AZANIÆ (Lat.), n. f. pl. $A^2z(a^3z)$-$a(a^3)'ni^2$-$e(a^3$-$e^2)$. Pine-buds. [Pliny (B, 114).]

AZANILINE, n. A^2z-$a^2n'i^2l$-en. See Azoaniline.

AZAOLA (Lat.), n. f. A^3-th^2a^3-$o'la^3$. From the name *Gonzalez y Azaola.* A genus of sapotaceous plants, allied to *Bassia*, made by Blanco; according to Bentham and Hooker, to be referred to *Bassia*, or perhaps to *Payena.* [B, 42, 121.]—**A. betis** [Blanco]. A small tree with hard wood, yellow bark, milky juice, and a fruit resembling a plum, growing in the Philippines. [B, 121.]

AZAPHIA (Lat.), n. f. $A^2z(a^3z)$-a^3-$fl(fe)'a^3$. See Asaphia.

AZAPHORA, n. See Æs *ustum.*

AZAR, n. See Adrop.

AZARA (Lat.), n. f. $A^2z(a^3z)$-$a(a^3)'ra^3$. Of Ruíz and Pavón, a genus of bixaceous plants of the series *Samydeæ* or the tribe *Flacourtieæ.* [B, 42, 121.]

AZARCON (Sp.), n. A^3-th^2a^3r-kon'. Red oxide of lead. [A, 447.]

AZAREÆ (Lat.), n. f. pl. $A^2z(a^3z)$-$a(a^3)'re^2$-$e(a^3$-$e^2)$. Fr., *azarées.* Ger., *Azareen.* Of Clos, a group of bixaceous plants, comprising *Azara* and three other genera having stipulate leaves and hermaphrodite flowers, often with a double perianth, with the stamens inflected in æstivation, the ovary with 3 to 6 parietal placentæ, containing many ovules, and surmounted by a simple or nearly simple style, and seeds with a crustaceous and reticulate testa. [B, 121.]

AZAREIRO, AZARÉRO, n's. The *Prunus lusitanica.* [B, 173.]

AZARET (Fr.), n. A^3-za^3-ra. The genus *Asarum.* [B, 173.]

AZARIA, n. A name given in Smyrna to a variety of coral. [B, 132.]

AZARIN, n. $A^2z'a^2r$-i^2n. An orange-colored paste of the composition $C_6H_2Cl_2(OH)-N=N-C_{18}H_6(OH)+NH_4.HSO_3$, used in dyeing cotton red. [B, 258.]

AZARINIT, n. A stone found in Cananore, India, formerly used as a remedy for fever, serpents' bites, etc. [B, 88.]

AZARNET, n. Ar. and Pers., *al-zernîkh*, from Gr., ἀρσενικός. An alchemical name for orpiment. [B, 50, 52.]

AZAROLE, n. $A^2z'a^2r$-ol. From Ar., *al-zaɔrûr.* Lat., *azarolus.* Fr., *azarole.* Ger., *Azarole* (1st def.), *Azarolbaum* (2d def.). It., *azzernola.* Sp., *azarolla, acerolo, acerole.* 1. The fruit of the *Cratægus azarolus.* 2. The tree itself. [B, 39.]

AZARUM, n. Turkish, *azaroum.* The wild nard (*Asarum europæum*). [A, 259; B.]—**Herba azari, Radix azari.** The herb and root of *Asarum europæum.* [B, 180.]

AZAUCHE (Fr.), n. A^3-zosh. The wild fig-tree. [B, 132.]

AZAVAR, n. An East Indian name for aloes. [B, 88, 121.]

AZAZAL (Sp.), n. A^3-th^2a^3-th^2a^3l'. See Ayotectli.

AZAZEGE, n. Ar., *al-zajáj.* An alchemical name for glass. [B, 52.]

AZCALXOCHITL, n. A Mexican name for the *Sprekelia formosissima.* [A, 447.]

AZCI, n. An alchemical name for ink. [B, 50.]

AZEB (Ar.), n. Hirsuties. [L, 83.]

AZEBOUCY (Fr.), n. A^3-ze^2b-u-se. A drug employed by the Chinese of Canton. [B, 132.]

AZEBUCHE (Sp.), n. A^3-th^2a-bu'cha. The wild olive (*Olea europæa*, var. *silvestris*). [B, 88.]

AZEC, n. An alchemical name for green ink. [Ruland, Johnson (A, 325).]

AZED, n. An Arabian name for an inferior variety of camphor (the camphor of commerce). [L, 97.]

AZEDARAC [Adanson], **AZEDARACH** [Tournefort], n's. The botanical genus *Melia.* [B, 170.]

AZEDARACHIÆ (Lat.), n. f. pl. A^{2}z(a^{3}z)-e^{2}d-a^3-ra^{2}k(ra^{3}ch^2)'-i^2-e(a^3-e^2). A family of plants made by Römer and Schultes. [B, 170.]

AZEDARINE, n. A^{2}z-e^{2}d'a^{3}r-en. Fr., *azédarine.* See AZADIRINE.

AZEDAS (Port.), n. A^3-za'da^{3}s. The *Rumex acetosa.* [B, 88.]

AZEDEGRIN, n. An alchemical name for lapis hæmatites. [Ruland, Johnson (A, 325).]

AZEDERA (Sp.), n. A^3-th^{2}a'da-ra^3. The *Rumex acetosa.* [B, 88.]

AZEDERAC, AZEDERACH [U. S. Ph.], n's. A^{2}z-e^{2}d'e^{2}r-a^{2}k. Ar., *azâd-dirakht,* from Pers., *âzâd,* free, and *dirakht,* a tree. Lat., *azederach.* Fr., *azéderach.* Ger., *Zedrach.* It., *azederac.* Sp., *acederaque.* 1. Of Medicus and others, a genus of plants (the *Melia* of Linnæus). 2. In the U. S. Ph., the bark of the root of *Melia azederach* [Linnæus]. It occurs in the form of curved fragments with a reddish-brown outer surface marked with longitudinal ridges, and a white or brownish striated inner surface. It has a bitter taste, and contains an amorphous resin and an alkaloid called *margosine.* [B, 5, 52, 273.]—**Azederach deleteria** [Mönch]. The *Melia azederach.* [B, 173.]—**Azederach fraxinifolia** [Mönch], **Azederach fructu polypyreno** [Burm.]. The *Azadirachta indica.* [B, 173, 216.]—**Cortex azederach.** Syn.: *cortex margosæ.* The bark of *Azadirachta indica.* [B, 270.]—**Decoctum corticis azederach.** Fr., *décoction d'azéderach.* A decoction made by boiling 4 oz. of a. bark in a litre of water; used as a stimulant and anthelminthic. [Batav. Ph., Niemann's ed., 1811 (B, 119).]

AZEDERACHA, AZEDERACHIA (Lat.), n's f. A^{2}z(a^{3}z)-e^{2}d-e^{2}r-a^{2}k(a^{3}ch^2)'a^3, -i^2-a^3. See AZEDERACH.—**Fructus azederachiæ.** The fruit of *Melia azederach.* [B, 180.]

AZEDINHA (Port.), n. A^3-za-den'ya^3. The *Oxalis acetosella.* [A, 259.]—**A. grama.** A Brazilian name for the *Oxalis violacea* of Velloz. ["Proc. of the Am. Pharm. Assoc.," xxxiii, p. 102 (B).]

AZEF, AZEFF, n's. See ALUMEN *scissum* and AZOB.

AZEG, AZEGI, n's. Ar., *al-zâj.* Alchemical names for vitriol. [B, 50, 52.]

AZELAIC ACID, n. A^{2}z-e^{2}l-a'i^{2}k. Fr., *acide azélaique* (ou *azélaïnique*). Ger., *Azelaïnsäure.* See ANCHOIC ACID.

AZELEM (Ar.), n. Avicenna's name for an African plant, probably the *Unona æthiopica,* a species now referred to the genus *Xylopia.* [B, 46, 88.]

AZELI, n. A sort of cereal in Congo, which produces colic in those who eat it for the first time; probably a species of *Sorghum.* [B, 88.]

AZELIC ACID, n. A^{2}z-e^{2}l'i^{2}k. Ger., *Azelsäure.* See AZELAIC ACID.

AZELIDÆ (Lat.), n. f. pl. A^{2}z(a^{3}z)-e^{2}l'i^{2}d-e(a^3-e^2). Fr., *azélides.* In entomology, a section of the *Myodariæ* having the genus *Azelia* for the type. [Robineau-Desvoidy (L. 180).]

AZELOALDEHYDIC ACID, n. A^{2}z''e^{2}l-o-a^{2}l-de-hid'i^{2}k. Fr., *acide azélo-aldéhydique.* Ger., *Azeloaldehydsäure.* An aldehyde acid, $C_9H_{16}O_3 = C_7H_{14}(CH.O)CO.OH$, derived from stearolic acid; an oily liquid. [B, 4.]

AZELOINIC ACID, n. A^{2}z-e^{2}l-o-i^{2}n'i^{2}k. Fr., *acide azéloïnique.* See AZELAIC ACID.

AZELSÄURE (Ger.), n. A^{3}tz-e^{2}l'zoi-re^2. See AZELAIC ACID.

AZEM, n. An alchemical name for "butyrum coctum." [B, 50.]

AZEMAFOR, AZEMALA, AZEMAPHOR, AZEMASOR, n's. See AZAMAR.

AZENSALI, n. An alchemical name for lichens found on rocks, used medicinally or as food; also a sort of black stone found along with gold. [B, 132; L, 94.]

AZEPHI, n. See ALUMEN *scissum* and AZOB.

AZERBE, n. From Ar., *al-çibar,* an acid fruit of some tree; or from Pers., *z'abr,* a wild nut. The wild nutmeg. [B, 52.]

AZERNEC, n. See ALFADIDAM.

AZEROE, n. See ASEROE.

AZÉROLE (Fr.), n. A^3-za-rol. See AZAROLE (1st def.).

AZÉROLIER (Fr.), n. A^3-za-ro-li^2-a. See AZAROLE (2d def.).

AZERYTHRIN, n. A^{2}z-e^{2}r'i^2-thri^{2}n. See AZOERYTHRIN.

AZEURE (Port.), **AZEVRE** (Port.), n's. A^3-zu^2'ra, -za'vra. Aloes, or aloes-juice. [B, 52, 88.]

AZHINGI-MARAN (Tamil), n. The *Alangium hexapetalum* (or *decapetalum*). ["Proc. of the Am. Pharm. Assoc.," xxvii, p. 237 (B).]

AZIDE, n. A^{2}z'i^{2}d(id). For deriv., see AZOTE. Fr., *azide.* Ger., *Azid.* A name given to compounds derived from the hydrazines by the substitution of an acid radicle for the hydrogen of the latter. They have the general formula $R'H = N - N = H_2$, $R'' = N - N = H_2$, $R'H = N - N = HR'$, $R''H = N - N = R''$, in which R' and R'' are respectively univalent and bivalent acid radicles. [B, 4.]

AZIER (Fr.), n. A^3'zi^2-a. A name given in French Guiana to various useful field-herbs. [B, 88.]—**A. à crapaud.** A species of *Commelina* growing in the streets of Cayenne, the mucilaginous decoction of which is used as a pectoral and demulcent. [B, 88.]—**A. à l'asthme.** The *Nonatelia officinalis* of Aublet. [B, 88.]—**A.-Macaque.** The *Melastoma racemosa.* [B, 121.]

AZIGN, n. A Madagascar name for the *Chrysopia fasciculata.* [B, 121.]

AZIGOS (Lat.), adj. A^{2}z(a^{3}z)'i^2-go^{2}s. See AZYGOS.

AZIMA (Lat.), n. f. A^{2}z(a^{3}z)'i^2-ma^3. Syn.: *Monetia* [L'Héritier]. A genus of salvadoraceous plants established by Lamarck, distinguished by its axillary spines and its flowers with free petals, free stamens alternate with the petals, and bilocular ovary containing 2 ovules in each loculus. [B, 42.]—**A. diacantha** [Lamarck]. A species referred by some to the *Canthium parviflorum,* but probably different from the latter and also from *A.* [B, 173, 214.]—**A. nova** [Blanco], **A. tetracantha** [Lamarck]. Syn.: *Monetia barlerioides* [L'Héritier]. A shrub with spreading branches and whitish flowers, growing in the East Indies. The juice and the powdered leaves are used in the treatment of cough, especially that of phthisis. [B, 173, 214.]

AZIMACEÆ (Lat.), n. f. pl. A^{2}z(a^{3}z)-i^{2}m-a(a^3)'se^2(ke^2)-e(a^3-e^2). Fr., *azimacées.* Wight and Gardner's name for the *Salvadoraceæ* of Bentham and Hooker. [B, 42, 121, 170.]

AZIMAR, n. See ÆS *ustum.*

AZIMEÆ (Lat.), n. f. pl. A^{2}z(a^{3}z)-i^{2}m'e^2-e(a^3-e^2). Fr., *azimées.* See AZIMACEÆ.

AZIMÈNE (Fr.), n. A^{3}z-i^2-me^{2}n. From a Madagascar name for red wood. According to Jussieu, a species of *Volkameria.* [Bory (B, 121).]

AZIMIDOBENZENE, n. A^{2}z-i^{2}m''i^{2}d-o-be^{2}n'-zen. See AZOIMIDOBENZENE.

AZINGANO, n. An Oriental name for the *Artedia.* [B, 121.]

AZIUS, n. An alchemical name for a stone bearing a saline efflorescence. [Ruland, Johnson (A, 325).]

AZOACETANILIDE, n. A^{2}z''o-a^{2}s e^{2}t-a^{2}n'i^{2}l-i^{2}d(id). A substance, $C_{16}H_{16}N_4O_4 = (C_2H_3O)HN.C_6H_4{-}N = N{-}C_6H_4.NH(C_2H_3O)$, prepared from intracetanilide by partial reduction. Paraazoacetanilide is known, and on further reduction furnishes parazoaniline. [W. G. Mixter, "Am. Chem. Jour.," v, p. 282; "Ber. d. dtsch. chem. Gesellsch.," 1883, p. 2927 (B); B, 3.]

AZOANILINE, n. A^{2}z''o-a^{2}n'i^{2}l-en. Fr., *azoaniline.* Ger., *Azoanilin.* Syn.: *azaniline, azyline, diamidoazobenzene.* A di-acid base, $C_{12}H_{12}N_4 = C_6H_4(NH_2) - \underbrace{N = N} - C_6H_4(NH_2)$. Paraazoaniline, $C_6[H,H,NH_2,H,H,N = NC_6(-,H_6),]$, is a dark-yellow substance, readily soluble in alcohol (from which it crystallizes in long, flat, golden-yellow, acicular crystals), soluble with difficulty in water; formed by the action of hydrochloric acid on paraazoacetanilide. It is the starting-point of the compounds known as azylines. [W. G. Mixter, "Ber. d. dtsch. chem. Gesellsch.," 1883, p. 2927, from "Am. Chem. Jour." (B); B, 3.]

AZOANISYL, n. A^{2}z''o-a^{2}n'i^{2}s-i^{2}l. Fr., *azoanisyle.* A supposititious radicle contained in the products obtained by treating anisylous acid with ammonia. [B.]—**A. hydride.** See ANISHYDRAMIDE.

AZOÄTHAN (Ger.), n. A^{3}tz-o-a-ta^{3}n'. See AZOETHANE.

AZOAZOBENZENERESORCINOL, n. A^{2}z'''o-a^{2}z-o-be^{2}n''-zen-re-so^{2}r'si^{2}n-o^{2}l. Ger., *Azoazobenzolresorcinol.* See *Benzenedisazobenzeneresorcinol,* under BENZENE.

AZOB, n. From Ar., *al-shabb,* or *al-shâb,* alum. An alchemical name for alum. [B, 52.]

AZOBENZENE, n. A^{2}z-o-be^{2}n'zen. Fr., *azobenzine.* Ger., *Azobenzol.* It., *Azobenzina.* A compound of benzene and nitrogen, $C_{12}H_{10}N_2 = C_6H_5 - N = N - C_6H_5$, formed by the action of nascent hydrogen on azoxybenzene; yellowish-red laminar or tabular crystals, insoluble in water, readily soluble in alcohol and in ether. [B, 2, 4.]—**A'acetoacetic acid.** Fr., *acide azobenzine-acétoacétique.* Ger., *Azobenzolessigsäure.* A monobasic acid, $C_{16}H_{16}N_2O_3 = CH_3 - CO - CH(N = N.C_6H_5) - CO.OH$, forming small golden laminar crystals. [B, 3.]—**A'dimethyl ketone.** Fr., *acétone* (ou *kétone*) *azobenzine-diméthylique.* Ger., *Azobenzoldimethylketon.* An azo-compound of benzene and dimethyl ketone. $C_9H_{16}N_2O = C_6H_5 - N = N - CH_2.CO.CH_3$, forming shining yellowish prismatic or yellow acicular crystals of a peculiar odor. [B, 3.]—**A'disulphonic acid.** Fr., *acide azobenzine-disulfonique.* Ger., *Azobenzoldisulfonsäure.* A dibasic acid, $C_{12}H_{10}N_2S_2O_6 = C_6H_4(SO_2.OH) - N = N - C_6H_4(SO_2.OH)$. Two isomeric acids of this formula, *α* a'd. acid and *β* a'd. acid, are formed by heating a. with fuming sulphuric acid. The former, united with 1 molecule of water of crystallization, forms red deliquescent acicular crystals; the latter forms a syrup. Metaa'd. acid, another isomeric form, united with 3 molecules of water of crystallization, forms yellowish deliquescent prismatic crystals. Paraa'd. acid, formed by the oxidation of sulphanilic acid, is another isomer. [B, 3.]—**A'metaphenylenediamine.** Fr., *azobenzine-métaphénylène-diamine.* Ger., *Azobenzolmetaphenylendiamin.* Chrysoidine, diamidoazobenzene. ["Ber. d. dtsch. chem. Gesellsch.," 1883, p. 2028 (B).]—**A'nitrolic acid.** Fr., *acide azobenzine-nitrolique.* Ger., *Azobenzolnitrolsäure.* An acid, $C_{12}H_{10}N_3O$, occurring as a yellow, flocculent precipitate, or, when deposited from alcohol, as brownish-red, acicular crystals. According to Janovsky and Erb, it has the composition

$$2(C_{12}H_{10}N_3O) = \begin{array}{l} C_6H_5.N = N.C_6H_4.N(OH) \\ \quad\quad\quad\quad\quad\quad\quad\; | \\ C_6H_5.N = N.C_6H_4.N(OH) \end{array}.$$

[B, 3.]—**A'sulphonamide.** Fr., *azobenzine-sulfonamine.* Ger., *Azobenzolsulfonamid.* A powder of the composition $C_{12}H_{11}N_3SO_2$, being that of an amide of a'sulphonic acid. [B, 3.]—**A'sulphonic acid.** Fr., *acide azobenzine-sulfonique.* Ger., *Azobenzolsulfonsäure.* A monobasic acid, $C_{12}H_{10}N_2SO_3 + 3H_2O = C_6H_4(SO_2.OH) - N = N - C_6H_5 + 3H_2O$, obtained by the action of fuming sulphuric acid on a.; large, dark orange-red, laminar crystals. [B, 3.]—**A'sulphonic chloride.** Fr., *chlorure azobenzine-sulfonique.* Ger., *Azobenzolsulfochlorür.* A substance, $C_{12}H_9N_2.SO_2Cl = C_6H_4(SO_2Cl) - N = N - C_6H_5$, forming orange-yellow masses insoluble in water. [B, 3.]

AZOBENZIDE, AZOBENZIDINE, n's. A^{2}z-o-be^{2}n'zi^{2}d-(zid), -zi^{2}d-en. Fr., *azobenzide, azobenzidine.* Ger., *Azobenzid, Azobenzidin.* See AZOBENZENE.

AZOBENZINE (Fr.), n. A^3-zo-ba^{3}n^2-zen. See AZOBENZENE.

AZOBENZOATE, n. A^{2}z-o-be^{2}n'zo-at. A salt of azobenzoic acid. [A, 385.]

AZOBENZOIC ACID, n. A²z-o-be²n-zo'i²k. Fr., *acide azobenzoïque.* Ger., *Azobenzoësäure.* A dibasic acid, $C_{14}H_{10}N_2O_4 = C_6H_4(CO.OH) - N = N - C_6H_4(CO.OH)$, formed by the reduction of azoxybenzoic acid. Three isomeric varieties, *orthoa' a.*, *metaa' a.*, and *paraa' a.*, are known, corresponding to the three varieties of azoxybenzoic acid. [B, 4.]

AZOBENZOIDE, n. A²z-o-be²n'zo-i²d(id). Fr., *azobenzoïde.* A substance having perhaps the composition $C_{43}N_6H_{37}$, obtained by the action of ammonia on bitter-almond oil; an amorphous white powder or crystalline granules, insoluble in ether. [B, 140.]

AZOBENZOIDINE, n. A²z-o-be²n-zo'i²d-en. Fr., *azobenzoïdine.* A crystalline substance, perhaps $C_{43}H_6N_{37}$, isomeric with azobenzoide and, like the latter, obtained by the action of ammonia on bitter-almond oil; 6-sided tabular crystals sparingly soluble in ether. [B, 140.]

AZOBENZOÏLE (Fr.), n. A³z-o-ba³n²-zo-el. See AZOBENZOYL.

AZOBENZOÏLIDE (Fr.), n. A³z-o-ba³n²-zo-i²l-ed. Syn.: *azoture d'ozostilbase.* Laurent's name for a micro-crystalline white substance, $C_{42}N_6H_{33}$, obtained by the action of potash and iron chloride on bitter-almond oil; according to Laurent, isomeric with azobenzoide and azobenzoidine. [B, 140.]

AZOBENZOÏLINE (Fr.), n. A³z-o-ba³n²-zo-i²l-en. A suppositious radicle contained in the products obtained by the action of ammonia on benzoic aldehyde. [B.]—**Hydrure d'a.** See AMARINE.

AZOBENZOL, n. A²z-o-be²n'zo²l. See AZOBENZENE.

AZOBENZOYL, n. A²z-o-be²n'zo-i²l. Fr., *azobenzoyle.* Ger., *Azobenzoyl.* A crystalline substance, $C_{21}H_{16}N_2$, produced by the action of ammonia on crude bitter-almond oil. [B, 2.]—**A. carbinol.** A term expressing, according to Kolbe, the structural formula of isatin, $C_8H_6NO_2 = CO.C_6H_4.N.C(OH).$ [B, 225.]—**A. hydride.** See HYDROBENZAMIDE.—**A. hydrosulphate, A. sulphydrate.** Fr., *hydrosulfure d'azobenzoyle.* Syn.: *azosulphopicramyl.* Laurent's name for a crystalline substance to which he assigned the formula $C_{21}H_{18}N_2S1\frac{1}{2}$, formed after a long time in a mixture of equal volumes of crude bitter-almond oil, ammonia, and ammonium sulphide. [B, 2.]

AZOBENZOYLIDE, n. A²z-o-be²n'zo-i²l-i²d(id). Fr., *azobenzoylide, azobenzoïlide.* A crystalline substance isomeric with azobenzoyl, and likewise obtained by the action of ammonia on bitter-almond oil. [B, 93.]

AZOBENZYL, n. A²z-o-be²n'zi²l. Written also *azobenzil* and *azobenzile.* Fr., *azobenzyle.* Ger., *Azobenzyl.* Syn.: *benzilam* [Japp]. A substance, $C_{21}H_{30}NO$, forming white, iridescent acicular or laminar crystals, obtained by the action of ammonia on an alcoholic solution of benzyl. [Zinin (B, 140).] Japp gives the constitution as $\begin{array}{l}C_6H_5 - C - O \\ \quad\;\; \Vert \\ C_6H_5 - C - N\end{array}\!\!>\!C - C_6H_5.$ ["Ber. d. dtsch. chem. Gesellsch.," 1883, p. 2636 (B).]—**A. carbinol.** Ger., *Azobenzylcarbinol.* A term expressing, according to Kolbe, the structural formula of oxindol, $C_8H_7NO_2 = CH_2.C_6H_4.N.C(OH).$ [B, 225.]—**A'methane.** Fr., *a.-méthane.* Ger., *A'methan.* A term expressing, according to Kolbe, the composition of indol, $C_8H_7N = CH_2.C_6H_4.N.CH.$ [B, 225.]

AZO-BLUE, n. A²z''o-blu²'. Ger., *Azoblau.* A dark-blue powder, $KO_3S - (OH)C_{10}H_6 - N = N - C_7H_6 - C_6H_7 - N = N - C_{10}H_6(OH) - SO_3K$, formed by the action of tetrazoditolyl chloride on potassium β-naphtholsulphonate; readily soluble in water and used in dyeing cotton. [B, 258.]

AZO-BODIES, n. pl. A²z'o-bo²d''i²z. See AZO-COMPOUNDS.

AZOCARBIC, adj. A²z-o-ka³rb'i²k. Fr., *azocarbique.* See CYANIC.

AZOCARBIDE, n. A²z-o-ka³rb'i²d(id). See CYANIDE.—**A. hydrique** (Fr.). Hydrocyanic acid. [A, 385.]

AZOCARBONIC ACID, n. A²z-o-ka³rb-o²n'i²k. Fr., *acide azocarbonique.* Ger., *Azocarbonsäure.* See PICRIC ACID.

AZOCARBONYL, n. A²z-o-ka³rb'o²n-i²l. Fr., *azocarbonyle.* A radicle composed of carbon and nitrogen, found in the cyanogen compounds. [B, 107.]

AZOCARBURE (Fr.), n. A³z-o-ka³rb-u⁶r. A cyanide. [Guibourt (B, 107).] Cf. AZOCARBIDE.

AZOCH, n. From Ar., *zawaq, zâûk, zîbaq* (Pers., *zhiwah, zhîwah*), mercury. An alchemical name for quicksilver. [B, 50.] See also AZOTH.

AZOCK, n. See AZOTH.

AZOCODEINE, n. A²z''o-ko-de'en. Fr., *azocodéine.* Ger., *Azocodeïn.* An artificial alkaloid formed by the action of ammonium sulphide on nitrocodeine. [B, 2.]

AZO-COLORS, n. pl. A²z'o-ku³l''o²rz. See AZO-DYES.

AZO-COMPOUNDS, n. pl. A²z'o-ko²m''pu⁶-undz. Fr., *corps* (ou *composés*) *azoïques.* Ger., *Azoverbindungen.* Compounds consisting of two organic molecules (one and often both being aromatic derivatives) united by a double atom of nitrogen; having therefore the general formula $R' - N = N - R''$, in which R' and R'' are simple or complex univalent radicles. These compounds are often called *diazo-compounds*, because they contain two atoms of nitrogen, but this term is frequently restricted to a.-c's in which one of the connected radicles, such as R'', is wanting or has its place supplied by an element or an inorganic acid radicle. [B, 3, 4.] Cf. AZOBENZENE and DIAZOBENZENE, and see also DIAZOAZO-COMPOUNDS.

AZOCONYDRINE, n. A²z-o-ko²n-i'dren. Fr., *azoconhydrine.* Ger., *Azoconydrin.* Syn.: *nitrosoconiine.* A yellowish oily liquid, $C_8H_{16}N_2O = C_8H_{16}(NO)N$, of an aromatic odor, formed by the action of nitrous anhydride and water on coniine. [B, 4, 257.]

AZODIBENZENEPHENYLENEDIAMINE, n. A²z''o-di-be²n'''zen-fe²n''''i²l-en-di'a²m-en. Fr., *azodibenzine-phénylène-diamine.* Ger., *Azodibenzolphenylendiamin.* A diacid base, $C_{18}H_{16}N_6 = C_6H_5 - N = N - C_6H_4 - N = N - C_6H_3(NH_2)_2$, isomeric with diamidodisazobenzene, belonging to the diazoazo-compounds. It forms brownish-red acicular crystals. [B, 3.]

AZODIFUNE, n. A²z''o-di-fu²n'. See AZOBENZENE.

AZODINAPHTHYLAMINE, n. A²z''o-di-na²p(na²f)-thi²l'-a²m-en. Fr., *azodinaphthylamine.* Ger., *Azodinaphthylamin.* A base having the constitution $C_{30}H_{21}N_3 = C_{10}H_6\!<\!\begin{array}{l}N.C_{10}H_7 \\ \vert \\ N.N(C_{10}H_7)H\end{array}.$ [B, 4.]—**A. hydrochloride.** Fr., *chlorhydrate d'a.* Ger., *Azodinaphthylaminhydrochlorid, salzsaures Azodinaphthylamin.* Magdala red, naphthaline red; a substance, $C_{30}H_{21}N_3.HCl + H_2O$, forming greenish acicular crystals of a metallic lustre, forming with alcohol a solution that is rose-red by transmitted light and of an opaque flame-color by reflected light. Used in dyeing silk fabrics. [B, 257.]

AZODINAPHTHYLDIAMINE, n. A²z''o-di-na²p(na²f)'''-thi²l-di'a²m-en. Fr., *azodinaphthyl-diamine.* Ger., *Azodinaphthyldiamin.* A substance, $(C_{10}H_7)_2NH.N_2$, formed by the action of potassium hydrate or nitrite, or of nitrous acid, on naphthylamine. ["Ber. d. dtsch. chem. Gesellsch.," 1869, p. 412 (B).]

AZODIPHENYL, n. A²z-o-di-fe²n'i²l. 1. See AZOBENZENE. 2. A substance, $C_{24}H_{18}N_2 = \begin{array}{l}C_6H_4 - N(C_6H_5) \\ \vert \qquad\quad \Vert \\ C_6H_4 - N(C_6H_5)\end{array}$, prepared by oxidizing hydrazodiphenyl; orange-red laminar crystals. [J. Zimmermann, "Ber. d. dtsch. chem. Gesellsch.," 1880, p. 1960 (B).]—**A. blue.** Ger., *A'blau.* One of the induline bases, $C_{18}H_{15}N_3$, formed by heating amidoazobenzene with aniline hydrochloride. Its hydrochloride is a deep-blue powder, soluble in alcohol, insoluble in water. [B, 3, 257.]—**A'diamine.** Fr., *azodiphényl-diamine.* Ger., *A'diamin.* Diphenyldiamine (a double molecule of phenylamine) in which nitrogen replaces 3 atoms of hydrogen, $N_2H(N)(C_6H_5)_2$; a name formerly given to diazoamidobenzene (*q. v.*). [B, 4.]

AZO-DYES, n. pl. A²z'o-diz. Fr., *azo-couleurs.* Ger., *Azofarbstoffe.* A general name for those of the azo-compounds that have tinctorial properties. Only those that contain simple or substituted amidogen or hydroxyl molecules are used as dyes. They include the classes of coloring matters known as chrysoidines, chrysoins, and tropæolins. [B, 3.]

AZOERYTHRIN, n. A²z-o-e²r'i²th-ri²n. For deriv., see AZOTE and ERYTHRIN. Fr., *azoérythrine.* Ger., *Azoërythrin.* A dark-red powder obtained by Kane by boiling with potash-lye that part of archill which is insoluble in alcohol and in boiling water. The formula $C_{11}NH_{16}O_{11}$ has been assigned to it, but it is very doubtful whether it is a true chemical compound or a mixture. [B, 140, 257.]

AZOETHANE, n. A²z''o-e²th-an'. Fr., *azo-éthane.* Ger., *Azoäthan.* A name sometimes given to methyl cyanide (acetonitrile) because it may be regarded as ethane in which an atom of nitrogen replaces 3 atoms of hydrogen: $H_3C - C \equiv N.$ [B.]

AZOFARBSTOFFE (Ger.), n. pl. A³tz'o-fa³rb-sto³f-fe². See AZO-DYES.

AZOGUE (Sp.), n. A³-th²o'gwa. Mercury. [B, 88.]

AZOHAR HEMBRA, AZOHAR MACHO, n's. Peruvian names for a variety of the *Cascarilla riveroana* [Weddell]. [B, 121.]

AZOHUMIC ACID, n. A²z-o-hu²'mi²k. For deriv., see AZOTE and HUMUS. A name given to several acids supposed by P. Thenard to be formed spontaneously in the soil by a combination of humic acid, atmospheric nitrogen and ammonia, and silica. [A. A. Julien, "Proc. of the Am. Assoc. for the Adv. of Sci.," xxviii, 1879, p. 311 (B).]

AZOHYDROXYBENZENE, n. A²z''o-hi-dro²x-i²-be²n'zen. Fr., *azohydroxybenzine.* Ger., *Azohydroxybenzol.* See AZOXYBENZENE.

AZOIC, adj. A²z-o'i²k. Lat., *azoicus* (from α priv., and ζωή, life). Fr., *azoïque.* 1. Destitute of organic life. [L, 120.] 2. Pertaining to nitrogen (azote). [A, 385.] See AZOTIC.

AZOIMIDOBENZENE, n. A²z-o-i²m''i²d-o-be²n'zen. Fr., *azoimido-benzine.* Ger., *Azoïmidobenzol.* A substance of the composition $C_6H_5N_3 = C_6H_4\!<\!\begin{array}{c}N \\ \vert \\ N\end{array}\!\!>\!NH$, isomeric with diazobenzene-imide. [P. Griess, "Ber. d. dtsch. chem. Gesellsch.," 1882, p. 2183 (B); B. 3.]

AZOINDOL, n. A²z-o-i²n'do²l. A red coloring matter produced by the action of acids and alkalies on hydrazoindol and by the action of fuming nitric acid on indol; probably nitrosoindol nitrate, $C_{16}H_{13}(NO)N_2NO_3H.$ [Nencki, "Ber. d. dtsch. chem. Gesellsch.," vii, 1875, p. 1517 (B).]

AZOÏQUES (Fr.), n. pl. A³-zo-ek. See AZO-COMPOUNDS.

AZOKERNE (Ger.), n. pl. A³tz'o-ke²rn-e². See AZO-NUCLEI.

AZOLEIC ACID, n. A²z-o-le'i²k. From *azote* (*q. v.*), and *oleum*, oil. Fr., *acide azoléinique.* Ger., *Azoleïnsäure.* Œnanthylic acid, so called because prepared by the action of nitric acid on castor-oil. [B, 140.]

AZOLÉINIQUE (Fr.), adj. A³z-o-la-i²n-ek. See AZOLEIC ACID.

AZOLITMIN, n. A²z-o-li²t'mi²n. Fr., *azolitmine.* Ger., *Azolitmin.* A brownish-red coloring matter, $C_7H_7NO_4$, extracted from litmus; supposed by some to be the same as orcein, but probably not a distinct chemical principle. [B, 2, 5, 257.]

AZOLLA (Lat.), n. f. A²z(a²z)-o²l'la³. 1. Of Lamarck, a genus of cryptogamous aquatic plants at first considered as allied to the ferns, but now placed among the *Rhizocarpeæ.* 2. Of Endlicher, the genus *Azorella.* [B, 121, 170.]—**A. caroliniana** [Willdenow]. An American species. [B, 121.]

AZOLLEÆ (Lat.), n. f. pl. A2z(a3z)-o2l'le2-e(a3-e2). Fr., *azollées.* Of Payer, a family or order of *Filicinæ;* of Reichenbach, a division of the *Salviniaceæ*, including the single genus AZOLLA. [B, 121, 170.]

AZOLLINEÆ (Lat.), n. f. pl. A2z(a3z)-o2l-li2n'e2-e(a3-e2). Fr., *azollinées.* See AZOLLEÆ.

AZOM, n. See AZEM.

AZOMARATE, n. A2z-o2m'a3r-at. A salt of azomaric acid. [B.]

AZOMARIC ACID, n. A2z-o-ma2r'i2k. Fr., *acide azomarique.* Ger., *Azomarsäure.* An amorphous substance, $O_{20}H_9O_4.NO_4+2HO$, obtained by treating pimaric acid with nitric acid. [A, 385; B, 7, 93.]

AZOMETHANE, n. A2z-o-me2th-an'. Fr., *azométhane.* Ger., *Azomethan.* A name given to hydrocyanic acid, because it may be regarded as methane in which 3 atoms of hydrogen are replaced by 1 atom of nitrogen: $H-C\equiv N$. [B, 158.]

AZONAPHTHYLAMINE, n. A2z''o-na2p(na2f)-thi2l'a2m-en. Fr., *azonaphthylamine.* Deamidonaphthalene (naphthylenediamine). [B, 4, 38.]

AZONCARBONIC ACID, n. A2z''o2n-ka3r-bo2n'i2k. Fr., *acide azon-carbonique.* Ger., *Azoncarbonsäure.* Syn.: *trioxypicolinic-acid quinone.* A substance, $C_6H_3NO_4=$ $\underbrace{CH\equiv \overset{\frown O \frown}{C-C}=N-C(CO.OH)=C}(OH)$, formed by the action of nitric acid on oxycomenamic acid. [B, 79.]

AZONEC, n. An alchemical name for sal ammoniac. [B, 50.]

AZONOROUTS, n. A Madagascar tree of undetermined botanical characters. [B, 121.]

AZON-PASSECH, n. According to Flacourt, a Madagascar tree, probably a species of *Phœnix.* [Bory (B, 121).]

AZONUALALA, n. According to Flacourt, a red Madagascar fruit resembling the currant. [Bory (B, 121).]

AZO-NUCLEI (Lat.), n. m. A2z(a3z)''o(o2)-nu2(nu)'kle2-i(e). For deriv., see AZOTE and NUCLEUS. Ger., *Azokerne.* Hydrocarbon nuclei in which nitrogen replaces hydrogen (*e. g.*, in cyanogen, $C\equiv N$, regarded as methyl in which N replaces H_3). [B, 140.]

AZOODYNAMIA (Lat.), n. f. A2z(a3z)-o-o(o2)-di2n(du6n)-a2m-(a3m)'i2-a3. From α priv., ζωή, life, and δύναμις, power. Fr., *azoodynamie.* Ger., *Mangel an Lebensthätigkeit.* Absence or deficiency of vital power. [K; L, 41.]

AZOODYNAMICUS (Lat.), adj. A2z(a3z)-o-o(o2)-di2n(du6n)-a2m(a3m)'i2k-u3s(u4s). Fr., *azoodynamique, azoodyname.* Pertaining to, caused by, or affected with, azoodynamia. [A, 322; L, 41.]

AZOOGENIA (Lat.), n. f. A2z(a3z)-o-o(o2)-je(ge2)'ni2-a3. From α priv., ζωή, life, and γεννᾶν, to produce. Fr., *azoogénie.* Ger., *Azoogenie.* 1. The generation of an organism of defective vitality. 2. The regeneration of such an organism. [A, 322.]

AZOOGENICUS (Lat.), adj. A2z(a3z)-o-o(o2)-je2n(ge2n)'i2k-u3s-(u4s). Pertaining to azoogenia. [A, 322.]

AZOOGENY, n. A2z-o-o2j'e2n-i2. See AZOOGENIA.

AZOOGONIA (Lat.), n. f. A2z(a3z)-o-o(o2)-go(go2)'ni2-a3. See AZOOGENIA.

AZOOGONICUS (Lat.), adj. A2z(a3z)-o-o(o2)-go2n'i2k-u3s(u4s). See AZOOGENICUS.

AZOOLOGY, n. A2z-o-o2l'o-ji2. From α priv., ζωή, life, and λόγος, understanding. The science of inanimate objects. [B, 39.]

AZOOSPERMATISM, n. A2z-o-o-spu5rm'a2t-i2zm. From α priv., ζωή, life, and σπέρμα, a seed. Sterility in the male; a condition in which, although the power of copulation may exist, spermatozooids are either absent from the semen or wanting in functional activity. [B; D, 18; K.]

AZOOSPERMIA (Lat.), n. f. A2z(a3z)-o-o(o2)-spu5rm(spe2rm)'-i2a3. Fr., *azoospermie.* Ger., *Azoospermie.* See AZOOSPERMATISM.

AZOOSPERMISM, n. A2z-o-o-spu5rm'i2zm. See AZOOSPERMATISM.

AZOOSPOREUS (Lat.), adj. A2z(a3z)-o-o(o2)-spo(spo2)'re2-u3s-(u4s). From α priv., ζωή, life, and σπόρος, a seed. Not producing zoospores. [B, 236.] See MONADINEÆ *azoosporeæ.*

AZOOXYBENZENE, n. A2z''o-o2x-i2-be2n'zen. See AZOXYBENZENE.

AZOOXYBENZYL, n. A2z''o-o2x-i2-be2n'zi2l. See AZOXYBENZYL.

AZOPARAFFINS, n. pl. A2z''o-pa2r'a3f-fi2nz. A name given to the nitriles, because they may be regarded as paraffins in which an atom of nitrogen replaces 3 atoms of hydrogen. [B.] See AZOETHANE, AZOMETHANE, and AZOPROPANE.

AZOPH, n. An old name for mercury. [B, 84.] Cf. AZOCH and AZOTH.

AZOPHENINE, n. A2z-o2f'e2n-en. Fr., *azophénine.* Ger., *Azophenin.* A monacid base, $C_{36}H_{29}N_6$, related to the indulin group of substances, produced by the decomposition of diphenylnitrosamine and in other ways, described by Kimich, Witt, and Thomas. It forms reddish laminar crystals. ["Ber. d. dtsch. chem. Gesellsch.," 1883, p. 1102 (B); B, 3.] See also INDULIN.

AZOPHENYLAMINE, n. A2z''o-fe2n-i2l'a2m-en. Fr., *azophénylamine.* Ger., *Azophenylamin.* A generic name for the products obtained by the action of nitrous acid on aniline. [B, 93.]

AZOPHENYLÄTHYL (Ger.), n. A3tz-o-fa-nu6l'a-tu6l. See AZOPHENYLETHYL.

AZOPHENYLENE, n. A2z-o-fe2n'i2l-en. Fr., *azophénylène.* Ger., *Azophenylen.* A substance, $C_{12}H_8N_2=C_6H_4\langle{N \atop N}\rangle C_6H_4$, obtained by the distillation of calcium azobenzoate with calcium hydrate. It forms bright-yellow, shining acicular crystals, soluble with great difficulty in water, and sparingly soluble in alcohol and in ether. [A. Claus, "Ann. d. Chem. u. Pharm.," clxviii, 1873, p. 1 (B).]

AZOPHENYLETHYL, n. A2z-o-fe2n-i2l-e2th'i2l. Fr., *azophényl-éthyle.* Ger., *Azophenyläthyl.* A yellow, oily liquid, $C_8H_{10}N_2=C_6H_5-N\equiv N-C_2H_6$, of a penetrating odor, formed by the oxidation of ethylphenylhydrazine. [B, 3.]

AZOPHENYLNITROETHYL, n. A2z-o-fe2n-i2l-ni-tro-e2th'-i2l. Fr., *azophényl-nitroéthyle.* Ger., *Azophenylnitroäthyl.* A substance, $C_8H_9N_3O_2=C_6H_5-N\equiv N-C_2(NO_2)H_4$, forming small, rectangular laminar crystals. It acts as a dibasic acid, forming salts with the metals. [B, 3.]

AZOPHENYLNITROPROPYL, n. A2z-o-fe2n-i2l-ni-tro-pro'-pi2l. Fr., *azophényl-nitropropyle.* Ger., *Azophenylnitropropyl.* A substance, $C_9H_{11}N_3O_2=C_6H_6-N\equiv N-C_3H_6(NO_2)$. Two isomeric forms, *azophenylnitronormalpropyl*, $C_6H_5-N\equiv N-CH(NO_2)-CH_2-CH_3$, occurring as dark-orange acicular crystals, and *azophenylnitroisopropyl*, $C_6H_6-N\equiv N-C(NO_2)\equiv(CH_3)_2$, occurring as a golden-colored oily liquid, are known. [B, 3.]

AZOPHORA (Lat.), n. f. A2z(a3z)-o2f'o(o2)-ra3. The botanical genus *Rhizophora.* [B, 132.]

AZOPHOSPHAMIC ACID, n. A2z-o-fo2s-fa2m'i2k. Fr., *acide azophosphamique.* Ger., *Azophosphaminsäure.* See PYROPHOSPHAMIC ACID.

AZOPHOSPHATES, n. pl. A2z-o-fo2s'fatz. A class of salts of the general composition $R'''P_2NO_4$, which may be regarded as salts of azophosphoric acid. [B, 140.]

AZOPHOSPHORÉ (Fr.), adj. A3z-o-fo2s-fo-ra. Containing both nitrogen and phosphorus. [B, 38.]

AZOPHOSPHORIC ACID, n. A2z-o-fo2s-fo2r'i2k. A tribasic acid, $H_3P_2NO_4$, regarded by Gladstone as phosphoric acid conjugated with a molecule of the group (PN). [B; L, 73.]

AZOPHTHALIC ACID, n. A2z-o2p(o2f)-tha2l'i2k. Fr., *acide azophthalique.* Ger., *Azophthalsäure.* A tetrabasic acid, $C_{16}H_{10}N_2O_8=C_6H_3(CO.OH)_2-N\equiv N-C_6H_3(CO.OH)_2$, obtained by the action of sodium amalgam on nitrophthalic acid. [A, Claus, O. May, "Ber. d. dtsch. chem. Gesellsch.," 1881, p. 1330 (B).]

AZOPROPANE, n. A2z-o-pro-pan'. Fr., *azopropane.* Ger., *Azopropan.* A name sometimes applied to ethyl cyanide, because it may be regarded as propane in which an atom of nitrogen replaces 3 atoms of hydrogen: $H_3C-CH_2-C\equiv N$. [B.]

AZORELLA (Lat.), n. f. A2z(a3z)-o-re2l'la3. Fr., *azorelle.* Syn.: *Chanitis* [Banks], *Fragosa* [Ruíz and Pavón], *Bolax* [Commerson]. A genus of umbelliferous plants of the tribe *Hydrocotyleæ*, established by Lamarck, yielding gum-resins; divided into the sections *Fragosa, Pozoa, Microsciadium*, and *Schizeilema.* [A, 385; B, 42, 121.]—**A. aretioides** [Willdenow]. A species referred by Hooker to the *A. cæspitosa* [Cavanilles], but by others considered a distinct species. [B, 214, 265.]—**A. cæspitosa.** 1. Of Cavanilles (Sp., *cordillera del planchon*), a perennial species growing on the summits of the Chilian Andes, said to furnish a gum similar to that of *A. glebaria.* 2. Of Vahl, see *A. glebaria.* [B, 173, 214.]—**A. crassifolia** [Persoon]. The *A. cæspitosa* of Cavanilles. [B, 214.]—**A. Gilliesii** [Hooker]. A species growing in the Cordilleras of Mendoza, having edible roots. [B, 46.]—**A. glebaria** [A. Gray]. Fr., *gommier de Magellan* (ou *des Malouines*). Syn.: *Hydrocotyle gummifera* [Lamarck], *Bolax gummifer* [Sprengel] (seu *glebaria* [Commerson]). A species growing about the Straits of Magellan. From a single root spring numerous leafy branches, which by lateral development form very large, rounded masses, so compact as to appear to be composed of a single piece. The interior of the mass is frequently made up of decaying débris, the primitive root having died and the peripheral living branches having sent down adventitious roots. It furnishes an aromatic, semi-transparent, reddish gum-resin, called bolax gum (Fr., *gomme de bolax*), used as a desiccative and in the treatment of chronic urethral discharges. [B, 93, 265.]—**A. gummifera** [Poiret]. The *A. cæspitosa* of Cavanilles. [B, 265.]—**A. madreporica.** Sp., *yareta, clareta de Coquimbo.* A species growing in the Chilian Andes, used to cure headache. [B, 46.]—**A. selago** [Hooker fil.]. A species growing in Tierra del Fuego and very abundantly in Kerguelen's Land, where it covers large areas of ground with brown masses. It resembles the *A. glebaria* in growing at the periphery and dying at the centre. B, 19, 265.]—**A. tricuspidata** [Lamarck, Gärtner], **A. trifurcata** [Gärtner]. Syn.: *Chamitis trifurcata* [Banks, Solander]. A Fuegian species, confounded by some with *A. glebaria*, but quite distinct from it. [B, 265.]

AZORELLEÆ (Lat.), n. f. pl. A2z(a3z)-o-re2l'le2-e(a3-e2). A subtribe of umbelliferous plants (*Tetragonospermæ*) made by Tausch, including *Azorella* and other genera. [B, 170.]

AZORES, n. pl. A'zorz. A group of islands in the Atlantic Ocean, off the coast of Morocco, recommended as a resort for consumptives. [L, 121.]

AZORESORCIN, n. A2z-o-re2z-o2r'si2n. Fr., *azorésorcine.* Ger., *Azoresorcin.* Syn.: *diazoresorcin* [Weselksky]. A substance, $C_{12}H_9NO_4=(OH)_2\equiv C_6A_3-N\langle{O \atop O}\rangle C_6H_4$, derived from resorcin, forming small, dark-red crystals of a greenish lustre like that of cantharides. [H. Brunner, C. Krämer, "Ber. d. dtsch. chem. Gesellsch.," 1884, p. 1847 (B); B, 3.]

AZORESORUFIN, n. A2z''o-re2z-o-ru2'fi2n. Syn.: *diazoresorufin* [Weselksky]. A substance, $C_{24}H_{16}N_2O_7=C_6H_4\langle{O \atop O}\rangle N-C_6(OH)H_3-O-H_3(OH)C_6-N\langle{O \atop O}\rangle C_6H_4$, formed by the action of sulphuric acid on azoresorcin; an amorphous reddish-brown pow-

O, no; **O2**, not; **O3**, whole; **Th**, thin; **Th2**, the; **U**, like oo in too; **U2**, blue; **U3**, lull; **U4**, full; **U5**, urn; **U6**, like ü (German).

der or, when deposited from a solution in hydrochloric acid, pomegranate-colored prismatic crystals. It produces with alkalies a cinnabar-red color, and is one of the most sensitive reagents to alkalies known. It is insoluble in water and in ether, soluble with difficulty in alcohol, and readily soluble in hydrochloric acid. [H. Brunner, C. Krämer, "Ber. d. dtsch. chem. Gesellsch.," 1884, p. 1847 (B); B, 3.]

AZOSALICYL, n. A^{2}z-o-sa^{2}l'i^2-si^{2}l. Fr., *azosalicyle.* A radicle, $C_2H_{16}N_2O_3$, contained in salicylimide. [B, 38.]—**A. hydride.** Fr., *hydrure d'azosalicyle.* Salicylimide, $C_{21}H_{18}N_2O_3$. [B, 38.]

AZOSALICYLIDE, n. A^{2}z-o-sa^{2}l-i^{2}s'i^{2}l-i^{2}d(id). Fr., *azosalicylure.* A compound of azosalicyl with a metal. [B, 38.]

AZOSULPHATE, n. A^{2}z-o-su^{3}lf'at. Fr., *azosulfate.* See NITROSULPHATE.

AZOSULPHOPICRAMYL, n. A^{2}z''o-su^{3}lf-o-pi^{2}k'ra^{2}m-i^{2}l. Fr., *azosulfopicramyle.* Ger., *Azosulfopicramyl.* See AZOBENZOYL *hydrosulphate.*

AZOSULPHURIC ACID, n. A^{2}z-o-su^{3}lf-u^2'ri^{2}k. Fr., *acide azosulfurique.* An acid obtained by the action of nitrogen dioxide on the alkaline sulphates. [A, 385.]

AZOT (Ger.), n. A^{3}tz-ot'. Nitrogen. [B.]—**A'gas.** Nitrogen. [B.]—**A'isch.** Nitric. [B.]—**A'säure.** Nitric acid. [B, 270.]

AZOTANE, n. A^{3}z-o-tan'. Ger., *Azotan.* Sir H. Davy's name for nitrogen chloride. [B, 7.]

AZOTANTHRACHYDROTICUM, AZOTANTHRACYDROTICUM (Lat.), n's n. A^{2}z(a^{3}z)-o-ta^{2}n(ta^{3}n)-thra^3-ki^{2}d(ch^{2}u^{6}d)-ro^{2}t'i^{2}k-u^{3}m(u^{4}m), -si^{2}d(ku^{6}d)-ro^{2}t'i^{2}k-u^{3}m(u^{4}m). See ANTHRACAZOTHYDROTICUM.

AZOTAS [Fr. Cod.] (Lat.), n. m. A^{2}z(a^{3}z)-o'ta^{2}s(ta^{3}s). Gen., *azota'tis.* A nitrate. [B.]—**A. argenticus.** Silver nitrate. [B, 81.]—**A. baryticus.** Barium nitrate. [B, 93.]—**A. ferricus.** Ferric nitrate. [B, 93.]—**A. hydrargyricus liquidus.** See *Liquor* HYDRARGYRI *nitratis.*—**A. hydrargyroso-ammonicus.** The soluble mercury of Hahnemann (*q. v.*, under MERCURY). [B, 93.]—**A. hydrargyrosus.** Mercurous nitrate. [B, 93.]—**A. magnesicus.** Magnesium nitrate. [B, 93.]—**A. plumbicus.** Plumbic nitrate; nitrate of lead. [B.]—**A. potassicus.** Potassium nitrate. [B, 93.]—**A. sodicus.** Sodium nitrate. [B, 5.]

AZOTATE, n. A^{2}z'o-tat. Lat., *azotas.* Fr., *azotate.* It., *azotato.* A nitrate. The word is used especially by the French. [B.]—**A. mercureux bibasique** (Fr.). Mercury subnitrate. [B.]—**A. mercureux cristallisé** [Fr. Cod.] (Fr.). Lat., *nitras hydrargyrosus.* Mercurous nitrate obtained in the form of hydrated crystals by the action of 2 parts of nitric acid diluted with 1 part of water on 2 parts of metallic mercury. [B, 113.]—**A. mercurique** (Fr.). Mercuric nitrate. [B.]—**A. mercurique liquide** [Fr. Cod.] (Fr.). Lat., *nitras hydrargyricus acido nitrico solutus.* Syn.: *nitrate acide de mercure.* See *Liquor* HYDRARGYRI *nitratis.*

AZOTATION (Fr.), n. A^3-zo-ta^3-si^2-o^{2}n^2. The assimilation of atmospheric nitrogen by plants and by animals deprived of albuminous foods. [Charbonnier (B, 107).]

AZOTE, n. A^{2}z'ot, a^{2}z-ot'. Lat., *azotum* (from α priv., and ζωή, life). Fr., *azote.* Ger., *Azot.* It., *azoto.* Nitrogen; so called because by itself it is irrespirable. [B.]

AZOTÉ (Fr.), adj. A^{3}z-o-ta. See AZOTIZED.

AZOTED, adj. A^{2}z'o-te^{2}d. See AZOTIZED.

AZOTÉNÈSES (Fr.), n. A^3-zo-ta-ne^{2}s. A generic name applied by Baumes to a class of diseases, including scurvy, gangrene, cancer, etc., attributed to a predominance of nitrogen in the tissues. [A, 301, 385.]

AZOTER (Fr.), v. tr. A^3-zo-ta. To mix with nitrogen, to cause to combine with nitrogen; to azotize. [B.]

AZOTEUX (Fr.), adj. A^3-zo-tu^6. Azotous. [B.] See NITROUS.

AZOTH, n. For deriv., see AZOCH. Lat., *azothum.* 1. An alchemical name for quicksilver. 2. Of Paracelsus, a panacea conjectured to be the philosopher's stone and supposed to contain within itself the essential virtues of all other medicines ("reliquias omnes medicinas in se concludit"), said to have been made of gold, silver, and mercury. [B, 38, 50.]

AZOTIC, adj. A^{2}z-o^{2}t'i^{2}k. Lat., *azoticus.* Fr., *azotique.* Ger., *azotisch.* It., *azotico.* Sp., *azótico.* See NITRIC.—**A. acid.** Lat., *acidum azoticum.* Fr., *acide azotique.* Ger., *Azotsäure.* It., *acido azotico.* Sp., *ácido azótico.* Nitric acid. [B.]—**A. air, A. gas.** Fr., *gaz azotique.* Ger., *Azotgas.* Nitrogen. [Hamilton (B, 39).]

AZOTIDE, n. A^{2}z'o-ti^{2}d(tid). Fr., *azotide, azoture.* Ger., *Azotür.* It., *azoturo.* 1. A nitride. [Guibout (B, 107).] 2. A name for the amides and amines. [B.] See AZOTÜR and AZOTURE.—**A. carbonique** (Fr.). Cyanogen. [B, 93.]

AZOTIFÈRE (Fr.), adj. A^3-zo-ti^2-fe^{2}r. Containing or carrying nitrogen (as in the expression *vaisseaux a's.*). [B, 132.]

AZOTINE, n. A^{2}z'o-ten. Fr., *azotine.* 1. A compound of nitrogen and another element. [B, 93.] 2. Wool obtained from a fabric made up of wool and cotton, by treating it with superheated vapor under a pressure of 5 atmospheres. The wool melts and, after drying, is soluble in water. It is used as a fertilizer. [B, 270.]

AZOTIODIQUE (Fr.), adj. A^3-zo-te-o-dek. See IODONITRIC.

AZOTIQUE (Fr.), adj. A^3-zo-tek. See NITRIC.

AZOTISATION (Fr.), n. A^3-zo-te-za^3-si^2-o^{2}n^2. The process of combining or causing to combine with nitrogen. [B, 38.]

AZOTISER (Fr.), v. tr. A^3-zo-te-za. To azotize. [B.]

AZOTITE, n. A^{2}z'o-tit. Fr., *azotite.* It., *azotito.* A nitrite. [B, 116.]

AZOTIZE, v. tr. A^{2}z'o-tiz. Fr., *azotiser.* To nitrogenize; to cause to combind with nitrogen. [B.]

AZOTIZED, adj. A^{2}z'o-tizd. Fr., *azoté.* It., *azotato.* Sp., *azoado.* Nitrogenized; combined with or containing nitrogen. [B.]

AZOTOÏDES (Fr.), n. pl. A^3-zo-to-ed. A name given to a class of chemical substances, comprising nitrogen, phosphorus, arsenic, and antimony, which, combined with hydrogen, act as bases and, combined with oxygen, as acids. [B, 132.]

AZOTOLUENE, n. A^{2}z-o-to^{2}l-u^2'en. Fr., *azotoluène.* Ger., *Azotoluol.* A substance, $C_{14}H_{14}N_2 = CH_3.C_6H_4 - N = N - C_6H_4.CH_3$, produced by the action of oxidizing agents on toluidine. [B, 2.]

AZOTOLUIDINE, n. A^{2}z-o-to^{2}l-u^2'i^{2}d-en. Fr., *azotoluidine.* Ger., *Azotoluidin.* Syn.: *diazotoluene.* A substance, $C_{14}H_{16}N_4 = C_7H_6(NH_2) - N = N - C_7H_6(NH_2)$, produced by the reduction of azoxytoluidine. [E. Buckney, "Ber. d. dtsch. chem. Gesellsch.," xi, 1878, p. 1451 (B).]

AZOTO-MERCURIQUE (Fr.), adj. A^3-zo-to-me^{2}r-ku^6-rek. Containing nitrogen and mercury. [B, 107.] See LIQUEUR *a.-m.*

AZOTOMETER, n. A^{2}z-o-to^{2}m'e^{2}t-u^{6}r. From α priv., ζωή, life (see AZOTE), and μέτρον, a measure. Fr., *azotomètre.* Ger., *Stickstoffmesser.* An apparatus invented by Knop for estimating the amount of nitrogen present in ammonium salts or in organic compounds that contain the ammonium residue NH_2. It consists of a closed vessel communicating with the interior of a graduated gasometric tube which is inverted over water. A measured portion of the substance to be examined is placed in the closed vessel, and is decomposed by agitating with a solution of an alkaline hydrobromite prepared by mixing bromine with an excess of caustic alkali. The nitrogen generated by this decomposition passes into the gasometric tube, where it is measured. [B, 270.]

AZOTOMETRY, n. A^{2}z-o-to^{2}m'e^{2}t-ri^2. Fr., *azotométrie.* Ger., *Azotometrie.* The process of determining the amount of nitrogen present in a body. [B.]

AZOTOSULPHURIC ACID, n. A^{2}z-o''to-su^{3}lf-u^2'ri^{2}k. Fr., *acide azotosulfurique.* See NITROSULPHONIC *anhydride* and NITROSULPHURIC ACID.

AZOTOUS, adj. A^{2}z'o-tu^{3}s. Lat., *azotosus.* Fr., *azoteux.* It., Sp., *azotoso.* See NITROGENOUS and NITROUS.—**A. acid.** See NITROUS *acid.*

AZOTOXYDE (Fr.), n. A^3-zo-to^{2}x-ed. A mineral containing nitrogen combined with oxygen. [B. 132.]

AZOTULMIC ACID, n. A^{2}z-o-tu^{3}l'mi^{2}k. Lat., *acidum azotulmicum.* Ger., *Azotulminsäure.* See AZULMIC ACID.

AZOTUM (Lat.), n. n. A^{2}z(a^{3}z)-o'tu^{3}m(tu^{4}m). Azote. [B.] See NITROGEN.

AZOTÜR (Ger.), **AZOTURE** (Fr.), n's. A^{3}tz-o-tu^{6}r', a^3-zo-tu^{6}r. 1. A nitride. 2. An amine or an amide, more especially a tertiary amine or amide. [Gerhardt (B, 38, 196).]—**Azotures bromo-conjugués, Azotures chloro-conjugués.** See under *Azoture conjugué.*—**Azoture conjugué.** An amine of an alcohol radicle, in which the hydrogen of the latter is replaced wholly or in part by another element or a radicle. The azotures conjugués are called *chloro-conjugués, bromo-conjugués, iodo-conjugués,* and *cyano-conjugués,* according as chlorine, bromine, iodine, or cyanogen is the replacing element. [B, 38.]—**Azotures cyano-conjugués.** See under *Azoture conjugué.*—**Azoture hydrique.** See AMMONIA.—**Azoture indéterminé.** An amide of indeterminate chemical character (applied to the alkaloids). [B, 38.]—**Azoture intermédiaire.** A compound intermediate between an amine and an amide; either an alkalamide or an amide formed from ammonia by the substitution of both an acid and a basic radicle for hydrogen. [B, 38.]—**Azotures iodo-conjugués.** See under *Azoture conjugué.*—**Azoture négatif.** An amide. [B, 38.]—**Azoture positif.** An amine. [B, 38.]—**Azoture primaire.** A primary amine or amide. [B, 38.]—**Azoture secondaire.** A secondary amine or amide. [B, 38.]—**Azoture tertiaire.** A tertiary amine or amide. [B, 38.]

AZOTURET, n. A^{2}z-o^{2}t'u^2-re^{2}t. A nitride. [B, 39.]

AZOTURETED, adj. A^{2}z-o^{2}t'u^2-re^{2}t-e^{2}d. Combined with nitrogen. [B, 98.] See *A.* HYDROGEN.

AZOTURIA (Lat.), n. f. A^{2}z(a^{3}z)-o-tu^2(tu)'ri^2-a^3. From α priv., ζωή, life (see AZOTE), and οὖρον, urine. Fr., *azoturie.* Ger., *Azoturie.* It., *azoturia.* A condition in which the urine contains an excess of nitrogenous constituents (urea and urates). [A, 385; B, 11.]

AZOUGUE (Port.), n. A^3-zo'u-ge^2. Mercury. [A, 259.]

AZOVALALA, n. A small red fruit of Madagascar, growing on a shrub resembling the gooseberry-bush. [B, 132.]

AZOVERBINDUNGEN (Ger.), n. pl. A^{3}tz'o-fe^{2}r-bi^{2}nd-ung-e^{2}n. See AZO-COMPOUNDS.

AZOXIMES, n. pl. A^{2}z-o^{2}x'emz. Bodies derived from the amidoximes and having the general constitution $R - C\langle {}^{N-O}_{N} \rangle C - R$, in which R is a univalent radicle. The a. are peculiar in that, while not necessarily very volatile by themselves, they volatilize very readily in the air or when dissolved in a volatile liquid. [F. Tiemann, "Ber. d. dtsch. chem. Gesellsch.," xviii, 1886, p. 1062 (B).]

AZOXYBENZENE, n. A^{2}z-o^{2}x-i^2-be^{2}n'zen. For deriv., see AZOTE, OXYGEN, and BENZENE. Fr., *azoxybenzine.* Ger., *Azoxybenzol.* A compound of benzene, nitrogen, and oxygen, obtained by the reduction of nitrobenzene; a substance, $C_{12}H_{10}N_2O = {}^{C_6H_5.N}_{C_6H_5.N} \rangle O$, forming yellow acicular crystals, readily soluble in alcohol and in ether. [B.]

AZOXYBENZIDE, n. A^{2}z-o^{2}x-i^2-be^{2}n'zi^{2}d(zid). See AZOXYBENZENE.

AZOXYBENZOIC ACID, n. A^{2}z-o^{2}x-i^2-be^{2}n-zo'i^{2}k. Fr., *acide azoxybenzoïque.* Ger., *Azoxybenzoësäure.* A dibasic acid,

$C_{14}H_{10}N_2O_5 = O\left\langle\begin{matrix} N - C_6H_4 - CO.OH \\ | \\ N - C_6H_4 - CO.OH \end{matrix}\right.$' formed by boiling an alcoholic solution of nitrobenzoic acid with caustic potash. Two isomeric compounds are known : *Orthoa'a.*, derived from orthonitrobenzoic acid, forming small, white, rhombic crystals ; and *metaa' a.*, derived from metanitrobenzoic acid. [B, 2, 4 ; P. Gries, "Ber. d. dtsch. chem. Gesellsch.," vii, 1874, p. 1609 (B).]

AZOXYBENZOL (Ger.), n. A3tz'o2x-u6-be2ntz-ol. See Azoxybenzene.

AZOXYBENZYDE, n. A2z-o2x-i2-be2n'zi2d(zid). See Azoxybenzene.

AZOXYBENZYLCARBINOL, n. A2z-o2x-i2-be2n''zi2l-ka3rb'-i2n-o2l. Fr., *azoxybenzyl-carbinol.* Ger., *Azoxybenzylcarbinol.* A name given to dioxindol, on the supposition that its structural formula is $CH(OH).(C_6H_4).N.C(OH) = \left\langle\begin{matrix} CH(OH)-C_6H_4. \\ | \qquad\qquad | \\ C \quad (OH)= N \end{matrix}\right.$ [B.]

AZOXYDIPHENYL, n. A2z-o2x-i2-di-fe2n'i2l. A substance, $C_{24}H_{18}N_2O = \begin{matrix} C_6H_4-(C_6H_5)N \\ | \\ C_6H_4-(C_6H_5)N \end{matrix}\!\!>\!O$, forming shining yellowish scales, insoluble in water and in alcohol. ["Ber. d. dtsch. chem. Gesellsch.," 1880, p. 1960 (B).]

AZOXYTOLUIDINE, n. A2z-o2x-i2-to2l-u2'i2d-en. Fr., *azoxytoluidine.* Ger., *Azoxytoluidin.* A substance, $C_{14}H_{16}N_4O = C_7H_6(NH_2)-N-N-C_7H_6(NH_2)$ (the two N joined through \O/), formed by the reduction of nitrotoluidine. [E. Buckney, "Ber. d. dtsch. chem. Gesellsch.," xi, 1878, p. 1451 (B).]

AZRAGAR, n. See Azagor.

AZUB, n. See Azob.

AZUBO, n. An old name for a sort of vessel used in chemistry. [B, 132.]

AZUC, n. An alchemical name for red coral. [Ruland, Johnson (A, 325).]

AZUCARITO (Sp.), n. A3-th2u-ka3r-e'to. The *Paullinia cururu*, the aril of which has a sweetish taste. [B, 38.]

AZUCENA (Sp.), n. A3-th2u-tha'na3. A general name for several liliaceous plants. [A, 361.]—**A. blanca.** The *Lilium candidum.* [B, 88.]—**A. de Santiago.** The *Amaryllis formosissima.* [A, 447.]

AZUCHE (Sp.), n. A3-th2u'cha. See Azebuche.

AZUFAIFA (Sp.), n. A3-th2u-fa3'e-fa3. The jujube, the fruit of the *Zizyphus sativus* [De Candolle]. [B ; L, 105.]

AZUFAIFO (Sp.), **AZUFEIFO** (Sp.), n's. A3-th2u-fa3'e-fo, -fa'e-fo. The jujube-tree (*Zizyphus sativus*). [B.]

AZUFRE (Sp.), n. A3-th2u'fra. Sulphur. [B.]—**A. vegetal.** The *Lycopodium clavatum.* [A, 447.]—**Higado de a.** Liver of sulphur, sulphurated potash. [B.]

AZULENE, n. A2z'u2-len. From Sp., *azul*, blue. Fr., *azulène.* Ger., *Azulen.* It., *azulene.* Sp., *azulena.* A name given by S. Piesse to a blue liquid occurring in various volatile oils, to which it imparts a bluish tinge ; identical with the cærulein of Gladstone. Its formula is uncertain. [B, 5 ; "Proc. of the Am. Pharm. Assoc.," xxviii, p. 483 (B).]

AZULINE, n. A2z'u2-len. Fr., *azuline.* Ger., *Azulin.* Sp., *azulina.* A name given to several blue aniline pigments, especially to aniline-blue (triphenylrosaniline) and to phenyl-blue, an intermediate product formed in the preparation of triphenylrosaniline from pararosolic acid. [B, 257.]

AZULMATE, n. A2z-u3l'mat. A salt of azulmic acid.

AZULMIC ACID, n. A2z-u3l'mi2k. Fr., *acide azulmique* (ou *azulminique*). Ger., *Azulminsäure, Azulmsäure.* A substance, $C_4H_5N_5O = C_4N_4.NH_3.H_2O$, deposited as a dark flocculent precipitate from solutions of cyanogen gas (dicyanogen) ; formed by the direct combination of cyanogen, ammonia, and water. [B, 4.]—**Braconnot's a. a.** A black, brittle mass, having a lustre of jet, obtained by exhausting decomposed horse-dung with water, and precipitating the aqueous solution with acids or alcohol. It is soluble in alkaline solutions. According to Pelouze and Richardson, it has the composition $C_4H_4N_4O_2$. ["Ann. chim.-pharm.," xxvi, 1838, p. 63 ; A. A. Julien, "Proc. of the Am. Assoc. for the Adv. of Sci.," xxviii, p. 311 (B).]

AZULMIN, n. A2z-u3l'mi2n. Fr., *azulmine.* Ger., *Azulmin.* See Azulmic acid.

AZULMINIC ACID, n. A2z-u3l-mi2n'i2k. See Azulmic acid.

AZULMSÄURE (Ger.), n. A3tz-ulm'zoi-re2. See Azulmic acid.

AZUMBAR (Sp.), n. A3-th2um'ba3r. Styrax. [A, 301.]

AZUR (Fr.), n. A3-zu6r. 1. A blue color. 2. The red coral of the alchemists. [B, 132.]—**A. à poudrer.** Smalt in coarse powder. [B, 132.]—**A. d'Allemagne.** A sort of blue pigment obtained by scraping the upper part of the stones which are found in silver-mines. [B, 132.]—**A. de cobalt.** Smalt ; glass colored with oxide of cobalt and powdered. [B, 132.]—**A. de cuivre.** Armenian stone, lapis lazuli, azurite ; a native blue carbonate of copper, used as a pigment. [B, 88, 132.]—**A. d'émail.** Smalt in very fine powder. [B, 132.]—**A. de premier** (ou **de second,** etc.) **feu.** Terms expressing the different grades of intensity of the color of smalt. [B, 132.]—**A. des bois.** 1. See *A. de cuivre.* 2. The *Agaricus cyaneus.* [B, 38, 121.]—**A. factice.** See *A. de cobalt.*—**Bleu d'a., Pierre d'a.** See *A. de cuivre.*

AZURET, n. A2z'u2-re2t. An old synonym of nitride. [B, 91.]

AZURIC, n. An alchemical name for a sort of red vitriol. [B, 132.]

AZURINE, n. A2z'u2-ren. Fr., *azurine.* Ger., *Azurin.* 1. A dark-blue pigment formed in the preparation of aniline-black. 2. A name given also to various blue aniline dyes, otherwise known as azuline (*q. v.*). [B, 2, 3, 49, 52.]

AZURITE, n. A2z'u2-rit. Fr., *azurite.* Ger., *Lazulit, Lazulith.* A native basic carbonate of copper. [B.] See Copper *carbonate.*

AZURIUM (Lat.), n. n. A2z(a3z)-u2(u)'ri2-u3m(u4m). An old name for a hard mass made by heating together 2 parts of mercury, ⅓ part of sulphur, and ¼ part of sal ammoniac until a bluish smoke rose, when it was to be taken from the fire, the vessel broken, and the mass powdered. [Albertus Magnus (A, 325 ; L, 84, 97).]

AZUROM, AZURUM, n's. See Azurium.

AZUZENA (Ar.), n. See Azucena.

AZUZENO, n. A Peruvian name for the *Cinchona grandiflora.* [B, 88.]

AZYGES (Lat.), adj. A2z(a3z)'i2(u6)-jez(gas). Gr., ἀζυγής. See Azygos ; as a n. (Gr., ἀζυγές), an old name for the sphenoid bone. [Gorræus (A, 325).]

AZYGOBRANCHIA, AZYGOBRANCHIATA (Lat.), n's n. pl. A2z(a3z)''i2(u6)-go(go2)-bra2n2(bra3n2)'ki2(ch2i2)-a3, -bra2n2-(bra3n2)-ki2(ch2i2)-a(a3)'ta3. From ἄζυξ (see Azygos), and βράγχια, gills. An order of the *Streptonura*, in which the left ctenidium and nephridium are atrophied ; divided into the sections *Raptantia* and *Natantia.* [L, 121.]

AZYGOCERA (Lat.), n. n. pl. A2z(a3z)-i2(u6)-go2s(go2k)'e2r-a3. From ἄζυγος (see Azygos), and κέρας, a horn. Fr., *azygocères.* De Blainville's name for a section of the *Nereidæ*, embracing those having an unequal system of tentacles. [L, 180.]

AZYGON (Lat.), n., n. of adj. *azygos.* A2z(a3z)'i2(u6)-go2n. See Azyges.

AZYGOS (Lat.), adj. A2z(a3z)'i2(u6)-go2s. Gr., ἄζυγος (originally the genitive of ἄζυξ, unwedded, not paired). Fr., *azygos.* Ger., *ungepaart.* It., *azigo.* Sp., *ázigo.* Single, not paired (said of structures which, like the sphenoid bone, the a. muscle of the uvula, etc., are single, not in pairs). [C.] The word is generally used as a n., *musculus, processus, vena*, etc., being understood ; when it is so used, it should be *a.* if the n. understood is masculine, *azyga* if it is feminine, and *azygon* if it is neuter, but *azyges* (representing ἀζυγής and ἀζυγές) may be used for either gender.—**A. de la luette** (Fr.). See *A. uvulæ.*—**A. glandulæ thyreoideæ.** See Levator *glandulæ thyreoideæ.*—**A. Morgagni.** See *A. uvulæ.*—**A. pharyngis.** Of Santorini, the middle constrictor muscle of the pharynx ; of Meckel, a small fasciculus lying behind the superior and middle constrictors, arising from the pharyngeal spine of the basilar process of the occipital bone, and inserted into the median rhaphe of the pharynx. [L, 142.]—**A. uvulæ.** Fr., *muscle staphylin* (ou *palato-staphylin*). Ger., *Zapfenmuskel, Zapfchenmuskel.* It., *palato-stafilino.* Sp., *ázigo de la uvula.* Syn. : *columellæ musculus teres* [Morgagni], *levator uvulæ* [Meyer], *staphylini medii* [Santorini], *palato-staphylinus* [Douglas], *staphylinus* [Winslow], *epistaphylinus* [Winslow], *palato-uvularis, palato-staphylius.* A name applied to a pair of muscles (formerly regarded as one muscle with two origins), each arising from the posterior nasal spine of the palate bone and running down to the tip of the uvula, where it joins its fellow of the opposite side. Their function is to raise and shorten the uvula. [L, 31.]

AZYGOSPORE, n. A2z-i'go2s-por. From ἄζυγος (see Azygos), and σπόρος, a seed. A name given by De Bary to spores which resemble zygospores in structure, but which, although they never unite like the latter, are yet capable of germination. [B, 121.]

AZYGOUS, adj. A2z'i2-gu3s. See Azygos.

AZYGUS (Lat.), adj. A2z(a3z)'i2(u6)-gu3s(gu5s). See Azygos.

AZYL (Ar.), n. The *Cyperus esculentus.* [B, 46.]

AZYLINES, n. pl. A2z'i2l-enz. A group of substances obtained by the action of nitric oxide on tertiary amines, having the general formula $R_2N - C_6H_4 - N = N - C_6H_4 - R_2N$, in which R denotes an alkyl radicle. The chief a. known are dimethylanilineazyline, diethylanilineazyline, and dipropylanilineazyline. [E. Lippmann, E. Fleissner, "Ber. d. dtsch. chem. Gesellsch.," 1883, p. 1415 (B).]

AZYMAR, n. An alchemical name for vermilion. [Ruland (A, 325).]

AZYMIA (Lat.), n. f. A2z(a3z)-i2m(u6m)'i2-a3. From ἄζυμος, unfermented. Fr., *azymie.* In the humoral pathology, crudity, the state of not being fermented or "concocted" (said of the blood, etc.). [K.]

AZYMICA (Lat.), n., n. pl. of adj. *azymicus.* A2z(a3z)-i2m(u6m)'-i2k-a3. Fr., *azymiques.* The *Aerobia ;* so called because they do not give rise to fermentative processes. [B, 206.]

AZYMIQUE (Fr.), adj. A3-zi2m-ek. 1. Hindering or retarding fermentation. [A, 385.] 2. Aerobiotic (*q. v.*). [J.] 3. As a n., in the pl., *a's*, see Azymica.

AZYMOUS, adj. A2z-i'mu3s. Gr., ἄζυμος. Lat., *azymos, azymus, azymicus.* Fr., *azyme.* Ger., *ungegohren.* It., *azzimo.* Unfermented, unleavened (said of bread). [A, 385 ; L, 84.]

AZYN (Dutch), n. Vinegar. [A, 259.]—**A'zuur.** Verdigris. [A, 259.]

B

B. For the uses of this letter as an abbreviation, see the List of Abbreviations.

BAAK-ROOSEN, n. An East Indian name for the *Lagerstrœmia.* [B, 171.]

BAALA-PALETI, n. An East Indian name for the *Uvaria zeylanica.* [B, 121.]

BAALE, n. A name given to *Sorghum* in upper Egypt. [B, 121.]

BAAL-SHEMEN (Heb.), n. Lit., the chief of oils; balm of Gilead. [B, 200.]

BAALUN, n. A New South Wales name for the *Avicennia tomentoso.* [B, 121.]

BAAR, n. Civet. [A, 385.] See CIVETTA.

BAASSEN, n. A place in Transylvania, near Mediasch, where there are two springs, the Ferdinandsquelle and the Felsenquelle, containing sodium iodide, bromide, and chloride; together with bathing establishments. The waters are used for scrofula, rheumatism, gout, cutaneous syphilis, periostitis, and traumatic injuries. [A, 319.]

BAATCHURI, n. A Basque name for the *Allium.* [B, 121.]

BAAYA, n. A Guiana name for the *Tecoma leucoxylon.* [B, 121.]

BABA, n. 1. The *Mimosa scandens.* 2. A Basque name for the bean. [B, 88, 121.]

BABACA MENOR (Port.), n. Ba^3-ba^3'ka^3 ma-nor'. The root of the *Rumex alpinus.* [L. 105.]

BABANLLYS, n. A Gaulish name for the *Agrimonia.* [B, 121.]

BÁBARANG, n. Written also *baberung* and *babreng.* A Hindu name for the *Embelia ribes,* recommended in the treatment of tape-worm. [Cheton Shah, "Indian Med. Gaz.," Aug., 1885; "Med. Chron.," Nov., 1885, p. 127; B, 172.]

BABARY, n. Pepper (the *Piper nigrum*). [B, 88.]

BABASARAN, n. A Java name for the *Morus alba,* var. *indica.* [B, 121.]

BABASSA (Teloogoo), n. The *Hydrocotyle asiatica.* [B, 172.]

BABATANBI, BABATEMBI, n's. West Indian names for the *Triopteris jamaicensis.* [B, 121.]

BABATU, n. The genus *Conium.* [Adanson (B, 121).]

BABBE, n. The *Calophyllum spurium.* ["Proc. of the Am. Pharm. Assoc.," xxv, p. 185 (B).]

BABEER, n. A Syrian name for the genus *Papyrus.* [B, 19.]

BABELA, n. A variety of *Acacia* growing in Bengal, said to furnish lac. [B, 88.]

BABERESCHE (Ger.), n. Ba^3'be^{2}r-e^{2}sh-e^2. The *Populus tremula.* [L, 43.]

BABERN, n. A place in Courland, Russia, where there is an alkaline sulphurous spring the water of which is used in diseases of the skin and of the air-passages. [L, 49.]

BABERUNG (Hind.), n. See BÁBARANG.

BABEURRE (Fr.), n. Ba^3-bu^{5}r. Buttermilk. [A, 385.]

BABGACH (Ar.), n. The heron (*Ardea cinerea*). [B, 88.]

BABIANA (Lat.), n. f. Ba(ba^3)-bi^2-a(a^3)'na^3. From Dutch. *babianer,* the baboon-plant, because the tubers are eaten by baboons. A genus of iridaceous plants of the tribe *Ixieæ,* established by Gawl. [B, 19, 42, 170.]—**B. plicata.** A pubescent South African species (perhaps the same as the *Gladiolus plicata* [Thunberg]), the flowers of which exhale an odor of cloves. [B, 19, 173.]

BABIBIRON (Ar.), n. The carrot (*Daucus carota*). [B, 88.]

BABINES (Fr.), n. pl. Ba^3-ben. See BABOUINES.

BABINGTONIA (Lat.), n. f. Ba^{2}b'i^{2}ng-to'ni^2-a^3. From *Babington,* an English botanist. Fr., *Babingtonie.* A genus of myrtaceous plants made by Lindley, made by Bentham and Hooker a section of *Bœckia.* [B, 42.]

BABIOT, BABIOU, n's. See BABOT.

BABIYAN, n. A Persian name for fennel. [A, 259.]

BÁBLÁ (Bengal.), n. The *Acacia arabica.* [B, 181.] See BABLAH and BÁBUL.

BABLABS, n. See BABLAH.

BABLACH, n. See BABLAH and BÁBUL.—**Semen b., Siliquæ b.** See BABLAH.

BABLAH, n. Syn.: *neb-neb.* The pod of several species of *Acacia,* especially the *Acacia Bambolah, Acacia cineraria, Acacia arabica,* and *Acacia nilotica.* The seeds, which are dark-brown, contain 4 per cent. of gallic acid and 20 per cent. of tannic acid and a red coloring matter, and are used in dyeing. The juice is the succus acaciæ veræ, used in tanning. [B, 2, 270.]—**East Indian b.** The fruit of the East Indian variety of *Acacia arabica.* [B, 121.]—**Egyptian b.** The fruit of *Acacia nilotica.* [B, 121.]—**Senegal b.** The fruit of the *Acacia seyal* of Delile. [B, 121.]

BABOEN, n. A Surinam name for the *Avicennia triloba.* [B, 121.]

BABOLAH, n. See BABLAH.

BABOOI-TOOLSHE, BABOOI-TULSEE, n's. See BÁBUI TULSI.

BABOOL, n. See BABUL.

BABORA, n. A Carib name for a variety of the *Cucurbita melopepo.* [B, 88.]

BABOSA-QUINADA (Port.), n. Ba^3-bo'sa^3-ken-a'da^3. A name given in Malabar to the *Vitis* (*Cissus*) *quadrangularis.* [Lamarck (B, 121).]

BABOT, n. A French provincial name for the *Papaver rhœas.* [B, 121.]

BABOU, n. See BABOT.

BABOUINES (Fr.), n. pl. Ba^3-bu-en. A popular name for the lips in monkeys, dogs, ruminants, etc. [A, 301.]

BABOULI-CANTI, n. The *Flacourtia sepiaria.* [Roxburgh (B, 121).]

BABOUNIGH (Ar.), **BABOUNJ** (Ar.), n's. The chamomile (*Anthemis nobilis*). [A, 259; Leclerc (B, 121).]

BABOUNY, n. See BABUNY.

BABOUNYA (Lat.), n. f. Ba^3-bu'ni^2-a^3. From *babouny* (see BABUNY). A section of the genus Santolina made by De Candolle. [B, 121.]

BABRENG, n. See BÁBARANG.

BÁBUI TULSI (Bengal.), n. The *Ocimum basilicum,* var. *pilosum.* [B, 181.]

BABUL (Bengal.), **BÁBUL** (Hind.), n's. The *Acacia arabica.* [B, 172, 181.]—**Babul bark.** The bark of *Acacia arabica;* used as a tonic, as an application to ulcers and cancers, and as a local astringent. [B, 172.]—**Babul gum.** Syn.: *babool gum, gond-babul.* An inferior sort of gum arabic obtained from the *acacia arabica;* used for coughs, mucous discharges, and rheumatism, and as a food for diabetics. [A, 2; B, 172.]

BABULA (Hind.), n. See BABLAH.

BABULACH, n. See BABLAH and BABUL.

BABUNEH GAW (Deccan), **BABUNE KA PHUL** (Pers.), n's. The *Anthemis nobilis.* [B, 88.]

BABUNY, n. A name given in Cairo to the flower-heads of *Santolina fragrantissima.* [B, 180.]

BABUZICARIOS, BABUZICARIUS (Lat.), n's m. Ba^{2}b-(ba^{3}b)-u^2(u)-zi^2-ka(ka^3)'ri^2 -o^{2}s,-u^{2}s(u^{4}s). Gr., βαβουζικάριος (from βαβάζειν, to speak unintelligibly). Nightmare. [A, 325.] See INCUBUS.

BABY-FARMING, n. Ba'bi^2-fa^{3}rm"i^{2}ng. Ger., *Engelmachen.* The practice of taking infants to rear (or, while pretending to rear them, allowing them to die of neglect and starvation). [Soyka (A, 319).]

BACA (Heb.), n. בכא, from בכה, he wept, because of the drops of sap which exude from the tree. The sycamore (*Ficus sycomòrus.* [B, 121.]

BACA (Lat.), n. f. Ba(ba^3)'ka^3. See BACCA.

BACABA, n. A Brazilian name for the *Œnocarpus distichus* [Martius]. [B, 121.]

BAÇAL (Ar.), n. The onion (*Allium cepa*). [B, 121.]

BACAN (Fr.), n. Ba^3-ka^{3}n^2. A popular name for the genus *Bruguiera.* [B, 121.]

BACARIS (Lat.), n. f. Ba^{2}k(ba^{3}k)'a^{3}r-i^{2}s. Gen., *bacar'idis.* See BACHARIS.

BACARON (Fr.), n. Ba^3-ka^3-ro^{2}n^2. A medicine of unknown composition mentioned in certain old prescriptions. [B, 88.]

BACAUVAN (Fr.), n. Ba^3-ko-va^{3}n^2. See BACAN.

BACCA (Lat.), n. f. Ba^{2}k(ba^{3}k)'ka^3. Gr., κόκκος. Fr., *baie.* Ger., *Beere.* It., *bacca, baja, coccola.* Sp., *baya.* 1. A berry: a succulent, pulpy fruit containing seeds scattered through its substance. 2. A term applied by Schreber to the fruit of the *Characeæ.* [B, 19, 198.]—**Baccæ Bermudæ** (seu **bermudenses**). Syn.: *saponariæ nuculæ.* Bermuda-berries, soap-berries; the fruit of the *Sapindus saponaria* [Linnæus]. [L, 84, 104, 119.]—**B. clausa.** An indehiscent berry. [B, 198.]—**B. composita.** Ger., *zusammengesetzte Beere.* A fruit composed of several fleshy, drupaceous carpels, separate at first, afterward more or less united. [B, 198.]—**B. corticata.** A berry provided with a rind (*e. g.,* an orange). [B, 19.]—**Baccæ domesticæ.** The fruit of *Rhamnus cathartica.* [B, 180.]—**Baccæ garou.** The fruit of *Daphne gnidium.* [B, 180.]—**B. inanis.** An empty berry, *i. e.,* one not filled with pulp. [B, 198.]—**B. infera.** A berry placed inferiorly with reference to the calyx and adnate to the latter. [B, 198.]—**Baccæ levantinæ.** See *Baccæ orientales.*—**B. libera.** See *B. supera.*—**Baccæ norlandicæ.** The fruit of *Rubus arcticus.* [B, 119.]—**Baccæ orientales, Baccæ piscatoriæ.** The cocculus indicus (the fruit of *Anamirta cocculus*). [B, 180; L, 119.]—**B. pyrenata.** A berry, or succulent fruit, with 2 or more hard putamina; distinguished from a drupe, which has but a single putamen. [B, 198.]—**Baccæ rhabarbarinæ.** The fruit of *Berberis vulgaris.* [B, 180.]—**B. sicca.** A fruit which, when unripe, is pulpy and succulent, but which becomes dry when ripe. [B, 9.]—**B. spinæ cervinæ.** [Ger. Ph.] See *Baccæ domesticæ.*—**B. spuria.** A false berry; a succulent fruit which is not a true berry (*e. g.,* the strawberry). According to Mönch, a succulent fruit with loculi and having the seeds dis-

posed in them according to some order of arrangement. [B, 19, 121.]—**B. supera.** A berry superior to the calyx and free from it. [B, 198.]—**B. vera.** A berry in the botanical sense; according to Mönch, a fleshy fruit without loculi and having the seeds scattered through it without any apparent order of arrangement. [B, 121.]—**Baccæ Vermudæ.** See *Baccæ Bermudæ.*

BACCACEUS, BACCÆFORMIS (Lat.), adj's. Ba^{2}k(ba^{3}k)-ka-(ka^{3})'she^{2}(ke^{2})-u^{3}s(u^{4}s), -se(ka^{3}-e^{2})-fo^{2}rm'i^{2}s. Berry-like, baccate. [B, 198.]

BACCAIRE (Fr.), n. Ba^{3}k-ka^{2}r. A fruit composed of 1-seeded berries borne upon a gynophore which continues to grow after fecundation and becomes succulent. [B, 121.]

BACCALIA (Lat.), n. f. Ba^{2}k(ba^{3}k)-ka(ka^{3})'li^{2}-a^{3}. A bay-tree or laurel-tree producing a great many berries. [Pliny (B, 134).]

BACCALIS (Lat.), adj. Ba^{2}k(ba^{3}k)-ka(ka^{3})'li^{2}s. Producing berries, having many berries. [Pliny (B, 134).]

BACCANS (Lat.), adj. Ba^{2}k(ba^{3}k)'ka^{2}nz(ka^{3}ns). Fr., *baccant.* Ger., *beerigwerdend.* Becoming berry-like (said of the receptacle of a flower when it becomes fleshy and succulent and serves as an envelope or bed for the fruit, as in the mulberry). [B, 123.]

BACCANTE (Fr.), n. Ba^{3}k-ka^{3}nt. See Baccharis (2d def.).

BACCAR (Lat.), n. n. Ba^{2}k(ba^{3}k)'ka^{3}r. Gen., *bac'caris.* Gr., βάκκαρις [Hippocrates], βάκχαρις [Dioscorides]. An ancient name for a fragrant herb supposed to protect against enchantment; clown's spikenard, probably the *Asarum europæum*, although the *Cyclamen europæum* and the *Valeriana celtica* have been thought to be the plant so called. [B, 88, 121, 134.] Cf. Baccharis.

BACCARININE, n. Ba^{2}k-ka^{2}r'i^{2}n-en. See Baccharinine.

BACCARIS (Lat.), n. f. Ba^{2}k(ba^{3}k)'ka^{3}r-i^{2}s. Gen., *baccar'idis. bac'caris.* See Baccar and Baccharis (1st def.).

BACCAROIDES (Lat.), n. f. Ba^{2}k(ba^{3}k)-ka^{3}r-o(o^{2})-i(e)'dez-(das). See Baccharoides.

BACCATE, adj. Ba^{2}k'kat. Lat., *baccatus.* Fr., *baccien, baié.* Ger., *beerenartig.* 1. Of the nature of a berry, berry-like (said of fruits and receptacles). 2. Puffy like a berry (said of fruits and flowers); having a pulpy envelope (said of seeds). [B, 19, 123.]

BACCAULAIRE (Fr.), adj. Ba^{3}k-ko-la^{2}r. See Baccaularius.

BACCAULARIS (Lat.), adj. Ba^{2}k(ba^{3}k)-ka^{4}l(ka^{3}u^{4}l)-a(a^{3})'ri^{2}s. See Baccaularius.

BACCAULARIUS (Lat.), adj. Ba^{2}k(ba^{3}k)-ka^{4}l(ka^{3}-u^{4}l)-a(a^{3})'-ri^{2}-u^{3}s(u^{4}s). Fr., *baccaulaire.* Consisting of several distinct bacciform ovaries springing from a single flower and borne upon a central dry, inconspicuous axis (polyphore); applied by Desvaux to a variety of fruit. [B, 1.]

BACCAUREA (Lat.), n. f. Ba^{2}k(ba^{3}k)-ka^{4}'(ka^{3}'u^{4})-re^{2}-a^{3}. From *bacca aurea*, a golden berry, because of the color of the fruit. Fr., *baccaurée.* A genus of euphorbiaceous plants belonging to the *Phyllantheæ*, made by Loureiro. [B, 121, 170.]—**B. cauliflora** [Loureiro]. A Cochin-China species having dark-purplish edible berries. [B, 173.]—**B. ramiflora** [Loureiro]. A Cochin-China species with a subacid edible fruit. [B, 173.]—**B. silvestris** [Loureiro]. A Cochin-China species, which, when wild, furnishes a very agreeable edible fruit. [B, 173.]

BACCAUSUS (Lat.), adj. Ba^{2}k(ba^{3}k)-ka^{4}'(ka^{3}'u^{4})-su^{3}s(su^{4}s). See Baccate.

BACCHANTE (Fr.), n. Ba^{3}k-ka^{3}nt. See Baccharis (2d def.).

BACCHAR (Lat.), n. n. Ba^{2}k-(ba^{3}k)'ka^{3}r(ch^{2}a^{3}r). Gen., *bac'-charis.* See Baccar.

BACCHAREÆ (Lat.), n. f. pl. Ba^{2}k(ba^{3}k)-ka(ch^{2}a^{3})'re^{2}-e(a^{3}-e^{2}). Fr., *baccharées.* A section of the *Baccharideæ* made by Reichenbach and De Candolle, including *Baccharis* and three other genera. [B, 121, 170.]

BACCHARIDE (Fr.), n. Ba^{3}k-ka^{3}r-ed. See Baccharis (2d def.).—**B. à feuille de laurier-rose.** See Brachylæna *nereifolia.* —**B. de Virginie.** See Baccharis *halimifolia.*

BACCHARIDEÆ (Lat.), n. f. pl. Ba^{2}k(ba^{3}k)-ka^{3}r(ch^{2}a^{3}r)-i^{2}d'e^{2}-e(a^{3}e^{2}). Fr., *baccharidées.* 1. A division of composite plants made by Cassini, Reichenbach, Spach, and others, including the sections *Chrysocorneæ* and *B. veræ* (or *Bacchareæ*), or the sections *Conyzeæ* and *B.* (*Eubaccharideæ, Bacchareæ*), comprising *Baccharis* and many other genera. 2. As defined by Bentham and Hooker and by Gray, a subtribe of composite plants of the tribe *Asteroideæ*, distinguished by the discoid heads, which are monœcious or nearly so, the filiform or minutely ligulate corollæ of the male flowers, and the pappus of capillary bristles. It includes *Baccharis* and two other genera. [B, 42, 215.]

BACCHARININE, n. Ba^{2}k-ka^{2}r'i^{2}n-en. An alkaloid obtained by P. N. Arata from the *Baccharis coridifolia.* [B, 5.]

BACCHARIS (Lat.), n. f. Ba^{2}k(ba^{3}k)'ka^{3}r(ch^{2}a^{3}r)-i^{2}s. Gen., *bacchar'idis, -char'eos* (*bac'charis*). Gr., βάκχαρις (said to be from βάκχος, the god Bacchus, and χάρις, homage, because it was said to cure headache due to drunkenness; but more probably only another form of βάκκαρις [see Baccar]). Fr., *baccharide, bacchante.* 1. A shrubby fragrant plant with red flowers, mentioned by Dioscorides and Pliny; according to Linnæus, a species of *B.* (2d def.—see *B. Dioscoridis*); according to Dumolin, the *Salvia sclarea*; or, according to others, a variety of *Digitalis.* [B, 88, 121.] See also Baccar. 2. A genus of composite herbs or small trees of the tribe *Asteroideæ*, subtribe *Baccharideæ*, with diœcious flower-heads, and usually a naked receptacle, the male flower having a minutely dentate corolla and one or many rows of bristly pappus. [B, 42.] 3. See Bacharis.—**B. ægyptiaca** [Forskål]. The *Pluchea Dioscoridis.* [B, 214.] —**B. Alamani.** See *B. glutinosa.*—**B. angustifolia** [Michaux]. A species growing in the southern and southwestern United States, with mostly linear sub-entire leaves. [B, 215.] See *B. ivæfolia.*—**B. articulata** [Persoon]. Syn.: *Conyza articulata* [Lamarck], *Molina articulata* [Less.]. A Brazilian shrub with an uninterruptedly bi-alate stem and very small leaves. [B, 214.]—**B. brasiliana** [Linnæus], **B. brasiliensis** [Linnæus]. See Vernonia *scabra.*—**B. cærulescens** [De Candolle]. See *B. glutinosa.*—**B. chilco** [Humboldt, Bonpland, Kunth]. Sp., *chilco, chilca.* A branching shrub growing in New Granada. [B, 214.]—**B. chilquilla** [De Candolle]. Sp., *chilquilla del rio.* A shrub growing in the thickets and woods near streams in Chili, enumerated among the medicinal plants of that country. [B, 214; "Proc. of the Am. Pharm. Assoc.," xxiv, p. 766 (B).]—**B. conferta** [Humboldt, Bonpland, Kunth]. Sp., *yerba del carbonero* [Mex. Ph.]. Syn.: *B. xalapensis* (seu *jalapensis*), *B. cuneata, Conyza tricuneata* [Willdenow]. A Mexican shrub, employed for the same purposes as *B. glutinosa.* [J. M. Maisch, "Am. Jour. of Pharm.," April, 1886, p. 168; B, 60, 214.]—**B. confertifolia** [Colla]. See *B. chilquilla.*—**B. coridifolia** [De Candolle]. The *mio mio*; a shrubby species indigenous to southeastern South America; very poisonous to cattle and sheep, and said to contain an alkaloid termed baccharinine. [B, 5.]—**B. cuneata** [De Candolle]. See *B. conferta.*—**B. cuneifolia.** 1. Of Mönch, the *B. halinifolia.* 2. Of De Candolle, the *B. magellanica.* [B, 214, 265.]—**A. Dioscoridis** [Linnæus]. The *Pluchea Dioscoridis.* [B, 214.]—**B. Douglasii** [De Candolle]. An herbaceous species with glutinous leaves, found in California and Chili. [B, 215.]—**B. fœtida** [Linnæus]. See Pluchea *bifrons* and Pluchea *camphorata.*—**B. frutescens.** See Bois *guillaume.*—**B. gaudichaudiana** [De Candolle]. A Brazilian species closely resembling *B. articulata.* [B, 214.]—**B. genisteloides** [Persoon]. Syn.: *Molina reticulata* [Less.], *Conyza genistelloides* [Lamarck]. A South American undershrub distinguished by the three flat reticulate alæ with which the stalk and branches are provided, and by the inconspicuous scale-like leaves. The plant is much sought after by horses, and is used as a remedy for chronic diseases of those animals. A bitter substance extracted from it is esteemed in Brazil a powerful remedy for intermittent fever. In that country the leaves are called *carguega amargosa.* [G. Peckolt, "Pharm. Jour. and Trans.," Oct., 1884, p. 327 (B): B, 19, 180.]—**B. glutinosa** [Persoon]. Sp., *yerba del carbonero* [Mex. Ph.]. Syn.: *Molina viscosa* [Ruíz and Pavón]. A species growing in South America, Central America, and the southwestern part of the United States, having a glutinous stem from 3 to 10 feet high, woody below and herbaceous above. In Mexico it is used as a diaphoretic and as a remedy for catarrhs. In Chili a decoction is used for dysuria, and a resin obtained from it is employed for several purposes. [J. M. Maisch, "Am. Jour. of Pharm.," April, 1886, p. 168; B, 180, 215.] —**B. Hænkii** [De Candolle]. See *B. Douglasii.*—**B. halimifolia** [Linnæus]. Fr., *baccharide de Virginie, seneçon en arbre.* Syn.: *Conyza halimifolia* [Desfontaines]. The groundsel-tree; a shrub with obovate or oblong, deeply toothed leaves on the stalk, and lanceolate, sub-entire leaves on the peduncles, which bear panicles of from three to five flower-heads. It is found along the entire Atlantic and Gulf coasts of the United States and in the West Indies. Its leaves are said to be tonic and stimulant. [B, 173, 215.] —**B. heterophylla** [Humboldt, Bonpland, Kunth]. Sp., *yerba del carbonero* [Mex. Ph.]. A Mexican branching shrub; used in Mexico for the same purposes as *B. glutinosa.* [J. M. Maisch, "Am. Jour. of Pharm.," April, 1886, p. 168; B, 214.]—**B. indica** [Linnæus]. The *Pluchea indica* [Less.]. [B, 180.]—**B. ivæfolia** [Linnæus]. The *Conyza ivæfolia.* The *B. ivæfolia* which Linnæus and others described as indigenous to North and South America, and the leaves of which were said to furnish a decoction used as a stomachic tonic, was another plant, perhaps the *B. angustifolia.* [B, 214.]—**B. jalapensis.** See *B. conferta.*—**B. linguiata** [Kunze]. See *B. rosmarinifolia.*—**B. magellanica** [Persoon]. Syn.: *B. sessiliflora* [Vahl] (seu *cuneifolia* [De Candolle], seu *tridentata* [Gaudichaud]), *Conyza cuneifolia* (et *magellanica*) [Lamarck]. A species much resembling *B. patagonica*, but decidedly smaller, growing in abundance in Tierra del Fuego and the Falkland Islands. [B, 214, 265.]—**B. microcephala** [De Candolle]. Syn.: *Molina microcephala* [Less.]. A Brazilian species with tri-alate stems. In Parana a hot infusion of the plant is used as a bath in rheumatism. [B, 19, 214.]—**B. multiflora** [Humboldt, Bonpland]. Sp., *yerba del carbonero.* A suffruticose Mexican species, used in Mexico for the same purposes as *B. glutinosa.* [J. M. Maisch, "Am. Jour. of Pharm.," April, 1886, p. 168; B, 214.]—**B. nereifolia** [Linnæus]. Fr., *baccharide à feuille de laurier-rose.* See Brachylæna *nereifolia.*—**B. oblongifolia** [Sprengel]. Syn.: *Molina oblongifolia* [Ruíz and Pavón]. A Chilian species. [B, 214.] —**B. obovata** [De Candolle]. Syn.: *Molina obovata* [Ruíz and Pavón]. The *tacyamacho*; a Peruvian shrub. The *B. obovata* of Hooker and Arnott is perhaps the *B. umbelliformis.* [B, 214.]—**B. patagonica** [Hooker and Arnott]. Sp., *romerillo chilote.* A rare Patagonian species. ["Proc. of the Am. Pharm. Assoc.," xxiv, p. 765 (B); B, 265.]—**B. pilularis** [De Candolle]. The kidney-plant of the Pacific coast of the United States. [J. Steele, "Proc. of the Am. Pharm. Assoc.," xxvi, p. 698 (B); B, 215.]—**B. pingræa** [Nuttall]. See *B. glutinosa.*—**B. prostrata** [Persoon]. Syn.: *Molina prostrata* [Ruíz and Pavón]. The *pachatacya*; a prostrate shrub of the Peruvian Andes, with obovate, dentate or entire leaves, and with axillary peduncles bearing a single flower-head. Used in decoction for dysuria. [B, 180, 214.]—**B. rosmarinifolia** [Hooker and Arnott]. Sp., *romero, romero de la tierra, romerillo.* A Chilian shrub with resinous-glandular branches densely covered with thick, linear, coriaceous leaves. [B, 214.]—**B. salvia** [Loureiro]. The *Blumea balsamifera.* [B, 172, 212.]—**B. sessiliflora** [Vahl], **B. tridentata** [Gaudichaud]. See *B. magellanica.*—**B. trimera** [De Candolle]. Syn.: *Molina trimera* [Less.]. A Brazilian species the stems of which are alate, like those of *B. genistelloides*, and are used in infusion as a tonic and sudorific. [B, 19, 180.]—**B. tricuneata** [Persoon]. See *B. conferta.*—**B. umbelliformis** [De Candolle]. Sp., *chilca.* A Chilian species with umbellate flower-heads. ["Proc. of the Am. Pharm. Assoc.," xxiv, p. 765 (B); B, 214.]—**B. veneta** [Humboldt, Bonpland, Kunth]. See Bigelovia *veneta.*—**B. venosa** [De Candolle]. Syn.: *Molina venosa* [Ruíz and Pavón].

A Peruvian shrub resembling *B. genistelloides*, having its whole surface covered with a viscid resinous secretion. [B, 214.]—**B. viscosa.** 1. See PLUCHEA *bifrons*. 2. Of Lamarck, a plant thought to be the *baume des Isles de France et de Bourbon*. The latter, however, is now referred to *Conyza* (*Psiadia*) *glutinosa*. [B, 46, 88.]—**B. xalapensis** [Humboldt, Bonpland, Kunth]. See *B. conferta*.—**Herba baccharidis.** The herb of *Conyza squarrosa*. [B, 180.]

BACCHAROIDES (Lat.), n. f. Ba^{2}k(ba^{3}k)-ka^{3}r(ch^{2}a^{3}r)-o(o^2)-i(e)'dez(das). From βάκχαρις (see BACCHARIS), and εἶδος, resemblance. Fr., *baccharoïde*. A genus of composite plants made by Mönch, now included in *Vernonia*. [B, 42.]—**B. anthelminthica** [Mönch], **B. ascaridia.** See VERNONIA *anthelminthica*.

BACCHI (Hind.), n. The *Vernonia anthelminthica*. [B, 172.]

BACCHIA (Lat.), n. f. Ba^{2}k(ba^{3}k)-ki(ch^{2}e)'a^3, ba^{2}k(ba^{3}k)'ki^2-(ch^{2}i^2)-a^3. Gr., βακχεία, βάκχια, βάκχη, βακχιάς. Fr., *bacchie*. 1. An ancient name for the ivy. [L, 84.] 2. See GUTTA *rosacea*.

BACCHICA (Lat.), n., f. of adj. *bacchicus* (Gr., βακχικός), sacred to Bacchus. Ba^{2}k(ba^{3}k)'ki^2(ch^{2}i^2)-ka^3. The ivy. [B, 200.]

BACCHINA (Lat.), n. f. Ba^{2}k(ba^{3}k)-ki(ch^{2}e)'na^3. An ancient name for the *Mandragora*. [Apuleius (B, 121).]

BACCHION (Lat.), n. n. Ba^{2}k(ba^{3}k)'ki^2(ch^{2}i^2)-o^{2}n. From βάκχιος, sacred to Bacchus, because the leaves were used as masks for the face in Bacchanalian revels. An ancient name for the burdock (*Lappa*). [Apuleius (B, 121).]

BACCHUSPFLANZE (Ger.), n. Ba^{3}k'ch^{2}us-pfla^{3}ntz-e^2. See BACCHARIS.

BACCIEN (Fr.), adj. Ba^{3}k-si^2-a^{3}n^2. See BACCATE.

BACCIFER (Lat.), adj. Ba^{2}k(ba^{3}k)'si^2(ki^2)-fu^{5}r(fe^{2}r). See BACCIFEROUS.

BACCIFERA (Lat.), n., f. of adj. *bacciferus* (*arbor* understood). Ba^{2}k(ba^{3}k)-si^{2}f(ki^{2}f)'e^{2}r-a^3. A name formerly applied to the trees furnishing cubebs, copabia, and wild cinnamon. [L, 104.]—**B. indica, baccis oblongis in umbellæ formam dispositis** [Ray]. The *Lawsonia inermis*. [B, 211.]—**B. indica, floribus ad foliorum exortus, fructu sulcato decapyreno** [Ray]. The *Physalis flexuosa* (*Withania somnifera*). [B, 211.]—**B. maderaspatana, ribis more floribus muscosis iuli instar** [Petiver]. The *Antidesma alexiteria*. [B, 211.]

BACCIFEROUS, adj. Ba^{2}k-si^{2}f'e^{2}r-u^{3}s. Lat., *baccifer*, *bacciferus* (from *bacca*, a berry, and *ferre*, to bear). Fr., *baccifère*. Ger., *beerentragend*. Having a berry for the fruit; in entomology, having the corselet and the elytra globular. [B, 1; L, 180.]

BACCIFORM, adj. Ba^{2}k'si^2-fo^{2}rm. Lat., *bacciformis* (from *bacca*, a berry, and *forma*, form). Fr., *bacciforme*. Ger., *beerenförmig*. Shaped like or resembling a berry. [B, 1, 123; L, 56.]

BACCILLARIACEÆ (Lat.), n. f. pl. Ba^{2}k(ba^{3}k)-si^{2}l(ki^{2}l)-la(la^3)-ri^2-a(a^3)'se^2(ke^2)-e(a^3-e^2). See BACILLARIACEÆ.

BACCILLARIAE (Lat.), n. f. pl. Ba^{2}k(ba^{3}k)-si^{2}l(ki^{2}l)-la(la^3)'ri^2-e(a^3-e^2). See BACILLARIÆ.

BACCILLE (Fr.), n. Ba^{3}k-sel. See BACILLE.

BACCILLUS (Lat.), n. m. Ba^{2}k(ba^{3}k)-si^{2}l(ki^{2}l)'lu^{3}s(lu^{4}s). See BACILLUS.

BACCINA (Lat.), n. f. Ba^{2}k(ba^{3}k)-si(ke)'na^3. 1. Henbane (*Hyoscyamus*). [B, 134.] 2. See BACCHINA.

BACCINIA (Lat.), n. f. Ba^{2}k(ba^{3}k)-si^{2}n(ki^{2}n)'i^2-a^3. See VACCINIUM.

BACCINIUM (Lat.), n. n. Ba^{2}k(ba^{3}k)-si^{2}n(ki^{2}n)'i^2-u^{3}m(u^{4}m). See VACCINIUM.

BACCIVORIDES (Fr.), n. pl. Ba^{3}k-si^2-vo-red. A family of birds subsisting on berries. [Cuvier (L, 41).]

BACCIVOROUS, adj. Ba^{2}k-si^{2}v'o-ru^{3}s. Lat., *baccivorus* (from *bacca*, a berry, and *vorare*, to devour). Fr., *baccivore*. Ger., *beerenfressend*. Subsisting on berries. [A, 385; L, 42.]

BACCOUCHAKECHA, BACCOUCOU, n's. Carib names for the banana (*Musa paradisiaca*). [B, 88.]

BACCULA (Lat.), n. f., dim. of *bacca* (*q. v.*). Ba^{2}k(ba^{3}k)'ku^2-(ku^4)-la^3. A small berry. [Pliny (B, 134).]

BACCULAR, adj. Ba^{2}k'ku^{2}l-a^{3}r. See BACCAULARIUS.

BACELAS, BACELUS, BACEOLUS (Lat.), n's m. Ba^{2}s-(ba^{3}k)'e^{2}l-a^{2}s(a^{3}s), ba^2(ba^3)-se(ka)'lu^{3}s(lu^{4}s), -se(ke^2)'o(o^2)-lu^{3}s(lu^{4}s). Gr., βακέλας, βάκηλος. A eunuch. [A, 311; L, 116.]

BACH (Bengal, Hind.), n. The *Acorus calamus*. [B, 172, 181.]

BACHALA (Ar.), n. The *Amarantus oleraceus*. [B, 88.]

BACHAO, n. A species of *Bruguiera*. [B, 121.] Cf. BACAN.

BACHARIS (Lat.), n. f. Ba^{2}k(ba^{3}ch^2)'a^{3}r-i^{2}s. Gen., *bachar'idis*. Gr., βάχαρις. An ointment, also called myrtle ointment and Lydian ointment, much esteemed by the ancients and recommended by Hippocrates as an application in painful pelvic disorders. [A, 325; Pliny, Athenæus (B, 200).]

BACHAS, n. See BACHAO.

BACHBLUME (Ger.), n. Ba^{3}ch^2'blum-e^2. The *Caltha palustris*. [B, 180.]

BACHBOHNEN (Ger.), n. pl. Ba^{3}ch^2'bon-e^{2}n. See BACHBUNGEN.—**Kleine B.** The *Veronica anagallis*. [B. 180.]

BACHBUNGEN (Ger.), n. pl. Ba^{3}ch^2'bung-e^{2}n. The *Veronica beccabunga*. [B, 180.]—**Langblätterige B., Schmalblätterige B.** The *Veronica anagallis*. [B, 180.]

BACH-CHI, n. A Chinese name for the *Piocris sinensis*, a decoction of the root of which is used as a febrifuge. [C. L. D., "Union méd.," June 1, 1886, p. 893.]

BACHE, n. A South American name for the *Mauritia flexuosa*. [B, 19; L, 87, 105.]

BACHELOR'S-BUTTON, n. Ba^{2}ch'e^{2}l-o^{2}rz-bu^{3}t't'n. A popular name for the double-flowered variety of the butter-cup (*Ranunculus acris*), the *Lychnis diurna*, and a species of *Centaurea*. [B, 19.]—**West Indian b.-b.** The genus *Gomphrena*. [B, 19.]—**White b.-b.** Fr., *bouton d'argent*. The *Achillea ptarmica*, also the *Ranunculus aconitifolius*. [A, 385; L, 73.]—**Yellow b.-b.** Fr., *bouton d'or*. A popular name for the *Ranunculus repens* [Linnæus] and other yellow-flowered allied plants. [A, 385.]

BACHENIN (Ar.), n. The *Nymphæa cærulea*. [B, 88.]

BACHET (Fr.), n. Ba^3-sha. A place in the department of Isère, France, where there is a sulphurous spring containing sodium sulphate. [L, 49.]

BACHKLEE (Ger.), n. Ba^{3}ch^2'kla. The *Oxalis acetosella*. [L, 80.]

BACHKREBS (Ger.), n. Ba^{3}ch^2'kre^{2}bs. The *Astacus fluviatilis*. [A, 355; L, 43.]

BACHKRESSE (Ger.), n. Ba^{3}ch^2'kre^{2}s-se^2. The *Nasturtium officinale*. [A, 355; L, 43.]

BACHLATEL GAZZEL (Ar.), n. The *Origanum dictamnus*. [A, 259.]

BACHMINZE (Ger.), n. Ba^{3}ch^2'mi^{2}ntz-e^2. The *Mentha aquatica*. [B, 180.]

BACHO (Port.), n. Ba^3'sho. The *Buxus sempervirens*. [B, 88.]

BACHQUELLE (Ger.), n. Ba^{3}ch^2'kwe^{2}l-le^2. One of the springs at Gleichenberg (*q. v.*). [L, 57.]

BACHRINNIG (Ger.), adj. Ba^{3}ch^2'ri^{2}n-ni^{2}g. In botany, *rivulosus* (*q. v.*). [B, 198.]

BACHSTELZE (Ger.), n. Ba^{3}ch^2'ste^{2}ltz e^2. The genus *Motacilla*. [B, 180.]—**Gemeine B., Weisse B.** The *Motacilla alba*. [B, 180.]

BACHWASSERFADEN (Ger.), n. Ba^{3}ch^2'va^{3}s-se^{2}r-fa^{3}d-e^{2}n. The *Conferva rivularis*. [A, 355.]

BACHWEIDE (Ger.), n. Ba^{3}ch^2'vid-e^2. The *Salix purpurea*. [B, 180.]

BACILLA (Lat.), n. f. Ba^{2}s(ba^{3}k)-i^{2}l'la^3. Fr., *bacile*, *bacille*, *fenouil marin*, *passe-pierre*, *perce-pierre*. Ger., *Bacille*. The *Crithmum maritimum*. [B, 180.]—**Herba bacillæ.** The herb of the *Crithmum maritimum*.—**Semen bacillæ.** The seed of the *Crithmum maritimum*. [B, 180.]

BACILLAIRE (Fr.), adj. and n. Ba^3-si^{2}l-la^{2}r. See BACILLAR and BACILLARIA.

BACILLAR, adj. Ba^2-si^{2}l'la^{3}r. From *bacillus*, a rod. Lat., *bacillaris*. Fr., *bacillaire*. Ger., *bacillär*, *stäbchenförmig*. It., *bacillare*. Sp., *bacilar*. 1. Rod-shaped; having the form of a slender straight rod. Also, consisting of slender rods, as the b. layer of the retina. [B, 123.] 2. Of or pertaining to or derived from a *Bacillus*; bacillary. [B.]

BACILLAREÆ (Lat.), n. f. pl. Ba^{2}s(ba^{3}k)-i^{2}l-la(la^3)'re^2-e(a^3-e^2). See BACILLARIEÆ.

BACILLARIA (Lat.), n. f. sing. and n. pl. Ba^{2}s(ba^{3}k)-i^{2}l-la(la^3)'-ri^2-a^3. Fr., *bacillaire*, *bacillaires*. 1. A genus of diatomaceous plants made by G. Gmelin, distinguished by the constant peculiar rhythmic motion of its frustules; so called from its rod-like shape. [B, 19, 261.] 2. As a n. n. pl., a group of unicellular organisms, variously regarded as of vegetable and animal origin, made by Ehrenberg, comprising the *Diatomaceæ* and the *Desmidiaceæ* of modern systems. [B, 261.]—**B. paradoxica** [Gmelin]. A species with linear lanceolate valves, found in salt marshes in Europe. [B, 261.]—**B. pectinalis** [Metzsch.]. A species probably identical with the *Diatoma vulgare*. [B, 173.]

BACILLARIACEÆ (Lat.), n. f. pl. Ba^{2}s(ba^{3}k)-i^{2}l-la(la^3)-ri^2-a(a^3)'se^2(ke^2)-e(a^3-e^2). Fr., *bacillariacées*. Ger., *Bacillariaceen*. See DIATOMACEÆ.

BACILLARIÆ (Lat.), n. f. pl. Ba^{2}s(ba^{3}k)-i^{2}l-la(la^3)'ri^2-e(a^{3}e^2). Fr., *bacillariées*. Ger., *Bacillarien*. A group of organisms made by Bory de St. Vincent for *Bacillaria* and one or two genera which he believed to be on the confines of the animal and vegetable kingdoms. The term is now used as a synonym of the *Diatomaceæ*. [B, 1, 35.]

BACILLARIEÆ (Lat.), n. f. pl. Ba^{2}s(ba^{3}k)-i^{2}l-la^{3}r-i(i^2)'e^2-e-(a^3-e^2). A subtribe of the *Naviculeæ* made by Ehrenberg, including the sections *Eubacillarieæ*, *Licomophoreæ*, and *Homœocladieæ*. [B, 170.]

BACILLARIS (Lat.), adj. Ba^{2}s(ba^{3}k)-i^{2}l-la(la^3)'ri^{2}s. See BACILLAR.

BACILLARY, adj. Ba^{2}s'i^{2}l-la-ri^2. See BACILLAR.

BACILLATED, adj. Ba^{2}s'i^{2}l-lat-e^{2}d. Rod-shaped. [B.]

BACILLE (Fr.), n. Ba^3-sel. 1. See BACILLA. 2. See BACILLUS.—**B. aérogène.** See BACILLUS *aerogenes*.—**B. aérophile.** See BACILLUS *aerophilus*.—**B. butylique.** See BACILLUS *butylicus*.—**B. butyrique.** See BACILLUS *butyricus*.—**B's chromogéniques.** See *Chromogenous* BACILLI.—**B. coprogène fétide.** See BACILLUS *coprogenes fœtidus*.—**B. cyanogène.** See BACILLUS *cyanogenus*.—**B. de Bienstock.** See BACILLI *of the fæces*.—**B. de Brieger.** See BACILLUS *cavicidus*.—**B. de Denecke.** See SPIRILLUM *tyrogenum*.—**B. de Finckler et Prior.** See SPIRILLUM *Finckler-Prior*.—**B. de Hauser.** See PROTEUS *vulgaris*, PROTEUS *mirabilis*, and PROTEUS *Zenkeri*.—**B. de Koch.** See BACILLUS *tuberculosis*.—**B's de la bouche.** See BACILLI *of the mouth*.—**B. de la chylurie.** See BACILLUS *of chyluria*.—**B. de la coqueluche.** See BACILLUS *of whooping-cough*.—**B. de la décomposition de l'albumine.** See BACILLUS *putrificus coli*.—**B. de la diphthérie.** See BACIL-

LUS *diphtheriæ.*—**B. de la diphthérie du pigeon.** See BACILLUS *diphtheriæ columbarum.*—**B. de la diphthérie du veau.** See BACILLUS *diphtheriæ vitulorum.*—**B. de la diphthérie intestinale chez les lapins.** See BACILLUS *of intestinal diphtheria in rabbits.*—**B. de la fermentation butyrique.** See BACILLUS *butyricus*, BACILLUS *amylobacter*, and BACILLI *of butyric-acid fermentation.*—**B. de la fermentation des carbohydrates.** See BACILLI *of fermentation of carbohydrates.*—**B. de la fermentation lactique.** See BACILLUS *acidi lactici* and BACILLI *of lactic-acid fermentation.*—**B. de la fièvre jaune.** See BACILLUS *of yellow fever.*—**B. de la fièvre puerpérale.** See BACILLUS *of puerperal fever.*—**B. de la fièvre typhoïde.** See BACILLUS *typhi abdominalis.*—**B. de la gangrène emphysémateuse progressive, B. de la gangrène gazeuse.** See BACILLUS *of gangrene.*—**B. de la gangrène sénile.** See BACILLUS *of senile gangrene.*—**B's de l'air.** See BACILLI *of the air.*—**B. de la lèpre.** See BACILLUS *lepræ.*—**B. de la malaria.** See BACILLUS *malariæ.*—**B. de la morve.** See BACILLUS *mallei.*—**B. de la nécrose du foie des cochins d'Inde.** See BACILLUS *of necrosis of the liver in guinea-pigs.*—**B. de la pneumonie.** See BACILLUS *pneumoniæ.*—**B. de la pseudo-tuberculose du lapin.** See BACILLUS *of pseudo-tuberculosis in rabbits.*—**B. de la pyémie.** See BACILLUS *of pyæmia.*—**B. de la rage.** See BACILLUS *lyssæ.*—**B. de la scarlatine.** See BACILLUS *of scarlet fever.*—**B. de la septicémie.** See BACILLUS *of septicœmia.*—**B. de la septicémie de la souris.** See BACILLUS *murisepticus.*—**B. de la septicémie du lapin.** See BACILLUS *cuniculicidus.*—**B. de la sueur des pieds.** See BACILLUS *of foot-sweat.*—**B. de la syphilis.** See BACILLUS *syphilidis.*—**B. de la terre.** See BACILLUS *of the soil.*—**B. de la tétanie.** See BACILLUS *tetani.*—**B. de la tuberculose.** See BACILLUS *tuberculosis.*—**B. de la tuberculose des vignes.** See BACILLUS *of tuberculosis of vines.*—**B. de l'eau.** See BACILLUS *of water.*—**B. de l'érysipèle du lapin.** See BACILLUS *of erysipelas in the rabbit.*—**B. de Liborius.** See BACILLUS *butyricus* (2d def.) and BACILLUS *amylobacter.*—**B's de l'intestin.** See BACILLI *of the intestine.*—**B. de l'œdème, B. de l'œdème malin.** See BACILLUS *œdematis maligni.*—**B. de l'urée.** See BACILLUS *ureæ.*—**B's de l'urine.** See BACILLI *of the urine.*—**B. de Lustgarten.** See BACILLUS *syphilidis.*—**B. de Prazmowski.** See BACILLUS *amylobacter.*—**B. des pommes de terre.** See BACILLUS *mesentericus vulgatus.*—**B. des selles.** See BACILLI *of the fæces* and BACILLUS *putrificus coli.*—**B. du béri-béri.** See BACILLUS *beribericus.*—**B. du catarrhe conjonctival.** See BACILLUS *of conjunctival catarrh.*—**B. du charbon.** See BACILLUS *anthracis.*—**B. du charbon symptomatique.** See BACILLUS *of symptomatic charbon.*—**B. du choléra.** See SPIRILLUM *choleræ asiaticæ.*—**B. du choléra des poules.** See BACILLUS *choleræ gallinarum.*—**B's du crachat.** See BACILLI *of the sputum.*—**B. du foin.** See BACILLUS *subtilis.*—**B. du jéquirity.** See BACILLUS *of jequirity ophthalmia.*—**B. du lait bleu.** See BACILLUS *cyanogenus.*—**B. du lait jaune.** See BACTERIUM *synxanthum.*—**B. du lait rouge.** See BACILLUS *prodigiosus.* –**B's du pus.** See BACILLI *of pus.*—**B. du pus bleu, B. du pus vert.** See BACILLUS *pyocyaneus.*—**B. du rhinosclérome.** See BACILLUS *rhinoscleromatis.*—**B. du rhumatisme.** See BACILLUS *rheumarthritidis.*—**B. du rouget du porc.** See BACILLUS *of rouget.*—**B. du sang.** See BACILLUS *of the blood.*—**B. du smegma.** See BACILLUS *of the smegma.*—**B. du xerosis conjunctivæ.** See BACILLUS *of xerosis epithelialis conjunctivæ.*—**B. en virgule.** See SPIRILLUM *choleræ asiaticæ.*—**B. érythrospore.** See BACILLUS *erythrosporus.*—**B's fluorescents.** See *Fluorescent* BACILLI.—**B. muriseptique.** See BACILLUS *murisepticus.*—**B. mycoïde.** See BACILLUS *mycoides.*—**B. néapolitaine.** See BACTERIUM *neapolitanum.*—**B's pathogéniques.** See *Pathogenic* BACILLI.—**B. pneumonique.** See BACTERIUM *pneumoniæ crouposæ.*—**B. pneumonique agile.** See BACILLUS *pneumonicus agilis.*—**B. puerpérale.** See BACILLUS *puerperalis.*—**B. pyogène fétide.** See BACILLUS *pyogenes fœtidus.*—**B. saprogène.** See BACILLUS *saprogenes.*—**B. septique.** See BACILLUS *septicus.*—**B. septique agrigène.** See BACILLUS *septicus agrigenus.*—**B. typhique.** See BACILLUS *typhi abdominalis.*—**B.-virgule, B.-virgule cholérique.** The comma-bacillus. [B.] See SPIRILLUM *choleræ asiaticæ.*—**B's zymogènes.** See *Zymogenous* BACILLI.

BACILLE (Ger.), n. Ba^3-tzi^{2}l′le^2. See BACILLA.—**B'nkraut.** The herb of *Crithmum maritimum.* [B, 270.]—**See-B.** The *Crithmum maritimum.* [B, 180.]

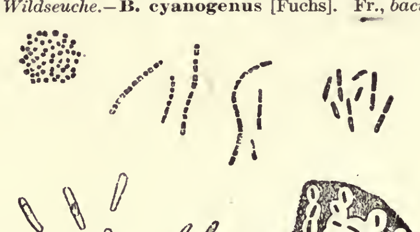
BACILLEN (Ger.), n. pl. Ba^3-tzi^{2}l′le^{2}n. 1. The *Bacilli.* See BACILLUS. 2. The plural of *Bacille* (*q. v.*).

BACILLI (Lat.), n. m. pl. Ba^{2}s(ba^{3}k)-i^{2}l′li(le). Pl. of *bacillus* (*q. v.*).

BACILLIFORM, adj. Ba^{2}s-i^{2}l′li^2 fo^{2}rm. Lat., *bacilliformis* (from *bacillus* [*q. v.*], and *forma*, form). Fr., *bacilliforme.* Ger., *stäbchenförmig.* Rod-shaped. [L, 180.]

BACILLIPAROUS, adj. Ba^{2}s-i^{2}l-li^{2}p′a^{3}r-u^{3}s. From *bacillus* (*q. v.*), and *parere*, to bear. Producing or abounding in bacilli.

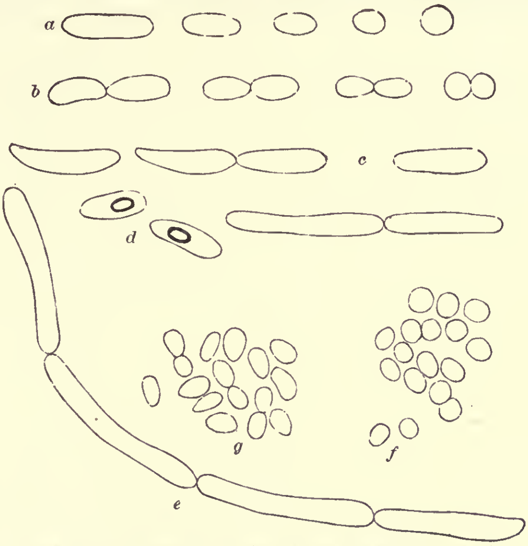
BACILLO-TUBERCULOSIS, n. Ba^{2}s″i^{2}l-lo-tu^2-bu^{5}rk-u^2-lo′-si^{2}s. From *bacillus* and *tuberculosis* (*q. v.*). Fr., *tuberculose bacillaire.* A term applied to tuberculosis by the adherents of the germ-theory of disease, on account of its supposed origin from the *Bacillus tuberculosis.* [A. B. Farnham, "N. Y. Med. Jour.," Sept. 13, 1884, p. 288.]



BACILLUM (Lat.), n. n. Ba^{2}s(ba^{3}k)-i^{2}l′lu^{3}m(lu^{4}m). See BACILLUS (1st def.).

BACILLUS (Lat.), n. m. (as a botanical term, occasionally f.). Ba^{2}s(ba^{3}k)-i^{2}l′lu^{3}s(lu^{4}s). Dim. of *baculus*, a rod. Fr., *bacille, bâtonnet.* Ger., *Bacillus, Stäbchen.* It., *bacillo.* Sp., *bacilo, bacilus.* 1. Literally, a little rod; hence, in pharmacy, a medicated bougie or candle (*candela fumalis*). 2. In anatomy, one of the rods of the retina, also any rod-like body. [L, 115.] 3. In botany, a term applied by Link to the cotyledon of the hyacinth, and also to the small bulb on the inflorescence of some plants. [B, 7.] 4. Cohn's name for a genus of *Schizomycetes* belonging to the order *Bacteriaceæ* [Zopf] or *Endosporeæ* [De Bary], which are distinguished by their occurrence in some period of their existence under the form of rod-shaped cells the length of which is several times as great as the diameter. Some species are known only under this form, others occur also as micrococci or as elongated straight or spiral filaments, but in every case develop from a rod-shaped organism and tend to revert to the latter form. The *Bacilli* increase by transverse division and are reproduced by spores formed in their interior. Formerly the term was restricted to individuals the length of which considerably exceeded their breadth, while the term *Bacterium* was applied to the organisms whose length was only two or three times as great as their diameter. The name *Bacterium*, however, is now given only to those species in which spore-formation does not exist (the *Arthrobacterium* of De Bary). The genus *Clostridium*, which differs only from *B.* in the fusiform shape of its cells, is in this work included with *B.* [B, 237, 238.]—**Anthrax B.** See *B. anthracis.*—**Aussatzb'** (Ger.). See *B. lepræ.*—**B. aceti.** A name given to long cylindrical cells of varying size found in vinegar manufactories. [B, 206.] It is probably the *Bacterium aceti* (*q. v.*). [B.]—**B. aceticus.** See BACTERIUM *aceti.*—**B. acidi lactici** [Hüppe]. Fr., *ferment lactique, bacille de la ferment lactique.* Ger., *Milchsäurebacillus, B. der Milchsäuregährung.* A term applicable to a number of *Bacilli* which give rise to the lactic-acid fermentation in milk. See *Bacilli of lactic-acid fermentation.* It is, however, usually restricted to the species described by Hüppe, which is probably identical with that previously described by Lister and Pasteur. This forms motionless, short, thick rods 0·3 μ to 0·4 μ thick and 1 to 1·7 μ (sometimes 2·8 μ) long, usually arranged in sets of two (rarely of four), and containing shining spherical spores at their extremity. They form in gelatin cultivations whitish colonies of porcelain-like lustre and do not liquefy the gelatin. They convert cane-sugar, milk-sugar, mannite, and dextrose into lactic and carbonic acids, and convert starch into sugar. [B, 122, 237, 238.]—**Bacilli acustici.** The rods of Corti. [L, 115.]—**B. aerogenes.** 1. See *B. lactis aerogenes.* 2. Of Miller, a small motile *B.* of varying length, found in the alimentary canal. It forms round, homogeneous, translucent, white or yellowish colonies on gelatin, and has the property of decomposing carbohydrates with the evolution of gas. [Miller, "Dtsch. med. Wchnschr.," Feb. 25, 1886, p. 117 (B).]—**B. aërophilus** [Liborius]. A species found as an accidental impurity in bacterial cultivations. It forms slender rods, of a thickness two thirds that of the *B. subtilis* and of varying length, frequently joined together, forming straight or bent pseudo-filaments. Reproduction occurs by the formation of oval shining spores. In cultivation it liquefies gelatin energetically and forms in gelatin-plates small, punctate, yellowish-green colonies; in needle-cultivations, sacculate, funnel-like excavations; and on potatoes, yellowish smooth patches of a paraffin-like lustre. It requires oxygen for its development in greater degree than any other *Fungus.* [B, 238.]—**B. albus** [Becker]. The white *B.* of water. [B.] See *Bacilli of water.*—**B. alvei** [W. Cheyne]. Ger., *B. der Faulbrut.* A *B.* producing the disease called foul-brood in bees and obtained from the larvæ which have died from the disease. It is from 2·5 to 5 μ long, 0·8 μ thick, with blunt or rounded ends, and exhibits slow spontaneous movements. Reproduction takes place by the development, in fusiform enlargements of the *B.*, of spores which are 2·2 μ long and 1·07 μ thick. Its cultivation in gelatin exhibits peculiar lateral offshoots which form secondary centres of growth, and from these in turn secondary offshoots which, as they spread, liquefy the gelatin. It forms a yellow coating on potatoes. All the cultivations are distinguished by the peculiar odor of old urine. The *Bacilli*, on injection, are fatal to mice and guinea-pigs, giving rise to œdema and in the latter to muscular necrosis. [B, 122, 209, 238.]—**B. amylobacter** [Van Tieghem]. Fr., *ferment de la fermentation butyrique.* Ger., *Buttersäurebacillus, B. der Buttersäuregährung.* Syn.: *Amylobacter clostridium* [Tricul], *B. butyricus, Clostridium butyricum* [Prazmowski]. A *B.* giving rise to the butyric-acid fermentation. Under this name have been confounded a variety of *Bacilli.* The name *B. amylobacter* is here retained for the *B.* described by Prazmowski, of which two varieties exist. The first forms motile or non-motile rods with rounded ends 3 to 5 μ long and 0·6 to 0·8 μ broad, frequently arranged in chains. In the course of development these rods become distended in the middle, assuming a spindle shape (clostridium stage), and acquire a diameter of 2 μ. Ovoid spores 3 μ long and over 1 μ broad develop in their interior and, when set free, germinate by axial development originating at the more acute extremity. In the clostridium stage granulose is deposited in all portions except in that in which the spores are produced. The second variety is 2 to 8 μ long and 0·5 μ broad, and in its clostridium stage becomes distended at one extremity, assuming a clubbed or pin-head shape. The granulose is deposited except in the spore-bearing portion of the cell and in certain other regions, forming transverse striæ. The spores are at most 1·5 μ long and 0·8 to 1 μ broad. The butyric-acid *B.* of Liborius appears to be essentially the same as the *B. amylobacter.* The *B. amylobacter* is extensively diffused in nature, being found in various decomposing plant-infusions, sauerkraut, old cheese, etc. It is decidedly anaerobic, growing only beneath the surface of gelatin and liquefying the latter with the evolution of gas. It converts starch, dextrin, sugar, and the lactates into butyric acid with the evolution of carbon dioxide and hydrogen, coagulates casein, and is said also to produce a peculiar fermentation of cellulose by which the latter is decomposed into methane, carbonic acid, and hydrogen sulphide, or into carbonic acid and hydrogen. [Van Tieghem (B, 73); B, 238; Gruber, "Ctrlbl. f. Bacteriol. u. Parasitenk.," 1887, No. 12, p. 369 (B).]—**B. anthracis** [Cohn]. Fr., *b.* (ou *bactéridie* [Davaine]) *du charbon.* Ger., *Milzbrandbacillus.* It., *bacillo del carbonchio.* Syn.: *Bacterium anthracicum* [Bollinger] (seu *anthracis* [Zopf]), *Metallacter anthracis* [Trevisan]. The *B.* of charbon ("splenic fever"), an organism found in the blood of animals which have died of charbon. It forms motionless, quadrangular, rod-like cells, 1 to 1·2 μ broad and 5 to 20 μ long, with blunt ends, which, after growing to a double length, in-

crease by transverse division and are disposed in a chain forming long, straight, or bent pseudo-filaments. By suitable cultivation they form long, often convoluted, filaments which may attain a length of 500 μ or more, and then develop ovate spores in their interior. The latter, after the dissolution of the parent filament, form ovoid masses surrounded by a clear, glassy envelope. This soon ruptures, and the spore, by growth at one of its poles, elongates into a bacillar form. These spores are very resistant against reagents and preserve their vitality for years. The *B. anthracis* is aerobic. It liquefies gelatin and forms in plate-cultivations rounded colonies which assume a peculiar floccose appearance like a Medusa's-head, and in needle-cultivations white centres which send out a number of anastomosing filaments. On potatoes it forms circumscribed white colonies. It is readily stained by the usual reagents. In most animals and in man the injection of the *B. anthracis* or of its spores into the blood produces charbon, either as a local affection or as a fatal systemic disease. Its virulent power can be diminished by various procedures, and the organism then, on being injected into the blood, produces a mild type of charbon which appears to render the individual, for a time at least, proof against subsequent infection. According to Buchner, the *B. anthracis* is identical with *B. subtilis*, which it closely resembles in morphological characters. This, however, is still very doubtful. [B, 122, 209, 238.]—**B. aus Faeces** (Ger.). See *Bacilli of the fæces.*—**B. bei Diphtherie des Menschen** (Ger.). See *B. diphtheriæ.* — **B. bei Erysipel am Kaninchen** (Ger.). See *B. of erysipelas in the rabbit.*—**B. bei Gelbfieber** (Ger.). See *B. of yellow fever.*—**B. bei Keuchhusten** (Ger.). See *B. of whooping-cough.*—**B. bei Lichen ruber** (Ger.). See *B. of lichen ruber.* — **B. beribericus** [De Lacerda]. Fr., *bacille du béri-béri.* A species of *B.* alleged to occur in the blood, urine, viscera, spinal cord, and nerves of patients affected with beri-beri. It consists of jointed cylindrical filaments much resembling those of *B. anthracis*, but smaller, which sometimes contain highly refractive points regarded as spores. Cultivations of this *B.* injected into the blood of rabbits are said to cause the symptoms of beri-beri. The *B.* is thought to develop from some peculiar condition of the rice-plant. [B, 73; "Nederl Tijdschr. v. Geneesk." and "Dtsch. med. Wchnschr.," Dec. 9, 1886, p. 887 (B).]—**B. brassicæ** [G. Pommer]. A species of *B.* found in infusions of cabbage-leaves, which consists at first of filaments 9 to 22 μ long and 0·9 to 1·2 μ thick, but which by subsequent division forms rods of 4·5 to 5·4 μ, and afterward of 3·6 to 1 μ in length. Various involution and irregular forms are also known. It forms spores 1·2 to 1·5 μ long and 0·9 μ broad which develop into filamentous cells which sometimes attain a length of 150 μ. [G. Pommer "Mittheil.," etc.; "Ctrlbl. f. Bacteriol. u. Parasitenk.," i, 1887, No. 4, p. 100 (B).]—**B. butylicus** [Fitz]. Fr., *bacille butylique* A species which has the property of decomposing glycerin, mannite, and invert-sugar with the formation chiefly of butyric acid, and to a less extent of butyl alcohol, lactic acid, and trimethylene alcohol. It also acts upon milk-sugar when hydrated by acids, inverts cane-sugar, and dissolves albuminoids. It is aerobic. It is of varying dimensions, usually 1·8 to 2·4 μ long and 0·7 to 1 μ broad, assumes the clostridium form at the time of sporification, and then also contains granulose and is colored by iodine. It is perhaps identical with Pasteur's butyric ferment, as suggested by Fitz, but more probably is the *B. butyricus* of Hüppe. [A. Fitz, "Bericht. d. dtsch. chem. Gesellsch.," 13, 1880, p. 1183; 15, 1882, p. 867; and 17, 1884, p. 1188 (B).]—**B. butyricus.** Fr., *bacille butyrique* (ou *de la fermentation butyrique*). Ger., *B. der Buttersäuregährung, Buttersäurebacillus.* It., *bacillo butirrico.* 1. Of Prazmowski, see *B. amylobacter.* 2. Of Liborius, see *B. amylobacter.* 3. Of Hüppe, a *B.* found in imperfectly sterilized milk and which was capable of producing the butyric-acid fermentation only after the milk had been acted upon by other organisms or when lactates were present. It also coagulated casein and subsequently decomposed it with the formation of peptone, leucine, and tyrosine. In morphological characters it resembles *B. amylobacter*, but differs in being aerobic, requiring oxygen for the development of its spores. [B, 238; "Ctrlbl. f. Bacteriol. u. Parasitenk.," 12, 1887, p. 367 (B).]—**B. caucasicus** [Kern]. Ger., *Kefirferment.* Syn.: *B. kaukasicus, Dispora kaukasica, Bacterium caucasicum.* A *B.* which with other organisms is found in kefir and kumys, and is believed to be the cause of the alcoholic fermentation of milk by which these beverages are produced. It forms rod-cells 3·2 to 8 μ long and 0·8 μ broad, sometimes provided with a flagellum and exhibiting a slow oscillatory movement. It has a spherical enlargement at each end, in each of which forms a spore of 0·8 μ diameter. When set free, these spores enlarge and germinate by protruding through the outer spore-coat a hernial projection of the inner spore-coat, which subsequently enlarges and develops into the cylindrical form. [B, 237, 238.]—**B. cavicida** [Brieger], **B. cavicidus.** A rod-like organism about twice as long as it is broad, obtained from human fæces. It forms on gelatin colonies in the form of irregular concentric rings resembling the scales of a tortoise, and on potatoes dirty-yellowish colonies. It is very fatal to guinea-pigs, causing death with marked signs of intestinal irritation. It is also said to decompose sugar into propionic acid. [B, 122, 238.]—**B. choleræ asiaticæ.** See Spirillum *choleræ asiaticæ.*—**B. choleræ gallinarum.** Fr., *microbe* (ou *bacille*) *du choléra des poules.* Ger., *B. der Hühnercholera* (oder *des Geflügeltyphoids*). Syn.: *Micrococcus choleræ gallinarum, B. of chicken-cholera.* A *B.* found by Pasteur in the blood of hens affected with chicken-cholera. It forms very short, rod-like, non-motile cells from 1 to 1·2 μ long and over 0·7 μ thick. They increase by division and often from median segmentation resemble diplococci, and present the same appearances as the latter when treated with coloring agents. In cultivations it forms whitish superficial colonies with uneven edges on gelatin and does not liquefy the latter. It is closely akin to the *B. cuniculicidus*, with which it very possibly is identical. [B, 122, 209, 238.] See also *B. of Wildseuche.*—**B. coprogenes fœtidus** [Schottelius]. A *B.* found in the intestine and neighboring organs of swine affected with hog-cholera. It forms non-motile rods about as large as those of *B. subtilis*, but somewhat shorter and with rounded ends. In the presence of air it forms spores arranged in rows, and the latter grow by lateral development. On cultivation it forms on gelatin-plates colonies which are grayish superficially and yellowish in the deeper layers, do not liquefy the gelatin, and are accompanied by an intense fæcal odor. On potatoes it forms a light-gray coating. It has probably no connection with the disease of swine. [B, 238.]—**B. coprogenes parvus** [Bienstock]. A very small non-motile *B.* closely resembling the *B. murisepticus*, found in human fæces and growing very slowly in agar-agar and gelatin. Injected into the blood of white mice and rabbits, it produces death with inflammation at the point of injection and intestinal symptoms. [B, 122, 238.]—**B. crassus** [Van Tieghem]. A non-motile species remarkable for its thickness (4 μ, and during the stage of sporification 6 μ) and for the size of its globular spores (5 μ in diameter), one of which is found at each end of the *B.* [Van Tieghem, "Bull. de la soc. bot. de France," 1879, p. 141; "Bot. Jahresb.," 1879, i, p. 593 (B).]—**B. crassus sputigenes** [Kriebohm]. A short, thick *B.* with rounded ends, often assuming a sausage or spiral shape, found in the human sputum. These *Bacilli* increase by division, and at a temperature of 35° C. form spores. On cultivation they form on gelatin grayish colonies elevated above the surrounding surface, in needle-cultures nail-shaped colonies, and on potatoes a moist, grayish coating. Inoculated in mice, rabbits, and dogs, they cause death with symptoms of septicæmia and acute gastro-enteritis. [B, 238.]—**B. cuneatus.** Syn.: *Bacterium cuneatum* [Rivolta]. A *B.* found in putrefied blood, in the intestines of horses and dogs that have died from "dissolutive processes," and in cows affected with septic metritis. It occurs as elongated, wedge-shaped rods with rounded extremities and having a shining globule (probably a spore) at the narrower end. [B, 30, 125.]—**B. cuniculicida** [Koch], **B. cuniculicidus.** Fr., *bactérie* (ou *bacille*) *de la septicémie des lapins.* Ger., *B. der Kaninchensepticämie.* The *B.* of the septicæmia of rabbits; a species found in impure river-water and decayed meat-brine, and closely resembling the *B. choleræ gallinarum.* It forms motionless rod-forms 1·4 μ long and 0·6 to 0·7 μ broad, which are frequently united in pairs or in figure-of-8 shapes. On gelatin it gives rise to nearly circular colonies with a dark yellowish central zone and lighter colored periphery. Inoculated in rabbits, mice, and birds, it produces septicæmia and death. [B, 122, 238.] See also *B. of Wildseuche.*—**B. cyanogenus** [Fuchs]. Fr., *bacille du lait bleu.* Ger., *Pilz* (oder *B.*) *der blauen Milch.* Syn.: *Bacterium syncyanum* [Schröter] (seu *cyanogenum* [Fuchs]), *Vibrio cyanogenus* [Fuchs] (seu *syncyanus* [Ehrenberg]). A *B.* producing in milk a grayish color which in the presence of free acids becomes a bright blue. This diseased condition of milk, which is inoculable, is due to the conversion of the casein into a blue coloring matter. The *B.* forms motile rods from 1 to 4 μ long and 0·3 to 0·5 μ thick with somewhat rounded extremities, and increases by division and by the formation of terminal spores, the latter giving to the *B.* a clubbed shape. On gelatin plates the *Bacilli* form granular whitish colonies, in needle-cultivations nail-like colonies with the evolution of the characteristic pigment, and on potatoes yellowish colonies with pigment-formation; in serum they grow without the development of pigment. It does not liquefy gelatin. [B, 122, 237, 238.]—**B. denitrificans.** Syn.: *Bacterium denitrificans* [Gayon and Dupetit]. A name given to two varieties of *B.* obtained from sewage, differing somewhat in the rate of their development and in their physiological action, but alike in morphological characters. They are actively motile, from 2 to 4 μ long

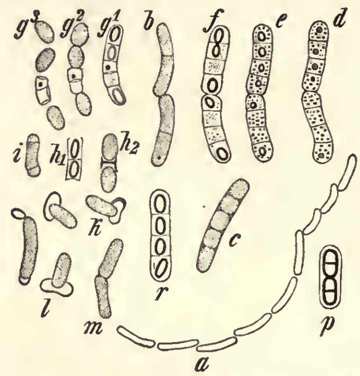


THE BACILLUS ANTHRACIS. (AFTER DE BARY.)

THE BACILLUS CYANOGENUS. [B, 246.]

and 0·4 to 0·6 μ broad, and multiply at first by fission, afterward by endogenous spore-formation, from one to three spores being formed in each *B.* They convert nitrates into nitrogen and nitrous oxide; and in the presence of organic matters carbon dioxide is also formed from the combination of the oxygen of the nitrates with the carbon of the organic substances. See *B. of rouget.*—**B. diphtheriæ** [Klebs and Löffler]. Fr., *bacille de le diphthérie.* Ger., *B. der Diphtherie des Menschen.* A *B.* found in diphtheritic membranes and those of laryngeal croup, forming straight or slightly bent non-motile rods as long as the *B. tuberculosis* and about twice as thick and often bent or swollen at one or both ends. These terminal swollen portions are more highly refractive than the remaining portions of the rods and are believed by some to show evidences of spore-formation, though this is doubtful. These *Bacilli* readily undergo retrogressive changes and present various involution forms. Introduced into the substance of the mucous membranes of birds and rabbits, these *Bacilli* produce diphtheritic symptoms and the formation of a false membrane. [B, 122, 237, 238.]—**B. diphtheriæ columbarum** [Löffler]. Fr., *bacille de la diphthérie des pigeons.* Ger., *B. der Taubendiphtherie.* A *B.* found in the epidemic diphtheria of doves, forming slender rods over 1·5 μ long and 0·3 to 0·4 μ thick. They form whitish colonies on gelatin, which they do not liquefy. Inoculated upon doves, they produce the original disease. [B, 209, 237, 238.]—**B. diphtheriæ vitulorum** [Löffler]. Fr., *bacille de la diphthérie des veaux.* Ger., *B. der Kälberdiphtherie.* A *B.* forming rods about 2 to 3 μ long and 0·5 μ broad, usually united into a filamentous chain. It has been found in the membrane of diphtheria of calves, and is believed to be the cause of the disease. [Klebs (B, 108); B, 237, 238.]—**B. diphtheriticus, B. diphtheritidis, B. diphtheritis.** See *B. diphtheriæ.*—**B. dysodes** [Zopf]. A *B.* producing a peculiar fermentation of bread by which the latter becomes gummy and uneatable and develops a peculiar odor like that of a mixture of oil of turpentine and oil of peppermint. It forms long filaments composed of long rod-like forms which break up into short rod-like forms and cocci and also form ellipsoidal spores. [B, 237.]—**B. epsilon von Miller** (Ger.). See *Epsilon B.*—**B. erythrosporus** [Eidam, Cohn]. A *B.* found in meat-infusions, drinking-water, and liquids containing decomposing albuminous matter. It forms slender motile rods with blunt, rounded ends, often connected into short filaments. They develop in their interior a row of from 2 to 8 oval spores of a dirty-red color. On gelatin plates they form whitish colonies with a greenish-yellow zone surrounding an opaque, brownish centre, from which subsequently radial wavy lines develop, the whole colony then assuming a fluorescent green hue. Needle-cultivations are green by transmitted light, yellow by reflected light, and potato-cultivations are at first red, afterward brown. [B, 237, 238.]—**B. ex pneumo-enteritide suis** [E. Klein]. See *B. of hog-cholera.*—**B. fasciculatus** [E. Fränkel]. A variety of *B.* described by Sadebeck and Fränkel in a non-malignant variety of pharyngeal mycosis. [B. Fränkel (B, 108).]—**B. figurans** [Crookshank]. A *B.* found on gelatin plates exposed to the air. It forms on gelatin characteristic cultivations of rods ranged in variously twisted parallel lines disposed so as to form more or less regular patterns. On agar-agar it forms feather-like cultivations. [B, 273.]—**B. fitzianus** [Zopf]. Ger., *Glycerinäthylbacillus.* A *B.* found by Fitz in hay-infusions and having the property of inducing a fermentation in glycerin by which the latter is converted into ethyl alcohol. It forms short rods, long rods, and filaments of a breadth of 1 μ and a length of 1·2 μ to many μ. It develops spores like the *B. subtilis,* and on gelatin forms brownish-yellow colonies with dark, nearly opaque centre. According to Fitz, it is the true *B. subtilis* of Cohn. According to Buchner, it is identical with the *B. subtilis* and Pasteur's *vibrion butyrique.* [B. 237, 238; "Bot. Jahresb.," 1882, i, p. 260 (B).]—**B. fluorescens** [Becker]. The fluorescent *B.* of water. [B.] See *Bacilli of water.*—**B. fluorescens liquefaciens.** A species found very frequently in water containing putrefying substances.

THE BACILLUS FITZIANUS. (FROM ZOPF, AFTER BUCHNER.)

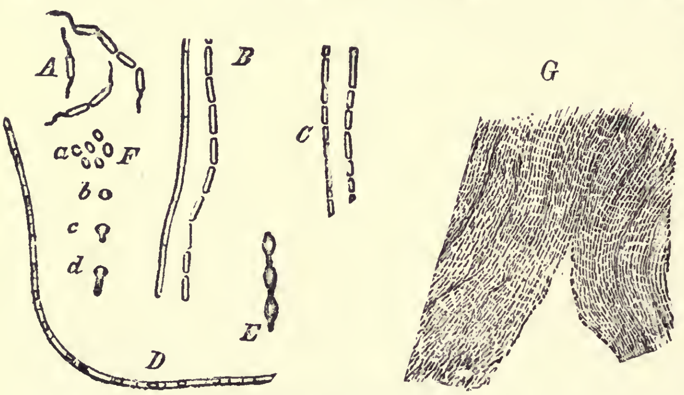


a, b, micrococcus forms showing the various transitions to short and long rods; *c,* long rods with the ends partly curved; *d,* rods bearing spores; *e,* long rods connected into filaments; *f, g,* globular and elliptical cocci, × 4,000.

It occurs as short motile rods arranged in pairs. In gelatin it forms fluorescent greenish or greenish-yellow colonies surrounded by liquefied gelatin. [B, 238.]—**B. fluorescens putidus.** A species occurring frequently in putrefying mixtures, to which, as well as to gelatin, it imparts a green color and an odor resembling that of trimethylamine. It does not liquefy gelatin. [B, 238.]—**B. fœtidus.** 1. The *Bacterium fœtidum* [Thin]; a species found in feet-sweat, described as occurring first in the form of cocci which divide and form wedge-shaped bodies, subsequently developing into rods which either break up or lengthen into spore-containing filaments. All the cultivations have the odor of foot-sweat. According to S. Le M. Moore, this *B.* is identical with the *Micrococcus* found in the surface soil (*corpuscles brillants*). ["Proc. of the Roy. Soc.," xxx, 1880, p. 473, and "Bot. Jahresb.," 1881, i, p. 313 (B); "Jour. of the Roy. Micr. Soc.," 1885, p. 676 (B).] 2. The *Clostridium fœtidum* [Liborius, "Ztschr. f. Hyg.," i, 1886, p. 115]; a species found associated with the *B. œdematis maligni,* and probably derived from the soil. It is actively motile, 1 μ thick and of varying length, sometimes united in pseudo-filaments. In sporification, it becomes distended at the extremity or in the middle (clostridium form) and develops oval spores over 1 μ thick. It is anaerobic, liquefies gelatin with the formation of round, irregularly limited colonies, and forms branched colonies in agar-agar. From these colonies a very fœtid gas is evolved. In morphological characters it is closely allied to *B. amylobacter.* It is perhaps identical with the first-described variety. [B.]—**B. fuscus.** A species found as an accidental impurity in gelatin-cultivations and forming long, slender rods, with blunt ends and an irregular, slightly wavy contour. It produces a brownish coloring matter and forms dark-brown colonies in gelatin. It is perhaps identical with the *Bacterium brunneum.* [B, 238.]—**B. geniculatus** [De Bary]. A species found in the contents of the stomach, forming rods like those of the *B. subtilis,* but somewhat smaller and narrower, and united to each other at an angle so as to constitute bent filaments. The interlaced filaments form a smooth pellicle on the surface of nutrient fluids. The *Bacilli* are motile only for a short time after germination. They reproduce by endogenous spore-formation, the axis of the spores being coincident with that of the *B.* They do not liquefy gelatin, and appear to have no pathogenetic qualities. [De Bary, W., "Arch. f. exper. Pathol. u. Pharmak.," xx, p. 243; "Ctrlbl. f. Bacteriol. u. Parasitenk.," i (1887), No. 10, p. 293 (B).]—**B. glycerinæ.** See *B. fitzianus.*—**B. grüner Eiter** (Ger.). See *B. pyocyaneus.*—**B. Hansenii** [Raspmussen]. A species forming on various nutrient liquids a yellowish or whitish pellicle consisting of rods 2·8 to 6 μ long and 0·6 to 0·8 μ broad, which develop spores 1·7 μ long and 1·1 μ broad. On potatoes it forms a chrome-yellow layer with the deposition of a pigment insoluble in all ordinary solvents, and giving rise at the same time to a pleasant fruity odor. [B, 237, 238.]—**B. ianthinus.** See BACTERIUM *ianthinum.*—**B. indicus, B. indicus ruber** [Koch]. A species found in the stomach of an East Indian monkey, forming very small motile rods with rounded ends which, cultivated on gelatin or on potatoes, produce a brick-red coloring matter. It liquefies gelatin and is aerobic. Injected into the blood of rabbits, it produces death with the lesions of a severe gastro-enteritis. [B, 122, 238.]—**B. kaukasicus.** See *B. caucasicus.*—**B. Klebsii.** A species, forming slowly motile rods, said to

be found in recent syphilitic ulcerations and conjectured to be the cause of syphilis. [B, 206.] See, however, *B. syphilidis.*—**B.-Komma** (Ger.). See SPIRILLUM *choleræ asiaticæ.*—**B. lacticus.** See *B. acidi lactici.*—**B. lactis aerogenes.** Syn.: *Bacterium lactis aerogenes* [Escherich]. A species found along with the *Bacterium coli commune* in the fæces of infants fed with milk. It forms short, non-motile rods, with rounded ends, 1·4 to 2 μ long and 0·5 μ broad, and under certain conditions apparently develops terminal spores. In gelatin it forms elevated colonies ("nail-cultivations") like those of the *Bacterium pneumoniæ crouposæ*, and on potatoes a whitish-yellow layer filled with bubbles of gas. It coagulates milk with the production of lactic acid and causes in glucose solutions an active fermentation, which can be maintained apart from the presence of air, although otherwise the *B.* is aerobic. In animals it produces effects similar to those caused by the *Bacterium coli commune.* [B, 238.]—**B. leiodermos.** A small, short, very actively motile *B.* with rounded ends, liquefying gelatin and forming upon it small, whitish, irregularly shaped colonies. On potatoes it forms a smooth, shining coating. [B, 238.]—**B. lepræ** [A. Hansen]. Fr., *bacille de la lèpre.* Ger., *Leprabacillus, B. des Aussatzes.* It., *bacillo della lepra.* A species discovered by Hansen (1874) in the new growths occurring in leprosy on the skin, on the mucous membranes, in the peripheral nerves, in various organs, and in the blood. These *Bacilli* usually lie in masses in the cells, but sometimes are found in the lymph-passages. They are 4 to 6 μ long, less than 1 μ thick, and form in their interior 2 or three oval spores. According to Lutz and Unna, they consist of rows of cocci joined into rods (coccotriches) by a cement-substance of different composition. In their appearance, and especially in their behavior toward coloring agents, they resemble the *B. tuberculosis.* Injected beneath the skin of some of the lower animals, they give rise to localized growths resembling those of leprosy, and are regarded as the cause of the disease in man. [B, 122, 238; "Arch. f. pathol. Anat. u. Phys. u. f. klin. Med.," lxxix (1880), p. 32 (G); "Dtsch. med. Wchnschr.," Oct. 28, 1886, p. 759 (B).]—**B. liodermos.** See *B. leiodermos.*—**B. lucens.** Syn.: *Bacterium lucens* [Van Tieghem]. A non-motile species, found upon the surface of water, distinguished by its brilliancy and forming spherical spores. ["Bull. de la soc. bot. de France," 1879, p. 141, and "Bot. Jahresb.," 1879, i, p. 593 (B); B, 73.]—**B. luteus.** A short non-motile *B.*, occurring as an impurity on gelatin plates. It forms yellowish colonies in gelatin without liquefaction. [B, 238.]—**B. luteus suis.** A species occurring in the pericardial or peritoneal fluids of swine as single or paired motile rods, somewhat rounded at the ends, 0·4 to 0·5 μ broad and 1·2 to 1·5 μ long, increasing to 2·5 or 3 μ before division. Spores have not yet been observed in it, and it hence, perhaps, belongs to the genus *Bacterium.* It liquefies gelatin, staining it greenish-yellow, forms in milk a yellow pigment insoluble in alcohol and ether, and resembling in reactions that produced by the *Bacterium synxanthum*, liquefies blood-serum, staining it an olive-green, and forms on potatoes a brick-red, subsequently dark-green, gelatinous mass. All the cultivations emit a peculiar odor like that of melted glue. It is not pathogenetic. [D. E. Salmon and T. Smith, "Proc. of the Am. Assoc. for the Adv. of Sci.," 1885, p. 303 (B).]—**B. lyssæ.** Fr., *bacille de la rage.* Ger., *Hundswuthbacillus.* A *B.* found by Pasteur in the saliva of a hydrophobic patient and in the blood of a rabbit inoculated with this saliva. [B, 206, 238.] Karop obtained from the saliva of a hydrophobic boy variously shaped, spore-forming, capsulated *Bacilli.* ["Proc. of the Roy. Micr. Soc.," 1885, p. 573 (B).] These, as well as Pasteur's *B.*, are perhaps identical with the *Bacterium septicum sputigenum* of Fränkel. Rivolta ["La riforma med.," Nos. 78, 79, 80, 1886; "Dtsch. med. Wchnschr.," May 6, 1886, p. 313] found in the organs, and especially the medulla and parotid epithelium, in hydrophobia, a micro-organism (*Coccobacterium lyssæ*) forming rods 1·4 to 2·8 μ long and 0·6 to 0·7 μ thick, consisting each of 2 to 5 cocci. [B.]—**B. malandriæ.** See *B. mallei.*—**B. malariæ** [Klebs and Tommasi-Crudeli]. Fr., *bacille de la malaria.* Ger., *B. der Malaria.* It., *bacillo della malaria.* A *B.* discovered in malarial soils and recently in malarial air, forming motile rods of 2 to 7 μ in length and 0·7 μ broad, growing into spiral threads, and increasing by division and also by the formation of central or terminal endogenous spores. It is said also to occur in the blood of patients affected with malaria, and to produce when injected into rabbits a variety of intermittent fever with enlargement of the spleen, deposition of pigment in the spleen and the abdominal lymphatic glands, and changes in the red blood-corpuscles similar to those constituting the so-called *Plasmodium malariæ* (*q. v.*). [B, 209, 237, 238; Schiavuzzi and Tommasi-Crudeli, "Rendic. della R. Acc. dei Lincei" and "Ctrlbl. f. Bacteriol. u. Parasitenk.," i (1887), No. 7, p. 203, and No. 12, p. 349 (B).]—**B. mallei** [Löffler and Schütz]. Fr., *bacille de la morve.* Ger., *Rotzbacillus.* A species found in the nodules of glanders. It forms very motile rods, 2 to 5 μ long and 0·5 to 1·4 μ broad, which form a brown mucilaginous layer upon potatoes and transparent prominent drops upon the surface of blood-serum, and in needle-cultures in gelatin liquefy the latter with the formation of whitish tenacious masses. They are said to reproduce by endogenous spore-formation, but this is denied by Löffler. Injected beneath the skin of guinea-pigs, field-mice, rabbits, and horses, cultivations of these *Bacilli* produced typical glanders. [B, 122, 238; Löffler, "Ctrlbl. f. Bacteriol. u. Parasitenk.," 1887, No. 4, p. 112 (B).]—**B. maydis.** It., *bacterio della pellagra.* Syn.: *Bacterium maydis* [Cuboni]. A species found in the grains of diseased Indian corn and believed to give rise to the Italian pellagra which results from eating such corn. It is 3 μ long, 1 μ broad, and reproduces by the formation of a medially situated spore. It liquefies gelatin with the formation of peculiar colonies which increase in area on the surface of the gelatin, but in the deeper layers remain of small size. It is said by some to occur in the blood of patients affected with pellagra. [Cuboni, "Atti della R. Acc. dei Lincei," ser. iv, vol. ii, 1885–1886, p. 532 (B).]—**B. megaterium** [De Bary]. A species observed in cooked cabbage, forming cylindrical, slightly arcuate, multiseptate rods (*b, p*) with rounded ends, 2·5 μ thick and gradually attaining a length of 10 to 15 μ, when they divide into two by a transverse division (*b*). They are arranged in chains (*a*) and exhibit a slow spontaneous movement. They reproduce by division of the rods into equilateral cells (*c*) in each of which an oblong spore develops (*d, e, f*). These spores, on being set free, increase in length till they form new *Bacilli* (*g, h*, etc., to *m*). Cultures of this *B.* liquefy gelatin and form yellowish-white colonies on potatoes. [B, 54, 122, 238.]—**B. melittophthorus.** See *B. alvei.*—**B. mesentericus fuscus.** A species found on potatoes, in the air, in hay-dust, and in other situations, forming short, small, actively moving rods, often arranged in groups of 2 or 4, and reproducing by means of small spores. They liquefy gelatin with the formation of whitish colonies with brownish offsets, and on potatoes grow rapidly with the production of a smooth, yellow, superficial layer which soon becomes wrinkled and brown. [B, 238.]—**B. mesentericus vulgatus.** Fr., *bacille des pommes de terre.* Ger., *Kartoffelbacillus.* The potato-b., a species somewhat larger than the preceding, and also motile and reproducing by spores. It liquefies gelatin, upon which it forms a yellowish pellicle; and upon potatoes it produces a rapidly growing, tough, tenacious, deeply wrinkled mass which penetrates deeply into the substance of the potato. It acts as a diastatic ferment and coagulates casein. [B, 122, 238.]—**B. minimus.** A name given by Klebs to the *B.* found by Klein in the pneumo-enteritis of the pig. [Klebs (B, 108).] See *B. of hog-cholera* and BACTERIUM *of swine-plague.*—**B. molllusci** [Domenico]. It., *bacillo del mollusco.* A *B.* found in molluscum contagiosum. It resembles greatly in morphological characters the *B. malariæ* and *B. lepræ*, and reproduces by the formation of terminal spores. The separate *Bacilli* usually occur joined in bent pseudo-filaments. [Domenico, M., "Atti della R. Acc. dei Lincei," ser. iii, vol. v, 1880, p. 77 (B).]—**B. multipediculus.** A species occurring, as an accidental impurity in potato-cultivations, in long, slender, non-motile rod-forms. The cultivations on gelatin are dark, rounded or oval, and are provided with numerous radial and variously bent offshoots, resembling the feet and antennæ of an insect. The cultivations on potatoes are smooth and dirty-yellow. [B, 238.]—**B. murisepticus** [Koch]. Fr., *bacille de la septicémie de la souris.* Ger., *B. der Mäusesepticämie.* A species found in various putrefying liquids. It occurs as non-motile spore-forming rods 0·8 to 1 μ long and 0·1 to 0·2 μ thick, frequently arranged in groups or rows of 2 or 4. They form reticulate bluish-gray colonies in gelatin, not liquefying the latter, and growing best in the deeper layers. Injected into the circulation of common mice, they accumulate in the white blood-corpuscles, destroy the latter, and give rise to a fatal variety of septicæmia. Birds and rabbits are also affected, inoculation in the case of the latter producing either a general septicæmia, as in mice, or a local inflammation from which the animals recover and which secures immunity against a subsequent attack of the disease. [B, 122, 237, 238.]—**B. muscoides** [Liborius]. A species found with the *B. œdematis maligni*, forming slowly motile rods, 1 μ thick, rarely joined into filaments. The spores are rounded-oval and usually terminal. It is anaerobic, does not liquefy gelatin, and forms in gelatin and agar-agar delicately branched cultures resembling moss in appearance. ["Ztschr. f. Hyg.," i, 1886, p. 115 (B).]—**B. mycoides.** Fr., *bacille mycoïde.* Ger., *Wurzelbacillus.* A species found constantly in the soil, occurring as motile rods with rounded ends, of about the size of *B. anthracis.* They reproduce by medially disposed large oval spores. They liquefy gelatin and give rise in it to peculiar whitish colonies consisting of a reticulum of fine filaments resembling the mycelium of a *Fungus.* They form a whitish layer on potatoes. [B, 122, 238.]—**B. neapolitanus** [Emmerich]. See BACTERIUM *neapolitanum.*—**B. necrophorus** [Löffler]. A species producing local necrotic processes with general systemic infection in rabbits or white mice inoculated with the particles taken from a moist flat condyloma. They occur as *Bacilli* of different length but uniform thickness, and often as long, slender, slightly wavy filaments. Spore-formation is not certainly known to exist. [B, 238.]—**B. œdematis, B. œdematis maligni** [Koch]. Fr., *bacille de l'œdème* (ou *de l'œdème malin*), *vibrion septique.* Ger., *Œdembacillus.* A species occurring in garden soil and in all substances undergoing putrefaction as very motile rods, resembling those of the *B. anthracis*, but more slender and with rounded ends. They are 3 to 3·5 μ long, 1 to 1·1 μ broad, frequently arranged in twos or threes, forming pseudo-filaments 15 to 40 μ long, which are often interrupted, bent, or twisted. In the process of reproduction they become distended either in the middle or at one extremity, and develop in the swollen portion a large oval or cylindrical highly refractive spore. The *B. œdematis maligni* is anaerobic, developing only in the interior of gelatin and po

THE BACILLUS MALARIÆ. [B, 246.]



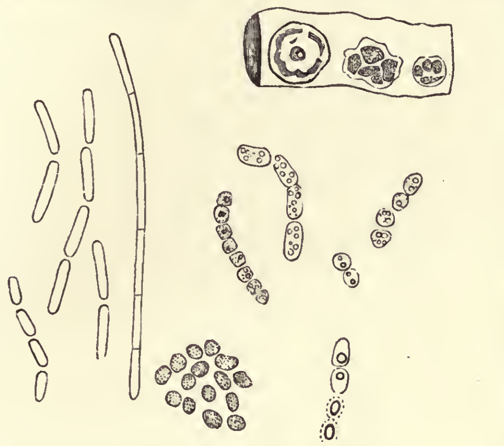
THE BACILLUS MEGATERIUM. (AFTER DE BARY.)

tatoes and liquefying the former with the evolution of an ill-smelling gas. In mice, pigs, sheep, and horses it produces a fatal disease, characterized locally by diffuse œdema and emphysema of the cellular tissue. In man it produces the so-called progressive gangrenous emphysema (*gangrène gazeuse*), although, according to W. Koch, the *B.* of symptomatic charbon is associated with this disease. [B, 122, 237, 238.]—**B. of albuminous decomposition.** Ger., *B. der Eiweisszersetzung.* See *B. putrificus coli.*—**B. of allantiasis.** A *B.* obtained from tainted sausages, which grows very quickly in nutrient fluids, liquefies gelatin, and causes putrefactive decomposition of blood-serum. It causes death when inoculated in rabbits. Its presence in the sausage is believed to be due to its occurrence normally in the stomach and intestine of the healthy pig, and it is thought to produce the symptoms of allantiasis by causing decomposition of the albuminous substances in the human intestine and the consequent evolution of toxic products. [Nauwerck, "Jahrb. der in- u. ausl- ges. Med.," ccxii, No. 3, 1886, p. 236 (B).]—**B. of anthrax.** See *B. anthracis.*—**B. of beri-beri.** See *B. beribericus.*—**B. of blue milk.** See *B. cyanogenus.*—**B. of braxy.** A *B.* much resembling the *B. anthracis* found in the intestinal mucous membrane and in the blood of sheep dying of "braxy." ["Proc. of the Roy. Soc. of Edinb.," 1881-1882, p. 615 (B).]—**Bacilli of butyric-acid fermentation.** Fr., *bacilles de la fermentation butyrique.* Ger., *Bacillen der Buttersäuregährung. Bacilli* which convert into butyric acid, starch, dextrin, inulin, cane-sugar, dextrose, and hydrated milk-sugar. [B, 238.] See *B. amylobacter*, *B. butyricus*, and *B. butylicus*, and Cf. Bacterium *of butyric-acid fermentation.*—**B. of cattle-plague.** Ger., *Rinderpestbacillus.* A *B.* found in the blood, intestinal walls, and lymphatic glands of cattle dying from the cattle-plague. That described by Metschnikoff occurs as short rods with rounded ends, sometimes developing into leptothrix-filaments. It liquefies gelatin and on cultivation behaves like the *B. typhi abdominalis.* In calves and rabbits the inoculation of pure cultivations produces the symptoms and lesions of the cattle-plague. [Metzdorf, "Bied. Ctrlbl.," 1884, p. 419, and "Jour. of the Chem. Soc.," xlvi (1884), p. 1398 (B); E. Metschnikoff and N. Gamaleia, "Russk. Med.," No. 40, 1886, and "Ctrlbl. f. Bacteriol. u. Parasitenk.," i, 1887, No. 21, p. 633 (B).]—**B. of chicken-cholera.** See *B. choleræ gallinarum.*—**B. of cholera.** See Spirillum *choleræ asiaticæ.*—**B. of choleraic diarrhœa from meat-poisoning.** A *B.* found by Klein in the blood and fæces in certain fatal cases of diarrhœa due to poisoning by tainted meat. It is 3 to 9 μ long, 1·3 μ thick, occurring singly or in pairs, having rounded ends and producing terminal or central oval spores 1 μ in diameter. [B, 273.]—**B. of chyluria.** Fr., *bacille de la chylurie.* Ger., *B. der Chyluria.* A species found in the coagulum of chylous urine consisting of filaments made up of connected *Bacilli*, often united in zooglœa forms. They reproduce by the development of terminal spores and at high temperatures exhibit spontaneous movement. [A. Wilson, "Br. Med. Journ.," Dec. 6, 1884; "Ctrlbl. f. d. med. Wssnsch.," 1885, No. 10, p. 175 (B).]—**B. of conjunctival catarrh.** Fr., *bacille du catarrhe conjonctival.* Ger., *B. des Bindehautcatarrhs.* A *B.* occurring in acute infections and epidemic conjunctival catarrh ("pink-eye") and believed to constitute the cause of the latter. That discovered by Koch in Egyptian catarrhal conjunctivitis is a short, small *B.* resembling in size, shape, and disposition the *B. murisepticus.* It occurs chiefly in the interior of the leucocytes of the inflammatory secretion. It forms characteristic cultivations on agar-agar and blood-serum, inoculation from which in one case reproduced the original disease. Spore-formation has not been observed. This *B.* resembles the *B.* of xerosis, but is probably not identical with it. The *B.* found by Weeks in pink-eye, apparently causing the latter, and believed by him to be identical with Koch's *B.*, occurs under the form of slender rods 1 to 2 μ long and 0·25 μ broad, sometimes united in filaments. It is associated with a club-shaped *B.*, which appears to have no pathogenetic action. [I. E. Weeks, "Arch. of Ophth.," xv, No. 4; "Ctrlbl. f. Bacteriol. u. Parasitenk.," No. 9, 1887, p. 263; Kartulis, *ib.*, No. 10, p. 289 (B).]—**B. of diphtheria in calves.** See *B. diphtheriæ vitulorum.*—**B. of diphtheria in doves.** See *B. diphtheriæ columbarum.*—**B. of diphtheria in man.** See *B. diphtheriæ*, *B. diphtheritis*, and Bacterium *diphtheriæ.*—**Bacilli of endocarditis.** *Bacilli* found in connection with other organisms in verrucose endocarditis and productive of the disease when injected into animals. Two were found by Fränkel and Saenger, the *B. pyogenes fœtidus* and a non-motile short *B.* with rounded ends which forms grayish-white colonies on gelatin and a grayish-white coating on potatoes, its cultivations emitting a strong fœtid odor. ["Arch. f. path. Anat. u. Phys. u. f. klin. Med.," cviii, 2, p. 286 (B).]—**B. of erysipelas in the rabbit.** Fr., *Bacille de l'érysipèle du lapin.* Ger., *B. bei Erysipel am Kaninchenohr.* A *B.*, 3 μ long, 0·3 μ thick, and forming filaments 10 μ in length, found by Koch in an erysipelatous inflammation of a rabbit's ear, excited by the injection of mouse's dung. [B, 238.]—**B. of false hog-cholera.** See *B. parvus ovatus.*—**B. of false tuberculosis in rabbits.** See *B. of pseudo-tuberculosis in rabbits.*—**Bacilli of fermentation of carbo-hydrates.** Fr., *bacilles de la fermentation des carbo-hydrates.* Ger., *Bacillen der Vergährung von Kohlehydraten. Bacilli* producing fermentative changes in carbo-hydrates. [B.] See *Bacilli of lactic-acid fermentation* and *Bacilli of butyric-acid fermentation*, *B. dysodes*, and *B. polymyxa.*—**B. of foot-sweat.** Fr., *bacille de la sueur des pieds.* Ger., *Fusschweissbacillus.* A *B.* found in foot-sweat and producing the fœtid odor of the latter. [B.] See *B. fœtidus* (1st def.) and *B. saprogenes No. II*, and Cf. Bacterium *graveolens.*—**B. of foul-brood.** See *B. alvei.*—**B. of gangrene.** Fr., *bacille de la gangrene.* See *B. saprogenes No. III*, *B. œdematis maligni*, and *B. of senile gangrene.*—**B. of gangrenous septicæmia.** Fr., *bacille de la gangrène gazeuse.* See *B. œdematis maligni.*—**B. of glanders.** See *B. mallei.*—**B. of green diarrhœa in children.** A species found by Lesage in an epidemic form of infantile diarrhœa with green evacuations. ["N. Y. Med. Journ.," June 25, 1887, p. 715 (B); "Il. Morgagni," May, 1887, p. 257 (B).]—**B. of green pus.** See *B. pyocyaneus.*—**B. of hay-infusions.** See *B. subtilis.*—**B. of hog-cholera.** A *B.* producing the disease of pigs called hog-cholera, pig-typhoid, pneumo-enteritis of the pig, etc. Under these names at least two distinct diseases have been described. In one form, the hog-cholera or swine-plague of the United States, Klein discovered a motile, very slender *B.* (the *B. minimus* of Klebs or *B. ex pneumo-enteritide suis*), resembling the *B. anthracis* and *B. subtilis*, but differing in having cylindrical spores only 0·5 μ in length, and again another spore-bearing *B.* from 1 to 5 μ long, and having a diameter one third or one fourth as great. Neither of these is probably the characteristic organism of the disease, and they are probably derived from impurities, perhaps putrefactive products, mixed with the tissue-cultivations. The true organism is probably a *Bacterium.* See Bacterium *of swine-plague.* The second form of hog-cholera, occurring on the continent of Europe, is the rouget of the French and Rothlauf of the Germans, and of this a specific *B.* has been isolated. See *B. of rouget.* [Klebs (B, 108); B, 238; D. E. Salmon, "Rept. of the U. S. Dept. of Agricult.," 1884, p. 258, and 1885, p. 476 (B).] See also *B. suis.*—**B. of hydrophobia.** See *B. lyssæ.*—**Bacilli of ice.** Bacilli, capable of development and reproduction, found in ice, especially when bubbly or containing snow. Such ice was found to contain *B. prodigiosus*, *B. typhi abdominalis*, a small fluorescent *B.*, and two other species. ["Ztschr. f. Hyg.," i, 1886 (B); T. M. Prudden, "Med. Rec.," "Jour. of the Roy. Mic. Soc.," June, 1887, p. 455 (B).]—**B. of intestinal diphtheria in rabbits.** Fr., *bacille de la diphthérie intestinale du lapin.* Ger., *B. der Darmdiphtherie der Kaninchen.* A species 3 to 4 μ long, 1 to 1·4 μ thick, having no specially characteristic methods of growth, and imbibing coloring matters somewhat less readily than other *Schizomycetes.* It produces in rabbits and guinea-pigs diphtheritic ulceration of the small intestine with accumulation of the micro-organisms in the blood, liver, and spleen. [Ribbert, "Dtsch. med. Wchnschr.," No. 8, 1887; "Ctrlbl. f. d. med. Wssnsch.," May 14, 1887 p. 380 (B).]—**B. of jequirity ophthalmia.** Ger., *B. der Jequirity-Ophthalmie.* A motile *B.*, 2·5 to 4·5 μ in length and 0·6 μ thick, found by Sattler in jequirity infusion. The shorter *Bacilli* have terminal spores, the longer one or two central spores, and some long filamentous forms a series of spores. The *B.* grows readily on gelatin, which it liquefies, and on various other nutritive media. It was formerly believed to be the cause of jequirity ophthalmia, but the latter is now thought to be due to the action of a soluble toxic principle (jequiritin), the *Bacilli* being inert. [B, 238.]—**Bacilli of lactic-acid fermentation.** Fr., *bacilles de la fermentation lactique.* Ger., *Bacillen der Milchsäuregährung. Bacilli* which convert milk-sugar into lactic acid. Several have this property, including the *B. acidi lactici*, the *B. prodigiosus*, the *B. caucasicus*, the *B. oxytocus perniciosus*, and others. [B, 238.]—**B. of leprosy.** See *B. lepræ.*—**B. of lichen ruber.** A *B.* of excessive tenuity found by Lassar in thick masses and tubular agglomerations in the lymph-passages in some cases of lichen ruber. ["Dtsch. med. Wchnschr.," No. 32, 1885 (B).]—**B. of lymph in fishes.** A short motile *B.* observed by Olivier and Richet in the lymph of certain fishes. ["Comptes rend.," xcvii; "Bot. Jahresb.," 1883, i, p. 311 (B).]—**B. of malaria.** See *B. malariæ.*—**B. of malignant œdema.** See *B. œdematis maligni.*—**B. of necrosis of the liver in badgers.** A *B.* somewhat larger than the *B. anthracis* and containing oblong-cylindrical spores, found by Eberth in the necrotic liver of a badger. [Klebs (B, 108).]—**B. of necrosis of the liver in guinea-pigs.** A *B.* found by Eberth in the necrotic liver of a guinea-pig. It was somewhat ovate in shape, and rounded at each extremity. Spore-bearing *Bacilli*, containing one, sometimes two, terminal or medial spores, and presenting fusiform dilatations (*clostridium* form), were observed. [B, 108, 238.]—**Bacilli of osteomyelitis.** *Bacilli* found by Kraske in some cases of osteomyelitis. One is a thick *B.*, forming whitish flat colonies on gelatin-plates, especially on the surface, and does not liquefy the gelatin. In old cultivations it occurs usually in the clostridium form and 2 or 3 terminal or medial spores. Another is a fine motile *B.* liquefying gelatin and forming upon it whitish colonies. A third *B.* (probably an impurity) occurs as short oval or centrally constricted rods which form whitish colonies and do not liquefy the gelatin. A fourth is a short, thick *B.* of varying length. Some of these, together with various coccus forms, are regarded by Kraske as the determining causes of osteomyelitis. ["Arch. f. klin. Chir.," xxxiv (1887), iv. p. 701 (B).]—**B. of phthisis.** See *B. tuberculosis.*—**B. of pink-eye.** See *B. of conjunctival catarrh.*—**B. of pneumonia.** See *B.* (Bacterium) *pneumoniæ*, *B. pneumonicus agilis*, and *B. septicus sputigenus.*—**B. of pseudo-œdema.** Ger., *Pseudo-Oedembacillus.* A species found along with the *B. œdematis maligni* in the fluid of malignant œdema and the tissues of mice inoculated with garden-earth. It is thicker than the *B. œdematis maligni* and develops spores (usually two in each *B.*) without undergoing any change in shape. It liquefies gelatin and the cultivations emit a gas which has an odor of old cheese and probably consists principally of butyric acid. Injected into rabbits or mice, this *B.* produces a fatal affection. [P. Liborius, "Ztschr. f. Hyg.," i, 1886, p. 115 (B).]—**B. of pseudo-tuberculosis in rabbits.** Ger., *B. der Pseudo-tuberculose der Kaninchen.* A *B.* found in the nodular deposits characteristic of the pseudo-tuberculosis [Eberth] (*tuberculose zoogléique* [Malassez and Vignal]) of rabbits. It is identical with the zooglœa forms observed by Malassez and Vignal in the same disease. ["Arch. f. path. Anat. u. Phys. u. f. klin. Med.," ciii, p. 488; "Jahresb. über d. Leist. u. Fortschr. in der ges. Med.," xxi, 1, p. 285 (B).]—**B. of puerperal fever.** Fr., *bacille de la fièvre puerpérale.* Ger., *B. der Puerperalfieber.* A short *B.* of very varying dimensions found in two cases of puerperal sepsis. On nutritive media it produced peculiar cultivations which, inoculated in mice and rabbits, caused death with accumulation of the *Bacilli* in the blood. [E. Fränkel, "Dtsch. med. Wchnschr.," No. 34, 1885; "Ctrlbl. f. d. med. Wssnsch.," No. 17, 1886, p. 300 (B).] Cf. *B. puerperalis* and Leptothrix *of puerperal fever.*—**Bacilli of pus.** Fr., *bacilles du pus.* Ger., *Eiterbacillen. Bacilli* found in pus. Such are the *B. pyogenes fœtidus*, the *B. pseudo-pneumo-*

nicus, the *B. saprogenes III*, the *B. pyocyaneus*, and a *B.* discovered by E. Harold resembling the *B. pyocyaneus* in producing a greenish coloring matter when cultivated in gelatin, but differing in not liquefying the latter and in possessing pathogenic properties. [B, 238; "Med. Times," Oct. 30, 1886 (B).]—**Bacilli of putrefaction.** Ger., *fäulnisserregende Bacillen. Bacilli* producing or associated with the putrefactive decomposition of albuminous matters. Such are the *B. amylobacter, B. butyricus, B. prodigiosus, B. fluorescens putidus, B. fluorescens liquefaciens, B. ureæ, B. saprogenes* (I, II, and III), *B. coprogenus fœtidus, B. pyogenes fœtidus, B. pyocyaneus, B. ianthinus* (*Bacterium ianthinum*), and the *B.* of allantiasis. [B, 238.]—**B. of pyæmia.** Fr., *bacille de la pyémie.* Ger., *B. der Pyämie.* A *B.* found by Beltzow in pyæmia. Two forms are described, one resembling the *B. œdematis maligni*, the other intermediate in size between the *B. tuberculosis* and *B. murisepticus.* ["Ctrlbl. f. d. med. Wssnsch.," May 31, 1884, p. 370 (B).]—**B. of rabies.** See *B. lyssæ.*—**B. of red bread, B. of red milk.** See *B. prodigiosus.*—**B. of rheumatism.** See *B. rheumarthritidis.*—**B. of rhinoscleroma.** See *B. rhinoscleromatis.*—**B. of rouget.** Fr., *bacille du rouget* (ou *mal rouge du porc*). Ger., *Rothlaufbacillus, B. des Schweinerothlaufs.* A *B.* found in the blood and tissues of pigs affected with rouget (Rothlauf, malignant erysipelas of the pig), a disease usually confounded with the hog-cholera or swine-plague of the United States, but differing from the latter in the absence of ulcerations of the large intestine. The *B.* described by Löffler and Schütz is 0·6 to 1·8 μ long, 0·2 μ or more in thickness, resembling greatly the *B. murisepticus* (with which, according to Schütz, it is identical) in form, arrangement, and development under cultivation. Its cultivations in gelatin present a mass of radiating reticulate fibrillæ, so that needle-cultures have the aspect of the brushes used for cleaning test-tubes. It is usually non-motile, although said to become motile on cultivation, and apparently forms spores. Inoculation in pigs, rabbits, mice, sheep, and doves produced death with accumulation of the *Bacilli* in the blood. Pasteur, who obtained a microbe of different morphological characters from that of Löffler and Schütz, a result due probably to the use of impure cultivations, has secured in swine partial immunity from the effects of the disease by protective inoculations with virus cultivated upon rabbits. This protective virus, according to Salmon, contains not Pasteur's microbe, but a small *B.* (perhaps the *B.* of Löffler and Schütz), and is not efficacious against American hog-cholera (swine-plague). [B, 209, 238; D. E. Salmon, "Rept. of the Dept. of Agric.," 1884, p. 258 (B).] See also *B. suis, B. of hog-cholera, B. of Wildseuche*, and Bacterium *of swine-plague.*—**B. of scarlet fever.** A short motile *B.*, resembling the *B. œdematis maligni*, and on cultivation closely resembling the *Proteus* of Hauser, if not identical with it; found by Crooke in the nasal mucus and the tissues of the neck in a case of angina Ludovici complicating scarlet fever. ["Ctrlbl. f. Bacteriol. u. Parasitenk.," i, 1887, No. 12, p. 381 (B).]—**B. of senile gangrene.** Fr., *bacille de la gangrène sénile.* A thin, moderately long *B.*, having a terminal or medial spore, found in senile gangrene in the ichorous discharge, in the tissues along the line of demarkation, in the lymphatic interspaces of the skin and subcutaneous tissue, and in the heart-blood. It is colored readily by blue and red aniline dyes. Injected into the subcutaneous tissue of mice, rabbits, and guinea-pigs, it produces death with extensive and progressive ulceration of the skin and the formation of a gangrenous eschar, but without intestinal lesions. [Tricomi, "Riv. intern. di med. e di chirurg.," 1886, 2–4; "Ctrlbl. f. Bacteriol. u. Parasitenk.," i, 1887, No. 5, p. 150 (B).]—**B. of septicæmia.** Fr., *bacille de la septicémie.* Ger., *B. der Septicämie.* It., *bacillo della setticemia.* See *B. murisepticus, B. cuniculicidus, B. septicus sputi*, etc.—**B. of septicæmia in man** [Klein]. A *B.* found in the blood-vessels of the swollen lymph-glands in septicæmia and forming rods or chains of rods 1 to 2·5 μ long and 0·3 to 0·5 μ thick. [B, 273.]—**B. of swine-plague.** See *B. of hog-cholera, B. of rouget*, and Bacterium *of swine-plague.*—**B. of symptomatic charbon.** Fr., *bacille* (ou *bactéridie*) *du charbon symptomatique.* Ger., *B. des Rauschbrandes.* It., *bacillo del carbonchio sintomatico.* Syn.: *Clostridium of symptomatic charbon.* A motile *B.*, 3 to 5 μ long and 0·5 to 0·6 μ thick, occurring in the serous fluid in the symptomatic charbon (Rauschbrand) of cattle. It reproduces by the formation of ovoid shining spores, over 0·6 μ in diameter, in the extremity of the *B.* which becomes swollen so as to take on the appearance of the clapper of a bell (*clostridium* form). Inoculations with cultivations or liquids containing this *B.* produce the original disease, and such liquids can be subjected to an artificial diminution of intensity so that inoculation with them produces a mild type of the disease which is apparently a preventive against subsequent infection. According to W. Koch, it is found in progressive gangrenous emphysema. See, however, *B. œdematis maligni.* T. Kitt has discovered in symptomatic charbon actively motile *Bacilli*, from 10 to 15 μ in length and 3 μ broad, which reproduce by the formation of terminal shining spores, the *B.* swelling at the time of sporification so as to assume a drumstick shape. [B, 237, 238; "Ctrlbl. f. Bacteriol. u. Parasitenk.," i, 1887, No. 2, p. 43, and Kitt, *ibid*, No. 23, p. 684, No. 24, p. 716, No. 25, p. 741 (B).]—**B. of syphilis.** See *B. syphilidis.*—**B. of Texas cattle-fever.** A *B.* found in the infectious disease of cattle called Texas cattle-fever. Several forms were observed by Detmers. ["Rept. of the Dept. of Agric.," 1880, p. 595 (B).]—**Bacilli of the air.** Fr., *bacilles de l'air.* Ger., *Luftbacillen. Bacilli* found in the atmosphere; 11 varieties, differing in size, form, and development under cultivation, are described by Babes. [B, 209.]—**B. of the blood.** Fr., *bacille du sang.* Ger., *Blutbacillus, B. des Blutes.* A species found by Hoffmann in the blood both in health and in disease. It occurs under the forms of *Micrococci*, 0·5 μ to 3 or 4 μ in diameter, of diplococci, triplococci, and chains of cocci either in apposition (*Torula* form) or strung together by a connecting filament, and also in the form of *Bacilli.* The latter are from 1·5 to 3 μ in length, 0·5 to 1·5 μ thick, having slightly irregular contour, and sometimes presenting a terminal knob-like dilatation. These *Bacilli* exhibit active serpentine movements and break up very rapidly into cocci and spores. The latter are round or oval, 0·3 to 0·5 μ in diameter, are extruded from the *Bacilli* both at the extremities and laterally, and after being set free exhibit characteristic spontaneous movements. Intermediate forms between cocci and *Bacilli* are also observed as well as branched rod-forms (? involution-forms [B]) and zooglœa forms. This *B.* and its spores become lodged in the white blood-corpuscles and are transported by them from one part of the body to another. In diseased conditions of the red blood-corpuscles they also attach themselves to the latter and then imbibe the coloring matter of the latter and become red. Hoffmann considers them identical with the *B. malariæ* and supposes that, although normally present in the blood, they exert, when greatly increased in number, a destructive influence upon the blood-corpuscles and produce a morbid condition which is the predisposing cause of many diseases, *e. g.*, malarial fever. Quinine has been found to exert a restraining influence upon the movements of these *Bacilli.* [B, 53.]—**Bacilli of the fæces.** Fr., *bacilles des selles.* Ger., *Bacillen aus Fœces.* Various species of *B.* found in the fæces. Two forms, discovered by Bienstock (*B.* I and *B.* II), resemble the *B. subtilis* in size and appearance, but are not motile. They reproduce by the formation of one, rarely two, eccentrically placed spores of the size of those of the *B. subtilis.* In nutritive gelatin the *B.* I forms a reticulum of anastomosing whitish-yellow filaments resembling the net-work of vessels in the mesentery, and *B.* II shining white colonies with rapidly growing racemose offshoots. Other *Bacilli* found in the fæces are the *B. cavicidus*, the *B. putrificus coli*, the *B. coprogenes parvus*, the *B. subtilis* (in the fæces of *Herbivora*), and the *B. coprogenes fœtidus.* [B, 122, 238.] See also Bacterium *coli commune* and *B. lactis aerogenes.*—**Bacilli of the intestine.** Fr., *bacilles de l'intestine.* Ger., *Darmbacillen. Bacilli* living in the intestinal canal or walls. Schottelius's *B.* of the intestine is the *B. coprogenes fœtidus.* Miller's *B.* of the intestine is the *B. aerogenes.* Babes describes six varieties of intestinal *Bacilli*, some of which are apparently to be referred rather to the genus *Spirillum*, as they closely resemble the *Spirillum choleræ asiaticæ;* another resembles the *B. typhi abdominalis*, but is twice as large, and forms brownish colonies on gelatin without liquefying it; and another is a small, very slender, slightly curved *B.*, which liquefies gelatin, with the formation of a yellowish-brown color. [B, 209, 238.] See also *Bacilli of the fæces.*—**B. of the lungs of cattle.** A short, thick *B.* found by Lüstig in the lungs of healthy and diseased cattle. It gradually liquefies gelatin and imparts to it various colors. ["Ctrlbl. f. d. med. Wssnsch.," No. 12, 1885, p. 193 (B).]—**B. of the meconium.** A spore-bearing *B.* which peptonizes albumen, found by Escherich in the meconium and giving place suddenly to the *Bacteria* of the fæces (*Bacterium coli commune* and *Bacterium lactis aerogenes*). ["Versamml. dtsch. Naturf. u. Aerzte," 1886; "Dtsch. med. Wchnschr.," May 27, 1886, p. 365 (B).]—**Bacilli of the mouth.** Fr., *bacilles de la bouche.* Ger., *Mundhöhlebacillen. Bacilli* found in the buccal cavity. Various forms have been described by Miller. [B, 238.] See also *B. septicus sputi, B. crassus sputigenus, B. lyssæ*, and cf. Bacterium *septicum sputigenum.*—**B. of the pneumo-enteritis of the pig.** Lat., *B. ex pneumo-enteritide suis.* See *B. of hog-cholera.*—**B. of the septicæmia of mice.** See *B. murisepticus.*—**B. of the septicæmia of rabbits.** See *B. cuniculicidus.*—**B. of the smegma.** Fr., *bacille du smegma.* Ger., *Smegmabacillus.* A *B.* found in the smegma of the prepuce and the vulva, closely resembling in morphological characters and behavior toward coloring-agents the *B. syphilidis.* [B, 209, 238; "Ctrlbl. f. d. med. Wssnsch.," 1886, p. 326 (B); M. Bender, "Ctrlbl. f. Bacteriol. u. Parasitenk.," No. 12, 1887, p. 357 (B); Ritter. *ib.*, No. 2, p. 42 (B).]—**Bacilli of the soil.** Fr., *bacilles de la terre.* Ger., *Erdebacillen, Bodenbacillen.* Various *Bacilli* found in the earth, including *B. tetani, B. septicus agrigenus, B. mycoides, B. septicus*, the *B. œdematis maligni*, and, probably, also the other *Bacilli* (*B.* of pseudo-œdema, *B. fœtidus, B. muscoides*, and *B. polypiformis*) found by Liborius associated with the latter; also, according to Adametz, the *B. subtilis, B. amylobacter*, and a third unnamed species of *B.* [B, 238; "Ctrlbl. f. Bacteriol. u. Parasitenk.," i, 1887, No. 1, p. 8 (B); J. Arnould, "Ann. d'hyg. publ.," 1885, p. 401 (B).]—**Bacilli of the sputum.** See *Bacilli of the mouth.*—**Bacilli of the urine.** Fr., *bacilles de l'urine.* Ger., *Bacillen des Harnes.* Various *Bacilli* found in the urine; especially the *B. ureæ* (*q. v.*). [B.]—**B. of tuberculosis.** See *B. tuberculosis.*—**B. of tuberculosis of vines.** Fr., *bacille de la tuberculose des vignes.* A short, nearly spherical, motile *B.*, sometimes disposed in pairs, in rows, or in chaplet form, regarded by Corvo as the cause of the disease of vines usually ascribed to the *Phylloxera.* [L. de A. Corvo, "Comptes rend.," ci (1885), p. 528 (B).]—**B. of typhoid fever.** See *B. typhi abdominalis.*—**B. of ulcerative stomatitis of cattle.** A *B.* found in masses in the cutaneous tissue, the mucous surfaces, and the lungs of young cattle suffering from an infectious ulcerative disease of the mouth and tongue. The *Bacilli* were found to transmit the disease. [A. Lingard and A. E. Bat, "Lancet," Apr. 14, 1883, p. 634 (B).]—**B. of vagus-pneumonia.** See *B. pneumonicus agilis.*—**B. of verruga peruana.** A *B.* found, together with chains of *Micrococci*, in the intercellular spaces and in the blood-vessels of the nodules of verruga peruana, the latter being supposed to be produced by the obstruction of circulation and subsequent inflammatory reaction set up by the micro-organisms. [Izquierdo. "Arch. f. path. Anat. u. Phys. u. f. klin. Med.," xcix, p. 411; "Ctrlbl. f. d. med. Wssnsch.," 1885, p. 344 (B).]—**Bacilli of water.** Fr., *bacilles de l'eau.* Ger., *Wasserbacillen.* Various *Bacilli* found in the water; Becker and Eisenberg describe: 1. The violet *B.*, a motile *B.* forming slender rods four times longer than it is broad, and with rounded ends, producing a violet-colored pigment, and capable of exciting the coagulation of casein in milk. 2. The red *B.*, a very motile *B.* of medium size and with obtuse ends, producing a brownish-red pigment. 3. The greenish-yellow *B.*, a very motile species occurring as slender small rods, which produce a greenish-yellow fluorescent coloring matter. 4. An aerogenic *B.*, forming very motile small rods which liquefy gelatin with

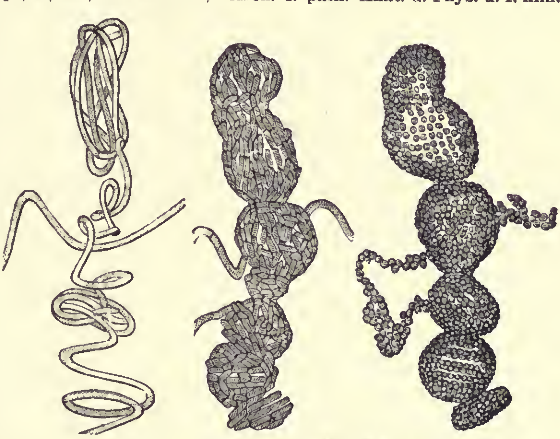
the formation of gas. 5. A liquefying *B.*, forming short, rather thick, very motile rods which liquefy gelatin very rapidly and produce putrefactive decomposition. 6. A greenish-yellow *B.*, forming small, slender, motile rods, which produce a greenish-yellow pigment in gelatin. 7. A fluorescent *B.*, forming short, slender, nonmotile rods, with rounded ends, and producing a mother-of-pearl-like fluorescence in gelatin-cultivations. 8. A white *B.*, forming short, motile rods, with blunt ends, which form minute, round, white colonies on gelatin. Only one of these varieties (No. 7) is known to produce spores, and the others are perhaps rather to be referred to the genus *Bacterium*. The first five species liquefy gelatin, and in this resemble three varieties described by Babes, the first of which is a slightly curved, scarcely motile organism, resembling the *Spirillum choleræ asiaticæ*, but more slender, and forming brownish-yellow colonies on gelatin-plates, and whitish plicate colonies on agar-agar; the second, also resembling the *Spirillum choleræ asiaticæ*, but larger and from 0·3 to 0·4 μ thick, forms yellow, very rapidly growing colonies on gelatin, which it stains green; the third is 2 to 4 μ long, 0·5 to 0·6 μ broad, has pointed extremities, and forms rounded lemon-yellow colonies on gelatin. De Malapert-Neuville has recently described a large number of different *Bacilli* in water. [B, 122, 209; Becker, "Jahrb. der in- u. ausl-ges. Med.," ccix, 1886, p. 281 (B); "Ann. d'hyg. publ.," March, 1887, p. 193 (B).] See also BACTERIA *of water*.—**B. of whooping-cough.** Fr., *bacille de la coqueluche*. Ger., *B. des Keuchhustens.* A short ellipsoid or centrally contracted *B.* found by C. Burger in the sputum of whooping-cough. ["Berl. klin. Wchnschr.," No. 1, 1883; "Ctrlbl. f. d. med. Wssnsch.," No. 25, 1883 (B).—**B. of Wildseuche.** A very small ovoid *B.*, or *Bacterium*, closely resembling *B. cuniculicidus*, found by Löffler in the disease called *Schweineseuche* (European hog-plague) and in *Wildseuche* (multiple gangrenous broncho-pneumonia of cattle, hogs, and horses). According to Hueppe, Schweineseuche, Wildseuche, and probably also chicken-cholera and rabbits' septicæmia are modifications of a single disease, septicæmia hæmorrhagica; and hence this micro-organism would be identical with *B. cuniculicidus* and *B. choleræ gallinarum*. ["Dtsch. med. Wchnschr.," No. 14, 1887, p. 287 (B).]—**B. of xerosis epithelialis conjunctivæ.** Fr., *bacille du xerosis conjunctivæ*. Ger., *B. der Xerosis epithelialis conjunctivæ.* A *B.* found by Leber, Kuschbert, and Neisser in the conjunctival secretion in the so-called xerosis epithelialis conjunctivæ. As described by the latter authors, it is of about the length of the *B. murisepticus* and of varying breadth, is surrounded by a fatty envelope, is disposed in groups but not in chain-form, and multiplies by division chiefly if not entirely. According to Leber and Schulz, it has no fatty envelope, and is often disposed in pairs, forming a pseudo-filament or chain. According to Schleich, it is 3 to 5 μ in length, and less than half as broad, has rounded ends, is often during the stage of division found arranged in pairs, seldom in threes or fours, in chain-form, and reproduces by endogenous spore-formation. According to the recent researches of Franke, Fränkel, and others, the *B.* of Kuschbert, Neisser, and Leber is found in xerosis conjunctivæ and also in various forms of conjunctivitis and keratitis, and probably has no ætiological connection with the former disease, although this connection is still asserted by the first-named authors. According to them also, the *B.* has no fatty envelope, but consists of two different substances, one a matrix which is only lightly colored by pigments, the other under the form of imbedded rounded particles which are deeply stained. It occurs singly or in chains of 2, 3, or 4 members, and probably is not reproduced by spore-formation. [B, 238; "Ctrlbl. f. Bacteriol. u. Parasitenk.," i, 1887, No. 6, p. 177, and No. 13, p. 389 (B).]—**B. of yellow fever.** Fr., *bacille de la fièvre jaune*. Ger., *B. der Gelbfieber.* A short *B.* resembling the *B. typhi abdominalis* and with large terminal spores, found by Babes in the mucous membrane of the small intestine in two cases of yellow fever. [B, 238.]—**B. of yellow milk.** See BACTERIUM *synxanthum*.—**B. oxytocus perniciosus** [Wysskowitsch]. A *B.* found in milk which had stood for a long time. It formed short rods rather thicker and shorter than the *B. acidi lactici* and with rounded ends. It produces the lactic-acid fermentation in milk, and, injected into the circulation of rabbits, causes death with hæmorrhagic inflammation of the intestine. [B, 238.]—**B. panificans** [Laurent]. A species said to cause the rising of bread. ["Med. Press of West. N. Y.," July, 1886 (B).]—**B. parvus ovatus** [Löffler]. A very small *B.*, resembling in appearance the *B. cuniculicidus*, found in a pig dead of a disease resembling rouget, and characterized by excessive œdema of the skin, bluish-red discoloration of the abdominal walls, and congestion of the gastric mucous membrane. Inoculations of this *B.* were fatal to mice, guinea-pigs, and rabbits, producing in the latter the same symptoms as those induced by the *B. cuniculicidus*, and reproduced in pigs the original disease. [B, 238.]—**B. pasteurianus.** See BACTERIUM *pasteurianum*.—**B. pneumoniæ.** See BACTERIUM *pneumoniæ cruposæ*.—**B. pneumonicus agilis** [Schou]. A short, thick, elliptical, very motile *B.* found in the lungs of rabbits in which pneumonia had been produced by section of the pneumogastric nerve. It rapidly liquefies gelatin with the formation of round granular colonies and forms a reddish chamois-colored layer on potatoes. Introduced into the respiratory tract of rabbits, it produces pneumonia. [B, 122, 238.]—**B. polymyxa.** Syn.: *Clostridium polymyxa* [Prazmowski]. A species resembling closely in form, development, and spore-production the *B. amylobacter*. It also contains granulose if cultivated in nutritive media containing starch. Ordinarily it does not excite fermentation, but if the access of oxygen is prevented, it produces a peculiar fermentation in dextrin-solutions, and in infusions of potatoes and lupine-seeds, and dissolves cellulose and starch. It forms a pellicle on the surface of nutrient solutions and on cooked vegetables an extended layer of cartilaginous consistence. [B, 237, 238.]—**B. polypiformis** [Liborius]. A slender *B.* of varying length and 1 μ thick, found along with the *B. œdematis maligni*. It exhibits very slight spontaneous movement, does not form filaments, and generates oval or cylindrical spores. It is anaerobic, does not liquefy gelatin, and forms small yellow colonies with bent and serpentine processes. Its cultivations do not develop gas. ["Ztschr. f. Hyg.," i, p. 115 (B).]—**B. Preussii** [Ciesielski]. A *B.* found in the larvæ of bees and believed to cause the disease called foul-brood. Each *B.* contains 4 spores. Perhaps the same as *B. alvei*. ["Jour. of the Roy. Micr. Soc.," Feb., 1887, p. 134 (B).]—**B. prodigiosus.** Fr., *bacille du lait (ou du) pain rouge*. Ger., *B. der rothen Milch, B. des rothen Brodes, Wunderblut, Hostienblut.* Syn.: *Micrococcus prodigiosus* [Cohn] (seu *imetrophus* [Trevisan]), *Monas* [Ehrenberg] (seu *Palmella* [Mont.]) *prodigiosa*, *Zoogalactina imetropha* [Sette], *Bacteridium prodigiosum* [Schröter]. A species, perhaps more properly referred to *Bacterium*, found upon starchy food-stuffs (bread, rice, potatoes, etc.), and also in milk and giving both a blood-red color, causing the so-called "blood rain," "bleeding bread," the "bleeding host," and "red milk." It consists of oblong-elliptical cells having a breadth of 1 μ in their thickest part and growing into short rod-forms sometimes united into pseudo-filaments. It liquefies gelatin, forming rounded reddish-brown colonies, and covers potatoes with a gelatinous blood-red coating. It decomposes albuminoids with the evolution of a gas having the odor of trimethylamine. Its pigment is insoluble in water and soluble in alcohol. It is not pathogenetic, and has been recently employed in bacterio-therapy as an antagonist to the *B. anthracis*. [B, 73, 237, 238; A. D. Pawlowsky, "Arch. f. path. Anat. u. Phys. u. f. klin. Med.," cviii, 1887, 3, p. 494 (B).]—**B. pseudopneumonicus.** See BACTERIUM *pseudopneumonicum*.—**B. puerperalis.** A motile *B.* discovered by Spillmann in the blood of a woman who had died in childbed. It is said to develop conidia. [Engel, "Comptes rend.," lxxxviii, 1879, p. 976 (B).]—**B. putrificus coli** [Bienstock]. Ger., *B. der Eiweisszersetzung.* A *B.* found constantly in the fæces forming short or long (3 μ) actively motile rods, sometimes united into filaments, and developing a shining globular spore in the extremity of the rod which previously becomes swollen, assuming a drum-stick form. On agar-agar it forms colonies having at first a nacreous lustre and afterward becoming yellowish. It decomposes albuminoids into ammonia, amines, the fatty acids and the amido-acids of the fatty series, tyrosine, phenol, paroxyphenylpropionic acid, paroxybenzoic acid, indol, and skatol; and further decomposes the proximate products of this decomposition into the ultimate products. [B, 122, 238.]—**B. pyocyaneus.** Fr., *bacille du pus vert.* Ger., *B. des grünblauen Eiters.* Syn.: *Micrococcus pyocyaneus* [Gessard], *Bacterium æruginosum* [Schröter]. A species of *B.* found in blue or greenish pus, forming slender small rods of varying length, sometimes united in twos or threes, but oftener in irregular heaps. It reproduces by spore-formation. It liquefies gelatin and imparts to it a beautiful green fluorescence and forms rusty-brown colonies on potatoes. The coloring matter is pyocyanine (*q. v.*). It kills guinea-pigs when injected into the peritoneal cavity. [B, 122, 237, 238.]—**B. pyogenes fœtidus** [Passet]. A short, slowly motile *B.* with rounded ends found in fœtid pus. It is 1·5 μ long, 0·6 μ broad, frequently united in groups of 2 or more, and apparently reproduces by means of endogenous spores. It forms grayish-white colonies on gelatin without liquefying the latter and shining yellowish-brown colonies on potatoes. All its cultivations emit a fœtid odor. Injected into mice and guinea-pigs, it produces local suppuration and systemic effects, and is often fatal. [B, 122, 238.]—**B. ramosus liquefaciens.** A rather large, slowly motile *B.*, occurring as an accidental impurity on gelatin-plates. It liquefies gelatin with the formation of round, oval, or pear-shaped colonies which are surrounded by radiating, brush-like projections and are associated with a circumscribed funnel-shaped excavation of the gelatin. [B, 238.]—**B. rheumarthritidis, B. rheumarthritis.** A short cylindrical *B.*, found in the purulent and serous effusion into the joints in rheumatism and believed to be the cause of this disease. The *Bacilli* occur united into thread-forms and reproduce by endogenous spore-formation. [B. 206.]—**Bacilli retinæ.** The rods of the retina. [L, 115.]—**B. rhinoscleromatis.** Fr., *bacille du rhinosclérome.* Ger., *B. des Rhinoskleroms.* A *B.* found by Cornil and Alvarez in the large disease-cells, and also lying freely in the tissues in rhinoscleroma. It occurs as short oval rods (2 to 3 times as long as broad), or longer rods (2·5 to 3 μ long and 0·4 to 0·5 μ broad [Cornil and Alvarez]), usually non-motile, but capable of becoming motile on cultivation [Wolkowisch], and sometimes united into pseudo-filaments. The *Bacilli* are capsulated and the shorter ovoid forms consist usually of two or more granules (diplococci) contained in a common envelope, and thus resemble closely the *Bacterium pneumoniæ cruposæ*. The cultures on gelatin and potatoes also resemble closely those of the latter organism, and inoculations from them in animals are said to produce similar effects to those induced by the latter. Although the *B.* was said by Cornil and Alvarez to contain spores, these are probably not present, and for this reason, as well as for its resemblance to the *Bacterium pneumoniæ crouposæ*, with which, according to Paltauf and Eiselberg, it is identical, this organism should probably be referred to the genus *Bacterium*. [B, 122; R. Paltauf in "Ctrlbl. f. Bacteriol. u. Parasitenk.," i, 1887, No. 8, p. 236 (B); N. Wolkowisch, *ib.*, No. 8, p. 237 (B); M. Bender, *ib.*, No. 19, p. 563, "Dtsch. med. Wchnschr.," No. 11, 1887, p. 220 (B).]—**B. ruber.** 1. Of Frank, an actively motile *B.*, 6 to 8 μ long and 1 μ broad, occurring on boiled rice and imparting to it a bright-red color. It occurs singly or in chains of 2 or 4 and forms 2 to 4 spores. [B, 30, 238.] 2. Of Becker, the red *B.* of water. [B.] See *Bacilli of water*.—**B. ruber indicus.** See *B. indicus ruber*.—**B. salivarius septicus** [Biondi]. A short, thick, elliptical, rod-shaped organism found in normal human sputum; said to produce local irritation and fatal septicæmia when injected into the blood of rabbits and mice. ["Breslauer ärztl. Ztschr.," Sept. 24, 1887, p. 205 (B).] It is perhaps identical with *Bacterium septicum sputigenum*, or with *B. crassus sputigenus*. [B.]—**B. saprogenes.** Fr., *bacille saprogène.* Ger., *Fäulnissbacillus.* A name given by Rosenbach to 3 *Bacilli* which are found associated with putrefactive processes. *B. saprogenes I* is found as an accidental impurity in fœtid secretions (the white plugs from the pharyngeal follicles). It occurs as quite large rod-forms with large terminal spores. In needle-cultivations on agar-

agar and in blood-serum it forms slowly growing colonies which exhale a marked putrefactive odor. It is without pathogenetic properties. The *B. saprogenes II*, somewhat shorter and slenderer than *I*, is found in fœtid foot-sweat, and in agar-agar forms rapidly growing colonies which exhale an odor of foot-sweat. In the presence of air it decomposes albumin and meat with the evolution of putrefactive gases; and the same decomposition occurs, but more slowly, if air is excluded. Injected into the joints and pleural cavity of rabbits, it produces purulent inflammation and death. Cf. *B. fœtidus*. The *B. saprogenes III*, short, thick, and with rounded ends, is found in the putrid pus from suppurating bone and gangrenous surfaces. It forms on agar-agar a grayish, almost fluid, coating, accompanied with a repulsive putrefactive odor, and a similar odor is observed in all nutritive fluids except milk. It causes putrefactive decomposition of albumin, especially in the presence of air. Injected in the joints of rabbits, it produced purulent inflammation. [B, 122, 238.]—**B. septicæmiæ.** See *B. murisepticus*.—**B. septicus** [Klein]. A non-motile *B.* found in soil, putrid blood, and putrid albuminous fluids. It is anaerobic, develops into threads and *Leptothrix* forms, and reproduces by means of spores. Perhaps the *B. fœtidus* [Liborius]. [B, 273.]—**B. septicus agrigenus.** A *B.* found in garden-earth resembling the *B. cuniculicidus* and *B. choleræ gallinarum* in morphological characters. On gelatin-plates it forms granular disc-like cultivations with yellowish-brown centre and grayish-yellow periphery. Inoculated in mice, field-mice, and rabbits, it produces death with symptoms of septicæmia, and shows a special disposition to attack the red blood-corpuscles. [B, 238.]—**B. septicus sputi.** Ger., *B. septicus aus Speichel*. A name applied to two species of *B.* obtained by Kreibohm from the secretions of the buccal cavity of man, and distinguished from other species by not being capable of cultivation on any known nutritive medium. The first species, closely resembling the *B. cuniculicidus*, and showing with stains a differentiation between the colored poles and a bright central zone, produces a septic affection very fatal to mice and field-mice, less fatal to rabbits, and not at all injurious to chickens. The second species, very similar to the *B. choleræ gallinarum*, is very fatal to mice, but does not affect rabbits. [B, 238.]—**B. septicus sputigenus** [Fränkel]. See Bacterium *septicum sputigenum*.—**B. sputigenus crassus.** See *B. crassus sputigenus*.—**B. subtilis** [Cohn]. Fr., *bacille du foin*. Ger., *Heubacillus*. It., *bacillo del fieno*. Syn.: *Vilbio subtilis* [Ehrenberg], *Metallacter*



THE BACILLUS SUBTILIS. [B, 246.]

A, ciliated rods; *B*, fibrils of long rods; *C*, fibrils of articulated long and short rods and cocci; *D*, a fibril the rods of which show the formation of spores; *E*, spores surrounded by the rod-membrane; *F*, spores (*a*, before germination; *b*, *c*, *d*, in various stages of germination); *G*, a fragment of zooglœa pellicle (after Brefeld).



b. [Perty], *Bacterium subtile* [Zopf]. A *B.* found in the air, in dust, in vegetable infusions, especially an infusion of hay, as a white efflorescence on the dung of herbivora, and in many other situations. It forms rods of varying length and three times longer than broad, furnished with a flagellum at each end. The rods grow very rapidly and are usually united into straight or bent pseudo-filaments, which exhibit an active serpentine movement. In liquids rich in nutritive constituents the rods increase by division, in poorer nutritive liquids they reproduce by the endogenous formation of terminal or medial, ovoid, shining spores, 1·2 μ long and 0·6 μ broad, with their long axis coincident with that of the *B.* The spores, on being set free by the dissolution of the parent-rod, germinate by a lateral protrusion through the spore-membrane of the spore-contents, which grow in a direction perpendicular to that of the axis of the spore and form new rods. The *B. subtilis* liquefies gelatin and forms on gelatin-plates small light-colored colonies which have a dark centre surrounded by a bright zone with stellate radiating projections (star-fish form). On agar-agar it forms a thick, wrinkled, readily separable coating, and on potatoes a moist, granular, whitish layer. The *B. subtilis* resembles strongly in morphological characters the *B. anthracis*, differing from it chiefly in that its rods are motile, somewhat slenderer, and have rounded ends, and its spores germinate transversely and not in an axial direction. The cultures are also of different character. Buchner believed that by cultivation the *B. anthracis* can be converted into the *B. subtilis*; but this view is not now generally accepted. The *B. subtilis* has no pathogenetic properties. It peptonizes albumin and gelatin, and, according to Cohn and Fitz, gives rize to the butyric-acid fermentation of carbohydrates and to the fermentation by which glycerin is transformed into ethyl alcohol. These fermentations are now, however, generally believed to be due to other *Bacilli*, and the ferment-*B.* which Fitz identifies with the true *B. subtilis* is regarded as a distinct species (*B. fitzianus*). [B, 30, 237, 238; A. Fitz, "Ber. d. dtsch. chem. Gsllsch.," 17 (1884), p. 1188 (B).]—**B. suis** [Detmers]. Syn.: *Micrococcus suis* [Burril]. A species found in all the fluids of pigs affected with hog-cholera. It occurs as globular or oval micrococci, 0·7 to 0·8 μ in diameter, which develop into *Bacilli*, and subsequently into filamentous forms, 30 to 175 μ in length. These divide, producing sporiferous rods. The *Bacilli* are sometimes motile, sometimes non-motile, and occur in agglutinated viscous clusters. According to Burril, the filamentous form is rare, and the *Micrococci* occur usually single or in pairs. [H. E. Detmers, "Rept. Dept. Agric.," 1878, p. 331 (B); Burril, "Am. Nat.," xvii, 1883, p. 319 (B, 73).]—**B. syncyanus.** See *B. cyanogenus*.—**B. synxanthus.** See Bacterium *synxanthum*.—**B. syphilidis, B. syphilis** [Lustgarten]. Fr., *bacille de la syphilis*. Ger., *Syphilisbacillus*, *Luesbacillus*. It., *bacillo della sifilide*. A *B.* discovered by Lustgarten in syphilitic new formations, occurring as slightly arcuate or S-shaped rods, 3 to 7 μ long and 0·1 μ thick, often with wavy outline and capitate swelling at the extremities, and containing from 2 to 4 bright, oval, shining corpuscles, which are probably spores. The *Bacilli* are found singly or in groups of 2 to 8, in swollen lymphoid cells of twice the size of leucocytes. They have not yet been successfully cultivated in nutrient media, but exhibit toward coloring matters a peculiar reaction, which is believed to be due to an encasement of fat, acquired as a result of the natural habitat of the *Bacilli*. Although closely allied to, if not identical with, the *B.* occasionally found in the normal genital secretions (see *B. of the smegma*), the *B.* of Lustgarten is regarded as the probable cause of syphilitic infection. Aufrecht and Birch-Hirschfeld discovered a *B.* in syphilis which, according to Disse and Taguchi, is identical with one which they have since found in the blood. These results, however, are doubtful. Eve and Lingard also found a sporiferous *B.* consisting of long and short rods, the former made up of segments of differing constitution. This *B.*, which differs from that of Lustgarten, was capable of cultivation on blood-serum, coagulated hydrocele-fluid, and agar-agar. See also Micrococci *of syphilis*. [B, 122, 238, 256; M. Bender, "Ctrlbl. f. Bacteriol. u. Parasitenk.," i, 1887, Nos. 11 and 12 (B).]—**Bacilli tannico-opiati.** Pastilles or bougies containing, each, tannic acid 4 grammes, opium 25 centigrammes, and glycerin a sufficiency. [B, 270.]—**B. tetani** [Nicolaier], **B. tetani traumatici** [Rosenbach]. Ger., *Tetanusbacillus*. A *B.* found in animals dead of tetanus induced by the inoculation of garden-earth, as well as in the tissues of a man dying from traumatic tetanus, and in those of animals inoculated with materials from such tissues; said to secrete the toxic ptomaine tetanine, or tetanotoxine [Brieger]. It occurs as slender rods, slightly longer than those of the *B. murisepticus*, sometimes united into pseudo-filaments, but usually agglomerated in irregular masses. They develop oval, shining spores in the distended extremity of the rod, the remaining portion of the rod dwindling to one third or one fourth the diameter of the spore. The *B. tetani* is decidedly anaerobic, and grows well in blood-serum when well protected from the air. It is probably the cause of a variety of tetanus in man and animals. [B, 238; Rosenbach, "Arch. f. klin. Chirurg.," xxxiv, p. 306; "Ctrlbl. f. Bacteriol. u. Parasitenk.," i, 1887, No. 19, p. 570 (B); "Dtsch. med. Wchnschr.," No. 14, 1887, p. 288 (B).]—**B. tremulus** [Koch]. Syn.: *Metallacter tremulus* [Trevisan]. A species found on decomposing plant-infusions, upon which it forms a thick gelatinous pellicle. It resembles closely the *B. subtilis*, but is shorter and more slender. It has a flagellum at either end, and exhibits a peculiar tremulous rotary movement. The spores have a diameter greater than that of the rod in which they are generated and from which they usually project as lateral offshoots. [B, 30, 238.]—**B. tuberculi, B. tuberculosis** [Koch], **B. tuberculosus.** Fr., *bacille* (*tuberculeux*) *de la tuberculose*. Ger., *Tuberkelbacillus*, *B. der Tuberculose*. It., *bacillo tubercolare* (*o della tubercolosi*). Sp., *bacilo de la tuberculosi*. Syn.: *Bacterium tuberculosis* [Zopf] (seu *tuberculosum*). A *B.*, discovered by Koch, found in the pathologically altered tissues of patients affected with local or general tuberculosis. It is also found in the excretory fluids which have been in contact with tuberculous tissue (the sputum in pulmonary tuberculosis, the urine in tuberculosis of the genito-urinary tract), and also in the tuberculosis (*Perlsucht*) of cattle. It forms non-motile, very slender, slightly curved or bent rods, 0·2 μ thick and 1·5 to 3·5 μ long, often containing from 2 to 6 oval spores which frequently project laterally beyond the outline of the rod. It occurs singly or in agglomerated masses in the interior of cells found in tubercles and is transported from one part of the body to another by the migration of such cells. It is distinguished from other micro-organisms by the ease with which it is stained by aniline coloring matters if rendered alkaline, and by the tenacity with which it withstands discoloration. It grows slowly and difficultly in nutritive fluids, forming on blood-serum characteristic colonies made up of an agglomeration of delicate curved and S-shaped lines. Inoculations with this *B.*, or with its cultivations, produce cheesy degeneration and infection extending to the lymphatic glands, producing general tuberculosis. Inhalations from the cultivations have a similar effect. The *B. tuberculosis* is hence regarded as the cause of tuberculosis in man and animals. According to recent researches by Duguet and Héricourt (as yet unconfirmed), this *B.* is only a developmental form of the *Microsporon furfur*, which, these authors allege, is found constantly either with or without the *B. tuberculosis* in tuberculous organs. Cultivations from such organs, as well as from tuberculous sputum, and from the *Microsporon furfur* itself, developed two organisms: an anaerobic found at the bottom of the cultivation-tubes, and an aerobic (the ordinary *B. tuberculosis*) upon the surface of the nutrient liquid. The spores of the latter fall to the bottom of the tube and develop into the spores and mycelium

of the *Microsporon furfur.* This statement is probably based upon erroneous observation. [B, 122, 238; Henri and Héricourt, "Compt.

THE BACILLUS TUMESCENS. (AFTER ZOPF.)

rend. de l'acad. des sc.," cii. p. 943 (B).]—**B. tumescens** [Zopf]. Syn.: *Bacterium tumescens* [Zopf]. A species forming a tough, wrinkled, whitish pellicle on moist, cooked "Mohrrüben" which have been kept at the ordinary temperature. It consists of rows of long rod-forms united in chains and imbedded in zooglœa. These rods split up into short rods and cocci [Zopf], becoming laterally distended in the process. In these short rods and cocci spores form. [B, 237, 238.]—**B. typhi abdominalis, B. typhosus.** Fr., *bacille typhique* (ou *de la fièvre typhoïde*). Ger., *Typhusbacillus.* It., *bacillo tifoso.* Syn: *Bacterium typhosum.* A *B.* discovered by Eberth and others in the spleen, lymphatic glands, and Peyer's patches of patients dead of typhoid fever, and in the urine and fæces in some cases, but not in the blood, nor in connection with the suppurative complications of the disease; said to secrete the poisonous ptomaine typhotoxine. It occurs as short, slender, very motile rods with rounded ends, having a length of 2 to 3 μ and a breadth one third as great. In cultivation-fluids they frequently form long pseudo-filaments and, according to some, are provided with flagella. They reproduce at elevated temperatures by the endogenous formation of terminal spores. They do not liquefy gelatin and form in it superficial grayish-white colonies with jagged edges, which under the microscope present numerous intersecting lines and furrows looking like a mass of spun glass. On potatoes they develop a very characteristic cultivation, forming upon it a moist, shining, very tenacious pellicle which so closely resembles the natural surface of the potato as not to be distinguished from it by ocular inspection, but which is readily detected when an attempt is made to detach it with a needle. This pellicle consists of a mass of proliferating *Bacilli.* Attempts at producing typhoidal disorders in the lower animals by inoculation with this *B.* have usually failed [Gaffky and others], but recent attempts by Fränkel and Simmonds, by Seitz, and by Sirotinin, have been successful, and a typical disease resembling more or less typhoid fever in symptoms and pathological lesions has been thus produced in mice, rabbits, and guinea-pigs. They also found that animals which survived a single inoculation of this sort were proof against subsequent inoculations. Its pathogenetic action is thought by Sirotinin to be due to the development by it of a specific ptomaine. The *B. typhi abdominalis* has been said to occur in contaminated water and in the soil; but this is not certain, although it is capable of cultivation and development in various kinds of water. Besides the *B.* of Eberth, two other *Bacilli* have been regarded as the cause of typhoid fever—the *B.* of Klebs, which differs from that of Eberth in its color reactions and manner of spore-formation, and that of Tayon. The latter is described as forming fine granulations and short, very motile rods, which, after inoculation in the dog, become elongated spore-bearing filaments. The spores are both medial and terminal. Injected into the peritonæum of animals, it causes death, and inoculated subcutaneously in animals and man, it produces fever and diarrhœa with apparent immunity from the effects of a second inoculation. [Klebs (B, 108), B, 122, 238; E. Fränkel and M. Simmonds, "Ctrlbl. f. Bacteriol. u. Parasitenk.," i, 1887, No. 4, p. 108 (B); K. Seitz, *ib.*, No. 5, p. 147 (B); M. Simmonds, *ib.*, No. 9, p. 262 (B); W. Sirotinin, "Ztschr. f. Hyg.," i, p. 465 (B); Tayon, "Comptes rend. de l'acad. des sc.," xcix, p. 333, c, p. 375, ci, p. 450 (B).] See also Bacterium *catenula.*—**B. ulna** [Cohn]. Syn.: *Vibrio b.* (in part) [Ehrenberg], *Metallacter ulna* [Trevisan], *Bacterium ulna* [Miller]. A motile *B.*, of 3 μ or more in length and 1·5 to 2·2 μ broad, found in decoctions of cooked egg-albumin and underneath the shell of a hen's-egg. It forms filaments and spores in the same way as *B. subtilis*, the spores being 2·5 to 2·8 μ long and over 1 μ broad. It grows well in albuminous nutrient liquids without producing any change in the latter. It is perhaps the same as the *bactéridie des infusions* of Davaine. [B, 30, 238.]—**B. ureæ.** 1. Of Leube, a *B.* found in old urine and capable of converting urea into ammonium carbonate. It forms short stout rods, 2 μ long and 1 μ broad, with rounded ends. It does not liquefy gelatin and forms on it superficial colonies in the shape of a series of concentric rings. Two other *Bacilli*—one forming thick oval rods, 1·2 to 1·5 μ long and 0·7 to 0·8 μ thick, and the other somewhat slenderer and with blunt ends—are described by Leube as having a similar action upon urea. They both are capable of cultivation in gelatin. 2. Of Miquel, a species found in urine and perhaps identical with *B. ulna.* [B, 30, 238.]—**B. violaceus** [Becker]. The violet *B.* of water. [B, 237; Becker, "Jahrb. der in- u. ausl- ges. Med.," ccix, 1886, p. 281 (B).] See *Bacilli of water.*—**B. virens** [Van Tieghem]. A species found in stagnant water, forming yellowish-green filaments, sometimes motile, usually non-motile, producing in their interior oval colorless spores. It is nearly related to the *Sporonema gracile* (perhaps identical with it), and is possibly not a *B.* at all, but one of the *Schizophyceæ.* [Van Tieghem, "Bull. de la soc. bot. de Fr.," 1880, p. 174 (B); "Bot. Jahresb.," 1881, i, p. 314 (B); B, 238.]—**B. virgula.** See Spirillum *choleræ asiaticæ.*—**B. viridis.** Syn.: *Bacterium viride* [Van Tieghem]. A species found in rain-water, consisting of minute rod-forms colored green (probably from the presence of chlorophyll) and multiplying by division and by the endogenous formation of colorless, highly refractive spherical or ovoid spores. It is not certainly a *B.*, and is perhaps to be referred to the *Schizophyceæ.* [Van Tieghem, "Bull. de la soc. bot. de Fr." (B, 73); "Bot. Jahresb.," 1881, 1, p. 314 (B); B, 238.]—**B. von Denecke** (Ger.). See Spirillum *tyrogenum.*—**B. von Finkler-Prior** (Ger.). See Spirillum *Finkler-Prior.*—**B. xerosis conjunctivæ.** See *B. of xerosis epithelialis conjunctivæ.*—**B. Zopfii.** Syn.: *Bacterium Zopfii* [Kurth]. A species obtained from the vermiform appendix of hens and occurring under the form of motile rods, 2 to 5 μ long and 0·75 to 1 μ broad. These develop into long filaments which assume various spiral, twisted, and glomerulus-like forms. These split up into shorter segments, 5 to 50 μ long, which again grow, and usually in a direction different from that of the axis of the filament. These segments again break up into spherical bodies, regarded as *Micrococci* by Kurth, but more correctly considered to be spores. The *B.* forms whitish-yellow colonies on gelatin. It is not pathogenetic. It is perhaps the same as *Bactéridie intestinale* of Davaine. Recently Schedtler has obtained developmental forms of the *B. Zopfii* much resembling those of the *Proteus*, and he believes that the so-called zooglœa form of the *Proteus mirabilis* is really due to the *B. Zopfii.* [B, 30, 238; H. Schedtler, "Arch. f. path. Anat. u. Phys. u. f. klin.

BACINET (Fr.), n. Ba^{3}s-i^{2}n-a. The *Ranunculus bulbosus.* [B, 173.]—**B. rampant.** The *Ranunculus repens.* [B, 173.]

BACIUCCO (It.), n. Ba^3-chi^2-uk'ko. The *Crithmum maritimum.* [B, 121.]

BACK, n. Ba^{2}k. A.-S., *bæc.* Gr., νῶτον, νῶτος, ῥάχις. Lat., *dorsum.* Fr., *dos.* Ger., *Rücken.* It., Sp., *dorso.* In general, the hinder part of the trunk of a vertebrate animal, extending from the last cervical to the last lumbar vertebra; in invertebrates, that aspect of the body which is opposite to the one to which the limbs are attached or to the mouth; as applied to particular parts, the upper part of the tongue, the nose. the hand (in a state of pronation), the foot, the penis, etc., and the posterior aspect of the head, a limb, etc. [A, 385.]

BACKABUNGA (Swed.), n. The *Veronica beccabunga.* [B, 88.]

BACKACHE, n. Ba^{2}k'ak. Lat., *rhachialgia, notalgia.* Fr., *rhachialgie.* Ger., *Rückgratsschmerz.* It., *rachialgia.* Sp., *raquialgia.* An aching pain in any part of the vertebral column. [A, 385.]

BACKALIAU (Ger.), n. Ba^{3}k-a^{3}l-i^2-a^3'u. The cod (*Gadus morrhua*). [B, 180.]

BACKBONE, n. Ba^{2}k'bo^{3}n. A common term for the vertebral column, except the cervical portion.

BACKDARM (Ger.), n. Ba^{3}k'da^{3}rm. The rectum. [L, 80.]

BACK-DRAUGHT, n. Ba^{2}k'dra^{3}ft. The whooping inspiration that takes place at the conclusion of a paroxysm of whooping-cough. [L, 73.]

BACKE (Ger.), n. Ba^{3}k'e^2. See BACKEN.—**Vordere B. des Gehirns.** The nates of the brain. [A, 355.]

BACKEN (Ger.), n. Ba^{3}k'e^{2}n. 1. The cheek. [A, 315; L, 135.] 2. Of a horse, the buttocks. [A, 301.] 3. In botany, as a pl., see BUCCÆ.—**B'arterie.** The buccinator artery. [L, 80.]—**B'bart.** In man, the whiskers; in birds, the feathers between the beak and the eyes. [A, 315; L, 30.]—**B'bein.** The malar bone. [L, 43.]—**B'blase.** The cheek-pouch.—**B'drüsen.** The buccal glands. [L, 30.]—**B'fortsatz.** The malar process of the superior maxilla. [L, 30.]—**B'grube, B'grübchen.** A dimple of the cheek. [L, 30.]—**B'hautnerv.** See NERVUS *subcutaneus malæ.*—**B'höhle.** The buccal cavity; that portion of the mouth which lies between the cheeks and the teeth. [L, 37.]—**B'knochen.** 1. The malar bone. [L, 80.] 2. In the horse, the hip-bone. [A, 301.]—**B'kragen.** See *B'bart.*—**B'muskel.** See BUCCINATOR.—**B'muskelnerv.** The buccinator nerve. [L, 30, 43.]—**B'pulsader, B'schlagader.** The buccinator artery. [L, 46.]—**B'speicheldrüsen.** The buccal glands. [L, 80.]—**B'tasche.** See *B'blase.*—**B'venen.** The buccinator veins. [L, 80.]—**B'zahn.** A molar tooth. [L, 135.]—**B'zahndrüsen.** The molar glands. [A, 355.]—**B'zahnmuskel.** See ALVEOLO-LABIALIS.

BÄCKERBEIN (Ger.), n. Bak'e^{2}r-bin. Genu valgum. [E. Gurlt (A, 319).]

BÄCKERKRÄTZE (Ger.), n. Bak'e^{2}r-kratz-e^2. Baker's itch. [Kaposi (A, 319).] See under ITCH and ECZEMA *manuum.*

BACKFERSENBEINMUSKEL (Ger.), n. Ba^{3}k-fe^{2}rz'e^{2}n-bin-musk-e^{2}l. See BIFEMORO-CALCANEUS.

BACKHOUSIA (Lat.), n. f. Ba^{2}k-hu^5'us-i^2-a^3. Named after James Backhouse, an English botanist. Of Hooker and Harvey, a genus of myrtaceous plants of the tribe *Leptospermeæ*, subtribe *Metrosidereæ.* [B, 19, 42.]—**B. citriodora.** A small tree with ovate-lanceolate leaves having the lower surface, as well as the young shoots, hairy; and flowers in umbel-like clusters in the axils of the upper leaves, the calyx-tube being hairy and the petals short. It furnishes a volatile oil much resembling that of verbena. [T. Christy, "New Commerc. Plants and Drugs," No. 9, 1886, p. 16.]—**B. myrtifolia** [Hooker and Harvey], **B. riparia** [Hooker]. A small tree growing in Australia. [B, 19, 219.]

BACKKREBS (Ger.), n. Ba^{3}k'kre^{2}bs. See ASTACUS *fluviatilis.*

BACKKRONBEINMUSKEL (Ger.), n. Ba^{3}k-kron'bin-musk-e^{2}l. See FEMORO-PHALANGEUS.

BACKROT (Swed.), n. The *Pimpinella saxifraga.* [B, 88.]

BACKSCHENKELBEINMUSKEL (Ger.), n. Ba^{3}k-she^{2}n^{2}k'-e^{2}l-bin-musk-e^{2}l. See TIBIO-PRÆMETATARSEUS.

BACKSET, n. Ba^{2}k'se^{2}t. A relapse of a disease, or a complication which delays recovery. [L, 56.]

BACKSIPPA (Sanscr.), n. Pulsatilla. [B, 88.]

BACKSTEINFARBIG (Ger.), adj. Ba^{3}k'stin-fa^{3}rb-i^{2}g. Lateritious. [L, 46.]

BACKSTROKE, n. Ba^{2}k'strok. An impulse felt in cardiac hypertrophy. By Laennec it is described "as though the heart swelled and applied itself by a single point. then by its whole surface, and finally sank back in a sudden manner." It was first observed by Hope. [L, 170.]

BACKTIMIAN (Swed.), **BACKTIMJAN** (Swed.), n's. The *Thymus serpyllum.* [B, 88, 92.]

BACK-WORT, n. Ba^{2}k'wu^{5}rt. A name formerly given to the *Symphytum officinale.* [B, 39.]

BACKZAHN (Ger.), n. Ba^{3}k'tza^{3}n. A molar tooth. [L, 31.]

BACLATUL-HUMKA (Hind.), n. The *Portulaca quadrifida.* [B, 172.]

BACOBA, n. A Brazilian name for a variety of the banana-tree bearing very small fruit. [B, 88.]

BACONIA (Lat.), n. f. Ba-ko'ni^2-a^3. Fr., *baconie.* See PAVETTA.

BACOPA (Lat.), n. f. Ba^{2}k(ba^{3}k)-o'pa^3. Fr., *bacope.* A genus of scrophulariaceous plants of the tribe *Gratioleæ* established by Aublet. [B, 121.]—**B. aquatica** [Aublet]. Fr., *herbe aux brûlures.* An annual species growing in Brazil and English and French Guiana, where it is used as an application to burns. [B, 88, 173, 214.]

BACOVE (Fr.), n. Ba^{3}k-ov. A common name in Guiana for

the fruit of the *Musa sapientium* and the *Musa sinensis.* [B, 121.]—**B. rongou.** The fruit of the *Musa sinensis.* [B, 121.]

BACOVIER (Fr.), n. Ba^{3}k-o-vi^2-a. The *Musa sapientium* and the *Musa sinensis.* [B, 121.]

BACQUOIS (Fr.), n. Ba^{3}k-kwa^3. The genus *Pandanus.* [B, 173.]

BACTERIA (Lat.), n. n., pl. of *Bacterium* (*q. v.*). Ba^{2}k(ba^{3}k)-te(ta)'ri^2-a^3. Fr., *bactéries.* Ger., *Bacterien.* It., *bacterii.* Sp., *bacterias.* Often used to signify the *Schizomycetes.* [B.] See MICROBE.

BACTERIACEÆ (Lat.), n. f. pl. Ba^{2}k(ba^{3}k)-te(ta)-ri^2-a(a^3)'-se^2(ke^2)-e(a^3-e^2). Fr., *bactériacées.* Ger., *Bacteriaceen.* It., *bacteriacee.* Sp., *bacteriáceas.* In Zopf's classification of the *Schizomycetes*, a group comprising the genera *Bacterium, Spirillum, Vibrio, Leuconostoc, Bacillus, and Clostridium*, which occur in the forms of micrococci, rods (either straight or bent), or filaments (straight or spiral), the latter presenting no differentiation between base and apex. Division takes place in one direction of space only. Reproduction by spores is present in some cases, absent or unknown in others. J. Künstler places them in a position intermediate between the animal and vegetable kingdoms, regarding them as most closely related to the astomous *Flagellata.* The term is also used generically as synonymous with *Schizomycetes.* [B, 237; "Jour. de microgr.," ix, 1885, "Proc. of the Roy. Soc. of Micr.," 1885, p. 1048 (B).] In Hueppe's classification, the *B.* are regarded as forming a genus only, and are held to include only the endosporous *B.*, comprising, thus, the genera (subgenera) *Bacillus* and *Clostridium.* [B, 270.] See ARTHROBACTERIACEÆ.

BACTERIACEOUS, adj. Ba^{2}k-te-ri^2-a'shu^{3}s. Fr., *bacteriacé.* Pertaining to bacteria or belonging to the *Bacteriaceæ.* [A, 385.]

BACTERIÆMIA (Lat.), n. f. Ba^{2}k(ba^{3}k)-te(ta)-ri^2-e'(a^3'e^2)-mi^2-a^3. From βακτήριον (see BACTERIUM), and αἷμα, blood. Ger., *Bacteriämie.* A condition in which bacteria (*Schizomycetes*) are present in the blood. [B.]

BACTERIAL, BACTERIAN, adj's. Ba^{2}k-te'ri^2-a^{2}l, -a^{2}n. Fr., *bactérien.* Ger., *bacteriell.* Of or pertaining to bacteria, or *Schizomycetes.* [B.]

BACTERIC, adj. Ba^{2}k-te^{2}r'i^{2}k. Bacterial. [Lister (B, 39).]

BACTERICIDAL, adj. Ba^{2}k-te^{2}r-i^2-si'da^{2}l. From βακτήριον (see BACTERIUM), and *cœdere*, to kill. See ANTIBACTERIAN.

BACTERIDIA (Lat.), n. n., pl. of *bacteridium* (*q. v.*). Ba^{2}k-(ba^{3}k)-te^{2}r-i^{2}d'i^2-a^3.

BACTERIDIAL, adj. Ba^{2}k-te^{2}r-i^{2}d'i^2-a^{2}l. Fr., *bactéridien.* Of or pertaining to bacteridia. [B.]

BACTÉRIDIE (Fr.), n. Ba^{3}k-ta-ri^{2}d-e. A bacteridium (*q. v.*). [Davaine (B, 46).]—**B. charbonneuse.** See BACILLUS *anthracis.*—**B. de levain** [Davaine]. See BACTERIDIUM *fermenti.*—**B. des infusions** [Davaine]. A *Bacteridium* found in various infusions of organic substances, forming thick, straight rods constricted at the centre. [Davaine (B, 46).] Perhaps the *Bacillus ulna.* [B, 30.]—**B. du charbon** [Davaine], **B. du sang de rate.** See BACILLUS *anthracis.*—**B. du vin tourné** [Pasteur]. A species of *Bacteridium* found in sour wine. It forms cylindrical, flexible rods, of variable length and less than 1 μ thick, not jointed, and without constrictions. [Davaine (B, 46).]—**B. glaireuse** [Davaine]. A species of *Bacteridium* forming extremely slender, straight or bent; hyaline filaments 10 μ long, found in the viscous, glairy substance formed in *eau sucrée* which has been kept for some months. [Davaine (B, 46).]—**B. intestinale** [Davaine]. A species of *Bacteridium* found in the intestines of different species of birds, forming filaments varying from 10 to 30 μ in length, generally straight and thick, often presenting a clear space in their interior, indicative of a segmentation into two, and sometimes bent at that point. [Davaine (B, 46).] Perhaps the *Bacillus Zopfii.* [B, 30.]—**B. syphilitique.** See BACILLUS *syphilidis.*

BACTERIDIUM (Lat.), n. n. Ba^{2}k(ba^{3}k)-te^{2}r(tar)-i^{2}d'i^2-u^{3}m-(u^{4}m). Gr., βακτηρίδιον = βακτήριον). Fr., *bactéridie.* A genus of *Schizomycetes* made by Davaine, including those in the form of a straight or bent rod, more or less distinctly pointed as the result of an imperfect spontaneous division, and always non-motile. The latter characteristic distinguishes the genus from *Bacterium* as defined by Davaine. [Comptes rend. de l'acad. des sci.," lix, 1864, p. 629 (B); Davaine (B, 46).—**B. anthracis.** See BACILLUS *anthracis.*—**B. aurantiacum.** The *Micrococcus aurantiacus.* [B, 30.]—**B. cyaneum.** The *Micrococcus cyaneus.* [B, 30.]—**B. fermenti** [Davaine]. Fr., *bactéridie du levain.* A species found in great numbers in the yeast of wheat and barley and in sour flour-paste, forming filaments usually thin and short, at most 10 μ long, sometimes divided into two articles, straight or bent, immobile or having a slight Brownian movement. Sometimes they are 20 μ long, and they are then divided into two, three, or four articles forming an angle with each other. It is identical in character with the *Bacillus anthracis.* [Davaine (B, 46).]—**B. glareosum.** See BACTÉRIDIE *glaireuse.*—**B. intestinale.** See BACTÉRIDIE *intestinale.*—**B. luteum.** The *Micrococcus luteus.* [B, 30.]—**B. prodigiosum.** The *Micrococcus* (*Bacillus*) *prodigiosus.* [B, 30.]—**B. violaceum.** The *Micrococcus violaceus.* [B, 30.]

BACTERIE (Ger.), n. Ba^{3}k-ta'ri^2-e^2. See BACTERIUM.—**B. der Blattern.** See BACTERIUM *variola.*—**B. der Brustseuche des Pferdes.** See BACTERIUM *of infectious pneumonia in the horse.*—**B'n der Buttersäuregährung.** See BACTERIUM *of butyric-acid fermentation*, BACILLUS *butyricus*, and BACILLUS *amylobacter.*—**B. der Diphtherie.** See BACTERIUM *diphtheriæ.*—**B. der Essiggährung.** See BACTERIUM *aceti.*—**B. der gelben Milch.** See BACTERIUM *synxanthum.*—**B. der Harngährung.** See BACTERIUM *ureæ.*—**B. der Pneumonie.** See BACTERIUM *pneumoniæ.*—**B. der Sputumsepticämie.** See BACTERIUM *septicum sputigenum.*—**B. der Variola.** See BACTERIUM *of variola.*—**B'n der Wildseuche.** See BACILLUS *of Wildseuche.*—**B. des Harns.** See BACTERIUM *ureæ.*—**B'n des Meerwassers.** See BACTERIUM *of sea-water.*—**B'nfäulniss.** Putrefaction produced by bacteria. [B, 270.]—**B'nfressend.** Bacteria-devouring (said of certain leucocytes). [B.] See PHAGOCYTE.—**B'nhaltig.** Containing bacteria. [B.]—**B'ntödtend.** See ANTIBACTERIAN.—**B'nversucher.** A device for readily finding minute objects, such as bacteria, on a microscope slide, and for bringing them into the field again after the stage has been moved. ["Dtsch. Med.-Ztg.," Jan. 7, 1886, p. 31.]—**Chromogene B'n.** See *Chromogenous* BACTERIA.—**Erdeb'n.** See BACTERIA *of the soil.*—**Fäulnissb'.** See BACTERIUM *termo* and BACTERIA *of putrefaction.*—**Leuchtb'.** See MICROCOCCUS *Pflügeri.*—**Luftb'n.** See BACTERIA *of the atmosphere.*—**Meerwasserb'n.** See BACTERIA *of sea-water.*—**Mundb'n.** See BACTERIA *of the mouth.*—**Pathogene B'n.** See *Pathogenic* BACTERIA.—**Pneumonieb'.** See BACTERIUM *pneumoniæ cruposæ* and BACTERIUM *septicum sputigenum.*—**Schwefelb'n.** A term applied by Cramer to *Bacteria* containing sulphur granules in their protoplasm, including the *Beggiatoæ, Clathrocystis roseo-persicina, Monas Okenii, Monas vinosa, Ophidomonas sanguinea*, etc. [S. Winogradski, "Bot. Ztg.," 1887; "Ctrlbl. f. Bakteriol. u. Parasitenk.," 1887, No. 20, p. 590.]—**Stäbchenb'n.** See *Rod* BACTERIA.—**Typhusb'.** See BACTERIUM *of typhoid fever.*—**Wasserb'n.** See BACTERIA *of water.*—**Zymogene B'n.** See *Zymogenous* BACTERIA.

BACTÉRIE (Fr.), n. Ba^{3}k-ta-re. See BACTERIUM.—**B. aérogène.** See BACTERIUM *aerogenes.*—**B's arthrospores.** See *Arthrosporous* BACTERIA.—**B. capsulaire de l'air.** A capsulated variety of *Bacterium* found in the atmosphere. [B, 209.]—**B. chaînette.** See BACTERIUM *catenula.*—**B's chromogènes.** See *Chromogenous* BACTERIA.—**B. commune.** See BACTERIUM *termo.*—**B's de la bouche.** See BACTERIA *of the mouth.*—**B. de la diphthérie.** See BACTERIUM *of diphtheria.*—**B. de la fermentation butyrique.** See BACTERIUM *of butyric-acid fermentation.*—**B. de la fièvre typhoïde.** See BACTERIUM *of typhoid fever.*—**B's de l'air.** See BACTERIA *of the air.*—**B. de la pneumonie.** See BACTERIUM *pneumoniæ cruposæ* and BACTERIUM *septicum sputigenum.*—**B. de la pourriture.** See BACTERIUM *putredinis.*—**B's de la putréfaction.** See BACTERIA *of putrefaction.*—**B. de la septicémie des lapins.** See BACTERIUM *of septicæmia in rabbits.*—**B's de la terre.** See BACTERIA *of the soil.*—**B. de la variole.** See BACTERIUM *of variola.*—**B's de l'eau.** See BACTERIA *of water.*—**B's de l'eau de mer.** See BACTERIA *of sea-water.*—**B. de l'urine.** See BACTERIUM *ureæ.*—**B. du charbon.** See BACILLUS *anthracis.*—**B. du ferment.** See BACTERIDIUM *fermenti.*—**B. du foin.** See BACILLUS *subtilis.*—**B. du lait jaune.** See BACTERIUM *synxanthum.*—**B. du sang de rate.** See BACILLUS *anthracis.*—**B. du vinaigre.** See BACTERIUM *aceti.*—**B's en bâtonnets.** See *Rod* BACTERIA.—**B's endospores.** See *Endosporous* BACTERIA.—**B's pathogènes.** See *Pathogenic* BACTERIA.—**B. photométrique.** See BACTERIUM *photometricum.*—**B. pseudo-pneumonique.** See BACILLUS *pseudo-pneumonicus.*—**B's saprogènes.** See *Saprogenic* BACTERIA.—**B. septique** [Pasteur]. See *Septic* BACTERIUM.—**B's zymogènes.** See *Zymogenous* BACTERIA.

BACTERIELL (Ger.), adj. Ba^{3}k-ta-ri^2-e^{2}l'. See BACTERIAL.

BACTÉRIEN (Fr.), adj. Ba^{3}k-ta-ri^2-a^{3}n^2. See BACTERIAL.

BACTERIFORM, adj. Ba^{2}k-te^{2}r'i^2-fo^{2}rm. From βακτήριον (see BACTERIUM), and *forma*, form. Fr., *bactériforme.* See BACTERIOID.

BACTERIOID, adj. Ba^{2}k-te'ri-oid. From βακτήριον (see BACTERIUM), and εἶδος, resemblance. Fr., *bactéroïde.* Ger., *stäbchenförmig.* Shaped like a staff or like a bacterium. [B.]

BACTERIOIDOMONADEÆ (Lat.), n. f. pl. Ba^{2}k(ba^{3}k)-te(ta)-ri^2-o-i(e)''do(do^2)-mo^{2}n-a^{2}d(a^{3}d)'e^2-e(a^3-e^2). A group of organisms probably related to the *Protozoa*, including the genus *Bacterioidomonas.* [J. Künstler, "Jour. de microgr.," ix, "Proc. of the Roy. Soc. of Micr.," 1885, p. 1048 (B).]

BACTERIOIDOMONAS (Lat.), n. f. Ba^{2}k(ba^{3}k)-te(ta)-ri^2-o(o^2)-i^{2}d(ed)-o^{2}m'o^{2}n-a^{2}s(a^{3}s). Gen., *bacterioidomon'ados* (*-dis*). From βακτήριον (see BACTERIUM), and μονάς, a unit. A genus of microscopic organisms belonging to the *Bacterioidomonadeæ*, intermediate in character between the *Schizomycetes* and the *Protozoa.* It differs from the rod-forms of the former in its greater size, its constant motion, the presence of a nucleus, and the existence of a number of spores. [J. Künstler, "Comptes rend. de l'acad. des sci.," 1885, p. 371 (B); "Bot. Ztg.," 1885, p. 364 (B).]—**B. sporifera** [J. Künstler]. A species attaining a length of 24 μ, provided with a long flagellum and with a large central nucleus; often also with two additional smaller nuclei, one at each extremity. The peripheral portion of the organism is of different constitution from the central portion, constituting a sort of envelope for the latter. Reproduction takes place by means of endogenous spores, which germinate outside of the parent organism. [J. Künstler, "Jour. de microgr.," 1884, viii, p. 376, and "Jour. of the Roy. Mic. Soc.," 1884, p. 934 (B).]—**B. undulans** [J. Künstler]. A species found in the intestine of the black rat. It forms spirilla 34 μ long, slightly attenuated at either end, with nuclei like those of *B. sporifera.* It is finely punctate interiorly and of denser consistence at the periphery. It has a very fine and long flagellum, and shows a slow undulatory movement. On reproduction, the body becomes more refractive, is filled with an amylaceous substance, and develops in its interior elongated spores, which, on being set free, undergo division and become spirilla. [J. Künstler, "Comptes rend. de l'acad. des sci.," c, 1885, p. 371 (B).]

BACTERIOLOGICAL, adj. Ba^{2}k-te''ri^2-o-lo^{2}j'i^{2}k-a^{2}l. Fr., *bactériologique.* Ger., *bacteriologisch.* It., *batteriologico.* Sp., *bacteriológico.* Of or pertaining to bacteriology. [B.]

BACTERIOLOGIST, n. Ba^{2}k-te-ri^2-o^{2}l'o-ji^{2}st. Fr., *bactériologiste.* Ger., *Bacteriolog.* One who studies bacteriology. [B.]

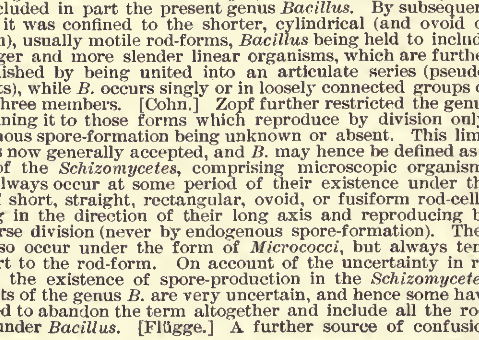
BACTERIOLOGY, n. Ba^{2}k-te-ri^2-o^{2}l'o-ji^2. From βακτήριον (see BACTERIUM), and λόγος, understanding. Fr., *bactériologie.*

Ger., *Bacteriologie.* It., *batteriologia.* Sp., *bacteriologia.* The science of bacteria. [B.]

BACTERIONACÉ (Fr.), adj. Ba^{3}k-ta-ri^2-o-na^3-sa. Bacteriod (*q. v.*). [A, 385.]

BACTERIOPHYTOMA (Lat.), n.n. Ba^{2}k(ba^{3}k)-te(ta)''ri^2-o(o^2)-fi(fu^6)-to'ma^3. Gen., *bacteriophytom'atos* (*-tis*). From βακτήριον (see BACTERIUM), and φυτόν, a growth (see also *-oma**). An organic unit (*e. g.*, an epithelial cell) filled with bacterial growths. ["Ctrlbl. f. Bacteriol. u. Parasitenk.," i, 1887, p. 357 (B).]

BACTERIOPURPURIN, n. Ba^{2}k-te''ri^2-o-pu^{5}r'pu^2-ri^{2}n. For deriv., see BACTERIUM and PURPURIN. A peculiar reddish coloring matter of a hue resembling that of peach-blossoms, present in the *Beggiaton roseo-persicina.* It is insoluble in alcohol and in water, and is distinguished by its peculiar absorption spectrum [B, 73, 238.]

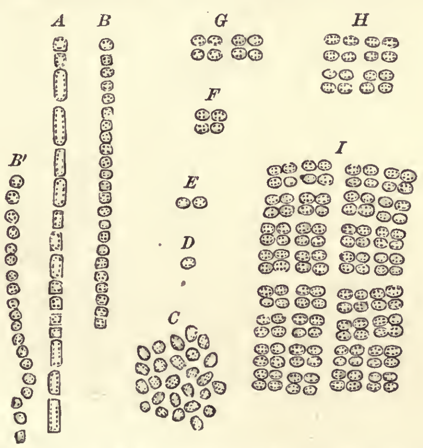


BACTERIOSCOPIC, adj. Ba^{2}k-te''ri^2-o-sko^{2}p'i^{2}k. Fr., *bactérioscopique.* Ger., *bacterioskopisch.* It., *batterioscopico.* Sp., *bacterioscópico.* Pertaining to bacterioscopy. [B.]

BACTERIOSCOPY, n. Ba^{2}k-te''ri^2-o^{2}s'ko^{2}p-i^2. From βακτήριον (see BACTERIUM), and σκοπεῖν, to examine. Fr., *bactérioscopie.* Ger., *Bacterioskopie.* It., *batterioscopia.* Sp., *bacterioscopia.* The observation or study of the *Bacteria* (*Schizomycetes*). [B.]

BACTERIOTHERAPY, n. Ba^{2}k-te''ri^2-o-the^{2}r'a^3-pi^2. From βακτήριον (see BACTERIUM), and θεραπεία, medical treatment. Fr., *bactério-thérapie.* Ger., *Bacteriotherapie.* It., *batterioterapia.* Sp., *bacterioterapia.* A plan of treating disease by employing one micro-organism to destroy another, the latter being the one on which the disease is supposed to depend (*e. g.*, the treatment of pulmonary tuberculosis by causing the patient to inhale the *Bacterium termo*). [A. Cantani, cited in "Brit. Med. Jour.," Aug. 29, 1885, "Practitioner," Oct., 1885, p. 306, and "N. Y. Med. Jour.," Apr. 17, 1886, p. 451.]

BACTERITIC, adj. Ba^{2}k-te^{2}r-i^{2}t'i^{2}k. Fr., *bactéritique.* Ger., *bacteritisch.* It., *bacteritico, batteritico.* Sp., *bacteritico.* Associated with or produced by bacteria or *Schizomycetes.* [A. Flint (B, 39).]



BACTERIUM (Lat.), n. n. Ba^{2}k(ba^{3}k)-te(ta)'ri^2-u^{3}m-(u^{4}m). From βακτήριον, a staff. Fr., *bactérie.* Ger., *Bacterie, Bakterie.* It., *bacterio, batterio.* Sp., *bacteria.* A genus of microscopic organisms, established by Ehrenberg and referred by him to the family *Vibrionia* of the animal kingdom. It is now usually (although not by all) regarded as belonging to the vegetable kingdom, and assigned to the class *Schizomycetes*, order *Bacteriaceæ* [Zopf] or *Arthrobacteriaceæ* [De Bary]. It comprehended, according to Ehrenberg, all the forms with straight, inflexible, linear body, and thus included in part the present genus *Bacillus.* By subsequent writers, it was confined to the shorter, cylindrical (and ovoid or fusiform), usually motile rod-forms, *Bacillus* being held to include the longer and more slender linear organisms, which are further distinguished by being united into an articulate series (pseudo-filaments), while *B.* occurs singly or in loosely connected groups of two or three members. [Cohn.] Zopf further restricted the genus by confining it to those forms which reproduce by division only, endogenous spore-formation being unknown or absent. This limitation is now generally accepted, and *B.* may hence be defined as a genus of the *Schizomycetes*, comprising microscopic organisms which always occur at some period of their existence under the form of short, straight, rectangular, ovoid, or fusiform rod-cells, growing in the direction of their long axis and reproducing by transverse division (never by endogenous spore-formation). They may also occur under the form of *Micrococci*, but always tend to revert to the rod-form. On account of the uncertainty in regard to the existence of spore-production in the *Schizomycetes*, the limits of the genus *B.* are very uncertain, and hence some have proposed to abandon the term altogether and include all the rod-forms under *Bacillus.* [Flügge.] A further source of confusion

THE BACTERIUM ACETI. (AFTER ZOPF.)

arises from the frequent application of the term *B.* to any individual of the *Schizomycetes*, the latter being often designated collectively as the *Bacteria.* For this reason, De Bary prefers the name *Arthrobacterium* for *B.* as here defined. In this work *B.* will be employed as far as possible to denote simply the genus name according to the definition imposed by Zopf, and the term *microbe* will be used for *B.* or *Bacteria* when designating one of the *Schizomycetes.* See MICROBE. [B, 30, 54, 73, 77, 237, 238.]—**Arthrosporous Bacteria.** Fr., *bactéries arthrospores.* Ger., *arthrospore Bacterien.* *Bacteria* which reproduce by fission; *Bacteria* in the restricted sense. [B, 54.]—**B. aceti** [Lanzi]. Fr., *bactérie* (ou *mycoderme*) *du vinaigre.* Ger., *Essigpilz, Essigferment.* Syn.: *Bacillus aceticus* [Flügge], *mycoderma aceti* [Pasteur], *Arthrobacterium aceti* [De Bary], *Ulvina aceti* [Kützing]. A species discovered by Hansen, effecting the transformation of alcohol into acetic acid, and forming a pellicle upon the surface of alcoholic liquids which have turned sour. It occurs as short straight rods somewhat constricted in the middle and about the size of the *Bacillus acidi lactici.* These unite into long pseudo-filaments, consisting of rows of connected long and short rods, some of which grow into filaments, while others become variously swollen and distorted. [B, 30, 237, 238.]—**B. acidi lactici.** Fr., *bactérie de la fermentation lactique.* Ger., *Bacterie der Milchsäuregährung.* 1. See BACILLUS *acidi lactici.* 2. Of Zopf, a species obtained from malt-infusion and capable of converting milk-sugar into lactic acid. It occurs both as a rod-form and as cocci. [B, 237.]—**B. aerogenes** [Miller]. A name given to two *Bacteria* found by Miller in the gastro-intestinal tract and producing gaseous decomposition of carbohydrates. The first (*B. aerogenes* I) forms short motile rods occurring singly or in pairs. It does not liquefy gelatin and produces on plates sharply limited, circular, yellow colonies, on agar-agar a grayish-white pultaceous layer, and on potatoes a yellowish-white pultaceous mass. Its fermentative action is exerted strongly both with and without the access of oxygen. The second *B.* (*B. aerogenes* II) is morphologically like the first, but differs in the form of its cultures and has much less marked fermentative action. [Miller, "Dtsch. med. Wchnschr.," Feb. 25, 1886, p. 117 (B).]—**B. æruginosum** [Schröter]. See BACILLUS *pyocyaneus.*—**B. anthracicum** [Bollinger], **B. anthracis** [Zopf]. See BACILLUS *anthracis.*—**B. articulatum** [Ehrenberg]. See *B. triloculare.*—**B. aurantiacum** [Trelease]. A chromogenous species. [B.]—**B. bacillus** [Pasteur]. A species resembling *B. termo.* [Davaine (B, 46).]—**B. bei Diphtherie aus Menschen und der Tauben** (Ger.). See *B. of diphtheria* (2d def.).—**B. bombycis.** The *Nosema bombycis* (*q. v.*). [B, 246.]—**B. brunneum** [Schröter]. A species occurring in a putrid infusion of Indian corn and producing a brown pigment. Perhaps identical with *Bacillus fuscus.* [B, 238.]—**B. butyricum.** See BACILLUS *amylobacter.*—**B. candidus** [Trelease]. A chromogenous species. [B.]—**B. capitatum** [Davaine]. A species found in water in which cheese, ham, and other animal matters had been infused, described as a rigid, actively motile rod-form, 10 to 15 μ long, and terminating in a semi-transparent, bluish dilatation like the head of a spermatozoid. [Davaine (B, 46).]—**B. carbunculare** [Pollender, Bräuell, Delafond, Davaine]. An old term for the micro-organism of charbon. [B, 125.] See BACILLUS *anthracis.*—**B. carlsbergense** [Hansen]. A species found in the air of Carlsberg. [Hansen, "Bot. Jahresb.," 1879, i, p. 556 (B).]—**B. catenula** [Dujardin]. Fr., *b.* (ou *bactérie*) *chainette.* A species discovered by Dujardin, who regarded it as belonging to the *Infusoria*; described as cylindrical filaments having a total length of 20 μ and by spontaneous division forming a chain of 3, 4, or 5 connected rods, 3 to 4 μ long and 0·4 to 0·5 μ thick. According to Coze and Feltz, it, or a species closely resembling it, is found in typhoid fever in man and also in rabbits to whom the disease has been communicated by inoculation, and is then from 1 to 4 μ long and 0·4 to 0·8 μ thick. See, however, BACILLUS *typhi abdominalis.* The *B. catenula* much resembles the lactic-acid ferment (*Bacillus acidi lactici*) [Davaine]; according to some, it is one of the forms described as *B. termo.* [B, 30; Davaine (B, 46).]—**B. caucasicum.** See BACILLUS *caucasicus.*—**B. chainette** (Fr.). See *B. catenula.*—**B. chlorinum** [Engelmann]. A species consisting of greenish-colored, highly motile, oval cells, 2 to 3 μ long, which exhibit a great tendency to accumulate in the light and evolve oxygen. It is perhaps not a *B.*, belonging rather to the *Schizophyceæ.* [B, 73, 238.]—**B. coli commune** [Escherich]. A species occurring, along with the *Bacillus lactis aerogenes*, in the fæces of infants nourished exclusively upon milk, as short, slightly arcuate rods, from 1 to 5 μ long and 0·3 to 0·4 μ thick. On gelatin it produces granular colonies, whitish superficially, yellowish in the deeper layers; and on potatoes a yellowish layer. In milk it produces the lactic-acid fermentation with coagulation of the casein, and also decomposes glucose. Inoculations in guinea-pigs and rabbits cause death with gastro-enteric inflammation and febrile symptoms. According to Weisser, the *B. coli commune* is identical in morphological characters and physiological properties with the *B. neapolitanum.* [B, 238; Weisser, "Ztschr. f. Hyg.," I (1886), p. 315 (B).]—**B. cuneatum** [Rivolta]. See BACILLUS *cuneatus.*—**B. cyanogenum.** See BACILLUS *cyanogenus.*—**B. decalvans** [Thin]. A micro-organism, doubtfully referred to the genus *B.*, said to occur in alopecia areata under the form of rounded or elongated, highly refracting bodies, 1·6 μ long, usually arranged in pairs. They are situated between the shaft of the affected hair and the cuticula, or between the shaft and the inner root-sheath, and are supposed by this route to enter the substance of the hair and to cause its falling out. It is perhaps identical with the *Micrococcus* found by Buchner and Sehlen in this disease. [B, 73, 238; G. Thin, "Proc. of the Roy. Soc.," 1881, No. 217 (G).]—**B. de la pourriture** (Fr.). See *B. putredinis.*—**B. de l'eau de mer** (Fr.). See *Bacteria of sea-water.*—**B. denitrificans.** See BACILLUS *denitrificans.*—**B. der Brustseuche des Pferdes** (Ger.). See *B. of infectious pneumonia in the horse.*—**B. der Essiggährung.** See *B. aceti.*—**B. der Kaninchenseptikämie** (Ger.). See BACILLUS *cuniculicidus.*—**B. der Milchsäuregährung** (Ger.). See BACILLUS *acidi lactici.*—**B. der Septicämie bei Kaninchen** (Ger.). See BACILLUS *cuniculicidus.*—**B. dysodes.** See BACILLUS *dysodes.*—**B. en-**

chelys [Ehrenberg]. A species described by Ehrenberg, who referred it to the animal kingdom (*Infusoria*). It occurs in river-water and forms cylindrical chains, about 9 μ long, made up of indistinctly defined, colorless, oval corpuscles, smaller than in the *B. triloculare*. [B, 253.]—**B. en zigzag** (Fr.). See BACILLUS *geniculatus*.—**B. farinaceum.** A species found in "Sauerteig." [B, 206.]—**B. fitzianum** [Zopf]. See BACILLUS *fitzianus*.—**B. fœtidum** [Thin]. See BACILLUS *fœtidus* (1st def.).—**B. fusiforme** [Warming]. A species forming fusiform cells, acute at both ends, 2 to 5 μ long and 0·5 to 0·8 μ thick; found in sea-water. [B, 30, 73.]—**B. griseum** [Warming]. Syn.: *Micrococcus griseus* [Winter]. A species occurring in fresh and salt water as rounded or ovate colorless rods, 2·5 to 4 μ long (increasing to 6 or 7 μ before division) and 1·8 to 2·5 μ thick. [B, 30, 73.]—**B. gummis** [Comes]. A species said to produce the gummous disease of the fig, almond, and orange tree, and also the *mal nero* of the vine. ["Atti R. Ist. d'Incoragg. di Nap.," iii (1884), "Proc. of the Roy. Mic. Soc.," 1885, p. 1053 (B).] Cf. *B. putredinis*.—**B. hyacinthi** [Wakker]. A species resembling *B. termo*, said to occur on the bulbs and leaves of the hyacinth and to cause the "yellow disease" of the latter. [J. H. Wakker (B, 73) and "Bot. Jahresb.," 1883, I, p. 368 (B).]—**B. ianthinum** [Zopf]. Syn.: *Bacillus ianthinus* [Zopf]. A species found by Zopf on pieces of a pig's bladder which he caused to float upon water rich in lower organisms. It consists of long and short rod-forms which in the presence of air form a beautiful violet pigment soluble in alcohol. A similar, perhaps identical organism was obtained by Hueppe, who found that it imparted its violet coloring matter to its various cultivation-media. [B, 237, 238.]—**B. kefir.** See BACILLUS *caucasicus*.—**B. Kochii** [Hansen]. A species found by Hansen in the air of Carlsberg. ["Bot. Jahresb.," 1879, i, p. 556 (B).]—**B. lactis** [Lister]. A species said to produce the lactic-acid fermentation of milk. It occurs, according to Lister, in the different forms of coccus, *B.* (short rod-form) *Bacillus* (long rod-form), *Leptothrix*, and *Saccharomyces* (?). It is probably identical with the *Bacillus acidi lactici*.—**B. lactis aerogenes** [Escherich]. See BACILLUS *lactis aerogenes*.—**B. lineola** [Cohn]. Syn.: *Vibrio lineola* [Müller and Ehrenberg (in part)]. A species said to occur in well-water and other water, upon potatoes, in the surface soil, and in other situations. It consists of oblong motile rods with rounded flagellate ends, 3·8 to 5·2 μ long and 1·5 μ thick; occurring singly or in pairs, never in long filaments. The cell-contents are granular and highly refractive. Under this title probably several distinct species have been included. [B, 30, 73, 238.]—**B. litoreum** [Warming]. A species found in sea-water, forming motile or non-motile, ellipsoidal or elongated, rods with rounded ends, having a length of 2 to 6 μ and a breadth of 1·2 to 2·4 μ, and occurring only singly or in pairs. [B, 73, 206.]—**B. lucens.** See BACILLUS *lucens*.—**B. luteum** [Trelease]. A chromogenous form. [B.]—**B. maydis** [Cuboni]. See BACILLUS *maydis*.—**B. merismopœdioides** [Zopf]. A species discovered by Zopf in

THE BACTERIUM MERISMOPŒDIOIDES. (AFTER ZOPF.)

A, a filament made up of long and short rods and of cocci; *B*, a filament made up of cocci; *B'*, a filament, the constituent cocci of which are separating from each other; *C*, an irregular group of cocci; *D*, *E*, *F*, *G*, *H*, successive stages in the formation of a rectangular colony; *I*, a colony.

sewage mud, occurring as filaments, of a diameter of 1 to 1·5 μ, which split up into long rod-forms, short rods, and cocci. The latter separate from each other, pass through a motile stage, then come to rest and increase by a process of growth and division taking place at first in one direction of space, subsequently in two directions so as to constitute rectangular lamelliform colonies resembling those of *Merismopœdia*. These colonies, which frequently contain as many as 4,000 cocci (64 on a side), become enveloped in zooglœa, and by union with other colonies form a pellicle upon the surface of water. From these colonies new rods and filaments are subsequently developed. [Zopf.] It is possible that under this name several organisms have been included. [Flügge.] [B, 237, 238.]—**B. morbilli.** An organism described by M. Lanzi as occurring in measles, being found in the urine, especially in the period of desquamation and in the shreds of skin during the second stage of the disease. ["Bull. d. R. Acc. med. di Roma," 1883; "Bot. Jahresb.," 1883, i, p. 321 (B).]—**B. navicula** [Reinke and Berthold]. A species occurring upon rotting potatoes as rather large, fusiform or elliptical, motile and non-motile cells, containing in their interior one or more dark spots which are stained blue by iodine. According to Bergonzini, it is identical with the *Bacillus amylobacter*. [B, 30, 73.]—**B. neapolitanum.** Ger., *Emmerich's neapler Bacillus*. Syn.: *Bacillus neapolitanus* [Emmerich]. A species discovered by Emmerich in the organs and intestinal canal of cholera patients. It forms short rods, about 0·9 μ thick, with rounded ends, sometimes occurring as ovate or elongated cells, and in certain cultivation-fluids as filaments. In gelatin it forms colonies which in the deeper layers are ovoid, sharply defined, brownish-yellow and with granular contents, and upon the surface are larger, flat, scale-like, and iridescent, presenting two zones—a central, golden-yellow and granular, and a peripheral, colorless and of glassy aspect. It does not liquefy the gelatin and is capable of existing with or without oxygen. According to Emmerich, it produces in animals choleraic symptoms with inflammation and erosion of the gastro-intestinal canal; and he hence regards it as the exciting cause of cholera in man. Flügge, Weisser, and others, however, have found an organism of essentially the same morphological and biological characters in the fæces of people not affected with cholera, and also in decomposing flesh, and in the air. Moreover, the *B. coli commune* is very similar to the *B. neapolitanum*, and by some is held to be identical with it. The latter, therefore, probably takes no part in the causation of cholera. [B, 122, 238; Weisser, "Ztschr. f. Hyg.," i, 1886, p. 315 (B); A. Pfeiffer, "Dtsch. med. Wchnschr.," No. 2, 1887, and M. Gruber, "Wien. med. Wchnschr.," Nos. 7 and 8, 1887, in "Ctrlbl. f. Bacteriol. u. Parasitenk.," I, Nos. 9 and 12 (B).]—**B. of butyric-acid fermentation.** Fr., *bactérie de la fermentation butyrique*. Ger., *Bacterie der Buttersäuregährung*. A motile *B.*, 1·8 to 2·4 μ long and 0·7 to 1 μ thick (in suitable cultivation-fluids 7 to 8 μ long and 1·5 μ thick), capable of converting lactates into butyrates with the simultaneous formation of propionic acid and of transforming tartrates into acetic and succinic acids. It also exerts a fermentative action upon the malates and citrates and upon cane-sugar, grape-sugar, milk-sugar, and mannite. It differs from the *Bacillus amylobacter* in the absence of spores and of amylaceous contents. [A. Fitz, "Ber. d. dtsch. chem. Gesellsch.," xvii, p. 1188 (B).] See also BACILLI *of butyric-acid fermentation*.—**B. of diphtheria.** Fr., *bactérie de la diphthérie*. Ger., *Bacterie der Diphtherie*. A species found by Emmerich in cases of diphtheria in man and in doves, and believed by him to be the cause of this disease. It forms short stout rods which grow on nutrient gelatin as whitish colonies and upon potatoes as a thick whitish-yellow coating. Inoculations from these cultivations are said by Emmerich to produce a diphtheritic inflammation in doves, rabbits, and white mice. It is probable, however, that the cultivations so acting were impure, and that the *B.* of Emmerich is not the causal agent in producing the diphtheritic process. [B, 237, 238.]—**B. of fire-blight.** See *B. of pear blight*.—**B. of hog-cholera.** See *B. of swine-plague*.—**B. of infectious pneumonia in horses.** Ger., *Bacterie der Brustseuche der Pferde*. An oval capsulated *B.* found by Schütz in the infectious pneumonia (*Brustseuche*) of the horse. It divides in the direction of its short diameter and usually occurs in pairs placed side by side. In morphological characters it closely resembles Fränkel's *B.* of pneumonia (the *B. septicum sputigenum*), although it differs somewhat in its color-reactions and the form of its cultivations, being in these respects often more like the *B. pneumoniæ cruposæ*. Inoculations with this *B.* were pathogenetic for mice, rabbits, and guinea-pigs. [Schütz, "Arch. f. path. Anat. u. Phys. u. f. klin. Med.," cvi, 2, p. 35, and 3, p. 434 (B).]—**B. of pear-blight.** A species, 3 μ long and 1 μ thick, very similar in appearance to *Bacillus amylobacter*, said to cause the fire-blight of pears and the twig-blight of apples. ["Bot. Jahresb.," 1882, i, p. 248 (B).]—**Bacteria of pneumonia.** Fr., *bactéries de la pneumonie*. Ger., *Pneumoniebacterien*. See *B. pneumoniæ cruposæ*, *B. of infectious pneumonia in horses*, and *B. septicum sputigenum*.—**Bacteria of putrefaction.** Fr., *bactéries de la putréfaction*. Ger., *Fäulnissbacterien*. *Bacteria* which are associated with putrefactive processes. The *B. termo* was formerly regarded as the cause of putrid decomposition, but it is now believed that what was formerly described as the *B. termo* comprised a number of species and that a variety of organisms are concerned in the production of putrefaction. [B.] See *B. termo*, *B. ianthinum*, *B. putredinis*, *B. termo*, etc., and cf. BACILLI *of putrefaction*.—**Bacteria of sea-water.** Fr., *bactéries de l'eau de mer*. Ger., *Bacterien des Meerwassers*. See *B. fusiforme*, *B. griseum*, *B. litoreum*, and *B. sulfuratum*, and cf. SPIRILLUM *attenuatum*, SPIRILLUM *violaceum*, and SPIRILLUM *Rosenbergii*.—**B. of septicæmia in rabbits.** A *B.*, 3 to 4 μ long and 0·2 to 0·7 μ thick, discovered by Bordoni-Uffreduzzi and Di Mattei in rabbits dead of septicæmia after inoculation with impure human saliva. It grows on gelatin in the form of whitish, irregular patches and liquefies the gelatin after 15 to 20 days. Inoculated in rabbits, it reproduces the septicæmic process. ["Arch. per le sc. med.," x, 1886; "Ctrlbl. f. Bacteriol. u. Parasitenk.," i, 1887, No. 12, p. 345 (B).] Cf. BACILLUS CUNICULICIDUS and BACILLUS *septicus sputi*.—**B. of swine-plague** [Salmon]. A *B.* found by Salmon in hogs affected with swine-plague or the American variety of hog-cholera, which he regards as distinct from the European hog-cholera (*rouget*, or *Rothlauf*). It is found especially in the spleen, but is present, more or less, in all the tissues, occurring as motile oval rods, 1·2 to 1·5 μ long and 0·6 μ thick, usually in pairs. Occasionally forms of less thickness and 1·8 μ in length occur, and these exhibit, when stained, a differentiation of structure between the peripheral and central portions. The dimensions are altered slightly by cultivation, the rods growing in meat-infusions being only 0·9 μ long and 0·4 to 0·5 μ thick. It does not liquefy gelatin, and in plate-cultures forms irregularly oval colonies elevated in the centre, in needle-cultivations in gelatin whitish colonies, and upon potatoes a light yellowish-green layer with the simultaneous production of a brownish pigment. The character of the cultivations, however, varies more or less according to the source from which the *Bacteria* are derived; for example, a cultivation obtained from western hogs

is somewhat different from that obtained from hogs bred in the east [Smith]. Its colonies do not emit the odor of putrefaction. The *B.* does not reproduce by spore-formation, and is killed by a temperature of 58° C. It is pathogenetic for swine, producing in them the lesions of swine-plague, and also for mice, rabbits, guinea-pigs, and pigeons. See also BACILLUS *of hog-cholera* and BACILLUS *suis.* [D. E. Salmon, "Rept. of the Dept. of Agric.," 1884, p. 258, and 1885, p. 476 (B); T. Smith, "Proc. of the Am. Assoc. for the Adv. of Sci.," 1886, p. 267 (B).]—**Bacteria of the air.** Fr., *bactéries de l'air.* Ger., *Luftbacterien.* Various *Bacteria* found in the air. Cornil and Babes enumerate three varieties, which approximate more or less to the *Micrococcus* form, and others—*e. g.*, the *B. neapolitanum*, *B. carlbergense*, *B. Kochii*, etc.—are known to occur. [B.]—**Bacteria of the mouth.** Fr., *bactéries de la bouche.* Ger., *Bacterien der Mundhöhle.* *Bacteria* occurring normally in the mouth. Many are known, Miller, for instance, enumerating 13 varieties of rod-forms found in the mouth, in regard to most of which, however, it is uncertain whether they are to be assigned to the genus *B.* or *Bacillus.* [B, 238.] See also BACILLI *of the mouth.*—**Bacteria of the soil.** Fr., *bactéries de la terre.* Ger., *Erdebacterien.* Various *Bacteria* occurring in the earth, including, according to Adametz, *B. termo*, *B. lineola*, and two other species. ["Ctrlbl. f. Bacteriol. u. Parasitenk.," i, 1887, No. 1, p. 8 (B).] See also BACILLI *of the soil.*—**Bacteria of the urine.** Fr., *bactéries de l'urine.* Ger., *Bacterien des Harns.* Various *Bacteria* found in the urine; especially the *B. ureæ.* [B.]—**B. of typhoid fever.** Fr., *bactérie de la fièvre typhoïde.* Ger., *Typhusbacterie.* A *B.* found by Coze and Feltz in the typhoid fever of man and rabbits. [Davaine (B, 46).] See *B. catenula.*—**B. of variola.** Fr., *bactérie de la petite-variole.* Ger., *Bacterie der Variola* (oder *der Blattern*). A rod-form, exhibiting a slow gliding or serpentine movement, found by Coze and Feltz in the vesicles of small-pox. It is said to be pathogenetic for rabbits. [Davaine (B, 46).]—**Bacteria of water.** Fr., *bactéries de l'eau.* Ger., *Wasserbacterien.* Various *Bacteria* found in water. Such are the *B. lineola*, *B. enchelys*, *B. ianthinum*, and another chromogenous species producing a violet pigment described by Macé, and also a number of species enumerated by de Malapert-Neuville. ["Ann. d'hyg. publ.," Mar., 1887, p. 191, and Apr., 1887, p. 354 (B).]—**B. oleæ** [Arcangeli]. A species said to produce the disease of the olives called tuberculosis (maladie de la loupe, rogna). [L. Savastano, "Compt. rend. de l'acad. des sci.," ciii, 1886, p. 1144 (B).]—**B. ovatum** [Lebert]. See NOSEMA *bombycis.*—**B. pasteurianum, B. pastorianum** [Hansen]. A species found by Hansen in beer-wort and in beer, especially in beer poor in alcohol. It closely resembles the *B. aceti*, from which it differs in containing starch. [B, 30, 237.]—**B. periplanetæ** [Tichomirow]. A species resembling *B. lineola*, but non-motile, found in the *Periplaneta orientalis*, and causing a special disease of the latter. ["Bot. Jahresb.," 1879, i, p. 327 (B).]—**B. Pflügeri** [Ludwig]. See MICROCOCCUS *Pflügeri.*—**B. photometricum** [Engelmann]. A species discovered by Engelmann, which occurs as somewhat reddish-colored cells which become motile only when exposed to light. In the solar spectrum they exhibit the most marked movement in the ultra-red, less marked in the yellow, and from this point to the violet end of the spectrum the motility gradually diminishes. [B, 73, 237.]—**B. pneumoniæ, B. pneumoniæ crouposæ** (seu **cruposæ**). Fr., *bactérie de la pneumonie.* Ger., *Bacterie der Pneumonie.* Syn.: *Diplococcus pneumoniæ* (seu *pneumoniæ fibrinosæ*), *Pneumococcus*, *Bacillus pneumoniæ.* A species discovered by Friedländer in the exudation and sputum, and also in the pleuritic and pericardial effusions in croupous pneumonia. It occurs as very short ovoid rods frequently disposed in pairs or in fours, with their apices in contact. Each *B.* is surrounded by a gelatinous capsule, a pair of *Bacteria* frequently having a common envelope. On gelatin it forms circular colonies, which in the deeper layers are dark-yellowish or olive-colored and granular, and above are whitish and project distinctly over the level of the plate. In needle-cultivations it forms along the needle-track a confluent mass surmounted by a hemispherical prominent head ("nail-cultivation"). On potatoes the cultivations assume the appearance of gelatinous, shining, yellowish-white masses often containing bubbles due to the gas evolved. The *B.* has the power of converting glucose into ethyl alcohol and acetic acid, and calcium lactate and creatinine into acetic acid [Brieger]. It is said to produce in animals, especially in mice, death, with pulmonary congestion and infiltration and pleuritic effusion, and they are hence regarded by Friedländer as the cause of pneumonia in man. According to the researches of others, however, various other organisms, especially the *B. septicum sputigenum* (*q. v.*), are concerned in the production of pneumonia, and Friedländer's *B.*, although found pretty constantly in pneumonia and in the various inflammatory affections (meningitis, pericarditis, endocarditis) complicating it, is also found in connection with morbid processes not associated with pneumonia (meningitis, purulent inflammation, ozæna, etc.). Moreover, the characters (capsulation and the "nail-cultivation"), which have been regarded as distinctive of the *B. pneumoniæ cruposæ* are assumed at times by other *Schizomycetes*, so that the former has been thought by some to have no claim to be regarded as a distinct species. This latter view, however, is probably a mistaken one. According to the latest researches by Weichselbaum, the *B.* of Friedländer, although a causal agent in the production of pneumonia, is less frequently so than the *B. septicum sputigenum* and the *Streptococcus pneumoniæ*, and, like these organisms, is also normally present in the healthy respiratory tract. The *B. pneumoniæ cruposæ* has been employed in bacteriotherapy as an antagonist to the *Bacillus anthracis* [Pawlowsky]. [B, 122, 237, 238; L. Brieger, "Ztschr. f. physiol. Chem.," 9, in "Ber. d. dtsch. chem. Gsellsch.," xviii, p. 293 (B); A. Thost, "Dtsch. med. Wchnschr.," No. 10, 1886 (B); Senger, "Arch. f. exper. Path. u. Pharmak.," xx, p. 389, and "Jahresb. über d. Leist. u. Fortschr. in d. ges. Med.," 1887, i, p. 290 (B); A. D. Pawlowsky, "Arch. f. path. Anat. u. Physiol. u. f. klin. Med.," cviii, 3, p. 494 (B); A. Weichselbaum, "Wien. med. Jahresb.," 1886, p. 483, in "Ctrlbl. f. Bacteriol. u. Parasitenk.," No. 10, 1887, p. 297 (B).] See also BACILLUS *rhinoscleromatis.*—**B. porri** [Tommasi-Crudeli]. A species said to occur in warts and to cause their contagiousness. [B, 246.]—**B. prodigiosum.** See BACILLUS *prodigiosus.*—**B. point** (Fr.). The *B. punctum.* [Davaine (B, 46).]—**B. pseudopneumonicum.** Syn.: *Bacillus pseudopneumonicus* [Flügge]. A species found by Passet in pus, resembling closely in form and development under cultivation the *B. pneumoniæ cruposæ*, but showing more tendency to assume the round-cell (*Micrococcus*) form. It occurs as capsulated rods, 1·16 μ long and 0·87 μ broad. Its cultivations in gelatin are prominent like the "nail-cultivations" of the *B. pneumoniæ cruposæ*, but do not descend deeply beneath the surface, and are associated with brownish discoloration of the gelatin and the evolution of a putrefactive odor. On potatoes it forms a whitish, shining, succulent layer, which contains no gas-bubbles. The *B. pseudopneumonicum* inoculated in serous cavities, and less markedly when subcutaneously injected, produces purulent inflammation. [B, 122, 238.]—**B. punctum** [Ehrenberg]. Fr., *b. point.* A species discovered by Ehrenberg, who referred it to the animal kingdom. It is described as forming ovoid or elongated rod-cells, 1·7 μ thick and 5·2 μ long, often arranged in pairs, and exhibiting a slow, waving movement. It is found in different infusions of animal substances and, according to Coze and Feltz, also in animals which have died from inoculation with putrid substances. According to the latter authors, it then attains a length of from 4 to 20 μ, its thickness remaining the same. By Bergonzini it is referred to *B. lineola.* Probably several distinct organisms have been included under this title. [B, 30; Davaine (B, 46).]—**B. putredinis** [Davaine]. Fr., *b.* (ou *bactérie*) *de la pourriture.* A species described by Davaine as occurring under three forms: (1) Exceedingly small and numerous, moving corpuscles (*Micrococci*); (2) Thin, short, straight filaments, at most 5 μ in length, usually divided into two, and exhibiting movements like those of *B. termo*; (3) Elongated filaments sometimes attaining a length of 30 μ. They are said to produce a process of decay in plants, more moist than that produced by the ordinary *Fungi* of decay. Bergonzini thinks that this organism may be the *Bacillus amylobacter*, but the description given by Davaine would answer as well for any one of a number of *Bacteria* or *Bacilli.* By O. Comes the *B. putredinis* was said to be the cause of the mal nero of vines. See, however, *B. gummis.* [B, 30; Davaine (B, 46); "Bot. Jahresb.," 1883, ii, p. 413 (B).]—**B. pyriforme** [Hansen]. A species said by Hansen to occur in the air of Carlsberg. ["Bot. Jahresb.," 1879, i, p. 556 (B).]—**B. rubescens** [Lankester]. The peach-colored *B.*, a species now regarded as the zooglœa-form of *Beggiatoa roseo-persicina.* [B.]—**B. septicum sputigenum.** Syn.: *Bacillus septicus sputigenus* [Flügge]; Fränkel's *B.* (or *Diplococcus*) of pneumonia; Fränkel's *Pneumococcus*, *Diplococcus pneumoniæ* [Weichselbaum]. A species discovered by Fränkel in pneumonic sputa occurring as fusiform or lanceolate cocci or ovoid rods, usually arranged in pairs or in chains of 4 or 6, and surrounded by a capsule like the *B. pneumoniæ cruposæ.* It differs from the latter in color-reactions and in the character of its cultivations, not growing on gelatin-plates at ordinary temperatures. It is probably the most ordinary, although not the only, cause of pneumonia. A *B.* probably identical with this *B.* was discovered by Sternberg and subsequently by Fränkel and by Weichselbaum in healthy sputum, and is believed to be also identical with the so-called *Micrococcus* (*Micrococcus Pasteuri*) found by Pasteur in the same location. See BACILLUS *lyssæ.* Inoculation with this *B.* as well as with Fränkel's *B. septicum sputigenum* produces septicæmia, but if a weakened cultivation of the latter is employed a pneumonic or pleuritic process is induced instead. [B, 238; A. Fränkel, "Dtsch. med. Wchnschr.," No. 13, 1886, and "Ztschr. f. klin Med.," xi, 5 and 6, and A. Weichselbaum, "Wien. med. Jahrb.," 1886, p. 483, in "Ctrlbl. f. Bacteriol. u. Parasitenk.," 1887, i, No. 3, p. 79 (B), and No. 10, p. 297 (B); G. M. Sternberg, "Am. Jour. of the Med. Sci.," July, 1886, and "Jahresb. über d. Leist. u. Fortschr. d. ges. Med.," 1887, i, p. 290 (B).]—**B. subtile** [Buchner]. See BACILLUS *subtilis.*—**B. sulfuratum, B. sulphuratum** [Warming]. A species found by Warming on the coast of Denmark. It is of a pale-pinkish color, and contains many sulphur granules. It is probably identical with the *Beggiatoa roseo-persicina.* [B, 30, 73.]—**B. syncyanum** [Ehrenberg]. See BACILLUS *cyanogenus.*—**B. synxanthum** [Schröter]. Syn.: *B. xanthinum* [Schröter], *Vibrio synxanthus* [Ehrenberg] (seu *xanthogenus* [Fuchs]), *Bacillus synxanthus* [Flügge]. An actively motile *B.* resembling *B. termo*, 0·7 to 1 μ in length, and occurring singly or in chains of 2 to 5 members, discovered by Ehrenberg in boiled milk which has become spontaneously yellow. This *B.*, when transferred to normal milk, colors the latter a lemon-yellow, at the same time rendering the latter at first acid and then alkaline and dissolving the casein. The coloring matter produced by this *B.* is soluble in water, insoluble in alcohol and ether, loses its tint on the addition of acids, and recovers it upon the addition of alkalies. According to Schröter, it resembles in reactions and in its absorption spectrum some of the yellow aniline colors. [B, 73, 237, 238.]—**B. termo** [Dujardin]. Fr., *bactérie commune, termo.* Ger., *Fäulnissbacterie.* It., *batterio termo.* Syn.: *Monas* [Müller] (seu *Zooglœa* [Cohn]) *termo*, *Palmella infusionum* [Ehrenberg]. A *B.* formerly regarded as the peculiar cause of putrefaction and described as forming short, cylindrical-oblong, actively motile rods, 1·5 to 2 μ long and 0·5 to 0·7 μ thick, arranged in irregular groups, series, or spherical agglomerations enveloped in zooglœa. The *B.* is said to have a flagellum by Dol-

THE BACTERIUM PNEUMONIÆ CRUPOSÆ. (AFTER ZOPF.)

llinger and Drysdale, and it exhibits all varieties of movement, rotation about the long axis or the transverse axis, a quivering movement, and progression in straight or in curved lines. Ewart describes a growth of the *Bacteria* into filamentous spore-bearing forms, but the organism which he describes is apparently quite different from that usually understood under the name of *B. termo*. Under the latter title have been included a number of different species, and the form which has been regarded as the typical *B. termo* is said not to produce putrefaction [Eidam]. One of the species designated under this title has been used by Cantani and others in bacteriotherapy as an antagonist to the *Bacillus tuberculosis* in the treatment of pulmonary phthisis. It is characterized as small, rapidly moving cylindrical rods arranged in groups or chains, rapidly liquefying gelatin and forming on gelatin-plates a greenish-colored depression with the evolution of a putrefactive odor. [B, 30, 73, 238; A. Maffucci and Flora, "Rivist. internaz.," 1886, "Ctrlbl. f. Bacteriol. u. Parasitenk.," 1887, i, No. 5, p. 148 (B).]—**B. tremulans** [Trevisan]. The *B. lineola*. [B, 30.]—**B. triloculare** [Ehrenberg]. Syn.: *B. articulatum*. A species discovered by Ehrenberg in bog-water and referred by him to the animal kingdom. It is described as a chain-like rod composed of 2 to 5 distinctly separated oval cells, each 2 to 2·5 μ long and having a thickness of 0·7 μ [Pritchard] or 2 to 2·5 μ [Davaine]. Each chain bears a filiform flagellum one third of the length of the chain, and presents a tremulous vibratory movement. By Bergonzini it is identified with *B. lineola*. [B, 30; Davaine (B, 46); B, 253.]—**B. tuberculosis** [Zopf], **B. tuberculosum**. See Bacillus *tuberculosis*.—**B. tumescens** [Zopf]. See Bacillus *tumescens*.—**B. typhosum**. See Bacillus *typhi abdominalis*.—**B. ulna**. See Bacillus *ulna*.—**B. ureæ** [Cohn]. See Micrococcus *ureæ*.—**B. violaceum** [Bergonzini]. Syn.: *Chromobacterium violaceum* [Bergonzini]. A motile *B.* occurring as isolated, violet-colored rods, 2 to 3 μ long and 0·6 to 1 μ thick, found in putrefying solutions of egg-albumin. The coloring matter is insoluble in water, but alcohol readily dissolves it with the production of a deep-blue color, and ether dissolves it less rapidly and with the formation of a reddish violet color. [B, 30, 73.]—**B. viride** [Van Tieghem]. See Bacillus *viridis*.—**B. xanthinum** [Schröter]. See *B. synxanthum*.—**B. xylinum** [A. J. Brown]. A name applied to a species (distinct from the *B. aceti*) constituting one of the varieties of the "vinegar-plant" and having the power of converting saccharine solutions into acetic acid, dextrose into gluconic acid, and mannitol into levulose. It forms a thin pellicle upon the fluids, in which it develops and consists almost entirely of cellulose. [A. J. Brown, "Brit. and Colon. Druggist," May 22, 1886, p. 358 (B).]—**B. Zopfii** [Kurth]. See Bacillus *Zopfii*.—**Chromogenous Bacteria.** Fr., *bactéries chromogènes*. Ger., *chromogene Bacterien*. It., *batteri cromogeni*. *Bacteria* which produce pigments, *e. g.*, the *B. violaceum*, the *B. synxanthum*, etc. [B.]—**Emmerich's diphtheria B.** See *B. of diphtheria*.—**Endosporous Bacteria.** Fr., *bactéries endospores*. Ger., *endospore Bacterien*. Bacteria which reproduce by endogenous spore-formation; *i. e.*, *Bacilli*. [B, 54.]—**Fränkel's B. of pneumonia.** See *B. septicum sputigenum*.—**Friedländer's B. of pneumonia.** See *B. pneumoniæ crupos*æ.—**Pathogenic Bacteria.** Fr., *bactéries pathogènes*. Ger., *pathogene Bacterien*. It., *batteri patogeni*. *Bacteria* which produce disease, *e. g.*, the *B. pneumoniæ cruposæ*.—**Rod Bacteria.** Fr., *bactéries* (ou *microbes*) *en bâtonnet*. Ger., *Stäbchenbacterien*. *Bacteria* in the form of rods, *i. e.*, *Bacteria* in the ordinary sense of the word. [B.]—**Saprogenic Bacteria.** Fr., *bactéries saprogènes*. See *Bacteria of putrefaction*.—**Septic B.** Fr., *bactérie septique* [Pasteur]. A *B.* which produces septic infection. [B.]—**Zymogenic Bacteria.** Fr., *bactéries zymogènes*. Ger., *zymogene Bacterien*. *Bacteria* which produce fermentation, *e. g.*, *B. aceti*. [B.]

BACTERIURIA (Lat.), n. f. Ba^{2}k(ba^{3}k)-te^{2}r(tar)-i^2-u^2(u)′ri^2-a^3. From βακτήριον (see Bacterium), and οὐρεῖν, to urinate. Fr., *bactériurie*. Ger., *Bacteriurie*. The passage of urine containing an excessive amount of *Bacteria* (*Schizomycetes*). Roberts divided the cases of b. into four classes: 1. Those in which the presence of bacterioid organisms is associated with incipient putrefactive changes in the urine. 2. Those in which ammoniacal fermentation of the urine is present. 3. Those in which some of the common varieties of *Schizomycetes* are present, without decomposition of the urine. 4. Those in which *Micrococcus* chains were voided with the urine. [D, 143.]

BACTEROID, adj. and n. Ba^{2}k′te^{2}r-oid. From βακτήριον (see Bacterium), and εἶδος, resemblance. Fr., *bactéroïde*. Ger., *bacteroid*. 1. Resembling a *Bacterium*; belonging to the *Bacteria* or *Schizomycetes*. [B.] 2. As a n., a name applied by Hellriegel to certain organized forms found in the tubercles upon the roots of leguminous plants. They resemble *Bacteria* in shape, aud by Brunchorst, Frank, and Tschirch have been considered to be *Bacteria* which have penetrated into the root-tissues and which assist in the nutrition of the plants by fixing the nitrogen of the atmosphere and supplying it to the plants in a form suitable for assimilation. According to more recent and exact investigations, they are believed to be only peculiarly modified plant-cells. [H. Hellriegel, "Ztschr. des Vereins f. Rübenzucker-Industrie," etc., Nov., 1886, p. 863 (B); A. Tschirch, "Ber. d. dtsch. bot. Gesellsch.," v, 2, p. 58, cited in "Ctrlbl. f. Bacteriol. u. Parasitenk.," i, 1887, No. 5, p. 133, and No. 21, p. 634 (B).]—**B'enschicht** (Ger.). The layer in the root-tubercles of the *Leguminosæ* in which the b's are found. [B.]

BACTERURIA (Lat.), n. f. Ba^{2}k(ba^{3}k)-te^{2}r(tar)-u^2(u)′ri^2-a^3. See Bacteriuria.

BACTRIDE (Fr.), n. Ba^{3}k-tred. See Bactridium.

BACTRIDEÆ (Lat.), n. f. pl. Ba^{2}k(ba^{3}k)-tri^{2}d′e^2-e(a^3-e^2). Fr., *bactridées*. Ger., *Bactrideen*. In Drude's classification, a subtribe of palms belonging to the tribe *Cocoineæ*, suborder *Ceroxylinæ*, comprising *Bactris*, *Desmoncus*, *Astrocaryum*, and two other genera. It is distinguished from the *Attaleeæ* by the germinal pores being situated above the middle or near the apex of the putamen. [Drude (B, 245).]

BACTRIDIACEÆ (Lat.), n. f. pl. Ba^{2}k(ba^{3}k)-tri^{2}d-i^2-a(a^3)′-se^2(ke^2)-e(a^3-e^2). Fr., *bactridiacées*. Ger., *Bactridiaceen*. A name given by Corda to a family of hyphomycetous *Fungi*, comprising *Bactridium*, and seven other genera which have the spores borne upon erect filaments which spring from a creeping mycelium. [B, 121.]

BACTRIDIEÆ (Lat.), n. f. pl. Ba^{2}k(ba^{3}k)-tri^{2}d-i(i^2)′e^2-e(a^3-e^2). Fr., *bactridiées*. Ger., *Bactridieen*. A tribe of *Fungi* (*Uredineæ*) comprising *Bactridium* and two other genera. [A. Brongniart (B, 121).]

BACTRIDIUM (Lat.), n. n. Ba^{2}k(ba^{3}k)-tri^{2}d(tred)′i^2-u^{3}m(u^{4}m). From βακτηρίδιον, a little staff. Fr., *bactride*. A name given by Kunze to a genus of *Fungi* found upon old wood or the bark of trees, and distinguished by its multiseptate, rod-like spores, derived from erect hyphæ springing from the creeping mycelium. [B, 121.]

BACTRIS (Lat.), n. f. Ba^{2}k(ba^{3}k)′tri^{2}s. Gen., *bac′tridos* (*-dis*). From βάκτρον, a cane, because one species is made into walking-sticks. A genus of palms established by Jacquin, belonging to the subtribe *Bactrideæ* (Drude). It is characterized by the urceolate three-toothed corolla of the female flowers, surrounded by or projecting from the urceolate or ring-shaped calyx; by the central rib of the leaves ending with the terminal pinna; and by the rounded or oblong putamen, the open germinal pore of which is not equidistant with the two closed pores from the apex of the putamen. By Drude it is divided into the subgenera *Eubactris* (the *B.* of Karsten), *Augustinea* (the genus *Augustinea* [Karsten] or *Oocarpos* [Martius]), and *Guilielma* (the genus *Guilielma* [Martius]). [B, 245.]—**B. acanthocarpa** [Martius]. A Brazilian species the leaves of which furnish a strong thread. [B, 173.]—**B. gasipaës** [Kunth]. Syn.: *Guilielma speciosa* [Martius]. A South American species known as *chonto*, *chontadura*, *pirijao* (in Venezuela), *pupunha* (in Brazil), and *gachipaës*. It bears fruit abundantly, although but once in several years. The fruit resembles an apricot in appearance, is juicy and of agreeable taste, contains a large amount of starch, and is much used as an article of food. [B, 88, 173, 188, 245.]—**B. guineensis** [Linnæus]. See *B. minor*.—**B. major** [Jacquin]. A Carthagena species with large rounded, edible fruit. [B, 71, 188.]—**B. maraja** [Martius]. A Brazilian species, from the fruit of which is made a sort of wine. [B, 49.]—**B. minima** [Gärtner], **B. minor** [Jacquin]. Syn.: *Cocos guineensis* [Linnæus]. A species indigenous to the West Indies and South America. From its stalks black walking-sticks, called Tabago canes, are made; the fresh leaves are eaten as a salad; the pulp of the fruit is used as a remedy in catarrhal thoracic affections, and contains a fixed oil used for illumination and soap-making; and the seeds contain an edible fixed oil. [B, 173, 180, 188.]—**B. setosa**. A Brazilian species, the leaves of which furnish a textile fibre called *tecun*, stronger and finer than that of hemp, but incapable of being used for ordinary fabrics. [B, 104.]—**B. speciosa** [Martius]. See *B. gasipaës*.

BACTRODIDA (Lat.), n. n. pl. Ba^{2}k(ba^{3}k)-tro^{2}d′i^{2}d-a^3. A subfamily of the *Reduvida*. [L, 265.]

BACTYRILOBIUM (Lat.), n. n. Ba^{2}k(ba^{3}k)-ti^{2}r(tu^{6}r)-i^2-lo(lo^2)′-bi^2-u^{3}m(u^{4}m). Fr., *bactyrilobe*. Of Willdenow, see Cathartocarpus.—**B. fistula**. See Cathartocarpus *fistula*.

BACUJON (Fr.), n. Ba^{3}k-u^6-zho^{2}n^2. A provincial name for the *Lathyrus tuberosus*. [B, 121.]

BACUL (Beng.), n. The *Mimusops elengi*. [B, 172.]

BACULUM, BACULUS (Lat.), n's n. and m. Ba^{2}k(ba^{3}k)′u^2(u^4)-lu^{3}m(lu^{4}m), -lu^{3}s(lu^{4}s). See Bacillus.

BACUMBER (Hind.), n. The *Anisomeles ovata*. [B, 172.]

BACUNGBUNG, n. An apocynaceous plant of the Philippines, the milky juice of which has been used as an abortifacient. [B, 88.]

BACURY, n. Also written *pacury*. The *Platomia insignis*. [B, 218.]

BAD (Ger.), n. Ba^{3}d. A bath.—**Alkoholb'.** See *Alcohol* bath.—**Allgemeines B.** A general bath. [B, 49.]—**Ameisenb'.** See under Ameise.—**Arsenikb'.** See Balneum *arsenicale* and Bain *arsenical*.—**Aschenb'.** See *Ash* bath.—**B'eanstalt.** A bathing establishment. [A, 315.]—**B'earzt.** A physician of a watering-place. [A, 315.]—**B'eausschlag.** A rash produced by bathing. [Kisch (A, 319).] See Psydracia *thermalis*.—**B'ecur.** A course of treatment by the systematic use of baths; also an establishment for that purpose. [A, 315; Kisch (D, 18).]—**B'efrau.** See *B'emutter*.—**B'efriesel.** See Psydracia *thermalis*.—**B'ehaus.** A bathing establishment. [L, 80.]—**B'eheilkunde.** Balneotherapeutics. [B.]—**B'ehonig.** An inferior quality of honey. [A, 315.]—**B'ekopf.** A cupping-glass. [A, 315.]—**B'ekraut.** The *Ligusticum levisticum*. [L, 105.]—**B'ekrautwurzel.** See *Radix* levistici.—**B'ekunst.** See Balneotechnics.—**B'emalz.** Barley-malt dried at a temperature of from 40° to 90° C.; used in the preparation of baths. [B, 270.]—**B'emutter.** A midwife. [A, 315.]—**B'esalz.** Salt or a mixture of salts for the preparation of baths. [B, 270.] See Balneum *marinum* and *Bain de* sel *marin*.—**B'eschwamm.** See Sponge.—**B'eseife.** See Soap.—**B'espiritus.** See Spiritus *saponato-aromaticus pro balneo*.—**B'estube.** A stove or other like contrivance for administering a hot-air or vapor bath, also for drying pharmaceutical preparations. [A, 301.]—**B'ewanne.** A bath-tub.—**B'ewarm.** Of a proper temperature for bathing. [A, 315.]—**B'ewärme.** The temperature of a bath, or that proper for bathing. [A, 315.]—**B'ezeit.** The bathing season. [M, 6.]—**B'kopf.** See *B'ekopf*.—**B'kraut.** See *B'ekraut*.—**B'sturm.** See *Bath* fever.—**Bassinb'.** See *Tank* bath.—**Caustisches B.** See *Caustic* bath.—**Chlorgasb'.** See *Fumigation de* chlore and *Vapor* chlori.—**Chlorzinkb'.** A zinc-chloride bath. [B, 270.]—**Comprimirtes Luftb'.** See *Compressed-air* bath.—**Dampfb'.** See *Vapor* bath.—**Doucheb'.** See Douche.—**Dunstb'.** See *Vapor* bath.—**Einhüllendes B.** See Balneum *involvens*.—**Eisenb'.** A ferruginous bath. [B, 108.]—**Eiskaltes B.** An ice-cold bath. [B, 108.]—**Elektrisches B.** See *Electrical* bath.—**Erdb', Erdeb'.** See

Earth BATH.—**Erweichendes B.** See *Emollient* BATH.—**Faradisches B.** See *Faradaic* BATH.—**Festes B.** See *Solid* BATH.—**Fichtennadelb'.** A fir-needle bath. BADAFA, n. See BADASSA.

BÁDÁM (Hind., Beng.), **BÁDÁMA** (Sanscr.), n's. The *Amygdalus communis*. [B, 181.]

BADAMIA (Lat.), n. f. Ba^3-da^{3}m'i^2-a^3. Fr., *badamier*. Of Gärtner, a section of the botanical genus *Terminalia*, comprising the species with an ovoid fruit and a rounded or angular kernel. [B, 121.]—**B. Commersoni** [Gärtner]. The *Terminalia catappa*. [B, 212.]

BADAMIE-HINDIE (Dak.), n. The *Terminalia catappa*.

BADAMIE (Hind.), n. 1. See BADAM (1st def.). 2. An East Indian name for oil of almonds. [B, 19.] Cf. BADEM AGHADJI.—**B. farsie** (Hind., Pers.). The almond-tree (*Amygdalus communis*). [B, 88.]

BADAMIER (Fr.), n. Ba^3-da^{3}m-i^2-a. The genus *Terminalia*. [B, 173.]—**B. ailé.** The *Terminalia alata*. [B, 173.]—**B. argenté.** The *Terminalia argentea*. [B, 173.]—**B. au vernis.** The *Terminalia vernix*. [A, 385.]—**B. belliric.** The *Terminalia bellirica*. [B, 173.]—**B. benjoin.** The *Terminalia angustifolia*. [A, 385.]—**B. chébule.** The *Terminalia chebula*. [B, 173.]—**B. citrin.** The *Terminalia citrina*. [B, 173.]—**B. de Malabar.** The *Terminalia catappa*. [B, 173.]—**B. des Moluques.** The *Terminalia moluccana*. [B, 173.]—**B. paniculé.** The *Terminalia paniculata* (*macroptera*). [B, 173.]—**B. vernix.** The *Terminalia vernix*. [B, 173.]

BADANJAM (Hind.), n. The *Solanum melongena*. [B, 172.]

BADARINGI (Ar.), n. The *Melissa fruticosa*. [B, 121.]

BADAROA, n. Fr., *badaroe*. See SICYOS.

BADASE (Fr.), n. Ba^{3}d-a^{3}s. The *Lavandula spica* [Linnæus]. [B, 173.]

BADASSA, n. A Languedoc name for the genus *Lavandula*. [B, 121.]

BADASSO, n. A Provence name for the plantain (*Plantago cynops*). [B, 38, 121.]

BA-DAU-TAU, n. A Cochin-China name for the *Croton tiglium*. [B, 121.]

BADÁWARD (Pers.), n. A Persian drug, considered by some (probably erroneously) to be the *shúkai* of the Hindus; thought by Dymock to be the *Tricholepis procumbens* (*q. v.*). ["Pharm. Jour. and Trans.," Aug. 16, 1879, p. 122; Jan. 24, 1880, p. 581 (B).]

BADBO-KI-ZIRANGI, n. A Deccan name for the *Mylabris cichorii* [Fabricius] or the Telini fly (*Meloe cichorii* [Linnæus]). ["Proc. of the Am. Pharm. Assoc.," xx, p. 249 (B).]

BADDER-LOCKS, n. Ba^{2}d'du^{5}r-lo^{2}ks. The *Alaria esculenta*. [B, 19.]

BADE, n. A place in Switzerland, where there is a hot saline spring. [A, 385.]

BADEA, n. An Ecuador name for the *Passiflora quadrangularis*. [B, 121.]

BADEK, n. A Java name for a fermented liquor made from rice. [B, 19.]

BADELGIAN (Pers.), n. The *Solanum pomiferum*. [B, 121.]

BADELLA (Lat.), n. f. Ba^{2}d(ba^{3}d)-e^{2}l'la^3. See BDELLA.

BADEM AGHADJI (Turk.), n. The *Amygdalus communis*. [B, 92.]

BADEN (Ger.), n. Ba^{3}d'e^{2}n. 1. A small city near Vienna, Austria, where there are thirteen hot springs which have been used therapeutically since the times of the ancient Romans. They contain sulphur compounds, sodium chloride, and sodium carbonate. Their temperature ranges from 26° to 36° C. The most copious spring, the Römerquelle, has a temperature of 33·75° C., and 1,000 parts of the water contain:

Calcium sulphate	0·734	Sodium carbonate	0·093
Calcium carbonate	0·295	Free hydrogen sulphide	2·056
Sodium chloride	0·255		

The water of this spring is drank, mostly with milk, whey, or other mineral waters; the other springs are used chiefly for bathing purposes. In many of the establishments there are appliances for douches, vapor-baths, and vapor-douches, and the Römerquelle is used by inhalation—either the gas arising from it or the water in the form of spray. Mud-baths are also employed. The air of the place is fresh, pure, and invigorating; B. being situated on the eastern spur of the Alps, at an elevation of 218 metres. It is chiefly resorted to by patients with scrofula, catarrh, rheumatism, gout, and cutaneous diseases. [A, 319, 363, 453.] 2. The Aquæ Helvetiæ of the ancients; a town in Aargau, Switzerland, in the valley of the Limmat, 383 metres above the sea, near which there are numerous hot springs; 10,000 parts of the water of the Verenaquelle contain:

Sodium chloride	3·20	Sodium sulphate	18·43
Lithium chloride	0·24	Potassium sulphate	1·27
Magnesium chloride	0·17	Magnesium carbonate	2·32
Calcium chloride	13·46	Silicic acid	0·46
Strontium chloride	0·10	Calcium arsenate	0·85

The waters are used chiefly for baths, for the same purposes as those of other sulphurous springs rich in calcium compounds. [A, 319, 363, 453.]—**B.-B.** See the major list.—**B. bei Wien.** See *B.* (1st def.).—**B. im Aargau.** See *B.* (2d def.).—**B. près de Vienne** (Fr.). See *B.* (1st def.).

BADEN-BADEN (Ger.), n. Ba^{3}d"e^{2}n-ba^{3}d'e^{2}n. A noted health-resort on the right bank of the Oos, at the entrance to the Black Forest, in the Grand Duchy of Baden. There are several hot springs, but they are not rich in solid constituents, and the place is chiefly resorted to on account of its mild, equable climate and its freedom from winds, which render it suitable for consumptives, convalescents, and the subjects of gout, rheumatism, and paralysis; 1,000 parts of the water of the Ursprung (the one that is used for drinking, mostly with the addition of common salt, Carlsbad salts, Marienbad salts, milk, or whey) contain:

Sodium chloride	2·151	Calcium sulphate	0·202
Potassium chloride	0·163	Free carbon dioxide	24·72 c.c.
Calcium carbonate	0·165		

Pine-cone extract and Mutterlauge are often added to the baths. [A, 319, 363, 453.]

BADENDJAN (Ar.), **BADENGAN** (Pers.), **BADENJAN** (Ar.), n's. The *Ocimum basilicum*. [B, 121.]

BADENKEN (Ger.), n. Ba^{3}d'e^{2}n-ke^{2}n. See *Flores* PRIMULÆ.

BADENWEILER (Ger.), n. Ba^{3}d'e^{2}n-vil-e^{2}r. A place in the Grand Duchy of Baden, near Müllheim, in the Black Forest, where there are unimportant mineral springs used chiefly for bathing. The climatic characters of the place are more important; they are those of mildness and equability, and are thought highly favorable for patients with scrofula, chronic bronchial catarrh, a relaxed state of the tissues, and the sequelæ of pleurisy or pneumonia. Cow's, goat's, and ass's milk, also whey and kumys, are used systematically, and in autumn the grape-cure. [A, 319; L, 49.]

BÄDERLEHRE (Ger.), n. Bad'e^{2}r-le^{2}r'e^2. See BALNEOLOGY.

BÄDERMALZ (Ger.), n. Bad'e^{2}r-ma^{3}ltz. See *Bademalz*, under BAD.

BÄDERSALZ (Ger.), n. Bad'e^{2}r-za^{3}ltz. See *Badesalz*, under BAD.

BADEWEILER (Ger.), n. Ba^{3}d'e^2-vil-e^{2}r. See BADENWEILER.

BADEZAHER (Ar.), **BADEZAHR** (Ar.), n's. See BEZOAR.

BADGER, n. Ba^{2}j'u^{6}r. Fr., *blaireau* (1st def.). Ger., *Dachs* (1st def.). 1. The *Meles taxus*, a plantigrade animal of Europe. Its fat (axungia taxi) was formerly used in medicine. [A, 359.] 2. The *Hyrax capensis* [Cuvier], termed b. by the Cape Colonists, the dry excrements of which are supposed to constitute the drug hyraceum (*q. v.*). [A, 247; L.]—**B's-bane.** The *Aconitum meloctonum*. [B, 19.]

BADH (Heb.), n. The *Linum usitatissimum*. [B, 88.]

BADHAAMU, n. A leguminous plant, perhaps a species of *Cajanus*. [B, 121.]

BADHAMIA (Lat.), n. f. Ba^{3}d-ha^3'mi^2-a^3. A genus of *Myxomycetes*, related to *Physarum*, of which it is sometimes regarded as a subgenus. [B, 121.]

BADHAMU, BADHUMN, n's. A sort of millet growing in Ceylon. [B, 38, 121.]

BÂDI, n. An East Indian name for scurvy. [R. T. Wright, "Indian Med. Gaz.," Sept., 1886, p. 285.]

BADIAGA, n. See SPONGIA *lacustris*. [B, 270.]

BADIAN, n. From Pers., *bâdyân*. Fr., *badiane*, *badian*. Ger., *Badian*. The *Illicium anisatum*. [B, 38, 270.]—**B'öl** (Ger.). The volatile oil of the *Illicium anisatum*. [B, 270.]—**B'säure** (Ger.). Anisic acid. [A, 324.]—**Fructus b., Semen b.** The fruit of the *Illicium anisatum*. [B, 180.]

BADIANA (Lat.), n. f. Ba^{3}d-i^2-a^3'na^3. Of Spach, a section of the botanical genus *Illicium*. [B, 121.]—**Semen badianæ.** The fruit of *Illicium anisatum*. [B, 180.]

BADIANE (Fr.), n. Ba^3-di^2-a^{3}n. Star-anise (the *Illicium anisatum*). [B, 113.]—**B. anisée.** See *B.*—**B. à petites fleurs.** The *Illicium parviflorum*. [B, 173.]—**B. de la Floride.** The *Illicium floridanum*. [B, 173.]—**B. de Chine, B. des Indes.** The *Illicium anisatum* or its fruit. [B, 38, 173.]—**B. rouge.** A shrub, with reddish-brown flowers, growing in Florida, highly aromatic and having a bitter bark; said to have the same uses as sassafras and cascarilla. [B, 38.]—**B. sacrée.** The *Illicium religiosum*. [B, 38.]—**Eau distillée de b.** [Fr. Cod.]. Star-anise water; made by macerating 1 part of the seeds of *Illicium anisatum* with water for twelve hours, and distilling until 4 parts of distillate are obtained. [B, 113.]—**Essence de b., Huile volatile de b.** [Fr. Cod.]. Oil of star-anise. [B, 113.] See *Oleum* ILLICII *anisati*.—**Poudre de b.** (fruit) [Fr. Cod.]. The fruit of *Illicium anisatum* dried at 25° C., powdered in an iron mortar, and passed through a No. 1 sieve. [B, 113.]—**Teinture de b.** [Fr. Cod.]. Tincture of star-anise; made with 1 part of the fruit of *Illicium anisatum* and 5 parts of 80-per-cent. alcohol. [B. 113.]—**Teinture d'essence de b.** [Fr. Cod.]. A solution of 2 parts of the volatile oil of *Illicium anisatum* in 98 parts of alcohol of 90 per cent. by volume (85·7 per cent. by weight). [B, 113.]

BADIANE-HUTTAIE (Ar.), n. The *Illicium anisatum*. [B, 92.]

BADIANIER (Fr.), n. Ba^3-di^2-a^{3}n-i^2-a. The genus *Illicium*. [B, 121.]—**B. à petites fleurs.** The *Illicium parviflorum*. [B; L, 87.]—**B. de Java, B. de la Chine, B. de l'Inde, B. des Philippines, B. du Japon.** The *Illicium anisatum*. [B, 46.]

BADIANIFERA (Lat.), n. f. Ba^{3}d-i^2-a^{3}n-i^{2}f'e^{2}r-a^3. The genus *Illicium*. [B, 121.]

BADIANIQUE (Fr.), adj. Ba^3-di^2-a^{3}n-ek. Pertaining to star-anise. [A, 385.] See ANISIC.

BADIANUM (Lat.), n. n. Ba^{3}d-i^2-a^{3}n'u^{3}m(u^{4}m). The fruit of *Illicium anisatum*. [B, 180.]—**B. muscoviticum, B. stellatum.** See *B.*—**Cortex badiani.** The bark of *Illicium anisatum*. [B, 180.]—**Oleum badiani.** See *Oleum* ILLICII *anisati*.

BADIANUS (Lat.), adj. Ba^{3}d-i^2-a(a^3)'nu^{3}s(nu^{4}s). Of or pertaining to badian or the *Illicium anisatum*. [B, 180.] See SEMEN *badianum*.

BADIDE-CHETTU (Teloogoo), n. The *Erythrina indica*. [B, 172.]

BADIERA (Lat.), n. f. Ba^{2}d(ba^{3}d)-i^2-e(a)'ra^3. Of De Candolle, a genus of West Indian polygalaceous plants, by some referred to the genus *Polygala*. The *B.* of Has-karl includes Asiatic species which belong to *Polygala*. [B, 42, 121.]—**B. diversifolia** [De Candolle]. Syn.: *Polygala diversifolia* [Linnæus]. A Jamaica shrub. [B, 214.]

BADIGEONNAGE (Fr.), n. Ba^{3}d-e-zho^{2}n-na^{3}zh. The procedure of applying a liquid or semi-liquid substance to the skin or a mucous surface by means of a brush. [L, 49.]

BADIJANE-KHATAI, n. See BADIANE-HUTTAIE.

BADINDJAN (Ar.), n. See BADINJAN.

BADINGIAN (Pers.), n. See BADELGIAN.

BADINJAN (Ar.), n. The *Solanum melongena*. [B, 121.]

BADIOUS, adj. Ba^{2}d'i^2-u^{3}s. Lat., *badius*. Ger., *kastanienbraun*. Bay- or chestnut-colored. [B, 19.]

BADIRI, n. An Amboyna plant having irritant properties; applied to children to make them walk fast. [B, 121.]

BADISHFAN (Ar.), n. The *Spartium junceum*. [B, 121.]

BADISIS, BADISMUS (Lat.), n's f. and m. Ba^{2}d(ba^{3}d)'i^2-si^{2}s, ba^{2}d(ba^{3}d)-i^{2}z(i^{2}s)'mu^{3}s(mu^{4}s). Gen., *badis'eos* (*-sis*), *-is'mi*. Gr., βάδισις, βαδισμός (from βαδίζειν, to walk). The act of walking. [Galen (A, 325).]

BADITIS, n. A Gaelic name for the *Nenuphar*. [B, 121.]

BADIUS (Lat.), adj. Ba^{2}d(ba^{3}d)'i^2-u^{3}s(u^{4}s). See BADIOUS.

BADIYAN (Pers.), n. Fennel. [B, 88.]

BADMINTON, n. Ba^{2}d'mi^{2}n-to^{2}n. A spiced and sweetened preparation of claret. [L, 56.]

BADOK-BANKON, n. A Ceylon name for the *Ballota disticha*. [B, 121.]

BADRUNJBUYEH (Pers.), n. The *Melissa officinalis*. [B, 92.] Cf. BADARINGI.

BADUCCA, BADUKKA, n's. The *Capparis Rheedii*. [B, 38, 121.]

BADULA (Lat.), n. f. Ba^{2}d(ba^{3}d)'u^2(u^4)-la^3. From the Ceylon name, *badulam*. Of Jussieu, a genus of myrsineaceous plants; by Endlicher made a section of the genus *Myrsine*, including the species that have the inflorescence in paniculate racemes or in umbels; by Bentham and Hooker referred to *Ardisia*. [B, 42, 121.]—**B. barthesia** [Bojer], **B. insularis** [De Candolle], **B. micrantha** [Bojer]. See ARDISIA *insularis*.

BADULAM, n. A Ceylon name for the genus *Badula*. [B, 121.]

BADURA, n. See NEPENTHES.

BADUSA (Lat.), n. f. Ba^{2}d(ba^{3}d)'u^2(u^4)-sa^3. A genus of rubiaceous plants of the tribe *Cinchoneæ*, established by A. Gray. [B, 42.]—**B. corymbifera** [A. Gray]. Syn.: *Cinchona corymbifera* [Forster]. A shrub or small tree with a very bitter bark, growing in the Tonga and Fiji Islands. [B. 121.]

BADYAN (Russ.), n. The *Illicium anisatum*. [B; L, 105.]

BADZAR, n. See BEZOAR.

BÆA (Lat.), n. f. Be'(ba^3'e^2)-a^3. Named in honor of *Beau*. A genus of cyrtandraceous plants of the tribe *Eudidymocarpeæ*, established by Commerson. [B, 121.]

BÆCKEA (Lat.), n. f. Bak'e^2-a^3. Named in honor of A. Bäck, physician to the Swedish king. A genus of myrtaceous plants established by Linnæus. According to Bentham and Hooker, it includes the sections *Babingtonia*, *Oxymyrrhine*, *Harmogia*, *Schidiomyrtus*, *Euryomyrtus*, and *Rinzia*, which have been regarded as distinct genera. [B, 42, 219.]—**B. camphorosmæ** [Endlicher]. Syn.: *Babingtonia camphorosmæ* [Lindley]. An Australian species belonging to the section *Babingtonia*. [B, 219.]—**B. chinensis** [Gärtner], **B. frutescens** [Linnæus]. An aromatic Asiatic species, used as an abortifacient and diuretic. The leaves and branches have an agreeable odor, and are employed to preserve clothes from the attacks of insects. [B, 121, 214.]

BÆCKEÆ (Lat.), n. f. pl. Bak'e^2-e(a^3-e^2). Fr., *bœckéées*. Syn.: *Bœckeeæ*, *Bäkeeæ* [Reichenbach]. 1. Of Schauer, a tribe or subtribe of myrtaceous plants (*Leptospermeæ*) including *Bœckea* and five or six other genera. 2. Of Reichenbach, a subdivision of the *Myrteæ*. 3. Of Bentham and Hooker, a group of myrtaceous plants including *Bœckea*, *Balanstium*, and another genus. [B, 121, 170.]

BÆCKEEÆ (Lat.), n. f. pl. Bak-e(a)'e^2-e(a^3-e^2). See BÆCKEÆ.

BAEGAL (Hind.), n. The *Holbœllia latifolia*. [B, 121.]

BÆKEA (Lat.), n. f. See BÆCKEA.

BÆKEEÆ (Lat.), n. f. pl. See BÆCKEÆ.

BAEL, n. Ba'e^{2}l. Lat., *bela*. Fr., *bael*. Ger., *Bael*. It., *bael*. The *Ægle marmelos* (*q. v.*). [B, 172.]—**B. fruit.** See BELÆ *fructus*.—**Indian b.** See BELÆ *fructus*.—**Liquid extract of b.** See *Extractum* BELÆ *liquidum*.—**Mucilage of b.** A sort of mucilage extracted from b. fruit. [B, 8.]

BAELE, n. See BAEL.

BÆMYCES (Lat.), n. m. Be^{2}m'(ba^3'e^{2}m)-i^2(u^6)-sez(kas). See BÆOMYCES.

BÆMYCIDEÆ (Lat.), n. f. pl. Be^{2}m(ba^3-e^{2}m)-i^2(u^6)-si^{2}d-(ki^{2}d)'e^2-e(a^3-e^2). See BÆOMYCIDEÆ.

BÆNODACTYLI (Lat.), n. m. pl. Be^{2}n(ba^3-e^{2}n)-o(o^2)-da^{2}k-(da^{3}k)'ti^{2}l(tu^{6}l)-i(e). From βαίνειν, to walk, and δάκτυλος, a digit. Fr., *bœnodactyles*. Of Ritgen, a family of reptiles having limbs adapted to walking. [L, 180.]

BÆNOSAURII (Lat.), n. m. pl. Be^{2}n(ba^3-e^{2}n)-o(o^2)-sa^{4}r'-(sa^3'u^{4}r)-i^2-i(e). From βαίνειν, to walk, and σαύρα, a lizard. Of Ritgen, a family of saurians having limbs adapted to walking. [L, 180.]

BÆOBOTHRYON (Lat.). n. n. Be(ba^3-e^2)-o(o^2)-bo^{2}th'ri^2(ru^6)-o^{2}n. Of Nees, a section of the genus *Scirpus*, including species with a mucronate fruit and solitary, terminal spikelets. [B, 121.]

BÆOBOTRYS [Forster] (Lat.), n. m. Be(ba^3-e^2)-o(o^2)-bo^{2}t'ri^{2}s-(ru^{6}s). Gen., *bœobot'ryos* (*-ryis*). From βαιός, small, and βότρυς, a bunch of grapes. See MÆSA.

BÆOMECONICUS (Lat.), adj. Be(ba^3-e^2)-o(o^2)-me^{2}k(mak)-o^{2}n(on)'i^{2}k-u^{3}s(u^{4}s). From βαιός, small, and μηκωνικός, of or like a poppy. Ger., *schwachmekonsauer*, *kleinmekonsauer*. See COMENIC.

BÆOMETRA (Lat.), n. f. Be(ba^3-e^2)-o(o^2)-me^{2}t'ra^3. Fr., *bœométre*. A genus of liliaceous plants of the tribe *Anguillarieæ*, established by Salisbury. [B, 42.]—**B. columellaris** [Salisbury].

Syn.: *Melanthium uniflorum* [Jacquin] (seu *ciliatum* [Jacquin], seu *æthiopicum* [Thunberg], seu *flavum*), *Tulipa breyniana* [Linnæus], *Kolbea breyniana* [Schlechtendahl], *Jania breyniana* [Römer and Schultes]. An herbaceous South African species with yellow flowers. [B, 42, 188.]

BÆOMYCEÆ (Lat.), n. f. pl. Be(ba^3-e^2)-o(o^2)-mi(mu^6)'se^2(ke^2)-e-(a^3-e^2). For deriv., see Bæomyces. Of Körber, a family of lichens comprising the genus *Bæomyces*. [B, 170.]

BÆOMYCEI, BÆOMYCETEI (Lat.), n's m. pl. Be(ba^3-e^2)-o(o^2)-mi^{2}s(mu^{6}k)'e^2-i(e), -mi^{2}s(mu^{6}k)-e^{2}t(at)'e^2-i(e). Of Nylander, a tribe of lichens, including *Bæomyces*, characterized by the usually stipulate, biatorine apothecia. [B, 121.]

BÆOMYCES (Lat.), n. m. Be(ba^3-e^2)-o^{2}m'i^{2}s(u^{6}k)-ez(as). Gen., *bæomyce'tos* (*-tis*). From βαιός, small, and μύκης, a fungus. A genus of lichens made by Ehrhart, having a tartareous thallus and a solid stipes without a cortical layer, bearing on its apex a capitate, immarginate, velate apothecium. [B, 274.]—**B. cocciferus** [Acharius]. Fr., *fausse cochenille*, *herbe du feu*. A European species, employed as a bechic and, in Thuringia, as a remedy for intermittent fevers. [B, 121, 173.]—**B. cornucopioides** [Acharius]. A variety of *B. cocciferus*. [B, 173.]—**B. ericetorum** [De Candolle]. See *B. roseus*.—**B. paschalis** [Whlbg.]. The *Stereocaulon paschale*. [B, 173.]—**B. pungens** [Acharius]. A species sometimes regarded as a variety of *B. rangiferinus*, affording a brownish-yellow or, when combined with sulphate of iron, a greenish dye. [B, 173.] See under Cladonia *rangiferina*.—**B. pyxidatus** [Acharius]. Fr., *pixide*. Ger., *Becherflechte*. See Cladonia *pyxidata*.—**B. rangiferinus** [Acharius]. See Cladonia *rangiferina*.—**B. roseus** [Persoon]. A French and English species with a white verrucose thallus and rose-colored or flesh-colored apothecia, growing in clayey soils. It is used as a dye, giving with alum and sulphate of iron an ash-gray or tawny tint. [B, 173, 274.]—**B. uncialis** [Acharius]. A European species affording a brownish dye. [B, 173.]

BÆOMYCETEI (Lat.), n. m. pl. Be(ba^3-e^2)-o(o^2)-mi(mu^6)-se-(ka)'-te^2-i(e). See Bæomycei.

BÆOMYCIDEÆ (Lat.), n. f. pl. Be(ba^3-e^2)-o(o^2)-mi(mu^6)-si^{2}d-(ki^{2}d)'e^2-e(a^3-e^2). Of Gray, a division of lichens (*Cœnothalameæ*) comprising *Bæomyces* and two other genera. [B, 170.]

BÆOTHRYON (Lat.), n. n. Be(ba^3-e^2)-o^{2}th'ri^2(ru^6)-o^{2}n. From βαιός, small, and θρύον, a rush. A genus of the *Cyperaceæ* made for the *Scirpus b.* [B, 121.]

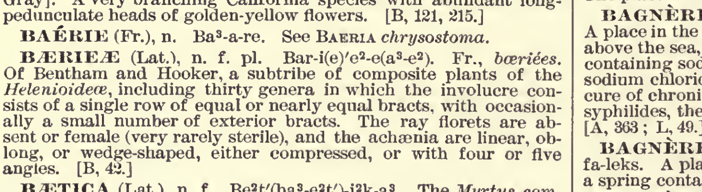
BAER (Hind.), n. The *Zizyphus jujuba*. [B, 181.]

BAERIA, BÆRIA (Lat.), n's f. Bar'i^2-a^3. From the name of the Russian zoologist, *von Baer*. A genus of composite plants of the tribe *Helenioideæ*, established by Fischer and Meyer, including several California species. [B, 121, 215.]—**B. chrysostoma** [Fischer]. Fr., *baérie*. Syn.: *Burrielia chrysostoma* [Torrey, Gray]. A very branching California species with abundant long-pedunculate heads of golden-yellow flowers. [B, 121, 215.]

BAÉRIE (Fr.), n. Ba^3-a-re. See Baeria *chrysostoma*.

BÆRIEÆ (Lat.), n. f. pl. Bar-i(e)'e^2-e(a^3-e^2). Fr., *bæriées*. Of Bentham and Hooker, a subtribe of composite plants of the *Helenioideæ*, including thirty genera in which the involucre consists of a single row of equal or nearly equal bracts, with occasionally a small number of exterior bracts. The ray florets are absent or female (very rarely sterile), and the achænia are linear, oblong, or wedge-shaped, either compressed, or with four or five angles. [B, 42.]

BÆTICA (Lat.), n. f. Be^{2}t'(ba^3-e^{2}t')-i^{2}k-a^3. The *Myrtus communis*. [B.]—**Folia bæticæ, Folia bæticæ sativæ, Folia bæticæ silvestris.** Myrtle leaves (the leaves of the *Myrtus communis*). [B, 180.]



BÆUMERTA (Lat.), n. f. Be(ba^3-e^2)-u^{3}m(u^{4}m)-u^{6}rt(e^{2}rt)'a^3. See Nasturtium.—**B. nasturtium** [Flora of Wetteravia]. See Nasturtium *officinale*.

BÆVILA, n. A Ceylon name for a plant which is probably a sort of mallow. [B, 121.]

BAF (Fr.), n. Ba^{3}f. The pretended offspring of a bull and a mare. [A, 385.]

BAFFINE, n. Ba^{2}f'fen. Fr., *baffine*. A two-per-cent. solution of potassium permanganate, used for staining the hair. [A, 385; B, 270.]

BAG, n. Ba^{2}g. A.-S., *bælg*, *bælig*. Any sac-like structure; a vulgar term for the udder of the cow, also for the scrotum. [A, 302; L.]—**Air-b.** Fr., *ballon*. Ger., *Luft-Ballon*. It., *pallone*. A b., usually of soft rubber, to be inflated with air and used as a pad, as a dilator, etc.—**B. of waters.** Fr., *poche des eaux*. Ger., *Fruchtblase*. Sp., *bolsa de las aguas*. A popular term for the accumulation of liquor amnii that takes place in advance of the fœtus during the expulsive stage of labor.—**Barnes's b's.** See *Barnes's* Dilators.—**Honey-comb b.** A popular term for the reticulum of a ruminant. [L, 147.]—**Ink-b.** A pyriform gland in certain mollusks, lying in or near the liver. It secretes a dark-colored liquid which the animal ejects when alarmed. [L, 11.]—**Politzer's b.** Fr., *ballon de Politzer*. Ger., *Politzer'scher Luft-Ballon*. It., *pallone d'aria del Politzer*. A b. of soft rubber for forcing air into the Eustachian tube. The nozzle, which has been variously modified by different otologists, is connected with the b. by a piece of rubber tubing 8 ctm. long. [F, 33.]—**Water-b's.** A term applied to certain pouches of the cardial portion of the stomach of the camel, provided with sphincter muscles. [L, 210.]

POLITZER'S BAG.

BAG-ACHERA, n. The *Tiliacora racemosa*. [B, 172.]

BAGAGE À COLLIER (Fr.), n. Ba^{3}g-a^{3}zh-a^3-ko^{3}l-li^2-a. The fruit of the *Cerbera ahouai*. [B, 121.]

BAGALATTA, BAGA-LUTA (Bengal.), n's. See Bag-achera.

BAGASSA (Lat.), n. f. Ba^3-ga^{3}s'sa^3. Of Aublet, a genus of urticaceous plants of the tribe *Moreæ*, subtribe *Broussonetieæ*. [B, 42.]—**B. guianensis** [Aublet]. Fr., *bagassier*. A Guiana species the wood of which (Fr., *bois de bagasse*) furnishes a yellow coloring matter and is used for making canoes and for other purposes. [B, 121.]

BAGASSE (Fr.), n. Ba^3-ga^{3}s. The dry crushed stalk of the sugar-cane. [B, 7.]—**B. de canne.** See *B.*—**B. d'indigo.** The residue left after the removal of indigo from the indigo-plant. [B, 173.]

BAGASSIER (Fr.), n. Ba^3-ga^{3}s-si^2-a. See Bagassa *guianensis*.

BAGATBAT, BAGATPAT, n's. See Bagapata.

BAGATTO, n. See Celtis.

BAGAU (Fr.), n. Ba^3-go. See Bagasse.

BAGBHERENDA (Hind.), **BÁGBHERENDÁ** (Bengal.), n's. The *Jatropha curcas*. [B, 172, 181.]

BAGGSÆTA (Swed.), n. The *Gentiana lutea*. [A, 259.]

BAGH-ANKARA (Bengal.), n. The *Alangium decapetalum*. [B, 172.]

BAGH-CHERENDA (Bengal., Hind.), n. The *Lablab cultratus*. [B, 172.]

BAGH-DHARANDA (Bengal.), n. The *Jatropha curcas*. [B, 172.]

BAGNACCIO (It.), n. Ba^{3}n-ya^{3}t'chi^2-o. A warm saline and feebly sulphurous spring in Tuscany. [A, 385; L, 49.]

BAGNÈRES-DE-BIGORRE (Fr.), n. Ba^{3}n-ye^{2}r-d'-be-gor. A place in the department of the Hautes-Pyrénées, France, eighty-five miles west of Toulouse, where there are many hot springs. The water of the spring *La Reine* contains magnesium carbonate, iron carbonate, calcium carbonate, sodium chloride, magnesium chloride, sodium sulphate, magnesium sulphate, calcium sulphate, silica, and carbon dioxide. The water is reputed a sedative for persons suffering from the effects of over-excitement and the atonic nervous derangements incident to a sedentary and studious life. The place is a popular winter resort. [A, 363; L, 49.]

BAGNÈRES-DE-LUCHON (Fr.), n. Ba^{3}n-ye^{2}r-d'-lu^6-sho^{2}n^2. A place in the department of the Haute-Garonne, France, 2,000 feet above the sea, where there are numerous warm sulphurous springs containing sodium, potassium, iron, and manganese sulphates and sodium chloride. The waters are drank and used as baths for the cure of chronic pustular and squamous affections of the skin, the syphilides, the scrofulides, chronic rheumatism, and old wounds. [A, 363; L, 49.]

BAGNÈRES-DE-SAINT-FÉLIX (Fr.), n. Ba^{3}n-ye^{2}r-d'-sa^{2}n^2-fa-leks. A place in the department of Lot, France, where there is a spring containing magnesium sulphate. [L, 49.]

BAGNÈRES-SUR-ADOUR (Fr.), n. Ba^{3}n-ye^{2}r-su^{6}r-a^3-dur. See Bagnères-de-Bigorre.

BAGNI A MORBA (It.), n. Ba^{3}n'ye a^3 mor'ba^3. A place in the province of Volterra, Italy, 1,600 feet above the sea-level, having a bathing establishment and fourteen warm and hot springs containing calcium salts and some hydrogen sulphide. [B, 269.]

BAGNI DELLA PORETTA (It.), n. Ba^{3}n'ye de^{2}l'la^3 po-re^{2}t'-ta^3. A place near Bologna, Italy, where there is a hot spring. [L, 49.]

BAGNI DELLA SCARPETTA (It.), n. Ba^{3}n'ye de^{2}l'la^3 ska^{3}r-pe^{2}t'ta^3. A place near Bologna, Italy, where there is a cold sulphurous spring. [L, 49.]

BAGNI DELLE CALDANE DI CAMPIGLIA (It.), n. Ba^{3}n'ye de^{2}l'la ka^{3}l-da^{3}n'a de ka^{3}m-pel'ya. See Caldanelle di Campiglia.

BAGNI DI CRANA (It.), n. Ba^{3}n'ye de kra^3'na^3. A place in the valley of the Onsernone, Switzerland, where there are warm springs. [B, 269.]

BAGNI DI LUCCA (It.), n. Ba^{3}n'ye de luk'ka^3. A place near Pisa, Italy, where there are several feebly chalybeate springs containing sulphates of calcium and magnesium. [L, 49.]

BAGNIGGE WELLS, n. Ba^{2}g'ni^{2}j we^{2}lz. The name of certain extinct springs in Clerkenwell, London, the waters of which are said to have resembled those of Epsom. [A, 316; L, 84, 97, 102.]

BAGNIO, n. Ba^{2}n'yo. Probably from It., *bagno*, or Sp., *baño*. 1. A bathing establishment, especially one in which sweating-baths are given. [Arbuthnot (L, 56).] 2. A house of prostitution. [L, 56.]

BAGNO (It.), n. Ba^{3}n'yo. A bath.

BAGNOLES (Fr.), n. Ba^{3}n-yol. A place in the department of the Orne, France, where there are two cold springs containing iron and sulphur, the waters of which are used for anæmia and nervous, gastric, and cutaneous diseases. [A, 385; B, 93.]

BAGNOLI (It.), n. Ba^{3}n-yo'le. A place near Naples, where there are warm springs con-

taining sulphates, used in paralysis, rheumatism, and cutaneous diseases. [B, 93 ; L, 49.]

BAGNOLS (Fr.), n. Ba^{3}n-yol. A place in the department of Lozère, France, where there are warm saline, alkaline, and feebly sulphurous springs. [A, 385 ; L, 49.]

BAGOAS (Lat.), n. m. Ba^{2}g(ba^{3}g)-o′a^{2}s(a^{3}s). See BAGOUS.

BAGOLA (It.), n. Ba^3′go-la^3. From *baccula*, dim. of *bacca*, a berry. A name given by Cæsalpinus to the fruit of the *Amelanchier* and that of the *Vaccinium myrtillus*. [B, 88, 121.]

BAGOLARUS [Guilandini], n. See CELTIS *australis*.

BAGOON (Hind.), n. The *Solanum melongena*. [B, 172.]

BAGOUS (Lat.), n. m. Ba^{2}g(ba^{3}g)-o′u^{3}s(u^{4}s). Gr. (from Pers.), βαγῶος, βαγώας. A eunuch. [A, 318.]

BAGRINA, BAGRIINA (Lat.), n′s n. pl. Ba^{2}g(ba^{3}g)-ri(re)′na, -ri^2-i(e)′na^3. A division of proteropterous *Siluridæ*. [L, 207.]

BAGUE AIMANTÉE (Fr.), n. Ba^{3}g a-ma^{3}n^2-ta. An amulet containing magnetized soft iron, formerly worn in cases of migraine. [B. 88.]

BAGUENAUDE (Fr.), n. Ba^{3}g-nod. 1. A fruit, like that of the *Colutea arborescens*, the *Physalis alkekengi*, etc., containing air in its interior. [B, 121.] 2. The *Physalis alkekengi*. [B, 173.]

BAGUENAUDIER (Fr.), n. Ba^{3}g-nod-i^2-a. A plant of the genus *Colutea*, especially the *Colutea arborescens*. [B, 121.]—**B. à vessie, B. commun.** The *Colutea arborescens*. [B, 46, 173.]—**B. de printemps, B. d'hiver.** The *Galanthus nivalis*. [B, 173.]—**B. du Levant.** The *Colutea orientalis* (*aperta*). [B, 173.]—**B. en arbre.** The *Colutea arborescens*. [B, 173.]—**B. oriental.** See *B. du Levant*.—**B. vésiculaire.** The *Colutea vesicaria*. [B, 173.]—**Faux b.** The *Coronilla emerus*. [B, 173.]

BAGUETTE (Fr.), n. Ba^3-ge^{2}t. Lit., a rod, a wand ; in botany, see TIGE *à b.*; in zoology, one of the curved rods, contained in the capsule, into which the nucleolus of some *Infusoria* divides during conjugation. [L, 66.]—**B. d'harmonie.** Lit., a musician's baton ; an expression used by Huguenin in reference to a fanciful name given by Bergmann to one of the limbs of the calamus scriptorius. [I, 28 ; K.]—**B. d'or.** A common name for the double varieties of the *Cheiranthus cheiri*. [B, 121.]—**B. magique.** A divining rod. [L, 49.]

BAGUIÉ, n. A Languedoc name for the *Laurus nobilis*. [B, 121.]

BAGUIO, n. A Guernsey name for a cherry. [B, 121.]

BAGY, n. The *Acorus calamus*. [B, 88.]

BAHAMENSIS (Lat.), adj. Ba^3-ha^3-me^{2}n′si^{2}s. Of or pertaining to the Bahama Islands.

BAHEL SCHULLI (Malay), n. The *Asteracantha longifolia*. [B, 172.]

BAHEL-TSJULLI, n. A Malabar name for the *Columnea longifolia*. [B, 93.]

BÄHEN (Ger.), v. tr. Ba′he^{2}n. To foment ; as a n., a fomentation. [A, 301.]

BAHERA (Hind., Bengal.), n. The *Terminalia bellerica*. [B, 181 ; "Proc. of the Am. Pharm. Assoc.," xxvi, p. 233 (B).] Cf. BAHIRA.

BAHIA [Lasgac.] (Lat.), n. f. Ba^3-e′a^3. From the Brazilian name. A genus of composite plants of the tribe *Helenioideæ*. [B, 42.]—**B. arachnoidea** [Fischer, Meyer]. The butterfly-plant ; a California species, a foot to 2 feet high, woody at the base, loosely floccose, and with a broadly campanulate or hemispherical involucre surrounding small, bright-yellow flower-heads. It is used as a bitter tonic for consumptives and persons convalescent from fevers and in cases where the digestive power is impaired. ["Proc. of the Am. Pharm. Assoc.," xxvii, p. 608 (B).]—**B. artemisiæfolia** [Lep.], **B. confertiflora** [De Candolle]. Two California species enumerated among the medicinal plants of the State. ["Proc. of the Am. Pharm. Assoc.," xix, p. 297 (B).]—**B. powder.** Ger., *B'pulver*. See ARAROBA.

BAHIRA, n. The fruit of the *Terminalia bellerica*. [B, 88.] Cf. BAHERA.

BAHLINGEN (Ger.), n. Ba^{3}l′i^{2}ng-e^{2}n. A cold sulphurous spring in a town of the same name, in Würtemberg. [L, 135.]

BAHMIA (Lat.), n. f. Ba^3′mi^2-a^2. See BAMMIA.

BAHN (Ger.), n. Ba^{3}n. A path, a road. [A, 315.]—**Centrale extraciliare B. des Bindearms.** A collection of nerve fibres, forming a portion of the cerebellar peduncle, which may be traced into the capsule of the corpus dentatum. [I, 17 ; K.]—**Centrale intraciliare B. des Bindearms.** A bundle of nerve fibres which may be traced from the cerebellar peduncle into the hilum of the corpus dentatum. [I, 17 ; K.]—**Gleitb'en.** In obstetrics, the slides, or guiding slopes, formed by certain portions of the interior of the pelvis. [A, 121.]—**Kleinhirnseitenstrangb'.** The direct cerebellar (or myelo-cerebellar [Spitzka]) tract ; a tract coursing in the lateral zone of the posterior half of the lateral column of the spinal cord, connecting the columns of Clarke with the cerebellum, which it enters as a component of the restiform column ; called direct because it does not decussate. [Flechsig (I).]

BAHO, n. A name applied in the Philippine Islands to a variety of mango. [Camelli (B, 121).]

BAHOBAB, n. See BAOBAB and ADANSONIA *digitata*.

BAHOO, n. A common name in Malabar for the *Cathartocarpus fistula*. [B, 121.]

BAHOU (Hind.), n. According to Clusius, the *Cassia alata*. [B, 121.]

BAHRE (Ger.), n. Ba^{3}r′e^2. A litter. [A, 315.]—**Schulterb'.** See *Shoulder*-LITTER.

BAHUÁRI (Bengal.), n. The *Cordia myxa*. [B, 181.]

BAHUBÁRA (Bengal.), n. The fruit of the *Cordia myxa* and that of the *Cordia latifolia*. ["Pharm. Jour. and Trans.," Nov. 22, 1879, p. 402 (B).]

BÄHUNG (Ger.), n. Ba′hung. A fomentation. [A, 315.]

BAHURA (Hind.), n. The *Terminalia bellerica*. [B, 172.]

BAHUVÁRA (Sanscr.), n. The *Cordia myxa*. [B, 181.]

BAI (Fr.), adj. Ba. See BADIOUS.

BAI (Jap.), n. The *Amygdalus nana*. ["Phar. Jour. and Trans.," Oct., 1879 (B).]

BAIAC, n. An alchemical name for white lead. [Ruland, Johnson (A, 325).]

BAIÆ (Lat.), n. f. pl. Ba(ba^3)′i^2-e(a^3-e^2). Gr., βαῖαι. 1. A small ancient town (the modern Baja) in Campania, ten miles from Naples, where there are hot and cold mineral springs. [A, 312, 363.] 2. An ancient term for watering places in general. [A, 318.]

BAIBAI, BAIBAIRA, n's. Carib names for the *Malpighia spicata*. [B, 121.]

BAIBULA, n. The *Plantago major*. ["Proc. of the Am. Pharm. Assoc.," xxvi, p. 167 (B).]

BAIE (Fr.), n. Be^2. A berry. [B, 1.] See BACCA.—**B. à ondes.** A common name in the West Indies for a species of *Acacia*. [B, 121.]—**B. de ronce.** The blackberry. [A, 247.]—**Fausse b.** See BACCA *spuria*.—**Vraie b.** See BACCA *vera*.

BAIGNOIRE (Fr.), n. Be^{2}n-y'-wa^{3}r. A bath-tub. [L, 49.]—**B. oculaire.** A basin for bathing the eyes. [A, 385.]

BAI-KE-CHAL, n. A bark, resembling that of the *Ægle marmelos*, occurring in small fragments ; used in Patna in dyeing. [B.]

BAILEY SPRINGS, n. Ba′li^2. A place in Lauderdale County, Alabama, where there are alkaline-chalybeate springs the waters of which are said to prove of service in scrofula, leucorrhœa, amenorrhœa, dysmenorrhœa, and irritability of the bladder. [A, 363.]

BÂILLANT (Fr.), adj. Ba^{3}l-ya^{3}n^2. In botany, see HIANS ; in zoology, having shells which do not shut tight (said of bivalves). [B, 198 ; L, 41.]

BÂILLEMENT (Fr.), n. Ba^{3}l-y'-ma^{3}n^2. Yawning. [B, 93.]

BAILLERIA (Lat.), n. f. Ba(ba^3)-i^{2}l-le(la)′ri^2-a^3. Fr., *baillerie*. A genus of composite plants established by Aublet. [B, 93.]—**B. aspera** [Aublet]. The *conami* ; a species growing in French Guiana, having a bitter taste and a powerful aromatic odor ; used to poison fish. [B, 93, 173.]

BAILLEUL (Fr.), n. Ba^{3}l-yu^{5}l. A bone-setter. [A, 300.]

BÂILLON (Fr.), n. Ba^{3}l-yo^{2}n^2. 1. A gag. 2. An oral speculum. 3. A muzzle to prevent an animal from biting. [A, 300 ; L, 49.]—**B. dentaire.** A mechanical appliance attached to the teeth for improving their direction. [L, 41, 49.]

BAIMO, n. The *Fritillaria thunbergia*. ["Proc. of the Am. Pharm. Assoc.," xxviii, p. 110 (B).]

BAIN (Fr.), n. Ba^{2}n^2. A bath.—**B. acide.** See *Acid* BATH and *Balneum* ACIDI CHLORHYDRICI.—**B. à étuve sèche.** See *Dry-air* BATH.—**B. alcalin** [Fr. Cod.]. See BALNEUM *alcalinum* and *Alkaline* BATH.—**B. alcalin factitieux.** See *Artificial alkaline* BATH.—**B. alcalino-ferrugineux.** A preparation devised by Raspail ; made by dissolving in a bath-tubful of water 200 grammes of a saturated solution of camphor in ammonia water and 1,000 grammes of common salt, and stirring with a red-hot fire-shovel. Recommended for fevers, rheumatic disorders, paralysis, rabies, violent mania, etc. [B, 92.]—**B. alcalino-salin.** See *Alkaline-saline* BATH.—**B. à l'hydrofère.** Ger., *Mineralwasserstaubbad*. A variety of bath devised by Mathieu, in which the surface of the body is sprayed with atomized liquid containing medicinal ingredients. The *hydrofère*, or apparatus for the bath, consists of (1) a *soufflerie*, or reservoir in which air is compressed ; (2) an atomizer (*pulvérisateur*) consisting of two concentric cylindrical boxes, the outer of which contains hot water, to maintain at any desired temperature the contents of the inner cylinder, which communicates with a reservoir containing the liquid to be used in the bath. This liquid is aspirated through a narrow tube and forced drop by drop out of a capillary opening, where it meets a current of compressed air from the *soufflerie* and is projected in a fine spray upon the patient's body. The latter is placed up to his neck in a closed wooden box called a *boite à bain*. [B, 46.]—**B. à l'hydrosulfate de soude.** See BALNEUM *baretginense*.—**B. ammoniaté.** A solution of 2,000 grammes of ammonium chloride in 300 litres of water. [B, 92.]—**B. ammoniaté-ferrugineux.** A preparation consisting of 15 grammes of ammonium chloride and 50 grammes of ferric chloride, to be dissolved in water at the time of using : used in rhachitis. [B, 92.]—**B. anticholérique.** See *B. électro-chimique de Pennès*.—**B. antimonial.** See BALNEUM *antimoniale*.—**B. antipsorique.** See *Antipsoric* BATH.—**B. antipsorique de Jadel.** See BALNEUM *sulphuratum simplex*.—**B. antirhumatismal.** See *Antirrheumatic* BATH.—**B. antispasmodique.** See *Antispasmodic* BATH.—**B. antisyphilitique.** See BALNEUM *mercuriale*.—**B. aromatique** [Fr. Cod.]. See BALNEUM *aromaticum* and *Aromatic* BATH.—**B. arsenical** [Fr. Cod.]. **B. arsénieux.** See BALNEUM *arsenicale*.—**B. astringent, B. astringent de Most.** See *Astringent* BATH.—**B. à température moyenne.** See BATH *of medium temperature*.—**B. au sulfhydrate de soude.** See BALNEUM *baretginense*.—**B. avec le savon.** See *Soap*-BATH.—**B. balsamique.** See *Balsamic* BATH.—**B. chaud.** See *Hot* BATH.—**B. chaud partiel.** A local hot bath. [B, 46.]—**B. chloruré.** A bath containing chlorine or chlorides. [B, 93.] See *Balneum* AQUÆ *marinæ artificialis* and *Vapor* CHLORI.—**B. d'acide carbonique.** See CARBONIC-ACID *bath*.—**B. d'acide chlorhydrique.** See *Balneum* ACIDI CHLORHYDRICI.—**B. d'air.** See *Air*-BATH.—**B. d'air chaud.** See *Hot-air* BATH.—**B. d'air**

comprimé. See *Compressed-air* BATH.—**B. d'air marin.** See *Marine-air* BATH.—**B. d'air raréfié.** See *Rarefied-air* BATH.—**B. d'alcool.** See *Alcohol*-BATH.—**B. d'alun.** See *Alum*-BATH.—**B. de Balarue.** An artificial mineral-water bath made by dissolving in 300 litres of water 1,625 grammes of calcium chloride, 780 of magnesium chloride, and 625 of sodium bicarbonate, and, after the solution, adding 1,568 grammes of sodium chloride and 500 of sodium sulphate. [B, 97.]—**B. de Baréges.** See BALNEUM *baretginense*.—**B. de boue, B. de boues minérales.** See *Mud*-BATH and *Peat*-BATH.—**B. de Bourbonne-les-Bains artificiel.** A preparation made by dissolving in 300 litres of water 990 grammes of calcium chloride, 140 of sodium bicarbonate, and 15 grammes of potassium bromide, and adding 1,600 grammes of sodium chloride and 1,550 of sodium sulphate. [B, 92.]—**B. de bras.** See *Arm*-BATH.—**B. de ciguë.** See *Balneum* CONII.—**B. de conferves.** See *Conferva*-BATH.—**B. de délice.** A bath distinguished by the agreeable sensation which it imparts to the skin; a term applied especially to the baths of Llupia at Molitz. [B, 108.]—**B. d'eau de mer.** See *Sea*-BATH.—**B. d'eau de vaisselle.** See *Dish-water* BATH.—**B. d'eau électrisée.** See *Electric* BATH.—**B. d'eau pulvérisée.** See *B. à l'hydrofère*.—**B. d'eau simple.** See *Water*-BATH (1st def.).—**B. de caisse.** See *B. d'étuve*.—**B. de fauteuil.** See *Sitz*-BATH.—**B. de Finlande.** See *Finnish* BATH.—**B. de fumier.** See *Dung*-BATH.—**B. de gaz ammoniaque.** See *Ammoniacal* BATH.—**B. de gélatine.** See BALNEUM *gelatinosum*.—**B. de glace.** See *Ice-cold* BATH.—**B. de cendre.** See *Ash*-BATH.—**B. de lait.** See *Milk*-BATH.—**B. de lame.** See *Surf*-BATH.—**B. d'électricité.** See *Electric* BATH.—**B. de limon.** See *Mud*-BATH.—**B. de limon salé.** See *Marine-mud* BATH.—**B. de main.** See *Hand*-BATH.—**B. de marc de raisin.** See *Grape-lees* BATH.—**B. de marc d'olives.** See *Olive-lees* BATH.—**B. de mer.** See *Sea*-BATH.—**B. de mer artificiel.** See *Balneum* AQUÆ *marinæ artificialis*.—**B. de mer naturel.** See *Sea*-BATH.—**B. demi-liquide, B. demi-solide.** See *B. mou*.—**B. de moutarde.** See BALNEUM *sinapisatum*.—**B. de neige.** See *Snow*-BATH.—**B. de paraffine.** See *Paraffin*-BATH.—**B. de petit-lait.** See *Whey*-BATH.—**B. de pieds.** See *Foot*-BATH.—**B. de pieds acide.** A pediluvium consisting of 100 grammes of hydrochloric acid dissolved in 6 litres of tepid water. [B, 92.] Cf. *Balneum* ACIDI CHLORHYDRICI.—**B. de pieds alcalin.** A pediluvium consisting of 125 grammes of potassium carbonate dissolved in a sufficiency of water. [B, 92.] Cf. BALNEUM *alcalinum*.—**B. de pieds mercuriel.** A solution of 20 centigrammes (about 3 grains) of corrosive sublimate in 1 litre of water; used as a pediluvium in syphilitic exostoses and tumors. [B, 92.] Cf. BALNEUM *mercuriale*.—**B. de pieds sinapisé.** See BALNEUM *sinapisatum*.—**B. de Plombières.** See *B. dit de Plombières*.—**B. de pluie.** See *Shower*-BATH.—**B. de Raspail.** See *B. alcalino-ferrugineux*.—**B. dérivatif.** See *B. électro chimique de Pennès*.—**B. de sable.** See *Sand*-BATH.—**B. de sang.** See *Blood*-BATH.—**B. des Égyptiens.** See *Egyptian* BATH.—**B. de sel.** See *Salt*-BATH and *Balneum* AQUÆ *marinæ artificialis*.—**B. de sel marin.** See *Balneum* AQUÆ *marinæ artificialis*.—**B. des Finlandais.** See *Finnish* BATH.—**B. de siége.** See *Sitz*-BATH.—**B. des Indiens.** See *Indian* BATH.—**B. de son.** A bran-bath. [A, 301.]—**B. des résineux.** A vapor-bath produced by the carbonization of chips of fir-wood. [B, 92.]—Cf. *Fir-needle* BATH.—**B. des Russes.** See *Russian* BATH.—**B. des Turcs.** See *Turkish* BATH.—**B. de sublimé corrosif.** See BALNEUM *mercuriale*.—**B. de substances animales.** A bath containing substances derived from the animal kingdom (*e. g.*, a milk-bath, a whey-bath, etc.). [B, 46.]—**B. de substances végétales.** A bath containing substances from the vegetable kingdom (*e. g.*, an herb-bath, an aromatic bath, etc.). [B; L, 87.]—**B. de surprise.** See *Surprise*-BATH.—**B. de terre.** See *Earth*-BATH.—**B. de tripes.** A sort of gelatinous bath made by boiling the entrails of cattle in water for a long time. [B, 93.] Cf. *Animal* BATH.—**B. d'étuve.** See *Hot-air* BATH, *Dry-air* BATH, and *Turkish* BATH.—**B. d'étuve humide.** See *Vapor*-BATH.—**B. d'étuve sèche.** See *Hot-air* BATH.—**B. de vapeur.** See *Vapor*-BATH.—**B. de vapeur d'alcool.** See *Alcohol vapor*-BATH.—**B. de vapeur humide.** See *Vapor*-BATH.—**B. de vapeur partiel.** A partial vapor-bath. [B, 46.]—**B. de vapeur sèche.** See *Dry-air* BATH.—**B. de vapeur térébenthinée.** See TURPENTINE-*vapor bath*.—**B. de vase.** See *Mud*-BATH and *Marine-mud* BATH.—**B. de Vénus.** A popular name for a species of *Dipsacus* the leaves of which, joined together at their base, form a basin which retains the rain-water. [B, 121.]—**B. de Vichy.** See *B. dit de Vichy*.—**B. de vide.** See *Vacuum*-BATH.—**B. de vin.** See *Wine*-BATH.—**B. d'huile.** See *Oil*-BATH.—**B. dit de Baréges** [Fr. Cod.]. See BALNEUM *baretginense*.—**B. dit de Plombières** [Fr. Cod.]. Lat., *balneum plombieranum*. A preparation consisting of two parts—one consisting of 100 grammes of powdered gelatin; the other, of a mixture of 100 grammes of sodium carbonate, 20 each of sodium chloride and bicarbonate, and 60 of sodium sulphate. In preparing the bath, the gelatin is first dissolved in hot water; the solution is then thrown into the bath, and the saline mixture is added. [B, 113.]—**B. dit de Vichy** [Fr. Cod.]. Lat., *balneum vichiense*. A preparation consisting of 500 grammes of sodium bicarbonate, to be dissolved in water for a bath. [B, 113.] See *Artificial Vichy* BATH.—**B. d'ondée.** See *Surprise*-BATH.—**B. d'oxygène.** See *Oxygen*-BATH.—**B. du marc de raisin.** See *Grape-lees* BATH.—**B. du roi.** Nitrohydrochloric acid. [B, 107.] Cf. AQUA *regia*.—**B. du son.** See *Bran*-BATH.—**B. électrique, B. électrique de Caplin.** See *Electric* BATH.—**B. électrique entier.** A general bath in which the water forms part of a galvanic circuit. [B, 187.] See *Electric* BATH.—**B. électro-chimique de Pennès.** A bath containing 1 gramme of potassium bromide, 1 gramme of calcium carbonate, 300 grammes of sodium carbonate, 8 of sodium phosphate, 5 of sodium sulphate, 1 gramme of aluminium sulphate, 3 grammes of ferrous sulphate, and 1 gramme each of the oils of rosemary, lavender, and thyme. Administered once, this constituted the *b. hygiénique*; repeated, the *b. dérivatif*, the *b. sédatif*, the *b. anticholérique*, etc. The original formula has been variously modified. [B, 92.]—**B. électro-négatif.** See *Electro-negative* BATH.—**B. électro-positif.** See *Electro-positive* BATH.—**B. émollient.** See *Emollient* BATH.—**B. entier.** See *General* BATH.—**B. faradique.** See *Faradaic* BATH.—**B. ferro-arsenical.** A bath containing from 2 to 8 grammes of arsenate of iron. [B, 107.]—**B. ferrugineux.** See *Ferruginous* BATH.—**B. fortifiant.** A bath containing 60 grammes each of peppermint and lavender, 45 each of sweet-flag and willow bark, and 30 of caraway, steeped in boiling water. [B, 92.]—**B. frais.** See *Cool* BATH.—**B. froid.** See *Cold* BATH.—**B. galvanique.** See *Electric* BATH.—**B. galvanoplastique.** See *Electroplating* BATH.—**B. gazeux.** See *Gas*-BATH.—**B. gélatineux** [Fr. Cod.]. See BALNEUM *gelatinosum*.—**B. glycériné.** See *Glycerin*-BATH (1st def.).—**B. huileux.** An oil-bath. The *b. huileux* of Jeannel is made by adding to an alkaline bath of 350 grammes of sodium carbonate dissolved in 200 litres of water an emulsion made by mixing 250 parts of almond oil or cod-liver oil with a solution of 50 parts of sodium carbonate in 500 of water. [B, 92.]—**B. hygiénique.** See under *B. électro-chimique de Pennès*. [B, 92.]—**B. hyperthermal.** See *Very hot* BATH.—**B. indifférent.** See BATH *of medium temperature*.—**B. iodé.** See BALNEUM *iodurâtum*.—**B. ioduré.** See BALNEUM *ioduratum* and *B. d'iodure de* POTASSIUM.—**B. ioduré de Lugol.** See BALNEUM *ioduratum*.—**B. liquide.** See *Liquid* BATH.—**B. liquide minéral.** A liquid bath containing mineral constituents. [B, 46.]—**B. local.** See *Partial* BATH.—**B.-marie.** See *Water*-BATH (2d def.).—**B. marin.** See *Balneum* AQUÆ *marinæ artificialis*.—**B. médicamenteux.** See *Medicated* BATH.—**B. médicamenteux d'étuves.** See FUMIGATION.—**B. médicinal** [Fr. Cod.]. See *Medicated* BATH.—**B. mercuriel.** See BALNEUM *mercuriale*.—**B. métallique.** See *Metallic* BATH.—**B. minéral factitieux.** See *Artificial mineral* BATH.—**B. mixte, B. mou.** A bath of soft, semi-solid consistence (*e. g.*, a mud-bath). [B, 92.]—**B. narcotique.** See *Narcotic* BATH.—**B. neutre.** See BATH *of medium temperature*.—**B. partiel.** See *Partial* BATH.—**B. phéniqué.** See *Carbolized* BATH.—**B. photographique.** See *Photographic* BATH.—**B. prolongé.** See *Permanent* BATH.—**B. résolutif.** A bath composed of 30 grammes of liver of sulphur, 60 grammes of sea-salt, 15 grammes of sodium carbonate, 1 to 2 handfuls of sage, and 6 litres of water. Used in baths, lotions, and douches for scrofulous diseases of the bones. [B, 92.]—**B. russe.** See *Russian* BATH.—**B. salé.** A bath consisting of 1,000 grammes of common salt dissolved in a sufficiency of water. [B, 107.] See *Balneum* AQUÆ *marinæ artificialis*.—**B. salino-gélatineux.** See *B. dit de Plombières*.—**B. sec.** See *Solid* BATH.—**B. sédatif.** See under *B. électro-chimique de Pennès*.—**B. sinapisé.** See BALNEUM *sinapisatum*.—**B. solide.** See *Solid* BATH.—**B. stimulant.** A stimulating bath. The b. stimulant of Augustin was made by infusing in 1,500 grammes of water 60 grammes of serpentaria and 18 each of valerian, elder, and chamomile, pouring the infusion into a bath, and adding 360 grammes of acetic acid and 1,080 of brandy. It was used in typhus. [B, 92.]—**B. sulfuré** [Fr. Cod.]. See BALNEUM *sulphuratum simplex*.—**B. sulfuré liquide** [Fr. Cod.]. See BALNEUM *sulfuratum liquidum*.—**B. sulfureux, B. sulfureux artificiel.** See BALNEUM *sulphuratum simplex*.—**B. sulfureux liquide.** See BALNEUM *sulfuratum liquidum*.—**B. sulfuro-alcalin** [Hardy]. A bath used in prurigo; composed of 32 grammes each of sodium sulphide and sodium carbonate and 16 of sodium chloride, to be dissolved at the time of using. [B, 92.]—**B. sulfuro-gélatineux.** See BALNEUM *gelatinosum sulphuratum*.—**B. tempéré, B. tiède.** See *Tepid* BATH.—**B. très chaud.** See *Very hot* BATH.—**B. très froid.** See *Very cold* BATH.—**B. turc.** See *Turkish* BATH.—**B. vivant.** See *Blood*-BATH.—**Boîte à b.** See under *B. à l'hydrofère*.—**Demi-b.** See *Half*-BATH.

BAINCH (Bengal.), n. The *Flacourtia sapida*. [B, 181.]

BAINGAN (Hind.), n. The *Solanum melongena*. [B, 172.]

BAINILLA (Sp.), n. Ba^3-i^{2}n-el'ya^3. See VANILLA.—**B. cimarona.** See VANILLA *simarona*.—**B. mansa.** See VANILLA *leg*.—**B. mestiza.** A variety of vanilla intermediate between the b. mansa and the b. cimarona. It is frequently adulterated. [B, 180.]

BAINS (Fr.), n. Ba^{2}n^2. A place in the Vosges Mountains, France, where there are hot springs containing sodium chloride and sulphate and a small amount of iron. The waters are drank and used as baths and douches in chronic intestinal disorders, anæmia, leucorrhœa, and neuroses. [B, 93.]

BAINS DE L'ALLIAZ (Fr.), n. Ba^{2}n^2 d' la^{3}l-li^2-a^3. Cold sulphur springs on Lake Geneva, containing gypsum and traces of free hydrogen sulphide. [B, 270.]

BAINS DE LA REINE (Fr.), n. Ba^{2}n^2 d' la^3 re^{2}n. See MERS-EL-KÉBIR.

BAINS D'HERCULE (Fr.), n. Ba^{2}n^2 de^{2}r-ku^{6}l. See MÉHADIA.

BAINS-DE-LUCQUES (Fr.), n. Ba^{2}n^2-d'-lu^{6}k. See BAGNI DI LUCCA.

BAINS DE MONTFERRAND (Fr.), **BAINS DE RENNES** (Fr.), n's. Ba^{2}n^2 d' mo^{2}n^2-fe^{2}r-ra^{3}n^2, ra^{3}n. See RENNES.

BAINS DU LAC DOMÈNE (Fr.), n. Ba^{2}n^2 du^6 la^{3}k do-me^{2}n. The cold sulphur springs of Schwarzsee, in the canton of Freiburg, Switzerland, containing calcium sulphate, magnesium sulphate, magnesium chloride, magnesium carbonate, calcium carbonate, carbon dioxide, and hydrogen sulphide. [B, 269.]

BAINS EN LORRAINE (Fr.), **BAINS EN VOSGES** (Fr.), n's. Ba^{2}n^{2}z a^{3}n^2 lor-ran, vo^{2}zh. See BAINS.

BAINS LLUPIA (Fr.), n. Ba^{2}n^2 lyu^6-pe-a^3. See LLO.

BAINS-PRÈS-ARLES (Fr.), n. Ba^{2}n^2-pre^{2}z-a^{3}rl. See AMÉLIE-LES-BAINS.

BAINS-PRÈS-DU-PUY (Fr.), n. Ba^{2}n^2-pre^2-du^6-pwe. A place in the department of the Haute Loire, France, where there are mineral springs. [B, 88.]

BAIR (Hind.), n. The *Zizyphus jujuba*. [B, 172.]

BAISALZ (Ger.), n. Ba³'e-za³ltz. See *Bay* SALT.

BAISONGE (Fr.), n. Be²z-o²n²zh. A popular name for the gall of the *Salvia pomifera*. [B, 121.]

BAISSA (It.), n. Ba³-es'sa². A sulphur spring in the province of Mondovi, Italy, near the Genoese border. [B, 269.]

BAISSE (Fr.), n. Be²s. A place on the river Leisse, near Chambery, where there is an effervescent ferruginous spring. [B, 269.]

BAITRE (Fr.), n. Be²tr. The *Colymbus cristatus*. [A, 385.]

BAIZONGE, n. A variety of Persian sponge which, powdered, is used to dye silk red. [L, 30.]

BAJA (It.), n. Ba³'ya³. See BALÆ.

BAJAM-LOHOR, n. A common name in Java for the *Rhus cobbe*. [B, 121.]

BAJAN, BAJANG, n's. Names given by Rumphius to two species of amarantaceous plants which the latter separated from the genus *Blitum*. [B, 121.]

BAJANG-BALY, n. A Java name for the *Ocimum tenuiflorum*. [B, 121.]

BAJA-PELINI, n. A Turkish name for the *Artemisia absinthium*. [A, 259.]

BAJEE, n. An East Indian name for potassium nitrate. [A, 259.]

BAJFALU, n. A Hungarian sulphur spring. [B, 269.]

BAJMOCZ, n. A place in Hungary, where there is a hot spring containing sodium sulphate, the water of which is drank and used as baths for digestive disorders. [B, 93, 269.]

BAJONETBEIN (Ger.), n. Ba³-yo-ne²t'bin. A fanciful term for a deformity of the knee in which there is ankylosis of the joint with posterior displacement of the leg, giving the limb the appearance of a bayonet. [E. Gurlt (A. 319).]

BAJONETMESSER (Ger.), n. Ba³-yo-ne²t'me²s-se²r. A bayonet-shaped knife, used in operations on the eye.

BAJOUE (Fr.), n. Ba³-zhu. The cheek of an animal, particularly a pig or a calf. [L, 41.]

BAJRA (Hind.), n. The *Penicillaria spicata*. [B, 121.]

BAJREE, n. See BAJRA.

BAJU-CHINA, n. A Malay name for the *Ruellia repanda*. [B, 121.]

BAJUREE, BAJURY, n's. See BAJRA.

BAK (Hind., Bengal.), n. The *Sesbania* (*Æschynomene*) *grandiflora*. [B, 181.]

BAKABÁNYA, n. A place in Hungary, where there is a mineral spring. [B, 269.]

BAKÁIN (Hind.), n. The *Melia azederach*. [B, 181.]

BAKAM (Bengal.), n. The *Cæsalpinia sappan*. [B, 181.]

BÁKAS (Bengal., Hind.), n. The *Justicia adhatoda* (*Adhatoda vasica*). [B, 181.]

BAKAUT, n. A Russian name for guaiacum. [B, 92.]

BAKAYAN, n. The root, herb, and fruit of the *Azadirachta indica*. [W. Dymock, "Pharm. Jour. and Trans.," Mar. 23, 1878, p. 745 (B).]

BÄKEEÆ (Lat.), n. f. pl. Bak-e(a)'e²-e(a³-e²). See BÆCKEÆ.

BAKERIA (Lat.), n. f. Bak-e(a)'ri²-a³. See PTERANDRA.

BAKEWELL, n. Bak'we²l. An English village, near which there are chalybeate springs. [L, 41.]

BAKKA, n. An East Indian name for a species of *Cannabis* (*Cannabis sativa*) which is smoked in the East. [B, 88, 121.]

BAKKAR, n. According to Bory, Dioscorides's name for *Asarum*. [B, 80, 121.]

BAKLÍ, n. An Arabic name for the bean. [B, 121.]

BAKOU, n. A place in Russia, near the Caspian Sea, where there are petroleum wells and mineral springs. The waters are used as baths for rheumatism, paralysis, etc. [L, 49.]

BAKOVAR, n. A spring at Szessan, in Hungary, containing a very small amount of iron and carbonic acid. [B, 269.]

BAKROT (Swed.), n. The *Pimpinella saxifraga* and the *Pimpinella magna*. [B, 92.]

BAKTERIE (Ger.), n. Ba³k-ta'ri²-e². See BACTERIUM, and for all German derivatives in *Bakt-*, see the corresponding words in *Bact-*.

BÁKUCHI (Hind.), n. The *Vernonia anthelminthica*. [B, 181.]

BAKUL (Bengal.), n. The *Mimusops elengi*. [B, 181.]

BAKUS, n. See BÁKAS.

BAKWIZA (Polish), *n*. The *Primula officinalis*. [B, 92.]

BAKZEDOAR (Dutch), n. Zedoary. [B, 92.]

BALA (Malay), n. A Malabar name for the banana-plant (*Musa sapientum*). [Rheede (B, 121) ; B, 172.]

BALA (Hind.), n. The *Andropogon murialicum*. [B, 172.]

BALÁ (Sanscr.), n. The *Sida cordifolia*. [B, 181.]—**Atib'.** The *Sida rhombifolia*. [B, 181.]—**Maháb'.** The *Sida rhomboidea*. [B, 181.]—**Nágab'.** The *Sida alba*. [B, 181.]

BÁLÁ (Sanscr.), n. The *Pavonia odorata*. [B, 181.]

BALÁBAHULÁ (Bengal.), n. The *Ficus heterophylla*. [B, 181.]

BALABANDI TIGA (Teloogoo), n. The *Ipomœa pes capræ*. [P. S. Mootooswamy, "Indian Med. Gaz.," Nov., 1886, p. 325.]

BÁLA-CHATURBHADRAKA (Sanscr.), n. A powder composed of equal parts of the root of *Aconitum heterophyllum*, the tubers of *Cyperus rotundus*, and the horny excrescences on *Rhus succedanea*, together with long pepper. [B, 181.]

BALADOR, n. Altered from *beledzar* (*q. v.*). The fruit of *Semecarpus anacardium*. [B, 121.]

BALADUR, n. See BALADOR.

BALÆNA (Lat.), n. f. Ba²l(ba³l)-e'(a³'e²)-na³. Gr., φάλλαινα, φάλαινα. Fr., *baleine*. Ger., *Wallfisch*. It., *balena*. Sp., *ballena*. The whale ; a genus of the *Balænidæ*. [L, 121, 147.]—**B. acutorostrata.** See BALÆNOPTERA *rostrata*.—**B. antarctica, B. australis** [Des Moulins]. Fr., *baleine du Cap*. Ger., *südlicher Wallfisch*. A variety found in the southern hemisphere. [L, 65.]—**B. boops** [Linnæus]. Fr., *balénoptère jubarte*. Ger., *Ochsenaugenwallfisch*. Syn.: *Balænoptera jubartis* [Lacépide], *Rorqualus boops* [F. Cuvier]. 1. A species having the blow-holes behind two hemispherical tuberosities, the dorsal fin curved backward, the lower jaw shorter and narrower than the upper one, and the throat and belly furrowed longitudinally. 2. Of Cuvier, the *Balænoptera rostrata*. [L, 208.]—**B. borealis.** See *B. mysticetus*.—**B. glacialis.** A variety now referred to *B. mysticetus*. [L, 217.]—**B. grœnlandica.** See *B. mysticetus*.—**B. jubartis.** See *B. boops*.—**B. longimana** [Rudolph]. Ger., *langhändiger Wallfisch*. A species distinguished by the great length of the pectoral fins, and by the lower jaw being longer than the upper one. As it has a dorsal fin, it should be referred to *Balænoptera*. [B, 180 ; L, 218.]—**B. macrocephala.** See PHYSETER *macrocephalus*.—**B. major.** See *B. mysticetus*.—**B. mysticetus** [Linnæus]. Fr., *baleine franche*. Ger., *nordischer* (oder *grönlandischer*) *Wallfisch*. The Greenland whale ("right whale"), from which oil and whalebone are obtained. [L, 107, 147.]—**B. naribus flexuosis.** See *B. mysticetus*.—**B. rostrata.** See BALÆNOPTERA *rostrata*.—**B. spitzbergensis, B. vulgaris.** See *B. mysticetus*.—**Oleum balænæ.** Fr., *huile de baleine*. Ger., *Wallfischthran*. Whale oil ; obtained from *B. mysticetus* and *B. australis*. [L, 65.]

BALÆNACIUS, BALÆNATUS (Lat.), adj's. Ba²l(ba³l)-e²n-(a³-e²n)-a(a³)'si²(ki²)-u³s(u⁴s), -tu³s(tu⁴s). See BALÆNIC.

BALÆNIC, adj. Ba²l-e²n'i²k. Lat., *balænacius*. Fr., *baléinique*. 1. Derived from the whale. [B.] 2. Made of whalebone. [A, 312.]—**B. acid.** Fr., *acide balénique*. An acid, $C_{19}H_{36}O_2$, occurring in the oil of the *Balænoptera rostrata*. [B, 14.]

BALÆNIDÆ (Lat.), n. f. pl. Ba²l(ba³l)-e²n'(a³-e²n')-i²d-e(a³-e²). Fr., *balænides*. The toothless whales ; a family of the *Cetacea* characterized by the absence of teeth in the adult, including the genera *Balæna* and *Balænoptera*. There are teeth in the fœtus, but they never penetrate the gum. Their place is supplied by plates of whalebone (baleen plates) attached to the palate. [L, 147.]

BALÆNOIDEA (Lat.), n. n. pl. Ba²l(ba³l)-e²n(a³-e²n)-o(o²)-i²d(ed)'-e²-a³. See BALÆNIDÆ.

BALÆNOLOGY, n. Ba²l-e²n-o²l'o-ji². From φάλλαινα, a whale, and λόγος, understanding. Fr., *balænologie*. Ger., *Balänologie*. That branch of zoology which treats of whales. [L, 116.]

BALÆNOPTERA (Lat.), n. f. Ba²l(ba³l)-e²n(a³-e²n)-o²p'te²r-a³. From φάλλαινα, a whale, and πτερόν, a wing or fin. Fr., *balénoptère*. Ger., *Flosswallfisch*. A genus of the *Balænidæ*, differing from the genus *Balæna* in having a dorsal fin. [L, 121, 217.]—**B. jubartis** [Lacépide]. See BALÆNA *boops*.—**B. rostrata.** Fr., *balénoptère museau-pointu* (ou *à bec*). Ger., *Schnabelwallfisch*. A species having both jaws pointed, the upper one shorter and narrower than the lower one ; a vesicular pouch of unknown function beneath the lower jaw ; and the pectoral fins small. Its oil contains balænic acid. [B ; L, 208.]

BALÆNOPTERIDÆ (Lat.), n. f. pl. Ba²l(ba³l)-e²n(a³-e²n)-o²p-te²r'i²d-e(a³-e²). A family of the *Cetacea*, having a distinct dorsal fin. [L, 121.]

BALAH (Ar.), n. An unripe date. [B, 121.]

BALAH SOLTANI, n. A variety of date-tree. [B, 121.]

BALAI (Fr.), n. Ba³l-e². 1. The comb of an electrical machine. [A, 385.] 2. A wire brush for use as a revulsive. [A, 385.] 3. An instrument for pushing foreign bodies from the œsophagus into the stomach. [L, 41.] 4. The *Clavaria coralloides*. [B, 121, 173.] 5. The *Scoparia dulcis*. [B, 121, 173.]

BALAIS (Fr.), n. Ba³l-e². 1. The *Sorghum vulgare*. [B, 173.] 2. See BALASIUS.—**B. de jonc.** The *Sorghum vulgare*. [B, 173.]—**B. doux.** The *Scoparia dulcis*. [B, 173.]—**Rubis b.** See BALASIUS.

BALAJOUS, n. A Languedoc name for the *Osyris alba*. [B, 121.]

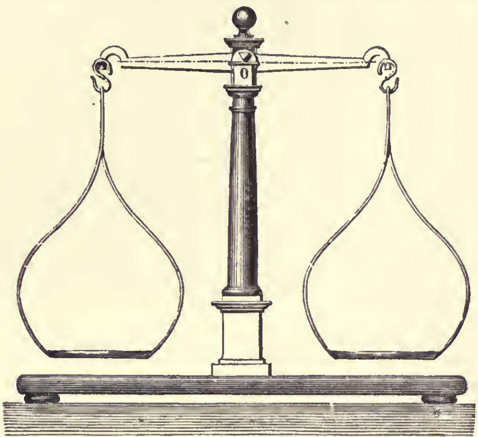
BALAKZEL, n. A Turkish name for the heron (*Ardea cinerea*). [B, 88.]

BALÁLATÁ (Bengal.), n. The *Ficus heterophylla*. [B, 181.]

BALAM-CIRA (Hind.), n. The *Cucumis sativus*. [B, 172.]

BALAM-PULLI (Malay), n. A Malabar name for the *Tamarindus indica*. [B, 88, 172.]

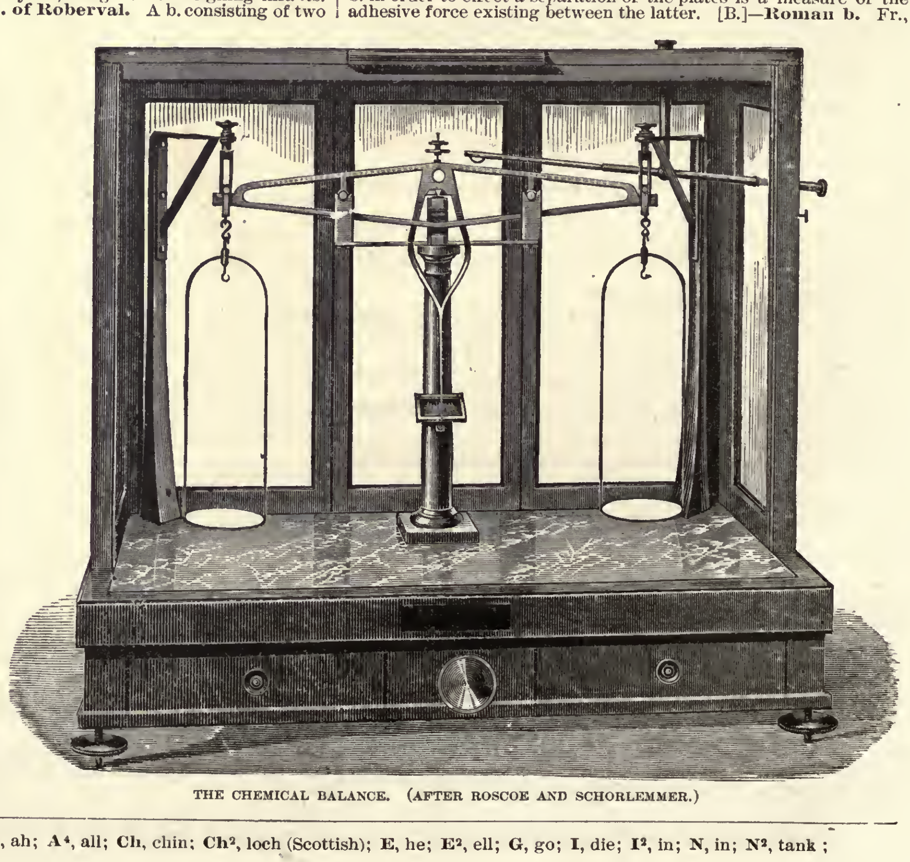
BALAN, n. A name for a variety of *Agave* growing in Java. [B, 88.]



BALAN (Ar.), n. The *Withania somnifera*. [B, 121.]

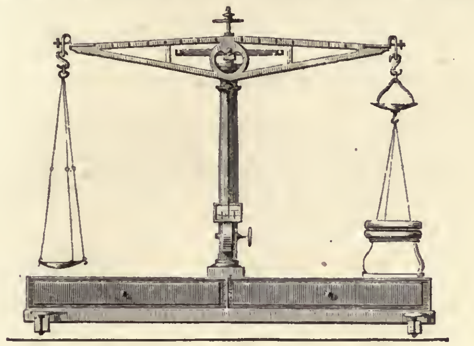
BALANA-BONE, n. A Carib name for the *Mimosa pudica*. [B, 88, 121.]

BALANARIS, BALANARIUS (Lat.), adj's. Ba²l(ba³l)-a³n-a(a³)'ri²s, -ri²-u³s(u⁴s). Fr., *balanaire*. See BALÆNIC.



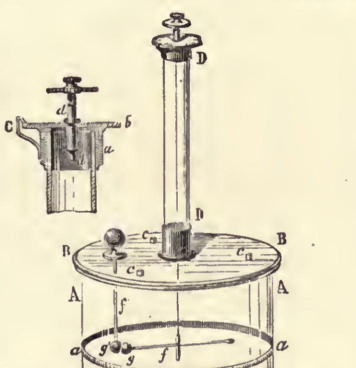
BALANATUS (Lat.), adj. Ba²l(ba³l)-a³n-a(a³)'tu³s(tu⁴s). From *balanus* (*q. v.*). Embalmed, anointed, or perfumed with balsam. [A, 312.]

BALANCE, n. Ba²l′a²ns. Gr., τρυτάνη. Lat., *bilanx* (from *bis*, twice, and *lanx*, a dish). Fr., *balance* (1st def.), *balancement* (2d def.). Ger., *Wage* (1st def.). It. *bilancia* (1st def.). Sp., *balanza* (1st def.). 1. A pair of scales, an instrument for ascertaining the weight of a body; consisting of a horizontal beam hung on a pivot or an agate knife-edge at a point above its centre of gravity, and having suspended from it at each end a receptacle, also hung on a pivot or a knife-edge—one of the receptacles being for the weight, and the other for the material to be weighed. [A, 1, 9, 385; B, 7.] 2. The proper state of relationship between the power or activity of the different parts of a mechanism or an organism; as used by some writers, an increased development (Fr., *balancement des organes*) or functional activity (Fr., *balancement fonctionnel*) of certain parts, to compensate for an inadequate development, atrophy, or diminished functional activity of other parts. [A, 385.]—**Adhe-**



THE BALANCE. (AFTER PRIVAT DESCHANEL.)

sion b. See *Prechtl's adhesion b.*—**Analytical b.** See *Chemical b.*—**Assay b.** A b. specially adapted to weighing small objects accurately and rapidly; chiefly used in mints. [B, 2.]—**B. de Coulomb** (Fr.), **B. de torsion** (Fr.). See *Torsion b.*—**B. d'induction** (Fr.). See *Induction b.*—**B. électrique** (Fr.). See *Torsion b.*—**B. électro-magnétique** (Fr.). See *Electro-magnetic b.*—**B. magnétique.** See *Torsion b.*—**B. of Odier and Blache.** A balance in the form of a steelyard, designed for weighing infants. [B, 107.] Cf. Pèse-bébé.—**B. of Roberval.** A b. consisting of two equal weights sliding upon two horizontal arms projecting from the lateral sides of a parallelogram the other two sides of which revolve about their centres, which are fixed. The two weights, no matter how disposed on the arms of the b., will always hold each other in equilibrium. [B, 7.]—**B. of torsion.** See *Torsion b.*—**B. romaine** (Fr.). See Steelyard.—**Chemical b.** Fr., *b. chimique.* Ger., *chemische Wage.* It., *bilancia chimica.* A b. used by chemists; made so as to combine precision and sensitiveness in the highest degree. It has a knife-edge bearing of some hard substance, usually agate, upon which the arms of the b. rest only during the operation of weighing. When not in use, it is usually kept under a case to protect it from disturbing influences. [B.]—**Chinese b.** A form of b. identical in principle with the steelyard. [B, 7.]—**Electro-magnetic b.** Fr., *b. électro-magnétique.* A b. for determining the intensity of electric currents. From each arm is suspended a magnet which dips into a glass tube surrounded by a coil of wire. On passing a current in opposite directions through the two coils, one magnet is depressed and the other elevated, and the weight required to restore the equilibrium is a measure of the intensity of the current. [Becquerel (B, 38).]—**Hydrostatic b.** Fr., *b. hydrostatique.* Ger., *hydrostatische Wage.* A b. designed for weighing substances in water, in order to ascertain their loss of weight when supported by the latter, and hence their specific gravity. [B.]—**Induction b.** Fr., *b. d'induction.* Ger., *Inductionswage.* An instrument invented by Hughes for testing variations in the structure or composition of metals by the currents which they generate. It consists of two primary coils, through which a current is sent, each connected with a secondary coil. The two secondary coils, which are so arranged that the currents in them pass in opposite directions, are connected with a telephone. If the currents are of exactly the same strength, they neutralize each other and no sound is heard in the telephone. Connected with each secondary coil there is a box. One of these boxes contains the metal to be tested, and the other contains a standard piece with which the former is to be compared. If, now, there is even a slight difference in the character of the two pieces, the equilibrium of the opposing currents is disturbed and the telephone sounds. The apparatus has been used for detecting the situation of pieces of metal, such as bullets, imbedded in the body. [B; J. H. Girdner, "N. Y. Med. Jour.," Apr. 9, 1887, p. 393.]—**Michell's torsion b.** An apparatus consisting of a light horizontal rod having at each extremity a small leaden ball, and suspended by its centre by a light wire so as to turn freely in a horizontal plane. Beneath the rod there is a horizontal bar of equal length, loaded at each extremity with large leaden balls, and turning freely upon a central pivot directly beneath the suspending wire of the rod. The amount of torsion produced in the wire by the movements of the rod is observed with a telescope. The b. is used for determining the attraction which the leaden spheres exert upon the leaden balls, and hence for determining the specific gravity of the earth. [B.]—**Mohr's b.** A form of hydrostatic b. for determining the specific gravity of liquids. It consists of a b. to one arm of which is attached a closed glass vessel filled with mercury, which serves as a weight, and which is exactly counterbalanced by a weight attached to the other arm. The arm of the b. is divided into ten equal parts. In using it, the mercurial weight is submerged in the liquid to be tested, and the arm of the b. is successively loaded with three riders, one of which has a weight precisely equal to the loss of weight of the mercurial sinker when submerged in water, and the two others weigh respectively $\frac{1}{10}$ and $\frac{1}{100}$ as much. When the riders are so adjusted that the b. is in equilibrium, their combined weight is equal to that which the sinker loses by being submerged in the liquid, *i. e.*, it is the specific gravity of that liquid compared with water as a standard. If, for example, the first weight stands at 8, the second at 6, and the third at 3, the sp. gr. of the liquid is 0·863. [B.]—**Pharmaceutical b.** A b. used by apothecaries. [B.]—**Physical b.** See *Chemical b.*—**Prechtl's adhesion b.** A b. for demonstrating the laws of adhesion. It consists of an ordinary b. from one arm of which is suspended a horizontal plate having its lower surface flat and polished, which is brought into contact with a similar polished surface, to which it adheres. The weight required to be placed in the pan suspended from the other arm of the b. in order to effect a separation of the plates is a measure of the adhesive force existing between the latter. [B.]—**Roman b.** Fr.,



THE CHEMICAL BALANCE. (AFTER ROSCOE AND SCHORLEMMER.)

b. romaine. Ger., *römische Wage.* See STEELYARD.—**Spring b.** An instrument for weighing, consisting of a coil of wire which is stretched by the substance to be weighed, and to which is attached an index showing the amount of tension, and hence the weight of

PRECHTL'S ADHESION BALANCE. [A, 327.]

the substance. [B.]—**Torsion b.** Fr., *b. de torsion* (ou *de Coulomb*). Ger., *Drehwage.* An apparatus devised by Coulomb for determining the laws of magnetic and electric attraction and repulsion, and used also for demonstrating the effects of torsion on the suspending thread or wire. It consists of a cylindrical glass case, AAAA, from the upper end of which rises another glass cylinder, DD, of much smaller diameter, the latter being fitted at its top with a brass cap, *a*, carrying an index, C. Outside of this, and capable of turning upon it, is another cap, *b*, divided at its top into 360 equal parts. In the centre of the cap, *b*, is an opening through which passes a small metal rod, *d*, capable of turning freely and having at its lower end a notch to which is attached a very fine wire. At the lower end of the wire there is a small piece of metal pierced by a horizontal needle of shellac, *f*, having a small gilt ball, *g*, at one end. Running round the large cylinder, in the same horizontal plane as the shellac needle, a scale is marked. Opposite the zero mark of the scale, within the cylinder, there is a fixed ball of some conducting material, *g'*, suspended by a rod of shellac, *f'*, passing up through the cover of the cylinder. [A, 376; B.] See also *Michell's torsion b.*—**Wheatstone's b.** See *Wheatstone's* BRIDGE.

COULOMB'S TORSION BALANCE. (AFTER PRIVAT DESCHANEL.)

BALANCEMENT (Fr.), n. Ba^{3}l-a^{3}ns-ma^{3}n^2. See BALANCE (2d def.).

BALANCERS, n. pl. Ba^{2}l'a^{2}ns-u^{5}rz. Lat., *halteres.* Fr., *balanciers.* Ger., *Balancirstängelchen.* 1. Certain clubbed filaments in the *Diptera*, representing posterior wings. They are attached at the bases of the anterior wings. By some they are regarded as rudimentary wings, but by others as assisting the insect to maintain its equilibrium during flight. [L, 11, 147.] 2. Two long processes on the throat, in front of the gills, of the larvæ of certain of the *Urodela*, which serve as supports when they are resting on the bottom. [L, 201.]

BALANDA, n. The *Fagus silvatica.* [L, 45, 119.]

BALANDINA (Lat.), n. f. Ba^{2}l(ba^{3}l)-a^{2}n(a^{3}n)-di(de)'na^3. An old name for a factitious stone containing mercury and iron ("compositus ex argento vivo ferri"). [A, 325.]

BALANE (Fr.), n. Ba^{3}l-a^{3}n. 1. See BALANOS. 2. See GLANS.

BALANEA, BALANEÆ (Lat.), n's n. and f. pl. Ba^{2}l(ba^{3}l)-a(a^3)'ne^2-a^3, -e(a^3-e^2). See BALANIDÆ.

BALANEOMPHALUS (Lat.), adj. Ba^{2}l'(ba^{3}l)''a^{2}n(a^{3}n)-e^2(a)-o^{2}m'fa^3-lu^{3}s(lu^{4}s). Gr., βαλανειόμφαλος (from βαλανεῖον, a bath, and ὀμφαλός, the navel or a knob). Having a boss like the valve of an ancient bath, or having a round bottom (said of cups); as a n., see MESOMPHALIUM. [A, 311, 322.]

BALANEUM (Lat.), n. n. Ba^{2}l(ba^{3}l)-a^{2}n(a^{3}n)-e(a)'u^{3}m(u^{4}m). Gr., βαλανεῖον. See BALNEUM.

BALANEUS (Lat.), n. m. Ba^{2}l(ba^{3}l)-a(a^3)'ne^2-u^{3}s(u^{4}s). Gr., βαλανεύς. See BALNEATOR.

BALANEUTES (Lat.), n. m. Ba^{2}l(ba^{3}l)-a^{2}n(a^{3}n)-u^2'tez(tas). Gr., βαλανευτής. See BALNEATOR.

BALANEUTRIA (Lat.), n. f. Ba^{2}l(ba^{3}l)-a^{2}n(a^{3}n)-u^2'tri^2-a^3. Gr., βαλανεύτρια. See BALNEATRIX.

BALANGHAS, n. See STERCULIA.

BALANGUE (Fr.), n. Ba^{3}l-a^{3}ng. A Madagascar fruit derived from an undetermined plant probably related to the *Jasmineæ.* [B, 121.]

BALANIDÆ (Lat.), n. f. pl. Ba^{2}l(ba^{3}l)-a^{2}n(a^{3}n)'i^{2}d-e(a^3-e^2). From βάλανος, an acorn. Fr., *balanides.* The "acorn-shells"; a division of the order *Thoracica* of the subclass *Cirripedia* of the crustaceans. [L, 121, 147.]

BALANIDE (Fr.), n. Ba^{3}l-a^{3}n-ed. 1. A sort of fruit, like the chestnut and the beech-nut, consisting of two or three achænia surrounded by a common involucre. [B, 121.] 2. In the pl., *b's*, see BALANIDÆ.

BALANIDEA (Lat.), n. n. pl. Ba^{2}l(ba^{3}l)-a^{2}n(a^{3}n)-i^{2}d'e^2-a^3. See BALANIDÆ.

BALANIFEROUS, adj. Ba^{2}l-a^{2}n-i^{2}f'e^{2}r-u^{3}s. Gr., βαλανηφόρος. Lat., *balaniferus* (from *balanus* [= βάλανος], an acorn, and *ferre*, to bear). Fr., *balanifère.* Ger., *eichelntragend.* Bearing acorns or acorn-like fruit. [L, 42.]

BALANINÆ (Lat.), n. f. pl. Ba^{2}l(ba^{3}l)-a^{2}n(a^{3}n)-i(e)'ne(na^3-e^2). Of Owen, a family of the *Balanidæ.* [L, 27.]

BALANINUS (Lat.), adj. Ba^{2}l(ba^{3}l)-a^{2}n(a^{3}n)'i^{2}n-u^{3}s(u^{4}s). Gr., βαλάνινος. Fr., *balanin.* Pertaining to or made from any of the fruits anciently termed balani. [A, 311, 312.] See BALANOS.

BALANION (Lat.), n. n. Ba^{2}l(ba^{3}l)-a^{2}n(a^{3}n)'i^2-o^{2}n. Gr., βαλάνιον. 1. A decoction of acorns. [A, 311.] 2. See BALANOS.

BALANIQUE (Fr.), n. Ba^{3}l-a^{3}n-ek. Pertaining to acorns or to the glans penis or the glans clitoridis. [A, 385.]

BALANISM, n. Ba^{2}l'a^{2}n-i^{2}zm. Gr., βαλανισμός (from βαλανίζειν). Lat., *balanismus.* The insertion of a suppository or a pessary. [A, 311, 322.]

BALANITE (Fr.), n. Ba^{3}l-a^{3}n-et. See BALANITES and BALANITIS.—**B. d'Égypte.** See BALANITES *ægyptiaca.*—**B. interstitielle.** A deep-seated inflammation of the glans penis. [A. Fournier (L, 88).]

BALANITEÆ (Lat.), n. f. pl. Ba^{2}l(ba^{3}l)-a^{2}n(a^{3}n)-i^{2}t'e^2-e(a^3-e^2). Fr., *balanitées.* Of Endlicher, a series of plants including the single genus *Balanites.* [B, 121.]

BALANITES (Lat.), n. m. (although treated by botanists as fem.). Ba^{2}l(ba^{3}l)-a^{2}n(a^{3}n)-i(e)'tez(tas). Gen., *balani'tæ.* From βαλανίτης, acorn-shaped. Fr., *balanites. balanite.* 1. An unknown precious stone. [Pliny (A, 311, 312).] 2. Of Delile, a genus of shrubs and small trees, referred by Bentham and Hooker to the *Simarubeæ* (tribe *Picramnieæ*), by Planchon to the *Meliaceæ*, and by Baillon to the *Rutaceæ.* It is distinguished by its alternate, bifoliate, usually epunctate leaves, its hermaphrodite, 5-parted flowers, its 10 stamens inserted at the base of the disc and having non-glandulose anthers, its globose, quinquelocular ovary having a short subulate style with 1 or 5 stigmas and with a solitary ovule in each cell, and its drupaceous fruit. [B, 42, 121.]—**B. ægyptiaca** [Delile]. Syn.: *Ximenia ægyptiaca* [Linnæus] (seu *ferox* [Poiret]). A shrub bearing coriaceous, inconspicuous leaves with entire leaflets and numerous pubescent greenish flowers of an aromatic odor. According to De Candolle, it is the *agihalid* of Prosper Alpinus. The ellipsoidal, drupaceous fruit is the Egyptian *myrobalan*, the *date of the desert* and *haledsch* of the Arabs, and the *soum* of the negroes; and is edible, although slightly bitter and purgative, especially when unripe. An oil extracted from the seeds is used as a vulnerary. The seed is said to be the *zacchone*, or *zachum.* [H. Baillon (B, 46).] The *B. ægyptiaca*, var. *indica*, is the *B. Roxburghii.* [B, 172.]—**B. Roxburghii** [Planchon]. A tree 20 feet high, growing in the Deccan; distinguished by the hairy corolla, but otherwise closely related to *B. ægyptiaca*, of which some regard it as a variety. The unripe fruit is a violent purgative, but the ripe fruit is edible. The bark is used in veterinary practice. [B, 121, 172.]

BALANITIS (Lat.), n. f. Ba^{2}l(ba^{3}l)-a^{2}n(a^{3}n)-i(e)'ti^{2}s. Gen., *balanit'idis.* Gr., βαλανῖτις (fem. of βαλανίτης). Fr., *balanite* (2d def.). Ger., *Eichelentzündung* (2d def.). It., *balanite* (2d def.). Sp., *balanitis* (2d def.). 1. An ancient name for an acorn-shaped kind of nut. [Pliny (A, 311, 312).] 2. A superficial inflammation of the glans penis, often involving also the inner surface of the prepuce. It is attended with erosion of the epithelium and a whitish or yellowish, offensive discharge, which consists of epithelium, sebaceous matter, and pus. It is sometimes associated with gonorrhœa. [G.]—**B. blennorrhoica.** See *Gonorrhœal b.*—**B. diabetica.** B. due to the irritation of saccharine urine. [L, 54.]—**Gonorrhœal b.** Lat., *gonorrhœa balani.* Fr., *blennorrhagie balano-préputiale, blennorrhée du gland.* Ger., *Eicheltripper.* Gonorrhœa of the glans penis; b. due to gonorrhœal infection. The existence of such a disease is denied by some (*e. g.*, by Diday). [G.]—**Interstitial b.** See BALANITE *interstitielle.*

BALANIUM, BALANNIUM (Lat.), n's n. Ba^{2}l(ba^{3}l)-a^{2}n-(a^{3}n)'i^2-u^{3}m(u^{4}m), -ni^2-u^{3}m(u^{4}m). See OLEUM *balaninum.*

BALANO-BLENNORRHŒA (Lat.), n. f. Ba^{2}l(ba^{3}l)''a^{2}n(a^{3}n)-o(o^2)-ble^{2}n-no^{2}r-re'(ro^2'e^2)-a^3. See *Gonorrhœal* BALANITIS.

BALANOCARPUS (Lat.), n. m. Ba^{2}l(ba^{3}l)-a^{2}n(a^{3}n)-o(o^2)-ka^{3}rp'-u^{3}s(u^{4}s). From βάλανος, an acorn, and καρπός, a fruit. A subgenus of *Areca*, including the species with simply branched spadices. [B, 245.]

BALANOCASTANUM (Lat.), n. n. Ba^{2}l(ba^{3}l)''a^{2}n(a^{3}n)-o(o^2)-ka^{2}st(ka^{3}st)'a^{3}n-u^{3}m(u^{4}m). From βάλανος, an acorn, and κάστανον, a chestnut. See BULBOCASTANUM.

BALANOID, adj. Ba^{2}l'a^{2}n-oid. From βάλανος, an acorn, and εἶδος, resemblance. Fr., *balanoïde*. Shaped like an acorn. [L, 42.]

BALANOKELE (Ger.), n. Ba^{3}l-a^{3}n-o-ka'le^2. From βάλανος, the glans penis, and κήλη, a hernia. That condition in which, as in cases of gangrenous phimosis, an opening forms in the prepuce and the glans protrudes through it. [Grünfeld (L, 57).]

BALANOPHAGE (Fr.), adj. Ba^{3}l-a^{3}n-o-fa^{3}zh. From βάλανος, an acórn, and φαγεῖν, to eat. Subsisting on acorns (said of birds). [L, 109.]

BALANOPHORA (Lat.), n. f. Ba^{2}l(ba^{3}l)-a^{2}n(a^{3}n)-o^{2}f'o^2-ra^3. From βάλανος, an acorn, and φορεῖν, to bear. Fr., *balanophore*. Syn.: *Cynopsole*. A genus of balanophoraceous plants of the tribe *Eubalanophoreæ*, occurring as fleshy, fungus-like parasites on various dicotyledonous trees and secreting a waxy material. The fruit is a nut with a rounded albuminous seed. [B, 46.]

BALANOPHORACEÆ (Lat.), n. f. pl. Ba^{2}l(ba^{3}l)''a^{2}n(a^{3}n)-o-(o^2)-fo^{2}r-a(a^3)'se^2(ke^2)-e(a^3-e^2). Fr., *balanophoracées*. Lindley's term for the *Balanophoreæ*. [B, 42.]

BALANOPHORACEOUS, adj. Ba^{2}l''a^{2}n-o-fo^{2}r-a'shu^{3}s. Lat., *balanophoraceus*. Fr., *balanophoracé*. Of or pertaining to the *Balanophoraceæ*, or *Balanophoreæ*. [B.]

BALANOPHORE (Fr.), adj. and n. Ba^{3}l-a^{3}n-o-for. See BALANOPHORA, BALANOPHORUS, and BALAPHORE.

BALANOPHOREÆ (Lat.), n. f. pl. Ba^{2}l(ba^{3}l)''a^{2}n(a^{3}n)-o(o^2)-fo(fo^2)'re^2-e(a^3-e^2). Fr., *balanophorées*. Ger., *Balanophoreen*. Syn.: *Balanophoraceæ* [Lindley]. 1. An order of parasitic plants established by Richard, belonging, according to Bentham and Hooker, to the series *Achlamydosporeæ* of the monochlamydeous dicotylydons. It is distinguished by the absence of leaves, and by its unisexual flowers borne upon spadices, the male flowers being either naked, in which case there are usually not more than 2 stamens, or provided with a perianth with valvate lobes, when the stamens usually lie opposite the latter; and the female flowers having either no perianth or one closely adnate to the ovary, and having 1 or 2 styles terminal upon the 1- to 3-celled ovary, which has a single pendulous ovule in each cell. The fruit is a 1-celled nut containing a single albuminous seed. By Bentham and Hooker it is divided into the *Monostyli* (with a single style or none), including the tribes *Cynomorieæ*, *Sarcophyteæ*, *Mystropetaleæ*, *Dactylantheæ*, *Eubalanophoreæ*, and *Langsdorffieæ*; and the *Distyli* (with 2 styles), including the *Helosideæ* and the *Lophophyteæ*. 2. Of Eichler, a tribe of the *Balanophoraceæ* (*B*), including the single genus *Balanophora* and corresponding to the *Eubalanophoreæ* of Bentham and Hooker. [B, 42, 121, 214.]

BALANOPHORIDÆ [J. Hooker] (Lat.), n. f. pl. Ba^{2}l(ba^{3}l)''a^{2}n(a^{3}n)-o(o^2)-fo^{2}r'i^{2}d-e(a^3-e^2). See BALANOPHOREÆ (2d def.).

BALANOPHORUS (Lat.), adj. Ba^{2}l(ba^{3}l)-a^{2}n(a^{3}n)-o^{2}f'o^{2}r-u^{3}s(u^{4}s). From βάλανος, an acorn, and φορεῖν, to bear. Bearing acorns. [L, 42.]

BALANOPLASTIK (Ger.), n. Ba^{3}l-a^{3}n-o-pla^{3}s-tek'. Plastic surgery applied to the glans penis. [L, 197.]

BALANO-POSTHITIS (Lat.), n. f. Ba^{2}l(ba^{3}l)''a^{2}n(a^{3}n)-o(o^2)-po^{2}s-thi(the)'ti^{2}s. Gen., *balano-posthit'idis*. From βάλανος, the glans penis, and πόσθη, the prepuce (see also *-itis**). Fr., *balano-posthite*. Ger., *Eichel- und Vorhautkatarrh*. Inflammation affecting both the glans penis and the prepuce. [L, 41.]—**B.-p. crouposa.** A variety accompanied with a deposit of false membrane. [Grünfeld (A, 319).]—**B.-p. diphtheritica.** Diphtheria of the glans penis and the prepuce. [Grünfeld (A, 319).]—**B.-p. erythematosa.** A variety accompanied with phlegmonous inflammation of the prepuce with erythema of its outer layer. [Grünfeld (A, 319).]—**B.-p. gangrænosa.** A form in which gangrene occurs, generally in consequence of phimosis, which interferes with the escape of pus. [Grünfeld (A, 319).]—**B.-p. phlegmonosa.** A form accompanied with phlegmonous inflammation of the prepuce. [Grünfeld (A, 319).]—**B.-p. superficialis.** A variety in which only the surface is affected. [Grünfeld (A, 319).]

BALANO-PREPUTIAL, adj. Ba^{2}l''a^{2}n-o-pre-pu^2'-shi^2-a^{3}l. Lat., *balano-præputialis*. Fr., *balano-préputial*. Pertaining to both the glans penis and the prepuce. [J. Rollet (L, 87).]

BALANOPS (Lat.), n. f. Ba^{2}l(ba^{3}l)'a^{2}n(a^{3}n)-o^{2}ps. A genus of plants established by H. Baillon, including six or seven New Caledonian trees or shrubs and constituting by itself the series (order) *Balanopseæ*. [B, 42, 121.]

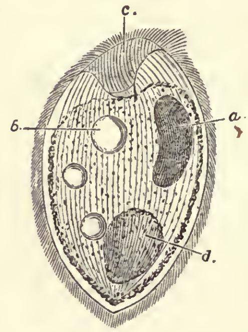
BALANOPSEÆ (Lat.), n. f. pl. Ba^{2}l(ba^{3}l)-a^{2}n(a^{3}n)-o^{2}ps'e^2-e-(a^3-e^2). Fr., *balanopsées*. A series of plants established by H. Baillon for the single genus *Balanops*, and referred by him doubtfully to the *Castaneaceæ* (*Cupuliferæ*). By Bentham and Hooker it is made a distinct order of monochlamydeous dicotyledons (series *Unisexuales*), being regarded as akin to the *Euphorbiaceæ*. [B, 42, 121.]

BALANOPTERIS [Gärtner] (Lat.), n. f. Ba^{2}l(ba^{3}l)-a^{2}n(a^{3}n)-o^{2}p'te^{2}r-i^{2}s. See HERITIERA.—**B. tothila** [Gärtner]. See HERITIERA *littoralis*.

BALANORRHAGIA (Lat.), n. f. Ba^{2}l(ba^{3}l)-a^{2}n(a^{3}n)-o^{2}r-ra-(ra^3)'ji^2(gi^2)-a^3. From βάλανος, the glans penis, and ῥήγνυσθαι, to burst forth. Fr., *balanorrhagie*. See *Gonorrhœal* BALANITIS.

BALANORRHINUM (Lat.), n. n. Ba^{2}l(ba^{3}l)-a^{2}n(a^{3}n)-o^{2}r-ri(re)'-nu^{3}m(nu^{4}m). A name given to the secretion of balanitis, used as a topical remedy. [B, 270.]

BALANORRHŒA (Lat.), n. f. Ba^{2}l(ba^{3}l)-a^{2}n(a^{3}n)-o^{2}r-re'-(ro^2'e^2)-a^3. From βάλανος, the glans penis, and ῥεῖν, to flow. Fr., *balanorrhée*. See BALANITIS.



BALANOS (Lat.), n. f. and m. Ba^{2}l(ba^{3}l)'a^{2}n(a^{3}n)-o^{2}s. Gr., βάλανος. Fr., *gland*. Ger., *Eichel*. 1. A name given by the ancients to a great variety of fruits, and especially the acorn; applied by some botanists to any fruit formed like the acorn. [B, 88, 121.] See GLANS. 2. The fruit of the ben-tree (*Moringa pterygosperma*). [Celsus (B, 45).] 3. The glans penis. [A, 311.] 4. A suppository, pessary, or pledget. [Hippocrates (A, 311).]—**B. myrepsica, B. myristicæ.** The seed of the *Moringa pterygosperma*. [B, 270.]

BALA-NPONTON, n. An African word meaning European root (applied to the potato and other species of *Solanum* and the *Batatas*). [B, 121.]

BALANTANA, n. A Carib name for the banana-tree (*Musa paradisiaca*). [B, 88.]

BALANTI, n. A name given in the Philippines to a species of *Ricinus*, the root of which is used in dysentery. [B, 88.]

BALANTIDIUM (Lat.), n. n. Ba^{2}l(ba^{3}l)-a^{2}n(a^{3}n)-ti^{2}d'i^2-u^{3}m-(u^{4}m). Gr., βαλαντίδιον, dim. of βαλάντιον (see BALANTIUM). A genus of *Protozoa* of the order *Ciliata*, family *Bursarieæ*, made by Claparède and Lachmann, having an egg-shaped body with the ventral and dorsal surfaces almost equally arched. [L, 182.]—**B. coli** [Malmsten]. Syn.: *Paramœcium coli* [Malmsten]. A species with an oval body 0·07 to 0·1 mm. long and 0·05 to 0·07 broad; found frequently in the large intestine of the pig, and occasionally in the dejecta of man in cases of diarrhœa, dysentery, typhoid fever, etc. [L, 49, 182.]

THE BALANTIDIUM COLI. (AFTER BRAUN.)
a, the nucleus; *b*, a vacuole; *c*, the peristoma; *d*, nutritive masses.

BALANTIEÆ (Lat.), n. f. pl. Ba^{2}l(ba^{3}l)-a^{2}n(a^{3}n)-ti(ti^2)'e^2-e-(a^3-e^2). Of Fée, a tribe of ferns including *Balantium*, *Culcita*, *Cibotium*, and two other genera. [B, 121.]

BALANTINE (Fr.), n. Ba^{3}l-a^{3}n^2-ten. The *Hernandia sonora*. [B, 121.]

BALANTION (Lat.), n. n. Ba^{2}l-(ba^{3}l)-a^{2}n(a^{3}n)'shi^2(ti^2)-o^{2}n. See BALANTIUM.

BALANTIOPHTHALMUS (Lat.), adj. Ba^{2}l(ba^{3}l)-a^{2}n(a^{3}n)''-shi^2(ti^2)-o^{2}f-tha^{2}l(tha^{3}l)'mu^{3}s(mu^{4}s). From βαλάντιον, a pouch, and ὀφθαλμός, the eye. Fr., *balantiophthalme*. In zoology, having the eyelids drooping in the form of a pouch. [L, 41, 180.]

BALANTIUM (Lat.), n. n. Ba^{2}l(ba^{3}l)-a^{2}n(a^{3}n)'shi^2(ti^2)-u^{3}m-(u^{4}m). Gr., βαλάντιον. Fr., *balantion*. A genus of cyathaceous ferns, usually referred to *Dicksonia*. [B, 270.]—**B. chrysotrichum** [Hasskarl]. See DICKSONIA *Blumei*.—**B. culcita** [Kaulfuss]. The *Dicksonia culcita*. [B, 242.]

BALANUS (Lat.), n. f. and m. Ba^{2}l(ba^{3}l)'a^{2}n(a^{3}n)-u^{3}s(u^{4}s). See BALANOS.—**B. migrepsica.** The ben-nut. [L, 84.]

BALANZIERSTÄNGELCHEN (Ger.), n. pl. Ba^{3}l-a^{3}ntz-er'-stang-e^{2}l-ch^{2}e^{2}n. See BALANCERS.

BALAOBOUCOUVOU, n. A Carib name for the *Hippomane mancinella*. [B, 121.]

BALAPHORE (Fr.), n. Ba^{3}l-a^3-for. The waxy substance secreted by various species of *Balanophora*. [De Lanessan (B, 121).]

BALARUC (Fr.), n. Ba^{3}l-a^{3}r-u^{6}k. A place in the department of Hérault, France, where there is a hot spring containing a large amount of sodium chloride, together with free carbonic acid, calcium and magnesium bicarbonates, and a little iron. The water is drank and, together with the mud, used as baths for diseases of the liver and of the intestines, scrofula, rheumatism, articular engorgements, paralyses, and certain skin diseases. [A, 321.]—**B. water.** See BAIN *de Balaruc*.

BALAS, n. Ba^{2}l'a^{2}s. See BALASIUS.

BALASAN, n. Mecca balsam or the tree furnishing it (the *Balsamea*, or *Balsamodendron*, *opobalsamum*). [B, 121; "Proc. of the Am. Pharm. Assoc.," xxvi, p. 165 (B).]

BALASIUS (Lat.), n. m. Ba^{2}l(ba^{3}l)-a(a^3)'si^2-u^{3}s(u^{4}s). Through Ar., *balakhsh*, from Pers., *badakhshân*. [B, 39.] Fr., *balais*. Ger., *Ballas*. It., *balascio*. Sp., *balax*. Syn.: *placidus*. The balas-ruby (*lapis b.*); a purplish or reddish gem described as a variety of the carbuncle, anciently used as a charm and as a remedy for affections of the eye and of the liver. [Ruland (A, 325).]

BALASSAN, n. Mecca balsam. [B, 121.]

BALASSE (Fr.), n. Ba^{3}l-a^{3}s. See ALCARRAZA.

BALASSEN, n. See BALASSAN.

BALATA, n. Ba^{3}l-a^3'ta^3. 1. A Guiana name for the *Mimusops b.* (*Sapota Mülleri*). [B, 121.] 2. The dried milky juice (Sp., *chicle*, *leche de popa*) of that tree, also of the *Achras b.*, the *Achras dissecta*, and several other sapotaceous trees indigenous to Guiana. When freshly obtained, it occurs in porous, spongy masses, white, reddish-white, or black. In commerce it usually occurs in the form of tough, very flexible, elastic pieces of a grayish-red or reddish-brown color, having an odor like that of gutta percha, which it resembles in physical properties and for which it is often employed as a substitute. It is soluble in benzene, in warm oil of turpentine, and in carbon disulphide, and melts at 149° C. [B, 270.] See also CHICLE.—**B. blanc** (Fr.). See *White b.*—**B. indien** (Fr.). The *Labatia macrocarpa*. [B, 121.]—**B. rouge** (Fr.). A Guiana species of *Anona*. [B, 121.]—**Galimata b., Galimeta b.** See *White b.*—**Lucuma b.** A variety furnished by the *Achras* (seu *Sapota*, seu *Lucuma*) *mammosa*. [B.]—**Mimusops b.** See BOIS *de balata*.—**Vulcanized b.** Ger., *vulcanisirte B.* A name given to b. treated with sulphur like vulcanized India rubber, used for the same pur-

poses as the latter. [B, 270.]—**White b.** Fr., *b. blanc*, a species of *Couratari.* [B, 121.]

BALÁTAILA (Sanscr.), n. An oil obtained by boiling 4 parts of the root of *Sida cordifolia* with 32 of water until the whole is reduced to 8 parts, then adding 8 parts of milk, 4 parts of prepared sesamum oil, and 1 part of the root of *Sida cordifolia.* Used externally for hemiplegia, stiffness of the neck, facial paralysis, and tinnitus aurium associated with headache. [B, 181.]

BALATANA, n. See BALANTANA.

BALATINUS (Lat.), adj. Ba^{2}l(ba^{3}l)-a^3-ti(te)'nu^{3}s(nu^{4}s). Of or pertaining to ben (the seeds of *Moringa pterygosperma*). [B, 180.] See OLEUM *balatinum.*

BALATONASSO, n. A shrub of the Philippines, probably akin to *Ricinus.* [Camelli, Ray (B, 121).] Cf. BALANTI.

BALATON-FÜRED, n. A place in Szalad, Hungary, where there are establishments for fresh-water bathing and for the whey cure, also cold, feebly chalybeate springs containing a large amount of carbonic acid. The water is drank and used, together with the mud, for baths in neuroses, paralyses, and rheumatic affections. [B, 93 ; L, 87.]

BALATRO (Lat.), n. m. Ba^{2}l(ba^{3}l)-a^{2}t(a^{3}t)'ro. Gen., *balatro'nis.* See BALBUS.

BALAUSTE (Fr.), n. Ba^{3}l-ost. 1. The pomegranate flower. [Fr. Cod. (B).] 2. The pomegranate fruit. [B, 93.] See BALAUSTIUM.

BALAUSTIA (Lat.), n. f. Ba^{2}l(ba^{3}l)-a^{4}st'(a^3-ust')-i^2-a^3. Of Bauhin, the genus *Punica.* [B, 121.]—**Flores balaustiæ.** Ger., *Balaustienblumen, Balaustienrosen.* Pomegranate flowers. [B, 180.]

BALAUSTIER (Fr.), n. Ba^{3}l-os-ti^2-a. The pomegranate-tree (*Punica granatum*). [B, 121.]

BALAUSTINE, n. Ba^{2}l-a^{4}st'en. See BALAUSTIUM.

BALAUSTIUM (Lat.), n. n. Ba^{2}l(ba^{3}l)-a^{4}st'(a^3-ust')-i^2-u^{3}m(u^{4}m). Gr., βαλαύστιον: Fr., *balauste* [Fr. Cod.] (2d def.), *balaustier* (3d def.). Ger., *Granathblüthe* (1st def.). 1. The flower of the wild pomegranate. [Dioscorides (A, 311).] 2. The fruit of the pomegranate ; applied also by some botanists to any fruit of like construction. [B, 93, 198.] 3. The pomegranate-tree (*Punica granatum*). [B.]—**Flores balaustiorum.** Pomegranate flowers. [B, 180.]

BALAUSTRÍ (Sp.), n. Ba^{3}l-a^3-us-tre'. The *Punica granatum.* [B, 88 ; *a*, 14.]

BALAUSTRUM (Lat.), n. n. Ba^{2}l(ba^{3}l)-a^{4}st'(a^3-ust')-ru^{3}m(ru^{4}m). See BALAUSTIUM.

BALAWA, n. The Chinese-varnish tree. [B, 88.]

BALAYAGE (Fr.), n. Ba^{3}l-e^2-ya^{3}zh. Lit., a sweeping ; that department of sanitation which pertains to the cleansing of apartments, etc. [A, 385.]

BALBIDODES (Lat.), adj. Ba^{2}l(ba^{3}l)-bi^2-do'dez(das). Gr., βαλβιδώδης (from βαλβίς [see BALBIS], and εἶδος, resemblance). Having two projecting edges (said by Hippocrates of that surface of the os brachii which articulates with the ulna). [A, 311, 325.]

BALBIS (Lat.), n. f. Ba^{2}l(ba^{3}l)'bi^{2}s. Gen., *bal'bidos* (*-dis*). Gr., βαλβίς. An oblong cavity with a projecting margin. [Foessius (A, 325).]

BALBISIA (Lat.), n. f. Ba^{2}l(ba^{3}l)-bi^{2}s'i^2-a^3. Fr., *balbisie.* 1. A genus of composite plants established by De Candolle. [B, 42, 214.] 2. Of Cavanilles, a genus of geraniaceous plants. [B, 42, 121.]—**B. Berterii** [De Candolle]. Syn. : *Ingenhouzia thurifera* [Bertero]. A species of *B.* (1st def.) ; a shrub with a glabrous, resinous stem and yellow flowers, growing on the island of Juan Fernandez, where it is called *incienso* and *resina-hembra.* [B, 214.]

BALBISIEÆ (Lat.), n. f. pl. Ba^{2}l(ba^{3}l)-bi^{2}s-i(i^2)'e^2-e(a^3-e^2). 1. Of De Candolle, a division of composite plants of the tribe *Senecionideæ,* including *Balbisia* (1st def.) and one other genus. [B, 214.] 2. Of H. Baillon, a series of geraniaceous plants including *Balbisia* (2d def.) and three other genera. [B, 121.]

BALBITODES (Lat.), adj. Ba^{2}l(ba^{3}l)-bi^2-to'dez(das). See BALBIDODES.

BALBUL, n. An East Indian name for the *Acacia arabica.* [B, 43.]

BALBUS (Lat.), adj. Ba^{2}l(ba^{3}l)'bu^{3}s(bu^{4}s). Ar., *magbus.* Gr., ψελλός, τραυλός. Fr., *bègue.* Ger., *stammelnd, stotternd, unvollkommen sprechend.* It., *balbo.* Affected with stammering, stuttering, or lisping ; as a n., a person so affected. [A, 311, 312, 322, 325, 385.]

BALBUTIATE, v. intr. Ba^{2}l-bu^2'shi^2-at. Lat., *balbutire.* Fr., *balbutier.* Ger., *stammeln, stottern.* It., *balbezzare.* To stammer (obs.). [L, 56.]

BALBUTIENS (Lat.), adj. Ba^{2}l(ba^{3}l)-bu^2(bu)'shi^2(ti^2)-e^{2}nz(e^{2}ns). See BALBUS.

BALBUTIES, BALBUTIO (Lat.), n's f. Ba^{2}l(ba^{3}l)-bu^2(bu)'shi^2(ti^2)-ez(as), -o. Gen., *balbutiéi, -io'nis.* Gr., ψελλισμός, βατταρισμός. Fr., *balbutie, balbutiement, bégaiement, bégayement.* Ger., *Stottern, Stammeln.* It., *balbuzie.* Sp., *balbucencia.* 1. Stammering. 2. Any defect of speech. [A, 311, 322, 325, 385.]

BALCHAR (Hind.), n. See BÁLUCHAR.

BALDACHIN (Ger.), n. Ba^{3}ld'a^{3}ch^2-en. The palate. [L, 80.]

BALDERGAN, n. A name given in the Caucasus to an aromatic juice contained in the young shoots of the *Heracleum pubescens.* [B, 121.]

BALDERIAN (Ger.), n. Ba^{3}ld'e^{2}r-i^2-a^{3}n. See BALDRIAN.

BALDGREIS (Ger.), n. Ba^{3}ld'gris. The genus *Senecio.* [B, 35.]—**B'kraut.** The *Senecio vulgaris.* [B, 180.]—**Eiförmiger B.** The *Senecio ovatus.* [L, 80.]—**Gemeiner B.** The *Senecio vulgaris.* [L, 80.]

BALDINGERA (Lat.), n. f. Ba^{3}ld-i^{2}ng'e^{2}r-a^3. From the name of a German botanist, E. G. Baldinger. [B.] See PLEMNA and PHALARIS.—**B. arundinacea** [Dumortier], **B. colorata** [Flora wetteravensis]. See PHALARIS *arundinacea.*

BALDINGERIA (Lat.), n. f. Ba^{3}ld-i^{2}ng-e(a)'ri^2-a^3. See COTULA.

BALDIRAN (Turk.), n. The *Conium maculatum.* [B, 92.]

BALDIRI KARA (Turk.), n. The *Adiantum capillus Veneris.* [B, 92.]

BALDMONEY, n. Ba^{4}ld'mu^{3}n-i^2. The *Meum athamanticum.* [B, 19.]

BALDNESS, n. Ba^{4}ld'ne^{2}s. See ALOPECIA and CALVITIES.

BALDOHN (Ger.), n. Ba^{3}ld'on. A place in Kurland, near Riga, where there is a cold sulphurous spring. [L, 135.]

BALDRIAN (Ger.), n. Ba^{3}ld'ri^2-a^{3}n. Valerian. [B.]—**Ackerb'.** See VALERIANA *officinalis.*—**Aetherische B'tinctur** [Ger. Ph.]. See *Tinctura* VALERIANÆ *ætherea.*—**B'abstrakt.** See *Abstractum* VALERIANÆ.—**B'äther.** Valerianic ether. [B.] See ETHYL *valerianate.*—**B'aufguss.** See *Infusum* VALERIANÆ.—**B'extract.** See *Extractum* VALERIANÆ.—**B'gewächse.** The *Valerianeæ.* [B, 35.] —**B'öl.** Volatile oil of valerian. [B.]—**B'pflanzen.** The *Valerianeæ.* [B, 49.]—**B'sauer.** Combined with valerianic acid ; with the name of a base, the valerianate of that base. [B.]—**B'säure.** Valerianic acid. [B, 4.]—**B'tinctur.** See *Tinctura* VALERIANÆ.—**B'wasser.** See *Infusum* VALERIANÆ.—**B'wurzel** [Ger. Ph.]. Valerian root (*radix valerianæ* [Ger. Ph.]). [B, 205.]—**Cap'scher B.** The *Valeriana capensis.* [B, 180.]—**Celtischer B.** The *Valeriana celtica.* [B, 180.]—**Felsenb'.** The *Valeriana saxatilis.* [B, 180.] —**Gartenb'.** The *Valeriana phu.* [B, 180.]—**Gebräuchlicher B., Gemeiner B.** The *Valeriana officinalis.* [B, 180 ; L, 80.]—**Grosse B'wurzel.** The root of *Valeriana phu.* [B.]—**Grosser B.** The *Valeriana phu.* [B, 180.]—**Haselwurzblättriger B.** The *Valeriana asarifolia.* [B, 180.]—**Holderblättriger B.** The *Valeriana sambucifolia.* [B, 180.]—**Italienischer B.** The *Valeriana italica.* [B, 180.]—**Katzenb'.** The *Valeriana officinalis.* [B, 180 ; L, 30.]—**Kleine B'wurzel.** The root of *Valeriana officinalis.* [B, 180.]—**Kleiner B.** The *Valeriana dioica.* [B, 180.]—**Knolliger B.** The *Valeriana tuberosa.* [B, 180.]—**Mittlerer B.** The *Valeriana latifolia.* [L, 80.]—**Nardenb'.** The *Valeriana celtica.* [B, 180.]—**Phub'.** The *Valeriana phu.* [B, 180.]—**Rankenblättriger B.** The *Valeriana Dioscoridis.* [B, 180.]—**Römische B'wurzel.** The root of *Valeriana phu.* [B, 180.]—**Römischer B.** The *Valeriana phu.* [B, 180.]—**Steinb'.** The *Valeriana saxatilis.* [B, 180.]—**Sumpfb'.** The *Valeriana dioica.* [B, 180.]—**Virginischer B.** The rhizome of *Aristolochia serpentaria.* [B, 180.]—**Wallich's B.** The *Valeriana Wallichii.* [B, 180.]—**Weisser B.** The *Valeriana phu.* [B, 180.]—**Wiesenb'.** The *Valeriana dioica.* [B, 180.]—**Wohlriechender B.** The *Valeriana saliunca.* [B, 180.]—**Zweihäusiger B.** The *Valeriana dioica.* [B, 180.]

BALDRIANE (Fr.), n. Ba^{3}ld-ri^2-a^{3}n. Valerian root. [A, 285.]

BALDRIANIQUE (Fr.), adj. Ba^{3}ld-ri^2-a^{3}n-ek. See VALERIANIC.

BALDRISSKRAUT (Ger.), n. Ba^{3}ld'ri^{2}s-kra^{3}ut. The *Senecio vulgaris.* [B, 180.]

BALDWINEÆ (Lat.), n. f. pl. Ba^{4}ld-wi^{2}n'e^2-e(a^3-e^2). From *Baldwinia,* the typical genus. Of Torrey and Gray, a division of composite plants belonging to the *Helenieæ,* including two genera. [B, 170.]

BÂLE (Fr.), n. Ba^{3}l. Written also *bale* and *balle.* A husk ; applied by P. de Beauvois to the glumes, by De Candolle to the glumellæ, or pales, of a spike of flowers in the *Gramineæ.* [B, 121, 198.]

BALEEN, n. Ba^{2}l-en'. From *balæna,* a whale. See WHALEBONE.—**B.-plates.** See under PLATE.

BALEINE (Fr.), n. Ba^{3}l-e^{2}n. See BALÆNA.—**B. de Grande Baie.** See BALÆNA *mysticetus.*—**B. du Cap.** See BALÆNA *antarctica.*—**B. franche, B. vulgaire.** See BALÆNA *mysticetus.*—**Blanc de b.** See SPERMACETI.—**Fanons de b.** See *Baleen-plates.*

BALEINEAU (Fr.), n. Ba^{3}l-e^{2}n-o. A young whale. [L, 208.]

BALEINIDES (Fr.), n. pl. Ba^{3}l-e^{2}n-ed. See BALÆNIDÆ.

BALEINON (Fr.), n. Ba^{3}l-e^{2}n-o^{2}n^2. See BALEINEAU.

BALEMCANDA-SHULARMANDI, n. Of Rheede, the *Ixia chinensis.* [B, 121.]

BALÉNEAU (Fr.), n. Ba^{3}l-an-o. See BALEINEAU.

BALÉNINE (Fr.), n. Ba^{3}l-an-en. Whalebone. [A, 385 ; L, 49.]

BALÉNOPTÈRE (Fr.), n. Ba^{3}l-an-op-te^{2}r. See BALÆNOPTERA. —**B. jubarte.** See BALÆNA *boops.*

BALESSAM, BALESSAN, n. 1. Of Prosper Alpinus, the *Amyris opobalsamum.* 2. Of Bruce, who probably confounded it with b. (1st def.), an African tree of the genus *Boswellia,* producing incense. [B, 121, 211.]

BALETE, n. A name given in the Philippine Islands to the *Ficus indica.* [B, 121.]

BALÈVRE (Fr.), n. Ba^3-le^{2}vr'. An old term for the lower lip (*bas-lèvre*). [L, 41.]

BALF, n. A place in Hungary, where there are hot sulphurous springs. [A, 385 ; L, 49.]

BALG (Ger.), n. Ba^{3}lg. 1. In general, a case, a shell, a sac. [A, 315.] 2. The cast-off skin or shell (slough) of a snake or of the larva of an insect. [A, 315 ; L, 30.] 3. In botany : (*a*) the glume of

grasses, (*b*) the sort of fruit called a bifolliculus, (*c*) the sporangeium of the *Ophioglosseæ* and *Filices*, (*d*) the peridium of the *Gasteromycetes* [Nees v. Esenbeck], (*e*) the sporangeium (peridium) of the *Coniomycetes*, and (*f*), in the pl., *Bälge*, the antheridia of the cryptogams. [B, 198.]—**Acephalocystenb'.** A sac containing echinococci. [L, 30.]—**B'apfel.** See *B'frucht.*—**B'artig.** In botany, follicular, also glumaceous. [B, 198; L, 49.]—**B'blüthe, B'blume.** A glumaceous flower. [A, 315; B, 198.]—**B'capsel.** A follicle. [L, 80.]—**B'drüse.** A follicular gland. [A, 355.]—**B'fleischgeschwulst.** See *B'geschwulst.*—**B'frucht.** In botany, a follicle. [B, 198.]—**B'geschwulst.** An encysted tumor, a wen. [A, 355.]—**B'kapsel.** See *B'frucht.*—**B'klappen.** The involucre of the spike of flowers in the *Gramineæ* (*i. e.*, the glume). [B, 35.]—**B'krone.** A glumella, or pale. [B, 198.]—**B'kropf.** A cystic goître. [A, 355.]—**B'pilze.** The *Gasteromycetes.* [B.]—**B'sarkom.** A cystic sarcoma. [L.]—**B'spelze.** A glume. [B, 35.]—**B'staar.** A cystic cataract. [A, 355.]—**B'wasserbruch.** See HYDROCELE.—**B'wassersucht.** Encysted dropsy. [L, 135.]—**Breiartiger B.** An atheromatous cyst. [L, 43.]—**Kolloidb'.** See MELICERIS.—**Naboth'sche Bälge.** See *Nabothian* FOLLICLES.

BÄLGLEIN (Ger.), n. Balg'lin. In botany, the periodiolum, or endosporous sporangeium, of *Fungi.* [B, 198.]—**B'geschwulst.** An atheromatous cyst. [L, 135.]

BALI, n. A Guiana name for the *Myristica sebifera.* [B, 121.]

BALI-BABOLAH, BALIBABOLHA, BALIBABULAH, n's. A pod, obtained perhaps from the *Cassia sophera*, rich in tannin; used in dyeing and as an astringent. [A, 385; B, 121.]

BALIBEU, n. A French provincial name for the *Tragopogon pratensis.* [B, 121.]

BALICUS [Rumphius], n. The *Cytisus cajan.* [B, 88.]

BALIGARAB, n. A shrub of the Philippines. [B, 121.]

BALIGOULE, n. Written also *bouligoule* and *brigoule.* The *Agaricus eryngii.* [B, 121.]

BALIK (Turk.), n. The cocculus indicus (the fruit of *Anamirta cocculus*). [B, 92.]

BALIK NEFSI (Turk.), n. Spermaceti. [B, 92.]

BALIMBA, n. Written also *bolimba.* The *Averrhoa bilimbi.* [B, 121.]

BALIMBAGO, n. A name in the Philippine Islands for the *Hibiscus populnea.* [B, 88.]

BALIN, n. A species of *Pandanus* growing in the Philippines. [B, 121.]

BALINEUM (Lat.), n. n. Ba^{2}l(ba^{3}l)-i^{2}n-e(a)'u^{3}m(u^{4}m). See BALNEUM.

BALINGASAN, n. An East Indian tree, perhaps a species of *Barringtonia.* [B, 121.]

BALINTRA BOLUM (Teloogoo), n. Myrrh. [B, 88.]

BALIOLUS (Lat.), adj. Ba^{2}l(ba^{3}l)-i(i^2)'o(o^2)-lu^{3}s(lu^{4}s). Dark-colored, swarthy, chestnut-colored; as a n., a negro. [A, 312; L, 119.]

BALIOSPERMUM (Lat.), n. n. Ba^{2}l(ba^{3}l)-i^2-o(o^2)-spu^{5}rm-(spe^{3}rm)'u^{3}m(u^{4}m). From βαλιός, spotted, and σπέρμα, a seed. Fr., *baliosperme.* A genus of euphorbiaceous plants of the tribe *Crotoneæ*, subtribe *Geloniëæ*, established by Blume. [B, 42.]—**B. angulare** [Decaisne], **B. axillare** [Blume], **B. indicum** [Decaisne], **B. montanum** [Muller], **B. moritzianum** [Baillon], **B. polyandrum** [Wight]. Syn.: *Jatropha montana* [Willdenow], *Croton polyandrus* [Roxburgh] (seu *solanifolius* [Geisel.]), *Rottlera suffruticosa* [Wallich], *Ricinus montanus* [Wallich]. An undershrub growing in Bengal, northern India, and Malabar. The seeds are cathartic, and probably constitute a large part of the *jumalgota* of the Indian drug-seller; the leaves are used as a vulnerary. [B, 172, 214.]

BALIS (Lat.), n. f. Ba(ba^3)'li^{2}s. Gen., *ba'leos* (*-lis*). See BALLIS.

BALISE (Fr.), n. Ba^{3}l-ez. The fruit of the *Canna indica.* [B; L, 41.]

BALISIER (Fr.), n. Ba^{3}l-ez-i^2-a. The genus *Canna*, especially the *Canna indica*; in the pl., *b's*, the *Cannaceæ.* [B, 173.]—**B. comestible.** The *Canna edulis.* [B, 173.]—**B. des Indes, Petit b.** The *Canna indica.* [B, 173.]

BALISOIDEÆ (Lat.), n. f. pl. Ba^{2}l(ba^{3}l)-i^{2}s-o(o^2)-i^{2}d(ed)'e^2-e(a^3-e^2). From βάλλις (see BALLIS), and εἶδος, resemblance. Fr., *balisoïdes, balisioïdes.* See AMOMEÆ.

BALISTA (Lat.), n. f. Ba^{2}l(ba^{3}l)-i^{2}st'a^3. See BALLISTA.

BALISTÆOS, BALISTÆUS, BALISTARIUS, BALISTICUS (Lat.), adj's. Ba^{2}l(ba^{3}l)-i^{2}st-e'(a^3'e^2)-o^{2}s, -u^{3}s(u^{4}s), -a(a^3)'ri^2-u^{3}s(u^{4}s), -i^{2}st'i^{2}k-u^{3}s(u^{4}s). See BALLISTICUS.

BALISTIDÆ (Lat.), n. f. pl. Ba^{2}l(ba^{3}l)-i^{2}st'i^{2}d-e(a^3-e^2). The file-fishes; a division or family of the *Sclerodermi.* [A, 359; L, 207.]

BALITISTERA, n. An alchemical name for terra rubra. [B, 50.]

BALISTINA, BALISTINI (Lat.), n's n. pl. and m. pl. Ba^{2}l-(ba^{3}l)-i^{2}s-ti(te)'na^3, -ni(ne). See BALISTIDÆ.

BÄLKCHEN (Ger.), n. pl. Balk'ch^{2}e^{2}n. Trabeculæ. [J.]

BALKEN (Ger.), n. Ba^{3}lk'e^{2}n. In general, a beam. [A, 315.] See TRABES, TRABECULA, and CORPUS *callosum.*—**B'bündel der inneren Kapsel.** A bundle of nerve fibres which may be traced from the genu of the corpus callosum into the internal capsule. [I, 17; K.]—**B. des Gehirns.** The corpus callosum. [A, 315.]—**B. des Herzens.** The trabeculæ of the heart. [L, 30.]—**B'-durchbruch.** Meynert's term for the developmental passage of the fibres of the corpus callosum from one cerebral hemisphere to the other. [I, 73, 76.]—**B'fasern.** The nerve fibres composing the corpus callosum. [I, 17; K.]—**B'furche.** The median groove in the corpus callosum. [I; K.] See STRIA *longitudinalis.*—**B'gewebe.** Trabecular tissue. [J.]—**B'harfe.** See LYRA.—**B. im Hinterlappen.** Those fibres which radiate from the posterior extremity of the corpus callosum into the occipital lobe. [I, 3; K.]—**B. im Unterlappen.** The posterior prolongation of the corpus callosum into the temporo-sphenoidal lobe. [I, 3; K.]—**B'knie.** The genu of the corpus callosum. [I, 17; K.]—**B'muskeln des Herzens.** The columnæ carneæ of the heart. [L, 115.]—**B'naht.** 1. In anatomy, see *B'furche.* 2. In surgery, the quilled suture. [L, 30.]—**B'polster.** See SPLENIUM.—**B'pulsader, B'schlagader.** The artery of the corpus callosum. [L, 43, 59.]—**B'schnabel.** See ROSTRUM.—**B'splenium.** See SPLENIUM.—**B'staar.** A cataract. [L, 46, 135.]—**B'stamm.** The body of the corpus callosum as distinguished from the fibres which radiate into the hemispheres. [I, 17; K; L, 43.]—**B'strahlung.** The prolongations of the corpus callosum into the hemispheres. This radiation takes place in all directions, but especially backward and to the sides. [I, 7; K; L, 43, 115.]—**B'system.** A system of nerve fibres, described by Reil, having its origin in the corpus callosum. [I, 3; K.]—**B'tapete.** See TAPETUM.—**B'wage.** A steelyard. [A, 315.]—**B'werk.** See *Trabecular* PLEXUS.—**B'wulst.** See SPLENIUM.—**B'zange.** The forceps of the corpus callosum. [I, 3; K; L, 43.]—**Fleischb'.** The columnæ carneæ of the heart. [L.]—**Folliculäres B'werk.** See *Follicular* FRAMEWORK.—**Kernlose B.** See *Non-nucleated* TRABECULÆ.—**Reil'sche B'tapete.** See TAPETUM.—**Subarachnoidale B.** Small connecting bands which stretch across from the arachnoid to the pia mater. [I, 17; K.]

BALL, n. Ba^{4}l. Gr., σφαῖρα. Lat., *globus, bolus.* Fr., *balle.* Ger., *Ball.* It., *balla, palla.* Sp., *bala.* 1. In anatomy, any rounded part, like the globe of the eye, the thickening of the palm at the root of the thumb or of the sole at the base of the great toe, etc. [A, 302.] 2. A globular mass, as of cotton, etc., used for making applications, for supporting parts, etc. 3. In veterinary medicine, a bolus. [B, 270.]—**B.-and-socket joint.** See ENARTHROSIS.—**Martial b's.** A mixture of 1 part of iron filings and 2 parts of cream of tartar, made into b's of the consistence of rosin; used to impregnate water with tartrate of iron and potassium. [B, 86.]—**Gascoigne b's.** Powdered oriental bezoar made into b's. [L, 97.]—**Mercurial b's.** An amalgam of tin and mercury made into b's; used by travelers to purify drinking-water. [B, 86.]—**Soda b.** See *British* BARILLA.—**Soot-b's.** Lat., *corpora nigra.* Black, spongy masses, consisting of portions of the uvea, sometimes seen at the edges of the pupil and in the anterior chamber of the eye. [L, 13.]—**Vorderer B. der Nase** (Ger.). The point of the nose. [L, 80.]

BALLA-MUCCA-PIRA, n. See MOMORDICA.

BALLARIA, BALLARION (Lat.), n's f. and n. Ba^{2}l(ba^{3}l)-la(la^3)'ri^2-a^3, -o^{2}n. Old names for *Lychnis.* [B, 121.]

BALLARIS (Lat.), n. f. Ba^{2}l(ba^{3}l)'la^{3}r-i^{2}s. Said to have been Dioscorides's name for *Conferva.* [Bory (B, 121).]

BALLATA-TREE, n. Ba^{3}l-la^3'ta^3. The *Bumelia retusa.* [B, 19.]

BÄLLCHEN (Ger.), n. Bal'ch^{2}e^{2}n. A small ball, a globule. [B, 198.]

BALLE (Fr.), n. Ba^{3}l. See BÂLE.

BALLEL, n. Of Rheede, the *Convolvulus repens.* [B, 211.]

BALLEN (Ger.), n. Ba^{3}l'le^{2}n. See BALL (1st and 2d def's).—**B'fieber.** See *B'gicht.*—**B'flechte.** The *Chiodecton.* [B, 180.]—**B'gicht.** Gout in the palm of the hand or the sole of the foot. [L, 46.]—**B'kraut.** The *Plantago major.* [L, 43.]—**B'mäuslein, B'muskeln.** The gluteal muscles. [L, 80.]

BALLENA (Lat.), n. f. Ba^{2}l(ba^{3}l)-le(la)'na^3. See BALÆNA.

BALLESSAN (Fr.), n. Ba^{3}l-le^{2}s-sa^{3}n^2. A popular name for the *Boswellia serrata* and some other terebinthaceous plants. [A, 385.]

BALLIA-MUCCA-PIRA, n. See MOMORDICA.

BALLIGOULE (Fr.), n. Ba^{3}l-li^2-gul. See BALIGOULE.

BALLIJA, n. A Turkestan name for the unripe fruit of the *Terminalia bellisia*, used as an appetizer and as a remedy against hallucinations. [" Proc. of the Am. Pharm. Assoc.," xxi, p. 245 (B).]

BALLINGA-KAI OIL, n. See under OIL.

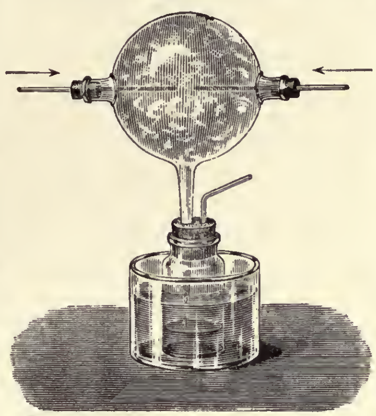
BALLIS (Lat.), n. f. Ba^{2}l(ba^{3}l)'li^{2}s. Gen., *bal'leos* (*-lis*). Gr., βάλλις. 1. The ancient name of an unknown plant credited with marvelous virtues. [A, 311, 322.] 2. Of Dioscorides, the *Momordica elaterium.* [Adanson (B, 121).]

BALLISMUS (Lat.), n. m. Ba^{2}l(ba^{3}l)-li^{2}z(li^{2}s)'mu^{3}s(mu^{4}s). Gr., βαλλισμός (from βαλλίζειν, to dance, to jump about). Ger., *Hüpfen, Tanzen, Veitstanz.* An old term for chorea or for any morbid state characterized by disordered muscular action. [A, 322; D, 29; L, 116.]

BALLISTA (Lat.), n. f. Ba^{2}l(ba^{3}l)-li^{2}st'a^3. From βάλλειν, to throw. An ancient engine for throwing missiles in warfare. [A, 312.]—**Os ballistæ.** The astragalus; so called because the ancients employed it as a missile with the b. [L, 104.]

BALLISTÆOS, BALLISTÆUS, BALLISTARIUS (Lat.), adj's. Ba^{2}l(ba^{3}l)-li^{2}st-e'(a^3'e^2)-o^{2}s, -u^{3}s(u^{4}s), -a(a^3)'ri^2-u^{3}s(u^{4}s). See BALLISTICUS and *Os* BALLISTÆ.

BALLISTICUS (Lat.), adj. Ba^{2}l(ba^{3}l)-li^{2}st'i^{2}k-u^{3}s(u^{4}s). 1. Pertaining to a ballista (*q. v.*); as a n., the astragalus. 2. Affected with or pertaining to ballismus (*q. v.*). [A, 322.] See *Ballistic* GALVANOMETER.



BALLON (Fr., Ger.), n. Ba^{3}l-lo^{2}n^2, -lon'. See BALLOON.—**B. à robinet** (Fr.). A glass balloon provided with a stop-cock. [L, 43.]—**B'luftpresse** (Ger.). An air-bag for inflating the middle ear. [Weber-Liel (A, 319).]—**B. tubulé.** A glass balloon having one or more orifices. [L, 43.]—**Luftb'** (Ger.). An air-bag. [A, 315.]

BALLONG, n. The *Melaleuca minor.* [B, 121.]

BALLONNÉ (Fr.), adj. Ba^{3}l-lo^{2}n-na. Inflated, distended, tympanitic. [L, 109.]

BALLONNEMENT (Fr.), n. Ba^{3}l-lon-ma^{3}n^2. See Ballooning.

BALLOON, n. Ba^{2}l-lun′. Lat., *ampulla.* Fr., *ballon.* Ger., *Ballon.* It. *pallone.* Sp., *recipiente.* A glass flask or receiver of a spherical shape opening by one or more necks; used in chemical and pharmaceutical manipulations. [A, 385; B, 2.]—**B.-vine.** The *Cardiospermum.* [B, 34.]—**Tritubulated b.** A b. having three orifices. [A, 3.]

A TRITUBULATED BALLOON. [A, 3.]

BALLOONING, n. Ba^{2}l-lun′i^{2}ng. Fr., *ballonnement.* Ger., *Aufblähung.* 1. Excessive distension with gas, as of the abdomen in tympanites. [A, 385.] 2. Decided enlargement of a cavity by atmospheric pressure, as of the vagina in the use of Sims's speculum. 3. (Fr., *ballonnement rectal* [Perrier]) the procedure of inserting a rubber bag into the rectum and distending the bag with water; employed to facilitate suprapubic lithotomy and certain other operations. [A, 385.] 4. A term applied by F. A. Ashford to a method of treating prolapse of the umbilical cord by attaching it to an air-pessary, the latter being then carried into the uterus and inflated to prevent its expulsion. ["Am. Jour. of Obstet.," Oct., 1878, p. 745; A, 22.]

BALLOTA, BALLOTE (Lat.), n's f. Ba^{2}l(ba^{3}l)-lo′ta^3, -te(ta). Gen., *ballo′tæ, -tes.* Gr., βαλλωτή. Fr., *ballote.* Ger., *Gottesvergess.* 1. A Linnæan genus of labiate plants of the tribe *Stachydeæ,* subtribe *Lamieæ,* distinguished from the closely allied genus *Marrubium* by having exserted stamens and a nearly infundibuliform calyx with 10 nervures and 5 to 10 (rarely more) teeth dilated at the base or united into a spreading orbicular limb. It is divided into three subgenera: *a, Beringeria* (the genus *Beringeria* of Necker), having soft, oblong or subulate bracteoles and 5 to 10 calyx-teeth; *b, Ballota* (the *B.* of Linnæus), having soft, linear-subulate bracteoles and 5 calyx-teeth; *c, Acanthoprasium,* with spiny bracteoles and 5 to 10 calyx-teeth. [B, 42, 121.] 2. The *Quercus b.* [B.]—**Ballota alba** [Linnæus]. Fr., *ballote blanche.* See *Ballota nigra,* var. *brevidentata,* subvar. *albiflora.*—**Ballota borealis** [Schweigger]. See *Ballota nigra,* var. *brevidentata,* subvar. *minor.*—**Ballota disticha.** Of Linnæus, the *Anisomeles ovata;* of Rodschied, the *Hyptis pectinata.* [Bentham (B, 214).]—**Ballota ebracteata** [Aiton]. See Hyptis *suaveolens.*—**Ballota fœtida** [Lamarck]. See *Ballota nigra,* var. *brevidentata.*—**Ballota lanata** [Linnæus]. Fr., *ballote laineuse.* See Leonurus *lanatus.*—**Ballota nigra** [Linnæus]. Fr., *ballote noire, marrube noir* (ou *fétide*), *marrubin.* Ger., *schwarze Ballote, schwarzer Andorn.* Syn.: *Marrubium nigrum* [Crantz]. The stinking (or black) horehound; a perennial European herb with an ascending, erect, villose stem 3 to 4 feet high; petiolate, ovate leaves; and thickly set axillary flowers. It includes the varieties: *Ballota nigra,* var. *longidentata,* with red flowers having ovate, erect calyx-teeth terminating in a long arm-like process; and *Bellota nigra,* var. *brevidentata,* with broad, spreading calyx-teeth terminating in a short process. The latter comprises the subvarieties *albiflora,* with white flowers; and *minor,* with small, white flowers and short, obtuse leaves. The herb—*herba ballotæ* (seu *ballotæ fœtidæ,* seu *marrubii nigri*)—has a penetrating, fœtid, aromatic odor and a very bitter, aromatic taste, and contains a bitter principle (*picroballota*). It was formerly employed in hysteria and as a substitute for the white horehound (*Marrubium vulgare*), also as a panacea for diseases of cattle. [B, 180.]—**Ballota rubra** [Schrader], **Ballota ruderalis** [Spr.], **Ballota sepium** [Paulet]. See *Ballota nigra.*—**Ballota suaveolens** [Linnæus]. See Hyptis *suaveolens.*—**Ballota urticifolia** [Ortm.]. A species which, according to Koch, should be referred to *Ballota nigra.* [B, 180.]—**Ballota vulgaris** [Link]. See *Ballota nigra,* var. *longidentata.* [B, 214.]—**Herba ballotæ.** The herb of *Ballota nigra.* [B, 180.]—**Herba ballotæ lanatæ, Herba ballotæ lanatæ sibiricæ.** The herb of *Leonurus lanatus.* It contains *picroballota* and a volatile oil. [B, 180.]—**Herba ballotæ nigræ.** The herb of *Ballota nigra.* [B, 180.]

BALLOTE (Fr., Ger.), n. Ba^{3}l-lot, -lot′e^2. See Ballota.—**B. blanche** (Fr.). See Ballota *alba.*—**B. cotonneuse** (Fr.). See Ballota *lanata.*—**B. fétide** (Fr.). See Ballota *fœtida.*—**B. laineuse** (Fr.). See Ballota *lanata.*—**B. noire** (Fr.), **Schwarze B.** (Ger.). See Ballota *nigra.*—**Sibirische B.** (Ger.). See Leonurus *lanatus.*

BALLOTEÆ (Lat.), n. f. pl. Ba^{2}l(ba^{3}l)-lo′te^2-e(a^3-e^2). Fr., *ballotées.* Syn.: *Ballotidæ* [Lindley]. Of Endlicher, a subtribe of labiate plants belonging to the *Stachydeæ,* including *Ballota* and a number of other genera in which the calyx-limb is dilated or divided into from 6 to 10 teeth, or has a truncate opening provided with a short membrane between the teeth, or is campanulate with a long membrane between the teeth. The upper lip of the corolla usually has the form of a compressed galea, and the stamens are exserted. [B, 121, 170.]

BALLOTIDÆ (Lat.), n. f. pl. Ba^{2}l(ba^{3}l)-lo^{2}t(lot)′i^{2}d-e(a^3-e^2). See Balloteæ.

BALLOTTEMENT (Fr.), n. Ba^{3}l-lot-ma^{3}n^2. From *ballotter,* to toss about (said of the action of the waves). Ger., *Ballotiren.* It., *ballottamento, ballottazione.* Sp., *sacadimiento.* Syn.: *repercussion.* 1. The procedure of causing a fœtus to rise from its resting-place on the lower segment of the uterus by a sudden push with the finger, and noting the sensation produced by its falling back to its former situation. 2. The sensation imparted to the examining finger when the manœuvre above described is executed; one of the signs of pregnancy. As commonly employed, only the impulse of rebound is understood, but some writers maintain that the retreat of the fœtus can be felt at the time the push is made.—**Abdominal b.** Fr., *b. abdominal.* B. practised or perceived through the abdominal wall.—**Cephalic b.** Fr., *b. céphalique.* B. by depressing the head of the fœtus through the abdominal wall, when it will be found to rebound against the hand. [A, 15.]—**Vaginal b.** Fr., *b. vaginal.* B. practised or perceived through the anterior wall of the vagina. According to Pajot, the sensation is the same as in abdominal b., but, according to Depaul, there is generally only the sensation of the retreat of the fœtus, without the impulse of its rebound. [A, 15.]

BALLSTON, n. Ba^{4}lz′tu^{3}n. A town in Saratoga County, N. Y., where there are several springs the waters of which have the same properties as those of Saratoga, but are richer in mineral constituents. The chief constituents are the carbonates of sodium, magnesium, iron, calcium, lithium, strontium, and barium, chlorides of potassium and sodium, sulphates of potassium and sodium, phosphate, iodide, biborate, and bromide of sodium, fluoride of calcium, alumina, silica, and carbon dioxide. [A, 363.]

BALLUCA, BALLUX (Lat.), n's f. Ba^{2}l(ba^{3}l)-lu^2(lu)′ka^3, ba^{2}l(ba^{3}l)′lu^{3}x(lu^{4}x). Gen., *ballu′cæ, -cis.* Gr., χρύσαμμος. Sand containing gold. [Pliny (A, 312, 325).]

BALLUSOOKURA (Teloogoo), n. The *Canthium parviflorum.* [B, 172.]

BALLUT (Dan.), n. The oak. [L, 77.]

BALM, n. Ba^{3}m. Lat., *balsamum.* Fr., *baume.* Ger., *Balsam.* 1. The *Melissa officinalis.* [B, 19.] 2. See Balsam. 3. Any costly, highly aromatic, or healing ointment. [A, 315.] 4. An anodyne or soothing drug. [A, 315.]—**American b. of Gilead.** The resin obtained from the *Icica carana* (carana resin). [B, 19.]—**B.-apple.** Ger., *Balsamapfel, Balsamgurke.* The *Momordica balsamina.* [A, 315.]—**B.-gentle, B.-mint.** The *Melissa officinalis.* [A, 315.]—**B. of acouchi.** See Acouchi balsam.—**B. of Gilead.** 1. The *Balsamodendron gileadense* and the *Balsamodendron opobalsamum,* also the resin obtained from them. 2. The *Dracocephalum canariense.* 3. The *Populus candicans.* [B, 19.] See also *American b. of Gilead.*—**B.-of-Gilead fir, B.-of-Gilead tree.** The *Abies balsamea.* [B; L, 102.]—**B. of Heaven.** The *Oreodaphne californica.* [B, 19.]—**B. of Mecca.** See *B. of Gilead.*—**B.-poplar.** Ger., *Balsampappel.* The *Populus balsamifera.* [A, 315.]—**B.-tea.** An infusion of the leaves of *Melissa officinalis.* [L, 107.]—**B.-tree.** Ger., *Balsambaum.* The *Balsamodendron gileadense.* [A, 315.]—**Bastard b.** The genus *Melittis.* [B, 19.]—**Field-b.** The *Calamintha nepeta.* [B, 19.]—**Horse-b.** The genus *Collinsonia.* [B, 19.]—**Moldavian b.** The *Dracocephalum moldavicum.* [B, 19.]—**Molucca b.** The genus *Molucella.* [B, 19.]—**Mountain b.** The *Melittis melissophyllum.* [L, 116.]

BALME (Fr.), n. Ba^{3}m. See Baume.

BALMISA, BALMISIA (Lat.), n's f. Ba^{2}l(ba^{3}l)-mi(me)′sa^3, -mi^{2}s′i^2-a^3. The *Arisarum vulgare.* [B, 121.]

BALMONY, n. Ba^{2}l′mo^{2}n-i^2. See Baldmoney.

BALMQUELLE (Ger.), n. Ba^{3}lm′kwe^{2}l-le^2. A sulphurous spring at Lenk, in the canton of Bern, Switzerland. [A, 319.]

BALNEA (Lat.), n. n., pl. of *balneum* (*q. v.*). Ba^{2}l(ba^{3}l)′ne^2-a^3.

BALNEABILIS (Lat.), adj. Ba^{2}l(ba^{3}l)-ne^2-a^{2}b(a^{3}b)′i^{2}l-i^{2}s. From *balneum,* a bath. Fr., *balnéable.* Fit to be used for bathing (said of water). [A. 325.]

BALNEÆ (Lat.), n. f., pl. of *balneum* (*q. v.*). Ba^{2}l(ba^{3}l)′ne^2-e (a^3-e^2).

BALNEAL, adj. Ba^{2}l′ne^2-a^{2}l. Lat., *balnearis* (from *balneum,* a bath). Fr., *balnéaire.* Pertaining to baths. [A, 385; L, 41, 56.]

BALNEARY, n. Ba^{2}l′ne-a-ri^2. Lat., *balnearium.* A bathing-room. [L, 56.]

BALNEATION, n. Ba^{2}l-ne-a′shu^{3}n. Fr., *balnéation.* See Balneo-therapy.

BALNEATOR (Lat.), n. m. Ba^{2}l(ba^{3}l)-ne^2-a(a^3)′to^{2}r. Gen., *balneato′ris.* Ger., *Bader.* A bathing attendant. [A, 312, 322.]

BALNEATRIX (Lat.), n. f. Ba^{2}l(ba^{3}l)-ne^2-a^{2}t(a^{3}t)′ri^{2}x. Gen., *balneatri′cis.* Ger., *Baderin.* A female bathing attendant. [A, 312, 322.]

BALNEOGRAPHY, n. Ba^{2}l-ne-o^{2}g′ra^{2}f-i^2. Lat., *balneographia* (from *balneum,* a bath, and γράφειν, to write). Fr., *balnéographie.* Ger., *Balneographie.* 1. A description of baths and mineral springs. [B.] 2. See Balneology.

BALNEOLOGICAL, adj. Ba^{2}l-ne^2-o-lo^{2}j′i^{2}k-a^{2}l. Lat., *balneologicus.* Fr., *balnéologique.* Ger., *balneologisch.* Of or pertaining to balneology. [B, 108.]

BALNEOLOGY, n. Ba^{2}l-ne^2-o^{2}l′o-ji^2. Lat., *balneologia* (from *balneum,* a bath, and λόγος, understanding). Fr., *balnéologie.* Ger., *Balneologie, Bäderlehre, Heilquellenlehre.* Syn.: *pegology.* The science of baths and bathing, also, as generally employed, that of mineral springs. [B, 108, 270.]

BALNEO-PHYSIOLOGY, n. Ba^{2}l″ne^2-o-fi^{2}z-i^2-o^{2}l′o-ji^2. For deriv., see Balneum and Physiology. The science of the influence of baths on the system; the physiology of bathing. [B.]

BALNEOTECHNICS, n. sing. Ba^{2}l″ne^2-o-te^{2}k′ni^{2}kz. Lat., *balneotechnice* (from *balneum*, a bath, and τέχνη, an art). Fr., *balnéotechnie.* Ger., *Balneotechnik, Badekunst.* The art of preparing and administering baths. [B, 108.]

BALNEO-THERAPEUTICS, BALNEO-THERAPY, n's. Ba^{2}l″ne^2-o-the^{2}r-a^3-pu^2′ti^{2}kz, -the^{2}r′a^3-pi^2. Lat., *balneotherapeia* (from *balneum*, a bath, and θεραπεια, medical treatment). Fr., *balnéo-thérapie.* Ger., *Balneotherapie, Badheilkunde.* The treatment of disease by means of baths. [B, 108.]

BALNEUM (Lat.), n. n. Ba^{2}l(ba^{3}l)′ne^2-u^{3}m(u^{4}m). Written also *balineum* and *balaneum.* Pl., *balnea* (neut.), *balneæ* (fem.). Gr., βαλανεῖον, λουτρόν (=λοετρόν). Fr., *bain.* Ger., *Bad.* It., *bagno.* Sp., *baño.* See BATH (2d, 3d, and 4th def's).—**B. acidum.** See *B.* ACIDI CHLORHYDRICI and *Acid* BATH.—**B. aereum.** An air-bath. [B, 48.]—**B. aerophorum.** An effervescing bath. [B, 270.]—**B. aerophorum cum natrio chlorato.** Ger., *moussirendes Kochsalzbad.* A preparation consisting of a mixture of 500 grammes of sodium bicarbonate and 1,000 grammes of sodium chloride and of another mixture of 500 grammes each of water and commercial hydrochloric acid (sp. gr., 1·200); the two mixtures to be added to the water of a bath. [B, 270.]—**B. aerophorum martiatum.** Ger., *moussirendes Eisenbad.* A preparation made by dissolving 500 grammes of sodium bicarbonate in the water of a bath, and adding, at the time of using, 500 grammes of commercial hydrochloric acid and a solution of 15 grammes of ferrous sulphate in 225 grammes of water acidulated with sulphuric acid. [B, 270.]—**B. aerophorum simplex.** Ger., *moussirendes Natronbad.* A preparation consisting of 500 grammes of sodium bicarbonate and a mixture of 500 grammes each of water and commercial hydrochloric acid (sp. gr., 1·200); the two to be added to a bath at the time of using. [B, 270.]—**B. alcalinum.** Fr., *bain alcalin* [Fr. Cod.]. Ger., *alkalisches Bad.* It., *bagno alcalino.* Sp., *baño alcalino* [Sp. Ph.]. Syn.: *b. cum carbonate sodico* [Fr. Cod.], *b. alcalinum mitius* [Belg. Ph.]. A preparation consisting of 230·4 grammes [Sp. Ph.] or 250 grammes [Fr. Cod., Belg. Ph.] of crystallized sodium carbonate, to be dissolved in the water of a bath at the time of using. Potassium carbonate is sometimes substituted. The *b. alcalinum forte* [Belg. Ph.] is made with 500 grammes of sodium carbonate. [B, 95, 113.]—**B. alcalinum forte** [Belg. Ph.], **B. alcalinum mitius** [Belg. Ph.], **B. alkalinum, B. alkalisatum.** See *B. alcalinum.*—**B. amylatum, B. amyli.** See *Starch-meal* BATH.—**B. animale.** Ger., *Thierbad.* See *Animal* BATH.—**B. antimoniale.** A preparation consisting of from 1 to 2 oz. of tartar emetic, to be dissolved in water at the time of bathing; used in skin diseases, in lumbago, and as a counter-irritant. [B, 199.]—**B. antipsoricum.** See *Antipsoric* BATH and *B. sulphuratum simplex.*—**B. antisyphiliticum.** See *B. mercuriale.*—**B. aquæ.** See *Water*-BATH.—**B. aquæ marinæ artificialis.** See under AQUA.—**B. aquosum.** See *Water*-BATH.—**B. arenæ, B. arenosum.** See *Sand*-BATH.—**B. aromaticum** [Fr. Cod., Belg. Ph.]. Fr., *bain aromatique.* Ger., *aromatisches Bad.* It., *bagno aromatico.* Sp., *baño aromático.* The aromatic bath; a preparation made by infusing in 10 litres of water 1,000 grammes [Belg. Ph.] or 500 grammes [Fr. Cod.] of the *species aromaticæ* (*q. v.*, under SPECIES), and adding the infusate to a bath. This aromatic bath is designated in the Fr. Cod. as a type for the preparation of aromatic baths in general. Cf. BAIN *de tilleul.* [B, 95, 118.]—**B. arsenicale, B. arsenicale Teissier** [Belg. Ph.]. Fr., *bain arsénical Trasbot* [Fr. Cod.]. It., *bagno ferro-arsenicale di Teissier.* A preparation used only in veterinary practice. The Belg. Ph. orders 1,000 grammes of arsenic trioxide and 10,000 of ferrous sulphate to be boiled with rain-water until the whole amounts to 100 litres. The Fr. Cod. formerly ordered the same, with the addition of 400 grammes of red oxide of iron and 200 of powered gentian, but now directs that a solution of 1,000 grammes of arsenic trioxide in 20 litres of hot water and a solution of 5,000 grammes of crude zinc sulphate and 500 of aloes in cold water be mixed, and 70 litres of water added. [B, 95.]—**B. artificiale.** See *Artificial* BATH.—**B. astringens.** See *Astringent* BATH.—**B. balsaminum.**—See *Balsamic* BATH.—**B. baretginense** [Fr. Cod., Belg. Ph.]. Fr., *bain dit de Barèges.* A preparation made by mixing 30 grammes of dried sodium carbonate and 60 each of sodium chloride and crystallized sodium sulphide (Na_2S+9H_2O), and dissolving in water at the time of using [Fr. Cod.]; or by dissolving in 308 parts of water 64 parts each of crystallized sodium carbonate, sodium chloride, and crystallized sodium sulphide ($NaHS+H_2O$). [B, 95.]—**B. benzoicum.** The benzoic bath. 1. A bath containing ¼ lb. of benzoin dissolved in warm water at the time of using; employed as a stimulant in hysteria, hypochondriasis, etc. 2. An ordinary warm bath accompanied with the inhalation of the fumes from heated benzoin; used in chronic laryngitis, relaxation of the uvula, etc. [B, 199.]—**B. calidi aeris madefacti** [Guy's Hosp.]. An air-bath of the temperature of from 110° to 115° F. [B.]—**B. calidulum.** See *Warm* BATH.—**B. calidum.** See *Hot* BATH.—**B. camphoratum.** An inhalation of camphor, 3 or 4 drachms being volatilized on a hot plate; used as a diaphoretic, anaphrodisiac, and sedative, in spasmodic respiratory affections, and in ardor urinæ. [B, 199.]—**B. carbonicum.** See *Carbonic-acid* BATH.—**B. chalybeatum, B. chalybeatum artificiale.** Ger., *Künstliches Stahlbad.* A bath in which an iron salt has been dissolved. [B, 270.]—**B. chlorinatum.** 1. See *Vapor* CHLORI. 2. A bath to which a little chlorine or chlorinated lime has been added; used as an antiseptic, antiparasitic, and stimulant in cases of foul ulcers and the itch, also in chronic hepatic affections. [B, 199.]—**B. cinereum, B. cineris.** See *Ash*-BATH.—**B. cœnosum.** See *Mud*-BATH.—**B. compositum.** A bath to which some medicinal substance has been added. [B, 199.]—**B. conii.** See under CONIUM.—**B. cum acido chlorhydrico.** See *B.* ACIDI CHLORHYDRICI.—**B. cum calce.** See under CALX.—**B. cum carbonate sodico** [Fr. Cod.]. See *B. alcalinum.*—**B. cum chlorureto hydrargyrico** [Fr. Cod.]. See *B. mercuriale.*—**B. cum chlorureto sodico** [Fr. Cod.]. See *B.* AQUÆ *marinæ artificialis.*—**B. cum hydrargyro bichlorato corrosivo.** See *B. mercuriale.*—**B. effervescens salinum.** See *B. aerophorum cum natrio chlorato.*—**B. effervescens simplex.** See *B. aerophorum simplex.*—**B. egelidum.** See *Tepid* BATH.—**B. ferratum artificiale.** See *B. chalybeatum artificiale.*—**B. ferri carbonici effervescens.** See *B. aerophorum martiatum.*—**B. ferrugineum.** See *B. chalybeatum artificiale.*—**B. frigidum.** See *Cold* BATH.—**B. furfuris.** See *Bran*-BATH.—**B. gelatinosum** [Fr. Cod., Belg. Ph.]. Fr., *bain gélatineux* [Fr. Cod.]. Ger., *Leimbad.* It., *bagno gelatinoso.* Sp., *baño gelatinoso* [Sp. Ph.]. A bath containing 500 [Fr. Cod.], 690 [Sp. Ph.], or 1,000 [Belg. Ph.] grammes of gelatin (*colle de Flandre*). [B, 95.]—**B. gelatinosum sulfuratum** [Belg. Ph.]. Fr., *bain sulfuro-gélatineux* [Fr. Cod., 1866]. A bath containing 1,000 grammes of gelatin and 100 of potassium sulphide. [B, 95.]—**B. glutinosum.** See *B. gelatinosum.*—**B. hydrochloricum.** See *B.* ACIDI CHLORHYDRICI.—**B. hydrosulphuretum.** A hydrosulphureted bath. 1. A sulphur-bath to which 2 or 3 drachms of hydrochloric acid are added before using; employed in paralysis, rheumatism, chronic skin diseases, and whooping-cough. 2. A warm bath to which from 1 drachm to 1 oz. of solution of ammonium hydrosulphide has been added; used like the preceding. [B, 199.]—**B. involvens.** Ger., *einhüllendes Bad.* A bath containing demulcent ingredients, like starch, malt, etc.; used in inflammatory conditions of the skin, burns, etc. [B, 270.]—**B. iodatum, B. iodinii.** See under IODINIUM.—**B. ioduratum** [Lugol; Belg. Ph.], **B. ioduretum.** Fr., *bain ioduré* [Fr. Cod., 1866]. It., *bagno iodurato.* Sp., *baño yodurado.* A solution of 8 grammes of iodine and 16 of potassium iodide in 600 of water, to be added to enough water for a bath. The Fr. Cod. of 1866 ordered the solution to be made of 10 grammes of iodine, 20 of potassium iodide, and 250 of water. It is used in scrofulous affections, and should be taken in a wooden tub. [B, 92, 95.]—**B. laconicum.** See *Hot-air* BATH and *Turkish* BATH.—**B. locale.** A local (partial) bath. [B, 270.]—**B. luteum, B. luti.** See *Mud*-BATH.—**B. BALO, n. 1. The *Placoma pendulum.* [B, 121.] 2. A Java name for gum lac. [B, 88, 92.]

BALOCHE (Fr.), n. Ba^{3}l-osh. The gooseberry. [L, 41.]

BALOGHIA (Lat.), n. f. Ba^{3}l-o′gi^2-a^3. Fr., *baloghie.* A genus of euphorbiaceous trees. [B, 19.]—**B. lucida.** Blood-wood; a tree 20 or 30 feet high, growing in the Norfolk Islands and Queensland. It contains a resinous, inflammable substance and a blood-sap which has been used as an indelible paint. [B, 19.]

BALOM-PULLI, n. See BALAM-PULLI.

BALOTIN (Fr.), n. Ba^{3}l-o-ta^{2}n^2. A variety of the lemon-tree. [B, 173.]

BALOTTE, n. A Benichon name for *Digitalis*. [B, 121.]

BALOUK JAGHI (Turk.), n. Cod-liver oil. [B, 92.]

BALOULOU, n. A Carib name for the banana-tree. [B, 121.]

BALOUROU, n. A Guiana name for the *Urania amazonica*. [B, 121.]

BALSAM, n. Ba^{4}l'sa^{2}m. From Ar., *balasân*, the *Balsamodendron gileadense*. Heb., *panach*. Gr., *βάλσαμον*. Lat., *balsamum*, *balsamus* [Paracelsus]. Fr., *baume*. Ger., *Balsam*. It., *balsamo*. Sp., *bálsamo*. 1. A term originally applied only to balm of Gilead, but now extended to a number of substances more or less resembling that body, all of them being viscid, aromatic liquids which exude from growing plants, and which consist of a mixture of resin and a volatile oil. They are insoluble in water, partially soluble in ether, and wholly soluble in alcohol. On exposure to the air, they harden from oxidation and from the evaporation of the volatile oil. They are divided into two groups: (*a*) Those of a purely oleo-resinous character, such as copaiba b., Mecca b., etc. (*b*) Those which contain cinnamic acid, such as b. of Peru, b. of Tolu, etc. 2. A medicinal preparation resembling a natural b. in physical properties, especially one containing an oily ingredient. 3. A name applied to the *Impotiens balsamina, the Abies balsamea*, and other plants. Cf. Balm. [A, 1, 325; B, 4, 49, 75.]—**Abgezogener B.** (Ger.). A popular name for tinctura aloes composita, also for oil of turpentine. [B, 270.]—**Acetic b.** See Balsamum *aceticum camphoratum*.—**Acouchi b.** A resinous substance derived from the *Icica aracouchini* (*q. v.*). [B, 19.]—**Acoustic b.** See Balsamum *acusticum*.—**Aeusserlicher B.** (Ger.). See Balsamum *externum*.—**Aguaraibab'** (Ger.). See *Mission b.*—**American b.** Ger., *amerikanischer B.* 1. B. of Peru. 2. Tinctura chinoidini (see under Chinoidinum). [B, 270.]—**Anisated sulphur b.** Ger., *Anisschwefelb'*. See *Balsamum* sulphuris *anisatum*.—**Anodyne b., Anodyne b. of Bates.** See *Linimentum* saponis *et opii*.—**Anodyne b. of Guy.** See Balsamum *anodynum Guidonis*.—**Antarthritic** (or **Anti-arthritic**) **b.** Fr., *baume anti-arthritique, éthérolé acétique savonneux camphré*. The antarthritic b. of Sanchez, or b. of Sanchez, is made up of animal soap and acetic ether each 1 oz., dissolved in 4 oz. of spirit of lavender, and mixed with 2 drachms of camphor and 15 drops each of the oils of peppermint, cinnamon, lavender, cloves, nutmeg, and sassafras; used as a liniment for sciatica and rheumatism. [B, 92, 97.] Cf. Balsamum *aceticum camphoratum*.—**Anthysteric** (or **Anti-hysteric**) **b.** See Balsamum *hystericum*.—**Anti-odontalgic b.** See Balsamum *odontalgicum*.—**Antipleuritic b.** See Balsamum *pleureticum*.—**Antodontalgic b.** See Balsamum *odontalgicum*.—**Apoplectic b., Apoplexy b.** See Balsamum *apoplecticum*.—**Aracouchini b.** See *Acouchi b.*—**Arcæus's b.** See *Unguentum* elemi.—**Aromatic b.** See Balsamum *aromaticum*.—**Artificial b.** Lat., *balsamum artificiale*. Ger., *künstlicher B.* See *B* (2d def.).—**Artificial b. of Peru.** A preparation made by melting together 1 lb. each of turpentine and white frankincense and 6 oz. each of oil of ben and elemi, adding 6 oz. each of powdered olibanum and labdanum, 4 oz. each of lavender-flowers and nutmeg, 1½ oz. each of spikenard, aloeswood, and dragon's-blood, 1 oz. each of lesser valerian, orris, *Aristolochia longa*, sweet flag, mace, benzoin, and storax, and 6 drachms each of zedoary, galangal, cloves, cinnamon, castoreum, and mastic, and heating until a blackish balsamic mass is produced. It was supposed to have the same properties as b. of Peru. [Pomet (B, 200).] Another imitation of b. of Peru is made by mixing benzoin, alcohol, b. of Tolu, and liquid storax. [B, 199.]—**Asiatic b.** Lat., *balsamum asiaticum*. Fr., *baume asiatique*. See *Mecca b.*—**Astringent b., Astringent b. of Gherli.** See Balsamum *astringens*.—**Augenb'** (Ger.). See Balsamum *ophthalmicum*.—**Augsburg eye b.** A preparation consisting of 3 parts of red oxide of mercury, 2 each of extract of belladonna and tincture of opium, and 28 of some fatty vehicle. [Hager (B, 199).]—**B. against chilblains.** See Balsamum *contra perniones*.—**B. against rheumatism.** See Balsamum *contra rheumatismum* and cf. Balsamum *antirrheumaticum*.—**B'apfel** (Ger.). Ph., Finn. Ph.], seu *indicum*, seu *myroxyli peruiferi*). Fr., *baume de Pérou noir* [Fr. Cod.], *baume de Pérou*. Ger., *Perub'*, *peruanischer B.* It., *balsamo di Peru*. Sp., *bálsamo negro* [Sp. Ph.] (6 *del Perú liquido* [Sp. Ph.]). Peruvian b.; a b. obtained from the *Toluifera* (*Myroxylon*) *Pereiræ*, and perhaps also from the related species, *Myroxylon peruiferum*, growing in San Salvador, Central America. 1. *Ordinary*, or *black*, b. *of Peru* (the *balsamum indicum nigrum* and the *Peruvian b.* of the pharmacopœias) is obtained from incisions made in the trunk of the tree with a blunt instrument, by which the bark is loosened in strips. The loosened bark is subsequently charred with lighted torches and falls off, leaving bare spots from which the b. exudes copiously. The latter is collected from the incisions and the bared places by covering them with rags, which are afterward boiled in water and wrung out in bags. The product thus obtained is mixed with a variety of b., called *bálsamo de cascara*, prepared from the bark by boiling and expression. B. of Peru is a dark reddish-brown liquid of the consistence of molasses, not very viscid or adhesive and not solidifying on exposure to the air. In thin layers, it is yellowish and completely transparent. It has a sp. gr. of from 1·135 to 1·160, an acid reaction, a peculiar agreeable, fragrant odor, and a warm, acrid, bitterish taste. It is completely soluble in very strong alcohol, in amyl alcohol, in chloroform, in glacial acetic acid, and in anhydrous acetone. It consists of a black, odorless resin (32 per cent.) and 60 per cent. or more of a liquid constituent, cinnamein. The latter is composed of free cinnamic acid, benzyl cinnamate, benzyl benzoate, and benzyl alcohol (probably the peruvin of Frémy). According to Krant, stilbene is contained in the distillate from the b., and Delafontaine found styracin (cinnamyl cinnamate) in it, but this discovery has not been corroborated. B. of Peru is sometimes used internally in affections of the respiratory and intestinal tracts, but is oftener employed externally as a stimulant and antiseptic dressing for ulcers and wounds. 2. *White b. of Peru—balsamum peruvianum* (seu *indicum*) *album* (Sp., *bálsamo blanco*)—is a yellowish-white, thick, mobile liquid, of a delicate vanilla-like odor and a bitterish, acrid taste, lighter than water. It was formerly thought to be derived from the trunk of the tree, but is now known to be produced by expression from the fruit. It contains a crystallizable resin, myroxocarpin. It readily dries on exposure to the air, forming *dried b. of Peru—balsamum indicum* (seu *peruvianum album*) *siccum*, *opobalsamum siccum*. It is probably the *bálsamo del Perú seco* of the Sp. Ph. It forms irregular fragments covered with a white powder. Another variety occurs as yellowish-red pieces, of a vitreous fracture. [B, 81, 95, 180, 270.]—**B. of Quinquino.** Syn.: *white b.* A variety of b. of Peru derived from the *Myrospermum* (*Myroxylon*) *pubescens*. [B, 19.] See *B. of Peru* (2d def.).—**B. of Rackasira** (or **Rakasiri**). See Balsamum *commendatoris*.—**B. of the Samaritan.** See Balsamum *samaritanum*.—**B. of Tolu.** Lat., *balsamum tolutanum* [U. S. Ph., Br. Ph., Ger. Ph. (1st ed.), Belg. Ph., Dan. Ph., Netherl. Ph., Norweg. Ph., Swed. Ph., Swiss Ph., Gr. Ph.], *resina tolutana* [Russ. Ph.]. Fr., *baume de Tolu* [Fr. Cod.]. Ger., *Tolub'*, *tolutanischer B.* It., *balsamo di Tolu*. Sp., *bálsamo de Tolú* [Sp. Ph.]. Syn.: *b. of Carthagena, American b., Honduras b., opobalsamum de Tolu.* A b. obtained from the *Tolifuera balsamum* (*Myrospermum toluiferum*), a tree growing in Venezuela, New Granada, and Peru, which, according to Baillon, is identical with the tree that furnishes b. of Peru. The b. is collected from V-shaped incisions made in the bark. When fresh, it is a transparent, brownish-yellow liquid of the consistence of turpentine, which soon solidifies into brittle, brownish fragments having an odor like that of b. of Peru and a similar but less acrid taste. In the solid state, it has a sp. gr. of 1·200, and is readily soluble in alcohol, in chloroform, and in acetone. It consists mainly of an amorphous resin regarded by Frémy as identical with that of b. of Peru, but, according to Kopp, composed of two resins differing in their solubility in alcohol; and also of benzoic and cinnamic acids, benzyl benzoate and cinnamate, and about 1 per cent. of tolene. It is used like b. of Peru, and especially as an internal remedy in catarrhal affections of the respiratory tract. Two varieties are described: *hard* (or *dry*) *b. of Tolu*, occurring in

opaque, hard, crystalline masses, brittle when cold, readily molded when warm, of more pronounced color and taste, but less marked odor, than the soft b., from which it is formed by drying; and *soft b. of Tolu*, of the consistence of turpentine. It is obtained by making a hole in the trunk of the tree and kindling a fire in the hole, from which, after the removal of the fire, the b. is drawn into bamboo tubes. It is a thick liquid, appearing reddish-brown and translucent by transmitted light and greenish and turbid by reflected light, having an odor and a taste like those of copaiba, but more unpleasant, and a sp. gr. of from 0·947 to 1·000. It is soluble in chloroform, in carbon disulphide, and in ethereal oils, and incompletely soluble in alcohol, in amyl alcohol, in ether, and in acetone. It consists of a volatile oil and a resin, the former in the proportion of from 45 to 72 per cent. The oil has a sp. gr. of 0·918, is highly lævorotary, and has the empirical formula $C_{15}H_{24}$. The resin is almost completely soluble in absolute alcohol, and the solution is fluorescent. It contains *gurjunic acid,* perhaps identical with metacopaivic acid. Gurjun b. is used in making varnish and lacquer and as a remedy for skin diseases, especially elephantiasis; the volatile oil has been employed in gonorrhœa. [B, 270.]—**Guy's b.** See BALSAMUM *anodynum Guidonis.*—**Haarb'** (Ger.). See BALSAMUM *crinale.*—**Hard b. of Tolu.** Fr., *baume de Tolu sec.* See under *B. of Tolu.*—**Hauptb'** (Ger.). Lat., *balsamum gileadense* (seu *meccanum,* seu *judaicum,* seu *ægyptiacum*), *opobalsamum verum, balsamus verus.* Fr., *baume de la Mecque* (ou *du Cairo,* ou *de Judée*). Ger., *Mekkab', B. von Mecca.* Syn.: *balm of Gilead* (or *of Mecca,* or *of Judea*), *opobalsam.* A b. derived from the *Balsamodendron gileadense* (*Amyris gileadensis*) of Arabia Felix. The finest variety, used only in the East, is peculiarly fragrant and is said to exude from the flowers in clear, colorless drops. An inferior sort exudes spontaneously from the young branches or from incisions in them; it is a pale-yellow, mobile liquid, turbid like almond syrup, of a very agreeable odor like that of rosemary or lemon, and a sharp, bitterish taste; exposed to the air, it gradually hardens and becomes opaque. The common variety is obtained by boiling the wood and the branches; it is somewhat thicker than copaiba, and becomes white and soapy when rubbed in the hand; it is partially soluble in alcohol. Mecca b. contains 30 per cent. of a volatile oil and 64 per cent. of a hard resin [Trommsdorf], or, according to Bonastre, 10 per cent. of a volatile oil, 70 per cent. of an adhesive resin, and 12 per cent. of a hard resin. It is still used in the East as a tonic. [A, 1; B, 81, 180.]—**Mekkab'** (Ger.). BALSAMIFERA (Lat.), n., f. of adj. *balsamiferus* (*arbor* understood). Ba^{2}l(ba^{3}l)-sa^{3}m-i^{2}f'e^{2}r-a^{3}. A balsam-bearing tree. [B.]—**B. brasiliensis.** See Arbor *b. brasiliensis*.—**B. indicana.** The *Myroxylon peruiferum* (*Toluifera Pereiræ*). [B ; L, 116.]

BALSAMIFEROUS, adj. Ba^{4}l-sa^{3}m-i^{2}f'e^{2}r-u^{3}s. Lat., *balsamiferus* (from *balsamum*, balsam, and *ferre*, to bear). Fr., *balsamifère.* Ger., *balsamtragend.* Producing balsam. [B ; L, 56.]

BALSAMIFERUS (Lat.), adj. Ba^{2}l(ba^{3}l)-sa^{2}m(sa^{3}m)-i^{2}f'e^{2}r-u^{3}s(u^{4}s). See Balsamiferous.—**Croton balsamiferum.** See Bois *de baume*.—**Hedwigia balsamifera, Houmiria balsamifera.** See Bois *à flambeau.*

BALSAMIFLUÆ [Blume], **BALSAMIFLUEÆ** [Brongniart] (Lat.), n's f. pl. Ba^{2}l(ba^{3}l)-sa^{3}m-i^{2}f'lu^{2}(lu^{4})-e(a^{3}-e^{2}), -i^{2}f-lu^{2}(lu^{4})'e^{2}-e-(a^{3}-e^{2}). From *balsamum*, balsam, and *fluere*, to flow. Fr., *bal-*

samifluées. Ger., *Balsambäume, Amberbäume.* Syn.: *Bucklandieæ, Bucklandiaceæ, Balsamaceæ* [Lindley], *Ambraceæ* [Reichenbach], *Liquidambreæ* [Dumortier]. An order of plants including the single genus *Liquidambar;* corresponding, therefore, to the *Altingiaceæ* of Lindley. It constitutes the series *Liquidambareæ* of the order *Saxifragaceæ* [H. Baillon], and, according to Bentham and Hooker, should be referred to the order *Hamamelideæ.* [B, 42, 121, 170.]

BALSAMIFLUOUS, adj. Ba^{4}l-sa^{3}m-i^{2}f′lu^2-u^{3}s. Lat., *balsamifluus.* Fr., *balsamiflué.* 1. See BALSAMIFEROUS. 2. Belonging to the *Balsamifluæ.* [A, 385.]

BALSAMINA (Lat.), n., f. of adj. *balsaminus.* Ba^{2}l(ba^{3}l)-sa^{2}m(sa^{3}m)′i^{2}n-a^3. Gr., βαλσαμίνη. Fr., *balsamine.* 1. The *Momordica b.* 2. A genus sometimes made for the *Impatiens b.* and one or two other related species of *Impatiens.* [B, 19.]—**B. fœmina** [Gärtner], **B. hortensis** [Desportes]. Fr., *balsamine des jardins.* The *Impatiens b.* [B, 173.]—**B. noli-me-tangere** [Gärtner]. Fr., *balsamine des bois.* The *Impatiens noli-me-tangere.* [B, 173.]

BALSAMINACEÆ (Lat.), n. f. pl. Ba^{2}l(ba^{3}l)-sa^{3}m-i^{2}n-a(a^3)′-se^2(ke^2)-e(a^3-e^2). Fr., *balsaminacées.* See BALSAMINEÆ.

BALSAMINE, n. Ba^{4}l′sa^{2}m-en. Lat., *balsamina.* Fr., *balsamine.* Ger., *Balsamine.* The garden-balsam (*Impatiens balsamina*). [B, 35, 116.]—**B. des bois** (Fr.). The *Impatiens noli-me-tangere.* [A, 385.]—**B. des jardins** (Fr.), **B. jaune** (Fr.). The *Impatiens balsamina.* [B, 173.]—**B. mâle** (Fr.). The *Momordica balsamina.* [B, 173.]—**B'ngewächse** (Ger.). The *Balsamineæ.* [B, 35.]—**B'nöl** (Ger.). The oil of *Momordica balsamina.* [B, 270.]—**B. rampante** (Fr.). The *Momordica balsamina.* [B, 173.]—**Ostindische B.** (Ger.). The *Impatiens balsamina.* [B, 35.]—**Wilde B.** (Ger.). The *Impatiens noli-me-tangere.* [B, 35.]

BALSAMINEÆ (Lat.), n. f. pl. Ba^{2}l(ba^{3}l)-sa^{3}m-i^{2}n′e^2-e(a^3-e^2). Fr., *balsaminées.* Ger., *Balsamineen. Balsamgewächse.* Syn.: *Balsaminaceæ* [Lindley], *Hydrocereæ* [Blume]. 1. A group of plants including the genera *Impatiens* and *Hydrocera,* regarded by Lindley, Jussieu, Kunth, and others as a distinct order, but by Baillon and by Bentham and Hooker made a tribe or series of the *Geraniaceæ.* 2. Of Dumortier, a family of the *Phalamungulia,* comprising the single genus *Impatiens.* [B, 42, 121, 170.]

BALSAMINUS (Lat.), adj. Ba^{2}l(ba^{3}l)-sa^{2}m(sa^{3}m)′i^{2}n-u^{3}s(u^{4}s). See BALSAMIC.

BALSAMISCH (Ger.), adj. Ba^{3}l-za^{3}m′i^{2}sh. See BALSAMIC.

BALSAMITA (Lat.), n. f. Ba^{2}l(ba^{3}l)-sa^{3}m-i(e)′ta^3. Fr., *balsamite.* Ger., *Frauenmünze.* A genus of composite plants separated by Desfontaines from the genus *Tanacetum;* referred by Bentham and Hooker to *chrysanthemum.* [B, 42, 121.]—**B. annua** [Flora Fr.]. The *Tanacetum annuum.* [B, 180, 214.]—**B. flabelliformis** [Persoon]. The *Pentzia flabelliformis.* [B, 214.]—**B. fœmina.** The *Achillea ageratum.* [L, 84.]—**B. lutea.** The genus *Persicaria.* [L, 119.]—**B. major** [Dod.], **B. mas** [Blackwell]. See CHRYSANTHEMUM *suaveolens.*—**B. minor.** See ACHILLEA *ageratum* and EUPATORIUM *cannabinum.*—**B. odorata, B. suaveolens** [Persoon], **B. vulgaris.** Fr., *balsamite odorante, menthe-coq, herbe au coq, coq des jardins.* See CHRYSANTHEMUM *suaveolens.*—**Herba balsamitæ, Herba balsamitæ maris.** Ger., *Marienblatt, Frauenblatt.* Syn.: *herba menthæ sarraceniæ* (seu *romanæ*). The herb of *Chrysanthemum suaveolens.* [B, 180.]—Herba balsamitæ minoris. The herb of *Eupatorium cannabinum.* [B, 180.]—**Lignum balsamitæ.** The wood of *Balsamodendron gileadense.* [B, 180.]—**Radix balsamitæ minoris.** The root of *Eupatorium cannabinum.* [B, 180.]—**Summitates balsamitæ, Summitates balsamitæ maris.** The herb of *Chrysanthemum suaveolens.* [B, 180.]—**Tanacetum b.** [Linnæus]. See CHRYSANTHEMUM *suaveolens.*

BALSAMITE (Fr.), n. Ba^{3}l-sa^{3}m-et. See BALSAMITA.—**B. odorante** [Fr. Cod.]. The *Chrysanthemum suaveolens.* [B, 113.]

BALSAMITO (Sp.), n. Ba^{3}l-sa^{3}m-e′to. A tincture (or, according to Dorat, an alcoholic extract) of the fruit of the *Toluifera Pereiræ;* used as a stimulant, diuretic, and anthelminthic and applied to ill-conditioned ulcers and to freckles. [B, 5.]

BALSAMO (It.), n. Ba^{3}l′sa^{3}m-o. See BALSAM.—**B. acetico.** See BALSAMUM *aceticum.*—**B. acetico canforato.** See BALSAMUM *aceticum camphoratum.*—**B. acustico.** See BALSAMUM *acusticum.*—**B. acustico con creosoto.** See BALSAMUM *acusticum* (4th def.).—**B. anodino.** See BALSAMUM *anodynum.*—**B. antiartritico.** See *Antarthritic* BALSAM.—**B. antireumatico.** See BALSAMUM *antirrheumaticum* and BALSAMUM *contra rheumatismum.*—**B. apoplettico.** See BALSAMUM *apoplecticum.*—**B. astringente del Gherli.** See BALSAMUM *astringens.*—**B. basvilliano.** See BALSAMUM *basvillianum.*—**B. benzoico.** See BENZOIN.—**B. bezoardico.** See BALSAMUM *læmicum* and BALSAMUM *ad pestem.*—**B. bianco liquido, B. bianco secco.** See BALSAM *of Peru.*—**B. calaba.** See BALSAM *of Maria.*—**B. carpatico.** See *Hungarian* TURPENTINE.—**B. cordiale.** See BALSAMUM *cordiale.*—**B. d'America.** See BALSAM *of Peru.*—**B. d'Arceo.** See *Unguentum* ELEMI.—**B. dei funerali, B. del Cairo.** See *Mecca* BALSAM.—**B. del Canadà.** See *Canadian* TURPENTINE.—**B. del commendatore di Pernes.** See BALSAMUM *commendatoris.*—**B. del Fioravanti.** See BALSAMUM *Fioravanti.*—**B. della Marca.** An embrocation made of an infusion of laurel berries and aromatic herbs, Venice turpentine, rosin, yellow wax, and nut-oil. [A, 314.]—**B. della Mecca, B. delle Mummie.** See *Mecca* BALSAM.—**B. del Perù.** See BALSAM *of Peru.*—**B. del Samaritano.**—See BALSAMUM *samaritanum.*—**B. del Tolù, B. di Cartagena.** See BALSAM *of Tolu.*—**B. di Chiron.** See BALSAMUM *Chironis.*—**B. di Condom.** See BALSAMUM *lectorense.*—**B. di copalma.** See LIQUIDAMBAR (2d def.).—**B. di Costantinopoli.** See *Mecca* BALSAM.—**B. di embrioni.** See BALSAMUM *embryonum.*—**B. di Fourcroy.** See *Fourcroy's* BALSAM.—**B. di Genoveffa.** See BALSAMUM *Genevievæ.*—**B. di Gilead.** See *Mecca* BALSAM.—**B. di gurgun.** See *Gurjun* BALSAM.—**B. di Hoffmann.** See MIXTURA *oleo-balsamica.*—**B. d'incisione.** See BALSAM *of incision.*—**B. di Laborde.** See *Fourcroy's* BALSAM.—**B. di Lectoure.** See BALSAMUM *lectorense.*—**B. di Locatelli.** See BALSAMUM *Locatelli.*—**B. di Losanna.** See BALSAMUM *Chironis.*—**B. di Maria.** See BALSAM *of Maria.*—**B. di Metz.** See BALSAMUM *viride metensium.*—**B. di opodeldoch.** See LINIMENTUM *saponato-camphoratum.*—**B. di Sanchez.** See *Antarthritic* BALSAM.—**B. di Santo Salvatore.** See BALSAM *of Peru.*—**B. di Santo Tommaso.** See BALSAM *of Tolu.*—**B. di Sassonia.** See BALSAMUM *cephalicum saxonicum.*—**B. di Saturno.** See *Balsamum* SATURNI.—**B. di Vinciguerra.** See BALSAMUM *lectorense.*—**B. di vita.** See BALSAMUM *vitæ.*—**B. di vita dell' Hoffmann.** See BALSAMUM *vitæ Hoffmanni.*—**B. di vita di Lelièvre.** See *Tinctura* ALOES *composita.*—**B. duro.** See BALSAM *of Tolu.*—**B. egiziano.** See *Mecca* BALSAM.—**B. giudaico.** See *Mecca* BALSAM and *Canadian* TURPENTINE.—**B. indico.** See BALSAM *of Peru.*—**B. innocenziano.** See BALSAMUM *commendatoris.*—**B. ipnotico.** See BALSAMUM *hypnoticum.*—**B. isterico.** See BALSAMUM *hystericum.*—**B. liquidambar.** See LIQUIDAMBAR (2d def.).—**B. nefritico di Fuller.** See BALSAMUM *nephriticum.*—**B. nervale (o nervino).** See BALSAMUM *nervinum.*—**B. odontalgico.** See BALSAMUM *odontalgicum.*—**B. orientale.** See *Mecca* BALSAM.—**B. ottalmico di Saint-Yves.** See BALSAMUM *ophthalmicum yveanum.*—**B. siriaco.** See *Mecca* BALSAM.—**B. storace.** See STORAX.—**B. tranquillo.** See BALSAMUM *tranquillans.*—**B. ungarico nativo (o ungherese).** See *Hungarian* TURPENTINE.—**B. verde.** See BALSAMUM *viride.*—**B. vero.** See *Mecca* BALSAM.—**B. vulnerario.** See BALSAMUM *traumaticum* and BALSAMUM *vulnerarium.*

BÁLSAMO (Sp.), n. Ba^{3}l′sa^{3}m-o: See BALSAM.—**B. anodino** [Mex. Ph.]. See *Linimentum* SAPONIS *et opii.*—**B. blanco.** White balsam of Peru. [B.]—**B. católico** [Mex. Ph.]. See BALSAMUM *commendatoris.*—**B. de Arceo.** See *Unguentum* ELEMI.—**B. de Buda.** See BALSAMUM *Fioravanti.*—**B. de cascara.** A variety of balsam of Peru (*q. v.*). [B, 270.]—**B. de Gonzalez** [Mex. Ph.]. See LINIMENTUM *anodynum.*—**B. del Caballero de San Victor (ó del comendador de Permes, ó de los inocentes).** See BALSAMUM *commendatoris.*—**B. de María.** See BALSAM *of Maria.*—**B. magistral de Zúñiga.** See *Oleum* SANTALI *compositum.*—**B. negro.** Ordinary black balsam of Peru. [B; L, 77.]—**B. nerval.** See BALSAMUM *nervinum.*—**B. opodeldoc concreto** [Mex. Ph.] (ó **inglés**). See LINIMENTUM *saponato-camphoratum.*—**B. opodeldoc líquido** [Mex. Ph.]. Ph.]. The fruit of the *Toluifera Pereiræ* (*q. v.*). [B.]

BALSAMO-AROMATICUS (Lat.), adj. Ba^{2}l(ba^{3}l)″sa^{3}m-o-(o^2)-a^{2}r(a^{3}r)-o-ma^{2}t(ma^{3}t)′i^{2}k-u^{3}s(u^{4}s). Balsamic and aromatic. [B.] See LIQUOR *b.-a.*

BALSAMOCARPON (Lat.), n. n. Ba^{2}l(ba^{3}l)″sa^{3}m-o(o^2)-ka^{3}rp′-o^{2}n. From βάλσαμον, balsam, and καρπός, fruit. A genus of leguminous plants established by Clos; referred by Bentham and Hooker to *Cæsalpinia.* [B, 42.]—**B. brevifolium** [Clos]. See CÆSALPINIA *brevifolia.*

BALSAMOCARPUM (Lat.), n. n. Ba^{2}l(ba^{3}l)″sa^{3}m-o(o^2)-ka^{3}rp′-u^{3}m(u^{4}m.). See BALSAMOCARPON.

BALSAMODENDRON (Lat.), n. n. Ba^{2}l(ba^{3}l)″sa^{3}m-o(o^2)-de^{2}nd′ro^{2}n. From βάλσαμον, balsam, and δένδρον, a tree. Fr., *balsamodendron, balsamier, baumier.* Ger., *Balsambaum.* Syn.: *Balsamodendrum* [Kunth], *Balsamea* [Gleditsch]. The balm-tree, balsam-tree; a genus of burseraceous trees of the tribe *Bursereæ,* separated by Kunth from the genus *Amyris,* from which it differs in having diclinous flowers with an urceolate, persistent calyx, equal, linear-oblong petals inserted with the stamens upon a glandular annular disc, and a bilocular ovary with a very short style. [B, 180.]—**B. africanum** [Arnott]. Syn.: *Balsamea africana* [Engl.], *Heudelotia africana* [Richard], *Niotoutt* [Adanson]. A species growing in Abyssinia, in the kingdom of Aden, and in Senegambia. The resin-cells of the trunk secrete a gum-resin which constitutes the so-called African bdellium. [H. Baillon (B, 46).]—**B. agallocha** [Wight and Arnott]. Syn.: *Amyris commiphora* [Roxburgh] (et *agallocha* [Roxburgh]), *Commiphora madagascariensis* [Jacquin]. The goozul, or goozgula, of the Bengalese; a small tree growing in the East Indies, with a crooked trunk, drooping branches, small red flowers, and a red fruit of the size of a currant. It is very aromatic, and gives forth an agreeable perfume when broken. It yields the gum-resin called *googul,* constituting one variety of Indian bdellium (*q. v.*). [B, 46, 172.]—**B. Berryi** [Arnott]. Syn.: *Protium gileadense* [Wight and Arnott], *Amyris gileadensis* [Roxburgh]. A fragrant tree growing in India, furnishing a gum-resin; possibly identical with *B. myrrha.* ["Pharm. Jour. and Trans.," July 31, 1875, p. 83 (B); *id.*. May 3, 1879, p. 893 (B); B, 212.]—**B. ehrenbergianum.** A species closely related to *B. myrrha,* and regarded by Berg as the true source of myrrh. According to Oliver and Hildebrandt, however, it is identical with *B. gileadense.* [Trimen, "Pharm. Jour. and Trans.," May 3, 1879, p. 893 (B); B. 250, 267.]—**B. gileadense** [Kunth]. Gr., βάλσαμον [Dioscorides], βάλσαμον δένδρον [Theophrastus]. Fr., *balsamier de Giléad, baumier blanc.* Ger., *ächter* (oder *arabischer*) *Balsambaum.* Syn.: *Amyris gileadensis* [Linnæus], *Balsamea meccanensis* [Gleditsch]. The balsam-tree; a small tree, with glabrous, squarrose, spreading branches and trifoliate, sometimes quinquefoliate, leaves growing from very small, almost bud-like branchlets, and small white flowers disposed at the ends of the branchlets, growing in Arabia Felix and Arabia Petræa, from which Mecca balsam is obtained. The small, reddish, usually inodorous and tasteless fruit (*grana* [seu *fructus*] *balsami, carpobalsamum*) was formerly official, together with the branches (*xylobalsamum, lignum balsamitæ*), which emit an agreeable odor when burned. [B, 5, 180.] Cf. BOIS *de baume.*—**B. kafal** [Kunth]. Ger., *Kataf-Balsambaum.* Syn.: *Amyris Kafal* [Forskål],

Balsamophlœos kataf [Berg]. An Arabian tree of somewhat doubtful botanical characters, which apparently much resembles the *B. gileadense*. The bark and the fruit have purgative properties, and the aromatic gum-resin which exudes from the bark has been thought to be identical with the Arabian incense, and is perhaps the *κάγκαμον* of Dioscorides and the sort of myrrh known in eastern Africa as *habakhadi* and in India as *bisabol*; used as an emmenagogue, excitant, and pectoral. [B, 46, 180, 270.]—**B. Kotschyi** [Berg]. See *B. africanum*.—**B. Mookul** [Hooker], **B. mukal** [Hooker], **B. mukul** [Hooker]. A species growing in Scinde, considered by some a variety of *B. agallocha*, from which, however, it differs in specific characters. It produces the *mukul*, or *bdellium*, of Scinde. [B, 46, 172.]—**B. myrrha** [Nees and Eberm.]. A specie growing in Africa and India, said to produce myrrh. It is a small tree with scattered, pointed branches, scanty alternate, trifoliate leaves, and flowers disposed like those of *B. africanum*. It is closely related to *B. Berryi*, and is perhaps identical with it. The myrrh is secreted in the interior of the trunk, and by exfoliation of the outer layers of the latter is brought to the surface, where it either exudes spontaneously, constituting the so-called *liquid myrrh*, or *stacte*, or is set free by incisions. [H. Trimen, "Pharm. Jour. and Trans.," May 3, 1879, p. 893 (B); B, 5.]—**B. opobalsamum** [Kunth]. Syn.: *Amyris opobalsamum* [Forskål]. A species now regarded as a variety of *B. gileadense*, from which it differs only in non-essential characters. [B, 46, 267.]—**B. Playfairii** [Hooker]. A shrub growing in the Nile lands of Africa, closely related to *B. kataf*, if not identical with it. It furnishes Hotai resin, a dark variety of bdellium, regarded as a sort of myrrh. [B, 250, 270.]—**B. pubescens** [Stocks]. An East Indian species the exudation from the bark of which constitutes the so-called Bayee balsam (*q. v.*, under BALSAM). [B, 212; "Pharm. Jour. and Trans.," July 31, 1875, p. 83 (B).]—**B. Roxburghii.** 1. Of Arnott, see *B. agallocha*. 2. Of Stocks, see *B. mukul*.—**B. Schimperi** [Berg.]. See *B. africanum*.—**B. Wightii** [Arnott]. See *B. mukul*.—**B. zeylanicum** [Kunth]. Syn.: *Amyris zeylanica* [Retzius]. A Ceylon tree of doubtful botanical characters, said to furnish a variety of elemi. [B, 214.]

BALSAMODENDRUM (Lat.), n. n. Ba^{2}l(ba^{3}l)-sa^{3}m-o(o^2)-de^{2}nd'ru^{3}m(ru^{4}m). See BALSAMODENDRON.

BALSAMODES (Lat.), adj. Ba^{2}l(ba^{3}l)-sa^{3}m-o'dez(das). Gr., *βαλσαμώδης* (from *βάλσαμον*, balsam, and *εἶδος*, resemblance). Balsamic; as a n., the *Laurus nobilis*. [B, 121.]

BALSAMON (Lat.), n. n. Ba^{2}l(ba^{3}l)'sa^{3}m-o^{2}n. Gr., *βάλσαμον* [Theophrastus]. The *Pistacia vera*. [B, 88, 121.]

BALSAMOPHLŒOS (Lat.), n. m. Ba^{2}l(ba^{3}l)''sa^{3}m-o(o^2)-fle'-(flo^2'e^2)-o^{2}s. From *βάλσαμον*, balsam, and *φλοιός*, the inner bark of a tree. A genus of burseraceous plants established by O. Berg, including some species of *Balsamodendron*. [B, 121, 250.]—**B. kataf** [Berg]. See BALSAMODENDRON *kataf*.

BALSAMOPHORE (Fr.), n. Ba^{3}l-sa^{3}m-o-for. The botanical genus *Heliopsis*. [L, 41.]

BALSAMORRHIZA (Lat.), n. f. Ba^{2}l(ba^{3}l)-sa^{3}m-o^{2}r-ri(re)'za^3. From *βάλσαμον*, balsam, and *ῥίζα*, a root. Of Hooker, a genus of composite herbs with tuberous roots, of the tribe *Helianthoideæ*, subtribe *Verbesineæ*. [B, 42.]—**B. helianthoides** [Nuttall]. See *B. sagittata*.—**B. Hookeri** [Nuttall]. A species found along the Pacific coast of the United States. The roots furnish a resinous substance of a terebinthaceous odor, and are eaten by the Oregon Indians. [B, 19, 215.]—**B. incana** [Nuttall]. A variety of *B. Hookeri*. [B, 19, 215.]—**B. macrophylla** [Nuttall]. A species growing throughout the Rocky and Wahsatch Mountains, mentioned among the medicinal plants of California. ["Proc. of the Am. Pharm. Assoc.," xix, p. 303 (B); B, 215.]—**B. sagittata** [Nuttall]. A species found throughout the Rocky Mountains and westward to California, the young stalks, roots, and seeds of which are eaten by the Indians. [B, 215.]

BALSAMOSACCHARUM (Lat.), n. n. Ba^{2}l(ba^{3}l)''sa^{3}m-o(o^2)-sa^{2}k(sa^{3}k)'ka^{3}r(ch^{2}a^{3}r)-u^{3}m(u^{4}m). From *βάλσαμον*, balsam, and *σάκχαρον* (= *σάκχαρ*), sugar. An oleosacharum consisting of sugar rubbed up with a balsam. [B, 48.]

BALSAMOUS, adj. Ba^{4}l'sa^{2}m-u^{3}s. Lat., *balsameus*. See BALSAMIC.

BALSAMUM (Lat.), n. n. Ba^{2}l(ba^{3}l)'sa^{3}m-u^{3}m(u^{4}m). See BALSAM.—**Alcohol cum balsamo peruviano.** See *Tinctura balsami peruviani*.—**B. ab Ægyptiis balessan.** See *Mecca* BALSAM.—**B. aceticum camphoratum, B. aceto-camphoricum.** Fr., *baume acétique camphré*. It., *balsamo acetico canforato*. A preparation analogous to the antarthritic balsam of Sanchez; made of 1 drachm each of animal soap and camphor and 10 drops of oil of thyme, heated together over a water-bath and then mixed with 1 oz. of acetic ether. [B, 92, 97.]—**B. acousticum, B. acusticum.** Fr., *baume acoustique*. Ger., *Ohrenbalsam*. It., *balsamo acustico*. Sp., *bálsamo acústico*. Acoustic balsam; a name given to a number of preparations used for earache and deafness. 1. Of Van Mons, a mixture of 2 parts each of opodeldoc and sweet-almond oil and 1 part each of tincture of castoreum and laudanum. 2. Of Paris, a mixture of 30 parts each of b. tranquillans and white-onion juice and 2 of balsam of Peru. The preparation of Sainte-Marie and Soubeiran was similar, but contained 15 parts of balsam of Peru. 3. Of de Gassicourt and Guibourt, a mixture of 2 drachms of b. tranquillans, ½ oz. of oil of rue, and 10 drops of each of oleum sulphuris terebinthatum, tincture of asafœtida, tincture of ambergris, tincture of castoreum, and rectified oil of amber. An imitation of this preparation is made by mixing 5 drops each of oleum sulphuris terebinthatum, oil of rue, and rectified oil of amber with 20 grammes of oil of hyoscyamus. 4. Of Radius, a mixture of 1 part of inspissated ox-gall and 7 parts of almond-oil. De Gassicourt and Foy employed 4 parts of ox-gall, 2 parts of almond-oil, and 1 part of b. Fioravanti. An imitation of this is made by mixing 2 parts of ox-gall, 1 part each of carbolic acid and zinc sulphate, and 10 parts of glycerin. Another similar preparation (Bouchardat's) is made of 10 grammes of compound spirit of balm (*Melissa*), 20 grammes of almond-oil, 40 grammes of ox-gall, and 10 drops of creasote. 5. A mixture of 1 part each of carbolic acid and rectified oil of amber, 10 parts of oil of hyoscyamus, and 40 of olive-oil. 6. A mixture of ¼ gramme of camphor, 30 grammes of almond-oil, and 5 drops of liquor ammonii anisati. 7. A mixture of 20 grammes of camphorated oil and 10 drops of oil of cajeput. [B, 119, 125, 199, 270.]—**B. ad apoplecticos.** See *B. apoplecticum*.—**B. ad capillos.** See *B. crinale*.—**B. ad dentitionem.** Fr., *baume adoucissant*. An old preparation made by heating together 60 grammes each of the expressed juice of crabs and mucilage of marsh-mallow root, 90 of fresh butter, and 7 each of chicken-fat and fox's grease, straining, and adding 120 grammes of candied sugar and the yolk of an egg; used as an application to the gums during dentition. [B, 119.]—**B. ad papillas mammarum.** Fr., *baume mamillaire*. Ger., *Brustwarzenbalsam*. A name given to various preparations for application to sore nipples. 1. The mamillary liniment of Dannemann; an emulsion of balsam of Peru, gum arabic, almond-oil, and rose-water in varying proportions, sometimes with the addition of a little vinegar of lead. 2. A mixture of 1 part of balsam of Peru, 20 parts each of alcohol and tincture of catechu, and 40 parts each of glycerin and mucilage of gum arabic. 3. A mixture of 1 part of tannin, 2 parts of boric acid, 20 of rose-water, and 180 of quince-mucilage. 4. A mixture of 10 grammes of balsam of Peru and the yolk of an egg. This is an imitation of the mamillary liniment of Harless, which contained in addition borax and almond-oil. The mamillary liniment of Ribke was made of 2 parts of balsam of Peru and 7 of cacao-butter. [B, 119, 270.]—**B. ad pestem Mindereri.** Balsam against the plague; an old mixture of b. sulphuris terebinthatum or b. sulphuris anisatum with a fourth part of camphor. Used against the plague and to prevent suppuration of the breast. [B, 89.]—**B. ægyptiacum.** See *Mecca* BALSAM.—**B. album.** 1. Of Parkinson, white balsam of Peru. 2. A mixture of equal parts of vinegar of lead, inspissated to the consistence of honey, and oil of roses; used as a desiccant. [B, 200.]—**B. Alpini.** See *Mecca* BALSAM.—**B. alpinum** [Lobel]. The *Rhododendron hirsutum*. [B, 121.]—**B. alterum.** Brandy. [B, 270.]—**B. americanum.** See BALSAM *of Tolu*.—**B. americanum durum** (seu **resinosum**, seu **siccum**). A natural balsam, probably balsam of Tolu, mentioned by some of the older writers. [B, 18.]—**B. anodynum, B. anodynum Batæi** (seu **Batei**). Fr., *baume anodin*. Ger., *schmerzstillender Balsam*. It., *balsamo anodino*. Sp., *bálsamo anodino*. See *Linimentum* SAPONIS *et opii*.—**B. anodynum Guidonis.** Guy's anodyne balsam; made by distilling a mixture of 1 part each of hepatic aloes, ammoniacum, bdellium, carana, castoreum, galbanum, labdanum, myrrh, balsam of Peru, olibanum, amber, tacamahac, and solid storax and 13 parts of Venice turpentine, without the addition of water. [B, 200.]—**B. antarthriticum indicum.** A preparation formerly much in vogue as a specific against gout and rheumatism; supposed to have been gurjun balsam with the addition of resinous oil. [B, 270.]—**B. antiquorum genuinum.** See *Mecca* BALSAM.—**B. antirrheumaticum.** Fr., *baume antirhumatique*. It., *balsamo antireumatico*. Sp., *bálsamo antireumático*. 1. Of Liboschitz, see *B. antirrheumaticum resinosum Liboschitzii*. 2. Of Fontaine, a mixture of 250 parts of b. Fioravanti, 30 of soap, 25 of camphor, 8 of ammoniacum, 6 of oil of rosemary, and 2 of oil of thyme. [B, 103, 125.]—**B. antirrheumaticum resinosum Liboschitzii.** Fr., *baume de Liboschitz*. Liboschitz's balsam; made by adding to 40 parts of concentrated alcohol enough Burgundy pitch to make it syrupy, and mixing with 3 parts each of b. vitæ Hoffmanni and Venice turpentine, 2 of camphor, and 3 of tincture of cantharides. The mixture is spread upon linen. Another formula directs the addition of 10 parts of b. vitæ Hoffmanni to 100 each of tincture of capsicum, spirit of mustard, and glycerin. [B, 119, 270.]—**B. apoplecticum.** Fr., *baume apoplectique*. Ger., *Schlagbalsam*. It., *balsamo apoplettico*. Sp., *bálsamo apopléctico*. Apoplectic balsam; made of 840 parts of fixed oil of nutmeg, 45 each of the oils of jessamine, cinnamon, and rosewood, 30 each of the oils of lavender, sweet marjoram, and cloves, 10 each of the oils of rue and amber, 8 each of musk and ambergris, 5 of civet, 20 of balsam of Peru, and a sufficiency of ivory-black. [Würtemb. Ph., 1798.] The Palat. Disp. of 1764 ordered somewhat different proportions of the same ingredients, but omitted the musk, ambergris, and civet, and substituted oil of rosemary for the oil of jessamine and amber soot for the ivory-black. The Brunsw. Ph. of 1777 ordered 240 parts of oil of nutmeg, 15 each of oil of rosemary, oil of lavender, and oil of cloves, 5 each of oil of amber and musk, and 30 of balsam of Peru. [B, 119.]—**B. Apparitii** [Sp. Ph., 1798]. Fr., *huile de millepertuis composée*. A preparation made by digesting for three days 18 parts each of rosemary, St. Johnswort, and rue in 72 of olive-oil, then boiling with 6 of earth-worms, straining, and adding 2 parts each of sandarac, myrrh, and incense and 1 part of mastic. [B, 119.]—**B. Arcæi.** Fr., *baume d'Arcœus* (ou *d'Arcéus*). Ger., *Arcäus' Balsam*. It., *balsamo d'Arceo*. See *Unguentum* ELEMI.—**B. aromaticum.** Fr., *baume aromatique*. Ger., *aromatischer Balsam*. It., *balsamo aromatico*. Sp., *bálsamo aromático*. Aromatic balsam; an old preparation consisting essentially of oil of nutmeg mixed with various volatile oils (especially those of amber, cloves, lavender, rosemary, juniper, peppermint, mace, and benzoin) with or without the addition of balsam of Peru. [Batav. Ph. (Niemann's ed., 1811); Fuld. Disp., 1791; Dan. Ph., 1805.] The Würzb. Ph. of 1796 ordered a mixture of mutton-suet, oil of rosemary, and the products obtained by boiling chamomile flowers and sweet marjoram in olive-oil. The b. aromaticum of Augustin was made by mixing 10 grains of ammonium sesquicarbonate, 40 grains of castoreum, 6 drops of oil of rue, and 2 drachms of oil of nutmeg, and was used as an application to the temples in hysteria. [B, 119.] Cf. *B. stomachicum* and *B. cephalicum*.—**B. aromaticum æthereum.** Fr., *baume aromatique éthéré*. Sp., *bálsamo aromático etéreo*. The b. aromaticum of Augustin (see under *B. aromaticum*). [B, 97, 119.]—**B. aromaticum Scherzeri.** Fr., *baume aromatique de Scherzer*. A mixture of 40 parts of oil of nutmeg, 2

each of the oils of orange-peel, cloves, and mace, 1 part each of the oils of rosemary, lavender, wormwood, cumin, and dill, and 8 parts of white wax [Brunsw. Disp., 1777]; or of 48 parts of oil of nutmeg, 12 each of yellow wax, oil of cloves, and oil of lavender, and 1 part of oil of amber [Finn. Ph., 1819; Swed. Ph., 1817]. [B, 119.]—**B. arthriticum.** Ger., *Gichtbalsam.*—**B. artificiale.** See *Artificial* BALSAM.—**B. asiaticum.** See *Mecca* BALSAM.—**B. astringens.** Fr., *baume astringent.* Sp., *bálsamo astringente.* An astringent balsam formerly used in hæmoptysis; made by adding 2 parts of oil of turpentine drop by drop to 5 of sulphuric acid, and, after all effervescence had ceased, mixing with 16 of alcohol. [Brunsw. Disp., 1777.] The Fuld. Disp. of 1791 ordered 3 parts of oil of turpentine and 24 of alcohol. Warren's b. hæmostaticum contained 2 parts each of oil of turpentine and alcohol and 5 of sulphuric acid. The astringent balsam of Gherli was prepared by digesting 2 parts of benzoin, 1 part of dragon's-blood, and 48 parts of alcohol with 4 parts of oil of turpentine, adding a solution of 5 parts of sulphuric acid in 20 of water, and then mixing with 12 of alcohol. [B, 119, 271.]—**B. auriculare.** See *B. acusticum.*—**B. basvillianum.** Fr., *baume de Basville.* It., *balsamo basvilliano.* Sp., *bálsamo de Basville.* A preparation resembling the b. vitæ externum; consisting of a mixture of 6 parts of oil of turpentine, 3 of potassium carbonate, 4 of Castile soap, 3 of distilled water, and 4 of spirit of juniper. [B, 119.]—**B. benivivum.** Benzoin. [B, 92.]—**B. betulinum.** Birch-tar. [B, 180.] See BETULA *alba.*—**B. brasiliense.** Copaiba. [B, 180.]—**B. Calaba.** See *Bourbon* TACAMAHAC.—**B. camphoratum.** See *Linimentum* CAMPHORÆ.—**B. canadense.** See *Canadian* TURPENTINE.—**B. cancamum.** East Indian elemi. [B, 180.]—**B. Capucinorum.** Fr., *baume des Capucins.* Ger., *Capuziner-Balsam.* A preparation used both externally and internally, especially in Austria; composed of 10 parts each of balsam of Peru, balsam of Tolu, liquid storax, Venice turpentine, myrrh, nutmeg, angelica root, and gentian, 5 each of saffron, mastic, benzoin, amber, and cinnamon bark, 15 of red sandal-wood, and 7·5 of potassium carbonate, digested with 1,000 of dilute alcohol. [B, 270.]—**B. carpathicum, B. carpathicum nativum, B. carpaticum.** See *Hungarian* TURPENTINE.—**B. catholicum.** Fr., *baume catholique.* It., *balsamo catolico.* Sp., *bálsamo catótico.* See *B. commendatoris.*—**B. catholicum cum spiritu vini.** See *Tinctura alcoholica* HYPERICI *vulneraria.*—**B. catholicum ex vino.** See *B. commendatoris.*—**B. cephalicum.** See *B. aromaticum Scherzeri* and *B. cephalicum saxonicum.*—**B. cephalicum saxonicum.** Fr., *baume saxon* (ou *céphalique saxon*). It., *balsamo di Sassonia.* Sp., *bálsamo cefálico sajon.* Cephalic balsam; a mixture of 480 parts of oil of nutmeg, 20 each of the oils of lavender and amber, 15 each of the oils of pennyroyal, sweet marjoram, sage, rosemary, and savory, 10 each of the oils of rue and mace, and 12 each of the oils of mint and origanum [Würtemb. Ph., 1798]; or of 48 parts of oil of nutmeg, 6 each of the oils of rosemary and cloves, 2 of oil of amber, and 3 of balsam of Peru [Lipp. Disp., 1794; Hess. Ph., 1827]. [B, 119.]—**B. chalybeatum.** See *Linimentum* FERRI *nitrici.*—**B. Chironis.** Fr., *baume Chiron* (ou *de Lausanne*). It., *balsamo di Chiron* (o *di Losanna*). Sp., *bálsamo de Chiron* (ó *de Lausana*). An old preparation used as an application to promote cicatrization; made by boiling together 800 parts of olive-oil, 160 of turpentine, 80 of yellow wax, and 40 of alkanna-root, straining, and adding 15 of balsam of Peru and 2 of camphor. Somewhat different proportions were ordered in other formularies, and red sandal-wood was sometimes substituted for the alkanna-root. [B, 119, 270.]—**B. commendatoris.** Fr., *baume du commandeur* (ou *du commandeur du Perne*, ou *des innocents*). It., *balsamo del commendatore di Pernes.* Sp., *bálsamo del commendador de Permes.* Syn.: *b. innocentium* (seu *innocentianum*, seu *traumaticum*, seu *catholicum*, seu *vulnerarium*, seu *persicum*), *elixir traumaticum.* A name formerly applied to a number of preparations that have served as a model for such modern preparations as the tinctura benzoini composita of the U. S. Ph., for which, accordingly, the term is often given as a synonym. [B.] See *Tinctura* BENZOINI *composita.*—**B. contra perniones.** Fr., *baume contre les engelures.* Ger., *Frostbalsam.* Sp., *bálsamo contra los sabañones.* A mixture of 1 part of balsam of Peru, 2 parts each of spermaceti, white wax, and hydrochloric acid, 6 of water, and 16 of olive-oil; or of 4 parts of oil of turpentine, 1 part of sulphuric acid, and 10 parts of olive-oil; or of a solution consisting of 3 parts of camphor, 15 each of tincture of benzoin and potassium iodide, 30 of solution of acetate of lead, 60 of dilute alcohol, and 15 of rose-water with a solution of 30 of animal soap in 60 of dilute alcohol and 15 of rose-water. Used to rub on parts threatened with chilblains. [B, 103, 119.]—**B. contra rheumatismum.** Balsam against the rheumatism; made of ½ lb. each of rosin and Burgundy pitch, 2 oz. of shoemaker's wax, 4 oz. of yellow wax, 2 oz. of Venice turpentine, 1 lb. each of hog's lard and butter, and 3 or 4 spoonfuls of essence of rosemary; used as an application to wounds and ulcers. [B, 200.]—**B. copaibæ, B. copaivæ.** See COPAIBA.—**B. copaivæ album.** White copaiba balsam. [B, 180.] See COPAIBA.—**B. copaivæ ceratum.** See *Massa pilularum balsami* COPAIVÆ.—**B. copaivæ flavum.** Yellow copaiba balsam. [B, 180.] See COPAIBA.—**B. copaivæ inspissatum, B. copaivæ parisiense, B. copaivæ siccum, B. copaivæ solidificatum.** See under COPAIVA.—**B. copalyvæ.** See COPAIBA.—**B. cordiale.** Ger., *herzstärkender Balsam.* It., *balsamo cordiale.* A preparation of the volatile oils of citron, cloves, cinnamon, and ambergris; used as an excitant. [B, 125.]—**B. cosmeticum.** See AQUA *cosmetica.*—**B. crinale.** Ger., *Haarbalsam.* A mixture of 1 part of tincture of cantharides and 50 parts each of b. vitæ Hoffmanni and castor-oil; or of 1 part of tincture of cantharides with the product obtained by melting together 4 parts of yellow wax and 25 of beef-marrow; or of 2 parts of tincture of cantharides and 25 each of balsam of Peru and almond-oil. [B, 270.]—**B. de Canada.** See *Canadian* TURPENTINE.—**B. de Cathagena.** See BALSAM *of Tolu.*—**B. de Chili.** See BALSAM *of Chili.*—**B. de copahu, B. de copaiba, B. de copaiva.** See COPAIBA.—**B. de Gilead.** See *Mecca* BALSAM.—**B. de Honduras.** See BALSAM *of Tolu.*—**B. de Mecca, B. de Mecha judaicum.** See *Mecca* BALSAM.—**B. de Peru.** See BALSAM *of Peru.*—**B. de Salazar.** See *Teinture d'*ALOÈS *et de mastic.*—**B. de Tolu.** See BALSAM *of Tolu.*—**B. dipterocarpi.** See *Gurjun* BALSAM.—**B. Dominæ Fœuillet.** Fr., *baume de Feuillet.* Sp., *bálsamo de Feuillet.* See *B. viride Metensium.*—**B. embryonum.** It., *balsamo di embrioni.* See ELIXIR *vitæ mulierum* and AQUA *aromatica* (Ger. Ph.).—**B. e Mecca, B. e Mecha verum.** See *Mecca* BALSAM.—**B. europæum.** Oil of amber. [B, 48.]—**B. Eustachii.** Balsam of Tolu. [B, 180.]—**B. ex Peru** [J. Bauhin]. See BALSAM *of Peru.*—**B. externum.** Ger., *äusserlicher Balsam.* It., *balsamo esterno.* A balsam designed for external application. [B, 48.]—**B. Feuilleti.** See *B. viride Metensium.*—**B. Fioravanti** [Fr. Cod.]. Fr., *baume de Fioravanti.* It., *balsamo del Fioravanti.* Sp., *bálsamo de Fioravanti.* An official synonym for the alcoolat de Fioravanti (*q. v.*), preparations similar to which were formerly official under this title in a number of formularies. The products of distillation were distinguished by different names according to their consistence and properties. The clear spirituous product first distilled from the mixture of herbs and resins was called *b. Fioravanti spirituosum*; a yellow oily product obtained by distilling the residue from the first distillation over a gentle fire constituted the *b. Fioravanti oleosum;* while the black empyreumatic substance produced by distilling the same residue over a hotter fire was called the *b. Fioravanti nigrum.* [B, 119.]—**B. Fioravanti nigrum.** Fr., *baume de Fioravanti noir.* See under *B. Fioravanti.*—**B. Fioravanti oleosum.** Fr., *baume de Fioravanti huileux.* See under *B. Fioravanti.*—**B. Fioravanti spirituosum.** Fr., *baume de Fioravanti spiritueux.* See under *B. Fioravanti.*—**B. Fioraventi.** See *B. Fioravanti.*—**B. Focot.** See *North American* TACAMAHAC.—**B. Fœuilleti.** See *B. viride metensium.*—**B. Frahmii.** Fr., *baume de Frahm.* Sp., *bálsamo de Frahm.* See *Unguentum* TEREBINTHINÆ.—**B. Friardi, B. Friari.** Fr., *baume de Friard.* Sp., *bálsamo de Friad.* See *Tinctura* BENZOINI *composita.*—**B. Genevievæ.** Fr., *baume de Genivièvе, onguent de térébenthine camphré.* Balsam of Geneviève; a preparation consisting of olive-oil, turpentine, yellow wax, red saunders, and camphor in various proportions. The camphor was sometimes omitted, and in some formularies there was an addition of wine or of wine and rose-water. It was used as a vulnerary and applied to gangrenous surfaces. [B, 119, 200.]—**B. Genofevæ.** It., *balsamo di Genoveva.* Sp., *bálsamo de Genoveva.* See *B. Locatelli.*—**B. genuinum antiquorum, B. gileadense.** See *Mecca* BALSAM.—**B. gileadense Salomonis.** Fr., *baume de vie de Salamon.* It., *balsamo afrodisiaco.* Sp., *bálsamo de Gilead de Salomon.* A preparation devised by Dorvault, consisting of 30 parts each of cardamom seeds and cinnamon, 2 of Mecca balsam, 1 part of tincture of cantharides, 500 parts of dilute alcohol, and 250 of sugar; used as an aphrodisiac. [B, 103, 108.]—**B. gopaivæ.** See COPAIBA.—**B. Goulardii.** Fr., *baume de Goulard.* Goulard's balsam. [B.] See *B.* SATURNI.—**B. guaiacinum.** Syn.: *tinctura guaiaci, elixir guaiacinum.* A solution of resin of guaiac and balsam of Peru in alcohol; used as an excitant and diaphoretic. [B, 97.]—**B. Guidonis.** See *B. anodynum Guidonis.*—**B. gurjunicum.** See *Gurjun* BALSAM.—**B. hæmostaticum** [Warren]. Ger., *blutstillender Balsam.* Sp., *bálsamo antihemorrágico.* See *B. astringens.*—**B. hannoveranum.** A preparation made by mixing 50 parts of olive-oil and 150 of oil of nutmeg, adding 3 parts of oil of cloves and 1 part of tincture of musk, and coloring with extract of alkanet. [B, 270.]—**B. Hollerii.** A preparation resembling the b. vitæ album with the addition of orris-root, *Serpentaria rotunda*, dittany, comfrey, elemi, opoponax, benzoin, and other ingredients. [B, 89.]—**B. hungaricum.** See *Hungarian* TURPENTINE.—**B. hutzochitl.** Black balsam of Peru. [B, 200.] See BALSAM *of Peru.*—**B. hystericum.** Fr., *baume antihystérique.* Ger., *Mutterbalsam.* It., *balsamo isterico.* Sp., *bálsamo antihistérico.* Hysteric (or anthysteric) balsam; an old preparation containing aloes, asphalt, galbanum, labdanum, castoreum, opium, and asafœtida, mixed with the oils of nutmeg, rue, amber, wormwood, savine, and tansy and either petroleum-oil or oil of jet. [B, 119.]—**B. indicum.** See BALSAM *of Peru.*—**B. indicum album.** 1. Storax. [B, 270.] 2. White balsam of Peru. [B, 119.] See BALSAM *of Peru.*—**B. indicum nigrum.** Black balsam of Peru. [L, 135.] See BALSAM *of Peru.*—**B. indicum siccum.** Dry balsam of Peru. [B, 180.] See BALSAM *of Peru.*—**B. innocentianum, B. innocentium.** It., *balsamo innocenziano.* Sp., *bálsamo de los inocentes.* See *B. commendatoris.*—**B. iodatum.** Opodeldoc to which from 5 to 10 per cent. of potassium iodide has been added. [B, 270.]—**B. ioduretum.** See BAUME *hydriodaté.*—**B. ischæmaticum.** See *B. astringens.*—**B. italicum, B. italicum rubrum.** See *B. Locatelli.*—**B. judaicum.** Mecca balsam. It., *balsamo di Lectoure.* Sp., *bálsamo de Lectour.* A preparation made of 1 part each of musk and amber, 2 parts each of camphor and saffron, 16 each of the oils of lavender, turpentine, juniper, cloves, and petroleum, 4 each of the oils of mace and nutmeg, and 8 of benzoin. [B, 119.]—**B. Libani.** Riga balsam. [B, 5.] See *Hungarian* TURPENTINE.—**B. Liboschitzii.** See *B. antirrheumaticum resinosum Liboschitzii.*—**B. liquidambar.** Storax (from the *Liquidambar styraciflua*). [B, 180.] See LIQUIDAMBAR (2d def.).—**B. liquidambra.** Liquid storax (from the *Altingia excelsa*). [B, 180.] See STORAX.—**B. lithaunicum, B. lithavinicum, B. lithuanicum.** See *B. betulinum.*—**B. Locatelli.** Fr., *baume Locatelli* (ou *de Lucatel*), *eléo-rétinolé de baume du Pérou.* It., *balsamo di Locatelli.* Sp., *bálsamo de Lucatel* (ó *Locatelli*, ó *Italia*). A preparation originally made by heating together 24 parts of olive-oil, 16 of yellow wax, and 20 of Madeira wine, and adding 24 parts of Venice turpentine, 1 part of balsam of Peru, and 2 parts of red sandal-wood [Würt. Ph., 1798; Turin Ph., 1833]. In subsequent formulæ the wine was omitted, and in some of them kino or alkanet was substituted for the red sandal-wood, and copaiba for the balsam of Peru, and in that of the Geneva Ph. of 1780, 12 parts each of olive-oil and turpentine, 6 parts of yellow wax, and 1 part of red

sandal-wood were employed. The b. Genovevæ was a modification of the last preparation, containing a small amount of camphor. It was used internally in phthisis and as an external application. [B, 103, 119, 270.]—**B. Locatelli album.** A mixture of 10 parts each of white wax and Venice turpentine and 15 each of olive-oil and rose-water. [Hager (B, 270).]—**B. Lucatelli.** See *B. Locatelli.*—**B. Malats.** Sp., *bálsamo de malats* [Sp. Ph.]. A preparation made by exposing to the sun and dew from May till October, in an open vessel, a mixture of 1 part each of fresh flowers of rosemary, Roman chamomile, and *Lavandula stœchas* and 24 parts of olive-oil, adding in August 2 parts of the dried leaves of the *Momordica balsamina*, and in September 1 part of balsam of Peru. [B, 95.]—**B. Mariæ.** See *Bourbon* TACAMAHAC.—**B. meccanense, B. meccanum.** See *Mecca* BALSAM.—**B. mercuriale.** See *Unguentum* HYDRARGYRI *nitratis* and *B. ophthalmicum yveanum.*—**B. mercuriale Plenkii.** Fr., *baume mercuriel de Plenk.* It., *balsamo mercuriale.* Sp., *bálsamo mercurial de Plenk.* A preparation made up of 23 parts of calomel, 540 of b. Arcæi (unguentum elemi), 360 of lard and a mixture of 120 parts of mercury and 60 of turpentine triturated together until the mercury is extinguished. Instead of the last three ingredients, 540 parts of unguentum hydrargyri cinereum may be used. [B, 119, 270.]—**B. metensium.** See *B. viride metensium.*—**B. mexicanum.** See BALSAM *of Peru.*—**B. mnemocephalicum.** See *B. cephalicum.*—**B. mortuum.** An old term for an alcoholic preparation of aloes and myrrh, used for preserving dead bodies. [A, 325.]—**B. moschatum.** See *Oleum* NUCISTÆ.—**B. moscoviticum.** See *B. betulinum.*—**B. myroxyli peruiferi.** See BALSAM *of Peru.*—**B. nativum pini laricis.** Venice turpentine. [B, 180.]—**B. nativum pini silvestris.** Ordinary turpentine. [B, 119.]—**B. naturale.** See *Natural* BALSAM.—**B. nervale, B. nervinum** [Swiss Ph.]. Fr., *baume nervin.* It., *balsamo nervale* (o *nervino*). Sp., *bálsamo nervino.* 1. See UNGUENTUM *nervinum.* 2. A preparation for which there are various formulæ. That of the Swiss Ph. is made up of 125 parts each of beef-marrow and oil of nutmeg melted together and mixed with 4 parts of camphor, 8 of balsam of Tolu, 15 of alcohol (sp. gr., 0·832), 4 of oil of cloves, and 8 of oil of mace. In the Fr. Cod. of 1837, oil of rosemary and balsam of Peru were directed, instead of the oil of mace and balsam of Tolu. [B, 95, 119.]—**B. nucis moschatæ, B. nucistæ.** Ger., *Muskatbalsam.* See *Oleum* NUCISTÆ and *B.* NUCISTÆ.—**B. nucistæ expressum.** See *Oleum* NUCISTÆ.—**B. odontalgicum.** Fr., *baume* (ou *mixture*) *odontalgique.* Ger., *Zahnbalsam.* It., *balsamo odontalgico.* A preparation of 5 parts each of opium and camphor, dissolved in alcohol, 8 of oil of cloves, 14 of oil of guaiac, and 44 of expressed oil of nutmeg [Palat. Disp., 1764; Würt. Ph., 1798]. Another preparation, called also *sotirella parva*, was composed of 1 drachm each of opium and the species diambræ, 12 grains each of camphor and saffron, and 2 drachms of expressed oil of nutmeg [Brunsw. Ph., 1777]. [B, 119.]—**B. odontalgicum Hoffmanni.** A mixture of 150 parts of tincture of catechu, 50 parts of tincture of cinchona, and 1 part of oil of cloves. [B, 270.]—**B. oleæ.** See OLIVE *gum.*—**B. ophthalmicum.** Fr., *baume ophthalmique.* It., *balsamo ottalmico.* Sp., *bálsamo oftálmico.* A name applied to various preparations designed for application to the eyes. The *Toluifera balsamum.* [B, 200.]—**B. tranquillans** [Fr. Cod.; Swiss Ph.], **B. tranquillum.** Fr., *baume tranquille* [Fr. Cod.], *huile narcotique, eléolé des solanées composé.* It., *balsamo tranquillo.* Sp., *bálsamo tranquilo.* Syn.: *oleum narcoticorum* (seu *bufonum*, seu *stramonii compositum*). A preparation made by heating 400 parts each of the leaves of belladonna, hyoscyamus, tobacco, poppy, *Solanum nigrum*, and stramonium in 1,000 parts of olive-oil, and, after decanting the green oil so produced, adding to it 1 part each of the oils of wormwood, hyssop, marjoram, peppermint, rosemary, rue, sage, and thyme [Fr. Cod.]. The Swiss Ph. directs the mixture of 250 grammes each of oleum belladonnæ and oleum hyoscyami coctum, 8 drops of oil of wormwood, and 16 drops each of the oils of lavender, rosemary, and thyme. Similar preparations have been official in various formularies, the place of the volatile oils being, however, usually supplied by the fresh or dried tops and the flowers of the corresponding plants. In the preparations of the Sard. Ph. of 1773 and the Sp. Ph. of 1798 (*oleum bufonum*), live toads were added to the mixture while it was being heated. [B, 95, 119.]—**B. traumaticum.** See *B. commendatoris* and AQUA *vulneraria spirituosa.*—**B. universale.** See *Linimentum* PLUMBI *subacetatis.*—**B. verum.** See *Mecca* BALSAM.—**B. viride** [Belg. Ph.]. Fr., *baume vert.* It., *balsamo verde.* Sp., *bálsamo verde.* 1. Bourbon tacamahac. 2. Green balsam; a preparation formerly made by mixing and boiling together to the consistence of an ointment ½ pint of linseed-oil, 2 oz. of elemi, and 2 drachms of verdigris. The preparation of the Belgian Ph. is made by melting a mixture of 20 parts of Venice turpentine, 60 of oil of laurel, and 365 each of linseed-oil and olive-oil, and adding 24 parts of verdigris, 16 of aloes, 12 of zinc sulphate, 8 of oil of cloves, and 30 of juniper-berries. The latter is an imitation of the old b. viride Metensium, or green balsam of Metz, or balsam of Feuillet, of which several closely allied formulæ exist. 3. A preparation of the Palat. Disp. of 1764, made by infusing 1 part each of lavender, sage, hyssop, marjoram, thyme, caraway, *Mentha aquatica*, *Mentha crispa*, plantain, rosemary, *Alchemilla vulgaris*, golden-rod, chamomile, and red rose in 48 parts each of olive-oil and oil of roses and 24 parts of linseed-oil, then adding 24 parts each of turpentine and sagapenum and 12 of olibanum, heating upon a water-bath, expressing, and adding 8 parts each of oil of lavender, oil of turpentine, and petroleum; formerly used as an excitant and depurative. [B, 95, 119, 200.]—**B. viride detersivum.** Green detersive balsam; a preparation made by melting together 1 lb. each of linseed-oil and oil of turpentine, 4 oz. each of elemi, oil of bay, and turpentine, and 1 oz. of verdigris; used externally as a detergent. [B, 200.]—**B. viride Metensium.** Fr., *baume de Metz* (ou *de Feuillet*, ou *vert*, ou *vert de Metz*), *huile verte, eléolé d'acétate de cuivre composé.* It., *balsamo di Metz* (o *verde di Metz*). Sp., *bálsamo de Metz.* Syn.: *oleum oxydi cupri viride.* See *B. viride* (2d def.).—**B. viride vulnerarium.** Green vulnerary balsam; an old preparation made by boiling together 1½ lb. of linseed-oil, 12 oz. of turpentine, and 6 handfuls of the leaves of adder's tongue (*Ophioglossum*), expressing, and heating the resulting oily liquid with 4 oz. of elemi, 2 oz. of oil of bay, 1 oz. of turpentine, and 2 drachms of verdigris (flos æris). [B, 200.]—**B. vitæ.** Fr., *baume de vie.* Ger., *Lebensbalsam.* It., *balsamo di vita.* Sp., *bálsamo*

de vida. Balsam of life; a name given to a number of balsamic preparations, especially those containing volatile oils. [B.]—**B. vitæ album.** Syn.: *spiritus balsamicus.* A preparation resembling the b. Fioravanti; made by distilling on a water-bath a mixture of 3 parts each of olibanum, myrrh, and galbanum, 1 part each of aloes-wood, cloves, cinnamon, nutmegs, galanga, zedoary, and ginger, 4 parts of bay-berries, 12 of Venice turpentine, and 144 of alcohol; used as a stomachic, diuretic, and nervine. [B, 97.]—**B. vitæ citrinum.** See *Sapo* TEREBINTHINÆ *liquidus.*—**B. vitæ externum.** Fr., *baume de vie externe de Plenk.* It., *balsamo di vita externo.* Sp., *bálsamo de vida esterno.* See SAPO *terebinthatus.*—**B. vitæ externum spirituosum.** See *Sapo* TEREBINTHINÆ *liquidus.*—**B. vitæ Hoffmanni.** Fr., *baume de vie de Hoffmann.* Ger., *Hoffmann'scher Lebensbalsam.* It., *balsamo di vita dell' Hoffmann.* Sp., *bálsamo de vida de Hoffmann.* See MIXTURA *oleoso-balsamica.*—**B. vitæ Rulandi.** See *B.* SULPHURIS *terebinthatum.*—**B. vulnerarium.** Fr., *baume vulnéraire.* Ger., *Wundbalsam.* It., *balsamo vulnerario.* Sp., *bálsamo vulnerario.* A name applied to a number of preparations. 1. A preparation closely allied to the b. Arcæi. See *Unguentum* ELEMI. 2. A name given to certain preparations resembling the b. commendatoris. See *Tinctura* BENZOINI *composita.* 3. A preparation of the Belg. Ph., made up of a mixture of 138 parts of larch turpentine, 552 of olive-oil, 276 of spiritus saponatus, and 34 of oil of rosemary. 4. Balsam of Peru. [B, 95, 119, 270.]—**B. vulnerarium Dippelii, B. vulnerarium minerale.** Fr., *baume de Dippel.* Syn.: *liquor vulnerarius mineralis.* A preparation made by digesting 3 parts of hæmatite, 6 of crude tartar (potassium bitartrate), and 18 of distilled vinegar, then distilling, and extracting the residue with 10 parts of alcohol. [Brunsw. Ph., 1777; Würt. Ph., 1796 (B, 119).]—**B. vulnerarium Stahlii.** Fr., *teinture* (ou *baume*, ou *essence*) *vulnéraire de Stahl.* Syn.: *liquor vulnerarius, essentia vulneraria Stahlii.* A mixture of 1 part of oil of turpentine, 2 parts of tincture of myrrh, and 4 parts of tincture of amber. [Fuld. Disp., 1791; Würt. Ph., 1796; Batav. Ph. (ed. Niem., 1811) (B, 119).]—**B. vulnerarium vegetabile.** See *Spiritus* MILLEFOLII *acetatus.*—**B. zaccum.** Ger., *Zacconöl.* An oily substance resembling sweet-almond oil, obtained by expression from the kernels of the fruit of a tree growing in Palestine. [B, 48.]—**Alcohol cum balsamo peruviano.** See *Tinctura balsami peruviani.*—**Emulsio de balsamo tolutano** [Fr. Cod.]. BAMBU, n. See BAMBOO.

BAMBUC, BAMBUK, n's. See BAMBOUC.—**B. butter.** Ger., *Bambucbutter.* Syn.: *Galam butter.* A pale-green substance, having an odor like that of cacao, obtained from the *Bassia Parkii* [De Candolle]. [B, 180.]

BAMBULIO (Lat.), n. m. Ba^{2}m(ba^{3}m)-bu^{2}(bu)'li^{2}-o. Gen., *bambulio'nis.* See BALBUS.

BAMBUS (Lat.), n. f. Ba^{2}m(ba^{3}m)'bu^{3}s(bu^{4}s). See BAMBUSA.—**B'rohr** (Ger.). The *Bambusa arundinacea.* [B, 180.]

BAMBUSA (Lat.), n. f. Ba^{2}m(ba^{3}m)-bu^{2}(bu)'sa^{3}. Fr., *bambousier, bambou.* Ger., *Bambos.* The bamboo; a genus of arborescent gramineous plants of the tribe *Bambuseæ*, subtribe *Eubambusiæ*, established by Schreber. [B, 121.]—**B. apous** [Perottet], **B. apus** [Römer and Schultes]. An East Indian species, the *bambu apus* of the Javanese. The Malays are said to eat the young shoots. [B, 173, 188.]—**B. arundinacea** [Willdenow], **B. arundinaria** [Retzius]. Fr., *bambou commun, roseau des Indes, canne bamboche.* Ger., *gemeiner Bambos.* Syn.: *Arundo bambos* [Linnæus], *Bambos arundinacea* [Retzius], *Nastus arundinaceus* [Smith]. The common bamboo: an East Indian species, which attains a height of upward of 60 feet and a diameter of from 4 to 6 inches at the base. It has a cylindrical, jointed, woody, glabrous, and shining stalk, which gives off at its nodes numerous branches clothed with short, grayish-green, acuminate leaves and sessile spikes of flowers in large panicles. The stalks of the female plant contain a peculiar substance (*tabaxir, tabasheer, bamboo milk, bamboo sugar*, etc.) which forms concretions in the nodes. It consists of silica with a small quantity of lime and vegetable matter. It is used as an antispasmodic and astringent, especially in hæmoptysis. A decoction of the leaves is used to purify the blood, as an anthelminthic, and to facilitate menstruation and the discharge of the lochia. The young shoots are used in the preparation of achar. The woody stalks are employed for many purposes in the arts. The root is given as a specific for eruptive affections. The grain is eaten in India. The plant is said to flower only once in fifteen years, and to die immediately afterward. [B, 172, 173, 180.]—**B. baccifera** [Kunth]. The *Beesha Rheedi.* [B, 172.] See MELOCANNA *bambusoides.*—**B. guadua** [Humboldt]. See GUADUA *angustifolia.*—**B. latifolia** [Humboldt and Bonpland]. See GUADUA *latifolia.*—**B. spinosa** [Roxburgh]. Syn.: *Arundarbor fera secunda* [Rumphius], *Arundo arbor* [Linnæus], *Arundo indica, arborea maxima, cortice spinoso, tabaxir fundens* [Burmaron]. A species growing

in the East Indies and in Cochin-China, with an erect spinose trunk; used like *B. arundinacea.* [B, 180, 188.]—**B. stricta** [Roxburgh].

THE BAMBUSA ARUNDINACEA. [A, 327.]

See DENDROCALAMUS *strictus.*—**B. tulda** [Roxburgh]. See DENDROCALAMUS *tulda.* [B, 172.]

BAMBUSACEÆ (Lat.), n. f. pl. Ba^{2}m(ba^{3}m)-bu^2(bu)-sa(sa^3)′-se^2(ke^2)-e(a^3-e^2). Fr., *bambusacées.* Ger., *Bambusaceen.* See BAMBUSEÆ.

BAMBUSACEOUS, adj. Ba^{2}m-bu^2-sa′shu^{3}s. Lat., *bambusaceus.* Fr., *bambusacé.* Resembling the *Bambusa*, or belonging to the *Bambusaceæ.* [B.]

BAMBUSÆ (Lat.), n. f. pl. Ba^{2}m(ba^{3}m)-bu^2(bu)′se(sa^3-e^2). See BAMBUSEÆ.—**B. veræ** [Ruprecht]. A section of the *Bambuseæ*, including the genera *Guadua*, *Nastus*, *Bambusa*, *Schizostachyum*, and *Melocanna.* [B, 170.]

BAMBUSEÆ (Lat.), n. f. pl. Ba^{2}m(ba^{3}m)-bu^2(bu)′se^2 e(a^3-e^2). Fr., *bambusées.* Ger., *Bambuseen.* Syn.: *Bambusaceæ* [Kunth, Link, Reichenbach, Miquel], *Bambusidæ* [Lindley]. Of Nees, Endlicher, and others, a tribe of gramineous plants, comprising *Bambusa* and other tall, shrubby or tree-like grasses, with flat leaves jointed to the sheath by a short petiole, spikelets of from one to many florets, usually with 3 lodiculæ and 3, 4, or more stamens. It is divided by Bentham and Hooker into the subtribes *Arundinarieæ*, *Eubambuseæ*, *Dendrocalameæ*, and *Melocanneæ.* [B, 42, 121, 170.]—**B. veræ.** Of Nees, a subdivision including *Bambusa* and three other genera. [B, 170.]

BAMBUSELLA (Lat.), n. f. Ba^{2}m(ba^{3}m)-bu^2(bu)-se^{2}l′la^3. Fr., *bambuselle.* A section of the genus *Panax.* [B, 170.]

BAMBUSIDÆ (Lat.), n. f. pl. Ba^{2}m(ba^{3}m)-bu^2(bu)′si^{2}d-e(a^3-e^2). Of Lindley, a subtribe of the *Festuceæ*, corresponding to the *Bambuseæ* (*q. v.*). [B, 170.]

BAMBUSINÆ (Lat.), n. f. pl. Ba^{2}m(ba^{3}m)-bu^2(bu)-si(se)′ne-(na^3-e^2). Of Agardh, a tribe of the *Gramineæ*, comprising the genera *Bambusa* and *Arundinaria.* [B, 170.]

BAMBUSOIDES (Lat.), adj. Ba^{2}m(ba^{3}m)-bu^2(bu)-so(so^2)-i(e)′-dez(das). From *Bambusa* (*q. v.*), and εἶδος, resemblance. Resembling the *Bambusa.* [B.] See MELOCANNA *b.*

BAMIA [Cæsalpinus] (Lat.), n. f. Ba^{2}m(ba^{3}m)′i^2-a^3. Written also *Bammia.* Fr., *bamie, bamier.* See HIBISCUS.—**B. americana** [Plukenet]. The *Hibiscus virginicus.* [B, 211.]—**B. moschata** [Daleschamp]. See HIBISCUS *abelmoschus.*—**B. Rivini** [Ruppius]. The *Trionum* (*Hibiscus trionum* [Linnæus]). [B, 211.]—**Semen bamiæ moschatæ.** The seeds of *Hibiscus abelmoschus.* [B, 180.]

BAMIAH (Ar.), n. See BAMIA.

BAMMA (Lat.), n. n. Ba^{2}m(ba^{3}m)′ma^3. Gen., *bam′matos* (*-tis*). Gr., βάμμα. See EMBAMMA.

BAMMIA (Lat.), n. f. Ba^{2}m(ba^{3}m)′mi^2-a^3. See BAMIA.

BAN, n. 1. A common name in Troyes for the double *Lychnis silvestris.* 2. The calaf of the Egyptians (*Salix ægyptiaca*). 3. The *Coffea arabica.* [B, 121, 211.]

BAN (Hind.), n. The *Moringa pterygosperma.* [B, 172.]

BANÁDÁ (Beng.), n. The *Zingiber cassumunar.* [B, 181.]

BANANA, n. Ba^{3}n-a^3′na^3. Fr., *banane* (the fruit), *bananier* (the plant). Ger., *Banane* (the fruit), *Bananasfeige* (the plant). It., *fico d'Amado.* Sp., *banana, banano, bananas.* The *Musa sapientium*, also its fruit. [A, 385; B.]—**B. brandy.** A liquid distilled from b's. ["Proc. of the Am. Pharm. Assoc.," xxvii, p. 145 (B).]—**B. essence.** An alcoholic solution of amyl acetate and butyric ether. [A, 308.]—**B. flour.** The b. fruit dried and powdered; said to contain 66 per cent. of b. starch. ["Proc. of the Am. Pharm. Assoc.," xxvii, p. 145 (B).]—**B'sfeige** (Ger.). See MUSA *sapientium.*—**B. starch.** Ger., *Bananenstärke.* The starch of the b. fruit (fruit of *Musa paradisiaca*). It is frequently of a reddish color, and the separate granules are from 20 to 40 in. in diameter, flattened, ovate, clavate, or sausage-shaped, provided with markedly excentric nucleus, and marked with fine but distinct, cuneiform striæ. [B, 270.]

BANANE (Fr., Ger.), n. Ba^{3}n-a^{3}n, -a^{3}n′e^2. See BANANA.—**B'n** (Ger.), **B'ngewächse** (Ger.). See MUSACEÆ.—**B'nstärke** (Ger.). See BANANA *starch.*

BANANEÆ (Lat.), n. f. pl. Ba^{2}n(ba^{3}n)-a^{2}n(a^{3}n)′e^2-e(a^3-e^2). Of Reichenbach, a family of the *Palmaceæ*, including the divisions *Scitamineæ*, *Canneæ*, and *Museæ.* [B, 170.]

BANANIER (Fr.), n. Ba^{3}n-a^{3}n-i^2-a. The genus *Musa*; in the pl., *b's*, the *Musæ* (*Musaceæ*). [B, 173.]—**B. à grand fruit.** The *Musa paradisiaca.* [B, 173.]—**B. à grappe droite.** The *Musa troglodytarum.* [B, 173.]—**B. à gros fruit.** The *Musa paradisiaca.* [B, 46.]—**B. à petit fruit.** The *Musa sapientium.* [B, 173.]—**B. commun.** The *Musa paradisiaca.* [A, 385.]—**B. ensete.** The *Musa ensete.* [B, 173.]—**B. figuier.** The *Musa sapientium.* [A, 385.]—**B. marron.** The *Heliconia caribæa.* [B, 173.]—**B. petit.** The *Musa rosacea.* [B, 173.]—**B. textile.** The *Musa textilis.* [B, 173.]—**B. violet.** The *Musa paradisiaca*, var. *violacea.* [B, 173.]

BANANIERA (Lat.), n. f. Ba^{2}n(ba^{3}n)-a^{2}n(a^{3}n)-i^2-e(a)′ra^3. See MUSA *paradisiaca.*

BANANIVORUS (Lat.), adj. Ba^{2}n(ba^{3}n)-a^{2}n(a^{3}n)-i^2(i^2)′vo(wo^2)-ru^{3}s(ru^{4}s). From *banana* (*q. v.*), and *vorare*, to devour. Fr., *bananivore.* Subsisting on bananas. [L, 41.]

BANAPU, n. A substance obtained from the *Terminalia tomentosa.* ["Proc. of the Am. Pharm. Assoc.," xxiv, p. 718 (B).]

BANAUSIA (Lat.), n. f. Ba^{2}n(ba^{3}n)-a^{4}s′(a^3′u^{4}s)-i^2-a^3. Gr., βαναυσία. Ger., *Marktschreierei.* Lit., mechanical as opposed to intellectual work; the practice of medicine as a trade rather than as an art; quackery. [Hippocrates (A, 322, 325).]

BANAUSICUS, BANAUSUS (Lat.), adj's. Ba^{2}n(ba^{3}n)-a^{4}s′-(a^3′u^{4}s)-i^{2}k-u^{3}s(u^{4}s), -u^{3}s(u^{4}s). Gr., βαναυσικός, βάναυσος. Pertaining to or characterized by banausia (*q. v.*); as n's, a person so characterized. [A, 311, 322.]

BANC (Fr.), n. Ba^{3}n^2. A bank or bench; in zoology, a school (of fish). [L, 180.]—**B. d'Hippocrate.** See BATHRON.

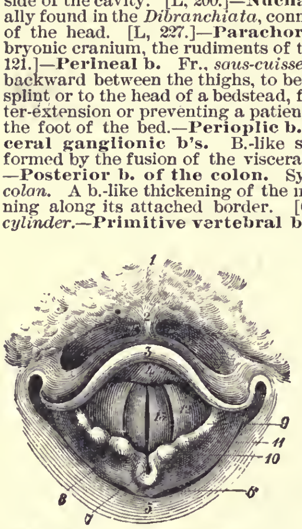
BANCA, n. A palm of the Philippine Islands, resembling the date-tree. [L, 41.]

BANCAL (Fr.), adj. Ba^{3}n^2-ka^{3}l. Deformed in the legs; as a n., a person so deformed. [A, 300, 385.]

BANCALUS (Malay), n. The genus *Nauclea.* [Bory (B, 121).]

BANCKSIA (Lat.), n. f. Ba^{2}n^{2}ks′i^2-a^3. See BANKSIA.

BANCOC, n. A Madagascar name for the *Indigofera argentata.* [B, 121.]



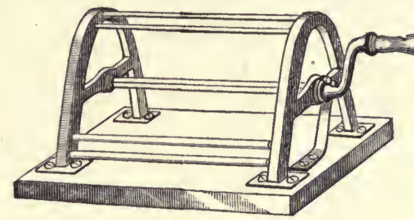
BANCOUL, n. Fr., *bancoul.* Ger., *Bankul.* The *Aleurites triloba* or the *Aleurites moluccana*, also the fruit of either plant. [B, 46, 88.]—**B. nut.** Fr., *noix de b.* Ger., *Bankulnuss.* The fruit of the plants mentioned above. [B.]—**B. oil.** Ger., *Bankulöl.* The oil derived from the *Aleurites* (*q. v.*). [B.]

BANCOULIER (Fr.), n. Ba^{3}n^2-kul-i^2-a. The *Aleurites moluccana.* [B, 93.]

BANCROCHE (Fr.), adj. Ba^{3}n^2-krosh. See BANCAL.

BAND, n. Ba^{2}nd. A.-S., *banda* (from *bindan*, to bind). Gr., ὀθόνιον, ὀθόνειον. Lat., *fascia.* Fr., *bande, bandeau.* Ger., *Band.* It., *banda.* Sp., *faja.* 1. A strip or stripe. 2. A cord-like structure. 3. In botany, see VITTA. 4. In odontology, see CINGULUM.—**Absorption b.** See *Absorption* SPECTRUM.—**Amniotic b's.** Fr., *brides amniotiques* (ou *de Simonart*). Ger., *amniotische* (oder *Simonart'sche*) *Bänder* (oder *Faden*). B's of false membrane sometimes formed on the inner surface of the amnion and extending to or encircling certain portions of the fœtus. By their contraction they may give rise to various malformations of the fœtus. [Simonart (A, 20).] Cf. *Fœto-amniotic b's.*—**Ano-genital b.** A transverse b. of integument which completes the division of the cloaca in the embryo; the rudiment of the perinæum. [L, 142.]—**Anterior b. of the colon.** See *Anterior* LIGAMENT *of the colon.*—**Arctuous b's.** Fibres which connect the layers of the corium in fishes. [Clark (L, 14).]—**Axis b.** The primitive streak of von Baer. [L, 146.]—**B.-axis.** See AXIS-*cylinder.*—**B. of Reil.** Syn.: *lateral triangular fasciculus.* A well-defined triangular space on the lateral face of the crus cerebri, below the testes. [L, 13.]—**Ciliated b's.** Certain ridges, covered with cilia, found in some of the *Chætopoda* and *Echinodermata.* [L, 201.]—**Constricting b.** The intersegmental or intercellular substance at the nodes of Ranvier (*q. v.*, under NODE). [J, 30.]—**Contractile b.** A modification of the protoplasm in the stalk of certain *Infusoria*, by the contraction of which the length of the stalk is lessened. Similar structures are seen in some of the *Ciliata* and *Gregarinidæ.* [L, 210.]—**Coronary frog-b.** See PERIOPLE.—**Covered b. of Reil.** See ISLAND *of Reil.*—**Dentate b.** See FASCIA *dentata.*—**Epithelial b.** In embryology, a b. composed at first of a central layer of polygonal cells covered by a layer of columnar epithelium, extending the whole length of the jaws, from which the teeth are formed. [L, 171.]—**False vocal b's.** See *Superior vocal b's.*—**Flattened b.** See AXIS-*cylinder.*—**Fœto-amniotic b's.** Ger., *fötal-amniotische* (oder *ovo-amniotische*) *Bänder* (oder *Stränge*). Amniotic b's (*q. v.*) extending to or around certain parts of the fœtus and tending to produce deformities or intra-uterine amputation.—**Frontal b.** See *Head-b.* and *Kramer's frontal b.*—**Furrowed b.** A small b. or ridge of gray matter connecting the uvula of the cerebellum with the amygdalæ; not seen until the latter are drawn aside. [I, 15; K.]—**Gastro-parietal b's** [Huxley]. 1. Delicate membranous b's, usually three in number, extending from the stomach to the

parietes of the circumvisceral chamber in the *Brachiopoda*. [A. Hancock, "Phil. Trans.," cxlviii (L).] 2. In the *Polyzoa*, see Funiculus.—**Gleno-humeral b.** See *Gleno-humeral* ligament.—**Head-b.** Fr., *bandeau frontal*. Ger., *Stirnband*. 1. A circular bandage passing horizontally around the head. 2. A b. or strap adapted for fastening to the head for the purpose of carrying a reflector or some other appliance of the sort. Cf. *Kramer's frontal b.*—**Hippocampal b.** See Tænia *hippocampi*.—**Ileo-parietal b's.** In the *Brachiopoda*, b's passing from the stomach outward and upward to a little below the junction of the pallial lobes. [Huxley, "Phil. Trans.," 1854; Hancock, "Phil. Trans.," 1858 (L).]—**Iliotibial b.** A thickening of the fascia lata running down the outer side of the thigh from the crest of the ilium to the outer tuberosity of the tibia and the head of the fibula. [L, 142.]—**Inferior vocal b's.** Lat., *ligamenta vocalia vera, plicæ thyreo-arytænoideæ inferiores, chordæ vocales veræ*. Fr., *cordes vocales inférieures* (ou *vraies*). Ger., *untere* (oder *wahre*) *Stimmritzenbänder*. It., *corde vocali inferiori*. Sp., *cuerdas vocales inferiores*. Syn.: *true vocal b's* (or *cords*). Two antero-posterior folds on the internal surface of the larynx, at the lower extremity of the glottis, one on each side, which, by their varying degree of approximation and tension, govern the pitch of the voice. See figure under *Vocal b's*.—**Inner b. of the colon.** A thick b. formed by the muscular coat extending along the inner aspect of the ascending and descending colon and the lower aspect of the transverse colon. [C.]—**Kramer's frontal b.** A head-b. for the purpose of holding a Eustachian catheter in place, and leaving both the surgeon's hands free. It is furnished with a small pad to rest on the forehead, to which a screw-forceps is attached by means of a ball-and-socket joint. [F, 38.]—**Mesoblastic b.** A row of mesoblastic cells extending the whole length of the embryo. [L, 201.]—**Moderator b's.** The columnæ carneæ of the ventricles of the heart in mammals, extending from the inner to the outer side of the cavity. [L, 200.]—**Nuchal b.** A broad muscular b. usually found in the *Dibranchiata*, connecting the mantle with the back of the head. [L, 227.]—**Parachordal b's.** Flat b's in the embryonic cranium, the rudiments of the parachordal cartilages. [L, 121.]—**Perineal b.** Fr., *sous-cuisse*. A b. extending from before backward between the thighs, to be fastened to the upper end of a splint or to the head of a bedstead, for the purpose of making counter-extension or preventing a patient from slipping too far toward the foot of the bed.—**Perioplic b.** See Periople.—**Pleuro-visceral ganglionic b's.** B.-like structures in certain molluscs, formed by the fusion of the visceral and pleural ganglia. [L, 121.]—**Posterior b. of the colon.** Syn.: *posterior ligament of the colon*. A b.-like thickening of the muscular coat of the colon running along its attached border. [C.]—**Primitive b.** See Axis-*cylinder*.—**Primitive vertebral b.** See *Protovertebral* plate.—**Remak's b.** See Axis-*cylinder*.—**Simonart's b's.** See *Amniotic b's*.—**Sternal b.** A longitudinal thickening of the blastoderm which, in some insects, gives rise to the sternum. [L, 11.]—**Striated hyaline b.** See *Cuticular* layer.—**Superior vocal b's.** Lat., *plicæ thyreo-arytænoideæ superiores, ligamenta vocalia superiora* (seu *ventriculi laryngis*), *chordæ vocales spuriæ*. Fr., *cordes vocales supérieures* (ou *fausses*). Ger., *obere* (oder *falsche*) *Stimmritzenbänder*. It., *corde vocali superiori*. Sp., *cuerdas vocales superiores*. Syn.: *false vocal b's* (or *cords*). Two lateral folds within the larynx, at the upper extremity of the glottis, one on each side.—**Supra-orbital b's.** The thickenings above and to the outer side of the eyes in the embryo. [L, 202.]—**True vocal b's.** See *Inferior vocal b's*.—**Ventricular b's of the larynx.** See *Superior vocal b's*.—**Vocal b's.** Lat., *chordæ vocales*. Fr., *cordes vocales*. Ger., *Stimmritzenbänder*. It., *corde vocali*. Sp., *cuerdas vocales*. See *Inferior vocal b's* and *Superior vocal b's*.



THE VOCAL BANDS. (FROM FLINT, AFTER LE BON.)

1, 2, the base of the tongue; 3, 4, the epiglottis; 5, 6, the pharynx; 7, the arytenoid cartilages; 8, the opening between the inferior vocal bands during the emission of a high-pitched sound; 9, the aryteno-epiglottidean folds; 10, the cartilage of Santorini; 11, the cuneiform cartilage; 12, the right superior vocal band · 13, the right inferior vocal band.

BAND (Ger.), n. Ba³nd. 1. See Band (Eng.). 2. A bandage, dressing, or truss. 3. A ligament. 4. See Tænia *hippocampi*.—**Accidentelle Bänder.** Adventitious bands. See *Amniotic* bands, under Band (Eng.).—**Aeusseres Leistenb'.** See *Poupart's* ligament.—**Akustische Bänder.** See Striæ *acusticæ*.—**Amniotische Bänder.** See *Amniotic* bands.—**Aufhängeb'.** A suspensory ligament. [L, 115.]—**Aufhebungsb'.** A suspensory ligament. [L, 46.]—**Augenliderbänder.** See *Papebral* ligaments.—**Ausfüllungsb'.** An obturator ligament. [L.]—**B'ähnlich.** Band-like, ligamentous. [A, 301.]—**B'apparat.** A ligamentous mechanism. [L, 31.]—**B'beinfügung.** See Syndesmosis.—**B'biene.** The Egyptian honey-bee (*Apis fasciata*). [A, 315.]—**B'blüthe.** The botanical genus *Ligula*. [A, 315.]—**B'blume.** The striped pink (*Dianthus caryophyllus*). [A, 315.]—**B'brille.** Spectacles, eye-glasses. [A, 309.]—**B. des Augensterns.** The ciliary ligament. [L, 43.]—**B. des Eichels.** The frænum of the penis. [L, 43.]—**Bänderbeschreibung.** See Syndesmology.—**Bänder des Gehirns.** The commissures of the brain. [A, 355.]—**Bänderhaut.** See Peridesmium.—**Bänderlehre.** See Syndesmology.—**B'fäsen.** The botanical genus *Diatoma*. [A, 315.]—**B'fische.** See Tænioidei. — **B'förmig.** See Ligulatus and Tæniæformis.—**B'gras.** The *Phalaris arundinacea picta*. [A, 305.]—**B'haft.** See Syndesmosis.—**B'keratitis.** See under Keratitis.—**B'kern.** See Claustrum.—**B'klöder.** A species of *Laminaria*. [A, 315.]—**B'laus.** The *Pediculus fasciatus*. [A, 315.]—**B'rose.** The damask rose (*Rosa gallica*). [A, 315.]—**B'scheibe.** An interarticular cartilage. [L, 31.]—**B'spinne.** The striped spider (*Aranea fasciata*). [A, 315.]—**B'strauch.** A creeping plant. [A, 315.]—**B'streifig.** In botany and zoology, having stripes in the form of bands. [L, 46.]—**B'verbindung.** See Synneurosis.—**B'verlängerung.** Relaxation of a ligament. [E.]—**B'weide.** The *Salix viminalis*. [L, 80.]—**B'wesen.** See Synneurosis.—**B'weide.** The *Salix viminalis*. [L, 80.]—**B'wurm.** See the major list. — **B'würmer.** See Tæniada. — **B'wurmmittel.** A remedy against tape-worm. [A, 317.]—**Befestigungsb'.** A term applied to various structures that serve to retain parts in position (*e. g.*, the so-called ligaments of the liver). [L, 115.]—**Blasenb'.** See Urachus.—**Bogenförmiges B.** An arched ligament. [A, 355.] — **Bogenförmiges B. an der Schambeinfuge** (oder **des Schambeins**). See *Inferior pubic* ligament.—**Breite Mutterbänder.** The broad ligaments of the uterus. [L, 115.]—**Breites Ausfüllungsb'.** See *Vorderes Ausfüllungsb'*.—**Bruchb'.** See Truss.—**Ciliarb'.** See *Ciliary* ligament.—**Dreieckiges B.** A triangular ligament.—**Dreieckiges B. am Kehlkopf.** The crico-arytenoid ligament. [L, 115.]—**Dreieckiges B. des Fersenbeins.** See *Internal lateral* ligament *of the ankle joint*.—**Dünndarm-Nieren-B.** See *Duodeno-renal* ligament.—**Eigenes vorderes B. des Schulterblatts.** See Ligamentum *scapulæ anterius proprium*.—**Fallopisches B.** See *Poupart's* ligament.—**Falsche Stimmbänder** (oder **Stimmritzenbänder**). See *Superior vocal* bands, under Band (Eng.). — **Festes knorpelartiges B.** See Ligamentum *neurochondrodes*. — **Flügelförmige Bänder des Kniees.** See *Alar* ligament *of the knee joint*.—**Flügelb' des Zahnes.** The lateral odontoid ligament. [L, 11.]—**Fötale Bänder.** See *Fœto-amniotic* bands, under Band (Eng.).—**Gelbe Bänder.** See Ligamenta *subflava*.—**Gelenkb'.** An articular ligament. [L, 30.]—**Gerades Ausfüllungsb'.** The superficial portion of the anterior occipito-atloid ligament. [L, 30.]—**Gespanntes B., Gestrecktes B., Gezogenes B.** See Tendon.—**Grosses unteres Beckenkreuzbeinb'** (oder **Knorrenkreuzbeinb'**). The greater sacroischiadic ligament. [L, 115.]—**Haftb'.** An accessory ligament. [L, 31.]—**Halbkreisförmiges B.** See Tænia *semicircularis*.—**Hemmungsb'.** See *Check*-ligament.—**Hilfsb'.** See *Accessory* ligament. — **Hinteres breites Ausfüllungsb'.** See *Posterior occipito-atloid* ligament. — **Hinteres Längsb'.** The posterior common spinal ligament. [L, 115.]—**Hinteres Rippenkopfb'.** See *Posterior costo-transverse* ligament.—**Hülfsb'.** See *Accessory* ligament. — **Inneres Knöchelb'.** See *Internal lateral* ligament *of the ankle*. — **Inneres Rippenhalsb'.** See *Superior costo-transverse* ligament. — **Kapselb'.** See *Capsular* ligament.—**Kegelförmiges B., Kegelförmiges Ringschildknorpelb'.** See *Middle crico-thyreoid* ligament.—**Kleines unteres Beckenkreuzbeinb'** (oder **Stachelkreuzbeinb'**). See *Lesser sacroischiadic* ligament.—**Kniekehlenb'.** See *Posterior* ligament *of the knee joint*.—**Knochenb'.** An osseous ligament. [L, 30.]—**Kramer'sches Stirnb'.** See *Kramer's frontal* band, under Band (Eng.).—**Kranzb' der Leber.** The coronary ligament of the liver. [L, 115.]—**Kreuzförmiges B.** A crucial ligament. [L, 80.] — **Kreuzhüftbeinbänder.** The sacro-iliac ligaments. [L, 117.] — **Kreuzsitzbeinbänder.** The sacro-ischiadic ligaments. [L.]—**Kronenb' der Leber.** The coronary ligament of the liver. [L, 115.]—**Längsb'.** A longitudinal ligament. [L, 115.] — **Lebensb'.** See Biodesmus. — **Leberdickdarmb'.** See *Hepatico-colic* ligament.—**Leberdünndarmb'.** See *Hepatico-duodenal* ligament.—**Leistenb' der Urniere.** Kölliker's term for a fold of the peritonæum constituting the rudiment of the gubernaculum testis. [A, 8; L, 115.] — **Leistenb' des Wolff'schen Körpers, Leitb' des Hodens.** See Gubernaculum *testis*. — **Lidknorpelb'.** See *Tarsal* ligament. — **Lungenbänder.** The pulmonary ligaments. [L, 30.]—**Magendickdarmb'.** See *Greater* omentum. — **Magenleberb'.** See *Gastro-hepatic* ligament. — **Magenmilzb'.** See *Gastro-splenic* ligament. — **Mauchart'sches Flügelb'.** See *Lateral odontoid* ligament.—**Mittleres Ausfüllungsb'.** See *Gerades Ausfüllungsb'*.—**Mittleres Ringschildknorpelb'.** See *Middle crico-thyreoid* ligament.—**Mittleres Rippenhalsb'.** See *Middle costo-transverse* ligament.—**Oberes Lendendarmbeinb'.** See *Superior ilio-lumbar* ligament.—**Oberes Schildknorpelgiesskannenknorpelb'.** See *Superior thyreo-arytenoid* ligament.—**Ovo-amniotische Bänder.** See *Fœto-amniotic* bands, under Band (Eng.).—**Querb'.** A transverse ligament. [L, 31.]—**Querb' der Pfanne.** See *Cotyloid* ligament.—**Ringb', Ringförmiges B.** An annular ligament. [L, 80, 117.]—**Ringknorpelgiesskannenknorpelb'.** See *Crico-arytenoid* ligament. — **Ringknorpelluftröhrenb'.** See Ligamentum *crico-tracheale*.—**Ringschildknorpelbänder.** The crico-thyreoid ligaments. [L, 115.]—**Rundes B.** A round ligament, also an annular ligament.—**Rundes B. der Ellenbogenröhre.** The orbicular ligament of the radius. [L, 80.]—**Rundes B. des Schenkelbeinkopfs.** See Ligamentum *teres*.—**Rundes B. des Schultergelenks.** See *Glenoid* ligament.—**Rundes B. der Speiche.** The orbicular ligament of the radius. [L, 80.]—**Rundes Leberb'.** See *Round* ligament *of the liver*. — **Runde Mutterbänder.** See *Round* ligament *of the uterus*.—**Rundliches B. des Schenkelbeinkopfs.** See Ligamentum *teres*.—**Schiffwürfelbeinbänder.** See *Naviculo-cuboid* ligaments.—**Schildknorpelkehldeckelb'.** See *Thyreo-epiglottic* ligament. — **Schleimb', Schleimiges B.** See Ligamentum *mucosum*.—**Schlossb'.** The ligament uniting the shells in the *Lamellibranchiata*. [L, 228.]—**Schräges B.** See *Round* ligament *of the forearm*.—**Seitenb', Seitliches B.** A lateral ligament. [L, 115.]—**Seitliches Ringschildknorpelb'.** See *Lateral crico-thyreoid* ligament.—**Sichelförmiges B.** A falciform ligament. [A, 355.]—**Simonart'sche Bänder.** See *Amniotic* bands, under Band (Eng.).—**Sohlenbänder.** The plantar ligaments. [L, 40.]—**Spitzenb'.** See *Supraspinous* ligament.—**Stachelkreuzbeinb'.** See *Sacro-vertebral* ligament.—**Stimmbänder, Stimmritzenbänder.** See *Vocal* bands, under Band (Eng.).—**Strahl-**

enb'. See *Ciliary* LIGAMENT.—**Synovial-B.** See LIGAMENTUM *mucosum.*—**Taschenbänder.** See *Ventricular* BANDS *of the larynx,* under BAND (Eng.).—**Unteres Lendendarmbeinb'.** See *Inferior ilio-lumbar* LIGAMENT.—**Unteres Rippenhalsb'.** See *Posterior costo-transverse* LIGAMENT.—**Unteres Schildknorpelgiesskannenknorpelb'.** See *Inferior thyreo-arytenoid* LIGAMENT.—**Uterusaufhängebänder.** The suspensory ligaments of the uterus. [L.]—**Verschliessendes B.** An obturator ligament. [L, 80.]—**Verstärkungsb'.** An accessory ligament. [α, 13.]—**Viereckiges B. des Schulterblatts.** See *Coraco-acromial* LIGAMENT.—**Volarb'.** See *Anterior* LIGAMENT *of the wrist joint.*—**Vorderes Ausfüllungsb'.** The deep portion of the anterior occipito-atloid ligament. [L, 142.]—**Vorderes gemeinsames Wirbelb', Vorderes Längsb'.** The anterior common ligament of the spinal column. [L, 31, 115.]—**Vorderes Rippenkopfb'.** See *Anterior costo-central* LIGAMENT.—**Wahre Stimmbänder, Wahre Stimmritzenbänder.** See *Inferior vocal* BANDS, under BAND (Eng.).—**Wirbelbänder.** The ligaments of the vertebral column. [L, 31.]—**Zangenb'.** See *Binz's* FILLET.—**Zungenbeinkehldeckelb'.** See *Hyo-epiglottic* LIGAMENT.—**Zwerchfellb' der Urniere.** Kölliker's term for a fold of the peritonæum, in the embryo, extending from the diaphragm to the Wolffian body. [L, 115.]—**Zwerchfelldickdarmb'.** See *Phrenico-colic* LIGAMENT.—**Zwerchfellmagenb'.** See *Phrenico-gastric* LIGAMENT.—**Zwischenbogenbänder.** See LIGAMENTA *subflava.*—**Zwischendornbänder.** See *Interspinous* LIGAMENTS.—**Zwischenknochenb'.** An interosseous ligament. [L, 30.]—**Zwischenquerbänder.** The intertransverse ligaments of the vertebral column. [L, 115.]—**Zwischenrippenbänder.** The intercostal ligaments. [L, 115.]—**Zwischenschlüsselbeinb'.** The interclavicular ligament. [L, 117.]—**Zwischenwirbelbänder.** The intervertebral fibro-cartilages. [L, 31.]

BANDAGE, n. Ba²nd'aj. Gr., *σπάργανον, δεσμός.* Lat., *fascia.* Fr., *bandage.* Ger., *Binde, Verband.* It., *fasciatura.* Sp., *renda.* An appliance consisting wholly or in great part of muslin, linen, flannel, or other analogous fabric, employed for restraining, suspending, supporting, or compressing a part, or for retaining other applications in position.—**American spiral b.** See *Foot-b.*—**Annular b.** See *Circular b.*—**Anterior figure-of-eight b.** A figure-of-eight b. in which the turns cross each other on the anterior aspect of the body or of a limb. [L, 213.]—**Anterior spica-b.** Lat., *spica anterior.* A spica-b. in which the turns cross each other on the front of the body or of a limb. [L, 214.]—**Apron-b.** Ger., *Schürzenverband.* A folded piece of cloth applied to the front of the chest, and held in place by strips passing over the shoulders, crossing behind, and brought forward at the sides to be pinned to the piece of cloth at its lower corners. [A, 455, 456.]—**Ascending spica-b.** A spica-b. in which the intersections of the turns succeed each other from below upward. [L, 213.]—**Ascending spiral b.** Lat., *dolabra ascendens.* Fr., *b. en doloire ascendant.* Ger., *aufsteigende Hobelbinde.* A spiral b. applied from below upward. See *Suspensory b.*—**B. triangulaire** (Fr.). See *Triangular b.*—**B. unissant** (Fr.). See *Uniting b.*—**B. vaginiforme** (Fr.). See *Invaginated b.*—**B.-winder.** A machine for rolling b's. [L.]—**B. xiastre** (Fr.). See *Figure-of-eight b.*—**Barton's b.** A b. for fracture of the inferior maxilla. The tail of a roller-b. is placed behind the left ear; the b. is then carried around the side of the head over the right parietal bone, crossed to the right over the neighborhood of the fronto-parietal suture, carried down beneath the chin, crossed on the forehead, carried around the left parietal bone, and brought to the place of beginning. [A, 457.]—**Baynton's b.** A compressive b. for atonic ulcers of the leg, consisting of systematic strapping with adhesive plaster from below upward, each strip partly overlying the one below it. [A, 458.]—**Belly-b.** A body-b. for application to the abdomen. A special form was formerly much used for making continuous pressure on the abdomen during the operation of tapping for ascites. It was made of stout flannel, 2 feet wide at the middle, where it formed a continuous sheet for 18 inches of its length, with a hole at the centre, through which the tapping was performed; beyond this portion, each end was torn into three tails, each 6 inches wide and 3 feet long, to be drawn upon by an assistant in such a manner as to compress the abdomen equably as the liquid was withdrawn. [L, 212.]—**Body-b.** Fr., *b. de corps.* Ger., *Leibbinde.* It., *fasciatura da corpo.* 1. A simple band encircling the whole trunk or any part of it. 2. A folded napkin or other

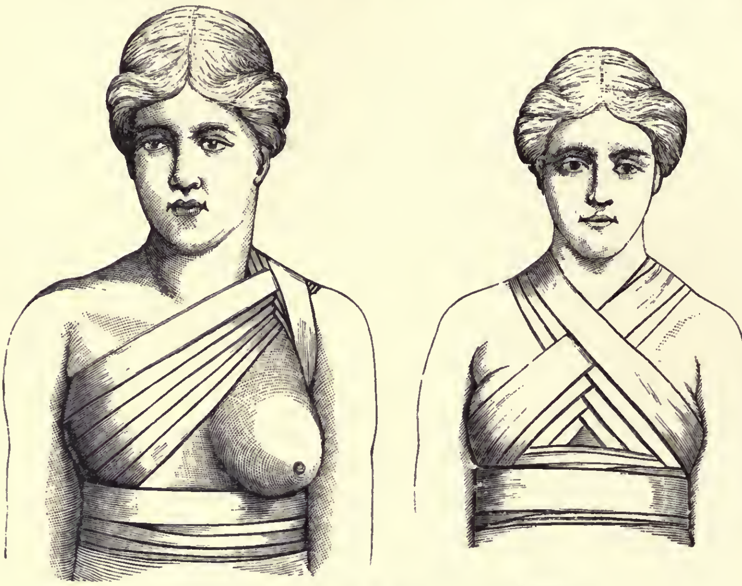
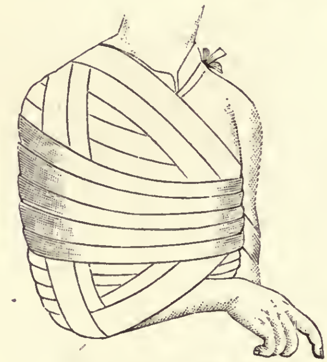
BARTON'S BANDAGE. [A, 457.]



A BODY-BANDAGE. [A, 278.]

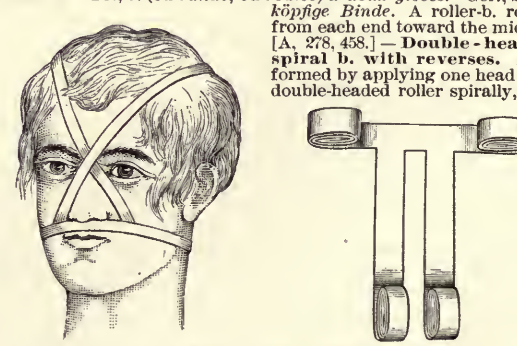
BOYER'S BANDAGE. [A, 458.]

soft fabric fastened around the chest and supported by strips (scapularies) passing over the shoulders; used for retaining dressings upon the trunk or as a means of attachment for other b's. [A, 278, 458; E.]—**Boyer's b.** An apparatus for the treatment of fracture of the clavicle, consisting of an axillary pad, a body-belt, and an arm-belt, the two latter being connected by means of straps and buckles. [A, 296, 458.]—**Breast-b.** Lat., *suspensorium mammæ.* Ger., *Tragebinde der Brust.* A b. for supporting one or both breasts. As applied to one breast, a sort of spica-b. of the opposite shoulder



THE BREAST-BANDAGE. (FROM WYETH, AFTER FISCHER.)

is made with a roller-b., with or without one or more preliminary turns around the body beneath the breasts; for both breasts, the turns run around the body, beneath the right breast and over the left shoulder, around the body again, and then beneath the left breast and over the right shoulder. [A, 319.]—**Capeline b.** Lat., *capelina, capellina, reflex capitis, mitra Hippocratis.* Fr., *b. capeline, bonnet d'Hippocrate.* Ger., *Kopfmütze des Hippocrates.* A b. employed by the ancients for compressing the head; now used only to retain dressings. The centre of a double-headed roller-b. is applied to the occiput, and both heads of the roller are carried around the head in opposite directions, the turns crossing each other before and behind, until a sufficient hold has been taken; then, with every turn, one of the heads is carried higher and higher, the other being all the time carried around horizontally as at first, until the whole top of the head is covered with an imbricated layer. [A, 319, 458.]—**Capistrum b.** See *Halter-b.*—**Chalk b., Chalk-and-gum b.** An immovable b. for the stiffening of which a mixture of equal parts of gum arabic and chalk is used, with enough boiling water to secure the proper consistence. [L, 211.]—**Chest-b.** Lat., *stella dorsi* (seu *pectoris*). Ger., *Sternbinde des Rückens* (oder *der Brust*). An anterior or posterior figure-of-eight b. for the chest. [A, 319.]—**Chin-sling b.** See *Four-tailed b. for the chin.*—**Circular b.** Lat., *fascia circularis.* Fr., *bandage circulaire.* Ger., *Kreisbinde.* It., *fasciatura circolare.* A b. consisting of one or more simple turns around a part, each covering the preceding. [L, 213.]—**Closed spiral b.** Lat., *dolabra ascendens.* Fr., *b. en doloires.* Ger., *Hobelbinde.* A spiral b. which advances gradually, so that the turns partly overlap each other.—**Complete double T-b.** A double T-b. in which the vertical strip is split as far as its junction with the horizontal strip. [L, 212.]—**Compound b.** Fr., *b. composé.* Ger., *zusammengesetzte Binde.* A b. composed of several parts joined together (*e. g.*, a T-b.). [L, 41.]—**Compressing b., Compressive b., Compressor b.** Lat., *fascia compressiva.* Fr., *b. compressif.* Ger., *Druckverband.* It., *fasciatura compressiva.* Any b. firmly applied so as to exert compression, but especially one covering a pad so situated as to press upon a particular part. [A, 458; L, 220.]—**Containing b.** See *Retentive b.*—**Continuous b.** See *Spiral b.*—**Cord-b.** The cravat-b. twisted. [L, 213.]—**Cravat-b.** A form of the handkerchief-b. made by folding a handkerchief diagonally into the form of a triangle, and then folding it further from the apex to the base. [L, 213.]—**Creeping spiral b.** See *Open spiral b.*—**Croft's b.** A form of plaster-of-Paris b. in which strips of flannel



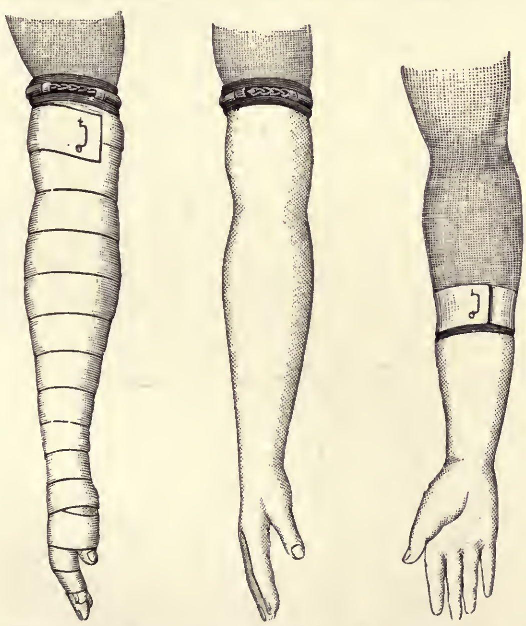
THE CAPELINE BANDAGE. [A, 319.]

cut to fit the sides of a limb are used. [L, 295.]—**Crossed b.** Fr., *b. croisé.* Ger., *Kreuzbinde.* Properly, a double-headed roller-b. so applied that the two portions cross each other on opposite sides of the part; sometimes used to denote a spica- or a figure-of-eight b. [A, 392, 458.]—**Crucial b.** See *T-b.*—**Desault's b.** An apparatus for fracture of the clavicle, consisting of a wedge-shaped axillary pad, two single-headed rollers, and a few compresses. The pad having been placed in the axilla, base uppermost, and the forearm flexed, an assistant holds the elbow forward, upward, and inward. Two strips attached to the pad are tied over the opposite shoulder. The tail of one of the rollers is placed under the axilla of the sound side, and two turns are made around the body, including the upper arm of the injured side; with the remainder of the roller, descending spiral turns are made, tighter and tighter as the elbow is approached; when the latter has been entirely surrounded, the end of the roller is secured with a pin. The compresses are now applied over the seat of fracture, and the tail of the second roller is pinned or stitched to the turns of the

DESAULT'S BANDAGE. [A, 458.]

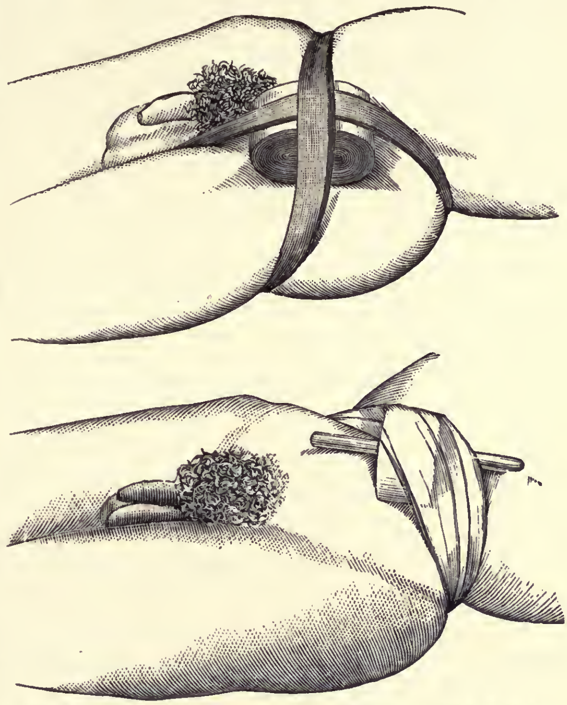
first one under the axilla of the sound side; it is then carried upward over the breast, across the compresses, and passed down behind the shoulder and arm, under the elbow, and obliquely upward to the place of beginning; it is then carried obliquely upward over the back of the chest to the compresses and brought down along and in front of the arm to the elbow; embracing the elbow, it is brought up obliquely behind the chest to the axilla and made to cross the fractured part again in front of the chest, as at first; it is then passed over the shoulder and down along the back of the arm to embrace the elbow for the third time and brought up again in front of the chest to the axilla; lastly, it passes obliquely upward behind the chest to the shoulder of the injured side in front of the arm, beneath the elbow, behind the chest to the axilla, ending in a number of oblique turns, including the body and the arm. [A, 458.]—**Descending spica-b.** Lat., *spica descendens.* Ger., *absteigende Kornähre.* A spica-b. in which the intersections of the turns proceed from above downward. [L, 213.]—**Descending spiral b.** Lat., *dolabra descendens.* Ger., *absteigende Hobelbinde.* A spiral b. which descends the part to which it is applied. [Wolff (L, 57).]—**Dextrin b.** Fr., *b. dextriné.* An immovable b. in which the stiffening material is a mixture of 100 parts of dextrin, 60 of alcohol, and 40 of hot water. [A, 321.]—**Dividing b.** Fr., *b. divisif.* Any b. applied in such a manner as to prevent the approximation of parts, such as the chin and the neck in cases of burns of the forepart of the neck. [L, 220.]—**Double-headed b., Double-headed roller-b.** Fr., *b.* (ou *bande*, ou *roulée*) *à deux globes.* Ger., *zweiköpfige Binde.* A roller-b. rolled from each end toward the middle. [A, 278, 458.]—**Double-headed spiral b. with reverses.** A b. formed by applying one head of a double-headed roller spirally, and

THE DOUBLE T-BANDAGE FOR THE NOSE AND FOR THE PELVIS. [A, 458.]



the other head in spirals with reverses, over the first. [L, 212.]—**Double spiral b.** A double-headed roller applied in such a manner that the spirals cross each other in front and behind. [L, 212.]—**Double T-b.** Ger., *doppelte T-Binde.* A T-b. having two vertical

strips. Different forms are used for retaining dressings applied to the nose, the anus, the perinæum, or the vulva. The vertical strips may be wholly independent, or a single piece split; if the latter, and the split extends quite to the horizontal band, the b. is termed *complete*, and, if only a part of the distance, *incomplete*. [A, 458; L, 202.]—**Egg-and-flour b.** An immovable b. in which the stiffening material is a paste made of white of egg beaten with flour. [L, 222.]—**Eighteen-tailed b.** Lat., *fascia octodecim capitibus*. Fr., *b. à dix-huit chefs*. Ger., *achtzehnköpfige Binde*. It., *fasciatura a diciotto capi*. A many-tailed b. (*q. v.*) having eighteen tails.—**Elastic b.** Fr., *bande élastique*. Ger., *elastische Verband*. See *Esmarch's elastic b.*, *Ewen's elastic b.*, *Fox's rubber b.*, and *Martin's rubber b.*—**Equal b.** Fr., *b. égal*. See *Circular b.*—**Esmarch's elastic b.** A broad strip of rubber shirring or sheet-rubber from

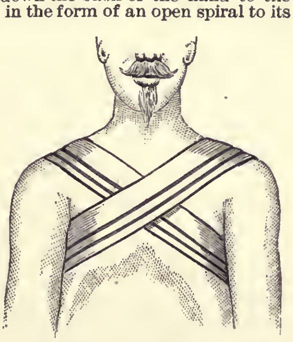


ESMARCH'S ELASTIC BANDAGE. [A, 459.]

3 to 5 yards long, in the form of a roller b., together with a stout solid rubber cord or strap having a chain at one end and a hook at the other; used for expelling the blood from a limb and as a tourniquet in bloodless amputations. It is applied after the manner of a closed spiral b. from below upward, sufficient tension being kept up upon it as the turns are made to exsanguinate the part thoroughly. When it has all been applied, the cord is passed tightly around the limb at the upper limit of the b., and fastened by means of the chain. The b. is then removed, but the cord or strap is left in place to act as a tourniquet. The apparatus is also used as a tourniquet by applying the roller as a pad and binding it down with

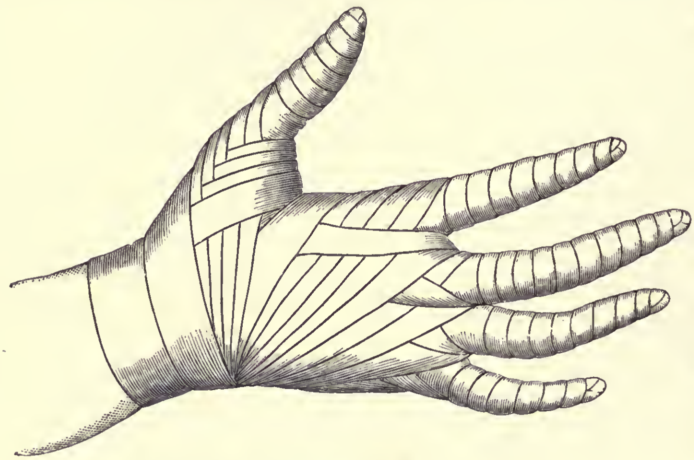
ESMARCH'S ELASTIC BANDAGE. (FROM WYETH, AFTER ESMARCH.)

the cord or strap. [A, 393.]—**Ewen's elastic b.** A form similar to Martin's, but consisting of an elastic woven fabric instead of sheet-rubber. [L, 212.]—**Expelling b.** Fr., *b. expulsif*. Ger., *Expulsiv-Binde*. It., *fasciatura espulsiva*. A compressive bandage serving to expel pus, etc. (*i. e.*, to prevent their accumulation). [L, 220.]—**Eye-b.** Lat., *fascia ocularis*. Ger., *Augenbinde*. A bandage for retaining a dressing on the eye or to prevent the use of the eye. A few horizontal turns with a roller are made around the head, then a number of oblique spiral turns over the eye, and finally a few additional horizontal circular turns. [A, 458.] Cf. MONOCLE.—**Figure-of-eight b.** Fr., *b. en huit de chiffre*. Ger., *Achterbinde*, *Achtertour*. Any b. so applied that turns are made alternately around two different parts (*e. g.*, the two shoulders), or at two different parts of a limb or the trunk, in the form of a figure-of-eight. By means of figure-of-eight turns, advancing up or down



ESMARCH'S ELASTIC BANDAGE AS A TOURNIQUET. (FROM WYETH, AFTER ESMARCH.)

a limb, a serrated appearance may be produced as with the spiral reversed b. Cf. *Spica-b.*—**Finger-b.** Fr., *gantelet*. Syn.: *gauntlet*. A b. including one or more of the fingers, with or without the thumb, together with the whole or a part of the hand and wrist. A few turns of a roller from $\frac{1}{2}$ in. to 1 in. wide are carried around the wrist; the roller is then carried down the back of the hand to the base of the finger and around it in the form of an open spiral to its



AN EYE-BANDAGE. [A, 458.]

THE FIGURE-OF-EIGHT BANDAGE. [A, 278.]

tip, and then carried methodically up the finger in a closed spiral or with reverses until its base is reached, when another turn is thrown around the wrist, and the next finger is treated in the same way. When the index-finger is reached, a few figure-of-eight turns may be made to cover the space between its base and the thumb. [A, 393.]—**Flour-paste b.** Ger., *Kleisterverband*. An immovable b. in which the stiffening material is flour-paste. [L, 57.]—**Foot-b.** A b. applied to the foot and usually continued up the leg. A form which has been termed the *American spiral b.* (in contradistinction to the *French spiral*, which leaves the point of the heel uncovered) is begun with two or three spiral turns around the foot, after which the roller is carried directly over the point of the heel, across the tarsus, beneath the instep, around one side of the heel, up over the instep again, then beneath the instep, around the other side of the heel, and up in front of the ankle. [A, 277.] Another method is by taking two or three circular turns around the ankle, then a figure-of-eight turn around the instep, then a turn around the point of the heel, then one around the outer and posterior aspects of the ankle with a reverse beneath the inner malleolus, then one beneath

the tarsus, up on the outer surface of the foot, and around the inner and posterior aspects of the ankle with a similar reverse beneath the outer malleolus, after which a few more figure-of-eight turns are made around the foot and ankle. For a third method, see *Wyeth's foot-b.*—**Four-tailed b.** A b. having four tails to be tied or otherwise fastened together in pairs. It may consist either of a piece of muslin torn from either end toward the centre, or of a handkerchief; in either case the two tails or corners of one edge are crossed by those of the other. The accompanying cuts show the four-tailed b. for the chin (Lat., *funda maxillæ;* Fr., *fronde du menton;* Ger., *Kinnschleuder*), in which

WYETH'S FINGER-BANDAGE. [A, 393.]

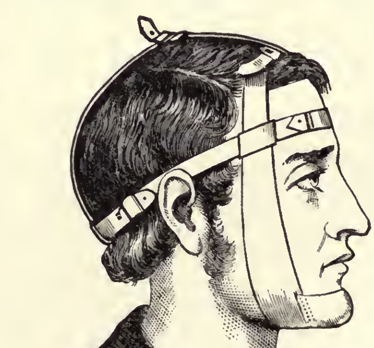
an opening is sometimes cut for the point of the chin; and that for the head (Lat., *capitium;* Fr., *fronde de la tête;* Ger., *Kopfschleuder*). [A, 393.]—**Fox's rubber b.** A tubular sheath of soft rubber to be drawn on to the leg over the foot, for the purposes of making equable compression, macerating thickened epidermis, etc.—**French spiral b.** See under *Foot-b.*—**Galen's b.** Lat., *fascia Galeni* (seu *pauperum*), *galea.* Fr., *b. de Galien* (ou *des pauvres*), *mentonnière.* Ger., *Binde des Galen.* Syn.: *poor man's b.* A six-tailed b. for retaining applications to the head. A piece of muslin of suitable size is torn lengthwise into three strips from each end toward the middle. The central part is laid on the head, the posterior tails are brought forward and fastened together over the forehead, the anterior tails are carried backward and fastened together under the occiput, and the middle tails are fastened together under the chin. [A, 278.]—**Gaping b.** Ger., *klaffende Binde.* A roller b. improperly applied so that one edge hangs loose while the other fits the limb. [A, 456.]—**Garretson's b.** A b. for the lower jaw; the middle of a strip of muslin is placed under the jaw, and the two tails are brought up above the forehead, where they cross and pass backward to cross again under the occiput, and are finally brought forward and secured to each other in front of the chin. [A, 457.]—**Genga's b.** See *Theden's b.*—**Gibson's b.** A b. for the lower jaw; starting in front of the ear, a roller-b. is carried beneath

FOUR-TAILED BANDAGES. [A, 393.]

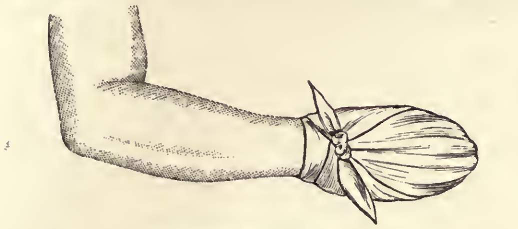
the jaw and up on the other side and over the fronto-parietal region to the point of beginning. Three turns are thus made; and then, reversing a little above the ear, three horizontal turns around the head; then, reversing in front, the roller is carried backward over the head to the nucha, from which point three turns are made around the front of the chin. The turns are secured to each other at their points of intersection. [Garretson (A, 457).]—**Glass b.** See *Silicate b.*—**Glue b.** An immovable b. made by applying a roller-b., then a layer of cotton batting, then another roller, and finally brushing on one or more coatings of dissolved glue of the ordinary consistence to which about ⅙ its bulk of alcohol has been added to hasten the drying. [L, 211.]—**Gluteal b.** A b. for the buttocks; made of two triangular pieces, one of which, folded, is fastened around the waist as a belt, and the apex of the other is attached to it above one hip, the other corners being carried around before and behind and tied on the opposite side. [L, 212.]—**Gum b.** An immovable b. in which the stiffening material is a solution of gum arabic. [L, 60.]—**Gum-arabic-and-whiting b.** An immovable b. like the chalk-and-gum b., whiting being substituted for the chalk. [L, 223.]—**Gutta-percha b.** See *Gutta-percha* SPLINT.—**Gypsum b.** See *Plaster-of-Paris b.*—**Halter-b.** Lat., *capistrum.* Fr., *chevestre.* Ger., *Halfterbinde, halfterähnliche Kinnbinde.* The chevaster; an old form of b. for the lower jaw, resembling Barton's b. (*q. v.*), but with the addition of a few horizontal

GARRETSON'S BANDAGE. [A, 457.]

turns around the head. [A. 456.]—**Hamilton's b.** A compound b. for the lower jaw, consisting of a firm leather strap passing under the jaw and buckled over the fronto-parietal suture, supported

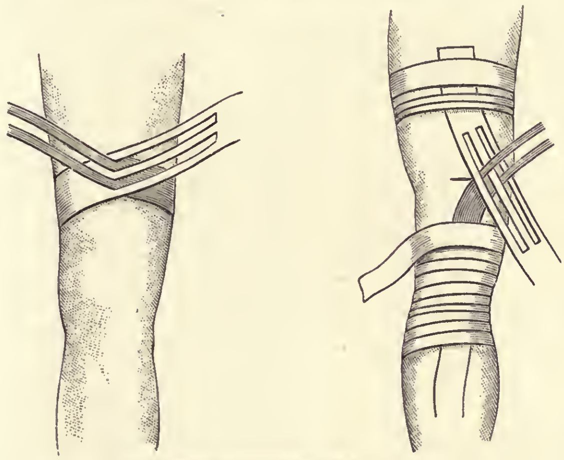


GALEN'S BANDAGE. [A, 278.]



GIBSON'S BANDAGE. [A, 457.]

on either side by a strap of webbing buckled around the head horizontally, the two straps being connected by a third strip of webbing passing from before backward over the top of the head. [A, 457; E.]—**Handkerchief b.** Ger., *Tuchbinde.* A loose supporting or retentive b. made with a handkerchief or a piece of stuff of like shape and size, either open, folded diagonally or crosswise, or rolled like a cravat. An elaborate system of such b's was devised by Mayor, a Swiss surgeon. [L, 219.]—**Hardening b.** Ger., *erhärtender Verband.* See *Immovable b.*—**Heliodorus's b.** The T-b. (*q. v.*). [L, 102.]—**Hernial b.** Fr., *b. herniaire.* See TRUSS.—**Hippocrates's b.** See *Capeline b.*—**Hueter's b.** See *Spica-b. for the perinæum.*—**Immovable b.** Fr., *b. inamovible.* Ger., *erstarrender Verband.* It., *fasciatura inamovibile.* A b. rendered

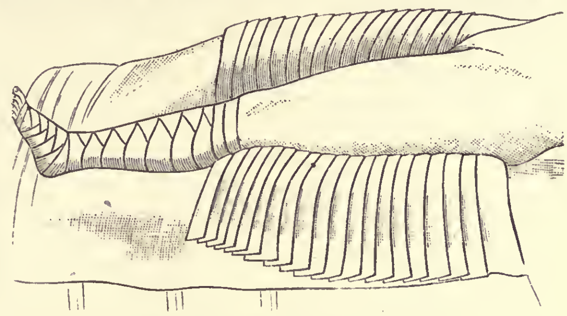


HAMILTON'S BANDAGE. [A, 457.]

stiff by some material (such as starch, plaster of Paris, etc.) which hardens as it dries, so as to hold the part fixed. [E.]—**Incarnative b.** Fr., *b. incarnatif.* See *Uniting b.*—**Incomplete double T-b.** See under *Double T-b.*—**Inguinal b.** Lat., *fascia inguinalis.* See *Spica-b. for the groin* and *Triangular b. for the groin.*—**Intermediate spiral b.** A spiral b. in which the turns touch each other,

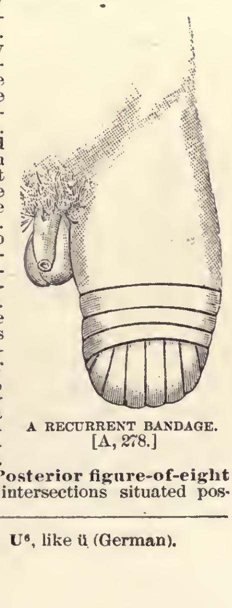
A HANDKERCHIEF-BANDAGE. [A, 319.]

but do not overlap.—**Invaginated b.** Fr., *b. invaginé* (ou *en gaîne*). A form of the uniting b. (*q. v.*) in which one portion of a roller has fenestræ for the passage of narrow tongues into which the tail is split; designed for making forcible and accurate traction. Instead of a single roller with holes and tongues, separate pieces may be used. [A, 278.]—**Jaw-b.** See *Barton's b.*, *Garretson's b.*, *Gibson's b.*, *Halter-b.*, *Hamilton's b.*, and *Four-tailed b.*—



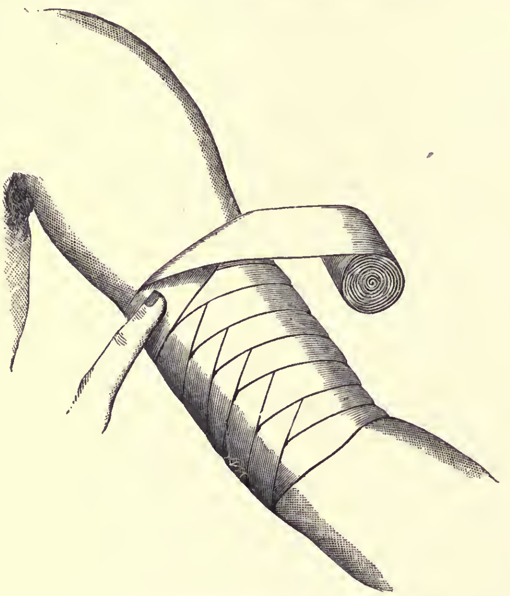
THE INVAGINATED BANDAGE. [A, 278.]

Knotted b. Lat., *fascia nodosa, scapha.* Fr., *bandage noué, nœud d'emballeur.* Ger., *Kreuzknotenbinde.* It., *fasciatura annodata.* A crossed b. of the head, made with a double-headed roller so applied that, every time the turns meet over the temporal region of one side (where a pad is placed to stop hæmorrhage from a wound of the temporal artery), they are looped with each other after the manner of a cord in doing up a package. [A, 278, 456, 458; L, 219.]—**Laced b.** Fr., *b. lacé.* Ger., *Schnurverband.* A b. (generally in the form of a stocking) made of two longitudinal pieces fashioned to fit a limb, sewed together behind and provided with eyelets in front for lacing. [A, 458; E.]—**Larrey's b.** A many-tailed b. in which the free ends are made adhesive with a mixture of tincture of camphor, lead-water, and white-of-egg. [P. Tillaux (L, 87).]—**Lateral spica-b.** Lat., *spica lateralis.* A spica-b. in which the intersections are made on the side of the body or a limb. [L, 214.]—**Langier's b.** See *B. en papier amidonné de Langier.*—**Liebreich's b.** A form of eye-b. consisting of a knitted-cotton band, about 12 in. long and 2¼ in. wide. At one end there are two tapes—one passing round the back of the head, and the other forming a cross-bar with the first and passing over the top of the head. The other end of the b. also carries a tape, which is to be tied at the side of the head opposite the affected eye to the one coming round from the back. [F.]—**Liquid-glass b.** See *Silicate b.*—**Looped b.** A b. consisting of strips doubled in the middle and passed transversely under a limb at short intervals; one of the free ends of each is passed through the loop in front of the limb and tied to the other. [L, 224.]—**Maisonneuve's b.** See *B. plâtré de Maisonneuve.*—**Manila-paper b.** An immovable b. made by applying strips of manila paper, stiffened with starch, first circularly,



THE KNOTTED BANDAGE. [A, 458.]

then longitudinally, and then spirally. [L, 223.]—**Many-tailed b.** Lat., *fascia fasciolis separatim dispositis.* Fr., *b. à bandelettes séparées.* Ger., *vielköpfige Binde.* Syn.: *Scultetus's b.*, *b. of separate strips.* A b. consisting of a number of strips passed transversely under a limb, one somewhat overlapping the one above or below it, according as the b. is to be applied from below upward or from above downward. Sometimes they are stitched to a longitudinal strip, but it is better that they should not be. The ends are brought together in front somewhat spirally, one overlapping the other, and the appearance when the application is completed is that of a spiral reversed roller. It is used where it is desirable to bandage a limb without lifting it from the bed, the separate strips being passed under it, folded, by means of a

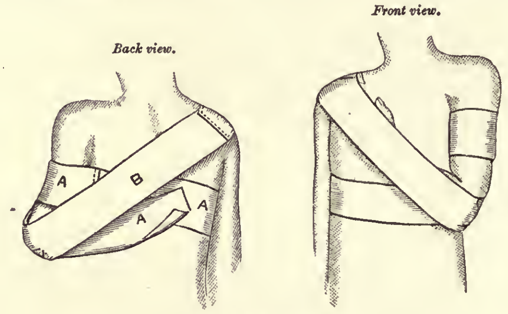


THE MANY-TAILED BANDAGE. [A, 458.]

spatula. [A, 458.]—**Martin's elastic** (or **rubber**) **b.** A roller-b. of soft vulcanized rubber, for spiral application to the lower limb for the purpose of producing compression in cases of varicose veins, eczematous infiltration, etc.—**Mathysen and Van de Loo's b.** A form of the plaster-of-Paris b. made by impregnating flannel or some like fabric with dry plaster, applying strips cut from it of suitable shape and wet. [P. Tillaux (L, 87).]—**Moore's elbow figure-of-eight b.** A b. designed especially for the treatment of fracture of the clavicle, about 2 yards long and 8 in. wide at the centre. Placing the centre across his palm, the surgeon grasps the elbow of the injured side, the two ends hanging loose. The end which falls inward, toward the patient, is carried upward in front of the shoulder, over the back, and under the opposite axilla. The other end is carried across the forearm, behind the back, over the opposite shoulder, and round the axilla to meet the first one. The forearm is sustained at an acute angle with a sling. [E. M. Moore, "Trans. of the Med. Soc. of the State of N. Y.," 1870, p. 107 (L).]—**Mustard-b.** A roller-b. soaked in a mixture of equal parts of ground mustard and flour with water enough to make it of the consistence of cream; used as a stimulating application. [L, 120.]—**Napkin-b.** See *Handkerchief-b.*—**Nodose b.** See *Knotted b.*—**Nose-b.** Ger., *Nasenbinde.* A b. for retaining dressings on the nose; either a simple folded piece tied behind the head or a double T.-b. (*q. v.*). [A, 455, 456, 458.]—**Oblique b., Oblique circular b.** See *Open spiral b.*—**Oblong b.** A form of the handkerchief-b. made by folding the square once on itself. [L, 213.]—**Open spiral b.** Lat., *dolabra repens.* Fr., *b. rampant.* Ger., *kriechende Hobelbinde, Schlangentour.* It., *fasciatura rampante.* A spiral b. so applied that there are decided intervals between the adjacent turns. [L, 219.]—**Paraffin-b.** Ger., *Paraffin-Verband.* A form of immovable b. made by saturating a b. with melted paraffin and applying it while hot, covering the first layer with paraffin to the thickness of about ⅛ in., and inclosing the whole in a roller-b. [L, 211.]—**Perforated T-b.** Fr., *b. en T perforé.* An apron-like b., being a T-b. in which the part corresponding to the vertical strip of an ordinary T-b. is broad and has one or more openings (*e. g.*, for the passage of the fingers). [A, 301.]—**Perineal b.** 1. A b. made by folding two triangular pieces like cravats, using one for a belt around the waist, and fastening the other to it in the middle line before and behind, spreading it out somewhat over the perinæum. [L, 212.] 2. A turn is first made around the waist with a roller-b., which then passes down obliquely across the left groin, around behind the thigh, over the right groin, behind the body, over the left groin, and behind the right thigh. [Sir W. MacCormac (A, 460).] See also *Spica-b. for the perinæum.*—**Permanent b.** See *Immovable b.*—**Phlebotomy-b.** See *Venesection-b.*—**Plaster-b., Plaster-of-Paris b.** Fr., *b. plâtré.* Ger., *Gypsverband.* 1. An immovable b. in which the stiffening material is plaster of Paris. A roller-b. of loose texture is prepared by rubbing dry plaster into its meshes; when it is to be applied, it is soaked in water; after its application, it is strengthened by applying a mixture of plaster and water of the consistence of cream. [L, 211.] 2. See *Plaster-of-Paris* SPLINT.—**Poor man's b.** Fr., *b. des pauvres.* See *Galen's b.*—**Posterior figure-of-eight b.** A figure-of-eight b. having the intersections situated pos-

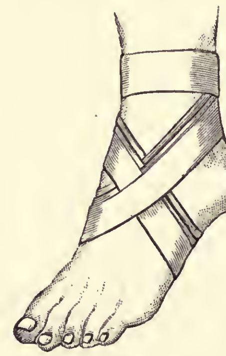
A RECURRENT BANDAGE. [A, 278.]

teriorly. [L, 213.]—**Posterior spica-b.** Lat., *spica posterior.* A spica-b. having the intersections situated posteriorly. [L, 214.]—**Pott's b.** A many-tailed b. in which the strips are sewed together at the middle. [P. Tillaux (L, 87).]—**Pretty's tourniquet-b.** An abdominal compass with a tourniquet attachment, for maintaining and regulating compression of the uterus post partum. ["Med. Times and Gaz.," 1853, i, p. 327 (L).]—**Radiated b.** See *Knotted b.*—**Rampant b.** See *Open spiral b.*—**Rapidly ascending spiral b.** See *Open spiral b.*—**Recurrent b.** Fr., *b. récurrent.* It., *fasciatura ricorrente.* A roller-b. applied over a rounded surface, like the face of a stump, in radiating, overlapping turns backward and forward, secured by a few circular turns. The capeline b. (*q. v.*) is an example. [A, 278.]—**Retaining b., Retentive b.** Fr., *b. contentif.* Ger., *Contentiv-Binde.* It., *fasciatura contentiva.* Any b. serving simply to retain splints, dressings, etc., in place. [L, 220.]—**Reversed b., Reversed spiral b.** Fr., *b. ren-*



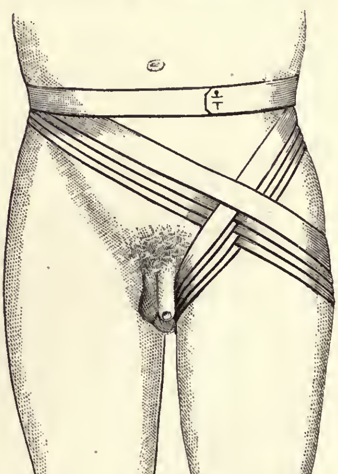
THE REVERSED BANDAGE. [A, 393.]

versé. Ger., *übergeschlagene Binde.* An ascending spiral b. in which, either to make it fit a limb increasing in size from below upward or to form serrations for the sake of a neat appearance, the separate turns are folded obliquely upon themselves on the same aspect of the limb before they are tightened. [A, 393; L, 212.]—**Ribball's b.** A spica b. for the foot. [L, 213.]—**Richet's b.** See *B. en stuc de Richet.*—**Roller-b.** Fr., *roulée, b. roulé.* Ger., *Rollbinde.* A strip of muslin, flannel, or other like material, wound from one or both ends in the form of a firm roll. The roll is called the *head*, and the free end the *tail*.—**Rotatory b.** Fr., *b. rotatoire.* 1. A roller-b. so applied as to exert a twisting action (*e. g.*, on the foot in cases of club-foot). 2. A special b. devised by Winslow for the correction of wry-neck; a few circular horizontal turns are made around the head with a roller-b., passing forward on the side to which the head is turned; then, having been secured on the opposite side of the head, the b. is passed down over the back of the shoulder and secured to a body-b. [A, 458.]—**Rubber b.** See *Esmarch's elastic b.*, *Fox's rubber b.*, and *Martin's rubber b.*—**Sagittal b.** Lat., *fascia sagittalis.* Ger., *Pfeilnahtbinde.* A form of T-b. for the head, consisting of one or more horizontal turns around the head connected by one running from before backward over the vault of the cranium in the median line. [A, 458; L, 219.]—**Sayre's b.** A device for treating fracture of the clavicle by means of strips of adhesive plaster. The middle of the arm is held back by a strip, *a, a, a*, and the loop which it forms around the arm serves as a fulcrum for the action of the second strip, *b*, which is passed from behind forward, traction being made upon it in such a way as to pull the elbow forward and throw the shoulder backward. [L. A. Sayre, "Am. Practitioner," July, 1871.]—**Scalp-b.** See *Capeline b.*—**Scapulary b.** Fr., *scapulaire.* Ger., *Schultertragbinde, Jochbinde, Skapulierbinde.* It., *scapolare.* Sp., *escapulario.* A retaining bandage for the shoulder, also a strip passing over the shoulder for holding other portions of a b. in place. [A, 321, 385, 458.]—**Scarf-b.** See *Handkerchief-b.* and *Triangular b.*—**Scott's b.** A dressing for a joint, in which, after the application of mercurial ointment and diachylon plaster,



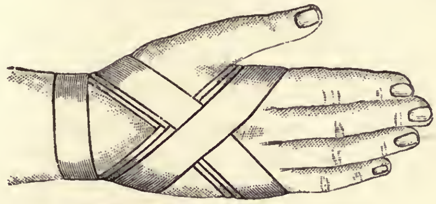
THE SAGITTAL BANDAGE. [A, 458.]

the whole is covered with a starch-b. [L, 295.]—**Scrotal b.** An appliance consisting of two triangular b's; one of them is applied as a pelvic belt, the base of the other is passed behind the scrotum, and its lateral ends are brought up and attached to the belt. [L, 212.]—**Scultetus's b.** See *Many-tailed b.*—**Semi-elastic b.** A b. made of flannel or knitted silk, cotton, or woolen material. [L, 212.]—**Serpentine b.** See *Open spiral b.*—**Seutin's b.** See *Starch-b.*—**Silica-b., Silicate b.** Fr., *b. silicaté.* Ger., *Wasserglasverband.* An

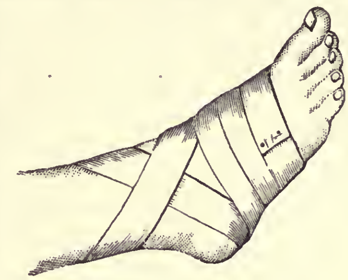


SAYRE'S BANDAGE.
a, a, a, the strip first applied; *b*, the second strip.

immovable b. made by applying a roller-b., and then coating it thoroughly with a solution of silicate of potassium or of sodium, to which whiting is sometimes added. [A, 392; L, 211.]—**Simple b.** Fr., *b. simple.* Ger., *einfache Binde.* One consisting of a single piece of stuff or of several pieces which do not need to be attached to each other before they are applied. [L, 41.] Cf. *Compound b.*—**Single-headed roller-b.** Fr., *b.* (ou *bande*, ou *roulée*) *à un globe.* Ger., *einköpfige Rollbinde.* A roller-b. wound from one end only.—**Single T-b.** See under *T-b.*—**Six-tailed b.** See *Galen's b.*—**Sling-b.** See SLING and *Suspensory b.*—**Slowly ascending spiral b.** See *Closed spiral b.*—**Solar b.** See *Knotted b.*—**Solid-rubber b.** See *Martin's rubber b.*—**Soluble-glass b.** See *Silicate b.*—**Spica-b.** Lat., *spica.* Fr., *épi, b. cruciforme.* Ger., *Aehrenbinde, Kornähre.* It., *spica, spiga.* Sp., *espiga.* A form of the figure-of-eight b., commonly said to be distinguished by the fact that the turns ascend or descend, instead of wholly overlying the preceding turns, but this is true of certain figure-of-eight b's to which the term spica is not applied; practically, it is an advancing figure-of-eight b. in which the turns of the two loops of the 8 encircle dissimilar or asymmetrical parts (such as the pelvis and the thigh) and are usually of unequal size. It derives its name from the fancied resemblance of its intersections to a spike of barley. [A, 314, 319; E.]—**Spica-b. for the foot.** Lat., *spica pedis.* A b. consisting of a circular turn above the ankle and a number of descending figure-of-eight turns around the ankle and the foot. [A, 319.]—**Spica-b. for the great toe.** A figure-of-eight b. in which the turns run alternately around the instep and the great toe. [L, 212.]—**Spica-b. for the groin.** Lat., *spica coxæ.* A spica-b. encircling alternately the pelvis and one or both thighs.—**Spica-b. for the hand.** Lat., *spica manus.* A spica-b. encircling alternately those portions of the hand above and below the thumb, with the intersections on the dorsal aspect. [A, 319.]—**Spica-b. for the hip.** See *Spica-b. for the groin.*—**Spica-b. for the perinæum.** Lat., *spica perinæi.* A b. devised by Hueter for wounds of the uro-genital apparatus; described as consisting of circular turns around the pelvis and descending oblique and circular turns around the thighs, covering the

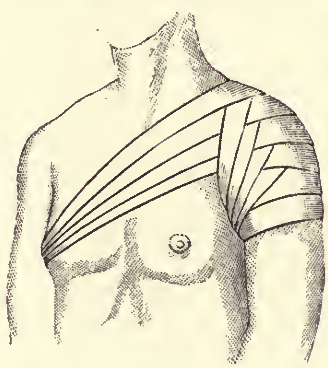


THE SPICA FOR THE FOOT. [A, 319.]

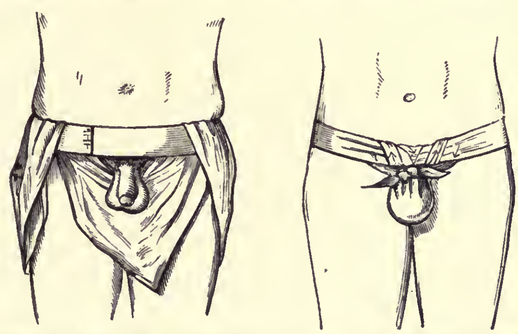


THE SPICA FOR THE GROIN. [A, 319.]

scrotum and the whole perineal region. [A, 319.]—**Spica-b. for the shoulder.** Lat., *spica humeri.* A spica-b. in which the turns



THE SPICA FOR THE HAND. [A, 319.]



pass alternately around the upper part of one arm or over the shoulder and from the shoulder to and around the opposite side of the body beneath the axilla. [A, 319.]—**Spica-b. for the thumb.** Lat., *spica pollicis.* A spica-b. in which the turns embrace alternately the thumb and the wrist. [A, 458; L, 212.]—**Spiral b.** Lat., *fascia spiralis, dolabra.* Fr., *b. spiral* (ou *en doloires*). Ger., *Hobelbinde.* It., *fasciatura spirale.* A roller-b. applied in simple spiral turns, usually with the edges overlapping. [L, 212.]—**Spiral reversed b.** See *Reversed b.*—**Splint-b.** See *Immovable b.*—**Square b.** Fr., *b. carré.* A square piece of cloth having strips attached at the corners for the purpose of holding it in place. [A, 278; L, 41.]—**Starch-b.** Fr., *b. amidonné.* Ger., *Kleisterverband.* It., *fasciatura amidata.* Syn.: *Seutin's b.* An immovable b. made by soaking roller-b's in a solution of starch and applying them so as to incase the part methodically.—**Stearin-b.** An immovable b. in which the stiffening material is stearin. [L, 295.]—**Stellar b., Stellate b.** See *Knotted b.*—**Stirrup-b.** Lat., *stapes.* Ger., *Steigbügel.* A b. consisting of a figure-of-eight turn around the ankle and a few descending spirals around the foot; formerly much used after venesection. [A, 319.]—**Strip-b.** See *Many-tailed b.*—**Suspensory b.** Lat., *suspensorium.* Fr., *suspensoir, suspensoire.* Ger., *Aufhängeband, Tragbinde.* It., *sospensorio.* Sp., *suspensorio.* A b. for suspending a part, especially the scrotum and testicles and the breast. For the scrotum, it consists of a strip passing around the hips in the form of a belt, to which a handkerchief or a knitted sac is attached. [A, 393.]—**Szymanowsky's handkerchief-b.** An apparatus for treating fracture of the clavicle. A handkerchief folded like a cravat, having its ends tied together, forms a loose collar for the shoulder of the sound side, passing over the top of the shoulder and beneath the axilla; to this are attached behind two other handkerchiefs folded in the same way, one forming a loop around the upper part of the arm of the injured side, and the other around the forearm just below the elbow; a fourth folded handkerchief passes around the wrist and is tied to the first one in front, so as to sustain the forearm. [A, 456.]—**T-b.** Fr., *b. en T.* Ger., *T-förmige Binde.* It., *fasciatura a T.* A b. consisting of two separate strips fastened together in the form of the letter T, one for encircling a part (generally the waist or the hips) and the other to be secured by its free end to the former (generally after passing beneath the perinæum); used for holding dressings in place. [E; L, 211.]—**T-b. for the ear.** A single or double T-b. with a triangular piece for covering the ear at the junction of the horizontal and the vertical strips, the former passing around the head and the latter under the lower jaw. [L, 212.]—**T-b. for the head.** See *Sagittal b.*—**Tar-b.** An antiseptic b. made by applying a roller-b. and saturating with a mixture of 1 part of olive-oil and 20 parts of tar hardened by boiling. [C. B. Leitner, "Trans. of the Georgia Med. Assoc.," 1878, p. 250 (L).]—**Thêden's b.** A roller b. applied to a limb from below upward, covering a graduated compress placed in a wound, to restrain hæmorrhage. [A, 365.]—**Thillaye's b.** An apparatus for approximating the lips of the wound made in the operation for hare-lip. Two double-headed rollers are interrupted by tapes between their heads, the tapes of the one interlacing with those of the other, each having a pad at one end of the tapes. The pads are secured in position by a few turns of that head of each bandage next to which they lie behind the occiput and then around the head horizontally; they are then drawn forward by means of similar turns with the other heads, first crossed in front. The whole is supported by turns encircling the head and passing under the jaw. [A, 458.]—**Triangular b.** Fr., *b. triangulaire.* Ger., *dreieckige Binde.* 1. A triangular piece of cloth sewed to a strip at one side for holding it in place. [A, 278.] 2. Any b. consisting of a handkerchief or a square piece of cloth folded once diagonally. [L, 212, 213.]—**Triangular b. for the head.** Fr., *couvre-chef en triangle.* Ger., *dreieckiges Kopftuch.* A b. consisting of a handkerchief folded in the shape of a triangle; the middle of the folded border is applied to the forehead, and the two lateral corners are carried back around the sides of the head, crossed over the other corner behind, brought forward again, and tied in front. [A, 458.]—**Tufnell's b.** See *Egg-and-flour b.*—**Turned b.** See *Reversed b.*—**Twelve-tailed b., Twenty-four-tailed b.** See *Many-tailed b.*—**Twisted b.** A circular b. to be twisted after its application, for the purpose of compressing the blood-vessels. [L, 212.]—**Unequal b.** Fr., *b. inégal.* One in which the turns are not accurately applied. [L, 41.]—**Uniting b.** Lat., *fascia uniens.* Fr., *b. unissant* (ou *incarnatif*). Ger., *Vereinigungsbinde.* It., *fasciatura unitiva* (o *incarnativa*). A b. specially contrived to approximate divided parts, such as the lips of wounds, the fragments of a broken patella, etc. It usually consists either of a roller with its tail terminating in bandelettes to pass through fenestræ situated farther up, or of a strip having bandelettes at one end and another strip with fenestræ, the two strips being held applied by spiral turns of a roller. Suitable pads hav-

ing been placed under the b., the two portions are firmly drawn upon and made fast by further turns. [A, 278, 458.] See cuts under *Invaginated b.*—**V-b.** A figure-of-eight b. in which the two loops of the 8 form an acute angle at their junction; in the V-b. for the head, one loop passes horizontally around the head, and the other downward over the lip, both intersecting behind the occiput. [L, 213.]—**Velpeau's b.** A b. for fracture of the clavicle, in which, a wad of cotton having been placed in each axilla, and the hand of the injured side carried to the front of the opposite shoulder, the tail of a roller-b. is placed on the scapula of the sound side, a few turns are made over the acromial end of the injured clavicle and around the arm to the place of beginning, and then the whole arm and forearm are covered by making alternate oblique and horizontal turns, which may be stitched together or smeared with silicate solution to hold them in place. [A, 319, 393.]—**Venesection-b.** Fr., *croisé de l'avant-bras, b. pour la saignée.* A figure-of-eight b. applied to the bend of the elbow, the turns intersecting on the palmar aspect;

WYETH'S FOOT-BANDAGE. [A, 393.]

used to compress the vein after venesection. [A, 278.]—**Winslow's b.** See *Rotatory b.* (2d def.).—**Wyeth's foot-b.** A single roller, 2 or 2½ in. wide and about 10 yards long, covering the whole foot. A turn is first made around the point of the heel, followed by one around the ankle and two or three more around the heel, so as to cover the heel completely; the b. is then carried under the bases of the toes to the little toe, where two turns are made around the foot; figure-of-eight turns are then made around the back of the heel and the foot, the intersections being a little to the outer side of the middle of the foot, until the whole foot is covered. [A, 393.]

BANDAGING, n. Ba^{2}nd'aj-i^{2}ng. Gr., ἐπίδεσις. Lat., *fasciatio.* Fr., *bandage.* Ger., *Bandagiren, Verbinden.* The art or practice of applying bandages, dressing wounds, etc.

BANDAGIST, n. Ba^{2}nd'aj-i^{2}st. Fr., *bandagiste.* One who makes bandages, trusses, etc. [L, 41.]

BANGE, n. Lat., *b. Indorum.* See BHANG.

BANGENKRAUT (Ger.), n. Ba^{3}ng'e^{2}n-kra^3-ut. The *Conium maculatum.* [L, 43.]

BANGHIE, n. An intoxicating liquor prepared from Indian hemp. [B, 121.] Cf. BHANG.

BANGI, n. 1. A name applied in the Philippines to a shrub having a milky juice, probably akin to *Strychnos.* The fruit is eaten, but the seeds are poisonous. [B, 121.] 2. See BHANG.

BANGIACEÆ (Lat.), n. f. pl. Ba^{3}ng-i^2-a(a^3)'se^2(ke^2)-e(a^3-e^2). From *Bangia*, the name of a genus. Of Nägeli, an order of *Algæ*, including the tribes *Lyngbyeæ* and *Ulveæ.* [B, 170.]

BANGIDEÆ (Lat.), n. f. pl. Ba^{3}ng-i^{2}d'e^2-e(a^3-e^2). Of Gray, a division of *Algæ* (*Hydrophytæ*). [B, 170.]

BANGIEÆ (Lat.), n. f. pl. Ba^{3}ng-i(i^2)'e^2-e(a^3-e^2). Of Zanardini, Rabenhorst, and Trevisan, a tribe of *Algæ*, including *Bangia* and related genera. [B, 170.]

BANGIGKEIT (Ger.), n. Ba^{3}ng'i^{2}g-kit. Anxiety. [L, 80.]

BANGUE, n. See BHANG.

BANGUILING, n. Of Camelli, the *Cicca* (*Phyllanthus*) *disticha.* [B, 121.]

BANHALUD (Beng.), n. The *Curcuma aromatica.* [B, 181.]

BANIA-LOUKA, n. A warm sulphurous spring in Bosnia. [L, 49.]

BANIAN-TREE, n. See FICUS *indica.*

BANILIA (Lat.), n. f. Ba^{2}n(ba^{3}n)-i^{2}l'i^2-a^3. Of Deleschamps, the vanilla plant (*Vanilla aromatica*). [B, 211.]

BANISTERA, n. Probably the *Diapensia lapponica.* [B, 211.]

BANISTEREÆ (Lat.), n. f. pl. Ba^{2}n-i^{2}s-te^{2}r'e^2-e(a^3-e^2). See BANISTERIEÆ.

BANISTERIA (Lat.), n. f. Ba^{2}n-i^{2}s-te(ta)'ri^2-a^3. Named after J. B. Banister, an English botanist. A genus of malpighiaceous plants established by Linnæus. [B, 170.]—**B. angulosa** [Linnæus]. A species growing in San Domingo and French Guiana. [B, 214.]—**B. leona** [Cavanilles]. A species growing in Sierra Leone, where a febrifuge decoction is made from the leaves, and the powdered fruit is used to preserve substances from the attacks of insects. [B, 173.]—**B. pragua** [Vellozo]. A Brazilian species, the root of which is used as a laxative and emetic, instead of ipecac. [H. Baillon (B).]

BANISTERIACEÆ (Lat.), n. f. pl. Ba^{2}n-i^{2}s-te^{2}r-i^2-a(a^3)'se^2-(ke^2)-e(a^3-e^2). See BANISTERIEÆ.

BANISTERIÆ [A. Richard], **BANISTERIEÆ** [De Candolle] (Lat.), n's f. pl. Ba^{2}n-i^{2}s-te(ta)'ri^2-e(a^3-e^2), -te^{2}r-i(i^2)'e^2-e(a^3-e^2). Fr., *banistériées.* Syn.: *Banistereæ* [Lindley], *Notopterygieæ* [End-

licher]. A tribe of malpighiaceous plants including *Banisteria* and related genera. [B, 42, 170.]

BANITAN, n. According to Camelli, an undetermined tree of the Philippines, the root of which is used as a medicine. [Bory (B, 121).]

BANJALUKA, n. See BANIA-LOUKA.

BANJOÁN (Beng.), n. The *Carum ajowan*. [B, 181.]

BANKA, n. A place in Hungary, where there are springs containing sulphates. [A, 385.]

BANKÁPÁS (Beng.), n. The *Hibiscus vitifolius*. [B, 181.]

BANKO, n. A place in Hungary, where there is a chalybeate spring. [A, 385; L, 49.]

BANKOUL, n. See BANCOUL.

BANKESIA (Lat.), n. f. Ba^{2}n^{2}k-ez(as)'i^2-a^3. See BRAYERA.—**B. abyssinica** [Bruce]. The *Brayera anthelminthica*. [B, 42, 173.]

BANKSEA (Lat.), n. f. Ba^{2}n^{2}ks'e^2-a^3. Of Koenig, the Linnæan genus *Costus*. [B, 121.]—**B. speciosa** [Koenig]. The *Costus arabicus*. [B, 173.]

BANKSIA (Lat.), n. f. Ba^{2}n^{2}ks'i^2-a^3. Fr., *banksie*. After Sir Joseph Banks, an English botanist and explorer. 1. Australian honey-suckle; a genus of proteaceous plants belonging to the tribe *Banksieæ*, established by Linnæus the younger. 2. Of Dombey, the genus *Cuphea*. 3. Of Forster, the genus *Pimelea*. [B, 42, 121.]—**B. abyssinica.** An erroneous spelling for *Bankesia abyssinica* (*q. v.*). [B, 5, 173.]—**B. asplenifolia.** 1. Of Salisbury, the *B. integrifolia*. 2. Of Knight, the *B. marcescens*. [B, 219.]—**B. collina** [R. Brown]. An Australian shrub, 8 to 12 feet in height, from the flowers of which exudes a liquid like that from *B. ericifolia*. [B, 185, 219.]—**B. compar** [R. Brown]. A long-leaved variety of *B. integrifolia*. [B, 219.]—**B. Cunninghami** [Sieb.]. See *B. collina*.—**B. ericifolia** [Linnæus fil.]. An Australian shrub or small tree 12 to 14 feet high. The yellow silky flowers contain an abundance of sweet liquid which collects in pools upon the ground beneath the tree. [B, 185, 219.]—**B. gibbosa** [Smith]. The *Hakea gibbosa*. [B, 219.]—**B. integrifolia** [Linnæus fil.]. An Australian tree with closely tomentose branches, scattered or verticillate, oblong-cuneate or lanceolate, short-petiolate leaves, and oblong or cylindrical spikes of flowers. The latter secrete a honey-like exudation like the *B. ericifolia*. [B, 19, 219.]—**B. macrophylla** [Link]. See *B. integrifolia*.—**B. marcescens** [R. Brown]. An Australian shrub 5 to 6 feet high with oblong, truncate, serrate, petiolate leaves, and oblong or cylindrical spikes of purple flowers. The root is said to be used as an emetic under the name of ipecacuanha. [B, 173, 219.]—**B. marginata** [Cavanilles]. A straggling shrub or small tree growing in Australia. [B, 219.]—**B. oleifolia** [Cavanilles], **B. paludosa** [R. Brown]. See *B. integrifolia*.—**B. pinifolia** [Meissner]. See *B. sphærocarpa*.—**B. præmorsa.** 1. Of Andrews, see *B. marcescens*. 2. See *B. marginata*.—**B. prionophylla** [F. Mueller]. See *B. collina*.—**B. speciosa.** 1. A name applied to two Australian species of *B.* (1st def.). 2. A faulty spelling of the *Banksea speciosa*. [B.]—**B. sphærocarpa** [R. Brown]. An Australian shrub 3 or 4 feet high, hoary-tomentose and with linear, obtuse, entire leaves and globular spikes of flowers. [B, 219.]—**B. spicata** [Gaertner]. See *B. integrifolia*.

BANKSIDÆ [Lindley], **BANKSIEÆ** [Reichenbach, Endlicher, *et al.*] (Lat.), n. f. pl. Ba^{2}n^{2}k'si^{2}d-e(a^3-e^2), ba^{2}n^{2}k-si(si^2)'e^2-e-(a^3-e^2). Fr., *banksidées*, *banksiées*. A tribe of proteaceous plants including *Banksia* and *Dryandra* which have flowers disposed in strobiline or involucrate heads or spikes, 2 collateral anatropous ovules, and a dehiscent fruit divided into 2 one-seed loculi by a single or double partition. [B, 42, 121, 170.]

BANKUL (Ger.), n. Ba^{3}n^2-kul'. See BANCOUL.—**B'nuss.** See BANCOUL *nut*.—**B'öl.** See BANCOUL *oil*.

BAN-MALLIKÁ (Hind.). The *Jasminum angustifolium* (*sambac*). [B, 172, 181.]

BANMETHI (Hind., Bengal.), n. The *Melilotus parviflora*. [B, 181.]

BANMUDGA (Beng.), n. The *Phaseolus aconitifolius*. [B, 181.]

BANNA, n. An Abyssinian name for the tape-worm. [A, 385; L, 49.]

BANNER, n. Ba^{2}n'nu^{5}r. In botany, see VEXILLUM.

BANNETTE (Fr.), n. Ba^{3}n-net. The *Dolichos melanophthalmos*. [B, 19.]

BAÑO (Sp.), n. Ba^{3}n'yo. See BATH and BALNEUM.—**B's de Carlos III.** A village in Guadalajara, Spain, where there are springs containing sulphates of calcium and magnesium, highly esteemed in the treatment of scrofula, syphilis, etc. [A, 319.]

BAÑOLAS (Sp.), n. Ba^{3}n-yo'la^{3}s. A place in the province of Gerona, Spain, where there are cold sulphurous waters. [A, 461.]

BANOUE (Fr.), n. Ba^{3}n-u. The *Poa dulcis*. [B, 121.]

BANPALÁS (Hind.), n. The *Schrebera swietenioides*. [B, 181.]

BÁNS (Hind.), n. The *Bambusa arundinacea*. [B, 172, 181.]

BANSA LOCHAN (Bengal.), n. See BANSAROCHANA.

BAÑSANUI (Bengal.), n. The *Crotalaria verrucosa*. [B, 181.]

BANSAROCHANA (Hind.), n. Tabaschir. [B, 181.] See BAMBUSA *arundinacea*.

BANSEN (Ger.), n. Ba^{3}ns'e^{2}n. The paunch of a ruminant. [A, 315.] See RUMEN.

BANSH (Bengal.), n. The *Bambusa arundinacea*. [B, 172.]

BANTING CURE, BANTINGISM, n's. Ba^{2}nt'ing, -i^{2}zm. Ger., *Banting-Cur*, *Banting-Kur*, *Banting-Diät*, *Entfettungskur*. A dietetic method of reducing corpulence, consisting essentially in the use of lean meat, poultry, game, fruit, fresh vegetables (except parsnips, beets, turnips, and carrots), soft-boiled eggs, and cheese, dry wines being allowed, and in the avoidance of farinaceous, saccharine, and oily articles of food, especially bread, pastry, potatoes, butter, pork, herrings, eels, salmon, milk, beer, port, and champagne. The plan is so called after a Mr. Banting, a London merchant, who followed it in his own case, under the direction of a surgeon, and published an account of it. [A, 327; D, 1.]

BANU-CURUDU, n. The cinnamon-tree. [B, 121.]

BANWAL, n. The Ceylon name for a vine which is used in making ropes. [Bory (B, 121).]

BANYAN-TREE, n. Ba^{2}n'ya^{2}n, ba^{2}n-ya^{2}n'. See FICUS *indica*.

BAO, n. See VAO.

BAOBAB, n. See ADANSONIA *digitata*.

BAPANABOORI (Teloogoo), n. The *Ehretia buxifolia*. [B, 172.]

BAPHIA (Lat.), n. f. Ba^{2}f(ba^{3}f)'i^2-a^3. From βάπτειν, to dye. A genus of leguminous trees belonging to the tribe *Sophoreæ*, established by Afzelius, distinguished by its unifoliolate leaves, its deciduous bracteoles shorter than the bifid or spathe-like calyx, its papilionaceous flowers with anthers shorter than the filaments, and its flat-compressed acute legume. [B, 42.]—**B. hæmatoxylon** [Hooker fil.]. See *B. nitida*.—**B. laurifolia** [H. Baillon]. See *B. pubescens*.—**B. leptostemma** [H. Baillon]. See *B. nitida*.—**B. nitida** [Afzelius]. Syn.: *Podalyria hæmatoxylon* [Schum. and Thonn.], *Carpolobia versicolor* [G. Don]. Cam-wood, bar-wood. An erect shrub 8 to 10 feet high or a small tree with rounded glabrous branches and white flowers, growing on the western coast of tropical Africa. Its wood (*cam-wood*) is red and is used for dyeing. [B, 19, 250.]—**B. pubescens** [Hooker fil.]. A tree 20 feet in height growing in upper Guinea, distinguished by the brownish pubescence which covers its branches and flowers. [B, 121, 250.]—**B'säure** (Ger.). See BAPHIC ACID.

BAPHIC ACID, n. Ba^{2}f'i^{2}k. Fr., *acide baphique*. Ger., *Baphiasäure*. A colorless substance, $C_{24}H_{22}O_{10}$, soluble in alcohol and in ether, produced by boiling baphiin with alcoholic potash and precipitating with hydrochloric acid. [V. Schröder (B, 270).]

BAPHICUS (Lat.), adj. Ba^{2}f(ba^{3}f)'i^{2}k-u^{3}s(u^{4}s). Gr., βαφικός (from βάπτειν, to dye). Pertaining or adapted to dyeing. [A, 311.]

BAPHIIN, n. Ba^{2}f'i^2-i^{2}n. A substance of the composition $C_{12}H_{10}O_4$, obtained by T. Anderson from the wood of *Baphia nitida*; colorless laminar crystals insoluble in water, but readily soluble in alcohol and in ether. [V. Schröder (B, 270).]

BAPHIINITIN, n. Ba^{2}f-i^{2}n'i^{2}t-i^{2}n. A substance of the composition n (C_4H_4O), precipitated when baphiin is boiled with aqueous potash. [B, 270.]

BAPHIINITONE, n. Ba^{2}f-i^{2}n'i^{2}t-on. Ger., *Baphiniton*. A substance, $C_{26}H_{26}O_6$, obtained from baphiin by boiling with a strong aqueous solution of caustic potash in the absence of air. [B, 270.]

BAPHORRHIZA (Lat.), n. f. Ba^{2}f(ba^{3}f)-o^{2}r-ri(re)'za^3. From βαφή, a dyeing, and ῥίζα, a root. See ANCHUSA.—**B. tinctoria.** See ANCHUSA *tinctoria*.

BAPHULEE (Hind.), n. The fruit of *Pastinaca grandis*. [W. Dymock, "Pharm. Journ. and Trans.," June 14, 1879, p. 1016 (B).]

BAPTES (Lat.), n. f. Ba^{2}p(ba^{3}p)'tez(tas). Gr., βάπτης. Gen., *bap'tæ*. See BAPTUS.

BAPTICUS (Lat.), adj. Ba^{2}p(ba^{3}p)'ti^{2}k-u^{3}s(u^{4}s). See BAPHICUS.

BAPTIN, n. Ba^{2}p'ti^{2}n. Fr., *baptine*. Ger., *Baptin*. A glucoside, obtained by Schroeder from *Baptisia tinctoria*, forming microscopic circular crystals readily soluble in water. It has a feebly cathartic action. [B, 270.]

BAPTISECULA (Lat.), n. f. Ba^{2}p(ba^{3}p)-ti^2-se^{2}k'u^2(u^4)-la^3. The *Centaurea cyanus*. [B, 121.]—**Flores baptiseculæ.** The flowers of *Centaurea cyanus*. [B, 180.]

BAPTISIA (Lat.), n. f. Ba^{2}p(ba^{3}p)-ti^{2}s'i^2-a^3. From βάπτειν, to dye. Fr., *baptisie*. Of Ventenat, a genus of leguminous herbs belonging to the tribe *Podalyrieæ*, distinguished by the bilabiate calyx obtuse at the base, the corolla made up of nearly equal petals, of which those composing the carina are dorsally connate, the deciduous stamens, and globose or ovoid many-seeded legume. [B, 19, 42.]—**B. alba** [R. Brown]. Syn.: *Sophora* [Walt.] (seu *Podalyria* [Willdenow], seu *Crotalaria* [Linnæus]) *alba*. A plant 2 to 3 feet high growing in the southern Atlantic states, distinguished by its elliptical oblanceolate leaflets, its caducous, subulate stipules, shorter than the petioles, and its caducous minute bracts enveloping the white flowers. [B. 5, 34, 214.]—**B. australis** [R. Brown]. Syn.: *Sophora australis* [Bot. Mag.], *Podalyria australis* [Ventenat] (seu *cœrulea* [Pursh]). A species with large indigo-blue flowers, obtuse oblong-cuneate leaves, and lanceolate stipules longer than the petiole. It is found in alluvial soils throughout the central and southern United States and is held to possess medicinal properties. [B, 34, 214; "Proc. of the Am. Pharm. Assoc.," xxix, p. 438 (B).]—**B. leucantha** [Torrey and Gray]. A species 2 to 4 feet in height growing throughout the central and western United States, distinguished by its petiolate leaves with obtuse cuneiform-obovate leaflets and lanceolate-linear stipules of the same length as the petioles, and by its racemes of large white flowers. In drying, the plant turns bluish-black. [B, 34.]—**B. nepalensis.** An East Indian species probably identical with the *Piptanthus nepalensis*. [B, 212.]—**B. tinctoria** [R. Brown]. Syn.: *Sophora* [Linnæus] (seu *Podalyria* [Sims]) *tinctoria*. Wild indigo. A bushy plant with subrotund obovate bluish-green leaflets, setaceous obsolete stipules, and yellow flowers in loose terminal racemes, growing in dry places throughout the United States and Canada. The plant turns bluish-black on drying. The root, which contains a resinous substance, an alkaloid *baptitoxine*, and two *glucosides*, *baptin* and *baptisin*, is nearly odorless and has a bitter and acrid nauseous taste. The

leaves furnish a dye which is used as a substitute for indigo, and the root affords a black dye. All parts of the full-grown plant, but especially the root and its bark, have emetic and drastic properties, and have been used as a stimulant in fevers and dysentery and as a topical remedy in ill-conditioned ulcerative affections. The young stalks are eaten like asparagus. [B, 34, 81, 173, 214.]

BAPTISIN, n. Ba^{2}p'ti^{2}s-i^{2}n. Fr., *baptisine*. Ger., *Baptisin*. A glucoside obtained by Schröder from *Baptisia tinctoria*, forming spherical crystals, insoluble in water, soluble in alcohol. It has no medicinal action. [B, 270.]

BAPTISMA (Lat.), n. n. Ba^{2}p(ba^{3}p)-ti^{2}z(ti^{2}s)'ma^3. Gen., *baptis'matos* (*-tis*). Gr., *βάπτισμα* (from *βάπτειν*, to dip). Lit., baptism, immersion; a bath. [A, 322.]

BAPTISTERIUM (Lat.), n. n. Ba^{2}p(ba^{3}p)-ti^{2}st-e(a)'ri^2-u^{3}m-(u^{4}m). Gr., *βαπτιστήριον*. A swimming-bath. [Pliny (A, 311).]

BAPTITOXINE, n. Ba^{2}p-ti^2-to^{2}x'en. Fr., *baptitoxine*. Ger., *Baptitoxin*. A highly poisonous alkaloid obtained by Schröder from the *Baptisia tinctoria*. It is a tonic in small doses; poisonous doses hasten the respiration, exaggerate the excito-motor power, and produce death by asphyxia. [B, 270; "Lancet," Oct. 31, 1885, p. 821.]

BAPTORRHŒA (Lat.), n. f. Ba^{2}p(ba^{3}p)-to^{2}r-re'(ro^2'e^2)-a^3. From *βάπτειν*, to dip, steep, infect, and *ῥεῖν*, to flow. A generic term proposed by R. G. Mayne for all discharges from mucous surfaces due to infection, such as gonorrhœa. [A, 380; G.]

BAPTORRHŒAL, adj. Ba^{2}p-to^{2}r-re'a^{2}l. Pertaining to or of the nature of baptorrhœa. [L, 116.]

BAPTOTHECORRHŒA (Lat.), n. f. Ba^{2}p(ba^{3}p)-to(to^2)-the-(tha)-ko^{2}r-re'(ro^2'e^2)-a^3. From *βάπτειν*, to infect, *θήκη*, a sheath, and *ῥεῖν*, to flow. R. G. Mayne's term for gonorrhœa in women. [L, 116.]

BAPTOTHECORRHŒAL, adj. Ba^{2}p-to-the-ko^{2}r-re'a^{2}l. Pertaining to or of the nature of baptothecorrhœa. [L, 116.]

BAPTURETHRORRHŒA (Lat.), n. f. Ba^{2}p(ba^{3}p)-tu^2(tu)-re-(ra)thro^{2}r-re'(ro^2'e^2)-a^3. From *βάπτειν*, to infect, *οὐρήθρα*, the urethra, and *ῥεῖν*, to flow. R. G. Mayne's term for gonorrhœa of the urethra (*i. e.*, in men). [L, 116.]

BAPTURETHRORRHŒAL, adj. Ba^{2}p-tu^2-re-thro^{2}r-re'a^{2}l. Pertaining to or of the nature of bapturethrorrhœa. [A, 380.]

BAPTUS (Lat.), n. m. Ba^{2}p(ba^{3}p)'tu^{3}s(tu^{4}s). Gr., *βαπτός*. An old name for some soft bituminous mineral (perhaps amber) of an agreeable odor; so called from its color, although that has been supposed to have been artificial. [Pliny (A, 318); A, 325.]

BAPUNGA (Teloogoo), n. The *Psoralea corylifolia*. [B, 172.]

BAQUET (Fr.), n. Ba^3-ke^2. A trough or tub. [A, 342.]—**B. magnétique.** A sort of trough employed by the early experimenters in mesmerism. [A, 300, 342, 385.]

BAQUOIS (Fr.), n. Ba^3-kwa^3. See PANDANUS.

BAR, n. Ba^{3}r. O. E., *barre*. Fr., *barre*. Ger., *Barre*. 1. In embryology, see ARCH. 2. A band running across the body or other part of an animal, of a different color from that of the surrounding surface. [L.] 3. An inward prominence of the symphysis pubis, encroaching on the pelvic cavity. [A, 385.] 4. The interval between the incisor and the molar teeth in the solipeds. [A, 385; L, 73.] 5. The horny processes of a horse's foot which run obliquely inward from the heel, including the frog between them. 6. The skeletal elements of a branchial arch. 7. When qualified by an adjective denoting a bone, the cartilaginous rod from which that bone is developed. [L, 13; 201.]—**Articulo-Meckelian b.** The cartilaginous structure from which the lower jaw is developed. [L, 202.]—**B. of the neck of the bladder.** See *Inter-ureteric b.*—**Basal b.** In ichthyology, a cartilaginous b. in the embryo, from which the fin is developed. [L, 210.]—**Basi-trabecular b.** The forward continuation of the base of the orbito-nasal septum, which in birds is the rudiment of the beak. [L, 121.]—**Branchial b's.** See *B.* (6th def.).—**First visceral b's.** See TRABECULÆ *cranii*.—**Interureteric b.** A ridge on the floor of the bladder, running between the orifices of the ureters; composed of muscular tissue and made prominent by muscular contraction, so that it sometimes causes an impediment to urination. [Rockwell, "N. Y. Med. Jour.," July 17, 1886, p. 82.]—**Parachordal b's.** See *Parachordal* CARTILAGES.—**Trabecular b's.** See TRABECULÆ *cranii*.

BAR (Fr., Sp.), n. Ba^{3}r. 1. A mildly purgative mineral spring in the department of Puy-de-Domes, France. [L, 32.] 2. A village in Coruña, Spain, where there are springs containing iron and chloride of sodium. [L, 49.]

BAR (Hind.), n. The *Ficus bengalensis*. [B, 181.]

BARA (Lat.), n. f. Ba(ba^3)'ra^3. Gr., *βάρα* (from *βαρεῖν*, to oppress). An old term for gravedo (*q. v.*). [A, 322.]

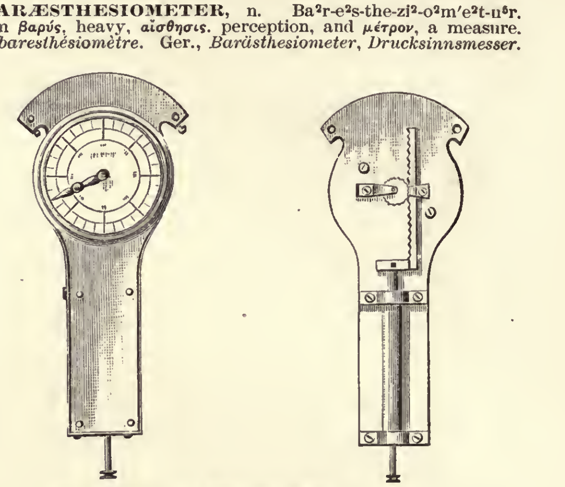
BARABASCO (It.), n. Ba^3-ra^3-ba^{3}s'ko. The mullein (*Verbascum thapsus*). [B.]

BARABET (Bengal.), n. A plant said to be the *Calamus fasciculatus*. [B, 181.]

BARAC, n. See BARACH.

BARACARA, n. The *Erythrina corallodendron*. [B, 121.]

BARACAYA-IAU-NAMBI, n. A Guarani name for the *Jatropha gossypifolia*. [B, 121.]



BARACH, BARACH PANIS, n's. Alchemical names for *nitrum salis*. [Ruland, Johnson (A, 325).]

BARACI, n. A place in Corsica, where there is a hot spring. [A, 385.]

BARACLÁCHI (Bengal., Hind.), n. The *Amomum subulatum*. [B, 181.]

BARACOCCA, n. From *πραικόκκιον*. The apricot. [B, 121.]

BARÆSTHESIOMETER, n. Ba^{2}r-e^{2}s-the-zi^2-o^{2}m'e^{2}t-u^{6}r. From *βαρύς*, heavy, *αἴσθησις*. perception, and *μέτρον*, a measure. Fr., *baresthésiomètre*. Ger., *Barästhesiometer*, *Drucksinnsmesser*.

EULENBURG'S BARÆSTHESIOMETER. [A, 319.]

An instrument devised by Eulenburg for testing the sense of pressure in different parts of the body. It consists of a button at the end of a spiral spring which, as it is pressed upon, turns a registering needle on an index. [L, 57.]

BARAGASH (Bengal.), n. The *Croton oblongifolium*. [W. Dymock, "Pharm. Jour. and Trans.," Nov., 1879, p. 381 (B).]

BARAICE, n. The *Veratrum album*. [B, 121.]

BARAKAVAR, n. The *Crinum asiaticum*. ["Proc. of the Am. Pharm. Assoc.," xxix, p. 127 (B).]

BARA-KULINJAN (Hind.), n. See ALPINIA *golanga*.

BARAL (Hind.), n. The *Artocarpus lakoocha*. [B, 172.]

BARALOU, n. A Carib name for the *Canna*. [B, 121.]

BARA-MAI (Hind.), n. The galls of *Tamarix gallica*. [E. M. Holmes, "Pharm. Jour. and Trans.," Nov. 10, 1877, p. 362 (B).]

BARA-MARECA (Malay), n. The *Canavalia gladiata*. [B, 172.]

BARAMBHI (Hind.), n. The *Herpestes* (*Gratiola*) *monnieria*. [B, 181.]

BARAMBIO (Sp.), n. Ba^{3}r-a^{3}m'bi^2-o. A place in Alava, Spain, where there are cold sulphurous springs. [L, 49.]

BARAMETZ, BARANETZ, n's. See BAROMETZ.

BARANILINE, n. Ba^{2}r-a^{2}n'i^{2}l-en. From *βαρύς*, heavy, and *aniline* (*q. v.*). Fr., *baraniline*. Any aniline boiling between 200° and 260° C. [A, 385.]

BARANNIK GORNOI (Russ.), n. *Arnica montana*. [L, 77.]

BARAQUE HOSPITALIÈRE (Fr.), n. Ba^{3}r-a^{3}k o-spi^{2}t-a^{3}l-i^2-e^{2}r. See *Field* HOSPITAL.

BARAQUETTE (Fr.), n. Ba^{3}r-a^3-ke^{2}t. Razous's term for a catarrhal epidemic that prevailed in France in 1761. [A, 385; L, 32.]

BARAS, n. See ALBARAS.

BARATCHURI, n. See BAATCHURI.

BARATHRON (Lat.), n. n. Ba^{2}r(ba^{3}r)-a^{2}th(a^{3}th)'ro^{2}n. Gr., *βάραθρον*. An ancient name for savine (*Juniperus sabina*). [B, 121.]

BARATRANTHUS (Lat.), n. n. Ba^{2}r(ba^{3}r)-a^{2}t(a^{3}t)-ra^{2}n(ra^{3}n)'-thu^{3}s(thu^{4}s). See LORANTHUS.

BARATRON (Lat.), n. n. Ba^{2}r(ba^{3}r)-a^{2}t(a^{3}t)'ro^{2}n. See BARATHRON.

BARATTE (Fr.), n. Ba^{3}r-a^{3}t. The *Nymphœa alba*. [B, 121.]

BARB, n. Ba^{3}rb. From *barba*, the beard. Fr., *barbe* (1st and 2d def's), *barbillon* (3d def.). 1. In botany, a tuft of long, delicate, hair-like processes springing from any part of a plant; sometimes used in the same sense as *arista* (*q. v.*); especially, the hairs of the pappus of the *Compositæ* when they are very long and slender. [B.] 2. That portion of a feather which consists of branches from the main shaft (and from the after-shaft also when that is present) forming a flat structure on the side of the shaft. [L, 194.] 3. A fold on either side of the frænum linguæ in the horse, etc., at the opening of the duct of the sublingual gland. [L, 13.] 4. See BARBULE (3d def.).

BARBA (Lat.), n. f. Ba^{3}r'ba^3. Gr., *πώγων*. Fr., *barbe*. Ger., *Bart*. It., Sp., *barba*. 1. The beard. [G.] 2. In fishes, a kind of spine with the teeth turned backward. [L, 108.] 3. The smaller claws of a *Polypus*. [L, 104.] 4. The feathers on the region of the crop in birds. [L.] 5. In botany, see. BARB.—**B. Aronis.** The *Arum maculatum*. [B, 180.]—**B. capræ.** 1. Of Tournefort, the genus *Spiræa*. 2. Of Bauhin and others, the *Spiræa aruncus*. [B, 211.]—**B. capræ floribus compactis** [Bauhin]. The *Spiræa ulmaria*. [B, 211.]—**B. capræ floribus oblongis.** The *Spiræa aruncus*. [B, 211.]—**B. capri.** 1. Of J. Bauhin, the *Spiræa aruncus*. 2. Of Cæsalpinus, the *Actæa spicata*. [B, 211.]—**B. caprina** [Sterb.]. Fr., *barbe de bouc*. The *Clavaria coralloides*. [B, 121, 211.]—**B. corollæ ringentis.** The lower lip of a ringent corolla.

[L, 119.]—**B. de mono.** A term applied to several species of *Triplaris.* [B, 121.]—**B. hirci.** A name applied to several species of *Tragopogon.* [B, 211.]—**B. Jovis.** Fr., *barbe de Jupiter.* 1. Of Tournefort, the genus *Anthyllis*, and of Bauhin, the *Anthyllis b.-Jovis.* 2. Of Dodonæus, the *Sempervivum tectorum.* 3. Of the chemists, the deposit formed in the neck of a retort in the formation of tin tetrachloride by the distillation of tin with corrosive sublimate. [B, 211; L, 116.]—**B. Jovis africana,** etc. [Boerhaave]. The *Psoralea pinnata.* [B, 211.]—**B. Jovis americana,** etc., **B. Jovis caroliniana.** The *Amorpha fruticosa.* [B, 211.]—**B. Jovis cretica** [Rivinus]. The *Anthyllis Hermanniæ.* [B, 211.]—**B. Jovis frutex** [Parkinson]. The *Anthyllis b.-Jovis.* [B, 200.]—**B. Jovis græca** [Tournefort]. The *Anthyllis Hermanniæ.* [B, 211.]—**B. Jovis pulchre lucens** [J. Bauhin]. The *Anthyllis b.-Jovis.* [B, 211.]—**B. Saturni** [Rumphius]. The *Lycopodium cernuum.* [B, 211.]—**B. tigris.** The *Colletia ferox.* [B, 270; "Proc. of the Am. Pharm. Assoc.," xxx, p. 138 (B).]—**Flores barbæ capræ.** The flowers of *Spiræa aruncus.* [B, 180.]—**Flores barbæ caprinæ.** The flowers of *Spiræa ulmaria.* [B, 180.]—**Folia barbæ capræ.** The leaves of *Spiræa aruncus.* [B, 180.]—**Folia barbæ Jovis.** The leaves of *Sempervivum tectorum.* [B, 180.]—**Herba barbæ caprinæ.** The herb of *Spiræa ulmaria.* [B, 180.]—**Herba barbæ Jovis.** See *Folia barbæ Jovis.*—**Radix barbæ Aronis.** The rhizome of *Arum maculatum.* [B, 180.]—**Radix barbæ capræ.** The root of *Spiræa aruncus.* [B, 180.]—**Radix barbæ caprinæ.** The root of *Spiræa ulmaria.* [B, 180.]—**Radix barbæ hirci.** The root of *Tragopogon porrifolius* and that of *Tragopogon pratensis.* [B, 180.]

BARBADDAH, n. A North Queensland name for the *Entada scandens.* [B, 121.]

BARBA DE PIEDRA (Sp.), n. Ba^{3}r'ba^3 da pe-a'dra^3. An herb of undetermined botanical origin, used in the Argentine Republic as a remedy for toothache. ["Proc. of the Am. Pharm. Assoc.," xxiv, p. 762 (B).]

BARBADINE, n. The *Passiflora quadrangularis.* [B, 121.]

BARBADOES LEG, n. See under ELEPHANTIASIS and LEG.

BARBADOSKIRSCHEN (Ger.), n. pl. Ba^{3}r-ba^3'dos-kersh-e^{2}n. The fruit of the *Malpighia punicæfolia.* [B, 180.]

BARBADOSTHEER (Ger.), n. Ba^{3}r-ba^3'dos-tar. Barbadoes petroleum. [B, 180.]

BARBAJOU, n. Probably a contraction of *barba Jovis.* A Languedoc name for the *Sempervivum tectorum.* [B, 121, 173.]

BARBALOIN, n. Ba^{3}r-ba^{2}l-o'i^{2}n. From *Barbadoes* and *aloes.* Fr., *barbaloïne.* Ger., *Barbaloin.* A neutral crystalline substance, $C_{34}H_{36}O_{14} + H_2O$ (T. and H. Smith), very soluble in warm water and in alcohol, supposed to be the active principle of Barbadoes aloes. It has been regarded as an anthracene derivative, and appears to be identical with zanaloin (*q. v.*). It forms substitution products with bromine (bromaloin) and with chlorine (chloraloin). [B, 2, 5, 270.]

BARBARAKRAUT (Ger.), n. Ba^{3}rb'a^3-ra^3-kra^3-ut. The *Barbarea vulgaris.* [B, 270.]

BARBAREA (Lat.), n. f. Ba^{3}r-ba^{3}r-e(a)'a^3. From *St. Barbara*, who was reputed to have discovered its medicinal properties. Fr., *barbarée.* Ger., *Barbelkraut.* The winter-cress; of R. Brown, a genus of cruciferous plants of the tribe *Arabideæ.* [B, 34.]—**B. arcuata** [Reichenbach]. See *B. vulgaris.*—**B. iberica** [De Candolle]. Syn.: *B. stricta* [Besser], *Cheiranthus ibericus* [Willdenow]. A perennial European herb used like *B. vulgaris*, now regarded as a variety of the latter. [B, 180, 212, 214.]—**B. intermedia** [Boreau]. A variety of *B. vulgaris* having pinnate upper leaves. [B, 212.]—**B. præcox** [R. Brown]. Fr., *cresson des jardins* (ou *des vignes*), *cressonette, cressonnette.* Syn.: *Erysimum præcox* [Smith]. The early winter-cress, Belle-Isle cress, scurvy-grass, land-cress; a small European herb cultivated in the United States. It is employed for salad, and its herb is used like that of *B. vulgaris.* The *B. præcox* of Fries is the *B. vulgaris.* [B, 19, 180, 212, 214.]—**B. stricta.** See *B. iberica.*—**B. taurica** [De Candolle]. Syn: *Erysimum arcuatum* [Presl]. A perennial species growing in the Taurus and in the Caucasus, probably a variety of *B. vulgaris.* [B, 180, 212, 214.]—**B. vulgaris** [R. Brown]. Fr., *herbe de Sainte-Barbe* (ou *aux charpentiers*, ou *de Saint-Julien*, ou *de Sainte-Marguerite*), *rondotte, julienne jaune, cresson de terre.* Ger., *gemeines Barbenkraut.* Syn.: *Erysimum b.* [Linnæus]. A perennial herb 1 or 2 feet high, growing throughout Europe and the northern United States. It was formerly used as an antiscorbutic, and its roots were considered feebly detergent; it is now used only in salad. [A, 301; B, 121, 180, 214.]—**Herba barbareæ.** Ger., *Barbelkraut.* The herb of *B. vulgaris* and other species of *B.* [B, 180.]

BARBARENKRAUT (Ger.), n. Ba^{3}r'ba^{3}r-e^{2}n-kra^3-ut. The *Barbarea vulgaris.* [L, 80.]

BARBARESQUE (Fr.), n. Ba^{3}r-ba^{3}r-e^{2}sk. See BARBARINE.—**B. sauvage.** The *Cucurbita polymorpha verrucosa* (*Melopepo verrucosus*). [B, 121.]

BARBARIA, BARBARICUM (Lat.), n's f. and n. Ba^{3}r-ba-(ba^3)'ri^2-a^3, -ku^{3}m(ku^{4}m). Rhubarb. [L, 84, 119.]

BARBARINE (Fr.), n. Ba^{3}r-ba^{3}r-en. A common name for various cucurbitaceous plants originally brought from Barbary or cultivated there, especially the *Cucurbita polymorpha verrucosa.* [B, 121, 173.] Cf. BARBARESQUE.

BARBARIS (Dutch), n. See BERBERIS.

BARBARISCH (Ger.), adj. Ba^{3}r-ba^{3}r'i^{2}sh. Exotic. [L, 30.]

BARBARON, BARBARUM (Lat.), n's n. From βάρβαρος, foreign (to Greece). Ba^{3}rb'a^{3}r-o^{2}n, -u^{3}m(u^{4}m). An ancient sticking-plaster mentioned by Scribonius Largus and Galen; so called because it was invented by a person who was not a Greek. [A, 322, 325.]

BARBASCO (Sp.), n. Ba^{3}r-ba^{3}s'ko. 1. A West Indian name for the *Jacquinia armillaris.* [B, 121.] 2. A Guayaquil plant, said to be a species of *Verbascum*, used to poison fish. [Bory (B, 121).]

BARBASIN, n. The *Boletus frondosus.* [B, 121.]

BARBATE, adj. Ba^{3}rb'at. Lat., *barbatus.* Fr., *barbé.* Ger., *bebartet.* In botany, provided with barbs (see BARB); occasionally used in the sense of aristate. [B, 19.]

BARBATI (Bengal.), n. The *Vigna sinensis* and the *Vigna catjang.* [B, 181.]

BARBATIC ACID, n. Ba^{3}r-ba^{2}t'i^{2}k. Fr., *acide barbatinique.* Ger., *Barbatinsäure.* Syn.: *usnetic acid.* An acid, $C_{19}H_{20}O_7$, obtained from the *Usnea barbata.* [B, 257.]

BARBATIGRIS, n. See BARBA *tigris.*

BARBATIMÃO (Port.), n. Ba^{3}r-ba^{3}t-e-mo^{2}n^2'. Lat., *cortex b.* (seu *astringens brasiliensis*). A Brazilian name for several astringent barks used in medicine and in tanning, including, according to Guibourt, those of the *Stryphnodendron b.* [Martius], the abaremotemo of Pison (*Pithecolobium avaremotemo* [Martius]), the angico of Brazil (*Acacia angico* [Martius]), and the jurema of Brazil (*Acacia jurema* [Martius]). [B, 121, 270.]

BARBATINE (Fr.), n. Ba^{3}r-ba^{3}t-en. An edible fruit of Cayenne. [A, 385.]

BARBATINIQUE (Fr.), adj. Ba^{3}r-ba^3-ten-ek. Pertaining to or derived from the *Usnea barbata.* See BARBATIC ACID.

BARBATINSÄURE (Ger.), n. Ba^{3}r-ba^3-ten'zoir-e^2. See BARBATIC ACID.

BARBATISEPALUS (Lat.), adj. Ba^{3}r-ba(ba^3)-ti^2-se^{2}p'a^3-lu^{3}s-(lu^{4}s). Having barbate sepals; a botanical species-name. [B, 215.]

BARBATULUS (Lat.), adj. Ba^{3}rb-a^{2}t(a^{3}t)'u^2(u^4)-lu^{3}s(lu^{4}s). Having a small or thin beard. [A, 318.]

BARBATUS (Lat.), adj. Ba^{3}rb-a(a^3)'tu^{3}s(tu^{4}s). See BARBATE.

BARBAZAN (Fr.), n. Ba^{3}r-ba^3-za^{3}n^2. A place in the department of the Haute-Garonne, France, where there are cold springs containing calcium sulphate. [A, 385; L, 49.]—**B. de bouc.** The *Tragopogon pratensis.* [L, 105.]—**B. de bouquin.** The *Clavaria coralloides.* [L, 105.]

BARBE (Fr.), n. Ba^{3}rb. See BEARD, BARB, and BARBA. In the pl., *b's*, small excrescences on the palate or under the tongue, in cattle and horses, interfering with mastication. [L, 41.]—**B. à Dieu.** The *Clematis vitalba.* [B, 88.]—**B. bleue.** The *Echium vulgare.* [B, 121.]—**B. de bouc.** 1. The *Tragopogon pratensis.* 2. The *Spiræa aruncus.* 3. The *Clavaria coralloides.* 4. The *Hydnum imbricatum.* [B, 121, 173.]—**B. de bouquin.** The *Clavaria coralloides.* [B, 173.]—**B. de capucin.** 1. The *Cichorium crispum.* 2. The *Nigella cærulea* (*damascena*). 3. The *Usnea barbata.* [B, 173.]—**B. de chèvre.** 1. The *Eryngium campestre.* 2. The *Spiræa aruncus.* 3. The *Clematis vitalba.* 4. The *Clavaria coralloides.* 5. The *Hydnum repandum.* [B; B, 173.]—**B. de Dieu.** A name applied to several species of *Andropogon.* [B, 121.]—**B. de Jupiter.** 1. The *Valeriana pyrenaica* or, according to some, the *Valeriana rubra.* 2. The *Rhus cotinus.* 3. The *Anthyllis barba Jovis.* 4. The *Sempervivum tectorum.* [B, 121.]—**B. de moine.** The *Cuscuta epithymum.* [B, 121.]—**B. de renard.** The *Astragalus massiliensis.* [B, 121.]—**B. de vache.** The *Hydnum repandum.* [B, 121.]—**B. du calamus scriptorius.** The white transverse fibres on the floor of the fourth ventricle of the brain, being the superficial roots of the auditory nerve. [L, 49.]—**B. espagnole.** The *Tillandsia usnoides.* [B, 121.]—**B. noire.** The *Buxus sempervirens.* [B, 121.]—**Petite b. de chèvre.** The *Spiræa ulmaria.* [B, 121.]

BARBÉ (Fr.), adj. Ba^{3}r-ba. See BARBATE.

BARBEAU (Fr.), n. Ba^{3}r-bo. 1. The *Centaurea cyanus*, official under this title in the Fr. Cod.; also other species of *Centaurea.* 2. The *Nigella cærulea* (*damascena*). [B, 113, 173.] 3. See BARBEL (1st def.).—**B. de montagne.** The *Centaurea montana.* [B, 121.]—**B. du Levant.** The *Centaurea moschata.* [A, 321.]—**B. jaune.** A yellow-flowered species of *Centaurea*, especially the *Centaurea suaveolens.* [B, 121.]—**B. musqué.** The *Centaurea moschata.* [B, 121.]—**B. vivace.** The *Centaurea montana.* [B, 121.]

BARBEBON, n. The *Tragopogon*, especially the *Tragopogon porrifolium.* [B, 121, 173.]

BARBEL, n. Ba^{3}rb'e^{2}l. 1. The *Cyprinus barbus* (Fr., *barbeau*; Ger., *Flussbarbe*). The roe is said to cause vomiting and purging if eaten to excess, and to be used in some countries as a purgative. [L, 43.] 2. See BARBE. 3. See BARBULE (3d def.).

BARBELKRAUT (Ger.), n. Ba^{3}rb'e^{2}l-kra^3-ut. The herb of *Barbarea vulgaris.* [B, 180.]

BARBELLA (Lat.), n. f., dim. of *barba* (*q. v.*). Ba^{3}r-be^{2}l'la^3. Fr., *barbelle.* Cassini's name for the hairs of the pappus of a composite plant when they are short, thick, and bristly. [B, 1, 19.]

BARBELLATE, adj. Ba^{3}r'be^{2}l-lat. Lat., *barbellatus.* Fr., *barbellé.* Provided with barbellæ. [B, 1.]

BARBELLULA (Lat.), n. f. Ba^{3}r-be^{2}l'lu^2(lu^4)-la^3. Fr., *barbellule.* Cassini's name for the hairs of the pappus of a composite plant when they are small, conical, and pointed, like spines. [B, 1.]

BARBELLULATE, adj. Ba^{3}r-be^{2}l'lu^2-lat. Lat., *barbellulatus.* Fr., *barbellulé.* Provided with barbellulæ. [B, 1.]

BARBENCHOLERA (Ger.), n. Ba^{3}rb'e^{2}n-ch^{2}o^{2}l-e^{2}r-a^3. See under CHOLERA.

BARBENHEDERICH (Ger.), n. Ba^{3}rb'e^{2}n-he^{2}d-e^{2}r-i^{2}ch^2. The *Barbarea vulgaris.* [B, 88.]

BARBENKRAUT (Ger.), n. Ba^{3}rb'e^{2}n-kra^3-ut. The genus *Barbarea.* [B, 180.]—**Gemeines B.** The *Barbarea vulgaris.* [B, 180.]

BARBENRÄUTE (Ger.), n. Ba^{3}rb'e^{2}n-roit-e^2. The *Nasturtium palustre.* [L, 30.]

BARBERIE (Fr.), n. Ba^{3}r-be^{2}r-e. A place in the department of the Loire-Inférieure, France, where there is a cold spring containing sodium bicarbonate. [A, 385; L, 32, 105.]

BARBERINE, n. Ba^{3}r'be^{2}r-en. See BERBERINE.

BARBERON (Fr.), n. Ba^{3}r-be^{2}r-o^{2}n^2. The *Tragopogon porrifolium.* [A, 300.]

BARBERRY, n. Ba^{3}r'be^{2}r-ri^2. See BERBERIS.—**American b.** The *Berberis canadensis.* [B, 138.]—**B. bark.** See BERBERIS (2d def.).—**B. blight.** The *Æcidium berberidis.* [B.] See PUCCINIA.—**B.-bush.** See BERBERIS *vulgaris.*—**B. family.** See BERBERIDACEÆ.—**Essential salt of barberries.** See under BERBERIS.—**Holly-leaved b.** The *Berberis aquifolium.* ["Proc. of the Am. Pharm. Assoc.," xix, p. 298 (B).]—**Nepal b.** The *Berberis aristata* and the *Berberis nepalensis.* [B, 71.]—**Ophthalmic b.** The *Berberis lycium.* [B, 71.]

BARBER'S ITCH, n. Ba^{3}r'bu^{5}rz i^{2}ch. See SYCOSIS *parasitaria.*

BARBES, n. The *Quercus ilex.* [B, 121.]

BARBESIN (Fr.), n. Ba^{3}r-be^2-za^{2}n^2. See BARBASIN.

BARBEUIEÆ (Lat.), n. f. pl. Ba^{3}r-bu^2-i(i^2)'e^2-e(a^3-e^2). From *Barbeuia*, one of the genera. Fr., *barbeuiées.* A series of the *Phytolaccaceæ* characterized by hypogynous stamens and a bilocular ovary composed of two united carpels. [H. Baillon (B, 121).]

BARBEZ, n. See BARBES.

BARBEZIN (Fr.), n. Ba^{3}r-be^2-za^{2}n^2. See BARBASIN.

BARBICELS, n. pl. Ba^{3}rb'i^2-se^{2}ls. Lat., *cilia.* Ger., *Wimpern.* Microscopical processes proceeding from the barbules of a feather, almost solely from those near the apex of the shaft. [L, 194.] See BARBULE (3d def.).

BARBICHE (Fr.), n. Ba^{3}r-besh. The *Nigella cærulea* (*damascena*). [B, 121.]

BARBICORNIS (Lat.), adj. Ba^{3}rb-i^2-ko^{2}rn'i^{2}s. From *barba*, the beard, and *cornu*, a horn. Fr., *barbicorne.* In entomology, having hairs at the bases of the antennæ. [L, 180.]

BARBIERS (Fr.), n. Ba^{3}rb-i^2-a. From Ar., *bahr-bari.* A nervous disease met with on the island of Réunion, considered by Le Roy de Méricourt to be identical with beriberi, but by Vinson as a true myelitis. [Wernich (A, 319).]

BARBIFÈRE (Fr.), adj. Ba^{3}rb-i^2-fe^{2}r. See BARBIGEROUS.

BARBIGEROUS, adj. Ba^{3}rb-i^{2}j'e^{2}r-u^{3}s. Lat., *barbiger* (from *barba*, a beard, and *gerere*, to bear). Fr., *barbigère, barbifère.* Ger., *barttragend.* Bearded. [L, 41, 180.]

BARBIGNON (Fr.), n. Ba^{3}rb-en-yo^{2}n^2. A provincial name for the *Hydnum.* [B, 121.]

BARBILLON (Fr.), n. Ba^{3}rb-el-yo^{2}n^2. 1. See BARBEL. 2. A provincial name for the *Sempervivum tectorum.* [B, 121.]

BARBIMAO, n. See BARBATIMÃO.

BARBINERVIS, BARBINERVIUS (Lat.), adj's. Ba^{3}rb-i^2-nu^{6}r(ne^{2}r)'vi^{2}s(wi^{2}s), -vi^2(wi^2)-u^{3}s(u^{4}s). From *barba*, the beard, and *nervus*, a nerve. In botany, having hairy nervures. [L, 41, 180.]

BARBION (Fr.), n. Ba^{3}rb-i^2-o^{2}n^2. See BARBEAU.

BARBIPES (Lat.), adj. Ba^{3}rb'i^2-pez(pas). From *barba*, the beard, and *pes*, the foot. In entomology, having hairy legs. [L, 41, 180.]

BARBIROSTRIS (Lat.), adj. Ba^{3}rb-i^2-ro^{2}st'ri^{2}s. From *barba*, the beard, and *rostrum*, the beak. Fr., *barbirostre.* Having the beak or proboscis hairy. [L, 41, 180.]

BARBITIUM (Lat.), n. n. Ba^{3}r-bi^{2}sh(bi^{2}t)'i^2-u^{3}m(u^{4}m). See BARBA.

BARBITURIC ACID, n. Ba^{3}rb-i^{2}t-u^2'ri^{2}k. Fr., *acide barbiturique.* Ger., *Barbitursäure.* Syn.: *malonylurea.* A compound, $C_4H_4N_2O_3 = CO\left\langle{NH-CO \atop NH-CO}\right\rangle CH_2$, occurring in prismatic crystals and acting both as a dibasic and as a monobasic acid. [B, 3, 4.]

BARBLAU (Fr.), n. Ba^{3}r-blo. See BARBEAU.

BARBLE, n. Ba^{3}rbl. See BARBEL.

BARBO, n. A Provence name for an edible species of *Boletus.* [B, 121.]

BARBON (Fr.), n. Ba^{3}r-bo^{2}n^2. The ANDROPOGON. [B, 121.]

BARBOT (Fr.), n. Ba^{3}r-bo. The *Centaurea cyanus.* [B. 121.]

BARBOTAN (Fr.), n. Ba^{3}r-bo-ta^{3}n^2. A place in the department of Gers, France, where there are hot sulphurous and ferruginous springs. [A, 319, 385; B; L, 87.]

BARBOTE (Fr.), n. Ba^{3}r-bot. The genus *Vicia.* [A, 300.]

BARBOTER (Fr.), v. tr. Ba^{3}r-bo-ta. To pass a mixture of gases rapidly, in the form of large bubbles, into a small quantity of liquid, especially a viscid liquid, for the purpose of fixing some of them and recovering those that do not dissolve. [A, 301.]

BARBOTEUR (Fr.), n. Ba^{3}r-bo-tu^{5}r. An inverted glass vessel for collecting gases over water. [L, 41.]

BARBOTINE (Fr.), n. Ba^{3}r-bo-ten. 1. A lute. [A, 385.] 2. Of the Fr. Cod., *santonica.* [B, 113.] 3. The *Artemisia judaica.* [A, 385.] 4. The *Tanacetum vulgare.* [B, 121.]

BARBOUQUET (Fr.), n. Ba^{3}r-bu-ka. A vesicular cutaneous disease of the sheep, usually affecting the muzzle, one form of which is said to be due to the itch-mite. [A, 385.]

BARBOUTOUBA, n. A Carib name for the *Epidendrum bifidum.* [B, 121.]

BARBU (Fr.), adj. Ba^{3}r-bu^6. See BARBATE.

BARBULA (Lat.), n. f. Ba^{3}rb'u^2(u^4)-la^3. Dim. of *barba* (*q. v.*). 1. See BARBULE. 2. A genus of mosses. 3. A name applied to several plants having bearded appendages. [B.]—**B. caprina.** The *Spiræa ulmaria.* [B, 180.]—**B. gœttingensis** [Bridel]. The *Tortula gœttingensis* (*ambigua*). [B, 173.]—**B. hirci.** 1. The hairs on the tragus and the antitragus. [L, 34.] 2. The *Tragopogon pratensis* and the *Tragopogon porrifolius.* [B.]—**B. muralis** [Timm]. The *Tortula muralis* [Hedwig]. [B, 173.]—**B. mutica** [Bridel]. The *Tortula æstiva.* [B, 173.]—**B. tragi.** See *B. hirci* (1st def.).—**B. vahliana** [Schultz]. The *Tortula muralis* [English]. [B, 173.]

BARBULACEA (Lat.), n. n. pl. Ba^{3}rb-u^2(u^4)-la(la^3)'se^2(ke^2)-a^3. From *Barbula*, one of the genera. Of Reichenbach, a section of mosses (the *Dicranoidei*). [B, 170.]

BARBULATUS (Lat.), adj. Ba^{3}rb-u^2(u^4)-la(la^3)'tu^{3}s(tu^{4}s). Fr., *barbulé.* Provided with barbules. [L. 116.]

BARBULE, n. Ba^{3}rb'u^{2}l. Lat., *barbula.* Fr., *barbule.* 1. In botany, Necker's term for the small beard-like body formed by the union of the hairs of the peristome in certain mosses. [B, 1.] 2. In the pl. (Lat., *radii, hamuli;* Ger., *Strahlen*), those processes of a feather which are attached to the margins of the barbs. Occasionally they spring from the apex of the main shaft or the after-shaft, where there are no barbs, and sometimes from between the barbs where these are scanty. [L, 194.] 3. One of certain slender pointed processes of the skin arranged around the mouth in some fishes; freely supplied with nerves and supposed to be organs of touch. [L, 1?, 207.]

BARBULEÆ (Lat.), n. f. pl. Ba^{3}rb-u^2(u)'le^2-e(a^3-e^2). Of Dumortier, a section of mosses including the genus *Barbula.* [B, 170.]

BARBULOÏDE (Fr.), adj. Ba^{3}rb-u^{6}l-o-ed. Resembling a barbule. [L, 41.]

BARBULOIDEI (Lat.), n. m. pl. Ba^{3}rb-u^2(u^4)-lo(lo^2)-i^{2}d(ed)'-e^2-i(e). A family of mosses (*Vaginulati acrocarpi*), comprising two genera. [B, 170.]

BARBUQUET (Fr.), n. Ba^{3}rb-u^6-ka. In veterinary medicine, a crack or a postule at the edge of the lip. [L, 41.]

BARBUS (Lat.), n. m. Ba^{3}rb'u^{3}s(u^{4}s). See BARBEL and BARBEAU.

BARBYLE (Fr.), n. Ba^{3}rb-el. The prune. [L, 41.]

BARCA, n. A Malay name for a variety of *Artocarpus.* [B, 121.]

BARCAMAN, n. A species of vegetable turpeth (*Ipomœa*) found in Guzerate. [B, 121.]

BARCELLA (Lat.), n. f. Ba^{3}r-se^{2}l(ke^{2}l)'la^3. Of Drude, a genus of palms; referred by Bentham and Hooker to *Elais.* [B, 42.]

BARCLAYA (Lat.), n. f. Ba^{3}r-kla'a^3. A genus of nymphæaceous plants established by Wallich. [B, 121, 170.]

BARCLAYEÆ [Endlicher], **BARCLAYIDÆ** [Lindley] (Lat.), n's f. pl. Ba^{3}r-kla'e^2-e(a^3-e^2), -i^{2}d-e(a^3-e^2). A tribe of nymphæaceous plants, comprising the single genus *Barclaya.* [B, 121, 170.]

BARDADIA, n. An alchemical term for a pound. [Ruland, Johnson (A, 325).]

BARDANA (Lat.), n. f. Ba^{3}rd-a(a^3)'na^3. Fr., *bardane* [Fr. Cod.]. Ger., *Klettenkraut.* It., Sp., *bardana.* The burdock; the genus *Arctium*, or *Lappa*, especially the species *Arctium lappa* (*Lappa major*). [B.]—**B. major.** The *Lappa major.* [B.]—**B. minor.** Fr., *petite bardane.* The *Xanthium strumarium.* [B.]—**Decoctum bardanæ.** Fr., *décoction de bardane, tisane de bardane* [Fr. Cod.]. A decoction of burdock root (*radix bardanæ*), official in several of the older formularies. The Fr. Cod. directs 20 parts of the root to be infused for two hours in 1,000 parts of boiling distilled water, and strained. [B, 119.]—**Extractum bardanæ.** Fr., *extrait de bardane* [Fr. Cod.]. An aqueous extract of burdock root, official in several of the older formularies, made by evaporating an infusion, a decoction, or a mixture of the expressed juice and water. The Fr. Cod. directs 1 part of the root, cut into small pieces, to be macerated for twelve hours in 5 parts of water; after expression, the residue is to be macerated again in 3 parts of water; the two liquors are then to be mixed, allowed to settle, decanted, and evaporated over a water-bath to the consistence of a soft extract. [B, 113, 119.]—**Herba bardanæ.** The herb of various species of *Lappa.* [B, 270.]—**Herba bardanæ minoris.** The herb of *Xanthium strumarium.* [B, 180.]—**Oleum bardanæ.** Ger., *Klettenwurzelöl.* A preparation made by digesting burdock root in olive-oil; used as a hair-oil. [A, 319.]—**Radix bardanæ** [Russ. Ph.]. Fr., *racine de bardane.* Ger., *Klettenwurzel.* Burdock root; the root of various species of *Lappa*, especially *Lappa officinalis, Lappa macrosperma, Lappa glabra*, and *Lappa tomentosa.* [B, 270.]—**Semen bardanæ.** The seed of various species of *Lappa.* [B, 270.]—**Semen bardanæ minoris.** The seed of *Xanthium strumarium.* [B, 180.]

BARDANE [Fr. Cod.] (Fr.), n. Ba^{3}r-da^{3}n. The burdock; in the Fr. Cod., the root of *Arctium lappa.* [B, 113.]—**B. cotonneuse.** The *Lappa tomentosa.* [B, 173.]—**B. officinale.** The *Lappa officinalis.* [B, 173.]—**Décoction de b.** See *Decoctum* BARDANÆ.—**Extrait de b.** [Fr. Cod.]. See *Extractum* BARDANÆ.—**Grande b.** The *Lappa major* (*officinalis*). [B, 173.]—**Petite b.** The *Xanthium strumarium.* [B, 119.]—**Poudre de b.** [Fr. Cod.]. Burdock root bruised, dried at a heat of about 40° C., powdered in an iron mortar, and passed through a No. 120 silk sieve. [A, 253.]—**Tisane de b.** [Fr. Cod.]. See *Decoctum* BARDANÆ.

BARDANETTE (Fr.), n. Ba^{3}r-da^{3}n-e^{2}t. The *Echinospermum lappula.* [B, 19.]—**B. fausse.** See *B.*

A, ape; **A^2**, at; **A^3**, ah; **A^4**, all; **Ch**, chin; **Ch^2**, loch (Scottish); **E**, he; **E^2**, ell; **G**, go; **I**, die; **I^2**, in; **N**, in; **N^2**. tank;

BARDAQUE (Fr.), n. Ba^{3}r-da^{3}k. See ALCARRAZA.

BARDÈ (Fr.), n. Ba^{3}r-de^2. See BARDISTUS *cibarius*.

BARDEAU (Fr.), n. Ba^{3}r-do. The *Viburnum lantana*. [B, 173.]

BARDISTUS (Lat.), n. m. Ba^{3}rd-i^{2}st'u^{3}s(u^{4}s). A genus of the *Cerambycidæ*. [L, 49.]—**B. cibarius.** Fr., *bardè*. A species the larvæ of which are edible. [A, 321, 385.]

BARDOTHIER (Fr.), **BARDOTTIER** (Fr.), n's. Ba^{3}r-do-ti^2-a. The *Imbricaria borbonica*. [B, 121, 173.]

BARÉGES (Fr.), n. Ba^{3}r-azh. A village in the department of the Hautes-Pyrénées, France, where there are hot springs containing calcium carbonate, sodium chloride, magnesium chloride, sodium sulphate, iron sulphate, sodium sulphide, sodium iodide, sodium silicate, aluminium silicate, calcium silicate, bituminous matter, and hydrosin. The waters are drank and used as baths and douches in the treatment of chronic articular affections, atonic wounds, paralyses, skin diseases, and catarrhs. [A, 321, 363.]—**Factitious B.-water.** Ger., *künstliches B.-Bad*. See BAIN *dit de B.*

BAREGIN, n. Ba^{2}r'e^{2}j-i^{2}n. Fr., *barégine*. Ger., *Baregin*. Sp., *baregina*. Syn.: *hydrosin*, *glairin*, *plombierin*, *glairidin*, *zoidin*, *zoogene*, *sulphurain*. An organic gelatinous, nitrogenous substance obtained from certain sulphurous waters by evaporation, or deposited spontaneously on the sides of the basins and conduits; so called from its having been first discovered at Baréges. It is largely made up of *Confervæ* and *Oscillatoriæ*. [B, 2, 15, 270.]

BÄRENBEERE (Ger.), n. Bar'e^{2}n-bar-e^2. The *Arctostaphylos uva ursi*. [B.]

BÄRENBLUST (Ger.), n. Bar'e^{2}n-blust. The genus *Rhododendron*. [A, 315.]

BARENCOCO, n. A Madagascar name for a gum-resin resembling dragon's-blood. [B, 121.]—**Litin b.** See *B.*

BÄRENDILL (Ger.), n. Bar'e^{2}n-di^{2}l. The *Meum athamanticum*. [B, 180; L, 30.]

BARENDJAN, n. See BADENDJAN.

BÄRENDRECK (Ger.), n. Bar'e^{2}n-dre^{2}k. Licorice. [B, 270.]

BÄRENFACKEL (Ger.), n. Bar'e^{2}n-fa^{3}k-e^{2}l. See BÄRENBEERE.

BÄRENFENCHEL (Ger.), n. Bar'e^{2}n-fe^{2}nch^2-e^{2}l. See BÄRENDILL.

BÄRENFETT (Ger.), n. Bar'e^{2}n-fe^{2}t. Bear's grease. [B, 180.] See *Axungia* URSI.

BÄRENFUSS (Ger.), n. Bar'e^{2}n-fus. The herb and root of *Helleborus fœtidus*. [B, 180.]

BÄRENKLAU (Ger.), n. Bar'e^{2}n-kla^3-u. The genus *Heracleum*, especially the *Heracleum sphondylium*. [B, 180.]—**Aechte B., B'enkraut.** The *Acanthus mollis*. [B, 180.]—**Deutsche B.** See *Unechte B.*—**Dornige B.** See ACANTHUS *spinosa*.—**Gemeine B., Unechte B.** The *Heracleum sphondylium*. [B; L, 30.]—**Weiche B.** The *Acanthus mollis*. [B, 180.]

BÄRENKLAUE (Ger.), n. Bar'e^{2}n-kla^3-u-e^2. 1. See BÄRENKLAU. 2. The *Euryangeium sumbul*. ["Proc. of the Am. Pharm. Assoc.," xxv, p. 171 (B).]

BÄRENKLEE (Ger.), n. Bar'e^{2}n-kla. The *Melilotus officinalis*. [B, 180.]

BÄRENKNOBLAUCH (Ger.), n. Bar'e^{2}n-kno^{2}b-la^3-uch^2. See BÄRENLAUCH.

BÄRENKOTH (Ger.), n. Bar'e^{2}n-kot. Lit., bear's dung; in mineralogy, dross. [A, 315.]

BÄRENKRAUT (Ger.), n. Bar'e^{2}n-kra^3-ut. See BÄRENBEERE.

BÄRENLAUCH (Ger.), n. Bar'e^{2}n-la^3-uch^2. The wild garlic (*Allium ursinum*). [A, 315; B, 180; L, 30.]

BÄRENMOOS (Ger.), n. Bar'e^{2}n-mos. The *Polytrichium commune*. [L, 46.]

BÄRENOHR (Ger.), n. Bar'e^{2}n-or. The wind-seed (*Arctotis*). [L, 46.]—**B'primel.** See BÄRENÖHRCHEN.

BÄRENÖHRCHEN (Ger.), **BÄRENÖHRLEIN** (Ger.), n's. Bar'e^{2}n-u^{5}r-ch^{2}e^{2}n, -lin. The *Primula auricula*. [B, 180.]

BÄRENSCHLAMM (Ger.), n. Bar'e^{2}n-shla^{3}m. In mineralogy, dross. [A, 315.]

BÄRENSCHMALZ (Ger.), n. Bar'e^{2}n-shma^{3}ltz. See BÄRENFETT.

BÄRENSCHOTE (Ger.), n. Bar'e^{2}n-shot-e^2. The wild licorice (*Astragalus glycyphyllus*). [A, 315.]

BÄRENTATZE (Ger.), n. Bar'e^{2}n-ta^{3}tz-e^2. The *Heracleum sphondylium*. [B, 180.]

BÄRENTRAUBE (Ger.), n. Bar'en-tra^3-ub-e^2. See BÄRENBEERE.—**B'nblätter.** The leaves of *Arctostaphylos uva ursi*. [B.]—**Gemeine B.** The *Arctostaphylos officinalis*. [B, 180.]

BÄRENWURZ (Ger.), n. Bar'e^{2}n-vurtz. The *Helleborus viridis*. [B, 180.]

BÄRENWURZEL (Ger.), n. Bar'e^{2}n-vurtz-e^{2}l. See BÄRENKLAU.

BÄRENZEHE (Ger.), n. Bar'en-tza-he^2. The dandelion (*Leontodon taraxacum*). [A, 315.]

BÄRENZUCKER (Ger.), n. Bar'e^{2}n-tzuk-e^{2}r. Licorice. [B, 270.]

BARF-ELIM (Pers.), n. The *Ranunculus edulis*. [B, 121.]

BARFLEUR (Fr.), n. Ba^{3}r-flu^{5}r. A sea-bathing station in the department of the Manche, France. [A, 385; L, 87.]

BARGADA, n. The *Ipomœa maritima*. [B.]

BARGOU, n. Ba^{3}r'gu. See BURGOO.

BARHAL (Hind.), n. The *Artocarpus lakoocha*. [B, 181.]

BARHALYA (Lat.), n. f. Ba^{3}r-ha^{2}l(ha^{3}l)'ya^3. Adopted from the Chaldee name for fennel. A section of the genus *Fœniculum*. [B, 121.]

BARHAMIA (Lat.), n. f. Ba^{3}r-ha^{2}m'i^2-a^3. From *Barham*, an English botanist. See CROTON.

BARHANTÁ (Hind.), n. The *Solanum indicum*. [B, 181.]

BARIC, adj. Ba'ri^{2}k. Lat., *baricus*. Containing or pertaining to barium. [B.]

BARIDIIDES (Lat.), n. m. pl. Ba^{2}r(ba^{3}r)-i^{2}d-i(i^2)'i^{2}d-ez(as). A subfamily of the *Hylesinidæ*. [L, 267.]

BARIGLIA, n. Ba^{2}r-i^{2}l'ya^3. See BARILLA.

BARIGOULE (Fr.), n. Ba^{3}r-i^2-gul. The *Agaricus Eryngii*. [B, 173.]

BARI-KASONDI, n. The *Cassia occidentalis*. ["Proc. of the Am. Pharm. Assoc.," xxvi, p. 166 (B).]

BARILLA, n. Ba^{2}r-i^{2}l'la^3. Fr., *barille*. Sp., *barilla*. 1. (Also called Spanish b.) an impure sodium carbonate obtained by the incineration of various terrestrial plants of the genera *Salsola*, *Salicornia*, and *Chenopodium*. It occurs in hard, porous masses, of a grayish-blue color, which, on exposure, become covered with a crust of saline matter. [B, 5.] 2. The *Batis maritima*. [B, 19.]—**B. de cobre** (Sp.). See *B.* COPPER.—**B'kupfer** (Ger.). See *B.* COPPER.—**B. of Aiguemortes.** Fr., *blanquette*. A variety obtained from several plants, containing from 3 to 8 per cent. of sodium carbonate. [L, 120.]—**B'soda** (Ger.). See *B.* (1st def.).—**British b.** 1. Kelp. [B, 19.] 2. Black ash, soda-ball; a substance produced in the first stage of the manufacture of sodium carbonate from sodium sulphate; prepared by heating the latter with its own weight of limestone and half its weight of fine coal. It is a black mass consisting of sodium sesquicarbonate and calcium sulphide. [B, 5.]—**Canary b.** A variety made from the *Salsola kali*. [L, 120.]—**Copper b.** See *B.* COPPER.—**French b.** See *B. of Aiguemortes*, *Narbonne b.*, and *Normandy b.*—**Narbonne b.** Salicor; a variety made from the *Salicornia annua* or the *Salicornia herbacea*, containing from 14 to 15 per cent. of sodium carbonate. [L, 120.]—**Normandy b.** Normandy soda; a variety made from *Fuci*. [L, 120.]—**Sicily b.** A variety made chiefly from the *Salsola sativa*, containing 55 per cent. of sodium carbonate. [Fée (L, 120).]—**Spanish b.** See *B.* (1st def.).

BARILLE (Fr.), n. Ba^{3}r-el-y'. 1. The *Salsola sativa*. [B.] 2. See BARILLA.

BARILLET, n. Ba^{2}r'i^{2}l-le^{2}t. From Fr., *barillet*, a little cask. 1. The tympanum. [L, 41.] 2. In embryology, a vesicle. [Needham (A, 4).]

BARILLOR, n. Ba^{2}r-i^{2}l'lo^{2}r. See BARILLA (1st def.).

BARINJ (Pers.), n. The *Oryza sativa*. [L, 77.]

BARINKA (Teloogoo), n. The *Epicarpurus orientalis*. [B, 172.]

BARIO (It., Sp.), n. Ba^{3}r'i^2-o. See BARIUM.

BARITA (It., Sp.), **BARITE** (Fr.), n's. Ba^{3}r-e'ta^3, -et. See BARYTA.

BARITICO (It.), adj. Ba^{3}r-i^{2}t'i^{2}k-o. See BARYTIC.

BARIUM (Lat.), n. n. Ba(ba^3)'ri^2-u^{3}m(u^{4}m). From βαρύς, heavy, on account of the high specific gravity of b. sulphate. Fr., *barium*, *baryum*. Ger., *Barium*, *Baryum*. It., Sp., *bario*. Syn.: *baryum*, *barytum*, *barytium*, *plutonium* [Clarke]. A metallic element found widely distributed through the vegetable kingdom, usually under the form of the sulphate or carbonate. It is also found in very small quantities in sea-water and some mineral waters. It has not been isolated in quantities sufficient to determine its physical properties. In composition it acts as a bivalent radicle, replacing two atoms of hydrogen and forming compounds analogous to those of calcium. Symbol, Ba; atomic weight, 136·8. [B, 3.]—**Acétate de b.** (Fr.). See *B. acetate*.—**Acid b. arsenate.** Fr., *arséniate de b. acide*. Ger., *saures arsensaures B.* A compound of b. arsenate with arsenic acid. [B.] See *B. arsenate*.—**Acid b. sulpharsenate.** Fr., *sulfarséniate de b. acide*. Ger., *saures schwefelarsensaures B.* See *B. metathioarsenate*.—**Acid b. sulphate.** Fr., *sulfate de b. acide*. Ger., *saures schwefelsaures B.* Dihydric b. sulphate. [B.] See *B. sulphate*.—**Acrylate de b.** (Fr.), **Acrylsaures B.** (Ger.). See *B. acrylate*.—**Adipate de b.** (Fr.), **Adipinsaures B.** (Ger.). See *B. adipate*.—**Aethylschwefelsaures B.** (Ger.). See *B. ethylsulphate*.—**Allylate de b.** (Fr.). See *B. allylate*.—**Amido-sulfonate de b.** (Fr.), **Amidosulfonsaures B.** (Ger.). See *B. amidosulphonate*.—**Antimoniate de b.** (Fr.), **Antimonsaures B.** (Ger.). See *B. antimonate*.—**Arséniate de b.** (Fr.). See *B. arsenate*.—**Arséniate de b. et d'ammonium** (Fr.). See *B. and ammonium arsenate*.—**Arsenigsaures B.** (Ger.), **Arsénite de b.** (Fr.). See *B. arsenite*.—**Arsensaures B.** (Ger.). See *B. arsenate*.—**Azotate de b.** (Fr.). See *B. nitrate*.—**Azotite de b.** (Fr.). See *B. nitrite*.—**Azotite de b. et de platine** (Fr.). See *B. platino-nitrite*.—**Baldriansaures B.** (Ger.). See *B. valerianate*.—**Barii acetas.** See *B. acetate*.—**Barii arsenias.** See *B. arsenate*.—**Barii arsenis.** See *B. arsenite*.—**Barii binoxydum.** See *B. dioxide*.—**Barii bromas.** See *B. bromate*.—**Barii bromidum, Barii bromuretum.** See *B. bromide*.—**Barii carbonas.** See *B. carbonate*.—**Barii chloras.** See *B. chlorate*.—**Barii chloridum, Barii chloruretum.** See *B. chloride*.—**Barii citras.** See *B. citrate*.—**Barii cyanidum.** See *B. cyanide*.—**Barii ferrocyanidum.** See *B. ferrocyanide*.—**Barii fluoridum, Barii fluoruretum.** See *B. fluoride*.—**Barii hydras.** See *B. hydrate*.—**Barii hypophosphis.** See *B. hypophosphite*.—**Barii hyposulphis.** See *B. thiosulphate*.—**Barii iodas.** See *B. iodate*.—**Barii iodidum, Barii ioduretum.** See *B. iodide*.—**Barii monoxidum, Barii monoxydum.** See BARYTA.—**Barii nitras.** See *B. nitrate*.—**Barii oxidum, Barii**

oxydum. See *B. oxide* and BARYTA.—**Barii perchloras.** See *B. perchlorate*.—**Barii permanganas.** See *B. permanganate*.—**Barii peroxydum.** See *B. dioxide*.—**Barii phosphas.** See *B. phosphate*.—**Barii phosphis.** See *B. phosphite*.—**Barii protoxidum, Barri protoxydum.** See BARYTA.—**Barii salicylas.** See *B. salicylate*.—**Barii sulphas.** See *B. sulphate*.—**Barii sulphidum.** See *B. sulphide*.—**Barii sulphis.** See *B. sulphite*.—**Barii sulphocarbolas.** See *B. sulphocarbolate*.—**Barii sulphocarbonas.** See *B. sulphocarbonate*.—**Barii sulphuretum.** See *B. sulphide*.—**Barii tartras.** See *B. tartrate*.—**Barii valerianas.** See *B. valerianate*.—**B. acetate.** Lat., *barii acetas, b. aceticum.* Fr., *acétate de b.* (ou *de baryte*). Ger., *Bariumacetat, essigsaures B.* It., *acetato di bario.* Sp., *acetato de bario.* A substance, $Ba(C_2H_3O_2)_2$, occurring as colorless crystals readily soluble in water, prepared by evaporating a solution of b. carbonate in acetic acid. It is used in the arts as a substitute for lead acetate. [B, 270.]—**B. acrylate.** Fr., *acrylate de b.* Ger., *acrylsaures B.* It., *acrilato di bario.* A compound, $Ba(C_3H_3O_2)_2$, of b. and acrylic acid. [B, 2.]—**B. adipate.** Fr., *adipate de b.* Ger., *adipinsaures B.* It., *adipato di bario.* A compound, $Ba.C_6H_8O_4$, of b. and adipic acid. [B, 2.]—**B. allylate.** Fr., *allylate de b.* Ger., *Bariumallylat.* It., *allilato di bario.* Sp., *alilato de bario.* A compound, $(C_3H_5O)_2BaO$, of b. and allyl alcohol; an amorphous mass soluble in allyl alcohol. ["Proc. of the Am. Pharm. Assoc.," xxix (1881), p. 299 (B).]—**B. amidosulphonate.** Fr., *amido-sulfonate de b.* Ger., *amidosulfonsaures B.* It., *amidosolfonato di bario.* Sp., *amidosulfonato de bario.* A substance, $BaN_2H_4S_2O_6 = NH_2.SO_2.O-Ba-O.SO_2.NH_2$, forming long prismatic crystals soluble in 3 parts of water. [E. Bergland, "Proc. of the Am. Pharm. Assoc.," xxvii (1879), p. 331 (B).]—**B. and ammoniumarsenate.** Fr., *arséniate de b. et d'ammonium.* A compound of b. and of ammonium with arsenic acid. Two such compounds are known, $2BaNH_4(AsO_4)+2H_2O$ and $Ba(NH_4)_2.2HAsO_4$; both crystalline solids. [B, 2.]—**B. and ethyl sulphate.** See *B. ethylsulphate.*—**B. and iron meconate.** Fr., *méconate de b. et de fer.* A compound of meconic acid with both b. and iron; a substance slightly soluble in cold water, more readily soluble in hot water, depositing from the aqueous solution as an amorphous solid. ["Proc. of the Am. Pharm. Assoc.," xxix (1881), p. 315 (B).]—**B. and methyl sulphate.** See *B. methylsulphate.*—**B. and platinum nitrite.** See *B. platino-nitrite.*—**B. and potassium tartrate.** Fr., *tartrate de b. et de potassium.* Ger., *weinsaures Bariumoxyd-Kali.* It., *tartrato di bario e di potassio.* Sp., *tartrato de bario y de potasio.* A pulverulent precipitate, $C_4H_4BaO_6.C_4H_4K_2O_6+2H_2O$, obtained by evaporating an aqueous solution of baryta and potassium bitartrate. [B, 2.]—**B. and sodium tartrate.** Fr., *tartrate de b. et de sodium.* Ger., *weinsaures Bariumoxyd-Natron.* It., *tartrato di bario e di sodio.* Sp., *tartrato de bario y de sodio.* A crystalline substance, $C_6H_4BaC_6.C_6H_4Na_2O_6+2H_2O$, obtained by adding b. chloride to a solution of sodium and potassium tartrate. [B, 2.]—**B. antimonate.** Fr., *antimoniate de b.* Ger., *antimonsaures B.* It., *antimoniato di bario.* Sp., *antimoniato de bario.* A compound, $Ba(SbO_3)_2$, of b. and antimonic acid. [B, 2.]—**B. arsenate.** Lat., *barii arsenias, b. arsenicicum.* Fr., *arséniate de b.* Ger., *arsensaures B.* It., *arseniato di bario.* Sp., *arseniato de bario.* A compound of b. and arsenic acid. *Normal b. arsenate* (*orthoarsenate*), $Ba_3(AsO_4)_2$, is a white powder almost insoluble in water. *Monohydric b. arsenate*, $Ba.HAsO_4$ or $2BaHAsO_4$, *tetrahydric b. arsenate*, $BaH_4.(AsO_4)_2$, and *acid b. arsenate*, which contains an excess of arsenic acid, are also known. [B, 2.]—**B. arsenite.** Lat., *barii arsenis, b. arseniosum* (seu *arsenicosum*). Fr., *arsénite de b.* Ger., *arsenigsaures B.* It., *arsenito di bario.* Sp., *arsenito de bario.* A compound of b. and arsenious acid. The name was formerly given to what is now called b. metarsenite (*q. v.*). [B.]—**B'äthylat** (Ger.). See *B. ethylate.*—**B'äthylsulfat** (Ger.). See *B. ethylsulphate.*—**B. benzenesulphonate.** See *B. phenylsulphonate.*—**B. bichromate.** See *B. dichromate.*—**B. bromate.** Lat., *barii bromas, b. bromicum.* Fr., *bromate de b.* Ger., *bromsaures B.* It., *bromato di bario.* Sp., *bromato de bario.* A substance, $Ba(BrO_3)_2+H_2O$, occurring as small shining monoclinic crystals difficultly soluble in cold water, precipitated from baryta water by the addition of bromine. [B, 270.]—**B. bromatum.** See *B. bromide.*—**B. bromicum.** See *B. bromate.*—**B. bromide.** Lat., *barii bromidum* (seu *bromuretum*), *b. bromatum, bromuretum baryticum.* Fr., *bromure de baryum* [Fr. Cod.] (ou *de b.*). Ger., *Brombaryum, Brombarium, Bariumbromid, Bariumbromür.* It., *bromuro di bario.* Sp., *bromuro de bario.* A compound, $BaBr_2$ or combined with water of crystallization $BaBr_2+2H_2O$ of b. and bromine, forming colorless rhombic crystals of unpleasant bitterish taste, readily soluble in water and alcohol. It is prepared by the addition of hydrobromic acid to b. hydroxide or b. carbonate and remains in solution when baryta water is treated with bromine. It is used in the preparation of hydrobromic acid for pharmaceutical purposes. [B, 3, 270.]—**B. carbonate.** Lat., *barii carbonas, b. carbonicum.* Fr., *carbonate de b.* (ou *de baryte*). Ger., *kohlensaures B.* (oder *Bariumoxyd*), *kohlensaurer Baryt, Bariumcarbonat.* It., *carbonato di bario.* Sp., *carbonato de bario.* A substance, $BaCO_3$, occurring native under the form of prismatic or pyramidal crystals (witherite), and also obtained artificially as a dense, white, tasteless, or odorless alkaline powder almost insoluble in water, when an alkaline carbonate is added to a solution of b. chloride or b. nitrate. It is employed as a reagent in chemical analysis and as a rat-poison. [B, 3, 270.]—**B. caryophyllinate.** Fr., *caryophyllinate de b.* Ger., *caryophyllinsaures B.* It., *cariofillinato di bario.* A yellow amorphous, bitter substance, $C_{20}H_{30}BaO_6+1''_2H_2O$, obtained by the action of b. chloride upon sodium caryophyllinate. ["Proc. of the Am. Pharm. Assoc.," xxii, p. 219 (B).]—**B. chlorate.** Lat., *barii chloras, b. chloricum.* Fr., *chlorate de b.* Ger., *chlorsaures B., Bariumchlorat.* It., *clorato di bario.* Sp., *clorato de bario.* A compound, $Ba(ClO_3)_2+H_2O$, of b. and chloric acid, occurring as colorless monoclinic prismatic crystals soluble in water. [B, 3, 159.]—**B. chloratum.** See *B. chloride.*—**B. chloricum.** See *B. chlorate.*—**B. chloride.** Lat., *barii chloridum, b.* (seu *baryum* [Ger. Ph., 1st ed., Russ. Ph., Swiss Ph.]), *chloratum, chloruretum baryi* [Belg. Ph.], *chloretum baricum* [Dan. Ph.] (seu *baryticum* [Netherl. Ph.]), *baryta muriatica* [Greek. Ph.]. Fr., *chlorure de baryum* [Fr. Cod.] (ou *de b.*). Ger., *Chlorbaryum, Chlorbarium, Bariumchlorid, Bariumchlorür.* It., *cloruro di bario.* Sp., *cloruro bárico* [Sp. Ph.] (ó *de bario*). A substance, $BaCl_2+2H_2O$, forming colorless tubular rhombic crystals of unpleasant salty taste, soluble in about 3 parts of cold water. On heating it loses its water of crystallization and is converted into a white powder. B. chloride has been used as a remedy in scrofula and in cutaneous disorders and as a vermifuge. [B, 3, 119.]—**B'chloridlösung** (Ger.). See *Test-solution of chloride of b.*—**B. chromate.** Lat., *barii chromas, b. chromicum.* Fr., *chromate de b.* Ger., *chromsaures B., Bariumchromat.* It., *cromato di bario.* Sp., *cromato de bario.* A compound, $BaCrO_4$, of b. and chromic acid, occurring as yellow crystals insoluble in water. It is used as a pigment under the name of yellow ultramarine. [B, 3.]—**B. citrate.** Lat., *barii citras, b. citricum.* Fr., *citrate de b.* Ger., *citronensaures B., Bariumcitrat.* It., *citrato di bario.* Sp., *citrato de bario.* A compound of b. and citric acid. *Normal b. citrate*, $Ba_3(C_6H_5O_7)_2$, occurs under various crystalline forms as well as in the form of an amorphous powder, according to the number of molecules of water of crystallization with which it is combined. [B, 3.]—**B. cyanide.** Lat., *barii cyanidum* (seu *cyanuretum*), *b. cyanatum.* Fr., *cyanure de b.* Ger., *Cyanbarium, Bariumcyanür.* It., *cianuro di bario.* A compound, $Ba(CN)_2$, of b. and cyanogen, prepared by the decomposition of b. ferrocyanide or by the action of hydrocyanic acid upon b. hydroxide. [B, 4.]—**B. deutoxide.** Fr., *deutoxyde de b.* See *B. dioxide.*—**B. dichloropropionate.** Fr., *dichloropropionate de b.* Ger., *dichlorpropionsaures B.* It., *dicloropropionato di bario.* A compound of b. and dichlorpropionic acid; a substance, $Ba(C_3H_3Cl_2O_2)_2+H_2O$, forming rhombic tubular crystals of glassy lustre. [H. Beckurts and R. Otto, "Ber. d. dtsch. chem. Gesellsch.," ix (1876), p. 1876 (B).]—**B. dichromate.** Lat., *barii bichromas, b. bichromicum.* Fr., *bichromate de b.* Ger., *Bariumdichromat, doppeltchromsaures B.* It., *bicromato* (o *dicromato di bario*). Sp., *bicromato de bario.* B. bichromate; a substance, $BaCr_2O_7+2H_2O$, forming yellow acicular crystals. [B, 3.]—**B. dioxide.** Lat., *barii binoxydum.* Fr., *bioxyde* (ou *dioxyde de b.*). Ger., *Bariumdioxyd, Bariumsuperoxyd.* It., *diossido di bario.* Sp., *dióxido de bario.* B. deutoxide, b. peroxide. A whitish pulverulent substance, BaO_2, which unites with water to form a hydrate, BaO_2+8H_2O. Both the dioxide and its hydrate act as oxidizing agents, owing to the readiness with which they give up one of their oxygen atoms, and are employed in the preparation of hydrogen dioxide. [B, 3, 270.]—**B. disulphate.** Fr., *disulfate de b.* Ger., *Bariumdisulfat.* See *B. pyrosulphate.*—**B. dithionate.** Fr., *dithionate de b.* Ger., *dithionsaures B., Bariumdithionat.* It., *ditionato di bario.* A substance, $BaS_2O_6+2H_2O$, forming large, shining, monoclinic prismatic crystals. [B, 3, 159.]—**B. ethylate.** Fr., *éthylate de b.* Ger., *Bariumäthylat.* It., *etilato di bario.* Sp., *etilato de bario.* A compound, $Ba(C_2H_5.O)_2$, prepared by dissolving baryta in absolute alcohol. [B, 4.]—**B. ethylsulphate.** Fr., *éthyl-sulfate de b.* Ger., *Bariumäthylsulfat, äthylschwefelsaures B.* It., *etilsolfato di bario.* Sp., *etilsulfato de bario.* Syn.: *b. and ethyl sulphate, b. sulphoethylate, b. sulphovinate.* A compound, $Ba(C_2H_5.SO_4)_2+2H_2O$, of b. and ethylsulphuric acid (acid ethyl sulphate); a substance occurring as monoclinic prismatic crystals. [B, 2.]—**B. eugenate.** Fr., *eugénate de b.* A compound, $Ba(C_{10}H_{11}O_2)_2$, of b. and eugenic acid, forming laminar crystals of pearly lustre. [B, 4.]—**B. ferrate.** Fr., *ferrate de b.* Ger., *eisensaures B., Bariumferrat.* It., *ferrato di bario.* A dark-red substance, $BaFeO_4+H_2O$, compounded of b. and ferric acid. [B, 3.]—**B. ferrocyanide.** Lat., *barii ferrocyanidum* (seu *ferrocyanuretum*), *b. ferrocyanatum.* Fr., *ferrocyanure de b.* Ger., *Ferrocyanbarium, Bariumferrocyanür.* It., *ferrocianuro di bario.* A substance, $Ba_2Fe(C_3N_3)_2+6H_2O$, produced by the action of the ferrocyanide of one of the heavy metals upon b. hydroxide. [B, 4.]—**B. fluoride.** Lat., *barii fluoridum.* Fr., *fluorure de b.* Ger., *Bariumfluorid.* It., *fluoruro di bario.* A compound, BaF_2, of b. and fluorine; a white granular crystalline powder difficultly soluble in water, but dissolving readily in nitric and hydrochloric acids. [B, 159.]—**B. gambogiate.** Fr., *gambogiate de b.* Ger., *gambogiasaures B.* A dark brick-red substance compounded of b. and gambogic acid. ["Proc. of the Am. Pharm. Assoc.," xxvii, p. 210 (B).]—**B. glycyrrhizate.** Fr., *glycyrrhizate de b.* A compound, $3BaO+5C_{24}H_{36}O_9$, of b. and glycyrrhizin; obtained under the form of yellowish scales by dissolving glycyrrhizin in baryta water, passing carbon dioxide through the solution and evaporating. ["Pharm. Jour. and Trans.," Oct. 23, 1879, p. 327 (B).]—**B. hydrate.** See *B. hydroxide.*—**B. hydrosulphate.** Ger., *Bariumhydrosulfat.* Dihydric b. sulphate. [B, 270.] See *B. sulphate.*—**B. hydrosulphide.** Lat., *barii sulphydras, b. sulfhydricum.* Fr., *sulfhydrate de b.* Ger., *Bariumhydrosulfid, Bariumsulfhydrat, Schwefelwasserstoff-Schwefelbarium.* It., *solfidrato di bario.* Sp., *sulfhidrato de bario.* B. sulphydrate; a substance forming prismatic crystals of the composition $Ba(SH)_2$. [B, 3.]—**B. hydroxide.** Lat., *barii hydras, baryta hydrica* (seu *hydrata*). Fr., *hydrate de b.* Ger., *Bariumhydrat, Bariumoxydhydrat, Bariumhydroxyd.* It., *idrato* (o *idrossido*) *di bario.* Sp., *hidrato* (ó *hidróxido*) *de bario.* B. hydrate; a compound, $Ba(OH)_2$, of b. and hydroxyl, formed by the action of water upon baryta and in other ways. It is a white powder which when fused forms a crystalline mass. By dissolving the latter in water or by boiling the pulverulent dioxide with water, the compound $Ba(OH)_2+8H_2O$ is precipitated as tubular or prismatic crystals. On exposure to moist air, b. hydroxide effloresces to a white powder of the composition $Ba(OH)_2+H_2O$. B. hydroxide dissolves in 20 parts of cold and 3 parts of boiling water, producing baryta water. This solution, as well as the hydroxide itself, is strongly alkaline and has a marked affinity for carbon dioxide, and is therefore employed like lime-water in the detection, estimation, and removal of the latter. [B, 3, 270.]—**B. hyperoxide.** See *B. dioxide.*—**B. hypophosphite.** Lat., *barii hypophosphis.* Fr., *hypophosphite de b.* Ger., *unterphosphorig-*

saures B. It., *ipofosfito di bario.* Sp., *hipofosfito de bario.* A compound, $Ba(H_2PO_2)_2$, of b. and hypophosphorous acid, occurring as square laminar crystals or, combined with a molecule of water of crystallization, as flexible acicular crystals of nacreous lustre. [B, 2.]—**B. hyposulphite.** See *B. thiosulphate.*—**B. iodate.** Lat., *barii iodas, b. iodicum.* Fr., *iodate de b.* Ger., *jodsaures B., Bariumjodat.* It., *iodato di bario.* Sp., *iodato de bario.* A compound, $Ba(IO_3)_2$ or $Ba(IO_3)_2+H_2O$, occurring under the form of monoclinic prismatic crystals or as a white granular powder. It is difficultly soluble in water and is precipitated when iodine is added to baryta water, b. iodide remaining in solution. [B, 3, 270.]—**B. iodatum.** See *B. iodide.*—**B. iodicum.** See *B. iodate.*—**B. iodide.** Lat., *barii iodidum, ioduretum baryii* [Belg. Ph.], *b.* (seu *baryum*) *iodatum.* Fr., *iodure de b.* Ger., *Jodbarium, Bariumjodid, Bariumjodür.* It., *ioduro di bario.* Sp., *ioduro de bario.* A substance, BaI_2+2H_2O, compounded of b. and iodine, forming large, colorless, deliquescent, rhombic crystals very soluble in water. It has been used in medicine. [B, 5, 119, 159.]—**B. isophthalate.** Fr., *iso-phtalate de b.* Ger., *isophtalsaures B.* It., *isoftalato di bario.* See *B. phthalate.*—**B. isovalerate, B. isovalerianate.** Fr., *iso-valérate de b.* See *B. valerianate.*—**B'jodat** (Ger.). See *B. iodate.*—**B'jodid** (Ger.), **B'jodür** (Ger.). See *B. iodide.*—**B. malonate.** Fr., *malonate de b.* Ger., *malonsaures B.* It., *malonato di bario.* Sp., *malonato de bario.* A compound, $Ba(C_3H_2O_4)$, of b. and malonic acid. [B, 4.]—**B. manganate.** Fr., *manganate de b.* Ger., *mangansaures B.* It., *manganato di bario.* Sp., *manganato de bario.* A compound, $BaMnO_4$, of b. and manganic acid, forming an emerald-green micro-crystalline powder insoluble in water. It has been used as a pigment instead of Scheele's green, over which it has the advantage of not being poisonous. [B, 3.]—**B. meconate.** Fr., *méconate de b.* Ger., *mekonsaures B.* It., *meconato di bario.* Sp., *meconato de bario.* A compound of b. and meconic acid; used as an anthelminthic. [B, 88.] See also *B. and iron meconate.*—**B. mellitate.** Fr., *mellitate de b.* Ger., *mellithsaures B.* It., *mellitato di bario.* A crystalline compound, $Ba_3C_{12}O_{12}+3H_2O$, of b. and mellitic acid. [B, 4.]—**B. metaphenylenedicarbonate.** Fr., *métaphénylène-dicarbonate de b.* Ger., *metaphenylendicarbonsaures B., B. isophthalate.* [B, 4.] See *B. phthalate.*—**B. metarsenite.** Fr., *métarsénite de b.* Ger., *metaarsenigsaures B.* It., *metarsenito di bario.* A substance of the composition $Ba(AsO_2)_2$, formerly known as b. arsenite. It forms a gelatinous mass which by drying is converted into a heavy powder. [B, 2.]—**B. metathioarsenate.** Fr., *méta-thioarséniate de b.* Ger., *metaschwefelarsensaures B.* It., *metatioarseniato di bario.* A substance formerly called acid b. sulpharsenate, having the composition $Ba(AsS_3)_2$. It is known only in solution, and, upon evaporating the latter, a yellow deposit of the composition $BaAs_6S_{16}$ is obtained. [B, 2.]—**B. metatungstate.** Fr., *métatungstate de b.* Ger., *metawolframsaures B.* It., *metatungstato di bario.* A substance, $BaW_4O_{13}+9H_2O$, forming pyramidal crystals. [B, 3.]—**B. methylsulphate.** Fr., *méthyl-sulfate de b.* Ger., *Bariummethylsulfat.* It., *metil-solfato di bario.* Sp., *metil-sulfato de bario.* Syn.: *methyl and b. sulphate, b. sulphomethylate.* A compound, $Ba(CH_3.SO_4)_2+2H_2O$, of b. and methylsulphuric acid (acid methyl sulphate); a substance forming laminar crystals used in the preparation of sodium methylsulphate. [B.]—**B. monosulphide.** Lat., *b. sulfuratum, baryta sulfurata.* Fr., *monosulfure de b.* (ou *de baryum*). Ger., *Bariummonosulfür, Schwefelbarium.* It., *monosolfuro di bario.* Sp., *monosulfuro de bario.* B. sulphide; a white powder, BaS, which, when combined with 6 molecules of water of crystallization, forms transparent tubular crystals. It is used as a source of the other b. compounds. [B, 3.]—**B. monoxide.** Lat., *barii monoxidum, b. monoxydatum.* Fr., *monoxyde de b.* (ou *de baryum*). Ger., *Bariummonoxyd.* It., *monossido di bario.* Sp., *monóxido de bario.* See BARYTA.—**B. morphinate.** Fr., *morphinate de b.* Ger., *Bariummorphinat.* It., *morfinato di bario.* A compound, $(C_{17}H_{19}NO_3)_2BaO+2H_2O$, of b. and morphine; an unstable crystalline substance having probably the constitution of a substituted phenol. ["Proc. of the Am. Pharm. Assoc.," xxx, p. 401 (B).]—**B. muriate.** Fr., *muriate de b.* Ger., *salzsaures B., salzsaurer Baryt.* It., *muriato di bario.* See *B. chloride.*—**B. myristate, B. myristicate.** Fr., *myristicate de b.* Ger., *myristicinsaures B.* It., *miristicato di bario.* A compound, $Ba(C_{14}H_{27}O_2)_2$, of b. and myristic acid; a very light micro-crystalline powder, difficultly soluble in water and alcohol. [B, 2.]—**B. nitrate.** Lat., *barii* (seu *barytæ*) *nitras, nitras baryticus, b. nitricum.* Fr., *Azotate de baryte* [Fr. Cod.] (ou *de b.*). Ger., *salpetersaures B., salpetersaurer Baryt, Bariumnitrat.* It., *nitrato* (o *azotato*) *di bario.* Sp., *nitrato de bario.* A compound, $Ba(NO_3)_2$, of b. and nitric acid, forming colorless octahedral crystals, of unpleasant bitter saline taste, soluble in 10 to 15 parts of cold water, insoluble in alcohol. It is prepared by the action of nitric acid upon witherite and upon b. monosulphide, and is used in pyrotechnics and for other purposes. [B, 3, 270.]—**B'nitratlösung** (Ger.). See *Test-solution of b. nitrate.*—**B. oleate.** Lat., *b. oleinicum.* Fr., *oléate de b.* It., *oleato di bario.* Sp., *oleato de bario.* A crystalline substance, $Ba(C_{18}H_{33}O_2)_2$, compounded of b. and oleic acid. It is soluble in warm dilute alcohol, the solution depositing on cooling an acid salt of the composition $Ba(C_{18}H_{33}O_2)_2.2C_{18}H_{34}O_2$. [B, 2.]—**B. orthoarsenate.** Fr., *orthoarséniate de b.* See *B. arsenate.*—**B. orthophenolsulphonate.** Fr., *orthophénol-sulfonate de b.* Ger., *orthophenolsulfonsaures B.* See *B. sulphocarbolate.*—**B. orthophenylenedicarbonate.** Fr., *orthodiphenylène-dicarbonate de b.* Ger., *orthophenylendicarbonsaures B.* B. phthalate (*q. v.*). [B, 4.]—**B. orthophosphate.** Fr., *orthophosphate de b.* Ger., *orthophosphorsaures B.* It., *ortofosfato di bario.* Sp., *ortofosfato de bario.* See *B. phosphate.*—**B. osmate.** Fr., *osmate de b.* Ger., *osmiumsaures B., Bariumosmat.* It., *osmato di bario.* A compound, $BaOsO_4$, of b. and osmic acid, occurring both under the form of an amorphous green powder or of lustrous black prismatic crystals. [B, 3.]—**B. osmite.** Fr., *osmite de b.* Ger., *osmigsaures B.* It., *osmito di bario.* A name sometimes given to b. osmate. [B.]—**B. oxalate.** Lat., *barii oxalas, b. oxalicum.* Fr., *oxalate de b.* Ger., *oxalsaures B., Bariumoxalat.* It., *ossalato di bario.* Sp., *oxalato de bario.* A compound, BaC_2O_4, of b. and oxalic acid. [B, 4.]—**B. oxide.** Lat., *barii oxidum, b.* (seu *baryum*) *oxydatum.* Fr., *oxyde de b.* (ou *de baryum*). Ger., *Bariumoxyd.* It., *ossido di bario.* Sp., *óxido de bario.* A compound of b. and oxygen. [B.] See BARYTA and *B. dioxide.*—**B'oxyd** (Ger.). B. oxide, combined with an adjective derived from the name of an acid, denotes the b. oxy-salt of that acid. For such compounds, see the similar compounds made with B.; *e. g.*, for *salpetersaures Bariumoxyd* (b. nitrate), see *Salpetersaures B.* [B.]—**B'oxydhydrat** (Ger.). See *B. hydroxide.*—**B. paraphenolsulphonate.** Fr., *para-phénol-sulfonate de b.* Ger., *paraphenolsulfonsaures B.* It., *parafenolsolfonato* (o *parasolfofenato*) *di bario.* Sp., *parafenolsulfonato de bario.* See *B. sulphocarbolate.*—**B. paraphenylenedicarbonate.** Fr., *paraphénylène-dicarbonate de b.* Ger., *paraphenylendicarbonsaures B.* B. terephthalate. [B, 4.] See *B. phthalate.*—**B. pentasulphide.** Fr., *pentasulfure* (ou *quintisulfure*) *de b.* Ger., *bariumpentasulfid.* It., *pentasolfuro* (o *quintisolfuro*) *di bario.* Sp., *pentasulfuro de bario.* A sulphide of b. of the composition BaS_5, known only in solution. [B, 3.]—**B. perchlorate.** Lat., *barii perchloras, b. perchloricum.* Fr., *perchlorate de b.* Ger., *perchlorsaures* (oder *überchlorsaures*) *B.* It., *perclorato di bario.* Sp., *perclorato de bario.* A substance, $Ba(ClO_4)_2+4H_2O$, occurring as deliquescent crystals soluble in water and alcohol. [B, 159.]—**B. permanganate.** Lat., *barii permanganas, b. permanganicum.* Fr., *permanganate de b.* Ger., *übermangansaures B.* It., *permanganato di bario.* Sp., *permanganato de bario.* A substance, $Ba(MnO_4)_2$, crystallizing in very dark, reddish, hard, rhombic prisms. [B, 3, 159.]—**B. peroxide.** Lat., *barii peroxidum.* Fr., *peroxyde de b.* Ger., *Bariumperoxyd, Bariumsuperoxyd.* It., *perossido di bario.* Sp., *peróxido de bario.* See *B. dioxide.*—**B. phenolsulphonate.** Fr., *phénol-sulfonate de b.* Ger., *phenolsulfonsaures B.* It., *fenol-solfonato di bario.* Sp., *fenol-sulfonato de bario.* A compound of b. and phenosulphonic acid. B. orthophenolsulphonate and paraphenolsulphonate are known. [B.] See *B. sulphocarbolate.*—**B. phenylenedicarbonate.** Fr., *phénylènedicarbonate de b.* Ger., *phenylendicarbonsaures B.* A compound of b. and one of the phenylenedicarbonic acids; a term including b. phthalate, b. isophthalate, and b. terephthalate. [B.] See *B. phthalate.*—**B. phenylsulphate.** Fr., *phényl-sulfate de b., sulfo-phénate de b.* Ger., *phenylschwefelsaures B.* It., *fenilsolfato* (o *solfo-fenato*) *di bario.* Sp., *fenil-sulfato de bario.* See *B. sulphocarbolate.*—**B. phenylsulphonate.** Fr., *phényl-sulfonate de b.* Ger., *phenylsulfonsaures B.* It., *fenil-solfonato di bario.* Sp., *fenil-sulfonato de bario.* A crystalline substance, $Ba(C_6H_5.SO_2.O)_2+H_2O$, compounded of b. and phenylsulphonic acid. [B, 4.]—**B. phosphate.** Lat., *barii phosphas, b phosphoricum.* Fr., *phosphate de b.* Ger., *phosphorsaures B.* It., *fosfato di bario.* Sp., *fosfato de bario.* A compound of b. and phosphoric (orthophosphoric) acid. *Normal b. phosphate* (*orthophosphate*), $Ba_3(PO_4)_2+H_2O$, is a white precipitate insoluble in water, soluble in dilute hydrochloric and nitric acids. *Hydric* (or *monohydric*) *b. phosphate* (*orthophosphate*), $BaHPO_4$, is a white crystalline powder sparingly soluble in water, readily soluble in dilute acids. *Tetrahydric b. phosphate* (*orthophosphate*), $BaH_4(PO_4)_2$, is a substance forming colorless crystals of acid reaction dissolving without change in a small quantity of water. [B, 159.]—**B. phosphite.** Lat., *barii phosphis.* Fr., *phosphite de b.* Ger., *phosphorigsaures B.* It., *fosfito di bario.* Sp., *fosfito de bario.* A compound of b. and phosphorous acid. *Neutral b. phosphite*, $BaHPO_3+\frac{1}{2}H_2O$, a somewhat efflorescent crystalline substance, is precipitated by the addition of b. chloride to a solution of an alkaline sulphite. *Acid b. phosphite*, $Ba(H_2PO_3)_2+H_2O$, prepared by treating the neutral salt with phosphorous acid, forms warty crystals. [B, 2.]—**B. phthalate.** Fr., *phthalate de b.* Ger., *phtalsaures B.* It., *ftalato di bario.* Sp., *ftalato de bario.* Syn.: *b. orthophenylenedicarbonate.* A compound, $BaC_8H_4O_4=C_6[H_4,CO.OBa,O.CO,]$, of b. and phthalic acid; a substance forming laminar crystals. The isomeric *b. isophthalate* (*metaphenylenedicarbonate*), $C_6[H_3,CO.OBa,H.O.CO,]+3H_2O$, and *b. terephthalate* (*paraphenylenedicarbonate*), $C_6[H_2,CO.OBa,H_2,O.CO,]+4H_2O$, are also known. [B, 4.]—**B. platinate.** Fr., *platinate de b.* Ger., *platinsaures B.* It., *platinato di bario.* Sp., *platinato de bario.* A yellow powder, $BaPtH_2O_4+3H_2O$, compounded of b. and platinic acid. [B, 159.]—**B. platino-nitrite.** Fr., *platino-nitrite de b.* A double nitrite of b. and platinum occurring as colorless octahedral crystals of the composition $BaPt(NO_2)_4+3H_2O$. [B, 3.]—**B. propylenedisulphonate.** Fr., *propylène-disulfonate de b.* Ger., *propylendisulfonsaures B.* It., *propilendisolfonato di bario.* A compound, $BaC_3H_6S_2O_6=CH_3-CH<\genfrac{}{}{0pt}{}{SO_3}{CH_2.SO_3}>Ba$, of b. and propylenedisulphonic acid; a substance forming crusts or microscopic crystals only moderately soluble in water. [A. Monari, "Annal. di. chim. medico-farm. e di farmacol.," April-May, 1885, p. 251 (B).]—**B. protoxide.** Lat., *barii protoxydum.* Fr., *protoxyde de b.* Ger., *Bariumprotoxyd.* It., *protossido di bario.* Sp., *protóxido de bario.* See BARYTA.—**B. pyrosulphate.** Fr., *pyrosulfate de b.* Ger., *Bariumpyrosulfat.* It., *pirosolfato di bario.* Sp., *pirosulfato de bario.* B. disulphate; a crystalline substance, BaS_2O_7, compounded of b. and pyrosulphuric acid; precipitated when fuming sulphuric acid is added to a solution of b. sulphate. [B, 3, 159.]—**B. pyrothioarsenate.** Fr., *pyro-thioarséniate de b.* Dibasic b. sulpharsenate [Watts]; a lemon-yellow substance of the composition $Ba_2As_2S_7$. [B, 2.]—**B. pyrothioarsenite.** Fr., *pyrothioarsénite de b.* Syn.: *neutral b. sulpharsenite* [Watts]. A gummy, reddish-brown substance of the composition $Ba_2As_2S_5$. [B, 2.]—**B. rhodizonate.** Fr., *rhodizonate de b.* Ger., *rhodizonsaures B.* A compound of b. and rhodizonic acid. *Acid b. rhodizonate*, $BaC_6H_6O_8+H_2O$, a red substance which when polished acquires the odor of cantharides, is known. [B, 3.]—**B. salicy-**

late. Fr., *salicylate de b.* Ger., *salicylsaures B.* It., *salicilato di bario.* Sp., *salicilato de bario.* A compound of b. and salicylic acid. *Normal b. salicylate*, $Ba(C_7H_3-O_3)_2=C_6[H_4,OH,-CO.O,]Ba[O.CO,OH,H_4,]C_6$, a substance forming acicular crystals, and *dibasic* ("*neutral*") *b. salicylate*, $BaC_7H_4O_3=C_6[H_4,-OBa,CO.O,]$, derived from the former by the action of b. hydroxide, are known. [B, 4.]—**B. silicate.** Fr., *silicate de b.* Ger., *kieselsaures B.*, *Bariumsilicat.* It., *silicato di bario.* Sp., *silicato de bario.* A compound of b. and silicic acid. Such a compound occurs in the so-called baryta-glass, and various silicates of b. combined with other elements are found native as minerals. A compound, $BaSiO_3+7H_2O$, is said to be formed as orthorhombic transparent crystals, by the action of baryta-water upon calcined silica or upon the glass of vessels in which the baryta-water is kept for a long time. [B, 3; "Proc. of the Am. Pharm. Assoc.," xxx (1882), p. 291 (B).]—**B. silico-fluoride.** Fr., *silico-fluorure de b.* Ger., *Bariumsiliciumfluorür.* It., *silico-fluoruro di bario.* A double fluoride, $BaSiF_6$, of b. and silicon; a white crystalline powder almost insoluble in water. [B, 159.]—**B. subsulfurosum.** See *B. thiosulphate.*—**B'sulfat** (Ger.). See *B. sulphate.*—**B'sulfhydrat** (Ger.). See *B. hydrosulphide.*—**B'sulfid** (Ger.). See *B. sulphide.*—**B'sulfit** (Ger.). See *B. sulphite.*—**B. sulfo-carbolicum.** See *B. sulphocarbolate.*—**B. sulfo-carbonicum.** See *B. sulphocarbonate.*—**B. sulfo-phenylicum.** See *B. sulphocarbolate.*—**B. sulfuratum.** See *B. sulphide.*—**B'sulfuret** (Ger.). See *B. sulphide.*—**B. sulfuricum.** See *B. sulphate.*—**B. sulfurosum.** See *B. sulphite.*—**B. sulphantimonate.** See *B. thioantimonate.*—**B. sulpharsenate.** See *B. thioarsenate.*—**B. sulpharsenite.** See *B. thioarsenite.*—**B. sulphate.** Lat., *barii* (seu *barytæ*) *sulphas, sulphas barytæ nativus* [Belg. Ph.], *b.* (seu *baryum*) *sulfuricum, baryta sulphurica nativa* [Pruss. Ph., 6th ed., Greek Ph.], *spathum ponderosum, terra ponderosa.* Fr., *sulfate de b.* (ou *de baryte*, ou *barytique*), *spathpesant.* Ger., *Bariumsulfat, schwefelsaures B.* (oder *Baryum*), *schwefelsaures Baryt, Schwerspath.* It., *solfato di bario* (o *di barite*). Sp., *espato baritico* [Sp. Ph.], *sulfato de bario* (o *barítico*). A compound of b. and sulphuric acid. *Normal b. sulphate*, $BaSO_4$, is found native as barytin or heavy spar, a mineral either occurring in tabular or columnar crystals of the rhombic system or aggregated into masses of a white or grayish color, having a sp. gr. of 4·3 to 4·7, and insoluble in water and in alcohol. This native sulphate is the variety official in the various pharmacopœias and is employed as a source of the other b. compounds, for which purpose, however, it is now largely replaced by witherite, and is also used as a pigment. By adding sulphuric acid or a soluble sulphate to a solution of a b. compound, a normal b. sulphate is obtained as a precipitate the character of which varies according to the strength and temperature of the solution. When thrown down from a concentrated cold solution it is an exceedingly fine, brilliant white, amorphous powder, which, under the names of *permanent white* or *blanc fixe*, is much used as a pigment, and also in paper-making, and for other purposes. When thrown down from a hot dilute solution, of a b. salt, normal b. sulphate is a coarse granular crystalline powder. *Dihydric b. sulphate, b. hydrosulphate*, $BaH_2(SO_4)_2$, is deposited under the form of prismatic crystals when a solution of normal b. sulphate in hot concentrated sulphuric acid is allowed to cool. [B, 3, 159, 270.]—**B. sulphide.** Lat., *barii sulphidum, b. sulfuratum, baryta sulfurata.* Fr., *sulfure de b.* (ou *de baryum*). Ger., *Schwefelbarium, Bariumsulfid, Bariumsulfuret.* It., *solfuro di bario.* Sp., *sulfuro de bario.* A compound of b. and sulphur. [B.] See *B. monosulphide, B. hydrosulphide, B. trisulphide, B. tetrasulphide*, and *B. pentasulphide.*—**B. sulphite.** Lat., *barii sulphis, b. sulfurosum.* Fr., *sulfite de b.* Ger., *schwefligsaures B., Bariumsulfit.* It., *solfito di bario.* Sp., *sulfito de bario.* A compound, $BaSO_3$, of b. and sulphurous acid, occurring as white 6-sided prismatic crystals. [B, 159.]—**B. sulphocarbolate.** Lat., *barii sulphocarbolas, b. sulfocarbolicum, b. sulfophenylicum.* Fr., *sulfo-phénate de b., sulfo-carbolate de b.* Ger., *phenylschwefelsaures B., Bariumsulfocarbolat.* It., *solfo-fenato di bario.* Sp., *sulfo-fenato de bario.* Syn.: *b. phenylsulphate, b. phenolsulphonate.* A compound, $Ba(C_6H_5.SO_4)_2$ of b. and sulphocarbolic acid prepared by digesting an aqueous solution of the latter with b. carbonate. What is ordinarily known as b. sulphocarbolate is *b. orthophenolsulphonate*, $C_6[H_4,OH,SO_2.O,]\ Ba\ [O,SO_2,OH,-H_4,]C_6 + 3H_2O$, which forms spherical aggregations of microscopic acicular crystals. *B. paraphenolsulphonate*, $C_6[H_2,OH,H_2,-SO_2.O,]\ Ba\ [O.SO_2.H_2,OH,H_2,]C_6, + xH_2O$, is also known. B. sulphocarbolate is used in pharmacy in the preparation of the corresponding sodium and zinc salts. [B, 2, 81.]—**B. sulphocarbonate.** Lat., *barii sulphocarbonas, b. sulfocarbonicum.* Fr., *sulfocarbonate* (ou *thiocarbonate*) *de b.* Ger., *B'sulfocarbonat, thiocarbonsaures B.* Syn.: *b. thiocarbonate.* A light-yellow crystalline substance, $BaCS_3$, prepared by the action of moist b. sulphide on carbon disulphide. ["Proc. of the Am. Pharm. Assoc.," xxiii, p. 277 (B).]—**B. sulphoethylate.** Fr., *sulfoéthylate de b.* Ger., *Bariumsulfoäthylat.* It., *solfo-etilato di bario.* Sp., *sulfo-etilato de bario.* See *B. ethylsulphate.*—**B. sulphomethylate.** Fr., *sulfo-méthylate de b.* Ger., *Barium sulfomethylat.* It., *solfo-metilato di bario.* Sp., *sulfo-metilato de bario.* See *B. methylsulphate.*—**B. sulphosulphate.** See *B. thiosulphate.*—**B. sulphovinate.** Fr., *sulfo-vinate de b.* See *B. ethylsulphate.*—**B. sulphydrate.** See *B. hydrosulphide.*—**B'superoxyd** (Ger.). See *B. dioxide.*—**B'superoxydhydrat.** The hydrate of b. dioxide. [B, 270.]—**B. tartrate.** Lat., *barii tartras, b. tartaricum.* Fr., *tartrate de b.* Ger., *weinsaures B., Bariumtartrat.* It., *tartrato di bario.* Sp., *tartrato de bario.* A compound, $C_4H_4BaO_6$, of b. and tartaric acid obtained as a white flocculent precipitate which afterward becomes crystalline, by the action of potassium tartrate upon b. chloride or of baryta-water upon tartaric acid. [B, 2.]—**B. terephthalate.** Fr., *téréphtalate de b.* Ger., *terephtalsaures B.* It., *tereftalato di bario.* B. paraphenylenedicarbonate. [B, 4.] See *B. phthalate.*—**B. tetrasulphide.** Fr., *tétrasulfure de b.* Ger., *Bariumtetrasulfid.* It., *tetrasolfuro di bario.* Sp., *tetrasulfuro de bario.* A crystalline substance, $BaS_4 + H_2O$, appearing red by reflected light, yellow by transmitted light. It is readily soluble in water, and when deposited from its aqueous solution forms an orange-colored crystalline powder. [B, 3.]—**B. thioantimonate.** Fr., *thioantimoniate* (ou *sulfantimoniate*) *de b.* Ger., *thioantimonsaures B., schwefelantimonsaures B.* It., *tioantimoniato* (o *solfantimoniato*) *di bario.* Sp., *tioantimoniato* (ó *sulfantimoniato*) *de bario.* Syn.: *b. sulphantimonate.* A substance, $Ba_3(SbS_4)_2 + 6H_2O$, occurring under the form of acicular crystals. [B, 3.]—**B. thioarsenate.** Fr., *thioarséniate* (ou *sulfarséniate*) *de b.* Ger., *thioarsensaures B., schwefelarsensaures B., Schwefelarsen-Bariumsulfid.* It., *tioarseniato* (o *solfarseniato*) *di bario.* Sp., *tioarseniato* (ó *sulfarseniato*) *de bario.* Syn.: *b. sulpharsenate.* A compound of b. and thioarsenic acid. *Normal b. thioarsenate* (*orthothioarsenate*), *tribasic b. sulpharsenate*, $Ba_3(AsS_4)_4$, is known. [B, 2.] See also *B. pyrothioarsenate* and *B. metathioarsenate.*—**B. thioarsenite.** Fr., *thioarsénite* (ou *sulfarsénite*) *de b.* Ger., *thioarsenigsaures B., schwefelarsenigsaures B.* It., *tioarsenito* (o *solfarsenito*) *di bario.* Sp., *tioarsenito* (ó *sulfarsenito*) *de bario.* Syn.: *b. sulpharsenite.* A compound of b. and thioarsenious acid. *Normal b. thioarsenite* (*orthothioarsenite*), the *basic b. sulpharsenite* of Watts, $Ba^3(AsS_3)_2$, occurs as a crystalline substance. [B, 2.] See *B. pyrothioarsenite.*—**B. thiocarbonate.** See *B. sulphocarbonate.*—**B. thiosulphate.** Lat., *barii hyposulphis, b. hyposulfurosum, b. subsulfurosum.* Fr., *thiosulfate* (ou *hyposulfite*) *de b.* Ger., *unterschwefligsaures B., Bariumthiosulfat.* It., *tiosolfato* (o *iposolfito*) *di bario.* Sp., *tiosulfato* (ó *hiposulfito*) *de bario.* Syn.: *b. hyposulphite, b. sulphosulphate.* A compound, $BaS_2O_3+H_2O$, of b. and thiosulphuric acid; a substance thrown down as a crystalline by the addition of sodium thiosulphate to solution of b. chloride. [B, 159.]—**B. trichromate.** See *B. chromate.*—**B. trisulphide.** Fr., *trisulfure de b.* Ger., *Bariumtrisulfid.* It., *trisolfuro di bario.* Sp., *trisulfuro de bario.* A greenish-yellow substance of the composition BaS_3. [B, 3.]—**B. tungstate.** Lat., *barii tungstas, b. wolframicum.* Fr., *tungstate de b.* Ger., *wolframsaures B., Bariumtungstat.* It., *tungstato di bario.* Sp., *tungstato de bario.* A crystalline substance, $BaWO_4$ or $2BaWO_4 + H_2O$, compounded of b. and tungstic acid. [B, 3.]—**B. tyrosine.** Fr., *barium-tyrosine.* Ger., *Bariumtyrosin.* A substitution compound, $C_9H_9BaNO_3 + 2H_2O$, of b. and tyrosine; a substance forming prismatic crystals produced by the action of baryta-water upon tyrosine. [B, 4.]—**B. valerate.** Lat., *b. valericum.* Fr., *valérate de b.* Ger., *Bariumvalerat.* A compound of b. and valeric acid. Isovalerate (valerianate) of b. is known. [B.] See *B. valerianate.*—**B. valerianate.** Lat., *barii valerianas, b. valerianicum.* Fr., *valérianate* (ou *isovalérate*) *de b.* Ger., *baldriansaures B., Bariumisovalerat.* It., *valerianato di bario.* Sp., *valerianato de bario.* Syn.: *b. isovalerate.* A compound, $Ba(O.C_5H_9O)_2 + H_2O$, of b. and valerianic (isovaleric) acid, occurring under the form of prismatic or laminar crystals. [B, 4.]—**B. violurate.** Fr., *violurate de b.* Ger., *violursaures B., Bariumviolurat.* It., *violurato di bario.* Sp., *violurato de bario.* A compound, $Ba(C_4H_2N_3O_4)_2 + 4H_2O$, of b. and violuric acid; a substance occurring as shining red crystals. [B, 3.]—**B. wolframicum.** See *B. tungstate.*—**Basic b. sulpharsenite.** See *B. thioarsenite.*—**Bichromate de b.** (Fr.). See *B. dichromate.*—**Binoxyde de b.** (Fr.), **Bioxyde de b.** (Fr.). BARJAC (Fr.), n. Ba³r-zha³k. A village 5 leagues from Saint-Andeol, France, near which there are mineral springs. [L, 105.]

BARJEMONT (Fr.), n. Ba³r-zhe²-mo²n². A variety of fig. [B, 38.]

BARK, n. Ba³rk. Gr., φλοιός. Lat., *cortex.* Fr., *écorce.* Ger., *Rinde.* It., *corteccia.* Sp., *corteza.* The external mass of tissue in trees sheathing the woody cylinder of which the stem and root are composed, and formed by the agglomeration of the phloëm portion of the fibro-vascular bundles. The phloëm, like the wood-forming portion of the fibro-vascular bundles (xylem), is made up of (*a*) vascular tissue, which here takes the form of sieve-tissue and never of tracheary tissue as in the xylem; (*b*) fibrous tissue made up of bast-fibres as the xylem is made up of wood-fibres; and (*c*) parenchymatous tissue resembling that of the xylem. The b. differs from the woody portions of the stem, from which it is usually readily separable in its looser and softer texture and in its greater toughness and elasticity. It also differs in the manner of its growth, which is centripetal, taking place by the deposition of concentric layers, each one of which is internal as regards the preceding layer. The growth-layers of the b., however, are less distinctly marked than those of the wood and are more or less obliterated by the ingrowth of adventitious tissue and by the pressure from the growing wood. The b. serves as a protective covering for the other structures of the trunk. Many b's contain resinous, oily, or nitrogenous principles, glucosides, tannic acid, etc., and are employed in medicine. For such b's see under the respective plant names. The word b. is often used without qualification to denote Peruvian or *Cinchona* b. See *Red b., Yellow b.,* etc. [B, 75.]—**Alcornoco b., Alcornoque b.** See under ALCORNOCO.—**Angostura b., Angustura b.** The b. of *Galipea cusparia.* [B.] See ANGUSTURA.—**Arariba b.** See ARARIBA.—**Arica b., Ariza b.** The b. of *Cinchona pubescens.* [B, 5, 19.]—**Ash b.** Fr., *quinqua de Loxa cendré.* The b. of *Cinchona ovata.* [B, 270.]—**Ashy crown b.** The b. of the *Cinchona macrocalyx* [B, 18]; or, according to others, that of the *Cinchona cordifolia,* var. *rotundifolia.* [B, 5.]—**Babul b.** The b. of several species of ACACIA. Ger., *Huanuco-China.* Cinchona b. derived from Huánuco in Peru ; chiefly the b. of *Cinchona nitida.* [B, 5, 23.]—**Huxham's tincture of b.** See *Tinctura* CINCHONÆ *composita.*—**Infusion of yellow b.** See *Infusum* CINCHONÆ *flavæ.*—**Iron b., Iron b. tree.** A name applied to the *Eucalyptus resinifera.* [B, 5, 75.]—**Jaen b.** Lat., *cortex chinæ Jaen.* Ger., *Jaen-China.* The b. of *Cinchona humboldtiana.* [B, 18.]—**Jamaica b.** Lat., *cortex jamaicensis* (seu *chinæ jamaicensis*). Ger., *jamaicensische Fieberrinde.* See *Caribean b.*—**Jesuit's b.** Fr., *écorce des Jésuites.* A name formerly given to cinchona b., because introduced generally throughout Europe by the Jesuits. [B, 5, 180.]—**Jurema b.** Lat., *cortex juremæ brasiliensis, cortex geremma.* Ger., *Jurema-Rinde, Geremma-Rinde.* A bitter astringent bark imported from Brazil under the form of flat, half-quilled, or quilled fragments, 4 to 10 inches long and 1 to 4 inches broad, violet-colored on the exterior surface and in the external layers, whitish internally. According to Nees v. Esenbeck, it is derived from the *Acacia jurema*, and is therefore one of the varieties of barbatimao b. [B, 180.]—**Juribali b.** Lat., *cortex juribali* (seu *euribali*). An astringent very bitter bark of Demerara, supposed to be derived from some cedrelaceous plant. In large doses it is said to be laxative and diaphoretic, and has been employed internally as a stimulant, diaphoretic, and antipyretic in malignant remittent fevers, measles, variola, and serous effusions, and externally as an application to ill-conditioned ulcers. [B, 19, 180.]—**Karinghota b.** The b. of *Samadera indica.* [B, 172.]—**Kunro b.** The b. of *Rhizophora mucronata.* [B, 19.]—**Lace-b.** The *Lagetta lintearia.* [B, 185.]—**Light calisaya b.** See under CALISAYA.—**Lima b.** Fr., *quinquina rouge de Lima* (1st def.), *quinquina de Lima gris brun* (ou *ordinaire*) (2d def.). 1. See *Huánuco b.* 2. The b. of *Cinchona micrantha.* [B, 5, 270.]—**Loxa b., Loxa crown b.** Lat., *cortex chinæ Loxæ* (seu *de Loxa*). See *Crown b. of Loxa.*—**Macallo b.** A b. derived from Yucatan. [B, 5.]—**Malambo b.** Lat., *cortex malambo* (seu *melambo*). Ger., *Malamborinde, Melamborinde.* A b. resembling Angustura, derived from the *Drimys granatensis* [B, 180], from the *Croton malambo* [B, 19], or from an undetermined species of *Galipea* or of a related genus [B, 19]. It occurs in dense fragments 1½ to 2 feet long, 2 to 3 inches broad, and 2 to 6 lines thick ; yellowish-gray externally, marked with rose-colored spots and with numerous minute prominences ; dark-brown internally ; having a penetrating aromatic odor and a bitter, pungent and lasting, aromatic taste. It has been employed in spasmodic affections (tetanus), gastro-intestinal disorders, rheumatism, inflammatory troubles, and wounds. [B, 180.]—**Mancona b.** See *Sassy b.*—**Maracaibo b.** The b. of *Cinchona tucujensis.* [B, 5.]—**Marcapata b.** [Howard]. The b. of *Cinchona condaminea.* [B, 270.]—**Massoy b.** Lat., *cortex Massoy* (seu *Massoi*, seu *Mazoi*, seu *oninius*). Ger., *Massoyrinde.* 1. A b. derived from the East Indies ; according to some, the product of *Cinnamomum kiamis.* It occurs in quilled pieces of various size, blackish-gray externally, brownish internally, and having a pleasant aromatic odor and mild astringent taste. It contains much volatile oil and is said to be employed as an aromatic tonic. 2. An East Indian b. having an odor like that of sassafras, probably derived from a lauraceous tree. [B, 180.]—**Matias b., Matius b., Melambo b.** See *Malambo b.*—**Mezereum b.** See MEZEREUM and DAPHNE *mezereon.*—**Missoy b.** See *Massoy b.*—**Monesia b.** Lat., *monesiæ cortex.* Ger., *Monesiarinde.* The b. of one or more species of sapotaceous trees growing in South America ; according to Harnausek, the b. of *Chrysophyllum glycophlœum* (*q. v.*). [B, 19, 270.]—**Mongumbo b.** A medicinal b. derived from Madagascar. [B, 5.]—**Mossed b.** Cinchona b. which has been left in strips upon the tree and covered with moss. BÄRLÄPP (Ger.), n. Bar'lap. The drug lycopodium. [B, 180.]

BÄRLAUCH (Ger.), n. Bar'la^3-uch^2. The *Allium ursinum.* [A, 315.]

BARLERIA (Lat.), n. f. Ba^{3}r-le(la)'ri^2-a^3. Fr., *barlérie.* A genus of acanthaceous plants of the tribe *Justicieæ*, subtribe *Barlerieæ*, established by Linnæus. [B, 42.]—**B. bispinosa** [Nees]. See *B. mysorensis.*—**B. buxifolia.** 1. Of Linnæus, the *Dicranacanthus buxifolia* of Oersted, a small, prickly undershrub, with hairy branches, growing in the South Deccan. The root is used as an aperient. 2. Of Wallich, the *B. mysorensis* (*q. v.*). [B, 46, 212.]—**B. ciliata** [Roxburgh], **B. cristata** [Linnæus]. An undershrub growing in northern and central India, and cultivated in the East Indies and China, having oblong or elliptical acute leaves and purplish-blue or white flowers in capitate spikes. [B, 181, 212.]—**B. dichotoma** [Roxburgh]. See *B. cristata.*—**B. hexacantha** [Morison]. The *Hygrophila spinosa.* [B, 212.]—**B. hystrix** [Linnæus]. See *B. prionitis.*—**B. laciniata** [Wallich]. See *B. cristata.*—**B. longifolia** [Linnæus]. The *Hygrophila spinosa.* [B. 212.]—**B. mysorensis** [Roth]. Syn.: *Dicranacanthus spinaceylanica* [Oersted]. A small, very prickly shrub, with hairy branches, elliptical, hairy leaves, and axillary, sessile, hairy flowers, growing in the South Deccan and in Ceylon. It has the same properties as *B. buxifolia.* [B, 46, 212.]—**B. napalensis** [Nees], **B. nuda** [Nees]. See *B. cristata.*—**B. obovata** [Hamilton]. A variety of the *B. buxifolia.* [Nees (B, 214).]—**B. prionitis** [Linnæus], **B. pubiflora** [Bentham]. Syn.: *Prionitis hystrix* [Miquel] (et *pubiflora* [Miquel]), *Justicia appressa* [Forskål], *Barretiera prionites* [Blanco]. A shrub from 2 to 5 feet high, usually densely armed with prickles, growing throughout India, Ceylon, and the East Indies. The expressed juice of the leaves, mixed with sugar and water, and the infusion are employed in the treatment of infantile aphthæ, catarrhs, and febrile diseases. The ashes of the plant, with the addition of water and rice, are used in coughs and dropsy. The Japanese employ the plant as an emollient. [B, 46, 172.]—**B. spina-ceylanica** [Nees]. See *B. mysorensis.*

BARLERIANTHUS [Oersted] (Lat.), n. m. Ba^{3}r-le^{2}r-i^2-a^{2}n-(a^{3}n)'thu^{3}s(thu^{4}s). See BARLERIA.

BARLERIDÆ [Endlicher], **BARLERIEÆ** [Nees] (Lat.), n's f. pl. Ba^{3}r-le^{2}r'i^{2}d-e(a^3-e^2), -le^{2}r-i(i^2)'e^2-e(a^3-e^2). A tribe of acanthaceous plants, or, according to Bentham and Hooker, a subtribe of the *Justicieæ*, including *Barleria* and other genera. [B, 42, 170.] See JUSTICIEÆ.

BARLERIOIDES (Lat.), adj. Ba^{3}r-le^{2}r-i^2-o(o^2)-i(e)'dez(das). From *Barleria* (*q. v.*), and εἶδος, resemblance. Resembling the *Barleria;* a botanical species-name. [B, 212.]

BARLERIOPSIS [Oersted], **BARLERIOSIPHON** [Oersted], **BARLERITES** [Oersted] (Lat.), n's f., m., and m. Ba^{3}r-le^{2}r-i^2-o^{2}ps'i^{2}s, -o^{2}s'i^2-fo^{2}n(fon[-o-si(si^2)'fo^{2}n]), -i(e)'tez(tas). Gen., *barleriop'seos* (*-sis*), *-sipho'nis*, *-i'tæ.* From *barleria* (*q. v.*), and ὄψις, an appearance, look, or σίφων, a reed (see also *-ites**). See BARLERIA.

BARLEY, n. Ba^{3}r'le^2. A.-S., *bere.* O. E., *bærlie.* Welsh, *barlys.* Gr., κριθαί (pl. of κριθή). Lat., *hordeum.* Fr., *orge.* Ger., *Gerste.* It., *orzo.* Sp., *cebada.* The genus *Hordeum* (*q. v.*), also the grain derived from plants of that genus. [A, 302, 311, 312; B.]—**Autumn b.** See *Winter b.*—**B. bree, B. brie.** A spirituous liquor distilled from b. [L, 73.]—**B. flour.** See *B. meal.*—**B. malt.** See under MALT.—**B. meal.** Ger., *Gerstenmehl.* The flour obtained by grinding hulled b. It is a grayish-white powder containing starch, sugar, nitrogenous and fatty principles, and mineral salts. It is made into bread which in some places is much used as a food. [B, 5.]—**B. sugar.** See under SUGAR.—**B. water.** See *Decoctum* HORDEI.—**Battledore b.** See *Putney b.*—**Caustic b.** See CEVADILLA.—**Common b.** The *Hordeum distichon.* [L, 120.]—**Decoction of b.** See *Decoctum* HORDEI.—**French b.** A variety of pearl b., smaller than the ordinary kind, and usually prepared from the *Hordeum hexastichon.* [B, 199.]—**Hulled b.** Lat., *hordeum mundatum.* Fr., *orge monde* [Fr. Cod.]. Ger., *Gerstengraupen.* It., *orzo mondato.* B. deprived of its husk; used in making b. meal. [B, 5.]—**Long-eared b.** The *Hordeum distichon.* [B.]—**Patent b.** Lat., *farina hordei.* B. meal made from pearl b. [B, 199.]—**Pearl** (or **Pearled**) **b.** Lat., *hordeum* [U. S. Ph., 1870], *hordeum decorticatum* [Br. Ph.] (seu *perlatum*). Fr., *orge perlé* [Fr. Cod.]. Ger., *Perlengraupen.* It., *orzo perlato.* Sp., *cebada perlada.* B. deprived of all its coverings and made round and smooth by grinding. It occurs in pearly-white, small, rounded or ovoid grains marked with a longitudinal furrow. It consists chiefly of starch with some gluten, sugar, and gum. [B, 5.]—**Pot b.** See *Pearl b.*—**Putney b.** The *Hordeum zeocriton.* [L, 120.]—**Scotch b.** See *Hulled b.*—**Scotch pearl b.** A variety of pearl b. resembling *French b.* [B, 199.]—**Six-rowed b.** The *Hordeum hexastichon* [B.]—**Sprat b.** See *Putney b.*—**Spring b., Square b.** The *Hordeum vulgare.* [L, 120.]—**Two-rowed b.** The *Hordeum distichon.* [B.]—**Wine of b.** See BEER.—**Winter b.** The *Hordeum hexastichon.* [L, 86, 120.]

BARM, n. Ba^{3}rm. A.-S., *beorma.* Ger., *Bärme*, *Barm.* Yeast. [A, 315; L, 56, 105.]

BÄRMUTTER (Ger.), n. Bar'mut-te^{2}r. See UTERUS.—**B'kraut.** The *Ligusticum levisticum.* [L, 46.]

BARNA (Hind.), n. The *Cratæva Roxburghii.* [B, 172.]

BARNADESEÆ [D. Don] (Lat.), n. f. pl. Ba^{3}r-na^3-de(da)'-ze^2(se^2)-e(a^3-e^2). See BARNADESIEÆ (1st def.).

BARNADESIA (Lat.), n. f. Ba^{3}r-na^3-de(da)'zi^2(si^2)-a^3. From *Barnadez*, the name of a Spanish botanist. A genus of composite spiny shrubs of the tribe *Mutisiaceæ*, subtribe *Barnadesieæ*, established by Mutis. [B, 42.]

BARNADESIÆ [Humboldt, Bonpland, Kunth] (Lat.), n. f. pl. Ba^{3}r-na^3-de(da)'zi^2(si^2)-e(a^3-e^2). See BARNADESIEÆ (1st def.).

BARNADESIEÆ (Lat.), n. f. pl. Ba^{3}r-na^3-de(da)-zi(si^2)'e^2-e-(a^3-e^2). Fr., *barnadésiées.* 1. Of Cassini, a division or subtribe of composite plants of the tribe *Mutisiaceæ*, including the genera *Barnadesia* and *Chuquiragua.* According to Bentham and Hooker and De Candolle, it includes *Barnadesia* and *Schlechtendahlia.* 2. Of Reichenbach, a division of the *Homoianthæ*, comprising the subdivisions *Trixideæ*, *Nassauvieæ*, and *Gochnatieæ.* [B, 42, 170.]—**B. veræ** [Reichenbach]. A division of the *Gochnatieæ;* the same as *B.* (1st def.). [B, 170.]

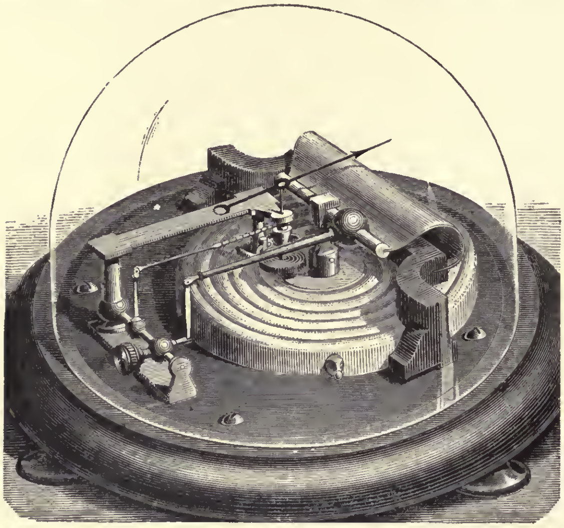
BARNET, n. Ba^{3}rn'e^{2}t. A place in England, where there is a spring the waters of which resemble those of Epsom, but are weaker. [L, 84.]

BARNUF (Ar.), n. The *Conyza odorata.* [B, 121.]

BARODMEUM, BARODMIUM (Lat.). n's n. Ba^{2}r(ba^{3}r)-o^{2}d-me(ma)'u^{3}m(u^{4}m), -mi(me)'u^{3}m(u^{4}m). Gr., βαροδμεῖον. See BARYODMIA.

BARODMOS (Lat.), adj. Ba^{2}r(ba^{3}r)-o^{2}d'mo^{2}s. See BARYODMOS.

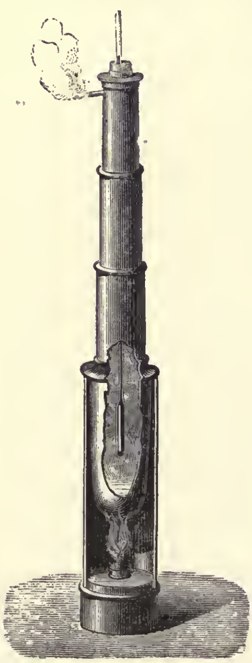
BAROGRAPH, n. Ba^{2}r'o-gra^{3}f. From βάρος, weight, and γράφειν, to write. A recording barometer. [B, 270.] See illustration under *Counterpoised* BAROMETER.



BAROLITE, n. Ba^{2}r'o-lit. From βαρύς, heavy, and λίθος, a stone. Ger., *Barolith*, *Witherite;* native barium carbonate. [A, 315.]

BAROLOGY, n. Ba^{2}r-o^{2}l'o-ji^2. From βάρος, weight, and λόγος, understanding. Fr., *barologie.* That department of physics which relates to gravitation. [A, Comte (A, 385); L, 41.]

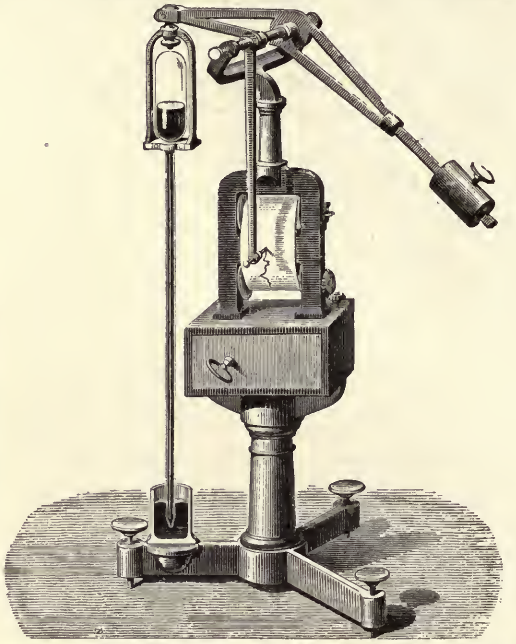
BAROMACROMETER, n. Ba^{2}r-o-ma^{2}k-ro^{2}m'e^{2}t-u^{5}r. Lat., *baromacrometrum* (from βάρος, weight, μάκρος, length, and μέτρον, a measure). Fr., *baromacromètre.* Ger., *Baromakrometer*, *Kindermesswage.* It., *baromacrometro.* Sp., *baromacrómetro.* An apparatus devised by G. W. Stein for ascertaining both the weight and the length of an infant, a description of which he published in 1775. [A, 47; B, 49; K; L, 44, 81.]



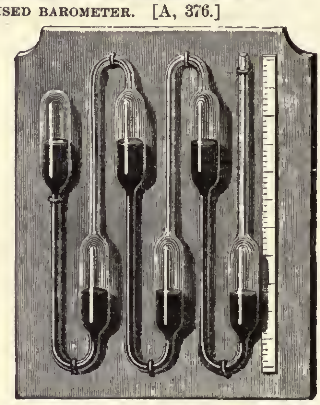
BAROMETER, n. Ba^{2}r-o^{2}m'e^{2}t-u^{5}r. Lat., *barometrum* (from βάρος, weight, and μέτρον, a measure). Fr., *baromètre.* Ger., *Barometer*, *Wetterglas.* It., *barometro.* Sp., *barómetro.* A term (first used by Boyle, in 1664 or 1665) applied to any instrument for ascertaining the pressure of the atmosphere, *i. e.*, the weight with which it presses upon the earth's surface at any given point. There are two chief sorts of b's. [B.] See *Aneroid b.* and *Cistern b.*—**Air b.** See SYMPIESOMETER.—**Aneroid b.** Fr., *baromètre anéroïde.* Ger., *Aneroidbarometer.* A form of b. devised by Bigi in 1847; a small round metallic box, nearly exhausted of air, with a thin corrugated lid which the weight of the atmosphere tends to press in more or less. A system of levers causes an index, sweeping over a dial, to mark the slightest movements of the thin lid. [B, 2.]—**B'natur** (Ger.). A morbid susceptibility to atmospheric impressions. [R. Arndt (A, 319).]—**Boiling-point b.** Syn.: *thermo-b.*, *hypsometer* [Regnault]. An instrument for estimating the atmospheric pressure from the temperature at which water boils when subjected to this pressure. It consists essentially of a delicate thermometer immersed in the steam rising from boiling water. The result is reached by reference to a table of vapor-pressures. [A, 376; B.]—**Bourdon's metallic b.** A variety of the aneroid b. consisting of a vacuous metallic box in the form of a flat tube bent almost into a circle. Its two ends approach or recede from each other as the atmospheric pressure increases or diminishes. [B, 2.]—**Cistern b.**

Fr., *baromètre à cuvette*. Ger., *Gefässb'*, *Kapselb'*. The simple form of b., invented by Torricelli. It consists of a tube, closed at one end, filled with liquid (usually mercury), and inverted into a vessel containing the same liquid. The liquid in the tube falls, leaving above it a closed vacuous space (the Torricellian vacuum),

THE ANEROID BAROMETER. [A, 376.]



until the weight of the atmosphere pressing upon the liquid in the vessel sustains the column of liquid in the tube. This occurs when the weight of the column of liquid is just equal to that of the column of air of the same diameter resting upon the liquid in the reservoir. This latter weight, which is the atmospheric pressure, is, therefore, directly proportional to the weight, and hence to the height, of the column in the tube, and the latter is read off from a scale graduated in fractions of an inch. [B.]—**Counterpoised b.** Ger., *Wageb'*. A form of cistern b. invented by S. Borland about the year 1680, in which the barometric tube is suspended from one end of a pivoted beam, a counterpoise being carried by the other end. As the atmospheric pressure increases, the mercury in the tube rises, making the tube and its contents heavier, while the sinking of the mercury in the cistern decreases the upward pressure due to displacement. Consequently the end of the beam to which the tube is attached falls. The variations of pressure are indicated by the movements of the beam, which may be recorded by a graphic mechanism, so that the instrument may be used as a barograph. [A, 376.]—**Differential b.** A manometer devised by Regnault for measuring gaseous pressures of less than one atmosphere. It consists of a cistern b. into the reservoir of which two tubes dip, one closed at the top, the other communicating with a vessel containing the gas under observation. The difference in the height of the mercury in the two tubes, measured with a cathetometer, indicates the difference between the tension of the gas and the atmospheric pressure. [B.]—**Dosenb'** (Ger.). See *Aneroid b.*—**Fahrenheit's b.** A form of b. in which the height of the barometric column is reduced by the device of employing a number of alternate columns of mercury and of water or any other



REGNAULT'S BOILING-POINT BAROMETER. [A, 376.]

The top of the tube.

FORTIN'S BAROMETER. [A, 376.]

liquid, usually colored. A glass tube with bulbous expansions at regular intervals is bent several times upon itself. The lower bulbs contain mercury, and the upper bulbs the other liquid. The atmospheric pressure is balanced by the sum of the differences of level of the columns of mercury, minus the sum of the corresponding differences for the columns of the other liquid. The instrument is not sensitive enough for ordinary use, but a similar device is used for measuring very high pressures. [A, 376.]—**Federb'** (Ger.). See *Aneroid b.*—**Flaschenb'** (Ger.). See *Cistern b.*—**Fortin's b.** A form of the cistern b. constructed with a view to portability and facility of accurate reading. The bottom of the reservoir is made of leather, and can be raised or lowered by means of a screw, so that the mercury in it can always be brought to a constant level, or, when the instrument is not in use, can be made to fill the reservoir completely, thus preventing the admission of air and the danger of breaking the instrument by a sudden movement of the mass of mercury. The column of mercury bears a cylindrical float furnished with a vernier. [A, 376; B.]—**Gay-Lussac's b.** See *Siphon b.*—**Gefässb'** (Ger.). See *Cistern b.*—**Heberb'** (Ger.). See *Siphon b.*—**Kapselb'** (Ger.). See *Cistern b.*—**Mercurial b.** Ger., *Quecksilberb'*. A b. in which a column of mercury is sustained by atmospheric pressure, as distinguished from a metallic b. and from one in which another liquid than mercury is used. [B.]—**Metallic b.** See *Aneroid b.* and *Bourdon's metallic b.*—**Morland's b.** See *Counterpoised b.*—**Quecksilberb'** (Ger.). See *Mercurial b.*—**Radb'** (Ger.). See *Wheel b.*—**Registering b.** Fr., *baromètre enregistreur*. Ger., *registrirendes B.* See BAROGRAPH and *Counterpoised b.*—**Reiseb'** (Ger.). A portable b. [B, 49.] See *Fortin's b.*—**Siphon b.** Fr., *baromètre à siphon*. Ger., *Heberb'*. It., *barometro a sifone*. Sp., *barómetro de sifon*. A modification of the cistern b. in which the reservoir is replaced by the shorter of the two arms of a U-shaped tube containing mercury. In Gay-Lussac's siphon b. the two arms of the U are connected by a capillary tube. The difference in height of the columns in the two arms indicates

THE SIPHON BAROMETER. [A, 376.]

THE WHEEL BAROMETER. [A, 376.]

the atmospheric pressure. [B.]—**Thermo-b.** See *Boiling-point b.*—**Torricelli's b.** The primitive form of the cistern b., consisting only of a glass tube filled with mercury and inverted into an open vessel also containing mercury. [B.]—**Wageb'** (Ger.). See *Counterpoised b.*—**Water b.** Ger., *Wasserb'*. A cistern b. containing water instead of mercury. Such b's must be at least 33 feet long. [B.]—**Wheel b.** Fr., *baromètre à cadran*. Ger., *Radb'*. A form of the siphon b. invented by Hooke in 1683, in which a float placed in the short arm of the tube rises and falls with the mercury, and turns a needle pivoted at the centre of a dial. [A, 376; B.]

BAROMÈTRE (Fr.), n. Ba^{3}r-o-me^{2}tr. 1. A barometer. [B.] 2. A provincial name for the *Carlina acaulis*. [B, 121.]—**B. à cadran.** See *Wheel* BAROMETER.—**B. à cuvette.** See *Cistern* BAROMETER.—**B. à siphon, B. de Gay-Lussac.** See *Siphon* BAROMETER.—**B. de Regnault.** See *Differential* BAROMETER.

BAROMETRIC, BAROMETRICAL, adj's. Ba^{2}r-o-me^{2}t'-ri^{2}k, -ri^{2}k-a^{2}l. Lat., *barometricus*. Fr., *barométrique*. Ger., *barometrisch*. It., *barometrico*. Sp., *barométrico*. Pertaining to a barometer, to barometry, or to atmospheric pressure.

BAROMETROGRAPH, n. Ba^{2}r-o-me^{2}t'ro-gra^{3}f. Lat., *barometrographium* (from βάρος, weight, μέτρον, a measure, and γράφειν, to write). Fr., *barométrographe*. Ger., *Barometrograph*. See BAROGRAPH.

BAROMETROGRAPHY, n. Ba^{2}r-o-me^{2}t-ro^{2}g'ra^{2}f-i^2. Fr., *barométrographie*. See BAROMETRY.

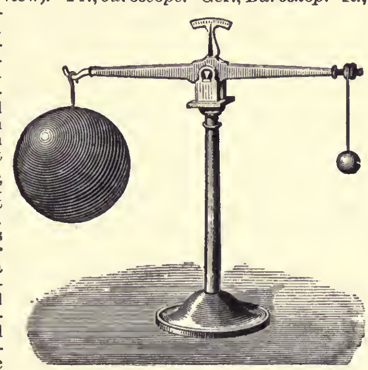
BAROMETRUM (Lat.), n. n. Ba^{2}r(ba^{3}r)-o-me^{2}t'ru^{3}m(ru^{4}m). See BAROMETER.

BAROMETRY, n. Ba^{2}r-o^{2}m'e^{2}t-ri^2. Fr., *barométrie*. Ger., *Barometrie*. The science of the barometer and its uses. [L, 41.]

BAROMETZ, n. Ba^{2}r'o-me^{2}tz. See CIBOTIUM *b.*

BARONES (Lat.), n. m., pl. of *baro*. Ba^{2}r(ba^{3}r)-o'nez(nas). Syn.: *nepones*. An ancient term for "vermiculi in pinnis, quibus compressis, illi exeunt" (perhaps comedones). [A, 325.]

BARONETZ, n. Ba^{2}r'o-ne^{2}tz. See CIBOTIUM *barometz*.



BARONG (Ar.), n. The *Lycoperdon pedunculatum*. [B, 121.]

BAROS (Lat.), n. n. Ba(ba^3)'ro^{2}s. Gen., *bar'eos (-eis)*. Gr., βάρος. Lit., weight; a sensation of weight, especially in the limbs; lassitude. [Hippocrates (A, 325).]

BAROS, n. Borneo camphor. [B.]

BAROSANEME, n. Ba^{2}r-o^{2}s'a^{2}n-em. Lat., *barosanemium* (from βάρος, weight, and ἄνεμος, wind). Fr., *barosanème*. An instrument for showing the force of the wind by means of a wheel held with a spring. [A, 306; L, 116.]

BAROSCOPE, n. Ba^{2}r'o-skop. Lat., *baroscopium* (from βάρος, weight, and σκοπεῖν, to view). Fr., *baroscope*. Ger., *Baroskop*. It., *baroscopio*. Sp., *baróscopo*. 1. A barometer. [A, 322.] 2. An instrument for demonstrating the upward pressure of liquid and gaseous media upon solid bodies suspended in them; a balance with a ball suspended at each end of the beam, the two balls being of the same weight, but very unequal in size. When the apparatus is placed in the receiver of an air-pump, and a portion of the air is exhausted, the large ball tends to fall; on exhausting the air and admitting carbon dioxide at atmospheric pressure, the small ball tends to fall. [A, 376.]

A BAROSCOPE. [A, 376.]

BAROSELENITE, n. Ba^{2}r-o-se^{2}l'e^{2}n-it. From βαρύς, heavy (see also SELENITE). Native barium sulphate. [L, 108.]

BAROSKAMPFER (Ger.), n. Ba^{3}r'os-ka^{3}mp-fe^{2}r. Borneo camphor. [B, 180.]

BAROSMA (Lat.), n. f. Ba^{2}r(ba^{3}r)-o^{2}z(o^{2}s)'ma^3. Written also (more correctly) *baryosma*. From βαρύοσμος (= βαρύοδμος), having an oppressive odor. Fr., *barosme*. Ger., *Buccostrauch*. A genus of rutaceous plants of the tribe *Diosmeæ*, established by Willdenow, having 5-parted, hermaphrodite, axillary flowers with subsessile naked petals, 10 anthers (of which 5 are abortive and converted into staminodia), and a 5-lobed ovary, with a central elongated style bearing a minute simple stigma, and with 5 loculi, each containing a single ovule. [B, 42, 180.]—**B. alpina.** See *B. pulchra.*—**B. betulina** [Bartling and Wendl]. Syn.: *Hartogia betulina* [Berg.], *Bucco betulina* [Römer and Schultes], *Diosma betulina* [Thunberg]. A South African branching shrub with rod-like branches bearing opposite cuneate-obovate leaves with obtuse recurved tips; one of the plants furnishing buchu. [B, 5, 263.]—**B. camphor.** See under CAMPHOR.—**B. crenata** [Kunze]. Ger., *kerbblättriger Buccostrauch*. Syn.: *Diosma crenata* [Linnæus], *Bucco crenata* [Römer and Schultes]. A species identified by Harvey and Sonder with *B. crenulata*. [B, 263.]—**B. crenulata** [Hooker]. Syn.: *Diosma crenulata* [Linnæus] (seu *serratifolia* [Burch.], seu *odorata* [De Candolle]), *Adenandra cordata* [Link]. The true buchu-bush; a small shrub with opposite oblong, ovate or obovate, crenulate or serrate leaves, growing at the Cape of Good Hope. It furnishes the buchu (*q. v.*) of commerce. [B, 263.]—**B. ecklonlana** [Berg.]. See *B. crenulata.*—**B. ericifolia** [Andr.]. A species furnishing a variety of buchu. The leaves are very small, resembling those of the heath, and have a powerful odor distinct from that of ordinary buchu. They are used by the Hottentots like ordinary buchu, also as a perfume and vulnerary. [E. M. Holmes, "Pharm. Jour. and

Trans.," Nov. 10, 1877, p. 362 (B).]—**B. latifolia** [Römer and Schultes]. Syn.: *Diosma latifolia* [Linn., fil.] (seu *odoratissima* [Montin.]). A South African pubescent shrub rather more than a foot high, with scattered ovate leaves, not dotted inferiorly, having a crenate margin with glandular incisures. [B, 263.]—**B. odorata** [De Candolle]. See *B. crenulata.* — **A. pulchella** [Bartling and Wendl]. Syn.: *Hartogia pulchella* [Berg.], *Bucco pulchella* [Römer and Schultes], *Diosma pulchella* [Linnæus] (seu *graveolens* [Lichtenet.]). A shrub 3 feet or more in height, having alternate, scattered, ovate, shining leaves, with thick, recurved, crenate margins, punctate on the lower surface. It furnishes buchu. [B, 121, 263.]—**B. pulchra** [Chamisso and Schlechtendahl]. A large variety of *B. pulchella.* [B, 263.]—**B. serratifolia** [Willdenow]. Syn.: *Diosma serratifolia* [Curt.], *Parapetalifera serrata* [Wendl], *Barγosma serratifolia* [Römer and Schultes], *Adenandra serratifolia* [Link]. A South African shrub several feet high, resembling *B. crenulata*, but with narrower and more sharply serrate leaves. It furnishes the so-called long buchu, which has the same properties as ordinary buchu. [B, 5.]—**Folia barosmæ.** Buchu leaves. [B.] See BUCHU.—**Infusum barosmæ.** See *Infusum* BUCHU.

THE BAROSMA CRENULATA.
[A, 327.]

BAROTES (Lat.), n. m. Ba^{2}r(ba^{3}r)-o'tez(tas). Gen., *baro'tis.* Fr., *barote* [Guyton-Morveau]. Baryta. [B, 88.]—**B. salitus.** An old name for barium chloride. [B, 88.]

BAROTHERMOMETER, n. Ba^{2}r-o-thu^{5}r-mo^{2}m'e^{2}t-u^{6}r. From *βάρος*, weight, *θέρμη*, heat, and *μέτρον*, a measure. See *Boiling-point* BAROMETER.

BAROTICUS (Lat.), adj. Ba^{2}r(ba^{3}r)-o^{2}t'i^{2}k-u^{3}s(u^{4}s). Fr., *barotique.* Of or pertaining to baryta. [B, 119.] See SAL *muriaticum baroticum.*

BAROULOU, n. A Carib name for the *Heliconia bihai.* [B, 121.]

BAROUTOUTOBANNA, n. A Carib name for the *Polygala paniculata.* [B, 121.]

BAROXYLUM (Lat.), n. n. Ba^{2}r(ba^{3}r)-o^{2}x'i^{2}l(u^{6}l)-u^{3}m(u^{4}m). See BARYXYLUM.

BARRACARA, n. A Guiana name for the *Erythrina corallodendron.* [B, 121.]

BARRALDEIA (Lat.), n. f. Ba^{2}r(ba^{3}r)-ra^{2}l(ra^{3}l)-di'(de^2'i^2)-a^3. A genus of rhizophoraceous plants established by Du Petit Thouars; referred by Bentham and Hooker to *Carallia.* [B, 42, 121.]

BARRALDEIÆ (Lat.), n. f. pl. Ba^{2}r(ba^{3}r)-ra^{2}l(ra^{3}l)-di'(de^2'i^2)-e(a^3-e^2). Fr., *barraldéiées.* Of Baillon, a series of the *Rhizophoraceæ*, including *Barraldeia* and other genera. [B, 121, 267.]

BARRALET (Fr.), n. Ba^{3}r-ra^{3}l-a. A Provence name for the *Hyacinthus carnosus.* [B, 121.]

BARRALINGUE (Fr.), n. Ba^{3}r-ra^{3}l-a^{2}n^2-g'. A sort of olive. [B.]

BARRAS, n. See ALBARAS.

BARRAS (Fr.), n. Ba^{3}r-ra^3. A resin obtained from incisions in the bark of the fir-tree. [B, 7.]

BARRE (Fr.), n. Ba^{3}r. 1. A village near Strassburg, where there are warm mineral springs. [L, 105.] 2. See BAR. 3. An inward projection of the symphysis pubis, encroaching upon the cavity of the pelvis. [A, 385; L, 43.] 4. The pubic bones. [A, 385.] 5. The interval between the incisor and the molar teeth in certain of the lower animals. [A, 385.] See DIASTEMMA. 6. A form of abdominal pain peculiar to certain diseases. [L, 41.] 7. The seeds of the *Carthamus tinctorius.* ["Proc. of the Am. Pharm. Assoc.," xxvi, p. 722 (B).]—**B.-barras.** See BARRAS (Fr.).—**B. frontale.** A variety of headache in which there is a sensation as of the pressure of a hard body in the depths of the frontal region. [A, 385.]

BARRÉ (Fr.), adj. Ba^{3}r-ra. 1. Of the pelvis, affected with *barre* (*q. v.* [3d def.]); as a n., in the fem., *barrée*, a woman so affected. [K; L, 43.] 2. Of the molar teeth, having the fangs curved in such a manner that they can not be extracted without injury to the maxilla. [A, 385; L, 43.]

BARRED, adj. Ba^{3}rd. 1. Having stripes of a color different from that of the general surface. [L, 73.] 2. (Lat., *septus*; Fr., *barré*; Ger., *versperrt, verriegelt*) see BARRÉ (1st def.).

BARREL, n. Ba^{2}r're^{2}l. 1. The belly of a horse, a mule, or a cow. [L.] 2. The quill portion of a feather. [L, 147.] 3. The tympanum of the ear. [F.]—**B.-chest.** See under CHEST.—**B.-tree.** The *Sterculia rupestris.* [B, 185.]

BARRELIERA [Gmelin] (Lat.), n. f. Ba^{2}r(ba^{3}r)-re^{2}l-i^2-e(a)'-ra^3. See BARLERIA.—**B. prionitis** [Blanco]. See BARLERIA *prionitis.*

BARREMENT (Fr.), n. Ba^{3}r-re^2-ma^{3}n^2. Closure of the veins in horses. [L, 42.]

BARREN, adj. Ba^{2}r're^{2}n. O. E., *barrein.* O. Fr., *baraigne.* Norm. Fr., *barein.* Gr., *στεῖρος.* Lat., *sterilis.* Fr., *stérile.* Ger., *unfruchtbar.* Unfruitful, incapable of procreation; of flowers, having stamens but no pistil, or neither stamens nor pistil. [L, 56, 108.]

BARRENG (Hind.), n. An anthelminthic seed found in the upper provinces of Bengal. [Ainslie (B, 121).]

BARRENNESS, n. Ba^{2}r're^{2}n-ne^{2}s. Gr., *στείρωσις.* Lat., *sterilitas.* Fr., *stérilité.* Ger., *Unfruchtbarkeit.* See STERILITY.

BARRENWORT, n. Ba^{2}r're^{2}n-wu^{5}rt. The genus *Epimedium.* [B, 19.]

BARRIGA, n. A variety of the camphor-tree of Sumatra, having large seeds like pepper. [L, 105.]

BARRIGON, n. The *Pachira b.* [B, 19.]

BARRINGTONIA (Lat.), n. f. Ba^{2}r-ri^{2}ng-ton'i^2-a^3. From *D. Barrington*, an English antiquary. Of Forster, a genus of myrtaceous plants of the tribe *Lecythideæ*, subtribe *Barringtonieæ*, distinguished from other genera of the latter by all its stamens being provided with anthers and by its undivided embryo. [B, 42.]—**B. acutangula** [Gärtner]. Syn.: *Eugenia acutangula* [Linnæus], *Stravadium acutangulum* [Miers] (seu *rubrum* [Wallich]). A tree growing in Bengal and Travancore. The root is bitter, cooling, and laxative, and is used like cinchona; the seeds are employed as an aromatic carminative in colic and in parturition. [B, 172, 173.]—**B. alba** [Miquel]. See *B. racemosa.* [B, 212.]—**B. asiatica** [Kurz]. See *B. speciosa.*—**B. coccinea** [H. Baillon]. Syn.: *Stravadium excelsum* [De Candolle]. A species the leaves of which are eaten in salad. [B, 121.]—**B. edulis.** A species eaten in the Fiji Islands, under the name of *vutu kana.* [B.]—**B. inclyta** [Miers]. See *B. racemosa.*—**B. racemosa** [Blume]. Syn.: *Eugenia recemosa* [Linnæus], *Stravadium album* [De Candolle], *Butonica racemosa* [Miers] (et *alba* [Miers]). An evergreen tree 50 feet in height, growing on the coast of India and the East Indies, having similar properties to those of the *B. acutangula.* The powdered fruit is used as a sternutatory, and applied externally in sore throat and eruptive affections. The root is used to poison fish. [B, 172, 180, 212.]—**B. rubra** [Miquel, Miers]. See *B. racemosa.*—**B. speciosa** [Forster]. Syn.: *Mammea asiatica* [Linnæus]. A tree from 30 to 50 feet high, growing in Ceylon, the Deccan, and Singapore, and throughout the East Indian and Pacific islands. Its fruit is eaten when green, and is used for poisoning fish. An illuminating oil is obtained from the seeds. The *B. speciosa* of Wallich is the *B. racemosa.* [B, 88, 212.]

BARRINGTONIACEÆ (Lat.), n. f. pl. Ba^{2}r-ri^{2}ng-ton-i^2-a-(a^3)'se^2(ke^2)-e(a^3-e^2). Of Lindley, an order of the grossal alliance corresponding to the *Barringtonieæ.* [B, 170.]

BARRINGTONIADS, n. pl. Ba^{2}r-ri^{2}ng-ton'i^2-a^{2}dz. The *Barringtonieæ.* [B, 19.]

BARRINGTONIEÆ (Lat.), n. f. pl. Ba^{2}r-ri^{2}ng-ton-i(i^2)'e^2-e-(a^3-e^2). Fr., *barringtoniées.* The Barringtoniads; a series [Baillon], tribe [De Candolle], or subtribe [Bentham and Hooker] of myrtaceous plants, comprising *Barringtonia* and other genera. According to Bentham and Hooker, who make it a subtribe of the *Lecythideæ*, it is characterized by its alternate, non-punctate leaves, its subvalvate or imbricate calyx, its regular andrœcium consisting of a broad, equal, annulate or cupulate staminiferous disc, and its fleshy or fibrous, indehiscent fruit. According to Baillon, it includes also genera with an irregular andrœcium and woody fruit, and thus corresponds to the *B.* and the *Eulecythideæ* of Bentham and Hooker. [B, 42, 267.]

BARRO (Port.), n. Ba^{3}r'ro. Clay. [*a*, 14.]

BARRURE (Fr.), n. Ba^{3}r-ru^{6}r. See BARRE.

BÄRSANIKEL (Ger.), n. Bar'za^{3}n-i^{2}k-e^{2}l. The bear's-ear sanicle (*Cortusa*). [L, 46, 135.]

BARSATI, n. Syn.: *atrophic carcinoma.* A disease of horses, supposed to be analogous to cancer. [R. W. Burke, "Jour. of Comp. Med. and Surg.," Jan., 1887, p. 165 (L).]

BARSCHE (Ger.), n. pl. Ba^{3}rsh'e^2. The perches (*Percoidei*). [B, 180.]

BARSCHHEIT (Ger.), n. Ba^{3}rsh'hit. Acerbity. [L, 80.]

BARSCHKNOCHEN (Ger.), n. pl. Ba^{3}rsh'knoch^2-e^{2}n. See *Lapides* PERCARUM.

BÄRSCHWAMM (Ger.), n. Bar'shwa^{3}m. See SIBBENS.

BART (Ger.), n. Ba^{3}rt. 1. The beard or any beard-like structure. See BARBA. 2. See BYSSUS. 3. The wattle of a cock. [A, 315.]—**B. am Getreide.** The beard of corn. [A, 315.]—**B'chen.** See BARBULA.—**B'faden.** See BARBEL and AVENA *fatua.*—**B'finne.** Sycosis (*q. v.*). [G.]—**B'flechte.** 1. Sycosis (*q. v.*). [G.] 2. The botanical genus *Usnea.* [B, 180.]—**B'gerste.** The *Hordeum zeocriton.* [B, 180; L, 46.]—**B'gras.** The genus *Andropogon.* [B, 180; L, 37.]—**B'grasöl.** The oil of *Andropogon nardus.* [B, 257.]—**B'grind.** Sycosis (*q. v.*). [L, 37.]—**B'haare.** The hairs of the beard; in botany, the *pili barbati* (see BARBA). [A, 315; B, 198.]—**B'haarig.** See BARBATE.—**B'hafer.** The *Avena fatua.* [A, 315.]—**B'hornig.** See BARBICORNIS.—**B'lappen, B'läppchen.** The wattles of a cock; the gills of a fish. [L, 30, 46.]—**B'lehre.** See POGONOLOGIA.—**B'los.** Beardless; in botany, *imberbis* (*q. v.*). [B, 198; L, 80.]—**B'moos.** The genus *Phascum.* [A, 315.]—**B'nelke.** The *Dianthus barbatus.* [B; L, 80.]—**B'nuss.** The filbert (*Corylus tubulosa*). [A, 315.]—**B'spitze.** See ANTENNULA.—**B'schlüsselflechte.** The *Parmelia florida.* [L, 80.]—**B'schnäbler.** See POGONORRHYNCI.—**B'weizen.** The *Triticum durum*, also some varieties of *Triticum vulgare.* [B, 180.]—**B'wischhafer.** The *Avena orientalis.* [A, 315.]—**Gegliederte B'flechte.** The *Parmelia articulata.* [L, 80.]—**Gemeine B'flechte.** The *Usnea barbata.* [B, 180.]—**Gemeiner B'weizen.** A variety of the *Triticum vulgare.* [B, 180.]—**Iwarankusa-B'gras.** The *Andropogon iwarancusa.* [B, 180.]—**Jupiter's B.** The *Anthyllis barba Jovis.* [*a*, 2.]—**Männerb'.** See *B'gras.*—**Narden-B'gras.** The *An-*

dropogon nardus. [B, 180.]—**Parasitäre** (oder **Parasitische**) **B'finne.** Parasitic sycosis. [G.]—**Wohlriechende B'flechte.** The *Alectoria Arabum.* [B, 180.]—**Wohlriechendes B'gras.** The *Andropogon schœnanthus.* [B, 180.]

BARTABALLI, n. A Guiana name for the *Licania Bonplandii.* [B, 121.]

BARTAKOO (Bengal.), n. The *Solanum melongena.* [B, 172.]

BARTALAI, n. A Provence name for the *Cuicus ferox.* [B, 121.]

BARTE (Ger.), n. Ba^{3}rt'e^2. Crude whalebone. [A, 315.]

BARTFELD, n. A place in Hungary, where there is a cold saline and ferruginous spring. [A, 385.]

BARTHÉLEMY (Fr.), n. Ba^{3}r-tal-e^{2}m-e. See SAINT-BARTHÉLEMY.

BÄRTHIERCHEN (Ger.), n. pl. Bar'ter-ch^{2}e^{2}n. See ARCTISCA.

BARTHOLINITIS (Lat.), n. f. Ba^{3}r-to-len-i(e)'ti^{2}s. Gen., *bartholinit'idis.* From *Bartholin,* the name of a Danish physician (see also *-itis**). Fr., *bartholinite.* Inflammation of the vulvo-vaginal gland (Bartholin's gland) or its duct. [Grünfeld (A, 319).]

BÄRTIG (Ger.), adj. Bart'i^{2}g. See BARBATE.

BÄRTLEIN (Ger.), n. Bart'lin. See BARBULA.—**B. unseres Herrgottes.** The *Spiræa ulmaria.* [L, 80.]

BARTLINGIEÆ (Lat.), n. f. pl. Ba^{3}rt-li^{2}ng-i(i^2)'e^2-e(a^3-e^2). Of Schauer, a subtribe of leguminous plants of the tribe *Chamælaucieæ,* including the single genus *Bartlingia.* [B, 121, 170.]

BARTONIA (Lat.), n. f. Ba^{3}r-to'ni^2-a^3. Named for B. F. Barton, an American botanist. Fr., *bartonie.* 1. Of Muhlenberg, a genus of American gentianaceous plants (the *Centaurella* of Michaux). [B, 34.] 2. A genus of loasaceous plants indigenous to North America. [B.]—**B. aurea.** A species of *B.* (2d def.) indigenous to California; a succulent plant 2 feet high, with very showy golden-yellow flowers. [B, 19.]—**B. ornata.** A species of *B.* (2d def.) with large white flowers, found in the northwestern and western United States. [B; 19.]—**Golden b.** See *B. aurea.*

BARTONIEÆ (Lat.), n. f. pl. Ba^{3}r-to-ni(ni^2)'e^2-e(a^3 e^2). Of Spach, a section of loasaceous plants, including *Bartonia* and other genera. [B, 170.]

BARTRAMEA (Lat.), n. f. Ba^{3}rt-ra^{2}m'e^2-a^3. Of De Candolle, see TRIUMFETTA.

BARTRAMIA (Lat.), n. f. Ba^{3}rt-ra^{2}m'i^2-a^3. Named for Bartram, a Pennsylvania botanist. 1. A genus of mosses, established by Hedwig. [B.] 2. Of Linnæus and others, see TRIUMFETTA.

BARTRAMIACEA (Lat.), n. n. pl. Ba^{3}rt-ra^{2}m-i^2-a(a^3)'-se^2-(ke^2)-a^3. Of Reichenbach, a subdivision of the *Acrocarpia* (mosses), including the sections *Bryacea, Mniacea, Conostomea,* and *Funariacea.* [B, 170.]

BARTRAMIACEÆ (Lat.), n. f. pl. Ba^{3}rt-ra^{2}m-i^2-a(a^3)'se^2-(ke^2)-e(a^3-e^2). Of Bruch, Schimper, and Gümbert, a family of mosses, including 3 genera; by Müller and Rabenhorst, made a subtribe or subsection of the *Bartramioideæ.* [B, 170.]

BARTRAMIÆ [Brid.], **BARTRAMIEÆ** [Hampe *et al.*] (Lat.), n's f. pl. Ba^{3}rt-ra^{2}m'i^2-e(a^3-e^2), -ra^{2}m-i(i^2)'e^2-e(a^3-e^2). A family of mosses (*Bryaceæ*) established by Schimper. [B, 170.]

BARTRAMIOIDEÆ (Lat.), n. f. pl. Ba^{3}rt-ra^{2}m-i^2-o(o^2)-i^{2}d-(ed)'e^2-e(a^3-e^2). Fr., *bartramioïdes.* 1. Of Fürnr., the *Bartramiaceæ.* 2. Of Müller and of Rabenhorst, a tribe or section of mosses, including the subtribes *Bartramiaceæ* and *Meeseaceæ,* or the subsections *Bartramiaceæ* and *Oreadeæ.* [B, 170.]

BARTSCH (Ger.), **BARTSCHKRAUT** (Ger.), n's. Ba^{3}rch, Ba^{3}rch'kra^3-ut. The *Heracleum sphondylium.* [A, 315; B, 180.]

BARTSCHIR (Ger.), n. Ba^{3}rt'sher. The genus *Bartsia.* [A, 315.]

BARTSIA (Lat.), n. f. Ba^{3}rt'si^2-a^3. Named for J. Bartsch, a Prussian physician. Fr., *bartsie.* Ger., *Bartsia, Bartschir.* A genus of scrophulariaceous herbs of the tribe *Euphrasieæ,* established by Linnæus. [B, 212.]—**B. imbricata** [Lapeyrouse]. A variety of the *Euphrasia officinalis.* [B, 180, 214.]—**B. odontites** [Hudson]. Ger., *rother Augentrost.* Syn.: *Odontites rubra* [Bentham] (seu *serotina* [Boissier]), *Euphrasia odontites* [Linnæus] (seu *rubra* [Persoon]). A species indigenous to Cashmere and growing throughout northern and central Asia and in Europe; a low annual. The entire plant (*herba euphrasiæ rubræ*) was formerly employed in toothache and in menorrhagia. [B, 180, 212.]

BARTSIEÆ (Lat.), n. f. pl. Ba^{3}rt-si(si^2)'e^2-e(a^3-e^2). Of G. Don and of Bentham, a subtribe of scrophulariaceous plants of the tribe *Euphrasieæ,* including *Bartsia, Euphrasia,* and other genera. [B, 170, 214.]

BARTUNDIE, n. The *Morinda citrifolia.* [W. Dymock, "Pharm. Jour. and Trans.," Oct. 28, 1876, p. 350 (B).]

BĀRTUNG, n. An East Indian name for the seeds of the *Plantago major.* [C. Shah, "Indian Med. Gaz.," Nov., 1885, p. 344.]

BARU (Malay), n. 1. (Fr., *varou*) the *Hibiscus tiliaceus.* [A, 385; B, 19, 121.] 2. A woolly substance obtained from the base of the leaves of the *Arenga saccharifera.* [B, 19, 121.]

BARUCE, n. A name given by Clusius to the fruit of *Hura crepitans.* [B, 121.]

BARUEL (Fr.), n. Ba^{3}r-u^6-e^{2}l. A place in French Guiana, where there is a cold ferruginous spring. [A, 385.]

BARU-LAUT (Malay), n. The *Hibiscus populneus.* [B, 121.]

BARUN (Bengal., Hind.), n. The *Cratæra religiosa* (*Capparis trifoliata*). [B, 181.]

BARURA, n. A name given in Thibet to a bitter nut said to have tonic properties and to be used for abdominal pains. [B, 121.]

BARURAC, n. An alchemical name for glass. [Ruland (A, 325).]

BARURIA (Lat.), n. f. Ba^{2}r(ba^{3}r)-u^2(u)'ri^2-a^3. From βαρύς, heavy, and οὖρον, urine. The condition in which the urine has a high specific gravity. [Fuller, "Med.-chir. Trans.," li (B, 11); K.]

BARUTIN, n. A Syrian name for a sort of mulberry-tree. [B, 121.]

BARUTON, n. Dioscorides's name for the *Juniperus sabina.* [Adanson (B, 121).] Cf. BARYTHRON and BARATHRON.

BAR-VARO, n. A Madagascar name for the *Hibiscus tiliaceus.* [B, 121.]

BARVASCO, n. A West Indian name for the *Jacquinia armillaris.* [B, 121.] Cf. BARBASCO.

BÄRWINDE (Ger.), n. Bar'vi^{2}nd-e^2. The *Convolvulus sepium.* [A, 315.]

BARWINKEL (Ger.), n. Bar'vi^{2}n^{2}k-e^{2}l. The lesser periwinkle (*Vinca minor*). [A, 315.]

BARWOOD, n. Ba^{6}r'wu^{4}d. The *Baphia nilida;* also the wood obtained from it. [B, 19, 185.]

BÄRWURZ (Ger.), n. Bar'vurtz. The root of *Meum athamanticum.* [B, 270.]

BÄRWURZEL (Ger.), n. Bar'vurtz-e^{2}l. The *Fœniculum ursinum.* [L, 80.]

BARYA (Lat.), n. f. Ba^{3}r'i^2-a^3. Named for Dr. A. de Bary. A genus of begoniaceous plants now referred to *Begonia.* [B, 121.]

BARYACOCCALON (Lat.), n. n. Ba^{2}r(ba^{3}r)-i^2(u^6)-a^3-ko^{2}k'ka^3-lo^{2}n. See BARYCOCCALON.

BARYAKUSIE (Ger.), n. Ba^{3}r-u^6-a^3-ku-se'. See BARYECOIA.

BARYANDRA (Lat.), n. f. Ba^{2}r(ba^{3}r)-i^2(u^6)-a^{2}n(a^{3}n)'dra^3. Of De Candolle, a section of the genus *Begonia.* [B, 121.]

BARYCOCCALON (Lat.), n. n. Ba^{2}r(ba^{3}r)-i^2(u^6)-ko^{2}k'ka^3-lo^{2}n. From βαρύς, heavy, and κόκκαλος, the kernel of a pine-cone. A name formerly given in Greece to the *Datura metel.* [B, 121.]

BARYCOIA (Lat.), n. f. Ba^{2}r(ba^{3}r)-i^2(u^6)-ko(ko^2)'i^2-a^3. See BARYECOIA.

BARYECŒA, BARYECOIA (Lat.), n's f. Ba^{2}r(ba^{3}r)-i^2(u^6)-e^2(a)-se'(ko^2'e^2)-a^3, -ko(ko^2)'i^2-a^3. Gr., βαρυηκοΐα (from βαρύς, heavy, and ἀκοή, the hearing). Fr., *baryécoïe, dureté de l'ouïe* (ou *d'oreille*). Ger., *Baryeköe, Schwerhörigkeit, Schwerhören.* Hardness of hearing, partial deafness. [F.]

BARYECOOS, BARYECOUS (Lat.), adj's. Ba^{2}r(ba^{3}r)-i^2(u^6)-e^{2}k(ak)'o(o^2)-o^{2}s, -u^{3}s(u^{4}s). Gr., βαρυήκοος. Hard of hearing. [A, 322.]

BARYENCEPHALIA (Lat.), n. f. Ba^{2}r(ba^{3}r)-i^2(u^6)-e^{2}n(e^{2}n^2)-se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)'i^2-a^3. From βαρύς, heavy, and ἐγκέφαλος, the brain. Fr., *baryencéphalie.* Dullness of intellect. [L, 41.]

BARYENCEPHALUS (Lat.), n. m. Ba^{2}r(ba^{3}r)-i^2(u^6)-e^{2}n(e^{2}n^2)-se^{2}f(ke^{2}f)'a^3-lu^{3}s(lu^{4}s). Gr., βαρυεγκέφαλος. Ger., *Dummkopf.* One who is dull of intellect. [A, 322.]

BARYETICA, BARYETICE (Lat.), n's f. Ba^{2}r(ba^{3}r)-i^2(u^6)-e^{2}t'i^2-ka^3, -se(ka). Fr., *baryétique.* Ger., *Baryetik.* That branch of physics which relates to gravitation. [Zenneck (A, 322).]

BARYGLOSSIA (Lat.), n. f. Ba^{2}r(ba^{3}r)-i^2(u^6)-glo^{2}s(glos)'si^2-a^3. From βαρύς, heavy, and γλῶσσα (Attic, γλῶττα), the tongue. Fr., *baryglossie.* Thickness or any imperfection of speech. [A, 322.]

BARYGLOSSUS (Lat.), n. m. Ba^{2}r(ba^{3}r)-i^2(u^6)-glo^{2}s(glos)'su^{3}s-(su^{4}s). Gr., βαρύγλωσσος. A person affected with baryglossia. [A, 322.]

BARYGLOTTIA (Lat.), n. f. Ba^{2}r(ba^{3}r)-i^2(u^6)-glo^{2}t(glot)'ti^2-a^3. See BARYGLOSSIA.

BARYGLOTTICUS (Lat.), adj. Ba^{2}r(ba^{3}r)-i^2(u^6)-glo^{2}t(glot)'-ti^{2}k-u^{3}s(u^{4}s). Pertaining to baryglossia; as a n., see BARYGLOSSUS. [A, 322.]

BARYGLOTTUS (Lat.), n. m. Ba^{2}r(ba^{3}r)-i^2(u^6)-glo^{2}t(glot)'-tu^{3}s(tu^{4}s). See BARYGLOSSUS.

BARYLALIA (Lat.), n. f. Ba^{2}r(ba^{3}r)-i^2(u^6)-la(la^3)'li^2-a^3. From βαρύς, heavy, and λαλιά (from λαλεῖν, to talk), speech. Fr., *barylalie.* See BARYGLOSSIA.

BARYLLIUM (Lat.), n. n. Ba^{2}r(ba^{3}r)-i^{2}l(u^{6}l)'li^2-u^{3}m(u^{4}m). Gr., βαρύλλιον. See ARÆOMETER and HYDROMETER.

BARYMASTUS (Lat.), adj. Ba^{2}r(ba^{3}r)-i^2(u^6)-ma^{2}st(ma^{3}st)'u^{3}s-(u^{4}s). Gr., βαρύμαστος (from βαρύς, heavy, and μαστός, the breast). Having large, heavy breasts. [A, 311.]

BARYMETRY, n. Ba^{2}r-i^{2}m'e^{2}t-ri^2. Lat., *barymetria* (from βαρύς, heavy, and μέτρον, a measure). See BAROMETRY.

BARYOCOCCALON (Lat.), n. n. Ba^{2}r(ba^{3}r)-i^2(u^6)-o(o^2)-ko^{2}k'-ka^3-lo^{2}n. See BARYCOCCALON.

BARYODES (Lat.), adj. Ba^{2}r(ba^{3}r)-i^2(u^6)-o'dez(das). Gr., βαρυώδης. See BARYODMOS.

BARYODMIA, BARYODMIE (Lat.), n's f. Ba^{2}r(ba^{3}r)-i^2(u^6)-o^{2}d'mi^2-a^3, -e(a). Gr., βαρυοδμία (from βαρύς, heavy, and ὀδμή, an odor). Heaviness, oppressiveness of odor; also a subjective sensation of a disagreeable odor. [Aretæus (A, 311, 322).]

BARYODMOS (Lat.), adj. Ba^{2}r(ba^{3}r)-i^2(u^6)-o^{2}d'mo^{2}s. Gr., βαρύοδμος. Having an oppressive odor. [L, 81.]

BARYODYNE, BARYODYNIA (Lat.), n's f. Ba^{2}r(ba^{3}r)-i^2-(u^6)-o^{2}d'i^{2}n(u^{6}n)-e(a), -o-di^{2}n(du^{6}n)'i^2-a^3. From βαρύς, heavy, and ὀδύνη, pain. Continuous severe pain. [A, 322.]

BARYODYNOS (Lat.), adj. Ba^{2}r(ba^{3}r)-i^2(u^6)-o^{2}d'i^{2}n(u^{6}n)-o^{2}s. Pertaining to, caused by, causing, or affected with baryodyne. [A, 322.]

BARYOECŒA (Lat.), n. f. Ba^{2}r(ba^{3}r)-i^2(u^6)-o(o^2)-e^2(a) se'-(ko^2'e^2)a^3. See Baryecoia.

BARYOSMA (Lat.), n. f. Ba^{2}r(ba^{3}r)-i^2(u^6)-o^{2}s'ma^3. For deriv., see Barosma. Fr., *baryosme.* 1. Of Gärtner, the section *Coumarouna* of the genus *Dipteryx.* 2. Of Römer and Schultes, the genus *Barosma.* [B, 121.]—**B. odorata.** See Dipteryx *odorata.*—**B. oppositifolium** [Persoon]. See Dipteryx *oppositifolia.*—**B. tongo** [Gärtner]. See Dipteryx *odorata.*

BARYPHONIA (Lat.), n. f. Ba^{2}r(ba^{3}r)-i^2(u^6)-fon'i^2-a^3. Gr., βαρυφωνια (from βαρύς, heavy, and φωνή, the voice). Fr., *baryphonie.* Ger., *Baryphonie.* Harshness of speech, hoarseness. [A, 311, 322.]

BARYPHONICUS, BARYPHONUS (Lat.), adj's. Ba^{2}r(ba^{3}r)-i^2(u^6)-fo^{2}n(fon)'i^{2}k-u^{3}s(u^{4}s), -fon'u^{3}s(u^{4}s). Gr., βαρύφωνος. Fr., *baryphonique.* Pertaining to, characterized by, or affected with hoarseness. [A, 311, 322 ; L, 81.]

BARYPHONY, n. Ba^{2}r-i^{2}f'o-ni^2. See Baryphonia.

BARYPICRON (Lat.), n. n. Ba^{2}r(ba^{3}r)-i^2(u^6)-pi^{2}k'ro^{2}n. From βαρύς, heavy, and πικρός, bitter. An old term for the *Artemisia vulgaris* or, according to some, the *Artemisia absinthium.* [B, 88 ; Apuleius (B, 121).]

BARYPLOTERES (Lat.), n. m. pl. Ba^{2}r(ba^{3}r)-i^2(u^6)-plo-te(ta)'-rez(re^{2}s). From βαρύς, heavy, and πλωτήρ, a swimmer. J. A. Ritgen's term for a family of aquatic birds characterized by swimming in a heavy, clumsy manner. [L, 180.]

BARYPODA (Lat.), n. n. pl. Ba^{2}r(ba^{3}r)-i^{2}p(u^{6}p)'o^{2}d-a^3. From βαρύς, heavy, and πούς, a foot. Ger., *Hufbeutler.* A sublegion of the *Botanophaga* having hoofs. [L, 173.]

BARYSOMATIA, BARYSOMIA (Lat.), n's f. Ba^{2}r(ba^{3}r)-i^2(u^6)-so^{2}m-a(a^3)'shi^2(ti^2)-a^3, -so'mi^2-a^3. From βαρύς, heavy, and σῶμα, the body. Fr., *barysomie.* Obesity. [L, 30.]

BARYSOMUS (Lat.), adj. Ba^{2}r(ba^{3}r)-i^2(u^6)-so'mu^{3}s(mu^{4}s). Gr., βαρύσωμος. Corpulent. [A, 322.]

BARYT (Ger.), n. Ba^{3}r-u^{6}t'. Baryta ; joined with a qualifying adj. derived from the name of an acid, the corresponding oxy-salt of barium (*e. g., schwefelsaurer B.* = barium sulphate ; *mangansaurer B.= mangansaures Barium* [*q. v.*]). [B.]—**Aetzb'.** Barium oxide. [B, 270.]—**B'erde.** Earthy barium sulphate (heavy spar). [B, 180.] See Barium *sulphate.*—**B'gelb.** Barium chromate. [B, 270.]—**B'haltig.** See Barytiferous.—**B'hydrat.** Barium hydroxide. [B, 270.]—**B'metall.** Barium. [A, 315.]—**B'salpeter.** Barium nitrate. [B, 270.]—**B'schwefelleber.** Barium sulphide. [B.]—**B'spath.** Leafy heavy spar (barium sulphate). [B, 180.]—**B'stein.** See Barytin.—**B'wasser.** Baryta water. [B, 270.]—**B'weiss.** Barium sulphate. [B. 270.]—**Bromsaurer B., Chlorsaurer B.,** etc. See *Bromsaures* Barium, *Chlorsaures* Barium, etc.—**Erdiger B.** See *B'erde.*—**Salzsaurer B.** Barium chloride. [B.]—**Schwefelsaurer B.** Barium sulphate. [B, 270.]

BARYTA (Lat.), n. f. Ba^{2}r(ba^{3}r)-i(u^6)'ta^3. From βαρύτης, heaviness. Fr., *baryte.* Ger., *Baryt.* It., Sp., *barita.* Barium oxide ; a grayish-white, friable, porous substance obtained by the combustion of barium in the air or by decomposing barium nitrate in a red-hot crucible. In moist air, it swells up, forming barium hydroxide and barium carbonate, and it combines with water with the evolution of heat to form the hydroxide. The oxy-salts of barium were formerly regarded as salts of b. For such compounds, see under Barium. [B.]—**Acetas barytæ.** Barium acetate. [B, 119.]—**Aqua barytæ.** B. water. [B, 119.]—**Aqua barytæ muriatis.** See *Solutio muriatis barytæ.*—**B. acetica.** Barium acetate. [B, 270.]—**B. carbonica.** Barium carbonate. [B, 119.]—**Barytæ arsenas, Barytæ arsenias.** See Barium *arsenate.*—**Barytæ carbonas.** See Barium *carbonate.*—**Barytæ hydriodas.** See Barium *iodide.*—**Barytæ murias.** See Barium *chloride.*—**Barytæ præparata.** Preparations of barium ; a term used in some pharmacopœias as the name for a class of poisons. [B, 95.]—**Barytæ sulphas.** See Barium *sulphate.*—**B. hydrata, B. hydrica.** Barium hydroxide. [B, 270.]—**B. hydriodate.** Lat., *b. hydriodica, barytæ hydriodas, hydriodas barytæ.* Fr., *iodhydrate de baryte.* See Barium *iodide.*—**B. hydrochlorate.** Lat., *b. hydrochlorica, hydrochloras barytæ.* Fr., *chlorhydrate de baryte.* Ger., *salzsaurer Baryt.* See Barium *chloride.*—**B. muriate.** Lat., *b. muriatica* [Gr. Ph.], *barytæ murias, murias barytæ.* Fr., *muriate de baryte.* See Barium *chloride.*—**B. nitrate.** Lat., *b. nitrica.* Barium nitrate. [B, 270.]—**B. pura.** Barium oxide. [B, 270.] See *B.*—**B. sulfurata.** Barium sulphide. [B, 270.]—**B. sulfurica, B. sulphurica.** Barium sulphate. [B, 270.]—**B. sulphurica nativa** [Pruss. Ph., 6th ed. ; Gr. Ph.]. Native barium sulphate. [B, 95.]—**B. vitriolata, B. vitriolica nativa.** Barium sulphate. [B, 180.]—**B. water.** Lat., *aqua barytæ.* Fr., *eau de baryte.* Ger., *Barytwasser.* It., *acqua di barita.* Sp., *agua de barita.* A solution of barium hydroxide in water ; used as a chemical reagent, especially for the detection of sulphuric acid and sulphates. [B.]—**Hydrochloras barytæ.** See Barium *chloride.*—**Liquor barytæ aceticæ.** Fr., *solution d'acétate de baryte.* A solution of 1 part of barium acetate in 9 parts of distilled water. [Hamb. Cod., 1835 (B, 119).]—**Liquor barytæ nitricæ.** Fr., *solution d'azotate de baryte.* A solution of 1 part of barium nitrate in 19 parts of distilled water. [Hamb. Cod., 1835 (B, 119).]—**Murias barytæ.** See Barium *chloride.*—**Native sulphate of b.** The b. sulphurica nativa of the Gr. Ph. [B.] See Barium *sulphate.*—**Nitras barytæ.** See Barium *nitrate.*—**Solutio muriatis barytæ.** Fr., *liqueur antiscrofuleuse de Hufeland.* Syn. : *liquor terræ ponderosæ salitæ.* An aqueous solution of barium chloride in various proportions ; formerly official in several pharmacopœias. Hufeland's original preparation was a solution of 1 part of barium chloride in 16 parts of water, and was given in doses of from 5 drops to a drachm, according to the age, in scrofulous conditions, and used as an application to ulcers. [B, 119.]—**Solution of acetate of b.** See *Liquor barytæ aceticæ.*—**Solution of muriate of b.** See *Solutio muriatis barytæ.*—**Solution of nitrate of b.** See *Liquor barytæ nitricæ.*—**Sulphas barytæ.** See Barium *sulphate.*—**Sulphas barytæ nativus** [Belg. Ph.]. Native barium sulphate. [B, 95.]

BARYTATUS (Lat.), adj. Ba^{2}r(ba^{3}r)-i^2(u^6)-ta(ta^3)'tu^{3}s(tu^{4}s). Of or pertaining to baryta. [B, 180.] See Vitriolicum *barytatum.*

BARYTE (Fr.), n. Ba^{3}r-et. Baryta (*q. v.*) ; frequently used also in compound terms designating oxy-salts of barium. [B.]—**Azotate de b.** [Fr. Cod.]. See Barium *nitrate.*—**B. carbonatée.** See Barium *carbonate.*—**B. sulfatée.** See Barium *sulphate.*—**Carbonate de b.** See Barium *carbonate.*—**Chlorhydrate de b.** See Barium *chloride.*—**Chromate de b.** See Barium *chromate.*—**Eau de b.** See Baryta *water.*—**Hydrochlorate de b., Muriate de b.** See Barium *chloride.*—**Nitrate de b.** See Barium *nitrate.*—**Solution d'acétate de b.** See *Liquor* barytæ *aceticæ.*—**Solution d'azotate de b.** See *Liquor* barytæ *nitricæ.*—**Sulfate de b.** See Barium *sulphate.*

BARYTES (Lat.), n. f. Ba^{2}r(ba^{3}r)-i(u^6)'tez(tas). Gen., *baryte'tos* (*-tis*). From βαρύτης, heaviness. See Baryta.—**B. oxythioides.** Barium sulphate. [B, 180.]—**B. salita.** Barium chloride. [B, 88.]—**B. sulphurica, B. testacea, B. vitriolata.** Barium sulphate. [B, 180.]

BARYTHON (Lat.), n. n. Ba^{2}r(ba^{3}r)-i(u^6)'tho^{2}n. An ancient name for savine (the *Juniperus sabina*). [Apuleius (B, 121).] Cf. Barathron and Baruton.

BARYTHYMIA (Lat.), n. f. Ba^{2}r(ba^{3}r)-i^2(u^6)-thi^{2}m(thu^{6}m)'-i^2-a^3. Gr., βαρυθυμία (from βαρύς, heavy), and θυμός, the mind. Fr., *barythymie.* Ger., *Schwermuth* (1st def.), *Jähzorn* (2d def.). 1. Melancholy. 2. Sullenness. [A, 322.]

BARYTHYMUS (Lat.), adj. Ba^{2}r(ba^{3}r)-i^2(u^6)-thi(thu^6)'mu^{3}s-(mu^{4}s). Gr., βαρύθυμος. Ger., *schwermüthig* (1st def.), *jähzornig* (2d def.). 1. Melancholic. 2. Sullen, morose. [A, 322.]

BARYTIC, adj. Ba^{2}r-i^{2}t'i^{2}k. Lat., *baryticus.* Fr., *barytique.* Ger., *barytisch, barythaltig.* Pertaining to or containing barium or baryta. [L, 56.]

BARYTICO-ARGENTIC, adj. Ba^{2}r-i^{2}t''i^{2}k-o-a^{3}r-je^{2}nt'i^{2}k. Lat., *barytico-argenticus.* Fr., *barytico-argentique.* Containing both baryta (or barium) and silver. [B, 38.]

BARYTICO-SODIC, adj. Ba^{2}r-i^{2}t''i^{2}k-o-so'di^{2}k. Lat., *barytico-sodicus.* Fr., *barytico-sodique.* Containing both baryta (or barium) and sodium. [B, 38.]

BARYTICUS (Lat.), adj. Ba^{2}r(ba^{3}r)-i^{2}t(u^{6}t)'i^{2}k-u^{3}s(u^{4}s). See Barytic.

BARYTIFEROUS, adj. Ba^{2}r-i^{2}t-i^{2}f'e^{2}r-u^{3}s. Lat., *barytiferus* (from *baryta* [*q. v.*], and *ferre,* to bear). Fr., *barytifère.* Ger., *barythaltig.* Containing barium or baryta. [L, 116.]

BARYTILE (Fr.), **BARYTILITHE** (Fr.), n's. Ba^{3}r-e-tel, -tel-et. Barium sulphate. [B.]

BARYTIN, n. Ba^{2}r'i^{2}t-i^{2}n. Ger., *Barytstein.* Native barium sulphate ; heavy spar. [B, 270.]

BARYTINE, n. Ba^{2}r'i^{2}t-en. An alkaloid found by Simon in *Veratrum,* afterward called by him jervine (*q. v.*) ; so named on account of its behavior toward sulphuric acid. ["Proc. of the Am. Pharm. Assoc.," xxvi, p. 591 (B).]

BARYTION, BARYTIUM (Lat.), n's n. Ba^{2}r(ba^{3}r)-i^2(u^6)'-shi^2(ti^2)-o^{2}n, -u^{3}m(u^{4}m). See Barium.

BARYTO-CÆLESTIN, n. Ba^{2}r''i^2-to-se^{2}l-e^{2}st'i^{2}n. Ger., *Barytocälestin.* A native double sulphate of barium and strontium. [B, 270.]

BARYTO-CALCITE, n. Ba^{2}r''i^{2}t-o-ka^{2}l'sit. Fr., *baryto-calcite.* Ger., *Barytocalcit.* A native double carbonate of calcium and barium. [B, 270.]

BARYTUM (Lat.), n. n. Ba^{2}r(ba^{3}r)-i(u^6)'tu^{3}m(tu^{4}m). See Barium.

BARYUM (Lat.), n. n. Ba(ba^3)'ri^2(ru^6)-u^{3}m(u^{4}m). The old form of the word *barium,* still often used in Europe, especially in pharmacopœial titles, but in chemical writings usually replaced by barium (*q. v.* for most of the compounds). [B.]—**B'acetat** (Ger.), **B'aceticum.** See Barium *acetate.*—**B. borowolframicum.** See Barium *borotungstate.*—**B'bromat** (Ger.). See Barium *bromate.*—**B. bromatum.** See Barium *bromide.*—**B. bromicum.** See Barium *bromate.*—**B'carbonat** (Ger.), **B. carbonicum.** See Barium *carbonate.*—**B'chlorat** (Ger.). See Barium *chlorate.*—**B. chloratum.** See Barium *chloride.*—**B. chloricum.** See Barium *chlorate.*—**B'chromat** (Ger.), **B. chromicum.** See Barium *chromate.*—**B'hydroxyd** (Ger.). See Barium *hydroxide.*—**B. iodatum.** See Barium *iodide.*—**B. iodicum, B'jodat** (Ger.). See Barium *iodate.*—**B'jodid** (Ger.). See Barium *iodide.*—**B'manganat** (Ger.). See Barium *manganate.*—**B'nitrat** (Ger.). See Barium *nitrate.*—**B. nitricum** [Ger. Ph.]. A test solution of 1 part of barium nitrate in 19 parts of distilled water. [B, 205.]—**B. oleinicum.** See Barium *oleate.*—**B'oxyd** (Ger.). See Baryta.—**B'oxydhydrat** (Ger.). See Barium *hydroxide.*—**B'sulfat** (Ger.). See Barium *sulphate.*—**B'sulfid** (Ger.), **B. sulfuratum, B. sulfuratum purum, B'sulfuret** (Ger.). See Barium *sulphide.*—**B. sulfuricum.** See Barium *sulphate.*—**B'superoxyd** (Ger.). See Barium *dioxide.*—**B'superoxydhydrat** (Ger.). See Barium *tetrahydroxide.*—**Bioxyde de b.** (Fr.). See Barium *dioxide.*—**Bromb'** (Ger.). See Barium *bromide.*—**Chlorb'** (Ger.), **Chloruretum baryi** [Belg. Ph.]. See Barium *chloride.*—**Ioduretum baryi** [Belg. Ph.], **Jodb'** (Ger.). See Barium *iodide.*—**Nitrate de b.** (Fr.). See Barium *nitrate.*—**Sulfate de b.** (Fr.). See Barium *sulphate.*—**Sulphuretum baryi.** See Barium *sulphide.*

BARYXYLON [Batsch], **BARYXYLUM** [Loureiro] (Lat.), n's n. Ba^{2}r(ba^{3}r)-i^{2}x(u^{6}x)′i^{2}l(u^{6}l)-o^{2}n, -u^{3}m(u^{4}m). From βαρύς, heavy, and ξύλον, wood. Fr., *baryxyle.* A genus of plants, probably akin to the *Leguminosæ*, established by Loureiro for a tree with heavy wood growing in the mountains of Cochin-China. [B, 121].

BARZAN (Fr.), n. Ba^{3}r-za^{3}n^2. See BARZUN.

BARZENKRAUT (Ger.), n. Ba^{3}rtz′e^{2}n-kra^3-ut. The *Œnanthe phellandrium.* [A, 315.]

BARZUD (Ar.), n. Galbanum. [L, 105.]

BARZUM (Fr.), **BARZUN** (Fr.), n's. Ba^{3}r-zu^{3}n^2. A mineral spring of the Baréges group. [L, 49.] See BARÉGES.

BAS (Fr.), n. Ba^3. See STOCKING.—**B. pour varices.** See *Elastic* STOCKING.

BASAAL (Malay), n. The *Embelia b.* [B, 172.]

BASAALE-MARAVARA, n. A Malabar name for the *Malaxis Rheedii.* [B, 121.]

BASAL, adj. Ba′sa^{2}l. Lat., *basalis* (from βάσις, a base). Fr., *basal.* Relating to a base (as of the cranium); fundamental, underlying; as a n., a term sometimes used by Huxley and Parker for the basi-sphenoid bone; as a n., in the pl., certain calcareous plates which form a ring around the posterior portion of the calix in the *Echinodermata.* [L, 201, 207.] See also *B.* CARTILAGES.—**B'fortsatz** (Ger.). See *Base*-PROCESS.—**B'haut** (Ger.). See ZONA *radiata.* —**B. membrane.** See *Basement* MEMBRANE.—**B'platte** (Ger.). See *Placental* DECIDUA *serotina.*—**B'saum** (Ger.). See *Cuticular* LAYER.—**B'schicht** (Ger.). The layer of epithelial cells next to the corium in the skin or next to the membrana propria of any stratified epithelium. [J.]—**B'theil der Haube** (Ger.). The b. portion of the tegmentum, forming on each side a portion of the posterior perforated space. [I, 17; K.]—**B'winkel** (Ger.). A cranial angle having its apex at the basion, formed by two lines running from that point to the occipital protuberance and to the nasion respectively. [Benedikt (L, 57).]—**B'zelle** (Ger.). See *Basilar* CELL.—**B'zellen** (Ger.). The cells of the *B'schicht* (*q. v.*). [J.]—**Eckstandiger B'fortsatz** (Ger.). See *Lateral base*-PROCESS.—**Mittlerer B'fortsatz** (Ger.). See *Central base*-PROCESS.—**Seitlicher B'fortsatz** (Ger.). See *Lateral base*-PROCESS.

BASALIA (Lat.), n. n. pl. of *basalis* (*q. v.*). Ba(ba^3)-sa(sa^3)′-li^2-a^3. Huxley's term for the metacarpal bones. [L, 207.]

BASALIS (Lat.), adj. Ba(ba^3)-sa(sa^3)′li^{2}s. See BASAL.—**Basale metapterygii.** In certain fishes, a cartilage which articulates with the posterior acetabular facet of the pelvic girdle, and is connected by smaller cartilages with the posterior portion of the fin. [L, 200.]

BASAN, n. Ba^{2}s′a^{2}n. Fr., *basane.* See BASIL.

BASANASTRAGALA (Lat.), n. f. Ba(ba^3)-sa^{2}n(sa^{3}n)-a^{2}s(a^{3}s)-tra^{2}g(tra^{3}g)′a^3-la^3. Gr., βασαναστραγάλα (from βάσανος, torture, and ἀστράγαλος, the heel). Gout of the foot. [A, 322.]

BASANISMUS (Lat.), n. m. Ba^{2}s(ba^{3}s)-a^{2}n(a^{3}n)-i^{2}z(i^{2}s)′mu^{3}s-(mu^{4}s). Gr., βασανισμός (from βασανίζειν, to investigate scientifically). A scientific investigation. [A, 325.]

BASANITE, n. Ba^{2}s′a^{2}n-it. Gr., βασανίτης (from βάσανος [see BASANOS]). Lat., *basanites.* Fr., *basanite.* Ger., *Basanit, Probirstein.* The touchstone (*lapis lydius*); a variety of black jasper formerly used for testing the purity of gold and silver and for making mortars and whetstones. [A, 325; L, 56.]

BASANOS, BASANUS (Lat.), n's f. Ba^{2}s(ba^{3}s)′a^3-no^{2}s, -nu^{3}s-(nu^{4}s). Gr., βάσανος. 1. See BASANISMUS. 2. See BASANITE. 3. Torture. [A, 322.]

BASAR (Ar.), n. Bulbous plants. [B, 121.]

BASCANION, BASCANIUM (Lat.), n's n. Ba^{2}s(ba^{3}s)-ka^{2}n-(ka^{3}n)′i^2-o^{2}n, -u^{3}m(u^{4}m). Gr., βασκάνιον. A charm against witchery. [A, 311, 322.]

BASCANON, BASCANUM (Lat.), n's n. Ba^{2}s(ba^{3}s)′ka^3-no^{2}n, -nu^{3}m(nu^{4}m). Gr., βάσκανον. Ger., *Zauber, Bezauberung, Anhexen, Behexung.* Incantation, enchantment, magic, witchcraft, fascination. [A, 315, 322, 325.]

BASCULATION, n. Ba^{2}s-ku^{2}l-a′shu^{3}n. Fr., *mouvement en bascule, basculer.* A balance-like movement, one in which one end of a body (*e. g.*, the fœtus or the uterus) moves in a certain direction whenever the other end is made to move in the opposite direction; also the act of producing such a movement. [A, 300; L, 56.]

BASCULE (Fr.), n. Ba^{3}s-ku^{6}l. A balance. [A, 300, 385.]

BASE, n. Bas. Gr., βάσις. Lat., *basis.* Fr., *base.* Ger., *Grund, Grundlage, Grundfläche, Base.* 1. In general, the underlying, fundamental, or lower portion of a structure. 2. In chemistry, according to the old theories of the dual nature of salts, the electro-positive constituent of the latter, *i. e.*, the metallic oxide or other substance which, by union with the electro-negative (acid) constituent, formed the salt. It may be defined as a compound formed either upon the water type (oxide, hydrate, or sulpho-salt) or upon the ammonia type (ammonia, amine, alkaloid, phosphine, stibine, arsine, and bismuthine) capable of neutralizing acids and combining with both acids and anhydrides. In the case of the first class of b's (those derived from the water type), the combination is effected by double decomposition, the b. losing its oxygen and the acid its hydrogen. In the case of b's formed upon the ammonia type, the combination is effected by direct union without decomposition. See AMMONIA and AMMONIUM. B's are called monacid, diacid, or triacid, according as their acidity (their capacity for saturating acids) is 1, 2, or 3, *i. e.*, according as they neutralize 1, 2, or 3 molecules of a monobasic acid. The b's formed upon the water type are designated as monohydric, dihydric, or trihydric, according as they contain 1, 2, or 3 molecules of hydroxyl or hydrosulphanyl. [B.] 3. Of a seed (Ger., *Nabelfleck*), the spot where the funis was attached. [B.] 4. Of a segment or appendage of an insect, the proximal or internal portion. 5. Of a shell, the ventral surface in molluscs. [L, 147.] 6. In pharmacy, the essential or fundamental ingredient of a prescription; also the ingredient which gives consistence to a preparation. [A; B.]—**Acid-forming b., Acidifiable b.** One which by union with water forms an acid. [B.]—**Aldehyde b.** See ALDINE.—**Amic b.** A b. bearing the same relation to a polyatomic alcohol that an amic acid bears to a polybasic acid. The amic b's include anisamine, dianisamine, diglycolamine, glyceramine, diglyceramine, and triglycolamine. [B, 2.]—**Amidogen b.** A monamine, or monamide; so called because it may be regarded as a compound of a radicle with amidogen. [B.]—**Ammonia b.** Fr., *b. ammoniacale.* Ger., *Ammoniakbase.* It., *b. ammoniacale.* Sp., *b. amoniacal.* A b. formed upon the ammonia type, *i. e.*, one consisting of ammonia in which one or more atoms of hydrogen are replaced by elements or radicles; an amine or an amide. [B.]—**Ammonium b.** Ger., *Ammoniumbase.* A b. having the constitution of ammonium in which one or more hydrogen atoms are replaced by elements or radicles. [B.]—**Antimony b.** Fr., *b. antimonique* (ou *stibiée*). Ger., *Antimonbase.* A b. containing antimony as its characteristic element; a stibine or a stibonium. [B.]—**Arsenic b., Arsenical b.** Fr., *b. arsénicale.* Ger., *Arsenikbase.* A b. containing arsenic as its characteristic element; an arsine or an arsonium. [B.]—**Arsonium b.** A substituted arsonium. [B.] See ARSONIUM.—**B. bihydrique** (Fr.). See *Dihydric b.*—**B. distincte** (Fr.). See *Focal* DISTANCE.—**B. du bassin** (Fr.). The upper margin of the pelvis. [L, 41.]—**B. du crâne** (Fr.). See BASIS *cranii.*—**B'nanhydrid** (Ger.). A basic anhydride *i. e.*, an anhydride (oxide) formed from a hydroxide by the abstraction of the elements of a molecule of water. The sulphides formed in the same manner from hydrosulphides are also denoted by this name. [B, 270.]—**B'nblau** (Ger.). See ANILINE *blue.*—**B. processes.** See under PROCESS.—**B. sessile** (Fr.). Brongniart's name for the receptacle or stroma of certain epiphytal *Fungi.* [B, 121.]—**B. stibiée** (Fr.). See *Antimony b.*—**Bismuth b.** Fr., *b. bismuthique.* Ger., *Wismuthbase.* A b. containing bismuth as its characteristic element. [B.] See BISMUTHINE.—**Chinizinb'** (Ger.). See *Quinizinic b.*—**Cinchona b's.** See CINCHONA *alkaloids.*—**Diacid b.** Fr., *b. bi-acide.* Ger., *zweisäurige B.* A b. one molecule of which is capable of neutralizing two molecules of a monobasic acid or a single molecule of a dibasic acid. [B.]—**Dihydric b.** Fr., *b. dihydrique* (ou *bihydrique*). Ger., *dihydrische B.* A b. formed upon the water type and containing two molecules of hydroxyl or hydrosulphuryl; having, therefore, the formula $R''(OH)_2$ or $R''(SH)_2$. [B.]—**Dreisäurige B.** (Ger.). See *Triacid b.*—**Einsäurige B.** (Ger.). See *Monacid b.*—**Geometrical b.** Fr., *b. géométrique.* Ger., *geometrische B.* That portion of an organ or segment of a plant which, in the adult state, is in immediate relation with the part supporting that organ or segment. [B, 121.]—**Hydropyridic b.** Fr., *b. hydro-pyridique.* Ger., *Hydropyridinbase.* A b., such as collidine hexahydride, derived from pyridine by the addition of hydrogen and the substitution of various radicles. [B.]—**Mehrsäurige B.** (Ger.). See *Polyacid b.*—**Monacid b.** Fr., *b. monoacide.* Ger., *einsäurige B.* A b. one molecule of which is capable of saturating a single molecule of a monobasic acid. [B.]—**Monohydric b.** Fr., *b. monohydrique.* Ger., *monohydrische B.* A b. formed upon the water type containing a single molecule of hydroxyl or hydrosulphuryl; having, therefore, the formula R(OH) or R(SH). [B.]—**Nitrogen b.** Ger., *Stickstoffbase.* A b. containing nitrogen and formed upon the ammonia or the ammonium type. [B.] See *Ammonia b.* and *Ammonium b.*—**Opium b's.** See OPIUM *alkaloids.*—**Organic b.** Fr., *b. organique.* Ger., *organische B.* 1. In chemistry, an organic compound (*i. e.*, a carbon compound) acting as a base; applied especially to such compounds as occur ready formed in animal or vegetable tissues. [B.] 2. In botany, that portion of an organ or segment of a plant which was originally attached to the plant axis from which it sprang; *i. e.*, the portion which represents the situation of the part which was first developed. [B, 121.]—**Oxy-b., Oxygen b.** Fr., *oxy-base.* Ger., *Oxybase.* A b. formed upon the water type and consisting of one or more molecules of hydroxyl united with a metallic or other radicle. The general formula of the oxy-b's is $R(OH)n$, in which R is a radicle of the quantivalence *n.* [B.]—**Phosphonium b.** A substituted phosphonium. [B.] See PHOSPHONIUM.—**Phosphorus b.** Fr., *b. phosphorique.* Ger., *Phosphorbase.* A b. containing phosphorus as its characteristic element; a phosphine or a phosphonium. [B.]—**Polyacid b.** Fr., *b. polyacide.* Ger., *mehrsäurige B.* A b. one molecule of which is capable of saturating more than one molecule of a monobasic acid. [B.]—**Polyhydric b.** Fr., *b. polyhydrique.* Ger., *polyhydrische B.* A b. formed upon the water type and containing more than one molecule of hydroxyl or hydrosulphuryl. [B.]—**Pyridic b.** Fr., *b. pyridique.* Ger., *Pyridinbase.* A b. derived from pyridine by substitution or addition. [B.]—**Quebracho b's.** See QUEBRACHO *alkaloids.*—**Quinizinic b.** Fr., *b. quinizinique.* Ger., *Chinizinbase.* A b. derived from quinizine by substitution or addition, or formed upon the same model. [B.]—**Salifiable b.** A b. capable of combining with an acid to form a salt. [B.]—**Sauerstoffb'** (Ger.). See *Oxy-b.*—**Schwefelb'** (Ger.). See *Sulpho-b.*—**Stickstoffb'** (Ger.). See *Nitrogen b.*—**Sulpho-b.** Ger., *Sulfobase.* A b. formed upon the water type and consisting of one or more molecules of hydrosulphuryl combined with a metallic or other radicle. The general formula of the sulpho-b's is $R(SH)n$, in which R is a radicle of the quantivalence *n.* [B.]—**Triacid b.** Fr., *b. triacide.* Ger., *dreisäurige B.* A b. one molecule of which is capable of saturating three molecules of a monobasic acid or a single molecule of a tribasic acid. [B.]—**Trihydric b.** Fr., *b. trihydrique.* Ger., *trihydrische B.* A b. formed upon the water type containing three molecules of hydroxyl or hydrosulphuryl. The general formula is $R'''(OH)_3$ or $R'''(SH)_3$. [B.]—**Wismuthb'** (Ger.). See *Bismuth b.*—**Zweisäurige B.** (Ger.). See *Diacid b.*

BASEBROOM, n. Bas′bru^{4}m. The *Genista tinctoria.* [B, 275.]

BASEITY, n. Ba^{2}s-e′i^{2}t-i^2. Lat., *baseitas.* Basicity (*q. v.*). [L, 81.]

BASELBEERE (Ger.), n. Ba^{3}z′e^{2}l-bar-e^2. The barberry. [L, 46.]

BASÉLI, n. A Languedoc name for the *Ocimum basilicum.* [B, 121.]—**B. del larje.** The *Ocimum latifolium.* [B, 121.]

BASELLA (Lat.), n. f. Ba^{2}s(ba^{3}s)-e^{2}l′la^3. Fr., *baselle.* A Linnæan genus of climbing chenopodiaceous plants of the sub-order *Baselleæ* and the tribe *Eubaselleæ.* [B, 19, 42.]—**B. alba** [Linnæus]. Fr., *baselle blanche, épinard de la Chine.* A species cultivated in the East Indies, where its leaves are eaten and used as an emollient application to ulcers and to hasten the maturation of abscesses and as a laxative. [B, 121, 173, 180.]—**B. cordifolia** [Lamarck]. Fr., *baselle à feuilles en cœur.* A biennial species growing in the East Indies, having edible leaves which are used like those of *B. alba.* It furnishes a purple dye. [B, 172.]—**B. japonica** [Burmann]. Fr., *baselle du Japon.* A perennial species growing in Japan, used for the same purposes as *B. alba.* [B, 173.]—**B. lucida** [Linnæus]. Fr., *baselle brillante.* An annual species growing in India, used like *B. alba.* [B, 173, 180.]—**B. nigra** [Loureiro]. See *B. rubra.*—**B. rubra** [Linnæus]. Fr., *baselle rouge, épinard d'Amérique* (ou *des Indes*). Malabar nightshade; a biennial species growing in the East Indies, the leaves of which are eaten like spinach. The juice of the leaves is used in India for infantile catarrh, and the fruit furnishes a red pigment. It has been considered a variety of *B. cordifolia.* [B, 19, 172, 173; L, 87.]—**B. tuberosa** [Humboldt, Bonpland, Kunth]. Fr., *baselle tubéreuse.* A perennial South American species. The leaves are eaten in New Granada, and often the root. It is said to render women fruitful. [B, 173, 180.]—**B. vesicaria** [Lamarck]. The *Anredera scandens.* [B, 214.]

BASELLACEÆ (Lat.), n. f. pl. Ba^{2}s(ba^{3}s)-e^{2}l-la(la^3)′se^2(ke^2)-e(a^3-e). Fr., *basellacées.* The basellads; of Moquin, an order of dicotyledonous herbs having the following characters: There is a persistent fleshy or membranous calyx, imbricate in æstivation and consisting of two whorls, an exterior 2-parted whorl and an interior 5-parted whorl. There is no corolla. The stamens are united by their bases into an urceolate tube adherent to the calyx, and are placed opposite the divisions of the inner whorl of the latter. The anthers are dorsally attached, contain two loculi, and dehisce by longitudinal slits. There is a short, simple style surmounted by three stigmas and terminally disposed upon a single free, unilocular ovary containing a single amphitropal ovule. The fruit is dry or bacciform, and contains a single vertical seed enveloped in an indehiscent crustaceous, cartilaginous, or membranous pericarp. The order is divided into the suborders *Baselleæ* (= the *Eubaselleæ* of Bentham and Hooker), including *Basella* and two other genera in which the albumen is eccentrically disposed and very scanty, and the embryo is of a spiral shape; and the *Anredereæ* (= the *Boussingaultieæ* of Bentham and Hooker), in which the albumen is more abundant and is centrally disposed and the embryo is annular. The whole order constitutes the suborder *Baselleæ* of the *Chenopodiaceæ* of Bentham and Hooker. [B, 42, 214.]

BASELLACEOUS, adj. Ba^{2}s-e^{2}l-la′shu^{3}s. Of or pertaining to the *Basellaceæ.* [B.]

BASELLADS, n. pl. Ba^{2}s′e^{2}l-la^{2}dz. The *Basellaceæ* (*q. v.*). [B, 19.]

BASELLE (Fr.), n. Ba^3-se^{2}l. The genus *Basella.* [B, 173.]—**B. à feuilles en cœur.** The *Basella cordifolia.* [B, 173.]—**B. blanche.** The *Basella alba.* [B, 173.]—**B. brillante.** The *Basella lucida.* [B, 173.]—**B. du Japon.** The *Basella japonica.* [B, 173.]—**B. rouge.** The *Basella rubra.* [B, 173.]—**B. tubéreuse.** The *Basella tuberosa.* [B, 173.]

BASELLEÆ (Lat.), n. f. pl. Ba^{2}s(ba^{3}s)-e^{2}l′le^2-e(a^3-e^2). Of Reichenbach, a section of phytolaccaceous plants, including *Basella, Anredera, Boussingaultia, Cuscuta,* and *Hablitzia.* Cf. Basellaceæ. By Moquin the term was applied to a suborder of the *Basellaceæ* (*q. v.*), and by Bentham and Hooker to a suborder of the *Chenopodiaceæ,* corresponding to the *Basellaceæ* of Moquin. [B, 42, 170, 214.]

BASELLOIDES (Lat.), adj. Ba^{2}s(ba^{3}s)-e^{2}l-lo(lo^2)-i(e)′dez(das). From *Basella* (*q. v.*), and εἶδος, resemblance. Fr., *baselloïde.* Resembling the genus *Basella;* a botanical species-name. [B.]

BASEMENT MEMBRANE, n. Bas′me^{2}nt. See under Membrane.

BAS-EN-BASSET (Fr.), n. Ba^{3}z-a^{3}n^2-ba^{3}s-sa. A village in the department of the Haute-Loire, France, where there is a cold chalybeate spring. [L, 105.]

BASENNA, n. See Musenna and Albizzia *anthelminthica.*

BASEROCKET, n. Bas′ro^{2}k-e^{2}t. The *Reseda lutea.* [B, 71.]

BASFAII, n. The *Polypodium vulgare.* ["Proc. of the Am. Pharm. Assoc.," xxvi, p. 159 (B).]

BAS-FOND (Fr.), n. Ba^3-fo^{2}n^2. Lit., a shallow, a flat; the lower part (floor) of the urinary bladder. [A, 300.]

BASIAL, adj. Ba′si^2-a^{2}l. Lat., *basialis.* Fr., *basial.* Basal (*q. v.*); as a n., the body of a vertebra. [Robineau-Desvoidy (L, 180).]

BASI-ALVEOLAR, adj. Ba-si^2-a^{2}l-ve′ol-a^{3}r. For deriv., see Basion and Alveolus. See *B.-a* line.

BASIARACHNITIS (Lat.), n. f. Ba(ba^3)″si^2-a^{2}r(a^{3}r)-a^{2}k-(a^{3}ch^2)-ni(ne)′ti^{2}s. Gen., *basiarachnit′idis.* For deriv., see Basis and Arachnitis. Inflammation of that portion of the arachnoid membrane which corresponds to the base of the skull. [Montault, "Jour. hebdom.," Feb., 1830 (A, 322).] Cf. *Basilar* meningitis.

BASIATIO (Lat.), n. f. Ba^{2}s(ba^{3}s)-i^2-a(a^3)′shi^2(ti^2)-o. Gen., *basiatio′nis.* From *basiare,* to kiss. The act of kissing, a kiss. [A, 312.] Cf. Amplexatio.

BASIATOR (Lat.), n. m. Ba^{2}s(ba^{3}s)-i^2-a(a^3)′to^{2}r. Gen., *basiato′ris.* From *basiare,* to kiss. The orbicularis oris muscle. [L, 45.]

BASIATRAHAGI (Ar.), n. The *Polygonum aviculare.* [L, 105.]

BASIBRACTEOLATE, adj. Ba″si^2-bra^{2}k-te′o-lat. For deriv., see Basis and Bract. Surrounded by bracts at the base, as in the dandelion. [B, 19.]

BASIBRANCHIAL, adj. Ba″si^2-bra^{2}n^2′ki^2-a^{2}l. For deriv., see Basis and Branchia. Serving to unite, situated near, or pertaining to, the bases of the branchiæ. [L.] See *B.* bones and *B.* cartilages.

BASIBRANCHIOSTEGAL, adj. Ba-si^2-bra^{2}n^2-ki^2-o^{2}s′te^{2}g-a^{2}l. For deriv., see Basis and Branchiostegal. Situated at the base of or behind the branchiostegal membrane; as a n., see *B.* bone. [L.]

BASIC, adj. Ba′si^{2}k. Lat., *basicus.* Fr., *basique.* Ger., *basisch.* It., *basico.* Sp., *básico.* 1. In chemistry, of, pertaining to, or having the properties of, a base; of salts, containing an excess of the b. (as opposed to the acid) constituent. [B.] 2. See Basal.

BASICERITE, n. Ba^{2}s-i^{2}s′e^{2}r-it. From βάσις, a base, and κέρας, a horn. The second segment of the antenna of a crustacean; the homologue of the basipodite of the other appendages, and sometimes so called. [L, 11.]

BASICESTRUM (Lat.), n. n. Ba(ba^2)-si^2-se^{2}s(ke^{2}s)′tru^{3}m-(tru^{4}m). See Basiocestrum.

BASICITAS (Lat.), n. f. Ba^{2}s(ba^{3}s)-i^{2}s(i^{2}k)′i^{2}t-a^{2}s(a^{3}s). Gen., *basicita′tis.* See Basicity.

BASICITY, n. Ba^{2}s-i^{2}s′i^{2}t-i^2. Lat., *basicitas.* Fr., *basicité.* Ger., *Basicität.* It., *basicità.* Sp., *basicidad.* Of an acid or an acid salt, capacity to combine with a base. The degree of b. is expressed by a number indicating the number of hydrogen atoms replaceable by a base. Acids and salts of a b. of one, two, three, and four are called respectively monobasic, dibasic (or bibasic, tribasic, and tetrabasic). [B.]

BASICRANIAL, adj. Ba″si^2-kra′ni^2-a^{2}l. For deriv., see Basis and Cranium. Relating to the base of the skull. [L.]

BASICUS (Lat.), adj. Ba(ba^3)′si^{2}k-u^{3}s(u^{4}s). See Basic.

BASIDE (Fr.), n. Ba^{3}s-ed. See Basidium.

BASIDÉS [Bertillon] (Fr.), n. pl. Ba^{3}s-e-da. See Basidiosporei (1st def.).

BASIDIE (Fr.), n. Ba^{3}s-e-de. See Basidium.

BASIDIE (Ger.), n. Ba^{3}s-ed′i^2-e^2. See Basidium.—**B′npilze.** See Basidiomycetes.—**B′nsporig.** Basidiosporous. [B.]—**B′nsporige.** See Basidiosporei.—**B′ntragend.** See Basidiophore.

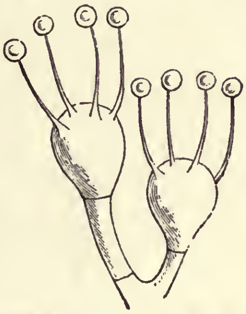
BASIDIGITAL, adj. Ba″si^2-di^{2}j′i^{2}t-a^{2}l. For deriv., see Basis and Digit. Relating to the bases of the phalanges; as a n., a b. bone (see under Bone). [L, 12.]

BASIDIOMYCETES [De Bary] (Lat.), n. m. pl. Ba^{2}s(ba^{3}s)-i^{2}d″i^2-o(o^2)-mi(mu^6)-se(ke)′tez(te^{2}s). From *basidium* (*q. v.*), and μύκης, a fungus. Fr., *basidiomycètes.* Ger., *Basidiomyceten, Basidiensporige, Basidienpilze.* A division (class) of *Fungi* (*Carposporeæ*) comprising those which produce spores upon basidia. It corresponds, therefore, to the *Basidiosporei* of Léveillé, and includes the orders *Hymenomycetes, Tremellini, Gasteromycetes,* and *Æcidiomycetes.* [B.]

BASIDIOPHORE, adj. Ba^{2}s-i^{2}d′i^2-o-for. Lat., *basidiophorus* (from *basidium* [*q. v.*], and φορεῖν, to bear). Fr., *basidiophore.* Ger., *basidientragend.* It., *basidioforo.* Bearing basidia (said of *Fungi* which reproduce by means of basidia). [B.]

BASIDIOPHORI (Lat.), n. m. pl. Ba^{2}s(ba^{3}s)-i^{2}d-i^2-o^{2}f′o^{2}r-i(e). 1. Of Corda, a suborder of hymenomycetous *Fungi,* including the families *Tuberculariaceæ, Coryneaceæ, Tremellinæ, Isarieæ, Clavariaceæ, Auricularini, Hydnei, Polyporei,* and *Agaricini.* Cf. Basidiosporei. 2. Of Bonorden, a family of hyphomycetous *Fungi,* including *Aspergillus* and various other genera in which the spore-containing cell becomes differentiated from those of the mycelium and forms a basidium. [B, 121, 170.]

BASIDIOSPORE, n. Ba^{2}s-i^{2}d′i^2-o-spor. From *basidium* (*q. v.*), and σπόρος, a seed. A spore developed on a basidium. [B, 19, 54.]



BASIDIOSPOREÆ (Lat.), n. f. pl. Ba^{2}s(ba^{3}s)-i^{2}d″i^2-o(o^2)-spor(spo^{2}r)′-e^2-e(a^3-e^2). Of Cohn, an order of the *Thallophyta,* comprising the sections *Hypodermiæ* (including the groups *Uredinaceæ* and *Ustilaginaceæ*) and *Basidiomycetes* (including the groups *Tremellaceæ, Agaricaceæ* [*Hymenomycetes*], and *Lycoperdaceæ* [*Gasteromycetes*]). [B, 75.] Cf. Basidiosporei.

BASIDIOSPOREI (Lat.), n. m. pl. Ba^{2}s(ba^{3}s)-i^{2}d″i^2-o(o^2)-spor-(spo^{2}r)′e^2-i(e). Fr., *basidiosporés.* Ger., *Basidiensporige.* 1. Of Léveillé, a division of *Fungi,* including all those in which the spores are developed upon basidia. It is divided into the *Entobasides, i. e.,* those in which the basidia are internal (the basidiophore *Gasteromycetes*), and the *Ectobasides, i. e.,* those in which the basidia are external (the basidiophore *Hymenomycetes*). 2. Of Bail, a series of *Fungi,* including the orders *Hyphenomycetes, Coniomycetes,* and *Hymenomycetes.* [B, 121, 170.]

BASIDIOSPOROUS, adj. Ba^{2}s-i^{2}d-i^2-o^{2}s′po^{2}r-u^{3}s. Fr., *basidiosporé.* Ger., *basidiensporig.* It., *basidiosporo.* Reproducing by basidiospores. [B, 77.]

BASIDIUM (Lat.), n. n. Ba^{2}s(ba^{3}s)-i^{2}d′i^2-u^{3}m(u^{4}m). Fr., *baside, basidie.* Ger., *Basidie.* Syn.: *sporophore.* The reproductive organ of certain *Fungi;* an elevation of the surface consisting of a single cell and bearing one or more spores at its apex. [B, 19.]—**Definitive b.** See *Secondary b.*—**Primary b.** A b. formed directly out of an enlargement upon the subhymenial hyphæ; dividing subsequently by the formation of perpendicular septa into

several (usually 4) secondary basidia. [B, 54.]—**Secondary b.** One of the segments of an original or primary b., formed by the division of the latter. Each secondary b. bears one monosporous sterigma. [B, 54.]

THE BASIDIA AND SPORES OF LYCOPERDON. [A, 443.]

BASIFACIAL, adj. Ba-si2-fa'si2-a2l. For deriv., see BASIS and FACE. Pertaining to the base of the skull and to the face. [H.]

BASIFICATION (Fr.), n. Ba3s-i2-fe-ka3-si2-o2n2. The conversion of a substance into a base. [A, 385.]

BASIFIER, n. Ba'si2-fi-u5r. A substance which accomplishes the conversion of a body into a base. [L, 56.]

BASIFIXED, adj. Ba-si2-fi2xd'. Lat., *basifixus* (from *basis*, a base, and *figere*, to fix). Fr., *basifixe*. Attached by its base or to the base of anything. [Richard (B, 198).] See ANTHERA *basifixa*.

BASIFUGAL, adj. Ba-si2f'u2-ga2l. Lat., *basifugus* (from *basis*, a base, and *fugere*, to flee). Fr., *basifuge*. In botany, growing only at the apex, away from the base, the latter having ceased to grow. [Trécul (B, 121).]

BASIGENIC, adj. Ba-si2-je2n'i2k. From *βάσις*, a base, and *γεννᾶν*, to produce. Fr., *basigène*. Ger., *basigenisch*. Giving rise to bases; according to Berzelius, not neutralizing metals, but producing with them electro-negative compounds, or acids, and electro-positive compounds, or bases (said of electro-negative bodies). [A, 301; B.] See *B.* ELEMENT.

BASIGENOUS, adj. Ba-si2j'e2n-u3s. Fr., *basigène*. Ger., *basigenisch*. See BASIPETAL.

BASIGLÈBE (Fr.), n. Ba3s-i2-gle2b. Bertillon's term for the *glœba*, or interior mass, of the *Gasteromycetes* when it contains basidia. [B, 121.]

BASIGYNDIUM (Lat.), n. n. Ba(ba3)-si2-ji2n(gu6n)'di2-u3m-(u4m). Fr., *basigynde*. See PODOGYNIUM.

BASIGYNIUM (Lat.), n. n. Ba(ba3)-si2-ji2n(gu6n)'i2-u3m(u4m). Fr., *basigyne*. See PODOGYNIUM.

BASIHELOIDES (Lat.), n. n. Ba(ba3)''si2-he2l(hal)-o(o2)-i(e)'-dez(das). See *Presphenoid* BONE.

BASIHYAL, adj. Ba-si2-hi'a2l. From *βάσις*, a base, and *ὑοειδής*, hyoid. Fr., *basihyal*. Relating to the body of the hyoid bone; as a n., see *B.* BONE. [L, 41, 153.]

BASIHYOBRANCHIAL, adj. Ba''si2-hi-o-bra3n2'ki2-a2l. Pertaining to the basihyal bone or region and the branchiæ. [L, 294.]

BASIHYOID, adj. Ba-si-hi'oid. See BASIHYAL.

BASIL, n. Ba2s'i2l. Lat., *basilicum* (from *βασιλικός*, royal). Fr., *basilic* [Fr. Cod.]. Ger., *Basilie*, *Basilienkraut*. The genus *Ocimum*, especially the *Ocimum basilicum*. [B.]—**B. barm, B.-thyme.** The *Calamintha acinos*. [B, 275.]—**B.-weed.** Fr., *grand basilic sauvage*. The *Calamintha clinopodium*. [B, 275.]—**Bush b.** Fr., *basilic nain*. The *Ocimum minimum*. [B, 19.]—**Chinese b.** The *Plectranthus nudiflorus*. [B, 275.]—**Citron b.** Lat., *basilicum citratum*. The *Ocimum basilicum*. [B, 19.]—**Common b.** Fr., *basilic commun*. The *Ocimum basilicum*. [B, 19.]—**Cow b.** The *Saponaria vaccaria*. [B, 275.]—**Field b., Great wild b.** Fr., *grand basilic sauvage*. The *Calamintha clinopodium*. [B, 19.]—**Holy b., Monk's b.** Fr., *basilic saint*. The *Ocimum sanctum*. [B, 275.]—**Small b.** Fr., *petit basilic*. The *Ocimum minimum*. [B, 19.]—**Stone b.** See *B.-weed*.—**Sweet b.** The *Ocimum basilicum*. [B, 19.]—**Wild b.** Fr., *grand basilic sauvage*. The *Calamintha clinopodium*. [B, 19.]

BASILAD [Barclay], adv. Ba2s'i2l-a2d. Toward the base or the "basilar aspect." [L, 141.]

BASILAIRE (Fr.), adj. Ba3s-i2l-a2r. Basilar.

BASILAR, adj. Ba2s'i2l-a3r. Lat., *basilaris*. Fr., *basilaire*. Ger., *basilar*. Pertaining to, constituting, or springing from the base of anything; as a n., according to Cuvier and Agassiz, the basi-occipital bone, also, according to Straus, the posterior and inferior piece of the head of an insect. [B; L, 41, 180.]—**B'knorpel** (Ger.). The cartilaginous rudiment of the basi-occipital bone. —**B'spina** (Ger.). See SPINA *basilaris*.

BASILARY, adj. Ba2s'i2l-a-ri2. See BASILAR.

BASILATE, adj. Ba2s'i2l-at. Lat., *basilatus*. Fr., *basilé*. A term used by Mirbel to describe plant-hairs which, like those of the *Humulus*, are borne on cellular prominences. [B, 121.]

BASILEION, BASILEIUM (Lat.), n's n. Ba2s(ba3s)-i2l-i'-(e2'i2)-o2n, -u3m(u4m). Gr., *βασίλειον*. A collyrium mentioned by Aetius. [Gorræus (A, 325).]

BASILEMMA (Lat.), n. n. Ba(ba3)-si2-le2m'ma3. Gen., *basilem'matos* (*-tis*). From *βάσις*, a base, and *λέμμα*, a husk, peel. A basement membrane. [L, 14.]

BASILEN [Barclay], adj. Ba2s'i2l-e2n. See BASILAR.

BASILIC, adj. Ba2s-i2l'i2k. Gr., *βασιλικός*. Lat., *basilicus*. Fr., *basilique*. Ger., *basilisch*, *königlich*. Royal (applied by the older writers especially to certain veins, to denote their supposed importance). [L, 41.]

BASILIC [Fr. Cod.] (Fr.), n. Ba3s-e-lek. The plant basil (*q. v.*); in the Fr. Cod., the *Ocimum basilicum* when in flower. [B.]—**A. à fleurs tendres.** The *Ocimum tenuiflorum*. [B, 173.]—**B. aux sauces.** The *Ocimum basilicum*. [B, 173.]—**B. blanchâtre.** The *Ocimum incanescens*. [B, 173.]—**B. commun.** The *Ocimum basilicum*. [B, 19.]—**B. couvert de poils.** The *Ocimum pilosum*. [B, 173.]—**B. crêpu.** The *Ocimum crispum*. [B, 173.]—**B. cultivé.** The *Ocimum basilicum*. [B, 173.]—**B. cultivé bulleux.** The *Ocimum basilicum*, var. *bullatum*. [B, 173.]—**B. cultivé lacinié.** The *Ocimum basilicum*, var. *fimbriatum*. [B, 173.]—**B. cultivé ligneux.** The *Ocimum basilicum*, var. *lignosum*. [B, 173.]—**B. d'Amérique.** The *Ocimum americanum*. [B, 173.]—**B. de Ceylan.** The *Ocimum zeylanicum*. [B, 173.]—**B. de Guinée.** The *Ocimum guineense*. [B, 173.]—**B. de la Chine.** The *Plectranthus nudiflorus*. [B, 19.]—**B. des cuisiniers.** The *Ocimum basilicum*. [B, 173.]—**B. nain.** The *Ocimum minimum*. [B, 173.]—**B. romain.** The *Ocimum basilicum*. [B, 19.]—**B. saint.** The *Ocimum sanctum*. [B, 173.]—**B. salé.** The *Ocimum salinum*. [B, 173.]—**B. velu.** The *Ocimum hirsutum*. [B, 173.]—**Grand b.** The *Ocimum basilicum*. [B, 121.]—**Grand b. sauvage.** The *Calamintha clinopodium*. [B, 173.]—**Petit b.** The *Ocimum minimum*. [B, 173.]—**Petit b. sauvage.** The *Calamintha acinos*. [B.]

BASILICA (Lat.), n. f. Ba2s(ba3s)-i2l'i2k-a3. Gr., *βασιλική*. 1. Of Apuleius, gentian. [B, 121.] 2. Of Scribonius Largus, some very efficacious healing embrocation. [A, 322.] 3. A basilic vein (see under VEIN). [L, 94.]—**B. mediana.** See *Median basilic* VEIN.

BASILICAL, adj. Ba2s-i2l'i2k-a2l. See BASILIC.

BASILICE (Lat.), n. f. Ba2s(ba3s)-i2l'i2-se(ka). See BASILICA.

BASILICON (Lat.), n. n. Ba2s(ba3s)-i2l'i2k-o2n. Gr., *βασιλικόν* (neut. of adj. *βασιλικός*, royal). 1. The genus *Ocimum*. [B, 121.] 2. An ancient name for a sort of plaster (called also *τετραφάρμακον*, from its containing four ingredients). [A, 325.] 3. (Ger., *Königssalbe*) see *Unguentum* RESINÆ.—**B. ointment.** Ger., *B'salbe*. See *Unguentum* RESINÆ.

BASILICUM (Lat.), n. n. Ba2s(ba3s)-i2l'i2k-u3m(u4m). See BASILICON.—**B. agreste** [Rumphius]. The *Ocimum tenuiflorum*. [B, 211.]—**B. citratum.** The *Ocimum b.* [B.]—**B. indicum agreste** [Rumphius]. The *Ocimum gratissimum*. [B, 211.]—**B'kamfer** (Ger.). A stearoptene obtained from the *Ocimum b.* [B, 270.]—**B. majus.** The *Ocimum b.* [B.]—**B.-Minze** (Ger.). The *Mentha gentilis*. [B, 270.]—**B'salbe** (Ger.). See *Unguentum* RESINÆ.—**B. zeylanicum latifolium odoratissimum** [Hermann]. The *Ocimum frutescens*. [B, 211.]—**Flores basilici** (seu **basilici citrati, seu basilici majoris**). The flowers of *Ocimum b.* [B, 180.]—**Herba basilici** (seu **basilici citrati, seu basilici majoris**). Ger., *Basilienkraut*, *grosses Basilienkraut*. The herb of *Ocimum b.* [B, 180.]—**Oil of b.** An oil obtained by distilling the leaves of *Ocimum b.* with water. [A, 2.]—**Semina basilici** (seu **basilici citrati, seu basilici majoris**). The seeds of *Ocimum b.* [B, 180.]

BASILICUS (Lat.), adj. Ba2s(ba3s)-i2l'i2k-u3s(u4s). See BASILIC.

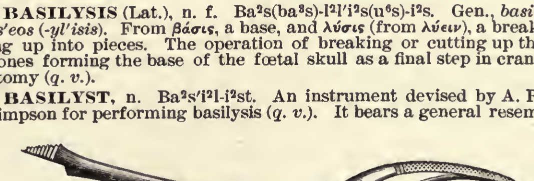
BASILIDION (Lat.), n. n. Ba2s(ba3s)-i2l-i2d'i2-o2n. Gr., *βασιλίδιον*. An application for the itch (*κολλύριον ψωρικὸν*) mentioned by Galen. [A, 325; L, 41.]

BASILIE (Ger.), n. Ba3s-i2l-e'. See BASIL.—**B'nkraut.** The herb of *Ocimum basilicum*. [B, 180.]—**B'nminze, B'nmünze.** The *Mentha gentilis*. [A, 355.]—**B'nsalbe.** Basilicon ointment. [B.] See *Unguentum* RESINÆ.—**Grosses B'nkraut.** The herb of *Ocimum basilicum*. [B.]—**Kleines B'nkraut.** The herb of *Ocimum minimum*. [B.]

BASILIKUM (Ger.), n. Ba3s-i2l'i2k-um. See BASILICON.—**Gemeines B.** The *Ocimum basilicum*. [A, 355.]—**Kleines B.** The *Ocimum minimum*. [A, 355.]

BASILIS (Lat.), n. f. Ba2s(ba3s)'i2l-i2s. Gen., *basil'idos* (*-dis*). Gr., *βασιλίς*. A liquid collyrium mentioned by Galen. [L, 94.]

BASILISCUS (Lat.), n. m. Ba2s(ba3s)-i2l-i2sk'u3s(u4s). Gr., *βασιλίσκος* (dim. of *βασιλεύς*, a king). 1. An ancient name for some venomous animal. [A, 325.] 2. Of the alchemists, the "mercurius philosophorum sublimatus," also the philosopher's stone. [A, 325.] 3. Syphilis. [Paracelsus (A, 325); G.] 4. A genus of saurian reptiles of the family *Iguanidæ*. [Laurenti (A, 327).]



BASILO-BREGMATIC, adj. Ba2s''i2l-o-bre2g-ma2t'i2k. Fr., *basilo-bregmatique*. Pertaining to the basion or the basilar region and the bregma. [L, 149.] See *B.-b.* LINE.

BASILO-PHARYNGIEN (Fr.), adj. Ba3s-i2l-o-fa3r-a2n2-zhi2-a3n2. Pertaining to the basilar process of the occipital bone and to the pharynx. [A, 385.]

BASILO-SUBNASAL, adj. Ba2s''i2l-o-su3b-na'sa2l. Pertaining to the basion or the basilar region and the nasion. [L, 149.] See *B.-s.* LINE.

BASILYSIS (Lat.), n. f. Ba2s(ba3s)-l2l'i2s(u6s)-i2s. Gen., *basilys'eos* (*-yl'isis*). From *βάσις*, a base, and *λύσις* (from *λύειν*), a breaking up into pieces. The operation of breaking or cutting up the bones forming the base of the fœtal skull as a final step in craniotomy (*q. v.*).

BASILYST, n. Ba2s'i2l-i2st. An instrument devised by A. R. Simpson for performing basilysis (*q. v.*). It bears a general resemblance to Thomas's perforator, but the shaft is split to the end of the screw, forming two blades of equal size and shape. [A. R.

THE BASILYST. (AFTER A. R. SIMPSON.)

Simpson, "Edinb. Med. Jour.," Oct., 1883.]—**B.-tractor.** A combination of the b. with a cranioclast blade, invented by A. R. Simpson. [" Edinb. Med. Jour.," Mar., 1885, p. 843.] Cf. BASIOTRIBE.

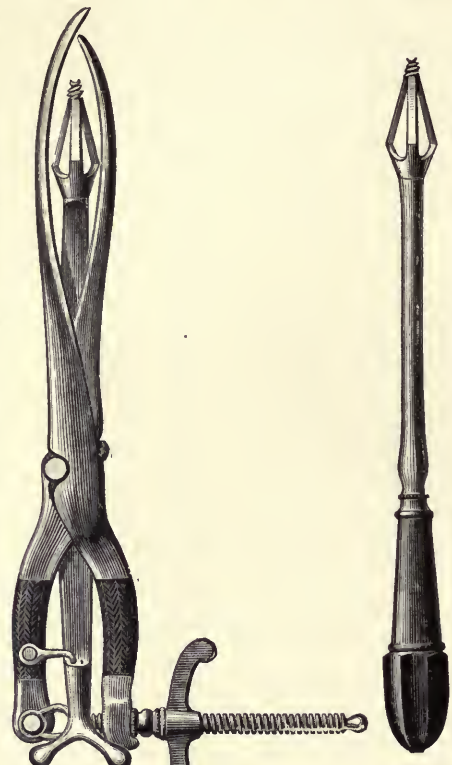
BASIN, n. Ba′si^{2}n. Fr., *bassin.* Ger., *Becken.* It., *bacino.* An old term for the pelvis, especially the true pelvis. [A, 30.]

BASINASAL, adj. Ba-si^2-na′sa^{2}l. Pertaining to the basion and the nasion. [L, 142.] See *B.* LINE.

BASINERVATE, adj. Ba-si^2-nu^{6}rv′at. See BASINERVED.

BASINERVED, adj. Ba-si^2-nu^{6}rvd′. Lat., *basinervis, basinervius* (from *basis,* a base, and *nervus,* a nerve). Fr., *basinerve, basinervé, basinervié.* Having nerves or ribs springing from the base (said of leaves). [B, 19.]

BASIO-ALVEOLAR, adj. Ba-si^2-o-a^{2}l-ve′o-la^{3}r. Pertaining to the basion and the alveolar point. [L, 149.]



BASI-OCCIPITAL, adj. Ba″si^2-o^{2}k-si^{2}p′i^{2}t-a^{2}l. For deriv., see BASIS and OCCIPUT. Fr., *basi-occipital.* Pertaining to the basal portion of the occipital bone. [L.] See *B.-o.* BONE.

BASI-OCCIPITO-SPHENOIDAL, adj. Ba‴si^2-o^{2}k-si^{2}p″i^{2}t-o-sfe^{2}n-oid′a^{2}l. For deriv., see BASIS, OCCIPUT, and SPHENOID. Pertaining to the basi-occipital bone or region and the sphenoid bone; as a n., see *B.-o.-s.* BONE. [L, 14.]

BASIOCERATOCHONDROGLOSSUS (Lat.), n. m. Ba(ba^3)″si^2-o-(o^2)-se^{2}r(ke^{2}r)″a^3-to(to^2)-ko^{2}n(ch^{2}o^{2}n)″-dro(dro^2)-glo^{2}s(glos)′su^{3}s(su^{4}s). From *βάσις,* a base, *κέρας,* a horn, *χόνδρος,* cartilage, and *γλῶσσα,* the tongue. See BASIOGLOSSUS.

BASIOCERATOGLOSSUS (Lat.), n. m. Ba(ba^3)″si^2-o(o^2)-se^{2}r(ke^{2}r)″a^3-to-(to^2)-glo^{2}s(glos)′su^{3}s(su^{4}s). From *βάσις,* a base. *κέρας,* a horn, and *γλῶσσα,* the tongue. Fr., *basio-cérato-glosse.* Ger., *Hornzungengrundmuskel.* It., *basio-cerato-glosso.* That portion of the hyoglossus muscle which arises from the great cornu of the hyoid bone. [L, 44.]

BASIOCESTRUM (Lat.), n. n. Ba-(ba^3)-si^2-o(o^2)-se^{2}s(ke^{2}s)′tru^{3}m(tru^{4}m). From *βάσις,* a base, and *κέστρον,* a pointed instrument. Fr., *basiocestre.* Ger., *Basiocästrum, Kopfbohrer.* A dart-like instrument devised by Mezler (who wrote *basiocæstrum*) for breaking up the base of the skull in the operation of craniotomy. [A, 88, 322.]

TARNIER'S BASIOTRIBE. (AFTER PINARD.)

BASIODELTOIDEUS (Lat.), n. m. Ba(ba^3)″si^2-o(o^2)-de^{2}l-to-(to^2)-i^{2}d(ed)′e^2-u^{3}s(u^{4}s). For deriv., see BASIS and DELTOID. Meckel's term for an anomalous fasciculus of the deltoid muscle arising from the infraspinous fascia or the spine of the scapula. [Calori (L, 31).]

BASIO-GLOSSE (Fr.), n. Ba^{3}s-i^2-o-glo^{2}s. See BASIOGLOSSUS.

BASIOGLOSSOPHARYNGEUS (Lat.), n. m. Ba(ba^3)″si^2-o-(o^2)-glo^{2}s(glos)″so(so^2)-fa^{2}r(fa^{3}r)-i^{2}n(u^{6}n^2)′je^2(ge^2)-u^{3}s(u^{4}s). From *βάσις,* a base, *γλῶσσα,* the tongue, and *φάρυγξ,* the pharynx. See BASIOPHARYNGEUS.

BASIOGLOSSUS (Lat.), n. m. Ba(ba^3)″si^2-o(o^2)-glo^{2}s(glos)′-su^{3}s(su^{4}s). From *βάσις,* a base, and *γλῶσσα,* the tongue. Fr., *basio-glosse.* That portion of the hyoglossus muscle which arises from the body of the hyoid bone. [L, 2, 81.]

BASIOHUMERALIS (Lat.), n. m. Ba(ba^3)″si^2-o(o^2)-hu^2(hu)-me^{2}r-a(a^3)′li^{2}s. From *basis* (*q. v.*), and *humerus* (= *umerus*), the shoulder. A muscle of the rabbit which arises from the basi-occipital bone and is inserted into the outer third of the clavicle. [L, 200.]

BASION, n. Ba′si^2-o^{2}n. From *βάσις,* a base. Fr., *basion.* A point situated in the median line of the base of the skull at the anterior border of the occipital foramen. [A, 385; L, 149.] See cuts, p. 274.

BASIOPHARYNGEUS (Lat.), n. m. Ba(ba^3)″si^2-o(o^2)-fa^{2}r-(fa^{3}r)-i^{2}n(u^{6}n^2)′je^2(ge^2)-u^{3}s(u^{4}s). Fr., *basio-pharyngien* [Winslow]. Ger., *Zungengrundschlundmuskel.* A term sometimes applied to those fibres of the middle constrictor of the pharynx which arise from the hyoid bone. [A, 385; L, 44.] Cf. HYOPHARYNGEUS.

BASIOPHTHALMITE, n. Ba″si^2-o^{2}p(o^{2}f)-tha^{2}l′mit. From *βάσις,* a base, and *ὀφθαλμός,* the eye. The proximal segment of the eye-stalk in the *Crustacea.* [L, 66.]

BASIOTIC, adj. Ba-si^2-o′ti^{2}k. From *βάσις,* a base, and *οὖς* (gen., *ὠτός*), the ear. Fr., *basiotique.* Pertaining to or forming the base of the ear; as a n., an ossification situated between the basi-occipital and the basisphenoid. [Albrecht (A, 385).]

BASIOTRIBE, n. Ba′si^2-o-trib. From *βάσις,* a base, and *τρίβειν,* to crush. Fr., *basiotribe.* It., *basiatribo.* An instrument devised by Tarnier for breaking up the base of the fœtal cranium in the operation of cephalotripsy; consisting of a heavy perforator with a conical-screw point, and of two blades like those of a cephalotribe, either or both of which may be attached to a pivot on the perforator after the latter has been engaged in the base of the skull. [A, 90; Bar (" Progr. méd.," Dec. 20, 27, 1884, pp. 1051, 1071).]

BASIOTRIPSY, n. Ba′si^2-o-tri^{2}p-si^2. Fr., *basiotripsie.* The operation of crushing the base of the fœtal skull, especially with the basiotribe (*q. v.*). [Bar, " Progr. méd.," Dec. 20, 1884, p. 1051.]

BASIPETAL, adj. Ba-si^{2}p′e^{2}t-a^{2}l. From *basis,* a base, and *petere,* to seek. Fr., *basipète.* In botany, increasing or developing at the base; the opposite of basifugal (said of a part or series of parts in which growth begins and continues at the base, the apex thus representing the older element). [B, 121.]

BASIPODITE, n. Ba-si^{2}p′o-dit. From *βάσις,* a base, and *πούς,* a foot. Fr., *basipodite.* In the *Arthropoda,* that segment of an appendage which articulates with the body. [L, 168.]

BASIPRESPHENOID, adj. Ba″-si^2-pre-sfen′oid. Pertaining to or made up of the basisphenoid and presphenoid bones; as a n., see *B.* BONE. [L, 14.]

BASIPTERYGIAL, adj. Ba-si^2-te^{2}r-i^{2}j′i^2-a^{2}l. Pertaining to the basipterygium. [L, 12.]

BASIPTERYGIUM (Lat.), n. n. Ba-(ba^3)″si^2-te^{2}r-i^{2}j(u^{6}g)′i^2-u^{3}m(u^{4}m). From *βάσις,* a base, *πτέρυξ,* a wing. See BASALE *metapterygii* (under BASALIS).

BASIPTERYGOID, adj. Ba″si^2-te^{2}r′i^2-goid. Connected with or pertaining to the basisphenoid and the pterygoid bones; as a n., see *B.* BONE. [L, 200.]

BASIQUE (Fr.), adj. Ba^{3}s-ek. See BASIC.

BASIRRHINAL, adj. Ba-si^2-ri′-na^{2}l. From *βάσις,* a base, and *ῥίς,* the nose. Pertaining to the base of the brain and to the nose. See *B.* FISSURE.

BASIS (Lat.), n. f. Ba(ba^3)′si^{2}s. Gen., *ba′seos* (*-sis, -sios*); acc., *ba′sim* (*-sem*); abl., *ba′si* (*-se*); gen. pl., *ba′sium.* Gr., *βάσις.* 1. See BASE. 2. The sole of the foot. [Hippocrates (A, 325).] 3. In pharmacy, that ingredient which either is the most important medicinally or determines the consistence and other general characters of the product. [A, 325; L, 104.]—**Basi affixus.** See BASIFIXED.—**B. cerebri.** The inferior surface of the brain.—**B. cordis.** The base of the heart; the broad upper part of the organ. [L, 115, 119.]—**B. coronæ radiatæ.** The upper portion of the crus cerebri at the point where the radiation of fibres termed the corona radiata begins. [I, 17; K.]—**B. corporis striati.** A term applied by Berenger to the anterior extremity of the corpus striatum. [I, 3; K.]—**B. cranii.** Fr., *base du crâne.* Ger., *Schädelgrund, Schädelbasis.* The lower portion of the skull. [A, 322.]—**B. cranii externa.** Ger., *äussere Schädelbasis.* The exterior of the base of the skull. [L, 175.]—**B. cranii interna.** Ger., *innere Schädelbasis.* The inner surface of the base of the skull, comprising the anterior, middle, and posterior fossæ. [L, 175.]—**B. des Hirnschenkels** (Ger.). See CRUSTA.—**B. fornicis.** See FORNIX.—**B. infundibuli.** See TUBER *cinereum.*—**B. linguæ.** Ger., *Zungenwurzel, Zungengrund.* The base of the tongue; the broad lower portion which is attached to the hyoid bone and the thyreoid cartilage. [A, 322; L, 80, 175.]—**B. mandibulæ, B. maxillæ inferioris.** The body, or horizontal portion, of the inferior maxilla. [L, 175.]—**B. nasi.** Ger., *Nasengrund.* The base of the nose. [L, 115.]—**B. orbitæ.** The anterior aperture of the orbit. [L, 175.]—**B. patellæ.** The upper edge of the patella. [L, 175.]—**B. pedis.** The sole of the foot. [Hippocrates (L, 94).]—**B. pedunculi cerebri, B. pedunculorum** [Reil]. See CRUSTA and CRUS *cerebri.*—**B. prostatæ, B. prostatica.** The base of the prostate gland; that portion which rests upon the rectum. [L, 115.]—**B. rostri.** Of Schultz, an osseous nodule lying between the bones of Bertin in the human embryo. [L, 115.]—**B. sacri.** The thick upper portion of the sacrum. [L, 44.]—**B. scapulæ.** Fr., *base de l'omoplate.* The inner (vertebral) border of the scapula. [L, 44, 115.]—**B.-substance.** See under SUBSTANCE.—**B. vesicæ urinariæ.** Ger., *Harnblasengrund.* The base, floor, or *bas-fond* of the bladder. [L, 115.]

BASISCH (Ger.), adj. Ba^{3}z′i^{2}sh. See BASIC and BASAL.

BASISOLUTE, adj. Ba^{2}s-i^{2}s′o-lu^{2}t. Lat., *basisolutus* (from *basis,* a base, and *solvere,* to loosen). Fr., *basisoluté.* In botany, prolonged at the base beyond the point of origin (said of leaves). [B, 1, 19.]

BASISPHENOID, BASISPHENOIDAL, adj's. Ba-si^2-sfen′oid, -sfe^{2}n-oid′a^{2}l. Lat., *basisphenoideus, basisphenoidalis* (from *βάσις,* a base, *σφήν,* a wedge, and *εἶδος,* resemblance). Fr., *basisphénoïde, basisphénal.* Pertaining to the body of the sphenoid bone; as a n., see *B.* BONE. [L, 123, 142.]

BASISPORÉS (Fr.), n. pl. Ba^3-se-spor-a. See BASIDIOSPOREI (1st def.).

BASISUPRASCAPULARIS (Lat.), n. m. Ba(ba^3)''si^2-su^2(su)-pra^3-ska^{2}p(ska^{3}p)-u^2(u^4)-la(la^3)'ri^{2}s. See LEVATOR *scapulæ*.

BASITAS (Lat.), n. f. Ba^{2}s(ba^{3}s)'i^{2}t-a^{2}s(a^{3}s). Gen., *basita'tis*. See BASICITY.

BASITÄT (Ger.), n. Ba^{3}z-i^2-tat'. See BASICITY.

BASITEMPORAL, adj. Ba-si^2-te^{2}m'po-ra^{2}l. From *basis*, a base, and *tempus*, a temple. Pertaining to or situated near the basisphenoid and the temporal bones or regions; as a n., see *B.* BONE. [L, 200.]

BASIUM (Lat.), n. n. Ba(ba^3)'si^2-u^{3}m(u^{4}m). Lit., a kiss; an old name for a certain extemporaneous preparation of iron and copper devised by Clossæus; so called from its being regarded as a bringing together of Mars and Venus, those being fanciful names for iron and copper. [Schröder (A, 325).]

BAS-JOINTÉ (Fr.), adj. Ba^3-zhwa^{3}n^2-ta. Having the pastern very short (said of horses). [A, 385.]

BASKET, n. Ba^{3}sk'e^{2}t. Lat., *bascauda*. Welsh, *basgawd*, *basged*, *bascod*. [A, 302.] 1. Any interlacing basket-like structure. 2. A convolution (*q. v.*). [J.]—**B.-fern.** The *Aspidium filix mas.* [B, 275.]—**B.-hoop.** The *Croton lucidus.* [B, 19.]—**B.-withe.** The Tournefortia volubilis. [B, 19.]—**Branchial b.** In certain of the *Branchiata*, a cartilaginous framework supporting the gills. [L, 200.]—**Honey-b.** See CORBICULUM.

BASNAGILI, n. A Ceylon name for the *Bryonia laciniosa.* [B, 121.]

BASO, n. A Japanese name for the banana plant. [B, 121.]

BASOKA (Hind.), n. The *Adhatoda vasica.* [B, 172.]

BASOMMATOPHORA (Lat.), n. n. pl. Ba^{2}s(ba^{3}s)-o^{2}m-ma^3-to^{2}f'o(o^2)-ra^3. From βάσις, a base, ὄμμα, the eye, and φορεῖν, to bear. A suborder of the *Pulmonata*, including the *Linnæidæ* and the *Auriculidæ*, having the eyes mediad of the cephalic tentacles at their base. [L, 121.]

BASOPHILE (Ger.), adj. Ba^3'zo-fel-e^2. From βάσις, a base, and φιλεῖν, to love. Ehrlich's term for expressing a readiness on the part of certain elements of the tissues to become stained with basic dyes, such as rosaniline. [K, 16.]

BASOS, n. The second joint of the appendages of certain *Crustacea*, situated between the coxa and the ischium. [L, 121.]

BASOURA (Port.), **BASOURINHA** (Port.), n's. Ba^3-so'u-ra^3, -so-u-ren'ya^3. See BASSOURA and BASSOURINHA.

BASRAGUMMI (Ger.), n. Ba^{3}s'ra^3-gum-me. See *Bassora* GUM.

BASR-I-CHAMMOS, n. See AT KULAGI.

BASS, n. Ba^{3}s. The linden-tree (*Tilia*), also its inner bark (see BAST). [B.]

BASSAL (Ar.), n. The onion. [Bory (B, 121).]

BASSANA (Hind.), n. The *Agati grandiflora.* [B, 172.]

BASSANEM (Ar.), n. Avicenna's term for a redness of the skin of the face or extremities due to cold. [G.]

BASSARIDÆ (Lat.), n. f. pl. Ba^{2}s(ba^{3}s)-sa^{2}r(sa^{3}r)'i^{2}d-e(a^3-e^2). A family of the *Dendropoda*, having an elongate, non-prehensile, subcylindrical tail covered with long hair and the soles of the feet hairy. [J. E. Gray (L).]

BASSAROBIN, n. Ba^{2}s-a^{3}r-o'bi^{2}n. See NURTAK.

BASSELBEEREN (Ger.), n. pl. Ba^{3}s'se^{2}l-bar-e^{2}n. The fruit of the *Sorbus aucuparia.* [B, 270.]

BASSEN, n. A place in Hungary, where there are hot carbonated saline springs, the waters of which are used in scrofula, syphilis, and skin diseases. [A, 321, 385.]

BASSET (Fr.), n. Ba^{3}s-sa. A name commonly applied to several agarics, especially those with a short stipes. [B, 121.]

BASSFENCHEL (Ger.), n. Ba^{3}s'fe^{2}n^2-ch^{2}e^{2}l. The *Peucedanum officinale.* [L, 80.]

BASSIA (Lat.), n. f. Ba^{3}s'si^2-a^3. From *Bassi*, the name of an Italian botanist. Fr., *bassie*, *illipé*. A genus of sapotaceous plants established by Linnæus. [B, 42.]—**B. butyracea** [Roxburgh]. Fr., *arbre à beurre*, *illipé à beurre*. The Indian butter-tree, the *phulware* of the Bengalese; a tree 70 feet high, growing in the subtropical Himalayan regions. The fruit is edible, and from its kernels a yellowish-white fatty substance called *choorie* is expressed. It is used as an application in rheumatism and contractures, as an emollient for chapped hands, as a dressing for the hair, and to adulterate *ghee*, or native butter. It is also used in soap-making and for illumination. The flowers furnish a sort of sugar resembling date-sugar. [B, 172, 173.]—**B. djave.** A species growing in the Gaboon country, yielding a butyraceous product like that obtained from the *Butyrospermum Parkii*; perhaps identical with *B. oleifera.* [E. M. Holmes, "Pharm. Jour. and Trans.," Apr. 5, 1879, p. 818 (B).]—**B. elliptica.** See DICHOPSIS *elliptica.*—**B. latifolia** [Roxburgh]. Fr., *illipé à larges feuilles.* Syn.: *Madhura indica* [Gmelin]. The *mahwah-tree*, or *madhuca*; a tree 40 or 50 feet high, growing throughout Central India. The flowers contain a large amount of saccharine matter, and are eaten by the natives. On distillation, they furnish a liquor somewhat resembling Irish whisky, which, owing to the large amount of empyreumatic oil that it contains, is said to be very deleterious, especially to Europeans, producing gastric irritation and often causing death. On expression, the kernels yield a concrete oil, *mahwah*, or *mowah*, oil (or butter), used for illuminating purposes, to adulterate *ghee*, and in making soap. The oil-cake is used for poisoning fish and as an emetic. [J. R. Jackson, "Pharm. Jour. and Trans.," Feb. 16, 1878, p. 646 (B); J. M. Maisch, "Am. Jour. of Pharm.," May, 1886, p. 250.]—**B. longifolia** [Linnæus]. A tree from 40 to 50 feet high, growing in Malabar and Ceylon. The flowers, roasted or boiled, are eaten. A yellowish oil (*iloopaly-oil*, *illopennay*) expressed from the ripe fruit is used for the same purposes as that of *B. latifolia*, and in England for candle-making; it is also an ingredient of a preparation called *anjunnaythylum*, which is used internally and externally by the natives in rheumatism and paralysis. A gummy juice obtained from the trunk is used in rheumatism, and the bark is employed as an astringent and emollient and as a remedy for the itch. [P. S. Mootooswamy, "Ind. Med. Gaz.," Jan., 1887, p. 3; B, 19, 172.]—**B. nounjou.** A species growing in the Gaboon country, perhaps identical with *B. oleifera*; furnishing a butyraceous product like that obtained from the *Butyrospermum Parkii.* [E. M. Holmes, *l. c.* (B).]—**B'öl** (Ger.). The oil, or butter, obtained from various species of *B.* [B, 257.]—**B. oleifera** [De Candolle]. An African species of doubtful botanical characters, perhaps comprising the two species *B. djave* and *B. nounjou.* It probably furnishes the smooth, plum-shaped, brownish seeds called *djave* and *nungu*, which yield an oil employed in the Gaboon region as a food and as an application in rheumatism. ["Proc. of the Am. Pharm. Assoc.," xxix, p. 115 (B); B, 214.]—**B. Parkii.** 1. Of Hooker, see BUTYROSPERMUM *Parkii.* 2. Of Don, a species said to furnish an excellent variety of gutta percha. [B, 270.]—**B'säure** (Ger.). Bassic acid. [B, 257.]—**B. sericea** [Blume]. A Java species furnishing a variety of gutta percha. [J. Moeller (B, 270).]—**B. villosa** [Wallich]. See *B. latifolia.*

BASSIATE, n. Ba^{2}s'si^{2}at. A salt of bassic acid. [L, 41.]

BASSIC, adj. Ba^{2}s'si^{2}k. Fr., *bassique.* Of, pertaining to, or derived from the genus *Bassia.* [B.]—**B. acid.** Fr., *acide bassique.* Ger., *Bassinsäure.* A fatty acid obtained by saponifying the oil of the seeds of the *Bassia latifolia*; formerly thought to be peculiar, but now known to be identical in composition and properties with stearic acid. [A, 2.]

BASSIE (Fr.), n. Ba^{3}s-se. See BASSIA.

BASSIN (Fr.), n. Ba^{3}s-sa^{2}n^2. 1. A basin. 2. The pelvis (*q. v.*).—**B. abdominal.** See *False* PELVIS.—**B. actif.** That portion of the parturient canal which is constituted of soft parts. [A. Boissard, "Thèse de Paris," 1884; "Progr. méd.," Apr. 4, 1885, p. 284.]—**B. à épines.** See ACANTHOPELVIS—**B. aplati.** See *Flat* PELVIS.—**B. à type ilio-fémoral** [Guéniot]. See *Coxalgic* PELVIS.—**B. avec fente symphysaire congénitale.** See *Fissured* PELVIS.—**B. carré.** See *Rectangular* PELVIS.—**B. de caoutchouc.** See *Osteomalacic* PELVIS.—**B. de la position couchée.** Ger., *Liegbecken.* A pelvis affected with a deformity, due to excessively prolonged maintenance of the horizontal posture, in which the structure maintains the form proper to it in childhood, the sacrum remaining far removed from the anterior wall, making the conjugate diameter relatively great. [A, 24.]—**B. de naine.** See *Dwarf* PELVIS.—**B. d'or.** The *Ranunculus repens.* [B. 19.]—**B. élastique.** See *Osteomalacic* PELVIS.—**B's en antéversion.** A generic term under which Pinard groups pelves deformed by luxation (the coxalgic pelves of Rokitansky, the *b's à type ilio-fémoral* of Guéniot), kyphotic pelves, those rhachitic pelves which are complicated with an abnormal curvature of the vertebral column, normal pelves, and pelves that are abnormally large. [A, 28.]—**B. en entonnoir.** See *Infundibuliform* PELVIS.—**B. en forme de cœur de cartes à jouer.** See *Cordiform* PELVIS.—**B. en forme de cœur de cartes à jouer émoussé.** See *Oval* PELVIS.—**B. en forme de coin.** See *Wedge-shaped* PELVIS.—**B. en forme d'ellipse.** See *Elliptical* PELVIS.—**B. en forme ronde.** See *Round* PELVIS.—**B. en huit de chiffre.** A pelvis in which the median antero-posterior diameter at the brim is encroached upon both before and behind. [L, 41.]—**B. fendu.** See *Fissured* PELVIS.—**B. généralement et régulièrement rétréci** (ou **trop petit**). See PELVIS *æquabiliter justo-minor.*—**B. ilio-fémoral** [Guéniot]. See *Coxalgic* PELVIS.—**B. inférieur.** See *True* PELVIS.—**B. obliquement rétréci, B. oblique ovalaire.** See *Oblique ovate* PELVIS.—**B. oculaire.** A small oval basin used in bathing the eye. [L, 41.]—**B. ovale transversalement.** See *Transverse ovate* PELVIS.—**B. passif.** The bony as distinguished from the soft part of the parturient canal. [A. Boissard, *l. c.*]—**B. ramolli** [Stein, Jr.]. See *Osteomalacic* PELVIS.—**B. rétréci.** See *Contracted* PELVIS.—**B. rhachitique replié sur lui-même.** See *Pseudo-osteomalacic* PELVIS.—**B. scoliotique-rhachitique.** See *Scolio-rhachitic* PELVIS.—**B. sec.** See *Dry* PELVIS.—**B. simplement aplati.** See *Simple flat* PELVIS.—**B. supérieur.** See *False* PELVIS.—**B. unilatéralement rétréci.** See *Oblique ovate* PELVIS.—**B. vicié.** A deformed pelvis.—**B. vicié par étroitesse.** See *Contracted* PELVIS.—**B. vicié par étroitesse absolue** [Velpeau] (ou **avec perfection des formes** [Dubois]). See PELVIS *æquabiliter justo-minor.*—**B. vicié par luxation.** See *Coxalgic* PELVIS.—**B. vicié par obstruction.** See *Obstructed* PELVIS.—**Grand b.** See *False* PELVIS.—**Petit b.** See *True* PELVIS.

BASSIN (Ger.), n. Ba^{3}s-sen'. A reservoir. [A, 315.]—**B'bad.** See *Tank* BATH.

BASSINAGE (Fr.), n. Ba^{3}s-a^{2}n-a^{3}zh. The bathing of a part. [A, 385.]

BASSINE (Fr.), n. Ba^{3}s-sen. A basin. [A, 301.]—**Mal de b.** See under MAL.—**Petite b.** The *Ranunculus repens.* [B, 121.]

BASSINEAU (Fr.), n. Ba^{3}s-a^{2}n-o. A provincial name for the *Caltha palustris.* [B, 121.]

BASSINET (Fr.), n. Ba^{3}s-a^{2}n-a. 1. The pelvis of the kidney. [L, 49.] 2. The *Ranunculus repens.* [B, 19.]—**B. blanc.** A name applied to several species of *Anemone.* [H. Baillon (B, 46).]—**B. des marais.** 1. The *Caltha.* 2. The *Vaccinium oxycoccos.* [B, 121.]—**B. du rein.** See *B.* (1st def.).—**B. jaune.** A name applied to several species of *Ranunculus.* [H. Baillon (B, 46).]—**B. plépou.** The *Ranunculus repens.* [B, 121.]—**B. purpurin.** The *Anemone nemorosa.* [B, 173.]

BASSINSÄURE (Ger.), n. Ba^{3}s-sen'zoi-re^2. See BASSIC *acid.*

BASSIQUE (Fr.), adj. Ba^{3}s-ek. See BASSIC.

BASSOMBE (Fr.), n. Ba^{2}s-om. A variety of *Acorus calamus.* [L, 105.]

BASSORA GALLS, BASSORA GUM, n's pl. and sing. Ba^{2}s'so-ra^3. See under GALL and GUM.

BASSORIN, n. Ba^{2}s'so-ri^{2}n. From *Bassora*, whence the gum containing it is exported. Lat., *bassorinum.* Fr., *bassorine.* Ger., *Bassorin.* 1. A substance, $C_6H_{10}O_5$, or $2C_6H_{10}O_5$, belonging to the class of vegetable mucilages, derived from Bassora gum tragacanth and other sorts of gum; tasteless, odorless, and almost colorless; insoluble in cold water and swelling up into a viscous mass when treated with hot water. On being heated with aqueous solutions of the alkalies, it is converted into a gum soluble in water, and by treatment with sulphuric acid it is transformed into a non-fermentable sugar. 2. A generic name for all vegetable mucilages. [B, 4, 8, 270.]

BASSORIQUE (Fr.), adj. Ba^{3}s-o-rek. Pertaining to bassorin. [L, 41.]

BASSOUCLE (Fr.), n. Ba^{3}s-ukl. See BASSOMBE.

BASSOURA (Port.), n. Ba^{3}s-so'u-ra^3. A Brazilian name for the *Scoparia dulcis.* [B, 121.]

BASSOURINHA (Port.), n. Ba^{3}s-so-u-ren'ya^3. A Brazilian name for the *Vandellia pratensis* [Vahl]. [B, 88, 121.]

BAST, n. Ba^{2}st. A.-S., *bæst.* A term originally denoting a fibrous bark, especially the inner fibrous bark of the linden and other trees, employed in making cordage and for other purposes. It has therefore been used in botany to denote the inner bark layers. It is now applied to any portion of the stalk containing b. fibres. [A, 302; B, 19, 270.] See *B.* CELL, *B.* FIBRE, *B.* LAYER, etc.—**B.-palm.** The *Attalea funifera* and the *Leopoldinia piassaba.* [B, 275.]—**Cuba b.** The *Paritium elatum.* [B, 185.]—**Soft b.** A layer, made up of a mingling of sieve tissue and parenchyma, found next to the cambium in the stems of certain plants. [B, 75.]

BASTARD, adj. Ba^{2}s'ta^{3}rd. Lat., *nothus.* Fr., *bâtard.* Spurious, hybrid. [B, 270; L, 56.]—**B'art** (Ger.). A hybrid species. [L, 228.]—**B'zeugung** (Ger.). Hybridism. [L, 228.]

BASTARDIEÆ (Lat.), n. f. pl. Ba^{2}s(ba^{3}s)-ta^{3}rd-i(i^2)'e^2-e(a^3-e^2). From *Bastardia*, the typical genus. Of Reichenbach, a subsection of plants belonging to the *Sidariæ.* [B, 170.]

BASTARONI (It.), n. pl. Ba^{3}s-ta^{3}r-o'ne. See *Stipites* CARYOPHYLLORUM, under CARYOPHYLLUS.

BASTENNES (Fr.), n. Ba^{3}s-ta^{3}n. A village in France, near Dax, where there is a spring the waters of which are said to resemble those of Baréges. [L, 105.]

BASTIDE-DU-PEYRAT (Fr.), n. Ba^{3}s-ted-du^6-pa-ra^3. A village in France, near Mirepoix, where there is a warm chalybeate spring. [L, 105.]

BASTILME (Ger.), n. Ba^{3}s-tel'me^2. See BASTULME.

BASTIN (Fr.), n. Ba^{3}s-ta^{2}n^2. The cocoanut-tree. [A, 385.]

BASTRA (Hind.), n. The *Callicarpa lanata.* [B, 172.]

BASTULME (Ger.), n. Ba^{3}s-tul'me^2. The *Ulmus effusa.* [B. 180.]

BAS-VENTRE (Fr.), n. Ba^3-va^{3}ntr. The lower part of the abdomen (the hypogastric and iliac regions). [A, 385.]

BASYL [Graham], n. Ba'si^{2}l. The metallic or other electropositive constituent of a salt. [B, 2.]

BASYLOUS, adj. Ba^{2}s'i^{2}l-u^{3}s. See BASIGENIC and *B.* ELEMENT.

BASYMÈNE (Fr.), n. Ba^3-si^2-me^{2}n. A hymenium composed of basidia. [Bertillon (B, 46).]

BASYMENIÉS (Fr.), n. pl. Ba^3-si^2-ma-ni^2-a. See BASIDIOSPOREI (1st def.).

BASYOTRIB (Ger.), n. Ba^3-su^6-o-treb'. See BASIOTRIBE.

BASYPOGÉS (Fr.), n. pl. Ba^3-si^2-po-zha. Subterranean *Fungi* belonging to the *Entobasides* (*Basidiosporei*). [Bertillon (B, 46).]

BAT (Hind.), n. The *Ficus indica.* [B, 172.]

BATA, n. Of Rheede, the *Musa paradisiaca.* [B, 88, 121.]

BATAGURIDÆ (Lat.), n. f. pl. Ba^{2}t(ba^{3}t)-a^3-gu^2(gu)'ri^{2}d-e(a^3-e^2). A family of the *Steganopodes.* [L, 256.]

BATAGURINA (Lat.), n. n. pl. Ba^{2}t(ba^{3}t)-a^3-gu^2(gu)-ri(re)'na^3. A tribe of the *Bataguridæ.* [L, 256.]

BATALOS (Lat.), n. m. Ba^{2}t(ba^{3}t)'a^3-lo^{2}s. Gr., βάταλος. 1. The anus. [A, 311.] 2. See CINÆDUS.

BATAMIBI, n. The *Psychotria parasitica.* [L, 105.]

BATAN, n. An East Indian name for the *Durio zibethinus.* [B, 121.]

BATANA, n. A Brazilian name for the *Œnocarpus b.* [Martius]. [B, 121.]

BATANUTA, n. Dioscorides's name for the *Tamus communis.* [B, 88, 121.]

BÂTARD (Fr.), adj. Ba^3-ta^{3}r. See BASTARD.

BATARREA (Lat.), n. f. Ba^3-ta^{3}r're^2-a^3. From the proper name *Batarra.* A genus of *Fungi* established by Persoon. [B, 170.]

BATARREÆ [Corda], **BATARREI** [Leveillé] (Lat.), n's f. pl. Ba^3-ta^{3}r're^2-e(a^3-e), -i(e). A family or tribe of lycoperdaceous *Fungi* (*Dermatogasteres* [Corda]) comprising the single genus *Batarrea.* [B, 170.]

BATAS, BATÁS, n's. The *Arum maculatum.* [B, 121, 173.]

BATATA, n. The *Ipomœa batatas.* [B, 199.]—**B. da terra** (Port.). See *B.*—**B. de purga** (Port.). The root of the *Ipomœa operculata.* [B, 180.]—**B. purgante.** See *B. de purga.*

BATATAS (Lat.), n. f. Ba^3-ta^3'ta^{3}s. Fr., *batate.* 1. Of C. Bauhin and Rumphius, the *B. edulis.* 2. Of Choisy, a genus of convolvulaceous plants, referred by Bentham and Hooker to *Ipomœa*, of which it constitutes a section. [B, 42, 121, 212.]—**B. acetosæfolia** [Choisy]. The *Ipomœa carnosa.* [B, 212.]—**B. betacea.** The beet-rooted sweet potato. [B, 172.]—**B. de purga.** See BATATA *de purga.*—**B. edulis** [Choisy]. The *Ipomœa b.* [B, 42, 121.]—**B. jalapa.** The *Ipomœa jalapa.* [B, 42, 214.]—**B. littoralis** [Choisy]. The *Ipomœa carnosa.* [B, 212.]—**B. maritima** [Bojer]. The *Ipomœa biloba.* [B, 212.]—**B. paniculata** [Choisy], **B. paniculatus.** The *Ipomœa digitata.* [B, 212.]—**B. papirin** [Don]. The *Pharbitis pubescens.* [B, 214.]—**B. subtriloba** [Don]. The *Pharbitis pubescens.* [B, 214.]—**B. tuberosa** [Bojer]. The *Ipomœa tuberosa* of Linnæus. [B, 214.]—**B. xanthorrhiza** [Bojer]. The *Ipomœa b.* [B, 212.]

BATATE (Fr.), n. Ba^3-ta^{3}t. The *Batatas* (*q. v.*), especially the *Batatas edulis* (*Ipomœa batatas*). [B.]

BATATE (Ger.), n. Ba^3-ta^3'te^2. The *Ipomœa batatas.* [B, 180.]—**B'ntrichterwinde, B'nwinde.** See *B.*

BATATILLA (Sp.), n. Ba^3-ta^3-tel'ya^3. The *Ipomœa brachypoda.* ["Proc. of the Am. Pharm. Assoc.," xxvii. p. 157 (B).]

BATATINHA DO CAMPO (Port.). Ba^3-ta^3-ten'ya^3 do ka^{3}m'-po. A Brazilian name for the *Ferraria cathartica.* [B, 121.]

BATATOIDES (Lat.), adj. Ba^{3}t-a^3-to(to^2)-i(e)'dez(das). From *Batatas* (*q. v.*), and εἶδος, resemblance. Resembling the *Batatas* (a botanical species-name). [B.]

BATATRAN, n. A Mauritius name for the *Ipomœa pes capræ* (*Ipomœa biloba*). [B, 121.]

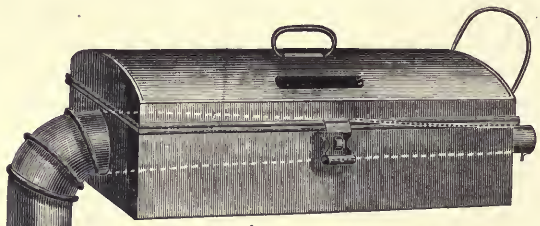
BATAULE (Fr.), n. Ba^3-tol. Galam butter, or Bambul butter, the product of various species of *Bassia.* [B. 88, 121.]

BÁTÁVI NEBU (Hind.), n. Lit., the Batavian lemon; the *Citrus decumana.* [B, 181.]

BATCIA (Lat.), n. f. Ba^{2}t(ba^{3}t)'si^2(ki^2)-a^3. See BAUCIA.

BATEC (Fr.), **BATECH** (Fr.), n's. Ba^3-te^{2}k. The watermelon. [B, 121.]

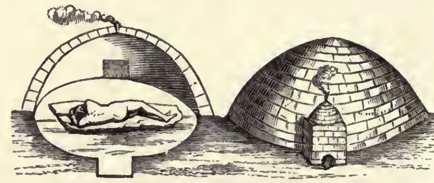
BATELE, n. A Carib name for an undetermined species of *Eupatorium.* [B, 121.]



BATERALECTORES (Lat.), n. m. pl. Ba^{2}t(ba^{2}t)-e^{2}r-a^3-le^{2}k-to'rez(re^{2}s). From βαίνειν, to walk, and ἀλέκτωρ, a fowl. Fr., *bateralectores.* J. A. Ritgen's name for the *Gallinaceæ.* [L, 180.]

BATERAPTODACTYLI (Lat.), n. m. pl. Ba^{2}t(ba^{3}t)-e^{2}r-a^{2}p-(a^{3}p)-to(to^2)-da^{2}k(da^{3}k)'ti^{2}l(tu^{6}l)-i(e). From βαίνειν, to walk, *rapere*, to seize, and δάκτυλος, a digit. Fr., *bateraptodactyles.* A term applied by J. A. Ritgen to a family of birds that walk and have claws suitable for grasping objects. [L, 180.]

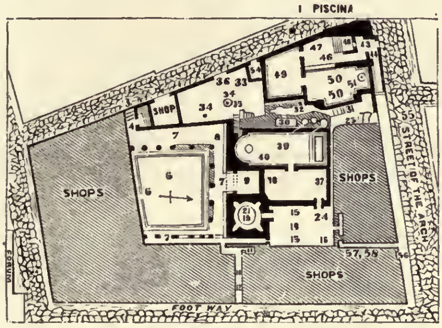
BATH, n. Ba^{3}th. A.-S., *bæth* (3d, 4th, and 5th def's). Gr., βαλανεῖον, λουτρόν (= λοετρόν) (3d, 4th, and 5th def's). Lat., *Aquæ Solis* (1st def.), *balneum* (3d, 4th, and 5th def's). Fr., *bain* (3d, 4th, and 5th def's). Ger., *Bad* (3d, 4th, and 5th def's). It., *bagno* (3d, 4th, and 5th def's). Sp., *baño* (3d, 4th, and 5th def's). 1. A city in Somersetshire, England, on the river Avon; so called from the hot mineral springs which it contains; 10,000 parts of the water contain, according to Attfield, 2·165 of sodium chloride, 2·178 of magnesium chloride, 3·306 of sodium sulphate, 0·957 of potassium sulphate, 13·444 of calcium sulphate, 0·151 of ammonium nitrate, 0·08 of calcium nitrate, 0·08 of magnesium carbonate, 1·12 of calcium carbonate, 0·175 of iron carbonate, 0·387 of siliceous earth, and small amounts of carbon dioxide and nitrogen in solution. [A, 302, 319, 327.] 2. A county in Virginia, where there are mineral springs. [A, 327.] See BATH ALUM SPRINGS. 3. The act or process of bathing; the entire or partial immersion of the body in a semi-solid, liquid, or gaseous medium, for either cleansing, refreshing, or medicinal purposes; also a vessel or other reservoir used for the purpose. [B.] 4. The medium in which the body is immersed in bathing; especially, in pharmacy, a preparation designed for medicinal application by bathing, consisting generally of certain designated ingredients to be mixed with water at the time of using. When no other medium is mentioned, water is always understood as designated. [B.] 5. In chemistry, a medium in which a body is immersed, especially such a medium as sand, water, oil, etc., by which a substance to be heated is surrounded, either immediately or in a proper receptacle. [B.]—**Acid b.** Lat., *balneum acidum.* Fr., *bain acide.* Ger., *saueres Bad.* It., *bagno acido.* Sp., *baño ácido.* A b. containing an acid, such as nitric or hydrochloric acid. [B, 125.] See BALNEUM *acidum* and *Balneum* ACIDI CHLORHYDRICI.—**Air b.** Lat., *balneum aereum.* Fr., *bain d'air.* Ger., *Luftbad.* It., *bagno d'aria.* A b. in which the body is exposed to air of any desired density, temperature, etc. [B.] See *Hot-air b.*, *Compressed-air b.*, and *Rarefied-air b.*—**Alcohol b.** Fr., *bain d'alcool.* Ger., *Alkoholbad.* It., *bagno d'alcool.* Sp., *baño de alcohol.* A b. consisting of alcohol, usually more or less diluted with water; used chiefly as a partial b. in febrile conditions, to reduce the surface temperature and to reduce inflammatory pain and swelling. [B.]—**Alcohol-vapor b.** Ger., *Spiritusdampfbad, Weingeistdampfbad.* A b. consisting of the vapor arising from alcohol; formerly much employed. [B, 48, 270.]—**Alkaline b.** Fr., *bain alcalin.* Ger., *alkalisches Bad.* It., *bagno alcalino.* Sp., *baño alcalino.* See BALNEUM *alcalinum.*—**Alkaline-saline b.** A b. containing both salt and an alkali; *e. g.*, the *balneum aerophorum cum natrio chlorato* (*q. v.*, under BALNEUM). [B, 270.]—**Aludel b.** A series of aludels arranged in the form of a chain resting on a slightly inclined surface; used in chemical manipulations. [B, 2.]—**Alum b.** Ger., *Alaunbad.* A b. containing alum, in which dye-stuffs are immersed; also a solution of alum in water, used as an application to burns. [B.] Cf. *Astringent b.*—**Ammoniacal b., Ammoniated b.** Fr., *bain ammoniaté* (ou *de gaz ammoniaque*). A b. containing ammonia or a salt of ammonium. [B.] See also BAIN *ammoniaté* and BAIN *ammoniaté ferrugineux.*—**Animal b.** Lat., *bal-*



neum animale. Fr., *bain animal.* Ger., *Thierbad.* It., *bagno animale* (1st def.), *bagno di ventre* (2d def.). Sp., *baño animal.* 1. A b. consisting of cow's dung or the contents of the first stomach of a freshly slaughtered ox. [L. Perl (A, 319).] 2. A b. consisting in the introduction of the whole or a part of the body into the abdominal cavity of a freshly slaughtered animal. It has been employed chiefly in rheumatic affections. [B.]—**Ant b.** Ger., *Ameisenbad.* A b. containing crushed ants (1 or 2 kilogrammes for a full bath). [B, 49.]—**Antimonial b.** See Balneum *antimoniale.*—**Antipsoric b.** Fr., *bain antipsorique.* A b. for the cure of the itch. Jadelot's antipsoric b. is the *balneum sulphuratum simplex* (*q. v.*). [B, 92.]—**Antirrheumatic b.** [Smith]. Fr., *bain antirrhumatismal.* A preparation consisting of 100 grammes of oil of turpentine, 10 of oil of rosemary, and 50 of sodium carbonate; to be added to sufficient water for a bath. Used in gout, rheumatism, and sciatica. [B, 92.]—**Antispasmodic b.** Fr., *bain antispasmodique.* Ger., *krampfstillendes Bad.* It., *bagno antispasmodico.* Sp., *baño antiespasmódico.* A b. designed to allay spasm, such as the hot b., the various kinds of vapor b., etc. [B, 49.]—**Antisyphilitic b.** Lat., *balneum antisyphiliticum.* Fr., *bain antisyphilitique.* Ger., *antiluetisches Bad.* It., *bagno antisifilitico.* See Balneum *mercuriale.*—**Arm b.** Lat., *brachiluvium.* Ger., *Armbad.* A b. in which only the arm is immersed. [B, 270.]—**Aromatic b.** See Balneum *aromaticum.*—**Arsenical b., Arsenious b.** See Balneum *arsenicale.*—**Artificial b.** Lat., *balneum artificiale.* A b. prepared in imitation of sea water or some natural mineral water. [B.] Cf. *Medicated b.*—**Artificial alkaline b.** Fr., *bain alcalin factitieux.* It., *bagno alcalino artificiale.* A b. containing an alkaline substance, such as an alkaline carbonate. [B.] See Bain *dit de Vichy* and *Caustic b.*—**Artificial Barèges b., Artificial b. of Barèges.** See Balneum *baretginense.*—**Artificial ferruginous b.** See Balneum *chalybeatum artificiale.*—**Artificial medicinal b.** It., *bagno medicinale artificiale.* A b. containing medicinal ingredients artificially added. [B.]—**Artificial mineral b.** Fr., *bain minéral factitieux.* Ger., *künstliches Mineralbad.* A b. made in imitation of a natural mineral water. [B, 108.]—**Artificial Plombières b.** See Bain *dit de Plombières.*—**Artificial salt b.** (or **sea b.**, or **sea-water b.**). See *Balneum* aquæ *marinæ artificialis.*—**Artificial sulphur b.** See Balneum *sulphuratum.*—**Artificial vegetable b.** It., *bagno vegetale artificiale.* See *Herb b.*—**Artificial Vichy b.** See Bain *dit de Vichy.*—**Ash b.** Ger., *Aschenbad.* A b. consisting in an immersion of the whole or a part of the body in ashes; similar in action and uses to the sand b. [B.]—**Astringent b.** Lat., *balneum astringens.* Fr., *bain astringent.* Ger., *adstringirendes Bad.* It., *bagno astringente.* A b. containing astringent materials, such as oak-bark, tannin, etc.; employed especially in cutaneous affections and ulceration and to control excessive sweating. Most's astringent b., used as a permanent b. in cases where a great part of the body is covered with burns, is made by dissolving 200 grammes of alum in from 6 to 8 pailfuls of cold water and adding a pailful of curdled milk. [B, 92, 270.] See also *Tan b.*—**Balsamic b.** Lat., *balneum balsaminum.* Fr., *bain balsamique.* Ger., *balsamisches Bad.* It., *bagno balsamico.* Sp., *baño balsámico.* A liquid or vapor b. containing balsamic ingredients, and especially the buds or bark of terebinthaceous plants. Trousseau's balsamic b. is made by digesting 1,000 grammes each of Bordeaux turpentine and tar with hot water and adding the mixture to enough water for an entire b. The b. is used in the skin diseases of children, and the liquid obtained by digesting the turpentine and tar is used for lotions and injections. [B, 92.]—**B. against chilblains.** It., *bagno contro i geloni.* A preparation made of 50 parts of alum and 500 each of oak-bark, red wine, and water. The bark is boiled in the water to two thirds of the original bulk of the latter, which is then filtered, and the alum is added. Used for chilblains that have not suppurated. [B, 125.]—**B. Alum Springs.** See the major list.—**B. by insolation.** See *Sun b.*—**B. fever.** See under Fever.—**B. of medium temperature.** Fr., *bain à temperature moyenne.* Ger., *indifferent warmes Bad.* A b. of a temperature between 35° and 37° C.; so called because it neither raises nor reduces the temperature of the human body. It acts as a calmative and cleansing agent. [Kisch (B, 108).]—**B. of Plombières.** See Bain *dit de Plombières.*—**B. of sea salt.** See *Balneum* aquæ *marinæ artificialis.*—**B. of the alkaline sulphides.** See Balneum *sulphuratum.*—**B. Springs.** See *B.* (1st def.).—**Benzoic b.** See Balneum *benzoicum.*—**Bichloride-of-mercury b.** See Balneum *mercuriale.*—**Blood b.** Ger., *Blutbad.* It., *bagno di sangue.* A b. consisting of the freshly drawn blood of some animal; formerly used for various purposes. [B.]—**Bran b.** Fr., *bain de son.* Ger., *Kleienbad.* An emollient b. consisting of bran mixed with water; used in eczema and burns. [B.]—**Brine b.** Ger., *Soolbad.* A salt-water b. containing over 2 per cent. of sodium chloride; used in scrofula, paralysis, and chronic rheumatism, to stimulate the skin, promote expectoration, and increase the action of the kidneys. [B, 15.]—**Camphor b.** See Balneum *camphoratum.*—**Caplin's electric b.** See *Electric b.*—**Carbolized b.** Fr., *bain phéniqué.* It., *bagno fenicato.* A solution of 1 part of carbolic acid in 600 parts of water; used to remove ticks from animals. [B, 92.]—**Carbonic-acid b., Carbonic b.** Fr., *bain d'acide carbonique.* A b., natural or artificial, containing free carbonic acid. [B, 15.] See Balneum *aerophorum simplex*, Balneum *aerophorum cum natrio chlorato*, and Balneum *aerophorum martiatum.*—**Caustic b.** Fr., *bain caustique.* Ger., *caustisches Bad, Laugenbad.* It., *bagno caustico.* A b. containing a caustic alkali. [B, 108.]—**Chalybeate b.** See *Ferruginous b.*—**Chemical b.** See *B.* (5th def.).—**Chlorinated b., Chlorine b.** See *Vapor* chlori and Balneum *chlorinatum.*—**Chlorine-gas b.** Ger., *Chlorgasbad.* A preparation designed for the purpose of liberating gaseous chlorine. [B, 48.] See *Vapor* chlori.—**Cold-air b.** Exposure of the body to cold air; similar in action to the cold b., but of less intensity. [B.]—**Cold b.** Lat., *balneum frigidum.* Fr., *bain froid.* Ger., *kaltes Bad.* It., *bagno freddo.* A b. of water of a temperature between 10° and 21° C. (50° and 70° F.); used as a tonic, as a circulatory and respiratory stimulant, to promote the action of the skin and tissue metamorphosis, also to reduce the bodily temperature in the essential fevers, pneumonia, sunstroke, etc. [B, 15, 46, 108.]—**Composite b., Compound b.** Lat., *balneum compositum.* See *Medicated b.*—**Conferva b.** Fr., *bain de conferves.* It., *bagno di muffe.* A variety of mud b. in which the mineral mud contains a large amount of minute acicular siliceous-shelled *Confervæ.* The shells penetrate the skin and act as a powerful stimulant to the peripheral nerves. [B, 270.]—**Cool b.** Fr., *bain frais.* Ger., *kühles Bad.* It., *bagno fresco.* A b. of a temperature between 20° and 25° C. (68° and 77° F.); similar in action to the cold b., but less energetic. [B, 46, 108.]—**Corroborant b.** See *Stimulating b.* and *Tonic b.*—**Corrosive-sublimate b.** See Balneum *mercuriale.*—**Dew b.** See *Vapor b.*—**Dish-water b.** Fr., *bain d'eau de vaisselle.* A b. sometimes used topically in domestic practice, consisting of the greasy water in which dishes have been washed. [B, 92.]—**Douche b.** See Douche.—**Dry-air b.** Fr., *bain à étuve sèche.* An air b. in which the air surrounding the body is not charged with an excess of moisture. The air is usually heated. [B.] See *Hot-air b.* and *Turkish b.*—**Dry b.** Lat., *balneum siccum.* A b. in a medium which is not liquid or does not wet the skin; *e. g.*, a solid b. or a dry-air b. [B, 199.]—**Dry-vapor b.** See *Dry-air b.*—**Dung b.** Fr., *bain de fumier.* Ger., *Mistbad.* A b. of dung, especially horse-dung; used in syphilis. [B, 46, 93, 270.]—**Earth b.** Lat., *balneum terrestre.* Ger., *Erdebad, Erdbad.* A b. consisting in surrounding the body with earth; used especially in scrofula. [B, 48.]—**Eastern b.** See *Turkish b.* and *Egyptian b.*—**Effervescent b.** Lat., *balneum aerophorum.* Ger., *moussirendes Bad.* A b. of a liquid containing free gas, usually carbon dioxide, which escapes with effervescence. [B.]—**Effervescent chalybeate (or ferruginous) b.** See Balneum *aerophorum martiatum.*—**Effervescent saline b.** See Balneum *aerophorum cum natrio chlorato.*—**Egyptian b.** Fr., *bain des Egyptiens.* Ger., *ägyptisches Bad.* A variety of the Turkish b. in which the temperature is gradually raised to the maximum point and then gradually lowered to the initial point. [B, 132.]—**Electric b., Electrical b.** Fr., *bain électrique.* Ger., *elektrisches Bad.* It., *bagno elettrico.* Sp., *baño eléctrico.* 1. A b. in which the water or other material of the b. and the patient's body are included in the circuit of a galvanic current. Caplin's electric b. consists of a large copper bathing tub filled with hot acidulated water, at the bottom of which there is a wooden frame placed upon four cushions of linen. The patient is supported upon this frame by means of a linen band fixed to the walls of the tub. To the copper tub is attached the negative pole of a galvanic battery, the positive pole being in communication with the surface of the patient's body. Used in chronic metallic poisoning and dyscrasiæ. [B, 105.] 2. A b. in which an electric current is generated by the chemical decomposition of the constituents of the b.—**Electro-chemical b.** See Bain *électro-chimique de Pennès.*—**Electro-negative b.** It., *bagno elettro-negativo.* The electrization of a patient by placing him in communication with the principal conductor of an electric machine; so called because the surface of the body and the enveloping air are supposed to be rendered electro-negative. [B, 107.]—**Electro-plating b.** A b. in which metals are immersed in the process of electro-plating. [B.]—**Electro-positive b.** It., *bagno elettro-positivo.* The electrization of a patient by putting him in communication with the cushion of an electric machine. [B, 107.]—**Emollient b.** Ger., *erweichendes Bad.* It., *bagno emolliente.* A b. which exerts an emollient action on the skin; employed in irritated or inflammatory conditions, such as eczema, burns, etc.; especially an herb b., starch b., malt b., or bran b. [B, 46, 49, 92, 93, 97, 125.] See Balneum *involvens.*—**Entire b.** See *General b.*—**Excitant b.** See *Stimulating b.*—**Fæcula b.** A b. containing a fæcula. [B, 199.] See *Starch-meal b.*, *Bran b.*, etc.—**Ferruginous b.** Fr., *bain ferrugineux.* Ger., *Eisenbad, Stahlbad.* A b. containing iron in solution. Such baths were formerly regarded as tonic, but, as the iron is not absorbed by the skin, they owe their activity to other factors. Artificial ferruginous b's were formerly prepared by dissolving iron tartrate in the form of boli (*globuli martiales*) in water. [B, 46, 93, 270.] See also Bain *ammoniaté ferrugineux* and Balneum *aerophorum martiatum.*—**Finnish b.** A b. resembling the Russian b., but of a somewhat higher temperature. [B, 46.]—**Fir-needle b.** Ger., *Fichtennadelbad.* A b. made by adding a decoction, or aqueous extract, or the oil of the needles of the fir (*Picea excelsa*) to water. It produces moderate irritation of the skin, and is used as a stimulant in rheumatic affections, etc. [B, 49, 270.]—**Foot b.** Lat., *pediluvium.* Fr., *bain des pieds, pédiluve.* Ger., *Fussbad.* It., *bagno dei piedi, pediluvio.* A b. designed for the feet only; used especially as a derivative. [B, 15.]—**Fucus b.** A b. containing chopped sea-weed or a decoction of sea-weed. It contains sodium chloride and a small amount of iodine, and is more or less gelatinous in consistence. [B, 254.]—**Full b.** See *General b.*—**Galvanic b.** Fr., *bain galvanique.* Ger., *galvanisches Bad.* It., *bagno galvanico.* See *Electric b.* (1st def.).—**Galvano-plastic b.** Fr., *bain galvano-plastique.* It., *bagno galvano-plastico.* See *Electro-plating b.*—**Gas b.** Fr., *bain gazeux.* Ger., *Gasbad.* It., *bagno di gaz.* A b. in which a gas (either carbon dioxide, hydrogen sulphide, or air) is applied in a closed vessel to either the whole or a part of the surface of the body, or to a mucous tract. The various kinds of air b. (hot-air b., Turkish b., etc.) are varieties of the gas b. B's of hydrogen sulphide or carbon dioxide are usually applied at the gas-containing springs, where the escaping gas is caught and conveyed in tubes to closed vessels in which the body of the patient is inclosed. [B.]—**Gelatin b.** See *Gelatinous b.*—**Gelatino-sulphurous b.** See Balneum *gelatino-sulfurosum.*—**Gelatinous b.** Lat., *balneum gelatinosum* (seu *glutinosum*). Fr., *bain gélatineux.* Ger., *Leimbad.* It., *bagno gelatinoso* (*o di gelatina*). An emollient bath prepared by dissolving in water gelatin or a decoction of animal material, such as calves' feet, containing gelatin; used in irritated states of the skin. [B.] See Bain *gélatineux.*—**General b.** Fr., *bain entier* (ou *général*). Ger., *ganzes Bad, Vollbad.* It., *bagno intiero.* A b. designed for the whole

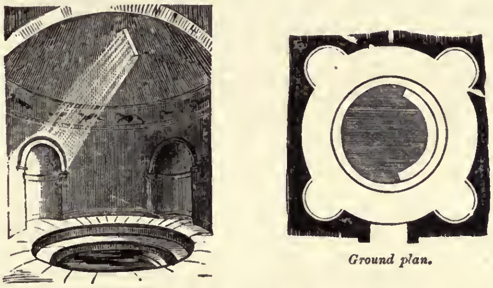
body. [B.]—**Glycerin b.** Fr., *bain glycériné* (1st def.). Ger., *Glycerinbad.* 1. A vapor b. to which glycerin is added. [B, 92.] 2. A chemical b. consisting of glycerin; used for immersing substances to be heated to a temperature not exceeding 200° C., especially in the conversion of starch into sugar. [B, 270.]—**Grape-lees b., Grape-marc b.** Fr., *bain de marc de raisin.* Ger., *Weintresterbad, Tresterbad.* It., *bagno di vinacce* (o *di mosto*). A solid b. consisting of the fermenting marc of grapes from which the juice has been expressed. The effects are due to the heat of the mixture and to the alcohol and carbonic acid set free. It is stimulant or sedative, according to the duration of its application. Used as a tonic and as a remedy for rheumatism. [B, 46, 107.]—**Half-b.** Ger., *Halbbad.* A b. for the lower half of the body. [B.] See *Sitz-b.*—**Hand b.** Lat., *maniluvium.* Fr., *bain des mains, maniluve.* Ger., *Handbad.* It., *maniluvio.* A b. designed for the hands only. [B.]—**Hay b.** Ger., *Heubad.* A b. consisting of hay placed in sacks, with which the whole or a part of the body is surrounded. [B, 270.]—**Head b.** Lat., *capitiluvium, capiluvium.* Fr., *bain de la tête.* Ger., *Kopfbad.* It., *bagno della testa, capiluvio.* A b. for the head alone; either a simple b. or, more generally, a douche or a shower b. [B.]—**Heat-abstracting b.** Ger., *wärmeentziehendes Bad.* Any b. which reduces the temperature of the body: one having a temperature below 35° C. (95° F.). It includes the cold b., the cool b., the temperate b., and the tepid b. [B, 108.]—**Heat-increasing b.** Ger., *wärmesteigendes Bad.* A b. which elevates the temperature of the body; one having a temperature over 37° C. (98·6° F.). [B, 108.]—**Hemlock b.** See *Balneum* CONII.—**Herb b.** Ger., *Kräuterbad.* A medicated b. containing herbs: *e. g.*, the *balneum aromaticum* (*q. v.*). [B, 48.]—**Hip b.** See *Sitz-b.*—**Hot-air b.** Fr., *bain d'air chaud.* Ger., *heisses Luftbad.* A b. consisting of air heated to any desired temperature and confined in a suitable vessel or beneath the bed-coverings. For the latter method,

A HOT-AIR BATH APPARATUS.



the apparatus consists of a metal pipe bent at a right angle. At the lower end of the vertical portion, which hangs down from the bed, is placed an alcohol lamp to heat the air which ascends. The horizontal portion is surrounded with a metallic case, which rests in the bed and protects the patient from contact with the hot pipe, and serves also as a receptacle for the disjointed pipe, for transportation. Another method of administering the b. is to cause the patient to lie down naked on a cane-seated sofa or several chairs placed side by side, when a number of spirit lamps placed under the sofa or chairs are lighted, and the patient, except the head, is covered, together with the sofa or chairs, with several blankets reaching to the floor. This b. is a powerful diaphoretic, used in uræmia and in other conditions calling for profound diaphoresis; it is also a stimulant of rapid action, applicable in surgical shock. [A, 21; B, 15; E.]—**Hot b.** Lat., *balneum calidum.* Fr., *bain chaud.* Ger., *heisses Bad.* A b. of a temperature exceeding 37° C. (98·6° F.). Used to raise the surface temperature, accelerate the circulation and respiration, promote the activity of the skin, and relax the muscular system (especially in convulsions, renal or hepatic colic, strangulated hernia, and retention of urine). [B, 15.]—**Hydrochloric-acid b.** See *Balneum* ACIDI CHLORHYDRICI.—**Hydrostatic b.** A form of the permanent b. devised by N. Arnott, which consists in supporting the patient (without total immersion) in a b. of water of sufficient depth to permit of it. [J. Barr, "Liverpool Med.-chir. Jour.," "Lancet," "N. Y. Med. Jour.," Aug. 20, 1887, p. 1224.]—**Hydrosulphureted b.** See BALNEUM *hydrosulphuratum.*—**Ice-cold b.** Fr., *bain de glace.* Ger., *eiskaltes Bad.* A b. of a temperature between 0° and 5° C. (32° and 41° F.); having the same action as the cold b., but much more powerful. [B, 108.]—**Indian b.** Fr., *bain des Indiens.* A Turkish b. in which massage is combined with the action of heated vapor. [B, 46, 132.]—**Indifferent b.** A mineral spring used for bathing, but containing no active mineral constituents. [B.]—**Iodine b.** See BALNEUM *ioduratum.*—**Iron b.** See *Ferruginous b.*—**Irritant b.** Fr., *bain irritant.* Ger., *reizendes Bad.* It., *bagno irritante.* A b. which causes irritation of the surface, used as a revulsive and derivative; *e. g.*, the mustard b. [B.]—**Lamp b.** See under *Hot-air b.*—**Leaf b.** Ger., *Laubbad.* A b. made with leaves (of the birch or other trees) heated and placed in sacks with which the body is surrounded. [B, 270.]—**Light b.** It., *bagno di luce.* See *Sun b.*—**Lime b.** See *Balneum cum* CALCE (under CALX).—**Liquid b.** Fr., *bain liquide.* Ger., *flüssiges Bad.* It., *bagno liquido.* Sp., *baño liquido.* A b. composed of a liquid, as distinguished from a solid or a gas. [B.]—**Local b.** Ger., *locales Bad.* See *Partial b.*—**Lukewarm b.** See *Temperate b.*—**Malt b.** Ger., *Malzbad.* An emollient b. containing malt. [B, 270.]—**Marine-air b.** Fr., *bain d'air marin.* Ger., *Seeluftbad.* It., *bagno d'aria marina.* The inhalation of sea-water reduced to a fine spray. [B, 125.]—**Marine-mud b.** Fr., *bain de limon salé* (ou *de vase de mer*). Ger., *Seeschlammbad.* A b. in the mud from sea-beaches, which is collected and applied with friction; used especially in Scandinavia, where it is thought to be revulsive, tonic, and alterative. [Dutroulau (B, 46).]—**Medicated-air b.** It., *bagno d'aria medicata.* A b. consisting of air charged with some medicinal substance. [B, 125.]—**Medicated b.** Lat., *balneum medicatum* (seu *medicinale*). Fr., *bain médicinal* [Fr. Cod.] (ou *médicamenteux*). A b. containing a medicinal ingredient; in the Fr. Cod., a class of preparations consisting of a substance or a mixture of substances to be dissolved at the time of using. [B, 113.] See BALNEUM *baretginense*, BAIN *dit de Vichy*, and BAIN *dit de Plombières.*—**Medicated-vapor b.** It., *bagno a vapore medicato.*—A vapor b. charged with a medicinal substance. [B, 125.]—**Medicinal b.** Fr., *bain médicinal* [Fr. Cod.]. See *Medicated b.*—**Mercurial b.** See BALNEUM *mercuriale.*—**Metal b., Metallic b.** Fr., *bain métallique.* Ger., *metallisches Bad.* It., *bagno metallico.* In chemistry, a b. of a molten metal or alloy; used for regulating the degree to which bodies immersed in it are heated. [B, 125, 199.]—**Mexican steam b.** A form of vapor b. used in Mexico, in which steam is generated beneath the floor of a small

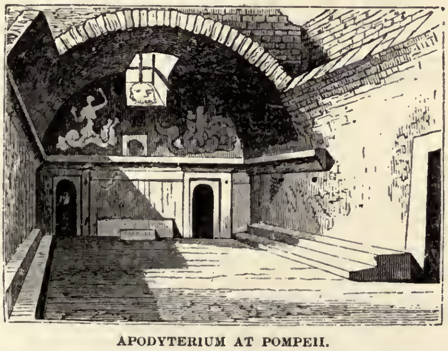
THE MEXICAN STEAM BATH. [A, 327.]



hut-like chamber, and is admitted to the chamber, in which the bather reclines on a bench. [A, 327.]—**Mild alkaline b.** The *balneum alcalinum mitius* of the Belg. Ph. [B.] See BALNEUM *alcalinum.*—**Milk b.** Fr., *bain de lait.* Ger., *Milchbad.* It., *bagno di latte.* Sp., *baño de leche.* A b. consisting of milk; used as a nutritive and emollient. [B, 46.]—**Mineral b.** Fr., *bain minéral.* Ger., *Mineralbad.* It., *bagno minerale.* Sp., *baño mineral.* 1. A mineral spring used for bathing purposes. 2. An artificial solution of mineral substances used as a b. [B.]—**Mineral-mud b.** Ger., *Mineralmoorbad.* See *Mud b.* and *Peat b.*—**Mineral-water b.** See *Mineral b.*—**Moderately cold b.** Ger., *mässig kaltes Bad.* A b. of a temperature of from 15° to 20° C. (59° to 68° F.). [B, 108.]—**Moist-air b., Moist-vapor b.** Fr., *bain de vapeur humide, étuve humide.* It., *bagno a vapore umido.* See *Vapor b.* and *Russian b.*—**Moor b.** See *Peat b.*—**Most's astringent b.** See under *Astringent b.*—**Mud b.** Fr., *bain de boue.* Ger., *Schlammbad, Quellenschlammbad.* It., *bagno di fanghi minerali.* The application of the mud precipitated from certain mineral springs, containing the salts of the latter and often various minute animal and vegetable organisms; used in rheumatic, gouty, and paralytic affections. [B, 15.]—**Muriatic b.** See *Balneum* ACIDI CHLORHYDRICI.—**Must b.** See *Grape-lees b.*—**Mustard b.** See BALNEUM *sinapisatum* and PÉDILUVE *sinapisé.*—**Narcotic b.** Fr., *bain narcotique.* It., *bagno narcotico.* Sp., *baño narcótico.* A b. containing narcotic ingredients. One formula directs a decoction of equal parts of belladonna, hyoscyamus, stramonium, lettuce, and poppies, to be added to enough water for a b. [B, 125.]—**Natural b.** See *Mineral* SPRINGS.—**Natural medicinal b.** It., *bagno medicinale naturale.* A b. or spring which naturally contains medicinal constituents. [B.]—**Natural-vapor b.** It., *bagno a vapore naturale, stufa naturale.* A b. in a cavern or an excavation containing vapor from a subferranean spring or from fissures in volcanic formations. [B, 125.]—**Nitrohydrochloric b., Nitromuriatic-acid b., Nitromuriatic b.** It., *bagno nitromuriatico* (o *reale*). See under NITROHYDROCHLORIC *acid.*—**Nutritive b.** A b. containing nutritive ingredients, such as milk, wine, etc. [B, 199.]—**Oak-bark b.** A b. containing a decoction of oak bark; used chiefly as an astringent partial b., especially in the form of a douche. [B, 199.]—**Oil b.** Lat., *balneum oleosum.* Fr., *bain d'huile.* Ger., *Oelbad.* It., *bagno d'olio.* Sp., *baño de aceite.* 1. A b. of oil, used as an emollient. [B, 46, 125.] See BALNEUM *oleosum.* 2. In chemistry, a b. (5th def.) used for regulating the temperature to which a body is heated, consisting of boiled linseed oil. It is used for heating to temperatures below 300° C. [B, 270.]—**Olive-lees b.** See BAIN *de marc d'olivier.*—**Oriental b.** See *Turkish b.*, *Egyptian b.*, and *Indian b.*—**Oxygen b.** Fr., *bain d'oxygène.* A gas b. consisting of oxygen; used chiefly by way of inhalation in conditions (such as heart disease, pulmonary affections, etc.) in which there is inadequate aeration of the blood; also locally as an application to gangrenous ulcers. [B, 46, 93.] See OXYGEN.—**Ozone b.** A popular term for the fucus b. (*q. v.*). [B, 254.]—**Paraffin b.** Fr., *bain de paraffine.* Ger., *Paraffinbad.* A b. (5th def.) consisting of melted paraffin, in which substances to be heated are immersed. The maximum temperature employed is usually about 250° C. [B, 270.]—**Partial b.** Fr., *bain partiel.* Ger., *Partialbad, Theilbad.* It., *bagno parziale.* Syn.: *local b.* A b. designed for application to only a part of the body. Such are the head b., arm b., hand b., half-b., sitz-b., and foot b., including liquid, vapor, and gas b's, the latter being applied by means of vessels specially adapted to receive the part to be immersed. The various douches, inhalations, etc., for application to mucous passages are also partial b's. [B.]—**Peat b.** Ger., *Moorbad, Mineralmoorbad.* A b. consisting in the application of the bog earth surrounding a mineral spring. It contains much vegetable matter, and is used in rheumatic, gouty, and paralytic affections. [B, 15, 108.] Cf. *Mud b.*—**Pennès's b.** See BAIN *électrochimique de Pennès.*—**Permanent b.** Ger., *permanentes Bad.* A b. intended for application for an indefinite time; usually either a lukewarm b. designed to lower the temperature in pyrexia, or a simple or medicated b. of the temperature of the body, applied by means of a water-bed or by irrigation in chronic skin diseases. [B.]—**Photographic b.** Fr., *bain photographique.* A liquid in which

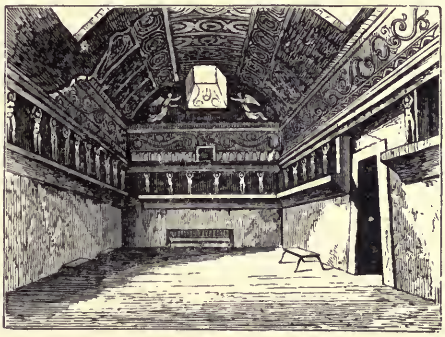
photographic plates are immersed for fixing or for toning the image. [B.]—**Pine b., Pine-leaf b., Pine-needle b.** Ger., *Kiefernadelbad.* A b. prepared with pine needles in the same way, and used for the same purposes, as the fir-needle b. [B, 49.]—**Plunge b.** Ger., *Tauchbad.* A b., usually cold, into which the patient plunges. [B, 48.]—**Pneumatic b.** See *Air b.*—**Potassium-sulphide (or sulphuret) b.** See Balneum *sulfuratum.*—**Rarefied-air b.** Fr., *bain d'air raréfié.* It., *bagno d'aria rarefatta.* A b. of rarefied air in which the whole or a part of the body is immersed. [B, 46, 125.]—**Roman b.** The system of

PLAN OF POMPEIAN BATH.



bathing in use among the ancient Romans, also an establishment for its application. "The public bath at Pompeii (uncovered in 1824), though inferior in size and appointments to those of the capital, was similar probably to them in its internal arrangements. It occupied an area of about 10,000 sq. ft., and contained two distinct bathing establishments, of which the smaller is believed to have been appropriated exclusively to the women. In the men's baths is first a court, about 60 ft. long, bounded on two sides by a Doric portico, in which those who were waiting their turn for admission to the thermæ might walk or repose upon the benches placed along the wall. From this court there was a communica-

Ground plan.



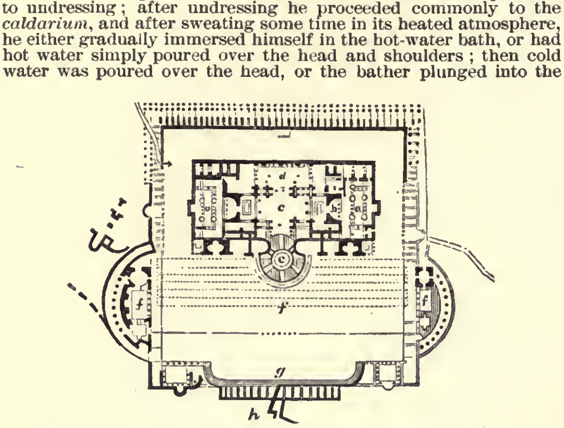
FRIGIDARIUM IN A BATH AT ROME.

tion by means of a corridor with a smaller room, *frigidarium*, in the walls of which holes are observed, which served for the insertion of pegs on which the clothes of the bathers might be hung. This room was the *apodyterium* (the place where the clothes were left) for those who intended to take the *natatio*, or cold bath. From it another door opened into an apartment in which was placed the *natatorium*, or the *piscina*, a basin for the cold bath. The *piscina* itself occupies the centre of the room ; it is of white marble, circular, 12 ft. 10 in. in diameter, and a little more than 3

APODYTERIUM AT POMPEII.

ft. in depth ; 10 in. below the lip, and 2 ft. 4 in. from the bottom, it is surrounded by a marble seat, 11 in. in width. The water was conducted into the basin by a bronze spout, the remains of which can still be discerned in the wall of the chamber. In the bottom was an outlet, by which the water could be let out and the *piscina* cleaned, while the rim is furnished with a waste pipe. From the *frigidarium* a door opened into a similar room, which appears to have been warmed by a large portable fireplace, and was furnished with bronze seats placed along the wall. This room served as an *apodyterium* for those who were to use the warm baths, and here the bathers, previous to entering the *caldarium*, were rubbed and anointed with some of the immense number of fragrant oils and ointments which were employed by the ancients. Having left his dress in the *tepidarium*, the bather passed directly into the *caldarium.* The flooring of this apartment, which, in accordance with the directions of Vitruvius, is twice as long as it is broad, is placed upon small pillars (*suspensuræ*), so that the heat from the furnaces had ready and free admission beneath it. The walls, too, were hollow, the inner being connected with the outer wall by strong clamps of iron and brick, and they thus formed one large flue for the circulation of the heated air. At one end of this room was

TEPIDARIUM AT POMPEII.



placed the hot bath. This was a shallow cistern (*alveus*), 15 ft. in length by about 4 ft. in breadth, and 2 ft. and half an inch in depth; it was elevated above the level of the floor, and the bathers ascended to it by means of two steps, the top one serving for a seat ; on the inside another seat surrounded the whole of the cistern at about half its depth. The hot water was furnished by caldrons placed upon the other side of the wall. At the end of the room, opposite the *alveus*, was the *labrum*, a huge vase or tazza of white marble, 8 ft. in diameter, and having a depth internally of not more than 8 in. From the centre projected a brass tube, probably throwing up cold water. This was perhaps received upon the head of the bather, before he quitted the heated atmosphere of the *caldarium.* Adjoining the *caldarium* was placed the furnace over which was set the caldron for supplying hot water to the baths. The arrangement will be explained by the annexed copy of a fresco discovered in the baths of Titus at Rome. The women's baths resembled those of the men, except that the different apartments were much smaller, and the arrangements less complete. The great thermæ erected by the emperors at Rome were much more extensive and magnificent structures. The baths of Caracalla were 1,500 ft. long by 1,250 ft. broad. At each end of the building is a large oblong hall, *a*, having on one of its sides a semicircular tribune, *b*. The halls were probably designed for exercise, as was also the large open space *f* before the baths. From the tribunes orators and poets spoke to

BATHS OF TITUS.

those assembled at this favorite place of resort. The large central apartment *c* is called the *pinacotheca*, but excellent authorities believe it to have been the *cella calidaria.* The circular apartment *e* was the *laconicum*, or room for the vapor bath ; while the apartment *d*, at the other side, was the *cella frigidaria.* The water for all the building came from the elevated reservoir *h*, passing under the rows of seats *g*, from which spectators witnessed the athletic exercises below. All the apartments of the bath were magnificently ornamented with mosaic, and profusely adorned with painting, stucco work, and statuary. In these immense establishments, the apartments were not only more numerous, but some of them on a very much larger scale. Thus the *natatorium*, or swimming bath, in the baths of Diocletian, was 200 ft. long by 100 ft. broad, and it is calculated that in the whole establishment more than 18,000 persons could bathe at the same time. In the times of the republic the cold bath alone was ordinarily employed, but later the hot air and warm bath were likewise generally used. The order in which they were taken varied according to the directions of the physicians or the inclination of the bather. Previous to bathing, gentle exercise was generally taken ; then it was recommended that the bather should

remain in the *tepidarium*, or warm chamber, for a time previous to undressing; after undressing he proceeded commonly to the *caldarium*, and after sweating some time in its heated atmosphere, he either gradually immersed himself in the hot-water bath, or had hot water simply poured over the head and shoulders; then cold water was poured over the head, or the bather plunged into the

PLAN OF THE BATHS OF CARACALLA.

cold *piscina*. He was now scraped with *strigiles* (small curved instruments, made generally of bronze), dried and rubbed with linen cloths, and finally anointed. When one bath alone was desired, it was taken just before the principal meal; but the Romans bathed after as well as previous to their *cœna*, and Commodus is said to have indulged in seven or eight baths a day." [A, 327.] —**Russian b.** Fr., *bain russe.* Ger., *russisches Bad.* It., *bagno russo.* Sp., *baño ruso.* A variety of vapor b. in which the bather is first exposed in a wooden chamber to the action of hot steam. Originally the steam was generated by pouring water on red-hot stones, but it is now usually conducted to the room in pipes. Against the walls there are shelves ranged one above another. The bather lies upon a lower shelf for a few minutes, then upon the second one, and so on, the temperature rising as he ascends. While he is lying on the shelves he is subjected to friction with soap, massage, flagellation, etc. He then enters another room, where he takes a brief cold b. of some form, either a general b., a douche, or a shower. After that he returns to the hot room, and this alternation is repeated several times. After the b., the person retires to an adjoining room, where he reposes until he is cool, and usually takes some warm drink; or, if prolonged sweating is desired, he is wrapped in blankets and reclines on a couch for some time. This b. is a powerful sudorific and promoter of tissue metamorphosis, used chiefly to promote the absorption of exudates; it is contra-indicated in cases where a decided disturbance of the action of the heart or lungs may prove injurious, as in heart disease with inadequate compensation, fatty degeneration of the heart, arterio-sclerosis, aneurysm, febrile diseases, and great debility from any cause. [Kisch (A, 319); B, 1, 15.] —**Saline b., Salt b., Salt-water b.** See *Brine b.* and *Balneum* AQUÆ *marinæ artificialis.*—**Sand b.** Lat., *balneum arenæ.* Fr., *bain de sable.* Ger., *Sandbad.* It., *bagno di sabbia.* Sp., *baño de arena.* 1. A b. of sand; usually heated to 48° or 50° C. (118·4° or 122° F.) for a general b., and to from 50° to 56° C. (122° to 132·8° F.) for a partial b.; used as a diaphoretic in dropsy and serous effusions. 2. In chemistry, a b. (5th def.) consisting of fine dry sand; used for immersing retorts, crucibles, etc., which are to be heated gradually to a comparatively high temperature. [B.]—**Scott's acid b., Scott's b.** See NITROHYDROCHLORIC-*acid b.*—**Sea b.** Lat., *balneum marinum.* Fr., *bain de mer.* Ger., *Seebad.* It., *bagno di mare.* Sp., *baño de mar.* A b. in the sea. It has the advantages of an ordinary cold b., together with those of a brine b., and in addition the stimulating effect of the mechanical action of the waves and of the muscular effort required to resist the waves and currents. [B, 15, 270.]—**Sea-mud b.** See *Marine-mud b.*—**Sea-weed b.** See *Fucus b.*—**Shower b.** Lat., *impluvium, hydroconion.* Fr., *douche en arrosoir.* Ger., *Regenbad, Staubregenbad, Traufbad.* A form of b., either general or partial, in which water is projected or made to fall upon the body in a shower of drops. It combines the effects of an ordinary b. with the mechanical stimulus of the impact of the water. It is used as a stimulant and revulsive in narcosis and other comatose conditions, also as a tonic with persons who are able to bear the shock. [B, 15, 48.]—**Simple effervescent b.** See BALNEUM *ærophorum simplex.*—**Sitz-b.** Lat., *insessus.* Fr., *bain de siége* (ou *de fauteuil*). Ger., *Sitzbad.* Syn.: *hip b.* A partial b. in which the hips are immersed, differing from the half-b. in the fact that the legs and feet are not immersed. The term is also applied to the bidet (*q. v.*). Used in congestive and spasmodic affections of the pelvic contents and to promote the reduction of inguinal or femoral hernia. [B, 15, 48, 139.]—**Snow b.** Fr., *bain de neige.* Ger., *Schneebad.* A b. constituted by plunging the body or a part of it into snow; said to be employed in Russia as one of the steps in the administration of the Russian b. [B.]—**Soap b.** Lat., *balneum saponatum* (seu *saponis*). Fr., *bain avec le savon.* Ger., *Seifenbad.* A b. in water containing soap. [B.]—**Solid b.** Fr., *bain solide* (ou *sec*). Ger., *festes Bad.* It., *bagno solido.* A b. consisting of some solid or semi-solid material with which the body is surrounded; the chief varieties are the mud b., marine-mud b., peat b., sand b., dung b., olive-lees b., grape-lees b., earth b., hay b., leaf b., ash b., and animal b. Such b's are of service partly by the mechanical effect produced by the friction of the solid particles upon the skin, an effect which is often heightened by kneading or massage; partly by the muscular effort made consciously or unconsciously to oppose the resistance of the enveloping substance; and partly by the warmth of that substance, which acts as a poultice. [B.]—**Sponge b.** A b. applied with a sponge, combining the effects of muscular effort and friction with those of the water. [B.]—**Spout b.** See DOUCHE.—**Starch b., Starch-meal b.** Ger., *Stärkemehlbad.* An emollient b. of starch and water. [B, 270.]—**Steam b.** Lat., *balneum vaporis.* 1. See *vapor b.*, *Russian b.*, and *Mexican steam b.* 2. In chemistry, a b. (5th def.) for heating substances by suspending them in steam; a variety of the water b. [B.]—**Steel b.** See *Ferruginous b.*—**Still-water b.** A b. in water not violently moved by waves or currents, as opposed to the surf b. [B.]—**Stimulating b.** Fr., *bain stimulant.* Ger., *stärkendes Bad.* A b. containing aromatic, astringent, or tonic ingredients, supposed to stimulate the part immersed. [B, 49.]—**Strong alkaline b.** The balneum alcalinum forte of the Belg. Ph. [B.] See BALNEUM *alcalinum.*—**Sulphur b., Sulphureted b.** See BALNEUM *sulphuratum.*—**Sulphureted-hydrogen b.** A gas b. consisting of hydrogen sulphide generated by the decomposition of the sulphides contained in natural or artificial sulphur waters. [B, 270.]—**Sulphureted-mud b.** Ger., *Schwefelschlammbad.* A b. consisting of the mud deposited from sulphurous springs and containing sulphur compounds. [B, 108.]—**Sulphuret-of-potassium b.** See BALNEUM *sulphuratum.*—**Sulphuric-acid b.** Ger., *Schwefelsäurebad.* A b. (5th def.) of sulphuric acid; used for heating substances to temperatures below 180° C. (356° F.). [B. 270.]—**Sulphurous-acid b., Sulphurous b., Sulphur-vapor b.** Fumigation with gaseous sulphurous acid. [B.] See also *Fumigation à l'*ACIDE SULFUREUX.—**Sun b.** Exposure of the naked body to the more or less prolonged action of the direct rays of the sun; used as a tonic and stimulant in anæmia and debility. [B.]—**Surf b.** Fr., *bain de lame.* Ger., *Wellenbad.* A sea b. taken in the surf; the exercise and the violent movements of the water exert the chief action. [B.]—**Surprise b.** Ger., *Ueberraschungsbad.* A b. into which one is thrown suddenly and without warning; used where a profound shock is required, as in hysteria. [B, 48.]—**Sweat b., Sweating b.** Ger., *Schwitzbad.* Any b. designed to produce sweating, especially the Turkish and the Russian b. [B, 48.]—**Tan b.** Ger., *Lohbad.* A b. containing tan; formerly used as an astringent and antidrotic in phthisis and other diseases. [B, 270.]—**Tank b.** Ger., *Bassinbad, Piscinenbad.* A b. taken in a large tank or basin, in which a number of persons bathe at once. [B.]—**Temperate b.** Fr., *bain tempéré.* Ger., *lauwarmes Bad.* It., *bagno temperato.* A b. of a temperature of from 25° to 30° C. (77° to 86° F.). [B, 15.]—**Tepid b.** Fr., *bain tiède.* It., *bagno tiepido.* A b. of a temperature of from 30° to 33° or 35° C. (86° to 91·4° or 95° F.); intermediate between the warm b. and the temperate b. The two terms, temperate b. and tepid b., are, however, often applied indiscriminately to b's of any temperature from 25° to 35° C. (77° to 95° F.). [B.]—**Therapeutic b.** See *Medicated b.*—**Tonic b.** Fr., *bain tonique.* Ger., *tonisches Bad.* It., *bagno tonico.* Sp., *baño tónico.* A b. having tonic properties, especially a sea b. or a cold b. [B, 49, 125.]—**Topical b.** See *Partial b.*—**Tub b.** Ger., *Wannenbad.* A b. taken in a tub of suitable size to receive the whole body or the part of it to be bathed, ordinarily a metallic tub, but, for b's containing a mineral acid, iodine, corrosive sublimate, or any substance injurious to metal, a wooden, porcelain, or enameled tub. [B.]—**Tumble b.** An old form of the shower b. [B, 199.]—**Turkish b.** Fr., *bain turc.* Ger., *türkisches Bad.* It., *bagno turco.* One of the modern forms of the ancient Roman b. The bather first disrobes in a room of a temperature of about 27° C. (80·6° F.), and puts on a thin gown and a pair of wooden-soled sandals. He then enters the *tepidarium*, a chamber having a slate or marble floor and tiled walls, where there are couches for reclining. Here, where the temperature is about 49° C. (120·2° F.), he remains for about fifteen minutes, and then goes to the shampooing room, where the temperature is about the same. He places himself on a marble table, where his body is rubbed and kneaded by an attendant. After that he reclines for about ten minutes in the *caldarium*, a chamber having a temperature of about 80° C. (176° F.), during which time he sweats profusely and feels a burning sensation about the nostrils. He then returns to the shampooing room, where he is douched with water of about 37° C. (98·6° F.), rubbed with wisps of sea-grass or hemp, and douched again, after which he is scraped with a wooden implement, and showered with water of a temperature of 32·5° C. (90° F.). Then he is douched with water of a temperature of 21·5° C. (70° F.), after which he is thoroughly dried in the dressing-room, and reclines there for some time on a couch. The same precautions are necessary in the use of this as of the Russian b. [A. 363.]—**Turpentine b.** See *Antirrheumatic b.*—**Turpentine-vapor b.** See under TURPENTINE.—**Vacuum b.** Fr., *bain de vide.* The treatment of a portion of the body by subjecting it to the action of a partial vacuum, as by the use of Junod's boot. [A, 306.]—**Vapor b.** Fr., *bain de vapeur.* Ger., *Dampfbad.* It., *bagno a vapore.* A b. in air charged with vapor and usually of a very high temperature. [B, 15.] See also *Russian b.*—**Very cold b.** Fr., *bain très-froid.* Ger., *sehr kaltes Bad.* It., *bagno freddissimo.* A b. of a temperature below 10° C. (50° F.); acting like the cold bath, but with greater energy, and to be used with caution and for a short time only. [B, 98, 108.] Cf. *Snow b.* and *Ice-cold b.*—**Very hot b.** Fr., *bain très-chaud.* Ger., *sehr heisses Bad.* It., *bagno caldissimo.* A b. of a temperature above 42° C. (107·6° F.); to be used with caution and for a short time only. [B, 98, 108.]—**Warm b.** Fr., *bain chaud.* Ger., *warmes Bad.* It., *bagno caldo.* A b. of a temperature of from 33° to 4° C. (91·4° to 104° F.); calmative and restorative, but to be used with caution in cases of organic disease of the heart or lungs. [B, 15, 108.]—**Water b.** Lat., *balneum Mariæ* (2d def.). Fr., *bain d'eau* (1st def.), *bain-Marie* (2d def.). Ger., *Wasserbad* (1st def.), *Marienbad* (2d def.). It., *bagno d'acqua* (1st def.), *bagno Maria* (2d def.). Sp., *baño de agua* (1st def.), *baño Maria* (2d def.). 1. A b. composed of water only. 2. In chemistry, a b. (5th def.) consisting of water, for immersing bodies to be heated to a temperature not above the boiling-

point of water. It usually consists of a hemispherical metallic vessel with a lid composed of a series of concentric rings, by removing one or more of which an aperture of any desired size may be obtained, into which is fitted the dish or other receptacle containing the substance to be heated. The metallic vessel is filled with water, and the whole is placed over a fire or on a sand b. A glue-pot is a familiar example of the water b. [B.]—**Whey b.** Fr., *bain de petit-lait.* Ger., *Molkenbad.* It., *bagno di siero.* A b. of whey; used as a nutritive and emollient. [B, 125, 270.]—**Wine b.** Fr., *bain de vin.* Ger., *Weinbad.* It., *bagno di vino.* A b. of wine; considered nutritive, stimulant, and slightly astringent, and used for the same purposes as the alcohol b. [B, 46.]—**Zinc-chloride b.** Ger., *Chlorzinkbad.* A chemical b. consisting of molten zinc chloride, for immersing substances to be heated to a temperature not exceeding 700° C. [B, 270.]

BAT-HA, n. A Chinese name for a species of *Pulegium.* [C. L. D., "Union méd.," June 1, 1886, p. 893.]

BATHAENDA, n. See BATHOENDA.

BATH ALUM SPRINGS, n. Ba^{3}th a^{2}l′u^{3}m spri^{2}ngz. A place in Bath County, Virginia, where there are springs the waters of which resemble those of the Rockbridge Alum Springs, but containing more iron; used in scrofula, chronic diarrhœa, eczema, and diseases depending on impoverishment of the blood. According to two analyses by A. A. Hayes, a pint of the water contains

Sodium chloride	0·022 grain.		
Potassium sulphate	....		0·032 grain.
Magnesium sulphate	0·352	or	0·160 "
Calcium sulphate	0·476	"	0·317 "
Iron protoxide	1·814	"	2·722 grains.
Alumina	1·286	"	1·536 "
Ammonium crenate	0·232	"	0·222 grain.
Sodium silicate	0·253	"	0·394 "
Free sulphuric acid	0·726	"	0·985 "
Carbon dioxide	1·4	"	1 cubic in.

There are also one or two other springs of a different character, but their waters have not been thoroughly investigated. [B, 15.]

BATHAM, n. A name given to the *Hibiscus heterophyllus* in North Queensland, where the roots and the young shoots are eaten. [B, 121.]

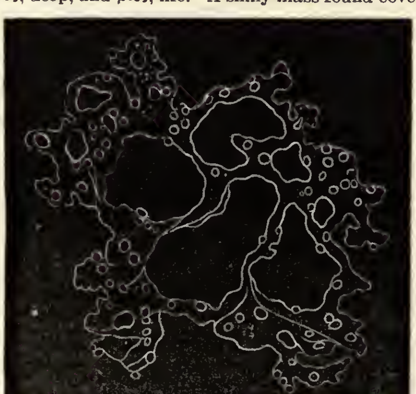
BATHENGEL (Ger.), n. Ba^{3}t′e^{2}ng-e^{2}l. The *Teucrium chamædrys.* [B, 180.]—**B'gemander.** See *B.*

BATHIKH (Ar.), n. See BATIECH.

BATHMIS (Lat.), n. f. Ba^{2}th(ba^{3}th)′mi^{2}s. Gen., *bath′midos (-dis).* Gr., βαθμίς. A shallow depression on the surface of a bone, especially either of the fossæ at the lower end of the os brachii for receiving the olecranon or the coronoid process of the ulna. [Hippocrates (A, 325).]

BATHMIUM (Lat.), n. n. Ba^{2}th(ba^{3}th)′mi^2-u^{3}m(u^{4}m). Of Presl, a genus of ferns, now included under *Aspidium*, section *Euaspidium.* [B, 242.]—**B. trifoliatum** [Fée]. The *Aspidium trifoliatum.* [B, 242.]

BATHMODES (Lat.), adj. Ba^{2}th(ba^{3}th)-mo′dez(das). Gr., βαθμοειδής (from βαθμίς [see BATHMIS], and εἶδος, resemblance). Pertaining to the bathmides (see BATHMIS). [A, 322.]



BATHMOS, BATHMUS (Lat.), n's m. Ba^{2}th(ba^{3}th)′mo^{2}s, -mu^{3}s(mu^{4}s). Gr., βαθμός. See BATHMIS.

BATHNA, n. An East Indian name for the *Chenopodium album.* [L, 105.]

BATHOENDA, n. A wood, perhaps that of a species of *Hibiscus*, used in Ceylon for making various utensils. [B, 121.]

BATHRION, BATHRIUM, BATHRON, BATHRUM (Lat.), n's n. Ba^{2}th(ba^{3}th)′ri^2-o^{2}n, -u^{3}m(u^{4}m), -ro^{2}n, -ru^{3}m(ru^{4}m). Gr., βάθρον. Fr., *banc d'Hippocrate.* Ger., *Hippokratische Bank.* Syn.: *scamnum Hippocratis.* A sort of mechanical bed devised by Hippocrates for applying extension by means of windlasses in the reduction of fractures and dislocations of the lower limb. [A, 301.]

BATHYBIUS (Lat.), n. m. Ba^{2}th(ba^{3}th)-i^{2}b(u^{6}b)′i^2-u^{3}s′u^{4}s). From βαθύς, deep, and βίος, life. A slimy mass found covering the

THE BATHYBIUS HAECKELII. [A, 462.]

bottom of the sea, especially the Atlantic Ocean. It has been supposed to be a distinct organism belonging to the *Monera*, but by some it has been thought to be simply a gelatinous form of the calcium salts of sea-water. It shows amœboid movements, and numerous coccoliths and coccospheres are found adherent to it. [A, 385, 462; L.]

BATHYCENTESIS (Lat.), n. f. Ba^{2}th(ba^{3}th)-i^2(u^6)-se^{2}n(ke^{2}n)-te(ta)′si^{2}s. Gen., *bathycente′seos (-sis).* From βαθύς, deep, and κέντησις (from κεντεῖν, to prick), puncture. Fr., *bathycentèse.* Ger., *Tiefstechen.* See ACUPUNCTURE.

BATHYCHAITES (Lat.), adj. Ba^{2}th(ba^{3}th)-i^2(u^6)-ka^3-i(i^2)′tez (tas). From βαθύς, thick, and χαίτη, long, flowing hair. Having the hair of the head thick. [A, 322.]

BATHYCHEILOS, BATHYCHILUS (Lat.), adj's. Ba^{2}th-(ba^{3}th)-i^2(u^6)-ki′(ch^{2}e^2′i^2)-lo^{2}s, -ki(ch^{2}e)′lu^{3}s(lu^{4}s). From βαθύς, thick, and χεῖλος, a lip. Having thick, heavy lips. [A, 322.]

BATHYERGINÆ (Lat.), n. f. pl. Ba^{2}th(ba^{3}th)-i^2(u^6)-u^{6}r(e^{2}r)′-ji^{2}n(gi^{2}n)-e(a^3-e^2). A subfamily of the *Spalacidæ* having the angular part of the mandible arising from the side of the socket of the lower incisor. [L, 121.]

BATHYMETRIC, BATHYMETRICAL, adj's. Ba^{2}th-i^2-me^{2}t′ri^{2}k, -ri^{2}k-a^{2}l. Pertaining to bathymetry (*q. v.*). [L, 108, 147.]

BATHYMETRY, n. Ba^{2}th-i^{2}m′e^{2}t-ri^2. From βαθύς, deep, and μέτρον, a measure. The measurement of the depth of the sea or of any natural or abnormal cavity of the body. [L, 55, 73.]

BATHYMORPHIA (Lat.), n. f. Ba^{2}th(ba^{3}th)-i^2(u^6)-mo^{2}rf′i^2-a^3. From βαθύς, deep, and μορφή, shape. An old name for myopia; so called from the antero-posterior elongation of the eyeball. [F.]

BATHYPICRON (Lat.), n. n. Ba^{2}th(ba^{3}th)-i^2(u^6)-pi^{2}k′ro^{2}n. From βαθύς, deep, and πικρός, bitter. See BARYPICRON.

BATHYRRHYNCUS (Lat.), adj. Ba^{2}th(ba^{3}th)-i^{2}r(u^{6}r)-ri^{2}n^2-(ru^{6}n^2)′ku^{3}s(ku^{4}s). From βαθύς, thick, and ῥύγκος, a beak. Fr., *bathyrrhynque.* Ger., *dickschnabelig.* Having the beak thick (said of birds). [L, 180.]

BATHYS (Lat.), n. f. Ba(ba^3)′thi^{2}s(thu^{6}s). From βαθύς, strong, rich. An ancient name for a choice variety of cheese. [Galen (A, 325).]

BATHYSTIXIS (Lat.), n. f. Ba^{2}th(ba^{3}th)-i^2(u^6)-sti^{2}x′i^{2}s. Gen., *bathystix′eos (-is).* From βαθύς, deep, and στίξις (from στίζειν, to prick), puncture. See ACUPUNCTURE.

BATHYTHRYSSIDÆ (Lat.), n. f. pl. Ba^{2}th(ba^{3}th)-i^2(u^6)-thri^{2}s(thru^{6}s)′si^{2}d-e(a^2-e^2). A family of the *Physostomi.* [L, 207.]

BATI, n. See BATIS.

BATIA (Lat.), n. f. Ba(ba^3)′shi^2(ti^2)-a^3. A retort. [Morley (A, 325).]

BATIATOR, n. A root of uncertain origin, perhaps that of the *Spermacoce hispida*, obtained from Senegal, said to have properties like those of ipecac. It is from 6 to 10 inches long, cylindrical, thin, yellowish or brownish and having annular stripes or wrinkles externally, yellowish internally, odorless, and having a slightly acrid, nauseous taste. ["Proc. of the Am. Pharm. Assoc.," xxvi, p. 281 (B); B, 5, 270.]

BATIC, n. See BATECH.

BATICULA (Lat.), n. f. Ba^{2}t(ba^{3}t)-i^{2}k′u^2(u^4)-la^3. Dim. of *batis* (*q. v.*). Of Cæsalpinus, the *Crithmum maritimum.* [B, 121.]

BATIDACEÆ, BATIDEÆ (Lat.), n's f. pl. Ba^{2}t(ba^{3}t)-i^{2}d-a(a^3)′se^2(ke^2)-e(a^3-e^2), -i^{2}d′e^2-e(a^3-e^2). Fr., *batidées.* A group of plants, including the single genus *Batis*, regarded by Lindley (1836) as a tribe of the *Urticaceæ*, by Reichenbach as a subdivision of the *Artocarpeæ*, by Martius, Meissner, and Bentham and Hooker as a distinct order, which the latter refer to the series *Curvembryeæ* in a place intermediate between the *Phytolaccaceæ* and the *Polygonaceæ*, from both of which it is distinguished by its diœcious flowers placed in axillary strobiles and by the quadrilocular ovaries containing one ovule in each loculus and uniting to form a compound fruit made up of a number of 4-kerneled drupes. [B, 42, 121, 170.]

BATIDES (Lat.), n. f. pl. Ba^{2}t(ba^{3}t)′i^{2}d ez(e^{2}s). Of Owen, a section of the *Plagiostomi*, including the rays and skates. [L, 147.]

BATIE (Fr.), n. Ba^3-te. See BATECH.

BATIECH, n. See BATECH.

BATIFOIL (Fr.), n. Ba^3-ti^2-fwa^{3}l. A place in the department of Cantal, France, where there is a cold effervescent alkaline and chalybeate spring. [A, 385.]

BATIGNOLLES (Fr.), n. Ba^3-ti^{2}n-yol. A place in the department of the Seine, France, where there is a cold alkaline and sulphurous spring. [A, 385.]

BATIKH ZICKE (Ar.), n. See BATECH.

BATINON MORON (Lat.), n. n. Ba^{2}t(ba^{3}t)′i^{2}n-o^{2}n mo(mo^2)′-ro^{2}n. Gr., βάτινον μόρον. An old name for the raspberry-bush. [L, 84.]

BATIS (Lat.), n. f. Ba(ba^3)′ti^{2}s. Gen., *bat′idos (-dis).* Gr., βατίς, βάτος. 1. Of Pliny, the *Crithmum maritimum.* 2. Of P. Broune, a genus of plants constituting by itself the order *Batideæ*, which has been variously referred to the *Amentaceæ*, the *Axonophyti*, the *Chenopodiaceæ*, the *Coniferæ*, the *Urticaceæ*, the *Moraceæ*, and the *Artocarpeæ.* [B, 42, 121.] 3. The thoraback, a fish the tongue of which was prescribed by Hippocrates for menstrual derangements. [L, 94.]—**B. maritima** [P. Broune]. Syn.: *barilla.* The only species; a small whitish shrub growing on the coast of Jamaica. The plant is burned to obtain soda (barilla), of which it contains a large quantity, and is also used in making pickles. [B, 19, 173.]

BATISECULA (Lat.), n. f. Ba^{2}t(ba^{3}t)-i^2-se^{2}k′u^2(u^4)-la^3. The *Centaurea cyanus.* [B.] See BAPTISECULA.—**Flores batiseculæ.** The flowers of the *Centaurea cyanus.* [B, 180.]

BATISSE (Fr.), n. Ba^3-tes. A place in Auvergne, France, where there is an effervescent, ferruginous, purgative, and alkaline spring. [L, 105.]

BATITURA (Lat.), n. f. Ba^{2}t(ba^{3}t)-i^2-tu^2(tu)′ra^3. See Battitura.

BATLESCHAIAN, n. The *Solanum melongena*. [Sloane (B, 121).]

BATOCAULON (Lat.), n. n. Ba^{2}t(ba^{3}t)-o(o^2)-ka^{4}l′(ka^3′u^{4}l)-o^{2}n. Of De Candolle, a section of the genus *Mimosa*. [B, 214.]

BATODENDRON (Lat.), n. n. Ba^{2}t(ba^{3}t)-o(o^2)-de^{2}n′dro^{2}n. Of Nuttall, a section of the genus *Vaccinium*, regarded by some as a separate genus. [B, 121.]

BATOIDEI (Lat.), n. m. pl. Ba^{2}t(ba^{3}t)-o(o^2)-i^{2}d(ed)′e^2-i(e). A division of the *Plagiostomata* having the gill-openings always five in number; the abdominal aspect of the body depressed; the trunk (surrounded by the largely developed pectoral fins) forming a broad, flat disc, to which is attached a small, slender tail; spiracles always present; no anal fin; the dorsal fin, if present, situated on the tail. [L, 207.]

BATOKIOULS, n. A Languedoc name for the *Cynorrhodon*. [B, 121.]

BATON (Lat.), n. n. Ba(ba^3)′to^{2}n. Gr., *βάτον*. The blackberry. [A, 322.]

BÂTON (Fr.), n. Ba^3-to^{2}n^2. 1. A rod or staff; in pharmacy, a bacillus (*q. v.*). [B, 119.] 2. The genus *Asphodelus*. [B.]—**B's aromatiques russes.** Pastilles made by melting together 20 parts each of benzoin and mastic and 10 each of anime, labdanum, amber, and olibanum, and adding 5 each of storax, powdered cinnamon-bark, and balsam of Peru; to be divided into rods of 5 grammes each. [Bernatzik (A, 319).]—**B. blanc.** The *Asphodelus ramosus*. [B, 19.]—**B. de casse.** The *Cassia fistula*. [L, 109.]—**B. de Jacob.** The *Asphodeline lutea*. [B, 121.]—**B. de Saint-Jacques.** The *Althœa rosea*. [L, 74.]—**B. de Saint-Jean.** The *Polygonum orientale*. [B, 121.]—**B. d'or.** The double-flowered variety of the *Cheiranthus cheiri*. [B, 121.]—**B. royal.** The *Asphodelus albus* or the *Asphodelus ramosus*. [B, 121, 173.]

BÂTONNAGE (Fr.), n. Ba^3-to^{2}n-na^{3}zh. The operation of tickling the palate of a ruminant with a stick, in order to provoke eructations for the alleviation of colic. [A, 385; L, 55.]

BÂTONNET (Fr.), n. Ba^3-to^{2}n-na. 1. See Bacillus. 2. In the retina, a rod of the layer of rods and cones. [L.] 3. In veterinary medicine, a small, heavy piece of wood used to strike the fleam with. [L, 55.]

BATOOLA (Hind.), n. The *Cicer arietinum*. [B, 172.]

BATOR-NEBOO (Bengal. and Hind.), n. The *Citrus decumana*. [B, 172.]

BATOS (Lat.), n. m. and f. Ba(ba^3)′to^{2}s. Gr., *βάτος ἰδαία* [Dioscorides]. 1. (Fem.) The raspberry (*Rubus idœus*). [B, 180.] 2. (Masc.) See Batis (3d def.).

BATOTO, n. A Guiana name for the saccharine, acidulous berries of several species of *Physalis*, especially the *Physalis pubescens*. [B, 121.]

BATOU, n. An African name for a species of *Lagenaria*, the fibrous bark of which is made into vessels in Senegambia. [B, 121.]

BATRACAUS (Lat.), n. m. Ba^{2}t(ba^{3}t)-ra^3-ka(ka^3)′u^{3}s(u^{4}s), -ra-(ra^3)′ka(ka^3)-u^{3}s(u^{4}s). From *βατράχειος*, *βατράχεος*, pertaining to a frog. See Ranula.

BATRACHIA (Lat.), n. n. pl. Ba^{2}t(ba^{3}t)-ra(ra^3)′ki^2(ch^{2}i^2)-a^3. From *βάτραχος*, a frog. Fr., *batraciens*. Ger., *Batracier, Batrachier*. The batrachians: 1. Of Bonaparte, a subclass of the *Amphibia*, divided into the *Mutabilia* and the *Immutabilia*. [L, 204.] 2. Of Owen, an order of the *Hœmatocrya*, including all amphibians, divided into the *Ophiomorpha*, the *Ichthyomorpha*, and the *Theriomorpha*. [L, 14, 147.] 3. Of Tschudi, a division of the *Amphibia*, including those with four limbs and no tail. [L, 204.] 4. Of Huxley, the *B. ecaudata*. [L.]—**B. anura.** See *B. ecaudata*.—**B. apoda.** Ger., *Schleichenlurche*. Those *B.* that have no limbs. [L.]—**B. caudata.** Fr., *marcheurs*. Ger., *Schwanzmolche*. The *Urodela*; those *B.* that in the perfect state have two or four limbs and a tail; divided into the families *Salamandridœ, Amphiumidœ, Proteidœ*, and *Sirenidœ*, [L,]—**B. ecaudata.** Fr., *sauteurs*. Ger., *Froschlurche*. The *Anura*; those *B.* that in the perfect state have four limbs, but no tail; including the frogs and toads. [L, 204.]—**B. gradientia.** See *B caudata*.—**B. salientia.** See *B. ecaudata*.—**B. urodela.** See *B. caudata*.

BATRACHIAN, adj. Ba^{2}t-ra′ki^2-a^{2}n. Lat., *batrachius*. Fr., *batracien*. Ger., *froschähnlich*. Pertaining to or resembling the *Batrachia*; as a n., one of the *Batrachia*.—**Frog b's.** See Batrachia *ecaudata*.—**Gilled b's.** See Perennibranchiata.—**Mailed b's.** See Phractamphibia.—**Naked b's.** See Lissamphibia.—**Tailed b's.** See Batrachia *caudata*.

BATRACHIDÆ (Lat.), n. f. pl. Ba^{2}t(ba^{3}t)-ra^{2}k(ra^{3}ch^2)′i^{2}d-e(a^3-e^2). A family of the *Acanthopterygii*. [L, 207.]

BATRACHIDES, BATRACHII (Lat.), n's m. pl. Ba^{2}t(ba^{3}t)-ra^{2}k(ra^{3}ch^2)′i^{2}d-ez(e^{2}s), -i^2-i(e). See Batrachidæ.

BATRACHIODES (Lat.), adj. Ba^{2}t(ba^{3}t)-ra^{2}k(ra^{3}ch^2)-i^2-o′dez-(das). See Batrachoid.

BATRACHION (Lat.), n. n. Ba^{2}t(ba^{3}t)-ra(ra^3)′ki^2(ch^{2}i^2)-o^{2}n. Gr., *βατράχιον*. An ancient name for the *Ranunculus aquatilis*. [B, 121.]

BATRACHITES (Lat.), n. m. Ba^{2}t(ba^{3}t)-ra^3-ki(ch^{2}e)′tez(tas). Gen., *batrachitœ*. Gr., *βατραχίτης*. See Bufonites.

BATRACHIUM (Lat.), n. n. Ba^{2}t(ba^{3}t)-ra(ra^3)′ki^2(ch^{2}i^2)-u^{3}m-(u^{4}m). 1. See Batrachion. 2. See Ranula. 3. Of De Candolle, a section of the genus *Ranunculus*, considered by some a distinct genus. [B, 121, 214.]

BATRACHIUS (Lat.), adj. Ba^{2}t(ba^{3}t)-ra(ra^3)′ki^2(ch^{2}i^2)-u^{3}s(u^{4}s). See Batrachian.

BATRACHOCEPHALUS (Lat.), adj. Ba^{2}t(ba^{3}t)′′ra^3-ko(ch^{2}o^2)-se^{2}f(ke^{2}f)′a^3-lu^{3}s(lu^{4}s). From *βάτραχος*, a frog, and *κεφαλή*, the head. Fr., *batrachocéphale*. Ger., *froschkopfig*. Having a head like a frog's. [L, 180.]

BATRACHOID, adj. Ba^{2}t′ra^3-koid. Gr., *βατραχώδης* (from *βάτραχος*, a frog, and *εἶδος*, resemblance). Lat., *batrachodes*. Fr., *batrachoïde*. Ger., *froschähnlich*. Resembling a frog. [L, 180.]

BATRACHOLEIC ACID, n. Ba^{2}t-ra-ko-le′i^{2}k. From *βάτραχος*, a frog, and *oleum*, oil. Fr., *acide batracholéinique*. Ger., *Batracholeinsäure, Froschölsäure*. An acid said to be contained, together with stearic acid, glycerin, and a peculiar yellow fat, in the oil expressed from the omentum of the water salamander. [B, 2.]

BATRACHOPHIDES (Lat.), n. m. pl. Ba^{2}t(ba^{3}t)-ra^3-ko^{2}f-(ch^{2}o^{2}f)′i^{2}d-ez(e^{2}s). From *βάτραχος*, a frog, and *ὄφις*, a snake. Fr., *batrachophides*. Of Ficinus, Carus, and Latreille, a division of reptiles having a snake-like body, and a smooth, scaleless, viscous skin. [L, 180.]

BATRACHOPHIDIA (Lat.), n. n. pl. Ba^{2}t(ba^{3}t)-ra^3-ko(ch^{2}o^2)-fi^{2}d′-i^2-a^3. Fr., *batrachophidiens*. Bonaparte's name for the *Batrachia apoda*. [L, 204.]

BATRACHOPLASTY, n. Ba^{2}t′ra^3-ko-pla^{2}st′′i^2. From *βάτραχος*, a frog (see Ranula), and *πλάσσειν*, to form. Fr., *batrachoplastie, batrachosioplastie*. A plastic operation for the cure of ranula by making an incision into the ranula and inserting a piece of the mucous membrane of the mouth. [Jobert (A, 385); E, 24.]

BATRACHOS (Lat.), n. m. Ba^{2}t(ba^{3}t)′ra^3-ko^{2}s(ch^{2}o^{2}s). See Rana and Ranula.

BATRACHOSIOPLASTIE (Fr.), n. Ba^3-tra^3-ko-si^2-o-pla^{3}s-te. See Batrachoplasty.

BATRACHOSPERMACEÆ [Rabenhorst], **BATRACHOSPERMEÆ** [Agardh], **BATRACHOSPERMIDÆ** [Lindley] (Lat.), n's f. pl. Ba^{2}t(ba^{3}t)-ra^3-ko(ch^{2}o^2)-spu^{5}rm(spe^{2}rm)-a(a^3)′se^2-(ke^2)-e(a^3-e^2), -spu^{5}rm(spe^{2}rm)′e^2-e(a^3-e^2), -i^{2}d-e(a^3-e^2). A family, division, or tribe of *Algœ* (*Chlorospermeœ, Confervaceœ, Vaucheriaceœ*), comprising *Batrachospermum* and other genera inhabiting fresh water and consisting of parallel, branched, filamentous rows of cells which increase by terminal growth and also by sexual reproduction. [B, 121, 170.]

BATRACHOSPERMUM (Lat.), n. n. Ba^{2}t(ba^{3}t)′′ra^3-ko(ch^{2}o^2)-spu^{5}rm(spe^{2}rm)′u^{3}m(u^{4}m). Fr., *batrachosperme*. A genus of *Algœ* belonging to the *Batrachospermeœ*, including several very gelatinous, dark-violet or black species. [B, 19.]—**B. moniliforme.** A species found in fresh-water rivulets, attached to stones or roots. [B, 19.]

BATRACHUS (Lat.), n. m. Ba^{2}t(ba^{3}t)′ra^3-ku^{3}s(ch^{2}u^{4}s). See Rana and Ranula.

BATRACIA (Lat.), n. n. pl. Ba^{2}t(ba^{3}t)-ra(ra^3)′si^2(ki^2)-a^3. See Batrachia.

BATRACIAN, n. Ba^{2}t-ra′si^2-a^{2}n. See Batrachian.

BATRACIEN (Fr.), adj. Ba^3-tra^3-si^2-a^{3}n^2. See Batrachian.

BATRACINE, n. Ba^{2}t′ra^3-sen. From *βάτραχος*, a frog. Fr., *batracine*. It., *batracina*. A milky secretion from the cutaneous and temporal glands of certain batrachians, especially a small species of *Phyllobates*; poisonous when inoculated into a wound, but harmless when swallowed. [A, 385; L, 44, 49.]

BATRACII (Lat.), n. m. pl. Ba^{2}t(ba^{3}t)-ra(ra^3)′si^2(ki^2)-i(e). See Batrachia.

BATRACIUS (Lat.), adj. Ba^{2}t(ba^{3}t)-ra(ra^3)′si^2(ki^2)-u^{3}s(u^{4}s). See Batrachian.

BATRACOPHIDES (Lat.), n. m. pl. Ba^{2}t(ba^{3}t)-ra^3-ko^{2}f′i^{2}d-ez(e^{2}s). See Batrachophides.

BATRACOSI (It.), n. Ba^3-tra^3-ko′se. See Ranula.—**B. sottolinguale.** Fr., *grenouillete diphthérique*. A swelling of the submaxillary and sublingual glands observed in a form of diphtheria supposed to be contracted from the fowl. [Cozzolino, "Giorn. internaz. delle sci. med.," "Ann. des. mal. de l'oreille," etc., Mar., 1882; De Marinis, "Giorn. internaz. delle sci. med.," iv, 5–6, p. 585.]

BATSALIKOORA (Teloogoo), n. The *Portulaca quadrifida*. [B, 172.]

BATSCHIA (Lat.), n. f. Ba^{3}t′shi^2-a^3. Of Gmelin, the genus *Lithospermum*; of Mönch, the genus *Eupatorium*; of Thunberg, the genus *Abuta*; of Vahl, the genus *Humboldtia*. [B, 121.]—**B. sericea** [Römer and Schultes]. The *Lithospermum sericeum*. [B, 214.]

BATTA, n. A Carib name for the *Cactus opuntia*. [B, 88.]

BATTAGLIA (It.), n. Ba^{3}t-ta^{3}l′yi^2-a^3. A village in Italy, near Abano and not far from Padua, near which there are sulphurous and ferruginous springs. [A, 385; L, 105.]

BATTALISMUS (Lat.), n. m. Ba^{2}t(ba^{3}t)-ta^{3}l-i^{2}z(i^{2}s)′mu^{3}s-(mu^{4}s). From *βατταρίζειν*, to stutter. Stuttering with inability to pronounce the aspirated *r*. [A, 322.]

BATTALOS, BATTALUS (Lat.), n's m. Ba^{2}t(ba^{3}t)′ta^{3}l-o^{2}s, -u^{3}s(u^{4}s). Gr., *βάτταλος*. A stutterer. [A, 322.]

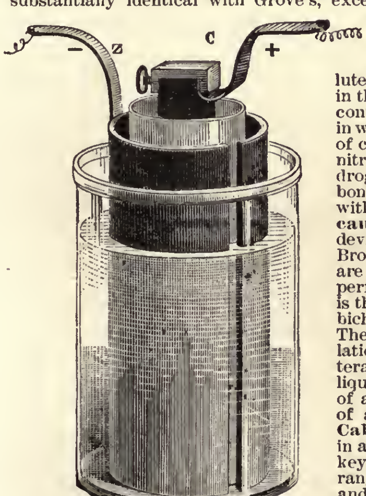
BATTANT (Fr.), n. Ba^{3}t-ta^{3}n^2. The valve of a shell; also the movable piece at the end of the plastron in certain chelonians. [L, 180.]

BATTARI, n. An East Indian name for the *Holcus sorghum*. [B, 121.]

BATTARISMUS (Lat.), n. m. Ba^{2}t(ba^{3}t)-ta^{3}r-i^{2}z(i^{2}s)'mu^{3}s-(mu^{4}s). Gr., *βατταρισμός* (from *βατταρίζειν*). Stuttering. [A, 322.] See PARAPHRASIA *præceps*.

BATTAROS, BATTARUS (Lat.), n's m. Ba^{2}t(ba^{3}t)'ta^{3}r-o^{2}s, -u^{3}s(u^{4}s). A stutterer. [L, 81.]

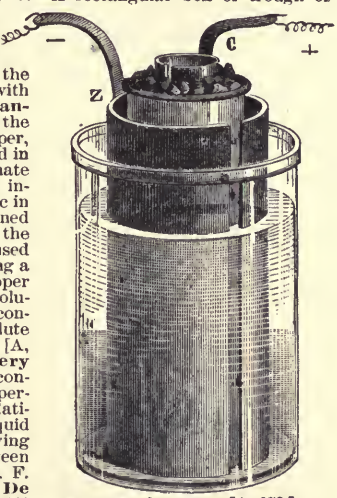
BATTATA (Lat.), n. f. Ba^{2}t(ba^{3}t)-ta(ta^3)'ta^3. See BATATAS.—**B. canadensis.** The Jerusalem artichoke. [B, 200.] See HELIANTHUS *tuberosus*.—**B. indica,** etc. [Ray]. The *Dioscorea pentaphylla.* [B, 211.]—**B. silvestris foliis smilacis nervosis,** etc. [Ray]. The *Dioscorea bulbifera.* [B, 211.]—**B. silvestris spinosa smilacis folio,** etc. [Ray]. The *Dioscorea aculeata.* [B, 211.]—**B. silvestris spinosa trifolia,** etc. [Ray]. The *Dioscorea triphylla.* [B, 211.]—**B. virginiana.** The potato. [B, 200.] See SOLANUM *tuberosum*.



BATTATAS (Lat.), n. f. Ba^{2}t(ba^{3}t)-ta(ta^3)'ta^{2}s(ta^{3}s). See BATATAS and BATTATA.

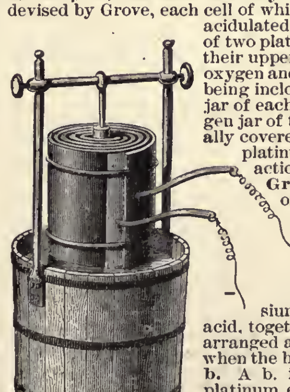
BATTA-VALLI [Rheede]. The *Cissampelos pareira.* [B, 121.]

BATTEMENT (Fr.), n. Ba^{3}t-ma^{3}n^2. See PULSATION.—**B's de Mayor.** The fœtal heart-sounds. [A, 385.]



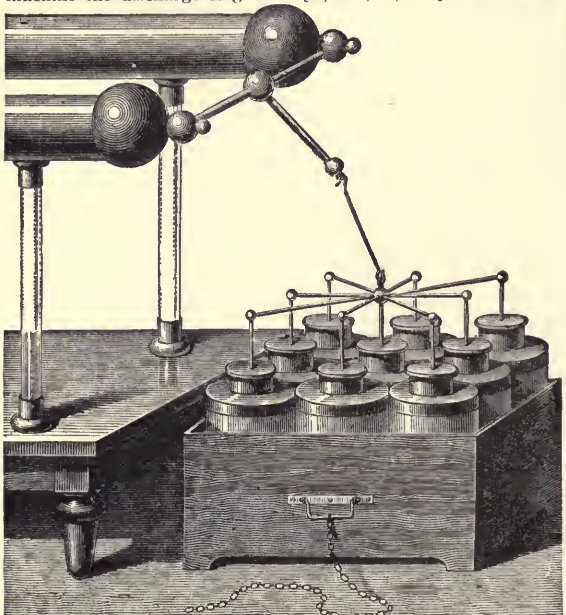
BATTERIE (Fr., Ger.), n. Ba^{3}t-te^{2}r-e, -e'. See BATTERY.—**B. à courants constants** (Fr.). See *Constant-current* BATTERY.—**B'strom** (Ger.). See *Battery* CURRENT.—**B. zur Galvanokaustik** (Ger.). See *Cautery* BATTERY.—**Cascadenb'** (Ger.). See *Cascade* BATTERY.—**Tauchb'** (Ger.). See *Plunge* BATTERY.

BATTERY, n. Ba^{2}t'te^{2}r-i^2. Fr., *batterie.* Ger., *Batterie.* It., *batteria.* Sp., *batería.* A series of similar electrical elements so interconnected that the combined action of all of them can be used simultaneously for the same purpose. [B.]—**Agglomerate Leclanché b.** A form of Leclanché's b. in which the carbon element is surrounded by plates of a special composition, secured around it with rubber bands. By adding plates, the internal resistance may be intensified. [A, 467.]—**B. current.** See under CURRENT.—**B. of Leyden jars.** See *Leyden-jar b.*—**B. resistance.** See under RESISTANCE.—**Bichromate b., Bichromate-of-potassium b.** A single-fluid or two-fluid zinc-carbon b. in which, in order to prevent the access of hydrogen bubbles to the carbon plates, potassium bichromate is added to the solution or to one of the solutions. For a single-fluid b., a saturated solution of the bichromate, made with boiling water, is added to dilute sulphuric acid. For a two-fluid b., the first solution may be made by dissolving 2 oz. of the bichromate in 20 oz. of hot water, and adding, when cold, 10 oz. of sulphuric acid. This addition causes the liquid to become warm again, and it should be allowed to cool before being used. The second solution is a saturated solution of sodium chloride. The bichromate solution is poured into the porous cup containing the carbon until it reaches to about ½ inch from the top: the salt solution is poured into the outer vessel containing the zinc until it reaches the same level. This form of b. is much used when a moderately powerful current is needed for a short time only. Its electro-motive force is said to be 2 volts. [A, 376; L. Clark (A, 464); A, 466.]—**Bunsen's b.** A b. of Bunsen's cells, substantially identical with Grove's, except that carbon is substituted for platinum.



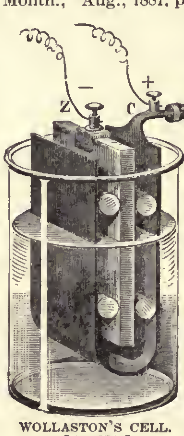
BUNSEN'S CELL. [A, 376.]

As usually constructed, the zinc element is a cleft cylinder immersed in dilute sulphuric acid. Within this there is a porous cup containing strong nitric acid, in which a rectangular prism of carbon is immersed. The nitric acid intercepts the hydrogen on its way to the carbon, and forms nitrous acid with it. [A, 376.]—**Byrne's cautery b.** A cautery b. devised by J. Byrne, of Brooklyn, in which the plates are of platinum and zinc, perforated, and the solution is the same as is used in the bichromate-of-potassium b. The tendency to an accumulation of hydrogen is counteracted by agitation of the liquid by forcing a current of air through it by means of a hand bulb. [A, 466.]—**Cabinet b.** A b. contained in a cabinet provided with a key-board on which are arranged a current-selector and usually a number of other devices for modifying the current employed, such as a commutator, a rheotome, a rheostat, etc., and commonly also an induction apparatus. [A, 466.]—**Callan's b.** A modification of Grove's b. in which platinized lead is substituted for platinum, and a mixture of sulphuric acid, nitric acid, and a saturated solution of potassium nitrate for nitric acid. [A, 284.]—**Cascade b.** Ger., *Cascadenbatterie.* A Leyden-jar b. in which the inner coating of the first jar is connected with the prime conductor of the machine, and its outer coating, insulated from the earth, is connected with the inner coating of the second jar, and so on to the last jar, the outer coating of the latter being connected with the earth. So called from the successive falls of potential from jar to jar. [A, 376.]—**Cautery b.** A galvanic b. constructed with special reference to the generation of a current of high quantity. The plates are very large and placed near each other, polarization being prevented by agitation of the liquid. The passage of such a current through a platinum wire or a piece of platinum (usually fashioned into an implement, such as a knife) heats the platinum, which is then used as a cautery. [A, 467.]—**Chloride-of-silver b.** A b. in which the elements are zinc and silver, chloride of silver in powder being placed in the bottom of each cell and a solution of common salt (1.752 grains to the gallon) poured over it. This form of b. is mostly used for purposes requiring a large number of cells. It is very constant in its electro-motive force. [W. De La Rue (A, 466).]—**Chromate-of-potassium b.** See *Bichromate-of-potassium b.*—**Constant b., Constant-current b., Constant voltaic b.** Fr., *batterie à courants constants.* 1. A b. in which the elements are permanently immersed, so that it is always ready for use. 2. A b. which, as compared with others, works for a long time without any considerable variation. 3. A galvanic b. as distinguished from an induction machine.—**Cruickshank's b.** A rectangular box or trough of charred wood, divided into compartments by partitions each consisting of a plate of zinc and a plate of copper soldered together, the compartments being filled with dilute acid. [A, 376.]—**Daniell's b.** A b. in which the elements are zinc and copper, the copper being immersed in a saturated solution of sulphate of copper contained in an inner porous cell, and the zinc in dilute sulphuric acid contained in an outer glass cup; or the glass vessel may be dispensed with, the copper plate being a cylindrical vessel of copper containing the saturated solution, and the porous cup containing the zinc and the dilute acid being placed within it. [A, 376, 467.]—**Dawson's cautery b.** A b. of two cells, each containing two plates of zinc, perforated, and a plate of platinum, the agitation of the liquid being accomplished by moving a frame up and down between the plates. Devised by B. F. Dawson, of New York.—**De La Rue's b.** A b. of 11,000 small chloride-of-silver cells;



DANIELL'S CELL. [A, 376.]

used for obtaining discharges in rarefied gases for experimental purposes. [A, 376.]—**Double-fluid b.** See *Two-fluid b.*—**Dry b.** A b. in which either no liquid is used, as in Zamboni's dry voltaic pile, or some such substance as sand, sawdust, or paper, moistened with acidulated water, separates the elements in each cell. [A, 376.]—**Electric b.** Fr., *batterie électrique.* Ger., *elektrische Batterie.* It., *batteria elettrica.* Sp., *batería eléctrica.* Any b. for generating electricity, more particularly a Leyden-jar b. (*q. v.*).—**Faradaic b.** A b. arranged to work an induction apparatus.—**Faure's b.** 1. A modification of Bunsen's b. in which the nitric acid is contained in the carbon element, which is made in the form of a bottle and closed with a carbon stopper. [A, 464.] 2. A modification of Planté's secondary b. in which the lead plates are coated with red lead.—**Fuller's b.** A b. of cells each of which consists of a porous cup containing mercury and water, in which the zinc element is immersed, placed in a large glass jar containing a carbon plate of large size and a saturated solution of potassium bichromate in dilute sulphuric acid; used chiefly for working an induction coil. [A, 467.]—**Galvanic b.** Fr., *batterie galvanique.* Ger., *galvanische Batterie.* It., *batteria galvanica.* Sp., *batería galvánica.* Any b. which generates galvanic electricity.—**Galvanic-cautery b., Galvano-cautery b.** See *Cautery b.*—**Gas b.** A b. devised by Grove, each cell of which consists of a vessel containing acidulated water in which the lower portions of two platinum plates are immersed, while their upper portions are surrounded, one by oxygen and the other by hydrogen, the gases being inclosed in inverted jars. The oxygen jar of each cell is connected with the hydrogen jar of the next cell. The plates are usually covered with a deposit of finely divided platinum to increase the rapidity of the action. [A, 376.]—**Gravitation b., Gravity b.** A two-fluid b. in which one solution floats on the other without the intervention of a diaphragm. [A, 467.] See *Hill's b.*—**Grenet's b.** A b. each cell of which contains two carbon plates immersed in a saturated solution of potassium bichromate in dilute sulphuric acid, together with a movable zinc plate so arranged as to be lifted out of the solution when the b. is not in use. [A. 467.]—**Grove's b.** A b. in which each cell consists of a platinum element immersed in nitric acid and a zinc element immersed in dilute sulphuric acid, the two liquids being separated by a porous cup. Its advantage is in its low resistance, but the fumes which it gives off are very objectionable. [A, 464, 467.] See also *Gas b.*—**Hare's b.** A b. of cells devised by Hare, of Philadelphia, characterized by low



HARE'S CELL. [A, 376.]

resistance. Two very large plates of zinc and copper are rolled on a cylinder of wood, and separated from each other with pieces of cloth or some indifferent substance. They are immersed in acidulated water. From the powerful heating effects obtained with this cell, it is called Hare's deflagrator. [A, 376.]—**Hill's b.** A zinc-copper gravity b. A copper plate rests on the bottom of the jar, in a saturated solution of sulphate of copper. A perforated disc of zinc is suspended in a solution of sulphate of zinc, the latter floating on the copper solution. [A, 467.]—**Leclanché's b.** A zinc-carbon b. in which the zinc element, in the form of a rod, is immersed in a solution of ammonium chloride contained in a glass jar, and the carbon plate, closely packed in a coarse powder of black oxide of manganese and powdered carbon, is contained in a porous cup placed in the jar. The packed porous cup is filled with water, and the top of the cell is closed with pitch. This b. is weak, but remains long available when used only for short periods at a time. [A, 463, 464, 466, 467.]—**Leyden b., Leyden-jar b.** A number of Leyden jars so connected that they can all be discharged at once. Usually the outer coatings are all connected with each other, and all the inner coatings with each other. The connection of the outer coatings is accomplished by placing the jars in compartments of a box lined with tin foil, and it is advisable that they should be freely connected with the earth by means of a chain attached to a gas-pipe or water-pipe. The inner coatings are connected by means of brass rods, and by connecting these rods with the conductor of the machine the discharge is given. [A, 376; B, 270.] For another

THE LEYDEN-JAR BATTERY. [A, 376.]

form of connection, see *Cascade b.*—**Magnetic b.** Fr., *batterie magnétique.* Ger., *magnetische Batterie.* It., *batteria magnetica.* Sp., *batería magnética.* A combination of horseshoe magnets. [B.]—**Marié-Davy b.** A b. of cells in which a carbon element is immersed in a paste of sulphate of mercury and water contained in a porous cup, and a zinc element is immersed in dilute sulphuric acid or a solution of sulphate of zinc. [A, 464.]—**Menotti's b.** A b. similar in arrangement to Hill's b., but with the two solutions separated by a layer of sawdust. [A, 464.]—**Nobili's b.** See *Thermo-electric* PILE.—**One-fluid b.** A b. in which both elements are immersed together in one liquid.—**Permanent b.** See *Constant b.* (2d def.).—**Piffard's cautery b.** A zinc-platinum b. devised by H. G. Piffard, of New York, in which the agitation of the liquid is accomplished by rocking the elements, which may be connected for either quantity or intensity. [A, 467.]—**Planté's b.** A secondary b. each cell of which contains two plates of lead rolled like the plates of Hare's b., and immersed in acidulated water. [A, 376.]—**Plunge b.** Ger., *Tauchbatterie.* A b. in which the plates are not constantly immersed, but are lowered into the liquid when the b. is to be used.—**Poggendorf's b.** A b. in which the form of the cell is similar to that of Bunsen's. The porous cup contains a carbon rod immersed in a mixture of 25 parts of sulphuric acid, 12 of potassium bichromate, and 100 of water, and the outer vessel contains a zinc rod immersed in a mixture of 12 parts of sulphuric acid and 1 part of water. [Niaudet (A, 466).]—**Sand b.** See *Dry b.* —**Sawdust b.** See *Dry b.* and *Menotti's b.*—**Secondary b.** Syn.: *storage b., galvanic accumulator.* A galvanic b. which has of itself no tendency to give forth a current, but is made capable of doing so when, after chemical action has gone on within it for a time, that action is reversed by the passage through it of a current from an ordinary b. The current (see *Secondary* CURRENT) which it is then capable of giving is in the reverse direction to that of the current from the ordinary b. employed, and is of short duration, but of very great quantity, so that a secondary b. charged from two or three of Grove's or Bunsen's cells (which answer best for the purpose) will for a short time produce effects greater than could be obtained directly by the use of many hundred cells. Its heating effect is remarkable, and it has been chiefly used in medicine as a cautery b. [A, 466; "Saturday Review," "Pop. Sci. Month.," Aug., 1881, p. 546.] See also *Planté's b.* and *Faure's b.* (2d def.).—**Siemens and Halske's b.** A modification of Daniell's b. The copper plate is placed at the bottom of the jar, immersed in a saturated solution of sulphate of copper. Over this there is a packing of *papier maché* on which the zinc plate rests, immersed in water. It is a very constant b. [A, 467.] —**Single-fluid b.** See *One-fluid b.*—**Smee's b.** A b. each cell of which contains two amalgamated zinc plates and, between them, a thin plate of silver having its surfaces covered with a deposit of rough platinum in powder, all being immersed in dilute sulphuric acid. [A, 464, 466, 467.]—**Storage b.** See *Secondary b.*—**Sulphate-of-copper b.** A b. in which one element is of copper immersed in a saturated solution of sulphate of copper, and the other of zinc immersed in water or a solution of chloride of sodium or sulphate of zinc. [A, 467.]—**Thermo-electric b.** See *Thermo-electric* PILE.—**Thomson's b.** A modification of Daniell's b. in which the copper element is in the form of a lining to the bottom of a leaden and wooden tray, over which a saturated solution of sulphate of zinc is poured, and the zinc element, in the form of a grating, rests upon blocks of wood placed in the tray. [A, 464; C. Maxwell (A, 466).]—**Tip b.** A b. in which the elements are immersed in the liquid or withdrawn from it by tipping the jar one way or the other.—**Trough b.** A general term for a class of batteries of which Cruickshank's is an example. —**Trouvé's b.** A modification of Grenet's b. in which the cells are of large size and the elements are raised and lowered by means of a windlass. [A, 467.]—**Two-fluid b.** A b. in which one element is immersed in one liquid and the other in another, the two liquids either being contained in separate receptacles or floating one upon the other. [A, 466.]—**Voltaic b.** Fr., *batterie voltaïque.* Ger., *voltaische Batterie.* It., *batteria voltaica.* See *Galvanic b.*—**Walker's b.** A modification of Smee's b. in which platinized carbon is substituted for platinized silver. [A, 467.]—**Wollaston's b.** A zinc-copper b. in which the zinc plate is suspended between the two portions of the copper plate folded about it, the two metals being separated by pieces of wood or cork. [A, 376.]—**Zinc-carbon b.** A b. in which one element is zinc and the other carbon.—**Zinc-copper b.** A b. in which one element is zinc and the other copper.

BATTI-SCHORIGERAM [Rheede], n. The *Urtica interrupta.* [B, 211.]

BATTISECULA (Lat.), n. f. Ba^{2}t(ba^{3}t)-ti^{2}-se^{2}k(sak)'u^{2}(u^{4})-la^{2}. See BAPTISECULA.

BATTITURA (Lat.), n. f. Ba^{2}t(ba^{3}t)-ti^{2}-tu^{2}(tu)'ra^{3}. Gr., λεπίς. Fr., *battiture.* A scale, or flake, of metal. [Ruland, Johnson (A, 325).]

BATTITURE (Fr.), n. Ba^{3}t-ti^{2}-tu^{6}r. See BATTITURA.—**B's de fer.** See IRON *trioxide.*

BATTLEDORE-SHAPED, adj. Ba^{2}t'tl-dor-shapd. See SPATULATE.

BATTOIDEÆ (Lat.), n. f. pl. Ba^{2}t(ba^{3}t)-to(to^{2})-i^{2}d(ed)'e^{2}-e-(a^{3}-e^{2}). 1. A family of the *Odonturidæ* established by Corda. 2. Of Milne-Edwards, the *Trilobitæ anormæ.* [L, 204.]

BATU (Ar.), n. The *Croton tiglium.* [L, 77, 105.]

BATUS (Lat.), n. m. and f. Ba(ba^{3})'tu^{3}s(tu^{4}s). Gr., βάτος. See RUBUS.

BÁTYÁLAKA (Sanscr.), n. The *Sida cordifolia.* [B, 181.]

BAU (Ger.), n. Ba^{3}'u. A construction, structure, fabric, texture. [A, 315.]

BAUCH (Ger.), n. Ba^{3}'uch^{2}. The belly. [A, 315.] See ABDOMEN.—**Aeussere B'wassersucht.** Serous effusion beneath the parietal peritonæum. [L, 80.]—**B'abscess.** An abdominal abscess. [L, 43.]—**B'adergeflecht.** The cœliac plexus. [L.]—**B'angst.** A feeling of oppression in the abdomen. [L.]—**B'aorta.** See *Abdominal* AORTA.—**B'aortengeflecht.** See *Aortic* PLEXUS.—**B'athmen.** Abdominal respiration. [L.]—**B'bedeckung.** See *B'decke.* —**B'berste.** The *Rhamnus frangula.* [L.]—**B'beschau.** An examination of the abdomen. [L, 43.]—**B'beschwerden.** Affections of the abdomen. [L, 46.]—**B'binde.** 1. An abdominal fascia or aponeurosis. [L, 115.] 2. An abdominal bandage. [L, 46.]—**B'binde der Wöchnerin.** See *Obstetric* BINDER.—**B'blasenschambeinspalte.** Fissure of the abdomen with exstrophy of the bladder. [E, 23.]—**B'blasenschnitt.** Suprapubic cystotomy. [L, 43.]—**B'bläsig.** Broken-winded (said of horses). [L, 46.]—**B'bläsigkeit, B'blass.** Broken-windedness, emphysematous dyspnœa. [L, 30, 46.]—**B'blatt.** See *Ventral* LAMINA.—**B'blattbingelkraut.** The *Mercurialis perennis.* [L, 80.]—**B'blume.** The genus *Lisianthus.* [L, 80.]—**B'bruch.** Ventral hernia. [E.] —**B'bruchband.** A truss or bandage for ventral hernia. [E.]—**B'brust.** See ALVITHORAX.—**B'brustfell.** The diaphragm. [L.] —**B'compresse.** An abdominal bandage. [L, 46.]—**B'congestion.** Abdominal hæmatocele. [L, 80.]—**B'darmbruch.** Ventral enterocele. [L, 135.]—**B'darmschnitt.** Abdominal enterotomy.—**B'decke.** A layer of the abdominal wall. [A, 315.]—

B'deckenarterie. The epigastric artery. [A, 315.]—**B'deckenblutadern, B'deckenvenen.** The epigastric veins. [A, 355.]—**B'deckung.** The abdominal wall. [A, 315.]—**B. des Kehlkopfs.** The sinus of the larynx. [L.]—**B'drüsen.** The mesenteric glands. [L, 80.]—**B'durchstich.** Paracentesis of the abdomen. [L, 80.]—**B'eingeweide.** The abdominal viscera. [L, 80.]—**B'eiterung.** A collection of pus in the abdomen. [L, 80.]—**B'empfängniss.** Abdominal gestation. [L, 30.]—**B'entzündung.** Abdominal inflammation. [L, 30.]—**B'euter.** An abdominal mammary gland. [L, 43.]—**B'fell.** The peritonæum. [A, 355.]—**B'fellabscess.** An abscess within the peritonæum. [E; L, 46.]—**B'fellbänder.** The peritoneal ligaments or bands. [L, 43.]—**B'fellblatt.** A layer of the peritonæum. [L, 59.]—**B'fellentzündung.** Peritonitis. [L, 80.]—**B'fellentzündung der Wöchnerinnen.** Puerperal peritonitis. [A, 355.]—**B'fellfalte.** A peritoneal fold. [L, 59.]—**B'fellgeschwulst.** Tympanites. [L, 80.]—**B'fellhaut.** The peritonæum. [L, 80.]—**B'fellsack.** The peritoneal sac. [L, 43.]—**B'fellsackwassersucht.** Ascites. [L, 80.]—**B'fellschwindsucht.** Peritoneal tuberculosis. [L, 80.]—**B'felltoilette.** See Toilet *of the peritonæum.*—**B'fellüberzug.** The peritoneal coat of an organ. [L, 115.]—**B'fieber.** See *Gastric* fever.—**B'finne.** See *B'flosse.*—**B'flechte.** The cœliac plexus. [L, 80.]—**B'flosse.** A ventral fin. [A, 315.]—**B'flosser.** The *Abdominalia*, a group of malacopterous fishes having abdominal fins. [L, 37, 147.]—**B'fluss.** Diarrhœa. [B, 48.]—**B'flüssig.** Diarrhœal. [L, 46.]—**B'förmig.** Belly-like; resembling a belly or a stomach. [L, 80.]—**B'füssler, B'füsser.** See Gasteropoda.—**B'gebärmutterschnitt.** Abdominal hysterotomy.—**B'geburt.** The removal of a fœtus or any product of conception by abdominal section. [L, 135.]—**B'geflecht.** The cœliac plexus. [L, 115.]—**B'gegend.** The abdominal region. [A, 315.]—**B'gehirn.** Lit., the abdominal brain; the solar plexus. [L, 115.]—**B'geschwulst.** A swelling or tumor of the abdomen. [A, 355.]—**B'glieder.** The abdominal limbs. [A, 315.]—**B'grimmen.** Colic, griping. [A, 315, 355.]—**B'gurt, B'gürtel.** An abdominal belt or bandage. [L, 135.]—**B'haut.** 1. The peritonæum. [L, 30.] 2. See Membrana *reuniens inferior.*—**B'hautmuskel.** The cutaneus maximus muscle of the solipeds. [L, 44.]—**B'hautwassersucht.** Ascites. [L, 80.]—**B'herzbruch.** A displacement of the heart into the abdominal cavity. [L, 80.]—**B'höhle.** The abdominal cavity. [L, 80.]—**B'höhlenschwangerschaft.** Abdominal gestation. [L, 135.]—**B'höhlenwindsucht.** Tympanites. [L, 30.]—**B'husten.** A cough dependent on gastric or abdominal derangement. [L, 80.]—**B'ig.** In botany, ventricous. [B.]—**B'klopfen.** Abdominal pulsation. [L, 80.]—**B'kneipen, B'krampf.** Colic, spasmodic abdominal pain. [L, 80.]—**B'krebse.** See Cirripedia.—**B'lage.** The prone posture.—**B'linie.** An abdominal line. See *Weisse B'linie.*—**B'luftwassersucht.** A collection of gas and ascitic liquid in the abdominal cavity. [L, 80.]—**B'lungenbruch.** A displacement of the lung into the abdominal cavity. [L, 80.]—**B'mündung.** An abdominal orifice. [L, 115.]—**B'mündung des Eileiters.** The abdominal opening of the oviduct. [L, 115.]—**B'mündung des Magens.** The pyloric orifice of the stomach. [A, 315.]—**B'muskel.** An abdominal muscle. [A, 315.]—**B'muskelscheide.** The sheath of the rectus abdominis muscle. [L, 43.]—**B'muskelscheidenwassersucht.** A collection of watery liquid in the sheath of the rectus abdominis muscle. [L.]—**B'muskelschmerz.** Pain in the abdominal muscles. [L, 80.]—**B'nabel.** The umbilicus. [L, 59.]—**B'naht.** 1. Suture of an abdominal wound. [A, 315.] 2. In botany, the ventral suture of a carpel. [B.]—**B'nervengeflecht.** The solar plexus.—**B'nervenkrank.** Hypochondriac. [L, 46.]—**B'nervenkrankheit, B'nervenübel.** Hypochondriasis. [L, 46.]—**B'netzbruch.** An omental hernia. [L, 135.]—**B'öffnung.** Laparotomy. [L, 135.]—**B'pilze.** The *Gasteromycetes.* [B.]—**B'platten.** The visceral plates of the embryo. See *Lateral mesoblastic* plates.—**B'presse.** 1. Pressure upon the abdominal contents, especially by straining or bearing down. [K, 16.] 2. An abdominal tourniquet. [B, 270.]—**B'prophet.** A ventriloquist. [A, 355.]—**B'pulsader.** The cœliac artery. [A, 355.]—**B'raum.** The abdominal cavity. [L, 59.]—**B'reden.** Ventriloquism. [L. 135.]—**B'redner.** A ventriloquist. [A, 355.]—**B'rednerei, B'rednerkunst.** Ventriloquism. [A, 315.]—**B'region.** See *B'gegend.*—**B'ring.** The abdominal (inguinal) ring. [L, 80.]—**B'ringbruch.** Inguinal hernia. [L, 30.]—**B'scheidenschnitt.** See Laparo-elytrotomy.—**B'schild.** The plastron of a chelonian. [L, 43.]—**B'schlagadergeflecht.** The cœliac plexus. [L, 80.]—**B'schmerz.** Abdominal pain. [A, 315.]—**B'schnitt.** Laparotomy. [A, 355.]—**B'schwamm.** See Gasteromyces.—**B'schwangerschaft.** Abdominal gestation. [L, 57.]—**B'schwindel.** Stomachic vertigo. [L, 59.]—**B'schwindsucht.** Abdominal phthisis. [L, 80.]—**B'seitengegend.** The lumbar region. [L, 80.]—**B'seitenweiche.** The hypochondrium. [L. 80.]—**B'sonde.** A large jointed probe. [A, 319.]—**B'spalte.** A fissure of the abdominal wall. [Marchand (A, 319).]—**B'speichel.** Lit., abdominal saliva; the pancreatic secretion. [L, 115.]—**B'speicheldrüse.** The pancreas. [L, 115.]—**B'speicheldrüsenarterie.** The pancreatic artery. [A, 355.]—**B'speicheldrüsenentzündung.** Inflammation of the pancreas. [L, 43.]—**B'speicheldrüsengang.** The pancreatic duct. [L, 59.]—**B'speicheldrüsengefässe.** The blood-vessels of the pancreas. [L, 43.]—**B'speicheldrüsenkopf.** The head of the pancreas. [L, 59.]—**B'speicheldrüsensaft.** The pancreatic secretion. [K.]—**B'speicheldrüsenschwanz.** The tail of the pancreas. [L, 59.]—**B'speicheldrüsenschwindsucht.** Pancreatic phthisis. [L, 43.]—**B'speicheldrüsenvenen.** The pancreatic veins. [L, 80.]—**B'speicheldrüsenverstopfung.** Vascular distension and stasis of the pancreas. [A, 322.]—**B'speicheldrüsenzwölffingerdarmarterie.** The pancreatico-duodenal artery. [A, 355.]—**B'speichelfluss.** Vomiting of pancreatic secretion. [L, 80.]—**B'sprecher.** A ventriloquist. [A, 355.]—**B'stecher.** A trocar for paracentesis of the abdomen. [E.]—**B'steinschnitt.** Suprapubic lithotomy. [A, 355.]—**B'stich.** Paracentesis of the abdomen. [E.]—**B'theil.** The abdomen. [L, 204.]—**B'thiere.** See Cœlenterata.—**B'troikar.** See *B'stecher.*—**B'wand, B'wandung.** The abdominal wall.—**B'wassersucht.** Ascites. [A, 355.]—**B'wassersüchtig.** Ascitic. [L, 80.]—**B'weh.** Colic. [A, 355.]—**B'weichflosser.** See *B'flosser.*—**B'windgeschwulst, B'windsucht.** Tympanites. [L, 80.]—**B'windsüchtig.** Tympanitic. [L, 46.]—**B'wirbel.** A lumbar vertebra. [L, 115.]—**B'wirbelnerven.** The lumbar nerves. [L, 43.]—**B'wunde.** An abdominal wound. [A, 315.]—**B'wurm.** An intestinal worm. [L, 43.]—**B'zwang.** Intestinal tenesmus. [A, 315.]—**B'zwerchfellbruch.** Diaphragmatic hernia. [L, 80.]—**Eiterb'wassersucht.** A collection of pus and ascitic liquid in the peritonæum. [L.]—**Gerade B'binde.** The fascia of the rectus abdominis muscle. [L. 43.]—**Gerader B'muskel.** The rectus abdominis muscle. [A, 355.]—**Grosser B'fellsack.** The greater cavity of the peritonæum. [L, 115.]—**Halbe B'lage.** The semi-prone posture.—**Hängeb'.** See *Pendulous* abdomen.—**Hängende B'blume.** The *Lisianthus pendulus.* [L, 80.]—**Kleiner B'fellsack.** The lesser cavity of the peritonæum. [L, 115.]—**Kleiner B'wurm.** The *Oxyuris vermicularis.* [L, 43.]—**Mittelb'gegend, Mittlere B'gegend.** The umbilical region. [A, 315; L, 37.]—**Oberb'gegend, Obere B'gegend.** The epigastrium. [L, 43.]—**Oberflächliche B'wassersucht.** See *Aeussere B'wassersucht.*—**Parietales B'fell.** The parietal peritonæum. [L.]—**Pyramidenförmiger B'muskel.** The pyramidalis muscle. [A, 355.]—**Quere B'binde.** The fascia transversalis. [L, 43.]—**Querer (oder Quergelegener) B'muskel.** The transversalis abdominis muscle. [A. 355.]—**Schiefe B'muskeln.** The oblique muscles of the abdomen. [A, 355.]—**Schildblumenartige B'blume.** The *Lisianthus chelonioides.* [L. 80.]—**Schmeerb'.** The abdomen. [L, 46.]—**Schräge B'muskeln.** See *Schiefe B'muskeln.*—**Sehr breite B'blume.** The *Lisianthus amplissimus.* [L, 80.]—**Unterb'gegend, Untere B'gegend.** The hypogastrium. [A, 315; L, 37.]—**Unterer B.** The abdomen. [A, 355.]—**Viereckiger B'muskel.** The quadratus lumborum muscle. [A, 355.]—**Viscerales B'fell.** The visceral peritonæum. [L.]—**Weisse B'linie.** The linea alba. [L, 80.]

BAUCHAN, n. See Bauchee.

BAUCHE (Fr.), n. Bosh. See La Bauche.

BAUCHEE, n. A name applied in India to the seeds of the *Psoralea corylifolia*; used as a tonic and in skin diseases. [A, 247; B, 275.]

BAUCIA (Lat.), n. f. Ba^{4}'(ba^{3}'u^{4})-si^{2}-ki^{2}-a^{3}. The *Pastinaca sativa.* [B, 211.]

BAUDA, n. See Bayda.

BAUDOT (Fr.), n. Bo-do. A warm spring in the Pyrenees containing sodium sulphide. [L, 57.]

BAUDRIER DE NEPTUNE (Fr.), n. Bo-dri^{2}-a d' Ne^{2}p-tu^{6}n. A common name for the *Laminaria saccharina* and other *Algæ* with large fronds. [B, 121.]

BAUDRUCHE (Fr.), n. Bod-ru^{6}sh. Goldbeater's skin. [A, 385.]—**B. gommée** [Fr. Cod.]. Court-plaster spread on goldbeater's skin, and with the balsamic ingredients omitted. [A, 259.]

BAUERA (Lat.), n. f. Ba^{3}'u-e^{2}-ra^{3}. A genus of Australian evergreen saxifragaceous shrubs established by Banks. [B, 121.]

BAUERACEÆ (Lat.), n. f. pl. Ba^{3}-u-e^{2}r-a(a^{3})'se^{2}(ke^{2})-e(a^{3}-e^{2}). Of Lindley, an order of the saxal alliance, corresponding to the *Bauereæ* (*q. v.*). [B, 170.]

BAUEREÆ (Lat.), n. f. pl. Ba^{3}-u-e(a)'re^{2}-e(a^{3}-e^{2}). Of De Candolle, a tribe of saxifragaceous plants comprising the single genus *Bauera.* [B, 214.]

BAUERNDILL (Ger.), n. Ba^{3}'u-e^{2}rn-di^{2}l. The *Meum athamanticum.* [A, 315.]

BAUERNEPPICH (Ger.), n. Ba^{3}'u-e^{2}rn-e^{2}p-pi^{2}ch^{2}. The *Apium graveolens.* [B.]

BAUERNFENCHEL (Ger.), n. Ba^{3}'u-e^{2}rn-fe^{2}n^{2}-ch^{2}e^{2}l. The *Peucedanum officinale.* [A, 315.]

BAUERNHYGROMETER (Ger.), n. Ba^{3}'u-e^{2}rn-hu^{6}-gro-ma''-te^{2}r. The seeds of the *Avena fatua*; so called because they curl up in dry weather, and straighten out in damp weather. [L, 30.]

BAUERNKIRSCHE (Ger.), n. Ba^{3}'u-e^{2}rn-kersh-e^{2}. A popular name for the *Prunus padus* and the *Prunus avium.* [A, 315.]

BAUERNKRAUT (Ger.), n. Ba^{3}'u-e^{2}rn-kra^{3}-ut. The *Ledum palustre.* [A, 315.]

BAUERNKRESSE (Ger.), n. Ba^{3}'u-e^{2}rn-kre^{2}s-se^{2}. The *Thlaspi arvense.* [B, 180.]

BAUERNLÖFFEL (Ger.), n. Ba^{3}'u-e^{2}rn-lu^{5}f-fe^{2}l. The *Drosera rotundifolia.* [A, 259.]

BAUERNPFLAUME (Ger.), n. Ba^{3}'u-e^{3}rn-pfla^{3}-u-me^{2}. The *Prunus spinosa.* [L, 46.]

BAUERNRHABARBER (Ger.), n. Ba^{3}'u-e^{2}rn-ra^{3}-ba^{3}rb-e^{2}r. The *Euphorbia cyparissias.* [B, 180.]

BAUERNSCHMINKE (Ger.), n. Ba^{3}'u-e^{2}rn-shmi^{2}n^{2}k-e^{2}. The *Lithospermum arvense.* [B, 180.]

BAUERNSENF (Ger.), n. Ba^{3}'u-e^{2}rn-ze^{2}nf. 1. The *Thlaspi arvense.* [B, 180.] 2. The *Iberis semperflorens.* [L, 46.] 3. The *Raphanus raphanistrum.* [L, 30.]

BAUERNTABAK (Ger.), n. Ba^{3}'u-e^{2}rn-ta^{3}-ba^{3}k. The *Nicotiana rustica.* [B, 180.]

BAUERNTHRAN (Ger.). n. Ba^{3}'u-e^{2}rn-tra^{3}n. Crude codliver oil. [T. Husemann (L, 57).]

BAUERNWETZEL (Ger.), n. Ba^{3}'u-e^{2}rn-ve^{2}tz-e^{2}l. The mumps. [L, 30.]

BAUHINIA (Lat.), n. f. Bo-hi^{2}n'i^{2}-a^{3}. Fr., *bauhinie.* A genus of leguminous plants of the tribe *Bauhinieæ*, established by Plumier. It includes many species, all tropical, and the following sections, often regarded as distinct genera: 1. *Pauletia* (including *Perlebia* and *Amaria*, regarded by Baillon as distinct sections). 2. *Casparia.* 3. *Pileostigma.* 4. *Lysiphyllum.* 5. *Phanera* (the sec-

tion *Symphyopoda* of De Candolle). 6. *Lasiobema*. 7. *Loxocalyx*. 8. *Adenolobus*. 9. *Schinella* (the *Caulotretus* of De Candolle, the *Tylotia* of Vogel, and the *Lacara* of Sprengel). [B, 19, 42, 121.]—**American b.** See Bois *à caleçons*.—**B. abyssinica** [Richard]. See *B. articulata*.—**B. aculeata** [Velloz]. See *B. forficata*.—**B. acuminata** [Linnæus]. Fr., *bauhinie à aiguillons, ébenier de montagne*. Mountain ebony; a small tree growing throughout India, the East Indies, and China, and cultivated in all tropical countries. It is said to have the same properties as the *B. variegata*, and in the West Indies the flowers are employed as a laxative and used by the negroes in religious ceremonies. A decoction of the root is used as an anthelminthic and carminative. [B, 181, 183, 212.]—**B. adansoniana** [Guillemin, Perottet]. An imperfectly known species growing in upper Guinea. The negroes are said to make cordage from the bark. [B, 173, 250.]—**B. anguina** [Roxburgh]. Syn.: *B. scandens* [Linnæus], *Lasiobema anguina* [Miquel] (et *Horsfieldii* [Miquel]). A glabrous climbing shrub growing in eastern Bengal, Burmah, and the East Indies. It grows to a great height upon trees, enveloping them like a coil of rope. It is said to furnish a gum which can be employed as a substitute for gum arabic in making ink. The *B. scandens* of Linnæus, which has been identified with this species, is the *daun lolab mubut* of the Moluccas (*i. e.*, "the plant which opens the mouth," because the leaves, broken before the mouths of babies learning to talk, are supposed by the natives to facilitate the acquisition of speech). According to Rumphius, a decoction of the root is used as an antipyretic. [H. Baillon (B, 46): B, 173, 212.]—**B. articulata** [De Candolle]. Syn.: *Locellaria bauhinioides* [Welwitsch]. A spreading tree, with tomentose or pubescent branches, coriaceous leaves, and whitish or rose-colored flowers, growing throughout tropical Africa. The bark is used in making cordage and as an astringent in chronic dysentery, and the leaves furnish a sort of gum. [B, 173, 250, 267.]—**B. Buchanani** [Desvaux]. See *B. diphylla*.—**B. candida.** 1. Of Aiton, the *B. acuminata*. 2. Of Roxburgh, the *B. variegata*. [B, 212.]—**B. coromandeliana** [De Candolle]. See *B. purpurea* (1st def.).—**B. diphylla** [Hamilton]. Syn.: *Phanera diphylla* [Bentham]. A glabrous climbing shrub found in the south of Asia, the bark of which furnishes a textile fibre. [B, 172, 212.]—**B. divaricata.** 1. Of Linnæus, a species growing in tropical America. 2. Of Lamarck. See *B. lamarckiana*. [B, 214.]—**B. esculenta** [Burchard]. A species growing at the Cape of Good Hope, the root of which is edible. [B, 180.]—**B. forficata** [Link]. A species growing in Brazil, where it is used as a demulcent. [B, 214.]—**B. inermis** [Schimper]. See *B. articulata*.—**B. lamarckiana** [De Candolle]. Syn.: *B. divaricata* [Lamarck] (seu *retusa* [Poiret]). A species growing in tropical America, armed with needles which exude a saccharine substance. [B, 88, 214.]—**B. lingua** [De Candolle]. Syn.: *B. scandens* [Linnæus] (in part). A climbing shrub of the Moluccas and Amboyna, where the leaves are eaten. [B, 180, 214.]—**B. macrostachya** [Wallich]. Syn.: *B. scandens* [Roxburgh], *Phanera macrostachya* [Bentham]. A glabrous climbing shrub found in Silhet and Assam. [B, 212.]—**B. microstachys.** The *cipo de escada*; a Brazilian species, the leaves of which are mucilaginous and employed as a demulcent. [H. Baillon (B, 46).]—**B. parviflora** [Vahl]. See *B. racemosa*. [B, 212.]—**B. porrecta** [Swartz]. Fr., *bois à barrique*. A small tree growing in Central America, Mexico, and the West Indies, where it is employed medicinally. [B, 60, 180.]—**B. purpurascens.** The purplish variety of *B. variegata* (= *B. purpurea* [Wallich]). [B, 172.]—**B. purpurea.** 1. Of Linnæus (the *Phanera purpurea* of Bentham), an erect tree of medium size found in India, Ceylon, and China; employed medicinally like *B. variegata*. 2. Of Wallich, the *B. acuminata* and *B. variegata*. [B, 212.]—**B. pyrrhocarpa** [Hochst.]. See *B. articulata*.—**B. racemosa.** 1. Of Lamarck, a small bushy tree with drooping branches (the *Pileostigma racemosa* of Bentham) found in the Punjab, Ceylon, Pegu, the East Indies, and China. The bark furnishes a fibre used in making strong ropes. 2. Of Vahl, the *B. Vahlii*. [B, 172, 212.]—**B. reticulata** [Guillemin, Perottet]. See *B. articulata*.—**B. retusa.** See *B. lamarckiana*.—**B. rufescens** [Lamarck]. Fr., *bauhinie rougeâtre*. An African species differing only slightly from the *B. racemosa*. [B, 212.]—**B. scandens.** 1. Of Linnæus, the *B. anguina* and *B. lingua*. 2. Of Roxburgh, the *B. macrostachya*. [B, 212.]—**B. speciosa** [Roxburgh]. See *B. tomentosa*.—**B. spicata** [König]. See *B. racemosa*.—**B. tamarindacea** [Delile], **B. Thönningii** [Schumann]. See *B. articulata*.—**B. timoriensis.** [Decaisne]. See *B. racemosa*.—**B. tomentosa** [Linnæus]. Fr., *bauhinie cotonneuse, bois bacha* (ou *à caleçons*). St. Thomas's tree; a species growing in India, Ceylon, the East Indies, China, and tropical Africa; an erect shrub with pubescent branches bearing hairy leaflets and pale-yellow crimson-spotted flowers. The dried leaves and buds are used in dysentery, and a decoction of the root-bark is employed as an anthelminthic and as a remedy for hepatic disorders. [B, 19, 172, 212.]—**B. triandra** [Roxburgh]. See *B. purpurea* (1st def.).—**B. Vahlii** [Wight and Arnott]. Syn.: *B. racemosa* [Vahl], *Phanera Vahlii* [Bentham]. The Maloo climber; a gigantic climbing shrub with pubescent branches and racemes of white flowers, growing in India. It frequently reaches a length of 300 feet, climbing to the tops of tall trees and often causing their death by strangulation. The seeds are eaten raw; ropes are made from the bark; and the leaves, almost a foot in diameter, composed of two connate ovate-cordate leaflets, are used for making plates and for wrapping packages. [B, 19, 172, 212.]—**B. variegata** [Linnæus]. Fr., *bauhinie panachée*. Syn.: *Phanera variegata* [Bentham]. Mountain ebony; a tree about 20 feet high, growing in India, the East Indies, and China, and introduced thence into the West Indies, bearing bifoliate leaves with connate broadly ovate leaflets and rose-white flowers disposed in pairs. The wood is of a dark color and is called ebony. The bark is regarded by the Hindoos as tonic, astringent, and alterative, and is used in scrofula, ulcers, cutaneous affections, and fevers, also in tanning and dyeing. The dried buds are eaten and are used as an astringent in diarrhœa and as an anthelminthic. [B, 19, 172, 181.]

BAUHINIE (Fr.), n. Bo-i^{2}n-e. See BAUHINIA.—**B. à aiguillons.** See BAUHINIA *acuminata*.—**B. cotonneuse.** See BAUHINIA *tomentosa*.—**B. panachée.** See BAUHINIA *variegata*.—**B. rougeâtre.** See BAUHINIA *rufescens*.

BAUHINIEÆ (Lat.), n. f. pl. Bo-hi^{2}n-i(i^2)′e^2-e(a^3-e^2). Fr., *bauhiniées*. Of Bentham, a tribe of leguminous plants including *Bauhinia* and two other genera. [B, 42.]

BAUHINIOIDES (Lat.), adj. Bo-hi^{2}n-i^2-o(o^2)-i(e)′dez(das). Resembling the genus *Bauhinia*; a botanical species-name. [B.]

BAUL, n. An alchemical name for urine. [Ruland, Johnson (A, 325).]

BAULDMONEY, n. Ba^{4}ld′mu^{3}n-e^2. See BAWDMONEY.

BAUNIA, n. See Baaya.

BAUNOS (Lat.), n. m. Ba^{4}n'(ba^3'un)-o^{2}s. Gr., βαῦνος, βαυνός. A furnace. [A, 322.]

BAUNSCHEIDTISM, n. Ba^3'un-shit-i^{2}zm. A method of counter-irritation by means of an instrument invented by a person named Baunscheidt; formerly much in vogue in Germany. Over one end of a short tube was stretched a piece of chamois saturated with an irritant oil. This end of the tube was applied to the part of the body to be acted on, and a number of needles contained in the tube were forced through the chamois and into the skin by the action of a spring. [A, 304.]

BAUNUS (Lat.), n. m. Ba^{4}n'(ba^3'un)-u^{3}s(u^{4}s). See Baunos.

BAURAC, BAURACH, n's. 1. Alchemical names for borax. [B, 50.] 2. See Anatron.

BAURACON (Fr.), n. Bo-ra^3-ko^{2}n^2. Borax. [A, 259.]

BAURCHEE, n. See Bauchee.

BAURIN (Fr.), n. Bo-ra^{2}n^2. A place in France, where there is a mineral spring. [L, 105.]

BAUSCH (Ger.), n. Ba^3'ush. A compress, roll, pledget. [A, 315.]—**B'beere.** The *Vaccinium uliginosum.* [A, 355.]—**B'muskel des Halses.** The splenius colli muscle. [A, 355.]—**B'muskel des Kopfs.** The splenius capitis muscle. [A, 355.]

BAUSCHE (Ger.), n. Ba^3'ush-e^2. See Plaga.

BÄUSCHCHEN (Ger.), n. Boish'ch^{2}e^{2}n. A little pad, a dossil. [L, 43.]

BAUSCHEN (Ger.), v. intr. Ba^3'ush-e^{2}n. To swell. [A, 315.]

BAUZON (Fr.), n. Bo-zo^{2}n^2. A village in France, where there are mineral springs. [L, 105.]

BAVA, n. A Malabar name for the *Cassia fistula.* [B, 121.]

BAVANA, n. An obsolete form of *banana* (*q. v.*). [B, 121.]

BAVANG, BAVANGMIRA, n's. A tree of the Moluccas with seeds having the taste of garlic. [B, 121.]

BAVASIMA, BAVASINGA, BAVASINGUA, n's. Malabar names for the *Cassia fistula* (*alata*) and its fruit. [B, 121.]

BAVAY-BAVAY, n. A name given to the *Quisqualis indica* in the Philippine Islands. [B, 121.]

BAVE (Fr.), n. Ba^{3}v. Slime, slaver; a profuse flow of saliva, especially that of a rabid animal. [A, 385.]

BAVENG, n. See Bavang.

BAVÉOLE (Fr.), n. Ba^3-va-ol. The *Centaurea cyanus.* [B, 121.]

BAVÈQUE (Fr.), n. Ba^3-ve^{2}k. The *Blennius pholis.* [A, 385.]

BAVERA, n. Fr., *bavère.* See Bauera.

BAVEU, n. A North Queensland name for the *Cycas medica.* [B, 121.]

BAVEULE (Fr.) n. Ba^3-vu^{5}l. See Bavéole.

BAVEUSE (Fr.), n. Ba^3-vu^{5}z. The *Blennius pholis.* [A. 385.]

BAVEUX (Fr.), adj. Ba^3-vu^5. Soft, flabby, secreting sero-pus, and indisposed to heal (said of wounds). [A, 301.]

BAWANG, n. See Bavang.

BAWCHEE-SEED, n. See Bauchee.

BAWDMONEY, n. Ba^{4}d'mu^{3}n-i^2. The *Meum athamanticum.* [B, 19.]

BAWME, n. Ba^{4}m. The *Melissa officinalis.* [B, 275.] See Balm.

BAXANA, n. A tree of Ormus, reputed to be poisonous. [Bory (B, 121).]

BAXTERA (Lat.), n. f. Ba^{2}x'te^{2}r-a^3. Fr., *baxtère.* A genus of asclepiadaceous shrubs of Brazil. [B, 19.]

BAY, n. Ba. A name applied to several trees, particularly to the *Laurus nobilis.* [B, 19.]—**American rose-b.** The *Rhododendron*, especially the *Rhododendron maximum.* [B, 34.]—**B.-berries.** See *B.-fruit.*—**B'berry.** See the major list.—**B.-cherry.** See *B.-laurel.*—**B. essence.** See *Spiritus* myrciæ.—**B.-fruit.** Lat., *fructus lauri* [Ger. Ph.]. Fr., *fruit de laurier* [Fr. Cod.]. Ger., *Lorbeeren* [Ger. Ph.]. The fruit of the *Laurus nobilis* (*q. v.*). [B.]—**B.-galls.** See *Red b.*—**B.-laurel.** The *Laurus nobilis.* [B, 275.]—**B.-leaved.** See Laurifolius.—**B.-leaves.** Lat., *folia lauri.* Fr., *feuilles de laurier commun* [Fr. Cod.]. Sp., *hojas de laurel.* The leaves of the *Laurus nobilis* (*q. v.*). [B.]—**B.-oak.** The *Quercus sessiliflora.* [B, 275.]—**B.-oil.** See *Oil of b.*—**B.-rum.** See *Spiritus* myaciæ.—**B. salt.** See under Salt.—**B. sore.** See under Sore.—**B.-spirit.** See *Spiritus* myrciæ.—**B.-tree.** 1. The *Laurus nobilis.* 2. In America, the *Magnolia glauca.* [B, 19.] See Laurus.—**B.-willow.** 1. The *Salix pentandra.* 2. The *Epilobium angustifolium.* [B, 275.]—**Catawba rose-b.** The *Rhododendron catawbiense.* [B, 34.]—**Dwarf b.-tree.** The *Daphne laureola* and the *Daphne mezereum.* [B, 275.]—**East Indian b.** The *Persea indica.* [B, 275.]—**East Indian rose-b.** The *Tabernœmontana coronaria.* [B, 275.]—**Indian b.** The *Laurus indica.* [B, 19.]—**Lapland b.** The *Rhododendron lapponicum.* [B, 34.]—**Loblolly-b.** The *Gordonia lasianthus.* [B, 19.]—**Madeira b.** The *Laurus fœtens.* [B, 275.]—**Mountain-b.** The *Gordonia pubescens.* [B, 75.]—**Oil of b.** Lat., *oleum lauri* [Ger. Ph.], *oleum e fructu lauri* [Fr. Cod.]. Fr., *huile de laurier* [Fr. Cod.]. Ger., *Lorbeeröl* [Ger. Ph.]. Sp., *aceite de laurel.* 1. The oil of the *Laurus nobilis* (*q. v.*). 2. See *Oil of* myrcia. [B.]—**Poison b.** The *Illicium floridanum.* [B, 19.]—**Red b.** The *Persea.* [B, 75.]—**Rose-b.** 1. The *Epilobium angustifolium.* 2. The *Nerium oleander.* 3. The *Rhododendron.* [B, 19, 34.]—**Royal b.** See *Indian b.*—**Spotted b.** The *Aucuba japonica*, var. *maculata.* [B, 19.]—**Sweet b.** See *B.-tree.*—**White b.** The *Magnolia glauca.* [B, 34.]—**Willow-b's.** The *Salix pentandra.* [B, 275.]

BAYA, n. A Carib name for the *Crescentia cujete.* [B, 121.]

BAYBERRY, n. Ba'be^{2}r-ri^2. The *Myrica cerifera* (*q. v.*). [B, 34.]—**B.-bark.** See Myrica *cerifera.*—**B.-bush.** See *B.*—**B. tallow.** See Myrtle *wax.*—**B.-tree.** The *Pimenta acris.* [B, 19.]

BAYCRURU, BAYCURU, n's. The *Statice brasiliensis* or its root. [B, 270; "Proc. of the Am. Pharm. Assoc.," xxvii. p. 153.]

BAYDA, n. An alchemical name for a vessel used in distillation. [Ruland (A, 325).]

BAYEBERRY. See Bayberry.

BAYEUX (Fr.), n. Ba^3-i^2-u^5. A village in France, where there are chalybeate springs. [L, 105.]

BAYKURU, n. See Baycuru.

BAYL, n. See Baul.

BAYLA, n. An antidysenteric remedy prepared from the bael (*Ægle marmelos*). [B, 121.]

BAYMAROUM (Ar.), n. The root of the *Nymphœa lotus.* [L, 105.]

BAYNILLA (Sp.), n. Ba^3-e-nel'ya^3. See Bainilla and Vanilla.

BAY-ROUA, n. A Carib name for the seeds of the *Mimosa inga.* [B, 121.]

BAY-THATCH, n. Ba'tha^{2}ch. A Jamaica name for the *Thrinax pumilio.* [B, 121.]

BAYUGO, n. The *Mimosa scandens.* [L, 105.]

BAZA (Sp.), n. Ba^3'th^{2}a^3. A village in Spain, where there is a mineral spring. [L, 105.]

BAZARA (Ar.), n. The *Plantago pulicaria.* [B, 121.]

BAZARI-CHICHEN (Ar.), n. The *Linum usitatissimum.* [B, 121.]

BAZIERS, n. The *Primula auricula.* [B, 275.]

BAZUCH, n. A place in Hungary, where there is an effervescent spring containing sodium chloride. [L, 49.]

BAZYLICO, n. A Polish name for the *Ocimum basilicum.* [A, 259.]

BDALLOPODE (Fr.), adj. Da^{3}l-lo-pod. Having the feet provided with suckers. [L, 41.]

BDALLOPODOBATRACHII (Lat.), n. m. pl. Da^{2}l(bda^{3}l)-lo^{2}p''o^{2}d-o(o^2)-ba^{2}t(ba^{3}t)-ra(ra^3)'ki^2(ch^{2}i^2)-i(e). Fr., *bdallopodobatraciens.* From βδάλλειν, to suck, πούς, the foot, and βάτραχος, a frog. A family of reptiles having the digits provided with suckers. [J. A. Ritgen (L, 180).]

BDALSIS (Lat.), n. f. Da^{2}l(bda^{3}l)'si^{2}s. Gen., *bdal'seos* (*-sis*). Gr., βδάλσις (from βδάλλειν, to milk, to suck). Suction, sucking. [Galen (A, 325).]

BDELLA (Lat.), n. f. De^{2}l(bde^{2}l)'la^3. Gr., βδέλλα (from βδάλλειν, to suck). Fr., *bdelle.* 1. The leech. [A, 325.] See Hirudo. 2. A genus of *Arachnida.* 3. A varicose vein. [Dioscorides (A, 325).]—**B. medicinalis.** See Hirudo *medicinalis*, Hirudo *officinalis*, and Hirudo *decora.*—**B. nilotica** [Savigny]. Fr., *bdelle du Nil.* A variety of leech inhabiting the fresh waters of Egypt. [A. Laboulbène (L, 87).]

BDELLAIRE (Fr.), adj. De^{2}l-la^{2}r. See Bdellaris.

BDELLARIA (Lat.), n., n. pl. of adj. *bdellaris.* De^{2}l(bde^{2}l)-la(la^3)'ri^2-a^3. Fr., *bdellaires.* A family of apodous *Entomozoaria* having a sucker at each end of the body. [De Blainville (L, 180).]

BDELLARIS (Lat.), adj. De^{2}l(bde^{2}l)-la(la^3)'ri^{2}s. Fr., *bdellaire.* Resembling a leech. [L, 41.]

BDELLATOMY, n. De^{2}l-la^{2}t'o^{2}m-i^2. From βδέλλα, a leech, and τέμνειν, to cut. Ger., *Bdellatomie.* 1. The operation of drawing blood with an artificial leech or by means of suction after scarification. 2. The practice of emptying a leech of blood by puucturing it. [K, 4.]

BDELLEI (Lat.), n. m. pl. De^{2}l(bde^{2}l)'le^2-i(e). Fr., *bdellés.* See Bdellidæ.

BDELLEPITHECIUM (Lat.), n. n. De^{2}l(bde^{2}l)-le^{2}p-i^2-the-(the^2)'si^2(ki^2)-u^{3}m(u^{4}m). From βδέλλα, a leech, and ἐπιτιθέναι, to apply. Fr., *bdellépithèque, pose-sangsues.* Ger., *Blutegelansetzer.* A tube for applying leeches. [A, 322, 385.]

BDELLEPITHESIS (Lat.), n. f. De^{2}l(bde^{2}l)-le^{2}p-i^{2}th'e^{2}s-i^{2}s. Gen., *bdellepithe'scos* (*-pith'esis*). From βδέλλα, a leech, and ἐπίθεσις (from ἐπιτιθέναι), an application. Fr., *bdellépithèse.* Ger., *Blutegelansetzen.* The application of leeches. [L, 50.]

BDELLIANÆ (Lat.), n. f. pl. De^{2}l(bde^{2}l)-li^2-a(a^3)'ne(na^3-e^2). Fr., *bdelliennes.* Of Savigny, a section of the family *Hirudines* having the genus *Bdella* as the type. [L, 180.]

BDELLICUS (Lat.), adj. De^{2}l(bde^{2}l)'li^{2}k-u^{3}s(u^{4}s). Fr., *bdellien.* Pertaining to or caused by leeches. [L, 50.]

BDELLIDÆ (Lat.), n. f. pl. De^{2}l(bde^{2}l)'li^{2}d-e(a^3-e^2). A family of the *Acaridea* having long beaks and antenniform palpi. [L, 121.]

BDELLIDEA (Lat.), n. n. pl. De^{2}l(bde^{2}l)-li^{2}d'e^2-a^3. An order of the *Achœtelmintha* [Diesing] having a circular sucker-like disc; divided into the *Hirudinacea* and the *Clepsinea.* [L, 261.]

BDELLIDES (Lat.), n. m. pl. De^{2}l(bde^{2}l)'li^{2}d-ez(as). See Bdellidæ.

BDELLIE (Fr.), n. De^{2}l-le. A plant yielding bdellium. [B, 38.]

BDELLIEN (Fr.), adj. De^{2}l-li^2-a^{3}n^2. See Bdellicus and Bdellaris.

BDELLIENGUMMI (Ger.), n. De^{2}l-len'gum-mi^2. See Bdellium.

BDELLIUM (Lat.), n. n. De[2]l(bde[2]l)′li[2]-u[3]m(u[4]m). Gr., βδέλλιον. Ar., *mumdilimon*, *mudemada*. Hebr., *bdolah*. Fr., *bdellium*, *bdellion*. Ger., *Bdellium*. It., *bdellio*. Sp., *bdelio* [Sp. Ph.]. 1. Of the Hebrews, a substance which, according to the older writers, was a sort of precious stone, but was probably the same substance that is now called b. 2. Of the Greeks and Romans, a transparent, fragrant, bitter resin, called also *madaleon*, derived, according to Kaempfer, from the *Borassus flabelliformis*. 3. A myrrh-like exudation from several burseraceous plants; also, of Dioscorides, the plant itself. B. is occasionally used as an ingredient of plasters. [B.] —**Aegyptisches B.** (Ger.). See *Egyptian b.*—**African B.** Lat., *b. africanum*. Fr., *b. d'Afrique* [Fr. Cod.]. Ger., *afrikanisches B.* It., *bdellio africano*. Sp., *bedelio* [Sp. Ph.], *bedelio purificado* [Sp. Ph.]. An exudation from the *Balsamodendron africanum*, occurring as translucent, yellowish or brownish, oval or rounded tears, about an inch in diameter, resembling myrrh in taste and odor. According to Pelletier, it contains about 59 per cent. of transparent resin and 9·2 per cent. of yellowish-gray gum. The resin, according to Johnston, has the formula $C_{40}H_{61}O_5$. The name is sometimes applied also to a gum-resin exuding from the *Ceradia furcata*, a substance occurring in small tears which burn with a myrrh-like odor. [B, 2, 19, 81.]—**Arabian b.** Gr., βδέλλιον ἀραβικὸν. A variety of Indian b. known to the ancients, brought from Arabia; described by Aetius as translucent and yellowish. [B, 200.]—**Babylonian b.** A variety mentioned by Pliny. [B, 200.]—**Bactrian b.** A variety mentioned by Pliny. [B, 200.]—**B. ægyptiacum.** See *Egyptian b.*—**B. africanum, B. d'Afrique** (Fr.) [Fr. Cod.]. See *African b.*—**B. de l'Inde** (Fr.). See *East Indian b.*—**B'gummi** (Ger.). See *B.*—**B. indicum.** See *Indian b.*—**B. judaicum.** See *Judean b.*—**B. meccaense, B. meccense.** According to Avicenna, the fruit of some tree. [B, 200.]—**B. opocalbason.** Syn.: *opocalbason*. A gummy, wax-like substance resembling myrrh, and, although poisonous, used to adulterate the latter. [Galen (B, 180).]—**B. sicilianum, B. siculum.** See *Sicilian b.*—**East Indian b.** Lat., *b. indicum*. Fr., *b. de l'Inde*. Ger., *ostindisches B.* It., *bdellio indiano*. An exudation from the *Balsamodendron mukul*, and probably also of the *Balsamodendron Roxburghii*. It occurs in large, rounded, dark-colored fragments, which are translucent in thin layers and have a dusty surface, a conchoidal fracture, and an odor somewhat resembling that of myrrh. It is used chiefly to adulterate myrrh, from which it is distinguished by its tincture not turning purple on the addition of nitric acid. [B, 81.] See also Bissa bôl.—**Egyptian b.** Lat., *b. ægyptiacum*. Ger., *ägyptisches B.* A sort of b. known to the ancients, extracted from the fruit of a tree (according to Sprengel, the *Borassus flabelliformis;* according to others, either the *Hyphæne crinita*, the *Chamærops humilis*, or a species of *Rhus*); of resinous consistence, occurring in round, yellowish, reddish, or greenish pieces, of a waxy fracture, more or less translucent, having an aromatic, myrrh-like odor and a bitter taste. [B, 180.]—**Gummi b., Gummi-resina b.** See *B.*—**Indian b.** Gr., βδέλλιον ἰνδικὸν. Lat., *b. indicum*. 1. Of the ancients, a variety of b. imported from the East, described by Dioscorides as occurring in dirty, blackish lumps. 2. Of the moderns, East Indian b. [B.]—**Judean b.** Lat., *b. judaicum*. A sort of b. described by the ancients, imported from the East and held to include two varieties, the Indian (or Scythian) and the Arabian; said by Avicenna to be different from the Arabian b., and hence, perhaps, the same as Indian b. (1st def.). [B, 200.]—**Mattes B.** (Ger.). See *Opaque b.*—**Meccan b.** See *B. meccense.*—**Median b.** A variety mentioned by Pliny. [B, 200.]—**Opaque b.** Fr., *b. opaque* [Guibourt]. Ger., *mattes B.* A variety said to be derived from the *Balsamodendron Playfairii;* a very hard, resistant substance occurring in large elliptical tears, with a granular surface, a yellowish, opaque, conchoidal fracture, hardly any odor, and a bitter, non-acid taste; used in the adulteration of myrrh. [R. H. Parker, "Pharm. Jour. and Trans.," Aug. 2, 1879, p. 81 (B).]—**Ostindisches B.** (Ger.). See *East Indian b.*—**Petrean b.** A blackish variety brought from Petræa. [Dioscorides (B, 200).]—**Resina bdellii, Resina b.** See *B.*—**Sclavian b.** A variety mentioned by Avicenna, regarded by him as distinct from Indian or Judean b. [B, 200.]—**Scythian b.** See *Indian b.* (1st def.).—**Sicilian b.** Lat., *b. siculum*, *b. sicilianum*. Ger., *sicilianisches B.* A gum-resin thought to be derived from the *Daucus hispanicus* or the *Daucus gingidium;* formerly used as a diuretic and diaphoretic. [B, 180.]

BDELLOIDA, BDELLOIDEA (Lat.), n's n. pl. De[2]l(bde[2]l)-lo(lo[2])-i(e)′da[3], -i[2]d(ed)′e[2]-a[3]. From βδέλλα, a leech, and εἶδος, resemblance. An order of the *Rotifera*, including those which swim and creep like leeches. [L, 121.]

BDELLOMETER, n. De[2]l-lo[2]m′e[2]t-u[5]r. Lat., *bdellometrum* (from βδέλλα, a leech, and μέτρον, a measure). Fr., *bdellomètre*. It., *bdelometro*. Sp., *bedelómetro*. Sarlendière's term for an instrument invented by him for drawing blood after the manner of an artificial leech and measuring the quantity drawn; consisting of a scarification and suction apparatus. [Paulet (L, 87).]

BDELLOMORPHA, BDELLOMORPHÆ (Lat.), n's n. and f. pl. De[2]l(bde[2]l)-lo(lo[2])-mo[2]rf′a[3], -e(a[3]-e[2]). From βδέλλα, a leech, and μορφή, shape. Fr., *bdellomorphes*. An order of *Achætelmintha* [Diesing] parasitic on fishes and molluscs; including the *Cryptocœla* and the *Rhabdocœla*. [L, 261.]

BDELLOS, BDELLUS (Lat.), n's m. De[2]l(bde[2]l)′lo[2]s, -lu[3]s-(lu[4]s). Gr., βδέλλος. An audible escape of flatus from the anus. [A, 322, 325.]

BDELYGMIA, BDELYGMUS (Lat.). n's f. and m. De[2]l-(bde[2]l)-i[2]g(u[6]g)′mi[2]-a[3], -mu[3]s(mu[4]s). Gr., βδελυγμία, βδελυγμός. 1. See Bdellos. 2. An abominable odor. [Foessius (A, 325).] 3. Nausea, disgust for food. [Hippocrates (A, 325).] 4. Filth, nastiness. [Hippocrates (A, 311).]

BDELYRIA (Lat.), n. f. De[2]l(bde[2]l)-i[2]r(u[6]r)′i[2]-a[3]. Gr., βδελυρία. See Bdelygmia (3d def.).

BDESMA (Lat.), n. n. De[2]z(bde[2]s)′ma[3]. Gen., *des′matos* (*-tis*). Gr., βδέσμα. See Bdellos.

BDOLUS (Lat.), n. m. Dol(bdo[2]l)′u[3]s(u[4]s). Gr., βδόλος. See Bdellos.

BEAD, n. Bed. Ger., *Kügelchen*, *Knöpfchen*, *Perlchen*. A small ball, drop, or bubble; in blowpipe analysis, a globule of molten matter. [B.]—**B.-moid, B.-mould.** A fungus the stems of which consist of cells arranged like a string of b's. [L, 56.]—**B.-proof.** Fr., *preuve d'Hollande*. Ger., *Perlenprobe* (n.), *probehaltig* (adj.). A crude method of testing the alcoholic strength of spirits by shaking a specimen in a bottle and observing the size, number, and persistence of the bubbles, or b's, that form on its surface. The larger and the more numerous they are, and the faster they break, the stronger is the spirit said to be. As an adj., conforming to a certain standard of alcoholic strength, as determined by this method of testing. [A, 377.]—**B.-tree.** The genus *Melia*. [B, 19.]—**B.-tree family.** The *Meliaceæ*. [B, 185.]—**Jumble b's.** The dried seeds of the *Abrus precatorius* (*q. v.*). [A, 377.]—**Lovi's b's, Specific-gravity b's.** Small hollow glass spheres of different degrees of buoyancy; used to ascertain the specific gravity of liquids. Each b. is numbered, and the number marked on the heaviest b. that floats in the liquid examined indicates its specific gravity. [A, 377.]—**West Indian b.-tree.** The *Ormosia dasycarpa*. [B, 19.]

BEADED, adj. Bed′e[2]d. Having knots or nodules arranged like a string of beads (said of roots). [L, 116.]

BEADING, n. Bed′i[2]ng. The process of adulterating spirit with some substance intended to cause it to appear, under the bead-proof, of greater alcoholic strength; also the substance so added to it. [A, 377.]

BEAD-IRNE, n. The genus *Rhynchosia*. [B, 19.]

BEAK, n. Bek. O. E., *becke*. Gr., ῥύγχος. Lat., *rostrum*. Fr., *bec*. Ger., *Schnabel*. It., *becco*. Sp., *pico*. 1. The bill, or nib, of a bird, also any analogous structure in an animal. [L, 208.] 2. Any pointed end resembling a bird's b. [L, 56.] 3. An elongated cylindrical or sharp-pointed process found on the apex of the fruit in some plants. [B.] 4. The tube or spout of a retort or other similar vessel. [B, 39.] 5. A sort of surgical forceps mentioned by Ridgley [B, 39]; also the b.-like end of the blades of certain forceps. 6. In conchology, see Umbo.—**B. of the calamus scriptorius.** The lower extremity, or re-entrant angle, of the calamus scriptorius. [A, 385.]—**B. of the corpus callosum, B. of the encephalon.** Fr., *bec* (ou *bourrelet*) *du corps calleux*. Ger., *Schnabel der Hirnschwiele*. The splenium, or posterior end, of the corpus callosum. [A, 321, 385.]—**B. of the sphenoid bone.** See Rostrum *sphenoidale*.—**B.-rush, B.-sedge.** The genus *Rhynchospora*. [B, 19.]—**Coracoid b.** Fr., *bec coracoïdien*. The b. of the coracoid process of the scapula. [L, 43.]

BEAKED, adj. Bekd. Lat., *rostratus*. Fr., *rostré*. Ger., *geschnäbelt*, *schnabelförmig*. Ending in a beak or in a prolonged cylindrical or angular tip. [B, 19.]

BEAKER, n. Bek′u[5]r. Gr., βικίον, βικιδίον. Lat., *bacar*. Fr., *tasse*, *gobelet*. Ger., *Becher*. It., *bicchiere*. A cup with a flaring lip, usually made of very thin glass, so as to bear great changes of temperature without breaking; used in decanting and boiling liquids and collecting precipitates. [B.]—**B. cells.** See *Goblet* cells.—**B. glass.** See *B.*—**Taste-b's.** See *Taste*-buds.

BEAL, n. and v. intr. Bel. A.-S., *byle*, *bile*. A boil; as a v., to suppurate. [E.]

BEAM, n. Bem. A.-S., *beam*. 1. A horizontal shaft serving as a support. [A, 302.] 2. Of a balance, the oscillating bar from the ends of which are suspended the weights and the substance to be weighed. [B.] 3. A group of parallel rays of light. [A, 302.]—4. The main stem of a branched antler. [L, 121.]—**B.-tree.** The *Pyrus aria*. [B, 19.]—**Hard b.** The *Carpinus betulus*. [B, 19.]

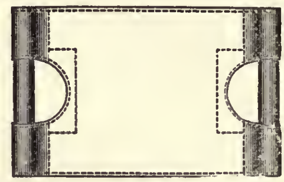
BEAN, n. Ben. A.-S., *bean*. Gr., κύαμος. Lat., *faba*. Fr., *fève*. Ger., *Bohne*. It., *fava*. Sp., *haba*. 1. The common name for the genus *Faba*, its fruit (pod), and the seed of the fruit; also applied generically to any seed resembling that of the *Faba*. [B.] 2. See Behen.—**Algaroba b.** The pod of the *Ceratonia siliqua*. [B, 199.]—**Asparagus b.** The *Dolichos sesquipedalis*. [B, 19.]—**Australian b.-tree.** The *Castanospermum australe*. [B, 19, 39.] —**B.-caper.** The *Zygophyllum fabago*. [B, 19.]—**B.-capers.** The *Zygophyllaceæ*. [B, 34.]—**B. copper.** See under Copper.—**B. family.** The *Leguminosæ*. [B, 199.]—**Egyptian b.** The *Nelumbium speciosum* or its fruit. [B, 19, 177.]—**Egyptian kidney b.** The *Dolichos lab-lab*. [B, 275.]—**English Tonka b.** The seed of the *Dipteryx oppositifolia*. [B, 81.]—**Extract of Calabar b.** See *Extractum* physostigmatos.—**False Pichurim b's.** Lat.,

fabæ Pichurim spuriæ. Ger., *falsche Pichurimbohnen.* See *Pichurim b.*—**Field b.** A variety of the *Faba vulgaris* growing in fields. [B, 71.]—**French b.** The *Phaseolus vulgaris.* [B, 19.]—**Frijol b.** The *Phaseolus Hernandezi.* [B, 275.]—**Garden b.** The *Faba vulgaris.* [B, 71.]—**Goa b's.** The seeds of the *Psophocarpus tetragonolobus.* [B, 275.]—**Greater Pichurim b's.** Lat., *fabæ Pichurim majores.* Ger., *grosse Pichurimbohnen.* See *Pichurim b.*—**Haricot b.** The *Phaseolus vulgaris.* [B, 19.]—**Hibbert b.** The *Phaseolus lunatus.* [B, 19.]—**Horse-b.** 1. The *Faba vulgaris,* var. *equina.* [B, 71.] 2. The *Canavalia gladiata.* [B, 19.]—**Horse-eye b.** The *Mucuna pruriens.* [B, 275.]—**Indian b.** The *Catalpa bignonioides.* [B, 275.]—**Inga b.** The pod of the bastard cassia. [B. 19.]—**Kentucky coffee b.** The *Gymnocladus canadensis.* [R. Bartholow, "Am. Jour. of the Med. Sci.," Apr., 1886, p. 582.]—**Kidney b.** A popular name for various species of *Phaseolus,* especially those cultivated as esculents. [B, 19.]—**Lesser Pichurim b's.** Lat., *fabæ Pichurim minores.* Ger., *kleine Pichurimbohnen.* See *Pichurim b.*—**Lima b.** An American name for the *Phaseolus lunatus.* [B, 19.]—**Locust b.** The pod of the *Ceratonia siliqua.* [B, 19.]—**Mackay b.** The seed of the *Entada scandens.* [J. Moss, "Brit. and Colon. Drug.," Sept. 3, 1887, p. 260.]—**Malacca b.** The seed of the *Semecarpus anacardium.* [B, 19.]—**Mezquit b.** The seed of the mezquite (*Prosopis glandulosa*). [B, 19.]—**Molucca b.** The fruit of the *Guilandia bonduc.* [B, 172.]—**Negro b.** The *Mucuna monosperma.* [B, 172.]—**Ordeal b. of Old Calabar.** See *Calabar b.*—**Ox-eye b.** The *Mucuna urens.* [B, 275.]—**Pichurim b.** Lat., *faba pechurim, fabæ pichurim.* Ger., *Pichurimbohne.* The cotyledons of two species of *Nectandra* (*major* and *minor*). Two varieties are distinguished; the larger, or true, Pichurim b. is derived from the *Nectandra* (*Ocotea*) *puchury major,* and the lesser, or false, Pichurim b. from the *Nectandra* (*Ocotea*) *puchury minor.* [B, 180.]—**Pigeon-b.** A small-seeded variety of the field b. [B, 19.]—**Puchury b.** See *Pichurim b.*—**Pythagorean b.** The *Nelumbium speciosum.* [B, 172.]—**Ram's-horn b.** The *Dolichos bicontortus.* [B, 19.]—**Red b.** The *Vigna unguiculata.* [B, 19.]—**Red b.-tree.** The *Erythrina corallodendron.* [B, 19.]—**Red castor b.** The *Ricinus sanguineus.* [B, 275.]—**Sacred b.** The *Nelumbium luteum.* [B, 19.]—**Sahuea b.** The *Soja hispida.* [B, 19.]—**Saint Ignatius's b.** Lat., *faba Ignatii, ignatia* [U. S. Ph.]. Fr., *fève de Saint-Ignace* [Fr. Cod.]. Ger., *Ignatiusbohne.* It., *fava di Santo Ignazio.* Sp., *haba de Santo Ignacio.* 1. The seed of the *Strychnos ignatia.* [B, 81.] 2. A Brazil name for the seed of the *Fevillea cordifolia.* [B, 19.]—**Scarlet pole b., Scarlet runner b.** The *Phaseolus multiflorus.* [B, 19, 34.]—**Screw b.** The *Prosopis pubescens.* [B, 275.]—**Seaside b.** 1. The *Canavalia obtusifolia.* 2. The *Vigna luteola.* [B, 19.]—**Soja b., Soy b.** The *Soja hispida.* [B, 275.]—**Speckled b.** The *Phaseolus vulgaris,* var. *variegatus.* [B, 199.]—**Sugar b.** 1. The *Phaseolus saccharatus.* 2. The *Phaseolus lunatus.* [B, 19, 275.]—**Swedish b.-tree.** The *Pyrus intermedia.* [B, 19, 39.]—**Sword b.** 1. The *Canavalia gladiata.* 2. The *Entada.* [B, 19.]—**Tick b.** The *Faba vulgaris,* var. *equina.* [B, 275.]—**Tonka b., Tonquin b.** Lat., *faba Tonco.* Fr., *fève Tonka, Tonka* (*fève*) [Fr. Cod.]. Ger., *Tonkabohne.* The seed of the *Dipteryx odorata.* [B, 81.]—**Tornillo b.** The *Prosopis pubescens.* [B, 275.]—**Tree b.** An Australian name for a species of *Bauhinia.* [B, 19.]—**True Pichurim b's.** Ger., *ächte Pichurimbohnen.* See *Pichurim b.*—**Underground b.** The *Voandzeia.* [B, 19.]—**Underground kidney b.** The *Arachis hypogæa.* [B, 19.]—**Vanilla b.** See VANILLA.—**Water b's.** The *Nelumbiaceæ.* [B, 19.]—**White b. of the ancients.** See BEHEN *album.*—**White b.-tree.** The *Pyrus aria.* [B.]—**White runner b.** The white-flowered variety of the *Phaseolus multiflorus.* [B, 275.]—**Wild b.** The *Apios tuberosa.* [B, 19.]—**Wild b.-vine.** The *Phaseolus perennis.* [B, 34.]—**Yam b.** The *Dolichos tuberosus.* [B, 19.]—**Year b.** The *Phaseolus vulgaris.* [B, 19.]—**Yellow sacred b., Yellow water b.** The *Nelumbium luteum.* [B, 275.]—**Zebra-striped b.** The *Phaseolus vulgaris,* var. *fasciatus.* [B, 199.]

BÉANCE (Fr.), n. Ba-a^{3}ns. The state of being wide open (said of the air-passages, etc.). [A, 385.]

BEÄNGSTIGUNG (Ger.), n. Be^2-ang'sti^2-gung. Anxiety. [L, 80.]

BÉANT (Fr.), adj. Ba-a^{3}n^2. Wide open, gaping (said of blood-vessels, of the os uteri, etc.).



BEAR, n. Ba^{2}r. A.-S., *bera.* Gr., *ἄρκτος.* Lat., *ursus.* Fr., *ours.* Ger., *Bär.* The common name for the genus *Ursus* of plantigrade mammals. [A, 300.] See AXUNGIA *ursi.*—**B.-bane.** The *Aconitum arctophonum.* [B, 19.]—**B'berry.** 1. The *Arctostaphylos uva ursi.* [B.] 2. In the northwestern parts of America, the *Rhamnus purshiana.* [B, 19.]—**B'berry leaves.** The leaves of the *Arctostaphylos uva ursi;* the uva ursi of the U. S. Ph. [B, 81.]—**B.-bind, B'bine.** 1. The *Convolvulus arvensis.* 2. The *Convolvulus sæpium.* 3. The *Lonicera periclymenum.* 4. The *Polygonum convolvulus.* 5. The *Calystegia.* [B, 275.]—**B.-fright.** The *Heptallon graveolens.* [L, 45.]—**B.-grass.** The *Yucca filamentosa* and the *Camassia esculenta.* [B, 185, 275.]—**B.-oak.** The *Quercus ilicifolia.* [B, 34.]—**B's-berry, B's-bilberry.** See *B'berry.*—**B's-breech.** The genus *Acanthus.* [B, 19.]—**B's-ear.** 1. The *Primula auricula.* [B, 19.] 2. The *Saxifraga sarmentosa.* [B, 185.]—**B's-ear sanicle.** The *Cortusa Matthioli.* [B, 39.]—**B's-foot.** The *Helleborus fœtidus.* [B, 19.]—**B's-fright.** See *B.-fright.*—**B's-garlic.** The *Allium ursinum.* [B, 39.]—**B's-grape.** The *Arctostaphylos.* [B, 71.]—**B's-grass.** See *B.-grass.*—**B's-grease.** See AXUNGIA *ursi.*—**B's-root.** A species of *Angelica* growing in Kamtchatka. [B, 19.]—**B's-weed.** The *Eriodictyon californicum.* [B, 81.]—**B's-whortleberry.** See *B'berry.*—**B.-weed.** See *B's-weed.*—**B'wort.** The *Meum athamanticum.* [Gerard (B, 39).]—**Black b'berry.** The *Arctostaphylos alpina.* [B, 39.]—**Common b's-breech.** The *Acanthus mollis.* [B, 275.]—**Great bastard b's-foot.** See *B's-foot.*—**Soft-leaved b's-breech.** The *Acanthus spinosus.* [B, 275.]—**Yellow b's-ear.** See *B's-ear* (1st def.).

BEAR, n. Ber. A.-S., *bere.* An old name for barley, especially the coarse varieties (*Hordeum hexastichon* and *Hordeum tetrastichon*). [B, 39.]—**B.-barley.** See *B.*—**B. meal.** Barley meal. [L, 73.]—**B.-seed.** See *B.*

BEARD, n. Berd. A.-S., *beard.* Gr., *πώγων.* Lat., *barba.* Fr., *barbe.* Ger., *Bart.* It., Sp., *barba.* See BARBA VANE, VEXILLUM, BRANCHIA, and AWN.—**B'ed.** See BARBATUS.—**B.-grass.** 1. The *Aristida.* [B, 34.] 2. The *Polypogon.* [B, 37.]—**B'less.** See IMBERBIS.—**B.-moss.** The *Usnea barbata.* [B, 39.]—**B.-tongue.** The *Pentastemon.* [B, 275.]

BEARING-DOWN, n. Ba^{2}r''i^{2}ng-du^5'un. Ger., *Bauchpresse.* 1. Compression of the abdominal contents by straining, voluntary or involuntary, as in defecation and parturition. 2. A subjective sensation as if something were being forced out of the body through the pelvis.

BEARING-SEAT, n. Ba^{2}r'-i^{2}ng-set. Ger., *Trag-Sitz.* A piece of canvas about a yard long and half a yard wide, with a semicircular portion cut out at each end and a stout pole secured to the fabric; used for transporting the wounded in battle. It is carried by two men, each of whom grasps the middle of one pole with one hand, and places the other hand behind the back of the wounded man, who is seated on the canvas. [A, 244.]

THE BEARING-SEAT. (AFTER LONGMORE.)

BEARSJES KRUID (Dutch), n. The *Capsella bursa pastoris.* [B; L, 105.]

BEASTINGS, n. pl. Best'i^{2}ngz. See BIESTINGS.

BEAST'S-BANE, n. Bestz'ban. The *Aconitum theriophonum.* [B, 19.]

BEAT, n. Bet. From A.-S., *beatan,* to strike. Gr., *πληγή, σφυγμός.* Lat., *ictus, plaga.* Fr., *battement.* Ger., *Schlag.* A stroke, a pulsation, as of the heart or an artery.—**Apex-b.** Fr., *choc de la pointe.* Ger., *Herzspitzenstoss.* The impulse of the apex of the heart against the wall of the chest.—**Heart-b.** Lat., *ictus cordis.* Fr., *battement du cœur.* Ger., *Herzstoss.* A pulsation of the heart.—**Pulse-b.** Fr., *battement d'une artère.* Ger., *Aderschlag.* A perceptible arterial pulsation. See PULSE.

BEATENBERG (Ger.), n. Ba-a^{3}t'e^{2}n-be^{2}rg. An elevated climatic health-resort in Switzerland, near Interlaken. [L, 57.]

BEATEN-WOMAN'S-HERB, n. Be'te^{2}n-wu^{4}m-a^{2}nz-u^{5}rb. The *Tamus communis.* [B, 19.]

BÉATRIX (Fr.), n. Ba-a^3-tre. One of the "*Meilleures*" (two new springs at Vals, France). The water is said to be highly charged with the bicarbonates of sodium, iron, calcium, and lithine, and to contain free carbon dioxide; recommended in gout and urinary affections. [P. Vernon, "Union méd.," Sept. 27, 1885, p. 527.]

BEATSONIA (Lat.), n. f. Bet-so'ni^2-a^3. Fr., *beatsonie.* A genus of frankeniaceous plants established by Roxburgh, closely allied to *Frankenia,* but having two styles and a 2-valved capsule. [B, 19.]—**B. portulacifolia** [Roxburgh]. Fr., *thé de Sainte-Hélène.* A species indigenous to the island of St. Helena; used as a substitute for tea. [B, 19, 173.]

BEAUCENS (Fr.), n. Bo-sa^{3}n^2. A place in the department of the Hautes-Pyrénées, France, where there is a cold alkaline spring the water of which is used in gastro-intestinal diseases. [L, 49.]

BEAUCUIT (Fr.), n. Bo-kwe. Buckwheat. [L, 42.]

BEAUFORTIA (Lat.), n. f. Bo-fort'i^2-a^3. A genus of myrtaceous shrubs indigenous to New Holland. [B, 19.]

BEAUFORTIEÆ (Lat.), n. f. pl. Bo-fort-i(i^2)'e^2-e(a^3-e^2). Fr., *beaufortiées.* Of Bentham and Hooker, a subtribe of myrtaceous plants of the tribe *Leptospermeæ.* [B, 42.]

BEAUHARNOISE (Fr.), n. Bo-a^{3}rn-wa^{3}z. The *Sanguinaria acaulis.* [B, 173.]

BEAUHARNOISIA (Lat.), n. f. Bo-a^{3}rn-wa^{3}z'i^2-a^3. Of Ruiz and Pavón, the genus *Tovomita.* [B, 170.]

BEAULIEU (Fr.), n. Bo-le-u^5. A place in the department of Puy-de-Dome, France, where there is a cold chalybeate and alkaline effervescent spring. [L. 87.]

BEAUMARIA (Lat.), n. f. Bo-ma^{2}r'i^2-a^3. Fr., *beaumarie.* See ARISTOTELIA.—**B. macqui** [Delessert]. The *Aristotelia macqui.* [B, 173.]

BEAUMERTA (Lat.), n. f. Bo-me^{2}rt'a^3. Fr., *beaumerte, cresson de fontaine.* The *Nasturtium officinale.* ["Fl. wetter." (B, 121).]

BEAUMONT-ROOT, n. Bo-mo^{2}nt'ru^{4}t. The *Gillenia trifoliata.* [B, 92.]

BEAUPRÉAU (Fr.), n. Bo-pra-o. A place in the department of the Maine-et-Loire, France, where there is a cold effervescent chalybeate spring. [L. 87.]

BEAUREGARD-VANDON (Fr.), n. Bor'-gar-va^{3}n-do^{2}n^2. See ROUZAT.

BEAUREPAIRE (Fr.), n. Bor'-pa^{2}r. See LES ROCHES.

BEAUVAIS (Fr.), n. Bo-ve^2. A village in France, where there are mineral springs. [L, 105.]

BEAUVERGIER (Fr.), n. Bo-ve^{2}r-zhi^2-a. A place in France, where there is a sulphurous spring. [L, 105.]

BEAVER, n. Be'vu^{5}r. A.-S., *beofer.* Lat., *fiber.* Fr., *bièvre.* Ger., *Biber.* It., *castoro.* Sp., *castor.* See CASTOR *fiber* and CAS-

TOREUM.—**B.-poison.** The *Cicuta maculata.* [B, 275.]—**B.-tree, B.-wood.** The *Magnolia glauca.* [B, 19, 275.]

BEBÄRTET (Ger.), adj. Be^2-bart'e^{2}t. See BARBATUS.

BEBEARINE, n. Be^{2}b-er'en. See BEBERINE.

BEBEERA, n. See BEBEERU.

BEBEERIA (Lat.), n. f. Be^{2}b-e^2-e(a)'ri^2-a^3. See BEBERINE.

BEBEERIC ACID, n. Be^{2}b-er'i^{2}k. Fr., *acide bébeerique.* Ger., *Bebeerinsäure.* See BEBERIC ACID.

BEBEERINA (Lat.), n. f. Be^{2}b-e^2-u^{6}r(e^{2}r)-i(e)'na^3. See BEBERINE.

BEBEERINE, n. Be^{2}b-er'en. See BEBERINE.

BEBEERINUM (Lat.), n. n. Be^{2}b-e^2-u^{6}r(e^{2}r)-i(e)'nu^{3}m(nu^{4}m). See BEBERINE.—**B. muriaticum.** See BEBERINE *hydrochloride.*—**B. sulfuricum.** Beberine sulphate. [B.]

BEBEERU, n. Fr., *bebéeru.* It., *bebeerù.* The greenheart-tree of Guiana (*Nectandra Rodiœi*). [B, 81.]—**B. bark.** Lat., *cortex b.* (seu *beberu,* seu *bibiru*). See NECTANDRÆ *cortex.*

BEBEN (Ger.), n. Ba'be^{2}n. Tremor. [L, 80.]

BEBEND (Ger.), adj. Ba'be^{2}nd. Tremulous. [L, 43.]

BEBERÄSCHE (Ger.), **BEBERESCHE** (Ger.), n's. Ba'be^{2}r-e^{2}sh-e^2. The *Populus tremulus.* [L, 43, 46.]

BEBERIA (Lat.), n. f. Be^{2}b-e(a)'ri^2-a^3. See BEBERINE.—**Beberiæ sulphas** [Br. Ph., 1867], **Sulphate of b.** [Br. Ph., 1867]. Beberine sulphate. [B.]

BEBERIC ACID, n. Be^{2}b-e^{2}r'i^{2}k. Fr., *acide bébéerique* (ou *bebérique,* ou *bébirique*). Ger., *Bebeerinsäure.* It., *acido bebeerico.* An acid, under the form of white deliquescent crystals, found in the fruit and bark of the bebeeru (*Nectandra Rodiœi*), combined with beberine. [B, 81.]

BEBERIN (Ger.). n. Ba-bar-en'. Beberine. [B.]—**B'säure.** Beberic acid. [B.]—**Salzsaures B.** Beberine hydrochloride. [B.]—**Schwefelsaures B.** Beberine sulphate. [B.]

BEBERINA (Lat.), n. f. Be^{2}b-e(a)-ri(re)'na^3. Beberine. [B.]—**Beberinæ sulphas** [Br. Ph.]. Beberine sulphate. [B.]

BEBERINE, n. Be^{2}b-er'en. Lat., *beberina, beberinum, beberia.* Fr., *bébirine, béberine, bébeerine.* Ger., *Beberin, Bebirin, Bebeerin.* It., *bebeerina.* An alkaloid, $C_{19}H_{21}NO_3$, discovered by Rodie (1834) in the bark of the bebeeru (*Nectandra Rodiœi*); a white, bitter powder soluble in alcohol and in ether; identical, according to Walz, with buxine, and, according to Flückiger, with pelosine and paricine. [B, 2, 81.]—**B. chloride.** See *B. hydrochloride.*—**B. chloroplatinate.** See *B. platinochloride.*—**B. hydrochlorate, B. hydrochloride.** Lat., *bebeerinum muriaticum.* Fr., *chlorhydrate de bébeerine.* Ger., *salzsaures Bebeerin.* It., *cloridrato di bebeerina.* A compound of b. and hydrochloric acid; a bitter, uncrystallizable substance, very soluble in water. [B, 2.]—**B. muriate.** See *B. hydrochloride.*—**B. platinochloride.** Fr., *platino-chlorure* (ou *chloro-platinate*) *de bébeerine.* An orange-colored amorphous precipitate, $C_{19}H_{21}NO_3.HCl.PtCl_2$. [B, 2.]—**B. sulphate.** Lat., *beberinæ sulphas* [Br. Ph.], *beberiæ sulphas* [Br. Ph., 1867], *beberinum sulfuricum.* Fr., *sulfate de bébeerine.* Ger., *schwefelsaures Beberin, Beberinsulfat.* It., *solfato di bebeerina.* A compound of b. and sulphuric acid, obtained by the action of the latter on bebeeru bark. As thus prepared, it occurs as bitter, dark-brown, translucent scales soluble in water and in alcohol, containing free sulphuric acid, sulphate of sepirine, and coloring matter. When freed from these latter constituents, it is yellowish-white. Used chiefly as a tonic and antiperiodic in place of quinine. [B, 81.]

BEBERN (Ger.), n. Ba'be^{2}rn. The genus *Vaccinium.* [L, 46.]

BEBERU, n. See BEBEERU.

BEBEUTELT (Ger.), adj. Be^2-boit'e^{2}lt. See BURSICULATUS.

BEBILEN, n. A Thibet name for the *Piper longum.* [B, 121.]

BEBINA (Hind.), n. The *Mussœnda frondosa.* [B, 172.]

BEBIRIC ACID, n. Be^{2}b-i^{2}r'i^{2}k. See BEBERIC ACID.

BEBIRINE, n. Be^{2}b-i^{2}r'en. See BEBERINE.

BEBLÄTTERT (Ger.), adj. Be^2-blat'te^{2}rt. Foliate, leafy; covered or provided with leaves. [B, 198.]

BEBLÄTTERUNG (Ger.), n. Be^2-blat'te^{2}r-ung. See FOLIATION.

BEBRÜTUNG (Ger.), n. Be^2-bru^{6}t'ung. The incubation of an egg.

BEC (Fr.), n. Be^{2}k. 1. See BEAK and ROSTRUM. 2. A village in France, where there are cold chalybeate springs. [L, 105.]—**B. coracoïdien.** See *Coracoid* BEAK.—**B. de Bunsen.** See *Bunsen's* BURNER.—**B.-de-cane.** 1. The *Aloe linguiformis.* [B, 38.] 2. See ROSTRUM *anatinum.*—**B.-de-canne.** See ROSTRUM *anatinum.*—**B.-de-cigogne.** The *Geranium ciconium.* [B, 38.]—**B.-de-corbin.** See ROSTRUM *corvinum.*—**B. de cuiller.** See PROCESSUS *cochleariformis.*—**B.-de-cygne.** See ROSTRUM *cygneum.*—**B.-de-grue.** 1. The genus *Geranium,* especially the *Geranium robertianum.* [B, 121.] 2. See ROSTRUM *gruinum.*—**B.-de-grue à Robert.** The *Geranium robertianum.* [B, 173.]—**B.-de-grue coudé.** A curved rostrum gruinum (*q. v.*). [L, 41.]—**B.-de-grue sanguin.** The *Geranium robertianum.* [B, 88.]—**B.-de-grue tacheté.** The *Geranium maculatum.* [B.]—**B.-de-héron.** The *Geranium arduinum.* [B, 121.]—**B. de la plume, B. de la plume à écrire.** See BEAK *of the calamus scriptorius.*—**B.-de-lézard.** See ROSTRUM *lacertinum.*—**B.-de-lièvre.** Hare-lip. [A. 385.]—**B.-de-lièvre commissural.** A condition in which the oral commissure is prolonged obliquely or horizontally on one or both sides. [Bouisson (L, 87).] Cf. MACROSTOMA.—**B.-de-lièvre génien.** See *B.-de-lièvre commissural.*—**B.-de-lièvre inférieur.** A fissure in the median line of the lower lip. [Bouisson (L, 87).]—**B.-de-lièvre unilatéral compliqué.** Unilateral hare-lip complicated with changes in size, situation, etc., of the adjacent parts. [J. N. Demarquay (L, 88).]—**B.-de-perroquet.** See ROSTRUM *psittacinum.*—**B.-de-pigeon.** The *Geranium columbinum.* [B, 121.] **B.-de-vautour.** See ROSTRUM *vulturinum.*—**B.-d'oie.** The *Potentilla anserina.* [B, 121.]—**B.-d'oiseau.** The *Cucubalus bacciferus.* [B, 121.]—**B. du calamus scriptorius.** See BEAK *of the calamus scriptorius.*—**B. du corps calleux.** See BEAK *of the corpus callosum.*—**B. de sphénoïde.** See ROSTRUM *sphenoidale.*—**B.-fin.** Having a slender beak. [A, 385.]—**B's-fins.** The *Silviadœ.* [L, 208.]—**B.-jaune.** A young bird in which the membranous portion of the beak is yellow. [L, 41.]—**B.-mouches.** Of Duméril, a family of *Diptera* having the head prolonged into a kind of beak. [L, 180.]

BECABUNGA, BECCABUNGA [Fr. Cod.] (Lat.), n's f. Be^{2}k-a^3-bu^{3}n^2(bun^2)'ga^3, be^{2}k-ka^3-bu^{3}n^2(bun^2)'ga^3. Ger., *Bachbunge* (probably from *Bach,* a stream, and *Bunge,* akin to Eng. bough, meaning, thus, flourishing by streams [B, 121]). Sp., *becabunga* [Sp. Ph.]. 1. A name applied to several species of *Veronica,* especially the *Veronica b.,* of which it is the official name in the Fr. Cod. 2. A genus of plants now made a section of the genus *Veronica.* [B, 170.]—**Aqua beccabungæ.** Fr., *eau distillée* (ou *hydrolat*) *de b.* A preparation made by distilling 1 part of a mixture of 2 parts each of the bruised herb of *Veronica b.* and water [Sard. Ph., 1773; Turin Ph., 1833; Port. Cod., 1836], or by distilling the juice of the plant [Austr. Ph., 1820]. [B, 119.]—**B. vulgaire** (Fr.). The *Veronica b.* [B, 173.]—**Conserva beccabungæ** [Belg. Ph.]. Fr., *conserve de b.* A mixture of 1 part of the fresh herb of *Veronica b.* and 3 parts of white sugar. [B, 95.]—**Eau distillée de b.** (Fr.). See *Aqua beccabungœ.*—**Extractum beccabungæ.** Fr., *extrait de b.* An extract made by evaporating the juice of *Veronica b.* to the proper consistence. [Sard Ph., 1773; Turin Ph., 1833 (B, 119).]—**Grand beccabunga** (Fr.). The *Veronica b.* [B, 173.]—**Herba beccabungæ, Herba recens beccabungæ.** The herb (fresh herb) of *Veronica b.* [B, 180, 270.]—**Hydrolat de b.** (Fr.). See *Aqua beccabungœ.*—**Petit beccabunga** (Fr.). The *Veronica anagallis.* [B, 121.]

BECHÆSTHESIS (Lat.), n. f. Be^{2}k(bach^2)-e^{2}s(a^3-e^{2}s)-the(tha)'-si^{2}s. Gen., *bechœsthe'seos* (*-sis*). From βήξ, cough, and αἴσθησις, a sensation. Fr., *bechesthèse.* Ger., *Hustenreiz.* A sensation in the respiratory tract giving rise to a desire to cough. [L. Martini (A, 322).]

BECHER (Ger.), n. Be^{2}ch^2'e^{2}r. 1. In botany, the cupulus of an acorn, etc.; also the scyphus of a lichen. [B, 198.] 2. A calix of the kidney. [L, 80.] 3. See *Goblet* CELL.—**B'baum.** The *Trechilia emetica.* [L, 46.]—**B'blume.** The genus *Poterium.* [B, 180.]—**B'farrn.** The genus *Trichomanes.* [B, 121.]—**B'flechte.** The *Bœomyces pyxidatus.* [B, 270.]—**B'förmig.** See ACETABULIFORM.—**B'frucht.** A fruit (like the acorn) provided with a cupulus; the calybion of Mirbel. [B, 198.]—**B'gebilde.** See *Goblet* CELL.—**B'haare.** See PILI *cupulati.*—**B'hülle.** A cupule. [B, 198.]—**B'keim.** See GASTRULA.—**B'los.** See ASCYPHOUS.—**B'schwamm.** The genus *Peziza,* also the *Cantharellus cibarius.* [B, 121, 180.]—**B'stuppe.** The *Bœomyces pyxidatus.* [B.]—**B'tragend.** See CUPULIFERUS and SCYPHIPHORUS.—**B'zelle.** See *Goblet* CELL.—**Dornige B'blume.** The *Poterium spinosum.* [L, 80.]—**Gemeine B'blume.** The *Poterium sanguisorba.* [B, 180.]—**Gemeine B'flechte.** The *Bœomyces pyxidatus.* [B.]—**Scharlachrothe B'flechte.** The *Bœomyces cocciferus.* [B; L, 80.]

BÉCHETTE (Fr.), n. Ba-she^{2}t. The *Hordeum vulgare.* [B, 121.]

BÉCHEUX (Fr.), adj. Ba-shu^5. See BECHODES.

BECHI BADEAN, n. A Turkestan name for a root the bark of which, according to Dragendorff, is closely allied to and perhaps identical with that of *Althœa officinalis.* It contains much mucilage, starch, and calcium oxalate, and is employed in Turkestan as the *Althœa officinalis* has been in Europe. ["Proc. of the Am. Pharm. Assoc.," xxi, p. 234 (B).]

BECHIA, BECHIAS (Lat.), n's f. and m. Be^{2}k(bach^2)'i^2-a^3, -a^{2}s(a^{3}s). Gr., βηχία, βηχίας. Hoarseness, cough, [L, 50.]

BECHIC, adj. Be^{2}k'i^{2}k. Gr., βηχικός. Lat., *bechicus.* Fr., *béchique.* It., *bechcio.* Sp., *béquico.* Originally, suffering with, pertaining to, or produced by, cough; as now used, efficient against cough. [A, 311, 322.]

BECHION (Lat.), n. n. Be^{2}k(bach^2)'i^2-o^{2}n. Gr., βήχιον. Fr., *béchion.* Ger., *Huflattig* (1st def.). 1. The genus *Tussilago.* [B, 121.] 2. A disease of the larynx or trachea. [L, 50.]

BÉCHIQUE (Fr.), adj. Ba-shek. See BECHIC.

BECHIUM (Lat.), n. n. Be^{2}k(bach^2)'i^2-u^{3}m(u^{4}m). See BECHION.—**Flores bechii, Folia bechii, Herba bechii, Radix bechii.** The flowers, leaves, herb, and root of *Tussilago farfara.* [B, 180.]

BECHODES (Lat.), adj. Be^{2}k(bach^2)-o'dez(das). Gr., βηχώδης. Fr., *bécheux.* Ger., *hustend, hustenartig.* Affected with or pertaining to cough. [L, 50.]

BECHOE, n. The *Barosma cremata.* [B, 88.] See BUCHU.

BECHORTHOPNŒA (Lat.), n. f. Be^{2}k(bach^2)-o^{2}r-tho^{2}p-ne'(no^2'e^2)-a^3. From βήξ, a cough, and ὀρθόπνοια (see ORTHOPNŒA). Fr., *béchorthopnée.* 1. Orthopnœa (*q. v.*) with cough. 2. Whooping-cough. [L, 50, 81.]

BECHOUS, adj. Be'ku^{3}s. See BECHODES.

BECKEA (Lat.), n. f. Be^{2}k'e^2-a^3. 1. A genus of brunaceous plants made by Burmann. [B, 170.] 2. Of Lamarck, see BÆCKIA.

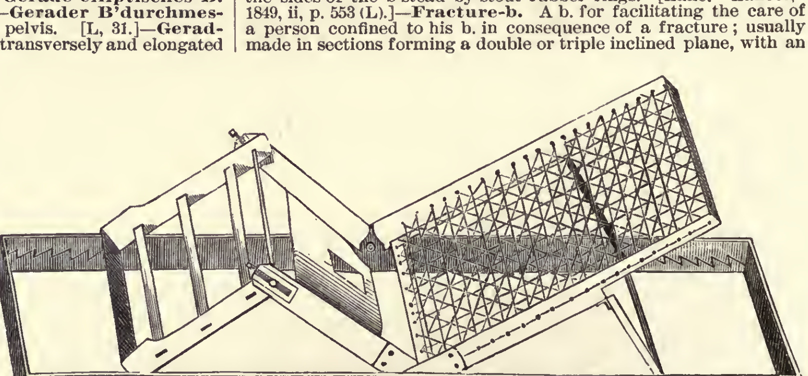
BECKEN (Ger.), n. Be^{2}k'e^{2}n. 1. The pelvis. 2. A basin.—**Aeussere B'messung.** See *External* PELVIMETRY.—**Allgemein verengtes B.** See PELVIS *œquabiliter justo-minor.*—**Allgemein zu weites B.** See PELVIS *œquabiliter justo-major.*—**Ankylotisch quer verengtes B.** An oblique transverse contraction of the pelvis due to defective development of the sacrum with consecutive ankylosis of the sacro-iliac joint. [A, 85.] Cf. *Schräg ver-*

engtes B.—**Bauchiges B.** A pelvis in which the cavity is large in proportion to the inlet and the outlet. [A, 117.]—**B'abweichung.** A pelvic deformity. [L, 30.]—**B'arterie.** The internal iliac artery. [L, 80.]—**B'ausgang.** The outlet of the pelvis. [L, 31.]—**B'ausgangsebene.** The plane of the outlet of the pelvis. [A, 121.]—**B'ausmessung.** A pelvic diameter. [L, 80.]—**B'axe.** A pelvic axis; usually the axis of the pelvic canal.—**B'band.** A pelvic ligament. [L, 80.]—**B'bart.** The *Cymbopogon.* [L, 80.]—**B'bein.** A pelvic bone. [L, 80.]—**B'binde.** The pelvic fascia. [L, 115, 135.]—**B'bindegewebe.** The connective tissue within the pelvis.—**B'bucht.** The inlet of the pelvis. [L, 59.]—**B'darmhöhle.** A cavity formed at the posterior end of the embryo by the growing in of the edge of the embryonic area. [H.]—**B'declination.** The inclination of the pelvis. [L, 80.]—**B. der Niere.** The pelvis of the kidney. [A, 355.]—**B. des Gehirns.** The infundibulum cerebri. [L, 80.]—**B. des Ohres.** The tympanum. [L, 80.]—**B'durchmesser.** A pelvic diameter. [L, 31.]—**B'ebene.** A plane of the pelvis.—**B'eingang.** The brim of the pelvis.—**B'eingangsebene.** The plane of the pelvic brim. [L, 59.]—**B'eingangszange.** An obstetrical forceps suitable for application at the superior strait of the pelvis.—**B'eingeweide.** The pelvic viscera. [A, 315.]—**B'end.** The pelvic pole of the fœtus.—**B'endlage.** See *Pelvic* PRESENTATION.—**B'enge.** A normal narrowing (strait) of the pelvis, also an abnormal pelvic contraction. [L, 37.]—**B'fascie.** The pelvic fascia. [L, 115.]—**B'förmig.** See PELVIFORMIS.—**B'geburt.** 1. The birth of a fœtus presenting by the pelvic pole. 2. Delivery through the pelvis, as opposed to that by abdominal section. [L, 30.]—**B'geflecht.** The hypogastric plexus. [A, 355.]—**B'gegend.** The pelvic region. [L, 57.]—**B'genitalien.** The internal genital organs; also the true genital organs of the female, as distinguished from the mammary glands.—**B'glieder.** The pelvic (posterior or lower) limbs. [L, 43.]—**B'grube.** The iliac fossa. [L, 59.]—**B'gürtel.** See *Pelvic* GIRDLE.—**B'höhle.** The pelvic cavity. [L, 80.]—**B'inclination.** The inclination of the pelvis. [L, 80.]—**B'knochen.** The pelvic bones. [L, 57.]—**B'krümmung.** The pelvic curve (of the obstetrical forceps). [L, 57.]—**B'lage.** See *Pelvic* PRESENTATION.—**B'lochnerv.** The obturator nerve. [L, 80.]—**B'messer.** See PELVIMETER.—**B'messung.** See PELVIMETRY.—**B'neigung.** The inclination of the pelvis. [L, 80.]—**B'neigungsmesser.** An instrument for measuring the inclination of the pelvis. [L, 30.]—See CLISEOMETER.—**B'öffnung.** A pelvic aperture. [L, 80.]—**B'ränder.** The margins of the pelvis. [L, 80.]—**B'raum.** The pelvic cavity. [L, 80.]—**B'ring.** See *Pelvic* GIRDLE.—**B'schnitt.** The operation of sawing through one of the bones of the pelvis to increase the size of the outlet. [L, 50.]—**B'stellung.** The attitude of the pelvis in the various postures of the body.—**B'stütze.** An apparatus for supporting the pelvis, as in the treatment of hip-joint disease. [E. Gurlt (L, 57).]—**B'symphyse.** A pelvic symphysis. [L, 57.]—**B'umfang.** The circumference of the pelvis. [L, 115.]—**B'wand.** The pelvic wall.—**B'weite.** The cavity of the pelvis. [L, 80.]—**B'zellgewebe.** The pelvic cellular tissue. [L, 57.]—**B'zellgewebentzündung.** Inflammation of the pelvic cellular tissue. [L, 59.]—**Coxalgisches B.** See *Coxalgic* PELVIS.—**Dreieckiges B., Dreiwinkeliges B.** See *Triangular* PELVIS.—**Eigentliches B.** The true pelvis. [L, 80.]—**Eingedrückte und zugespitzte Herzfigur des B's.** See *Cordiform* PELVIS.—**Eingekniffenes B.** A pelvis in which the inlet and the outlet are large in proportion to the cavity. [A, 117.]—**Engtrichterförmiges B.** See *Contracted infundibuliform* PELVIS.—**Geburtshülfliches B.** See *Obstetric* PELVIS.—**Gerade-elliptisches B.** See *Antero-posterior elliptical* PELVIS.—**Gerader B'durchmesser.** The conjugate diameter of the pelvis. [L, 31.]—**Geradovales B.** A pelvis which is contracted transversely and elongated antero-posteriorly. The inlet and outlet are usually rather small in proportion to the cavity. [A, 61.]—**Geradverengtes B.** A pelvis contracted in the conjugate diameter.—**Gespaltenes B.** See *Fissured* PELVIS.—**Graciles B.** See *Infantile* PELVIS.—**Grösseres B., Grosses B.** The false pelvis. [L. 80.]—**Halisteretisches B.** See *Osteomalacic* PELVIS.—**Herzförmiges B.** See *Cordiform* PELVIS.—**Innere B'messung.** See *Internal* PELVIMETRY.—**Kartenherzförmiges B.** See *Cordiform* PELVIS.—**Keilförmiges B.** See *Cuneiform* PELVIS.—**Kindliches B.** See *Infantile* PELVIS.—**Kleines B.** The true pelvis. [L, 80.]—**Knöchernes B.** The bony pelvis. [L, 80.]—**Männliches B.** See *Masculine* PELVIS.—**Nierenb'.** The pelvis of the kidney. [L, 49.]—**Obere B'öffnung.** The pelvic inlet. [L, 31.]—**Oberes B.** The false pelvis.—**Oberes B'geflecht.** The superior hypogastric plexus. [L, 115.]—**Plattes B., Quergezogenes B.** See *Flat* PELVIS.—**Rundes B.** See *Round* PELVIS.—**Schräg verengtes B., Schräg verschobenes B., Schräg verzogenes B.** These terms are commonly used synonymously, all denoting the oblique pelvis of Nägele. Strictly, however, *schräg verengtes B.* means a pelvis simply narrowed obliquely, as by a synostosis of the sacrum and the ilium taking place during intra-uterine or infantile life, causing the ala of the sacrum of the affected side to be arrested in its growth and the curve of the linea arcuata to be distorted; while *schräg verschobenes* (*verzogenes*) *B.* means a pelvis narrowed obliquely by upward and backward pressure on the ilium in consequence of shortening of one lower limb. [α, 16.]—**Skeletisirtes B.** See *Bony* PELVIS.—**Spitzeckigte Hutform** (oder **Spitzige Herzfigur**) **des B's.** See *Cocked-hat* PELVIS.—**Stachelb'.** See ACANTHOPELVIS.—**Stumpfe Kartenherzform des B's.** See *Cordate* PELVIS.—**Trichterb'.** See *Infundibuliform* PELVIS.—**Umgekehrt trichterförmiges B.** See *Reverse infundibuliform* PELVIS.—**Untere B'öffnung.** The pelvic outlet. [L, 43.]—**Unteres B.** The true pelvis. [L, 80.]—**Unteres B'geflecht.** The inferior hypogastric plexus. [L, 115.]—**Verjüngtes B.** See *Infantile* PELVIS.—**Verlängerte Herzform des B's.** See *Triangular* PELVIS.—**Verschobenes B.** That variety of deformed pelvis in which the iliac bone is forced upward and backward.—**Weiberb'.** A woman's pelvis. [L, 115.]—**Weittrichterförmiges B.** See *Expanded infundibuliform* PELVIS.—**Zusammengeknicktes B.** See *Pseudo-osteomalacic* PELVIS.—**Zwergb'.** See *Dwarf* PELVIS.

BECKSPETERLEIN (Ger.), n. Be^{2}ks'pa-te^{2}r-lin. The *Pimpinella saxifraga.* [B, 121.]

BÉCONGUILLE (Fr.), **BÉCONQUILLE** (Fr.), n's. Ba-ko^{2}n^2-gel, -kel. Ipecac. [B, 121.]

BECOS (Lat.), n. m. Bek(be^{2}k)'o^{2}s. Gr., βέκος. A Phrygian name for bread. [Galen (A, 325).]



BECUDO, n. A Languedoc name for the *Cicer arietinum.* [B, 121.]

BECUIBA (Port.), n. Ba-ku-e'ba^3. A Brazilian name for the *Myristica bicuiba* (*q. v.*), also for its nut. [B, 121.]—**B. balsam.** See *B. tallow.*—**B. nux.** The nut of *Myristica bicuiba.* [B.]—**B. tallow.** Fr., *baume de bicuhyba.* Syn.: *bicahyba balsam, bicuiba redonda.* A fatty substance expressed from the seeds of the *Myristica bicuiba* (seu *becuhyba*); of a sharp, acidulous taste, melting at 47° C. Used in Brazil in the treatment of rheumatism and hæmorrhoids. [B, 81, 121, 180.]

BECUIBIN, n. Be^{2}k-we'bi^{2}n. A substance extracted from the juice of the bark of *Myristica bicuiba,* forming shining, reddish, laminar crystals of weakly acid reaction and devoid of taste and odor, soluble in chloroform, in hot alcohol, and in boiling water, insoluble in cold water or alcohol and in ether. [B, 270.]

BECULO, BECUQUELLA, n's. Ipecac. [B, 88.]

BED, n. Be^{2}d. A.-S., *bed.* Gr., κλίνη. Lat., *lectus.* Fr., *couche.* Ger., *Bett.* 1. An article of furniture for sleeping on. 2. A structure on which another structure rests (*e. g.,* the matrix of the nail) or in which it is imbedded (*e. g.,* the parts immediately surrounding a tumor).—**Air-b.** A b. similar to the water-b., but distended with air instead of water. [Simmonds (D, 20).]—**Arnott's b.** See *Water-b.*—**Bandeloux's b.** An air-bed with a vessel beneath for the collection of urine, the whole surmounted by a cradle covered with gauze. [Londe, "Bull. de l'Acad. de méd.," xxi, p. 1092 (L).]—**B.-bug.** See ACANTHIA *lectularia.*—**B.-case.** Ger., *Bettsucht.* That manifestation of hysteria or hypochondriasis in which the patient unnecessarily remains in bed. [R. Arndt (A, 319); L, 45.]—**B.-chair.** See under CHAIR.—**B.-hoist.** An apparatus for raising a sick person from his b. [Atkinson, "Brit. Med. Jour.," 1873, i, p. 533 (L).]—**B.-pan.** See under PAN.—**B'ridden.** Lat., *lecto affixus.* Ger., *bettlägerig.* Confined to one's b. (said especially of those who seem permanently so affected). [A, 244, 315.]—**B.-sore, B'sore.** See under SORE.—**B.-straw, B'straw.** See the major list.—**B.-swing.** An apparatus for swinging a patient clear of the bed, resembling a hammock. [Millikin, "Cincinnati Lancet-Clinic," iii, 1879, p. 208 (L).]—**B.-warmer.** See *Warming*-PAN.—**Big b.-bug.** See CONORRHINUS *sanguisuga.*—**Elastic-ring b.** A b. consisting of transverse strips attached to the sides of the b'stead by stout rubber rings. [Luke, "Lancet," 1849, ii, p. 553 (L).]—**Fracture-b.** A b. for facilitating the care of a person confined to his b. in consequence of a fracture; usually made in sections forming a double or triple inclined plane, with an opening to allow of the escape of urine and fæces.—**Hydrostatic b.** See *Water-b.*—**Protection b.** A crib for confining maniacs in the recumbent posture. [Lindsay, "Edinburgh Med. Jour.," xxiii, 1878, p. 715 (L).]—**Water-b.** Ger., *Wasserbett.* A b. consisting of a rubber sac filled with water; designed to equalize the pressure due to the weight of the patient's body, and thus prevent b.-sores; invented by N. Arnott.

NELSON'S FRACTURE-BED. [A, 276.]

BED (Hind.), n. The *Calamus rotang.* [B, 172.]—**B.-i-musk.** The *Salix caprea.* [B, 172.]

BEDA, n. See BEDO.

BEDAM (Tamil), n. The *Canarium commune.* [B, 172.]

BEDARINGI (Ar.), n. The *Melissa officinalis.* [B, 121.]

BEDAS, BEDE, n's. See BEDO.

BÉDEAU (Fr.), **BÉDÉAUDE** (Fr.), n's. Ba-do, -da-od. Popular names for any insect the body of which is of two distinct colors. [L, 208.]

BEDECKELT (Ger.), adj. Be^{2}-de^{2}k'e^{2}lt. In botany, operculate. [B, 198.]

BEDECKT (Ger.), adj. Be^{2}-de^{2}kt'. Lat., *tectus*, *obtectus*. Covered, concealed. [B, 198.]—**B'früchtig.** See ANGEIOCARPOUS.—**B'geadert.** See OBTECTO-VENOSUS.—**B'samige.** The angeiosperms. [B, 36.]

BEDECKUNG (Ger.), n. Be^{2}-de^{2}k'ung. An investment, covering, integument; in botany, the vestimentum, or indumentum. [B, 198; L, 80.]

BE-DE-FRANGI (Pers.), n. The venereal disease. [L, 102.]

BEDEGAR, BEDEGUAR, n's. Be^{2}d'e^{2}-ga^{3}r. Pers., *bâd-âward*, *bâd-âwardah*. Lat., *fungus rosarum* (seu *b.*, seu *cyozbati*, seu *comosus*), *spongia rosarum*. Fr., *bédégar*, *bédéguar*. Ger., *Rosenschwamm*, *Schlafapfel*, *Siebenschläfer*, *Siefe*. An excrescence produced on the branches of rose-bushes by the punctures of various insects (the *Cynips rosæ*, the *Cynips Brandtii*, and others). It has an irregular surface, varies in size from that of a walnut to that of a small apple, is yellowish, greenish, or reddish, and is covered with bristly branched processes. It consists of an aggregation of small hemispherical nodules, each containing various cavities, in which the eggs of the insect are deposited and hatched. It is odorless and has a sweetish and somewhat astringent taste. It was formerly much used in diarrhœa, calculous and renal disorders, and rabies, and the larvæ contained in it have been recommended in toothache. [B, 180.]

BÈ-DE-POUMIÈ, n. A Languedoc name for the mistletoe (*Viscum album*). [B, 121.]

BEDE-SEDGE, n. Bed'se^{2}j. The *Sparganium ramosum*. [B, 275.]

BEDEWIN, n. Be^{2}d'e^{2}-wi^{2}n. The *Betula alba*. [B, 275.]

BEDEWINDE (Ger.), n. Ba'de^{2}-vi^{2}nd e^{2}. See BEDWINDE.

BEDEZAHER, n. See BEZOAR.

BEDFORD ALUM SPRINGS, n. Be^{2}d'ford. A place on the border between Bedford and Campbell counties, Virginia, near New London, where there is a spring containing sulphates of potassium, magnesium, calcium, aluminium, and protoxide of iron, together with free sulphuric acid; recommended in scrofula, chronic diarrhœa, eczema, and impoverishment of the blood. [A, 363.]

BEDFORDIA (Lat.), n. f. Be^{2}d-ford'i^{2}-a^{3}. A genus of composite plants of the tribe *Senecionidæ*, established by De Candolle; distinguished from *Senecio* by its axillary inflorescence and its stellate indumentum. [B, 219.]—**B. salicina** [De Candolle]. Syn.: *Cacalia salicina* [Labillardière], *Culcitium salicinum* [Sprengel], *Senecio Bedfordii* [F. Müller]. Tasmania dogwood; a shrub or small tree growing in Australia and Tasmania. [B, 185, 219.]

BEDFORD SPRINGS, n. Be^{2}d'ford. 1. A place in Bedford County, Pennsylvania, where there are springs containing iron and calcium carbonates, sodium and calcium chlorides, magnesium and calcium sulphates, and free carbonic acid; recommended in anæmia, digestive diseases, and calculous disorders. There is also a sulphurous spring said to contain no iron. 2. A place in Trimble County, Kentucky, where there is a spring containing sodium chloride, sodium and magnesium sulphates, calcium and magnesium bicarbonates, and sodium carbonate. [A, 363.]

BEDHANA (Tamil), n. The *Cydonia vulgaris* (*Pyrus cydonia*). [B, 88.]

BEDHOLACH (Hebr.), n. See BDELLIUM.

BÉDILLE (Fr.), n. Ba-del. A name applied in the Gironde to the *Convolvulus arvensis* and some other plants. [B, 121.]

BEDIS, BEDISSA, n's. Languedoc names for the willow. [B, 121.]

BEDO, n. A Ceylon name for an albino.

BEDÖRNELT (Ger.), adj. Be^{2}-du^{5}rn'e^{2}lt. In botany, spinulose. [B, 198.]

BEDORNT (Ger.), adj. Be^{2}-dornt'. In botany, spinose. [B, 198.]

BÉDOU (Fr.), n. Ba-du. The *Ursus meles*. [L, 105.]

BÉDOUIN (Fr.), n. Ba-du-a^{2}n^{2}. Properly, *bec d'ouin* (wolf's muzzle). The *Mclampyrum arvense*. [B, 121.]

BEDOUISI, n. An undetermined tree of India. [B, 121.]

BEDSTRAW, n. Be^{2}d'stra^{4}. Ger., *Bettstroh*. The genus *Galium*, also the *Desmodium aparines*. [B, 19, 75.]—**Cross-leaved b.** The *Galium boreale*. [B, 71.]—**Great b., Great hedge-b., Hedge-b.** The *Gallium mollugo*. [B, 71, 275.]—**Lady's b., Our Lady's b.** Ger., *Frauen-Bettstroh*, *Liebfrauen-Bettstroh*. The *Galium verum*. [B, 275.]—**Rough b.** The *Galium asprellum*. [B, 275.]—**Yellow b.** The *Galium verum*. [B, 275.]

BEDÜRFNISS NACH SAUERSTOFF (Ger.), n. Be^{2}-du^{6}rf'-ni^{2}s na^{3}ch^{2} za^{3}'u-e^{2}r-sto^{3}f. The sensation of the necessity of breathing; the respiratory sense. [J.]

BEDURN, n. A Ceylon name for the *Polypodium quercifolium*. [B, 121.]

BEDWIND, n. Be^{2}d'wind. The *Convolvulus sæpium*. [B, 275.]

BEDZNJK, n. A Bohemian name for the *Pimpinella saxifraga*. [B, 88.]

BEE, n. Be. A.-S., *beo*. See APIS.—**African b.** See APIS *Adansonii*.—**B.-bread.** 1. See under BREAD. 2. The *Trifolium pratense*. [B, 275.]—**B.-flower.** The *Ophrys apifera*. [B, 19.]—**B.-glue.** See PROPOLIS.—**B.-larkspur.** The *Delphinium grandiflorum*, also other cultivated species of *Delphinium*. [B, 275.]—**B.-nettle.** The *Lanium album*, also two species of *Galeopsis*. [B, 275.]—**B.-orchis.** See *B.-flower*.—**Domestic b.** See APIS *mellifica*.—**Egyptian b.** See APIS *fasciata*.—**Grecian b.** See APIS *cecropia*.—**Hive-b., Honey-b.** See APIS *mellifica*.—**Humble b.** See BOMBUS (2d def.).—**Indian b.** See APIS *indica*.

BEECH, n. Bech. A.-S., *bece*. Gr., φηγός. Lat., *fagus*. Fr., *hêtre*. Ger., *Buche*. The genus *Fagus*, especially the *Fagus silvatica*. [B, 19.]—**Australian b.** The *Tectona australis*. [B, 19.]—**B.-drops.** See the major list.—**B. fungus.** The *Cyttaria Darwinii*. [B, 185.]—**B.-mast, B.-nut.** The fruit of the *Fagus silvatica*. [B.]—**B.-nut oil, B. oil.** Lat., *oleum fagi*. Fr., *huile de faine*. Ger., *Buchelöl*, *Bucheckeröl*. A yellow oil expressed from the nut of the *Fagus silvatica*. It has a feeble odor, a mild taste (somewhat acrid when heat is employed during the expression), and a sp. gr. of 0·921 to 0·923, and freezes at −17·5° C. It consists chiefly of olein with some stearin and palmitin, and is similar in preparation and uses to cotton-seed oil. [B, 86.]—**B. of Australia.** See *Australian b.*—**B. of New South Wales.** The *Monotoca elliptica*. [B, 19.]—**B.-tree.** See *B.*—**B.-wheat.** Buckwheat (the *Polygonum fagopyrum*). [B, 275.]—**Blue b.** The *Carpinus americana*. [B, 75.]—**Copper-colored b.** The *Fagus silvatica*, var. *cuprea*. [B, 275.]—**Dutch b.** The *Populus alba*. [B, 275.]—**Evergreen b.** The *Fagus betuloides*. [B, 185.]—**Horn-b., Horse-b., Horst-b.** The *Carpinus betulus*. [B, 275.]—**Indian b.** The *Pongamia glabra*. [B, 172.]—**Purple b.** The *Fagus silvatica*, var. *purpurea*. [B, 275.]—**Rusty-leaved b.** The *Fagus ferruginea*. [B, 185.]—**Seaside b.** A Jamaica name for the *Exostema caribæum*. [B, 19.]—**Water-b.** 1. The *Carpinus americana*. 2. The *Platanus occidentalis*. [B, 19, 275.]—**Weeping b.** The *Fagus silvatica*, var. *pendula*. [B, 275.]—**White b.** The *Carpinus betulus*. [B, 275.]

BEECH-DROPS, n. Bech'dro^{2}pz. 1. An American name for the genus *Epiphegus*. [B, 19.] 2. The *Orobanche virginiana*. [B.]—**Albany b.-d.** The *Pterospora andromedea*. [B, 34.]—**False b.-d.** An American name for the *Hypopitys lanuginosa*. [B, 19.]

BEEDUL (Beng.), n. The purple variety of the *Bauhinia variegata*. [B, 172.]

BEEF, n. Bef. Lat., *caro bovis* (seu *bovilla*), *bubula*. Fr., *bœuf*. Ger., *Rindfleisch*. The flesh of a full-grown bovine animal.—**B.-eaters.** The *Buphagineæ*. [L, 73.]—**B.-essence.** See *B.-tea*.—**B.-extract.** Lat., *extractum carnis* (seu *carnis bovinæ* [Greek Ph.], seu *carnis Liebig* [Ger. Ph., 1st ed.]). Fr., *extrait de viande*. Ger., *Fleischextract*. A brown, extract-like mass, of agreeable odor like that of cooked meat, readily soluble in water without turbidity; made, according to Liebig, by boiling minced lean meat with water, removing the fat and gelatin, and evaporating on a water-bath to the consistence of an extract. It should contain only 22 per cent. of water and not more than 18 per cent. of ash. It is composed of water, salt, osmazome, and other extractive principles. [B, 92, 95.]—**B.-fibre juice, B.-juice.** Lat., *succus carnis*. Fr., *bouillon de viande fortifiant pour malades*. Ger., *Fleischsaft*. The juice of b., either obtained by expression from raw b. or in the form of b.-tea (*q. v.*). A preparation recommended by Liebig is made by extracting 250 parts of chopped raw, lean b. with 250 parts of cold water acidulated with from 3 to 5 drops of hydrochloric acid, and containing from 1 to 1·5 part of common salt, and adding 250 parts of water to the extract. Sometimes the pulverized meat from which the juice has been extracted is added. In this variety all the nutritious elements of the b. are preserved. [B, 92.]—**B'steak-fungus.** The *Fistulina hepatica*. [B, 275.]—**B'steak-plant.** The *Begonia evansiana*. [B, 275.]—**B.-suet tree.** The *Shepherdia argentea*. [B, 275.]—**B.-tea.** Lat., *infusum carnis bubulæ*, *jusculum cum carne bovis*. Fr., *thé de bœuf de Liebig*. A strained decoction of b., to which salt or other condiments are added. The b. must be chopped fine and freed from fat as far as possible; then, either is heated on a water-bath without the addition of water, the resulting liquid being decanted and seasoned; or an equal weight of water is added, the mixture heated gently for several hours, and the liquid poured off and strained; or a rather greater amount of water is added and the whole boiled for a short time. In all cases the liquid is allowed to cool before being used, so that the fat and other impurities may be skimmed from the surface. Prepared in the first way (by slow digestion on a water-bath), it contains a good deal of the nutrient matter of the b.; as ordinarily prepared, it contains chiefly the extractive matters of the b., osmazome, salts, and flavoring matters, is held to possess stimulant properties, and is used as an appetizer and tonic in sickness when other food is refused, but the amount of actual nutriment contained in it is very small. [B, 92, 276; L.] See also *B.-juice*, *B.-extract*, and BOUILLON.—**B., wine, and iron.** See *Elixir of b., wine, and iron*.—**B'wood.** The genus *Casuarina*; in New South Wales, the *Stenocarpus salignus*; in Queensland, the *Banksia compar*. [B, 19.]—**B'wood family.** The *Casuarinaceæ*. [B, 185.]—**Borden's b.-biscuit.** Fr., *biscuit de viande*. Syn.: *Borden's meat-biscuit*. An article of food made by boiling lean meat, evaporating the decoction to a syrupy mass, adding enough wheat flour to make a dough, and baking. [G. Borden (B, 92, 137).] Cf. *Tablettes de* BOUILLON.—**Elixir of b., wine, and iron.** A preparation made by adding ¼ oz. (av.) of Liebig's extract of b., 256 grains of ammonio-citrate of iron, ½ fl. oz. of spirit of orange (1 to 10), 1½ fl. oz. of distilled water, and sufficient sherry wine to make 16 fl. oz. The iron salt is dissolved in the water, the extract is dissolved in the wine, the spirit of orange being added, and the two solutions are mixed. [A, 308.]—**Essence of b.** See *B.-tea*.—**Extract of b.** B.-tea, especially that form obtained by slow digestion on a water-bath. [B, 276.]—**Johnson's fluid b.** An extract of b. so made as to contain all the nutrient principles of the meat. The albumin and fibrin of the b. are removed, reduced to a powder, and added to the extract of b. prepared in the usual way. [B, 276.]—**Leube's b.-solution.** A preparation made by boiling 100 parts each of b. and water with 2 parts by volume of pure hydrochloric acid in a Papin's digester for from 10 to 15 hours, powdering the resulting mass, boiling again for from 15 to 20 hours,

neutralizing with potassium carbonate, and evaporating to a pulpy consistence. By this process the albuminous constituents of the b. are largely converted into peptone. Used where gastric digestion is defective, as in cancer and ulcer of the stomach, etc. [B, 276.]—**Liebig's b.-extract.** See *B.-extract.*

BEEJASAL, n. An East Indian name for the *Butea frondosa.* [B, 121.]

BEEL-JHUN-JHUN (Hind.), n. The *Crotalaria retusa.* [B, 172.]

BEEMBO (Bengal.), n. The *Cephalandra indica.* [B, 172.]

BEEN (Lat.), n. n. Be(be^2)'e^{2}n. See BEHEN.—**B. album officinarum, B. album Rannolfi.** See BEHEN *album.*—**B. magnum.** The nuts of the *Jatropha multifida.* [B, 180.]—**B. nux.** Fr., *noix de b.* Ger., *B'nuss.* See BEHEN *nut.*—**Folia b. rubri.** See *Folia* BEHEN *rubri.*—**Noix de b.** (Fr.). See BEHEN *nut.*—**Nuces b.** See *Nuces* BEHEN.—**Radix b. rubri.** See *Radix* BEHEN *rubri.*—**Red b., White b.** See under BEHEN.

BEENEL, n. Of Rheede, an evergreen Malabar plant, referred to *Croton racemosum.* The root, boiled in oil of sesame, is used for headache and obstinate pains in the limbs. [B, 88, 121.]

BEENGUNG (Ger.), n. Be^2-e^{2}ng'ung. Stricture, constriction. [L, 46.]

BEER, n. Ber. A.-S., *beor, bear.* Gr., *ζῦθος* (from *ζυμοῦν*, to leaven). Lat., *cerevisia, cervisia.* Fr., *bière* (1st def.), *brutolé* (2d def.), *brytolé* (2d def.). Ger., *Bier.* It., *birra* (1st def.), *brutoleo* (2d def.). 1. An alcoholic beverage made by infusing ("mashing") malt (generally barley-malt), with or without boiling, adding hops, and fermenting, either with or without the addition of yeast. The character of b. varies according to the character of the malt and the temperature at which the fermentation is conducted. At a high temperature, the latter goes on rapidly and chiefly at the top of the liquid ("top fermentation"); at a low temperature, it goes on at the bottom ("bottom fermentation"). B. contains water, alcohol (from 2·75 to 8 or even 12 per cent.), carbonic acid, extractive matters of malt and hops (including the narcotic principle of the latter), and a very small amount of acetic acid. Its sp. gr. is from 1·004 to 1·030. It is tonic and somewhat narcotic, aperient, and diuretic, acting also as an irritant upon the genito-urinary tract. See also ALE, PORTER, STOUT, BIER, and MALT. The term is also applied to any fermented liquor made from aromatic roots, plant-tops, and other vegetable substances. See SPRUCE *b.*, etc. 2. In pharmacy, a medicinal preparation having b. for a vehicle. For such preparations, see under the names of the respective drugs. [B.]—**Ague b.** See *Cerevisia* CINCHONÆ.—**Amber b.** A variety made from 1 part of pale malt and 3 parts of amber malt. [B, 199.]—**Antiscorbutic b.** See CEREVISIA *antiscorbutica.*—**Bark b.** See *Cerevisia* CINCHONÆ.—**Bavarian b.** Fr., *bière bavaroise.* Ger., *bayerisches Bier.* A variety made in Bavaria, both infusion and decoction being employed in the process, and the fermentation being conducted at a low temperature; rich in extractive matter. [B, 2, 46.]—**B.-flower.** The *Hydrophyllum virginicum.* ["Proc. of the Am. Pharm. Assoc.," xxix, p. 445 (B).]—**B.-heading.** The device of adding some substance to b. for the purpose of heightening its frothiness when poured out of one vessel into another. [B, 2.]—**B.-Springs.** A place in Oregon, where there are springs containing magnesium and calcium carbonates, sodium, magnesium, and calcium chlorides, and magnesium and calcium sulphates. [A, 363.]—**B. vinegar.** See under VINEGAR.—**B.-yeast.** See under YEAST.—**Belgian b.** Fr., *bière belge.* A variety fermented without yeast. [B, 46.]—**Bitter b.** Fr., *bière amère.* 1. A variety containing an excess of hops, giving it a bitter taste. See *East Indian* ALE. [B.] 2. See CEREVISIA *amara.*—**Cephalic b.** Fr., *bière cephalique.* It., *birra cefalica inglese.* A preparation made of 15 parts of valerian root, 10 of black-mustard seed, 5 each of rosemary flowers and sage, 2 of serpentaria, and 20 of b.; used for headaches, stomachic debility, and hysteria. [B, 125.]—**Draught b.** Ger., *Schenkbier.* B. ready to be drawn for use, especially a variety containing less alcohol than lager bier, and not adapted for storage. [B, 132.]—**English b.** Fr., *bière anglaise.* Ger., *englisches Bier.* It., *birra inglese.* B. made in England. The malt extract is made by infusion only, and the fermentation is conducted at a high temperature. There are many varieties. [B.] See *Bitter b.*, *Small b.*, *Table b.*, STOUT, PORTER, and ALE.—**Flowers of b.** The *Saccharomyces mycoderma.* [B, 31.]—**Hard b.** B. in which nearly all the sugar and mucilage have been converted into alcohol by fermentation.—**Hopped b.** B. containing hops: ordinary b. [B, 199.]—**Medicated b., Medicinal b.** Lat., *cerevisia medicata.* Fr., *bière médicinale.* Ger., *Heilbier, medicinisches Bier.* It., *britoleo, brutoleo, britolatura, britolato, britolito, brutolato, brutolito.* See *B.* (2d def.)—**Lisbon diet-b.** See SARSAPARILLA *b.*—**Prophylactic b.** See under *Cerevisia* CINCHONÆ.—**Root b.** A term applied to fermented liquors made from roots and other parts of plants (spruce b., ginger b., etc.). [B, 138.]—**Small b.** Fr., *petite-bière.* It., *birra piccola.* A weak variety, made either by using a large amount of water in infusing the malt or by making the infusion with the residuum left after the stronger b. has been removed. [B, 2.]—**Stomachic b.** Lat., *cerevisia stomachica.* Fr., *bière stomachique.* A medicinal b. containing gentian (from 1·5 to 2 per cent.) with or without the addition of citron bark and canella, or, according to Quincy, of centaury tops, Roman wormwood, orange peel, angelica root, and Winter's bark. [B, 119, 199.] Cf. CEREVISIA *amara.*—**Strong b.** B. containing a considerable amount of alcohol. [A, 2.]—**Substantial b.** B. that is rich in malt extract. [A, 2.]—**Table b.** A weak variety containing much water and about 5 per cent. of malt extract; sp. gr., 1·025. [B, 199.]—**Wheaten b., Wheat-malt b.** Syn.: *mum.* B. made from wheat malt. [B, 199.]

BEERA-KAIDA, n. A Malabar name for the *Schœnus nemorum.* [B, 121.]

BEERCHEEN, n. Ber-chen'. One of the acini of a compound berry, such as those of the raspberry. [B, 198.]

BEERE (Ger.), n. Bar'e^2. A berry. [B.]—**Aechte B.** See BACCA *vera.*—**B'nähnlich.** Resembling a berry, baccate. [B, 123.]—**B'nartig.** Baccate (Lat., *baccaceus, baccæformis*). [B, 198.]—**B'nausschlag.** The morulus of Wallace (Irish button-scurvy). [Grünfeld (A, 319).]—**B'nbaster.** Berry-bearing lilies. [A, 315.]—**B'nbaum.** The American gooseberry (*Melastoma acinodendron*). [L, 46.]—**B'nblau.** A dye-stuff extracted from mulberries, elderberries, etc. [L, 46.]—**B'nbromen.** The blackberry (*Rubus fruticosus*). [L, 46.]—**B'nförmig.** Bacciform. [B, 123.]—**B'nfressend.** Baccivorous. [B, 131.]—**B'nfresser.** A baccivorous animal. [A, 315.]—**B'nfrucht.** See BACCA.—**B'nhaufen.** See SOROSIS.—**B'nholz.** The *Rhamnus frangula.* [B, 131.]—**B'nleimkraut.** The *Silene baccifera.* [L, 46.]—**B'nlilien.** See *B'nbaster.*—**B'nlorsche.** The Chinese tallow-tree (*Stillingia sebifera*). [B, 131.]—**B'nmelde.** The genus *Blitum.* [B, 131.]—**B'npfeffer.** The *Capsicum annuum.* [L, 43.]—**B'npflanzen.** Plants that bear berries. [B, 131.]—**B'npilze.** The *Clavaria.* [B, 131.]—**B'ntragend.** Bacciferous. [B.]—**B'nzapfen.** A galbulus. [B, 198.]—**B'nzwetsche.** The genus *Chrysobalanus.* [B, 131.]—**Falsche B., Unächte B.** See BACCA *spuria.*

BEERESCHE (Ger.), n. Bar'e^{2}sh-e^2. The *Sorbus* (*Pyrus*) *aucuparia.* [B, 131.]

BEERGELB (Ger.), n. Bar'ge^{2}lb. A yellow dye obtained from the juice of the hawthorn. [B, 131.]

BEERGRÜN (Ger.), n. Bar'gru^{6}n. The *Vinca minor.* [B, 131.]

BEERHEIDE (Ger.), n. Bar'hid-e^2. The *Empetrum nigrum.* [B, 131.]

BEERIG (Ger.), adj. Bar'i^{2}g. Baccate. [B, 198.]—**B'werdend.** *Baccans* (*q. v.*). [B, 123.]

BEERMELDE (Ger.), n. Bar'me^{2}ld-e^2. The genus *Blitum.* [B, 131.]

BEERSCHWAMM (Ger.), n. Bar'shwa^{3}m. Frambœsia. [G.]

BEERSHEBA SPRINGS, n. Be^2-u^{5}r'she^{2}b-a^3. A place in Grundy County, Tennessee, where there are chalybeate springs, situated in an attractive mountainous region. [A, 363.]

BEERSTRAUCH (Ger.), n. Bar'stra^3-uch^2. The *Sambucus niger.* [B, 131.]

BEERTIA (Hind.), n. The *Panicum italicum.* [B, 172.]

BEERWEIN (Ger.), n. Bar'vin. Inferior, weak wine. [A, 315.]

BEERWINDE (Ger.), n. Bar'vi^{2}nd-e^2. The genus *Convolvulus.* [L, 43.]

BEERWURZ (Ger.), n. Bar'vurtz. The *Athamanta cretensis.* [B, 131.]—**B'samen.** The fruit of *Athamanta cretensis.* [B, 92.]

BEERZUCKER (Ger.), n. Bar'tzuk-e^{2}r. Licorice juice. [L, 46.]

BEERZUD (Pers.), n. Galbanum. [B, 92.]

BEESHA, n. A Malay name for the *Melocanna bambusoidea;* adopted by Rheede as the name of a plant which is better referred to the genus *Ochlandra*, and by Kunth made the generic name for a species now referred to *Melocanna.* [B, 42, 172.]—**B. Rheedii** [Kunth]. See MELOCANNA *bambusoidea.*

BEE'S-NEST, n. Bez'ne^{2}st. The *Daucus carota.* [B, 275.]

BEESOM, n. Be'so^{2}m. The *Sarothamnus scoparius.* [B, 275.]

BEEST, BEESTIN, BEESTING, BEESTINGS, BEESTINING, BEESTINS, BEESTLING, BEEST-MILK, BEESTNYNG, BEESTNYNGE, BEESTYNG, n's. Best, Best'i^{2}n, -i^{2}ng, -i^{2}ngz, -i^{2}n-i^{2}ng, -i^{2}nz, -li^{2}ng, -mi^{2}lk, -ni^{2}ng, -ni^{2}ng, -i^{2}ng. See BIESTING.

BEESWAX, BEES'-WAX, n's. Bez'wa^{2}x. See under WAX.

BEET, n. Bet. A.-S., *beta, bete.* Lat., *beta.* Fr., *betterave.* Ger., *Beete, Mangold.* It., *bieta, bietola.* Sp., *acelga.* The genus *Beta*, especially the *Beta vulgaris.* [B.]—**B.-radish.** The *Beta vulgaris.* [B, 71.]—**B.-root sugar, B.-sugar.** See *Beet*-SUGAR.—**Chard b.** The *Beta cicla.* [B, 19.]—**Common b., Culinary b.** The *Beta vulgaris.* [B, 199.]—**Field b.** See *Hybrid b.*—**Garden b.** The *Beta vulgaris.* [B.]—**Hybrid b., Large-rooted b.** Lat., *Beta hybrida.* Fr., *bette* (ou *betterave*) *commune, racine d'abondance* (ou *de disette*). Ger., *Mangold, Mangoldwurzel, Mangelwurzel.* The mangelwurtzel (*Beta vulgaris*, var. *macrorrhiza*). [B, 185.]—**Red b.** The *Beta vulgaris.* [B, 199.]—**Sea b.** The *Beta maritima.* [B, 19.]—**Sicilian b.** The *Beta cicla.* [B, 19.]—**Sugar b.** Ger., *Rankelrübe.* The *Beta vulgaris*, var. *rapacea.* [B.]—**Swisschard b.** Fr., *poirée à carde.* A variety of the *Beta cicla* (*q. v.*). [B, 19.]—**Turnip b.** The *Beta vulgaris*, var. *rapa.* [B, 34.]—**White b.** 1. The *Beta cicla.* 2. The sugar b. [B, 185.]—**Yellow b.** A variety of the *Beta vulgaris.* [B, 185.]

BEET (Ger.), n. Bat. A bed (applied by Unna to the sheath of a hair). [H.]—**B'haar.** Unna's term for a hair that, after becoming detached from its papilla, takes root in the prickle cells, which form its external root-sheath (see under HAIR), where it continues to grow till dislodged by the upward growth of the young hair that afterward develops from the papilla. [G, 82.] Cf. *Papillen*HAAR.

BEETCHEN (Ger.), n. Bat'ch^{2}e^{2}n. The areola in a lichen. [B, 198.]

BEETKLIM, n. According to Bory, a Flemish name for the *Basella.* [B, 121.]

BEETLA, n. From *b.-codi* (*q. v.*). Of Endlicher, a section of the genus *Piper.* [B, 121.]—**B.-codi** (Malay). The *Chavica betel.* [B, 172.]

BEETLE, n. Betl. The common name for an insect of the order *Coleoptera.* [L, 86.]—**B.-weed.** The *Galax aphylla.* [B, 34.]—**Blister-b.** The *Cantharis vesicatoria.* [L, 130.]—**Blister-**

ing b's. A general term for various insects (*e. g.*, several species of *Mylabris*) having blistering properties. [J. O. Braithwaite, "Pharm. Jour. and Trans.," Sept. 3, 1887, "Am. Jour. of Pharm.," Oct., 1887, p. 516.]—**Oil b.** The *Meloe majalis.* [B, 97.]

BEFARIA (Lat.), n. f. Be(be^2)-fa(fa^3)'ri^2-a^3. See BEJARIA.

BEFASERT (Ger.), n. Be^2-fa^{3}z'e^{2}rt. In botany, fibrillose. [B, 198.]

BEFBASE, n. Of Avicenna, mace. [B, 121.]

BEFESTIGUNG (Ger.), n. Be^2-fe^{2}st'i^2-gung. A fastening. [A, 315.]—**B'sbinde.** See EPIDESMUM.

BEFFAICI (Ar.), **BEFFAIGI** (Ar.), n's. The *Polypodium vulgare.* [B, 92, 121.]

BEFLECKUNG (Ger.), n. Be^2-fle^{2}k'ung. A staining, pollution. [A, 315.]—**B. des Nachts, B. im Traume, Nachtliche B.** Nocturnal pollution. [L, 80.]

BEFLÜGELT (Ger.), adj. Be^2-flu^{6}g'e^{2}lt. See GEFLÜGELT.

BEFRAGUNG DER TODTEN (Ger.), n. Be^2-fra^{3}g'ung de^{2}r tot'e^{2}n. A post-mortem examination. [L, 80.]

BEFREUNDET (Ger.), adj. Be^2-froind'e^{2}t. Lit., friendly, akin; in botany, *cœnobiarius* or *etœnionarius* (*q. v.*). [B, 198.]

BEFRUCHTET (Ger.), adj. Be^2-fruch^{2}t'e^{2}t. Fecundated, impregnated. [B, 198.]

BEFRUCHTUNG (Ger.), n. Be^2-fruch^{2}t'ung. Fertilization, fecundation, impregnation. [A, 315; L, 80.]—**B'sboden.** The peltate variety of the antheridial disc in the *Hepaticæ.* [B, 198.]—**B'scanal.** See *B'skanal.*—**B'sfähig.** Capable of fecundating, fecund. [B, 198.]—**B'sfähigkeit.** Capability of fecundating or being fecundated.—**B'skanal.** 1. A small tube originating in the posterior end of the sperm sac and opening into the uterus in the *Cestodes.* [L, 182.] 2. The vagina. [L, 80.]—**B'skelch.** In botany, the perianth of fructification. [A, 315.]—**B'skolben.** An antheridium. [B, 198.]—**B'skugel.** A fruit-spore. [L, 228.]—**B'sorgane.** The organs of fructification; the sexual organs. [B, 198.]—**B'sröhre.** A pistil. [L, 46.]—**B'ssäule.** The gynostemium (columna genitalium) of orchids. [B, 198.]—**B'sschlauch.** A sac-like body protruded by the antheridium of *Fungi* and introduced into the substance of the oogonium. [B, 206.]—**B'sstaub.** Pollen. [B, 198.]—**B'sstoff.** The fovilla (of the pollen of phænogamous plants and of the antheridial sac of mosses). [B, 198.]—**B'sstuhl.** See THALAMUS *fructificationis.*—**B'stheile.** The reproductive organs. [L, 43.]—**B'sträger** [Nees]. A gonophore. [B, 198.]—**B'swerkzeug.** The reproductive apparatus. [L, 115.]—**Künstliche B.** Artificial fertilization. [L, 37.]—**Unmerkliche B., Verborgene B.** See CRYPTOGAMY.

BEFUND (Ger.), n. Be^2-fund'. The state or condition in which anything is found.—**Leichenb'.** The condition found at a post-mortem examination.

BÉGAIEMENT (Fr.), n. Ba-ge^2-ma^{3}n^2. Stuttering, stammering; improperly applied also to all forms of vicious articulation. [L, 41.]—**B. d'arrière.** Stuttering due to imperfection in the movement of the tongue from before backward. [L, 41.]—**B. d'avant.** A form attributed to an imperfection in the movement of the tongue from behind forward. [L, 41.]—**B. d'en haut.** A form attributed to an imperfection in the movement of the tongue from below upward. [L, 41.]—**B. des femmes.** See *B. labio-choréique muet.*—**B. difforme** [Deleau]. See *B. labial.*—**B. douloureux** [Deleau]. Stammering in which there is almost an impossibility of producing articulate sounds, although all the muscles of respiration are called into play. [Oré (L, 87).]—**B. fermé** [Becquerel]. A form in which the consonant is repeated several times, the lips being tightly closed, or the tongue pressed against the teeth. [Kussmaul (L, 20).]—**B. gutturo-convulsif** [Violette]. That form of stammering in which there are associated convulsive movements. [Oré (L, 87).]—**B. gutturo-tétanique.** A class made by Colombat characterized by a sort of tetanic spasm of the muscles of aspiration, particularly those of the larynx and pharynx. [Oré (L, 87).]—**B. gutturo-tétanique canin** [Colombat]. A variety in which the jerky repetitions sound like the barking of a dog. [Oré (L, 87).]—**B. gutturo-tétanique choréiforme** [Colombat]. B. gutturo-tétanique in which there are choreiform movements of the head, arms, and limbs, continuing only during attempts at articulation. [Oré (L, 87).]—**B. gutturo-tétanique épileptiforme.** B. gutturo-tétanique in which there are various epileptoid movements of the body. [Oré (L, 87).]—**B. gutturo-tétanique intermittent** [Colombat]. A variety in which there is an inability to articulate for a few instants, after which speech is fluent. [Oré (L, 87).]—**B. gutturo-tétanique mixte** [Colombat]. A variety having the characteristics of two or more of the other subdivisions. [Oré (L, 87).]—**B. gutturo-tétanique muet** [Colombat]. A variety in which the sounds are produced after several scanty successive aspirations are made. [Oré (L, 87).]—**B. labial** [Deleau]. Stammering in which there is very great difficulty in opening the mouth, with considerable facial distortion. [Oré (L, 87).]—**B. labio-choréique.** A division made by Colombat in which there is a succession, more or less rapid, of convulsive movements of the tongue, lower jaw, etc. [Oré (L, 87).]—**B. labio-choréique difforme.** A variety of b. l.-choréique in which there are convulsive movements of the muscles of the face, eyelids, brow, etc. [Oré (L, 87).—**B. labio-choréique lingual.** A variety accompanied with convulsive movements of the tongue. [Oré (L, 87).]—**B. labio-choréique loquace avec bredouillement.** A variety in which the person speaks quickly, stumbles over nearly all the syllables, and chops the words in two. [Oré (L, 87).]—**B. labio-choréique muet.** Stammering with convulsive movements of the tongue, lips, and lower jaw. [Oré (L, 87).]—**B. lingual** [Deleau]. Stammering due to irregular and improper movements of the tongue. [Oré (L, 87).]—**B. loquace** [Deleau]. See B. *lingual.*—**B. muet.** See B. *douloureux.*—**B. ouvert** [Becquerel]. A variety of the b. gutturo-tétanique in which the mouth remains open. [Kussmaul (L, 20).]

BEGATTUNG (Ger.), n. Be^2-ga^{3}t'tung. Copulation. [L, 135.]—**B'shinderniss.** An impediment to copulation.—**B'stheile.** The organs of copulation.—**B'strieb.** The sexual instinct. [A, 315.]—**B'swerkzeug.** See *B'stheile.*—**B'szeit.** In animals, the period of heat; in botany, the time of fecundation. [A, 315.]

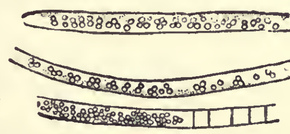
BÉGAYEMENT (Fr.), n. Ba-ge^2-i^2-ma^{3}n^2. See BEGAIEMENT.

BEGEHREN (Ger.), **BEGEHRUNG** (Ger.), n's. Be^2-ge^{2}r'e^{2}n, -ung. Appetite. [L, 80.]

BEGGAR'S-BASKET, n. Be^{2}g'ga^{3}rz ba^{3}s'ke^{2}t. The *Pulmonaria officinalis.* [B, 271.]

BEGGAR'S-BLANKET, n. Be^{2}g'ga^{3}rz bla^{2}n^2'ke^{2}t. The *Verbascum thapsus.* [B, 275.]

BEGGAR'S BUTTONS, n. Be^{2}g'ga^{3}rz bu^{3}t'to^{2}nz. The flower-heads of the *Arctium lappa.* [B, 275.]



BEGGAR'S-LICE, n. Be^{2}g'ga^{3}rz lis. See BEGGAR-TICKS.

BEGGAR'S-NEEDLE, n. Be^{2}g'ga^{3}rz nedl. The *Scandix pecten.* [B, 275.]

BEGGAR-TICKS, n. Be^{2}g'gar ti^{2}x. 1. An American name for the *Bidens frondosa* and the *Bidens connata.* 2. The *Cynoglossum Morisoni.* [B, 19, 34.]

BEGGAR-WEED, n. Be^{2}g'ga^{3}r wed. A name applied to various troublesome weeds, especially the *Polygonum aviculare.* [B, 245.]

BEGGIATOA (Lat.). n. f. Be^{2}d-ji^2-a^3-to'a^3. From the name of F. S. Beggiato, an Italian botanist. A genus of *Schizomycetes*, established by Trevisan, consisting of long, straight, unbranched filaments (in the swarming stage, sometimes spiral), thicker than in the allied genus *Leptothrix*, and also distinguished by their containing sulphur in the form of strongly refracting granules. The *Beggiatoæ* possess the property of decomposing sulphur compounds with the evolution of hydrogen sulphide. They occur in both running and stagnant water which receives sewage or other refuse, in sulphur springs, upon mud, and upon animal and vegetable bodies. [B, 237, 238.]—**B. alba** [Vauch]. A species found in the waste water from sugar-manufactories, tanneries, etc., and in sulphur waters, forming a white, or yellowish white layer (the *barégine* or *glairine* of the French); in the adult state also found upon decomposing water plants, and dead insects. The filaments vary in thickness from 1 to 5 μ, and often exhibit a segmentation into long or short rod-form and into cocci. They pass under certain conditions into spiral form, and in the swarming stage become ciliated. They increase by division. [B, 237, 238.]—**B. alba,** var. *marina* [Cohn]. Syn.: *B. Oerstedtii.* A variety of *B. alba* distinguished from the ordinary kind by its occurrence in sea-water, and by its smaller size (thickness only 2 μ). [B, 73.]—**B. arachnoidea.** A species occurring in swamp and sulphur waters forming thick jointed motile rods. [B, 30, 206.]—**B. leptomitiformis** [Meneghi]. A variety of *B.*, 1·8 μ thick, occurring in sulphur water, referred by Zopf to *B. alba.* [B, 30, 206.]—**B. marina** [Cohn]. The *B. alba*, var. *marina.* [B. 237.]—**B. minima.** An actively motile marine species attaining a length of no more than 40 μ. [B, 30, 206.]—**B. mirabilis** [Cohn]. A species occurring as a white layer in sea-water, in sea-mud, and on marine plants and decomposing animal substances, distinguished by its very great size. By septation, it is converted into almost isodiametric particles. [B, 237, 238.]—**B. multisepta.** See PRAGMIDIOTHRIX *multisepta.*—**B. nivea** [Rabenhorst]. A species occurring in sulphur springs, forming filaments 1·5 μ thick; referred by Zopf to *B. alba.* [B. 206, 237.]—**B. nodosa.** A filamentous vegetable organism assigned by Van Tieghem to the genus *B.*, but differing from true specimens of that genus in the absence of sulphur granules and in its lack of motility. It is distinguished by the nodosities which form at intervals along the filaments. [B, 73.]—**B. Oerstedtii** [Rabenhorst]. The *B. alba*, var. *marina.* [B, 73.]—**B. pellucida** [Cohn]. A species found in salt-water aquaria, composed of motile articulated filaments about 5 μ thick, translucent, and having only a few sulphur granules. [B, 73.]—**B. punctata** [Trevisan]. The *B. alba.* [B, 30.]—**B. roseo-persicina** [Zopf]. A species found frequently in excavations and pools, forming a red or violet covering. The filamentous form is like that of *B. alba*, and is distinguished from it only by its red color, due to the presence of bacteriopurpurin (*q. v.*). By division, it forms cocci, which are agglomerated into peculiar reticulate or lobulate zooglœa forms which are the *Clathrocystis roseo-persicina* [Cohn], or *Cohnia roseo-persicina* [Kützing], and the *Bacterium rubescens* of Lankester. These cocci are rounded or oval, 2·5 μ in diameter, reddish, filled with sulphur granules, and united into families each cell of which is surrounded by a special gelatinous envelope in addition to the general envelope which surrounds the whole family. The families form a solid mass at first, and then become hollowed out with the formation of cavities filled with water. The cocci develop into rod-forms, and, by the disappearance of the gelatin, both the cocci and the rods can take on the swarming stage. [B, 73, 237, 238.]—**B. tigrina** [Rabenhorst]. Syn.: *Oscillaria tigrina.* An organism classed, with doubtful propriety, among the *Beggiatoæ*; according to Zopf, only a variety of *B. alba.* It occurs in swamp-water, forming motile filaments from 3·5 to 4·5 μ thick. [B, 73, 206, 237.]

THE BEGGIATOA ALBA. (AFTER TROUESSART.)

BEGIERDE (Ger.), n. Be^2-gerd'e^2. Appetite, desire. [L, 135.]—**B. der Schwangeren.** See PICA.

BEGIESSUNG (Ger.), n. Be^2-ges'sung. Affusion. [L, 80.]

BEGMA (Lat.), n. n. Be^{2}g(bag)'ma^3. Gen., *beg'matos* (*-tis*). Gr., βῆγμα. 1. The act of coughing. [K.] 2. Matter coughed up. [Hippocrates (A, 311).]

BEGONIA (Lat.), n. f. Ba-go'ni^2-a^3. From *Bégon*, a French botanist. Fr., *bégonie*. Ger., *Schiefblatt*. A genus of begoniaceous plants established by Linnæus, comprising herbs or shrubs with alternate, inequilateral, variously lobed or parted, dentate leaves. The male flowers are composed of a perianth of two outer sepaloid leaflets and two inner petaloid leaflets (the latter sometimes many or none), and of numerous stamens; the female flowers, of a perianth of two large outer sepaloid leaflets and four inner petaloid leaflets, and an ovary divided into from two to five (generally three) loculi, and with as many bifid styles as there are loculi. The fruit is generally a three-angled and three-winged capsule containing from two to five loculi, and loculicidal or septicidal below the apex or along its whole length; or, more rarely, is a berry. [B, 42.]—**B. acetosa** [Vell.]. A species known only by name. [B, 214.]—**B. acida** [Martius]. A Brazilian shrub. [B, 214.]—**B. acuminata** [Dryand]. Syn.: *Platycentrum hamiltonianum* [Miquel], *Tittelbachia hamiltoniana* [Regel]. A suffruticose species growing in Jamaica and cultivated in England. The leaves are highly acid, and are used in the preparation of an antiphlogistic and antiscorbutic beverage and as an emollient application to swellings. [B, 180, 214.]—**B. acutifolia.** 1. Of Jacquin, a species probably identical with *B. acuminata*. 2. Of Balbis, the *B. portoricensis*. [B, 180, 214.]—**B. anemonoides** [Azara]. A Mexican species known only by name; said to have a drastic root which is efficient in scrofula and syphilis. [B, 180, 214.]—**B. balmisiana** [Ruiz]. Syn.: *Knesebeckia balmisiana* [Klotzsch]. A Mexican species. The root is drastic, and is employed in scrofula and syphilis. [B, 180, 214.]—**B. bidentata** [Raddi]. A Brazilian undershrub. It contains much oxalic acid, and the leaf is eaten as a vegetable. The juice is reputed depurative and furnishes a refreshing drink. [B, 173, 180, 214.]—**B. brasila** [De Candolle]. The *B. hirtella*. [B, 214.]—**B. bulbifera** ["Herb. reg. ber."]. The *B. bulbillifera* of Link and Otto. [B, 214.]—**B. bulbillifera.** 1. Of Link and Otto, a Mexican species (the *yerba de la doncella* of the Mex. Ph.). The root is emetic and cathartic. [J. M. Maisch, "Am. Jour. of Pharm.," April, 1886, p. 168; B, 214.] 2. A variety of the *B. gracilis*. [B, 214.]—**B. capensis.** 1. Of Blanco, an acaulescent herb of the Philippine Islands. 2. Of Linnæus, *fil.*, the *B. diptera*. [B, 173, 214.]—**B. ciliata** [Kunth]. The *B. hirtella*. [B, 214.]—**B. cucullata** [Willdenow]. A Brazilian and Bolivian shrub. It contains much oxalic acid, and is used as a remedy in inflammatory and bilious affections, and especially in cystitis. [B, 173, 180, 214.]—**B. dasypoda** [Meissner]. The *B. hirtella*. [B, 214.]—**B. dipetala** [Graham]. A variety of the *B. malabarica* of Lamarck. [B, 212.]—**B. diptera** [Dryander]. An acaulescent species with a tuberous root, growing in the West Indies; said to have the same properties as the *B. bidentata*. [B, 173, 214.]—**B. discolor** [Blume, Aiton]. The *B. evansiana*. [B, 214.]—**B. diversifolia** [Graham]. A variety of the *B. gracilis*. [B, 214.]—**B. eriocaulis** [Vis.]. A variety of the *B. tomentosa* of Schott. [B, 214.]—**B. evansiana** [Andrews]. Syn.: *Diploclinium evansianum* [Lindley], *Knesebeckia discolor* [Klotzsch]. The *tsou-hoy-tong* of the Chinese and the *sjukaido*; a perennial herb growing in China and the West Indies and cultivated in Europe. It contains a large amount of oxalic acid. [B, 180, 214.]—**B. family.** See BEGONIACEÆ.—**B. geraniifolia** [Hooker]. Syn.: *Eupetalum tuberosum* [Klotzsch]. A Peruvian species; a perennial herb. [B, 214.]—**B. gracilis** [Kunth]. Sp., *yerba de la doncella* [Mex. Ph.]. A Mexican species of which a number of varieties are described. The tuberous root is emetic and cathartic. [J. M. Maisch, "Am. Jour. of Pharm.," April, 1886, p. 168; B, 214.]—**B. grandiflora.** 1. The *B. octopetala*. 2. Of Jacquin, a species probably identical with the *B. suaveolens*. [B, 214.]—**B. grandis** [Dryander]. The *B. evansiana*. [B, 214.]—**B. hæmatotricha** ["Hort. boiss."]. A variety of the *B. humilis* of the "Hortus kewensis." [B, 214.]—**B. hamiltonia** [Lehm.]. The *B. acuminata*. [B, 214.]—**B. hirsuta.** 1. Of Aublet, an esculent species growing in French Guiana. 2. Of the "Hortus kewensis," the *B. humilis*. [B, 180, 214.]—**B. hirtella** [Link]. An esculent species growing throughout tropical South America, having properties similar to those of *B. bidentata*. [B, 46, 173, 214.]—**B. humilis.** 1. Of the "Hortus kewensis," a species growing in Trinidad and St. Thomas, having properties like those of *B. bidentata*. 2. Of the "Bot. Register," the *B. suaveolens*. [B, 173, 214.]—**B. hydrophila** [Miquel]. A variety of the *B. malabarica* of Lamarck. [B, 212.]—**B. Langsdorffii** [De Candolle]. The *B. bidentata*. [B, 214.]—**B. lucida** [Haworth]. The *B. humilis* of the "Hortus kewensis." [B, 214.]—**B. macrophylla.** Of Lamarck, a species probably identical with the *B. suaveolens*. [B, 173.]—**B. macroptera** [Klotzsch]. Fr., *oseille sauvage*. A suffruticose species growing in Brazil, probably identical with Lindley's *B. pauciflora*, which has medicinal properties like those of *B. bidentata*. [B, 173, 214.]—**B. malabarica.** 1. Of Lamarck, the *tsjenia-narinampuli* of Rheede; an esculent species growing in India and Ceylon, from the leaves of which a vulnerary ointment is prepared. 2. Of Roxburgh, the *B. Roxburghii*. [B, 180, 214.]—**B. malvacea** [Klotzsch]. A perennial Brazilian species, perhaps identical with the *B. pauciflora* of Lindley, which has medicinal properties like those of the *B. bidentata*. [B, 173, 214.]—**B. martiana** [Link]. A variety of the *B. gracilis*. [B, 214.]—**B. Meyeri** [Klotzsch]. **B. Meyerii** [Otto, Dietrich]. The *B. tomentosa* of Schott. [B, 214.]—**B. minor** [Jacquin]. The *B. nitida*. [B, 214.]—**B. muricata** [Blume]. The *B. tuberosa* of Lamarck. [B, 214.]—**B. nitida** [Aiton, Dryander]. An esculent shrub of the West Indies; employed like *B. acuminata*. [B, 173, 214.]—**B. obliqua.** 1. Of Linnæus, in part, the *B. acuminata*. The *B. obliqua*, var. δ of Linnæus, is the *B. rotundifolia*. 2. Of L'Héritier, and of Klotzsch, the *B. nitida*. 3. Of Thunberg, the *B. evansiana*. 4. Of Velloz, an undetermined species. [B, 214.]—**B. octopetala** [L'Héritier]. Syn.: *B. grandiflora* [Knowl. and Weston], *Huszia octopetala* [Klotzsch]. An acaulescent herb with tuberous root growing in Peru, where the root is employed as a remedy for scurvy, pulmonary hæmorrhage, and bloody flux. [B, 46, 214.]—**B. odorata** [Willdenow]. The *B. suaveolens*. [B, 214.]—**B. pauciflora.** Probably the *B. macroptera* or *B. malvacea*. [B, 173.]—**B. platanifolia** [Graham]. A shrubby Brazilian species. [B, 214.]—**B. populifolia** [Kunth]. The *B. balmisiana*. [B, 214.]—**B. porteriana** [Fischer]. A variety of the *B. humilis* ["Hortus kewensis"]. [B, 214.]—**B. portoricensis** [De Candolle]. Syn.: *B. acutifolia* [Balbis]. An undershrub growing on the banks of streams in Porto Rico. [B, 214.]—**B. pulchra** ["Herb. Schreber"]. The *B. nitida*. [B, 214.]—**B. purpurea.** Of Swartz, the *B. nitida*; of Plumier, the *B. suaveolens* of Ladd. [B, 173, 214.]—**B. reniformis** [Pavón]. A species included with the *B. balmisiana*. [B, 214.]—**B. rex** [Putzeys]. An acaulescent perennial species indigenous to Assam. [B, 214.]—**B. rigida** [Regel]. Syn.: *Gurltia rigida* [Klotzsch]. A Brazilian undershrub. [B, 214.]—**B. roseo flore, folio orbiculari** [Plumier]. The *B. rotundifolia*. [B, 214.]—**B. rotundifolia** [Lamarck]. A perennial creeping herb indigenous to the West Indies, and esculent. [B, 180, 214.]—**B. Roxburghii** [De Candolle]. A perennial herbaceous species growing in India. [B, 214.]—**B. sinensis** [De Candolle]. The *B. evansiana*. [C. B. Clarke (B, 212).]—**B. spathulata** [Ladd], **B. spatulata** [Ladd]. The *B. cucullata*. [B, 214.]—**B. speciosa** ["Hort. Van Houtte"]. The *B. nitida*. [B, 214.]—**B. suaveolens** [Ladd]. 1. A species growing in Guadeloupe and San Domingo, and cultivated in gardens; it is probably identical with the *B. macrophylla* of Lamarck which has medicinal properties like those of the *B. octopetala*. 2. The *B. nitida* of Klotzsch. [B, 214.]—**B. tomentosa.** 1. Of Schott, the *Gurltia tomentosa* [Klotzsch]. A shrubby species growing in Brazil, employed like *B. octopetala*. 2. Of the "Hort. kewensis," the *B. rigida*. [B, 46, 173, 214.]—**B. tuberosa.** 1. Of Heyene, the *B. dipetala*. 2. Of Pavón, the *B. bulbillifera* [Link and Otto]. 3. Of Ruiz, the *B. geraniifolia* [Hooker]. 4. Of Wallich, the *B. malabarica* [Lamarck]. 5. Of Lamarck, a creeping, esculent herb of the Moluccas. [B, 180, 214.]—**B. ulmifolia** [Willdenow]. A Brazilian shrub, esculent and having properties similar to those of the *B. bidentata*. [B, 173, 214.]—**B. undulata** [Schott]. Syn.: *Gærdtia undulata* [Klotzsch] (seu *stenobotrys* [Klotzsch]). A Brazilian shrub. [B.]—**B. vaginans** [Vell]. The *B. tomentosa* [Schott].—**B. villosa.** 1. Of Garner, the *B. macroptera*. 2. Of Lindley, the *B. hirtella*. [B, 214.]

BEGONIACEÆ (Lat.), n. f. pl. Be^2-gon-i^2-a(a^3)'se^2(ke^2)-e(a^3-e^2). Fr., *bégoniacées*. 1. Of R. Brown, and subsequent writers, an order of apetalous (monochlamydeous) dicotyledons belonging to the begonial or cucurbital alliance [Lindley], and by some referred to the *Polygonaceæ*. By Bentham and Hooker referred to the *Polypetalæ* (series *Calyciflorœ*) cohort *Passiflorales*, and made to include herbs or shrubs with alternate or scattered stipulate leaves; monœcious asymmetrical flowers having a perianth divided into two or more segments which are either all petaloid or both petaloid and sepaloid, numerous stamens with adnate anthers, and inferior ovary usually three-angled or three-winged, and generally trilocular with placentæ springing from the inner angle of the loculus, and two to five usually bifid styles, free or connate at the base, and with capsular, rarely baccate, fruit, having numerous seeds with little or no albumen. It comprises, according to them, only *Begonia* and *Hilldebrandia*. 2. Of Klotzsch, a tribe of the *B.* (1st def.) belonging to the suborder *Stephanocarpeæ* comprising *Begonia* and twenty-nine other genera since included in the same genus. [B, 170.]

BEGONIACEOUS, adj. Be^2-gon-i^2-a'shu^{3}s. Lat., *begoniaceus*. Fr., *bégoniace*. Of or resembling *Begonia* belonging to the *Begoniaceæ*. [B, 19.]

BEGONIADS, n. pl. Be^2-gon'i^2-a^{2}dz. The *Begoniaceæ*. [B, 19.]

BEGONIALES (Lat.), n. m. pl. Be^2-gon-i^2-a(a^3)'lez(le^{2}s). Of Lindley, an alliance of epigynous exogens including the single order *Begoniaceæ*. [B, 170.]

BEGONIARIEÆ (Lat.), n. f. pl. Be^2-gon-i^2-a(a^3)-ri(ri^2)'e^2-e-(a^3-e^2). Of Dumortier, an order of the *Gynocephalœ*, comprising the single family *Begoniaceæ*. [B, 170.]

BEGONIDEÆ, BEGONIDIEÆ (Lat.), n's f. pl. Be^2-gon-i^{2}d'e^2-e(a^3-e^2), -i^{2}d-i(i^2)'e^2-e(a^3-e^2). Of Dumortier, a family of the *Fructitegmia*. [B, 170.]

BEGONIEÆ (Lat.), n. f. pl. Be^2-gon-i(i^2)'e^2-e(a^3-e^2). See BEGONIACEÆ (1st def.). [B, 170.]

BEGOON, n. See BEGUN.

BÉGOS, n. A Languedoc name of the *Lathyrus sativus*. [B, 121.]

BEGPOORA (Bengal, Hind.), n. The *Citrus medica*. [B, 172.]

BEGRANNT (Ger.), n. Be^2-gra^{3}nt'. See ARISTATE.

BEGRENZEN (Ger.), n. Be^2-gre^{2}ntz'e^{2}n. See DEMARCATION.

BEGRENZUNGSHAUT (Ger.), n. Be^2-gre^{2}ntz'ungs-ha^3-ut. The membrana limitans. [A, 317.]

BEGUAN, n. A sort of bezoar obtained from the iguana. [B, 88.]

BÈGUE (Fr.), adj. Be^{2}g. Pertaining to, or affected with, stuttering. [A, 385.]

BÉGUIL, n. An undetermined fruit of Sierra Leone. [Bory (B, 121).]

BEGUN (Bengal), n. The *Solanum melongena*. [B, 181.]

BEGÜNSTIGEND (Ger.), adj. Be^2-gu^{6}nst'i^{2}g-e^{2}nd. Adjuvant.

BEHAART (Ger.). adj. Be^2-ha^{3}rt'. Hairy; in botany, pilose; in zoology, crinigerous. [A, 315; B, 198.]—**B'heit.** Hairiness. [A, 315.]—**B'werden.** See TRICHOSIS.

BEHAARUNG (Ger.), n. Be^2-ha^{3}r'ung. See TRICHOSIS.

BEHALMT (Ger.), adj. Be^2-ha^{3}lmt'. In botany, stalked, bladed. [L, 46.]

BEHÄLTER (Ger.), n. Be^2-halt'e^{2}r. A receptacle. [B, 198; L, 43.]—**B. des Herzens.** An auricle of the heart. [L, 80.]—**B. des Milchsaftes.** See RECEPTACULUM *chyli*.

BEHÄLTNISS (Ger.), n. Be^2-halt'ni^{2}s. A receptacle. [L, 80.]—**B'sehne.** A capsular ligament. [L, 80.]—**Crystallines B'band.** The capsule of the crystalline lens of the eye. [L, 80.]

BEHANDLUNG (Ger.), n. Be^2-ha^{3}nd'lung. Treatment, manipulation. [L, 46.]—**B'sart.** A method of treatment. [A, 315.]—**Scheinb'.** Pretended medical treatment; the use of placebos. [A, 315.]

BEHAR (Ar.), n. The *Capsicum annuum.* [B, 92.]

BEHARA, n. The *Terminalia bellerica.* ["Pharm. Jour. and Trans.," Aug. 24, 1878, p. 146 (B).]

BEHAUBT (Ger.), adj. Be^2-ha^3'ubt. In botany, calyptrate or galeate. [B, 198.]

BEHELMT (Ger.), adj. Be^2-he^{2}lmt'. In botany, galeate. [B, 198.]

BEHEM, BEHEMEN, n's. See Behen.

BEHEMOTHSZÄHNE (Ger.), n. pl. Ba'ha-mots-tzan-e^2. A name variously applied to the teeth of the walrus, the hippopotamus, and the narwhal, all of which were formerly used in medicine and as amulets. [B, 180.]

BEHEN (Lat.), n. n., indecl. Be(ba)'he^{2}n. From a name (also written *behem, behn, been,* and *ben*) given by the Arabs to the roots of various plants. 1. Of Hill, a genus of composite plants now referred to *Serratula.* 2. Of Mönch, a genus of plants now referred to *Silene.* [B, 170.]—**B. abiad.** See *White b.* (1st def.).—**B. abias.** The *Red b.* [B, 46.]—**B. ackmar.** Of the Arabians, probably the red b. [B, 121.]—**B. albi radix.** See *White b.* (1st def.).—**B. album** [Rauwolff], **B. album Rauwolfi.** See *White b.*—**B'anthe** (Ger.). See *B.*—**B'baum** (Ger.). The *Moringa pterygosperma.* [A, 315.]—**B'flockenblume** (Ger.). The *Centaurea b.* [B, 180.]—**B. Hamer** (Arab.). The *White b.* (1st def.). [B, 46.]—**Klimmender B.** (Ger.). The *Silene baccifera.* [B, 180.]—**B. nostratis radix.** The root of *Silene inflata.* [B, 97.]—**B'nuss** (Ger.). See *B. nut.*—**B'nussbaum** (Ger.). The *Moringa pterygosperma.* [B, 180.]—**B. nut.** Lat., *nuces b.* Fr., *noix de b.* Ger., *B'nuss.* The seeds of the *Moringa pterygosperma* (*q. v.*). [B, 181.]—**B.-nut oil.** Lat., *oleum b.* (seu *balatinum*). Ger., *B'öl.* The oil expressed from the seeds of the *Moringa pterygosperma.* It contains behenic acid, and was formerly employed as a purgative and anthelminthic, and externally in skin diseases. [B, 180.]—**B. radix.** Ger., *B'wurzel.* The root of *Centaurea b.* [B, 97.]—**B. rouge** (Fr.). See *Red b.*—**B. rubri radix.** The root of *Statice limonium.* [B, 97.]—**B. rubrum, B. rubrum limonium.** See *Red b.*—**B'säure** (Ger.). See Behenic *acid.*—**B'scharte** (Ger.). See Serratula *b.*—**B'wurzel** (Ger.). See *B. radix.*—**Folia b. rubri.** The leaves of *Statice limonium.* [B, 180.]—**Gemeine B'nuss** (Ger.). See *B. nut.*—**Gemeiner B.** (Ger.). See *Silene inflata.*—**Nuces B.** See *B. nut.*—**Oleum b.** See *B.-nut oil.*—**Radix b., Radix b. albi.** Ger., *weisse B'wurzel.* The root of *Centaurea b.* [B, 180.]—**Radix b. nostratis.** The root of *Silene inflata.* [B, 180.]—**Radix b. rubri, Red b.** Lat., *behen rubrum.* Fr., *b. rouge.* Ger., *rother B.* The root of *Statice limonium* (*q. v.*). [B. 121, 180.]—**Weisse B'wurzel** (Ger.). The root of *Centaurea b.* [B, 180.]—**White b.** Fr., *b. blanc.* Ger., *weisse B'wurzel* (1st def.), *weisser B.* 1. Of the Arabs, probably the root of *Centaurea b.* [B, 121, 180.] 2. The *Silene inflata,* the root of which is often substituted for that of the *Centaurea b.* [B, 121, 180.]

BÉHEN (Fr.), n. Ba-ha^{3}n^2. See Behen.—**B. à mouche.** The *Cucubulas* (*Silene*) *otites.* [B, 173.]—**B. baccifère.** See Silene *baccifera.*—**B. blanc.** See *White b.*—**B. commune.** See Silene *inflata.*

BEHENANTHA (Lat.), n. f. Be(ba)-he^{2}n-a^{2}n(a^{3}n)'tha^3. According to Otth, a section of the genus *Silene.* [B, 214.]

BEHENIC, adj. Be^2-he^{2}n'i^{2}k. Fr., *béhénique* (ou *bénique*). Derived from Behen. [B.]—**B. acid.** Fr., *acide béhénique.* Ger., *Behensäure.* Syn.: *benic acid.* A monobasic acid, $C_{22}H_{44}O_2$, obtained from behen-nut oil; regarded by Heintz as a mixture of palmitic and myristic acids. [B, 4, 5.]

BEHENOLIC ACID, n. Be^2-he^{2}n-o^{2}l'i^{2}k. Fr., *acide béhénolique.* Ger., *Behenolsäure.* A monobasic crystalline acid of the composition of behenic acid less four atoms of hydrogen: $C_{22}H_{40}O_2 = C_{21}H_{39} - COOH$. [B, 4.]

BEHENOXYLIC ACID, n. Be^2-he^{2}n-o^{2}x-i^{2}l'i^{2}k. Fr., *béhénoxylique.* Ger., *Behenoxylsäure.* A monobasic crystalline acid of the composition of behenolic acid with ten atoms of oxygen added: $C_{22}H_{40}O_4 = C_{21}H_{39}O_2 - CO.OH$. [B, 4.]

BEHAFER (Ger.), n. Ba'ha^{3}f-e^{2}r. The *Avena fatua.* [L, 43.]

BEHK-SÚS (Pers.), n. The root of the *Glycyrrhiza glabra.* [J. E. T. Aitchison, "Pharm. Jour. and Trans.," Dec. 11, 1886, p. 465, "Am. Jour of Pharm.," Jan., 1887, p. 38.]

BEHMEN, n. See Behen (1st def.).—**B. abiad, B. abias,** n's (Ar.). See *White* behen (1st def.).—**B. abiad Arabum.** See *White* behen (1st def.).—**B. ackmar.** See *Red* behen.

BEHN, n. See Behen.—**Nuces b.** See Behen *nut.*

BEHÖCKERT (Ger.), adj. Be^2-hu^{5}k'e^{2}rt. In botany, gibbous. [B, 198.]

BEHOOR-BAUSH (Bengal.), n. The *Bambusa spinosa.* [B, 172.]

BEHR (Ar.), n. Dyspnœa. [L, 83.]

BEHÜLFLICH (Ger.), adj. Be^2-hu^{6}lf'li^{2}ch^2. Adjuvant. [A, 315.]

BEHURA (Bengal.), n. The *Terminalia bellerica.* [B. 172.]

BEHUTET (Ger.), adj. Be^2-hut'e^{2}t. In botany, pileate. [B, 198.]

BEIAHALALEN (Ar.), n. The *Sempervivum tectorum.* [B, 121.]

BEIBLATT (Ger.), **BEIBLÄTTCHEN** (Ger.), n's. Bi'bla^{3}t, -blat-ch^{2}e^{2}n. See Amphigastrum.

BEID-EL-OSSAR (Ar.), n. See under Beidelsar.

BEIDELSAR. A corruption of Ar., *beid-el-ossar.* A name, according to G. Bauhin, of certain Egyptian plants (probably the *Calotropis procera* and the *Asclepias Cornuti*), the fruits of which were called by the Arabs *beid-el-ossar* (eggs of ossar), ossar being probably the name of any asclepiadaceous plant. It was used as a substitute for amadou and silk; the pappus of the seeds was used to make mattresses; and the milky juice was applied to ulcers. [Fournier (B, 121).]

BEIDLEBIG (Ger.), adj. Bid'lab-i^{2}g. Amphibious. [L, 30.]

BEIFALLSTRIEB (Ger.), n. Bi'fa^{3}ls-treb. In phrenology, love of approbation. [A, 315.]

BEIFUSS (Ger.), n. Bi'fus. The genus *Artemisia.* [B, 1.]—**Aehriger b.** (Ger.). See Artemisia *spicata.*—**Alpen-B.** See Artemisia *mutellina.*—**B'kohlen.** See *Carbones* artemisiæ *rubræ.*—**B'laus.** The *Aphis absinthii.* [L, 46.]—**B'wurzel.** The root of *Artemisia vulgaris.* [B, 180.]—**Geknäuelter B.** The *Artemisia glomerata.* [B, 180.]—**Gemeiner B.** Common artemisia; mug-wort (*Artemisia vulgaris*). [B, 180.]—**Gletscher B.** (Ger.). See Artemisia *glacialis.*—**Meerstrands-B.** (Ger.). See Artemisia *maritima.*—**Römischer B.** Roman wormwood (*Artemisia pontica*). [B.]—**Vahl'scher B.** The *Artemisia vahliana.* [B, 180.]

BEIGESCHMACK (Ger.), n. Bi'ge^2-shma^{3}k. An after-taste. [A, 315.]

BEIGNICOURT (Fr.), n. Be^{2}n-yi^2-kur. A village in the department of the Vosges, France, where there is a cold chalybeate spring. [A, 385; L, 105.]

BEIHÜLFE (Ger.), n. Bi'hu^{6}lf-e^2. An adjuvant. [L, 46.]

BEIKAMAN, n. The *Solanum coagulans.* [Forskål (B, 121).]

BEIL (Ger.), n. Bil. See Ascia.—**B'förmig.** Securiform. [B, 198.]—**B'füsser.** The *Lamellibranchiata.* [L.]—**B'kraut, B'kraut-Peltsche, B'kronwicke, B'pflanze.** The *Coronilla securidaca.* [L, 46, 80.]—**B'stein.** A renal calculus. [L, 80.]—**B'wurzel.** The *Iris versicolor.* [A, 315.]

BEILEHUI, n. See Beleyleh.

BEIMISCHEN (Ger.), **BEIMISCHUNG** (Ger.), n's. Bi'mi^{2}sh-e^{2}n, -ung. Admixture. [A, 315.]

BEIMUSKEL (Ger.), n. Bi'musk-e^{2}l. An accessory muscle. [A, 317.]

BEIN (Ger.), n. Bin. 1. See Bone. 2. The leg. [L, 46.]—**Accessorisches Schlüsselb'.** See *Coracoid* bone.—**Achselb', Armb'.** See Humerus.—**Backenb'.** See *Malar* bone.—**Bajonetb'.** A term used to describe the condition in which, in subluxation of the knee joint, the leg slips backward so that its long axis is posterior to that of the thigh. [L, 57.]—**Barbadosb'.** See Elephantiasis *Arabum.*—**Beckenwirbelb'.** See Sacrum.—**B'ader.** See *Crural* vein.—**B'ähnlich.** 1. Osseous. 2. Resembling a leg. [L, 46.]—**B'ansatz.** See Epiphysis.—**B'artig.** Osseous. [L, 46.]—**B'ausschnitt.** The excision of bone. [L, 80.]—**B'beule.** The formation of pus in a bone or between the bone and the periosteum, also an exostosis. [A, 301, 317.]—**B'binde.** See Osteocolla.—**B'bindlade.** See *B'lade.*—**B'blätterlein.** An exfoliated piece of bone.—**B'blätterung.** Exfoliation of bone. [L, 46.]—**B'blume.** See Caltha *palustris.*—**B'brand.** Necrosis of bone. [L, 80.]—**B'brech.** See Osteocolla.—**B'brechährenlille, B'brechgras.** See Narthecium *ossifragum.*—**B'bruch.** A fracture, especially one of the leg. [L, 80.]—**B'bruchheilend.** Serviceable in cases of fracture. [L, 46.]—**B'brüchig.** Having a broken leg. [L, 46.]—**B'bruchlade.** See Splint.—**B'bruchmaschine.** An apparatus for treating fractures, especially those of the legs. [L, 135.]—**B'bruchschwebe.** A suspensory apparatus for treating fractures. [L, 30.]—**B'bruchstein.** See Lapis *osteocollæ.*—**B'bruchwurzel.** The *Symphytum officinale.* [B, 180.]—**B'chen.** See Ossicle.—**B. des Hinterhaupts, B. des Hinterschiffs.** See *Occipital* bone.—**B. des viertes Paares.** See *Superior* maxilla.—**B'e des Zwerchfells.** The pillars of the diaphragm. [L, 80.]—**B'dürr.** Greatly emaciated. [L, 46.]—**B'ern.** Osseous. [L, 80.]—**B'erzeugung.** See Ossification.—**B'fäule, B'fäulniss.** See Caries and Necrosis.—**B'feile.** A bone file. [L, 80.]—**B'fleisch.** See Callus.—**B'frass.** See *B'fäule.*—**B'frässig.** In botany, carious. [B. 198.]—**B'fresser.** See *B'krebs* and Necrosis.—**B'fuge, B'fügung.** A suture. [L, 43.]—**B'gerippe, B'gerüste.** A skeleton. [L, 46.]—**B'geschwulst.** See Exostosis.—**B'gestell.** See *B'gerippe.*—**B'gewächs.** See Exostosis.—**B'glas.** Translucent (white) glass. [L, 30.]—**B'gras.** See Narthecium *ossifragum.*—**B'gruft.** A sinus in a bone. [L, 80.]—**B'halter.** An apparatus for holding the lower limbs in a certain position (*e. g.,* the lithotomy position).—**B'hart.** Hard like bone, osseous. [L, 43.]—**B'haut, B'häutchen.** See Periosteum.—**B'hautentzündung.** See Periostitis.—**B'hautgeschwulst.** See Periosteophyte.—**B'hautkrebs.** Cancer of the periosteum. [L, 135.]—**B'häutlein.** See Periosteum.—**B'hautnecrosirung.** Necrosis or sloughing of the periosteum. [L, 30.]—**B'hautpanaritium.** See Paronychia *periostei.*—**B'hautwucherung.** See Periostosis.—**B'hebel, B'heber.** See *Bone* elevator.—**B'heil.** See *B'well.*—**B'höhle.** An articular cavity. [L, 46.]—**B'holz.** See Lonicera *xylosteum.*—**B'icht.** Bony. [L, 46.]—**B'ig.** Bony; in composition, having legs. [L, 46.]—**B'kehle.** The popliteal fold. [A, 301.]—**B'knopf, B'knorren.** A condyle. [L, 80.]—**B'knoten.** Osteophytes. [L, 135.]—**B'kohle.** See *Bone* black.—**B'kopf.** See Condyle.—**B'krampf.** A cramp in the leg. [L, 80.]—**B'körper.** A skeleton. [L, 80.]—**B'krebs.** See *Osteo*carcinoma.—**B'lade.** See Splint.—**B'lehre.** See Osteology.—**B'lein.** See Ossicle.—**B'los.** Without bone. [L, 43.]—**B'machend.** See Catagmatic.—**B'mark.** Marrow. [L, 80.]—**B'mehl.** Bone ash. [L, 30.]—**B'naht.** See Suture.—**B'narbe.** See Callus.—**B'nerv.** The crural nerve. [A, 317.]—**B'ohren.** See Branchiostegi.—**B'öl.** Bone oil. [L, 46.]—**B'punkte.** Centres of ossification. [L, 80.]—**B'ritze.** A fissure of bone. [L, 46.]—**B'röhrholz.**

See Lonicera *xylosteum*.—**B'rüstung.** See Splint.—**B'säge.** A bone-saw. [L, 46.]—**B'samen.** The genus Lithospermum. [L, 46.]—**B'schiene.** See Splint.—**B'schmalz.** See *B'öl*.—**B'schwarz.** Bone black. [L, 30.]—**B'schrötig.** Causing injury to bone. [L, 30.]—**B'spalte.** A fissure of a bone. [L, 46.]—**B'spath.** Bone spavin. [L, 46.]—**B'stellung.** Any particular position of the legs.—**B'weh.** Pain in the bones. [L, 46.]—**B'well.** See the major list. **B'welle, B'wohl.** See Symphytum and Osteocolla.—**B'wuchs.** Ossification. [L, 46.]—**B'wurm.** See Dracunculus *medinensis*.—**B'zange.** A bone forceps. [L, 46.]—**Blättchenb'.** An intercalary bone. [L, 80.]—**Bodenb'.** See *Occipital* and *Sphenoid* bone.—**Breites B. des Rückgrats.** See Sacrum.—**Brustb'.** See Sternum.—**Darmb'.** See Ilium.—**Dickes B.** See Femur.—**Dreieckiges B., Dreiseitiges B.** See *Pyramidal* bone.—**Drittes B. des obern Kinnbackens.** The superior maxilla. [L, 80.]—**Drittes Keilb'.** See *External cuneiform* bone.—**Elfenb'.** 1. Ivory. 2. Dentin. [L, 219.]—**Elfenb'schwarz.** See *B'schwarz*.—**Erbsenb'.** See *Pisiform* bone.—**Erstes Keilb'.** See *Internal cuneiform* bone.—**Felsenb'.** A term applied by Meckel to the alisphenoid bone and by Rathke to the petrosal bone. [L, 27, 175.]—**Felsenartiges B.** The petrous portion of the temporal bone. [L, 43.]—**Felsiges B.** See *Temporal* bone (1st def.).—**Fersenb'.** See Calcaneum—**Feuchter B'frass.** See Caries *humida*.—**Fischb'.** Whalebone.—**Flügelb'.** See *Sphenoid* bone.—**Fusswirbelb'.** See Astragalus.—**Gaumenb'.** See *Palatal* bone.—**Gekräuselte B'e der Nasenlöcher.** The conchæ narium. [L, 80.]—**Gelenkb'.** See *Quadrate* bone.—**Grosses B. des Rückgrats.** See Sacrum.—**Grosses vieleckiges B.** See Trapezium.—**Grundb'.** See *Basilar* bone and *Spheno-occipital* bone.—**Gürtelb'.** See *Sphenethmoid* bone.—**Hakenb'.** See *Unciform* bone.—**Hakenschlüsselb'.** See *Coracoid* bone.—**Halbmondförmiges B.** See *Semilunar* bone.—**Hauptstirnb'.** See *Frontal* bone.—**Heiligenb', Heiliges B.** See Sacrum.—**Hinteraugenhöhlenb'.** See *Alisphenoid* bone.—**Hinterb'.** A posterior extremity. [L, 146.]—**Hinteres Keilb'.** See *Basisphenoid* bone.—**Hinteres Schlüsselb'.** See *Epicoracoid* bone.—**Hinteres Stirnb'.** See *Postfrontal* bone.—**Hinterhauptsb'.** See *Occipital* bone.—**Hinterhauptsb'körper.** See *Basioccipital* bone.—**Hinterkopfb'.** See *Occipital* bone.—**Hüftb'.** See Ilium.—**Jochb'.** See *Malar* bone, *Quadrate* bone, and *Suborbital* bone.—**Kahnb', Kahnförmiges B.** See *Scaphoid* bone.—**Keilb'.** 1. See *Sphenoid* bone. 2. See *Parasphenoid* bone. 3. A cuneiform bone of the hand or of the foot. [L, 175.]—**Keilförmiges B.** See *Sphenoid* bone and *Keilb'* (3d def.).—**Kleines vieleckiges (oder vielwinkeliges) B.** See *Trepezoid* bone.—**Knickb'.** See Genu *valgum*.—**Knöchelb'.** See Astragalus.—**Knollb'.** See Elephantiasis.—**Kopfb', Köpfiges B.** See Os *magnum*.—**Kreuzb'.** See Sacrum.—**Kreuzb' des Kopfes.** See Sacrum *capitis*.—**Kriechender B'wold.** See Symphytum *Clusii*.—**Kucucksb', Kukuksb'.** See Coccyx.—**Leistenb'.** See *Pubio-ischiadic* bone.—**Linsenähnliches B.** See *Sesamoid* bone.—**Lippenb'.** See *Labial* bone.—**Mangelhaftes B.** See *Temporal* bone (1st def.).—**Mittelfussb'e.** See *Metatarsal* bones.—**Mittelhandb'e.** See *Metacarpal* bones.—**Mittleres Brustb'.** See Gladiolus.—**Mondb', Mondförmiges B.** See *Semilunar* bone.—**Muschelb'e.** The turbinated bones. [L, 31.]—**Nagelb'.** See *Lacrymal* bone.—**Nahtb'.** See *Zwickelb'*.—**Nasenb'.** 1. See *Nasal* bone. 2. A name applied by Meckel to the turbinal bone of Owen. 3. Of Weideman and Rathke, see *Prefrontal* bone. [L, 27.]—**Nebenthränenb'.** See Os *lacrimale* accessorium.—**Oberarmb'.** See Humerus.—**Oberaugenhöhlenb'** [Meckel]. See *Supraorbital* bone.—**Obere B'haut der Hirnschale.** See Pericranium.—**Oberes Brustb'.** See Manubrium.—**Oberes Gelenkb'.** See *Hyomandibular* bone.—**Oberes Hinterhauptsb', Oberhinterhauptb'.** See *Supra-occipital* bone.—**Oberkieferb'.** See *Superior* maxilla.—**Oberschenkelb'.** The femur. [L, 115.]—**Officineller B'well.** See Symphytum *officinale*.—**Papiernes B.** See Os *planum*.—**Paukenb'.** See *Tympanic* bone.—**Pflugscharb'.** See Vomer.—**Pyramidenb'.** A cuneiform bone. [L, 117.]—**Quadratb'.** See *Quadrate* bone.—**Quadrato-Jochb'.** See *Quadrato-jugal* bone.—**Rabenb'.** See *Coracoid* bone.—**Riechb'.** See *Ethmoid* bone.—**Rippenschlüsselb'.** See *Costo-clavicular* ligament.—**Rollb'.** See Astragalus (3d def.)—**Rückb'.** The vertebral column. [L, 46.]—**Rückwirbelb'.** A dorsal vertebra. [L, 230.]—**Rundes B., Rundes Handwurzelb'.** See *Pisiform* bone.—**Schaufelförmiges B.** See Sacrum.—**Schamb'.** See *Pubic* bone.—**Scheideb'.** See Vomer.—**Scheitelb'** [Meckel]. See *Parietal* bone.—**Schenkelb'.** See Femur.—**Scherenartige B'stellung.** See *Cross-legged* progression.—**Schiffb'.** See Calcaneum and *Scaphoid* bone.—**Schläfeb', Schläfenb'.** See *Temporal* bone (1st def.).—**Schlossb'.** See *Pubic* bone.—**Schlüsselb'.** See Clavicle.—**Schoosb'.** See *Temporal* bone (1st def.).—**Schoosb'.** See *Pubic* bone.—**Schuppenb'.** See *Squamosal* bone (1st def.).—**Schuppenförmiges B.** See *Temporal* bone (1st def.).—**Schulterb'.** See Scapula.—**Schwanzb'.** See Coccyx.—**Schwertförmiges B.** See Sternum.—**Sehnenb', Sehnenb'chen.** A sesamoid bone. [L, 117.]—**Seitenwandb'.** See *Parietal* bone.—**Seitliches Reichb'.** See *Prefrontal* bone.—**Seitliches unteres Hinterhauptb'** [Meckel]. See *Exoccipital* bone.—**Sesamb', Sesamb'chen.** A sesamoid bone. [L, 117.]—**Sichelb'.** See *Interparietal* bone.—**Siebb', Siebförmiges B.** See *Ethmoid* bone. [L, 43, 117.]—**Sitzb'.** The ischium. [L, 117.]—**Speichenb'.** The radius. [L, 228.]—**Sprungb'.** See Astragalus.—**Steinichtes B.** See *Temporal* bone (1st def.).—**Steissb'.** See Coccyx.—**Stirnb'.** See *Frontal* bone.—**Stirnscheitelb'.** See *Fronto-parietal* bone.—**Thränenb'.** 1. See *Lacrymal* bone. 2. Of Meckel and Weideman, see *Postfrontal* bone.—**Trapezb'.** See Trapezium.—**Trapezoidb'.** See *Trapezoid* bone.—**Unbewegliches B. des Rückgrats.** See Sacrum.—**Ungenanntes B.** See *Innominate* bone.—**Unteraugenhöhlenb'.** See *Suborbital* bone.—**Unteres Gelenkb'.** See *Quadrate* bone.—**Unteres Muschelb'.** See *Inferior turbinated* bone.—**Untergelenkb'.** See *Quadrate* bone.—**Unterkieferb'.** See *Inferior* maxilla.—**Unterstes Brustb'.** The ensiform process of the sternum. [L, 204.]—**Unverschämtes B.** See *Frontal* bone.—**Urschlüsselb'.** See *Precoracoid* bone.—**Verbindungsb'.** See *Pterygoid* bone.—**Vielförmiges B., Vielgestaltes B., Vielwinkeliges B.** See Trapezium.—**Vorderb'.** An anterior limb. [L, 146.]—**Vorderes Keilb'.** See *Presphenoid* bone.—**Vorderes Schlüsselb'.** See *Coracoid* bone.—**Vorderes Stirnb'.** See *Antorbital* bone.—**Wadenb'.** See Fibula.—**Wandb'.** See *Parietal* bone.—**Wangenb'.** See *Malar* bone.—**Wespenb', Wespenförmiges B.** See *Sphenoid* bone.—**Wirbelb'.** See Astragalus (3d def.)—**Würfelb', Würfelförmiges B.** See *Cuboid* bone.—**Zahnb.'** See Dentin.—**Zitzenb'** [Meckel]. See *Mastoid* bone.—**Zungenb'.** 1. A term applied by Meckel to the uro-hyal bone. [L, 27.] 2. See *Hyoid* bone.—**Zweites Keilb'.** See *Middle cuneiform* bone.—**Zwickelb', Zwischenb'.** An intercalary bone, more particularly the interparietal bone. [L, 31.]—**Zwischenkieferb'** [Meckel]. See *Premaxillary* bone.—**Zwischenscheitelb'.** See *Interparietal* bone.

BEINERV (Ger.), n. Bi′ne^{2}rf. An accessory nerve. [A, 317.]

BEIORDNUNG (Ger.), n. Bi′o^{2}rd-nung. Co-ordination. [L, 46.]

BEISAMMENLIEGEND (Ger.), adj. Bi-za^{3}m′me^{2}n-leg-e^{2}nd. Conglobate (said of glands). [L, 46.]

BEISCH (Ger.), n. Bish. The *Ruscus aculeatus*. [L, 46.]

BEISCHLAF (Ger.), n. Bi′shla^{3}f. Cohabitation. [A, 315.]—**B'sfähigkeit.** Ability to copulate. [E. Hofmann (A, 319).]—**B'sunfähigkeit.** Sexual impotence. [E. Hofmann (A, 319).]

BEISCHMACK (Ger.), n. Bi′shma^{3}k. An after-taste. [A, 315.]

BEISICHTIG (Ger.), adj. Bi′zi^{2}ch^{2}t-i^{2}g. Near-sighted. [L, 46.]

BEISSBEERE (Ger.), n. Bis′bar-e^2. The genus *Capsicum*. [B, 180.]—**Jährige B.** The *Capsicum annuum*. [L, 80.]—**Kirschartige B.** The *Capsicum frutescens*. [L, 80.]

BEISSBEERFRUCHT (Ger.), n. Bis′bar-fruch^{2}t. The fruit of the *Capsicum annuum*. [L, 43.]

BEISSELBEERE (Ger.), n. Bis′se^{2}l-bar-e. The genus *Berberis*. [L, 43.]

BEISSEN (Ger.), n. Bis′se^{2}n. A bite; burning, itching. [L, 30, 80.]

BEISSEND (Ger.), adj. Bis′se^{2}nd. Biting, acrid. [L, 43, 80.]

BEISSKOHL (Ger.), n. Bis′kol. The *Beta vulgaris*, var. *cicla*. [B.]

BEISSMUSKELN (Ger.), n. pl. Bis′musk-e^{2}ln. The muscles of mastication. [L, 135.]

BEISSRÜBE (Ger.), n. Bis′ru^{6}b-e^2. See Beisskohl.

BEISSWURZ (Ger.), n. Bis′vurtz. The *Anemone pulsatilla* and the *Anemone pratensis* [B, 180.]

BEISSZAHN (Ger.), n. Bis′tza^{3}n. An incisor tooth. [A, 315.]

BEISSZANGE (Ger.), n. Bis′tza^{3}ng-e^2. A pair of tweezers. [L, 46.]

BEIST, n. Best. See Biesting.

BEISTEHER (Ger.), n. Bist′a-he^{2}r. The prostate. [L, 80.]

BEISTINGS, BEISTYN, n's. Best′i^{2}ngz, -i^{2}n. See Biesting.

BEIWOHNEN (Ger.), **BEIWOHNUNG** (Ger.), n's. Bi′von-e^{2}n, -ung. Cohabitation. [A, 315; L, 80.]

BEIZE (Ger.), n. Bitz′e^2. 1. Corrosion, maceration. 2. A mordant. [A, 315; Soyka (A, 319).]

BEIZELLE (Ger.), n. Bi′tze^{2}l-le^2. See under Zelle.

BEIZEND (Ger.), adj. Bitz′e^{2}nd. Corrosive, caustic. [L, 46.]

BEIZIEHER (Ger.), **BEIZIEHMUSKEL** (Ger.), n's. Bi′tze-he^{2}r, -musk-e^{2}l. An adductor muscle. [L, 80.]

BEIZKRAFT (Ger.), n. Bitz′kra^{3}ft. Corrosiveness. [A, 315.]

BEIZMITTEL (Ger.), n. Bitz′mi^{2}t-te^{2}l. A caustic or corrosive. [A, 315.]

BEIZWASSER (Ger.), n. Bitz′va^{3}s-se^{2}r. A fluid containing a caustic or a mordant. [L, 30.]

BEIZWURZ (Ger.), n. Bitz′vurtz. See Beisswurz.

BEJAR (Sp.), n. Ba-ha^{3}r′. A village in Spain, where there is a hot sulphurous spring. [A, 385; L, 105.]

BEJARIA (Lat.), n. f. Ba-ha^{3}r′i^2-a^3. From the name of *Bejar*, a professor at Cadiz. Syn.: *Befaria*. A genus of ericaceous plants established by Mutis, belonging to the tribe *Rhodoreæ*. [B, 121.]

BEJUCO (Sp.), n. Ba-hu′ko. A vine; especially, in the Antilles, the *Hippocratea scandens*, and, in the Philippines, the *Acacia scandens*. [B.]—**B. de agua.** Any vine that yields a potable liquid. [B, 121.]—**B. de estrella.** A Peruvian name for the *Aristolochia fragrantissima*. [B, 121.]—**B. de Mavacure.** A vine (perhaps a species of *Lasiostoma* or of *Rouhamon*) thought to furnish curare. [B, 121.]

BEJUGO (Sp.), n. Ba-hu′go. See Bejuco.

BEJUIO, n. See Bean *of Carthagena*.

BEJUXO, n. A Peruvian vine (perhaps a species of *Clematis*) having purgative properties. [Clusius (B, 121).] Cf. Bejuco.

BEKAMMT (Ger.), adj. Be^2-ka^{3}mt′. See Aristate.

BEKELCHT (Ger.), adj. Be^2-ke^{2}lch^{2}t′. Calycate. [B, 198.]

BEKEN, n. See Behen.

BEKION, n. See Bechion.

BEKLEIDET (Ger.), adj. Be^2-klid′e^{2}t. Clothed; in botany, *vestitus*. [B, 198.]

BEKLEIDUNG (Ger.), n. Be^2-klid′ung. A tunic; in botany, a *vestimentum*. [B, 198; L, 80.]

BEKLEMMUNG (Ger.), **BEKLOMMENHEIT** (Ger.), n's. Be^2-kle^{2}m-mung, -klo^{2}m'me^{2}n-hit. A sense of anxiety or oppression, especially within the chest. [D ; L, 46.]

BEKLOPFUNG (Ger.), n. Be^2-klo^{2}pf'ung. Percussion. [L, 30.]

BEKÖRNELT (Ger.), adj. Be^2-ku^{5}rn'e^{2}lt. In botany, granulate. [B, 198.]

BEKRÄNZT (Ger.), adj. Be^2-kre^{2}ntzt'. In botany, crowned (*coronatus*). [B, 198.]

BEKRUSTUNG (Ger.), n. Be^2-krust'ung. Incrustation [L, 46.]

BEKYM (Ar.), n. Aphonia. [L, 83.]

BEL (Bengal., Hind.), n. The *Ægle marmelos*, also the *Crœtava religiosa.* [B, 172.]

BELA (Lat.), n. f. Be(ba)'la^3. Fr., *béla.* See ÆGLE *marmelos.*—**Belæ fructus** [Br. Ph.]. Ger., *B'frucht.* Bael fruit ; the dried half-ripe fruit of the *Ægle marmelos*, used as a remedy for dysentery and diarrhœa. [B.]—**B'frucht** (Ger.). See *Belæ fructus.*—**Extractum belæ liquidum** [Br. Ph.]. Fr., *extrait liquide de béla.* Ger., *flüssiges B'extract.* A preparation made from 1 lb. of b. fruit, 12 imperial pints of distilled water, and 2 fl. oz. of rectified spirit. The fruit is macerated in one third of the water, then in the second third, and then in the remaining third, for an hour ; the marc is then pressed, and the liquors are mixed and filtered through flannel, and the mixture is evaporated to 14 fl. oz. When it is cold, the spirit is added. [A, 308.]

BELA (Hind.), n. The *Jasminum sambac.* [B, 172.]

BELA-AYE, n. Syn.: *Oxyanthus cymosus* [Reichenbach], *Cinchona afro-indica* [Will.], *Cinchona mauritiana* [Stadm]. 1. An undetermined tree of Madagascar from the bark of which a sort of beer is made. [B, 121.] 2. The bark of *Mussœnda landia ;* said to have antiperiodic properties, to closely resemble *Cinchona b.*, and to have a bitter astringent taste. Efficacious in the cure of diarrhœa. [B, 270 ; L, 84.]—**B.-a. cortex.** Ger., *B.-a'rinde.* The bark of the b.-a. [L, 84.]

BELA-DAMBOE, n. A convolvulaceous plant, perhaps a species of *Ipomœa*, a decoction of which, mixed with oil and ginger, is used in India for the bites of mad dogs. [B, 121 ; L, 105.]

BÉLADAMBRÉ (Fr.), n. Ba-la-da^{3}m-bra. See BELA-DAMBOE.

BELAH (Ar.), n. The date. [B, 121.]

BELAHÉ, n. See BELA-AYE.

BELAHUEN, n. A section of the genus *Haplopappus.* [B, 42.]

BELAMCANDA, n. Syn.: *B. chinensis* [Redouté], *B. punctata* [Mönch]. The *Ixia* (*Pardanthus*) *chinensis.* [B, 173.]

BELAM-CANDA-SCHULARMANI (Malay), n. See BELAMCANDA.

BELA-MODAGAM, n. The *Scœvola Koenigii*, the leaves of which are said to be diuretic. [A, 385.]

BELANCANDA (Tamil), n. The *Pardanthus chinensis.* [B, 172.]

BELANCODAGAM, n. Of Rheede, the *Scœvola Koenigii.* [B, 121.]

BELANDRE (Fr.), n. Be^{2}l-a^{3}ndr. A caisson provided with curtains for the transportation of wounded soldiers. [L, 41.]

BELANGEREÆ (Lat.), n. f. pl. Be^{2}l-a^{2}nj(a^{3}ng)-e^{2}r'e^2-e(a^3-e^2). Of Lindley, a tribe of the *Cunoniaceœ.* [B, 170.]

BELA-POLA, n. The *Epidendrum scriptum.* [B, 121.]

BELA SCHORA, n. A variety of the *Lagenaria vulgaris.* [B, 121.]

BELASSAN (Ar.), n. The *Sambucus nigra.* [L, 77.]

BELASTUNG (Ger.), n. Be^2-la^{3}st'ung. The loading of a muscle in physiological experiments. [Gruenhagen (K).]

BELAUBT (Ger.), adj. Be^2-la^3'ubt. Foliate. [A, 315.]

BELBELTA, n. An Abyssinian name for the *Celosia arvensis*, the flowering tops of which are used as a tæniacide by the Abyssinians. [B, 121 ; L, 49.]

BELBIDA, BELBIDAS, BELBILLA, n's. See BELBELTA.

BELCHONGUMMI (Ger.), n. Be^{2}l'ch^{2}on-gum-mi^2. See BDELLIUM.

BELDIBRUNNEN (Ger.), n. Be^{2}l'di^2-brun-ne^{2}n. A carbonated, chalybeate spring at Elöpatak (*q. v.*). [L, 57.]

BELDROEGA (Port.), **BELDROEGAS** (Port.), n's. Be^{2}l-dro'a-ga^3, -ga^{3}s. The *Portulacca oleracea.* [L, 77.]

BÈLE, n. In the Guernsey dialect, the *Berula angustifolia*, also a species of *Potamogeton.* [B, 121.]

BELEBEND (Ger.), adj. Be^2-lab'e^{2}nd. Stimulating, invigorating. [L, 80.]

BELEBER (Ger.), n. Be^2-lab'e^{2}r. See ANAPSYCTERIUM (2d def.).

BELEBTHEIT (Ger.), **BELEBUNG** (Ger.), n's. Be^2-labt'hit, -lab'ung. See ANIMATION.

BELEDAMBOE, n. See BELA-DAMBOE.

BELEDZAR (Ar.), n. The fruit of the *Semecarpus anacardium.* [Avicenna (B, 121).]

BELEGKNOCHEN (Ger.), n. Be^2-le^{2}g'kno^{3}ch^2-e^{2}n. See *Membrane*-BONES.

BELEGT (Ger.), adj. Be^2-le^{2}gt. Coated, furred. [L, 30.]—**B'sein.** Hoarseness. [L, 30.]

BELEGUNGSKÖRPER (Ger.), n. Be^2-le^{2}g'ungs-ku^{5}rp-e^{2}r. An accessory body. [J.] See also *Nerve*-CELL.

BELEGUNGSKÖRPERCHEN (Ger.), n. Be^2-le^{2}g'ungs-ku^{5}rp-e^{2}r-ch^{2}e^{2}n. An accessory corpuscle. [J.] See also *Nerve*-CELL.

BELEGZELLE (Ger.), n. Be^2-le^{2}g'tze^{2}l-le^2. See *Parietal* CELL.

BELEIBT (Ger.), adj. Be^2-libt'. Corpulent. [L, 46.]

BELEIBTHEIT (Ger.), n. Be^2-libt'hit. Corpulence. [L, 46.]

BELEMCANDA, n. See BELAM-CANDA.

BELEMNITES (Lat.), n. m. Be^{2}l-e^{2}m-ni(ne)'tez(tas). Gen., *belemni'tœ.* Gr., βελεμνίτης (from βέλεμνον, a dart). Fr., *bélemnile.* Ger., *Belemnit.* A genus of the *Belemnitidœ*, the shell of which was formerly used in medicine. [L.]

BELEMNITIDÆ (Lat.), n. f. pl. Be^{2}l-e^{2}m-ni^{2}t'i^{2}d-e(a^3-e^2). Fr., *Bélemnitidées.* An extinct family of the *Octopoda*, the shell of which consists of a pen, terminated posteriorly in a chambered cone, sometimes invested with a fibrous guard. The air-cells of the phragmacone are connected by a siphuncle close to the ventral side. [L, 227.]

BELEMNOID, adj. Be^{2}l'e^{2}m-noid. Lat., *belemnoides.* Fr., *bélemnoïde.* 1. Arrow-shaped. [L.] 2. As a n., the styloid process of the temporal bone and of the ulna. [L, 84.]

BELENIUM (Lat.), n. n. Be^{2}l-e^{2}n-i^2-u^{3}m(u^{4}m). See DORONICUM.

BELERICA, n. A Malabar name for a species of *Asclepias.* [B, 121.]

BEL-ERICU (Malay), n. A variety of the *Calotropis gigantea.* [B, 172.]

BELESON, n. Be^{2}l'e^2-so^{2}n. A barbarous term used for balsam. [L, 109.]

BELETTE (Fr.), n. Be^{2}l-e^{2}t. The *Mustela vulgaris.* [L, 105.]

BELEYLEH (Ar.), n. The *Myrobolani bellirici.* [B, 121.]

BELI, n. The *Ægle marmelos.* [B, 121.] See BAEL.

BELI-CARAGA (Malay), n. The *Cynodon dactylon.* [B, 171.]

BELIDES (Lat.), n. m. pl. Be^{2}l'i^{2}d-ez(as). Fr., *bélides.* A group of the family *Curculionides*, with the *Belus* for their type. A name applied by Schoenherr. [L, 180.]

BÉLIERS (Fr.), n. pl. Ba-li^2-a. Lat., *arietes.* A name given by Debuch to a family of the *Ammonacea*, having a back shaped something like a ram's horn. [L, 180.]

BELILLA (Malay), n. Fr., *bélilla.* 1. An Indian berry-bearing shrub ; the *Mussœnda frondosa.* [B, 172.] 2. A tree mentioned by Rheede, referred by Adanson to a distinct genus of the same name, and since referred to the genus *Mussœnda.* [B, 121.]

BÉLINGÈLE, BÉLINGILE, BÉRINGÈNE (Fr.), n's. Ba-la^{2}n^2-zhe^{2}l, -zhel, -zhe^{2}n. The *Solanum melongena.* [B, 121.]

BELION, n. The *Teucrium Polium.* [B, 121.]

BELIPATHÆGAS, n. 1. The *Hibiscus populneus.* 2. The *Thespesia populnea.* [B, 121 ; L, 105.]

BELKNAP HOT SPRINGS, n. Be^{2}l'na^{2}p. A place in Lane County, Oregon, where there are hot springs, with facilities for tub and vapor baths. [A, 363.]

BELL, n. Be^{2}l. A.-S., *belle.* Lat., *campana.* Fr., *cloche.* Ger., *Glocke.* It., Sp., *campana.* A metallic vessel designed to give out a ringing sound when struck ; any article or structure of like shape.—**American b.-flower.** The *Quamoclit vulgaris.* [B.]—**B.-animalcules, B.-animals.** See VORTICELLIDÆ.—**B.-flower.** The genus *Campanula*, also the *Canarina campanula.* [B, 19.]—**B.-glass.** A glass vessel shaped like a b. ; used as a cover to prevent drying, for the collection of gases, and as the receiver of an air-pump.—**B.-heather.** The *Erica tetralix.* [L, 73.]—**B.-jar.** See *B.-glass.*—**B.-metal.** See under METAL.—**B.-pepper.** See CAPSICUM *annuum.*—**B.-ragges.** Probably the *Nasturtium amphibium.* [L, 73.]—**B.-rose.** The *Narcissus pseudonarcissus.* [L, 73.]—**B.-shaped.** See CAMPANULATE.—**B.-trap.** See under TRAP.—**B.-wort, Canterbury b., Dumb-b.** See the major list.—**Electric dumb-b.** See under DUMB-BELL.

BELLADONA [Fr. Cod.] (Lat.), n. f. Be^{2}l-la^3-do'na^3. See BELLADONNA.—**Acetum belladonæ.** See *Acetum* BELLADONNÆ.—**Essentia belladonæ.** See *Tinctura* BELLADONNÆ.—**Extractum belladonæ alcoholicum.** See *Extractum* BELLADONNÆ *alcoholicum.*—**Extractum belladonæ aquosum.** See *Extractum* BELLADONNÆ *aquosum.*—**Glyceritum cum extracto belladonæ** [Fr. Cod.]. See *Glyceritum extracti* BELLADONNÆ.—**Infusum belladonæ.** See *Infusum* BELLADONNÆ.—**Oleum belladonæ.** See *Oleum* BELLADONNÆ.—**Oxymel belladonæ.** See *Oxymel* BELLADONNÆ.—**Pomatum cum extracto belladonæ** [Fr. Cod.]. See *Unguentum* BELLADONNÆ.—**Pomatum de b.** See *Unguentum* BELLADONNÆ.—**Raiz de b.** (Sp.). Belladonna root. [B.]—**Semillas de b.** (Sp.). Belladonna seeds. [B.]—**Syrupus belladonæ.** See *Syrupus* BELLADONNÆ.—**Syrupus de b.** [Fr. Cod.]. See *Syrupus* BELLADONNÆ.—**Tinctura belladonæ.** See *Tinctura* BELLADONNÆ.—**Tinctura belladonæ ætherea.** See *Tinctura* BELLADONNÆ *œtherea.*

BELLADONE (Fr.), n. Be^{2}l-la^3-don. See BELLADONNA.—**Acétolé de b.** See *Acetum* BELLADONNÆ.—**Alcoolature de b.** [Fr. Cod.]. A concentrated tincture made by digesting for ten days fresh belladonna leaves or root with an equal weight of alcohol, and filtering. [B, 113.]—**Alcoolé de b.** See *Tinctura* BELLADONNÆ.—**Baies de b.** Belladonna fruit. [B, 119.]—**Cigarettes de b.** [Fr. Cod.]. A preparation consisting of cigarettes each containing 1 gramme (15 grains) of dried belladonna leaves. [B, 113.]. Cf. CIGARETÆ *antiasthmaticœ.*—**Éléolé de b.** See *Oleum* BELLADONNÆ.—**Emplâtre de b., Emplâtre d'extrait de b.** [Fr. Cod.]. See *Emplastrum* BELLADONNÆ.—**Extrait alcoolique de feuilles de b.** See *Extractum* BELLADONNÆ *alcoholicum.*—**Extrait alcoolique de semences de b.** See under *Extractum* BELLADONNÆ *alcoholicum.*—**Extrait aqueux de feuilles de b.** See *Extractum* BELLADONNÆ.—**Extrait de b. (avec le suc)** [Fr. Cod.]. See *Extractum* BELLADONNÆ (1st def.).—**Extrait de b. (racine)** [Fr.

Cod.]. See *Extractum* BELLADONNÆ *alcoholicum* (2d def.).—**Extrait hydrolique de b.** See *Extractum* BELLADONNÆ *aquosum*.—**Feuilles de b.** [Fr. Cod.]. Belladonna leaves. [B, 113.]—**Glycéré d'extrait de b.** [Fr. Cod.]. See *Glyceritum extracti* BELLADONNÆ.—**Huile de b.** [Fr. Cod.]. See *Oleum* BELLADONNÆ.—**Hydrolé de b., Infusion de b.** See *Infusum* BELLADONNÆ.—**Liparolé de b.** See *Unguentum* BELLADONNÆ.—**Oxéolé de b.** See *Acetum* BELLADONNÆ.—**Oxymel de b.** See *Oxymel* BELLADONNÆ.—**Pilules de b.** [Ph. of the Fr. Mil. Hosp., 1839]. Pills containing each ½ grain of extract of belladonna with sufficient licorice to insure a proper consistence. [B, 119.]—**Pommade de b.** See *Unguentum* BELLADONNÆ.—**Poudre de b. (feuilles)** [Fr. Cod.]. Lat., *pulvis folii atropæ belladonæ* [Fr. Cod.]. A powder of belladonna leaves, made by drying the latter for some moments in an oven heated to 40° C., pulverizing and passing through a sieve of 120 meshes to the inch (French). [B, 113.]—**Poudre de b. (racine)** [Fr. Cod.]. Powdered belladonna root, prepared by cutting the latter into thin slices, drying in an oven, pulverizing, and passing through a sieve of 140 meshes to the inch (French). [B, 113.]—**Poudre de b. sucrée.** See *Sedative* POWDER.—**Racine de b.** [Fr. Cod.]. Belladonna root. [B, 113.]—**Semences de b.** [Fr. Cod.]. Belladonna seeds. [B, 113.]—**Sirop de b.** [Fr. Cod.]. See *Syrupus* BELLADONNÆ.—**Teinture de b.** See *Tinctura* BELLADONNÆ.—**Teinture éthérée de b.** [Fr. Cod.]. See *Tinctura* BELLADONNÆ *ætherea*.—**Vinaigre de b.** See *Acetum* BELLADONNÆ.

BELLADONÉ (Fr.), **BELLADONISÉ** (Fr.), adj's. Be^{2}l-la^3-do-na, -ne-za. Combined or mixed with belladonna. [B, 119.]

BELLADONLILIE (Ger.), n. Be^{2}l-la^3-don'li^{2}l-e. The *Amaryllis belladonna*. [L, 46.]

BELLADONNA (Lat.), n. f. Be^{2}l-la^3-do^{2}n'na^3. Fr., *belladonne* [Fr. Cod.], *belladone*. Ger., *Tollkirsche*, *Tollkraut*, *Wolfskirsche*. It., *belladonna* (from *bella*, f. of *bello*, beautiful, and *donna*, a woman, on account of the plant having been used as a feminine adornment), of which the Lat. is an adaptation. Sp., *belladona*. Deadly nightshade (*Atropa b.*); the official name in the U. S. Ph., and most of the other formularies. [A, 322; B]—**Abstract of b., Abstractum belladonnæ** [U. S. Ph.]. A preparation made by exhausting 200 parts of b. root with alcohol by maceration and percolation, reserving the first 170 parts of the percolate, evaporating the remaining portion to 30 parts, mixing this with the reserve portion, adding 50 parts of sugar of milk, evaporating to dryness, and adding enough sugar of milk to make the whole weigh 100 parts. [B, 5, 6.]—**Acetum belladonnæ.** Fr., *vinaigre* (ou *acétolé*, ou *oxéolé*) *de belladone*. A preparation made by macerating b. root 3 parts in vinegar 24 parts, and adding alcohol 2 parts to the strained infusion. [Würtzb. Ph., 1796 (B, 119).]—**Adeps papavere, hyoscyamo, et b. medicatus.** See POMATUM *populeum*.—**Aetherische B'tinctur** (Ger.). See *Tinctura belladonnæ ætherea*.—**Alcoholic extract of b.** See *Extractum belladonnæ alcoholicum*.—**Aqua belladonnæ** [Belg. Ph.]. A preparation made by distilling 500 parts of b. leaves, gathered from the wild plant before the time of flowering, with enough water to make 1,000 parts of distillate [B, 95.]—**Aqueous extract of b.** See *Extractum belladonnæ aquosum*.—**Baccæ belladonnæ.** See *B. fruit*.—**B'abstrakt** (Ger.). See *Abstractum belladonnæ*.—**B. baccifera.** See ATROPA *b.*—**B'extract** (Ger.). See *Extractum* BELLADONNÆ.—**Belladonnæ folia** (seu **folium**). See *B. leaves*.—**Belladonnæ radix** [U. S. Ph., Br. Ph.]. See *B. root*.—**B. fruit.** Lat., *baccæ belladonnæ* Fr., *baies de belladone*. The berries of the *Atropa b.* They resemble cherries in appearance and color, and are highly poisonous. [B.]—**B. juice.** Lat., *succus belladonnæ*. Fr., *suc de belladone*. Ger., *B'saft*. It., *succo di belladonna*. The juice of the *Atropa b.* [B.]—**B. laccifera** [Lamarck]. The *Atropa b.* [B, 180.]—**B. leaves.** Lat., *belladonnæ folia* [U. S. Ph., Br. Ph.], *folia belladonnæ* [Ger. Ph., Swiss Ph., Russ. Ph., Norweg. Ph., Swed. Ph., Belg. Ph., Finn. Ph.], *b.* [Austr. Ph., Hung. Ph., Netherl. Ph.]. Fr., *belladone* [Fr. Codex], *feuilles de belladone*. Ger., *Tollkirschenblätter*. It., *foglie di b.* Sp., *belladona* [Sp. Ph.], *hojas de belladona*. The leaves of the *Atropa b.*, collected before or during the time of flowering; they contain much atropine, although not so much as the root. [B, 5, 95.]—**B. lily.** Ger., *Belladonlilie*. The *Amaryllis*. [B, 19; L, 46.]—**B. liniment.** See *Linimentum belladonnæ*.—**B. majoribus foliis et floribus** [Tournefort]. The *Atropa b.* [B, 200.]—**B. ointment.** See *Unguentum belladonnæ*.—**B'pflaster** (Ger.), **B. plaster.** See *Emplastrum belladonnæ*.—**B. poultice.** See *Cataplasma* BELLADONNÆ.—**B. root.** Lat., *belladonnæ radix* [U. S. Ph.; Br. Ph.]. Fr., *belladone* [Fr. Cod.] *racine de belladone*. Ger., *Tollkirschenwurzel*, *B'wurzel*. It., *radice di b.* Sp., *raiz de belladona*. The root of *Atropa b.* It contains varying amounts of atropine. [B.]—**B'saft** (Ger.). See *B. juice*.—**B'sauerhonig** (Ger.). See *Oxymel* BELLADONNÆ.—**B. seeds.** Fr., *belladone* [Fr. Cod.], *semences de belladone*. Ger., *Tollkirschensamen*. It., *semi di b.* Sp., *semillas de belladona*. The seeds of *Atropa b.* They contain atropine. [B.]—**B'syrup** (Ger.). See *Syrupus belladonnæ*.—**B'tinctur, B. tinktur** (Ger.). See *Tinctura belladonnæ*.—**B. trichotoma** [Scopoli]. The *Atropa b.* [B, 180.]—**B'wurzel** (Ger.). See *B. root*.—**Cataplasma belladonnæ.** Sp., *cataplasma de belladona* [Sp. Ph.]. A poultice made with 1 part of b. leaves, 1 part of linseed-meal, and 6 parts of water. [B, 95.]—**Cigaretæ belladonnæ.** See *Cigarettes de* BELLADONE and CIGARETÆ *antiasthmaticæ*.—**Emplastrum belladonnæ** [U. S. Ph.; Br. Ph.; Ger. Ph., 1st ed.; Belg. Ph., 2d ed.; Swiss Ph., Netherl. Ph., Russ. Ph.], **Emplastrum cum extracto belladonnæ.** Fr., *emplâtre d'extrait de belladone* [Fr. Cod.]. Ger., *B'pflaster*, *Tollkirschenpflaster*. Sp., *emplasto de belladona*. B. plaster. That of the U. S. Ph. is prepared by exhausting 1 part of powdered b. root with alcohol by maceration and percolation, reserving the first 90 parts of percolate, evaporating the remaining 10 parts, adding them to the reserved portion, evaporating the mixture to the consistence of a soft extract, and adding enough resin plaster to bring the whole up to 100 parts. That of the Br. Ph. is made by triturating 3 oz. of extract of b. and 6 fl. oz. (= 5 parts by weight) of alcohol, evaporating the spirituous solution, and adding 3 oz. of resin plaster. That of the Fr. Cod. is made by mixing purified elemi 1 part, the *emplâtre diachylon gommé* 2 parts, and extract of b. root 9 parts. That of the Ger. Ph., 1st ed., was made by mixing 2 parts of powdered b. leaves with a melted mixture of 4 parts of yellow wax and 1 part each of turpentine and olive-oil. That of the Belg. Ph. is a mixture of 5 parts of extract of b., 2 of olive-oil, and 33 of plaster of Burgundy pitch. Other pharmacopœias order yellow-wax 16 parts [Ger. Ph.], 10 parts [Swiss Ph., Netherl. Ph.], or 3 parts [Russ. Ph.], colophony 3 parts [Swiss Ph.] or 1 part [Russ. Ph.], lead plaster 10 parts [Netherl. Ph.] or 20 parts [Russ. Ph.], olive-oil 4 parts [Ger. Ph.], 5 parts [Swiss Ph., Netherl. Ph.], 2 parts [Russ. Ph.], and turpentine 4 parts [Ger. Ph.] or 2 parts [Swiss Ph.], or 10 parts [Swiss Ph., Netherl. Ph., Russ. Ph.]. Formerly it was made also by boiling b. juice with an equal weight of linseed-oil, and adding yellow wax and a little Venice turpentine, and in other ways. [B, 95, 108, 113, 119.]—**Essentia belladonnæ.** See *Tinctura belladonnæ*.—**Extract of b.** See *Extractum belladonnæ*.—**Extract of b. leaves.** See *Extractum belladonnæ alcoholicum* (1st def.).—**Extract of b. root.** See *Extractum belladonnæ alcoholicum* (2d def.).—**Extractum belladonnæ.** Fr., *extrait de belladone (avec le suc)* [Fr. Cod.] (1st def.). Sp., *extracto de belladona* [Sp. Ph.] (1st def.). Syn.: *extractum belladonnæ aquosum* [Netherl. Ph.] (1st def.). 1. Of the Br. Ph. and Greek Ph., an aqueous extract of b. leaves with the young branches, made by heating and straining the expressed juice, inspissating on a water-bath, adding the chlorophyll that had been separated in the straining, and evaporating to a pilular consistence. The process of the Fr. Cod. is essentially the same, but without the addition of the chlorophyll. The Sp. Ph. directs a similar treatment of the fresh leaves or extraction of the dry leaves with the addition of cold water. The Greek Ph. directs that an extract of the consistence of honey be made from the juice of the fresh leaves mixed with a little water and boiled, and that this be mixed with a similar extract made by digesting the residue from the former process with hot water. In the process of the Netherl. Ph. the expressed juice is evaporated, with the addition of a little water, to the consistence of a thick extract. Similar preparations were official in a great number of the older formularies. 2. Of the Hung. Ph. and Norweg. Ph., the extractum belladonnæ siccum. 3. Of other pharmacopœias, the extractum belladonnæ alcoholicum. [B, 95, 113, 119.]—**Extractum belladonnæ alcoholicum.** Fr., *extrait de belladone alcoolique*, *extrait de belladone (racine)* [Fr. Cod.] (2d def.). Ger., *alkoholisches B'extract*, *B'extract* [Ger. Ph.] (1st def.). It., *estratto di b. alcoolico*. Sp., *extracto alcohólico de belladona* [Sp. Ph.] (1st def.). 1. Of the U. S. Ph. (the extractum belladonnæ of the Ger. Ph., Belg. Ph., Dan. Ph., Finn. Ph., Swiss Ph., Russ. Ph., and Swed. Ph.; the extractum belladonnæ spirituosum of the Netherl. Ph.), a preparation made from fresh b. leaves by extracting the inspissated juice [Netherl. Ph.] or an inspissated mixture of the watery extract and the juice with alcohol, or by extracting the dry leaves with alcohol alone [Finn. Ph., Sp. Ph., Swed. Ph.], with a mixture of alcohol and water [U. S. Ph.], with alcohol and subsequently with a mixture of alcohol and water [Dan. Ph., Swiss Ph.], or with hot water so as to form an aqueous extract, which is itself subsequently extracted with alcohol [Russ. Ph.]. 2. Of the Br. Ph. (the extractum belladonnæ of the Austr. Ph.; the extractum de radice atropæ belladonæ of the Fr. Cod.), a preparation made by extracting b. root with alcohol and evaporating to the consistence of an extract; of four times the strength of the extractum belladonnæ [Br. Ph.]. The preparation of the Fr. Cod. was formerly made from b. seeds (*extrait alcoolique de semences de belladone*). [B, 95, 113, 119.]—**Extractum belladonnæ aquosum** [Netherl. Ph.]. Fr., *extrait aqueux de feuilles* (ou *extrait hydrolique*) *de belladone*. Ger., *wässeriges B'extract*. It., *estratto di b. acquoso*. Aqueous extract of b. [B.] See *Extractum belladonnæ* (1st def.).—**Extractum belladonnæ cum dextrino** [Russ. Ph.]. See *Extractum belladonnæ siccum*.—**Extractum belladonnæ fluidum** [U. S. Ph.]. Fluid extract of b.; made by exhausting powdered b. root with alcohol by maceration and percolation, reserving the first 90 parts of the percolate, evaporating the rest to the consistence of a soft extract, dissolving this in the reserved portion, and adding enough alcohol to make the whole measure 100 parts. [B, 8.]—**Extractum belladonnæ pulveratum** [Finn. Ph.], **Extractum belladonnæ siccum** [Swed. Ph., Swiss Ph.]. Syn.: *extractum belladonnæ* [Hung. Ph., Norweg. Ph.] (seu *belladonnæ cum dextrino* [Russ. Ph.]). A preparation made by adding to 1 part of the alcoholic extract of b. leaves (extractum belladonnæ alcoholicum [1st def.]) 2 parts [Swiss Ph.] or ¼ part [Norweg. Ph.] of milk sugar, or 2 parts of a mixture of milk sugar and licorice [Finn. Ph.], or 1 part of licorice [Swed. Ph.], or 1 part of dextrin [Russ. Ph.]. The preparation of the Hung. Ph. is like that of the Russ. Ph., but is made from the alcoholic extract of b. root (extractum belladonnæ alcoholicum [2d def.]).—**Extractum belladonnæ spirituosum** [Netherl. Ph.]. See *Extractum belladonnæ alcoholicum* (1st def.).—**Fluid extract of b.** See *Extractum belladonnæ fluidum*.—**Folia belladonnæ** [Ger. Ph.]. See *B. leaves*.—**Fomentatio belladonnæ, Fotus belladonnæ** [Belg. Ph., 1854]. Fr., *fomentation de belladone*. It., *fomenti di b.* Sp., *fomentación de belladona* [Sp. Ph.]. A preparation made by boiling b. leaves in water [Belg. Ph.] or by steeping them in cold water [Sp. Ph.], and straining; 1,000 parts correspond to 35 [Belg. Ph.] or about 29 [Sp. Ph.] of b. leaves. [B, 95.]—**Glyceritum extracti belladonnæ** [Belg. Ph.]. Fr., *glycéré d'extrait de belladone* [Fr. Cod.]. Syn.: *glyceritum cum extracto* BELLADONÆ [Fr. Cod.]. A mixture of 1 part of extract of b. leaves and 9 parts of glycerite of starch. [B, 95, 113.]—**Herba belladonnæ.** See *B. leaves*.—**Infusum belladonnæ** [Russ. Ph.]. Fr., *infusion de belladone*. Infusion of b.; made by infusing b. root and b. leaves in boiling water. In the preparation of the Russ. Ph., 6 parts of the leaves or root furnish 1,000 of infusion. A similar preparation, of nearly twice this strength, made from b. leaves, was official in the Swed. Ph. of 1817. [B, 95, 119.]—**Japanese b.** The trade name of certain rhizomes supposed to be derived from the *Scopolia japonica*. [E. M..

Holmes (A, 308).]—**Linimentum belladonnæ** [U. S. Ph., Br. Ph.]. B. liniment, made by dissolving 5 parts of camphor in 95 of fluid extract of b. [U. S. Ph.], or by extracting 20 oz. of b. root and 1 oz. of camphor with enough alcohol to make an imperial pint [Br. Ph.]. [B, 81.]—**Oil of b.** 1. A fixed oil expressed from the seeds of the *Atropa b.*; used in cooking and for illumination. [A, 1.] 2. See *Oleum belladonnæ*.—**Oleum belladonnæ.** Fr., *huile de belladone* [Fr. Cod.]. It., *olio cotto di b.* A preparation made by boiling 1 part of fresh b. leaves with 2 parts [Fr. Cod.] or 8 parts [Hamb. Ph., 1835] of olive-oil, or with 40 of olive-oil and 16 of water [Belg. Ph., 1853–'4]. [B, 10, 113, 119.]—**Oxymel belladonnæ.** Fr., *oxymel de belladone.* Ger., *B'sauerhonig.* A preparation made by boiling a mixture of 1 part of vinegar of b. and 2 parts of white honey to the consistence of a syrup. [Würzb. Ph., 1796 (B. 119).]—**Succus belladonnæ.** See *B. juice*.—**Suppositoria belladonnæ** [U. S. Ph., 1870]. Suppositories each containing ¼ grain of alcoholic extract of b. and 29¾ grains of cacao butter. [B, 81.]—**Syrup of b., Syrupus belladonnæ.** Fr., *sirop de belladone* [Fr. Cod.]. Ger., *B'syrup.* It., *siroppo di b.* Sp., *jarabe de belladona.* A preparation made by mixing 75 parts of tincture of b. with 925 of syrup [Fr. Cod.], or by dissolving 3 parts of alcoholic extract of b. in 6 of alcohol and adding 997 of syrup [Belg. Ph., 1853]. [B, 10, 113.]—**Tinctura belladonnæ.** Fr., *teinture de belladone* [Fr. Cod.]. Ger., *B'tinctur.* A tincture made by exhausting b. leaves with alcohol by maceration and percolation; 100 parts correspond to 20 [Fr. Cod.], 15 [U. S. Ph.], or 5·4 parts [Br. Ph.] of b. leaves. The preparation of the Ger. Ph., 1st ed., was made by extracting 5 parts of b. leaves with 6 of alcohol; that of the Austr. Ph. is made from b. root, 100 parts representing 16⅔ parts of the root. [B, 81, 108, 113.]—**Tinctura belladonnæ ætherea.** Fr., *teinture éthérée de belladone* [Fr. Cod.]. Ger., *ätherische B'tinctur.* Syn.: *tinctura belladonæ æthærea* [Fr. Cod.]. A preparation made by extracting 1 part of b. leaves with 5 parts of ether (sp. gr., 0·758). A similar preparation was official in the Belg. Ph. of 1853–'4. [B, 10, 113.]—**Tinctura foliorum belladonnæ.** A tincture made from b. leaves. [B, 108.]—**Tincture of b.** See *Tinctura belladonnæ*.—**Unguentum belladonnæ.** Fr., *liparolé* (ou *pommade* [Fr. Cod.]) *de belladone, graisse belladonisée.* Ger., *B'salbe, Tollkirschensalbe.* It., *unguento di b.* An ointment made by mixing 10 parts of alcoholic extract of b. with 6 of alcohol, and incorporating with 84 of benzoinated lard [U. S. Ph.], or by mixing 1 part of extract of b. and 6 parts of lard [Br. Ph.], or 2 parts of extract of b., 1 part of distilled water, and 12 parts of lard [Fr. Cod.], or 1 part of extract of b. and 9 parts of unguentum cereum [Ger. Ph., 1st ed.]. Similar preparations of various strength have been official in a number of formularies. [B, 10, 81, 108, 113, 119.]—**Vinegar of b.** See *Acetum belladonnæ*.—**Wässeriges B'extract** (Ger.). The extractum belladonnæ aquosum. [B.] See *Extractum belladonnæ* (1st def.).

BELLADONNE (Ger.), n. Be^{2}l-la^3-don'ne^2. See BELLADONNA.

BELLADONNINE, n. Be^{2}l-la^3-do^{2}n'nen. Fr., *belladonine.* Ger., *Belladonnin.* An uncrystallizable alkaloid obtained from belladonna root: a resinous substance of a bitter, acrid taste. [Vogl (B, 108).] The term has also been applied to atropine. [A, 301.]

BELLA-MODAGAM (Malay), n. The *Scævola bela-modagam.* [B, 172.]

BELLAN (Fr.), n. Be^{2}l-la^{3}n^2. The *Poterium spinosum.* [B, 121.]

BELLAN-PATSJA, n. A Malabar name for the *Lycopodium cernuum.* [Rheede (B, 121).]

BELLAS (Port.), n. Be^{2}l'la^{3}s. A place in Portugal, near Lisbon, where there are chalybeate springs. [L, 49.]

BELLAS, n. An Abyssinian name for the *Ficus pseudo-carica.* [B, 121.]

BELLA-SOMBRA, n. The *Pircunia dioica.* [B, 19.]

BELLA-WINE (Hind.), n. The *Semecarpus anacardium.* [B, 172.]

BELLE (Ger.), n. Be^{2}l'le^2. A cough. [L, 46.]

BELLE-DAME (Fr.), n. Be^{2}l-da^{3}m. The *Atriplex hortensis*, also the *Atropa belladonna.* [B, 121.]

BELLE-DE-JOUR (Fr.), n. Be^{2}l-d'-zhur. The *Convolvulus tricolor.* [B, 121.]

BELLE-DE-NUIT (Fr.), n. Be^{2}l-d'-nwe. The *Mirabilis jalapa.* [B, 121.]

BELLE-D'ONZE-HEURES (Fr.), n. Be^{2}l-do^{2}nz-u^{5}r. The genus *Ornithogalum.* [B, 51.]

BELLE-D'UN-JOUR (Fr.), n. Be^{2}l-du^{3}n^2-zhur. A name applied to several species of *Asphodelus* and *Hemerocalla.* [B, 121.]

BELLEGU, n. The *Terminalia bellerica.* [B.]

BELLÊME (Fr.), n. Be^{2}l-le^{2}m. See BELLESME.

BELLEN (Ger.), n. Be^{2}l'le^{2}n. 1. A barking. See ABOIEMENT. 2. The *Populus nigra.* [L, 80.]

BELLENDENEÆ (Lat.), n. f. pl. Be^{2}l-le^{2}n-de^{2}n'e^2-e(a^3-e^2). Fr., *bellendeniées.* Of Reichenbach, a division of proteaceous plants. [B, 170.]

BELLE-PUCELLE (Fr.), n. Be^{2}l-pu^6-se^{2}l. The *Ranunculus campestris.* [L, 42.]

BELLERIGI, BELLERIC, n's. See MYROBALANUS *bellerica.*

BELLESME (Fr.), n. Be^{2}l-le^{2}m. A place in the department of the Orne, France, where there is a spring containing bicarbonates, sulphates, chlorides, and a little iron. [Rotureau (L, 87).]

BELLE-THÉODORE (Fr.), n. Be^{2}l-ta-o-dor. The *Schotia afra.* [B, 173.]

BELLEVILLE (Fr.), n. Be^{2}l-vel. A place in the department of the Seine, France, where there is a sulphurous spring containing calcium sulphate. [A, 385; L, 49.]

BELLHUSTEN (Ger.), n. Be^{2}l'hust-e^{2}n. A barking cough. [D.]

BELLI, n. The *Feronia elephantum.* [B, 19.]

BELLIDEÆ (Lat.), n. f. pl. Be^{2}l-li^{2}d'e^2-e(a^3-e^2). Fr., *bellidées.* Of Cassini and others, a division of composite plants (*Ustereæ*); of Bentham and Hooker, a subtribe of composite plants (tribe, *Asteroideæ*) comprising *Bellis* and other genera. [B, 42, 170.]—**B. genuinæ** [Reichenbach]. See *B. veræ*.—**B. spuriæ** [Cassini]. A division of the *B.* corresponding nearly to the *Amelloideæ* of Reichenbach. [B, 170.]—**B. veræ** [Cassini]. A subdivision of the *B.* corresponding in part to the *B.* of Bentham and Hooker. [B, 170.]

BELLIDIFOLIÉ (Fr.), adj. Be^{2}l-li^{2}d-i^2-fo-li^2-a. Having leaves like those of the daisy. [L, 41.]

BELLIDIOIDES (Lat.), adj. Be^{2}l-li^{2}d-i^2-o(o^2)-i(e)'dez(das). From *bellis*, the daisy, and εἶδος, resemblance. Resembling the *Bellis.* [B, 214.]—**B. vulgaris.** See BELLIS *major.*

BELLIEÆ (Lat.), n. f. pl. Be^{2}l-li(li^2)'e^2-e(a^3-e^2). From *Bellium*, one of the genera. Of De Candolle and others, a subdivision of composite plants (*Astereæ, Asterinæ*) comprising three genera in which there is a single row of ray flowers and the pappus is squamellate. [B, 170, 214.]

BELLIED, adj. Be^{2}l'li^{2}d. See URCEOLATE.

BELLINIA (Lat.), n. f. Be^{2}l-li^{2}n'i^2-a^3. A genus of solanaceous plants. [B.]—**B. biflora** [Römer and Schultes]. The *Sarachia biflora.* [B, 173.]

BELLIRICA (Lat.), n. f. Be^{2}l-li^{2}r'i^{2}k-a^3. See MYROBALANUS *bellerica.*

BELLIRICUS (Lat.), n. m. Be^{2}l-li^{2}r'i^{2}k-u^{3}s(u^{4}s). See BELLICULUS.

BELLIS (Lat.), n. f. Be^{2}l'li^{2}s. Gen., *bel'lidis.* Fr., *pâquerette.* Ger., *Masliebe, Maslieblchen.* 1. Anciently, the white daisy. [Pliny (A, 318).] 2. A genus of composite plants established by Tournefort. [B, 180.]—**B. annua.** See *B. perennis.*—**B. du Cap.** The *Osmites camphorina.* [L, 105.]—**B. hortensis.** See *B. perennis.*—**B. integrifolia** [Michaux]. Syn.: *Eclipta integrifolia* [Sprengel], *Astranthium integrifolium* [Nuttall]. A species from 6 to 12 inches high, found in the southern and western United States. [B, 215.]—**B. major.** The ox-eye daisy (*Chrysanthemum leucanthemum*). [L, 84.]—**B. major ramosa umbellifera americana.** The common chamomile. [L, 119.]—**B. major silvestris** (seu **vulgaris**). See *B. major.*—**B. minor, B. minor pratensis** (seu **silvestris simplex**, seu **silvestris spontanea**, seu **vulgaris**). See *B. perennis.*—**B. montana frutescens acris.** The *Anacyclus pyrethrum.* [L, 119.]—**B. perennis** [Linnæus]. Fr., *petite pâquerette* (ou *marguerite*, ou *consoude*). Ger., *Gänseblümchen, Tausendschön.* Syn.: *Consolida minor.* The daisy; a species growing wild throughout Europe and naturalized in the eastern part of the United States, of which there are many cultivated varieties. The herb and flowers (*herba et flores bellidis minoris*, seu *symphyti minimi*) were formerly used in pulmonary affections and as a vulnerary, and are slightly laxative. [A, 321, 322; B, 173, 180.]—**B. polyclonos silvestris major, caule folioso.** See *B. major.*—**B. pratensis.** See *B. perennis.*—**B. silvestris, B. silvestris caule folioso major.** See *B. major.*—**B. silvestris minor.** See *B. perennis.*—**Flores bellidis hortensis.** The flowers of *B. perennis.* [B, 180.]—**Flores bellidis majoris.** The flowers of the *Chrysanthemum leucanthemum.* [B, 180.]—**Flores bellidis minoris.** The flowers of *B. perennis.* [B, 180.]—**Flores bellidis pratensis.** See *Flores bellidis majoris.*—**Flores bellidis silvestris.** The flowers of *B. perennis.* [B, 180.]—**Herba bellidis hortensis.** The herb of *B. perennis.* [B, 180.]—**Herba bellidis majoris.** The herb of the *Chrysanthemum leucanthemum.* [B, 180.]—**Herba bellidis minoris.** The herb of *B. perennis.* [B, 180.]—**Herba bellidis pratensis.** See *Herba bellidis majoris.*—**Herba bellidis silvestris.** The herb of *B. perennis.* [B, 180.]

BELLOC (Fr.), n. Be^{2}l-lok. A place in the department of the Gironde, France, where there is a chalybeate spring. [L, 49, 87.]

BELLOCULUS (Lat.), n. m. Be^{2}l-lo^{2}k'u^2(u^4)-lu^{3}s(lu^{4}s). Said to be a contraction of *Beli oculus* (the eye of Bel). A gem to which the ancient Assyrians attributed wonderful curative powers in diseases of the eye. [A, 325.]

BELLON (Fr.), n. Be^{2}l-lo^{2}n^2. Lead colic. [A, 385.]

BELLONIA (Lat.), n. f. Be^{2}l-lon(lo^{2}n)'i^2-a^3. See BELONIA.

BELLOTAS (Sp.), n. Be^{2}l-yo'ta^{3}s. Fr., *bellote, chêne à glands doux.* See QUERCUS *ballota.*

BELLOWS, n. sing. and pl. Be^{2}l'loz. A.-S., *bælg.* Gr., φῦσα. Lat., *follis.* Fr., *soufflet.* Ger., *Blasebalg.* It., *soffietto.* Sp., *fuelle.* An apparatus for sucking in air and forcing it through a nozzle.—**B.-murmur, B.-sound.** See BRUIT *de soufflet.*—**Funic b.-sound, Placental b.-sound.** See *Placental* SOUFFLE.—**Richardson's b.** An apparatus for employing moderate pressure in the injection of vapors into the middle ear, consisting of a double balloon with a connecting tube. [F, 32.]

BELLUÆ (Lat.), n. f. pl. Be^{2}l'lu^2(lu^4)-e(a^3-e^2). Of Linnæus, an order of the *Mammalia*, including the horse, the hippopotamus, the hog, and the rhinoceros. [L, 180.]

BELLUS (Sp.), n. Be^{2}l'lus. A place in Valencia, Spain, where there is a spring containing alkaline chlorides and carbonates. [L, 49.]

BELLWORT, n. Be^{2}l'wu^{5}rt. In America, the genus *Uvularia*; in the pl., the *Campanulaceæ.* [B, 19.]

BELLY, n. Be^{2}l'li^2. A.-S., *bælg, bælig.* 1. See ABDOMEN. 2. Any b.-like enlargement (*e. g.*, the fleshy portion of a muscle).—**B'ache.** See COLIC.—**B'ache-bush.** The *Jatropha gossypiifolia.* [B, 19.]

BELMONTIN, n. Be^{2}l'mo^{2}nt-i^{2}n. A fatty substance prepared from Burmese naphtha. [A, 2.]

BELMOSCHUS, BELMUSCUS (Lat.), n's m. Be^{2}l-mo^{2}s'ku^{3}s-(ch^{2}u^{4}s), -mu^{3}s(mu^{4}s)'ku^{3}s(ku^{4}s). See ABELMOSCHUS.

BELOGLOSSÆ (Lat.), n. f. pl. Be^{2}l-o(o^2)-glo^{2}s(glos)'se(sa^3-e^2). From βέλος, a dart, and γλῶσσα, the tongue. Of Ranzani, a family of the *Scansores*, having a very long, protractile, lumbricoid tongue. [L, 180.]

BELOID, adj. Be^{2}l'oid. Lat., *beloides*. Fr., *béloïde*. See BELONOID.

BELON (Fr.), **BÉLON** (Fr.), n's. Be^{2}l-o^{2}n^2, ba-lo^{2}n^2. See ÆGLE *marmelos*.

BELONE (Lat.), n. f. Be^{2}l'o^{2}n-e(a). Gr., βελόνη. A needle or pin. [A, 325.]

BÉLONÉPHOBIE (Fr.), n. Ba-lo^{2}n-a-fo-be. From βελόνη, a needle or pin, and φόβος, dread. An insane dread of pins. [E. Régis, "L'Encéphale," Nov.-Dec., 1885, p. 659.]

BELONIA (Lat.), n. f. Be^{2}l-on(o^{2}n)'i^2-a^3. Fr., *bélonie*. A genus of rubiaceous plants of the West Indies. [A, 385; B, 173, 180.]—**B. aspera** [Linnæus]. A shrub said to be bitter and astringent. Its bark has been used in intermittent fever, passive hæmorrhages, and dysentery. [B, 180.]

BELONODES (Lat.), adj. Be^{2}l-o^{2}n-o'dez(das). See BELONOID.—**Processus b.** See *Styloid* PROCESS.

BELONOID, adj. Be^{2}l'o^{2}n-oid. Gr., βελονοειδής (from βελόνη, a needle, and εἶδος, resemblance). Lat., *belonodes, belonoides*. Fr., *bélonoïde*. Ger., *nadelförmig*. Needle-shaped, styloid. [A, 322. 325.]

BELONOSPASIS (Lat.), n. f. Be^{2}l-o^{2}n-o^{2}s'pa^3-si^{2}s. Gen., *belonospa'seos (-os'pasis)*. From βελόνη, a needle, and σπάσις, a drawing. Fr., *belonospase*. Irritation with needles or with Perkins's metallic tractors. [A, 322.] Cf. ACUPUNCTURE.

BELOSTOMA (Lat.), n. n. Be^{2}l-o^{2}s'to^{2}m-a^3. Fr., *bélostome*. Of Latreille, a genus of heteropterous *Hemiptera*, including the water-scorpions. [A, 321, 385.]

BELOSTOMIDÆ (Lat.), n. f. pl. Be^{2}l-o^{2}s-to^{2}m'i^{2}d-e(a^3-e^2). A subfamily of the *Pachyceridæ*. [L, 121.]

BELPHOOL (Bengal.), n. The *Jasminum sambac*. [B. 172.]

BELT, n. Be^{2}lt. A.-S., *belt*. Gr., ζώνη. Lat., *cingulun, cingulus, cingula*. Fr., *ceinture*. Ger., *Gurt, Gürtel*. A band to encircle some portion of the body, especially the abdomen.—**Abdominal b.** Lat., *cingulum abdominis*. Fr., *ceinture abdominale*. Ger., *Leibbinde*. A broad b. for encircling the abdomen for the purpose of support, as during pregnancy, after laparotomy, etc.—**Hypogastric b.** Fr., *ceinture hypogastrique*. A b. to encircle the pelvis, between the crest of the ilium and the great trochanter, with or without a pad or block in front; designed to exert pressure upon the hypogastrium.—**Talismanic b.** Fr., *ceinture bénie* (ou *de Saint-François*). A b. believed by the superstitious peasants of Brittany to preserve them from hell. A variety given out from a convent-school is believed to facilitate parturition, care having been taken to touch it with a fragment of a b. reputed to have belonged to the Holy Virgin. ["N. Y. Med Jour.," Aug. 27, 1887, p. 252.]

BELTED, adj. Be^{2}lt'e^{2}d. Having a band of color. [L, 56.]

BELUGA, n. Be^{2}l-u'ga^3. See ACIPENSER *huso*.

BELUGENSTEIN (Ger.), n. Be^{2}l-u'ge^{2}n-stin. A concrement found in the cloaca of the sturgeon, consisting of calcium phosphate, organic substances, and water, formerly used in medicine. [L, 30.]

BELUGO, n. Be^{2}l-u'go. See ACIPENSER *huso*.

BELUGIDÆ (Lat.), n. f. pl. Be^{2}l-u^2(u)'ji^{2}d(gi^{2}d)-e(a^3-e^2). A family of the *Phocænina*, having a head rounded in front, without a dorsal fin, the pectoral fin small and ovate, the skull with a lateral expansion of the maxilla over the orbit, and the side of the beak shelving downward. [L, 236.]

BELULCUM (Lat.), n. n. Be^{2}l-u^{3}l(ul)'ku^{3}m(ku^{4}m). Gr., βελουλκόν (from βέλος, a dart, and ἕλκειν, to draw out). Fr., *bélulque*. An old instrument for extracting darts and arrows. [A. Paré, Fabricius ab Aquapendente (A, 325); L, 41. 84.]

BELVÉDÈRE (Fr.), n. Be^{2}l-va-de^{2}r. The *Salsola scoparia*. [B, 173.]

BELVEDRAQUELLE (Ger.), n. Be^{2}l-fe^{2}d'ra^3-kwe^{2}l''le^2. One of the springs at Chur (*q. v.*). [A, 319.]

BELVISIA (Lat.), n. f. Be^{2}l-vi^{2}s(wi^{2}s)'i^2-a^3. Fr., *belvisie*. See NAPOLEONA.

BELVISIACEÆ (Lat.), n. f. pl. Be^{2}l-vi^{2}s(wi^{2}s)-i^2-a(a^3)'se^2(ke^2)-e(a^3-e^2). Fr., *belvisiacées*. An order of plants assigned by Lindley to the myrtal alliance; corresponding to the subtribe *Napoleoneæ* of *Myrtaceæ* of Bentham and Hooker. [B, 42, 170.]

BELVISIEÆ [R. Brown] (Lat.), n. f. pl. Be^{2}l-vi^{2}s(wi^{2}s)-i(i^2)'e^2-e(a^3-e^2). Fr., *belvisiées*. See BELVISIACEÆ.

BELZAHAR, n. See BEZOAR.

BELZOE, n. See BENZOIN.

BELZOF, n. The tree producing benzoin. [L, 41, 109.]

BELZOIM, BELZOIN, n's. Lat., *belzoinum*. See BENZOIN.

BELZOINUS (Lat.), adj. Be^{2}l-zo(zo^2)-i(i^2)'nu^{3}s(nu^{4}s). Of or pertaining to benzoin. [B, 180.] See GUMMI *belzoinum*.

BELZUAR, n. See BEZOAR.

BEMBECIDÆ (Lat.), n. f. pl. Be^{2}m-be^{2}s(be^{2}k)'i^{2}d-e(a^3-e^2). Fr., *bembécides*. Of Latreille, a family or tribe of the *Hymenoptera*, having *Bembex* as the type. [L, 180.]

BEMBI, n. An East Indian name for the *Acorus calamus*. [L, 105.]

BEMBIDIIDÆ (Lat.), n. f. pl. Be^{2}m-bi^2-di(di^2)'i^{2}d-e(a^3-e^2). A family of beetles of the tribe *Geodephaga*. [L, 73.]

BEMERELLENKRAUT (Ger.), n. Be^2-me^{2}r-e^{2}l'le^{2}n-kra^3-ut. The *Nicotiana tabacum*. [B, 180.]

BEM-SCHETTI, n. An East Indian name for the *Ixora alba*. [L, 105.]

BEMÜHUNG (Ger.), n. Be^2-mu^6'hung. See MOLIMEN.

BEN, n. Be^{2}n. See BEHEN.—**Arabian b.** The *Glans unguentaria* [L, 94.]—**B. album** (Lat.), n. See *White* BEHEN.—**B. de Judée** (Fr.). See BENZOIN.—**B. nut, B. nux** (Lat.). See BEHEN *nut*.—**B. of Judæa.** See BENZOIN.—**Grand b. purgatif** (Fr.). The *Jatropha multifida*. [B, 173.]—**Huile de b.** (Fr.). See BEHEN-*nut oil*.—**Noix de b.** (Fr.), **Nux b.** See BEHEN *nut*.—**Oil of b.** See BEHEN-*nut oil*.—**White b.** See *White* BEHEN.

BENA (Bengal., Hind.), n. The *Andropogon muricatum*. [B. 172.]

BENAGT (Ger.). adj. Be^2-na^{3}gt'. Suberose. [L, 46.]

BENARBEND (Ger.), adj. Be^2-na^{3}rb'e^{2}nd. Promoting cicatrization. [L, 46.]

BENARBT (Ger.), adj. Be^2-na^{3}rbt'. Cicatrized. [L, 46.]

BENARBUNG (Ger.), n. Be^2-na^{3}rb'ung. Cicatrization; a cicatrix. [L, 46.]

BENATH (Ar.), n. Sudamina. [L, 111.]

BENAVENTE (Sp.), n. Be^{2}n-a-ve^{2}nt'a. A place in Spain, where there is a chalybeate alkaline spring. [L, 49.]

BENÇÃO DE DEOS (Port.), n. Be^{2}n-so^{2}n^2' da da'os. A Brazilian name for the flowers of the *Abutilon esculentum*. [B, 19.]

BENDEE, n. Okra. [B.]

BENDIDÆ (Lat.), n. f. pl. Be^{2}n'di^{2}d-e(a^3-e^2). A family of the *Patulæ*. [L, 248.]

BENE, BENNE, n's. See BEHEN.

BÊNE (Fr.), n. Be^{2}n. The *Helosciadum nodiflorum*. [B, 173.]

BENEDICTA (Lat), n. f. sing. and n. pl. 1. A name applied to several plants (*e. g.*, the *Centaurea b.*). 2. The plural of *benedictum* (*q. v.*).—**B. laxativa.** See BENEDICTUM.—**B. silvestris.** The *Geum rivale*. [B, 180.]—**Herba benedictæ.** The herb of *Geum urbanum*. [B, 180.]—**Radix benedictæ.** The root of *Geum urbanum*. [B, 180.]—**Radix benedictæ silvestris.** The root of *Geum rivale*. [B. 180.]

BENEDICTENDISTEL (Ger.), n. Be^{2}n-e^2-di^{2}k'te^{2}n-di^{2}st-e^{2}l. See CARDUUS *benedictus*.

BENEDICTENKRAUT (Ger.), n. Be^{2}n-e^2-di^{2}k'te^{2}n-kra^3-ut. The *Geum urbanum* and the *Cnicus benedictus*. [B, 180.]

BENEDICTENWURZEL (Ger.), n. Be^{2}n-e^2-di^{2}k'te^{2}n-vurtz-e^{2}l. The *Geum urbanum*. [B.]—**Gemeine B.** See *B.*

BENEDICTUM (Lat.), n. n. Be^{2}n-e-di^{2}k'tu^{3}m(tu^{4}m). Heb., *barak*. Ar., *mubaraca*. Gr., εὐλογισόν. Fr., *bénédict*. It., *benedetto*. An old term for a mild purgative. [A, 325.]

BENEDICTUS (Lat.), adj. Be^{2}n-e^2-di^{2}k'tu^{3}s(tu^{4}s). Lit., blessed; a term formerly applied to various pharmaceutical preparations. See BENEDICTUM, AQUA *benedicta, composita*, etc.

BENEDICTWURZEL (Ger.), n. Be^{2}n-e^2-di^{2}kt'vurtz-e^{2}l. See BENEDICTENWURZEL.

BENEDIKTENFLOCKBLUME (Ger.), **BENEDIKTENFLOCKENBLUME** (Ger.), n's. Be^{2}n-e^2-di^{2}kt'e^{2}n-flo^{2}k-blum-e^2, -flo^{2}k-e^{2}n-blum-e^2. The *Centaurea benedicta*. [L, 80.]

BENEDIKTENKRAUT (Ger.), n. Be^{2}n-e^2-di^{2}k'te^{2}n-kra^3-ut. See BENEDICTENKRAUT.

BENEDIKTENWURZ (Ger.), **BENEDIKTWURZ** (Ger.), n's. Be^{2}n-e^2-di^{2}kt'e^{2}n-vurtz, -di^{2}kt'vurtz. The *Geum urbanum*. [B, 180.]

BENEFFIGI (Ar.), n. The *Viola odorata*. [L, 77, 105.]

BENEFICIUM (Lat.), n. n. Be^{2}n-e^2-fi^2'si^2(ki^2)-u^{3}m(u^{4}m). From *bene*, well, and *facere*, to do. Gr., εὐεργέτημα. Fr., *bénéfice*. A favorable interposition or mediation. [A, 312.] See VIS *medicatrix naturæ*.—**B. alvi.** Fr., *bénéfice de ventre*. Spontaneous salutary diarrhœa. [L, 43.]—**B. naturæ.** Fr., *bénéfice de nature*. See *B.*

BENEOLENS (Lat.), adj. Be^{2}n-e(e^2)'o^{2}l-e^{2}nz(e^{2}ns). From *bene*, well, and *olere*, to emit a smell. Fragrant.

BENEOLENTIA (Lat.), n. n., pl. of adj. *beneolens* (*medicamenta* understood). Be^{2}n-e^2-o^{2}l-e^{2}n'shi^2(ti^2)-a^3. Fragrant medicinal preparations. [A, 325.]

BENETUTTI (It.), n. Ba-na-tut'te. A place in Sardinia, where there are warm sulphurous springs. [L, 49.]

BENETZER (Ger.), n. Be^{2}n-e^{2}tz'e^{2}r. An irrigator. [A, 315.]

BENEVIVUM (Lat.), n. n. Be^{2}n-e^2-vi(we)'vu^{3}m(wu^{4}m). See BENZOIN.

BENERVT (Ger.), n. Be^2-ne^{3}rft'. In botany, nerved. [L, 46.]

BENG, n. See BHANG.

BENGALE (Lat.), n. n. Be^{2}n^2'ga^3-le(la). The *Zingiber cassumunar*. [L, 105.]—**B. inodorum.** See *B.*—**Radix b.** The tuber of *Zingiber cassumunar*. [B, 180.]

BENGAL-ROOT, n. Be^{2}n-ga^{4}l'ru^{4}t. The root of the *Zingiber cassumunar*. [B, 19.]

BENGELKRAUT (Ger.), n. Be^{2}ng'e^{2}l-kra^3-ut. The *Mercurialis perennis*. [L, 46.]

BENGEMI, n. An East Indian name for the tree that furnishes benzoin. [L, 105.]

BENGHIE, n. See BHANG.

BENGHILIK, n. A Turkish name for the *Datura stramonium*. [L, 77.]

BENGI (Ar.), n. The *Hyoscyamus niger*. [L, 105.] Cf. BENGHILIK and BHANG.

BENGIECHEST (Ar.), n. The *Vitex agnus castus*. [L, 77, 105.]

BENGIRI, n. See SAPIUM *aucuparium*.

BEN-HAROUN, n. A place in Algeria, where there is a cold carbonated spring. [L, 49.]

BÉNI (Fr.), adj. Ba-ne. See BENEDICTUS.

BENIC, adj. Be²n'i²k. See BEHENIC.—**B. acid.** See BEHENIC ACID.

BENIGN (adj.). Be²-nin'. Gr., εὐήθης. Lat., *benignus*. Fr., *bénin*. Ger., *gütig*, *gutartig*. It., Sp., *benigno*. Not malignant; not specially severe.

BENIGNANT, adj. Be²-nig'na²nt. See BENIGN.

BENIGNITY, n. Be²n-i²g'ni²-ti². Lat., *benignitas*. Fr., *bénignité*. Ger., *Benignität*. It., *benignità*. Sp., *benignidad*. The quality of being benign.

BENIGNUS (Lat.), adj. Be²n-i²g'nu³s(nu⁴s). See BENIGN.

BÉNIN (Fr.), adj. Ba-na²n². See BENIGN.

BENINCASA (Lat.), n. f. Ba-nen-ka³'za³. Named after *Benincasa*, an Italian nobleman. Of Savi, a genus of cucurbitaceous plants with polygamous and monœcious flowers having a quinquefid, undulate-toothed calyx, a wheel-shaped, 5-parted corolla, 5 triadelphous stamens, and a style with a 3-lobed stigma. The fruit is a trilocular, many-seeded pepo. [B, 19, 180.]—**B. cerifera.** Syn.: *Cucurbita cerifera* [Fischer]. A perennial species growing in the East Indies, with large golden-yellow flowers, and an ovate, cylindrical, or pear-shaped greenish fruit, often exceeding a foot in length and more than half a foot in thickness, and with obovate-oblong, oily, bitterish seeds. The plant is used as a remedy for fevers, thoracic difficulties, vertigo, etc., and the seeds are employed in dysuria. The rind of the fruit is used by the Chinese in consumption, asthma, and chills, and the seeds are employed to relieve colic, spasms, etc. [B, 19, 180; L, 75.]

BENINCASEÆ (Lat.), n. f. pl. Ba-nen-ka³'ze²-e(a³-e²). Of Seringe, a tribe of cucurbitaceous plants including *Benincasa*, *Cucumis*, *Lagenaria*, and other genera. [B, 170.]

BENINGKRAUT (Ger.), n. Be²n'i²ng-kra³-ut. The root of the *Pæonea*. [L, 80.]

BÉNIQUE (Fr.), adj. Ba-nek. See BEHENIC.

BENIT-HERB, n. Be²n'i²t-u⁵rb. The herb-bennet (*Geum urbanum*). [B.]

BENIVI ARBOR, n. See under ARBOR.

BENJAMIN, n. Be²n'ja³-mi²n. Corrupted from *benzoin*. Ger., *Benjaminbaum*. 1. The *Styrax benzoin*. 2. *Benzoin*. [B, 86.]—**B. bush.** The *Benzoin odoriferum*. [B, 19.]—**B. tree.** 1. The *Styrax benzoin*. 2. The *Ficus benjamina*. 3. The *Benzoin odoriferum*. [B, 19.]—**Flowers of b.** See *Flowers of* BENZOIN.—**Gum b.** Benzoin. [L, 120.]—**Tincture of b.** See *Tinctura* BENZOINI.

BENJAN, n. The *Sesamum orientale*. [L, 105.]

BENJAOY, n. See BENZOIN (1st def.).

BENJOIN [Fr. Cod.] (Fr.), n. Ba²n²zh-wa³n². See BENZOIN (1st def.).—**Alcoolé de b.** See *Tinctura* BENZOINI.—**Baume b.** See BENZOIN.—**B. amygdaloïde.** See *Amygdaloid* BENZOIN.—**B. de Siam** [Fr. Cod.]. Siam benzoin. [B, 113.]—**B. de Sumatra** [Fr. Cod.]. Sumatra benzoin. [B, 113.]—**B. en larmes.** See BENZOIN *in tears*.—**B. en sorte.** See BENZOE *in sortis*.—**B. français.** The *Imperatoria ostruthium*. [B, 173.]—**B. vanille.** Siam benzoin. [B, 92.]—**Écorce de b.** The *Terminalia borbonica*. [L, 105.]—**Faux b.** 1. The *Benzoin odoriferum*. 2. The *Terminalia benzoin*. [B, 173.]—**Fleurs de b.** See *Flowers of* BENZOIN.—**Gomme de b.** See BENZOIN (1st def.).—**Huile de b.** See *Oil of* BENZOIN.—**Huile pyrogénée de b.** See *Empyreumatic oil of* BENZOIN.—**Poudre de b.** [Fr. Cod.]. Lat., *pulvis benzoini*. Benzoin powdered in an iron mortar and passed through a No. 100 silk sieve. [A, 253.]—**Sirop de b.** See *Syrupus* BENZOINI.—**Teinture d'aloès et de b.** See *Tinctura* BENZOINI *composita*.—**Teinture de b.** [Fr. Cod.]. See *Tinctura* BENZOINI.—**Teinture de b. composée.** 1. See *Tinctura* BENZOINI *composita*. 2. See TINCTURA *cosmetica*.

BENJOÏNE (Fr.), n. Ba³n²-zho-en. Desvaux's term for an essential principle found in small quantity in benzoin. [A, 301.]

BENJOINUM (Lat.), n. Be²n-zo(zo²)-i(e)'nu³m(nu⁴m). See BENZOIN.

BEN-MOENJA, n. An undetermined tree of the East Indies, the root of which is used in decoction for malignant fevers. [L, 105.]

BENNE, n. A name given in central Africa to the seeds of the *Sesamum orientale*. [B, 19.]—**B. oil.** See *Oleum* SESAMI.

BENNET, n. Be²n'ne²t. Lat., *benedicta*. Fr., *benoite*. Ger., *Benedictenkraut*. It., *erba benedetta*. Syn.: *herb-b*. The common avens (*Geum urbanum*). [B, 19; L, 56.]

BÉNODACTYLE (Fr.), adj. Ba-no-da³k-tel. From βαίνειν, to walk, and δάκτυλος, a digit. In ornithology, walking upon the digits; as a n., in the pl., a family of birds walking in that manner. [L, 41.]

BENOÎT (Fr.), **BENOITE** (Fr.), **BÉNOITE** (Fr.), n's. Ba²n-wa³, -wa³t, ban-wat. 1. The genus *Geum*. [B, 173.] 2. The *Geum urbanum* [Fr. Cod.].—**B. aquatique.** The *Geum rivale*. [B, 92.]—**B. commune.** The *Geum urbanum*. [B, 119.]—**B. de montagne.** The *Geum montanum*. [B, 173.]—**B. des ruisseaux.** The *Geum rivale*. [B, 173.]—**B. officinale.** The *Geum urbanum*. [B, 173.]—**Décoction de b.** See *Decoctum* CARYOPHYLLATÆ.—**Extrait de b.** See *Extractum* CARYOPHYLLATÆ.—**Huile essentielle** (ou **Oléule**) **de b.** An essential oil distilled from the *Geum urbanum*. [B, 119.]

BENOLEIC ACID, n. Be²n-o-le'i²k. Fr., *acide bénoléique*. A fatty acid, homologous with oleic acid, obtained from behen-nut oil. [A, 385.]

BENOMARGARATE, n. Be²n-o-ma³r'ga³r-at. A salt of benomargaric acid. [B.]

BENOMARGARIC ACID, n. Be²n-o-ma³r-ga²r'i²k. A crystalline acid of the fatty series, forming one of the isomeric varieties of penta-decatoic acid, and having, therefore, the constitution $C_{16}H_{30}O_2 = C_{14}H_{29}.CO.OH$. It was obtained by Walter from oil of ben. [B, 2.]

BENOMMENHEIT (Ger.), n. Be²-no³m'me²n-hit. Stupor, numbness, hebetude. [D, 60.]

BENOSTEARIC ACID, n. Be²n-o-ste-a²r'i²k. The same as behenic acid. According to Völcker, who obtained it from oil of ben, it has the formula $C_{21}H_{42}O_2$. [B, 2.] Its real formula is, however, probably $C_{22}H_{44}O_2$. [B, 3, 4.]

BENSIPONETOS, n. The *Solidago virga aurea*. [L, 105.]

BENT, adj. Be²nt. 1. In botany, applied to flowers that hang toward the ground. [L, 116.] 2. As a n., in the pl., the dried stalks of various grasses found in pastures. [B, 19.] Cf. BENT-GRASS.

BENTAMARA, n. Indian name for the *Nelumbium speciosum*. [L, 105.]

BENTA-MARE, n. The *Cassia occidentalis*. ["Proc. of the Am. Pharm. Assoc.," xxix, p. 209 (B).]

BENTEKA, n. Fr., *bentèque*. A Malabar plant. [L, 105.]

BENT-GRASS, n. Be²nt'gra³s. The genus *Agrostis*. [B, 19.]

BENTHAMIA (Lat.), n. f. Be²n-tha²m'i²a³. Named for Bentham, an English botanist. Fr., *benthamie*. A genus of cornaceous plants with opposite leaves, a 4-toothed calyx, four fleshy, cup-shaped petals, four stamens, one style, and a fruit consisting of a compound berry made up of an aggregation of small drupes resembling that of *Arbutus*. [B, 19.]—**B. fragifera.** Fr., *benthamie portefraises*. A species indigenous to northern India and cultivated in Europe. [B, 19.]

BENTHEIM (Ger.), n. Be²n'tim. A place in Hannover, where there is a spring containing calcium sulphate and sulphur. [A, 385; L, 49.]

BENT-WOOD, n. Be²nt'wu⁴d. A provincial name for the common ivy. [L, 73.]

BENTYAPO, n. The *Kœmpfera rotunda*. [L, 105.]

BENZACETIC ACID, n. Be²nz-as-e'ti²k. See BENZOYLACETIC ACID.

BENZACETOSULPHOPHENAMIDE, n. Be²nz-a²s-e²t-o-su³lf-o-fe²n'a²m-i²d. A derivative of benzamide, $C_{15}H_{13}NSO_4 = N.C_7H_5O.C_2H_3O.C_6H_5SO_2$. [A, 1.]

BENZAL, n. Be²nz'a²l. See BENZYLIDENE.—**B. bromide.** Ger., *B'bromid*. Benzylidene dibromide. [B, 4.]—**B. chloride.** Ger., *B'chlorid*. Benzylidene dichloride. [B, 4.]

BENZALCOHOL, n. Be²nz-a²l'ko-ho²l. See BENZYL *alcohol*.

BENZALDEHYDE, **BENZALDIDE**, n's. Be²nz-a²l'de-hid, -a²l'did. See BENZOIC *aldehyde*.

BENZAMIC ACID, n. Be²nz-a²m'i²k. Ger., *Benzaminsäure*. See AMIDOBENZOIC ACID.

BENZAMIDACETIC ACID, n. Be²nz-a²m"i²d-a²s-e'ti²k. See HIPPURIC ACID.

BENZAMIDE, n. Be²nz'a²m-i²d. Lat., *benzamidum*. Fr., *benzamide*. Ger., *Benzamid*. The amide of benzoic acid, $C_6H_5.CO.NH_2 = C_7H_7NO$, forming shining laminar or tabular crystals. [B, 4.]

BENZAMIDOACETIC ACID, n. Be²nz-a²m"i²d-o-a²s-e'ti²k. See HIPPURIC ACID.

BENZAMILE (Fr.), n. Ba³n²-za³m-el. A product, $C_{28}H_{10}NO_2$, of the distillation of oil of bitter almonds with potash. [A, 385.]

BENZANILIDE, n. Be²nz-a²n'i²l-i²d. Syn.: *benzoic anilide*, *phenylbenzamide*. An anilide, $C_6H_5.N(C_6H_5.CO)H = C_{13}H_{11}NO$, in which benzoyl replaces the hydrogen of aniline; formed by the action of chlorbenzoyl on aniline. [B, 4.] See also DIBENZANILIDE.

BENZENE, n. Be²nz'en. Lat., *benzolum* [Swiss Ph.], *benzinum* [Gr. Ph.], *pyroleum benzinum* [Swed. Ph.]. Fr., *benzène*, *benzine*. Ger., *Benzen*, *Benzol*. It., *benzina*. Sp., *bencina*. Written also *benzen* and *benzol*. A colorless liquid, C_6H_6, derived from coal-tar; colorless, of a peculiar odor, boiling at 80·5° C., freezing at a low temperature into crystals that melt at 5·5° C., of a sp. gr. of 0·899, readily volatile, inflammable, nearly insoluble in water, readily soluble in alcohol and in ether, and itself a solvent of iodine, sulphur, phosphorus, fatty and resinous bodies, caoutchouc, etc. It is the starting-point of the so-called aromatic series; which may be regarded as derived from it by successive processes of substitution.

```
        H – C = C – H
           /     \
Its graphic formula is probably H – C       C – H.
           \\    //
        H – C – C – H
```

[B, 4, 95.]—**B.-Collas.** Ordinary b., first introduced into use by Collas, in 1848, as a cleansing agent. [B.]—**B'dicarbonic acid.** Ger., *Benzoldicarbonsäure*. Phthalic acid. [B, 196.]—**B'disazob'resorcinol.** See AZOAZOB'RESORCINOL.—**B'disulphonic acid.** Fr., *acide benzine-*

disulfonique. Ger., *Benzoldisulfonsäure.* A dibasic acid, $C_6H_4.(SO_2.OH)_2=C_6H_6S_2O_6$, of which three isomeric varieties are known: 1. *Orthob'disulphonic acid,* $C_6[H,SO_2.OH,SO_2.OH,H,H,H,]$. 2. *Metab'disulphonic acid,* $C_6[H,SO_2.OH,H,SO_2.OH,H,H,]+2\frac{1}{2}H_2O$, a deliquescent mass of crystals. 3. *Parab'disulphonic acid,* $C_6[H,SO_2.OH,H,H,SO_2.OH,H,]$, a hygroscopic crystalline substance. [B, 3, 4.]—**B. hexabromide.** Fr., *hexabromure de benzine.* Ger., *Benzolhexabromür.* It., *essabromuro di benzina.* A solid addition compound of b. and bromine, $C_6H_6Br_6$. [B, 4.]—**B'hexacarbonic acid.** Ger., *Benzolhexacarbonsäure.* Mellitic acid. [B, 196.]—**B. hexachloride.** Fr., *hexachlorure de benzine.* Ger., *Benzolhexachlorür.* It., *essacloruro di benzina.* An addition compound of b. and chlorine; acicular crystals, $C_6H_6Cl_6$. [B, 4.]—**B. hexahydrate.** Fr., *hexahydrate de benzine.* Ger., *Benzolhexahydrat.* It., *essaidrato di benzina.* Phenose; an addition compound of b. and hydroxyl, $C_6H_6.(OH)_6$; amorphous, sweetish, hygroscopic, isomeric with glucose, and resembling the latter in reducing alkaline solutions of copper compounds. [B, 3, 4.]—**B. hexahydride.** Fr., *hexahydrure de benzine.* Ger., *Benzolhexahydrür.* It., *essaidruro di benzina.* An addition compound of b. and hydrogen, $C_6H_6.H_6=C_6H_{12}$; a liquid of the sp. gr. of 0·760, boiling at 69° C., occurring in Caucasian petroleum, also formed when b. is heated with an excess of hydriodic acid. [B, 3.]—**B'hypochlorous acid.** Ger., *Unterchlorigsäure-Benzol.* See *B'trichlorhydrin.*—**B'metadisulphonic acid.** Fr., *acide benzine-métadisulfonique.* Ger., *Benzolmetadisulfonsäure.* See *Metab'disulphonic acid,* under *B'disulphonic acid.*—**B'methyldicarbonic acid.** Fr., *acide benzine-méthyldicarbonique.* Ger., *Methyldicarbonsäure-Benzol.* See Uvitic acid.—**B'monocarbonic acid.** Ger., *Benzolmonocarbonsäure.* Benzoic acid. [B, 196.]—**B'monosulphonic acid.** Fr., *acide benzine-monosulfonique.* Ger., *Benzolmonosulfonsäure.* See under *B'sulphonic acid.*—**B'orthodisulphonic acid.** Fr., *acide benzine-orthodisulfonique.* Ger., *Benzolorthodisulfonsäure.* See *Orthob'disulphonic acid,* under *B'disulphonic acid.*—**B'paradisulphonic acid.** Fr., *acide benzine-paradisulfonique.* Ger., *Benzolparadisulfonsäure.* See *Parab'disulphonic acid,* under *B'disulphonic acid.*—**B'sulphamide.** See *B'sulphonamide.*—**B'sulphinic acid.** Fr., *acide benzine-sulfinique.* Ger., *Benzolsulfinsäure.* Syn.: *phenylsulphinic acid.* A monobasic acid of the composition $C_6H_5.SO_2H$. [B.]—**B'sulphochloride.** See *B'sulphonic chloride.*—**B'sulphonamide.** The amide of b'sulphonic acid, $C_6H_5.SO_2.NH_2$; crystalline, readily soluble in alcohol. [B, 3.]—**B'sulphonate.** A salt of b'sulphonic acid. [B.]—**B'sulphonic acid.** Fr., *acide benzine-sulfonique.* Ger., *Benzolsulfonsäure.* Syn.: *monob'sulphonic* (or *b'monosulphonic*) *acid.* A monobasic acid, $C_6H_5.SO_2.OH$, formed by the action of fuming sulphuric acid on b. or that of nitric acid on phenyl mercaptan or phenyl sulphide, forming deliquescent tabular crystals. [B, 3, 4.] See also *B'disulphonic acid.*—**B'sulphonic chloride.** An oily liquid, $C_6H_5.SO_2.Cl$, which congeals at 0° C. into rhombic crystals. [B, 3.]—**B'sulphurous acid.** See *B'sulphinic acid.*—**B'tetracarbonic acid.** Ger., *Benzoltetracarbonsäure.* Prehnitic acid. [B, 196.]—**B'tricarbonic acid.** Ger., *Benzoltricarbonsäure.* A name expressive of the constitution of trimesitic, hemimellitic, and trimellitic acids. [B, 196.]—**B'trichlorhydrin, B. trichlortrihydrate.** Ger., *Benzoltrichlorürtrihydrat.* An addition compound of b., chlorine, and hydroxyl, $C_6H_6.(OH)_3Cl_3$, forming colorless crystals which melt at 10° C. Called also *b'hypochlorous acid,* because it may be regarded as b. united with three molecules of hypochlorous acid. [B, 4.]—**B'trisulphonic acid.** Fr., *acide trisulfo-benzolique* (ou *benzine-trisulfonique*). Ger., *Benzoltrisulfonsäure.* A tribasic acid, $C_6H_3(SO_2.OH)_3+3H_2O$, forming hygroscopic, flattened acicular crystals. [B, 3.]

BENZÈNE (Fr.), n. Ba[3]n[2]-ze[2]n. 1. Benzene. 2. Nitrobenzene. 3. Benzylidene. [B.]

BENZENIC ACID, n. Be[2]n-ze[2]n'i[2]k. Fr., *acide benzénique.* A crystalline acid, $C_6H_4O_2$, regarded as a homologue of benzoic acid, but probably only an impure variety of the latter. [B, 93.]

BENZENYL, n. Be[2]n'ze[2]n-i[2]l. See Phenyl.—**B'amidoxine.** A base, $C_6H_6-C(NH_2)=NOH$, formed by the union of hydroxylamine and benzonitrile. [P. Kruger, "Ber. d. dtsch. chem. Gesellsch.," 1885, p. 1053; "Jour. of the Am. Chem. Soc.," Apr., 1886, p. 75 (B).]

BENZERYTHRENE, n. Be[2]nz-e[2]r'i[2]th-ren. An orange-colored substance of uncertain composition produced by the destructive distillation of benzene. [B, 158.]

BENZHYDRAMIDE, n. Be[2]nz-hi'dra[2]m-i[2]d. See Hydrobenzamide.

BENZHYDROCYANIDE, n. Be[2]nz-hi-dro-si'a[2]n-i[2]d(id). See Benzimide.

BENZHYDROL, n. Be[2]nz-hi'dro[2]l. Syn.: *diphenylcarbinol.* An alcohol, $C_6H_6-CH(OH)-C_6H_5$, isomeric with benzylphenol, obtained by the action of sodium amalgam on an alcoholic solution of benzophenone; silky acicular crystals sparingly soluble in water. [B, 4.]—**B. acetate.** A thick liquid, $(C_6H_5)-CH(O.C_2H_3O)-C_6H_5$, prepared by boiling b. with acetic acid. [B, 4.]

BENZHYDROLIC ETHER, n. Be[2]nz-hi-dro[2]l'i[2]k. A substance, $(C_6H_5)_2=CH-O-CH=(C_6H_5)_2$, produced by the decomposition of benzhydrol. [B, 4.]

BENZHYDRYLBENZOIC ACID, n. Be[2]nz-hi''dri[2]l-be[2]nz-o'i[2]k. Fr., *acide benzhydryl-benzoïque.* Ger., *Benzhydrylbenzoësäure.* A monobasic crystalline acid, $C_{14}H_{12}O_3=C_6H_6-CH(OH)-C_6H_4(CO.OH)$, formed by the action of nascent hydrogen on an alcoholic solution of parabenzoylbenzoic acid. [B, 4.]

BENZIDAM, n. Be[2]nz'i[2]d-a[2]m. Fr., *benzidame.* A name given by Zinin, in 1842, to a substance since proved to be identical with aniline. [B, 49.]

BENZIDE, n. Be[2]nz'i[2]d(id). Mitscherlich's name for a compound of benzene or benzyl with a radical or an element. [B, 196.] Cf. Nitrogen *b.*

BENZIDINE, n. Be[2]nz'i[2]d-en. Lat., *benzidinum.* Fr., *benzidine.* Ger., *Benzidin.* A diacid base, $C_{12}H_{12}N_2=NH_2C_6H_4-C_6H_4-NH_2$, forming silvery laminar crystals readily soluble in hot water and in alcohol. [B, 158.]—**B. sulphate.** A compound of b. and sulphuric acid, $C_{12}H_{12}N_2.H_2SO_4$. [B, 158.]

BENZIL, n. Be[2]nz'i[2]l. Fr., *benzile.* A substance, $C_{14}H_{10}O_2=C_6H_5.CO-CO.C_6H_5$, forming prismatic crystals insoluble in water, produced by the action of nitric acid on benzoin (3d def.) and in other ways. [B, 4.]

BENZILAM, n. Be[2]nz'i[2]l-a[2]m. Fr., *benzilame.* A crystalline substance, $C_{14}H_9N$, formed, along with benzilimide, by the action of ammonia on benzil. [B, 2.]

BENZILATE, n. Be[2]nz'i[2]l-at. Lat., *benzilas.* A salt of benzilic acid. [B.]

BENZILIC ACID, n. Be[2]nz-i[2]l'i[2]k. Fr., *acide benzilique.* Ger., *Benzilsäure.* It., *acido benzilico.* Syn.: *diphenylglycollic acid.* A monobasic acid, $C_{14}H_{12}O_3=(C_6H_5)_2=C(OH)-CO\ OH$, isomeric with benzhydrylbenzoic acid, obtained by heating benzil with alcoholic potash. [B, 4.]

BENZILIDENE, n. Be[2]nz-i[2]l'i[2]d-en. See Benzylidene.

BENZILIM, n. Be[2]nz'i[2]l-i[2]m. See Benzilimide.

BENZILIMIC ACID, n. Be[2]nz-i[2]l-i[2]m'i[2]k. Ger., *Benzilimsäure.* Benzilic acid. [B, 196.]

BENZILIMIDE, n. Be[2]nz-i[2]l'i[2]m-i[2]d. A substance, $C_{28}H_{22}N_2O_2$, forming fine white acicular silky crystals, produced by the action of dry ammoniacal gas on an alcoholic solution of benzil. [B, 2.]

BENZILSÄURE (Ger.), n. Be[2]ntz-el'zoir-e[2]. Benzilic acid. [B, 4.]

BENZIMATE, n. Be[2]nz'i[2]m-at. A salt of benzimic acid. [B, 2.]

BENZIMIC ACID, n. Be[2]nz-i[2]m'i[2]k. Fr., *acide benzimique.* A peculiar crystalline acid obtained by Laurent by the action of ammonia on oil of bitter almonds. [B, 2.]

BENZIMIDE, n. Be[2]nz'i[2]m-i[2]d. Fr., *benzimide.* Ger., *Benzimid.* A compound, $C_{23}H_{18}N_2O_2=2C_7H_6O.C_7H_6(CN)_2$, obtained by Laurent by treating oil of bitter almonds with hydrocyanic acid, and occurring in crude oil of bitter almonds: forming a loose mass of colorless crystals of a pearly lustre. [B, 2, 81.]

BENZIN, n. Be[2]nz'i[2]n. Lat., *benzinum* [U. S. Ph., Russ. Ph.], *benzinum petrolei* [Ger. Ph., Belg. Ph.]. Fr., *essence de pétrole blanche* [Fr. Cod.], *huile légère de pétrole* [Fr. Cod.]. Ger., *Benzin.* Syn.: *petroleum b.* 1. A name originally given by Mitscherlich to benzene. [B, 196.] 2. A clear, colorless liquid produced by distilling petroleum; of a peculiar powerful odor; insoluble in water, moderately soluble in alcohol, very soluble in ether, in chloroform, and in fixed and volatile oils. It is inflammable, and its vapor is explosive when mixed with air. It boils between 50° and 60° C. Chemically, it consists of a mixture of different hydrocarbons, chiefly those of the paraffin (fatty) series. [B, 5.] Cf. Petroleum *ether.*—**B'sulphuric acid.** Mitscherlich's name for benzenesulphonic acid. [B, 3.]—**Coal-tar b.** Ger., *Theerb'.* B. obtained from coal-tar oil, occurring as a by-product in the preparation of benzene and toluene, by treatment with acids and alkalies. It is of entirely different composition from that of petroleum b., consisting chiefly of a mixture of xylolene, mesitylene, pseudocumene, etc., and is usually of much higher sp. gr. than petroleum b., from which it differs in chemical and physical properties. It is used as a cleansing fluid and as a solvent for resin, caoutchouc, etc. [B, 270.]—**Petroleum b.** See *B.*—**Theerb'** (Ger.). See *Coal-tar b.*

BENZINATUS (Lat.), adj. Be[2]nz-i[2]n-a(a[3])'tu[3]s(tu[4]s). Combined with or containing benzin or benzene. [B, 95.]

BENZINE (Fr.), n. Ba[3]n[2]-zen. See Benzin and Benzene.

BENZINUM (Lat.), n. n. Be[2]nz-i(e)'nu[3]m(nu[4]m). 1. Of the U. S. Ph. and the Russ. Ph., benzin. 2. Of the Gr. Ph., benzene. [B, 95.]—**B. e ligno fossili.** Ligroin. [B, 270.]—**B. lithanthracicum, B. lithanthracis.** Coal-tar benzene. [B, 270.]—**B. nitricum.** A homœopathic name for nitrobenzene. [B, 270.]—**B. petrolei.** See Benzin.

BENZINUS (Lat.), adj. Be[2]nz-i(e)'nu[3]s(nu[4]s). Of or pertaining to benzene. [B.] See Pyroleum *benzinum.*

BENZITE, n. Be[2]nz'it. Ger., *Benzit.* A solution of sulphur in 2 or 3 parts of hot coal-tar. [B, 270.]

BENZOAS (Lat.), n. m. Be[2]nz'o(o[2])-a[2]s(a[3]s). Gen., *benzoa'tis.* A benzoate. [B.]—**B. ammonicus** [Fr. Cod.]. See Ammonium *benzoate.*—**B. calcicus** [Fr. Cod.]. See Calcium *benzoate.*—**B. lithicus** [Fr. Cod.]. See Lithium *benzoate.*—**B. sodicus** [Fr. Cod.]. See Sodium *benzoate.*

BENZOATE, n. Be[2]nz'o-at. Lat., *benzoas.* Fr., *benzoate.* Ger., *Benzoat, Benzoësalz.* It., *benzoato.* A salt of benzoic acid. The b's have in general the constitution $R^N(C_7H_5O_2)n$, where R^N is a radicle of the combining power of *n.* [B.]

BENZOATED, adj. Be[2]nz'o-at-e[2]d. See Benzoinated.

BENZOATUS (Lat.), adj. Be[2]nz-o(o[2])-a(a[3])'tu[3]s(tu[4]s). See Benzoinated.

BENZOCARBOLIC ACID, n. Be[2]nz-o-ka[3]rb-o[2]l'i[2]k. See Phenyl *benzoate.*

BENZOCHINOLINCARBONSÄURE (Ger.), n. Be[2]ntz-o-ch[2]i[2]n-o-len''ka[3]rb-on'zoir-e[2]. Benzoquinolinecarbonic acid. [B, 79.] See Quinoline*benzocarbonic acid.*

BENZODIUREIDE, n. Be[2]nz-o-di-u[2]-re'i[2]d. A substance forming minute acicular crystals, $C_7H_6(CO.NH_2.NH)_2=C_9H_{12}N_4O_2$, produced by the action of urea on benzoic aldehyde. [Leeds, "Jour. of the Am. Chem. Soc.," Jan., 1884, p. 15 (B).]

BENZOE (Lat.), n. f. Be[2]nz'o(o[2])-e(a). Gen., *benz'oes.* Benzoin (1st def.). [B.]—**Balsamum e b.** See *Tinctura* benzoini *composita.*

—**B. amygdalina, B. amygdaloides** [Austr. Ph., Belg. Ph., Rouman. Ph.]. See *Amygdaloid* BENZOIN.—**B. communis.** See *Common* BENZOIN.—**B. electissima.** See *Amygdaloid* BENZOIN.—**B. in granis** [Austr. Ph.], **B. in lacrimis** [Swiss Ph.]. See BENZOIN *in tears*.—**B. in massis.** See *Block* BENZOIN.—**B. in sortis.** Fr., *benjoin en sorte*. See under *Common* BENZOIN.—**B. resina.** Benzoin (1st def.). [B.]—**B's flores.** See *Flowers of* BENZOIN.—**B. vulgaris.** See *Common* BENZOIN.—**Flores b's.** See *Flowers of* BENZOIN.—**Gummi b., Gummi b's.** See BENZOIN.—**Pulvis b's.** Fr., *poudre benzoinée*. A preparation consisting of powders each containing ½ grain of kermes mineral, 1 grain of benzoic acid, and ½ grain of castoreum. [Batav. Ph. (Niemann's ed.), 1811; Geneva Ph., 1780 (B, 119).]—**Resina b.** [Dan. Ph., Norw. Ph., Finn. Ph., Russ. Ph., Swed. Ph.], **Resina b's.** See BENZOIN.—**Sal acidum (seu essentiale, seu volatile) b's.** Benzoic acid. [B, 97.]—**Tinctura b's** [Ger. Ph.]. See *Tinctura* BENZOINI.—**Tinctura b's composita.** See *Tinctura* BENZOINI *composita*.—**Tinctura b's simplex, Tinctura de b. alcoolica.** See *Tinctura* BENZOINI.

BENZOË (Ger.), n. Be^{2}ntz'o-e^2. Benzoin (1st def.). The Latin is also often thus written, *e. g.*, in the Ger. Ph. [B.]—**Amorphe B'-säure.** Benzoeretic acid. [B, 196.]—**Bauchb'.** See *Belly* BENZOIN.—**B'artig.** Resembling or of the nature of benzoin. [B.]—**B'baum.** See BENZOIN (2d def.) and STYRAX *benzoin*.—**B'blumen.** See *Flowers of* BENZOIN.—**B'essigsäureanhydrid.** See ACETOBENZOIC *anhydride*.—**B'fett.** See ADEPS *benzoinatus*.—**B'haltig.** Benzoinated. [B.]—**B'harz.** Benzoin. [B, 108, 180.]—**B.-Katappenbaum.** The TERMINALIA *benzoin*. [L, 80.]—**B'lorbeer.** See BENZOIN *odoriferum*.—**B'oxyd.** Benzophenide. [B, 196.]—**B'resinsäure.** Benzoeretic acid. [B, 196.]—**B'salpetersäure.** Nitrobenzoic acid. [B, 196.]—**B'sauer.** Of or pertaining to benzoic acid; with the name of a base, the benzoate of that base. [B.]—**B'säure.** Benzoic acid. [B.]—**B'säureanhydrid.** See BENZOIC *anhydride*.—**B'säure-Aethylester.** Ethyl benzoate. [B.]—**B'säure-Benzylester.** Benzyl benzoate. [B.]—**B'säure-Methylester.** Methyl benzoate. [B.]—**B'säurepastillen.** See *Trochisci* ACIDI BENZOICI.—**B'säure-Phenylester.** Phenyl benzoate. [B.]—**B'schwefelsäure.** Sulphobenzoic acid. [B, 196.]—**B'talg.** See SEBUM *benzoinatum*.—**B'tinctur** [Ger. Ph.]. See *Tinctura* BENZOINI.—**B'unterschwefelsäure.** Sulphobenzoic acid. [B, 196.]—**Blockb'.** See *Block* BENZOIN.—**Einfache B'tinctur.** See *Tinctura* BENZOINI.—**Falscher B'baum.** The *Terminalia angustifolia*. [B, 180.]—**Fussb'.** See *Foot* BENZOIN.—**Gebräuchlicher B'baum.** The STYRAX *benzoin*. [B, 180.]—**Kopfb'.** See *Head* BENZOIN.—**Mandelb'.** See *Amygdaloid* BENZOIN.—**Penang-B.** See *Penang* BENZOIN.—**Siam-B.** See *Siam* BENZOIN.—**Storaxb'.** See *Penang* BENZOIN.—**Sumatra-B.** See *Sumatra* BENZOIN.—**Thränenb'.** See BENZOIN *in tears*.—**Zusammengesetzte B'tinctur.** See *Tinctura* BENZOINI *composita*.

BENZOENE, n. Be^{2}nz'o-en. Fr., *benzoène*. See TOLUENE.

BENZOERETIC ACID, n. Be^{2}nz-o-e^{2}r-e^{2}t'i^{2}k. Fr., *acide benzoérésique*. Ger., *Benzoëretinsäure*. An acid substance of uncertain composition obtained by heating benzoin (1st def.) with nitric acid. It occurs as a whitish amorphous powder, of aromatic, acidulous, bitter taste, soluble in alcohol, ether, and in boiling water. [B, 2.]

BENZOGLYCOLLATE, n. Be^{2}nz-o-gli^{2}k'o^{2}l-lat. A salt of benzoglycollic acid. [B, 2.]

BENZOGLYCOLLIC ACID, n. Be^{2}nz-o-gli^{2}k-o^{2}l'li^{2}k. Fr., *acide benzo-glycolique*. Ger., *Benzoglycolsäure*. It., *acido benzoglicollico*. A monobasic acid, $(C_6H_5.CO)O.CH_2 - CO.OH$, produced by the action of nitrous acid on hippuric acid. [B, 2, 4.]

BENZOHELICIN, n. Be^{2}nz-o-he^{2}l'i^{2}s-i^{2}n. A substance, $C_{20}H_{20}O_8 = C_{13}H_{15}(C_6H_5.CO)O_7$, compounded of benzoyl and helicin; prepared by the action of nitric acid on benzosalicin. [B, 2, 158.]

BENZOI (Ar.), n. Benzoin. [A, 325.]

BENZOIC, adj. Be^{2}nz-o'i^{2}k. Lat., *benzoicus*. Fr., *benzoïque*. It., *benzoico*. Pertaining to or derived from benzoin. [B.]—**Amorphous b. acid.** See BENZOERETIC ACID.—**B. acid.** Lat., *acidum benzoicum* [U. S. Ph., Br. Ph., Ger. Ph., Fr. Cod.]. Fr., *acide benzoïque* [Fr. Cod.]. Ger., *Benzoësäure*. It., *acido benzoico*. A monobasic aromatic acid, $C_6H_5.CO.OH = C_7H_6O_2$, occurring native in various resins, especially in benzoin, and also prepared synthetically in a variety of ways. It is usually obtained in commerce from its derivative, hippuric acid, contained in the urine of the *Herbivora*. It forms lustrous, colorless acicular or foliate crystals, which have an acidulous, biting taste, and, when obtained by sublimation, usually an agreeable aromatic odor. It is soluble in 200 parts of cold and in 24 of boiling water, and readily soluble in alcohol and in ether. The Fr. Cod. distinguishes two varieties: *b. a. by sublimation* and *b. a. by the wet way* (see ACIDE BENZOÏQUE). [B.]—**B. alcohol.** See BENZYL *alcohol*.—**B. aldehyde.** Fr., *aldéhyde benzoïque*. Ger., *Benzaldehyd*. It., *aldeide benzoica*. Syn.: *benzaldehyde*. A substance, $C_6H_5.COH = C_7H_6O$, contained, together with hydrocyanic acid and the concrete substance called benzoin in crude volatile oil of bitter almonds, and constituting by itself the purified oil of bitter almonds. It may also be prepared artificially from toluene. It is a colorless, highly refracting liquid, of a peculiar but pleasant aromatic odor and a burning taste, of a sp. gr. from 1·043 to 1·050, boiling at 180° C. It is soluble in 30 parts of water, and mixes in all proportions with alcohol and with ether. [B, 4, 5.]—**B. anhydride.** Fr., *anhydride benzoïque*. Ger., *Benzoësäure-Anhydrid*. It., *anidride benzoica*. The anhydride of b. acid, $C_{14}H_{10}O_3 = C_6H_5.CO - O - CO.C_6H_5$; forming prismatic crystals. [B, 4.]—**B. bromide.** See BENZOYL *bromide*.—**B. chloride.** See BENZOYL *chloride*.—**B. iodide.** See BENZYLIDENE *iodobenzoate*.—**German b. acid.** A commercial name for b. acid obtained from the urine of cattle. [B.]—**Troches of b. acid.** See *Trochisci* ACIDI BENZOICI.

BENZOICIN, n. Be^{2}nz-o'i^{2}s-i^{2}n. See BENZOYCIN.

BENZOICUM (Lat.), n. n. Be^{2}nz-o(o^2)'i^{2}k-u^{3}m(u^{4}m). Benzoin. [B.]

BENZOICUS (Lat.), adj. Be^{2}nz-o(o^2)'i^{2}k-u^{3}s(u^{4}s). Benzoic; with the name of a base, the benzoate of that base.

BENZOIFERA (Lat.), n. f. Be^{2}nz-o(o^2)-i^{2}f'e^{2}r-a^3. From *benzoinum*, benzoin, and *ferre*, to bear. See STYRAX *benzoin*.

BENZOILIC ACID, n. Be^{2}nz-o-i^{2}l'i^{2}k. See BENZOLEIC ACID.

BENZOIN, n. Be^{2}n'zo-i^{2}n. Ar., *benzoi*. Lat., *benzoin* (2d def.), *benzoinum* [U. S. Ph., Br. Ph.], *benzoe* [Ger. Ph., Austr. Ph., Netherl. Ph., Swiss Ph., Gr. Ph.], *resina benzoe* [Dan. Ph., Finn Ph., Norweg. Ph., Russ. Ph., Swed. Ph.], *benzoina* (3d def.), *asa dulcis*, Fr., *benjoin* [Fr. Cod.], *benzoïne* (3d def.). Ger., *Benzoë*. *Benzoïn*. (3d def.). It., *benzoe*, *belzuino*, *benzoina* (3d def.). Sp., *benjuí* [Sp. Ph.]. 1. A resinous substance that exudes from incisions into the bark of the *Styrax b.* It occurs in commerce in the form of rounded or angular, light-colored tears imbedded in a homogeneous matrix, the relative proportion and the physical qualities of each varying in the different kinds. B. is insoluble in cold water, yields benzoic acid in boiling water, and is partially soluble in ether and readily soluble in alcohol and in chloroform. It contains from 70 to 80 per cent. of an amorphous resin, from 14 to 18 or even 24 per cent. of benzoic acid, more or less cinnamic acid, small quantities of benzyl benzoate and vanillin, and some residual matter insoluble in alcohol. This last should not exceed 8 or 12 per cent., and some pharmacopœias require b. to be free from cinnamic acid. B. is employed as an antiseptic and vulnerary and in pulmonary affections, especially by inhalation, and was formerly much used in torpidity of the abdominal viscera and in skin diseases. [B, 180, 270.] See *Tinctura* BENZOINI, *Tinctura* BENZOINI *composita*, and ADEPS *benzoinatus*. 2. A genus of lauraceous shrubs and trees established by Nees. [B, 19, 34.] 3. A substance, $C_{14}H_{12}O_2 = C_6H_5 - CO - CH(OH).C_6H_5$, obtained by the action of an alcoholic solution of potassium cyanide on benzoic aldehyde; colorless prismatic crystals sparingly soluble in water, in alcohol, and in ether. [B, 4.]—**Acid of b.** Lat., *sal acidum benzoes*. Benzoic acid. [B, 86.]—**Amygdaloid b.** Lat., *benzoe amygdaloides* [Austr. Ph., Belg. Ph.]. Fr., *benjoin amygdaloïde*. Ger., *Mandelbenzoë*. B. (1st def.) consisting almost entirely of agglomerated tears, the intervening matrix being scanty. [B, 95, 180.]—**Belly b.** Ger., *Bauchbenzoë*. A variety of b. (1st def.) obtained from the tree in the six or seven years after it has ceased to yield head b. It contains fewer tears than the latter. [B, 81.]—**B. gum.** See *B.* (1st def.).—**B. in tears.** Lat., *benzoe in lacrimis* [Swiss Ph.]. Fr., *benjoin en larmes*. Ger., *Thränenbenzoë*. Amygdaloid b., also b. (1st def.) in separate tears. [B, 81.]—**B.-tree.** See STYRAX *b.*—**Block b.** Lat., *benzoe in massis*. Ger., *Blockbenzoë*. B. (1st def.) occurring in large blocks or masses. [B, 270.]—**Common b.** Lat., *benzoe vulgaris*. Ger., *gemeine Benzoë*. B. (1st def.) occurring in masses in which the matrix predominates over the tears. When, in addition, it contains cavities and air-bubbles, it is the *benzoe in sortis* (Fr., *benjoin en sorte*). Less esteemed than amygdaloid b. [B, 180.]—**Compound tincture of b.** See *Tinctura* BENZOINI *composita*.—**Empyreumatic oil of b.** Fr., *huile pyrogénée de benjoin*. An empyreumatic oil obtained by distilling b. (1st def.) on a sand bath; used as an embrocation in articular affections. [B, 92.]—**False b.** An Isle of Bourbon name for the *Terminalia mauritiana*. [B, 19.]—**Flowers of b.** Lat., *flores benzoes*. Fr., *fleurs de benjoin*. Ger., *Benzoëblumen*. It., *fiori di benzoe*. Benzoic acid obtained by the sublimation of b. (1st def.). [B.]—**Foot b.** Ger., *Fussbenzoë*. An inferior variety of b. (1st def.) obtained from the tree after it has been felled. [B, 81.]—**Gum b.** See *B.* (1st def.).—**Head b.** Ger., *Kopfbenzoë*. The variety of b. (1st def.) obtained from the tree during the first three years of its yield. It contains a large number of white tears, and is regarded as of superior quality. [B, 81.]—**Oil of b.** Fr., *huile de benjoin*. See *Empyreumatic oil of b.*—**Ointment of b.** [U. S. Ph., 1870]. See ADEPS *benzoinatus*.—**Palenbang b.** A variety of b. (1st def.) much resembling Sumatra b. [B, 5.]—**Siam b.** Fr., *benjoin de Siam* [Fr. Cod.]. Ger., *Siam-Benzoë*. It., *belzuino di Siam*. The most valuable kind of b. (1st def.) and the only one recognized in the Dan. Ph., Norweg. Ph., Swed. Ph., Hung. Ph., and Ger. Ph., 1st ed. It occurs in agglomerated or discrete tears, which are brown or reddish externally, and milky or gray within when first broken, becoming darker on exposure. It is darker-colored and more lustrous than Sumatra b., has a strong vanilla-like odor, and melts at 75° C. [B, 270.]—**Spirit of b.** Lat., *spiritus benzoini*. An acid spirit which comes over with the empyreumatic oil of b. on distillation. [B, 200.]—**Sumatra b.** Fr., *benjoin de Sumatra* [Fr. Cod.]. Ger., *Sumatra-Benzoë*. It., *belzuino di Sumatra*. The variety of b. (1st def.) ordinarily met with in commerce, occurring in tears imbedded in a reddish or brownish, porous, friable matrix. The tears are translucent at the edges, and the freshly fractured surface is whitish and of a waxy lustre. The tears melt at 85° C., and the matrix melts at 95°. [B, 270.]—**Tincture of b.** See *Tinctura* BENZOINI.

BENZOIN (Lat.), n. n. Be^{2}nz'o(o^2)-i^{2}n. Gen., *benzoi'nis*. See *B.* Eng. (1st and 2d def's).—**B. odoriferum** [Nees]. Syn.: *Laurus b.* [Linnæus]. The fever-bush, bush-allspice; a shrub from 6 to 12 feet high, with obovate-lanceolate deciduous leaves, and pedicelled yellow flowers in sessile umbels, growing in the United States and Canada. The bark is aromatic, and is said to be stimulant and tonic; the berries have been used as a substitute for allspice. [B, 19, 34.]—**B. officinale** [Hayne]. See STYRAX *b.*—**Essentia b'is, Tinctura b'is.** See *Tinctura* BENZOINI.

BENZOÏN (Ger.), n. Be^{2}ntz-o-en'. See *B.*, Eng. (3d def.).

BENZOIN (Fr.), adj. Ba^{3}n^2-zo-a^{2}n^2. See BENZOINUS.

BENZOINA (Lat.), n. f. Be^{2}nz-o(o^2)-i(e)'na^3. See BENZOIN. Eng. (3d def.).

BENZOINAM, n. Be^{2}nz-o'i^{2}n-a^{2}m. Fr., *benzoïname*. A white

micro-crystalline inodorous powder, $C_{28}H_{24}N_2O$, obtained by heating benzoin (3d def.) with an alcoholic solution of ammonia. [B, 2.]

BENZOINAMIDE, n. Be^{2}nz-o-i^{2}n'a^{2}m-i^{2}d. Fr., *benzoïnamide*. A white, tasteless, inodorous powder, $C_{42}H_{36}N_4$, obtained by the action of an aqueous solution of ammonia on benzoin (3d def.). [B, 2.]

BENZOINATED, adj. Be^{2}nz'o-i^{2}n-at-e^{2}d. Lat., *benzoinatus* [U. S. Ph.], *benzoatus* [Br. Ph.]. Fr., *benzoïné*. Ger., *benzoïnirt*. It., *benzoato*. Sp., *benzoado*. Syn.: *benzoated*. Containing or prepared with benzoin. [B.] See ADEPS *benzoinatus*.

BENZOÏNE (Fr.), n. Ba^{3}n^{2}z-o-en. See BENZOIN (3d def.).

BENZOÏNÉ (Fr.), adj. Ba^{3}n^{2}z-o-en-a. See BENZOINATED.

BENZOINEÆ (Lat.), n. f. pl. Be^{2}nz-o(o^2)-i^{2}n'e^2-e(a^3-e^2). Of Reichenbach, a subdivision of lauraceous plants, comprising the genera *Benzoin* and *Sassafras*. [B, 170.]

BENZOINIFERA (Lat.), n. f. Be^{2}nz-o(o^2)-i^{2}n-i^{2}f'e^{2}r-a^3. From *benzoe*, benzoin, and *ferre*, to bear. The *Styrax benzoin*. [B, 200.]

BENZOINIMIDE, n. Be^{2}nz-o-i^{2}n'i^{2}m-i^{2}d(id). A substance, $C_{14}H_{11}N$, formed by the action of ammonia on benzoin (3d def.). [B, 196.]

BENZOÏNIRT (Ger.), adj. Be^{2}ntz-o-en-ert'. See BENZOINATED.

BENZOINITRIC, adj. Be^{2}nz-o-i^2-ni'tri^{2}k. See NITROBENZINIC.

BENZOINUM [U. S. Ph., Br. Ph.] (Lat.), n. n. Be^{2}nz-o(o^2)-i(e)'-nu^{3}m(nu^{4}m). See BENZOIN (1st def.).—**Acidum benzoini.** Benzoic acid. [B.]—**Arbor benzoini.** The *Styrax benzoin*. [B.]—**Benzoini oleum.** See *Empyreumatic oil of* BENZOIN.—**B. verum.** See BENZOIN (1st def.).—**Flores benzoini.** See *Flowers of* BENZOIN.—**Oleum benzoini.** See *Empyreumatic oil of* BENZOIN.—**Pulvis benzoini** [Fr. Cod.]. See *Poudre de* BENJOIN.—**Spiritus benzoini.** See *Spirit of* BENZOIN.—**Tinctura benzoini** [U. S. Ph.]. Fr., *teinture de benjoin* [Fr. Cod.]. Syn.: *tinctura benzoes* [Ger. Ph.]. A filtered solution of 1 part of benzoin (1st def.) in 4 [U. S. Ph.] or 5 [Fr. Cod., Ger. Ph] parts of alcohol. [B, 81, 113, 205.]—**Tinctura benzoini composita** [U. S. Ph., Br. Ph.]. Fr., *teinture balsamique* [Fr. Cod.]. Ger., *zusammengesetzte Benzoëtinctur*. It., *tintura di benzoe composta*. Syn.: *tinctura balsamica, essentia balsamica*. A preparation made up of 12 parts of benzoin, 2 of purified aloes, 8 of storax, 4 of balsam of Tolu, and enough alcohol to make 100 parts [U. S. Ph.]; or of 2 oz. of benzoin, 1½ oz. of prepared storax, ½ oz. of balsam of Tolu, and 160 grains of socotrine aloes dissolved in 1 pint of rectified spirit [Br. Ph.]; or of a tincture prepared by macerating 1 part of angelica root and 2 parts of the flowering part of St. John's-wort in 72 parts of alcohol, adding 1 part each of aloes, myrrh, and olibanum and 6 parts each of balsam of Tolu and benzoin [Fr. Cod.]. Similar preparations, in some of which balsam of Peru was substituted for balsam of Tolu, have been official in a great number of formularies under various names, such as *Friar's balsam* (*balsamum Friardi*), *Turlington's*, *Jesuits'*, *Vervain's*, *Saint Victor's*, *Persian*, and *Swedish balsam*, *balsamum commendatoris* (seu *innocentium*, seu *catholicon*, seu *traumaticum*, seu *vulnerarium*, seu *persicum*), *elixir traumaticum*, etc. A similar preparation was the *baume vulnéraire de Burrhus*. It is a reddish acid liquid, much employed as an application to ulcers, bed-sores, cracked nipples, excoriations, etc.. and used internally and by inhalation in respiratory and urinary disorders. [B, 81, 113, 119.]—**Unguentum benzoini** [U. S. Ph., 1870]. See ADEPS *benzoinatus*.

BENZOINUS (Lat.), adj. Be^{2}nz-o(o^2)-i(e)'nu^{3}s(nu^{4}s). See BENZOIC.

BENZOL, n. Be^{2}nz'o^{2}l. Fr., *benzol, benzole*. Ger., *Benzol*. See BENZENE.—**B'dicarbonsäure** (Ger.). Phthalic acid. [B, 196.]—**B'disulphonic acid.** Ger., *B'disulfonsäure*. See BENZENEDISULPHONIC ACID.—**B'hexacarbonsäure** (Ger.). Mellitic acid. [B, 196.]—**B'hexachlorür** (Ger.). See BENZENE *hexachloride*.—**B'-hexahydrat** (Ger.). See BENZENE *hexahydrate*.—**B'hexahydrür** (Ger.). See BENZENE *hexahydride*.—**B'metadisulfonsäure** (Ger.). Metabenzenedisulphonic acid. [B.] See under BENZENE*disulphonic acid*.—**B'monocarbonsäure** (Ger.). Benzoic acid. [B, 196.]—**B'orthodisulfonsäure** (Ger.). Orthobenzenedisulphonic acid. [B.] See under BENZENE*disulphonic acid*.—**B'paradisulfonsäure** (Ger.). Parabenzenedisulphonic acid. [B.] See under BENZENE-*disulphonic acid*.—**B'schweflige Säure** (Ger.), **B'sulfinsäure** (Ger.). Benzenesulphinic acid. [B, 4.]—**B'tetracarbonsäure** (Ger.). Prehnitic acid. [B, 196.]—**B'tricarbonsäure** (Ger.). See BENZENE*tricarbonic acid*.—**B'trichlorürtrihydrat** (Ger.). Benzene trichlorotrihydrate. [B, 4.]—**B'trisulfonsäure** (Ger.). Benzenetrisulphonic acid. [B.]

BENZOLACTATE, n. Be^{2}nz-o-la^{2}k'tat. A salt of benzolactic acid. [B, 2.]

BENZOLACTIC ACID, n. Be^{2}nz-o-la^{2}k'ti^{2}k. Fr., *acide benzolactique*. Ger., *Benzomilchsäure*. A crystalline substance, $C_{10}H_{10}O_4{=}C_3H_4-(C_6H_5.CO)-CO.OH$, being lactic acid in which benzoyl replaces basic hydrogen, obtained by heating a mixture of lactic and benzoic acids on an oil bath. [B, 2.]

BENZOLE, n. Be^{2}nz'ol. Fr., *benzole*. Ger., *Benzol*. See BENZENE.

BENZOLEIC ACID, n. Be^{2}nz-o-le'i^{2}k. Fr., *acide benzoléique*. Syn.: *benzoilic* (or *hydrobenzoic*) *acid*. An acid, $C_7H_{10}O_2{=}C_6H_9$.-CO.OH, derived from benzoic acid by the action of sodium amalgam; an oily liquid which, on exposure to the air, is converted into benzoic acid. [B, 2, 4, 93.]

BENZOLENE, n. Be^{2}nz'o^{2}l-en. Graebe's name for a substance of the formula C_6H_{12}. [B, 196.]

BENZOLEUM (Lat.), n. n. Be^{2}nz-ol(o^{2}l)'e^2-u^{3}m(u^{4}m). See BENZENE.

BENZOLIN, n. Be^{2}nz'o^{2}l-i^{2}n. 1. See LIGROIN. 2. Graebe's name for a substance of the formula C_6H_{10}. [B, 196.]

BENZOLINE, n. Be^{2}nz'o^{2}l-en. See AMARINE.

BENZOLONE, n. Be^{2}nz'o^{2}l-on. 1. A crystallizable substance, probably $C_{21}H_{18}O_2$, produced by the decomposition of hydrobenzamide. [B, 2.] 2. Graebe's name for a substance of the formula C_6H_8. [B, 196.]

BENZOLUM [Swiss Ph.] (Lat.), n. n. Be^{2}nz'o^{2}l-u^{3}m(u^{4}m). See BENZENE.

BENZOMERCURAMIDE, n. Be^{2}nz-o-mu^{6}r-ku^{2}r'a^{2}m-i^{2}d(id). A mercurial derivative of benzamide, $C_{14}H_{12}Hg''N_2O_2 = (N.C_7H_5$-$O.H)_2Hg''$. [A, 1.]

BENZOMILCHSÄURE (Ger.), n. Be^{2}ntz-o-mi^{2}lch^2'zoir-e^2. Benzolactic acid. [B, 196.]

BENZONE, n. Be^{2}nz'on. See BENZOPHENONE.

BENZONITRANISIDE, n. Be^{2}nz-o-ni-tra^{2}n'i^{2}s-i^{2}d(id). A derivative of nitranisidine, $C_{14}H_{12}N_2O_4 = N.C_7H_5O.C_7H_6(NO_2)O.H$, analogous to benzamide. [A, 1.]

BENZONITRILE, n. Be^{2}nz-o-ni'tri^{2}l. Ger., *Benzonitril*. Syn.: *phenyl cyanide*. A colorless oily liquid, C_7H_5N or $C_6H_5.CN$. [B, 4.]

BENZONUM (Lat.), n. n. Be^{2}nz'o^{2}n-u^{3}m(u^{4}m). See BENZOPHENONE.

BENZOPHENIDE, n. Be^{2}nz-o^{2}f'e^{2}n'i^{2}d(id). See PHENYL *benzoate*.

BENZOPHENONE, n. Be^{2}nz-o^{2}f'e^{2}n-on. Lat., *benzophenonum*. Fr., *benzophénone*. Ger., *Benzophenon*. Syn.: *benzone, diphenyl ketone*. A ketone, $C_6H_5-CO-C_6H_5{=}C_{13}H_{10}O$, forming prismatic crystals insoluble in water, soluble in alcohol. [B, 4.]

BENZOPINACONE, BENZOPINAKONE, n's. Be^{2}nz-o-pin'a^3-kon. A micro-crystalline substance, $C_{26}H_{20}O_2$, produced by the action of nascent hydrogen on benzophenone; converted by distillation into an isomeric form, *isobenzopinacone*, a thick, colorless, highly refracting liquid. [B, 93, 196.]

BENZOPINITE, n. Be^{2}nz-o-pin'it. A product of the action of benzoic acid on pinite. [B, 158.] See DIBENZOPINITE and TETRABENZOPINITE.

BENZOPURPURIN, n. Be^{2}nz-o-pu^{5}r'pu^2-ri^{2}n. A dark-red powder of the composition $NaO.SO_2-NH_2-C_{10}H_5.N{=}N-C_6H_7-C_6H_7-N{=}N.C_{10}H_5.NH_2-SO_2.ONa$. [B, 258.]

BENZOQUERCITE, n. Be^{2}nz-o-kwu^{5}r'sit. A product of the action of benzoic acid on quercite. [B, 158.] See DIBENZOQUERCITE.

BENZOQUINOLINECARBONIC ACID, n. Be^{2}nz-o-kwi^{2}n-o-len-ka^{3}r-bo^{2}n'i^{2}k. See QUINOLINE*benzocarbonic acid*.

BENZOQUINONE, n. Be^{2}nz-o^{2}k'wi^{2}n-on. See QUINONE.

BENZOSALICIN, n. Be^{2}nz-o-sa^{2}l'i^{2}s-i^{2}n. Lat., *benzosalicinum*. Fr., *benzo-salicine*. Ger., *Benzosalicin*. Populin; so called because it may be regarded as salicin with an atom of hydrogen replaced by benzoyl. [B, 158.]

BENZOSALICYLAMIC ACID, n. Be^{2}nz-o-sa^{2}l-i^2-si^{2}l-a^{2}m'i^{2}k. See BENZOSALICYLAMIDE.

BENZOSALICYLAMIDE, n. Be^{2}nz-o-sa^{2}l-i^2-si^{2}l'a^{2}m-i^{2}d(id). A salicyl derivative of benzamide, $C_{14}H_9NO_2{=}N.C_7H_5O.C_7H_4O''$. It acts as a monobasic acid, forming salts with metals. [B, 2.]

BENZOSALICYLIC ACID, n. Be^{2}nz-o-sa^{2}l-i^2-si^{2}l'i^{2}k. Fr., *acide benzo-salicylique*. A substance, $C_{14}H_{10}O_4{=}C_6H_3(C_6H_5.CO)-CO.OH$ or $C_6H_4(C_6H_5.CO)-CO.O$, occurring as a viscous mass formed by the action of benzoyl chloride upon potassium salicylate. [B, 2.]

BENZOSTILBIN, n. Be^{2}nz-o-sti^{2}l'bi^{2}n. A crystallizable substance, perhaps $C_{14}H_{10}O$, obtained by the decomposition of hydrobenzamide. [B, 2.]

BENZOSULPHATE, n. Be^{2}nz-o-su^{3}lf'at. Fr., *benzosulfate*. A salt of benzosulphuric (sulphobenzoic) acid. [A, 385.]

BENZOSULPHURIC ACID, n. Be^{2}nz-o-su^{3}lf-u^2'ri^{2}k. Fr., *acide benzosulfurique*. See SULPHOBENZOIC ACID.

BENZOTHIAMIDE, n. Be^{2}nz-o-thi'a^{2}m-i^{2}d(id). See THIOBENZAMIDE.

BENZOTRICHLORIDE, n. Be^{2}nz-o-tri-klo'ri^{2}d(rid). Ger., *Benzotrichlorür*. A compound, $C_6H_5.CCl_3$, produced by the action of phosphoric chloride on chlorbenzoyl; a liquid boiling at 213° or 214° C. [B, 4.]

BENZOTRIQUINONE, n. Be^{2}nz-o-tri'kwi^{2}n-on. Syn.: *triquinoyl*. A substance, $C_6O_6+8H_2O$, obtained by the oxidation of hexahydroxybenzene or of tetrahydroxyquinone, forming minute, colorless acicular crystals nearly insoluble in water and in alcohol. [B, 3.]

BENZOURIC ACID, n. Be^{2}nz-o-u^2'ri^{2}k. Fr., *acide benzourique*. See HIPPURIC ACID.

BENZOXYCARBOSTYRIL, n. Be^{2}nz-o^{2}x-i^2-ka^{3}rb-o^{2}s'ti^{2}r-i^{2}l. See DIOXYQUINOLINE.

BENZOYCIN, n. Be^{2}nz-o'i^{2}s-i^{2}n. Fr., *benzoycine*. Monobenzoycin; a glyceride of benzoic acid. $C_{10}H_{12}O_4{=}C_3H_5(OH)_2(C_6H_5$.-CO.O), a pale, viscid, oily liquid of a bitter aromatic taste and a sp. gr. of 1·228, very soluble in alcohol and in ether. [B, 2.] See also TRIBENZOYCIN.

BENZOYL, n. Be^{2}nz'o-i^{2}l. Lat., *benzoylium*. Fr., *benzoyle*. Ger., *Benzoyl*. The radicle, $C_6H_5.CO$, of benzoic acid. [B.]—**B'acetic acid.** Fr., *acide benzoyl-acetique*. Ger., *B'essigsäure*. Syn.: *benzacetic acid*. A supposititious acid having the composition of acetic acid in which b. replaces hydrogen, $CH_2(C_6H_5.CO)-CO.OH$; known only by its derivatives. [B, 2.] See AMIDOBENZOYLACETIC ACID and NITROBENZOYLACETIC ACID.—**B'acetoacetate.** An acetoacetate in which a molecule of b. replaces an atom of hydrogen. [B, 2.]—**B'aconine.** See ACONITINE.—**B'apoaconine.** See

APOACONITINE.—**B'amide.** See BENZAMIDE.—**B. and hydrogen nitride.** See BENZAMIDE.—**B'apoaconitine.** Syn.: *dib'apoaconine.* A base, $C_{26}H_{35}NO_7(O)(O-CO.C_6H_5)(O-CO.C_6H_5)$, being apoaconitine in which b. replaces one atom of the hydroxylic hydrogen. ["Ber. d. dtsch. chem. Gesellsch.," 1878, p. 1267 (B).]—**B'apopseudaconine.** A base, $C_{27}H_{37}NO_5(O)(O-C_6H_5.CO)-(OH)=C_{34}H_{43}NO_9$, being apopseudaconine in which b. replaces hydrogen. ["Ber. d. dtsch. chem. Gesellsch.," 1878, p. 1267 (B).]—**B'apopseudaconitine.** A crystallizable base, $C_{36}H_{46}(C_6H_5.CO)NO_{11}$, being apopseudaconitine in which b. replaces hydrogen, formed by treating the former with benzoic aldehyde. ["Ber. d. dtsch. Gesellsch.," 1878, p. 1267 (B).]—**B'azotide.** A substance, $C_{15}H_{12}N_2$, occurring as a white, tasteless, odorless, microcrystalline powder, obtained by the action of ammonia on oil of bitter almonds. [B, 2.]—**B. benzoate.** Benzoic anhydride. [B, 2.]—**B'benzoic acid.** Fr., *acide b.-benzoïque.* Ger., *B'benzoësäure.* A monobasic acid, $C_{14}H_{10}O_3=C_6H_4(C_6H_5.CO),CO.OH$, being benzoic acid in which b. replaces hydrogen; small, silky acicular or laminar crystals or a gelatinous precipitate. [B, 2.]—**B. bromide.** A colorless, pungent liquid, $C_6H_5.CO.Br$, of the sp. gr. of 1·570. ["Proc. of the Am. Pharm. Assoc.," xxx, p. 385 (B).]—**B. carbamide.** See *B'urea.*—**B'chinin** (Ger.). See *B'quinine.*—**B'chinolin** (Ger.). See *B'oxyquinoline.*—**B. chloride.** Fr., *chlorure de benzoyle.* Ger., *B'chlorür.* See CHLORBENZOYL.—**B'ecgonine.** Fr., *b.-ecgonine.* Ger., *B'ecgonin.* A substance, $C_{16}H_{19}NO_4$, occurring in coca leaves, along with cocaine, and transformed into the latter by treatment with methyl iodide; prismatic crystals melting between 90° and 92° C., readily soluble in water, soluble with difficulty in alcohol, and insoluble in ether. In physiological action it is quite different from cocaine, but resembles caffeine. [Merck, "Dtsch. Med.-Ztg.," Feb. 11, 1886, p. 137; R. Stockman, "Pharm. Jour. and Trans.," Apr. 24, 1886, cited in "Therap. Gaz.," June, 1886, p. 391; B, 270.]—**B'essigsäure** (Ger.). See *B'acetic acid.*—**B'eugenol.** Ger., *B.-Eugenolester.* A substance, $C_{17}H_{16}O_3=C_{10}H_{11}(C_6H_5.CO)O_2$, prepared by the action of chlorb' on eugenol; colorless acicular crystals. [B, 4.]—**B'glycocine.** Ger., *B'glycocoll.* Hippuric acid. [B, 4.]—**B'harnstoff** (Ger.). See *B'urea.*—**B'helicin.** See BENZOHELICIN.—**B. hydrate.** Benzoic acid. The term is also applied to benzoic aldehyde, but improperly. [B.]—**B. hydride.** Ger., *B'hydrür.* Benzoic aldehyde. [B, 4.]—**B'metaoxyquinoline.** Fr., *b.-métaoxyquinoléine.* Ger., *B'metaoxychinolin.* See *B'oxyquinoline.*—**B'methylecgonine.** Fr., *b.-méthyl-ecgonine.* Ger., *B'methylecgonin.* A name expressive of the constitution of cocaine regarded as a derivative of ecgonine in which 2 atoms of hydrogen are replaced by a molecule of b. and one of methyl, $C_9(CH_3)(C_6H_5.CO)H_{12}NO_3=C_{17}H_{21}NO_4$. [B.] See ECGONINE and COCAINE.—**B'orthoxyquinoline.** Fr., *b.-orthoxyquinoléine.* Ger., *B'orthoxychinolin.* See *B'oxyquinoline.*—**B'oxyquinoline.** Fr., *b.-oxyquinoléine.* Ger., *B'oxychinolin.* A substitution compound of quinoline in which oxygen and b. replace hydrogen. Three isomeric varieties are known: 1. *B'orthoxyquinoline*, $C_6[H,H,H,O-CO.C_6H_5,N=CH-CH=\overbrace{CH,-,}]$, a substance forming shining crystals. 2. *B'paroxyquinoline*, $C_6[H,O-CO.C_6H_5,H,H,N=CH-CH=\overbrace{CH,-,}]$, forming white acicular crystals. 3. *B'metaoxyquinoline*, probably $C_6[O-CO.C_6H_5,H,H,H,N=CH-CH=\overbrace{CH,-,}]$, forming colorless prismatic crystals. [B, 79.]—**B'paroxyquinoline.** Fr., *b.-paroxyquinoléine.* Ger., *B'paroxychinolin.* See *B'quinoline.*—**B. persulphide.** A substance, $C_{14}H_{10}O_2S_2=C_6H_5.CO-S-S-CO.C_6H_5$, formed by the oxidation of thiobenzoic acid. [B, 4.]—**B'piperidine.** Fr., *b.-pipéridine.* Ger., *B'piperidin.* A substitution product of piperidine, forming colorless columnar crystals, $C_{12}H_{15}NO=C_5H_{10}(CO.C_6H_5)N$. [B, 79.]—**B'piperylhydrazine.** Fr., *b.-pipérylhydrazine.* Ger., *B'piperylhydrazin.* A substance, $C_{12}H_{16}N_2O=C_5H_{10}N-NH-CO.C_6H_5$, forming shining scales. [B, 79.]—**B'quinine.** Fr., *b.-quinine.* Ger., *B'chinin.* A substitution compound of quinine in which b. replaces hydrogen, $C_{27}H_{28}N_2O_3=C_{20}H_{23}(C_6H_5.CO)N_2O_3$. [B, 4.]—**B'resorcin.** A derivative of b. and resorcin; a highly colored, thick, oily liquid, heavier than water and insoluble in that liquid, but dissolving in alcohol to form a yellow solution which shows a green fluorescence. ["Proc. of the Am. Pharm. Assoc.," xxvi, p. 625 (B).]—**B'salicin.** Fr., *b.-salicine.* Ger., *B'salicin.* See POPULIN.—**B'salicylamide.** Ger., *B'salicylamid.* An amide, $C_{14}H_{11}NO_3$, formed by the action of b. chloride on salicylamide. [B.]—**B'salicylol.** A thick oily liquid, $C_{14}H_{10}O_5$, obtained by the action of b. chloride on sodium salicylide. [B, 93.]—**B'salicylonitrile.** A substance, $C_{14}H_9NO_2$, formed by the action of heat on b'salicylamide. [B, 93.]—**B'sulphonic acid.** Fr., *acide b.-sulfonique.* Ger., *B'sulfonsäure.* An acid, $C_7H_6SO_6=C_6H_5-CO-SO_3.OH$, forming prismatic crystals. produced by the action of sulphuric acid on b. chloride; isomeric with sulphobenzoic acid and readily convertible into that body. [B, 2.]—**B'tetrahydroquinoline.** Fr., *b.-tétrahydroquinoléine.* Ger., *B'tetrahydrochinolin.* A substitution compound of tetrahydroquinoline in which b. replaces hydrogen, $C_{16}H_{15}NO=C_9H_7.H_3(CO.C_6H_5)$, forming large colorless crystals. [B, 79.]—**B'tropeine.** A substitution compound of b. and tropeine, $C_{75}H_{29}NO_2$. ["Proc. of the Am. Pharm. Assoc.," xxix, p. 337 (B).]—**B'tropine.** A crystalline substance having the composition of tropine in which b. replaces hydrogen; not a mydriatic. ["Proc. of the Am. Pharm. Assoc.," xxv, p. 308 (B).]—**B'urea.** Syn.: *benzureide.* A crystalline substance, $C_8H_8N_2O_2=NH_2-CO-NH(C_6H_5.CO)$, obtained by the action of b. chloride on urea. [B, 2.]—**B'ureide.** Fr., *b.-uréide.* Ger., *B'ureïd.* A white, tasteless, odorless amorphous powder. $C_{26}H_{28}N_8O_4$, obtained by the action of benzoic aldehyde on urea. [B, 2.]—**B'wasserstoff** (Ger.). Benzoic aldehyde. [B.]—**Hydrated b.** Benzoic acid. [L, 120.]—**Methylb'ecgonine.** See *B'methylecgonine.*

BENZOYLATE, n. Be^{2}nz-o′i^{2}l-at. See BENZOATE.

BENZOYLIC, adj. Be^{2}nz-o-i^{2}l′i^{2}k. Lat., *benzoilicus.* See BENZOIC.

BENZOYLIUM (Lat.), n. n. Be^{2}nz-o(o^2)-i^{2}l(u^{6}l)′i^2-u^{3}m(u^{4}m). Benzoyl. [L, 81.]

BENZULE, n. Be^{2}nz′u^{2}l. See BENZOYL.

BENZULMIC ACID, n. Be^{2}nz′u^{3}l′mi^{2}k. A dibasic acid, $C_{14}H_{10}O_6$, obtained, along with oxybenzoic acid, when amidobenzoic acid is treated with nitrous acid. [B, 93.]

BENZUREIDE, n. Be^{2}nz-u^2-re′i^{2}d(id). Fr., *benzuréide.* Ger., *Benzureïd.* A substance formed by the action of urea on benzoic aldehyde in alcoholic solution. [B.] See BENZOYL*urea*, BENZODIUREIDE and DIBENZOTRIUREIDE.

BENZYDROL, n. Be^{2}nz-i′dro^{2}l. See BENZHYDROL.

BENZYHYDROXAMIC ACID, n. Be^{2}nz-i^2-hi-dro^{2}x-a^{2}m′i^{2}k. Fr., *acide benzy-hydroxamique.* Ger., *Benzyhydroxaminsäure.* A monobasic acid, $NH_2(C_7H_5O)O=C_7H_7NO_2$, being hydroxylamine in which an atom of hydrogen is replaced by a molecule of benzoyl; colorless laminar crystals. [B, 2.]

BENZYL, n. Be^{2}nz′i^{2}l. Fr., *benzile, benzyle.* Ger., *Benzyl.* It., *benzile.* A univalent radicle, $C_6H_5.CH_2$, to which the symbol Bz was formerly given. [B, 4, 118.]—**Acid b. sulphite.** See *B'sulphurous acid.*—**B. acetate.** Fr., *acétate de benzile.* Ger., *Essigsäure-B'ester.* A liquid, $C_6H_5.CH_2-(C_2H_3O_2)$, of hyacinthine odor, boiling at 210° C. [B, 4.]—**B'acetoacetate.** An acetoacetate in which b. replaces an atom of hydrogen. [B, 2.]—**B. alcohol.** Fr., *alcool benzylique.* Ger., *Benzalkohol.* Syn.: *phenylcarbinol, phenylmethyl alcohol.* A colorless oily liquid, $C_6H_5.CH_2.OH$, freely soluble in alcohol and in ether, boiling at 206° or 207° C., found in balsam of Peru, balsam of Tolu, and styrax, and obtainable by the action of alcoholic potash on oil of bitter almonds. It is isomeric with cresol, and may be regarded as methyl alcohol in which phenyl replaces hydrogen. [B, 4.]—**B'amine.** Fr., *b'amine.* Ger., *B'amin.* It., *benzilamina.* A colorless, highly alkaline, caustic liquid, $NH_2.C_6H_5.CH_2$, isomeric with toluidine, boiling at 183° C., which may be regarded as ammonia in which an atom of hydrogen is replaced by b. [B, 3.]—**B'äther** (Ger.). See *B. ether.*—**B'äthyläther** (Ger.). See *B'ethyl ether.*—**B'äthylbenzol** (Ger.). See *B'ethylbenzene.*—**B'äthylketon** (Ger.). See *B'ethyl ketone.*—**B'benzene.** Fr., *b.-benzine.* Ger., *B'benzol.* See DIPHENYL*methane.*—**B. benzoate.** Fr., *benzoate de benzyle.* Ger., *Benzoësäure-B'ester.* A cystalline substance, $C_6H_5CH_2(C_7H_5O_2)=C_{14}H_{12}O_2$, occurring in the liquid portion of balsam of Peru. [B, 4.]—**B'benzoic acid.** Fr., *acide b.-benzoïque.* Ger., *B'benzoësäure.* A monobasic acid, $C_{14}H_{12}O_2=C_6(C_6H_5.CH_2)H_4-CO.OH$, being benzoic acid in which b. replaces hydrogen; forming acicular crystals. [B, 2, 158.]—**B'benzol** (Ger.). B'benzene. [B.] See DIPHENYL*methane.*—**B. bromide.** Fr., *bromure de benzyle.* Ger., *B'bromür.* A liquid, $C_6H_5.CH_2Br$, emitting highly irritant vapors. [B, 4.]—**B. butyrate.** Fr., *butyrate de benzyle.* Ger., *B'buttersäureester, Buttersäure-B'ester.* A substance of the composition $C_{10}H_{10}O_2=CH_3.CH_2.CH_2CO.O-(C_6H_5.CH_2)$. [B, 4.]—**B. carbamate.** See *B'urethane.*—**B. carbamide.** See *B'urea.*—**B'chinolin** (Ger.). See *B'quinoline.*—**B. chloride.** Fr., *chlorure de benzyle.* Ger., *B'chlorür.* A colorless liquid, $C_6H_5.CH_2Cl$, giving off highly irritant vapors. [B, 4.]—**B. cinnamate.** Fr., *cinnamate de benzyle.* Ger., *Zimmtsäure-B'ester.* Cinnamein. [B, 4.]—**B. cyanide.** Fr., *cyanure de benzyle.* Ger., *B'cyanür.* Phenylacetonitrile. [B, 4.]—**B'dimethylcarbinol.** Fr., *b.-diméthyl-carbinol.* Syn.: *phenylkatabutyl alcohol.* A substance, $OH-C=(CH_3)_2 \diagdown CH_2(C_6H_5)$, forming colorless acicular crystals. [B, 158.]—**B'essigsäureester** (Ger.). See *B. acetate.*—**B'ester** (Ger.). A compound ether or a salt formed by the union of b. with an acid. [B.]—**B. ether.** Fr., *éther benzylique.* Ger., *B'äther.* A compound of b. and another radicle with oxygen. [B.] See DIBENZYL *ether*, *B'methyl ether*, *B'ethyl ether, and B'phenyl ether.*—**B'ethyl acetone.** See *B'ethyl ketone.*—**B'ethylbenzene.** Fr., *b.-éthyl-benzine.* Ger., *B'äthylbenzol.* An oily liquid, $C_{15}H_{16}=C_6(C_6H_5.CH_2)(C_2H_5)H_4$, being benzene in which b. and ethyl replace each an atom of hydrogen. [B, 4.]—**B'ethyl ether.** Fr., *éther b.-éthylique.* Ger., *B'äthyläther.* A liquid, $C_6H_5.CH_2-O-C_2H_5$, boiling at 185° C. [B, 4.]—**B'ethyl ketone.** Ger., *B'äthylketon.* A ketone, $C_6H_5.CH_2-CO-C_2H_5$, boiling at 225° or 226° C.; converted, on oxidation, into benzoic and propionic acids. [B, 4.]—**B'harnstoff** (Ger.). See *B'urea.*—**B. hydrate.** Fr., *hydrate de benzyle.* Ger., *B'hydrat.* See *B. alcohol.*—**B. hydride.** Fr., *hydrure de benzyle.* Ger., *B'wasserstoff, B'hydrür.* Toluene. [B.]—**B. hydrosulphide.** See *B. mercaptan.*—**B'hydrylbenzoic acid.** See BENZHYDRYLBENZOIC ACID.—**B. iodide.** Fr., *iodure de benzyle.* Ger., *B'jodür.* A crystalline substance, $C_6H_5.CH_2I$, melting at 24° C. [B, 4.]—**B'isobuttersäureester.** See *B. isobutyrate.*—**B. isobutyrate.** Fr., *isobutyrate de benzyle.* Ger., *B'isobuttersäureester, Isobuttersäure-B'ester.* A substance of the composition $C_{10}H_{14}O_2=(CH_3)_2>CH.CO.O.(C_6H_5.CH_2)$. [B, 4.]—**B'jodür** (Ger.). See *B. iodide.*—**B. mercaptan.** B. hydrosulphide; a highly refracting liquid, $C_6H_5.CH_2.SH$, of a leek-like odor. [B, 4.]—**B'methyl acetone.** See *B'methyl ketone.*—**B'methyläther** (Ger.). See *B'methyl ether.*—**B'methylbenzene.** Fr., *b.-méthylbenzine.* Ger., *B'methylbenzol.* See *B'toluene.*—**B'methyl ether.** Fr., *éther b.-méthylique.* Ger., *B'methyläther.* A liquid, $C_6H_5.CH_2-O-CH_3$, isomeric with ethylphenyl ether, boiling at 167° or 168° C. [B, 4.]—**B'methyl ketone.** Ger., *B'methylketon.* Syn.: *b'methyl acetone.* A ketone, $C_6H_5.CH_2-CO-CH_3$. boiling between 214° and 216° C.; converted, on oxidation, into benzoic and acetic acids. [B, 4.]—**B. nitrate.** Fr., *azotate de benzyle.* Ger., *Salpetersäure-B'ester.* A compound, $C_6H_5.CH_2.NO_3$, of b. and nitric acid. [B, 3.]—**B'phenol.** Fr., *b.-phénol.* Ger., *B'phenol.* A phenol in which b. replaces hydrogen, $C_{13}H_{12}O=C_6H_4(C_6H_5.CH_2)(OH)$, isomeric with benzhydrol; silvery acicular crystals. [B, 4.]—**B'phenyläther** (Ger.). See *B'phenyl ether.*—**B'phenyl ether.** Fr., *éther b.-phénylique.* Ger., *B'phenyläther.* A crystalline substance, $C_6H_5.CH_2-O-C_6H_5$, melting at 38° or 39° C. [B, 4.]—**B'phosphine.** A compound in which b. replaces hydrogen in

O, no; **O^2**, not; **O^3**, whole; **Th**, thin; **Th^2**, the; **U**, like oo in too; **U^2**, blue; **U^3**, lull; **U^4**, full; **U^5**, urn; **U^6**, like ü (German).

phosphine. Monob'phosphine, $P(C_6H_5.CH_2)H_2$, is a colorless liquid of peculiar odor, boiling at 180° C. [B, 93.] See also DIBENZYL*phosphine.*—**B'piperidine.** Fr., *b.-pipéridine.* Ger., *B'piperidin.* A mobile, oily liquid, $C_{12}H_{17}N=C_5H_{10}N.C_7H_7$, boiling at 245° C.; being piperidine in which b. replaces hydrogen. [B, 79.]—**B. propionate.** Fr., *propionate de benzyle.* Ger., *B'propionsäureester, Propionsäure-B'ester.* A compound of b. and propionic acid, $C_3H_5O_2-(C_6H_5.CH_2)$. [B, 4.]—**B'quinoline.** Fr., *b.-quinoléine.* Ger., *B'chinolin.* Quinoline in which b. replaces hydrogen, $C_{16}H_{13}N=C_9H_6(C_7H_7)N$; an oily liquid. [B, 79.]—**B'salicylic acid.** Fr., *acide b.-salicylique.* Ger., *B'salicylsäure.* A crystalline acid, $C_{14}H_{12}O_3$, obtained by the action of b. chloride on sodium methylsalicylate. [B, 93.]—**B'salpetersäureester** (Ger.). See *B. nitrate.*—**B. sulphide.** See DIBENZYL *sulphide.*—**B'sulphonic acid.** Fr., *acide b.-sulfonique* (ou *b.-sulfureux*). Ger., *B'sulfonsäure.* A name given to the substance more correctly called b'sulphurous acid. [B, 2, 93.]—**B'sulphurous acid.** Fr., *acide b.-sulfureux.* Ger., *B'schwefligsäure.* A monobasic acid, $C_7H_8SO_3$, forming colorless, very hygroscopic crystals; it is sometimes called b'sulphonic acid, from the idea that its structural formula is that of a true sulphonic acid, but it is more probably of the constitution of acid b. sulphite. [B, 2.]—**B. thioalcohol.** See *B. mercaptan.*—**B'toluene.** Fr., *b.-toluène.* Ger., *B'toluol.* Toluene (methylbenzene) in which b. replaces an atom of hydrogen, $C_{14}H_{14}=C_6(C_6H_5.CH_2)(CH_3)H_4$. A mixture of liquid hydrocarbons of this formula is obtained by heating toluene with b. chloride and zinc dust and in other ways. [B, 4.]—**B'urea.** Fr., *b.-urée.* Ger., *B'harnstoff.* Syn.: *monob'urea.* A substitution compound of urea, $C_8H_{10}N_2O=H_2N-CO-NH(C_6H_5.CH_2)$, forming long, white acicular crystals. [B, 2.] See also DIBENZYL*urea.*—**B'urethane.** Fr., *b.-uréthane.* Ger., *B'urethan.* Syn.: *b. carbamate.* A crystalline substance, $C_8H_9NO_2=O=C(NH_2)-O(C_6H_5.CH_2)$, formed by the action of solid cyanogen chloride on b. alcohol. [B, 93.]—**B. violet.** Ger., *B'violett.* See METHYL *violet.*—**B'wasserstoff** (Ger.). See TOLUENE.

BENZYLE (Fr.), n. Ba^{3}n^{2}-zel. See BENZYL.—**Azotate de b.** See BENZYL *nitrate.*—**Bromure de b.** See BENZYL *bromide.*—**Chlorure de b.** See BENZYL *chloride.*—**Cyanure de b.** Benzyl cyanide. [B.] See PHENYL *acetonitrile.*—**Iodure de b.** See BENZYL *iodide.*

BENZYLENE, n. Be^{2}nz'i^{2}l-en. Fr., *benzylène.* Ger., *Benzylen.* See BENZYLIDENE.

BENZYLIC, adj. Be^{2}nz-i^{2}l'i^{2}k. Lat., *benzylicus.* Fr., *benzylique.* Of, pertaining to, or containing, benzyl. [B.]—**B. alcohol.** See BENZYL *alcohol.*—**B. benzoate.** See BENZYL *benzoate.*—**B. cinnamate.** See *Cinnamein.*

BENZYLIDEN (Ger.), n. Be^{2}ntz-u^{6}l'i^{2}d-e^{2}n. See BENZYLIDENE.—**B'chinaldin.** See BENZYLIDENE*quinaldine.*—**B'chlorür.** See BENZYLIDENE *dichloride.*—**B'dibromür.** See BENZYLIDENE *dibromide.*—**B'dichlorür.** See BENZYLIDENE *dichloride.*—**B'piperylhydrazin.** See BENZYLIDENE*piperylhydrazine.*—**B'sulfid.** See BENZYLIDENE *sulphide.*

BENZYLIDENE, n. Be^{2}nz-i^{2}l'i^{2}d-en. Fr., *benzylidène.* Ger., *Benzyliden.* It., *benzilidene.* A bivalent radicle, $C_6H_5.CH''$, being benzyl less an atom of hydrogen. [B, 4.]—**B. bromobenzoate.** A substance of the composition $(C_6H_4.CH)-C_6H_5.Br.CO.O.$ [B.]—**B. chloride.** See *B. dichloride.*—**B'diantipyrine.** Fr., *benzylidène-diantipyrine.* Ger., *Benzylidendiantipyrin.* A substance having the composition of two molecules of antipyrine, less two atoms of hydrogen, united with a molecule of b.: $C_{29}H_{28}N_4O_2=2C_{11}H_{11}N_2O.C_7H_6$. [B.]—**B. dibromide.** Fr., *bibromure de benzylidène.* Ger., *Benzylidendibromür* A compound of b. and bromine, $C_6H_5.CHBr_2$. [B.]—**B. dichloride.** Fr., *bichlorure de benzylidène.* Ger., *Benzylidendichlorür.* A liquid, $C_6H_5.CHCl_2$, boiling at 206° C. [B, 4.]—**B'piperylhydrazine.** Fr., *benzylidène-pipérylhydrazine.* Ger., *Benzylidenpiperylhydrazin.* A substance, $C_{12}H_{16}N_2=C_5H_{10}N-N=CH.C_6H_5$, forming tabular crystals. [B, 79.]—**B'quinaldine.** Fr., *benzylidène-quinaldine.* Ger., *Benzylidenchinaldin.* A substance, $C_{17}H_{13}N=C_9H_6(CH=CH.-C_6H_5)N$, forming colorless, shining acicular crystals. [B, 79.]—**B. sulphide.** Fr., *sulfure de benzylidène.* Ger., *Benzylidensulfid.* A substance, $C_6H_5.CHS$, forming colorless laminar crystals. [B, 4.]

BENZYLIUM (Lat.), n. n. Be^{2}nz-i^{2}l(u^{6}l)'i^{2}-u^{3}m(u^{4}m). Benzyl. [L, 81.]

BEOHRET (Ger.), adj. Be^{2}-or'e^{2}t. See AURICULATE.

BÉOMYCÈS (Fr.), n. Ba-o-mi^{2}-se^{2}z. See BÆOMYCES.

BERAN (Sp.), n. Ba-ra^{3}n'. A hot spring near the village of Fuy, in Spain, the waters of which are used as a stomachic. [L, 105.]

BERAS (Ar.), n. See ALBARAS and BARAS.

BERAS ASVED (Ar.), **BERAS BEJAS** (Ar.), n's. See ALBARAS.

BERASET (Ger.), adj. Be^{2}-ra^{3}s'e^{2}t. In botany, cespititious. [L, 46.]

BERATHSCHLAGUNG (Ger.), **BERATHUNG** (Ger.), n's. Be^{2}-ra^{3}t'shla^{3}g-ung, -ra^{3}t'ung. See CŒNOLOGIA.

BERAUBEND (Ger.), adj. Be^{2}-ra^{3}'ub-e^{2}nd. See STERETICUS.

BERAUBUNG (Ger.), n. Be^{2}-ra^{3}'ub-ung. See STERESIS.

BERÄUCHERN (Ger.), **BERÄUCHERUNG** (Ger.), n's. Be^{2}-roich^{2}'e^{2}rn, -e^{2}r-ung. Fumigation. [L, 43, 80.]

BERAUSCHEND (Ger.), adj. Be^{2}-ra^{3}'ush-e^{2}nd. Intoxicating. [L, 80.]

BERÄUSCHERUNG (Ger.), n. Be^{2}-roish'e^{2}r-ung. Fumigation. [L, 43.]

BERAUSCHUNG (Ger.), n. Be^{2}-ra^{3}'ush-ung. See THOREXIS.

BERBARIS (Lat.), n. f. Bu^{5}r(be^{2}r)'ba^{3}r-i^{2}s. 1. See BERBERIS. 2. Of Parkinson, the *Berberis vulgaris.* [B, 200.]

BERBERACEÆ (Lat.), n. f. pl. Bu^{5}r(be^{2}r)-be^{2}r-a(a^{3})'se^{2}(ke^{2})-e(a^{3}-e^{2}). See BERBERIDEÆ.

BERBERAL, adj. Bu^{5}r'be^{2}r-a^{2}l. Lat., *berberalis.* Of or resembling the genus *Berberis.* [B.]—**B. alliance.** See BERBERALES.

BERBERALES (Lat.), n. m. pl. Bu^{5}r(be^{2}r)-be^{2}r-a(a^{3})'lez(le^{2}s). Syn.: *berberal alliance.* Of Lindley, an alliance of hypogynous exogens, including the orders *Berberidaceæ, Fumariaceæ, Vitaceæ, Droseraceæ, Pittosporaceæ* (including the *Canellaceæ*), *Olacaceæ,* and *Cyrillaceæ.* [B, 170.]

BERBEREÆ (Lat.), n. f. pl. Bu^{5}r(be^{2}r)-be^{2}r'e^{2}-e(a^{3}-e^{2}). Of Reichenbach, Spach, and Bentham and Hooker, a subdivision or tribe of the *Berberideæ,* comprising the sections *B. genuinæ* (including *Berberis, Mahonia,* and two other genera), *Epimedieæ,* and *Caulophylleæ* [Reichenbach]; or the *Berberineæ, Epimedineæ,* and *Leonticineæ* [Spach]. [B, 42, 170.] See also BERBERIDEÆ.

BERBERIA (Lat.), n. f. Bu^{5}r(be^{2}r)-be^{2}r'i^{2}-a^{3}. See BERI-BERI.

BERBERIDACEÆ (Lat.), n. f. pl. Bu^{5}r(be^{2}r)-be^{2}r-i^{2}d-a(a^{3})'-se^{2}(ke^{2})-e(a^{3}-e^{2}). See BERBERIDEÆ.

BERBERIDACEOUS, adj. Bu^{5}r-be^{2}r-i^{2}d-a'shu^{3}s. Of or pertaining to the *Berberidaceæ.* [B.]

BERBÉRIDE (Fr.), n. Be^{2}r-ba-red. The *Berberis vulgaris.* [B, 92.]

BERBERIDEÆ (Lat.), n. f. pl. Bu^{5}r(be^{2}r)-be^{2}r-i^{2}d'e^{2}-e(a^{3}-e^{2}). Fr., *berberidées.* Ger., *Berberideen.* 1. An order of dicotyledonous herbs and shrubs, divided by Bentham and Hooker into the tribes *Lardizabaleæ* (made a distinct order by some botanists) and the *Berbereæ.* By Baillon the order is extended to include the *Bixineæ,* and comprehends in addition the *Lardizabaleæ,* the *Erythrospermeæ,* and the *Berberideæ* and *Podophylleæ,* which together correspond to the *Berbereæ* of Bentham and Hooker. As defined by Bentham and Hooker, it comprises genera with a calyx of three, four, or six (rarely nine) petaloid sepals; a corolla of two or three free hypogynous, caducous petals; from four to six hypogynous stamens, usually arranged in two rows and disposed opposite the petals, having erect, extrorse anthers; an ovary of from one to three (rarely from six to nine) distinct oblong carpels containing two or more ovules and terminating in a short style with a dilated stigma; and a baccate or dry, capsular fruit, usually indehiscent, with albuminous seeds. [B, 1, 42, 49, 121, 270.] 2. Of Torrey and Gray and others, a tribe of the *Berberidaceæ* (the *B.* of other authors). [B.]

BERBERIDES (Fr.), n. pl. Be^{2}r-be^{2}r-ed. Of Jussieu, the *Berberideæ* (1st def.).

BERBÉRIDIFOLIÉ (Fr.), adj. Be^{2}r-ba-ri^{2}d-i^{2}-fo-li^{2}-a. Having leaves resembling those of the *Berberis.* [L, 41.]

BERBERIDS, n. pl. Bu^{5}r'be^{2}r-i^{2}dz. The *Berberidaceæ.* [Lindley (B. 19).]

BERBERIM (Ar.), n The *Cratægus oxyacantha.* [L, 105.]

BERBERIN (Ger.), n. Be^{2}r-be^{2}r-en'. See BERBERINE.—**Bromwasserstoffb'.** See BERBERINE *hydrobromide.*—**Chlorwasserstoffb'.** See BERBERINE *hydrochloride.*—**Cyanwasserstoffb'.** See BERBERINE *hydrocyanide.*—**Jodwasserstoffb'.** See BERBERINE *hydriodide.*—**Phosphorsaures B.** See BERBERINE *phosphate.*—**Salpetersaures B.** See BERBERINE *nitrate.*—**Salzsaures B.** See BERBERINE *hydrochloride.*—**Schwefelsaures B.** See BERBERINE *sulphate.* [B.]—**Unterphosphorigsaures B.** See BERBERINE *hypophosphite.*

BERBERINÆ (Lat.), n. f. pl. Bu^{5}r(be^{2}r)-be^{2}r-i(e)'ne(na^{3}-e^{2}). Of Batsch, the *Berberideæ* (1st def.). [B.]

BERBERINE, n. Bu^{6}r'be^{2}r-en. Lat., *berberina, berberinum.* Fr., *berbérine.* Ger., *Berberin.* It., Sp., *berberina.* An alkaloid, $C_{20}H_{17}NO_4 + 4\frac{1}{2}H_2O$, occurring in several species of *Berberis,* in calumba, in the bark of *Cœocline polycarpa,* the bark of *Xanthoxylum clava Herculis* (the *xanthopicrite* of Chevallier and Pelletan), that of *Geoffræa jamaicensis* (*the jamaicine* of Hüttenschmidt), and in many other plants. It is a bright-yellow microcrystalline powder, devoid of odor, and having a persistent bitter taste, sparingly soluble in cold alcohol and water, and readily soluble in hot alcohol and in hot water. Its physiological action is uncertain, salivation, diarrhœa, and various nervous symptoms being observed, but inconstantly, after its administration, according to some observers; according to others, it occasions a great variety of phenomena, acting particularly as a tonic to the capillary blood-vessels, producing hyperæmia and œdema, and elevating the arterial pressure. It is eliminated by the kidneys, and renders the alkaline urine of the *Herbivora* acid. It has been highly recommended as an antiperiodic. [B, 5, 81, 270.]—**Acid b. sulphate.** It., *solfato acido di berberina.* Bisulphate of b.; a salt of the composition $C_{20}H_{17}NO_4.H_2SO_4$. It dissolves in 100 parts of water at 21° C. [I. M. Lloyd, "Pharm. Jour. and Trans.," xv, p. 342.] [B.]—**Basic b. sulphate.** It., *solfato basico di berberina.* A salt having the constitution $(C_{20}H_{17}NO_4)_2H_2SO_4$. It is more soluble in water than the acid sulphate. [I. M. Lloyd, "Pharm. Jour. and Trans.," xv, p. 342.] [B.]—**B. bisulphate.** Fr., *bisulfate de berbérine.* It., *bisolfato di berberina.* See *Acid b. sulphate.*—**B. chloride.** See *B. hydrochloride.*—**B. hydriodate, B. hydriodide.** Fr., *iodhydrate de berbérine.* Ger., *Jodwasserstoffberberin.* It., *iodidrato di berberina.* Sp., *iodhidrato de berberina.* A substance, $C_{20}H_{17}NO_4.HI$, forming small yellow acicular crystals. An addition compound of this and iodine, $C_{20}H_{17}NO_4.HI_3$, called also *b. triiodide,* occurs as brown lustrous acicular crystals. [B, 270.]—**B. hydrobromate, B. hydrobromide.** Fr., *bromhydrate de berbérine.* Ger., *Bromwasserstoffberberin.* It., *bromidrato di berberina.* Sp., *bromhidrato de berberina.* A compound, $C_{20}H_{17}NO_4.HBr+1\frac{1}{2}H_2O$, forming yellowish acicular crystals readily soluble in water and in

alcohol. [B, 270.]—**B. hydrochlorate, B. hydrochloride.** Lat., *berberinum hydrochloricum.* Fr., *chlorhydrate de berbérine.* Ger., *salzsaures Berberin, Chlorwasserstoffberberin.* It., *cloridrato di berberina.* Sp., *chlorhidrato de berberina.* A substance. $C_{20}H_{17}NO_4.HCl + 2\frac{1}{2}H_2O$, forming yellow acicular crystals. [B, 270.]—**B. hydrocyanate, B. hydrocyanide.** Fr., *cyanhydrate be berbérine.* Ger., *Cyanwasserstoffberberin.* It., *cianidrato di berberina.* Sp., *cianhidrato de berberina.* A compound, $C_{20}H_{17}NO_4.HCN$, forming brownish laminar rhombic crystals, sparingly soluble in water and in alcohol. [B, 270.]—**B. muriate,** Lat., *berberinum muriaticum.* See *B. hydrochloride.*—**B. nitrate.** Lat., *berberinum nitricum, berberinæ nitras.* Fr., *azotate de berbérine.* Ger., *salpetersaures Berberin.* It., *nitrato di berberina.* Sp., *nitrato de berberina.* A substance, $C_{20}H_{17}NO_4.HNO_3$, forming bright-yellow crystals. [B, 270.]—**B. phosphate.** Lat., *berberinum phosphoricum.* Fr., *phosphate de berbérine.* Ger., *phosphorsaures Berberin.* A compound of b. and phosphoric acid. [B.]—**B. sulphate.** Fr., *sulfate de berbérine.* Ger., *schwefelsaures Berberin.* It., *sulfato di berberina.* Sp., *sulfato de berberina.* See *Acid sulphate of b.* and *Basic sulphate of b.*—**B.-tree.** The *Cœlocline polycarpa.* [B.]—**B. triiodide.** Ger., *Berberintrijodid.* See *B. hydriodide.*

BERBÉRINE (Fr.), n. Be2r-ba-ren. Berberine. [B.]—**Azotate de B.** See BERBERINE *nitrate.*—**Bromhydrate de b.** See BERBERINE *hydrobromide.*—**Cyanhydrate de b.** See BERBERINE *hydrocyanide.*—**Iodhydrate de b.** See BERBERINE *hydriodide.*

BERBERINEÆ (Lat.), n. f. pl. Bu5r(be2r)-be2r-i2n'e2-e(a3-e2). 1. Of Bernhardi and Spach, a section of the *Berberideæ*, comprising *Berberis, Epimedium,* and *Leontice.* 2. Of Brongniart, a class of hypogynous *Dialypetalæ*, comprising the orders *Berberideæ, Lardizabaleæ,* and *Menispermeæ.* [B, 170.]

BERBERINUM (Lat.), n. n. Bu5r(be2r)-be2r-i(e)'nu3m(nu4m). See BERBERINE.—**B. hydrochloricum.** See BERBERINE *hydrochloride.*—**B. muriaticum.** See BERBERINE *hydrochloride.*—**B. nitricum.** See BERBERINE *nitrate.*—**B. phosphoricum.** See BERBERINE *phosphate.*—**B. sulfuricum.** See BERBERINE *sulphate.*

BERBERIS (Lat.), n. f. Bu5r(be2r)'be2r-i2s. Gen., *berber'idis, ber'beris.* Ar., *aargis.* Fr., *b. épine-vinette.* Ger., *Berberitze, Saurach.* It., *berberi.* Sp., *bérberos* [Sp. Ph.], *agracejo* [Sp. Ph.]. 1. Of Linnæus, a genus of berberidaceous shrubs with yellowish wood, and with the primary leaves often transformed into spines bearing in their axils a fascicle of secondary leaves. The calyx consists of from 6 to 9 deciduous sepals arranged in 2 or 3 rows; the corolla, of 6 unguiculate petals placed opposite the sepals and each provided at its base internally with 2 glands; there are 6 stamens and a 1-celled ovary with from 2 to 8 erect ovules and a peltate, short-styled stigma. The fruit is a berry of 2 or more seeds, umbilicate or perforate above. The section *Mahonia* (sometimes made a distinct genus) comprises the species with pinnate leaves. [B, 19, 180.] 2. In the secondary list of former editions of the U. S. Ph., the root-bark of *B. vulgaris;* in the Fr. Codex, the *B. vulgaris.* 3. In the pl., *berberes,* the fruit of *B. vulgaris.* [B, 119.]—**Apochylisma berberum.** See *Rob berberum.*—**Baccæ berberidis** (seu **berberis,** seu **berberum**). See *Fructus berberidis.*—**Berberes exsiccatæ.** The dried fruit of *B. vulgaris.* [B, 180.]—**B. aquifolia** [Pursh]. The Oregon grape, mountain grape; a bushy shrub from 3 to 5 feet high, found in Oregon, with shiny, leathery, pinnate, spinulose leaves and yellow flowers. It is said to be used as a tonic and antiperiodic. The rhizome varies in size and is yellowish-brown externally and of a bright yellow internally, with thin bark and tough yellow wood. The bark is bitterish. [B, 34, 66, 81.]—**B. aristata** [De Candolle]. A species growing in India; distinguished by its slender pendulous or erect racemes of flowers, longer than the leaves and not corymbose. The bark of the root contains much berberine and is employed as a tonic. It is said to be employed in ophthalmic diseases like *B. lycium.* [B, 5, 81, 172.]—**B. asiatica** [Roxburgh]. A species growing in the northern East Indies. It contains berberine, is said to have properties similar to those of *B. vulgaris,* and is employed as a tonic. [B, 180.]—**B'beerenstrauch** (Ger.). See *B. vulgaris.*—**B'beerensyrup** (Ger.). See *Syrupus berberidis.*—**B. canadensis** [Pursh]. The *B. vulgaris,* var. β *canadensis.* [B, 34.]—**B. chinensis.** A species found in China and northern India. The fruit, a dark purple berry, together with that of *B. lycium,* is used by the Chinese in preparing a cooling and tonic drink. The juice of the fresh fruit is applied to weak eyes. An infusion of the leaves is used for nervous headache, fatigue, etc. [B, 172, 180; L, 75.]—**B. dumetorum.** The *B. vulgaris.* [B, 200.]—**B. fascicularis.** Syn.: *Mahonia fascicularis.* A species the bark of which is used in the preparation of a yellow dye, and the acid berries are employed like those of *B. vulgaris.* [B, 104, 173.]—**B. fructus.** See *Fructus berberidis.*—**B. fruticosa** [Sloan]. A shrub growing in Jamaica. The negroes use it as a remedy in venereal diseases, and an infusion of the leaves is employed in colic. [B, 173.]—**B. kunawurensis** [Royle]. An East Indian variety of *B. vulgaris.* [B. 212.]—**B. Leschenaultii** [Wallich]. See *B. nepalensis.*—**B. lycium** [Royle]. The ophthalmic berberry; a species growing in India. The root-bark contains much berberine and is employed as a tonic. According to Royle, an extract from the wood or roots of this and other Indian species of *B.* is the medicine *rusot,* or *ruswut,* employed in India as a local remedy in ophthalmic affections and is identical with the λύκιον of the ancients (the *lycium indicum* of Dioscorides), which was employed in the same way. [B, 5, 81.]—**B. nepalensis** [Sprengel]. An East Indian mountainous species, from 10 to 12 feet high, having a bluish-purple fruit. [B, 172, 212.]—**B. nervosa** [Pursh]. A species belonging to the section *Mahonia;* a shrub about 4 inches high growing in the Pacific United States. Its rhizome and roots resemble those of *B. aquifolia;* the root-bark contains berberine. [B, 81.]—**B. pinnata.** See *B. fascicularis.*—**B. repens** [Lindley]. A shrub belonging to the section *Mahonia;* growing in the northern Pacific United States. ["Proc. of the Am. Pharm. Assoc.," xxvii, p. 202 (B).] Its rhizome and roots resemble those of *B. aquifolia,* and are employed for like purposes. [B, 81.]—**B. sibirica** [Pallas]. A Siberian species employed like *B. vulgaris.* [B, 180.]—**B. sinensis** [Desfontaines]. See *B. chinensis.*—**B. tinctoria** [Leschenault]. See *B. aristata.*—**B. vulgaris** [Linnæus]. Fr., *b.* [Fr. Cod.], *épinevinette.* Ger., *Berberitze, Berberbeere, Sauendorn.* It., *berberi.* A bushy shrub from 2 to 8 or 10 feet high, growing in Europe and in the northern United States, composed of numerous spiny stems having simple obovate-spatulate leaves with serrulate bristly edges; pendulous, many-flowered racemes of yellow flowers; and scarlet acid berries. The variety β *canadensis* is smaller and bears smaller flowers in few-flowered racemes, oval berries, and leaves narrower than those of the ordinary variety. The bark (*cortex berberidis*) and the root-bark (*cortex radicis berberidis, b.* [U. S. Ph., 1870 (secondary list)]) are yellowish and impart a yellow color to the saliva when chewed, and they have hence been employed as a remedy in jaundice. They are almost odorless, have a strong bitter taste, and contain berberine (*q. v.*), oxyacanthine, starch, and tannin. They are occasionally employed as a gastric tonic and astringent in dyspepsia, diarrhœa, etc., and to reduce the volume of the hypertrophied spleen in malarial affections. Together with the wood, they are also employed as a yellow dye. The berries (*berberes, fructus berberidis, baccæ berberidis*) are employed to furnish an acidulous, refrigerant, and antiscorbutic drink and a conserve (see *Succus berberum, Rob berberum,* and *Sirop de b.*). The seeds also are employed medicinally. [B, 5, 19, 34, 81, 119.]—**B. wallichiana** [De Candolle]. A species found at very great elevations in Nepal. [B, 172, 212.]—**Cortex berberidis.** The bark of the twigs of *B. vulgaris.* [B, 180.]—**Cortex radicis berberidis.** The root-bark of *B. vulgaris* (the *b.* of the secondary list of the U. S. Ph., 1870). [B, 180.]—**Fructus berberidis.** Fr., *b.* (ou *épine-vinette*) [Fr. Cod.]. Sp., *bérberos* [Sp. Ph.], *agracejo* [Sp. Ph.]. The fruit of *B. vulgaris.* [B, 95, 108.]—**Gelatina berberorum.** Jelly of barberries; an acidulous jelly made from the berries of *B. vulgaris.* [B; L, 104.]—**Radix berberidis.** The root of *B. vulgaris.* [B, 180.]—**Rob berberum.** Fr., *rob d'épine-vinette.* Ger., *eingekochter Berberitzensaft.* Syn.: *apochylisma berberum.* A preparation, official in several of the older formularies, made by evaporating the juice of the berries of *B. vulgaris* to the consistence of an electuary. [B, 119.]—**Rotule berberum.** Fr., *pastilles d'épine-vinette.* Pastilles made of 1 part of purified juice of berberry berries (the fruit of *B. vulgaris*) and 6 parts of sugar [Bruns. Ph., 1777; Würtemb. Ph., 1798; Würzb. Ph., 1796]. [B, 119.]—**Sirop de b.** [Fr. Cod.]. Lat., *syrupus berberidis.* A preparation made from the filtered juice of the berries of *B. vulgaris,* mixed with sufficient sugar to form a syrup of sp. gr. of 1·330. [B, 108, 113.]—**Succus berberum.** Fr., *suc de b.* [Fr. Cod.]. Ger., *Berberitzensaft.* The juice of the fruit of *B. vulgaris.* [B.]—**Syrupus berberidis** (seu **berberis,** seu **berberum**). See *Sirop de b.*

BERBERITE, n. Bu5r'be2r-it. See BERBERINE.

BERBERITZE (Ger.), n. Be2r-be2r-etz'e2. The *Berberis vulgaris.* [B, 180; L, 80.]—**B'nsaft.** See *Succus* BERBERUM. [L, 80.]—**B'nwurzel.** The root of *Berberis vulgaris.* [B, 180.]—**B'nwurzelrinde.** The root-bark of *B. vulgaris.* [B, 81.]—**B'nstrauch.** The genus *Berberis.* [B.]—**Eingekochter B'nsaft.** See *Rob* BERBERUM.

BERBERONIC ACID, n. Bu5r-be2r-o2n'i2k. Fr., *acide berbéronique.* Ger., *Berberonsäure.* A tribasic acid, $C_8H_5NO_6 = C_5H_2(CO.OH)_3N$, isomeric with pyridinetricarbonic acid; a substance forming triclinic prismatic crystals, produced by the action of nitric acid upon berberine. [B, 79.]

BERBERRY, n. Bu5r'be2r-ri2. The *Berberis vulgaris.* [B, 19.]—**B.-blight.** See ÆCIDIUM *berberidis.*—**Dyer's b.** The *Berberis tinctoria.* [B, 172.]—**Ophthalmic b.** The *Berberis lycium.* [B, 19.]—**Raisin b.** The *Berberis lycium.* [B, 172.]

BERBESBEERE (Ger.), n. Be2r'be2s-bar-e2. The *Berberis vulgaris.* [B, 180.]

BERBICE-KAKAO, n. See *Berbice* CACAO.

BERBINE, n. Bu5r'ben. Lat., *berbina, berbinum.* Ger., *Berbin.* See OXYACANTHINE.

BERBOUISSET (Fr.), n. Be2r-bu-es-sa. The *Ruscus aculeatus* of Linnæus. [L, 105.]

BERCE (Fr.), n. Be2rs. The *Heracleum sphondylium.* [A, 385; L, 65.]—**B. des pres.** The *Heracleum sphondylium.* [B, 173.]—**B. laiteuse.** The *Heracleum lanatum.* [B, 173.]—**B. tubéreuse.** The *Heracleum tuberosum.* [B, 173.]—**Grande b.** 1. The *Acanthus mollis.* 2. The *Heracleum sphondylium.* [B, 173.]

BERCEAU DE LA VIERGE (Fr.), n. Be2r-so d' la3 vi2-e2rzh. The *Clematis vitalba.* [B, 173; L, 105.]

BERCHEMIA [Necker] (Lat.), n. f. Be2rch2-e(e2)'mi2-a3. A genus of shrubs of the order *Rhamneæ,* tribe *Zizypheæ.* [B, 212.]—**B. lineata** [De Candolle]. Syn.: *Rhamnus lineatus* [Linnæus]. A shrub growing in the mountains of India and in China. According to Loureiro, the root is used as a diuretic in Cochin-China. [B, 173, 212.]

BERCK-SUR-MER (Fr.), n. Be2rk-su6r-me2r. A bathing station in the department of Pas-de-Calais, France, where there is a hospital for scrofulous children. [L, 49; Rotureau (L, 87).]

BERD (Ar.), n. The *Cyperus papyrus.* [L, 105.]

BERE, n. Ber. See BEER (meaning barley).

BEREBERA (Lat.), n. f. Be(ba)-re2-be(ba)'ra3. An adaptation of the native name. Ger., *Bereberi.* Of Hochstetter, the *Millettia ferruginea.* [B, 19.]

BEREIFET (Ger.), adj. Be2-rif'e2t. In botany, pruinous. [L, 46.]

BERENGELITE, n. Be2r-e2n'je2l-it. Fr., *bérengélite.* A fossil resinous substance, $C_{40}H_{30}O_7$, of a bitter taste, soluble in dilute alkalies, in alcohol, and in ether; so called from San Juan de Berengela, South America, where it is found. [A, 301.]

BERENICE (Lat.), n. f. Be^{2}r-e^{2}n-i(e)'se(ka). See AMBRA *flava*.

BÉRÉNICIDÉ (Fr.), adj. Ba-ran-e-se-da. Resembling amber. [L, 109.]

BERENICIUM (Lat.), n. n. Be^{2}r-e^{2}n-i^{2}s(i^{2}k)'i^2-u^{3}m(u^{4}m). Gr., βερενίκιον. Nitre. [Galen (A, 325).]

***BERENI SECUM**, n. An old name for the genus *Artemisia*. [A, 325.]

BERETHRON, BERETHRUM (Lat.), n's n. Be^{2}r-e^{2}th'ro^{2}n, -ru^{3}m(ru^{4}m). Gr., βέρεθρον. See BARATHRON.

BERG (Ger.), n. Be^{2}rg. 1. See MONS. 2. A place near Stuttgart, where there are chalybeate springs and a buttermilk cure. [Rotureau (L, 87).]—**B.-Adonisröschen.** The *Adonis vernalis*. [L, 30.]—**B'ahorn.** The *Acer pseudo-platanus*. [B, 180.]—**B'alaun.** Rock alum. [L, 46.]—**B'alraun.** The *Allium victoriale*. [L, 46.]—**B'ampfer.** The *Rumex alpinum*. [L, 46.]—**B'andorn.** The *Stachys germana*. [L, 46.]—**B'angelika.** A species of *Aralia*. [L, 46.]—**B'asche.** See *B'blau*.—**B'asterkraut.** The herb of a species of *Inula*. [B, 270.]—**B'balderian, B'baldrian.** The *Valeriana phu*. [L, 80.]—**B'basilie.** The *Calamintha arvensis*. [L, 30.]—**B'bathengel.** The *Teucrium chamædrys*. [B, 180.]—**B'benedikten, B'benediktwurz.** The *Geum montanum* (*Sieversia montana*). [B, 180; L, 80.]—**B'betonienwurzel.** The root of *Arnica montana*. [B, 180.]—**B'blau.** Lat., *cœruleum montanum*. A blue carbonate of copper prepared artificially by precipitating copper sulphate with soda. [B, 180, 270; L, 80.] See also *Armenian* STONE.—**B'bohnenkraut.** The *Satureja montana*. [L, 46.]—**B'buche.** The *Fagus silvatica*. [L, 46.]—**B'butter.** The coating of alum and oxide or sulphate of iron which forms upon silicious slates as the result of weathering. [B, 270.]—**B'china.** The bark of the *Exostema floribundum*. [B, 180.]—**B'citronenkraut.** The *Calamintha officinalis*. [L, 46.]—**B. des oberen Wurms im kleinen Gehirn, B. des Wurms.** See MONTICULUS *cerebelli*.—**B'benholz.** The *Coronilla emerus*. BERGALLO (It.), n. Be^{2}r-ga^{3}l'lo. A place in Italy, where there is a calcareous spring. [A, 385.]

BERGAMILÈNE (Fr.), n. Be^{2}rg-a^{3}m-i^{2}l-e^{2}n. See BERGAPTENE.

BERGAMIUM (Lat.), n. n. Bu^{5}rg(be^{2}rg)-a^{2}m(a^{3}m)'i^2-u^{3}m(u^{4}m). Fr., *bergammottier*. See BERGAMOT.—**Oleum bergamii** [U. S. Ph.]. Oil of bergamot. [B.]

BERGAMOT, n. Bu^{5}rg'a^{2}m-o^{2}t. Lat., *bergamium*, *bergamotta*. Fr., *bergamote*. Ger., *Bergamotte*. It., *bergamotta*, *bergamotto*. Sp., *bergamota*, *bergamoto*. The *Citrus bergamia*. [B.]—**B. camphor.** Ger., *Bergamottkampher*. See BERGAPTENE.—**B. mint.** The *Mentha citrata*. [B, 215.]—**B'öl.** Oil of bergamot. [L, 80.]—**B. peel.** Lat., *cortex fructus bergamottæ*. Fr., *bergamote* (*épicarpe, dit zeste*) [Fr. Cod.]. The rind of the fruit of the *Citrus bergamia*. It furnishes the oil of b. [B.]—**Essence of b.** Lat., *essentia bergamii*. Fr., *essence de bergamotte*. It., *essenza di bergamotto*. Sp., *esencia de bergamota*. See *Oil of b.*—**Oil of b.** Lat., *oleum bergamii* [U. S. Ph.], *oleum bergamattæ*. Fr., *huile volatile de bergamote* [Fr. Cod.]. Ger., *Bergamottöl*. It., *olio di bergamotto*. Sp., *aceite* (*ó esencia*) *de bergamota*. A yellowish or greenish volatile oil, of agreeable odor and bitter taste, readily soluble in alcohol, in ether, and in the fatty oils, obtained from b. peel by expression, or more rarely by distillation. It is composed of a terpene or a mixture of terpenes, with their hydrates and with a product of their oxidation. It is used mainly as a perfume. [B, 270.]—**Wild b.** An American name for the *Monarda fistulosa*. [B, 19.]

BERGAMOTE [Fr. Cod.] (Fr.), n. Be^{2}rg-a^3-mot. The fruit of the *Citrus bergamia*. [B.] See BERGAMOT.—**Alcoolé d'essence de b.** [Fr. Cod.]. See *Teinture d'essence de b.*—**Essence de b., Huile volatile de b.** [Fr. C. d.]. See *Oil of* BERGAMOT.—**Oléosaccharure de b.** [Fr. Cod.]. A preparation made by triturating in a mortar 1 part of oil of bergamot and 20 parts of white sugar. [B.]—**Teinture d'essence de b.** [Fr. Cod.]. A filtered mixture of 2 parts of oil of bergamot and 98 of 90-per-cent. alcohol. [B.]

BERGAMOTIER (Fr.), n. Be^{2}r-ga^3-mo-ti^2-a. The *Citrus bergamia*. [B, 173.]

BERGAMOTTA (Lat.), n. f. Bu^{5}rg(be^{2}rg)-a^3-mo^{2}t'ta^3. See BERGAMOT.—**Cortex fructus bergamottæ.** See BERGAMOT *peel*.—**Oleum bergamottæ.** See *Oil of* BERGAMOT.

BERGAMOTTE (Fr., Ger.), **BERGAMOTTHE** (Ger.), n. Be^{2}rg-a-mot, -mot'te^2. 1. In German, a variety of pear. 2. Bergamot. [B, 180.]—**B'nbirnen** (Ger.). See *B.* (1st def.).—**B'nöl** (Ger.). See *Oil of* BERGAMOT.—**Huile de bergamotte** (Fr.). See *Oil of* BERGAMOT.—**Petite bergamotte** (Fr.). The small variety of bergamot (*Citrus bergamia*, var. *parva*). [B, 173.]

BERGAMOTTIER (Fr.), n. Be^{2}rg-a^3-mot-ti^2-a. See BERGAMOTIER.

BERGAPTENE, n. Bu^{5}rg-a^{2}p'ten. Fr., *bergaptène*. Ger., *Bergapten*. Syn.: *bergamot camphor*. A substance, $C_9H_8O_3$, forming white acicular crystals, devoid of taste and odor, and soluble in hot water, in alcohol, and in ether, deposited from oil of bergamot upon standing. [B, 5, 270.]

BERGENIA (Lat.), n. f. Bu^{5}r(be^{2}r)-jen(gan)'i^2-a^3. Fr., *bergénie*. A genus of saxifragaceous plants. [B.]—**B. bifolia** [Mönch]. See SAXIFRAGA *crassifolia*.

BERGENIN, n. Bu^{6}r'je^{2}n-i^{2}n. A bitter crystalline substance, $C_6H_8O_4$, found in various species of *Saxifraga*. It is soluble in water and in alcohol, and reduces Fehling's solution. [B, 270.]

BERGERA (Lat.), n. f. Bu^{5}r(be^{2}r)-je(ga)'ra^3. Fr., *bergéra*. A genus of rutaceous (aurantiaceous) plants, referred by Bentham and Hooker to *Murraya*. [B, 42, 180 ; L, 107.]—**B. Koenigii** [Linnæus]. See MURRAYA *Koenigii*.

BERGÈRE (Fr.), n. Be^{2}r-zhe^{2}r. The *Vinca minor*. [B, 173.]

BERGEREÆ (Lat.), n. f. pl. Bu^{6}r(be^{2}r)-je(ga)'re^2-e(a^3-e^2). Of Reichenbach, a section of the *Limonieæ*, including *Bergera*, *Limonia*, and two other genera. [B, 170.]

BERGGIESSHÜBEL (Ger.), n. Be^{2}rg'ges-hu^{6}b-e^{2}l. A place in Pirua, Saxony, where there are chalybeate springs. [L, 30.]

BERGIDÆ (Lat.), n. f. pl. Bu^{5}r(be^{2}r)'ji^{2}d(gi^{2}d)-e(a^3-e^2). A family of the *Zoanthacea*. [L. 244.]

BERGONDOLA, n. Be^{2}r-gon'do-la^3. A place near Villa-Franca, in Italy, where there is a salt spring analogous to that of the Tettuccio. [L, 105.]

BERGSKUBBA, n. The *Globularia vulgaris*. [L, 105.]

BERGUE (Fr.), n. Be^{2}rg. The *Alnus glutinosa*. [B, 173.]

BERGUNG (Ger.), n. Be^{2}rg'ung. Concealment.—**B. des Eies.** The reception and imbedding of the ovum in the uterus. [G.]

BERHENREID, n. A place in Switzerland where there is a whey-cure establishment. [L, 49.]

BERI (Hind.), n. The *Zizyphus jujuba*. [B, 172.]

BERIBERI, BERI-BERI, n's. Be^{2}r-i^2-be^{2}r'i^2. Said to be from the Hindustani word *b'here*, a sheep, from the fanciful notion that those affected with the disease walk with a kind of jerking motion, like a peculiar species of that animal. [N. Chevers, "Med. Times and Gaz.," April 5, 1884, p. 448.] Lat., *beriberia*. Fr., *béribéri*. Ger., *Beri-Beri*. It., Sp., *beri-beri*. Jap., *kakke*. Syn.: *acute anæmic dropsy*. A constitutional disease, which begins with anæmia, and manifests in its progress stiffness of the limbs, numbness and even paralysis of the lower extremities, difficult breathing, and a swollen countenance. The quantity of urine secreted is diminished and there is general œdema. It usually ends in death, which is often preceded by an effusion into the serous cavities. [D, 1.] "A recurrent, non-contagious disease, attacking up to the present time only the natives of Japan, selecting the residents of most densely populated towns, and particularly of the low crowded districts in these places ; most prevalent during the period of high temperature and heavy rain-fall ; with or without rise of temperature ; marked and temporary numbness of certain portions of the surface ; paralytic affections, most commonly of the lower and upper extremities, but occasionally other parts, tending to atrophy, with spasm and tenderness, in the paralyzed muscles ; œdema, usually confined to the lower extremities, and palpitation." [Sozuki and Toyozumi, "Australian Med. Jour.," Dec., 1882, p. 535.] See, also, BARBIERS.

BERIBERIA (Lat.), n. f. Be^{2}r-i^2-be^{2}r'i^2-a^3. See BERI-BERI.—**B.-spuria.** A name under which one case is mentioned by Bartholin, probably one of simple paraplegia. [Sauvages (L).]

BERICHTIGER (Ger.), n. Be^2-ri^{2}ch^{2}t'i^{2}g-e^{2}r. See ADJUSTER.

BÉRIGOULE (Fr.), n. Ba-ri^2-gul. See AGARICUS *geogenius*. [B, 105.]

BERILLUS (Lat.), n. m. Be^{2}r(bar)-i^{2}l'lu^{3}s(lu^{4}s). See BERYLLIUM.

BÉRINGÈNE (Fr.), n. Ba-ra^{2}n^2-zhe^{2}n. The *Solanum melongena*. [L, 41.]

BERINGERBAD (Ger.), n. Be^{2}r'i^{2}ng-e^{2}r-ba^{3}d. A place in Prussia, at the foot of the Harz Mountains, where there is a cold spring containing hydrogen sulphide and calcium chloride and bromide. [L, 105.]

BERINGERIA (Lat.), n. f. Bar-i^{2}ng-e(a)'ri^2-a^3. A genus of labiate plants. [B.]—**B. pseudo-dictamnus** [Bentham]. Syn.: *Marrubium pseudo-dictamnus* [Linnæus]. A shrub growing in Greece and Crete, the ψευδοδίκταμνον of the Greeks. It was formerly employed like the *Origanum dictamnus*, and is said still to be used in Greece as a digestive tonic. [B, 180.]

BERKA (Ger.), n. Be^{2}rk'a^3. A place near Weimar, Germany, where there is a ferruginous spring, together with mud baths, pine-needle baths, etc. [A, 319.]

BERKELEY SPRINGS, n. Bu^{6}rk'le^2. Four hot springs (the "Gentlemen's Spring," "Lord Fairfax's Spring," the "Ladies' Spring," and a smaller spring) in Bath, Morgan County, West Virginia, containing calcium carbonate, sodium and calcium chloride, magnesium sulphate, calcium and iron crenate, and iron silicate ; used chiefly as baths for neuralgia and debility. [A, 363.]

BERKELEYA (Lat.), n. f. Bu^{6}rk(ba^{3}rk)'li^{2}a^3. Fr., *berkeléye*. A genus of *Diatomaceæ*. The *B. fragilis* is parasitic on *Zostera Marina* and on some algæ. [L, 41.]

BERKSHIRE SODA SPRING, n. Bu^{6}rk'sher. A spring in Great Barrington, Berkshire County, Massachusetts, said to contain chlorine, carbonic acid, soda, and alumina. [A, 363.]

BERLE (Fr., Ger.), n. Be^{2}rl, be^{2}rl'e^2. The genus *Sium* (*Berula*), especially the *Sium latifolium*. [B, 173, 180.]—**B. à feuilles étroites** (Fr.). The *Sium angustifolium* (*Berula angustifolia*). [B, 173.]—**B. à larges feuilles** (Fr.). The *Sium latifolium*. [B, 173.]—**B. nodiflore** (Fr.). The *Sium* (*Helosciadium*) *nodiflorum*. [B, 173.]—**Schmalblättrige B.** (Ger.). The *Sium angustifolium* (*Berula angustifolia*). [B, 180.]

BERLINERBLAU (Ger.), n. Be^{2}r-len-er-bla^3'u. See *Prussian* BLUE.—**B'säure.** Hydrocyanic acid. [L, 43.]—**B'säurestoff.** See CYANOGEN.

BERLUE (Fr.), n. Be^{2}r-lu^5. Lat., *suffusio oculorum*, *metamorphopsia*. An aberration of the sense of vision in which objects appear to be seen which are not present in the field of vision (*e. g.*, *Muscæ volitantes*). [A, 301.]

BERMUDA ISLANDS, BERMUDAS, n's. Bu^{6}r-mu^2'da^3, -da^{3}s. A group of islands in the North Atlantic Ocean ; lat., 32° 14' to 32° 25' N., long., 64° 38' to 64° 52' W. ; a resort for pulmonary invalids.

BERMUDIANA (Lat.), n. f. Bu^{5}r(be^{2}r)-mu^2(mu)'di^2-a(a^3)'na^3. Fr., *bermudienne*. A genus of cannaceous plants. [B.]—**B. juncea** [Plumier]. The *Maranta juncea* of Lamarck. [B, 173.]

BERNADINOIDES (Lat.), n. f. pl. Bu^{5}rn(be^{2}rn)-a^3-di^{2}n-o(o^2)-i(e)'dez(das). A tribe of the family *Anagalleidæ*, made by Bando. [B, 170.]

BERNARDIN, n. Be^{2}rn-a^{3}rd'i^{2}n. Glycogen ; so called in honor of Bernard, the French physiologist. [B.]

BERNARVI, n. A highly intoxicating electuary, of unknown composition, used by the Egyptians. [L, 109.]

BERNE, n. Ar., *berniyak* (1st def.). Sp., *albornia* (1st def.). 1. In alchemical nomenclature, a glass vessel. [B. 52.] 2. A Brazilian fly which deposits its eggs under the skin, causing pustules. [Van Beneden (L).]

BERNECK (Ger.), n. Be^{2}rn'e^{2}k. A place in Bavaria, where there is an establishment for pine-needle baths, herb-baths, and the whey cure. [L, 57.]

BERNHARDIEÆ (Lat.), n. f. pl. Be^{2}rn-ha^{3}rd-i(i^2)'e^2-e(a^3-e^2). Of Reichenbach, a family of the *Lycopodiaceæ*. [B, 170.]

BERNHARDINERKRAUT (Ger.), n. Be^{2}rn-ha^{3}rd-en'e^{2}r-kra^3-ut. The herb of *Carduus benedictus*. [B, 270.]

BERNHARDSKRAUT (Ger.), n. Be^{2}rn'ha^{3}rds-kra^3-ut. The *Centaurea benedicta*. [L, 46.]

BERNIÈRES (Fr.), n. Be^{2}r-ni^2-e^{2}r. A sea-bathing station in the department of Calvados, France. [A, 385.]

BERNITZBEEREN (Ger.), n. Be^{2}rn'etz-bar-e^{2}n. The *Vaccinium vitis idæa*. [B, 180.]

BERNOS (Fr.), n. Be^{2}rn-o. A place in the department of the Gironde, France, where there is a carbonated chalybeate spring, the waters of which are esteemed in the treatment of dyspepsia and as a tonic. [L, 49.]

BERNSTEIN (Ger.), n. Be^{2}rn'stin. 1. Amber. [B.] 2. A place in Hungary, where there is a sulphurous chalybeate spring. [A, 385 ; L, 49.]—**Aetherische B'tinctur.** See *Tinctura* SUCCINI *ætherea*.—**Aetherisches B'öl.** Oil of amber. [B.] See *Oleum* SUCCINI.—**Alkalische B'tinctur.** See *Tinctura* SUCCINI *alcalisata*.—**Amerikanischer B.** See *Factitious* AMBER.—**Balsamische B'tinctur.** See *Tinctura* SUCCINI *balsamica*.—**B'ähnlich, B'artig.** Resembling amber. [L, 46.]—**B'äther.** See *B'säureäther*.—**B'auszug.** See *Tinctura* SUCCINI.—**B'balsam.** See *Balsamum* SUCCINI.—**B'baum.** The *Pinites succinifer*. [B, 48.]—**B'bitumen.** See SUCCININ.—**B'essenz.** See *Tinctura* SUCCINI.—**B'eupion.** See *Oleum* SUCCINI.—**B'firniss.** See AMBER *varnish*.—**B'haltig.** Containing amber. [L, 46.]—**B'kolophonium.** See *Colophony of* AMBER.—**B'kraut.** The sea-weed, containing amber inclosed in it, which is thrown up into the nets used in collecting amber. [B, 49.]—**B'öl.** See *Oleum* SUCCINI.—**B'ölzucker.** See *Oleosaccharum* SUCCINI.—**B'pillen.** See *Pilulæ de* SUCCINO.—**B'salmiak.** See AMMONIUM *succinate*.—**B'salz.** Succinic acid. [B, 49.]—**B'sauer.** Of or pertaining to succinic acid ; with the name of a base, the succinate of that base. [B.]—**B'sauerhaltig.** Containing succinic acid. [B.]—**B'säure.** Succinic acid. [B.]—**B'säureanhydrid.** Succinic anhydride. [B, 4.]—**B'säureäther, B'säureester.** An ethereal salt of succinic acid, especially ethyl succinate. [B.]—**B'täfelchen.** See *Trochisci* SUCCINI.—**B'tinctur.** See *Tinctura* SUCCINI.—**Flüchtiges B'salz.** Succinic acid. [A, 324.]—**Geistige B'tinctur.** See *Tinctura* SUCCINI *alcoholica*.—**Gegrabener B.** Fossil amber ; amber dug out of rock beds. [L, 46.]—**Grauer B.** See AMBRA *grisea*.—**Schwarzer B.** See *Black* AMBER.—**Wasserfreie B'säure.** Succinic anhydride. [B, 48.]

BEROIDA (Lat.), n. n. pl. Be^{2}r-o(o^2)-i^{2}d(ed)'-a^3. See BEROIDEÆ.

BEROIDÆ (Lat.), n. f. pl. Be^{2}r-o(o^2)-i^{2}d(ed)'e(a^3-e^2). Fr., *béroïdées*. A family of the *Eurystomata*, having an ovate body truncated at the oral pole, the aboral being more or less acuminate and mobile, and the radial canals being connected by a circumoral canal. [L, 121.]

BEROIDAL, adj. Be^{2}r-oid'a^{2}l. Fr., *béroïdé*. Resembling the *Beroidæ*. [L, 121.]

BEROIDEÆ (Lat.), n. f. pl. Be^{2}r-o(o^2)-i^{2}d(ed)'e^2-e(a^3-e^2). Fr., *béroïdes*. A family including the *Ctenophora*. [L, 208.]

BEROSCII (Heb.), n. The *Fraxinus excelsior* and the *Pinus albus*. [B.]

BÉROSOMES (Fr.), n. pl. Ba-ro-som. A tribe of *Beroideæ*. [L, 208.]

BERRIED, adj. Be^{2}r'ri^{2}d. See BACCATE.

BERRIONIS, n. An alchemical name for a resin or varnish. [Ruland (A, 325 ; B, 200).]

BERROUAGHIA, n. A place in Algeria, where there is a sulphurous spring. [L, 49.]

BERRY, n. Be^{2}r'ri^2. A.-S., *beria*. See BACCA.—**Avignon berries.** Fr., *graines d'Avignon*. The fruit of *Rhamnus infectorius* (*q. v.*). [B, 7.]—**Bermuda berries.** See BACCÆ *bermudenses*.—**Blackb', Blueb'.** See the major list.—**Bog-b.** The *Vaccinium oxycoccus*. [L, 56.]—**Compound b.** See BACCA *composita*.—**False b.** See BACCA *spuria*.—**French berries.** See *Avignon berries*.—**Partridge-b.** The genus *Mitchella*. [B, 75.]—**Persian berries.** See *Avignon berries*.—**True b.** See BACCA *vera*.—**Turkey b.** See PIPER *cubeba*.—**Yellow berries.** See *Avignon berries*.

BERRYA (Lat.), n. f. Be^{2}r'ri^2-a^3. From Dr. A. Berry, of Madras. Fr., *berrye.* A genus of tiliaceous plants established by Roxburgh. [B, 170.]—**B. ammomilla** [Roxburgh]. A tree of the East Indies and tropical Australia. The seeds are hairy, and produce severe itching. [B, 19.]

BERS, n. An ancient Egyptian intoxicating electuary. [Prosper Alpinus (A, 325).]

BERSLING (Ger.), n. Be^{2}rs'li^{2}ng. The *Fragaria collina.* [L, 80.]

BERSTEKRAUT (Ger.), n. Be^{2}rst'e^2-kra^3-ut. The *Solanum nigrum.* [L, 46.]

BERTHOLLETIA (Lat.), n. f. Be^{2}r-to^{2}l-la'shi^2(ti^2)-a^3. Fr., *berthollétie.* A genus of myrtaceous plants. [A, 385.]—**B. excelsa** [Humboldt, Bonpland]. Fr., *châtaignier du Brésil.* Port., *castanheiro de Para.* A large South American tree furnishing Brazil-nuts. [B, 81, 180.]—**B. nobilis.** See *B. excelsa.*

BERTHOLLIMÈTRE (Fr.), n. Be^{2}r-to^{2}l-li^2-me^{2}tr. See CHLOROMETER.

BERTINAL (Fr.), **BERTINISCH** (Ger.), adj's. Be^{2}r-ti^{2}n-a^{3}l, be^{2}r-ta^{2}n^2'i^{2}sh. Pertaining to certain structures described by Bertin (*e. g.*, the bones of Bertin). [L, 41, 115.]

BERTRAM, n. Bu^{5}rt'ra^{2}m. See BARTRAM.

BERTRAM (Ger.), n. Be^{2}rt'ra^{3}m. The *Anacyclus pyrethrum.* [B, 92.]—**Aechte B'wurzel.** The root of *Anacyclus pyrethrum.* [B, 180.]—**B'achillenkraut.** The *Achillea ptarmica.* [L, 105.]—**B'baum.** The *Xanthoxylum fraxineum.* [L, 46.]—**B'baumrinde.** The bark of *Xanthoxylum fraxineum.* [B, 92.]—**B'garbe.** The *Achillea ptarmica.* [L, 80.]—**B.-Kamille.** See *B.*—**B'kraut.** The *Thysselinum palustre.* [B.]—**B.-Ringblume.** The genus *Anacyclus.* [B, 180.]—**B'tinctur.** See *Tinctura* PYRETHRI.—**B'wurz.** The genus *Pyrethrum.* [B, 180.]—**B'wurzel.** Pellitory; the root of several species of *Anacyclus.* [B, 180.]—**B'wurzeltinctur.** See *Tinctura* PYRETHRI.—**Deutsche B'wurzel.** The root of *Anacyclus officinarum.* [B, 180.]—**Deutscher B.** The *Anacyclus officinarum.* [B, 180.]—**Falscher B.** The *Achillea ptarmica.* [B, 180.]—**Gemeine B'wurz.** The *Pyrethrum parthenium.* [B, 180.]—**Gewöhnliche B'wurzel.** The root of *Anacyclus officinarum.* [B. 180.]—**Persische B'blumen.** The flower-heads of *Pyrethrum* (*Chrysanthemum*) *roseum* and *Pyrethrum carneum.* [B, 81.]—**Römische B'wurzel.** The root of *Anacyclus pyrethrum.* [B, 180.]—**Wahrer B. der Alten.** True pellitory; according to Dierbach, the root of *Thysselinum palustre.* [B, 180.]—**Wiesenb', Wiesenb'kraut, Wildes B'kraut.** See ACHILLEA *ptarmica.*—**Wohlriechender B.** The *Achillea ageratum.* [B, 180.]

BERTRICH (Ger.), n. Be^{2}rt'ri^{2}ch^2. A place in Rhenish Prussia, where there is a hot spring containing sodium sulphate, free carbonic acid, baregin, silica, and alumina, the water of which is drank and used as baths and douches in digestive and pulmonary affections. [A, 321.]

BERTUA (Sp.), n. Be^{2}r-tu'a^3. A place in Galicia, Spain, where there is a mineral spring. [L, 105.]

BERU (Fr.), n. Be^{2}r-u^6. A village in France, where there is a chalybeate spring. [L, 105.]

BERÜCKSICHTIGUNG (Ger.), n. Be^2-ru^{6}k'zi^{2}ch^{2}t-i^{2}g-ung. See ANAMNESIS.

BERUFKRAUT (Ger.), n. Be^2-ruf'kra^3-ut. 1. The genus *Erigeron.* 2. The *Stachys recta.* 3. The *Sideritis hirsuta.* [B, 180.]—**Canadisches B.** The *Erigeron canadensis.* [B, 180.]—**Scharfes B.** The *Erigeron acris.* [B, 180.]

BERUHIGEND (Ger.), adj. Be^2-ru'hi^{2}g-e^{2}nd. Calmative. [L, 80.]

BERUHIGUNG (Ger.), n. Be^2-ru'hi^{2}g-ung. Sedation. [L, 80.]—**B'smittel.** A sedative. [L, 46.]—**B'ssaft.** See *Syrupus* PAPAVERIS.

BERÜHRUNG (Ger.), n. Be^2-ru^{6}r'ung. Contact. [A, 315.]—**B'selectricität.** Contact electricity; galvanism. [B.]

BERULA (Lat.), n. f. Be^{2}r(bar)'u^2(u^4)-la^3. Fr., *bérule, berle.* Ger., *Berle.* A genus of umbelliferous plants established by Koch, closely related to *Sium.* [B.]—**B. augustifolia** [Koch]. Ger., *schmalblättrige Berle.* A species growing in waste places in Europe and central Asia, having a fibrous root sending off lateral offshoots. The fruit and the herb (*herba berulæ, seu sii*) were formerly used in medicine and considered acrid narcotics. [B, 180.]—**B. gallica.** See *B. angustifolia.*

BERYL, n. Be^{2}r'i^{2}l. Gr., *βήρυλλος.* Lat., *beryllus.* Fr., *béryl.* Ger., *Beryll.* A compound of beryllium with aluminic and silicic acids, $Be_3Al_2Si_6O_{18} = 3BeO.Al_2O_3.6SiO_2$; a mineral occurring in hexagonal prismatic crystals, either of a transparent green (the emerald), of a bluish-green (the aquamarine), or of a bluish, reddish, or yellowish tint. It was formerly used in medicine, being accounted one of the *quinque fragmenta lapidum pretiosorum.* [B, 3, 180.]—**Common b.** Ger., *gemeiner Beryll.* The opaque or feebly translucent variety. [B, 3, 180.]—**Precious b.** Ger., *edler Beryll.* The transparent variety. [B, 3, 180.]

BERYLL (Ger.), n. Be^{2}r-u^{6}l'. See BERYL.—**B'erde.** See BERYLLIA.—**Edler B.** See *Precious* BERYL.—**Gemeiner B.** See *Common* BERYL.

BERYLLIA (Lat.), n. f. Be^{2}r(bar)-i^{2}l(u^{6}l)'li^2-a^3. Ger., *Beryllerde.* Syn.: *glucina.* A name given by German authors to the oxide of beryllium found in the beryl and the emerald; either a white amorphous powder or a microcrystalline body, according to the method of its preparation. BeO. [B, 3.]

BERYLLIS [Salisbury] (Lat.), n. f. Be^{2}r(bar)-i^{2}l(u^{6}l)'li^{2}s. Gen., *beryl'lidis.* A section of the genus *Ornithogalum.* [Engler (B, 245).]

BERYLLIUM (Lat.), n. n. Be^{2}r(bar)-i^{2}l(u^{6}l)'li^2-u^{3}m(u^{4}m). Gr., *βηρύλλιον.* Fr., *béryllium.* Ger., *Beryllium.* Syn.: *glucinium, glycinium, glucinum.* A bivalent metal (symbol, Be or Gl) discovered by Wöhler in 1828, occurring in the beryl, the emerald, and other minerals; silvery-white, of the sp. gr. of 2·100; also obtainable as a grayish powder capable of acquiring a metallic polish; forming salts analogous to those of magnesium; atomic weight, 9·2. [B, 3.]—**B. hydrate, B. hydroxide.** A white powder, $Be(OH)_2$, precipitated by the addition of ammonia to a solution of a b. salt. [B, 3.]—**B. nitrate.** A deliquescent salt, crystallizable with difficulty, $Be(NO_3)_2+3H_2O$, converted by heating into a basic salt, $Be(OH)NO_3+H_2O$. [B, 3.]—**B. oxide.** See BERYLLIA.—**B. phosphate.** Acid b. phosphate, $HBePO_4+3H_2O$, occurs as a white amorphous precipitate when solutions of b. nitrate and sodium phosphate are mixed. Tetrahydrogen b. phosphate, $H_4Be(PO_4)_2$, is also known. [B, 3.]—**B. sulphate.** Normal b. sulphate, $BeSO_4+4H_2O$, forms quadratic, pyramidal efflorescent crystals of a sweetish taste. The same compound occurs under different forms, combined with varying amounts of water of crystallization. [B, 3.]

BERYLLUS (Lat.), n. m. Be^{2}r(bar)-i^{2}l(u^{6}l)'lu^{3}s(lu^{4}s). See BERYL.

BERYTIDÆ (Lat.), n. f. pl. Be^{2}r(bar)-i^{2}t(u^{6}t)'i^{2}d-e(a^3-e^2). A family of the *Gymnocerata.* [L, 121.]

BERYTION (Lat.), n. n. Be^{2}r(bar)-i^{2}sh(u^{6}t)'i^2-o^{2}n. Gr., *βηρύτιον*, from the name of the inventor, Berytius. An old name for a certain collyrium for epiphora, also for a pastille used in dysentery. [Galen, Gorræus (A, 325).]

BES (Lat.), n. m. Be^{2}s(bas). Gen., *bes'sis.* Two thirds of anything, especially of a 12-oz. pound (*i. e.*, 8 oz.). [A, 312; Rhodius (A, 325).]

BESACHAR, n. An alchemical name for a fungus. [Dornæus, Ruland, Johnson (A, 325).]

BESANA, n. See MUSANÆ *cortex.* [B, 180.]

BESÄNFTIGEND (Ger.), adj. Be^2-zanf'ti^{2}g-e^{2}nd. Soothing, sedative. [A, 315.]—**B'es Mittel.** A sedative. [A, 315.]

BESÄNFTIGUNG (Ger.), n. Be^2-zanf'ti^{2}g-ung. Sedation, palliation. [A, 315; L, 43.]—**B'smittel.** A sedative, a palliative. [A, 315.]

BESATZ (Ger.), n. Be^2-za^{3}tz'. In botany, a peristome. [A, 315.]—**B'körperchen.** See *Marginal* CELL.

BESCHÄDIGUNG (Ger.), n. Be^2-shad'i^{2}g-ung. Insanity. [L, 80.]

BESCHAFFENHEIT (Ger.), n. Be^2-sha^{3}f'fe^{2}n-hit. A constitutional state, a diathesis. [L, 43.]—**B'sübel.** A cachexia. [L, 43.]

BESCHÄLEN (Ger.), v. tr. Be^2-shal'e^{2}n. To decorticate. [L, 43.]

BESCHEIDET (Ger.), adj. Be^2-shid'e^{2}t. In botany, vaginate. [B, 123.]

BESCHILDET (Ger.), adj. Be^2-sheld'e^{2}t. See ASPIDOPHOROUS.

BESCHLAG (Ger.), n. Be^2-shla^{3}g'. An efflorescence. [L, 46.]

BESCHLAUCHT (Ger.), adj. Be^2-shla^3'uch^{2}t. In botany, ascidiate. [B, 123.]

BESCHLEUNIGER (Ger.), n. Be^2-shloin'i^{2}g-e^{2}r. See ACCELERATOR.

BESCHLEUNIGUNG (Ger.), n. Be^2-shloin'i^{2}g-ung. Acceleration. [A, 315.]—**B'snerv.** See *Accelerator* NERVE.

BESCHNEIDER (Ger.), n. Be^2-shnid'e^{2}r. A circumcisor. [E.]

BESCHNEIDUNG (Ger.), n. Be^2-shnid'ung. Circumcision. [L, 80.]—**B. der Vorhaut.** See *B.*

BESCHNITTEN (Ger.), adj. Be^2-shni^{2}t'te^{2}n. Circumcised.—**B'er.** A circumcised person.

BESCHRÄNKTHEIT (Ger.), n. Be^2-shran^{2}kt'hit. Mental weakness. [L, 80.]

BESCHREIKRAUT (Ger.), n. Be^2-shri'kra^3-ut. The *Erigeron acris* and the *Sideritis scordioides.* [B, 180; L, 80.]

BESCHUPPT (Ger.), adj. Be^2-shupt'. In botany, squamate, squamose. [B, 123.]

BESCHWEIFT (Ger.), adj. Be^2-shwift'. In botany, caudiculate. [B, 123.]

BESCHWERDE (Ger.), n. Be^2-shwe^{2}rd'e^2. Trouble, difficulty; a complaint, a malady. [A, 315.]

BESED (Ar.), n. Red coral. [L, 105.]

BESEELT (Ger.), adj. Be^2-zalt'. Animated. [L, 80.]

BESEELUNG (Ger.), n. Be^2-zal'ung. Animation. [L, 43.]

BESEHEN (Ger.), n. Be^2-za'he^{2}n. See INSPECTION.

BESEN (Ger.), n. Ba'ze^{2}n. In botany, a spadix. [A, 315.]—**B'flachs.** The *Chenopodium scoparium.* [A, 315.]—**B'ginster.** The tops of *Sarothamnus scoparius.* [B.]—**B'ginsterabsüd.** See *Decoctum* SCOPARII.—**B'gras.** The genus *Spartina.* [A, 315.]—**B'kraut.** 1. The *Lepidium ruderale.* 2. The *Sarothamnus scoparius.* [B, 180.]—**B'schrade.** The *Scoparia dulcis.* [A, 315.]—**B'winde.** The *Convolvulus scoparius.* [B, 180.]—**Binsenartiger B'ginster.** The *Spartianthus junceus* (*Spartium junceum*). [B, 180.]—**Enzianartiges B'kraut.** The *Sarothra gentianoides.* [B, 180.]—**Grosser B'ginster.** The *Sarothamnus scoparius.* [B, 180.]—**Grosses B'kraut.** The *Sisymbrium Sophia.* [B, 180.]—**Süsses B'kraut.** The *Scoparia dulcis.* [B, 180.]

BESENNA (Lat.), n. f. Be^{2}s-e^{2}n'na^3. See ALBIZZIA.—**B. anthelminthica.** See ALBIZZIA *anthelminthica.*

BESESSEN (Ger.), adj. Be^2-ze^{2}s'se^{2}n. Possessed (of an evil spirit). [A, 315.]—**B'heit, B'sein.** Demoniacal possession. [A, 315; L, 80.]

BESEZTMÜNDIG (Ger.), adj. Be^2-zetzt'mu^{6}nd-i^{2}g. Provided with a peristome. [B, 123.]

BESHAN, n. The *Balsamodendron opobalsamum*. [B, 19.]

BESHULYO-KURUNEE (Bengal.), n. The *Cocculus cordifolius*. [B, 172.]

BESICHTIGUNG (Ger.), n. Be²-zi²ch²t′i²g-ung. See INSPECTION.

BESICLES (Fr.), n. pl. Be²z-ekl. Spectacles. [L, 32.]

BESING (Ger.), n. Ba′zi²ng. A name applied to several species of *Vaccinium*. [A, 315.]—**B'strauch.** The *Vaccinium myrtillus*. [L, 46.]—**Rother B.** The *Vaccinium vitis idæa*. [L, 46.]—**Schwarzer B.** See *B'strauch*.

BESINNUNG (Ger.), n. Be²-zi²n′nung. See ANAMNESIS.

BESLEREÆ (Lat.), n. f. pl. Be²s-le(la)′re²-e(a³-e²). See BESLERIEÆ.

BESLERIA (Lat.), n. f. Be²s-le(la)′ri²-a³. Fr., *beslérie*, *beslère*. A genus of gesneraceous plants established by Plumier. [B, 121.]—**B. cærulea** [Aublet]. See *B. violacea*.—**B. incarnata** [Aublet]. A species indigenous to Guiana, where the pulp of the berries is eaten. [B, 173.]—**B. violacea** [Aublet]. A Guiana species. The plant and its fruit are used in making a violet dye. [B, 173.]

BESLERIEÆ (Lat.), n. f. pl. Be²s-le²r(lar)-i(i²)′e²-e(a³-e²). Fr., *beslériées*. Syn.: *Beslereæ* [Endlicher]. Of Bartling, a tribe of gesneraceous plants distinguished by the ovary being free. [B, 121, 170.]

BESOIN (Fr.), n. Be²s-wa³n². The sensation of the need of performing any physiological act, or of a strong impulse to gratify a natural or artificial appetite. [A, 385.]—**B. artificiel.** An acquired appetite, as for tobacco, alcohol, etc. [A, 385.]—**B. circulatoire.** A sensation of anguish due to interference with the action of the heart. [A, 385.]—**B. de défécation.** The sensation as if the bowels must be evacuated. [A, 385.]—**B. de respirer.** Ger., *Athmungsnoth*. The sensation of the necessity of breathing, as when the breath is held. [A, 385.]—**B. d'uriner.** A desire to pass urine. [A, 385.]

BESPITZT (Ger.), adj. Be²-spi²tzt′. In botany, apiculate. [B, 123.]

BESPRENGEN (Ger.), n. Be²-spre²ng′e²n. See ASPERSION.

BESPRENGT (Ger.), **BESPRÜZT** (Ger.), adj's. Be²-spre²ngt′, -spru⁶tzt′. In botany, aspersus. [B, 123.]

BESS, n. A Tartar name for the *Menyanthes trifoliata*. [L, 105.]

BESSANEM (Ar.), n. An erythema of the face and limbs, especially that caused by exposure to cold. [Avicenna (A, 325).]

BESSE (Fr.), n. Be²s. A place in the department of Puy-de-Dôme, France, where there is a chalybeate spring. [Rotureau [L, 87.]

BESSERUNG (Ger.), n. Be²s′se²r-ung. Improvement (as in a patient's condition). [L, 46.]—**B'smittel.** A corrigent. [L, 46.]

BESSI, n. An Amboyna name for the *Eucalyptus resiniferus*. [L, 105.]

BESSIS (Lat.), n. m. Be²s′si²s. See BES.

BESTACHELT (Ger.), adj. Be²-sta³ch²′e²lt. See MURICATUS.

BESTAMMT (Ger.), adj. Be²-sta³mt′. Having a stem; cormose. [B, 123.]

BESTANDTHEIL (Ger.), n. Be²-šta³nd′til. A constituent part of a compound. [L, 135.]

BESTÄUBEND (Ger.), adj. Be²-stoib′e²nd. In botany, fecundating. [B, 123.]

BESTÄUBT (Ger.), adj. Be²-stoibt′. In botany, pulverulent. [B, 123.]

BESTÄUBUNG (Ger.), n. Be²-stoib′ung. A sprinkling with dust; in botany, fertilization by the dissemination of pollen. [B.]

BESTAUDUNG (Ger.), n. Be²-sta³′ud-ung. The formation of stalks. [L, 46.]

BESTECK (Ger.), n. Be²-ste²k′. An instrument-case. [E.]

BESTIÆ (Lat.), n. f. pl. Be²s′ti²-e(a³-e²). Fr., *bestiaux*. 1. A Linnæan order of *Mammalia*, including the *Insectivora*, *Marsupialia*, etc. [L, 173.] 2. An order of *Mammalia* corresponding to the ruminants. [L, 180.]

BESTIALITY, n. Be²st-i²-a²l′i²t-i². From *bestia*, a beast. Fr., *bestialité*. Ger., *Bestialität*. In legal medicine, an attempt at copulation with a lower animal. [A, 385.]

BESTIELT (Ger.), adj. Be²-stelt′. Pedunculated; in botany, petiolate. [L, 46.]

BESTIMMT (Ger.), adj. Be² sti²mt′. In botany, definite or determinate. [B, 123.]

BESTOCKUNG (Ger.), n. Be²-sto²k′ung. See BESTAUDUNG.

BESTRAHLUNG (Ger.), n. Be²-stra³l′ung. Irradiation. [A, 315.]

BESTREUEN (Ger.), n. Be²-stroi′e²n. See ASPERSION.

BESTREUT (Ger.), adj. Be²-stroit′. In botany, conspersus, aspersus (*q. v.*). [B, 123.]

BESTRUNKT (Ger.), adj. Be²-strun²kt′. In botany, stipitate. [B, 123.]

BET (Hind., Bengal.), n. The *Calamus Rotang*. [B, 172.]

BETA (Lat.), n. f. Be(ba)′ta³. Gr., βῆτα. Fr., *béta*. The second letter of the Greek alphabet. Written out or expressed by the character β, it is used as a prefix to chemical terms to denote an isomeric variety (*e. g.*, beta-amyl = β-amyl), and as a suffix to botanical species-names to denote the second of two or more varieties. [B.] For all such terms, see under the words to which β is added as a prefix or suffix.

BETA (Lat.), n. f. Be(ba)′ta³. Gr., τεῦτλον. Fr., *bette*. Ger., *Beete*, *Mangold*. A Linnæan genus of chenopodiaceous plants including the beets. [L, 108.]—**B. alba.** See *B. vulgaris*.—**B. cicla** (seu **cycla**) [Linnæus]. Fr., *racine de disette* (ou *d'abondance*), *blette*, *poirée*, *carde poirée*. Ger., *eigentlicher Mangold*. A species often regarded as a sub-species of *B. vulgaris*, growing in middle and southern Europe, where it is used as a substitute for spinach. The leaves—*folia betæ* (seu *ciclæ*)—were formerly employed as an emollient application to raw and blistered surfaces, wounds, etc. The root is used like that of *B. vulgaris*. [B, 71, 173, 180.]—**B. hortensis** [Miller]. See *B. cicla*.—**B. maritima** [Willdenow]. The sea beet; a species employed as a substitute for spinach. [B, 71.]—**B. rubra.** The *B. vulgaris*, var. *rubra*. [B.]—**B. sativa** [Bernhardi]. See *B. cicla*.—**B. vulgaris.** Fr., *bette*, *bette commune*, *betterave*, *réparée*. Ger., *gemeiner Mangold*. The common beet; a species cultivated throughout Europe and America. Several varieties are distinguished, differing in the color and appearance of the root, as the *B. vulgaris*, var. *alba* (*B. alba* of some) with white root, the *B. vulgaris*, var. *lutea*, with yellow root, the *B. vulgaris*, var. *rubra* (*B. rubra* of some) with red root, stalk, and leaf-ribs. The leaves are eaten, and are employed medicinally as a laxative and emollient. The root—*radix betæ rubræ* (seu *communis*, seu *vulgaris*), *radix rapi rubri*—contains much sugar (beet-sugar) and is largely employed as a source of this article. It was also formerly used as a remedy in hepatic, splenic, and phthisical affections. [B, 180.]—**Folia betæ.** The leaves of the beet, especially of *B. cicla*. [B, 180.]—**Herba betæ pratensis, Herba betæ silvestris.** The herb of the *Menyanthes trifoliata*. [B, 180.]—**Radix betæ communis, Radix betæ rubræ, Radix betæ vulgaris.** The root of *B. vulgaris* (*q. v.*). [B, 180.]

BETA (Bengal., Hind.), n. The *Calamus Rotang*. [B, 172.]

BETACEOUS, adj. Be-ta′shu³s. Lat., *betaceus*. Of or pertaining to the genus *Beta*. [A, 318.]

BETAILLE (Fr.), n. Ba-ta³-i²-y′. A place in the department of the Corrèze, France, where there is a chalybeate spring. [A, 385; Rotureau (L, 87).]

BETAINE, n. Be′ta³-en. From *beta*, the beet. Fr., *bétaine*. Ger., *Betain*. Syn.: *oxyneurine*. A crystalline basic principle, isolated from the common beet (*Beta vulgaris*), having the constitution of trimethyl glycocine, $N(CH_3)_3 \equiv CH_2.CO.O. = C_5H_{11}NO_2$ or $C_{10}H_{22}N_2O_4$. [B, 4.]

BETÄUBEND (Ger.), adj. Be²-toib′e²nd. Narcotic. [A, 315.]

BETÄUBUNG (Ger.), n. Be²-toib′ung. Narcosis. [L, 43.]

BÊTE (Fr.), n. Be²t. A beast; in veterinary medicine, sheep-pox. [A, 385.]—**B. à bon Dieu, B. à Dieu.** See COCCINELLA.—**B. d'août.** The larva of the *Trobidium autumnale* (*q. v.*). [L, 87.]—**B. des boulangers, B. noire des cuisines.** See BLATTA *orientalis*.—**B. rouge.** See PULEX *penetrans*.

BETEÆ (Lat.), n. f. pl. Bet(bat)′e²-e(a³-e²). Of Reichenbach and others, a division or subtribe of chenopodiaceous plants, including *Beta*, *Chenopodium*, and other genera. According to Moquin, it comprises those genera of the tribe *Chenopodieæ* in which the seed is horizontal. [B, 170, 214.]

BETEL, n. Betl. Fr., *bétel*. Ger., *Wasserpfeffer*. The *Piper betle* (*Piper b.*); also the substance consisting of the leaves of this plant combined with lime and some astringent material like the areca-nut (b.-nut) or catechu, used as a masticatory by the inhabitants of the East. [B.]—**B.-nut.** Ger., *B'nuss*. The areca-nut. [B.]—**B'pfeffer** (Ger.). The *Piper betle*. [B, 180.]

BÉTEL (Fr.), n. Ba-te²l. See BETEL.—**B. marron.** The *Piper discolor*. [B, 173.]—**B. noir.** A variety of the *Piper betle*. [L, 105.]

BETHAUT (Ger.), adj. Be²-ta³′ut. See RORIDUS.

BETHESDA SPRINGS, n. Be²th-e²z′da³. 1. Springs in Waukesha, Waukesha County, Wisconsin. The water contains sodium, magnesium, iron, and calcium carbonates, sodium chloride, potassium and sodium sulphates, sodium phosphate, alumina, silica, and organic matter. It is a diuretic, and is used in diabetes mellitus, lithiasis, and catarrh of the bladder, and as a palliative in Bright's disease. 2. Three springs in Lumpkin County, Georgia, near Dahlonega. [A, 363.]

BETHINA (Ar.), n. Fr., *jusquiame du Sahara*. A variety of *Hyoscyamus*, said to be used by the Arabs as a poison. [Bousson, "Arch. de méd. et de pharm. milit.," Dec. 15, 1883, p. 87; "Bull. gén. de thérap.," Oct. 15, 1885, p. 335.]

BETHKALK (Ger.), n. Be²t′ka³lk. Quicklime. [L, 46.]

BETHOL, n. Be′tho²l. See BETOL.

BETHROOT, n. Be²th′ru⁴t. A name applied to several species of *Trillium* (especially *T. erectum* and *T. pendulum*) and to their rhizome. [B, 81.]

BETIFALCA, n. The *Tamus communis*. [L, 105.]

BETIS (Lat.), n. f. Be(ba)′ti²s. Gen., *be′tis*. See BETA (2d def.).

BETLE, n. Betl. See BETEL.

BETMESE, n. Inspissated grape juice. ["Proc. of the Am. Pharm. Assoc.," xxiv, p. 170 (B).]

BÉTOINE [Fr. Cod.] (Fr.), n. Bat-wa³n. The *Betonica officinalis* (*Stachys betonica*). [B.]—**B. aquatique.** The *Scrophularia aquatica*. [B, 173.]—**B. commune.** See *B*.—**B. d'eau.** See *B. aquatique*.—**B. de montagne, B. des montagnes, B. des Savoyards, B. des Vosges.** The *Arnica montana*. [B, 173; L, 45, 87.]—**B. officinale.** See *B*.—**Cérat de b.** See *Emplastrum* BETONICÆ.—**Conserve de b.** See *Conserva* BETONICÆ.—**Eau de b.** See *Aqua* BETONICÆ.—**Emplâtre de b.** See *Emplastrum* BETONICÆ.—**Poudre de b.** [Fr. Cod.]. The powdered leaves of the *Stachys betonica* passed through a silk sieve of 80 meshes to the inch (Fr.). [B, 113.]—**Sirop de b.** See *Syrupus* BETONICÆ.

BETOL, n. Be'to^{2}l. A commercial name for the β-naphthol ether of salicylic acid, which has a structural formula analogous to that of the phenyl ether of salicylic acid (salol) and is said to resemble that compound in therapeutical properties. [H. Helbing, "Brit. and Colon. Drug."; "N. Y. Med. Jour.," July 16, 1887, p. 84.]

BÉTON (Fr.), n. Bat-o^{2}n^2. The colostrum of the cow. [A, 385.]

BETONICA (Lat.), n. f. Be^{2}t(bat)-o^{2}n'i^{2}k-a^3. Fr., *bétoine.* Ger., *Betonie.* A genus of labiate plants referred by Bentham and Hooker to *Stachys* (*q. v.*). [B, 42.]—**Aqua betonicæ.** Fr., *eau de bétoine.* An old preparation made by distilling 2 parts of a mixture of 1 part of the fresh herb of *B. officinalis* and 3 parts of water. [B, 119.]—**B. alba.** The *Veronica officinalis.* [B, 270.]—**B. alopecurus** [Linnæus]. Ger., *gelbweisse Betonie.* The *Stachys alopecurus.* [B, 180, 214.]—**B. aquatica.** The *Scrophularia aquatica.* [B, 173.]—**B. hirsuta** [Linnæus]. The *Stachys densiflora.* [B, 214.]—**B. hirta.** Of Leys, the *Stachys b.*; of Gouan, the *Stachys recta* [Gouan]. [B, 214.]—**B. incana** [Aiton]. The *Stachys densiflora.* [B, 214.]—**B. montana.** The *Arnica montana.* [B, 173.]—**B. officinalis** [Linnæus]. Fr., *bétoine commune.* Ger., *gebräuchliche Betonie.* See Stachys *b.*—**B. Pauli.** The *Veronica officinalis.* [B, 180.]—**B. purpurea, B. silvestris.** See *B. officinalis.*—**B. stricta** [Aiton]. The *Stachys b.* [B, 180.]—**B. vulgaris.** See *B. officinalis.*—**Ceratum betonicæ.** See *Emplastrum betonicæ.*—**Conserva betonicæ.** Fr., *conserve de bétoine.* Of the Würtemb. Ph. of 1798, a mixture of 1 part of the flowers of *B. officinalis* and 2 parts of sugar, beaten together. [B, 119.]—**Emplastrum betonicæ.** Fr., *emplâtre de bétoine.* Of the Palat. Disp. of 1764 and the Würtemb. Ph. of 1798, a preparation made by melting together 8 parts each of yellow wax, resin, and oil of turpentine, and adding 4 parts of *B. officinalis* and 1 part each of mastic, asphalt, and olibanum. With various modifications, the preparation was directed in several of the old formularies. [B, 119.]—**Flores betonicæ.** The flowers of *B. officinalis.* [B, 180.]—**Flores betonicæ montanæ.** The flowers of *Arnica montana.* [B, 180.]—**Flores betonicæ purpureæ.** The flowers of *B. officinalis.* [B, 180.]—**Herba betonicæ.** Ger., *Betonienkraut.* The herb of *B. officinalis.* [B, 180.]—**Herba betonicæ albæ.** The herb of *Veronica officinalis.* [B, 270.]—**Herba betonicæ aquaticæ.** The herb of *Scrophularia aquatica.* [B, 180.]—**Herba betonicæ Pauli.** The herb of *Veronica officinalis.* [B, 180.]—**Herba betonicæ purpureæ.** The herb of *B. officinalis.* [B, 180.]—**Radix betonicæ.** The root of *B. officinalis.* [B, 180.]—**Radix betonicæ montanæ.** The root of *Arnica montana.* [B, 180.]—**Radix betonicæ purpureæ.** The root of *B. officinalis.* [B, 180.]—**Syrupus betonicæ.** Fr., *sirop de bétoine.* Of the Würtemb. Ph. of 1798, a preparation made by macerating 120 parts of *B. officinalis* in 360 of aqua betonicæ, expressing, and adding to 270 parts of the liquid 480 of sugar, then simmering and straining. [B, 119.]

BETONIE (Ger.), n. Be^{2}t-o'ne. See Betonica.—**B'nkraut.** The herb of *Betonica officinalis.* [B, 180.]—**Braune B., Gebräuchliche B.** The *Betonica officinalis.* [B, 180.]—**Gelbweisse B.** The *Betonica alopecurus.* [B, 180.]—**Wiesen-B.** The *Betonica officinalis.* [B, 180.]

BETONIK (Ger.), **BETONIKA** (Ger.), n's. Be^{2}t-o^{2}n'ek, -ek-a^3. See Betonica.

BETONUNG (Ger.), n. Be^2-ton'ung. See Accentuation.

BETONY, n. Be^{2}t'o-ni^2. See Betonica.

BETROPFT (Ger.), adj. Be^2-tro^{2}pft'. In botany, guttate. [B, 123.]

BETSCHELETHEE (Ger.), n. Be^{2}t'she^{2}l-e^2-ta. Elder flowers (*flores sambuci*). [B, 270.]

BETT (Ger.), n. Be^{2}t. 1. A bed. [A, 315.] 2. In botany, see Discus, Thalamus, and Torus.—**B'ähnlich.** See Clinoid.—**B'aufhelfer.** A cord hanging near the head of a bed, for a patient to grasp to assist in raising himself upright. [A, 315.]—**B'flasche.** A bottle to be filled with hot water for application to a patient in bed. [A, 315.]—**B'förmig.** See Clinoid.—**B'fortsätze.** See *Clinoid* processes.—**B'fuss.** The genus *Clinopodium.* [L, 46.]—**B'gras.** The genus *Eriophorum.* [A, 315.]—**B'lägerig.** Bedridden. [A, 315.]—**B'maschine.** A mechanical bed arranged for treating fractures, etc. [L, 135.]—**B'nässen.** Incontinence of urine.—**B'nässen der Kinder.** The nocturnal incontinence of urine of children. [Ultzmann (A, 319).]—**B'pfanne.** A warming-pan. [A, 315.]—**B'pissen.** See *B'nässen.*—**B'schieber, B'schüssel.** A bed-pan. [A, 315; L, 135.]—**B'stroh.** The *Asperula odorata.* [L, 135.] See also Bedstraw.—**B'sucht.** A morbid propensity to lie in bed continually. [R. Arndt (A, 319).]—**B'wanze.** See Acanthia *lectularia.*—**Frauenb'stroh.** The *Galium verum.* [B, 275.]—**Hydrostatisches B.** See *Water* bed.—**Querb'.** That position of a patient in which he lies crosswise of the bed.—**Wasserb'.** See *Water*-bed.

BETTA TOVARY, n. The *Bombax gossypium.* [L, 105.]

BETTE (Fr.), n. Be^{2}t. See Beta (2d def.).—**B. blanche.** The *Beta vulgaris*, var. *alba*, also a white variety of the *B. cicla.* [B, 119, 173.]—**B. commune, B. ordinaire.** The *Beta vulgaris.* [A, 385.]

BETTERAVE (Fr.), **BETTE-RAVE** (Fr.), n's. Be^{2}t-ra^{3}v. The beet. See Beta.—**B. à sucre.** The sugar-beet; the variety of the *B. vulgaris* from which sugar is obtained. [B.]—**B. champêtre, B. sur terre.** The *Beta cicla.* [B, 173.]

BETTLER (Ger.), n. Be^{2}t'le^{2}r. A beggar. [A, 315.]—**B'heilkraut.** The herb of the *Convolvulus sepium.* [B, 180.]—**B'kraut.** The *Clematis vitalba* and the *Clematis flammula.* [A, 315; L, 135.]—**B'laus.** The *Xanthium strumarium.* [L, 80.]—**B'mantel.** The *Alchemilla vulgaris.* [A, 315.]—**B'salbe.** An ointment for phtheiriasis. [A, 315.]—**B'släusekraut.** The *Tordylium anthriscus* and the *Xanthium strumarium.* [A, 315.]

BETULA (Lat.), n. f. Be^{2}t'u^2(u^4)-la^3. Fr., *bouleau.* Ger., *Birke.* It., *betulla.* Sp., *abedul.* The birch; a genus of trees and shrubs of the *Cupuliferæ* (tribe *Betuleæ*) established by Linnæus. [B, 42.]—**B. alba** [Linnæus]. Fr., *bouleau blanc, bouillard, biès, arbre de la sagesse.* Ger., *weisse Birke, Pfingstmaie, Maienbaum.* The common, white, paper, or canoe birch; a tree 50 or 60 feet high growing in North America, Europe, and northern and central Asia. Regel divides the species into nine subspecies, each of which comprehends several varieties, and under it are included a great number of species formerly regarded as distinct. The bark is usually whitish externally (at least on the trunk), and peels off in layers. On distillation with water, the buds and twigs furnish a colorless, pungent balsamic oil (oil of birch). On dry distillation, the bark and the wood yield birch tar (oleum betulinum, balsamum russicum, etc.), a dark reddish-brown substance of an aromatic odor like that of Russia leather; on re-distillation, this furnishes a brownish-red oil (empyreumatic oil of birch). The inner bark also contains betulin (*q. v.*). The leaves (folia betulæ) are said to be employed in Lapland as a substitute for tea, and are used as an anthelminthic, also as a diaphoretic, both externally and internally, in rheumatism, gout, and dropsy. They also furnish a yellow dye and a varnish. The inner bark (cortex betulæ) is aromatic and somewhat astringent, and is used externally in itch and scrofula. The saccharine, acidulous sap, which exudes in the spring from incisions made into the bark, is used in the preparation of an alcoholic drink, also of vinegar, and, boiled down to a syrup, constitutes the syrup of birch, formerly official. This sap was formerly much employed in skin diseases, gout, and intermittent fever. The oil of birch is employed in chronic skin diseases and gonorrhœa, and birch tar is used for the same purposes as the leaves. [B, 81, 180, 214.]—**B. alnus** [Linnæus]. See Alnus *glutinosa.*—**B. ambigua** [Hampe]. See *B. alba.*—**B. bhojpattra** [Wallich]. A species growing in the northern provinces of India and in Japan. [B, 214; "Proc. of the Am. Pharm. Assoc.," xxviii, p. 198.]—**B. carpatica** [Reichenbach *et al.*], **B. carpathica** [Tausch], **B. cuspidata** [Schrader]. See *B. alba.*—**B. emarginata.** See Alnus *glutinosa.*—**B. ethnensis** [Rafinesque]. See *B. alba.*—**B. excelsa.** 1. Of Aiton and others, a species now referred to *B. alba.* 2. Of Hooker, the *B. lenta.* [B, 214.]—**B. glutinosa.** 1. Of Willdenow, the *Alnus glutinosa.* 2. Of Fries and others, a variety of *B. alba.* [B, 214.]—**B. gummifera** [Bert.], **B. hybrida** [Bechst., Bloom, *et al.*]. See *B. alba.*—**B. incana** [Linnæus]. See Alnus *incana.*—**B. Jacquemontii** [Spach]. A species akin to *B. bhojpattra* and, according to Spach, including the latter. [B, 214.]—**B. laciniata** [Wahlenberg]. See *B. alba.*—**B. lanulosa** [Michaux]. The *B. nigra* (3d def.). [B, 214.]—**B. lenta.** Ger., *zähe Birke.* 1. Of Duroi, a variety of *B. alba.* 2. Of Willdenow, the sweet, cherry, or black birch; a tree growing in Canada and the Atlantic United States, characterized by its oblong-cordate, acuminate-serrate leaves, pubescent inferiorly, by its erect fertile aments, and by its reddish-brown bark, which is only slightly laminate, and that in the outer layers. The bark and leaves contain gaultherin and another principle which, by combination with water, form a colorless volatile oil of syrupy consistence, apparently identical with oil of gaultheria, consisting almost wholly of methyl salicylate. The bark also contains tannic acid, and both it and the leaves are stimulant and diaphoretic. [B, 34, 81, 214.]—**B. lutea** [Michaux]. See *B. lenta.*—**B. nana** [Linnæus]. Fr., *bouleau nain.* Ger., *Zwergbirke.* The dwarf-birch; a low shrub or trailing plant found on the Alps and on the White Mountains, having orbicular, crenate leaves and the scales of the fertile aments deeply trifid and the samaræ nearly wingless. The sap is said to be employed in Switzerland in gout and other affections, and externally in skin diseases. [B, 34, 180, 214.]—**B. nigra.** Fr., *bouleau à canots.* Ger., *Rothbirke.* 1. Of Duhamel, the *B. alba.* 2. Of Duroi, the *B. lenta.* 3. Of Willdenow, the red birch; a lofty tree growing in the Atlantic United States, with dark-red bark, which at length separates from the trunk in shreds, with rhomboid-ovate leaves, acute at both ends and glaucous inferiorly, and with sessile, erect fertile aments. It is said to have properties like those of *B. alba.* [B, 34, 180; "Proc. of the Am. Pharm. Assoc.," xxix, p. 440 (B).]—**B. odorata.** A name applied to several species now referred to *B. alba.* [B, 214.]—**B. papyracea** [Willdenow *et al.*], **B. papyrifera** [Michaux *et al.*], **B. pendula** [Hoffmann]. Fr., *bouleau à papier.* See *B. alba.*—**B. pubescens.** Of various authors, different species now referred to *B. alba.* [B, 214.]—**B. rubra** [Michaux]. Fr., *bouleau rouge.* See *B. nigra* (3d def.).—**B. utilis** [Don]. See *B. bhojpattra.*—**B. verrucosa** [Ehr.]. See *B. alba.*—**Cortex betulæ.** Sp., *abedul* (*corteza del leño*) [Sp. Ph.]. The bark of *B. alba.* [B, 180.]—**Cortex betulæ alni.** The bark of *Alnus glutinosa.* [B.]—**Folia betulæ, Folia betulæ albæ.** The leaves of *B. alba.* [B, 180.]—**Folia betulæ alni.** The leaves of *Alnus glutinosa.* [B, 180.]—**Oleum betulæ.** See under *B.*—**Succus betulæ.** Ger., *Birkensaft, Birkenwasser.* The juice of *B. alba.* [B, 180.]

BETULACEÆ (Lat.), n. f. pl. Be^{2}t-u^2(u^4)-la(la^3)'se^2(ke^2)-e-(a^3-e^2). Fr., *bétulacées.* See Betuleæ.

BETULACEOUS, adj. Be^{2}t-u^2-la'shu^{3}s. Lat., *betulaceus.* Fr., *bétulacé.* Of or pertaining to the *Betulaceæ* or resembling the *Betula.* [B.]

BÉTULAIRE (Fr.), adj. Ba-tu^{6}l-a^{2}r. See Betulaceous.

BETULEÆ (Lat.), n. f. pl. Be^{2}t-u^{2}l(u^{4}l)'e^2-e(a^3-e^2). Fr., *bétulées.* Of Baillon, a series of the *Castanaceæ* [Baillon], or the *Cupuliferæ*, comprising the genera *Betula* and *Alnus.* [B, 42, 121.]

BETULIDEÆ [Gray] (Lat.), n. f. pl. Be^{2}t-u^2(u^4)-li^{2}d'e^2-e(a^3-e^2). See Betuleæ.

BETULIN, n. Be^{2}t'u^2-li^{2}n. Lat., *betulinum, betulina.* Fr., *bétuline, résine de bouleau.* Ger., *Betulin, Birkenharz.* Birch camphor, birch resin; a resin-like substance found in the inner bark of *Betula alba*; light, flocculent crystals soluble in ether and in the volatile oils. The formulæ $C_{40}H_{33}O_3$ [Hess] and $C_{25}H_{40}O_2$ or $C_{24}H_{36}O_2$ [Kraut] have been assigned to it, but, according to Hausmann, its true formula is $C_{36}H_{60}O_3$, and it is probably a diatomic alcohol. [B, 2, 81, 207; "Proc. of the Am. Pharm. Assoc.," xxv, p. 321.]

BETULINÆ [Reichard], **BETULINEÆ** [Reichenbach] (Lat.), n's f. pl. Be^{2}t-u^2(u^4)-li(le)'ne(na^3-e^2), -li^{2}n'e^2-e(a^3-e^2). See BETULEÆ.

BETULINAMARIC ACID, n. Be^{2}t''u^{2}l-i^{2}n-a^{2}m-a^{2}r'i^{2}k. Ger., *Betulinamarsäure.* A tetrabasic acid, $C_{36}H_{52}O_{16}$, said to be produced by the oxidation of betulin. [B, 207.]

BETULINEOUS, adj. Be^{2}t-u^2-li^{2}n'e-u^{3}s. See BETULACEOUS.

BETULINIC ACID, n. Be^{2}t-u^{2}l-i^{2}n'i^{2}k. Ger., *Betulinsäure.* A tribasic acid, $C_{36}H_{54}O_6$, produced by the oxidation of betulin. [B, 207.]

BETULINUM (Lat.), n. n. Be^{2}t-u^2(u^4)-li(le)'nu^{3}m(nu^{4}m). See BETULIN.

BETULINUS (Lat.), adj. Be^{2}t-u^2(u^4)-li(le)'nu^{3}s(nu^{4}s). Of or pertaining to the birch. [B.] See OLEUM *betulinum.*

BETULLA (Lat.), n. f. Be^{2}t-u^{3}l(u^{4}l)'la^3. See BETULA.

BETULOIDEÆ (Lat.), n. f. pl. Be^{2}t-u^2(u^4)-lo(lo^2)-i^{2}d(ed)'e^2-e-(a^3-e^2). Of Spach, a tribe of the *Cupuliferæ*, including the sections *Coryleæ* and *Carpineæ.* [B, 170.]

BETULORESINIC ACID, n. Be^{2}t''u^2-lo-re^{2}z-i^{2}n'i^{2}k. Fr., *acide bétulo-résinique.* A resinous acid, $C_{36}H_{66}O_6$, forming a white powder on the young leaves and shoots of *Betula alba;* soluble in alcohol, making a solution of a bitterish taste. [B, 81, 207.]

BETULORETIC ACID, n. Be^{2}t''u^2-lo-re'ti^{2}k. Fr., *acide bétulorrhétinique.* Ger., *Betuloretinsäure.* An acid, $C_{36}H_{66}O_6$, obtained from betulin. [A, 385; B, 2, 48.]

BETULUS (Lat.), n. m. Be^{2}t'u^2(u^4)-lu^{3}s(lu^{4}s). An ancient name for a certain gem supposed to possess magical virtues. [Pliny (A, 318).]

BETUTET (Ger.), adj. Be^2-tut'e^{2}t. Ochreate. [B, 198.]

BEU, n. The *Cariaria ruscifolia.* ["Proc. of the Am. Pharm. Assoc.," xxiv, p. 765 (B).]

BEUEL (Ger.), n. Boi'e^{2}l. A place in the valley of the Ahr, where there are warm springs resembling those of Ems. [L, 30.]

BEUGADE, n. An East Indian name for the *Morinda citrifolia.* [L, 105.]

BEUGE (Ger.), n. Boig'e^2. A bend, a flexure. [A, 450.]—**B'fläche.** A flexor surface. [A, 317.]—**B'muskel.** A flexor muscle. [L, 43.]—**B'sehne.** A flexor tendon. [A, 317.]

BEUGER (Ger.), n. Boig'e^{2}r. See BEUGE*muskel.*—**Aeusserer B. der Vorderfusswurzel.** See EPICONDYLO-SUPERCARPEUS.—**Aeusserer kurzer B. des Armbeins.** See SCAPULO-HUMERALIS *minor.*—**Aeusserer langer B. des Armbeins.** See SCAPULO-HUMERALIS.—**B. des Schienbeins, B. des vorderen Mittelfusses.** See EPITROCHLEO-METACARPEUS.—**Dicker B. des Hufbeins.** See TIBIO-PHALANGEUS.—**Dünner B. des Hufbeins.** See PERONEO-PHALANGEUS.—**Durchbohrender B.** See RADIO-PHALANGEUS.—**Durchbohrter B.** See EPITROCHLEO-PHALANGEUS.—**Gewandener B.** See HUMERO-RADIALIS.—**Intrauterinb'.** See *Uterine* ELEVATOR.—**Kleiner B. des Kopfes.** See ATLOIDO-STYLOIDEUS.—**Kurzer B. des Vorderarms.** See HUMERO-RADIALIS.—**Langer B. des Vorderarms.** See CORACO-RADIALIS.—**Oberflächlicher B.** A superficial flexor muscle. [L, 43.]—**Schiefer B. des Kopfes.** See ATLOIDO-STYLOIDEUS.—**Seitenb' des Hufbeins.** See PERONEO-PHALANGEUS.—**Tiefer B.** A deep flexor muscle. [L.]—**Zweiköpfiger B.** See *Biceps* FLEXOR *cruris* and *Biceps* FLEXOR *cubiti.*

BEUGUNG (Ger.), n. Boig'ung. A bending, flexion, flexure. [L, 80.]—**B. des Lichts.** Diffraction of light. [B.]

BEULAH, n. Bu^2'la^3. A place near London, England, where there is a spring containing magnesium and sodium sulphates. [A, 319.]

BEULE (Ger.), n. Boil'e^2. See ABSCESS, BOIL, and PHLEGMON.—**Aleppob'.** See *Aleppo* BOIL.—**B'nbrand.** The *Ustilago maidis.* [A, 247.]—**B'nfieber.** The urticaria of horses. [L, 80.]—**B'npest.** See PLAGUE.—**B'nseuche, B'nseucht.** See *Contagious* ANTHRAX.—**Biskarab'.** See *Aleppo* BOIL.—**Bösartige Brandb'.** See *Contagious* ANTHRAX.

BEURRAT (Fr.), n. Bu^{6}r-ra^3. The *Malva silvestris.* [B, 121.]

BEURRE [Fr. Cod.] (Fr.), n. Bu^{6}r. Butter. [B.] See also under AMANDE, ANTIMOINE, BISMUTH, etc.—**B. d'Afrique.** See *Galam* BUTTER.—**B. de Bambarre.** A butyraceous substance believed to be produced by the *Elæis guineensis.* [L, 87.]—**B. de bambou, B. de bamboue, B. de Bataule.** A substance obtained from Africa, perhaps identical with *b. de Bambarra.* [B, 121.]—**B. de cacao.** See *Oleum* THEOBROMÆ.—**B. de Cayan.** An alimentary preparation made in India from the fruit of *Capsicum annuum.* [B, 121.]—**B. de Chi.** See *B. de Bambarra.*—**B. de chigomier.** A butyraceous substance obtained from the *Combretum butyrosum.* [B, 121.]—**B. de Chiquea.** A fatty substance said to be produced by a species of palm growing in Gambia. [B, 121.]—**B. de Chiquito.** See *B. de chigomier.*—**B. de cire.** A substance consisting of margaric and oleic acids and of myricin and cerin, obtained by the distillation of wax. [B, 46.]—**B. de cirier.** See *B. de galé.*—**B. de coco.** A white fatty substance contained in the cocoa-nut. [A, 301.]—**B. de croton.** An oily substance obtained from the seeds of *Croton sebiferum.* [B, 121.]—**B. d'eau.** The *Nostoc pruiniforme.* [B, 121.]—**B. de fourmis.** A species of *Nostoc* found among the ant-hills in Siberia. [B, 121.]—**B. de Galam.** See *Galam* BUTTER.—**B. de galé.** The waxy substance obtained from the berries of *Myrica cerifera.* [B, 121.]—**B. de Ghe, B. de Ghi.** The butter produced by the *Bassia butyracea.* [B, 121.]—**B. de Kokum.** See *Kokum* BUTTER.—**B. de la margarine.** See OLEO-MARGARIN.—**B. de mahdouca, B. de mahwah.** A saponifiable fatty matter obtained from a sapotaceous tree growing on the coast of Coromandel and in Bengal. [A, 301.]—**B. de muscade.** See *Oleum* MYRISTICÆ *expressum.*—**B. de palme.** Palm-oil, or palm-butter, obtained from several species of palms, especially the *Elæis guineensis.* [B, 121.]—**B. de palmier.** See *B. de palme.*—**B. de péki.** A fatty substance obtained from the seeds of *Pekea butyrosa.* [B, 121.]—**B. de Saturne.** See *Linimentum* PLUMBI *subacetatis.*—**B. de Shea.** See *B. de Bambarra.*—**B. de sumac.** A concrete fatty substance obtained from the seeds of *Rhus succedaneum.* [B, 121.]—**B. de terre.** A species of *Nostoc* growing in Siberia. [B, 121.]—**B. de Tomex.** A butyraceous substance derived from the seeds of *Litsæa chinensis.* [B, 121.]—**B. magique.** See *B. de terre.*—**B. végétal.** The pulp of the fruit of *Persea gratissima.* [B, 121.]

BEURRERIA [Jacquin] (Lat.), n. f. Bu^{2}r-ra'ri^2-a^3. See BOURRERIA.

BEUTEL (Ger.), n. Boit'e^{2}l. A bag, sac, cyst. [A, 315.]—**Affenfüssige B'thiere.** See PEDIMANA.—**B'blattlaus.** A species of *Aphis* (*q. v.*). [A, 315.]—**B'chen.** A little sac or cyst; in botany, a bursicula. [B, 198.]—**B'förmig.** See SCROTIFORMIS.—**B'geschwulst.** A cystic tumor. [E.]—**B'ig.** Encysted, sacciform. [A, 317.]—**B'knochen.** See *Marsupial* BONE.—**B'laus.** See *B'blattlaus.*—**B'krebs.** The *Cancer latro* of Linnæus. [L, 218.]—**B'leim.** See PROPOLIS.—**B'muskel.** See OBTURATOR *internus.*—**B'ratten.** See DIDELPHIDÆ.—**B'schneidekraut.** The *Thlaspi bursa pastoris.* [L, 46.]—**B'schwarzer.** The pecten of the eye. [L, 43.]—**B'skur.** See *Movement* CURE.—**B'staare.** See ICTERINÆ.—**B'thierchen.** See BURSARIA.—**B'thiere.** See DIDELPHIA.—**Eisb'.** An ice-bag. [L.]—**Fleischfressende B'thiere.** See ZOOPHAGA.—**Fruchtfressende B'thiere.** See CARPOPHAGA.—**Herzb'.** See PERICARDIUM.—**Insectenfressende B'thiere.** See CANTHAROPHAGA.—**Muskulöser B. des Hodens.** See DARTOS.—**Pflanzenfressende B'thiere.** See BOTANOPHAGA.—**Raubb'-thiere.** See CREOPHAGA.—**Wurzelfressende B'thiere.** See RHIZOPHAGA.—**Zahnarme B'thiere.** See EDENTATA.

BEUTENHONIG (Ger.), n. Boit'e^{2}n-hon-i^{2}g. The honey of the wild bee. [L, 46.]

BEUTLER (Ger.), n. pl. Boit'le^{2}r. See DIDELPHIA.

BEUZEVAL (Fr.), n. Bu^{6}z-va^{3}l. A bathing station in the department of Calvados, France. [L, 49.]

BEVERAGE, n. Be^{2}v'u^{5}r-aj. Lat., *beveragium.* Fr., *breuvage.* Ger., *Trank, Getränk.* It., *beveraggio.* A prepared liquid for habitual drinking, especially one that is used simply because it is agreeable.

BEVILACQUA, n. A name applied in the Mauritius to the *Hydrocotyle asiatica.* [L, 49.]

BÉVUE (Fr.), n. Ba-vu^6. Diplopia. [L, 109.]

BEWA, n. An East Indian name for the *Melia azadirachta.* [L, 105.]

BEWACHEN (Ger.), n. Be^2-va^{3}ch^2'e^{2}n. See SYNTERESIS.

BEWAFFNET (Ger.), adj. Be^2-va^{3}f'ne^{2}t. Armed (with spines or the like). [L, 80.] See ARMATUS.

BEWAFFNUNG (Ger.), n. Be^2-va^{3}f'nung. See ARMATURE.

BEWAHREN (Ger.), n. Be^2-va^{3}r'e^{2}n. See SYNTERESIS.

BEWAHRUNGSMITTEL (Ger.), n. Be^2-va^{3}r'ungs-mi^{2}t-te^{2}l. A prophylactic. [L, 43.]

BEWEGBARKEIT (Ger.), n. Be^2-vag'ba^{3}r-kit. Motility. [K.]

BEWEGEN (Ger.), n. Be^2-vag'e^{2}n. Motion, commotion. [L, 80.]—**B'd.** Moving, motor. [L, 43.]

BEWEGKRAFT (Ger.), n. Be^2-vag'kra^{3}ft. Motor force. [L, 80.]

BEWEGLICH (Ger.), adj. Be^2-vag'li^{2}ch^2. Movable, mobile. [L, 43.]—**B'keit.** Mobility. [L, 43.]

BEWEGUNG (Ger.), n. Be^2-vag'ung. Motion, agitation. [L, 30, 43.]—**Amöboide B.** Amœboid movement. [J.]—**B'sataxie.** Inco-ordination of movements. [D.]—**B'sbildercentrum.** Lichtheim's term for the centre of motor images. ["Brain," Jan., 1885, p. 435 (K).]—**B'sfaser.** A motor fibre. [L, 80.]—**B'sgrund.** A motor stimulus. [L, 80.]—**B'skur.** See *Movement* CURE.—**B'slähmung.** Motor paralysis.—**B'slehre.** Mechanics. [L, 43.]—**B'snerv, B'snerve.** A motor nerve. [K.]—**B'splasma.** The external layer of the three into which Brass divides the protoplasm, especially that of amœboid cells; supposed to be specially endowed with the power of movement. [J, 55, 60.]—**B'splastiden.** Anatomical elements having special motor functions, such as muscular fibres and cells. [J.]—**B'svermögen.** Motility. [L, 43.]—**B'swerkzeuge.** The organs of motion. [L, 80.]—**Ciliarb'.** See *Ciliary* MOVEMENT.—**Co-relative B.** See *Correlative* MOVEMENT.—**Fortb'.** Movement, propulsion (said of the circulation of the blood, lymph, etc.). [K, 16.]—**Freiwillige B.** Voluntary movement. [K.]—**Gaumenb'.** The movement of the soft palate during deglutition. [K, 16.]—**Gegenwurmförmige B.** Reversed peristaltic action. [L, 80.]—**Gesammt-B.** A compound movement (applied by Landois to the sum of the phenomena of peristaltic action). [K, 16.]—**Glitschende und radförmige B.** Rotation. [L, 80.]—**Kau-B.** Mastication. [K, 16.]—**Mahl-B.** The lateral grinding movement of the jaws in mastication. [K, 16.]—**Peristaltische B.** See PERISTALSIS.—**Reitbahn-B.** See *Circus* MOVEMENT.—**Roll-B.** A movement made by animals after unilateral injury of the corpora quadrigemina, consisting in a constant revolution of the body around its vertical axis. [K, 16.]—**Sarkodische B.** Amœboid movement. [K.]—**Schlingb'.** Deglutition. [K, 16.]—**Selbstständige B.** Automatic movement. [B.]—**Vibrirende B.** Vibratory movement. [K.]—**Wurmförmige B.** See PERISTALSIS.—**Zeiger-B.** A peculiar vibrating movement of the head and shoulders observed in animals after unilateral injury of the corpora quadrigemina. [K, 16.]—**Zwangs-B.** A forced movement. [K, 16.]

BEWEHRT (Ger.), adj. Be^2-ve^{3}rt'. See ARMATUS.

BEWIMPERT (Ger.), adj. Be^2-vi^{2}mp'e^{2}rt. Ciliated. [J.]

BEWINDSEL (Ger.), n. Be^2-vi^{2}nd'ze^{2}l. A ligature. [E.]

BEWULSTET (Ger.), adj. Be^2-vulst′e^{2}t. In botany, volvate. [B, 123.]

BEWURZELT (Ger.), adj. Be^2-vurtz′e^{2}lt. Provided with a root; radicate. [B, 123.]

BEWURZELUNG (Ger.), n. Be^2-vurtz′e^{2}l-ung. See RHIZOSIS and RADICATIO.

BEWUSSTLOSIGKEIT (Ger.), n. Be^2-vust′los-i^{2}g-kit. Unconsciousness. [L, 57.]

BEWUSSTSEIN (Ger.), n. Be^2-vust′zin. Consciousness. [L, 80.]

BEWUSSTWERDEN (Ger.), n. Be^2-vust′ve^{2}rd-e^{2}n. 1. Consciousness. [L, 46.] 2. See APPERCEPTION.

BEX (Lat.), n. f. Be^{2}x(bax). Gen., *bech′os* (*-is*). Gr., βήξ. A cough. [A, 387.]—**B. convulsiva.** Whooping-cough. [L, 83.]—**B. humida.** A cough with expectoration, a loose cough. [L, 83.]—**B. sicca.** A dry cough, one without expectoration. [L, 83.]—**B. theriodes.** Whooping-cough. [L, 83.]

BEX (Fr.), n. Be^{2}x. A place in the canton of Vaud, Switzerland, where there is a spring containing a large amount of sodium chloride, together with potassium, calcium, and magnesium chlorides, also a whey-cure establishment. The waters are used chiefly for scrofula and general debility. [A, 321.]

BEXAGUILLO (Sp.), n. Ba-ha-gwel′yo. See BEXUCO and BEJUCO.

BEXIS (Lat.), n. f. Be^{2}x(bax)′i^{2}s. See BEX, Lat.

BEXUCO (Sp.), **BEXUGO** (Sp.), **BEXUGUILLO** (Sp.), **BEXUQUILLO** (Sp.), n′s. Ba-hu′ko, -go, -hu-gwel′yo, -kel′yo. A Mexican purgative root. [Clusius (B, 121).] See BEJUCO.

BEYDLEBIG (Ger.). adj. Bid′lab-i^{2}g. For this and other German words in *Bey-*, see the corresponding words in *Bei-*.

BEYOCO (Malay), n. A variety of the *Calamus rotang*. [B, 121.]

BEZA, n. An Abyssinian name for favus. [A, 321.]

BEZAAR, BEZAHAU, n′s. See BEZOAR.

BEZAUBERT (Ger.), adj. Be^2-tza^3′ub-e^{2}rt. Enchanted, hypnotized. [A, 315.]

BEZAUBERUNG (Ger.), n. Be^2-tza^3-ub-e^{2}r-ung. Fascination, hypnotization. [A, 315; L, 80.]

BEZE, n. Bez. See BEZE-TYNE.

BEZEHARD, n. See BEZOAR.

BEZEICHNET (Ger.), adj. Be^2-tzich^2′ne^{2}t. In botany, marked (*notatus*). [B, 123.]

BEZERCHETAN, n. The *Linum usitatissimum*. [L, 105.]

BEZERCOTHUME (Ar.), n. The *Plantago psyllium*. [L, 105.]

BEZETTA (Lat.), n. f. Be^2-ze^{2}t′ta^3. Fr., *bezette, tournesol en drapeau.* Ger., *Schminkeläppchen.* A dye made from certain vegetable coloring matters and collected on linen rags. [B, 2, 180.]—**B. cærulea.** See *Blue b.*—**B. rubra.** See *Red b.*—**Blue b.** Lat., *b. cærulea.* A blue coloring matter obtained from the *Crozophora tinctoria* by treatment with ammoniacal vapors and urine; used in coloring cheese and as a chemical test (like blue litmus). [B, 2, 180.]—**Red b.** Lat., *b. rubra.* Blue b. that has been reddened with an acid. [B, 2, 180.]

BEZE-TYNE, n. Bez′tin. The second tyne of an antler, counting from the head outward. [L, 14.]

BEZIRK (Ger.), n. Be^2-tzerk′. A region, area, district. [L, 46.]—**Ausbreitungsb′.** The area to which a nerve or a blood-vessel is distributed. [K.]

BEZOAR, n. Be′zo-a^{3}r. From Ar., *bezard*, an antidote. [A, 325.] Lat., *bezoar, lapis bezoardicus.* Fr., *bézoard.* Ger., *Bezoar, Bezarstein.* It., *bezoardo, belzuar.* 1. A concretion found in the hollow viscera of various animals, formerly highly valued as a remedy against poisons, the plague, etc. Three principal varieties are recognized: *a.* Solid, stony, laminated concrements (*lapis b.* [seu *bezoariticus*]) found in the intestines of various animals. *b.* Round agglomerations of hair and vegetable fibre occurring in the stomach and intestines of various ruminants. *c.* Gall-stones from the gall-bladder of several animals. Chemically, nine varieties are distinguished, consisting respectively of calcium phosphate, magnesium phosphate, ammonium and magnesium phosphate, calcium oxalate, ellagic acid, lithofellic acid, ambergris, vegetable fibre, and hair. 2. By extension, any powerful antidote or prophylactic. [B, 2, 180.]—**Abendländischer B.** (Ger.), **American b.** See *B. occidentalis.*—**Affenb′** (Ger.). See *B. simiæ.*—**Animal b.** See *B. animale.*—**Argentine b.** See BEZOARDICUM *lunare.*—**B. animale.** Fr., *bézoard animal.* 1. See BEZOARDICUM *animale.* 2. A preparation made by calcining and levigating hartshorn and adding to it, drop by drop, enough sulphuric acid to make a paste; used as an alexipharmac, diaphoretic, and anthelminthic. [B, 200.]—**B′bock** (Ger.). See *B. goat.*—**B. bovinum, B. bovinus.** Fr., *bézoard de bœuf.* A b. found in the intestines of the ox. [B, 199.]—**B. caprinum.** A b. found in the intestine of the goat. [B, 199.]—**B. coromandelianus.** Ger., *coromandel′scher B., B. von Coromandel.* Syn.: *lapis bezoardicus de Coromandel.* A rounded, friable, inflammable concretion, of a peculiar aromatic odor, found in the intestine of the *Bos bubulus* or, according to the older writers, in the sea-horse (*Trichecus manatus* [Linnæus]). [B, 97, 180.]—**B. de Goa.** An artificial product made from musk and ambergris mixed with earth and made into balls with tragacanth. [B, 180.]—**B. equinum, B. equinus.** Fr., *bézoard de cheval.* A b. found in the intestine of the horse. [B, 88.]—**B′essig** (Ger.). See ACETUM *bezoardicum.*—**B. fossile.** See *B. minerale.*—**B′gazelle** (Ger.). The *Antilopus oryx.* [L, 43.]—**B. germanicum, B. germanicus.** Fr., *bézoard d′Allemagne.* Ger., *deutscher B., Gemskugeln.* Concretions of hair and vegetable fibre found in the stomach and intestines of the chamois and various domestic animals. [B, 2, 180.] See also ÆGAGROPILUS.—**B. goat.** Ger., *B′bock.* The goat or deer furnishing a b. [B, 200.]—**B. hominis.** See *B. microcosmi.*—**B. hystricinum, B. hystricis, B. hystricum.** Fr., *pierre de porc, bézoard de porc-épic.* Ger., *Schweinb′, Schweinstein.* Syn.: *lapis porcinus* (seu *porcarius*, seu *porci*, seu *hystricis*, seu *hystricinus*, seu *malacensis*). A gall-stone found in the porcupine (*Hystrix cristata*); a brownish-black, bitter, non-aromatic substance, of about the size of a small hen′s egg. [B, 180, 200.]—**B. lunare.** See BEZOARDICUM *lunare.*—**B. microcosmi, B. microcosmicum.** Fr., *bézoard humain.* A urinary calculus from the human subject. [B, 200.]—**B. minerale.** A mineral substance resembling a b.; a term applied especially to Sicilian earth (terra sicula). [B, 200.]—**B. occidentale, B. occidentalis.** Fr., *bézoard occidental.* Ger., *abendländischer B.* A stony concretion, varying in size, found in the intestines of the llama (*Auchenia lama* and *Auchenia vicuña*), blackish, grayish, or reddish externally, and composed of rather thick laminæ; devoid of taste and odor and consisting chiefly of calcium phosphate. [B, 2, 180.]—**B. of lead.** See *Bezoardicum* SATURNI.—**B. of the chamois, B. of the deer.** See *B. germanicum.*—**B. of the horse.** See *B. equinum.*—**B. of the Indian porcupine.** See *B. hystricinum.*—**B. of the monkey.** See *B. simiæ.*—**B. of the porcupine.** See *B. hystricinum.*—**B. orientale, B. orientalis.** Fr., *bézoard de gazelle.* Ger., *orientalischer* (oder *morgenländischer*) *B.* Syn.: *lapis bezoardicus orientalis.* A spherical or oval stony concretion obtained from the intestines of the gazelle (*Antilopus dorcas*), the *Capra œgragus*, and other ruminants; varying in size from that of a pea to that of a large apple; consisting of concentric layers of resinous matter; dark-brown to black externally; tasteless and odorless, but burning with an agreeable odor. It consists chiefly of either lithofellic or ellagic acid, and is still much valued in the East for its supposed medicinal properties. [B, 2, 180.]—**B. peruvianum.** See *B. occidentale.*—**B. porci.** See *B. hystricinum.*—**B. porci malaccense.** Ger., *Igelb′ aus Malacca.* A gall-stone supposed to be obtained from the Malacca hedgehog (*Erimaceus malaccensis*); reddish or dark-brown, varying in size from that of a cherry to that of a small apple, and having a horn-like lustre and a bitter, aromatic taste. [B, 180.]—**B. porcinum, B. porci zeylonicum.** See *B. hystricinum.*—**B. Saturni.** See *Bezoardicum* SATURNI.—**B. simiæ.** Fr., *bézoard de singe.* Ger., *Affenb′.* 1. A variety found in the stomach of certain apes; rare and considered very valuable. 2. The *lapis simiœ*; a round, hard, bone-like substance obtained from the common apes; according to some a cerebral, according to others a biliary, concretion. [B, 180.]—**B. stone.** Ger., *B′stein.* See *B.* (1st def. [*a*]).—**B′wurzel** (Ger.). See CONTRAYERVA.—**Coromandel b.** See *B. coromandelianus.*—**Deutscher B.** (Ger.). See *B. germanicus.*—**Eastern b.** See *B. orientale.*—**Factitious b.** Fr., *bézoar factice.* B. made artificially (*e. g.*, the b. de Goa). [B.]—**Fossil b.** See *B. minerale* (1st def.).—**German b.** See *B. germanicus.*—**Human b.** 1. A b. said (erroneously) to be derived from the intestine of man. [B, 199.] 2. See *B. microcosmi.*—**Lapis b.** See *B.* (1st def. [*a*]).—**Lapis b. occidentalis.** See *B. occidentale.*—**Lapis b. orientalis.** See *B. orientale.*—**Lapis b. peruvianus occidentalis.** See *B. occidentalis.*—**Lunar b.** See BEZOARDICUM *lunare.*—**Martial b.** See BEZOARDICUM *martiale.*—**Microcosmic b.** See *B. microcosmi.*—**Mineral b.** See BEZOARDICUM *minerale* and *B. minerale.*—**Monkey b.** See *B. simiæ.*—**Morgenländischer B.** (Ger.). See *B. orientale.*—**Occidental b.** See *B. occidentale.*—**Oriental b., Oriental b. stone.** See *B. orientale.*—**Ox b.** See *B. bovinum.*—**Porcupine b.** See *B. hystricinum.*—**Saturnine b.** See *Bezoardicum* SATURNI.—**Solar b.** See BEZOARDICUM *solare.*—**Vegetable b.** A stony concretion found in the cocoa-nut. [L, 43.]—**Western b.** See *B. occidentale.*

BEZOARD, n. Be′zo-a^{3}rd. See BEZOAR.

BÉZOARD (Fr.), n. Ba-zo-ar. See BEZOAR and BEZOARDICUM.—**B. animal.** See BEZOAR *animale.*—**B. d′ægagre.** See BEZOAR *orientale.*—**B. d′Allemagne.** See BEZOAR *germanicum.*—**B. de bœuf.** See BEZOAR *bovinum.*—**B. de cheval.** See BEZOAR *equinum.*—**B. de gazelle.** See BEZOAR *orientale.*—**B. de porc, B. de porc-épic.** See BEZOAR *hystricinum.*—**B. de Saturne.** See *Bezoardicum* SATURNI.—**B. de singe.** See BEZOAR *simiæ.*—**B. de Vénus.** See *Bezoardicum* VENERIS.—**B. factice.** See *Factitious* BEZOAR.—**B. fauve.** See BEZOAR *hystricinum.*—**B. germanique.** See BEZOAR *germanicum.*—**B. humain.** See BEZOAR *microcosmi.*—**B. jovial.** See ANTIHECTICUM *Poterii.*—**B. lunaire.** See BEZOARDICUM *lunare.*—**B. martial.** See ANTIMONIUM *diaphoreticum martiale.*—**B. mercuriel.** See BEZOARDICUM *mercuriale.*—**B. minéral.** See BEZOARDICUM *minerale.*—**B. noir rayonné.** See BEZOAR *hystricinum.*—**B. occidental.** See BEZOAR *occidentale.*—**B. oriental.** See BEZOAR *orientale.*—**B. solaire.** See BEZOARDICUM *solare.*

BEZOARDIC, adj. Be-zo-a^{3}rd′i^{2}k. Lat., *bezoardicus.* Fr., *bézoardique.* Ger., *bezoardisch.* Alexipharmac, antidotal. [B, 117.]—**B. acid.** Lat., *acidum bezoardicum.* An old name for uric acid. [B, 87.]

BEZOARDICUM (Lat.), n. n. Be^{2}z-o(o^2)-a^{3}rd′i^{2}k-u^{3}m(u^{4}m). See BEZOAR (1st and 2d def′s).—**B. animale.** Fr., *bézoard animal.* 1. An old antidote made from the dried hearts and livers of vipers. [B, 2, 200.] 2. See BEZOAR *animale.*—**B. antimoniale.** A preparation devised by Angelus Sala, consisting of powdered magisterium antimonii diaphoretici (antimonic acid) mixed with red coral, mother of pearl, calcined hartshorn, and the oils of cinnamon and cloves. [B, 59.]—**B. Curvi incompletum.** See *Decoctum* SCORZONERÆ *b.*—**B. humanum.** See BEZOAR *microcosmi.*—**B. joviale.** See ANTIHECTICUM *Poterii.*—**B. lunale, B. lunare.** Fr., *bézoard lunaire.* Argentine (or lunar) bezoar; a preparation made from nitrate of silver and antimony trichloride, formerly used for migraine, apoplexy, and convulsions, especially those of epilepsy. [B, 200.]—**B. martiale.** Fr., *bézoard martial.* See ANTIMONIUM *diaphoreticum martiale.*—**B. mercuriale.** Fr., *bézoard mercuriel.* An old preparation made from

the "mercurius vitæ" (antimony oxychloride), antimony trichloride, and nitric acid; used in venereal diseases. [B, 200.]—**B. minerale.** Fr., *bézoard minéral.* 1. The "mercurius vitæ correctus" of Sylvius; the product obtained by deflagrating powder of Algaroth with 3 parts of nitre, throwing the mixture into water, and washing. Another preparation known by the same name was made by repeatedly subliming antimony trichloride with nitric acid, washing the residue, and igniting with alcohol. [B, 200.] 2. See BEZOAR *minerale.*—**B. Saturni.** Fr., *bézoard de Saturne.* See under SATURNUS.—**B. solare.** Fr., *bézoard solaire.* An old preparation made by treating a solution of gold in nitrohydrochloric acid with antimony trichloride: a diaphoretic used in syphilis, gout, and obstruction of the spleen. [B, 200.]—**B. Veneris.** Fr., *bézoard de Vénus.* See under VENUS.

BEZOARDICUS (Lat.), adj. Be^{2}z-o(o^2)-a^{3}rd′i^{2}k-u^{3}s(u^{4}s). See BEZOARDIC.

BEZOARDUS (Lat.), n. m. Be^{2}z-o(o^2)-a^{3}rd′u^{3}s(u^{4}s). A name given by Good to the bezoar hominis. [L, 120.]

BEZOARIC, adj. Be-zo-a^{2}r′i^{2}k. See BEZOARDIC.—**B. acid.** Fr., *acide bézoarique.* Ellagic acid; so called because found in bezoars. [B, 2.]

BEZOARTIC, BEZOARTICAL, adj's. Be-zo-a^{3}rt′i^{2}k, -i^{2}k-a^{2}l. Lat., *bezoarticus.* See BEZOARDIC.

BEZOARTICUM (Lat.), n. n. Be^{2}z-o(o^2)-a^{3}rt′i^{2}k-u^{3}m(u^{4}m). See BEZOARDICUM.—**B. auratum** [A. Sala]. A mixture of magisterium auri, extract of vipers, stags' tears (*larmes de cerf*), etc. [B, 88.]—**B. martiale.** See ANTIMONIUM *diaphoreticum martiale.* —**B. mercuriale.** See BEZOARDICUM *mercuriale.*—**B. metallicum** [Béguin]. A preparation of precipitated gold oxide, used as a sudorific. [B, 88.]—**B. minerale.** See BEZOARDICUM *minerale.* —**B. Saturni.** See *Bezoardicum* SATURNI.—**B. solare.** See BEZOARDICUM *solare.*—**B. Veneris.** See *Bezoardicum* VENERIS.

BEZOARTICUS (Lat.), adj. Be^{2}z-o(o^2)-a^{3}rt′i^{2}k-u^{3}s(u^{4}s). See BEZOARDIC.

BEZUGO, n. A name given in the Philippines to vines, especially to certain species of *Hippocratea* and to the *Mimosa scandens.* [B, 121.] Cf. BEJUCO and BEXUCO.

BHÆTOCEREÆ (Lat.), n. f. pl. Be(ba^3-e^2)-to(to^2)-se^{2}r(ke^{2}r)′-e^2-e(a^3-e^2). A subfamily of the *Biddulphiaceæ* (*q. v.*). [B, 121.]

BHAIR (Hind.), n. The *Zizyphus jujuba.* [B, 172.]

BHAIRAH, n. The fruit of the *Terminalia bellerica.* ["Proc. of the Am. Pharm. Assoc.," xxvii, p. 233 (B).]

BHAKKATEIA, n. The *Solanum Jacquini.* [L, 105.]

BHAMBURDA, n. The *Blumea holoserica.* ["Proc. of the Am. Pharm. Assoc.," xxvii, p. 180 (B).]

BHANG (Hind.), n. Hasheesh; the leaves of the East Indian variety of *Cannabis sativa,* pounded into a pulp with water. ["Indian Med. Gaz.," Oct., 1885, p. 320; B, 5, 19, 172.]

BHANT (Bengal.), n. The *Clerodendron infortunatum.* [B, 172.]

BHARA, n. The *Morinda citrifolia.* ["Proc. of the Am. Pharm. Assoc.," xxiv, p, 719 (B).]

BHARANGI MUL, n. The *Clerodendrum serratum.* ["Proc. of the Am. Pharm. Assoc.," xxvii, p. 142 (B).]

BHARENDA (Hind.), n. The *Ricinus communis.* [B, 172.]

BHAR-JAMBOOL, n. The *Ammannia vesicatoria.* ["Proc. of the Am. Pharm. Assoc.," xxvii, p. 237 (B).]

BHAT-KATYA, n. See BHAKKATEIA.

BHEELA (Hind.), n. The *Semecarpus anacardium.* [B, 172.]

BHÊL, n. See ÆGLE *marmelos.*

BHELA, n. See BHEELA.

BHERBAND (Hind.), n. The *Argemone mexicana.* [B, 172.]

BHILANA, n. The fruit of the *Semecarpus anacardium.* ["Proc. of the Am. Pharm. Assoc.," xxvi, p. 167 (B).]

BHIMB (Hind.), n. The *Coccinia indica.* [B, 172.]

BHINDA-TORI (Hind.). n. The *Abelmoschus esculentus.* [B, 172.]

BHOKAR, n. The fruit of the *Cordia myxa.* ["Proc. of the Am. Pharm. Assoc.," xxviii, p. 129 (B).]

BHOOCOKRA (Hind.), n. The *Zapania nodiflora.* [B, 172.]

BHOOE-KOMRA (Hind.), n. The *Trichosanthes cordata.* [B, 172.]

BHOOI-JAMBA (Bengal.), n. The *Premna herbacea.* [B, 172.]

BHOOIN-KOOMRA (Bengal., Hind.), n. The *Ipomœa digitata.* [B, 172.]

BHOORAR (Hind.), n. The *Rhizophora mangle.* [B, 172.]

BHOORI-CHUMPA (Bengal., Hind.), **BHUCHAMPA** (Hind.), n's. The *Kaempfera rotunda.* [B, 172.]

BHUI AMLA, n. The *Phyllanthus Niruri.* ["Proc. of the Am. Pharm. Assoc.," xxviii, p. 194 (B).]

BHUI-KOHALA, n. The *Ipomœa digitata.* ["Proc. of the Am. Pharm. Assoc.," xxviii, p. 131 (B).]

BHUI-PATR, n. The *Betula bhojpattra.* ["Proc. of the Am. Pharm. Assoc.," xxviii, p. 198 (B).]

BHULLES (Ar.), n. The *Salix alba.* [L, 105.]

BHUNGIE (Hind.), n. The *Carchorus obitarius.* [B, 172.]

BHU-RINGNI. The *Solanum Jacquini.* ["Proc. of the Am. Pharm. Assoc.," xxviii, p. 120 (B).]

BHURJA PATRA, n. See BHUI-PATR.

BIA (Lat.), n. f. Bi(bi^2)′a^3. Gr., *βία.* Force. [L, 94.]

BIACCA (It.), n. Be-a^{3}k′ka^3. White lead; basic carbonate of lead. [B.]

BIACIDE (Fr.), adj. Be-a^3-sed. See DIACID.

BI-ACROMIAL (Fr.), adj. Be-a^3-krom-i^2-a^{3}l. See BIS-ACROMIAL.

BIACUMINATE, adj. Bi-a^{2}k-u^{2}m′i^{2}n-at. Lat., *biacuminatus* (from *bis,* twice, and *acuminatus,* pointed). Fr., *biacuminé.* Having two pointed extremities diverging from each other. [B, 19.]

BIACURU, n. A Brazilian name for the *Statice brasiliensis.* [B, 81.]

BIAIGUILLONÉ (Fr.), adj. Be-e^2-gwel-yo^{2}n-a. Having two stings or spines (said of fishes). [L, 41.]

BI-AILÉ (Fr.), adj. Be-a(e^2)-la. See BI-ALATE.

BI-AILES (Fr.), n. pl. Be-e^{2}l. See DIPTERA.

BIAK-MONDO, n. The *Ophiopogon japonicus.* ["Proc. of the Am. Pharm. Assoc." (L).]

BIAKOO-BOOKUNG, n. The *Roxburghia sessilifolia.* ["Proc. of the Am. Pharm. Assoc.," xxviii, p. 110 (L).]

BIAK-TAU-KAH, n. The *Amygdalus persica.* ["Proc. of the Am. Pharm. Assoc.," xxviii, p. 29 (L).]

BIAKOU-SITZOU (Jap.), **BIAKU-JUTZU** (Jap.), **BIAK-YITZ** (Jap.), n's. See ATRACTYLIS *ovata.*

BI-ALATE, adj. Bi-a′lat. From *bis,* twice, and *ala,* a wing. Fr., *bi-ailé.* Ger., *zweiflügelig.* It., *bialato.* Having two alæ, or wings. [B, 121.]

BI-ALUMINIQUE (Fr.), adj. Be-a^{3}l-u^{6}m-i^{2}n-ek. A term applied to a salt of aluminium containing in the binary notation two equivalents of alumina combined with one equivalent of acid. [B, 38.]

BI-AMMONIACAL (Fr.), adj. Bi-a^{2}m-mo^{2}n-i′a^{2}k-a^{2}l. Containing two molecules of ammonia or ammonium; or containing two equivalents of ammonium combined with one exuivalent of another radicle. [B.]

BIANA (Sp.), n. Be-a^3′na^3. A place near Puebla de Sanabria, in the province of Galicia, Spain, where there are mineral springs. [L, 105.]

BIANCHETTI, n. See TUBER *album.*

BIANCO (It.), n. Be-a^{3}n^2′ko. Whiting. [B.]—**B. di balena.** Spermaceti. [L, 77.]—**B. fisso.** See BLANC *fixe.*

BI-ANGULATE, adj. Bi-a^{2}n^2′gu^2-lat. Lat., *biangulatus* (from *bis,* twice, and *angulus,* an angle). Fr., *bi-angulé.* Having two angles. [B, 1.]

BI-ANGULATED, adj. Bi-a^{2}n^2′gu^2-lat-e^{2}d. See BI-ANGULATE. —**B.-quadriradiate.** Having two radii projected from a common base in one plane and two others projected in a similar manner in a plane at right angles to the first plane. [L, 232.]

BI-ANGULOUS, adj. Bi-a^{2}n^2′gu^2-lu^{3}s. See BI-ANGULATE.

BI-ANTHERIFEROUS, adj. Bi-a^{2}n-the^{2}r-i^{2}f′e^{2}r-u^{3}s. From *bis,* twice, *anthera,* an anther, and *ferre,* to bear. Fr., *bi-anthérifère.* Bearing two anthers. [B, 121.]

BI-ANTIMONATE, BI-ANTIMONIATE, n's. Bi-a^{2}n-ti^{2}m′-o^{2}n-at, -a^{2}n-ti^2-mo′ni^2-at. An acid antimonate. [B.] See ANTIMONATE.

BI-AORTE (Fr.), adj. Be-a^3-ort. Having a double aorta. [Bouillaud (D, 87).]

BI-APICULATE, adj. Bi-a^{2}p-i^{2}k′u^2-lat. From *bis,* twice, and *apiculum* (*q. v.*). Fr., *biapiculé.* Having two summits. [B, 38.]

BIARGHETUNSIM, n. An alchemical name for cerussa. [Ruland (A, 325).]

BIARINÆ [Schott.] (Lat.), n. f. pl. Bi(bi^2)-a^{2}r(a^{3}r)-i(e)′ne(na^3-e^2). Fr., *biarinées.* Of Schott and Engler, a subtribe of araceous plants, including the single genus *Biarum.* [B, 216.]

BIARISTATUS (Lat.), adj. Bi(bi^2)-a^{2}r(a^{3}r)-i^{2}s-ta(ta^3)′tu^{3}s(tu^{4}s). From *bis,* twice, an *aristatus* (see ARISTATE). Fr., *biaristé.* Provided with two awns or bodies resembling awns. [B, 198.]

BIARO, n. The stalk of the *Nymphæa lotus.* [B, 121.]

BIARON, n. According to Bory, Dioscorides's name for the *Arum dracunculus.* [B, 88, 121.]

BIARRITZ (Fr.), n. Be-a^{3}r-ri^{2}tz. A sea-bathing resort on the Bay of Biscay, near the Spanish frontier. [L. Perl (A, 319).]

BI-ARSENATE, n. Bi-a^{3}r′se^{2}n-at. Fr., *biarséniate.* A dihydric arsenate. [B.] See ARSENATE.

BI-ARTICULATE, adj. Bi-a^{3}r-ti^{2}k′u^2-lat. Lat., *biarticulatus* (from *bis,* twice, and *articulus* [*q. v.*]). Fr., *biarticulé.* Doubly jointed; having two joints. [B.]

BIARUM (Lat.), n. n. Bi(bi^2)-a(a^3)′ru^{3}m(ru^{4}m). Of Schott, a genus of araceous plants, by Bentham and Hooker referred to the tribe *Arineæ,* subtribe *Euarineæ,* distinguished from the related genera by its entire leaves, its one-ovuled ovary, and the connate margins of the spathe. [B, 42.]

BI-ATOMIC, adj. Bi-a^{2}t-o^{2}m′i^{2}k. Fr., *bi-atomique.* See DIATOMIC. [B.]

BIATOREÆ [Trevisan], **BIATORINÆ** [Körber] (Lat.), n's f. pl. Bi(bi^2)-a^{2}t(a^{3}t)-or(o^{2}r)′e^2-e(a^3-e^2), -o^{2}r-i(e)′ne(na^3-e^2). From *Biatora,* one of the genera. A subfamily or subtribe of lichens (*Lecideæ*). [B, 170.]

BIATORINE, adj. Bi-a^{2}t′o-ri^{2}n. Resembling the genus *Biatora* (said of certain black patelliform varieties of apothecia in lichens). [B, 121.]

BIAURA (Lat.), n. f. Bi(bi^2)-a^{4}r′(a^3′u^{4}r)-a^3. See Biotaura.

BIAURICULATE, adj. Bi-a^{4}r-i^{2}k′u^2-lat. From *bis,* twice, and *auricula* (*q. v.*). Fr., *biauriculé.* 1. Having two auricles (said of the heart). 2. In botany, having two small ear-like projections at the base of a leaf. [B ; L, 56.]

BIAURITE, adj. Bi-a^{4}r′it. Lat., *biauritus* (from *bis,* twice, and *auris,* the ear). Having two ears or ear-like processes. [B, 19.]

BIAXIAL, adj. Bi-a^{2}x′i^2-a^{2}l. From *bis,* twice, and *axis* (*q. v.*). Fr., *biaxial, biaxifère.* Having two axes ; especially, of crystals, having two optical axes. [B, 3.]

BIBACIER (Fr.), n. Be-ba^{3}s-i^2-a. The *Eriobotrya japonica.* [B, 121.]

BIBAI-KAND, n. The *Ipomœa digitata.* [B.]

BIBASIC, adj. Bi-bas′i^{2}k. Lat., *bibasicus.* Fr., *bibasique.* Ger., *bibasisch.* It., *bibasico.* Sp., *bibásico.* See Dibasic.

BIBASSIER (Fr.), n. Be-ba^{3}s-si^2-a. See Bibacier.

BIBBY, n. See Bibry.

BIBECH, n. See Bex.

BIBENELLA, n. See Pimpinella.

BIBENZAMIDE, n. Bi-be^{2}nz′a^{2}m-i^{2}d(id). See Benzimide.

BIBER (Ger.), n. Be′be^{2}r. The beaver. [B.]—**B'baum.** The *Magnolia.* [L, 30.]—**B'geil.** See the major list.—**B'klee.** The *Menyanthes trifoliata.* [B, 180.]—**B'kraut.** The herb of the *Erythræa centaurium.* [B, 180.]—**B'wurzel.** The root of *Aristolochia clematitis.* [B, 180.]—**Gemeiner B.** The *Castor fiber.* [B, 180.]—**Grossblumiger B'baum.** The *Magnolia grandiflora.* [L, 46.]

BIBERGEIL (Ger.), n. Be′be^{2}r-gil. Castoreum. [B.]—**Aetherische B'tinctur.** See *Tinctura* castorei *ætherea.*—**Amerikanisches B.** The American castor (*Castoreum canadense*). [B, 180.]—**B'essenz.** See *Tinctura* castorei.—**B'fett.** See Axungia *castorei.*—**B'geist.** See *Tinctura* castorei.—**B'harz.** The resinous substance found in castor. [B, 48.]—**B'öl.** See *Oleum* castorei.—**B'sack.** The sac containing castoreum. [L, 30.]—**B'tinctur.** See *Tinctura* castorei.—**Canadisches B., Englisches B.** See *Amerikanisches B.*—**Moskowitisches B., Russisches B., Sibirisches B.** Russian castor (*castoreum sibiricum*). [B, 180.]

BIBERINE, n. Bi^2-ber′en. See Beberine.

BIBERNELL (Ger.), n. Be-be^{2}rn-e^{2}l′. See Pimpinella.—**B'tinctur** [Ger. Ph.]. See *Tinctura* pimpinellæ [Ger. Ph.].—**B'wurzel** [Ger. Ph.]. The rhizome and rootlets of the *Pimpinella saxifraga* and *Pimpinella magna.* [B, 205.]—**Falsche B.** The *Sanguisorba officinalis.* [B, 180.]—**Gemeine B.** The *Pimpinella saxifraga.* [B.]—**Grosse B.** 1. The *Sanguisorba officinalis.* 2. The *Pimpinella magna.* [B, 148.]—**Kleine B.** 1. The *Pimpinella saxifraga* and its root. 2. The *Poterium sanguisorba.* [B, 48, 180.]—**Schwarze B.** The root of the *Pimpinella magna.* [B, 180.]—**Weisse. B.** The *Pimpinella saxifraga.* [B, 180.]—**Welsche B.** The *Sanguisorba officinalis.* [B, 180.]

BIBERNELLE (Fr.), n. Be-be^{2}rn-e^{2}l. See Pimpinella.

BIBERON (Fr.), n. Be-be^{2}r-o^{2}n^2. A nursing-bottle. [L, 49.]

BIBILEN, n. A Thibet name for the *Piper longum.* [B, 121.]

BIBILIS (Lat.), adj. Bi^{2}b′i^{2}l-i^{2}s. Potable. [Cælius Aurelianus (A, 318).]

BIBINELLA (Lat.), n. f. Bi^{2}b-i^{2}n-e^{2}l′la^3. A section of the genus *Plantago.* [B, 121.]

BIBIONIDÆ [Macquart] (Lat.), n. f. pl. Bi^{2}b-i^2-o^{2}n′i^{2}d-e(a^3-e^2). A group of dipterous insects. [L, 292.]

BIBIRINA (Lat.), n. f. Bi^{2}b-i^{2}r-i(e)′na^3. See Beberine.—**Bibirinæ sulphas.** See Beberine *sulphate.*

BIBIRINE, n. Bi^{2}b-i^{2}r′en. See Beberine.

BIBIRU, n. See Bebeeru.—**Cortex b.** Ger., *B'rinde.* The bark of *Nectandra Rodiœi.* [B, 81.]

BIBITORIUS (Lat.), adj. Bi^{2}b-i^{2}t-o′ri^2-u^{3}s(u^{4}s). From *bibitor,* a toper. Pertaining to drunkenness ; as a n., the internal rectus muscle of the eye, so called from the habit acquired by topers of adducting the eyes to look into the glass. [Bartholin (A, 325) ; L, 30, 84, 94, 109.]

BIBLITES (Lat.), n. m. pl. Bi^{2}b-li(le)′tez(te^{2}s). A group of the *Lepidoptera,* made by Blanchard. [L, 208.]

BIBO, n. The *Semecarpus anacardium.* [B.]

BIBORAS (Lat.), n. m. Bi(bi^2)-bo′ra^{2}s(ra^{3}s). See Pyroborate. [B.]—**B. natricus.** Borax. [B.]

BIBORATE, n. Bi-bo′rat. Lat., *biboras.* Fr., *biborate.* Ger., *doppeltborsaures Salz.* It., Sp., *biborato.* See Pyroborate.

BIBORATED, adj. Bi-bo′rat-e^{2}d. Lat., *biboricus.* Converted into a biborate (pyroborate) ; combined with pyroboric acid. [B.]

BIBOSSU (Fr.), adj. Be-bo^{2}s-su^6. Having two bosses or two boss-like eminences. [L, 41.]

BIBRA (Ger.), n. Be′bra^3. A small town of Prussia, in the vicinity of Naumburg, where there are two mineral springs (the *Stahlquelle,* containing potassium sulphate, sodium carbonate and chloride, calcium sulphate and carbonate, strontium, magnesium carbonate, aluminium phosphate, manganese carbonate, iron carbonate, silicic acid, nitrogenous organic matter, and traces of arsenic and fluorine ; and the *Schwesternquelle,* containing potassium sulphate, sodium chloride, magnesium chloride and carbonate, calcium sulphate and carbonate, strontium carbonate, manganese carbonate, basic iron phosphate, silicic acid, and organic matter). The waters are drank and used as baths. [A, 319.]

BIBRACTEATE, adj. Bi-bra^{2}k′te-at. Lat., *bibracteatus.* Having two bracts. [B.]

BIBRACTEOLATE, adj. Bi-bra^{2}k′te-ol-at. Lat., *bibracteolatus.* Fr., *bibractéolé.* Having two bracteoles. [B, 121.]

BIBRACTEUS (Lat.), adj. Bi(bi^2)-bra^{2}k(bra^{3}k)′te^2-u^{3}s(u^{4}s). See Bibracteate.

BIBRANCHIÉ (Fr.), adj. Be-bra^{3}n^2-ki^2-a. Having branchiæ on each side of the body. [L, 41.]

BIBREUIL (Fr.), n. Be-bru^5-el. The *Heracleum sphondylium.* [B, 12.]

BIBROMAMYLENE, n. Bi-brom-a^{2}m′i^{2}l-en. For this word and others in *Bibrom-,* not here given, see the corresponding words in *Dibrom-.*

BIBROMÉ (Fr.), adj. Be-brom-a. Containing or combined with two atoms of bromine. [B.]

BIBROMIDE, n. Bi-brom′i^{2}d(id). Lat., *bibromidum.* Fr., *bibromure.* A compound of bromine with another element or a radicle, and containing, with reference to that radicle or element, twice as much bromine as another similar compound, existing or supposed to exist. [B.]

BIBRY, n. An American species of palm, furnishing a liquor called *bibby.* [B, 121.]

BIBULOUS, adj. Bi^{2}b′u^2-lu^{3}s. Lat., *bibulus* (from *bibere,* to drink). Fr., *spongieux.* Ger., *aufsaugend.* Absorbent. See *B.* paper and Lapis *bibulus.*

BICA, n. A terebinthaceous tree of the Argentine Republic, which furnishes a sweetish, translucent, reddish gum-resin resembling gum arabic in appearance. [B, 121.]

BICAHYBA BALSAM, n. See Becuiba *tallow.* [B, 180.]

BICALCARATE, adj. Bi-ka^{2}l-ka′rat. Lat., *bicalcaratus* (from *bis,* doubly, and *calcar,* a spur). Fr., *bi-éperonné.* Having two spurs or spur-like processes. [L, 180.]

BICALCIC, adj. Bi-ka^{2}l′si^{2}k. Lat., *bicalcicus.* Fr., *bicalcique.* It., *bicalcico.* Sp., *bicálcico.* See Dicalcic.

BICALLOSE, BICALLOUS, adj's. Bi-ka^{2}l′los, -lu^{3}s. Lat., *bicallosus* (from *bis,* doubly, and *callosus,* callous). Fr., *bicalleux.* In botany, having two callous prominences. [B, 19.]

BICAPITATE, adj. Bi-ka^{2}p′i^{2}t-at. Lat., *bicapitatus* (from *bis,* doubly, and *caput,* a head). Having two heads. [B, 121.]

BICAPSULAR, adj. Bi-ka^{2}p′su^{2}l-a^{3}r. Lat., *bicapsularis* (from *bis,* doubly, and *capsula,* a capsule). Fr., *bicapsulaire.* Ger., *zweifächerig.* Composed of or dividing into two capsules (said of a fruit). [B, 1, 121.]

BICARBONAS (Lat.), n. m. Bi(bi^2)-ka^{3}rb-o′na^{2}s(na^{3}s). Gen., *bicarbona′tis.* See Bicarbonate.—**B. kalicus.** Potassium bicarbonate. [B.]—**B. natricus.** Sodic bicarbonate. [B.] See *B. sodicus.*—**B. potassicus** [Fr. Cod.]. Fr., *bicarbonate de potasse.* Bicarbonate of potassium. [B.]—**B. sodicus.** Bicarbonate of sodium. [B.]—**Tabellæ cum bicarbonate sodico** [Fr. Cod.]. Fr., *tablettes de bicarbonate de soude.* See *Trochisci* sodii *bicarbonatis.*

BICARBONATE, n. Bi-ka^{3}rb′o^{2}n-at. Lat., *bicarbonas.* Ger., *doppeltkohlensaures Salz.* It., Sp., *bicarbonato.* An acid carbonate ; so called because, with reference to the base with which the carbonic acid is united, it contains twice as much of the carbonic acid radicle as the corresponding normal carbonates. [B.]

BICARBONÉ (Fr.), adj. Be-ka^{3}rb-on-a. Containing two atoms of carbon ; doubly compounded with carbon. [B, 38.]

BICARBONICUS (Lat.), adj. Bi(bi^2)-ka^{3}rb-o^{2}n′i^{2}k-u^{3}s(u^{4}s). Fr., *bicarbonique.* Ger., *doppeltkohlensauer.* Containing a double quantity of carbonic acid ; with the name of a base, the bicarbonate (acid carbonate) of that base. [B.]

BICARBURE (Fr.), n. Be-ka^{3}rb-u^{6}r. That one of a series of similar carbides which contains twice as much carbon in proportion to the associated element or radicle as the first member of the series. [B.]

BICARDIE (Fr.), n. Be-ka^{3}rd-e. The existence of two hearts in the same individual. [L, 41.]

BICARÉNÉ (Fr.), adj. Be-ka^{3}r-a-na. See Bicarinate.

BICARÉNURE (Fr.), n. Be-ka^{3}r-an-u^{6}r. The existence at the same time of two keel-like processes. [L, 41.]

BICARINATE, adj. Bi-ka^{2}r′i^{2}n-at. Lat., *bicarinatus* (from *bis,* doubly, and *carinatus,* keel-shaped). Fr., *bicaréné, bicariné.* Ger., *doppeltkahnförmig.* 1. Having two keel-like processes. 2. In botany, of a pale of grass, having two elevated ribs placed nearer the border than the centre or equidistant from the border and the centre. [B.]

BICARPIÆ (Lat.), n. f. pl. Bi(bi^2)-ka^{3}rp′i^2-e(a^3-e^2). Of Tulasne, a group of the *Podostemaceæ,* including the genus *Weddellina.* [B, 121.]

BICAUDAL, adj. Bi-ka^{4}d′a^{2}l. Lat., *bicaudalis* (from *bis,* doubly, and *cauda,* a tail). Fr., *bicaudé, bicaudal.* Ger., *zweischwänzig.* Having two tails or tail-like appendages (said of a muscle). [L, 42, 56.]

BICAUDALIS (Lat.), adj. Bi(bi^2)-ka^{4}d(ka^3-u^{2}d)-a(a^3)′li^{2}s. See Bicaudal.—**B. intricalis, B. muscularis.** The abductor auris muscle. [L, 97.]

BICAUDATE, adj. Bi-ka^{4}d′at. Lat., *bicaudatus.* Fr., *bicaudé.* See Bicaudal.

BICAYBA, n. A Brazilian name for the *Myristica bicuhyba.* [B, 121.] See Becuiba.

BICCO, BICCHO, n's. See Bicho.

BICENNA, n. See Albizzia.

BICÉPHALE (Fr.), adj. Be-sa-fa^{3}l. See Dicephalous.

BICÉPHALIE (Fr.), **BICÉPHALITÉ** (Fr.), n's. Be-sa-fa^{3}l-e, -e-ta. See DICEPHALIA.

BICEPHALUS (Lat.), adj. Bi(bi^2)-se^{2}f(ke^{2}f)'a^3-lu^{3}s(lu^{4}s). Fr., *bicéphale.* Ger., *bicephalisch, zweiköpfig.* It., *bicefalo.* See DICEPHALOUS and DICEPHALUS.

BICEPS (Lat.), adj. Bi(bi^2)'se^{2}ps(ke^{2}ps). Gen., *bicip'itis.* From *bis*, twice, and *caput*, a head. Gr., δικέφαλος. Fr., *biceps.* Ger., *zweiköpfig.* It., *bicipite.* Having two heads or origins (said of a muscle). [L, 56.]—**B. anconæus.** See ANCONÆUS (3d def.).—**B. brachial** (Fr.). See *B.* FLEXOR *cubiti.*—**B. brachialis** [E. Coues], **B. brachii.** See *B.* FLEXOR *cubiti.*—**B. crural** (Fr.), **B. cruris.** See *B.* FLEXOR *cruris.*—**B. cubiti.** See *B.* FLEXOR *cubiti.*—**B. cubiti externus.** The middle and external heads of the triceps muscle of the arm, regarded as one muscle. [L, 30.]—**B. de la jambe** (Fr.). See *B.* FLEXOR *cruris.*—**B. du bras** (Fr.). See *B.* FLEXOR *cubiti.*—**B. extensor.** See *Triceps* EXTENSOR *cubiti.*—**B. externus.** A name given by Douglas to the external and middle heads of the triceps extensor cubiti. [L.] See ANCONÆUS *longus.*—**B. fémoral** (Fr.), **B. femoris.** See *B.* FLEXOR *cruris.*—**B. flexor cruris, B. flexor cubiti.** See under FLEXOR.—**B. huméral** (Fr.), **B. humeri, B. internus, B. internus humeri, B. internus manus, B. manus.** See *B.* FLEXOR *cubiti.*

BICERCLÉ (Fr.), adj. Be-se^{2}r-kla. See BICINGULATUS.

BICH (Hind.), n. See BISH.

BICHET (Fr.), n. Be-sha. The *Bixa orellana.* [B, 121, 173.]

BICHICHIÆ (Lat.), n. f. pl. Bi^{2}k(bech^2)-i^{2}k(i^{2}ch^2)'i^2-e(a^3-e^2). The name of certain pectoral pills or troches described by Rhazes, containing licorice-juice, sugar, starch, tragacanth, blanched almonds, and mucilage of quince-seeds. [A, 325.]

BICHITTRIE (Bengal.). The *Trugia involucrata.* [B, 172.]

BICHLORACÉTIQUE (Fr.), adj. Be-klor-a^3-sat-ek. See DICHLORACETIC *acid.*

BICHLORALLYLENE, n. Bi-klor-a^{2}l'li^{2}l-en. For this and other words in *Bichlor-*, not here given, see the corresponding words in *Dichlor-*.

BICHLORATUS (Lat.), adj. Bi(bi^2)-klor(ch^{2}lor)-a(a^3)'tu^{3}s(tu^{4}s). Doubly combined with chlorine; forming a bichloride [Ger. Ph.]. [B.]

BICHLORÉ (Fr.), adj. Be-klor-a. Bichlorinated; containing or combined with two atoms of chlorine. [B.]

BICHLORETHER, n. Bi-klor-e'thu^{5}r. Ger., *Bichloräther.* See DICHLORETHER.

BICHLORIDE, n. Bi-klor'i^{2}d(id). Lat., *bichloruretum, bichloridum.* Fr., *bichlorure.* Ger., *Bichlorid.* It., Sp., *bicloruro.* That one of a series of similar chlorides which contains twice as much chlorine in proportion to the combining radicle as the protochloride, or first member of the series. [B.] Cf. DICHLORIDE.

BICHLORINATED, adj. Bi-klor'i^{2}n-at-e^{2}d. Lat., *bichloratus.* Fr., *bichloré.* Containing or combined with two atoms of chlorine. [B.]

BICHLOROSALICYLIQUE (Fr.), adj. Be-klo-ro-sa^{3}l-i-si^{2}l-ek. See DICHLORSALICYLIC ACID.

BICHLORURE (Fr.), n. Be-klor-u^{6}r. See BICHLORIDE.

BICHO, n. 1. See BEX. 2. A Brazilian name for the *Sarcopsylla* (*Pulex*) *penetrans*, also for a certain gangrenous affection of the rectum. [A, 385; G, 16; L.]

BICHROMAS (Lat.), n. m. Bi(bi^2)-krom(ch^{2}rom)'a^{2}s(a^{3}s). Gen., *bichroma'tis.* See DICHROMATE.—**B. ammonicus** [Fr. Cod.]. Fr., *bichromate d'ammoniaque.* See AMMONIUM *dichromate.*—**B. kalicus, B. potassicus** [Fr. Cod.]. Fr., *bichromate de potasse.* See POTASSIUM *dichromate.*

BICHROMATE, n. Bi-krom'at. Lat., *bichromas.* Fr., *bichromate.* Ger., *Bichromat.* It., Sp., *bicromato.* See DICHROMATE.

BICHROMICUS (Lat.), adj. Bi(bi^2)-krom(ch^{2}rom)'i^{2}k-u^{3}s(u^{4}s). Dichromic; with the name of a base, the dichromate of that base. [B.]

BICHUA (Hind.), n. The *Crotalaria juncea.* [B, 172.]

BICINCTUS, BICINGULATUS (Lat.), adj's. Bi(bi^2)-si^{2}n^{2}k-(ki^{2}n^{2}k)'tu^{3}s(tu^{4}s), -si^{2}ng(ki^{2}ng)-gu^2(gu^4)-la(la^3)'tu^{3}s(tu^{4}s). From *bis*, doubly, and *cingere*, to gird, or *cingulum*, a girdle. Fr., *bicerclé.* Having two rays or elevations in the shape of circles. [L, 180.]

BICIPITAL, adj. Bi-si^{2}p'i^{2}t-a^{2}l. Lat., *biceps.* Fr., *biceps, bicipital.* Ger., *zweiköpfig.* It., *bicipitale.* Sp., *bicipital.* 1. double-headed. [L, 41.] 2. Pertaining to a biceps muscle, especially the biceps flexor cubiti. [A, 385.] See *B.* GROOVE and *B.* TUBEROSITY.

BICIPITÉ (Fr.), adj. Be-si^{2}p-i^{2}t-a. See BICAPITATE.

BICIPITOSUS [E. Coues] (Lat.), adj. Bi(bi^2)-si^{2}p(ki^{2}p)-i^{2}t-o'-su^{3}s(su^{4}s). Bicipital; as a n., a biceps muscle, especially the biceps flexor cruris. [L.]

BICIPITOUS, adj. Bi-si^{2}p'i^{2}t-u^{3}s. See BICIPITAL.

BICK, n. See BISH.

BICKBEEREN (Ger.), **BICKELBEEREN** (Ger.), n's pl. Bi^{2}k'bar-e^{2}n, -e^{2}l-bar-e^{2}n. See *Fructus* MYRTILLI.

BICLAVATE, adj. Bi-klav'at. Lat., *biclavatus* (from *bis*, doubly, and *clava*, a club). Fr., *biclavé.* Having a club-shaped process at each end. [L, 41, 232.]—**B.-bihamate.** Having the two club-shaped extremities bent toward each other. [L, 232.]—**B.-cylindrical.** Cylindrical and with club-shaped extremities. [L, 232.]

BICLOSO, n. A Languedoc name for the *Anchusa officinalis.* [B, 121.]

BICOCCUS (Lat.), adj. Bi(bi^2)-ko^{2}k'ku^{3}s(ku^{4}s). Fr., *bicoque.* Provided with or consisting of two cocci (said of fruits). [B, 1.]

BICOLLIGATE, adj. Bi-ko^{2}l'li^{2}g-at. From *bis*, twice, and *colligere*, to collect. Fr., *bicolligé.* 1. Connected together (said of two adjacent parts, *e. g.*, the two anterior toes of certain birds). [L, 56, 108.] 2. Collected into two bundles. [L, 41.]

BICOLOR (Lat.), adj. Bi(bi^2)'kol(ko^{2}l)-o^{2}r. Fr., *bicolore.* Ger., *zweifarbig.* Bicolored; of two colors. [B.]

BICOLORIN, n. Bi-ko^{2}l'o^{2}r-i^{2}n. Fr., *bicolorine.* Ger., *Bicolorin.* A white powder, $C_{16}H_9O_{10}$, insoluble in alcohol and in ether, obtained by Trommsdorff from the bark of the *Æsculus hippocastanum*; the cause, according to him, of the fluorescence of infusions of that bark and other vegetable substances. [A, 301.] Cf. ÆSCULIN.

BICOMIS (Lat.), adj. Bi(bi^2)'kom(ko^{2}m)-i^{2}s. From *bis*, twice, and *coma* (= κόμη), the hair of the head.

BICONCAVE, adj. Bi-ko^{2}n'kav. From *bis*, twice, and *concavus*, concave. Fr., *biconcave.* Ger., *zweiseitig-concav.* Doubly concave; concave on two opposite sides. [A, 385; B.]

BICONGIUS (Lat.), n. m. Bi(bi^2)-ko^{2}n(ko^{2}n^2)'ji^2(gi^2)-u^{3}s(u^{4}s). An old measure of about two gallons. [L, 94.]

BICONJUGATE, adj. Bi-ko^{2}n'ju^2-gat. Lat., *biconjugatus* (from *bis*, twice, and *conjugare* [= *conjungere*], to join together). Fr., *biconjugué.* Having two secondary petioles, each bearing two leaflets (said of a compound leaf). [B, 1, 121.]

BICONJUGATO-PINNATE, adj. Bi-ko^{2}n-ju^2-ga''to-pi^{2}n'nat. For deriv., see BICONJUGATE and PINNATE. Lat., *biconjugato-pinnatus.* Having two secondary petioles, each bearing a pinnate leaflet (said of a compound leaf). [B, 1.]

BICONTORTED, adj. Bi-ko^{2}n-to^{2}rt'e^{2}d. Lat., *bicontortus* (from *bis*, twice, and *contorquere*, to twist). Fr., *bicontourné.* Twisted upon itself twice. [B, 121; L, 109.]

BICONVEX, adj. Bi-ko^{2}n've^{2}x. From *bis*, twice, and *convexus*, convex. Fr., *biconvexe.* Ger., *zweiseitig-convex.* Doubly convex; convex on two opposite sides. [A, 385; B.]

BICOQUE (Fr.), adj. Be-kok. See BICOCCUS.

BICORDATUS (Lat.), adj. Bi(bi^2)-ko^{2}rd-a(a^3)'tu^{3}s(tu^{4}s). From *bis*, doubly, and *cor*, the heart. Fr., *bicordé.* Having two heart-shaped notches. [L, 180.]

BICORN, BICORNATE, adj's. Bi'ko^{2}rn, -ko^{2}rn'at. See BICORNIS.

BICORNE (Fr.), adj. Be-korn. See BICORNIS; as a n., the *Martynia angulosa.* [B, 173.]—**B. hérissé, B. rude.** The *Ditrachyseras rudis.* [Lamarck (L, 18).]

BICORNED, adj. Bi'ko^{2}rnd. See BICORNIS.

BICORNES (Lat.), n., f. pl. of adj. *bicornis* (*q. v.*). Bi(bi^2)-ko^{2}rn'ez(as). 1. Of Linnæus, an order of plants, including *Ledum, Azalea, Andromeda, Erica, Myrsine, Vaccinium, Arbutus,* etc., now referred to the *Ericaceæ* and *Myrsinaceæ.* 2. Of Endlicher, a class of the *Gamopetali* (*Acramphibrya*), comprising the orders *Epacrideæ, Ericaceæ, Diapensiaceæ, Pyrolaceæ,* and *Monotropeæ.* 3. Of Klotzsch, a class of plants, comprising the orders *Ericaceæ, Siphonandraceæ, Menziesiaceæ, Rhodoraceæ, Clethraceæ,* and *Hypopithieæ.* The term is applied on account of the two-horned anthers of many of the genera. [B. 170.] Cf. ERICACEÆ.

BICORNIS (Lat.), adj. Bi(bi^2)-ko^{2}rn'i^{2}s. From *bis*, twice, and *cornu*, a horn. Fr., *bicorne.* Ger., *zweihörnig.* Having ending in, or consisting of, two horns or horn-like eminences. [B, 121, 198; L, 180.]

BICORNOUS, adj. Bi-ko^{2}rn'u^{3}s. See BICORNIS.

BICORNU (Fr.), adj. Be-korn-u^6. See BICORNIS.

BICORNUOUS, BICORNUTE, adj's. Bi-ko^{2}rn'u^2-u^{3}s, -u^{2}t. See BICORNIS.

BICORONATE, adj. Bi-ko^{2}r'on-at. Lat., *bicoronatus* (from *bis*, twice, and *coronare*, to crown). Fr., *bicouronné.* Having two crowns, or coronæ (said of flower-heads that bear three kinds of florets arranged as an outer, an inner, and an intermediate set, each differing in the form of their corollæ). [Cassini (B, 121).]

BICORPOR (Lat.), adj. Bi(bi^2)-ko^{2}rp'o^{2}r. Gen., *bicorp'oris.* From *bis*, twice, and *corpus*, a body. Fr., *bicorps.* Double-bodied; having or consisting of two bodies (said *inter alia* of the uterus). [H. Jones, "Lancet," Apr. 16, 1887, p. 779.]

BICORPORAL, BICORPORATE, BICORPORATED, adj's. Bi-ko^{2}rp'or-a^{2}l, -at, -at-e^{2}d. See BICORPOR.

BICORPS (Fr.), adj. Be-kor. See BICORPOR.

BICOSTATE, adj. Bi-ko^{2}st'at. Lat., *bicostatus* (from *bis*, twice, and *costa*, a rib). Fr., *bicosté.* Ger., *zweirippig.* Marked with two ribs, or longitudinal elevations; in botany, having two ribs. [B, 121; L, 81.]

BICOTYLÉDONÉ (Fr.), adj. Be-ko-ti^{2}l-a-don-a. See DICOTYLEDONOUS.

BICOUDÉ (Fr.), adj. Be-ku-da. Having two bends. [L, 109.]

BICOURONNÉ (Fr.), adj. Be-kur-on-na. See BICORONATE.

BICRENATE, BICRENATED, adj's. Bi-kre^{2}n'at, -at-e^{2}d. Lat., *bicrenatus* (from *bis*, twice, and *crenatus*, notched). Fr., *bicréné.* Doubly crenate; having crenatures which are themselves crenate (said of the margin of a leaf). [B.]

BICRURAL, adj. Bi-kru^2'ra^{2}l. From *bis*, twice, and *crus*, a leg. Having two legs, or two long projections resembling a pair of legs. [B, 19.]

BICUBAWACHS (Ger.), n. Be-ku'ba^3-va^{3}chs. See BECUIBA *tallow.*

BICUCULLATUS (Lat.), adj. Bi(bi^2)-ku^2(ku^4)-ku^{3}l(ku^{4}l)-la-(la^3)'tu^{3}s(tu^{4}s). From *bis*, twice, and *cucullus*, a hood. Fr., *bicuculle.* Double-hooded. [L, 41, 94, 119.]

BICUHYBA (Lat.), n. f. Bi^{2}k-u^2(u^4)-hi(hu^6)'ba^3. See MYRISTICA *b.*—**B'balsam** (Ger.), **B'wachs** (Ger.). See BECUIBA *tallow.*

BICUIBA (Lat.), n. f. Bi^{2}k-u^2(u^4)-i(e)'ba^3. See BECUIBA.—**B. redonda, B. rodonda.** Brazilian names for the *Myristica officinalis*, also for becuiba tallow. [B, 121, 180.] Cf. BICAYBA and BECUIBA.

BICUIRASSÉ (Fr.), adj. Be-kwer-a^{3}s-sa. Having a double corslet. [L, 41.] As a n., in the pl., *b's*, see BIPELTATA.

BICURVO-ACERATE, adj. Bi-ku^{6}rv''o-a^{2}s'e^{2}r-at. From *bis*, twice, *curvus*, curved, and *acer*, sharp-pointed. Pointed at each end and having two curves. [L, 232.]

BICUSPID, adj. Bi-ku^{3}sp'i^{2}d. Lat., *bicuspidatus, bicuspidalis* (from *bis*, twice, and *cuspis*, a point). Fr., *bicuspide, bicuspidé.* Ger., *zweispitzig.* It., *bicuspidale.* Sp., *bicuspidado.* Double-pointed, having two cusps. [C.] See *B.* TEETH and *B.* VALVE.

BICUSPIDATE, adj. Bi-ku^{3}sp'i^{2}d-at. Lat., *bicuspidatus.* Fr., *bicuspidé.* In botany, having two cusps; terminating in two erect divergent points. [B, 1, 198.]

BICUSPIS (Lat.), n. m. Bi(bi^2)-ku^{3}sp(ku^{4}sp)'i^{2}s. Gen., *bicusp'idis.* A bicuspid tooth. [L, 84.]

BICYANATE, n. Bi-si'a^{2}n-at. Lat., *bicyanas.* Fr., *bicyanate.* Ger., *Bicyanat.* It., Sp., *bicianato.* An acid cyanate; one which, according to the old notation, contains two equivalents of cyanic acid combined with one equivalent of the base. [B, 38.]

BICYANIDE, n. Bi-si'a^{2}n-i^{2}d(id). Lat., *bicyanidum, bicyanuretum.* Fr., *bicyanure.* Ger., *Bicyanid.* It., Sp., *bicianuro.* That one of a series of similar cyanides which contains twice as much cyanogen in proportion to the radicle with which it is compounded as the cyanide which is regarded as the first of the series. [B.]

BICYANURET, n. Bi-si-a^{2}n'u^2-re^{2}t. See BICYANIDE.

BIDACTYLE (Fr.), adj. Be-da^{3}k-tel. From *bis*, twice, and δάκτυλος, a finger. See BIDIGITATE.

BIDARIA (Lat.), n. f. Bi^{2}d-a(a^3)'ri^2-a^3. Fr., *bidarie.* A section of the genus *Gymnema*; made a distinct genus by Decaisne. [B, 121.]

BIDDRIE-NANA-BEEUM (Teloogoo), n. The *Euphorbia thymifolia.* [B, 172.]

BIDDULPHIACEÆ (Lat.), n. f. pl. Bi^{2}d-dulf-i^2-a(a^3)'se^2(ke^2)-e(a^3-e^2). From *Biddulphia*, one of the genera. Of Rabenhorst, a family of diatomaceous *Algæ*, divided into the *Biddulphieæ* and the *Bhœtocereæ.* [B, 121.]

BIDDULPHIEÆ (Lat.), n. f. pl. Bi^{2}d-dulf-i(i^2)'e^2-e(a^3-e^2). Of Kützing, a family of diatomaceous plants, divided by Trevisan into the sections *Eubiddulphieæ*, *Triceratieæ*, and *Amphitetraseæ.* [B, 170.]

BIDENS (Lat.), adj. and n. f. Bi(bi^2)'de^{2}nz(de^{2}ns). Gen., *bident'is.* From *bis*, twice, and *dens*, a tooth. Fr., *bident.* Ger., *zweizähnig* (adj.), *Zweizahn* (n.). See BIDENTATE; as a n., a genus of composite plants of the tribe *Helianthoideæ*, subtribe *Coreopsideæ*, having the leaves opposite; the flower-heads surrounded by a double involucre and having from four to eight neutral ray-florets (absent in some species), perfect deck-florets, and a flat, chaffy receptacle; and the achænia obcompressed and bearing from two to five rigid deflexed awns instead of a pappus. [B, 19, 34.]—**B. acmelloides** [Bergius]. The *Spilanthes oleracea.* [B, 173, 180.]—**B. angustifolia** [Lamarck]. The *Spilanthes urens.* [B, 173.]—**B. apiifolia** [Linnæus]. The *Verbesina mutica.* [B, 173.]—**B. bipinnata** [Linnæus]. Spanish needles; a species growing in waste places in the northern United States. The root and seeds have been used as an emmenagogue and as a remedy for acute laryngitis and bronchitis. [B, 81, 215.]—**B. cernua** [Linnæus]. Ger., *nickender Zweizahn.* Syn.: *Coreopsis b.* [Linnæus]. The bur-marigold; a species found in swamps and ditches in Europe and America. The herb (*herba bidentis*, seu *verbesinæ*) was formerly employed like that of *B. tripartita.* [B, 180, 215.]—**B. chinensis** [Linnæus]. A species referred to *Glossogyne chinensis* (*q. v.*), but probably really a species of *B.* [B, 180.]—**B. fervida** [Lamarck]. The *Spilanthes oleracea.* [B, 180.]—**B. foliis tripartito-divisis** [Tournefort]. The *B. tripartita.* [B, 200.]—**B. frondosa** [Linnæus]. The stick-tight; a branching species, from 2 to 6 feet high, growing throughout the United States. [B, 215.]—**B. hybrida.** A variety of *B. tripartita.* [B, 173.]—**B. ocimifolia** [Lamarck]. The *Spilanthes alba.* [B, 180.]—**B. radiata** [Thuillier]. See *B. cernua.*—**B. tetragona** [De Candolle]. Sp., *té de Milpa* [Mex. Ph.]. A Mexican species, the leaves of which are used as a substitute for tea. [J. M. Maisch, "Am. Jour. of Pharm.," March, 1886, p. 122 (B).]—**B. tripartita** [Linnæus]. Fr., *chanvre aquatique, cornuet, langue de chat.* Ger., *Wasserhanf, dreitheiliger Zweizahn, Pfauenspiegel.* A species with broadly lanceolate, tripartite, deeply serrate or incised leaves, solitary terminal yellow discoid flower-heads, and biaristate achænia. The herb (*herba verbesinæ*, seu *cannabis aquaticæ*) was formerly used as a sialagogue, aperient, diuretic, and emmenagogue; the leaves and stalk furnish a yellow dye. [B, 173, 180.]—**Flores bidentis.** The flowers of *B. cernua.* [B, 97.]—**Herba bidentis.** The herb of *B. cernua.* [B, 180.]

BIDENT (Fr.), adj. and n. Be-da^{3}n^2. See BIDENS and BIDENTATE.

BIDENTAL, adj. Bi-de^{2}nt'a^{2}l. Lat., *bidentalis* (from *bis*, twice, and *dens*, a tooth). Fr., *bidenté.* Ger., *zweizähnig.* Having two teeth or two tooth-like protuberances.

BIDENTATE, BIDENTATED, adj's. Bi-de^{2}nt'at, -at-e^{2}d. Lat., *bidens, bidentatus.* Fr., *bident, bidenté.* Ger., *zweizähnig.* In botany, doubly dentate; *i. e.*, either having two teeth or two tooth-shaped elevations along the edge, or having secondary dentations or tooth-shaped elevations on the edge of the primary dentations (said of leaves). [B.]—**B. inequi-anchorate.** Having two unequal anchor-shaped extremities, each with two dentate processes. [L, 232.]

BIDENTEÆ [Reichenbach] (Lat.), n. f. pl. Bi(bi^2)-de^{2}nt'e^2-e-(a^3-e^2). See BIDENTIDEÆ.

BIDENTES (Lat.), n. f. pl. Bi(bi^2)-de^{2}nt'ez(as). Of Adanson, a section of the *Compositæ*, comprising seventeen genera. [B, 178.]

BIDENTIAL, adj. Bi-de^{2}n'shi^2-a^{2}l. See BIDENTAL.

BIDENTIDEÆ [Lessing] (Lat.), n. f. pl. Bi(bi^2)-de^{2}nt-i^{2}d'e^2-e-(a^3-e^2). Fr., *bidentidées.* A division of composite plants of the *Heliantheæ*, comprising *Bidens* and three other genera. [B, 121, 170.]

BIDENTIGÈRE (Fr.), adj. Be-da^{3}n^2-ti^2-zhe^{2}r. See BIDENTAL.

BIDENTOIDES (Lat.), adj. Bi(bi^2)-de^{2}nt-o(o^2)-i(e)'dez(das). Resembling the genus *Bidens*; a species-name. [B, 215.]

BIDENTORIUS (Lat.), adj. Bi(bi^2)-de^{2}nt-o'ri^2-u^{3}s(u^{4}s). See BIDENTATE.

BIDET (Fr.), n. Be-da (as an English word, bi^2-de^{2}t'). An article of chamber furniture consisting of an oval or fiddle-shaped basin sunk in a frame provided with legs; designed for bathing the genitals, the anus, etc., the bather being seated astride the frame. [A, 300; E.]

BIDIGITATE, adj. Bi-di^{2}j'i^{2}t-at. Lat., *bidigitatus* (from *bis*, twice, and *digitus*, a finger). Fr., *bidigité.* Ger., *doppelt gefingert.* Having two fingers or finger-like divisions. [B, 1, 121.]

BIDIGITATO-PINNATE, BIDIGITI-PINNATE, adj's. Bi-di^{2}j-i^{2}t-a''to-pi^{2}n'nat, -di^{2}j''i^{2}t-i^2-pi^{2}n'nat. Lat., *bidigitato-pinnatus.* Fr., *bidigitaté-penné, bidigité-penné, bidigiti-penné.* A term descriptive of a leaf consisting of a common petiole supporting two pinnated leaflets at its summit. [L, 43.]

BIDUCTULOSE, adj. Bi-du^{3}kt'u^2-los. Lat., *biductulosus* (from *bis*, twice, and *ductus*, a leading). Fr., *biductuleux.* In botany, having two nervures or canals. [L, 41.]

BIDUOUS, adj. Bi^{2}d'u^2-u^{3}s. Lat., *biduus* (from *bis*, doubly, and *dies*, a day). Lasting for two days. [B, 19.]

BIDUUM (Lat.), n., n. of adj. *biduus.* Bi^{2}d'u^2(u^4)-u^{3}m(u^{4}m). A period of two days. [A, 318.]

BIDUUS (Lat.), adj. Bi^{2}d'u^2(u^4)-u^{3}s(u^{4}s). See BIDUOUS.

BIDZJAM, n. The *Sesamum orientale.* [L, 105.]

BIEBERNELLE (Ger.), n. Beb'e^{2}r-ne^{2}l-le^2. See BIBERNELL.—**Falsche B., Rothe B.** The *Sanguisorba officinalis.* [L.]

BIECHO, BIECO, n's. See BICHO.

BIÉCUSSONÉ (Fr.), adj. Be-a-ku^{6}s-son-a. See BISCUTATUS.

BIEGEN (Ger.), n. Beg'e^{2}n. A flexion. [L, 80.]

BIEGMUSKEL (Ger.), n. Beg'musk-e^{2}l. A flexor muscle. [A, 317.]

BIEGUNG (Ger.), n. Beg'ung. See BIEGEN.

BIELOI, n. A salt lake in Siberia, the water of which is used for baths. [L, 49.]

BIELUGA, n. The *Acipenser huso.* [B, 180.]

BIEMBRYONATUS (Lat.), adj. Bi(bi^2)-e^{2}m-bri^2(bru^6)-o^{2}n-a-(a^3)'tu^{3}s(tu^{4}s). From *bis*, doubly, and ἔμβρυον, an embryo. Fr., *biembryoné.* Containing two embryos (said of a seed). [B, 38; L, 180.]

BIENE (Ger.), n. Ben'e^2. A bee; in the pl. *B'n*, the *Anthophila.* [L, 30.]—**B'nbaum.** The *Acer campestre.* [L, 43.]—**B'nbrod.** Bee-bread. [L, 43.]—**B'nförmig.** See APIFORM.—**B'nfressend.** See APIVOROUS.—**B'nklee.** The *Trifolium repens.* [L, 46.]—**B'nkraut.** The *Thymus vulgaris.* [B, 180.]—**B'nsaug.** See the major list.—**B'nstich.** The sting of a bee. [L, 43.]—**B'nstock.** See ALVEUS. [L, 80.]—**B'ntragend.** See APIFERUS.—**B'nwachs.** See *Bees*-WAX.—**B'nzellenartig.** See FAVOSUS.—**B'nzellig.** In botany, faveolate. [B, 123.]

BIENENSAUG (Ger.), n. Ben'e^{2}n-za^3-ug. The genus *Lamium.* [B, 180.]—**Geflectes B.** The *Lamium maculatum.* [B, 180.]—**Rothes B.** The *Lamium purpureum.* [B, 180.]—**Weisses B.** The *Lamium album.* [B, 180.]

BIENJOINT (Fr.), n. Bi^2-a^{3}n^2-zhwa^{3}n^2. See BENZOIN (1st def.).

BIENNIAL, adj. Bi-e^{2}n'ni^2-a^{2}l. Lat., *biennalis* (from *bis*, twice, and *annus*, a year). Fr., *bisannuel, biennal.* Ger., *zweijährig.* It., *biennio.* Sp., *bienal.* Lasting two years or seasons (said of a plant which does not bring forth fruit until the second year of its growth, and then dies); as a n., a b. plant. [B, 19.]

BIENNIS (Lat.), adj. Bi(bi^2)-e^{2}n'ni^{2}s. See BIENNIAL.

BI-ÉPERONNÉ (Fr.), adj. Be-a-per-on-na. See BICALCARATUS.

BI-ÉPILLÉ (Fr.), **BI-ÉPINEUX** (Fr.), adj's. Be-a-pi^{2}l-la, -pen-u^5. See BISPINOSE.

BIER (Ger.), n. Ber. See BEER.—**Bayerisches B.** See *Bavarian* BEER.—**B'essig.** See *Beer* VINEGAR.—**B'gäscht, B'hefe.** Brewers' yeast. [L, 46, 65.]—**B'hopfen.** The *Humulus lupulus.* [B, 180.]—**B'kirsche.** The *Cerasus acida.* [L, 46.]—**B.-Sarcina.** See SARCINA *of beer.*—**B'tanne.** The *Pinus canadensis.* [L, 46.]—**Bitterb'.** See *Bitter* BEER.—**Bockb'.** See *Doppelb'.*—**Braunb'.** A dark-colored beer, made from malt that has been well roasted. [A, 304.]—**Decoctionsb'.** Beer in the preparation of which the malt is boiled. [A, 304.]—**Doppelb'.** Strong beer, made from the first infusion or decoction of the malt and a portion of the second. [A, 304.]—**Einfaches B.** Weak beer. [A, 304.]—**Gerstenb'.** Beer made from barley. [A, 315.]—**Getreideb'.** Beer made from grain. [A. 304.]—**Grünes B.** See *Jungb'.*—**Halbb'.** See *Koventb'.*—**Infusionsb'.** Beer in the preparation of which the malt is simply infused, not boiled. [A, 304.]—**Jopenb'.** A substantial German beer resembling porter. [A, 304.]—**Jungb'.** Beer recently separated from the yeast, before it has undergone the ripening process. [A, 304.]—**Koventb'.** A weak beer made from the third or fourth infusion or decoction of the malt. [A, 304.]—**Lagerb'.**

Beer made by the bottom-fermentation process and then allowed to ripen at a low temperature for a considerable length of time; so called from its having lain (*lagern*, to lie at rest) for a time before it is used. The name is commonly applied, however, to all light German beers prepared by the bottom-fermentation process. [A, 327.]—**Leichtes B.** Light beer, containing but a small amount of extractive matter. [A, 304.]—**Luxusb'.** See *Doppelb'*.—**Maïsb'.** Beer made from maize. [A, 304.]—**Märzb'.** See *Doppelb'*.—**Obergähriges B.** Beer made by top-fermentation, as employed in England, France, and Belgium. [A, 304.]—**Schenkb'.** Draught beer; beer that, although made by bottom-fermentation, has not been subjected to the subsequent slow fermentation at a low temperature employed in the preparation of true Lagerb', and consequently has not the keeping properties of the latter. [A, 327.]—**Schwaches B.** Beer that contains but little alcohol. [A, 304.]—**Schweres B.** See *Substanziöses B.*—**Sommerb'.** See *Lagerb'*.—**Sprossenb'.** See Spruce *beer*.—**Starkes B.** Beer containing a large amount of alcohol. [A, 304.]—**Substanziöses B.** Beer that is rich in extractive matter. [A, 304.]—**Süssb'.** Sweet beer; beer in the preparation of which only a small amount of hops or other bitter material has been used. [A, 304.]—**Trockenes B.** Dry beer; beer rich in alcohol and weak in extractive matter. [A, 304.]—**Untergähriges B.** Beer made by bottom-fermentation, as employed in Bavaria, Austria, and Saxony. [A, 304.]—**Wachholderb'.** Beer made from an infusion of juniper-berries. [A, 315.]—**Weissb'.** Beer made from malt that has been only slightly roasted. That of Berlin, a pale, very effervescent beer, is made from 3 parts of corn malt and 1 part of barley malt. [A, 304.]—**Weizenb'.** Beer made from wheat. [A, 315.]—**Winterb'.** See *Schenkb'*.

BIER (Hind.), n. The *Zizyphus jujuba*. [B, 172.]

BIÈRE (Fr.), n. Be-e^{2}r. See Beer.—**B. amère.** See *Bitter* beer.—**B. antiscorbutique** [Fr. Cod., 1818]. See Cerevisia *antiscorbutica*.—**B. médicinale** [Fr. Cod.]. Lat., *cerevisia*. Syn.: *brutolé*. Any preparation consisting of medicinal substances dissolved in beer. [B, 113.]

BIEREMATUS (Lat.), adj. Bi(bi^2)-e^{2}r-e^{2}m(am)-a(a^3)'tu^{3}s(tu^{4}s). From *bis*, doubly, and *eremus* (= ἔρημος), a waste place. Fr., *biérémé*. Having two eremi. [B.]

BIERVILLE (Fr.), n. Be-e^{2}r-vel. A village of France, where there is a cold chalybeate spring. [L, 105.]

BIESTINGS, BIEST-MILK, n's. Best'i^{2}ngz, -mi^{2}lk. See Colostrum.

BIÈVRE (Fr.), n. Be-e^{2}vr. An old name for the *Castor fiber*. [L, 105.]

BIFACIAL, adj. Bi-fa'si^2-a^{2}l. From *bis*, doubly, and *facies*, a face. Having the opposite surfaces alike. [Dana (L, 56).]

BIFARIAM (Lat.), adv., acc. f. of adj. *bifarius* (*partem* understood). Bi(bi^2)-fa(fa^3)'ri^2-a^{2}m(a^{3}m). Ger., *Zweifach*. On two sides; in two ways or parts. [L, 48.]

BIFARIBRANCHIA (Lat.), n. n. pl. Bi(bi^2)-fa^{2}r(fa^{3}r)-i^2-bra^{2}n^2-(bra^{3}n^2)'ki^2(ch^{2}i^2)-a^3. From *bifariam*, in two places, and *branchiæ* (*q. v.*). Fr., *bifaribranches*. Of Latreille, a family of *Gasteropoda*, having the branchiæ on both sides of the body. [L, 180.]

BIFARIBRANCHIUS (Lat.), adj. Bi(bi^2)-fa^{2}r(fa^{3}r)-i^2-bra^{2}n^2-(bra^{3}n^2)'ki^2(ch^{2}i^2)-u^{3}s(u^{4}s). Fr., *bifaribranche*. Having branchiæ on each side of the body. [L, 41.]

BIFARIOUS, adj. Bi-fa'ri^2-u^{3}s. Lat., *bifarius*. Fr., *bifarié*. Ger., *zweireihig*, *zweifach*. Arranged in two series or rows more or less regularly disposed. [B, 19.]

BIFASCIATUS (Lat.), adj. Bi(bi^2)-fa^{2}s(fa^{3}s)-si^2(ki^2)-a(a^3)'tu^{3}s-(tu^{4}s). Fr., *bifascié*. Having two colored bands or stripes. [L, 41.]

BIFEMORO-CALCANEUS (Lat.), n. m. Bi(bi^2)-fe^{2}m-o^{2}r-o-(o^2)-ka^{2}l(ka^{3}l)-ka(ka^3)'ne^2-u^{3}s(u^{4}s). From *bis*, doubly, *femur* (*q. v.*), and *calcaneus* (*q. v.*). Fr., *bifémoro-calcanéen* [Girard (A, 314)]. Ger., *Backfersenbeinmuskel*. It., *bifémoro-calcáneo*. 1. A two-headed muscle of the solipeds, having no direct analogue in man. The external head arises from the femur, in front of the supracondylar fossa, and the internal head from the supracondylar crest; its tendinous termination is attached to the anterior part of the summit of the os calcis. It extends the foot upon the tibia. [L, 13.] 2. See Gastrocnemius.

BIFENDU (Fr.), adj. Be-fa^{3}n^2-du^6. Having two fissures. [L, 41, 109.]

BIFENESTRATUS (Lat.), adj. Bi(bi^2)-fe^{2}n-e^{2}s-tra(tra^3)'tu^{3}s-(tu^{4}s). From *bis*, doubly, and *fenestra*, a window. Fr., *bifenestré*, *bifenêtré*. Having two openings. [L. 116.]

BIFER (Lat.), adj. Bi(bi^2)'fu^{5}r(fe^{2}r). See Biferous.

BIFEROUS, adj. Bi^{2}f'e^{2}r-u^{3}s. Lat., *bifer*, *biferus* (from *bis*, twice, and *ferre*, to bear). Fr., *bifère*. Sp., *bifer*. Flowering twice in the course of the year. [B, 19.]

BIFEUILLE (Fr.), adj. Be-fu^5-i^{2}l-y'. See Bifoliate.

BIFID, adj. Bi'fi^{2}d. Gr., δίχηλος. Lat., *bifidatus*, *bifidus* (from *bis*, twice, and *findere*, to split). Fr., *bifide*. Ger., *zweispaltig*, *bifid*, *gespalten*. Sp., *bifido*. Forked; in botany, divided longitudinally for about one half the length. [B, 19.]

BIFIDATE, adj. Bi^{2}f'i^{2}d-at. See Bifid.

BIFIDITÉ (Fr.), n. Be-fi^{2}d-i^2-ta. The state of being bifid. [L, 41.]

BIFIDUS (Lat.), adj. Bi(bi^2)'fi^{2}d-u^{3}s(u^{4}s). See Bifid and Spina *bifida*.

BIFISSILE (Fr.), adj. Be-fi^{2}s-sel. Opening naturally into two parts. [L, 41.]

BIFISSUS (Lat.), adj. Bi(bi^2)-fi^{2}s'su^{3}s(su^{4}s). From *bis*, twice, and *findere*, to split. See Bifid.

BIFISTULAR, BIFISTULOUS, adj's. Bi-fi^{2}st'u^{2}l-a^{3}r, -u^{3}s. Lat., *bifistulosus* (from *bis*, doubly, and *fistula*, a pipe). Fr., *bifistuleux*. Ger., *zweiröhrig*. Having two tubes. [L, 107.]

BIFLABELLATUS (Lat.), adj. Bi(bi^2)-fla^{2}b(fla^{3}b)-e^{2}l-la(la^3)'-tu^{3}s(tu^{4}s). From *bis*, doubly, and *flabellum*, a fan. Fr., *biflabellé*. Ger., *doppelt fächerförmig*. Having two fan-like processes. [L, 180.]

BIFLAGELLATE, adj. Bi-fla^2-je^{2}l'lat. Lat., *biflagellatus* (from *bis*, doubly, and *flagellum*, a whip). Fr., *biflagellé*. Provided with two flagella. [L, 121.]

BIFLEXUS (Lat.), adj. Bi(bi^2)-fle^{2}x'u^{3}s(u^{4}s). From *bis*, twice, and *flexus*, bent. Fr., *biflexe*. It., *biflesso*. Having two curvatures. [L, 41.]

BIFLORA [Hoffmann] (Lat.), n. f. Bi(bi^2)-flo'ra^3. A genus of umbelliferous plants. [B, 19.]—**B. dicœca** [Hoffmann], **B. flosculosa** [Marsch.], **B. testiculata** [Sprengel]. See Coriandrum *testiculatum*.

BIFLORAL, BIFLORATE, BIFLOROUS, adj's. Bi-flo'-ra^{2}l, -rat, -ru^{3}s. Lat., *biflorus* (from *bis*, doubly, and *flos*, a flower). Fr., *biflore*. Ger., *zweiblümig*, *zweiblüthig*. Sp., *biflor*. Bearing two flowers; also, in the sense of biferous, flowering twice a year. [B, 19.]

BIFOIL (Fr.), n. Bef-wa^{3}l. See Bifolium.

BIFOLD, adj. Bi'fold. From *bis*, doubly, and Eng. *fold* (A.-S., *feald*), a doubling. Double (sometimes used as the opposite of azygous). [L, 121.]

BIFOLIA (Lat.), n. f. Bi(bi^2)-fol(fo^{2}l)'i^2-a^3. See Bifolium.—**Herba bifoliæ.** The herb of *Neottia latifolia*. [B, 180.]

BIFOLIATE, adj. Bi-fol'i^2-at. Lat., *bifoliatus* (from *bis*, doubly, and *folium*, a leaf). Fr., *bifolié*. Ger., *zweiblätterig*. Properly, having two leaves, but usually regarded as equivalent to bifoliolate. [B.]

BIFOLIOLATE, adj. Bi-fol'i^2-o-lat. Lat., *bifoliolatus* (from *bis*, doubly, and *foliolum*, a leaflet). Fr., *bifoliolé*. Having two leaflets. [B, 19.]

BIFOLIUM (Lat.), n. n. Bi(bi^2)-fol(fo^{2}l)'i^2-u^{3}m(u^{4}m). Fr., *bifoil*. The *Neottia latifolia*, or the *Listra ovata*. [B, 180, 200.]—**B. majus, B. majus vulgare, B. silvestre vulgare.** See *B.*—**Herba bifolii.** The herb of the *Listra ovata*. [B, 180.]

BIFOLIUS (Lat.), adj. Bi(bi^2)-fol(fo^{2}l)'i^2-u^{3}s(u^{4}s). See Bifoliate.

BIFOLLICULUS (Lat.), n. m. Bi(bi^2)-fo^{2}l-li^{2}k'u^2(u^4)-lu^{3}s(lu^{4}s). From *bis*, doubly, and *folliculus*, a follicle. Fr., *bifollicule*. In botany, a double follicle; a fruit composed of two follicles. [B, 19.]

BIFORA (Lat.), n. n. pl. Bi^{2}f'o^{2}r-a^3. From *bis*, doubly, and *foris*, the leaf of a door. Fr., *biforés*. Of Latreille, a family of the *Cirripedes*, in which the operculum of the tube has two valves. [L, 180.]

BIFORATE, adj. Bi^{2}f'o-rat. Lat., *biforus*, *biforatus* (from *bis*, twice, and *foris*, an opening). Fr., *biforé*. Having two perforations or pores. [B, 19.]

BIFORIDÉES (Fr.), n. pl. Be-fo-rid-a. See Biphoridæ.

BIFORINE, n. Bi^{2}f'o^{2}r-en. In botany, a cell pierced at either end for the expulsion of the rhaphides. [B, 19.]

BIFORIPALLA (Lat.), n. n. pl. Bi(bi^2)-fo^{2}r-i^2-pa^{2}l(pa^{3}l)'la^3. From *biforus* (see Biforate), and *pallium*, a mantle. Fr., *biforipalles*. Of Latreille, a class of the *Lamellibranchiata* having two openings in the mantle, one for the foot and the other for the escape of the dejections. [L, 180.]

BIFORIS (Lat.), adj. Bi(bi^2)'fo^{2}r-i^{2}s. See Biforate.

BIFORM, adj. Bi'fo^{2}rm. Lat., *biformis*, *biformatus* (from *bis*, doubly, and *forma*, form). Fr., *biforme*. Ger., *doppelgestaltig*. See Dimorphous.

BIFORMITY, n. Bi-fo^{2}rm'i^{2}t-i^2. Fr., *biformité*. Ger., *Biformität*. The state of being dimorphous.

BIFOROUS, adj. Bi^2'fo^{2}r-u^{3}s. Lat., *biforus*. See Biforate.

BIFORUS (Lat.), adj. Bi^{2}f'o^{2}r-u^{3}s(u^{4}s). 1. Biforate (*q. v.*). 2. Having two valves. [Camellus (A, 322).]

BIFRONS (Lat.), adj. Bi(bi^2)'fro^{2}nz(fro^{2}ns). From *bis*, doubly, and *frons*, the forehead. Lit., having two brows. In botany, growing upon both faces of a leaf. [B, 119.]

BIFRONTED, adj. Bi-fru^{3}nt'e^{2}d. See Bifrons.

BIFURCATE, adj. Bi-fu^{5}rk'at. Lat., *bifurcus*, *bifurcatus* (from *bis*, doubly, and *furca*, a fork). Fr., *bifurqué*. Ger., *zweiastig*. A term used sometimes in the sense of forked, *i. e.*, terminating in two diverging arms, and sometimes in the sense of doubly forked, *i. e.*, terminating in two pairs of diverging arms. [B, 19.]

BIFURCATE, v. intr. Bi'fu^{5}rk-at. To divide into two branches (usually said of arteries).

BIFURCATED, adj. Bi'fu^{5}rk-at-ed. See Bifurcate (adj.).

BIFURCATION, n. Lat., *bifurcatio*. Fr., *bifurcation*. Ger., *Furchung*. Sp., *bifurcación*. The division of a structure (*e. g.*, an artery) into two branches; also the physical arrangement resulting from such a division.

BIFURCATUS (Lat.), adj. Bi(bi^2)-fu^{5}rk(furk)-a(a^3)'tu^{3}s(tu^{4}s). See Bifurcate (adj.).

BIFURCOUS, adj. Bi-fu^{5}rk'u^{3}s. Lat., *bifurcus*. Fr., *bifurqué*. See Bifurcate (adj.).

BIG, n. Bi^{2}g. A kind of barley (the *Hordeum hexastichum*). [L, 56, 108.]

BIGAMIA (Lat.), n. f. Bi(bi^3)-ga^{3}m(ga^{3}m)'i^3-a^3. See Digamia.

BIGANDELLE (Fr.), n. Be-ga^{3}n^2-de^{2}l. The *Cerasus vulgaris.* [B, 19.]

BIGARADE (Fr.), n. Be-ga^{3}r-a^{3}d. The bitter orange. [B.]—**Écorce de b.** [Fr. Cod.]. Bitter-orange peel. [B, 113.]—**Essence de b.** Volatile oil of bitter orange, a commercial title. [B.]—**Huile volatile de b.** [Fr. Cod.]. Volatile oil of bitter orange extracted from the rind. [B, 113.]

BIGARADIER (Fr.), n. Be-ga^{3}r-a^{3}d-i^2-a. The bitter-orange tree (*Citrus vulgaris* [De Candolle], *Citrus bigaradia* [Risso]). [B.]

BIGARREAUTIER (Fr.), n. Be-ga^{3}r-rot-i^2-a. The cherry-tree. [L, 42.]

BIGASTER (Lat.), adj. Bi(bi^2)-ga^{2}s(ga^{3}s)'tu^{5}r(tar). From *bis*, doubly, and γαστήρ, the belly. See DIGASTRIC.

BIG BONE SPRINGS, n. Bi^{2}g bo^{4}n. A place in Boone County, Kentucky, where there are three springs (the "Big Bone," the "Mastodon," and the "American Epsom") containing hydrogen sulphide, sodium chloride, magnesium, sodium, and aluminium sulphates, calcium and magnesium bicarbonates, and sodium carbonate. [A, 363.]

BIGELOVIA (Lat.), n. f. Bi^{2}g-e^{2}l-o'vi^2(wi^2)-a^3. A genus of composite plants of the tribe *Asteroideæ*, subtribe *Homochromeæ*, akin to *Solidago.* [B, 215.]—**B. Menziesii** [Gray], **B. veneta** [Gray]. Syn.: *Baccharis veneta* [Humboldt, Bonpland, and Kunth], *Linosyris mexicana* [Schlechtendahl], *Aplopappus* (*Hoplopappus*) *discoideus* [Arnott] (seu *Menziesii* [Torrey and Gray]), *Pyrrocoma Menziesii* [Hooker and Arnott], *Isocoma vernonioides* [Nuttall]. Damiana; a species of *B.* growing in northern Mexico and southern California, furnishing damiana. [B, 66, 215.] See DAMIANA.

BIGEMINAL, BIGEMINATE, adj's. Bi-je^{2}m'i^{2}n-a^{2}l, -at. Lat., *bigeminatus* (from *bis*, twice, and *geminatus*, doubled). Fr., *bigéminé.* Sp., *bigeminado.* See BICONJUGATE.

BIGÉMINATION (Fr.), n. Be-zham-i^{2}n-a^3-si^2-o^{2}n^2. See DICROTISM.

BIGEMINOUS, adj. Bi-je^{2}m'i^{2}n-u^{3}s. Lat., *bigeminus.* Occurring in two pairs. [B, 19.]

BIGEMMIS (Lat.), adj. Bi(bi^2)-je^{2}m(ge^{2}m)'mi^{2}s. Fr., *bigemme.* Having two buds. [L, 41.]

BIGÈNE (Fr.), adj. Be-zhe^{2}n. See BIGENUS.

BIGENER (Lat.), n. m. Bi(bi^2)'je^{2}n(ge^{2}n)-u^{5}r(e^{2}r). From *bis*, doubly, and *genus* (*q. v.*). Fr., *bigénère.* A male plant produced by crossing species of two different genera. [B, 19.]

BIGENERUS (Lat.), adj. Bi(bi^2)-je^{2}n(ge^{2}n)'e^{2}r-u^{3}s(u^{4}s). From *bis*, twice, and *genus* (*q. v.*). Of two kinds, mongrel. [A, 318.]

BIGENUS (Lat.), adj. Bi(bi^2)'je^{2}n(ge^{2}n)-u^{3}s(u^{4}s). Fr., *bigène.* Producing two crops of leaves in one season. [L, 41.]

BIGG, n. Bi^{2}g. See BIG.

BIGIBBOSE, BIGIBBOUS, adj's. Bi-gi^{2}b'bos, -bu^{3}s. Lat., *bigibbosus* (from *bis*, doubly, and *gibbus*, a hump). Fr., *bigibbeux.* Having two bosses. [L, 41.]

BIGLANDULAR, adj. Bi-gla^{2}nd'u^{2}l-a^{3}r. Lat., *biglandulosus* (from *bis*, doubly, and *glandula*, a gland). Fr., *biglanduleux.* Having two glands (said of plants). [L, 56.]

BIG-LAUREL, n. Bi^{2}g la^{4}r'e^{2}l. The *Magnolia grandiflora.* [A, 385.]

BIGLE (Fr.), adj. Begl. Affected with strabismus. [L, 41.]

BIGLOBOSUS (Lat.), adj. Bi(bi^2)-glob(glo^{2}b)-o'su^{3}s(su^{4}s). From *bis*, doubly, and *globus*, a globe. Fr., *biglobuleux.* Having the form of two globes. [L, 41.]

BIGLOCHIDE (Fr.), **BIGLOCHIDÉ** (Fr.), adj's. Be-glo-ked, -ked-a. Having two glochides. [L, 41.] See GLOCHIS.

BIGLUMATUS, BIGLUMIS (Lat.), adj's. Bi(bi^2)-glum-a(a^3)'-tu^{3}s(tu^{4}s), -glum'i^{2}s. From *bis*, doubly, and *gluma* (see GLUME). Fr., *biglumé.* Consisting of two glumes. [B, 19.]

BIGNE (Fr.), n. Beny'. An old name for a swelling on the head resulting from a blow. [A, 300.]

BIGNONIA (Lat.), n. f. Bi^{2}n-yon'i^2-a^3. Fr., *bignone.* Ger., *Trompetenblume.* The trumpet-flower; a genus of bignoniaceous plants of the tribe *Bignonieæ*, established by Plumier. [B, 215.]—**B. æquinoctialis** [Linnæus]. Fr., *liane à cordes* (ou *à crabes*). A West Indian and South American species, the bitter and somewhat astringent bark of which is employed in diarrhœal affections. The plant is also used as a discutient for swellings on the feet, and an astringent infusion is made from the flowers. [B, 173, 180.]—**B. alliacea.** Fr., *liane à l'ail.* The garlic-shrub; a species growing in the West Indies and Guiana, distinguished by the strong garlicky odor given out by its leaves and branches when bruised. [B, 19.]—**B. antisyphilitica** [Martius]. See CYBISTAX *antisyphilitica.*—**B. brasiliana** [Lamarck]. See JACARANDA *brasiliana.*—**B. cærulea** [Linnæus]. See JACARANDA *bahamensis.*—**B. candicans** [Richard]. An American species, the root of which is reputed to be vulnerary, sudorific, and alexipharmac. [B, 173.]—**B. capreolata** [Linnæus]. The trumpet-creeper, or cross-vine; a lofty climbing shrub growing throughout the southern United States. The root and stem have been used as a substitute for sarsaparilla. [B, 81, 215.]—**B. catalpa** [Linnæus]. The *Catalpa bignonioides.* [B.]—**B. caudata, B. chelonoides** [Linnæus]. The *Stereospermum chelonoides.* [B, 212.]—**B. chica** [Bonpland]. A species found in the districts adjoining the upper part of the Orinoco River, furnishing a red dye called *chica* (*q. v.*). [B, 173, 180, 187, 197.]—**B. copaia** (seu **copaja**) [Aublet]. The *Jacaranda procera.* [B, 180.]—**B. crucigera** [Linnæus]. See *B. capreolata.*—**Bignoniæ catalpæ radix.** The root of *Catalpa bignonioides.* [B.]—**B. echinata** [Jacquin]. The *Jacaranda echinata.* [B, 180.]—**B. frutescens** [Miller]. The *Tecoma stans.* [B, 173.]—**B. heterophylla** [Willdenow]. See *B. kerere.*—**B. incarnata** [Aublet]. A French Guiana species, having the same properties as *B. æquinoctialis.* [B, 173.]—**B. indica.** The *Oroxylum indicum.* [B, 212.]—**B. kerere** (seu **kereru**) [Aublet]. A French Guiana species, having properties resembling those of *B. æquinoctialis.* [B, 173, 214, 270.]—**B. leucantha** [Vell.]. The *Sparattosperma lithontriptica.* [B, 270.]—**B. leucoxylon** [Linnæus]. The *Tecoma leucoxylon.* [B, 270.]—**B. longifolia** [Willdenow]. The *Pajanelia Rheedii.* [B, 212.]—**B. longissima** [Jacquin]. The *Catalpa longissima.* [B, 180.]—**B. multijuga.** The *Pajanelia Rheedii.* [B, 212.]—**B. nodosa** [Silva Mans.]. A species growing on dry plains in Brazil; somewhat aromatic and said to be employed as a substitute for senna and for caroba. [B, 214; "Proc. of the Am. Pharm. Assoc.," xxx, p. 177 (B).]—**B. obovata.** The *Spathodea obovata.* [B.]—**B. ophthalmica** [Chisholm]. A species imperfectly known, growing in Guiana, where the pulp and the juice of the root have been employed in the treatment of ophthalmia. [B, 173, 180.]—**B. paganelia** (seu **pajanelia**). The *Pajanelia Rheedii.* [B, 212.]—**B. pentandra** [Loureiro]. The *Oroxylum indicum.* [B, 212.]—**B. pentaphylla** [Linnæus]. The *Tecoma pentaphylla.* [B, 214.]—**B. pseudoquercus** [Tussac]. The *Catalpa longissima.* [B, 173.]—**B. purgans.** Syn.: *Caroba guyra.* A species the leaves of which are used as an antisyphilitic and the root-bark as a purgative. [B.]—**B. quercus** [Lamarck]. The *Catalpa longissima.* [B, 214.]—**B. quinquefolia.** The *Cybistax antisyphilitica.* [B, 214.]—**B. radicans** [Linnæus]. The *Tecoma radicans.* [B, 215.]—**B. sempervirens** [Linnæus]. The *Gelsemium sempervirens.* [B, 215.]—**B. spathacea** [Linnæus]. The *Dolichandrone Rheedii.* [B, 173, 212.]—**B. stans** [Linnæus]. The *Tecoma stans.* [B, 215.]—**B. suberosa.** The *Millingstonia hortensis.* [B, 172, 212.]—**B. tomentosa.** The *Tecoma heteropoda.* [B, 214.]—**B. uliginosa** [Gomez]. The *Tabebuia uliginosa.* [B, 214.]—**B. unguis** [Linnæus], **B. unguis cati** [Descourtils]. Fr., *liane à chat, lierre de Saint-Dominique.* A species indigenous to the West Indies and northern South America, where the juice of the leaves and root is considered an alexipharmac by the negroes. [B, 173, 180.]—**B. xylocarpa.** Tamil, *vadencarni.* A large tree, of rapid growth, common in the forests of Madras, Mysore, Bengal, and Bombay. A thick liquid, of the color and consistence of Stockholm tar, obtained from the wood, is used in cutaneous affections. [B, 172; "Proc. of the Am. Pharm. Assoc.," xxvi, p. 159 (B).]

BIGNONIACEÆ (Lat.), n. f. pl. Bi^{2}n-yo^{2}n-i^2-a(a^3)'se^2(ke^2)-e(a^3-e^2). Fr., *bignoniacées.* Ger., *Bignoniaceen.* The bignoniads, or trumpet-vines; of Persoon and subsequent writers, an order of gamopetalous dicotyledons, assigned by Bentham and Hooker to the cohort *Personales*; including trees and shrubs or woody climbers with opposite, simple or pinnately divided leaves, sometimes having accessory stipule-like leaflets, and showy, irregular flowers, borne in terminal panicles or racemes, having a gamosepalous calyx, a more or less bilabiate corolla, tetradynamous or diandrous stamens with 2-celled anthers, and a subsessile 2-celled ovary surmounted by a single style with a 2-lobed stigma and containing numerous anatropous ovules. The fruit is a loculicidal or septicidal capsule containing numerous large, flat and often alate exalbuminous seeds attached to parietal placentæ or to the septum of the capsule, which in the dehiscence of the latter separates from the valves. [B, 212, 215.]

BIGNONIACEOUS, adj. Bi^{2}n-yon-i^2-a'shu^{3}s. Of or belonging to the *Bignoniaceæ*; belonging to or resembling the genus *Bignonia.* [B.]

BIGNONIADS, n. pl. Bi^{2}n-yon'i^2-a^{2}dz. See BIGNONIACEÆ.

BIGNONIÆ (Lat.), n. f. pl. Bi^{2}n-yon'i^2-e(a^3-e^2). Fr., *bignoniées.* See BIGNONIACEÆ.

BIGNONIAL, adj. Bi^{2}n-yon'i^2-a^{2}l. Lat., *bignonialis.* Pertaining to the genus *Bignonia.* [B.]—**B. alliance.** See BIGNONIALES.

BIGNONIALES (Lat.), n. f. pl. Bi^{2}n-yon-i^2-a(a^3)'lez(las). The bignonial alliance of Lindley (1833); an alliance of the *Personatæ*, comprising the orders *Bignoniaceæ*, *Pedalinæ*, and *Cyrtandraceæ*, or (1847) an alliance of perigynous exogens, comprising the orders *Pedaliaceæ*, *Gesneraceæ*, *Crescentiaceæ*, *Bignoniaceæ*, *Acanthaceæ*, *Scrophulariaceæ*, and *Lentibulariaceæ.* [B, 170.]

BIGNONIARIÆ (Lat.), n. f. pl. Bi^{2}n-yon-i^2-a(a^3)'ri^2-e(a^3-e^2). Of Reichenbach, a subdivision of the *Scrophularinæ*, comprising the sections *Sesameæ*, *Martyneæ*, and *Bignonieæ.* [B, 170.]

BIGNONIDIÆ (Lat.), n. f. pl. Bi^{2}n-yon-i^{2}d'i^2-e(a^3-e^2). Of Dumortier, a family of the *Thalamitubia*, including *Bignonia* and related genera. [B, 170.]

BIGNONIEÆ (Lat.), n. f. pl. Bi^{2}n-yon-i(i^2)'e^2-e(a^3-e^2). Of Jussieu and succeeding authors, a family, subfamily, or tribe of plants either corresponding more or less closely to the order *Bignoniaceæ* or forming a subdivision of that order. As defined by Bentham and Hooker, it is a tribe of the *Bignoniaceæ*, including genera having a completely bilocular ovary, a capsule having a septifragal dehiscence taking place by two valves, which are deciduous with the parallel septum, and opposite leaves, usually ternate, the terminal leaflet being often suppressed or converted into a tendril. [B, 42.]

BIGNONIN, n. Bi^{2}n-yon'i^{2}n. A crystallizable substance obtained from *Bignonia leucantha.* ["Proc. of the Am. Pharm. Assoc.," xxvii, p. 167 (B).]

BIGNONIOIDES (Lat.), adj. Bi^{2}n-yon-i^2-o(o^2)-i(e)'dez(das). Resembling the genus *Bignonia.* [B.] See CATALPA *b.*

BIGNONNE (Fr.), n. Bi^{2}n-yon. The genus *Bignonia.* [B, 132.]

BIGNONÉES (Fr.), n. pl. Bi^{2}n-yon-na. The *Bignoniaceæ.* [B. 132.]

BIGORRE (Fr.), n. Be-gor. See BAGNÈRES-DE-BIGORRE.

BIGRAMMICUS (Lat.), adj. Bi(bi^2)-gra^{2}m(gra^{3}m)'mi^{2}k-u^{3}s-(u^{4}s). From *bis*, doubly, and γράμμα, a drawing. Fr., *bigrammique.* Marked with two spots of color. [L, 116.]

BIGRANULARIS (Lat.), adj. Bi(bi^2)-gra^{2}n(gra^{3}n)-u^2(u^4)-la-(la^3)'ri^{2}s. From *bis*, doubly, and *granum*, a grain. Fr., *bigranulaire.* Having two rows of granules or tubercles. [L, 180.]

BIGUTTATUS (Lat.), adj. Bi(bi^2)-gu^{3}t(gut)-ta(ta^3)′tu^{3}s(tu^{4}s). From *bis*, doubly, and *gutta*, a drop. Fr., *bimouchete*. Marked with two small spots. [L, 41, 116.]

BIH, n. See Bish.

BIHAI, n. See Heliconia.

BIHAMATE, adj. Bi-ham′at. From *bis*, doubly, and *hamatus*, hook-shaped. Hook-shaped at both ends. [L, 232.]

BIHAR (Ar.), n. Tincture of *Anthemis tinctoria*. [B, 38; L, 105.]

BIHASTATUS (Lat.), adj. Bi(bi^2)-ha^{2}st(ha^{3}st)-a(a^3)′tu^{3}s(tu^{4}s). From *bis*, doubly, and *hasta*, a lance. Fr., *bihasté*. Having two lance-shaped appendages. [L, 41.]

BIHERNIUS (Lat.), adj. Bi(bi^2)-hu^{5}rn(he^{2}rn)′i^2-u^{3}s(u^{4}s). From *bis*, doubly, and *hernia* (*q. v.*). Having two herniæ. [L, 119.]

BIHYDRATE (Fr.), n. Be-he-dra^{3}t. See Dihydrate.

BIHYDRATÉ (Fr.), adj. Be-he-dra^{3}t-a. See Dihydrated.

BIHYDRIQUE (Fr.), adj. Be-he-drek. See Dihydric.

BIHYDRO-CARBOXYLIQUE (Fr.), adj. Be-he-dro-ka^{3}rb-o^{2}x-i^{2}l-ek. See Dihydrocarboxylic.

BIHYDROGURET, n. Bi-hid-ro^{2}g′u^2-re^{2}t. See Dihydride.

BIHYDROSULPHATE, n. Bi-hid-ro-su^{3}lf′at. A salt of dihydrosulphuric acid. [B, 38.] See Ammonia *b*.

BI-ILIAQUE (Fr.), adj. Be-i^{2}l-i^2-a^{3}k. See Bis-iliac.

BI-IODURE (Fr.), n. Be-e-od-u^{6}r. See Biniodide.

BI-ISCHIATIQUE (Fr.), adj. Be-i^{2}s-ki^2-a^{3}t-ek. See Bis-ischiadic.

BIJODATUM (Lat.), n. n. Bi(bi^2)-jo(yo)-dat(da^{3}t)′u^{3}m(u^{4}m). See Biniodide.

BIJODATUS (Lat.), adj. Bi(bi^2)-jo(yo)-dat(da^{3}t)′u^{3}s(u^{4}s). Combined with two atoms of iodine; as a n., with the name of a base, the biniodide of that base.

BIJODURETUM (Lat.), n. n. Bi(bi^2)-jo^{2}d(yod)-u^2(u^4)-ret(rat)′-u^{3}m(u^{4}m). See Biniodide.

BIJON (Fr.), n. Be-zho^{2}n. See *Larch* turpentine.

BIJUGATE, BIJUGATOUS, BIJUGOUS, adj's. Bi-ju^{2}g′at, -ju^{2}g-at′u^{3}s, -ju^{2}g′u^{3}s. Lat., *bijugatus*, *bijugus* (from *bis*, doubly, and *jugum*, a yoke). Fr., *bijugué*. In botany, having two pairs of leaflets on the same petiole. [B, 19.]

BIJUMEAU (Fr.), adj. Be-zhu^6-mo. Twin, paired (said of the tubercula quadrigemina in animals in which they are divided into two parts instead of four, also of the two heads of a biceps muscle); as a n., a double monster. [A, 385; L, 49.]

BIK, BIKH (Hind.), n's. See Bish.

BIKŒCINA [Stein] (Lat.), n. n. pl. Bi^{2}k-e^{2}s(o^2-e^{2}k)-i(e)′na^3. A family of the *Monadidea*, closely allied to the *Codonœcina*, but distinguished by the individual being fixed in its cup by a contractile, thread-like stalk. [L, 121.]

BIKSZAD, n. A place in Hungary, where there is a feebly chalybeate spring containing sodium chloride and various carbonates. [A, 385; L, 49.]

BILA, n. The fruit of the *Semecarpus anacardium*. ["Proc. of the Am. Pharm. Assoc.," xxvi, p. 167 (B).]

BILABE, n. Bi′lab. From *bis*, doubly, and *labium*, a lip. An instrument for removing small bodies from the bladder through the urethra. [L, 56.]

BILABIATÆ [Gaudin] (Lat.), n. f. pl. Bi(bi^2)-lab(la^{3}b)-i^2-a(a^3)′-te(ta^3-e^2). See Labiatæ.

BILABIATE, adj. Bi-lab′i^2-at. Lat., *bilabiatus* (from *bis*, doubly, and *labium*, a lip). Fr., *bilabié*. Ger., *zweilippig*. Having two lips, an upper and a lower (said of the corolla of certain plants). [B.]

BILADEN, n. An old name for steel. [A, 325.]

BILAMELLAR, BILAMELLATE, BILAMELLATED, adj's. Bi-la^{2}m-e^{2}l′la^{3}r, -lat, -lat-e^{2}d. Lat., *bilamellatus* (from *bis*, doubly, and *lamella*, a plate). Fr., *bilamellé*. In botany, composed of two thin plates, which are usually disposed vertically. [B.]

BILAMINAR, BILAMINATE, adj's. Bi-la^{2}m′i^{2}n-a^{3}r, -at. From *bis*, doubly, and *lamina*, a sheet. Consisting of two sheets or layers.

BILATE, n. Bil′at. See Glycocholate.

BILATERAL, adj. Bi-la^{2}t′e^{2}r-a^{2}l. Lat., *bilateralis* (from *bis*, doubly, and *latus*, the side). Fr., *bilatéral*. Ger., *zweiseitig*. Pertaining to or affecting both sides; in botany, having the leaves placed on opposite sides. [A, 301.]

BILATERALITY, n. Bi-la^{2}t-e^{2}r-a^{2}l′i^{2}t-i^2. The quality of being bilateral. [L.]

BILAZAI (Fr.), n. Bi^{2}l-a^3-za. A place in the department of Deux-Sèvres, France, where there are sulphurous springs. [A, 385; L, 87.]

BILBERGIA (Lat.), n. f. Bi^{2}l-be^{2}r′gi^2-a^3. See Billbergia.

BILBERGIINÆ (Lat.), n. f. pl. Bi^{2}l-be^{2}r-ji^2(gi^2)-in(en)′e(a^3-e^2). See Billbergiinæ.

BILBERRY, n. Bi^{2}l′be^{2}r-ri^2. The whortleberry, the fruit of the *Vaccinium myrtillus*; also the genus *Vaccinium*, especially the section *Euvaccinium*. [B, 19, 34.]—**Bear's b.** The *Arctostaphylos uva ursi*. [B; L, 73, 116.]—**Common b., European b., Whortle b.** See *B*.

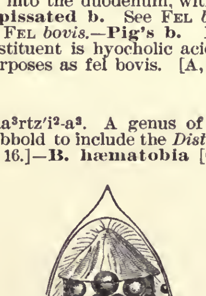
BILDEND (Ger.), adj. Bi^{2}ld′e^{2}nd. Formative, plastic. [L, 43.]

BILDNERINNEN (Ger.), n. pl. Bi^{2}ld′ne^{2}r-i^{2}n-ne^{2}n. Plastids (*q. v.*). [J.]

BILDUNG (Ger.), n. Bi^{2}ld′ung. Formation.—**B'sabweichung, B'sanomalie.** See *B'sfehler*.—**B'sdotter.** See *Formative* vitellus.—**B'selement.** A formative element. [J.]—**B'sfehler.** An abnormity of development. [L, 57, 59.]—**B'sflüssigkeit.** See Blastema.—**B'sgeschichte.** Embryology.—**B'sgewebe.** Formative tissue. [J.]—**B'sheerd.** A formative focus.—**B'shemmung.** Arrest of development. [L, 57.]—**B'sknorpel.** A temporary cartilage. [L, 43.]—**B'skraft.** Plastic force. [K.]—**B'slehre.** See *B'sgeschichte*.—**B'ssaft.** See Blastema.—**B'sstoff.** Protoplasm. [J.]—**B'strieb.** Formative energy. [Blumenbach (L, 121).]—**B'ssubstanz.** Protoplasm. [J.]—**B'svermögen.** Plastic capacity. [L, 80.]—**B'szelle.** A formative (embryonal) cell. [J.]

BILE, n. Bil. Ar., *marra*, *merora*. Heb., *merora*. Gr., *χολή*. Lat., *bilis*, *fel*. Fr., *bile*. Ger., *Galle*. It., *bile*. Sp., *bilis*. Gall; the secretion of the liver; a liquid varying from dark yellowish green to reddish brown in color; semitransparent except when very dark; somewhat viscid as it comes directly from the liver, still more viscid after passing into the gall-bladder; of a disagreeable, bitter taste; almost inodorous when perfectly fresh, but readily undergoing putrefaction; of a sp. gr. ranging from 1·020 to 1·026; usually alkaline in reaction; not containing any characteristic anatomical elements. According to Robin, 1,000 parts contain:

Water	916·00 to 819·00
Sodium taurocholate or choleate	56·50 " 106·00
Sodium glycocholate or cholate	traces
Cholesterin	0·62 to 2·66
Biliverdin	14·00 " 30·00
Lecithin, margarin, olein, and traces of soaps	3·20 " 31·00
Cholin	traces
Sodium chloride	2·77 to 3·50
Sodium phosphate	1·60 " 2·50
Potassium phosphate	0·75 " 1·50
Calcium phosphate	0·50 " 1·35
Magnesium phosphate	0·45 " 0·80
Salts of iron	0·15 " 0·30
Salts of manganum	traces " 0·12
Silicic acid	0·03 " 0·06
Mucosin	traces



The ancients considered the b. as a purely excrementitious product, but it is now regarded as playing a part in the process of digestion. It is thought to retard putrefaction of the intestinal contents, and it has moderate emulsifying power, but its precise office in digestion is not well understood. The b. of various animals was formerly used in medicine, and that of the ox (*fel bovis*) is still employed. [A, 440, 448.]—**Æruginous b.** B. of the color of verdigris. [L, 94.]—**Azure b.** See *Glastine b.*—**B. acids.** See Taurocholic acid, Glycocholic acid, Hyoglycocholic acid, Hyotaurocholic acid, and Chenotaurocholic acid.—**B. blanche** (Fr.). B. more or less deficient in pigment. [A, 385.]—**B. cristallisée** (Fr.). See *Crystallized b.*—**B. de bœuf** [Fr. Cod.] (Fr.), **B. de bœuf purifiée** (Fr.). See Fel *bovis*.—**B. cystique** (Fr.). See *Cystic b.*—**B.-ducts.** See under Duct.—**B. hépatique** (Fr.). See *Hepatic b.*—**B. pigments.** See Bilirubin, Bilifulvin, Cholophæin, Bilifuscin, Biliprasin, Bilihumin, and Bilicyanin.—**B. répandue** (Fr.). Jaundice.—**B. resin.** See Bilin.—**B.-stone.** See Gall-stone.—**Black b.** See Atrabilis.—**Blue b.** See *Glastine b.*—**Crystallized b.** Fr., *b. cristallisée*. Platner's term for sodium taurocholate. [A, 448.]—**Cystic b.** Lat., *bilis cystica*. Fr., *bile cystique*. B. which has been stored for some time in the gall-bladder, as distinguished from that which passes directly from the liver into the duodenum. It is somewhat thickened. [A, 440; K.]—**Glastine b.** Lat., *bilis glastea*. An old term for b. of a bluish hue; so called from *glastum*, the herb wood (*Isatis tinctoria*). [A, 312; L, 94.]—**Hepatic b.** Lat., *bilis hepatica*. Fr., *b. hépatique*. B. as it passes directly from the liver into the duodenum, without entering the gall-bladder. [K.]—**Inspissated b.** See Fel *bovis inspissatum*.—**Ox-b., Ox's b.** See Fel *bovis*.—**Pig's b.** Lat., *bilis porcina*. Its characteristic constituent is hyocholic acid (*q. v.*). It has been used for the same purposes as fel bovis. [A, 448; L, 45.]—**Purified b.** See Fel *bovis*.

BILE, n. Bil. See Boil (n.).

BILHARZIA (Lat.), n. f. Bi^{2}l-ha^{3}rtz′i^2-a^3. A genus of distomidous parasites, established by Cobbold to include the *Distoma hæmatobium* of Bilharz. [B, 70; L, 16.]—**B. hæmatobia** [Cob-

THE BILHARZIA HÆMATOBIA, MALE AND FEMALE SEXUALLY COMBINED. (FROM COBBOLD [A, 364], AFTER KÜCHENMEISTER.)

THE OVUM OF THE BILHARZIA HÆMATOBIA, CONTAINING THE EMBRYO AND FREE SARCODE GRANULES. × 234 DIAMETERS. (AFTER COBBOLD [A, 364].)

bold]. Syn.: *Distoma hœmatobium* [Bilharz], *Schistosoma hæmatobium* [Weinland], *Thecosoma hæmatobium* [Moquin-Tandon], *Dis-*

toma capense [J. Harley], *B. magna*, *Gynæcophorus hæmatobius* [Diesing]. A cylindrical worm of the order *Trematoda*, suborder *Distomadæ*. The male is about half an inch long, and the female somewhat longer, but more slender. During copulation the female is lodged in the gynæcophoric canal of the male. It is found in the portal vessels and in the veins of the mesentery and of the urinary tract, causing a severe disease characterized by hæmaturia, anæmia, and diarrhœa, endemic in various parts of Africa and in the Mauritius. [A, 364; L, 16.]—**B. magna.** See *B. hæmatobia.*

BILIAIRE (Fr.), adj. Be-li²-a²r. See BILIARY.

BILIANIC ACID, n. Bi²l-i²-a²n′i²k. Ger., *Biliansäure.* A tribasic acid, $C_{25}H_{36}O_9$, the anhydride of which is produced by the oxidation of cholic acid. [Clive, "Ber. d. dtsch. chem. Gesellsch.," xiv, pp. 272, 1410 (B).]

BILIANIC ANHYDRIDE, n. Ger., *Biliansäureanhydrid.* The anhydride, $C_{50}H_{70}O_{17} + 4H_2O$, of bilianic acid (*q. v.*), forming small shining, rhombic crystals. [Clive, "Ber. d. dtsch. chem. Gesellsch.," xiv, pp. 272, 1410 (B).]

BILIANSÄURE (Ger.), n. Bi²l-i²-a³n′zoir-e². See BILIANIC ACID.—**B′anhydrid.** See BILIANIC ANHYDRIDE.

BILIARY, adj. Bi²l′i²-a-ri². Gr., χολώδης. Lat., *biliaris, biliarius.* Fr., *biliaire.* Ger., *biliar.* It., *biliare.* Sp., *biliar.* Pertaining to the bile or to its production or excretion. [A, 385.]

BILIATION, n. Bi²l-i²-a′shu³n. Lat., *biliatio.* Fr., *biliation.* The excretion of bile. [A, 385.]

BILIC ACID, n. Bil′i²k. Fr., *acide bilique.* A name applied to a mixture of acids obtained from bile. [B, 93.]

BILICHÉNATE (Fr.), n. Be-le-kan-a³t. That one of a series of compounds of lichenic acid with a base that contains twice as much lichenic acid as the first member of the series. [L, 41.]

BILICHOLIC ACID, n. Bil-i²-kol′i²k. From *bilis*, bile, and χολή, bile. Fr., *acide bilicholique.* Berzelius's name for a supposed biliary acid which was probably a mixture. [B, 5.]

BILICHOLINIC ACID, n. Bil-i²-kol-i²n′i²k. Lat., *acidum bilicholinicum* (from *bilis*, bile, and χολή, bile). Fr., *acide bilicholinique.* Ger., *Bilicholinsäure.* See CHOLEIC ACID.

BILICYANIN, n. Bil-i-si′a²n-i²n. From *bilis*, bile, and κυάνεος, dark blue. Fr., *bilicyanine.* Ger., *Bilicyanin.* A blue substance formed by adding strong nitric acid to an ammoniacal solution of bilirubin. It is said to have been found in the sputa of persons suffering with pneumonia. [Korányi (A, 319); K.]

BILIEUX (Fr.), adj. Be-li²-u⁶. See BILIOUS.

BILIFELLINIC ACID, n. Bil-i²-fe²l-li²n′i²k. Lat., *acidum bilifellinicum* (from *bilis*, bile, and *fel*, bile). Fr., *acide bilifellinique.* Ger., *Bilifellinsäure.* Berzelius's name for a supposed biliary acid which was probably a mixture. [B, 5.]

BILIFICATION, n. Bil-i²-fi²-ka′shu³n. From *bilis*, bile, and *facere*, to make. The process of the formation of bile. [L, 14.]

BILIFLAVIN, n. Bil-i²-flav′i²n. From *bilis*, bile, and *flavus*, reddish yellow. Fr., *biliflavine.* A yellow substance produced by the prolonged action of silver oxide upon biliverdin. [B, 2.]

BILIFULVIC ACID, n. Bil-i-fu³l′vi²k. From *bilis*, bile, and *fulvus*, reddish yellow. Fr., *acide bilifulvique.* Ger., *Bilifulvinsäure.* See BILIFULVIN.

BILIFULVIN, n. Bil-i²-fu³l′vi²n. Lat., *bilifulvinum.* Fr.; *bilifulvine.* Ger., *Bilifulvin.* Berzelius's name for a yellow crystalline substance obtained by him from ox's bile; probably not a normal constituent of human bile. [K.]

BILIFUSCIN, n. Bil-i²-fu³s′si²n. From *bilis*, bile, and *fuscus*, brown. Fr., *bilifuscine.* Ger., *Bilifuscin.* A pigment, $C_{16}H_{20}N_2O_4$, or $C_{32}H_{20}N_2O_8$ (being bilirubin plus one or two molecules of water); an almost black, shining, brittle body, olive-green in powder, obtained by Städeler from the residue left after the action of hydrochloric acid on the bilirubin of gall-stones; insoluble in ether and scarcely soluble in chloroform. [A, 448.]

BILIGULARES (Lat.), n. f. pl. Bi(bi²)-li²g-u²(u⁴)-la(la³)′rez-(ras). Of Dumortier, a family of the *Ligulacia*, including *Mutisia* and other genera. [B, 170.]

BILIGULATUS (Lat.), adj. Bi(bi²)-li²g-u²(u⁴)-la(la³)′tu³s(tu⁴s). From *bis*, doubly, and *ligula*, a tongue. Fr., *biligulé, biliguliforme.* Shaped like two tongues, or having two tongue-like appendages. [B, 38; L, 41.]

BILIHUMIN, n. Bil-i²-hu²m′i²n. From *bilis*, bile, and *humus* (*q. v.*). Fr., *bilihumine.* Ger., *Bilihumin.* A black-brown powdery body which remains after washing with ammonia water the residue left when gall-stones have been treated with ether, water, dilute acids, chloroform, and alcohol. [A, 448.]

BILIMBI (Bengal.), n. The *Averrhoa b.* [B, 172.]

BILIN, n. Bil′i²n. Fr., *biline.* Ger., *Bilin.* A resinous mass formed by freeing bile from mucus and evaporating it to dryness; made up of an impure mixture of glycocholate and taurocholate of sodium. [A, 385, 448; L, 120.]

BILIN (Ger.), n. Bel-en′. A town in Bohemia, where there is a spring containing sodium, magnesium, and calcium carbonates, sodium chloride, potassium and sodium sulphates, and silica. [A, 363.]

BILINEURINE, n. Bil-i²-nu²r′en. From *bilis*, bile, and νεῦρον, a nerve. Fr., *bilineurine.* Ger., *Bilineurin.* The so-called neurine of the bile. [A, 448.] See CHOLINE.

BILINGUA (Lat.), n. f. Bi(bi²)-li²n²′gwa³. From *bis*, doubly, and *lingua*, the tongue. The *Ruscus hypoglossum.* [B, 180.]—**Folia bilinguæ, Herba bilinguæ.** The herb of *Ruscus hypoglossum.* [B, 180.]

BILINGUIS (Lat.), adj. Bi(bi²)-li²n²′gwi²s. From *bis*, doubly, and *lingua*, a tongue. Fr., *bilingue.* See BILIGULATUS.

BILIO-NERVO-SANGUINEOUS, adj. Bi²l″i²-o-nu⁵rv″′o-sa²n²-gwi²n′e-u³s. From *bilis*, bile, *nervus*, a nerve, and *sanguis*, blood. See *B.-n.-s.* TEMPERAMENT.

BILIOSITY, n. Bi²l-i²-o²s′i²t-i². An old term for a supposed "hepatic sensation" which guided the liver in selecting the elements necessary for the formation of bile. [L, 14.]

BILIOSO-NERVOUS, adj. Bi²l-i²-o″so-nu⁵rv′u³s. Fr., *bilioso-nerveux.* See *B.-n.* TEMPERAMENT.

BILIOUS, adj. Bi²l′yu³s. Gr., χολερικός. Heb., *caret.* Ar., *zafravi.* Lat., *biliosus.* Fr., *bilieux.* Ger., *gallicht, gallig, gallensüchtig.* It., Sp., *bilioso.* 1. Pertaining to, containing, or due to, bile. 2. Pertaining to, affected with, or disposed to, biliousness (*q. v.*). [A, 325; D.] See also *B.* TEMPERAMENT.

BILIOUSNESS, n. Bi²l′yu³s-ne²s. A popular term for a digestive derangement characterized by constipation, intellectual sluggishness, a feeling of general discomfort, offensiveness of the breath, and a furred state of the tongue, with or without headache, vomiting of bile, and abdominal pain; attributed to a defective secretion or outflow of bile. [D.]

BILIPHÆIN, n. Bil-i²-fe′i²n. Lat., *biliphæinum* (from *bilis*, bile, and φαιός, of a dusky color). Fr., *biliphéine.* Ger., *Biliphäin.* See CHOLOPHÆIN.

BILIPRASIN, n. Bil-i²p′ra²s-i²n. From *bilis*, bile, and *prasinus* (= πράσινος), leek-green. Fr., *biliprasine.* Ger., *Biliprasin.* A green pigment, $C_{16}H_{22}N_2O_6$, found in gall-stones. [M. Seligsohn (A, 319); K.]

BILIPURPIN, BILIPURPURIN, n's. Bil-i²-pu⁵rp′i²n, -u²r-i²n. From *bilis*, bile, and *purpureus*, purple. Fr., *bilipurpurine.* A purplish substance derived from biliverdin by the action of silver oxide. [A, 385; B, 2.]

BILIPYRRHIN, n. Bil-i²-pi²r′ri²n. See CHOLEPYRRHIN.

BILIQUE (Fr.), adj. Bel ek. See BILIARY and BILIC ACID.

BILIRUBIN, n. Bil-i²-ru²b′i²n. From *bilis*, bile, and *ruber*, red. Fr., *bilirubine.* Ger., *Bilirubin.* An orange-colored crystalline biliary pigment, $C_{16}H_{18}N_2O_3$, or $C_9H_9NO_2$, allied to hæmatin and hæmatoidin, soluble in alkaline solutions and in chloroform; a weak acid; found in the urine in cases of jaundice and, in combination with calcium, in the nuclei of gall-stones. [M. Seligsohn (A, 319); A, 432; K.]—**B′calcium** (Ger.). A compound of b. and calcium, found in gall-stones. [M. Seligsohn (L, 57).]

BILIS (Lat.), n. f. Bil(bel)′i²s. Gen., *bi′lis.* Abl., *bi′li, -le.* See BILE.—**Bile suffusus.** Jaundiced. [Pliny (A, 312).]—**B. æruginea.** See *Æruginous* BILE.—**B. aquosa.** Thin, watery bile. [A, 325.]—**B. atra.** See ATRABILIS.—**B. bovina.** See FEL *bovis.* —**B. bovina depurata.** 1. Of the Swed. Ph., see FEL *bovis purificatum.* 2. Of the Dan. Ph., see FEL *tauri depuratum siccum.*—**B. bubula.** See FEL *bovis.*—**B. cærulea.** See *Glastine* BILE.—**B. calculosa.** Bile prone to form gall-stones. [A, 325.]—**B. cystica.** See *Cystic* BILE.—**B. fel.** The gall-bladder. [A, 312.]—**B. fellea.** See *Cystic* BILE.—**B. flava.** Ar., *marra zafra.* Gr., χολὴ ξανθή. Fr., *bile jaune.* It., *bile gialla.* Yellow bile; an old term for a mixture of bile, pancreatic juice, and a certain peccant acid principle. [A, 325.]—**B. fluida, B. fluxilis.** Old terms for bile in excess, giving rise to diarrhœa. [A, 325.]—**B. fusca.** Brown bile. [A, 325.]—**B. glastea.** See *Glastine* BILE.—**B. glutinosa.** See *B. spissa.*—**B. hepatica.** See *Hepatic* BILE.—**B. humida.** See *B. aquosa.*—**B. nigra.** See ATRABILIS.—**B. obscura.** See *B. fusca.* —**B. oleosa.** See *B. pinguior.*—**B. pallida.** See BILE *blanche.*—**B. pinguior.** An old term for a fatty state of the bile, to which aversion to food was attributed. [A, 325.]—**B. porcina.** The bile of the hog.—**B. porracea.** An old term for a greenish vomited matter consisting of bile, the digestive secretions, etc. [A, 325.]—**B. rubra.** Red bile. [A, 325.]—**B. russa.** Flame-colored bile. [A, 325.]—**B. spirituosa.** An old term for a supposed biliary vapor to which jaundice was attributed. [A, 325.]—**B. spissa.** Inspissated bile. [A, 325.]—**B. subrubra.** Reddish bile. [A, 325.]—**B. suffusa.** Jaundice. [Pliny (A, 312).]—**B. turgens.** See *B. fluxilis.*—**B. vitellina.** Bile resembling the yolk of a raw egg in color and consistence. [A, 325.]—**B. volatilis.** See *B. spirituosa.*

BILIVERDIN, n. Bil-i²-vu⁵rd′i²n. Lat., *biliverdinum* (from *bilis*, bile, and *viridis*, green). Fr., *biliverdine.* Ger., *Biliverdin.* A crystallizable green pigment, $C_{16}H_{20}N_2O_5$, or $C_8H_9NO_2$, formed by the oxidation of bilirubin; found in the bile and the blood of the *Herbivora.* [A, 432; Städeler (B, 4, 81); K.]

BIL-JHUNJHUN (Bengal.), n. The *Crotalaria retusa.* [B, 172.]

BILL, n. Bi²l. A.-S., *bile.* See BEAK.

BILLARDIERA (Lat.), n. f. Bi²l-ya³rd-i²-a′ra³. Fr., *billardière.* A genus of pittosporaceous shrubs of New Holland. [B, 132.]

BILLBERGIA (Lat.), n. f. Bi²l-be²rg′i²-a³. Fr., *billbergie.* A genus of bromeliaceous plants of Brazil. [A, 385.]

BILLBERGIIN/Æ (Lat.), n. f. pl. Bi²l-be²rg-i²-in(en)′e(a³-e²). In Wittmack's classification of the *Bromeliaceæ*, a subtribe of the *Bromelieæ.* [B, 245.]

BILLENSIA (Lat.), n. f. Bi²l-le²ns′i²-a³. A corruption of *epilepsia* (*q. v.*). [F. B. Stephenson, "N. Y. Med. Jour.," July 24, 1886, p. 92.]

BILLON (Fr.), n. Bel-yo²n². The *Vicia sativa.* [B, 132; L, 105.]

BILLOO (Teloogoo), n. The *Swietenia chloroxylon.* [B, 172.]

BILLOO-GADDI (Teloogoo), n. The *Saccharum spontaneum.* [B, 173.]

BILLOT (Fr.), n. Bel-lo. In veterinary parlance, a piece of wood to which is attached a bag containing a dose to be administered to a horse. [A, 301.]

BILLY-BUTTON, n. Bi^{2}l'li^2-bu^{3}tn. A double-flowered variety of the *Saxifraga granulata*. [L, 73.]

BILNA, n. Bi^{2}l'na^3. See PÜLLNA.

BILOBATE, adj. Bi-lob'at. Lat., *bilobatus*, *bilobus* (from *bis*, doubly, and λοβός, a lobe). Fr., *bilobé*. Ger., *zweilappig*. Having two lobes; in botany, divided into two lobes by an obtuse sinus. [B, 132; C; L, 43.]

BILOBATION, n. Bi-lob-a'shu^{3}n. A division into two lobes or the state of being so divided. [L, 121.]

BILOBED, BILOBOUS, adj's. Bi-lobd', -lob'u^{3}s. See BILOBATE.

BILOBULAR, BILOBULATED, adj's. Bi-lo^{2}b'u^{2}l-a^{3}r, -ate^{2}d. Fr., *bilobulé*. Having two lobules. [L, 43.]

BILOBUS (Lat.), adj. Bi^{2}l'o(o^2)-bu^{3}s(bu^{4}s). See BILOBATE.

BILOCULAR, adj. Bi-lo^{2}k'u^{2}l-a^{3}r. Lat., *bilocularis*, *biloculatus* (from *bis*, doubly, and *loculus*, a compartment). Fr., *biloculaire*. Ger., *zweifächerig*. Divided into two compartments. [B, 198.]

BILOPHODONT, adj. Bi-lo^{2}f'o-do^{2}nt. From *bis*, doubly, λόφος, a ridge, and ὀδούς, a tooth. Having two ridges on the cutting surface of the teeth. [L, 121.]

BILOPHOS, BILOPHUS (Lat.), adj's. Bi^{2}l'o(o^2)-fo^{2}s, -fu^{3}s-(fu^{4}s). From *bis*, doubly, and λόφος, a tuft. Fr., *bilophe*. Having a tuft of long feathers behind each eye. [L, 180.]

BILSAMEN (Ger.), **BILSAMKRAUT** (Ger.), n's. Bel'za^{3}m-e^{2}n, -kra^3-ut. The genus *Hyoscyamus*. [L, 43.]

BILSENBOHNE (Ger.), n. Bel'ze^{2}n-bon-e^2. The *Hyoscyamus niger*. [L, 43.]

BILSENKRAUT (Ger.), n. Bel'ze^{2}n-kra^3-ut. The genus *Hyoscyamus*. [L, 43, 77.]—**B'extract.** See *Extractum* HYOSCYAMI.—**B'öl** [Ger. Ph.]. See *Oleum* HYOSCYAMI *infusum*.—**B'tinctur.** See *Tinctura* HYOSCYAMI.—**Gemeines B.** The *Hyoscyamus niger*. [B, 180.]—**Goldgelbes B.** The *Hyoscyamus aureus*. [B, 180.]—**Indianisches B., Peruvianisches B.** Tobacco leaves. [B, 180.]—**Schluttenartiges B.** The *Hyoscyamus physaloides*. [B, 180.]—**Schwarzes B.** The *Hyoscyamus niger*. [B, 180.]—**Weisses B.** The *Hyoscyamus albus*. [B, 180.]

BILSENSAFT (Ger.), n. Bi^{2}l'ze^{2}n-za^{3}ft. See *Succus* HYOSCYAMI.

BILSENSAMEN (Ger.), n. Bel'ze^{2}n-za^{3}m-e^{2}n. See *Semen hyoscyami*.—**B'öl.** See *Oleum* HYOSCYAMI *infusum*.

BILSLING (Ger.), n. Bels'li^{2}ng. The *Boletus bovinus*. [L, 46.]

BILSTED, n. Bi^{2}l'ste^{2}d. The *Liquidambar styraciflua*. [B, 81.]

BILTON, n. Bi^{2}l'to^{2}n. A place near Harrogate (*q. v.*), England, where there is a sulphurous spring. [L, 57.]

BILULO, n. The *Mangifera indica*. [B, 132; L, 105.]

BILUNULÉ (Fr.), adj. Be-lu^{6}n-u^{6}l-a. From *bis*, doubly, and *lunula* (*q. v.*). Marked with two crescentic spots. [L, 109.]

BILVA (Teloogoo), n. The *Cratæva Roxburghii*. [B, 172.]

BILZ (Ger.), n. Bi^{2}ltz. The *Boletus rufus*. [L, 105.]

BILZE (Ger.), n. Bi^{2}ltz'e^2. The *Prunus insititia*. [L, 46.]

BILZWURZ (Ger.), n. Bi^{2}ltz'vurtz. The *Anemone pulsatilla*. [L, 43.]

BIMACULATE, BIMACULATED, adj's. Bi-ma^{2}k'u^{2}l-at, -e^{2}d. From *bis*, doubly, and *maculatus*, spotted. Fr., *bimaculé*. Ger., *doppelfleckig*. Marked with two spots. [L, 108.]

BIMAHOLZ (Ger.), n. Be'ma^3-ho^{3}ltz. The wood of the *Cæsalpinia sappan*. [B, 180.]

BIMALATE, n. Bi-mal'at. That one of a series of malates that contains twice as much malic acid as the first member of the series. [B, 38.]

BIMANA (Lat.), n. n. pl. Bi^{2}m'a^{3}n-a^3. From *bis*, doubly, and *manus*, a hand. Fr., *bimanes*. Ger., *Zweihänder*. Of Cuvier, an order of mammals, including man only. [L, 173.]

BIMANOUS, adj. Bi^{2}m'a^{2}n-u^{3}s (bi-man'u^{3}s). Lat., *bimanus*. Fr., *bimane*. Ger., *zweihändig*. Belonging to or resembling the *Bimana*. [L, 14.]

BIMANUAL, adj. Bi-ma^{2}n'u^2-a^{2}l. Fr., Ger., *bimanuel*. Performed with both hands (said of an examination or operation).

BIMARGARATE, n. Bi-ma^{3}r'ga^{2}r-at. A margarate containing twice as much margaric acid as a normal margarate. [L, 41.]

BIMARGINATE, adj. Bi-ma^{3}r'ji^{2}n-at. Lat., *bimarginatus* (from *bis*, doubly, and *marginatus*, inclosed with a margin). Fr., *bimarginé*. Having two borders. [B, 38; L, 42.]

BIMASHOLZ (Ger.), **BIMAS-SAPPANHOLZ** (Ger.), n's. Be'ma^{3}s-ho^{3}ltz, -za^{3}p-pa^{3}n-ho^{3}ltz. See BIMAHOLZ.

BIMECONATE, n. Bi-me^{2}k'o^{2}n-at. An acid meconate; one containing twice as much meconic acid as a normal meconate. [B.]

BIMEMBRAL, adj. Bi-me^{2}m'bra^{2}l. Lat., *bimembris* (from *bis*, doubly, and *membrum*, a member). Having two limbs. [L, 73, 119.]

BIMERIDÆ (Lat.), n. f. pl. Bi(bi^2)-me^{2}r'i^{2}d-e(a^3-e^2). A family of gymnoblastic hydroids. [L. 193.]

BIMESTRAL, adj. Bi-me^{2}st'ra^{2}l. Lat., *bimestris* (from *bis*, doubly, and *mensis*, a month). Fr., *bimestre*. Lasting two months, also two months old. [B; L, 73, 119.]

BIMÉTALLIQUE (Fr.), adj. Be-ma-ta^{3}l-lek. See DIMETALLIC.

BIMETHYLACETONE, n. Bi-me^{2}th-i^{2}l-a^{2}s'e^{2}t-on. See DIMETHYLACETONE, and for other words in *Bimethyl-*, see the corresponding words in *Dimethyl-*.

BIMOLYBDATE, n. Bi-mo^{2}l-i^{2}b'dat. A molybdate that contains twice as much molybdic acid in proportion to the base as a normal molybdate. [B, 38.]

BIMORPHE (Fr.), adj. Be-mo^{2}rf. See DIMORPHOUS.

BIMOUCHETÉ (Fr.), adj. Be-mush-ta. Marked with two small spots. [L, 41.]

BIMS (Ger.), **BIMSENSTEIN** (Ger.), **BIMSTEIN** (Ger.), n's. Bi^{2}ms, bi^{2}ms'e^{2}n-stin, bi^{2}m'stin. Pumice-stone. [B, 180; L, 105.]—**Bimsteinartig.** Resembling pumice-stone. [L, 46.]—**Bimsteingewächs.** Periostosis. [L, 80.]—**Bimsteinpulver.** Powdered pumice-stone. [L, 46.]

BIMUCATE, n. Bi-mu^{2}k'at. A mucate containing twice as much mucic acid in proportion to the base as a normal mucate. [B.]

BI-MUCOUS, adj. Bi-mu^{2}k'u^{3}s. From *bis*, doubly, and *mucus* (*q. v.*). Pertaining to or connecting two mucous surfaces (said of fistulæ). [J. Dreschfeld, "Med. Chron.," May, 1887, p. 89.]

BIMUCRONATUS (Lat.), adj. Bi(bi^2)-mu^2(mu)-kron-a(a^3)'tu^{3}s-(tu^{4}s). From *bis*, doubly, and *mucronatus*, pointed. Fr., *bimucroné*. Having two short sharp points, usually opposite. [B, 38; L, 42, 180.]

BIMUS (Lat.), adj. Bi(be)'mu^{3}s(mu^{4}s). Two years old; lasting two years. [B.]

BIMUSCULAR, adj. Bi-mu^{3}s'ku^{2}l-a^{3}r. From *bis*, doubly, and *musculus*, a muscle. See DIMYARIOUS.

BIMUSCULOSA (Lat.), n. n. pl. Bi(bi^2)-mu^{3}s(mu^{4}s)-ku^2(ku^4)-lo'sa^3. See DIMYARIA.

BINA (Bengal., Hind.), n. The *Avicennia tomentosa*. [B, 172.]

BINAIRE (Fr.), adj. Ben-a^{2}r. See BINARY.

BINAL, adj. Bin'a^{2}l. See BINARY.

BINÄR (Ger.), adj. Ben-ar'. See BINARY.

BINARIUS (Lat.), adj. Bi^{2}n-a(a^3)'ri^2-u^{3}s(u^{4}s). See BINARY.

BINARSENATE, n. Bi^{2}n-a^{3}rs'e^{2}n-at. See DIARSENATE.

BINARY, adj. Bin'a-ri^2. Lat., *binarius*. Fr., *binaire*. Ger., *binär*, *binarisch*. It., Sp., *binario*. Composed of two parts or things. In chemistry, containing only two different elements (*e. g.*, the hydrocarbons). [B.] See *B.* COMPOUNDS and *B.* THEORY.

A BINATE LEAF. (AFTER YOUMANS.)

BINATE, adj. Bin'at. Lat., *binatus* (from *binus*, two by two). Fr., *biné*. Occurring in pairs; two-fingered, bifoliolate, geminate. [A, 442; B.]

BINATO-BIJUGUS (Lat.), adj. Bin(bi^{2}n)-a(a^3)''to(to^2)-bi(bi^2)'-ju^2(yu^4)-gu^{3}s(gu^{4}s). For deriv., see BINATE and BIJUGOUS. In botany, bigeminate. [B.]

BINATO-PINNATE, adj. Bin-at''o-pi^{2}n'nat. See BIPINNATE.

BINAURAL, adj. Bi^{2}n-a^{4}r'a^{2}l. Lat., *binauralis* (from *bis*, doubly, and *auris*, the ear). Pertaining to or adapted to use with both ears. See *B.* STETHOSCOPE.

BINBAUM (Ger.), n. Ben'ba^3-um. The *Acer campestre*. [L, 46.]

BINCHA (Hind.), n. The *Flacourtia sapida*. [B, 172.]

BINDA (Teloogoo), n. The *Abelmoschus esculentus*. [B, 172.]

BINDBAST (Ger.), n. Bi^{2}nd'ba^{3}st. The *Ulmus campestris*. [L, 46.]

BIND-CORN, n. Bind'ko^{2}rn. The *Polygonum convolvulus*. [L, 73.]

BINDE (Ger.), n. Bi^{2}nd'e^2. A band, a bandage; in anatomy, a fascia; in entomology, a bar (*q. v.*); in botany, see VITTA. [A, 315; B, 123.]—**Absteigende Hobelb'.** A descending spiral bandage. [L.]—**Achterb'.** See *Figure-of-eight* BANDAGE.—**Achtzehnköpfige B.** See *Eighteen-tailed* BANDAGE.—**Aderb'.** A bandage for compressing a blood-vessel (*e. g.*, the vein after venesection). [A, 315.]—**Aehrenb'.** See *Spica*-BANDAGE.—**Aufgerollte B.** A roller bandage. [L, 80.]—**Aufhebeb'.** A truss or a suspensory bandage. [L, 46.]—**Aufsteigende Hobelb'.** An ascending spiral bandage. [L.]—**Augenb'.** An eye bandage. [L, 135.]—**Auseinander treibende B.** See *Dividing* BANDAGE.—**Austreibende B.** See *Expelling* BANDAGE.—**Bauchb'.** An abdominal bandage.—**Bauchb' der Wöchnerin.** See *Obstetric* BINDER.—**B'arm.** See the major list and BRACHIUM *conjunctivum*.—**B'gewebe, B'haut.** See the major list.—**B'mittel.** An agglutinant. [L, 46.]—**B'neinwickelung.** The art or process of bandaging. [L, 219.]—**B'nstreif.** A strip of bandage. [L, 219.]—**B'stück.** See JUGAMENTUM.—**B'system des Kleinhirns.** The connective system of the cerebellum. [I, 11.]—**B'zeug.** A dressing-case. [E.]—**Breite B.** See FASCIA *lata*.—**Contentiv-B.** See *Retaining* BANDAGE.—**Doppelte T-B.** See *Double T*-BANDAGE.—**Dreieckige B.** See *Triangular* BANDAGE.—**Dreiköpfige Habichtsb'.** See ACCIPITER *triceps*.—**Einäugige B.** A bandage for one eye. [L, 43.]—**Einfache B.** See *Simple* BANDAGE.—**Einfache T-B.** See *T*-BANDAGE.—**Einköpfige B.** A single-headed roller bandage. [L.]—**Expulsiv-B.** See *Expelling* BANDAGE.—**Flache B.** See FASCIA *plana*.—**Fleischmachende B.** See *Incarnative* BANDAGE.—**Fuhrmannsb'.** See AURIGA (1st def.).—**Fünfköpfige Habichtsb'.** See ACCIPITER *quinqueceps*.—**Gefensterte B.** See *Fenestrated* BANDAGE.—**Gestärkte B.** See *Starch* BANDAGE.—**Gipsb'.** See *Plaster-of-Paris* BANDAGE.—**Habichtsb'.** See ACCIPITER.—**Halfter-B.** See *Halter* BANDAGE.—**Haltende B.** See *Containing* BANDAGE.—**Herabsteigende B.** A descending roller bandage. [L, 80.]—**Hobelb'.** See *Spiral* BANDAGE.—**Jochb'.** See *Scapulary* BANDAGE.—**Klaffende B.** See *Gaping* BANDAGE.—**Kleisterb'.** See *Starch* BANDAGE.—**Kreisb'.** See *Circular* BANDAGE.—**Kreuzförmige B.** See *Crossed* BANDAGE.—**Kreuzknotenb'.** See *Knotted* BANDAGE.—**Kriechende B.** See *Gaping* BANDAGE.—**Kriechende Hobelb'.** See *Open spiral* BANDAGE.—**Leibb'.** See *Body*-BANDAGE.—**Menstruationsb'.** A bandage or

napkin to be worn during menstruation. [L. Fürst, "Ctrlbl. f. Gynäk.," Sept. 12, 1885, p. 577.]—**Nasenb'.** See *Nose*-BANDAGE.—**Pfeilnahtb'.** See *Sagittal* BANDAGE.—**Rollb'.** See *Roller*-BANDAGE.—**Schneckenförmige B.** A spiral bandage. [L.]—**Schultertragb'.** See *Scapulary* BANDAGE.—**Scultet'sche B.** See *Many-tailed* BANDAGE.—**Skapulierb'.** See *Scapulary* BANDAGE.—**Sternb' der Brust (oder des Rückens).** See *Chest*-BANDAGE.—**T-B., Tförmige B.** See *T*-BANDAGE.—**Trageb'.** A suspensory bandage.—**Tuchb'.** A handkerchief bandage. [L, 219.]—**Uebergeschlagene B., Umgekehrte B.** A reversed bandage. [L.]—**Vereinigende B., Vereinigungsb'.** See *Uniting* BANDAGE.—**Vierköpfige B.** A four-tailed bandage. [L, 43.]—**Vielköpfige B.** See *Many-tailed* BANDAGE.—**Wurmförmige B.** See *Reversed* BANDAGE.—**Zusammengesetzte B.** See *Compound* BANDAGE.—**Zusammenhaltende B.** A contentive bandage. [L.]—**Zweiäugige B.** A bandage for both eyes. [L, 30.] See BINOCULUS.—**Zweiköpfige B.** A double-headed roller bandage. [L.]

BINDEARM (Ger.), n. Bi2nd'e2-a3rm. See BRACHIUM *conjunctivum*.—**B. im Kleinhirne.** A cerebellar peduncle. [I, 3; K.]—**B'kreuzung.** The decussation of the superior peduncles of the cerebellum within the posterior half of the pons; described by Meynert as taking place between the stratum lemnisci and the posterior longitudinal fasciculus. [I, 11; K.]—**Hinterer B.** See *Posterior* BRACHIUM.—**Vorderer B.** See *Anterior* BRACHIUM.

BINDEGEWEBE (Ger.), n. Bi2nd'e2-ge2-ve2b'e2. See *Connective* TISSUE.—**Areoläres B.** See *Areolar* TISSUE.—**B'knorpel.** White fibro-cartilage. [J.]—**Fetthaltiges B.** Adipose tissue. [L, 115.]—**Fibrilläres B.** Fibrous tissue. [J.]—**Gallertiges B.** Gelatinous connective tissue (*e. g.*, that of the umbilical cord). [A, 8; H.]—**Geformtes B.** See *Fibrilläres B.*—**Granulirtes B.** See NEUROGLIA.—**Lymphadenoides B.** See *Adenoid* TISSUE.—**Poröses B.** See NEUROGLIA.—**Reifes B.** See *Fibrilläres B.*—**Reticuläres B.** Reticulated connective tissue. [J.]—**Ungeformtes B., Unreifes B.** See *Gallertiges B.*

BINDEGEWEBIG (Ger.), adj. Bi2nd'e2-ge2-ve2b-i2g. Pertaining to or consisting of connective tissue. [J.]

BINDEGEWEBSBALKEN (Ger.), n. pl. Bi2nd'e2-ge2-ve2bs-ba3lk-e2n. See *Connective-tissue* TRABECULÆ.

BINDEGEWEBSBÜNDEL (Ger.), n. Bi2nd'e2-ge2-ve2bs-bu6nd-e2l. See *Connective-tissue* FASCICULUS.—**Umsponnenes B.** See *Spiral* FIBRE.

BINDEGEWEBSEMPHYSEM (Ger.), n. Bi2nd'e2-ge2-ve2bs-e2m-fu6s-e2m. Emphysema of connective tissue. [A, 319.]

BINDEGEWEBSENTZÜNDUNG (Ger.), n. Bi2nd'e2-ge2-ve2bs-e2nt-tzu6nd-ung. Inflammation of connective tissue. [A, 319.]

BINDEGEWEBSFADEN (Ger.), **BINDEGEWEBSFASER** (Ger.), n's. Bi2nd'e2-ge2-ve2bs-fa3d-e2n, -fa3z e2r. See *Connective-tissue* FIBRE.

BINDEGEWEBSFIBRILLE (Ger.), n. Bi2nd'e2-ge2-ve2bs-fe-bri2l-le2. See *Connective-tissue* FIBRIL.

BINDEGEWEBSHÜLLE (Ger.), n. Bi2nd'e2-ge2-ve2bs-hu6l-le2. An envelope of connective tissue. [L, 115.]

BINDEGEWEBSKORB (Ger.), n. Bi2nd'e2-ge2-ve2bs-korb. See *Plexiform connective* TISSUE.

BINDEGEWEBSKÖRPERCHEN (Ger.), n. Bi2nd'e2-ge2-ve2bs-ku5rp-e2r-ch2e2n. See *Connective-tissue* CORPUSCLE.—**Spindelförmiges B.** See *Fixed connective-tissue* CORPUSCLE.

BINDEGEWEBSLÜCKE (Ger.), n. Bi2nd'e2-ge2-ve2bs-lu6k-e2. See AREOLA.

BINDEGEWEBSNETZ (Ger.), n. Bi2nd'e2-ge2-ve2bs-ne2tz. See NEUROGLIA and *Connective-tissue* PLEXUS.

BINDEGEWEBSNEUBILDUNG (Ger.), n. Bi2nd'e2-ge2-ve2bs-noi-bi2ld-ung. A new formation of connective tissue. [A, 319.]

BINDEGEWEBSSCHEIDE (Ger.), n. Bi2nd'e2-ge2-ve2bs-shid-e2. A sheath of connective tissue. [L, 115.]

BINDEGEWEBSZELLE (Ger.), n. Bi2nd'e2-ge2-ve2bs-tze2l-le2. See *Connective-tissue* CORPUSCLE.—**Fixe B.** See *Fixed connective-tissue* CORPUSCLE.—**Wandernde B'n.** See *Wandering* CELLS.

BINDEHAUT (Ger.), n. Bi2nd'e2-ha3-ut. See CONJUNCTIVA.—**Augapfelb', Augenb'.** The ocular conjunctiva. [L, 115.]—**Augenlidb'.** The palpebral conjunctiva.—**B'blennorrhöe.** See BLENNORRHŒA *conjunctivæ*.—**B'fett.** Lipoma of the conjunctiva. [F.]

BINDEND (Ger.), adj. Bi2nd'e2nd. Agglutinant. [L, 46.]

BINDER, n. Bind'u5r. From A.-S., *bindan*, to bind. A bandage.—**Obstetric b.** Ger., *Bauchbinde der Wöchnerin.* The abdominal bandage that is applied to women after delivery, reaching from the lower ribs to the space between the crest of the ilium and the trochanter major.

BINDESTOFF (Ger.), n. Bi2nd'e2-sto3f. Gluten. [A, 301.]

BINDESUBSTANZ (Ger.), n. Bi2nd'e2-zub-sta3ntz. Connective material or tissue. [J; L, 115.]—**B'elemente, B'gebilde, B'körperchen, B'zellen.** Connective-tissue corpuscles. [J.]—**Spongiöse B.** See NEUROGLIA.

BINDUNG (Ger.), n. Bi2nd'ung. A binding, connection, agglutination; that which binds. [L, 46.]—**B'shäutchen des Auges.** See CONJUNCTIVA.—**B'smittel.** An agglutinant. [L, 46.]

BINDWEB, n. Bind'we2b. See NEUROGLIA.

BINDWEED, n. Bind'wed. A popular name for several species of *Convolvulus*, especially the *Convolvulus arvensis*, and for the *Smilax aspera*. [B, 19.]—**Black b.** The *Polygonum convolvulus*. [B, 19.]—**Blue b.** The *Solanum dulcamara*. [B.]—**False b.** The genus *Ipomœa*. [B, 34.]—**Knot-b.** See *Black b.*—**Mallow-b.** The *Convolvulus althæoides*. [B, 275.]—**Nightshade-b.** The *Circæa luteliana*. [B, 275.]—**Riviera b.** See *Mallow-b.*—**Rosy-flowered b.** The *Convolvulus sepium*. [B, 275.]—**Sea-b.** The *Convolvulus soldanella*. [B, 275.]—**Small b.** The *Convolvulus arvensis*. [B.]

BINDWEIDE (Ger.), n. Bi2nd'vid-e2. The *Salix vitellina* and the *Clematis vitalba*. [A, 315.]

BINDWITH, n. Bind'wi2th. The genus *Clematis*, especially the *Clematis vitalba*. [B, 19.]

BINDWURM (Ger.), n. Bi2nd'vurm. A popular name for an entozoon of the genus *Distoma*. [A, 300.]

BINÉ (Fr.), adj. Be-na. See BINOUS.

BINERVATE, BINERVIOUS, adj's. Bi-nu5rv'at, -i2-u3s. Lat., *binervatus*, *binervius* (from *bis*, doubly, and *nervus*, a nerve). Fr., *binervé*. In botany, having two nervures. [B, 1.]

BINERVULATUS (Lat.), adj. Bi(bi2)-nu5r(ne2r)-vu2(wu4)-la-(la3)'tu3s(tu4s). Fr., *binervulé*. Having two nervules (applied by Mirbel to the placenta in plants wh_n it has two cords made up of nutrient vessels). [B, 1.]

BINETSCH (Ger.), n. Bi2n-e2ch'. Spinage. [L, 46.]

BINEWEED, n. Bin'wed. See BINDWEED.

BING, n. The choicest variety of green tea. [B, 180.]

BINGALLE, n. See BENGALE.

BING BING, n. See BING.

BINGELKRAUT (Ger.), n. Bi2ng'e2l-kra3-ut. The genus *Mercurialis*. [B.]—**Ausdauerndes B.** The *Mercurialis perennis*. [B, 180.]—**Einjähriges B.** The *Mercurialis annua*. [B, 180.]

BINGEN (Ger.), n. Bi2ng'e2n. A place on the Rhine, in Germany, where there is a grape-cure establishment. [A, 385; L, 20.]

BINI (Lat.), adj. m. pl. Bi(be)'ni(ne). See BINOUS.

BINIFLOROUS, adj. Bi-ni2-flor'u3s. Lat., *biniflorus* (from *bini*, in pairs, and *flos*, a flower). Fr., *biniflore*. Producing flowers in pairs. [B, 19.]

BINIODIDE, n. Bi2n-i'o-di2d(did). Lat., *biniodidum*. Fr., *bi-iodure*. Ger., *Bijodür*. That one of a series of iodides of the same element or radicle that contains twice as much iodine as the first member of the series. [B.]

BINITRATE, n. Bi-nit'rat. From *bis*, doubly, and *nitrum* (= νίτρον), nitre. See DINITRATE.

BINITRÉ (Fr.), adj. Be-ne-tra. Doubly nitrated; containing two molecules of nitryl. [B.]

BINITRO-BENZINE (Fr.), n. Be-ne-tro-ba3n2-zen. See DINITROBENZENE, and for other words in *Binitro-*, see the corresponding words in *Dinitro-*.

BINKELWEIZEN (Ger.), n. Bi2n2k'e2l-vitz-e2n. The *Triticum vulgare*. [B, 180.]

BINKOHUMBA, n. The *Phyllanthus urinaria*. [A, 385.]

BIN-LANG (Chin.), n. The areca nut. ["Union méd.," June 1, 1886, p. 893.]

BINNBAUM (Ger.), n. Bi2n'ba3-um. The *Acer campestris*. [A, 315.]

BINNENEPITHEL (Ger.), n. Bi2n'ne2n-e2p-i2-te2l. See ENDOTHELIUM.

BINNENPLASMA (Ger.), n. Bi2n'ne2n-pla3s-ma3. The mass of protoplasm observed in the central part of a fat cell which is undergoing retrograde metamorphosis. [Flemming, "Arch. f. mikr. Anat.," 1876, p. 476 (J).]

BINO-ANNULAIRE (Fr.), adj. Be-no-a3n-nu6-la2r. Having two rings. [L, 41.]

BINOCLE (Fr.), adj. and n. Bi2n-okl. See BINOCULAR and BINOCULUS.

BINOCULAR, adj. Bi2n-o2k'u2-la3r. Lat., *binocularis* (from *bini*, two by two, and *oculus*, an eye). Fr., *binoculaire* (as a n., *binocle*). Ger., *binoculär*, *zweiäugig*. It., *binoculo*. Sp., *binocular*. 1. Having two eyes. [L, 41.] 2. Pertaining to, affecting, or fitted for use with, both eyes; as a n., an optical instrument to be used with both eyes. [F.] See *B.* ACCOMMODATION, *B. far* POINT, *B. near* POINT, *B.* MICROSCOPE, *B.* OPHTHALMOSCOPE, and *B.* VISION.

BINOCULATE, adj. Bi2n-o2k'u2-lat. Fr., *binoculé*. Having two eyes. [L, 42.]

BINOCULUS (Lat.), n. m. Bi2n-o2k'u2(u4) lu3s(lu4s). From *bis*, doubly, and *oculus*, an eye. Fr., *binocle*, *œil double*. Ger., *zweiäugige Binde*. It., *binoculo*. Sp., *binóculo*. A figure-of-eight bandage applied to the head in such a manner as to cover both eyes. [F.]

BINODAL, adj. Bi-nod'a2l. From *bis*, doubly, and *nodus*, a knot. In botany, composed of two nodes only. [B, 19.]

BINOLEATE, n. Bi2n-ol'e-at. From *bis*, doubly, and *oleum*, oil. Fr., *bioléate*. An oleate containing twice as much of the oleic-acid element as is contained in a normal oleate. [L, 180.]

BINOTISCH (Ger.), adj. Bi2n-ot'i2sh. From *bis*, doubly, and οὖς, the ear. See BINAURAL.

BINOUS, adj. Bin'u3s. Lat., *binus*. Fr., *biné*. Ger., *gezweit*. In botany, disposed in pairs or arising as a pair from a common point of origin. [A, 300.]

BINOXALATE, n. Bi2n-o2x'a2l-at. Lat., *binoxalas*. An acid oxalate; one that contains twice as much oxalic acid as a normal oxalate. [B.]

BINOXIDE, n. Bi2n-o2x'i2d(id). From *bis*, doubly, and *oxide* (*q. v.*). Fr., *bi-oxyde*. Ger., *Bioxyd*. It., *biossido*. Sp., *bióxido*. That one of a series of oxides of the same element or radicle that contains twice as much oxygen as the first member of the series. [B.]

BINSE (Ger.), n. Bi^{2}n'ze^2. A rush (applied to the genera *Juncus, Scirpus, Carex,* and *Agrostis*). [B, 131.]—**B'nblume.** The *Butomus umbellatus.* [B, 131.]—**B'ngras.** The genera *Carex* and *Scirpus.* [B, 131.]—**B'ngräser.** The *Cyperaceæ.* [L, 80.]—**B'nhalm.** In botany, a culm. [B.]—**B'nlauch.** The *Allium schœnoprasum.* [L, 64.]—**B'nnarcisse.** The *Narcissus jonquilla.* [A, 315.]—**B'npfriemen.** The *Genista juncea.* [L, 80.]—**B'nrölse.** The genus *Corymbium.* [A, 315.]—**B'nseide.** The genus *Eriophorum.* [A, 315.]—**Blumenb'.** See *B'nblume.*—**Knollige B.** The *Scirpus tubulosus.* [B, 180.]—**Spelzenb', Sperrige B.** The *Juncus squarrosus.* [A, 315.]

BINSICUS (Lat.), adj. Bi^{2}n'si^{2}k-u^{3}s(u^{4}s). From a Rabbinical word, *binsica,* signifying insanity. Characterized by mental disturbance. [A, 325; L, 84.]—**Binsica mors.** Death preceded by mania. [L, 119.]

BINTAL, n. The *Basella rubra.* [L, 105.]

BINTU, n. The *Eubriza hortulana.* [L, 105.]

BINUCLEAR, BINUCLEATE, adj's. Bi-nu^2'kle-a^{3}r, -at. From *bis,* doubly, and *nucleus* (*q. v.*). Having two nuclei. [J; L, 56.]

BINUCLEOLATE, adj. Bi-nu^2-kle'o-lat. From *bis,* doubly, and *nucleolus* (*q. v.*). Having two nucleoli (said of a nucleus). [J.]

BINUS (Lat.), adj. Bi(be)'nu^{3}s(nu^{4}s). See Binous.

BIO (Fr.), n. Be-o. A place in the department of Lot, France, where there are springs containing calcium sulphate. [A, 385.]

BIOCELLATE, adj. Bi-o^{2}s'e^{2}l-lat. From *bis,* doubly, and *ocellus* (dim. of *oculus*), a little eye. Fr., *biocellé.* Having two eye-like dots. [L, 56.] Cf. Bioculatus.

BIOCHEMIA (Lat.), n. f. Bi(bi^2)-o(o^2)-ke^{2}m(ch^{2}am)-i(e)'a^3. See Biochemistry.

BIOCHEMICAL, adj. Bi-o-ke^{2}m'i^{2}k-a^{2}l. Lat., *biochemicus.* Fr., *biochimique.* Ger., *biochemisch.* Pertaining to biochemistry.

BIOCHEMISTRY, n. Bi-o-ke^{2}m'i^{2}st-ri^2. Lat., *biochemia* (from βίος, life, and χημεία, chemistry). Fr., *biochimie.* Ger., *Biochemie.* The chemistry of living organisms or tissues; a term properly including both animal and vegetable chemistry, but denoting especially the chemistry of living as distinguished from dead matter, or chemistry in its relations to the phenomena of life and the vital processes. [B.]

BIOCHYME (Fr.), n. Be-o-kem. See Biochymus.

BIOCHYMIA (Lat.), n. f. Bi(bi^2)-o(o^2)-ki^{2}m(ch^{2}u^{6}m)-i(e)'a^3. From βίος, life, and χυμεία, chemistry. See Biochemistry.

BIOCHYMUS (Lat.), n. m. Bi(bi^2)-o(o^2)-kim(ch^{2}u^{6}m)'u^{3}s(u^{4}s). From βίος, life, and χυμός, juice. Fr., *biochyme.* Ger., *Pflanzenlebenssaft.* The vital juice, or cell-juice, of plants. [Meyer (A, 322).]

BIOCULATUS (Lat.), adj. Bi(bi^2)-o^{2}k-u^{2}l(u^{4}l)-a(a^3)'tu^{3}s(tu^{4}s). From *bis,* doubly, and *oculus,* an eye. Fr., *bioculé.* Having two spots of color differing from the main color. [L, 180.] Cf. Biocellate.

BIOD, n. Bi'o^{2}d. From βίος, life. A term proposed by Reichenbach for vital force. [K.] See Vis *vitalis,* Irritability, and Od.

BIODESMUS (Lat.), n. m. Bi(bi^2)-o(o^2)-de^{2}s'mu^{3}s(mu^{4}s). From βίος, life, and δεσμός, a bond. Fr., *biodesme.* Ger., *Lebensband, Grundlage und Grundbedingung des Lebens.* A term that seems to have been intended to denote the principle of life as a distinguishing bond of union between living organisms. [A, 322.]

BIODYNAMICS, n. sing. Bi-o-di^{2}n-a^{2}m'i^{2}ks. Lat., *biodynamica, biodynamice,* fem. of adj. *biodynamicus* (from βίος, life, and δύναμις, power), *doctrina* understood. Fr., *biodynamique.* Ger., *Biodynamik, die Lehre von der Lebensthätigkeit.* 1. L. A. Kraus's term for the philosophy of vital activity. [A, 322.] 2. See *Dynamic* biology.

BIODYNAMICUS (Lat.), adj. Bi(bi^2)-o(o^2)-di^{2}n(du^{6}n)-a^{2}m(a^{3}m)'i^{2}k-u^{3}s(u^{4}s). Fr., *biodynamique.* Ger., *biodynamisch.* Pertaining to or in accordance with biodynamics. [A, 322.]

BIOGAMIA (Lat.), n. f. Bi(bi^2)-o(o^2)-ga^{2}m(ga^{3}m)'i^2-a^3. From βίος, life, and γάμος, marriage. Fr., *biogamie.* Ger., *Biogamie.* The blending of two opposed vital properties with an indifferent third property; the union of sensibility and contractility with reproduction. [A, 322.]

BIOGEN, n. Bi'o-je^{2}n. The "od" of Reichenbach; the "spiritual body" ("hypothetical substance of mind"); "spirit in combination with the minimum of matter necessary to its manifestation." [L, 293.]

BIOGÈNE (Fr.), adj. Be-o-zhe^{2}n. See Biogenetic.

BIOGENESIS (Lat.), n. f. Bi(bi^2)-o(o^2)-je^{2}n(ge^{2}n)'e^{2}s-i^{2}s. Gen., *biogene'seos* (*-sis*). From βίος, life, and γένεσις, production. The doctrine of the generation or evolution of organisms from pre-existing organisms, as opposed to abiogenesis (*q. v.*). [L, 146.]

BIOGENETIC, adj. Bi-o-je^{2}n-e^{2}t'i^{2}k. Fr., *biogénique.* Ger., *biogenetisch.* Pertaining to biogenesis. [L, 146.]

BIOGENY, n. Bi-o^{2}j'e^{2}n-i^2. See Biogenesis.

BIOGNOSIS (Lat.), n. f. Bi(bi^2)-o^{2}g-no'si^{2}s. Gen., *biogno'seos* (*-sis*). From βίος, life, and γνῶσις, an investigation. Fr., *biognose.* Ger., *Lebenserforschung.* The science or study of the laws of life. [A, 322, 385.]

BIOLÉATE (Fr.), n. Be-ol-a-a^{3}t. See Binoleate.

BIOLOGICAL, adj. Bi-o-lo^{2}j'i^{2}k-a^{2}l. Lat., *biologicus.* Fr., *biologique.* Ger., *biologisch.* It., *biologico.* Sp., *biológico.* Pertaining to biology.

BIOLOGIST, n. Bi-o^{2}l'o-ji^{2}st. Lat., *biologus.* Ger., *Biolog.* A student of biology.

BIOLOGUS (Lat.), adj. Bi(bi^2)-o^{2}l'o(o^2)-gu^{3}s(gu^{4}s). Biological; as a n., a biologist.

BIOLOGY, n. Bi-o^{2}l'o-ji^2. Lat., *biologia* (from βίος, life, and λόγος, understanding). Fr., *biologie.* Ger., *Biologie.* It., Sp., *biologia.* The science of living organisms; of the phenomena which they manifest or are capable of manifesting, of the conditions of their origin, and of their relations to their surroundings. [A, 12; A. Comte (A, 385).]—**Dynamic b.** Fr., *biologie dynamique.* The science of the activities of living organisms, including physiology and the reciprocal action of organisms and their surroundings. [A. Comte (A, 385).]—**Static b.** The science of the potentialities of living organisms, including their anatomy, their physical properties, and their relations to air, light, heat, etc. [A. Comte (A, 385).]

BIOLYCHNION, BIOLYCHNIUM (Lat.), n's n. Bi(bi^2)-o(o^2)-li^{2}k(lu^{6}ch^2)'ni^2-o^{2}n, -u^{3}m(u^{4}m). From βίος, life, and λύχνος, a lamp or candle. Fr., *biolychnion.* 1. Lit., the vital flame, a term applied in the middle ages to animal heat, also to the so-called *calor innatus.* 2. According to Béguin and Burggrav, a mysterious substance which one of them professed to have discovered in human blood. [A, 322, 325.]

BIOLYSIS (Lat.), n. f. Bi(bi^2)-o^{2}l'i^2(u^6)-si^{2}s. Gen., *biolys'eos* (*-ol'ysis*). From βίος, life, and λύειν, to undo. The destruction of life. [K.]

BIOLYTIC, adj. Bi-o-li^{2}t'i^{2}k. Lat., *biolyticus.* Pertaining to biolysis; as a n., an agent that causes biolysis. [K.]

BIOMAGNETIC, adj. Bi-o-ma^{2}g-ne^{2}t'i^{2}k. Pertaining to animal magnetism. [L, 56.]

BIOMAGNETISM, n. Bi-o-ma^{2}g'ne^{2}t-i^{2}zm. Lat., *biomagnetismus* (from βίος, life, and *magnetismus* [see Magnetism]). See *Animal* magnetism.

BIOMANTIA (Lat.), n. f. Bi(bi^2)-o(o^2)-ma^{2}n(ma^{3}n)-ti(te)'a^3. From βίος, life, and μαντεία, divination. Fr., *biomantie.* Ger., *Lebensprophezeiung.* The pretended art of foretelling the duration of an individual's life by an examination of the pulse and other vital phenomena. [A, 322.]

BIOMANTICUS (Lat.), adj. Bi(bi^2)-o(o^2)-ma^{2}n(ma^{3}n)'ti^{2}k-u^{3}s(u^{4}s). Fr., *biomantique.* Pertaining to biomantia. [A, 322.] See Monochordon *symbolicum biomanticum.*

BIOMANTIS (Lat.), n. m. Bi(bi^2)-o(o^2)-ma^{2}n(ma^{3}n)'ti^{2}s. Gen., *bioman'teos* (*-tis*). From βίος, life, and μάντις, a diviner. Ger., *Lebensprophet.* A practitioner of biomantia. [A, 322.]

BIOMETRY, n. Bi-o^{2}m'e^{2}t-ri^2. Lat., *biometria* (from βίος, life, and μετρεῖν, to measure). Fr., *biométrie.* Ger., *Biometrie, Lebensmesskunst.* The art of observing, measuring, and recording the products of vital activity. [A, 322.]

BION (Lat.), n. n. Bi(bi^2)'o^{2}n. An ancient wine made from unripe grapes, highly esteemed for its sanitary properties. [Pliny (A, 318).]

BIONGUICULÉ (Fr.), adj. Be-o^{2}n^2-gi^{2}k-u^6-la. From *bis,* doubly, and *unguis,* a nail. Ending in two hooks or nail-like processes. [L, 109.]

BIONOMY, n. Bi-o^{2}n'o-mi^2. From βίος, life, and νόμος, a law. Fr., *bionomie.* The study of the laws of organic or vital phenomena. [A, 385.]

BIOPHÆNOMENOLOGIA (Lat.), n. f. Bi(bi^2)-o(o^2)-fe^{2}n(fa^3-e^{2}n)-o^{2}m-e^{2}n-o(o^2)-lo(lo^2)'ji^2(gi^2)-a^3. From βίος, life, φαινόμενον, a phenomenon, and λόγος, understanding. The science of the phenomena of life. [A, 322.]

BIOPHAGOUS, adj. Bi-o^{2}f'a^{2}g-u^{3}s. See Biotophagous.

BIOPHILIA (Lat.), n. f. Bi(bi^2)-o(o^2)-fi^{2}l'i^2-a^3. From βίος, life, φιλεῖν, to love. Fr., *biophilie.* The instinct of preserving one's life. [Spurzheim, Broussais (A, 301).]

BIOPHTHORE (Fr.), adj. Be-o^{2}f-tor. Gr., βιοφθόρος (from βίος, life, and φθορά, destruction). Destructive to life. [A, 385.]

BIOPHYTUM (Lat.), n. n. Bi(bi^2)-o^{2}f'i^{2}t(u^{6}t)-u^{3}m(u^{4}m). From βίος, life, and φυτόν, a plant. A genus of oxalidaceous plants. [B, 180.]—**B. sensitivum** [De Candolle]. Ger., *Fuhlkraut.* An East Indian species; the root is used in pulmonary and calculous affections and gonorrhœa, and externally for inflammatory swellings and the sting of the scorpion. [B, 180.]

BIOPLASM, n. Bi'o-pla^{2}zm. From βίος, life, and πλάσμα, formed matter. Fr., *bioplasme.* Beale's term for "living, forming, growing, self-producing matter, as distinguished from matter in every other state or condition whatever." ["Quart. Jour. of Micr. Sci.," 1870, p. 209 (J).] See Protoplasm.

BIOPLASMIC, adj. Bi-o-pla^{2}z'mi^{2}k. See Bioplastic.

BIOPLASSON, n. Bi'o-pla^{2}s-so^{2}n. From βίος, life, and πλάσσειν, to form. L. Elsberg's term for protoplasm. ["Trans. of the Am. Med. Assoc.," 1875 (J).]

BIOPLAST, n. Bi'o-pla^{2}st. Beale's term for "a very minute living particle" (*e. g.,* a white blood-corpuscle, a nucleus of a nerve fibre or of a capillary). ["Quart. Jour. of Micr. Sci.," 1870, p. 210 (J); J, 39.]

BIOPLASTIC, adj. Bi-o-pla^{2}st'i^{2}k. Fr., *bioplastique.* Pertaining to bioplasm or to bioplasts. [Beale (J).]

BI-ORBITAL, adj. Bi-o^{2}rb'i^{2}t-a^{2}l. From *bis,* doubly, and *orbita,* the orbit. Pertaining to or connecting both orbits. [L, 149.]

BIOS (Lat.), n. m. Bi(bi^2)'o^{2}s. Gr., βίος. Life. [A, 322.]

BIOSCOPE, n. Bi'o-skop. From βίος, life, and σκοπεῖν, to examine. Lat., *bioscopus.* Fr., *bioscope.* Ger., *Bioskop.* It., *bioscopo.* Sp., *bióscopo.* 1. Any instrument employed in bioscopy. [A, 322.] 2. See Stereophantoscope.

BIOSCOPIC, adj. Bi-o^{2}s-ko^{2}p'i^{2}k. Lat., *bioscopicus.* Pertaining to bioscopy. [A, 322.]

BIOSCOPY, n. Bi-o²s'ko²p-i². Lat., *bioscope, bioscopia.* Fr., *bioscopie.* Ger., *Bioskopie.* The examination of a cadaver with a view to ascertain whether it is that of a being born alive or viable; as sometimes employed, forensic medicine in general. [A, 322.]

BIOSIS (Lat.), n. f. Bi(bi²)-o'si²s. Gen., *bio'seos (-sis).* Gr., *βίωσις.* A course of life; life. [A, 322.]

BIOSOPHIA (Lat.), n. f. Bi(bi²)-o(o²)-so(so²)'fi²-a³. From *βίος*, life, and *σοφία*, knowledge. Fr., *biosophie.* Troxler's term for biodynamics (*q. v.*). [A, 322.]

BIOSPHÆRA (Lat.), n. f. Bi(bi²)-o²s-fer'(fa³'e²r)-a³. From *βίος*, life, and *σφαῖρα*, a sphere. Fr., *biosphère.* Ger., *Biosphäre.* J. H. Mayer's name for a minute granule showing Brunonian movements, found in the juices of plants. Mayer supposed that such granules were animals, and that a plant was nothing more than a collection of myriads of animals. [A, 322; J, 33.]

BIOSTATIC, adj. Bi-o-sta²t'i²k. Fr., *biostatique.* Pertaining to static biology. [L, 80.]

BIOSTATICS, n. sing. Bi-o-sta²t'i²ks. Lat., *biostatica, biostatice* (from *βίος*, life, and *στατική* [from *ἱστάναι*, to stand still], statics). Ger., *Biostatik.* See *Static* BIOLOGY.

BIOSTATISTICS, n. sing. Bi-o-sta²t-i²st'i²ks. From *βίος*, life, and *status*, a state. Vital statistics. [K.]

BIOTA (Lat.), n. f. and (3d def.) n. pl. Bi(bi²)'o²t-a³. Gr., *βιοτή.* Fr., *biotes* (3d def.). 1. Life. [A, 322.] 2. A genus-name proposed for certain specimens of *Thuja* (*q. v.*). [B, 19.] 3. A group made by Hill to include *Actinia, Medusa*, and *Hydra.* [L, 180.]

BIOTAURA (Lat.), n. f. Bi(bi²)-o²t-a⁴r'(a³'u⁴r)-a³. From *βίοτος*, life, and *aura* (*q. v.*). See AURA *vitalis* (1st def.).

BIOTAXY, n. Bi'o-ta²x-i². From *βίος*, life, and *τάξις*, an arrangement. Fr., *biotaxie.* Ger., *Biotaxie.* Static biology (*q. v.*), especially with reference to the classification of organisms. [De Blainville, A. Comte (A, 385).]

BIOTE (Lat.), n. f. Bi(bi²)'o²t-e(a). See BIOTA (1st def.).

BIOTES (Fr.), n. pl. Be-ot. See BIOTA (3d def.).

BIOTHALMIUS (Lat.), adj. Bi(bi²)-o(o²)-tha²l(tha³l)'mi² u³s-(u⁴s). Gr., *βιοθάλμιος* (from *βίος*, life, and *θάλλειν*, to abound). In robust health. [A, 311.]

BIOTHANATOS (Lat.), n. m. Bi(bi²)-o(o²)-tha²n(tha³n)'a²t(a³t)-o²s. From *βία*, violence, and *θάνατος*, death. A violent death; according to Forestus, one who has died by violence. [A, 322, 325.]

BIOTHANATOLOGY, n. Bi-o-tha²n-a²t-o²l'o-ji². From *βίος*, life, *θάνατος*, death, and *λόγος*, understanding. Casper's term for the science or doctrine of life and death. [K.]

BIOTIA (Lat.), n. f. Bi(bi²)-o(o²)'ti²-a³. Of De Candolle, a genus of composite plants, generally regarded as a section of *Aster.* [B, 19, 215.]—**B. corymbosa.** See ASTER *corymbosus.*

BIOTIC, adj. Bi-o²t'i²k. Gr., *βιοτικός.* Lat., *bioticus.* Fr., *biotique.* See VITAL.

BIOTICA, BIOTICE (Lat.), n's f. Bi(bi²)-o²t'i²-ka³, -se(ka). Biotics. [L, 81.] See PHYSIOLOGY.

BIOTICOPHAGE (Fr.), adj. Be-o-te-ko-fa³zh. See BIOTOPHAGOUS.

BIOTICS, n. sing. Bi-o²t'i²ks. Lat., *biotica, biotice.* Ger., *Biotik.* See PHYSIOLOGY.

BIOTOMY, n. Bi-o²t'o-mi². Lat., *biotomia* (from *βίος*, life, and *τέμνειν*, to cut). Fr., *biotomie.* See VIVISECTION.

BIOTOPHAGOUS, adj. Bi-o²t-o²f'a²g-u³s. From *βίοτος*, life, and *φαγεῖν*, to eat. Fr., *biotophage.* Subsisting on living tissue. [A, 385.]

BIOUTÉ (Fr.), n. Be-u-ta. The *Populus nigra.* [L, 105.]

BIOVULATE, adj. Bi-o²v'u²l-at. From *bis*, doubly, and *ovulum* (dim. of *ovum*), an ovule. Fr., *biovulé.* In botany, containing two ovules. [L, 41.]

BIOXALATE, n. Bi-o²x'a²l-at. See BINOXALATE.

BIOXIDE, n. Bi-o²x'i²d(id). Fr., *bioxyde.* See BINOXIDE.

BIOXYACETULMIC ACID, n. Bi-o²x-i²-a²s-e²t-u³l'mi²k. An addition product of acetulmic acid, formed by the addition of two atoms of oxygen. [B, 2.]

BIOXYDE (Fr.), n. Be-o²x-ed. See BINOXIDE.

BIPALEOLATE, adj. Bi-pa²l'e-ol-at. Lat., *bipaleolatus* (from *bis*, doubly, and *paleola* [*q. v.*]). Fr., *bipaleolé.* Composed of two paleolæ. [B, 19.]

BIPALMATUS (Lat.), adj. Bi(bi²)-pa²l(pa³l)-ma(ma³)'tu³s(tu⁴s). From *bis*, doubly, and *palmatus*, spreading like an open hand. Fr., *bipalmé.* Having petiolules diverging from the common petiole, and being themselves arranged in a like manner (said of leaves). [L, 180.]

BIPALPÉ (Fr.), adj. Be-pa³l-pa. Having two palpi. [L, 41.]

BIPARASITIC, adj. Bi-pa²r-a³-si²t'i²k. Lat., *biparasiticus* (from *bis*, doubly, and *παράσιτος*, a parasite). Fr., *biparasite.* Living as a parasite on another parasite. [L, 41.]

BIPARIETAL, adj. Bi-pa²r-i'e²t-a²l. Lat., *biparietalis* (from *bis*, doubly, and *paries*, a wall). Fr., *bipariétal.* Of or pertaining to both parietal bones, or extending from one to the other.

BIPAROUS, adj. Bi²p'a²r-u³s. From *bis*, doubly, and *parire*, to bring forth. Bearing on both sides (said of a flower-stalk). [B.] See *B.* CYME.

BIPARTI (Fr.), adj. Be-pa³rt-e. See BIPARTITE.

BIPARTIBILIS (Lat.), adj. Bi(bi²)-pa³rt-i²b'i²l-i²s. From *bis*, doubly, and *pars*, a part. Fr., *bipartible.* Capable of spontaneous division into two parts. [B, 1.]

BIPARTIENT, adj. Bi-pa³r'shi²-e²nt. Lat., *bipartiens* (from *bis*, doubly, and *partire*, to divide). Dividing into two parts. [L, 56.]

BIPARTILE, adj. Bi-pa³rt'i²l. See BIPARTIBILIS.

BIPARTILOBATUS (Lat.), adj. Bi(bi²)-pa³rt-i²-lob(lo²b)-a(a)'-tu³s(tu⁴s). From *bis*, doubly, *pars*, a part, and *λοβός*, a lobe. Fr., *bipartilobé.* Divided into two lobes by an incision reaching nearly to the base. [B, 1.]

BIPARTITE, adj. Bi-pa³rt'i²t(it). Lat., *bipartitus.* Fr., *biparti.* Ger., *zerschnitten, zweitheilig.* Two-parted; almost completely divided into two parts. [B, 19.]

BIPARTITION, n. Bi-pa³rt-i²sh'u³n. Division into two parts (said of cells). [L, 121.]

BIPECTINATE, adj. Bi-pe²k'ti²n-at. Lat., *bipectinatus* (from *bis*, doubly, and *pecten*, a comb). Fr., *bipectiné.* Having comb-like processes on each margin. [L, 41.]

BIPED, adj. Bi'pe²d. Lat., *bipes* (from *bis*, doubly, and *pes*, a foot). Fr., *bipède.* Having two feet; as a n., a two-footed animal; as a n. pl., of Latreille, a section of mammals equivalent to the *Cetacea.* [A, 318; L, 56, 226.]

BIPEDAL, adj. Bi²p'e²d-a²l. Lat., *bipedalis.* Fr., *bipède.* Ger., *zweifüssig.* Having two feet. [L, 56.]

BIPÈDE (Fr.), adj. Be-pe²d. Bipedal; as a n., a biped, also either pair of a horse's feet. [A, 301.]

BIPELTATA (Lat.), n., n. pl. of adj. *bipeltatus* (see BIPELTATE). Bi(bi²)-pe²lt-a(a³)'ta³. Fr., *bipeltés.* Cuvier's name for a family of crustaceans of the order *Stomapoda.* [L, 180.]

BIPELTATE, adj. Bi-pe²lt'at. Lat., *bipeltatus* (from *bis*, doubly, and *pelta* [= *πέλτη*], a shield). Fr., *bipelté.* In zoology, having two shield-like defenses. [L, 109.]

BIPENNATE, BIPENNATED, adj's. Bi-pe²n'nat, -nat-e²d. Lat., *bipennis, bipennatus.* Fr., *bipenné.* See BIPINNATE.

BIPENNATIFID, adj. Bi-pe²n-na²t'i²-fi²d. See BIPINNATIFID.

BIPENNÉS (Fr.), n. pl. Be-pa³n-na. A section of anelytrous insects having but two wings. [L, 109.]

BIPENTAPHYLLOUS, adj. Bi-pe²nt-a³-fi²l'lu³s. From *bis*, twice, *πέντε*, five, and *φύλλον*, a leaf. Provided with from two to five leaflets. [B, 19.]

BIPERFORÉ (Fr.), adj. Be-pe²r-for-a. Having two openings. [L, 41.]

BIPES (Lat.), adj. Bi(bi²)'pez(pas). See BIPED and BICRURIS.

BIPETALOUS, adj. Bi-pe²t'a²l-u³s. Lat., *bipetalus* (from *bis*, doubly, and *πέταλον*, a petal). Fr., *bipétalé.* Provided with or divided into two petals. [B.]

BIPHORA (Lat.), n. n. pl. Bi²f'o²r-a³. Fr., *biphores.* Of Cuvier, a family of the *Acephala*, comprising those having a mantle open at each end. [L, 180.]

BIPHORE (Fr.), adj. Be-for. See BIFORUS and BIPHORA.

BIPHORIDEÆ (Lat.), n. f. pl. Bi(bi²)-fo²r-i²d'e²-e(a³-e²). Fr., *biphoridées.* Of Macleay, a family of the *Tunicata.* [L, 180.]

BIPHOSPHAS (Lat.), n. m. Bi(bi²)-fo²s'fa²s(fa³s). Gen., *biphosphat'is.* See BIPHOSPHATE.—**B. calcicus** [Fr. Cod.]. Biphosphate (tetrahydric orthophosphate) of calcium. [B, 113.]

BIPHOSPHATE, n. Bi-fo²s'fat. Lat., *biphosphas.* Fr., *biphosphate.* An acid phosphate (applied especially to the dihydric phosphates). [B.]

BIPHOSPHIDE, n. Bi-fo²s'fi²d(fid). Lat., *biphosphidum.* Fr., *biphosphure.* That one of a series of phosphides that contains twice as much phosphorus as the first member of the series. [B.]

BIPHOSPHITE, n. Bi-fo²s'fit. An acid phosphite; one that contains twice as much phosphorous acid as a normal phosphite. [B.]

BIPINNARIA (Lat.), n. n. pl. Bi(bi²)-pi²n-na(na³)'ri²-a³. The commonest form of the larvæ of the *Asteroidea*, distinguished from the *Auricularia* by having two ciliated bands. [L, 201.]

BIPINNATE, BIPINNATED, adj's. Bi-pi²n'nat, -nat-e²d. Lat., *bipinnatus* (from *bis*, doubly, and *pinnatus*, feathered). Fr., *bipenné.* Ger., *doppelt gefiedert.* Syn.: *binato-pinnate, bipinnatisect.* Doubly pinnate; pinnately divided into segments which are themselves pinnate (said of a leaf in which the common petiole has opposite branches each of which bears opposite leaflets). [B, 19; L, 107.]

BIPINNATIFID, adj. Bi-pi²n-na²t'i²-fi²d. Lat., *bipinnatifidus* (from *bis*, doubly, *pinnatus*, feathered, and *findere*, to split). Fr., *bipinnatifide.* Doubly pinnatifid; pinnatifid with the divisions themselves pinnatifid. [B, 19.]

BIPINNATIPARTITO-LACINIATE, adj. Bi-pi²n-na²t'''-i²-pa³rt-i''to-la²s-i²n'i²-at. From *bis*, doubly, *partitus*, divided, and *lacinia*, a small division. Bipinnatifid and with laciniate divisions. [B, 19.]

BIPINNATUS (Lat.), adj. Bi(bi²)-pi²n-na(na³)'tu³s(tu⁴s). See BIPINNATE.

BIPINNÉ (Fr.), adj. Be-pa²n-na. See BIPINNATE.

BIPLICATE, adj. Bi²p'li²-kat. Lat., *biplicatus* (from *bis*, twice, and *plicare*, to fold together). Fr., *biplié.* Folded twice upon itself. [B, 1.]

BIPLICITY, n. Bi-pli²s'i²t-i². The state of being biplicate. [L, 73.]

BIPLIÉ (Fr.), **BIPLISSÉ** (Fr.), adj. Be-ple-a, -ples-sa. See BIPLICATE.

BIPLUMBIC, adj. Bi-plu³m'bi²k. From *bis*, doubly, and *plumbum*, lead. Fr., *biplombique.* Containing two atoms of lead. [B.]

BIPLUMÉ (Fr.), adj. Be-plu⁶m-a. See BIPINNATE.

BIPOCILLATED, adj. Bi-po'si^{2}l-lat-e^{2}d. From *bis*, doubly, and *pocillum*, a little cup. Having two cup-shaped processes. [L, 232.]

BIPOINTU (Fr.), adj. Be-pwa^{3}n^2-tu^6. See BIMUCRONATUS.

BIPOLAR, adj. Bi-pol'a^{3}r. Lat., *bipolaris* (from *bis*, twice, and *polus*, a pole). Fr., *bipolaire*. Ger., *bipolar, zweistahlig*. 1. Pertaining to the two poles of an elongated body. 2. Having only two processes (said of nerve cells). [J.]

BIPOLARITY, n. Bi-pol-a^{2}r'i^2-ti^2. Fr., *bipolarité*. The state of having opposite electrical or magnetic properties at the two poles. [A, 301, 385.]

BIPONCTUÉ (Fr.), adj. Be-po^{2}n^{2}k-tu^6-a. See BIPUNCTATE.

BIPOROSE, adj. Bi-por'os. Lat., *biporosus* (from *bis*, twice, and *porus* [= πόρος], a channel). Fr., *biporeux*. Having two pores; of an anther or a carpel, dehiscing by two pores. [B, 198.]

BIPOTASSIQUE (Fr.), adj. Be-po-ta^{3}s-sek. Containing two atoms of potassium. [B, 38.]

BIPUBIOTOMY, n. Bi-pu^2-bi^2-o^{2}t'o^{2}m-i^2. From *bis*, twice, *pubes* (*q. v.*), and τέμνειν, to cut. An operation devised by Galbiati as a substitute for the Cæsarean operation, consisting in sawing through the anterior wall of the pelvis near each acetabulum. [A, 43.]

BIPUNCTATE, adj. Bi-pu^{3}n^{2}k'tat. Lat., *bipunctatus* (from *bis*, twice, and *punctum*, a point). Fr., *biponctué*. Marked with two points or spots. [B, 121.]

BIPUNCTUAL, BIPUNCTUATE, adj's. Bi-pu^{3}n^{2}k'tu^2-a^{2}l, -at. See BIPUNCTATE.

BIPUPILLATE, adj. Bi-pu^2'pi^{2}l-lat. From *bis*, twice, and *pupilla* (= *pupula*), the pupil of the eye. Fr., *bipupillé*. Having spots each with two pupil-like dots. [L, 41, 56.]

BIPUSTULÉ (Fr.), adj. Be-pu^{6}s-tu^{6}l-a. Marked with two pustules or red spots. [B, 38.]

BIQUE (Fr.), n. Bek. A dartrous affection of the muzzle in sheep. [A, 300.]

BIR (Hind.), n. The *Zizyphus jujuba*. [B, 121.]

BIRA (Lat.), n. f. Bi(be)'ra^3. See CEREVISIA.

BIRADIATE, BIRADIATED, adj's. Bi-ra'di^2-at, -at-e^{2}d. From *bis*, twice, and *radius*, a ray. Fr., *birayé*. Having two colored rays. [B, 38.]

BIRAGO, n. A Gascon name for the *Lolium temulentum*. [B, 132.]

BIRALAMADO, n. A Brahman name for the *Caryota ureus*. [B, 121.]

BIRAMOSE, BIRAMOUS, adj's. Bi-ra'mos, -mu^{3}s. From *bis*, twice, and *ramus*, a branch. Fr., *biramé*. Having two branches. [B, 132 ; L, 41.]

BIRANG-I-KABULI, n. A Persian name for the *Embelia ribes*.

BIRA-SOUREL, n. A Languedoc name for the *Helianthus annuus*. [B.]

BIRAYÉ (Fr.), adj. Be-re^2-i^2-a. See BIRADIATE.

BIRCH, n. Bu^{5}rch. A.-S., *birce*. Lat., *betula*. Fr., *bouleau*. Ger., *Birke*. It., *bettola, betulla*. The genus *Betula* (*q. v.*). [B.]—**B. bark.** See *Cortex* BETULÆ.—**B. camphor.** See BETULIN.—**B. family.** The *Betulaceæ*. [B, 75.]—**B. of Jamaica.** See *West Indian b.*—**B. oil.** See *Oil of b.* and *Empyreumatic oil of b.* (under BETULA *alba*.)—**B. resin, B. stearoptene.** See BETULIN.—**B. tar.** Lat., *balsamum* (seu *oleum*) *betulinum*. Ger., *Birkentheer, Birkenöl*. The tar obtained by the dry distillation of b. bark. [B, 180.] See BETULA *alba*. —**Black b.** The *Betula lenta*. [B, 81.]—**Canoe b.** The *Betula papyracea*, an American variety of the *Betula alba*, the bark of which is used for making canoes. [B.]—**Cherry b.** See BETULA *lenta*.—**Common b.** See BETULA *alba*.—**Drooping b.** The *Betula pendula*, a variety of the *Betula alba* with drooping branches. [B.] —**Dwarf b.** The *Betula nana*, also another small species of *Betula*. [B, 275.]—**Empyreumatic oil of b.** See under BETULA *alba*.—**European b.** See BETULA *alba*.—**Mahogany b.** See BETULA *lenta*.—**Oil of b.** The volatile oil obtained from *Betula lenta* and *Betula alba*. [B, 5, 81.]—**Paper b.** See *Canoe b.*—**Sweet b.** See BETULA *lenta*.—**West Indian b.** The *Bursera gummifera*. [B, 19, 75.]—**White b.** See BETULA *alba*.

BIRCH-DALE SPRINGS, n. Bu^{5}rch'dal. Four springs (the Concord, Merrimack, Granite, and Penacook) in Concord, New Hampshire. According to an analysis by C. F. Chandler, the water of the Concord spring contains sodium, magnesium, iron, and calcium carbonates, sodium chloride, potassium and sodium sulphates, sodium phosphate, alumina, silica, and organic matter. [A, 363.]

BIRCHWORTS, n. pl. Bu^{5}rch'wu^{5}rtz. A name given by Lindley to the *Betulaceæ*. [B, 19.]

BIRD, n. Bu^{5}rd. A.-S., *bird, brid*. An animal of the class *Aves* (*q. v.*).—**American b's-eye.** The *Primula pusilla*. [B, 19.] —**B.-cherry.** The *Prunus padus*. [B, 275.]—**B.-eagles.** The fruit of *Cratægus oxyacantha*. [B, 275.]—**B.-eye.** See *B's-eye*.—**B.-footed.** See PEDATE.—**B. glue.** See *B. lime*.—**B.-grass.** The *Poa trivialis*. [B, 275.]—**B. lime.** Fr., *glu*. Ger., *Vogelleim*. A glutinous preparation made of the boiled and fermented inner bark of the holly, or from mistletoe-berries, elder-shoots, etc. ; formerly used as a discutient, but now chiefly employed in making fly-paper. [A, 377.]—**B.-pepper.** The *Capsicum baccatum*. [B, 215.]—**B's-bill.** The *Trigonella ornithorrhynchus*. [B, 19.]—**B's dung.** The excrement of several species of b's ; used in medicine among the ancients (see Celsus) and still employed by the Chinese. [B.]—**B's-eye.** The *Veronica chamædrys*, also several other plants with small bright flowers. [B, 19, 275.]—**B's-foot.** The genus *Ornithopus*, the *Lotus corniculatus*, and the *Euphorbia ornithopus*. [B, 19, 275.]—**B's-foot vetch.** The genus *Ornithopus*. [B, 19.]—**B's-foot violet.** The *Viola pedata*. [B, 81.]—**B's-head.** The genus *Ornithocephalus*. [B, 19.]—**B's-head process.** See AVICULARIUM. —**B's-nest.** The *Neottia nidus avis*, the *Daucus carota*, a species of *Thamnopteris*, and a species of orchid. [B, 19, 275.]—**B's-nest peziza.** A name given to several species of *Cyathus* and *Nidularia*. [B, 19.]—**B's-tongue.** The genus *Ornithoglossum*, also the *Senecio paludosus*. [B, 19, 275.]—**B.-weed.** The *Polygonum aviculare*. [B, 81.]—**Mexican b.-plant.** The *Heterotoma lobelioides*. [B, 19.]—**Yellow b's-nest.** The *Momotropa hypopitys*. [B, 275.]

BIRD B'NAR, n. The *Rosa canina*. [B, 275.]

BIRÉFRINGENT (Fr.), adj. Be-ra-fra^{2}n^2-zha^{3}n^2. See ANISOTROPIC.

BIRETHUS (Lat.), n. m. Bi^{2}r-e(a)'thu^{3}s(thu^{4}s). See CUCUPHA.

BIRGUS (Lat.), n. m. Bu^{5}r(bi^{2}r)'gu^{3}s(gu^{4}s). Fr., *birgue*. A genus of the *Anomura*, comprising the tree-crabs. [A, 359.]—**B. latro** [Leach]. A species found in western Africa, the roasted entrails of which are said to furnish Tourlouro oil. [B, 180.]

BIRIDGI, n. The *Arachis hypogœa*. [B, 121.]

BIRIMOSE, adj. Bi-ri'mos. Lat., *birimosus* (from *bis*, twice, and *rima*, a cleft). Having two slits ; of an anther, dehiscing by two slits. [B, 198.]

BIRK APPLES, n. pl. Bu^{5}rk a^{2}p'plz. The cones of the *Pinus silvestris*. [B, 275.]

BIRKE (Ger.), n. Berk'e^2. Birch (the genus *Betula*). [B.]—**B'nbalsam.** Birch tar. [B.] See BETULA *alba*.—**B'nbaum.** See *B*.—**B'nblätter.** See *Folia* BETULÆ.—**B'nblättersalbe.** See UNGUENTUM *betulinum*.—**B'ngewächse.** See BETULACEÆ.—**B'nharz.** See BETULIN.—**B'nlaub.** See *Folia* BETULÆ.—**B'nöl.** See *B'nbalsam*.—**B'nrinde.** See *Cortex* BETULÆ.—**B'nrindenöl.** See *B'nbalsam*.—**B'nsaft.** See *Succus* BETULÆ.—**B'ntheer.** See *B'nbalsam*.—**B'nwasser.** See *Succus* BETULÆ.—**Gemeine B.** See BETULA *alba*.—**Hängeb'.** See BETULA *pendula*.—**Kleinblättrige B.** A small-leaved variety of *Betula alba*. [B, 180.]—**Trauerb'.** See BETULA *pendula*.—**Weisse B.** See BETULA *alba*.—**Zähe B.** See BETULA *lenta*.—**Zwergb'.** See BETULA *nana*.

BIRKENFELD (Ger.), n. Berk'e^{2}n-fe^{2}ld. A place in the duchy of Oldenburg, where there are springs containing sodium and calcium carbonates and iron. [A, 385 ; L, 49.]

BIRLENBACH (Ger.), n. Berl'e^{2}n-ba^{3}ch^2. A place in the duchy of Nassau, where there is a chalybeate spring. [A, 385 ; L, 49.]

BIRME (Hind.), n. The *Trichosanthes incisa*. [B, 172.]

BIRMENSDORF (Ger.), n. Ber'me^{2}ns-do^{2}rf. A place in the canton of Aargau, Switzerland, where there are springs containing a high percentage of magnesium sulphate, the waters of which have been recommended as a substitute for Püllna water. [L, 57.]

BIRN (Ger.), n. Bern. A pear. [A, 315.]—**B'baum.** The pear-tree. [L, 43.]—**B'förmig.** Pear-shaped. [A, 315.]—**B'frucht.** In botany, a pyridium. [B.]—**B'kraut.** The genus *Pyrola*, especially the *Pyrola rotundifolia*. [B, 180.]—**B'muskel.** The pyramidalis muscle. [L, 80.]—**B'quitte.** A variety of the quince with a pear-shaped fruit. [B, 180.]—**B'wein.** Perry. [A, 315.]

BIRNE (Ger.), n. Bern'e^2. A pear. [B.]—**B'nförmig.** Pear-shaped. [B.]—**Felsenb', Traubenb'.** The *Amelanchier*. [B, 49.]

BIRNI (Hind.), n. The *Cratœva tapia*. [B, 172.]

BIROLIA (Lat.), n. f. Bi^{2}r-o'li^2-a^3. See ELATINE.

BIROSTRATE, BIROSTRATED, adj's. Bi-ro^{2}s'trat, -e^{2}d. Lat., *birostratus, birostris* (from *bis*, twice, and *rostrum*, a beak). Fr., *birostré*. Ger., *zweischnabelig*. Having a double beak or two processes resembling beaks. [Mirbel (B, 1).]

BIRRESBORN (Ger.), n. Ber're^{2}s-bo^{2}rn. A place in Prussia, where there is a chalybeate spring. [L, 49.]

BIRSEN, n. An Arabic or Persian name for inflammation or abscess of the breast. [C. T. Bierling (A, 325).]

BIRTH, n. Bu^{5}rth. A.-S., *beordh, byrd*. Gr., γένεσις, τόκος. Lat., *partus*. Fr., *naissance*. Ger., *Geburt*. It., *nascita*. Sp., *nacimiento*. The process of being born.—**Cross-b.** See *Transverse* PRESENTATION.—**Plural b.** Ger., *mehrfache Geburt*. The b. of more than one fœtus as the product of one gestation.—**Still b.** The b. of a dead fœtus.—**Virgin b.** See PARTHENOGENESIS.

BIRTHROOT, n. Bu^{5}rth'ru^{4}t. 1. An American name for the *Aristolochia*. [B, 19.] 2. The *Trillium erectum*. [B, 275.]

BIRTHWORT, n. Bu^{5}rth'wu^{5}rt. See ARISTOLOCHIA.—**Climbing b.** The *Aristolochia tenuis*. [L, 84.]—**Common b.** The *Aristolochia clematitis*. [B.]—**Indian b.** The *Aristolochia indica*. [B, 172.]—**Snake-killing b.** The *Aristolochia anguicida*. [B.]

BIRUNCINATUS (Lat.), adj. Bi(bi^2)-ru^{3}n(ru^{4}n^2)-si^{2}n(ken)-a(a^3)'tu^{3}s(tu^{4}s). From *bis*, twice, and *runcina*, a plane. Fr., *biruncinė*. Doubly runcinate. [B, 38.]

BIRZAND-JAO-SHÍR, n. An Afghan name for the gum of the *Ferula galbaniflua*. [J. E. T. Aitchison, "Pharm. Jour. and Trans.," Dec. 11, 1886, p. 465 ; "Am. Jour. of Pharm.," Jan., 1887, p. 38.]

BIS (Bengal., Hind.), n. The *Aconitum ferox*. [B, 172.] See also BISH.

BISACCATE, adj. Bi-sa^{2}k'kat. From *bis*, twice, and *saccus*, a sac. Having two sacs. [A, 248.]

BISACROMIAL, adj. Bi^{2}s-a^{2}k-rom'i^2-a^{2}l. From *bis*, twice, and *acromion* (*q. v.*). Fr., *bi-acromial*. Extending from one acromion to the other. [A, 22.]

BISAILLE (Fr.), n. Bez-a^3-i^2-y'. The *Pisum arvense*. [A, 385.]

BI-SALT, n. Bi'sa^{4}lt. Fr., *bisel*. See *Acid* SALT.

BISAM (Ger.), n. Be'za^{3}m. Musk. [B.]—**B'artig.** Musky ; in botany, moschatus. [B.]—**B'blume.** See *B'flockenblume*.—

B'bock. The *Moschus moschiferus.* [B, 180.]—**B'bockkäfer.** The *Cerambyx moschatus.* [B. 180.]—**B'distel.** The *Carduus nutans.* [A, 315.]—**B'duft.** The odor of musk. [A, 315.]—**B'duftend.** Having a musky odor. [A, 315.]—**B'eibisch.** The *Hibiscus abelmoschus.* [B, 131.]—**B'flockenblume.** The *Centaurea moschata.* [B, 131.]—**B'günsel.** The *Ajuga iva.* [B, 180.]—**B'hahnenfuss.** The *Adoxa moschatellina.* [B, 131.]—**B'hibiscus.** The *Hibiscus abelmoschus.* [L, 80.]—**B'hirsch, B'hirsche, B'hirschchen.** The *Moschus moschiferus.* [B, 131, 180.]—**B'holzbock.** The *Cerambyx moschatus.* [L. 80.]—**B'katze.** The civet-cat (*Viverra zibetha*). [B, 131.]—**B'knabenkraut.** The *Orchis bifolia.* [B, 131.]—**B'knopf.** See *B'flockenblume* and *B'kugel.*—**B'körner.** See *Semen* ABELMOSCHI.—**B'kraut.** The *Hibiscus abelmoschus* and the *Adoxa moschatellina.* [B, 180.]—**B'kugel, B'kügelchen.** Musk-ball. [B, 131.]—**B'nagel.** See the major list.—**B'narcisse.** The *Narcissus moschatus.* [A, 315.]—**B'nuss.** The nutmeg. [B, 131.]—**B'ochs.** The musk-ox (*Bos moschatus*). [A, 315.]—**B'pappel.** See *B'eibisch.*—**B'reh.** The *Moschus moschiferus.* [B, 180.]—**B'reiherschnabel.** The *Erodium moschatum.* [L, 80.]—**B'rose.** The *Rosa moschata.* [B, 180.]—**B'samen.** See *Semen* ABELMOSCHI.—**B'schröter.** See *B'bockkäfer.*—**B'storchschnabelkraut.** The herb of *Erodium* (*Geranium*) *moschatum.* [B, 180.]—**B'strauch.** The *Hibiscus abelmoschus.* [L, 80.]—**B'thier.** The *Moschus moschiferus.* [B, 131.]—**B'tinctur.** The tinctura moschi of the Ger. Ph. [B, 205.]—**B'tragend.** Producing or containing musk. [B.]—**B'trüffel.** The *Tuber moschatum.* [B, 180.]—**Bucharischer B.** Bucharian musk. [B, 180.]—**Cabardinischer B.** Carbadine musk. [B, 180.]—**Künstlicher B.** See MOSCHUS *artificialis.*—**Orientalischer B.** Thibet musk. [B, 180.]—**Russischer B., Sibirischer B.** Siberian musk. [B, 180.]—**Thibetanischer B.** Thibet musk. [B, 180.]—**Tunquinischer B.** Tonquin (Thibet) musk. [B, 180.]

BISAMNAGEL (Ger.), n. Be′za^{3}m-na^{3}g-e^{2}l. The operculum of the *Murex trapezium.* [B, 180.]—**Kleiner B.** The operculum of the *Murex trunculus.* [B, 180.]

BISAN (Fr.), n. Be-za^{3}n^2. The *Lolium temulentum.* [B, 38.]

BISANNUALITÉ (Fr.), n. Bez-a^{3}n-nu^6-a^{3}l-e-ta. The state of being biennial (said of plants). [B ; L, 41.]

BISANNUEL (Fr.), adj. Bez-a^{3}n-nu^6-e^{2}l. See BIENNIAL.

BISBERG (Ar.), n. The *Polypodium vulgare.* [B, 121.]

BISBINETTE (Fr.), n. Bi^{2}z-bi^{2}n-e^{2}t. A provincial name for the *Berberis vulgaris.* [B, 121.]

BISCHE, n. An East Indian name for a severe form of endemic dysentery. [L, 41.]

BISCHOFFIEÆ (Lat.), n. f. pl. Bi^{2}sh-o^{2}f-fi(fi^2)′e^2-e(a^3-e^2). Fr., *bischoffiées.* From *Bischoffia*, the only genus. A subtribe of plants of the *Phyllantheæ.* [B.]

BISCOCT, n. Bi^{2}s′ko^{2}kt. See BISCUIT.

BISCOCTUM, BISCOCTUS (Lat.), n's n. and m. Bi^{2}s-ko^{2}kt′-u^{3}m(u^{4}m), -u^{3}s(u^{4}s). From *bis*, twice, and *coquere*, to cook. See BISCUIT.

BISCUIT, n. Bi^{2}s′ki^{2}t. Gr., *διπυρίτης, δίπυρος.* Lat., *biscoctus, biscoctum.* Fr., *biscuit.* Ger., *Zwieback.* It., *biscotto.* Sp., *bizcócho.* 1. Anciently, bread cooked twice. [A, 325.] 2. Bread, leavened or unleavened, baked rapidly in small separate portions. 3. A cracker ; a hard unleavened variety of bread, made by dividing the dough into small, thin forms and baking.—**B's animalisés** (Fr.). See *Meat-b's.*—**B's antisyphilitiques** [Olivier] (Fr.). B's each containing $\frac{15}{100}$ grain of corrosive sublimate. [B, 46.]—**B's contre les vers** [Storey] (Fr.). B's each containing $1\frac{1}{2}$ grain of calomel, $7\frac{1}{2}$ grains of jalap, 45 grains of white sugar, and a small amount of cinnabar, made up with b. paste. [B, 46.]—**B's de mer** (Fr.). See *Sea-b's.*—**B's dépuratifs** [Olivier] (Fr.). See *B's antisyphilitiques.*—**B's ferrugineux** (Fr.). B's each containing 3 grains of oxide of iron. [B, 46.]—**B's médicinaux** (Fr.). Medicated b's. [B, 46.]—**B's purgatifs** (Fr.). B's containing some cathartic medicine. [L, 120.]—**B's purgatifs à la résine de scammonée** (Fr.). B's each containing $1\frac{1}{2}$ grain of resin of scammony. [B, 46.]—**B's purgatifs à la scammonée** (Fr.). B's each containing 3 grains of powdered scammony. [B, 46.]—**B's purgatifs au jalap** (Fr.). B's each containing 15 grains of jalap. [B, 46.]—**B's vermifuges** (Fr.). B's each containing some anthelminthic medicine. [L, 32.]—**B's vermifuges à la santonine** (Fr.). B's each containing $1\frac{1}{2}$ grain of santonin. [B, 46.]—**B's vermifuges au calomel** (Fr.). B's each containing $4\frac{1}{2}$ grains of calomel. [B, 46.]—**B's vermifuges au semen-contra** (Fr.). B's each containing 15 grains of semen contra. [B, 46.]—**Meat b's.** Fr., *b's animalisés.* B's made by mixing flour with a rich soup, and evaporating to dryness. A variety specially prepared for dogs contains farinaceous matter, meat, dates, etc. [L, 41.]—**Medicated b's, Medicinal b's.** Fr., *b's médicinaux.* B's containing medicine.—**Sea b's.** Fr., *b's de mer.* A very dry and hard sort of unleavened bread made in the form of crackers ; containing three or four times as much nourishment as fresh bread, and given to sailors on long voyages. [B, 46.]

BISCUTATE, adj. Bi-sku^2′tat. Lat., *biscutatus* (from *bis*, twice, and *scutum*, a shield). Having two shield-shaped processes or appendages. [L, 180.]

BISCUTELLATÆ [Meissner], **BISCUTELLEÆ** [Reichenbach] (Lat.), n's f. pl. Bi^{2}s-ku^2(ku)-te^{2}l-la(la^3)′te(ta^3-e^2), -te^{2}l′le^2-e-(a^3-e^2). From *Biscutella*, one of the genera. A section or subtribe of the *Thlaspidieæ.* [B, 170.]

BISDECEMPUNCTATUS (Lat.), adj. Bi^{2}s″de(de^2)-se^{2}m-(ke^{2}m)-pu^{3}nk(pu^{4}nk)-ta(ta^3)′tu^{3}s(tu^{4}s). From *bis*, twice, *decem*, ten, and *punctum*, a point. Fr., *bis-decem-ponctué.* Having twenty points or spots. [B, 132.]

BISE (Fr.), n. Bez. A name for several species of *Agaricus.* [B.]—**B. verte.** The *Agaricus odorus.* [B, 121.]—**B. vraie.** The *Agaricus virescens.* [B, 121.]

BISEAU (Fr.), n. Be-zo. In the solipeds, the gutter-like depression which receives the coronary cushion. [L, 41.]

BISECTION, n. Bi-se^{2}k′shu^{3}n. From *bis*, twice, and *secare*, to cut. Fr., *bissection.* In obstetrics, the division of the fœtus into two parts, as by decapitation or rhachiotomy. [A, 398.]

BISECTUS (Lat.), adj. Bi(bi^2)-se^{2}k′tu^{3}s(tu^{4}s). Fr., *biséqué.* Bisected ; of a leaf, divided into two lobes by incisions reaching nearly to the mid-rib. [B, 121.]

BISEL (Fr.), n. Be-se^{2}l. See *Acid* SALT.

BISÉLÉNIATE (Fr.), n. Be-sa-la-ne-a^{3}t. An acid selenate ; one containing twice as much selenic acid as a normal selenate. [B, 38.]

BISÉLÉNITE (Fr.), n. Be-sa-la-net. An acid selenite ; one containing twice as much selenious acid as a normal selenite. [B, 38.]

BISÉLÉNIURE (Fr.), n. Be-sa-la-ne-u^{6}r. See DISELENIDE.

BISEMUTUM (Lat.), n. n. Bi^{2}s-e^{2}m-u^2(u)′tu^{3}m(tu^{4}m). An old form of *bismuthum.* Bismuth. [B, 3.]

BISENNA (Lat.), n. f. Bi(bi^2)-se^{2}n′na^3. See ALBIZZIA.

BISEPTATE, adj. Bi-se^{2}p′tat. Lat., *biseptatus* (from *bis*, twice, and *septum* [= *sœptum*], a wall). Fr., *bisepté.* Ger., *zweikammerig.* Having two partitions. [B, 19, 121.]

BISÉQUÉ (Fr.), adj. Be-sa-ka. See BISECTUS.

BISERIAL, BISERIATE, adj's. Bi-se′ri^2-a^{2}l, -at. Lat., *biseriatus, biserialis* (from *bis*, twice, and *series*, a row). Fr., *bisérié, bisérial.* Ger., *zweireihig.* Disposed in two rows that are not on the same level ; or, simply, arranged in two rows or series. [B, 19 ; L.]

BISERIATIO (Lat.), n. f. Bi(bi^2)-se(se^2)-ri^2-a(a^3)′shi^2(ti^2)-o. Gen., *biseriatio′nis.* Fr., *bisériation.* A disposition into two rows. [B, 132.]

BISERRATE, adj. Bi-se^{2}r′rat. Lat., *biserratus* (from *bis*, twice, and *serratus*, notched like a saw). Fr., *biserré.* Ger., *doppelt gesägt.* Doubly serrate ; having the serratures themselves serrate. [B, 19.]

BISETACEOUS, BISETIGEROUS, BISETOSE, BISETOUS, adj's. Bi-se-ta′shu^{3}s, -ti^{2}j′e^{2}r-u^{3}s, -se′tos, -tu^{3}s. Lat., *bisetosus, bisetus* (from *bis*, twice, and *seta* [= *sœta*], a bristle). Fr., *bisétacé, bisétigère.* Ger., *zweiborstig.* Having, or tipped with, two bristles. [B, 121.]

BISETTE (Fr.), n. Be-se^{2}t. An edible variety of *Agaricus.* [B, 132.] See MOUSSERON.

BISEXOUS, BISEXUAL, adj's. Bi-se^{2}x′u^{3}s, -u^2-a^{2}l. Lat., *bisex, bisexualis, bisexuinus* (from *bis*, twice, and *sexus*, sex). Fr., *bisexe, bisexuel.* Ger., *zweischlechtig.* Hermaphrodite ; in botany, having both sexes represented in the same flower or in different flowers on the same plant ; according to De Candolle, heterogamous. [B, 1.]

BISH (Hind., Bengal.), n. Written also *biskh, bikh*, and *bis.* The *Aconitum ferox* or a poison prepared from its root ; also the root of *Caltha cadua.* [B, 172, 180.]

BISH-BANSH (Bengal.), n. The *Beesha Rheedii* (the *Melocanna bambusoides*). [B, 172.]

BISH-HUPRA (Hind.), n. The *Trianthema obcordatum.* [B, 172.]

BISHMA, n. See BISH.

BISHOP-WEED, n. Bish′o^{2}p-wed. The *Ægopodium podagraria*, the *Sison ammi* of Linnæus, and the genus *Ammi.* [B, 19.]—**Mock b.-w.** An American name for the genus *Discopleura.* [B, 19.]

BISHOP'S-CAP, n. Bi^{2}sh′o^{2}ps-ka^{2}p. An American name for the *Mitella.* [B, 19.]

BISHOP'S-ELDER, n. Bi^{2}sh′o^{2}ps-e^{2}ld-u^{6}r. The *Ægopodium podagraria.* [B, 275.]

BISHOP'S-HAT, n. Bi^{2}sh′o^{2}ps-ha^{2}t. The *Epimedium alpinum.* [B, 275.]

BISHOP'S-LEAVES, n. Bi^{2}sh′o^{2}ps-levz. The *Scrophularia aquatica.* [B, 275.]

BISHOP'S-WEED, n. Bi^{2}sh′o^{2}ps-wed. See BISHOP-WEED.—**Common b.-w.** The *Ammi majus.* [B, 275.]—**Mock b.-w.** The genus *Discopleura.* [B, 275.]—**Prickly-seeded b.-w.** The *Ammi copticum.* [B, 275.]—**Toothpick b.-w.** The *Ammi visnaga.* [B, 275.]—**True b.-w.** The *Ammi copticum.* [B, 275.]

BISHOP'S-WORT, n. Bi^{2}sh′o^{2}ps-wu^{5}rt. The *Stachys betonica.* [B, 275.]

BISH-TARAK (Hind.), n. The *Argyreia speciosa.* [B, 172.]

BISHUMBA (Hind.), n. The *Cucumis colocynthis.* [B, 172.]

BIS-ILIAC, adj. Bi^{2}s-i^{2}l′i^2-a^{2}k. From *bis*, twice, and *ilium* (*q. v.*). Fr., *bi-iliaque.* Extending from one ilium to the other. [A, 22.]

BISILICATE, n. Bi-si^{2}l′i^{2}k-at. A silicate containing twice as much silicic acid as a normal silicate. [B, 38.]

BISILICATÉ (Fr.), adj. Be-si^{2}l-e-ka^3-ta. Doubly compounded with silicic acid ; converted into a bisilicate. [B, 38.]

BISILLONNÉ (Fr.), adj. Be-sel-yo^{2}n-na. See BISULCATE.

BISINUATUS (Lat.), adj. Bi(bi^2)-si^{2}n-u^2(u^4)-a(a^3)′tu^{3}s(tu^{4}s). From *bis*, twice, and *sinus* (*q. v.*). Fr., *bisinué.* Having two sinuses or wavy folds. [B, 38.]

BISIPHITE (Fr.), adj. Be-se-fet. See DISIPHONATE.

BIS-ISCHIADIC, BIS-ISCHIATIC, adj's. Bi^{2}s-i^{2}sk-i^2-a^{2}d′-

i^{2}k, -a^{2}t'i^{2}k. From *bis*, twice, and *ischium* (*q. v.*). Fr., *bis-ischiatique*. Extending from one ischium to the other. [A, 22.]

BISK, n. See Bish.

BISKARA-BEULE (Ger.), n. Bi^{2}s'ka^{3}r-a^3-boil'e^2. See *Aleppo* boil.

BISKH, n. See Bish.

BISKRA BUTTON, n. Bi^{2}sk'ra^3 bu^{3}t'tu^{3}n. Fr., *bouton de Biskra* (ou *Biskara*), *chancre de Sahara, bouton des zibans*. Ger., *Biskara-Beule*. A disease observed in Biskra, Algeria, of a nature similar to that of the Aleppo boil (*q. v.*, under Boil). [G.]

BISLINGUA (Lat.), n. f. Bi^{2}s-li^{2}n^2'gwa^3. From *bis*, twice, and *lingua*, the tongue. Of Dioscorides, the *Ruscus hypoglossum*. [B, 121.]

BISMALVA (Lat.), n. f. Bi^{2}s-ma^{2}l(ma^{3}l)'va^3(wa^3). A section of the genus *Malva;* also a name formerly given to the *Althæa officinalis*. [B, 121.]—**Radix bismalvæ.** The root of *Althæa officinalis*. [B, 180.]

BISMETHYL, n. Bi^{2}z-me^{2}th'i^{2}l. See Bismuth *ethyl*.

BISMUT (Ger.), n. Bi^{2}s'mut. See Bismuth.

BISMUTH, n. Bi^{2}z'mu^{3}th. Lat., *bismuthum* [Br. Ph., Belg. Ph., Finn. Ph., Greek Ph., Netherl. Ph.; Swed. Ph.], *bismutum* [Swiss Ph.]. Fr., *bismuth*. Ger., *Wismut, Wismuth, Wissmuth*. It., *bismuto*. Sp., *bismuto* [Sp. Ph.]. A metallic element known from early times, but formerly confounded with other elements and with their compounds. It is found often uncombined and also in various forms of combination in the mineral kingdom. It is often associated with other metals, especially iron and silver, and with non-metallic elements, especially sulphur, tellurium, and arsenic. B. occurs in hard, brittle, grayish or reddish-white, lustrous masses, and may also be obtained in the form of large crystals. It melts at 270° C., oxidizes on exposure to the air, and is dissolved by hot sulphuric acid, by nitric acid, and by nitrohydrochloric acid. Sp. gr., 9·823. In composition it usually acts as a triad, but also as a diad, and with oxygen it combines in four proportions, acting as a tetrad and pentad, as well as a diad and triad. Symbol, Bi; atomic weight, 210. [B, 3.]—**Acicular b.** A native alloy of b. compounded with sulphur, lead, and copper. [B, 2.]—**Azotate basique de b.** (Fr.). Basic b. nitrate. [B.]—**Azotate de b.** (Fr.). Nitrate of b. [B.]—**Azotate de b. neutre.** B. trinitrate. [B, 81.]—**Basic b. carbonate.** Fr., *carbonate basique de b*. Ger., *basisches kohlensaures Wismutoxyd*. It., *carbonato di bismuto basico*. A compound in which b. oxide or b. hydrate replaces the hydrogen in carbonic acid. The principal basic carbonate is b. subcarbonate (*q. v.*). Another basic carbonate, of the composition $3Bi_2O_2.CO_3+2Bi(OH)_3+3H_2O$, is found native as a mineral. [B, 3.]—**Basic b. nitrate.** Fr., *azotate basique de b*. Ger., *basisches salpetersaures Wismutoxyd*. It., *nitrato di bismuto basico*. A compound in which b. oxide or b. hydrate replaces the hydrogen of nitric acid. Several basic nitrates of b. are known, the most important of which is b. subnitrate. [B.]—**Basic b. sulphate.** Fr., *sulfate basique de b*. Ger., *basisches schwefelsaures Wismutoxyd*. It., *solfato di bismuto basico*. A compound in which b. oxide or b. hydrate replaces the hydrogen in sulphuric acid. Several are known, formed by the action of water upon trisulphate of b. and in other ways. Formulæ, $Bi_2(OH_4).SO_4,Bi_2O_2SO_4$ and $Bi(OH).SO_4+H_2O$. [B, 3.]—**Beurre de b.** (Fr.). B. trichloride. [B, 46.]—**Bichlorure de b.** (Fr.). B. dichloride. [B.]—**Bioxyde de b.** (Fr.). Dioxide of b. [B.]—**B. amalgam.** Fr., *amalgame bismuthique* (ou *de b.*). Ger., *Wismuth-Amalgam*. An alloy of b. and mercury; a substance at first soft, afterward acquiring a granular crystalline texture. [B, 2.]—**B. and ammonium citrate.** Lat., *bismuthi et ammonii citras* [U. S. Ph.]. Fr., *citrate de b. et d'ammoniaque* (ou *d'ammonium*). Ger., *citronensaures Wismuthoxyd-Ammonium*. It., *citrato di bismuto e d'ammonio*. Sp., *citrato de bismuto y de amonio*. A body occurring under the form of pearly or translucent scales, without odor and of a slightly acidulous metallic taste; soluble in water; prepared by dissolving citrate of b. in a mixture of water of ammonia and water. Constitution uncertain. [B, 5.]—**B. and potassium iodide.** Fr., *iodure de b. et de potassium*. Ger., *Kaliumwismuthjodür*. It., *ioduro di bismuto e di potassio*. Sp., *ioduro de bismuto y de potasio*. A compound used in a very delicate test for alkaloids; prepared by adding 3 parts of iodide of potassium to 16 of b. triiodide and 3 of hydrochloric acid. [B, 5; "Gazz. Chim. Ital.," xiii, 1882, p. 155 (B); "Jour. de pharm.," 1883, p. 257 (B).]—**B. arsenate.** Fr., *arséniate de b*. Ger., *arsensaures Wismutoxyd*. It., *arseniato di bismuto*. Sp., *arseniato de bismuto*. Properly, b. pyroarsenate; a white substance, $Bi_4(As_2O_7)_3$, insoluble in water. [B, 3.]—**B. bismuthate.** B. tetroxide. [B, 2.]—**B. bromide.** Fr., *bromure de b*. Ger., *Wismuthbromür, Bromwismut*. It., *bromuro di bismuto*. Sp., *bromuro de bismuto*. A compound of b. and bromine. See *B. tribromide, B. dibromide*, and *B. oxybromide*.—**B. carbonate.** Fr., *carbonate de b., b. carbonaté*. Ger., *kohlensaures Wismutoxyd*. It., *carbonato di bismuto*. Sp., *carbonato de bismuto*. See *Basic b. carbonate* and *B. subcarbonate*. The carbonate of b. of the Br. Ph. is b. subcarbonate. [B.]—**B. chloride.** Fr., *chlorure de b*. Ger., *Chlorwismut*. It., *cloruro di bismuto*. Sp., *cloruro de bismuto*. A compound of b. and chlorine. [B.] See *B. dichloride, B. trichloride*, and *B. oxychloride*.—**B. chlorsulphide.** B. thiochloride; a substance, BiSCl, forming white acicular crystals insoluble in water. [B, 3.]—**B. chromate.** Fr., *chromate de b*. Ger., *chromsaures Wismut* (oder *Wismutoxyd*). It., *cromato di bismuto*. A compound of b. and chromic acid. Several basic chromates and polychromates of b. are known. [B, 3.]—**B. citrate.** Fr., *citrate de b*. Ger., *citronensaures Wismut*. It., *citrato di bismuto*. Sp., *citrato de bismuto*. A compound of b. and citric acid. The *normal citrate of b.* (Lat., *bismuthi citras* [U. S. Ph.], *bismuthum citricum;* Fr., *citrate de b. neutre;* Ger., *neutrales citronsaures Wismuth*), $C_6H_5O_7.Bi$, is official in the U. S. Ph. It is a white amorphous powder devoid of taste and odor and insoluble in water and in alcohol. [B, 3.]—**B. dibromide.** Fr., *dibromure* (ou *bibromure*) *de b*. Ger., *Wismutdibromür*. It., *dibromuro di bismuto*. A substance, $BiBr_2$, suspected to exist, but not yet satisfactorily isolated. [B, 3.]—**B. dichloride.** Fr., *bichlorure* (ou *dichlorure*) *de b*. Ger., *Wismutchlorür*. It., *bicloruro* (o *dicloruro*) *di bismuto*. Sp., *dicloruro de bismuto*. A black, crystalline, fusible substance of the composition $BiCl_2$. [B, 3.]—**B. dioxide.** Fr., *bioxyde* (ou *dioxyde*) *de b*. Ger., *Wismutdioxyd*. It., *biossido* (o *diossido*) *di bismuto*. Sp., *dióxido de bismuto*. A dark-gray crystalline powder, Bi_2O_2. [B, 3.]—**B. disulphide.** Fr., *bisulfure* (ou *disulfure*) *de b*. Ger., *Wismutdisulfid*. It., *bisolfuro* (ou *disolfuro*) *di bismuto*. Sp., *disulfuro de bismuto*. A substance, Bi_2S_2, prepared by melting together b. and sulphur, forming gray aggregations of acicular crystals of a metallic appearance. When obtained by precipitation it forms a black powder of the composition $Bi_2S_2+2H_2O$. [B, 3.]—**B. dit de Quesneville** (Fr.). See *Crême de b.*—**B'ethyl.** Fr., *bismuth-éthyle*. Ger., *Wismutäthyl*. Syn.: *ethylbismuth*. A bivalent radicle, $Bi(C_2H_5)$, analogous in composition to a primary amine. [B, 4.]—**B'ethyl chloride, B'ethyl dichloride.** Fr., *chlorure* (ou *bichlorure*) *de bismuth-éthyle*. Ger., *Wismutäthyldichlorür*. A crystalline body. $Bi(C_2H_5).Cl_2$. [B, 4.]—**B'ethyl oxide.** Fr., *oxyde de bismuth-éthyle*. Ger., *Wismutäthyloxyd*. A substance of the composition $Bi(C_2H_5).O$. [B, 4.]—**B. fluoride.** Fr., *fluorure de b*. Ger., *Wismutfluorid*. It., *fluoruro di bismuto*. See *B. trifluoride*.—**B. hydrate.** Fr., *hydrate de b*. Ger., *Wismutoxydhydrat*. It., *idrato di bismuto*. Sp., *hidrato de bismuto*. B. trihydroxide. [B.]—**B. iodide.** Fr., *iodure de b*. Ger., *Jodwismut*. It., *ioduro di bismuto*. Sp., *ioduro de bismuto*. See *B. triiodide* and *B. oxyiodide*.—**B. isovalerate.** See *B. valerianate*.—**B. lactate.** Lat., *bismuthi lactas*. Fr., *lactate de b*. Ger., *milchsaures Wismut* (oder *Wismutoxyd*). It., *lattato di bismuto*. Sp., *lactato de bismuto*. A compound of b. and lactic acid. Two basic b. lactates are known, prepared by the action of sodium lactate on b. nitrate, or of lactic acid on b. hydrate or carbonate. [B, 2, 81.]—**B. lozenges.** See *Trochisci* bismuthi.—**B. nitrate.** Lat., *bismuthi nitras, bismutum nitricum*. Fr., *azotate de b*. Ger., *salpetersaures Wismutoxyd*. It., *nitrato di bismuto*. Sp., *nitrato de bismuto*. A compound of b. and nitric acid. [B.] See *B. trinitrate* and *B. subnitrate*.—**B. ochre.** An ore of b. consisting almost entirely of b. trioxide associated with iron. [B, 2.]—**B. oleopalmitate.** A name applied to an unctuous compound of b. with oleic and palmitic acids, prepared by decomposing a solution of almond-oil or castile soap with a b. salt. [B, 81.]—**B. oxide.** Fr., *oxyde de b*. It., *ossido di bismuto*. Sp., *óxido de bismuto*. A compound of b. and oxygen. See *B. dioxide, B. trioxide, B. tetroxide*, and *B. pentoxide*. The oxide of b. of the Br. Ph. is the trioxide. [B.]—**B. oxybromide.** Fr., *oxybromure de b*. Ger., *Wismutoxybromür*. It., *ossibromuro di bismuto*. Sp., *oxibromuro de bismuto*. Basic b. bromide, BiOBr; a white substance precipitated from an aqueous solution of tribromide of b. by the addition of an excess of water. [B, 3.]—**B. oxychloride.** Fr., *oxychlorure de b., blanc de fard*. Ger., *Wismutoxychlorür*. It., *ossicloruro di bismuto*. Sp., *oxicloruro de bismuto*. Basic b. chloride, BiOCl; a white powder, insoluble in water, prepared by decomposing b. trichloride with water or by treating a solution of sodium chloride with b. nitrate. It constitutes a pigment called pearl-white. [B, 2, 3.]—**B. oxyiodide.** Fr., *oxyiodure de b*. Ger., *Wismutoxyjodür*. It., *ossi-ioduro di bismuto*. Sp., *oxi-ioduro de bismuto*. Basic b. iodide, b. subiodide, BiOI; a crystalline substance of a copper-red color precipitated from an aqueous solution of b. triiodide by boiling. It is used as a local application in chronic ulceration, and also employed internally. [B, 3; "Am. Jour. of Pharm.," Dec., 1886, pp. 590, 599.]—**B. oxysulphide.** Fr., *oxysulfure de b*. Ger., *Wismutoxysulfür*. It., *ossisolfuro di bismuto*. Sp., *oxisulfuro de bismuto*. A compound of b. with oxygen and sulphur. Several oxysulphides of b. are known, one of which, having the formula Bi_4O_3S, occurs as a mineral. [B, 3.]—**B. pentoxide.** Fr., *pentoxyde de b*. Ger., *Wismutpentoxyd*. It., *pentossido di bismuto*. Sp., *pentóxido de bismuto*. Bismuthic oxide (or anhydride); an unstable substance forming a brown powder of the composition Bi_2O_5. [B, 3.]—**B. peroxide.** See *B. pentoxide*.—**B. phosphate.** Lat., *bismuthi phosphas*. Fr., *phosphate de b*. Ger., *phosphorsaures Wismutoxyd*. It., *fosfato di bismuto*. Sp., *fosfato de bismuto*. A compound of b. and phosphoric acid; a white pulverulent substance of the composition $BiPO_4$. The medicinal properties are the same as those of the subnitrate, for which, being a more stable salt, it has been proposed as a substitute. [Fredenat, "Giorn. Farm. Napol."; "Nouv. remèdes"; "N. Y. Med. Jour.," Nov., 1885, p. 620; B, 3, 81.] See also *B. pyrophosphate*.—**B. protoxide.** See *B. trioxide*.—**B. purifié** [Fr. Cod.]. Lat., *bismuthum*. B. purified for pharmaceutical purposes. [B, 113.]—**B. pyroarsenate.** See *B. arsenate*.—**B. pyrophosphate.** Fr., *pyrophosphate de b*. Ger., *pyrophosphorsaures Wismutoxyd*. It., *pirofosfato di bismuto*. Sp., *pirofosfato de bismuto*. A compound of b. and pyrophosphoric acid; a substance of the composition $Bi_4(P_2O_7)_3$. [B, 3.]—**B. salicylate.** Lat., *bismuthi salicylas, bismuthum salicylicum*. Fr., *salicylate de b*. Ger., *salicylsaures Wismutoxyd*. It., *salicilato di bismuto*. Sp., *salicilato de bismuto*. A compound of b. and salicylic acid, prepared by decomposing a solution of b. nitrate in glycerin with sodium salicylate. It is a granular, pulverulent, neutral substance of a pinkish hue, which has been used in various gastro-intestinal affections. [B, 81; Desplats, "Gaz. hebd. de méd. et de chir.," June 1, 1883, p. 377; J. Ehring, "Arch. f. Kinderheilk.," ix, 2, 1887, p. 90.]—**B. selenide.** Fr., *séléniure de b*. See *B. triselenide*.—**B. silicate.** Fr., *silicate de b*. Ger., *kieselsaures Wismutoxyd*. It., *silicato di bismuto*. Sp., *silicato de bismuto*. A compound of b. and silicic acid; a crystalline substance, $Bi_4(SiO_4)_3$, occurring native as a mineral. [B, 3.]—**B. subbromide.** See *B. oxybromide*.—**B. subcarbonate.** Lat., *bismuthi subcarbonas* [U. S. Ph.], *bismuthi carbonas* [Br. Ph., 1867], *carbonas bismuthicus* [Netherl. Ph.], *bismutum carbonicum* [Swiss Ph.]. Fr., *sous-carbonate de b*. Ger., *basisches kohlensaures Wismutoxyd, Wismutsubcarbonat*. It., *sotto-carbonato di bismuto*. Sp., *subcarbonato de bismuto*. A basic carbonate of b., $Bi_2O_2.CO_3+H_2O$, prepared by

precipitating a solution of b. trinitrate with carbonate of ammonium. It is a white or yellowish-white powder, devoid of taste and insoluble in water and in alcohol. [B.]—**B. subchloride.** Lat., *bismuthi subchloridum.* 1. See *B. oxychloride.* 2. A name given to the chloride, Bi_2Cl_8, formed by the action of chlorine upon b. trichloride and in other ways; said to have an action similar to that of b. subnitrate. [B, 3, 199.]—**B. subnitrate.** Lat., *bismuthi subnitras* [U. S. Ph., Br. Ph.], *subnitras bismuthi* [Belg. Ph.], *bismuthum subnitricum præcipitatum* [Russ. Ph.], *bismuthum subnitricum* [Austr. Ph., Hung. Ph., Greek Ph.], *bismutum subnitricum* [Ger. Ph., Norweg. Ph., Swiss Ph.], *nitras bismuthicus basicus* [Netherl. Ph.], *subnitras bismuthicus* [Dan. Ph., Fr. Cod., Finn. Ph., Netherl. Ph., Swed. Ph.], *bismuthum album.* Fr., *sous-azotate de b.* [Fr. Cod.]. It., *sottonitrato di bismuto.* Sp., *subnitrato bismútico* [Sp. Ph.] (*ó de bismuto*). Basic b. nitrate, $Bi(OH)_2.NO_3$, or $BiO.NO_3 + H_2O$; a substance precipitated from a solution of b. in nitric acid by dilution with water. It is a heavy white micro-crystalline powder, having no odor and a very slight acid taste and reaction, insoluble in water and in alcohol, but soluble in mineral acids. It is employed topically as a protective and soothing application to inflamed and excoriated surfaces, as in burns, ulcers, fissures, etc., also to check morbid discharges, as in leucorrhœa and fœtid sweating, coryza, and ozæna. Internally it is employed as an anodyne and astringent in gastralgia, ulcer and cancer of the stomach, diarrhœa of all kinds, and dysentery, in which disease it is also employed in the form of rectal injections. [B, 81, 95.]—**B. suboxide.** Fr., *suboxide* (ou *sous-oxyde*) *de b.* Ger., *Wismutsuboxyd.* It., *sotto-ossido di bismuto.* Sp., *subóxido de bismuto.* See *B. dioxide.*—**B. subprotocarbonate.** See *B. subcarbonate.*—**B. subprotonitrate.** B. subnitrate. [B, 97.]—**B. sulphate.** Fr., *sulfate de b.* Ger., *schwefelsaures Wismutoxyd.* It., *solfato di bismuto.* Sp., *sulfato de bismuto.* A compound of b. and sulphuric acid. [B.] See *B. trisulphate* and *Basic b. sulphate.*—**B. sulphide.** Fr., *sulfure de b.* Ger., *Schwefelwismut.* It., *solfuro di bismuto.* Sp., *sulfuro de bismuto.* A compound of b. and sulphur. [B.] See *B. disulphide*, *B. trisulphide*, and *B. oxysulphide.*—**B. sulphocacodylate.** See *B. thiocacodylate.*—**B. sulphuret.** See *B. sulphide.*—**B. tannate.** Lat., *bismuthi tannas*, *bismutum tannicum.* Fr., *tannate de b.* Ger., *gerbsaures Wismutoxyd.* It., *tannato di bismuto.* Sp., *tannato de bismuto.* A light yellow pulverulent substance, insoluble in water and in alcohol; prepared by decomposing b. nitrate with sodium hydrate and treating the b. hydrate so formed with tannic acid. [B, 81.]—**B. telluride.** See *B. tritelluride.*—**B. terchloride.** See *B. trichloride.*—**B. ternitrate.** See *B. trinitrate.*—**B. teroxide.** See *B. trioxide.*—**B. tersulphide.** See *B. trisulphide.*—**B. tetroxide.** Fr., *tétroxyde de b.* Ger., *Wismuttetroxyd.* Bismuthous bismuthate; a substance having the composition Bi_2O_4,$(Bi_2O_3 + Bi_2O_5 = 2Bi_2O_4)$, which may be regarded as a compound of b. trioxide and b. pentoxide (bismuthic acid). [B, 3.]—**B. thiocacodylate.** A substance forming delicate golden-yellow scales of the constitution $[As(CH_3)_2]_3S_6Bi$, insoluble in water and nearly insoluble in alcohol and in ether. [B, 2.]—**B. thiochloride.** See *B. chlorsulphide.*—**B. tribromide.** Fr., *tribromure de b.* Ger., *Wismutbromid*, *Wismuttribromür.* It., *tribromuro di bismuto.* Sp., *tribromuro de bismuto.* A golden-colored deliquescent crystalline substance, $BiBr_3$, decomposed by solution in water. It combines with bromides of other elements and with ammonium to form double salts. [B, 3.]—**B. trichloride.** Fr., *trichlorure de b.* Ger., *Wismutchlorid*, *Wismuttrichlorür.* It., *tricloruro di bismuto.* Sp., *tricloruro de bismuto.* A white granular substance, $BiCl_3$, obtainable by sublimation in the crystalline form. It dissolves in a small quantity of water, but the addition of an excess of water decomposes it with the formation of oxychloride of b. Trichloride of b. combines with hydrochloric acid, ammonium, and the chlorides to form double salts. By the action of chlorine it is converted into b. subchloride (2d def.). [B, 3.]—**B'triethyl.** Ger., *Wismuttriäthyl*, *Triäthylbismuthin.* Syn.: *triethylbismuthine.* A body having the composition $Bi.(C_2H_5)_3$; a liquid of a very disagreeable odor and taking fire spontaneously on exposure to the air. [B, 4.]—**B. trifluoride.** Fr., *trifluorure de b.* It., *trifluoruro di bismuto.* A white powder of the composition BiF_3. [B, 3.]—**B. trihydroxide.** Fr., *trihydroxyde de b.* Ger., *Wismutoxydhydrat.* It., *tri-idrossido di bismuto.* Sp., *tri-hidróxido de bismuto.* A white amorphous substance of the composition $Bi(OH)_3$. [B, 3.]—**B. triiodide.** Fr., *triiodure de b.* Ger., *Wismutjodid.* It., *triioduro di bismuto.* Sp., *tri-ioduro de bismuto.* A substance, BiI_3, forming dark-gray or black tabular crystals of a metallic lustre. It combines with hydriodic acid and other substances to form compound salts. [B, 3.]—**B. trinitrate.** Lat., *bismuthi nitras.* Fr., *tri-nitrate de b. azotate de b. neutre.* Ger., *salpetersaures Wismutoxyd.* It., *trinitrato di bismuto.* Sp., *trinitrato de bismuto.* Normal b. nitrate, $Bi(NO_3)_3 + 3H_2O$; a substance forming transparent prismatic crystals, obtained by dissolving b. in nitric acid and evaporating. If water is added to its solution in nitric acid it is converted into the insoluble subnitrate and precipitated. [B, 3.]—**B. trioxide.** Lat., *bismuthi oxidum* [Br. Ph.], *bismuthum oxydatum.* Fr., *trioxyde de b.* Ger., *Wismutoxyd*, *Wismuttrioxyd.* It., *triossido di bismuto.* Sp., *trióxido de bismuto.* Often called simply oxide of b., Bi_2O_3; a substance found native as bismuth-ochre and obtainable artificially either in the form of a dull lemon-yellow powder or that of fine crystals. It is insoluble in water. [B, 3.]—**B. triselenide.** Fr., *triséléniure de b.* A brittle crystalline mass, Bi_2Se_3, of a metallic lustre. [B, 3.]—**B. trisnitrate.** See *B. trinitrate.*—**B. trisulphate.** Fr., *trisulfate de b.* Ger., *schwefelsaures Wismutoxyd*, *Wismuttrisulfat.* It., *trisolfato di bismuto.* Sp., *trisulfato de bismuto.* An amorphous white substance, $Bi_2(SO_4)_3$; decomposed by water with the formation of basic b. sulphate. [B, 3.]—**B. trisulphide.** Fr., *trisulfure de b.* It., *trisolfuro di bismuto.* Sp., *trisulfuro de bismuto.* A substance, Bi_2S_3, occurring native as bismuthite, and obtainable artificially in the same crystalline form as that mineral. It can also be procured as a blackish-brown powder readily soluble in nitric acid. [B, 3.]—**B. tritelluride.** A compound, Bi_2Te_3, of b. and tellurium, occurring native as the mineral tetradymite. [B, 3.]—**B. valerianate.** Lat., *bismutum valerianicum* [Ger. Ph., 1st ed., Swiss Ph.], *bismuthum valerianicum* [Russ. Ph.], *bismuthi valerianas.* Ger., *baldriansaures Wismut.* It., *valerianato di bismuto.* Sp., *valerianato de bismuto.* Isovalerate of b.; a whitish powder, $Bi(C_5H_9O_2)_3$. It has been recommended for neuralgic affections in doses of from half a grain to two grains. [B, 5.]—**Bisulfure de b.** (Fr.). B. disulphide. [B.]—**Blanc de b.** (Fr.). B. subnitrate. [B, 93.]—**Bromure de b.** (Fr.). B. bromide. [B.]—**Carbonate basique de b.** (Fr.). Basic b. carbonate. [B.]—**Chlorure de b.** (Fr.). B. chloride. [B.]—**Crême de b.** [Quesvenille]. Recently precipitated b. subnitrate washed, but not dried, and containing about 30 per cent. of the dry salt; used as a remedy in dysentery. [B, 92, 93.]—**Dibromure de b.** (Fr.). B. dibromide. [B.]—**Dichlorure de b.** (Fr.). B. dichloride. [B.]—**Dioxyde de b.** (Fr.). B. dioxide. [B.]—**Flowers of b.** Lat., *flores bismuthi.* The product obtained by subliming b. with water. [B, 70.]—**Fluorure de b.** (Fr.). B. fluoride. [B.]—**Iodure de b.** (Fr.). B. iodide. [B.]—**Magistery of b.** Lat., *magisterium bismuthi.* Fr., *magistère de b.* It., *magistero di bismuto.* B. subnitrate. [B.]—**Neutral b. nitrate.** See *B. trinitrate.*—**Nitrate basique de b.** (Fr.). B. subnitrate. [B, 93.]—**Nitrate de b.** (Fr.). B. nitrate. [B.]—**Normal b. citrate.** See *B. citrate.*—**Normal b. nitrate.** See *B. trinitrate.*—**Oxyde blanc de b.** (Fr.). See *B. subnitrate.*—**Oxyde de b.** (Fr.). B. oxide. [B.]—**Phosphate de b.** (Fr.). See *B. phosphate.*—**Purified b.** [Br. Ph.]. Lat., *bismuthum purificatum* [Br. Ph.]. Fr., *b. purifié* [Fr. Cod.]. Ger., *gereinigtes Wismut.* It., *bismuto purificato.* B. purified for pharmaceutical purposes, especially b. freed from arsenic. [B.]—**Salicylate de b.** (Fr.). See *B. salicylate.*—**Séléniure de b.** (Fr.). B. selenide. [B.]—**Solution of b. and ammonium citrate.** See *Liquor* BISMUTHI *et ammonii citratis.*—**Sous-azotate de b.** [Fr. Cod.]. B. subnitrate. [B, 13.]—**Sous-carbonate de b.** (Fr.). B. subcarbonate. [B.]—**Sous-chlorure de b.** (Fr.). See *B. subchloride.*—**Sous-iodure de b.** (Fr.). See *B. oxyiodide.*—**Sous-nitrate de b.** (Fr.). B. subnitrate. [B.]—**Sulfate basique de b.** (Fr.). Basic b. sulphate. [B.]—**Sulfate de b.** (Fr.). B. sulphate. [B.]—**Sulfure de b.** (Fr.). B. sulphide. [B.]—**Tablettes de sous-nitrate de b.** [Fr. Cod.]. See *Trochischi* BISMUTHI.—**Tannate de b.** (Fr.). See *B. tannate.* **Telluric b.** See *B. tritelluride.*—**Tribromure de b.** (Fr.). B. tribromide. [B.]—**Trichlorure de b.** (Fr.). B. trichloride. [B.]—**Triiodure de b.** (Fr.). B. triiodide. [B.]—**Trioxyde de b.** (Fr.). B. trioxide. [B.]—**Trisulfate de b.** (Fr.). B. trisulphate. [B.]—**Trisulfure de b.** (Fr.). B. trisulphide. [B.]—**Troches of b.** See *Trochisci* BISMUTHI.—**White b.**, **White b. oxide.** Lat., *bismuthum album.* Fr., *oxyde blanc de b.* It., *bismuto bianco.* See *B. subnitrate.*

BISMUTHAL, adj. Bi²z'mu³th-a²l. Consisting of or containing bismuth. [L, 56.]

BISMUTHATE, n. Bi²z'mu³th-at. Fr., *bismuthate.* It., *bismutato.* A salt of bismuthic acid. [B.]

BISMUTHIC, adj. Bi²z-mu³th'i²k. Lat., *bismuthicus.* Fr., *bismuthique.* Derived from bismuth; containing bismuth as a pentad radicle. [B.]—**B. acid.** Lat., *acidum bismuthicum.* Fr., *acide bismuthique.* A red powder, $HBiO_3$, which may be regarded as the hydrate of bismuth pentoxide, $(Bi_2O_5 + H_2O = 2HBiO_3)$, which acts as a monobasic acid, forming salts called *bismuthates.* [B, 3, 91.]—**B. anhydride.** See BISMUTH *pentoxide.*—**B. hydrate.** See *B. acid.*—**B. oxide.** See BISMUTH *pentoxide.*

BISMUTHICUS (Lat.), adj. Bi²z(bi²s)-mu³th(muth)'i²k-u³s(u⁴s). See BISMUTHIC and SUBNITRAS *b.*

BISMUTHIDE (Fr.). adj. Bi²z-mu⁶t-ed. Resembling bismuth; as a noun, one of a class of minerals of which bismuth is a type. [B, 38.]

BISMUTHIFEROUS, adj. Bi²z-mu³th-i²f'e²r-u³s. From *bismuthum*, bismuth, and *ferre*, to bear. Fr., *bismuthifère.* Containing or producing bismuth. [B, 38.]

BISMUTHINE, n. Bi²z'mu³th-en. Ger., *Bismuthin.* 1. A compound of bismuth with a radicle, analogous in composition to an amine. 2. A native trisulphide of bismuth. [B, 3, 38.]

BISMUTHITE, n. Bi²z'mu³th-it. A mineral containing bismuth under the form of the trisulphide, although according to some authors it is a carbonate of bismuth. [B, 3, 38.]

BISMUTHOSIS (Lat.), n. f. Bi²z(bi²s)-mu³th(muth)-o'si²s. Gen., *bismutho'seos* (*-sis*). The condition in which bismuth is absorbed by the system and deposited in the gums. [Petersen, "Dtsch. med. Wchnschr.," 1883, No. 25 (B).]

BISMUTHOUS, adj. Bi²z'mu³th-u³s. Containing bismuth as a trivalent radicle. [B.]—**B. bismuthate.** See BISMUTH *tetroxide.*—**B. nitrate.** Bismuth trinitrate. [B, 81.]—**B. oxide.** See BISMUTH *trioxide.*—**B. sulphide.** Bismuth trisulphide. [B.]—**Hydrated b. oxide.** Bismuthic acid. [B, 199.]

BISMUTHUM (Lat.), n. Bi²z(bi²s)-mu²(mu)'thu³m(thu⁴m). The official title of bismuth in the U. S. Ph., Br. Ph., Belg. Ph., Finn. Ph., Greek Ph., Netherl. Ph., Swed. Ph., and Fr. Cod. [B.]—**Bismuthi ammonio citras.** Bismuth and ammonium citrate. [B, 81.]—**Bismuthi carbonas** [Br. Ph.]. Bismuth subcarbonate. [B.]—**Bismuthi citras** [U. S. Ph., Br. Ph., 1885]. Normal citrate of bismuth. [B.] See BISMUTH *citrate.*—**Bismuthi et ammonii citras** [U. S. Ph., Br. Ph.]. See BISMUTH *and ammonium citrate.*—**Bismuthi flores.** See *Flowers of* BISMUTH.—**Bismuthi lactas.** Bismuth lactate. [B, 81.]—**Bismuthi magisterium.** See *Magistery of* BISMUTH.—**Bismuthi nitras.** See BISMUTH *trinitrate.*—**Bismuthi oxidum** [Br. Ph.]. Oxide (trioxide) of bismuth. [B.]—**Bismuthi oxychloridum.** Bismuth oxychloride. [B, 81.]—**Bismuthi phosphas.** Bismuth phosphate. [B, 81.]—**Bismuthi salicylas.** Bismuth salicylate. [B, 81.]—**Bismuthi subcarbonas** [U. S. Ph.]. Bismuth subcarbonate. [B.]—**Bismuthi subnitras** [U. S. Ph., Br.

Ph.]. Bismuth subnitrate. [B.]—**Bismuthi tannas.** Bismuth tannate. [B, 81.]—**Bismuthi ternitras.** Bismuth trinitrate. [B, 81.]—**Bismuthi valerianas.** See BISMUTH *valerianate.*—**B. album.** White bismuth; subnitrate of bismuth. [B.]—**B. citricum.** Bismuth citrate. [B.]—**B. citricum ammoniatum.** Bismuth and ammonium citrate. [B, 81.]—**B. hydrico-nitricum, B. nitricum, B. nitricum præcipitatum.** Bismuth subnitrate. [B, 81, 97.]—**B. oxydatum.** Bismuth trioxide. [B, 81.]—**B. oxydulatum album.** Bismuth subnitrate. [B, 97.]—**B. peptonatum siccum pulverisatum.** A preparation containing 3·1 per cent. of bismuth, or 3·5 per cent. of oxide of bismuth, in a soluble form. [Merck, "Dtsch. Med.-Ztg.," Feb. 11, 1886, p. 137.]—**B. purificatum** [Br. Ph.]. Fr., *bismuth purifié* [Fr. Cod.]. See *Purified* BISMUTH.—**B. salicylicum.** Bismuth salicylate.—**B. subcarbonicum.** Bismuth subcarbonate. [B.]—**B. subnitricum.** Bismuth subnitrate. [B, 97.]—**B. tannicum.** Bismuth tannate. [B, 81.]—**B. trisnitricum.** Bismuth trinitrate. [B, 81.]—**B. valerianicum.** Bismuth valerianate. [B.]—**Flores bismuthi.** See *Flowers of* BISMUTH.—**Liquor bismuthi et ammoniæ citratis** [Br. Ph., 1867], **Liquor bismuthi et ammonii citratis** [Br. Ph.]. Solution of citrate of bismuth and ammonium; a preparation made by rubbing up 800 grains of bismuth citrate with water, adding enough ammonia water to effect solution, and diluting with water up to a pint. It is a clear neutral or weakly alkaline liquid, employed internally for the same purposes as bismuth subnitrate. [B.]—**Magisterium bismuthi.** See *Magistery of* BISMUTH.—**Nitras bismuthi, Subnitras bismuthi.** Bismuth subnitrate. [B, 97.]—**Trochisci bismuthi** [Br. Ph.]. Fr., *tablettes de sousnitrate de bismuth.* Syn.: *tabellæ cum subnitrate bismuthico* [Fr. Cod.]. Bismuth lozenges; troches of bismuth. Each troche contains 2 grains of bismuth subnitrate, about 2½ grains of magnesium carbonate, and 3½ grains of calcium carbonate, with 17½ grains of sugar, and a little over ½ grain of gum arabic, made into the proper consistence with mucilage and rose-water. The corresponding French preparation contains in each tablet 10 centigrammes (about 1½ grain) of bismuth subnitrate with sugar up to a gramme (15½ grains), made into the proper consistence with mucilage of tragacanth. [B, 5, 113.]

BISMUTHYL, n. Bi^{2}z'mu^{3}th-i^{2}l. A univalent radicle, BiO. [B.]—**B. bromide, B. chloride, B. iodide.** See BISMUTH *oxybromide,* BISMUTH *oxychloride,* and BISMUTH *oxyiodide.* [B.]

BISMUTITE, n. Bi^{2}z'mu^{3}t-it. See BISMUTHITE.

BISMUTUM (Lat.), n. n. Bi^{2}z(bi^{2}s)-mu^2(mu)'tu^{3}m(tu^{4}m). Bismuth; the official title in the German, Norwegian, and Swiss Pharmacopœias. [B, 95.]—**B. carbonicum** [Swiss Ph.]. Bismuth subcarbonate. [B, 95.]—**B. citricum.** Bismuth citrate. [B, 95.]—**B. citricum ammoniatum.** Bismuth and ammonium citrate. [B, 95.]—**B. oxydatum.** Bismuth oxide. [B, 95.]—**B. subnitricum** [Ger. Ph., Norweg. Ph., Swiss Ph.]. Bismuth subnitrate. [B.]—**B. valerianicum** [Ger. Ph., 1st ed.; Swiss Ph.]. Bismuth valerianate. [B.]

BISNAGO, BISNAGUS, n's. The *Daucus visnaga.* [B, 81.]

BISOTTE (Fr.), n. Be-zot. A species of *Agaricus.* [B, 38.]

BISPATHELLATE, adj. Bi-spa^{2}th-e^{2}l'lat. Lat., *bispathellatus* (from *bis,* doubly, and *spathella* [*q. v.*]). Fr., *bispathellé.* Composed of two spathellæ (said of a glume). [B, 1.]

BISPATHELLULATE, adj. Bi-spa^{2}th-e^{2}l'lu^{2}l-at. Lat., *bispathellulatus* (from *bis,* doubly, and *spathellula* (*q. v.*). Fr., *bispathellulé.* Composed of two spathellulæ (said of a glumella). [B, 1.]

BISPENIÆ (Lat.), n. f. pl. Bi^{2}s-pen(pan)'i^2-e(a^3-e^2). From *bis,* doubly, and *penis* (*q. v.*). Fr., *bispéniens.* Of De Blainville, an order of reptiles comprising those with a double penis. [L, 116.]

BISPICATUS (Lat.), adj. Bi(bi^2)-spik(spek)-a(a^3)'tu^{3}s(tu^{4}s). From *bis,* doubly, and *spica,* a point. See BISPINOSE.

BISPINOSE, adj. Bi-spin'os. Lat., *bispinosus* (from *bis,* doubly, and *spina,* a spine). Having two spines. [L, 56.]

BISPIRUS (Lat.), adj. Bi(bi^2)-spi(spe)'ru^{3}s(ru^{4}s). From *bis,* doubly, and *spirare,* to breathe. See DIPNOUS.

BISS (Ger.), n. Bi^{2}s. A bite. [B.]—**B'wurm.** See ŒSTRUS *bovis.*

BISSA BÔL, n. Syn.: *hăbăk hadee* [Dymock], *hebbakhade* [Somatis], *myrrha indica* [Martiny]. A substance, perhaps derived from the *Balsamodendron kafal,* exported from Berbera to India and China. It much resembles myrrh, from which it is distinguished by the angular interstices in its substance filled with a transparent reddish-brown resin, and by its very peculiar powerful aromatic odor. It is used in adulterating myrrh, and by the Chinese as incense, also for mixing with the food of milch-cattle in order to improve the quantity and increase the quality of the milk. [R. H. Parker, "Pharm. Jour. and Trans.," Aug. 2, 1879, p. 81 (B).]

BISSE (Fr.), n. Bi^{2}s. See BYSSUS.

BISSECT, v. tr. Bi^{2}s-se^{2}kt'. See BISECT.

BISSECTION, n. Bi^{2}s-se^{2}k'shu^{3}n. See BISECTION.

BISSECTUS (Lat.), adj. Bi^{2}s-se^{2}k'tu^{3}s(tu^{4}s). From *bis,* doubly, and *secare,* to cut. Divided into two parts; according to Kirby, divisible into two pieces. [L, 180.] See BISECTUS.

BISSEGMENT, n. Bi^{2}s-se^{2}g'me^{2}nt. See BISEGMENT.

BISSEN (Ger.), n. Bi^{2}s'se^{2}n. The bolus of masticated food when ready for swallowing. [K, 16.]—**Medicinischer B.** See BOLUS. [L, 43.]

BISSEPTEMPUSTULÉ (Fr.), adj. Bi^{2}s-se^{2}p-te^{2}m-pu^{6}s-tu^{6}l-a. Marked with fourteen red dots. [B, 38.]

BISSUS (Lat.), n. m. Bi^{2}s'su^{3}s(su^{4}s). See BYSSUS.

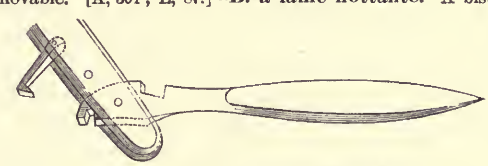
BISTACHIUM, BISTACIUM (Lat.), n's. n. Bi^{2}s-ta^{2}k(ta^{3}ch^2)'i^2-u^{3}m(u^{4}m), -ta^{2}k(ta^{3}k)'i^2-u^{3}m(u^{4}m). See PISTACIA.

BISTEARATE, n. Bi-ste'a^{3}r-at. From *bis,* doubly, and *στέαρ,* tallow. Fr., *bistéarate.* An acid stearate, *i. e.,* one containing twice as much of the stearic-acid constituent in proportion to the base as the neutral stearates. [B, 38.]

BISTELLATE, adj. Bi-ste^{2}l'lat. From *bis,* doubly, and *stella,* a star. Having the shape of a double star. [B.] See *Bistellate* FIGURE.

BISTIPELLÉ (Fr.), adj. Be-sti^{2}p-e^{2}l-la. Furnished with two stipels. [B, 38.]

BISTIPULED, adj. Bi-sti^{2}p'u^{2}ld. Fr., *bistipulé.* Having two stipules. [L, 56.]



BISTORT, n. Bi^{2}s'to^{2}rt. Lat., *bistorta.* Fr., *bistorte.* Ger., *Natterwurz, Drachenwurz, Krebswurz.* The *Polygonum bistorta.* [B.]—**Alpine b.** The *Polygonum viviparum.* [B, 34.]—**Greater b.** The *Polygonum bistorta.* [B, 275.]—**Small b.** The *Polygonum viviparum.* [B.]

BISTORTA (Lat.), n. f. Bi^{2}s-to^{2}rt(tort)'a^3. From *bis,* twice, and *tortus,* twisted, alluding to the root. Bistort (the *Polygonum b.*). [B, 170.]—**Bistortæ radix.** See *Radix bistortæ.*—**B. major, B. major rugosioribus foliis** [J. Bauhin], **B. major vulgaris** [Parkinson], **B. radice minus intorta** [C. Bauhin], **B. serpentaria** [Chab.]. See *B.*—**Extractum bistortæ** [Belg. Ph.]. Fr., *extrait de bistorte* [Fr. Cod.]. An aqueous extract made from the sliced root of the *Polygonum b.* by maceration and expression. [B, 95, 113.]—**Radix bistortæ.** The root of the *Polygonum b.* [B, 180.]

BISTORTE (Fr.), n. Bi^{2}s-tort. Bistort. [B, 113.]—**Extrait de b.** [Fr. Cod.]. See *Extractum* BISTORTÆ.—**Poudre de b.** [Fr. Cod.]. The root of *Polygonum bistorta* dried in an oven at a temperature of 40° C., powdered in an iron mortar, and passed through a sieve of 120 meshes to the inch (French). [B, 113.]

BISTORTIER (Fr.), n. m. Bi^{2}s-tort-i-a. A sort of wooden pestle with a long handle. [B, 52.]

BISTOURI (Fr.), n. Bi^{2}s-tur-e. See BISTOURY.—**B. à cliquet.** A bistoury in which a catch takes the place of a spring to keep the instrument closed or open.—**B. à double tranchant.** A double-edged bistoury.—**B. aiguillé.** A bistoury with a very narrow, needle-like blade. [A, 385.]—**B. à la lime.** A bistoury with a file-like edge which cuts only parts that are put upon the stretch. [A, 385.]—**B. à lame dormante** (ou fixe). A bistoury with the blade immovable. [A, 301; L, 87.]—**B. à lame flottante.** A bistoury

A BISTOURI À CLIQUET. (AFTER LÜER.)

with a sliding blade. [L, 43.]—**B. à lame mobile.** A bistoury with a movable blade. [L, 87.]—**B. à ressort.** A bistoury which is kept closed or open by means of a spring like that of a pocket-knife. [L, 43.]—**B. boutonné.** See *Probe-pointed* BISTOURY.—**B. caché.** Lat., *forceps deceptoria.* A bistoury in which the blade is concealed in a cannula, for introduction past parts which it is desired not to injure, and is made to protrude when it has reached the part into which an incision is to be made. Many varieties have been made, adapted to special purposes.—**B. convexe.** See *Convex* BISTOURY.—**B. courbe.** A curved bistoury.—**B. de doight.** A knife blade mounted on a ring to be applied to the finger; used for perforating the fœtal head. [Roederer (A, 385).] Cf. AMNIOTOME.—**B. droit.** A straight bistoury. [L, 109.]—**B. gastrique.** An instrument devised by Morand for enlarging wounds of the abdomen. [A, 385; E; L, 43.]—**B. herniaire.** See *Hernia* KNIFE.—**B. royal.** A narrow curved probe-pointed bistoury; so called from its having been used on Louis XIV in an operation for fistula in ano. [A, 385; L, 109.]—**Bruchb'** (Ger.). See *Hernia* KNIFE.—**Knopfb'** (Ger.). See *Probe-pointed* BISTOURY.

BISTOURISER (Fr.), v. tr. Bi^{2}s-tur-e-za. To cut with a bistoury. [L, 41.]

BISTOURNAGE (Fr.), n. Bi^{2}s-turn-a^{3}zh. From *bis-* (= Engl., *mis-*), and *tourner,* to turn. Ger., *Wallachen.* A method of castration by twisting the testicles upon the spermatic cord so as to cause atrophy of the organs. [A, 300, 385; L, 41.]

BISTOURNÉ (Fr.), adj. Bi^{2}s-turn-a. Turned upon itself. [L, 180.]

BISTOURNEMENT (Fr.), n. Bi^{2}s-turn-ma^{3}n^2. See BISTOURNAGE.

BISTOURNER (Fr.), v. tr. Bi^{2}s-turn-a. To castrate by bistournage (*q. v.*). [L, 41.]

BISTOURY, n. Bi^{2}s'tu^{4}r-i^2. Gr., *σμίλη, μαχαίριον.* Lat., *culter, scalpellus.* Fr., *bistouri.* Ger., *Bistouri.* It., *bistori.* Sp., *bisturi.* A surgical knife, especially one with a small and narrow blade. [A, 385.] Cf. KNIFE and SCALPEL.—**Anæsthetic b.** A straight b. with the handle and blade channeled; devised by J. L. Corning for injecting a solution of cocaine into the part upon which it is used. [A, 469.]—**Concave b.** Fr., *bistouri concave.* A curved b. with the cutting edge on the concavity. [E.]—**Convex b.** Fr., *bistouri convexe.* A curved b. with the cutting edge on the convexity. [E.]—**Probe-pointed b.** Fr., *bistouri boutonné.* Ger., *Knopfbistouri.* A b. with a blunt, knob-like point; so called because it was originally made with a probe-like prolongation at the point. Used in sinuses, fistulæ, etc. [E.]

BISTRIATUS (Lat.), adj. Bi(bi^2)-stri(stri^2)-a(a^3)'tu^{3}s(tu^{4}s). From *bis,* doubly, and *striatus,* striated. Fr., *bistrié.* Marked with two striæ. [L.]

BISTURI (Ger.), n. Bi^{2}s-tu-re′. See BISTOURY.

BISUBULATE, adj. Bi-su^{3}b′u^{2}l-at. Lat., *bisubulatus* (from *bis*, doubly, and *subula*, an awl). Ger., *doppeltpfriemlich.* Shaped like two awls placed base to base (a botanical descriptive term). [B.]

BISUCCINAMIDE, n. Bi-su^{3}k-si^{2}n′a^{2}m-i^{2}d. A crystallizable substance, $C_8H_5O_4N$, obtained by the action of ammonia on succinic acid; moderately soluble in water, soluble with difficulty in alcohol and in ether. [A, 301.]

BISULCA (Lat.), n. n. pl. Bi(bi^2)-su^{3}l(su^{4}l)′ka^3. Fr., *bisulques.* Ger., *Zweihufer.* Ruminants. [B, 180.]

BISULCATE, BISULCOUS, adj's. Bi-su^{3}lk′at, -u^{3}s. Lat., *bisulcus* (from *bis*, twice, and *sulcus*, a furrow). Fr., *bisulque, bisulce.* Ger., *gespalten.* 1. Having two furrows. [L, 56.] 2. Divided into two parts by a furrow, cleft, especially cloven-footed. [L, 13, 104.]

BISULFARSÉNIATE (Fr.), n. Be-su^{6}lf-ar-san-i^2-a^{3}t. See BISULPHARSENATE.

BISULFARSÉNITE (Fr.), n. Be-su^{6}lf-ar-san-et. See BISULPHARSENITE.

BISULFAS (Lat.), n. m. Bi(bi^2)-su^{3}lf(su^{4}lf)′a^{2}s(a^{3}s). See BISULPHATE.

BISULFAT (Ger.), n. Be-zulf-a^{3}t′. See BISULPHATE.

BISULFATE (Fr.), n. Be-su^{6}lf-a^{3}t. See BISULPHATE.

BISULFITE (Fr.), n. Be-su^{6}lf-et. See BISULPHITE.

BISULFOMOLYBDATE (Fr.), n. Be-su^{6}lf-o-mo-li^{2}b-da^{3}t. A thiomolybdate that contains twice as much of the molybdic-sulphide constituent as the normal thiomolybdates. [B, 38.]

BISULFURE (Fr.), n. Be-su^{6}lf-u^{6}r. See BISULPHIDE.

BISULFURETUM [Fr. Cod.] (Lat.), n. n. Bi(bi^2)-su^{3}lf(su^{4}lf)-u^2(u^4)-re(ra)′tu^{3}m(tu^{4}m). See BISULPHIDE.

BISULPHARSENATE, BISULPHARSENIATE, n's. Bi-su^{3}lf-a^{3}r′se^{2}n-at, -a^{3}r-se^{2}n′i^2-at. Fr., *bisulfarséniate.* Names formerly given to the metathioarsenates, from their containing twice as much of the sulphur acid constituent in proportion to the basic sulphide constituent as the neutral sulpharsenates (pyrothioarsenates). [B.] See THIOARSENATE.

BISULPHARSENITE, n. Bi-su^{3}lf-a^{3}r′se^{2}n-it. Fr., *bisulfarsénite.* Ger., *Bisulfarsenit.* An old name for the metathioarsenites. [B.]

BISULPHATE, n. Bi-su^{3}lf′at. Lat., *bisulphas.* Fr., *bisulfate.* Ger., *Bisulfat, doppeltschwefelsaures Salz.* It., *bisolfato.* Sp., *bisulfato.* An acid sulphate; so called because it contains twice as much of the sulphuric-acid radicle as a normal sulphate. [B.]

BISULPHIDE, n. Bi-su^{3}lf′i^{2}d(id). Lat., *bisulphidum, bisulfuretum.* Fr., *bisulfure.* Ger., *Bisulfür, Bisulfid.* It., *bisolfuro.* Sp., *bisulfuro.* Syn.: *bisulphuret.* A term used partly in the sense of disulphide (as in b. of carbon) and partly, after the analogy of bichloride, binoxide, etc., to denote a compound of sulphur with an element or radicle that contains twice as much sulphur, relatively to that element or radicle, as a sulphide. [B.] Cf. MERCURY *b.*

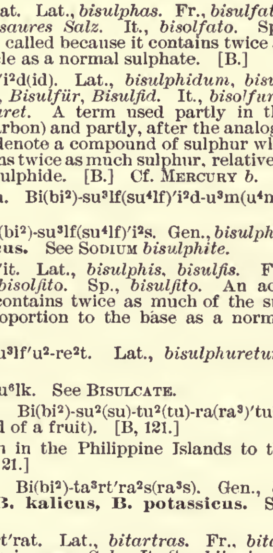
BISULPHIDUM (Lat.), n. n. Bi(bi^2)-su^{3}lf(su^{4}lf)′i^{2}d-u^{3}m(u^{4}m). See BISULPHIDE.

BISULPHIS (Lat.), n. m. Bi(bi^2)-su^{3}lf(su^{4}lf)′i^{2}s. Gen., *bisulphi′tis.* See BISULPHITE.—**B. sodicus.** See SODIUM *bisulphite.*

BISULPHITE, n. Bi-su^{3}lf′it. Lat., *bisulphis, bisulfis.* Fr., *bisulfite.* Ger., *Bisulfit.* It., *bisolfito.* Sp., *bisulfito.* An acid sulphite; so called because it contains twice as much of the sulphurous-acid constituent in proportion to the base as a normal sulphite. [B.]

BISULPHURET, n. Bi-su^{3}lf′u^2-re^{2}t. Lat., *bisulphuretum, bisulfuretum.* See BISULPHIDE.

BISULQUE (Fr.), adj. Be-su^{6}lk. See BISULCATE.



BISUTURATUS (Lat.), adj. Bi(bi^2)-su^2(su)-tu^2(tu)-ra(ra^3)′tu^{3}s(tu^{4}s). Having two sutures (said of a fruit). [B, 121.]

BITAOY, n. A name given in the Philippine Islands to the *Calophyllum inophyllum.* [B, 121.]

BITARTRAS (Lat.), n. m. Bi(bi^2)-ta^{3}rt′ra^{2}s(ra^{3}s). Gen., *bitartrat′is.* See BITARTRATE.—**B. kalicus, B. potassicus.** See POTASSIUM *bitartrate.*

BITARTRATE, n. Bi-ta^{3}rt′rat. Lat., *bitartras.* Fr., *bitartrate.* Ger., *Bitartrat, doppeltweinsaures Salz.* It., Sp., *bitartrato.* An acid, or hydric, tartrate; so called because it contains twice as much of the tartaric-acid radicle in proportion to the base as the corresponding normal tartrate. [B.]

BITEGMIA (Lat.), n. n. pl. Bi(bi^2)-te^{2}g′mi^2-a^3. 1. A stirps of the *Corticalia*, including the families *Fructungulia, Fructitubia, Calicitubia, Calicungulia, Thalamitubia, Thalamisertia,* and *Thalamungulia.* 2. A stirps of the *Decorticalia*, including the families *Thalamifloria, Fructifloria,* and *Calicifloria.* [Dumortier (B, 170).]

A BITERNATE LEAF. (AFTER YOUMANS.)

BITENTACULATE, adj. Bi-te^{2}n-ta^{2}k′u^2-lat. From *bis*, twice, and *tentaculum*, a tentacle. Fr., *bitentaculé.* Having two tentacles. [L, 11, 41.]

BITERNATE, adj. Bi-tu^{5}rn′at. Lat., *biternatus* (from *bis*, twice, and *terni*, three each). Fr., *biterné.* Ger., *doppelt dreizählig.* In botany, doubly ternate; *i. e.*, ternate and having each of the three divisions itself triply divided. [B.]

BITESTACÉ (Fr.), adj. Be-te^{2}st-a^3-sa. Covered with a two-valved testa; as a n., in the pl., *b's*, a group of the *Branchiopoda* having a testa resembling a bivalve shell. [L, 41.]

BITESTACEA (Lat.), n. n. pl. Bi(bi^2)-te^{2}st-a(a^3)′se^2(ke^2)-a^3. From *bis*, doubly, and *testa*, a shell. Fr., *bitestacés.* See OSTRACODES.

BITHI, n. See BITI.

BITHIMALCA, BITHNIMALCA, n's. See BITNIMALCA.

BITHYNOS, BITHYNUS (Lat.), n's m. Bi^{2}th′i^{2}n(u^{6}n)-o^{2}s, -u^{3}s(u^{4}s). Gr., *βιθυνός.* An ancient plaster described by Galen as useful in dropsy, also a certain pastille. [Galen, Gorræus (A, 325).]

BITI, n. A lofty evergreen tree of the East Indies, the root of which is said to furnish an oil used in the treatment of alopecia. [Ray (B, 200).]

BITING STONE-CROP, n. Bit′i^{2}ng sto^{3}n′kro^{2}p. The *Sedum acre.* [A, 308.]

BIT-LOBAN, n. See KALA-NIMAK.

BITNIMALCA, n. From Heb., *beten* or *bitni*, the belly, the stomach, and *malkah*, a queen. Syn.: *gasteranax.* A medieval name for a peculiar active principle residing in the stomach, presiding over chylification and the separation of the ingesta into nutrient and excrementitious matter. [A, 322, 325.]

BIT-NOBEN, n. See KALA-MINAK.

BITO, n. The *Balanites ægyptiaca.* [B, 121.]

BITONAL (Fr.), adj. Be ton-a^{3}l. Double-toned (said of the voice when it is emitted in two successive tones). [A, 385.]

BITOUR (Fr.), n. Be-tur. The *Ardea stellaris.* [L, 105.]

BITRIFLORE (Fr.), adj. Be-tre-flor. Bearing two or three flowers. [B, 38.]

BITROCHANTERIC, adj. Bi-tro-ka^{2}n-te^{2}r′i^{2}k. Fr., *bi-trochantérien.* Extending from one trochanter major to the other.

BITTEN, adj. Bi^{2}t′t′n. See PREMORSE.

BITTER, n. Bi^{2}t′tu^{5}r. Gr., *πικρόν.* Lat., *amarum.* Fr., *amer.* Ger., *Bitter.* A principle or substance characterized by a bitter taste. Cf. AMARA.—**Artificial b. of aloes.** See ALOE-BITTER.—**B'amsel** (Ger.). The *Polygala amara.* [B, 180.]—**B.-blain.** A name given by the Dutch Creoles in Guiana to the *Vandellia diffusa.* [B, 19.]—**B. des Hollandais** (Fr.). See LATIFIA *des Hollandais.*—**B'distel** (Ger.). The *Cnicus benedictus.* [B, 118.]—**B'erde** (Ger.). See the major list.—**B'esche** (Ger.). The *Simaruba* (*Quassia*) *excelsa.* [B, 180.]—**B'gelbsäure** (Ger.). Picric acid. [B, 48.]—**B'gift** (Ger.). Picrotoxin. [L, 43.]—**B'holz** (Ger.). See the major list.—**B.-king.** The *Soulamea amara.* [B, 19.]—**B'klee** (Ger.). The herb of *Menyanthes trifoliata.* [B, 180.]—**B'kleeextrakt** (Ger.). See *Extractum* TRIFOLII *fibrini.*—**B'kleesalz** (Ger.). Potassium quadroxalate. [B, 48.]—**B'knöterich** (Ger.). The *Polygonum hydropiper.* [L, 77.]—**B'kochsalz** (Ger.). Magnesium chloride. [B, 48.]—**B'kraut** (Ger.). 1. The genus *Picris.* 2. The herb of *Erythræa centaurium.* [B, 48.]—**B'kresse** (Ger.). The *Cochlearia officinalis.* [B, 48.]—**B'mandel** (Ger.). See the major list.—**B. of aloes.** See ALOE-BITTER.—**B'quassienrinde** (Ger.). The bark of *Quassia amara.* [B, 180.]—**B'rinde.** See the major list.—**B'salz** (Ger.). Magnesium sulphate. [B.]—**B'salzerde** (Ger.). Magnesia. [B, 48.]—**B'säure** (Ger.). Picric acid. [B, 48.]—**B'schlangenholz** (Ger.). The *Ophioxylon serpentinum.* [B, 48.]—**B'springgurke** (Ger.). The *Momordica charantia.* [L, 80.]—**B'stoff** (Ger.). See *B.* PRINCIPLE.—**B'strauch** (Ger.). See the major list.—**B'süss** (Ger.), **B.-sweet.** See the major list.—**B'wort.** Ger., *B'wurz.* An old name for the *Gentiana lutea.* [B, 19, 180.]—**B'wurzel** (Ger.). See the major list.—**B'zimmt** (Ger.), **B'zimmtlorbeer** (Ger.). The *Cinnamomum culilawan.* [B, 48, 180, 270.]—**Erythrin b.** See PICROERYTHRIN.—**Simple b.** See AMARUM *purum.*—**Welter'sches B.** (Ger.). Picric acid. [B.]

BITTERA (Lat.), n. f. Bi^{2}t-te(ta)′ra^3. A genus of rutaceous plants of the West Indies. [A, 385.]

BITTERERDE (Ger.), n. Bi^{2}t′te^{2}r-e^{2}rd-e^2. Magnesia. [B.]—**B'hydrat.** See MAGNESIUM *hydrate.*—**Schwefelsaure B.** See MAGNESIUM *sulphate.*

BITTERHOLZ (Ger.), n. Bi^{2}t′te^{2}r-ho^{3}ltz. Quassia, quassia wood. [B, 180.]—**B'baum.** The *Simaruba excelsa.* [B, 180.]—**Grossblüthiges B.** The *Xylopia grandiflora.* [B, 180.]—**Jamalkanisches B.** The wood of the *Simaruba excelsa.* [B, 180.]—**Langblättriges B.** The *Xylopia longifolia.* [B, 180.]—**Seidenhaariges B.** The *Xylopia serica.* [B, 180.]—**Strauchiges B.** The *Xylopia frutescens.* [B, 180.]

BITTERIN, n. Bi^{2}t′tu^{6}r-i^{2}n. Fr., *bittérine.* See QUASSIN.

BITTERLINGKRAUT (Ger.), n. Bi^{2}t′te^{2}r-li^{2}ng-kra^3-ut. The *Polygonum hydropiper.* [B, 180.]

BITTERMANDEL (Ger.), n. Bi^{2}t′te^{2}r-ma^{3}nd-e^{2}l. The bitter almond. [B.]—**B'grün.** Malachite green (*q. v.*); so called because prepared by the action of benzaldehyde (derived from oil of bitter almonds) on dimethylaniline. [B, 49.]—**B'öl.** Oil of bitter almonds. [B.]—**B'ölgrün.** See *B'grün.*—**B'kleie.** The residue left after the expression of the oil from bitter almonds. [B, 108.]—**B'stoff.** See AMYGDALIN.—**B'wasser.** See *Aqua* AMYGDALARUM *amarum.*—**Concentrirtes B'wasser.** See *Aqua* AMYGDALARUM *amarum concentrata.*—**Verdünntes B'wasser.** See *Aqua* AMYGDALARUM *amarum diluta.*

BITTERMITTEL (Ger.), n. Bi^{2}t′te^{2}r-mi^{2}t-te^{2}l. See AMARA.—**Adstringirende B.** See AMARA *adstringentia.*—**Salzige B.** See AMARA *resolventia salina.*

BITTERRINDE (Ger.), n. Bi^{2}t′te^{2}r-ri^{2}nd-e^2. A bitter bark. [B.]—**Mexikanische B.** See *Copalche* BARK.

BITTERS, n. pl. Bi^{2}t'tu^{5}rz. A bitter, vegetable liquid preparation designed as a tonic or appetizer.

BITTERSTRAUCH (Ger.), n. Bi^{2}t'te^{2}r-stra^3-uch^2. The genus *Picramnia.* [B, 180.]—**Fünfmänniger B.** The *Picramnia pentandra.* [B, 180.]—**Langtraubiger B.** The *Picramnia antidesma.* [B, 180.]

BITTERSÜSS (Ger.), n. Bi^{2}t'te^{2}r-zu^{6}s. The *Solanum dulcamara.* [B, 180.]—**B'aufguss.** See *Infusum* DULCAMARÆ.—**B'extrakt.** See *Extractum* DULCAMARÆ.—**B'stengel.** The stipites dulcamaræ. [B.] See SOLANUM *dulcamara.*—**Flüssiges B'extrakt.** See *Extractum* DULCAMARÆ *fluidum.*

BITTER-SWEET, n. Bi^{2}t-tu^{5}r-swet'. Lat., *dulcamara.* Fr., *douce-amère.* Ger., *Bittersüss.* It., Sp., *dulcamara.* The *Solanum dulcamara.* [B, 19.]—**Climbing b.-s., False b.-s.** The *Celastrus scandens.* [B, 75; L, 65.]

BITTER-WOOD, n. Bi^{2}t'tu^{5}r-wu^{4}d. Quassia wood, also the genus *Xylopia.* [B, 19, 81.]

BITTERWURZEL (Ger.), n. Bi^{2}t'te^{2}r-vurtz-e^{2}l. Gentian root. [B, 81.]—**Indianische B.** The *Ophiorrhiza mungos.* [L, 43.]

BITUBERCULATE, adj. Bi-tu^{2}b-u^{5}r'ku^2-lat. From *bis,* twice, and *tuberculum,* a tubercle. Fr., *bitubercué, bitubéreux.* Provided with two tubercles. [L, 27, 41.]

BITUME (Fr.), n. Be-tu^{6}m. Bitumen. [B.]—**B. de Judée** [Fr. Cod.]. Asphalt. [B, 113.]—**B. des Brahmes.** Maltha. [B, 132.]—**B. des momies.** Asphalt. [B, 132.]—**B. élastique.** Elaterite. [B, 132.]—**B. glutineux.** Maltha. [B, 132.]—**B.-naphte.** Naphtha. [B, 132.]—**B.-pétrole.** Petroleum. [B, 132.]—**B. solide.** Asphalt. [B, 132.]

BITUMEN (Lat.), n. n. Bi^{2}t-u^2(u)'me^{2}n. Gen., *bitum'inis.* Gr., ἄσφαλτος, ἀσφαλτόν. Fr., *bitume.* Ger., *Erdpech, Erdtheer, Erdharz.* It., *bitume.* Sp., *betun.* A name applied to several inflammable mineral substances consisting usually of a mixture of hydrocarbons. [B, 2.]—**Asphalto-b., Asphaltum-b., B. Arabum, B.-asphaltum, B. babylonicum.** See ASPHALT.—**B. barbadense.** See *Barbadoes* PETROLEUM.—**B. fluidum.** Petroleum. [B, 180, 270.]—**B. fossile, B. judaicum.** Asphalt. [B, 180, 199.]—**B. liquidum.** Petroleum. [B, 180.]—**B.-maltha.** See MALTHA.—**B.-petroleum.** See PETROLEUM.—**B.-petroleum indicum.** See *Barbadoes* PETROLEUM.—**B. Sodomæ.** Asphalt. [B, 180.]—**B. terræ.** Petroleum. [B, 180.]—**B. vitreum, Compact b.** Asphalt. [B, 2, 199.]—**Elastic b.** Elaterite. [B, 2.]—**Fossil b., Jewish b.** Asphalt. [B, 199; L, 120.]—**Liquid b.** Petroleum. [L, 120.]—**Solid b., Vitreous b.** Asphalt. [B, 199.]

BITUMINEUS (Lat.), adj. Bi^{2}t-u^2(u)-mi^{2}n'e^2-u^{3}s(u^{4}s). See BITUMINOUS.

BITUMINEUX (Fr.), adj. Bi^{2}t-u^{6}m-i^{2}n-u^5. See BITUMINOUS.

BITUMINIFEROUS, adj. Bi^{2}t-u^2-mi^{2}n-i^{2}f'e^{2}r-u^{3}s. Lat., *bituminiferus* (from *bitumen* [*q. v.*], and *ferre,* to bear). Fr., *bituminifère.* Yielding bitumen. [L, 41.]

BITUMINIZATION, n. Bi^{2}t-u^2-mi^{2}n-i^{2}z-a'shu^{3}n. Lat., *bituminisatio.* Fr., *bituminisation.* A transformation into bitumen. [A, 385.]

BITUMINOUS, adj. Bi^{2}t-u^2'mi^{2}n-u^{3}s. Lat., *bituminosus.* Fr., *bitumineux.* Ger., *erdpechig.* It., Sp., *bituminoso.* Resembling, containing, or pertaining to, bitumen. [A, 385.]

BITUNICATUS (Lat.), adj. Bi(bi^2)-tu^{2}n(tu^{4}n)-i^{2}k-a(a^3)'tu^{3}s-(tu^{4}s). From *bis,* doubly, and *tunicatus,* clothed. Fr., *bituniqué.* Covered with two envelopes or tunics. [L, 41.]

BI-UMBONATE, adj. Bi-u^{3}m'bon-at. From *bis,* doubly, and *umbo,* a boss. Having two boss-like processes. [L, 232.]

BIUR (Hind.), n. The *Zizyphus jujuba.* [B, 172.]

BIURATE, n. Bi-u^2'rat. An acid urate; one that contains twice as much of the uric-acid constituent as an ordinary, or neutral, urate. [B, 38.]

BIURET, n. Bi-u^2're^{2}t. Lat., *biuretum.* Fr., *biuret.* Ger., *Biuret.* Syn.: *allophanic amide, allophanamide.* A decomposition derivative of urea, $C_2O_2N_3H_5 = H_2N - CO - (NH) - CO - NH_2$, which may be regarded as consisting of 2 molecules of urea less 1 molecule of ammonia; colorless acicular crystals fairly soluble in water. [B, 4.]—**B'probe** (Ger.). See *B.* REACTION.

BIVALENCE, n. Bi^{2}v'a^{2}l-e^{2}ns. From *bis,* twice, and *valere,* to be worth. Fr., *bivalence.* Ger., *Zweiwerthigkeit.* Syn.: *divalence.* The property or condition of being bivalent. [B.]

BIVALENT, adj. Bi^{2}v'a^{2}l-e^{2}nt. Fr., *bivalent.* Ger., *zweiwerthig.* Syn.: *divalent.* Having an atomicity of two; *i. e.,* being capable of replacing two atoms of hydrogen in a compound. [B.]

BIVALVA (Lat.), n. n. pl. Bi(bi^2)-va^{2}l(wa^{3}l)'va^3(wa^3). From *bis,* twice, and *valva,* a valve. A name formerly given to all molluscs having bivalve shells. [L.]

BIVALVE, adj. Bi'va^{2}lv. Lat., *bivalvis.* Fr., *bivalve.* Ger., *zweiklappig, zweischalig.* Having two valves; as a n., a mollusc provided with two valves. [B, 28.]

BIVALVED, adj. Bi'va^{2}lvd. Having two valves; in botany, dehiscing by two valves. [B, 198.]

BIVALVIA (Lat.), n. n. pl. Bi(bi^2)-va^{2}l(wa^{3}l)'vi^2(wi^2)-a^3. 1. See BIVALVA (of which word this is a more correct form). 2. Of Hoffmann, an order of cryptogams, including the genera *Ophioglossum, Osmunda,* and *Lycopodium.* [B, 170.]

BIVALVIS (Lat.), adj. Bi(bi^2)-va^{2}l(wa^{3}l)'vi^{2}s(wi^{2}s). See BIVALVE and BIVALVED.

BIVALVULAR, adj. Bi-va^{2}l'vu^2-la^{3}r. From *bis,* twice, and *valvula,* a little valve. Fr., *bivalvulaire.* See BIVALVE.

BIVALVULATE, adj. Bi-va^{2}l'vu^{2}l-at. Lat., *bivalvulatus.* Fr., *bivalvulé.* Dehiscing by two valvules (said of anthers). [B, 1.]

BIVALVUS (Lat.), adj. Bi(bi^2)-va^{2}l(wa^{3}l)'vu^{3}s(wu^{4}s). See BIVALVE.

BIVANADATE, n. Bi-va^{2}n'a^{2}d-at. An acid vanadate; *i. e.,* one that contains twice as much of the vanadic-acid constituent as an ordinary, or neutral, vanadate. [B, 38.]

BIVARICOSUS (Lat.), adj. Bi(bi^2)-va^{2}r(wa^{3}r)-i^{2}k-os'u^{3}s(u^{4}s). From *bis,* doubly, and *varix* (*q. v.*). Fr., *bivariqueux.* Having two varix-like processes. [L, 180.]

BIVEINEUX (Fr.), adj. Be-ve^{2}n-u^5. 1. See BIVENATE. 2. Following the course of the radicles of both the portal and the hepatic veins (said of cirrhosis).

BIVENTER (Lat.), adj. Bi(bi^2)-ve^{2}nt(we^{2}nt)'u^{5}r(e^{2}r). From *bis,* twice, and *venter,* a belly. Fr., *biventre.* Ger., *zweibäuchig.* Double-bellied; as a n., a digastric muscle.—**B. cervicis.** Fr., *biventre du cou.* Ger., *B. des Nackes.* A name sometimes applied to the inner portion of the complexus muscle, which is generally more or less separate from the rest of the muscle, and has its continuity interrupted by a tendinous intersection. [A, 5; L, 172.]—**B. mandibulæ, B. maxillæ, B. maxillæ inferioris, Deprimens maxillæ b.** The digastric muscle of the lower jaw. [A, 246, 313; L, 84.] See DIGASTRICUS.

BIVENTRAL, adj. Bi-ve^{2}nt'ra^{2}l. See DIGASTRIC.

BIVENTRALIS [E. Coues] (Lat.), n. m. Bi(bi^2)-ve^{2}nt(we^{2}nt)-ra(ra^3)'li^{2}s. See BIVENTER *cervicis.*

BIVERRUCOSUS (Lat.), adj. Bi(bi^2)-ve^{2}r(we^{2}r)-ru^2(ru)-kos'-u^{3}s(u^{4}s). From *bis,* doubly, and *verrucosus,* warty. Fr., *biverruqueux.* Having two small wart-like elevations. [L, 41.]

BIVINIEÆ (Lat.), n. f. pl. Bi(bi^2)-vi^{2}n(wi^{2}n)-i(i^2)'e^2-e(a^3-e^2). Of Tulasne, a division of the *Homalineæ,* comprising genera in which the ovary is almost free. [B, 170.]

BIVITTATE, adj. Bi-vi^{2}t'tat. From *bis,* twice, and *vitta,* a fillet. Fr., *bivitté.* Having two longitudinal bands. [L, 41.]

BIVIUM (Lat.), n. n. Bi^2'vi^2(wi^2)-u^{3}m(u^{4}m). From *bis,* doubly, and *via,* a path. The two posterior ambulacra of the *Echinidea.* [L, 66.]

BIVOLTINE, adj. Bi-vo^{3}lt'i^{2}n. From Lat., *bis,* twice, and It., *volta,* a turn. Fr., *bivoltin.* Laying eggs or bringing forth young twice a year. [A, 385.]

BIXA (Lat.), n. f. Bi^{2}x'a^3. Ger., *Orleanbaum.* A Linnæan genus of bixineous plants. [B, 42.]—**B. acuminata** [Bojer]. A variety of *B. orellana.* [B.]—**B. orellana** [Linnæus]. Fr., *rocou, rocouyer.* Ger., *ächter Orleanbaum, Rukubaum.* The arnotto-tree; a small tree growing in South America, Mexico, the West Indies, the East Indies, Ceylon, and Senegal. The fruit is a cordate (sometimes lanceolate) capsule dehiscing by two valves and containing from eight to ten obovoid seeds surrounded by three envelopes, the outermost of which is pulpy and contains the yellow coloring matter, annotto (*q. v.*), which is employed as a dye. This pulp is both astringent and purgative, and has been used as a remedy for dysentery and renal disease and as an antidote to the mandioc poison. The seeds are held to have astringent, cordial, and antipyretic properties. [B, 121, 172; Clos, "Ann. des sci. nat.," iv, 8, p. 209 (B).]—**B. platycarpa** [Ruíz and Pavón]. Syn.: *B. urucurana.* A species found in Peru and New Granada, distinguished by its more or less reniform or globose fruit; said to have the same properties as *B. orellana.* [B, 180; Clos, *l. c.* (B).]—**B. purpurea.** A variety of *B. orellana* with rose-colored flowers. [Clos, *l. c.* (B).]—**B. urucurana** [Hoffmannsegg]. See *B. platycarpa.*

BIXACEÆ [Lindley] (Lat.), n. f. pl. Bi^{2}x-a(a^3)'se^2(ke^2)-e(a^3-e^2). Fr., *bixacées.* See BIXINEÆ.

BIXADS, n. pl. Bi^{2}x'a^{2}dz. See BIXINEÆ.

BIXÆ [Clos] (Lat.), n. f. pl. Bi^{2}x'e(a^3-e^2). See BIXEÆ (1st def.).

BIXAL, adj. Bi^{2}x'a^{2}l. Lat., *bixalis.* Of or pertaining to the genus *Bixa* or the *Bixales.* [B.]—**B. alliance.** See BIXALES.

BIXALES (Lat.), n. f. pl. Bi^{2}x-a(a^3)'lez(las). Of Lindley, an alliance of the *Parietales,* comprising the single order *Bixineæ.* [B, 170.]

BIXEÆ (Lat.), n. f. pl. Bi^{2}x'e^2-e(a^3-e^2). 1. Of Sprengel, a division of samydeous (bixaceous) plants, comprising *Bixa* and *Prockia;* by other authors extended to include a number of genera and divided into various sections. 2. Of Bentham and Hooker, a tribe of the *Bixineæ,* including *Bixa, Cochlospermum,* and another genus, in which the flowers are hermaphrodite, rarely polygamous, the petals are broad, contorted, and devoid of scales, the anthers are linear, oblong, biporose or shortly bivalved at the apex, and the fruit is a capsule of valvular dehiscence with a membranaceous endocarp. 3. Of Baillon, a series of the *Bixineæ,* including *Bixa* and *Oncoba.* [B, 42, 121, 170.]

BIXEIN, n. Bi^{2}x'e-i^{2}n. Lat., *bixeinum.* Fr., *bixéine.* Ger., *Bixein.* A dark reddish-brown substance produced by the action of the air on bixin, constituting the red coloring matter of annotto. [B, 2.]

BIXIC ACID, n. Bi^{2}x'i^{2}k. Fr., *acide bixique.* Ger., *Bixinsäure.* A resinous acid said to be obtained from *Bixa orellana.* [B.]

BIXIN, n. Bi^{2}x'i^{2}n. Fr., *bixine.* Ger., *Bixin.* An orange-colored or red crystalline coloring matter, $C_{16}H_{20}O_2$ [Kerndt], $C_{15}H_{18}O_4$ [Stein], or $C_{28}H_{34}O_5$ [Etti], obtained from annotto; soluble with difficulty in water, but, according to Chevreuil, readily soluble in alcohol and in ether. The term is applied also to a superior variety of annotto. [B, 2, 81.]—**B'säure** (Ger.). See BIXIC ACID.

BIXINÆ (Lat.), n. f. pl. Bi^{2}x-i(e)'ne(na^3-e^2). Of Kunth, Lindley, and others, an order of cotyledonous plants, corresponding in part to the *Bixineæ.* [B, 170.]

BIXINEÆ (Lat.), n. f. pl. Bi^{2}x-i^{2}n'e^2-e(a^3-e^2). Fr., *bixinées.* Syn.: *Bixaceæ.* An order of dicotyledonous trees or shrubs estab-

lished by Kunth. By Bentham and Hooker it is referred to the cohort *Parietales*, and made to comprise trees or shrubs with alternate simple leaves, exstipulate or having minute caducous stipules, and with regular hermaphrodite or unisexual flowers having from two to six sepals, usually imbricate, which finally become reflexed or deciduous, a corolla (sometimes absent) consisting of petals equaling or exceeding the sepals in number and also deciduous, numerous hypogynous stamens with bilocular anthers, a receptacle often glandulose and sometimes expanded into a disc, and an ovary, usually unilocular, bearing two or more parietal placentæ, each of which contains two or more amphitropal or anatropal ovules, and having as many styles as placentæ, either united into one or more or less separate. The fruit is fleshy or dry, and few-seeded; the albumen is fleshy and incloses an axile embryo. The *B.* are divided into the *Bixeæ*, *Oncobeæ*, *Flacourtieæ*, and *Pangieæ*. By Baillon the order has been extended to comprise genera ranked by Bentham and Hooker under different orders, and is divided into the *Bixeæ* (including *Bixa* and *Oncoba*), *Flacourtieæ*, *Samydeæ*, *Lacistemeæ*, *Calanticeæ*, *Homalieæ*, *Pangieæ*, *Papayeæ*, *Turnereæ*, and *Cochlospermeæ*. [B, 42, 121.]

BIXINUM (Lat.), n. n. Bi^{2}x-i(e)′nu^{3}m(nu^{4}m). See Bixin.

BIZINCIC, adj. Bi-zi^{2}n′si^{2}k. Fr., *bizincique*. Containing two atoms of zinc (said of that one of a series of compounds which contains twice as much zinc in the molecule as the first member of the series). [B, 38.]

BIZIRCONIC, adj. Bi-zu^{5}r-ko^{2}n′i^{2}k. Fr., *bizirconique*. Containing two atoms of zirconium (said of that one of a series of compounds that contains twice as much zirconium in the molecule as the first member of the series). [B.]

BIZONATUS (Lat.), adj. Bi(bi^2)-zon-at(a^{3}t)′u^{3}s(u^{4}s). From *bis*, doubly, and *zona*, a girdle. Fr., *bizoné*. Marked with two circular bands or zones. [L, 41.]

BLABE (Lat.), n. f. Bla(bla^3)′be(ba). Gr., *βλάβη* (from *βλάπτειν*, to injure). A blow, a wound, an injury. [A, 322, 325.]

BLABERIDÆ (Lat.), n. f. pl. Bla^{2}b-(bla^{3}b)-e^{2}r′i^{2}d-e(a^3-e^2). A family of the *Nuditarsi*. [L, 266.]

BLABEROPUS (Lat.), n. m. Bla^{2}b-(bla^{3}b)-e^{2}r′o(o^2)-pu^{3}s(pu^{4}s). From *βλαβερός*, noxious, and *ὀπός*, juice. A genus of apocynaceous plants separated by A. De Candolle from *Alstonia*, to which it is restored by Bentham and Hooker. [B, 42, 46.]

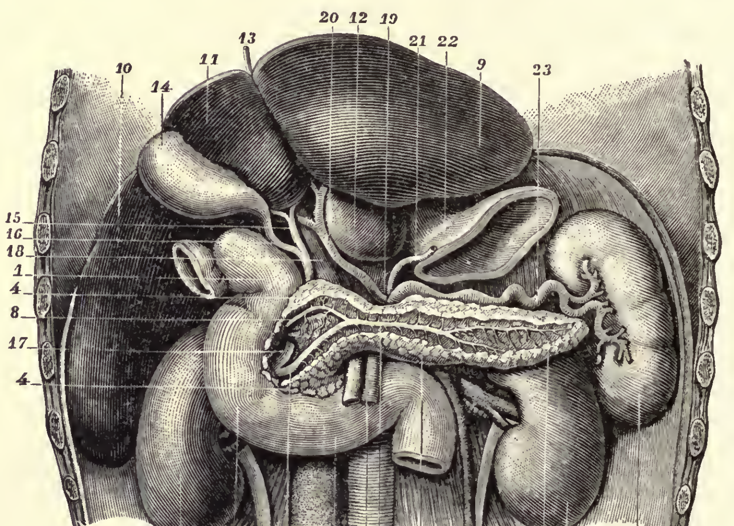
BLACCIÆ (Lat.), n. f. pl. Bla^{2}k(bla^{3}k)′-si^2(ki^2)-e(a^3-e^2). An old name for measles. [Rhazes (A, 325).]

BLACHMAL, n. An alchemical name for a product obtained by pouring a mixture of several melted metals over sulphur. [Johnson (A, 325).]

BLACIA (Lat.), n. f. Bla^{2}s(bla^{3}k)-i(e)′a^3. Gr., *βλακεία*. Exhaustion, debility, lassitude. [A, 322.]

BLACK, adj. Bla^{2}k. A.-S., *blæc*. Gr., *μέλας*. Lat., *ater*, *niger*. Fr., *noir*. Ger., *schwarz*. It., Sp., *negro*. More or less completely incapable of reflecting light; as a n., a substance so characterized, also an individual of the negro race. For many compound names beginning with *b.*, see under the other term of the compound.—**Animal b.** Fr., *noir animal*. Animal charcoal. [B.]—**B'berry.** See the major list.—**B.-cap.** The *Typha latifolia*. [B, 275.]—**B'fisch** (Ger.). The cuttle fish (*Sepia officinalis*). [B, 180.]—**B'fischbein** (Ger.). Cuttle-fish bone. [B, 180.]—**B.-heads.** The *Typha latifolia*. [B, 275.]—**B.-Jack.** 1. An American name for the *Quercus nigra*. [B, 19.] 2. Burnt sugar; used to color beverages and for the adulteration of coffee. [L, 120.]—**B.-knot.** The *Sphæria morbosa*. [B.]—**B.-nonesuch.** The *Medicago lupulina*. [B, 19.]—**B.-tang.** The *Fucus vesiculosus*. [L, 65.]—**B'thorn.** The *Prunus spinosa*. [B, 19.]—**B.-top.** The *Centaurea scabiosa*. [B, 275.]—**B.-wash.** See *Lotio* hydrargyri *nigra*.—**B.-wort.** The *Symphytum officinale*. [B, 275.]—**Bone b., Ivory b.** Fr., *noir d'os* (ou *d'ivoire*). Ger., *Beinschwarz*, *Elfenbeinschwarz*. Animal charcoal made by incinerating bones or ivory apart from the air. [B.]—**Lamp-b.** See the major list.

BLACKBERRY, n. Bla^{2}k′be^{2}r-ri^2. Lat., *rubus*. A name applied to those species of *Rubus* in which the fruit is inseparably affixed to the receptacle, which is juicy and deciduous; including the species *fruticosus*, *villosus*, *canadensis*, and *trivialis*; also the fruit itself. [B, 3, 5, 34.]—**American b.** The *Rubus villosus*. [B, 81.]—**B. root-bark.** Lat., *rubus* [U. S. Ph.]. The root-bark of *Rubus villosus*, *Rubus canadensis*, and *Rubus trivialis*. [B, 95.]—**Bush-b.** The *Rubus trivialis*. [B, 81.]—**Creeping b.** The *Rubus canadensis*. [B, 5.]—**Fluid extract of b. bark.** See *Extractum* rubi *fluidum*.—**High b.** The *Rubus villosus*. [B, 34.]—**Low b.** The *Rubus canadensis*. [B, 5.]—**Syrup of b. bark, Syrup of b. root-bark.** See *Syrupus* rubi.

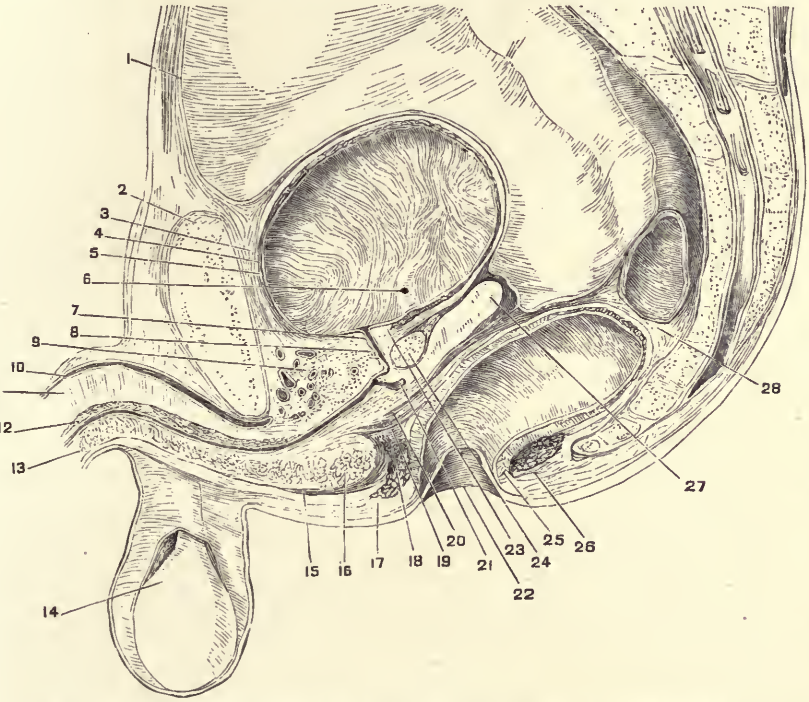


BLACKWELLIA (Lat.), n. f. Bla^{2}k-we^{2}l′li^2-a^3. A genus of homaliaceous trees and shrubs, named in honor of Elizabeth Blackwell. [B, 19.]

BLACTARA, n. An alchemical name for cerussa. [Ruland (A, 325).]

BLACTIÆ (Lat.), n. f. pl. Bla^{2}k(bla^{3}k)′ti^2-e(a^3-e^2). See Blacciæ.

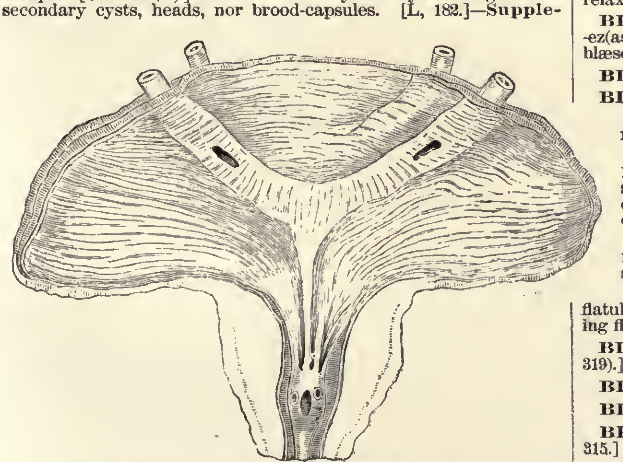
BLAD (Fr.), n. Bla^3. A popular name for rye in the south of France. [L, 41.]



BLADDER, n. Bla^{2}d′du^{5}r. A.-S., *blædre*. Gr., *κύστις*. Lat., *vesica*. Fr., *vessie*. Ger., *Blase*. It., *vescica*. Sp., *vejiga*. Any thin-walled sac capable of inflation or having the appearance of being inflated. Used alone, the word is usually understood to denote the hollow organ which serves as a reservoir for the urine.—**Air-b.** A b. containing air, found in most fishes. It usually communicates with some part of the intestinal tract, but in some fishes it is closed. When it is compressed by muscular action, the specific gravity of the fish is increased, and thus it is enabled to sink; when the pressure is relaxed, the specific gravity is lowered, and the fish rises. The organ is wanting in many fishes, and in the *Dipnoi* it assumes the function of respiration. [A, 304; L, 207.]—**Bilobed b., Bilocular b.** A sacculated b. consisting of two chambers. [L.]—**B.-campion, B. catch-fly.** The *Silene inflata*. [L, 73.]—**B.-dock.** Ger., *Blasenampfer*. The *Rumex vesicarius*. [L, 46.]—**B.-fern.** The genus *Cystopteris*. [B, 34.]—**B. fucus.** See Fucus *vesiculosus*.—**B.-fumitory.** Ger., *Blasenerdrauch*. The *Fumaria vesicaria*. [L, 46.]—**B.-gastrula.** See Perigastrula.—**B.-germ.** See Blastula.—**B. green.** See under Green.—**B.-kelp.** Ger., *Blasentang*. See Fucus *vesiculosus*.—**B.-nut.** The genus *Staphylea*. [B, 34.]—**B.-pod.** The genus *Vesicaria*. [B, 34.]—**B.-seed.** The genus *Physospermum*. [B, 19.]—**B.-senna.** The genus *Colutea*. [B, 34.]—**B.-snout.** Ger., *Bläschenkraut*. The *Utricularia vulgaris*. [L, 73.]—**B.-tree.** See *B.-nut*.—**B.-worm.** Ger., *Blasenwurm*. A term applied to the *Cestoda* in their embryonic state, from their cyst-like appearance. [L, 182.] See Cysticercus, Echinococcus, and Cœnurus.—**B.-wort.** The genus *Utricularia*. [B, 34.]—**B.-wrack.** See Fucus *vesiculosus*.—**Brain-b.** See *Cerebral* vesicle.—**Caudal b.** The vesicular portion of a *Cysticercus*. [L, 182, 201.]—**Cloacal b.** See *Anal* sac.—**Columnar b., Columniform b.** Fr., *vessie à colonnes*. A condition of the urinary b. in which hypertrophied muscular fasciculi give rise to projections into its interior in the form of cords and ridges. [E, 18.]—**Contractile b.** In the *Rotifera*, a small sac situated close to the cloaca, forming a part of a water-vascular system. Two respiratory tubes arise from it, and it undergoes rhythmical contraction and dilatation. [L, 147.]—**Daughter-b's.** Ger., *Tochterblasen*. Secondary hydatids; cysts arising from the outer or inner surface of the mother-b. and giving origin in their interior to heads, brood-capsules, or granddaughter-b's. [L, 182.]—**Encysted b.** A urinary b. with diverticula or with cysts communicating with it. [A. Clark, "N. Y. Jour. of Med," 1857, p. 86 (L).]—**Eye-b.** See *Optic* vesicle.—**Fasciculated b.** See *Columnar b.*—**Gall-b.** Gr., *κύστις χοληδόχη*. Lat., *cystis* (seu *vesica*) *fellea*, *cholecystis*, *felliculus*, *vesicula* (seu *folliculus*) *fellis*. Fr., *vésicule biliaire* (ou *du fiel*), *vessie du fiel*, *cholécyste*. Ger., *Gallenblase*. An egg-shaped or pear-shaped sac, about four inches long in the human subject, situated in a fossa on the lower surface of the liver, to which it is attached; serving as a receptacle for the bile, to which it adds a mucous secretion of its own, and which it discharges into the ductus choledochus communis. [A, 440; C.]—**Granddaughter-b's.** Hydatid cysts springing from daughter-b's (*q. v.*). [L, 182.]—**Irritable b.** A term applied to an unnaturally frequent desire to urinate, dependent on some affection of the urinary b. or of some part in its immediate vicinity, and not on the action of a diuretic or on diabetes, hysteria, or the like. [A, 439.]—**Mother-b.** Ger., *Mutterblase*. A hydatid cyst from the inner or outer surface of which spring secondary cysts. [L, 182.]—**Multilocular b.** A sacculated b. consisting of many

THE GALL-BLADDER AND ADJACENT STRUCTURES. (FROM FLINT, AFTER SAPPEY.)

1, 2, 3, duodenum; 4, 4, 5, 6, 7, 7, 8, pancreas and pancreatic ducts; 9, 10, 11, 12, 13, liver; 14, gall-bladder; 15, hepatic duct; 16, cystic duct; 17, common duct; 18, portal vein; 19, branch from the cœliac axis; 20, hepatic artery; 21, coronary artery of the stomach; 22, cardiac portion of the stomach; 23, splenic artery; 24, spleen; 25, left kidney; 26, right kidney; 27, superior mesenteric artery and vein; 28, inferior vena cava.



compartments. [L.]—**Sacculated b.** A condition of the urinary b. in which, in consequence of over-distension, its mucous coat is forced outward in one or more places between the fibres of the muscular coat, so as to form pouches more or less distinct from

THE URINARY BLADDER AS SEEN IN A MEDIAN SECTION. HALF SIZE. (AFTER HENLE.)

1, the peritonæum; 2, the symphysis pubis; 3, 4, the outer and inner muscular layers of the bladder; 5, its mucous lining thrown into folds; 6, the mouth of the right ureter; 7, the urethra; 8, the internal sphincter of the bladder; 9, the external (voluntary) sphincter; 10, the vena dorsalis penis; 11, the septum of the corpora cavernosa; 12, 13, the corpus spongiosum; 14, the testicle; 15, the bulbo-cavernosus muscle; 16, the bulb of the urethra; 17, the sphincter ani; 18, a layer of muscular fibres on the inferior aponeurosis of the deep transversus perinæi; 19, the deep transversus perinæi muscle; 20, a slip from the layer of longitudinal fibres of the rectum; 21, the prostatic sinus; 22, the anus; 23, the internal sphincter of the bladder; 24, the prostate; 25, the internal sphincter ani; 26, the external sphincter ani; 27, the seminal vesicle; 28, the rectum.

the general cavity of the organ, in which urine may be retained and become decomposed and in which calculi may be imprisoned. [E.]—**Stammering b.** Sir J. Paget's term for a condition of painful and spasmodic urination, with incomplete emptying of the b., attributed to a lack of concord between the muscles that must contract to expel the urine and those that must relax to allow of its escape. [Coulson (L).]—**Sterile b.** A hydatid cyst having neither secondary cysts, heads, nor brood-capsules. [L, 182.]—**Supple-**

THE FLOOR OF THE BLADDER. (AFTER HENLE.)

mentary b. A diverticulum from the urinary b. caused by sacculation. [A. V. Best, "Lancet," 1871, i, p. 593 (L).]—**Swim-b., Swimming-b.** Lat., *vesica natatoria.* Fr., *vessie natatoire.* Ger., *Schwimmblase.* See *Air-b.*—**Urinary b.** Gr., *κύστις.* Lat., *vesica urinaria.* Fr., *vessie urinaire.* Ger., *Harnblase.* It., *vescica orinaria.* Sp., *vejiga de la orina.* A hollow organ serving as a receptacle for the urine; situated in the pelvis, between the pubic bones in front and the rectum (or, in women, the uterus) behind. During fœtal and infantile life it is situated mainly above the pubes. It is a flattened, more or less horizontal body when empty, but, when distended, it becomes an oval bag and rises so as to occupy more or less of the hypogastrium. It is attached below, but free to expand above. It is essentially a muscular organ, lined with mucous membrane and covered, except in its lower portion, with a loosely attached peritoneal coat. Into its lower and posterior portion the ureters empty, and from its neck (see NECK *of the bladder*) the urethra arises. When not over-distended, it holds about a pint—somewhat more in women than in men. [A, 262, 439, 440.]

BLADDERED, BLADDERY, adj's. Bla^{2}d'du^{6}rd, -du^{6}r-i^{2}. 1. Inflated like a bladder. 2. Furnished with bladders. [B, 19; L, 56, 73.]

BLADE, n. Blad. A.-S., *blæd.* 1. The cutting part of a knife or other like instrument, as opposed to the shank or handle. 2. Of an obstetrical forceps, one of the two articulating parts, as opposed to the other (Lat., *brachium*; Fr., *branche;* Ger., *Arm, Blatt*); also the part that is applied to the fœtus, as opposed to the shank or handle (Fr., *cuiller*). 3. In botany, the flat, expanded portion (lamina) of a leaf, as distinguished from the petiole. [B.]—**B.-bone, Shoulder-b.** See SCAPULA.

BLADON SPRINGS, n. Bladn. A place in Choctaw County, Alabama, in a pine-forest region, where there are four springs (the "Vichy Spring," the "Branch Spring," the "Old Spring," and the "Sulphur Spring") containing alkaline carbonates, iron, and a considerable amount of carbon dioxide. The water of the "Sulphur Spring" contains also hydrogen sulphide. [A, 363.]

BLÆSITAS (Lat.), n. f. Ble^{2}s'-(bla^{3}'e^{2}s)-i^{2}t-a^{2}s(a^{3}s). Gen., *blœsitat'is.* For deriv., see BLÆSUS. Fr., *blésité.* Ger., *Lispeln, Wispeln, Zischeln.* That defect of speech in which a soft sound is substituted for a hard one, like *z* for *s*, *d* for *t*, etc. [A, 322, 385.]

BLÆSOPODES, BLÆSOPUS (Lat.), adj's. Ble^{2}s(bla^{3}-e^{2}s)-o^{2}p'o^{2}d-ez(as), ble^{2}s'(bla^{3}'e^{2}s)-o^{2}p-u^{3}s(us). Gen., *blœsop'odis.* Gr., *βλαισόποδης, βλαισόπους* (from *βλαισός*, twisted, crooked, and *πούς*, the foot). Affected with talipes varus. [A, 322.]

BLÆSOSIS (Lat.), n. f. Ble^{2}s(bla^{3}-e^{2}s)-o'si^{2}s. Gen., *blœso'seos* (*-sis*). Gr., *βλαίσωσις.* 1. Crookedness of a part from paralysis or relaxation. 2. Blæsitas (*q. v.*). [A, 322.]

BLÆSOTA, BLÆSOTES (Lat.), n's f. Ble^{2}s'(bla^{3}'e^{2}s)-o^{2}t-a^{3}, -ez(as). Gr., *βλαισότης.* Crookedness of the legs or feet, especially blæsosis, also blæsitas (*q. v.*). [A, 311, 322.]

BLÆSSA (Lat.), n. n. pl. Ble^{2}s'(bla^{3}'e^{2}s)-sa^{3}. See under BLÆSUS.

BLÆSSUS (Lat.), adj. Ble^{2}s'(bla^{3}'e^{2}s)-su^{3}s(su^{4}s). See BLÆSUS.

BLÆSTRISMUS (Lat.), n. m. Ble^{2}s(bla^{3}-e^{2}s)-tri^{2}z(tri^{2}s)'-mu^{3}s-(mu^{4}s). See BLESTRISMUS.

BLÆSUS (Lat.), adj. Ble'(bla^{3}'e^{2})-su^{3}s(su^{4}s). Gr., *βλαισός.* 1. Affected with blæsitas or with blæsosis; as a n., a person so affected. 2. As a n., in the n. pl., *blœsa* (Gr., *τὰ βλαισά*), distorted joints, also the hollows of the hind-legs of bees, for carrying pollen. [Aristotle (A, 311); A, 322, 325.]

BLAFARD (Fr.), adj. Bla^{3}-fa^{3}r. Pale, wan, pallid; as a n., an albino, also one who has lost the natural color of the skin. [A, 385; G.]

BLÄHEN (Ger.), v. tr. Bla'he^{2}n. To inflate, to cause flatulence; as a n., flatulence. [A, 315; L.]—**B'd.** Flatulent, causing flatulence. [A, 315.]

BLÄHHALS (Ger.), n. Bla'ha^{3}ls. Goître. [Hildebrand (A, 319).]

BLÄHKRAMPF (Ger.), n. Bla'kra^{3}mpf. Wind colic. [L, 30.]

BLÄHSUCHT (Ger.), n. Bla'zuch^{2}t. Flatulence. [L, 80.]

BLÄHSÜCHTIG (Ger.), adj. Bla'zu^{6}ch^{2}t-i^{2}g. Flatulent. [A, 315.]

BLÄHUNG (Ger.), n. Bla'hung. Flatus, flatulence. [A, 315.]—**B'skolik.** Wind colic. [L, 30.]—**B'smittel.** A carminative. [L, 46.]—**B'streibend, B'szertheilend.** Carminative. [B, 48; L, 43.]

BLAIN, n. Blan. A.-S., *blegen.* 1. A blister, a pustule, or any inflammatory swelling; also a scar or discoloration left by an injury. [E.] 2. In veterinary medicine, a swelling in the region of the glottis obstructing respiration (perhaps œdema of the glottis).

[White (A, 302).]—**Bitter-b.** A name given by the Dutch Creoles of Guiana to the *Vandellia diffusa.* [B, 19.]

BLAISEMENT (Fr.), n. Ble^{2}z-ma^{3}n^2. See BLÆSITAS.

BLAKEA (Lat.), n. f. Blak′e^2-a^3. A genus of melastomaceous plants. [B.]

BLAKEACEÆ (Lat.), n. f. pl. Blak-e^2-a(a^3)′se^2(ke^2)-e(a^3-e^2). Of Reichenbach, a section of the *Melastomeæ*, comprising *Blakea* and many other genera. [B, 170.]

BLAMMA (Lat.), n. n. Bla^{2}m(bla^{3}m)′ma^3. Gen., *blam′matos* (-*t s*). Gr., *βλάμμα* (=*βλάβη*). A blow, also an injury from a blow; a hurt. [A, 311, 322.]

BLANC (Fr.), adj. Bla^{3}n^2. White.—**B. d'albâtre.** Finely powdered plaster of Paris. [B, 132.]—**B. d'argent.** A commercial name for the finest variety of white lead. [B, 38.]—**B. d'eau.** The *Nymphœa alba.* [B, 19.]—**B. de baleine.** See the major list.—**B. de bismuth.** Bismuth subnitrate. [B, 38.]—**B. de Briançon.** Talc. [A, 385.]—**B. de céruse.** White lead. [B, 38.]—**B. de champignon.** 1. The mycelium of the *Agaricus.* [B.] 2. The peel of mushrooms. [A, 385.]—**B. de Clichy.** A variety of white lead prepared by a process first employed at Clichy. [B, 38.]—**B. de craie.** A rather hard and compact variety of *b. d'Espagne* (*q. v.*). [B, 38.]—**B. de fard.** Bismuth subnitrate, also bismuth oxychloride. [B, 81, 93.]—**B. de fer.** Tinned iron; sheet-tin.—**B. de Goslar.** Zinc sulphate. [L, 105.]—**B. de graines.** Wahlenberg's name for gluten. [A, 385.]—**B. de Hollande.** The *Populus alba.* [B.]—**B. de lait.** A popular name for various species of *Agaricus.* [B, 132.]—**B. de l'œil.** The white of the eye. [L, 109.]—**B. de mesue.** Diachylon plaster. [B, 132.]—**B. de Meudon.** Calcium carbonate. [B.]—**B. de neige.** Crude zinc oxide. [B, 270.]—**B. de Paris.** Paris white, calcium carbonate. [B.]—**B. de perle.** Bismuth subnitrate. [B, 93.]—**B. de plomb.** White lead. [B, 93.]—**B. d'Espagne.** A name given to the subnitrate and to the basic sulphate of bismuth, also to other white substances used as cosmetics. [B, 3, 49.]—**B. de Troyes.** See *B. de Meudon.*—**B. de zinc.** Zinc oxide. [L, 41.]—**B. d'ivoire.** The *Hygrophorus eburneus.* [B, 173.]—**B. d'œuf.** White of egg. [B, 38.]—**B. fixe.** Permanent white; finely ground barium sulphate mixed with white lead; used as a white paint. [B, 3, 5.]—**B.-Madame.** A variety of white grapes. [B, 38.]—**B.-raisin, B.-Rhazes, B.-Rhazis.** An ointment made of white wax and lead oxide, used for burns and certain skin diseases. [B, 38.]

BLANCA (Lat.), n. f. Bla^{2}n^2(bla^{3}n^2)′ka^3. An ancient lenitive compound of a white color, of which there were three varieties, the *magna*, *media*, and *minor.* [A, 325.]—**B. mulierum.** An alchemical name for white lead. [Ruland (A, 325).]

BLANC DE BALEINE (Fr.), n. Bla^{3}n^2 d' ba^{3}l-e^{2}n. Spermaceti. [A, 385.]—**Cérat de b. de b.** See *Ceratum* CETACEI.

BLANCHED, adj. Bla^{3}nchd. Made white. See *B.* ALMONDS.

BLANCHET (Fr.), n. Bla^{3}n^2-sha. 1. Aphthæ. [D.] 2. A piece of white woolen cloth for filtering syrups, etc. [A, 301, 385; L, 43.]

BLANCHETON (Fr.), n. Bla^{3}n^{2}sh-to^{2}n^2. A variety of grape. [B, 38.]

BLANCHIMONT (Fr.), n. Bla^{3}n^{2}sh-i^2-mo^{2}n^2. A place in Belgium, where there is a chalybeate spring. [A, 385; L, 49.]

BLANCHING, n. Bla^{3}nch′i^{2}ng. Lat., *albefactio, candidatio.* Fr., *blanchiment.* Ger., *Bleichen.* A making or becoming white.

BLANCHININE, n. Bla^{2}nk′i^{2}n-en. Lat., *blanchinina.* Fr., *blanchinine, blanquinine.* Ger., *Blanchinin.* See ARICINE.

BLANCHIR (Fr.), v. tr. Bla^{3}n^2-sher. To subdue the manifestations of a disease for the time being, without curing it. [A, 301.]

BLANCHISSANT (Fr.), adj. Bla^{3}n^2-shes-sa^{3}n^2. See ALBESCENT.

BLANC-MANGE, n. Bla^3-ma^{3}n^{2}zh′. Fr., *blanc-manger.* Sp., *blanco-manjar, manjar-blanco.* Lit., white food; a jelly usually prepared by simmering 1 oz. of isinglass, 2 or 3 oz. of sugar, and certain flavoring substances (grated bitter almonds, cinnamon, orange-peel, or lemon-peel) in about a pint of milk until the gelatin is dissolved, when the liquid is strained and allowed to gelatinize, after which the mass is melted again at a gentle heat and poured into molds to solidify. [A, 377, 385.]—**Rice b.-m.** A variety made with rice instead of isinglass. [A, 377.]—**Transparent b.-m.** Flavored jelly. [A, 377.]—**West Indian b.-m.** B.-m. made with arrow-root instead of isinglass. [A, 377.]

BLANCTA (Lat.), n. f. Bla^{2}n^{2}k(bla^{3}n^{2}k)′ta^3. See BLANCA *mulierum.*

BLAND, adj. Bla^{2}nd. Gr., *ἐΰς, ἠΰς, μειλίχιος.* Lat., *blandus.* Fr., *doux.* Ger., *mild.* Mild, unirritating, soothing, demulcent.

BLANDFORDIEÆ (Lat.), n. f. pl. Bla^{2}nd-ford-i(i^2)′e^2-e(a^3-e^2). From *Blandfordia.* the typical genus. Of Bernhardi, a tribe of liliaceous plants. [B, 170.]

BLANDOVIEÆ (Lat.), n. f. pl. Bla^{2}nd(bla^{3}nd)-o(o^2)-vi(wi^2)′e^2-e(a^3-e^2). Of Reichenbach, a division of podostemoneous plants. [B, 170.]

BLANKENBERGHE, n. A sea-bathing resort in Belgium, near Ostend. [L. Perl (A, 319).]

BLANKENBURG (Ger.), n. Bla^{3}n^{2}k′e^{2}n-burg. 1. A town in Germany, near Brunswick, in a mountainous region, where there are pine-needle baths; a resort for pulmonary invalids. 2. A village in Thuringia, where there are various bathing establishments; a summer resort for invalids. [A, 319.]

BLANKENHAIN (Ger.), n. Bla^{3}n^{2}k′e^{2}n-ha^3-i^{2}n. A summer resort in Thuringia, where there are pine-needle baths. [A, 319.]

BLANQUETTE (Fr.), n. Bla^{3}n^2-ke^{2}t. 1. Native sodium carbonate. 2. Brandy of the first distillation. 3. A kind of pear. [A, 385; B, 173; L, 120.]

BLANQUININE (Fr.), n. Bla^{3}n^2-ki^{2}n-en. See ARICINE.

BLANZÉ (Fr.), n. Bla^{3}n^2-za. A variety of the *Triticum vulgare.* [A, 385.]

BLAPIDÆ (Lat.), n. f. pl. Bla^{2}p(bla^{3}p)′i^{2}d-e(a^3-e^2). A family of the *Carabidæ.* [L, 267.]

BLAPS (Lat.), n. f. Bla^{2}ps(bla^{3}ps). A genus of coleopterous insects of the family *Blapsidæ.* [A, 321.]—**B. gigas.** A species found in southern Europe and northern Africa. [A, 321.]—**B. mortisaga.** Ger., *Trauerkäfer, Todtenkäfer.* A species the larvæ of which have been found in the intestinal contents, especially in children. [Cobbold, "Brit. Med. Jour.," Apr. 7, 1878 (A, 319).]—**B. polychresta** [Forskål]. A species found in Egypt, where, according to Forskål, it is eaten cooked with butter, and highly esteemed as a remedy for scorpion bites and for earache. [L, 49.]

BLAPSIDÆ (Lat.), n. f. pl. Bla^{2}ps(bla^{3}ps)′i^{2}d-e(a^3-e^2). Fr., *blapsides.* A family of the *Pseudotremera.* [L, 262.]

BLAPSIDARIÆ (Lat.), n. f. pl. Bla^{2}ps(bla^{3}ps)-i^{2}d-a(a^3)′ri^2-e(a^3-e^2). Fr., *blapsidaires.* Of Latreille, the *Blapsidæ* (*q. v.*). [L, 203.]

BLAPSIDES, BLAPSITES, n's pl. Bla^{2}ps′i^{2}dz, -itz. See BLAPSIDÆ.

BLAPSIGONIA (Lat.), n. f. Bla^{2}ps(bla^{3}ps)-i^2-gon(go^{2}n)′i^2-a^3. Gr., *βλαψιγονία* (from *βλάψις*, damage, and *γονεία.* generation). An ancient name for a disease of bees that prevented their breeding. [Pliny (A, 312).]

BLAS (Lat.), n. n. Bla^{2}s(bla^{3}s). Van Helmont's term for a subtle force which. he imagined, was, in its various sorts, the cause of sidereal and other movements, plasticity, sensibility, etc. [A, 325; L, 49.]

BLASAMUM, BLASAMUS (Lat.), n's n. and m. Bla^{2}s(bla^{3}s)′-a^{2}m(a^{3}m)-u^{3}m(u^{4}m), -u^{3}s(u^{4}s). Gr., *βλάσαμον.* See BALSAMUM.

BLÄSCHEN (Ger.), n. Blas′ch^{2}e^{2}n. A bubble, pimple, vesicle, pustule; in botany, a utricle. [A, 315.]—**B'ähnlich, B'artig.** Vesicular.—**B'ausschlag.** Herpes. [L, 30.]—**B'catarrh.** Catarrhal inflammation attended with the formation of vesicles. [Reuss (A, 319).]—**B'flechte.** Herpes. [L.]—**B'förmig.** Vesicular or bag-like. [L, 44.]—**B'kraut.** The bladder-wort (the genus *Utricularia*). [A. 315.]—**B'natur.** A vesicular character (said in describing corpuscular elements). [K, 13.]—**B'rothlauf.** See ERYSIPELAS *bullosum.*—**Dotterb'.** See *Vitelline* SAC.—**Graafisches B.** See *Graafian* FOLLICLE.—**Nabot'sches B.** See *Nabothian* FOLLICLE.—**Purkinje'sches B.** See *Germinal* VESICLE.

BLÄSE (Ger.), n. Bla^{3}z′e^2. 1. A bladder. 2. A bleb. [G.] 3. An alembic. [L.]—**B'balggeräusch.** A bellows-murmur. [L, 46.]—**B'loch.** The blow-hole of a cetacean. [A, 315.]—**B'nähnlich.** Vesicular. [L, 46.]—**B'nampfer.** The bladder-dock (*Rumex vesicarius*). [L, 46.]—**B'nartig.** Vesicular; in botany, folliculous. [L, 46.]—**B'aufschneider.** A cystotome. [L, 80.]—**B'nausschlag.** Pemphigus. [A, 355.]—**B'nausspülung.** The procedure of washing out the bladder. [Ultzmann (A, 319).]—**B'nband.** The urachus. [L, 80.]—**B'nbänder.** The vesical ligaments. [L, 80.]—**B'nbandwurm.** The *Cysticercus cellulosæ.* [L.]—**B'nbaum.** The *Colutea arborescens.* [B.]—**B'nblennorrhöe.** Gonorrhœal cystitis.—**B'nbrandbeule.** See ANTHRAX *carbunculus terminthus.*—**B'nbruch.** 1. Rupture of the bladder. [A, 315.] 2. Cystocele. [A, 355.]—**B'ncroup.** Membranous cystitis.—**B'ndarmbruch.** See CYSTO-ENTEROCELE.—**B'ndreieck.** The trigone of the bladder. [L, 115.]—**B'nepithel.** The epithelium forming the walls of the closed acini, or vesiculæ, of the thyreoid gland. [J, 35.]—**B'nerbse.** The genus *Cardiospermum.* [L, 46.]—**B'nerdrauch.** The *Fumaria vesicaria.* [L, 46.]—**B'nerweiterung.** Dilatation of the bladder. [L, 50.]—**B'nfieber.** Acute pemphigus. [G.]—**B'nfistel.** A fistula opening into the bladder.—**B'nflechte.** Herpes. [L, 80.]—**B'nfliegen.** The *Inflata* of Latreille. [L, 30.]—**B'flitte.** The *Hibiscus trionum.* [L, 46.]—**B'nförmig.** Vesicular, ampullate. [J; L, 46.]—**B'nfüsser.** The *Physopoda.* [L, 228.]—**B'ngalle.** Cystic bile. [L, 46.]—**B'ngallengang, B'ngang.** The cystic duct. [L. 80.]—**B'n-Gastrula.** See PERIGASTRULA.—**B'ngebärmutterfistel.** A vesicouterine fistula.—**B'ngeflecht.** A vesical plexus. [L, 115.]—**B'ngehirn.** See CYSTENCEPHALIA.—**B'ngeissler.** See CYSTOFLAGELLATA.—**B'n-Genitalspalte.** See FISSURA *vesico-genitalis.*—**B'ngeräusch.** A vesicular murmur. [A, 315.]—**B'ngeschwulst.** A hydatid tumor. [L, 46.]—**B'ngewebe.** A tissue composed mostly of hyaline cells, found in many invertebrates. [J.]—**B'ngries.** The urinary deposit known as gravel. [L, 80.]—**B'grün.** See *Bladder* GREEN.—**B'ngrünbeere.** The *Rhamnus catharticus.* [L, 46.]—**B'ngrund.** The fundus of the urinary bladder. [L, 43.]—**B'nhals.** 1. The neck of the urinary bladder. 2. A hernial tumor of the neck. [L, 80.]—**B'nhalsschnitt.** An incision into the neck of the bladder. [L, 80.]—**B'nhämorrhoide.** See *Vesical* HÆMORRHOIDS.—**B'nharnleiterscheidenfistel.** A uretero-vesico-vaginal fistula. [L. Bandl (A, 319).]—**B'nharnröhrenscheidenfistel.** A urethro-vesico-vaginal fistula. [L. Bandl (A, 319).]—**B'nhäute.** The tunics of the urinary bladder. [L, 80.]—**B'nhelm.** See *B'nhut.*—**B'nhöhle.** The cavity of the bladder. [A, 315.]—**B'nhut.** The lid of an alembic. [A, 315.]—**B'nkäfer.** The *Cantharis vesicatoria.* [Vogl (A. 319).]—**B'nkatarrh.** Catarrh of the bladder. [A, 355.]—**B'nkeim.** See BLASTULA.—**B'nkiemen.** See CYSTIBRANCHIA.—**B'nkirsche.** See the major list.—**B'nklee.** The *Trifolium fragiferum.* [L, 46.]—**B'nklingen.** See *B'ngeräusch.*—**B'nkopf.** 1. See CYSTENCEPHALUS. 2. See *B'nhut.*—**B'nkörper.** The body of the bladder. [L, 80.]—**B'nkrampf.** Spasm of the bladder. [E.]—**B'nkrankheit.** See B'NAUSSCHLAG.—**B'nkraut.** The genus *Utricularia.* [A, 315.]—**B'nkropf.** Cystic goître. [M, 56.]—**B'nlähmung.** Paralysis of the bladder. [L.]—**B'nlebergang.** The cystic duct. [A, 315.]—

B'nlöffel. A vesical curette. [E.]—**B'nmarkschwamm.** Medullary fungus of the bladder. [L, 50.]—**B'nmastdarmfistel.** A vesico-rectal fistula.—**B'nmole.** See *Vesicular* MOLE.—**B'nmoos.** The genus *Splachnum.* [A, 315.]—**B'nmund.** The urethral orifice of the bladder. [A, 355.]—**B'nmuskelhaut.** The muscular coat of the bladder. [L, 59.]—**B'nmutterscheidenfistel.** A vesico-vaginal fistula.—**B'nniere.** Cystic enlargement of the kidney. [L, 30.]—**B'nnussbaum.** The *Staphylea pinnata.* [A, 315.]—**B'nöffnung.** 1. See *B'nmund.* 2. Cystotomy. [E.]—**B'noxyd.** See *Cystic* OXIDE.—**B'npflaster.** A blistering plaster. [A, 315.]—**B'npocken.** Varicella. [A, 355.]—**B'npunktion.** Puncture of the bladder. [L.]—**B'nquallen.** See PHYSOPHORIDÆ.—**B'nrasselgeräusch.** A subcrepitant râle. [L, 50.]—**B'nraum.** See *B'nhöhle.*—**B'nräumer.** A lithotomy scoop. [E.]—**B'nreinigung.** Cleansing of the bladder by irrigation.—**B'nrose.** See ERYSIPELAS *bullosum.*—**B'nrost.** The *Peridernium pini.* [B.]—**B'nrothlauf.** See ERYSIPELAS *bullosum.*—**B'nsalbe.** A blistering ointment. [L, 46.]—**B'nsand.** See *B'ngries.*—**B'nscharlach.** Vesicular scarlet fever. [A, 355.]—**B'nscheidenbruch.** Vaginal cystocele. [L, 80.]—**B'nscheidenfistel.** A vesico-vaginal fistula.—**B'nscheidenwand.** The vesico-vaginal septum.—**B'nscheitel.** The fundus of the bladder. [L, 43.]—**B'nschenkelbruch.** Femoral cystocele. [L, 43.]—**B'nschlagader.** See *Cystic* ARTERY.—**B'nschlauch.** The urachus. [L, 80.]—**B'nschleimfluss.** A mucous discharge from the bladder. [A, 355.]—**B'nschleimhaut.** The mucous membrane of the bladder. [L.]—**B'nschleimsack.** A bursa mucosa. [L, 80.]—**B'nschliessmuskel.** The sphincter vesicæ muscle. [L, 80.]—**B'nschmerz.** See CYSTALGIA.—**B'nschnitt.** See CYSTOTOMY.—**B'nschnitt mit der grossen Geräthschaft.** See *Median* CYSTOTOMY.—**B'nschnitt mit der hohen Geräthschaft.** See *Suprapubic* CYSTOTOMY.—**B'nschnitt mit der kleinen Geräthschaft.** See APPARATUS *minor.*—**B'nschnitt von unten.** See *Perineal* CYSTOTOMY.—**B'nschnur.** The urachus. [A, 355.]—**B'nschnurtang.** The genus *Cystoseira.* [B, 180.]—**B'nschötchen.** The *Vesicaria utriculata.* [B.]—**B'nschwanz.** See the major list.—**B'nschwindel.** The disease of horses known as staggers. [L, 46.]—**B'nsenna.** Bladder-senna; the genus *Colutea*, especially the *Colutea arborescens.* [B.]—**B'nsennesblätter.** The leaves of *Colutea arborescens.* [B, 180.]—**B'nsonde.** A urethral catheter or sound. [E.]—**B'nspalte, B'nspaltung.** See CYSTOCHISIS.—**B'nsphincter.** The sphincter vesicæ muscle. [L.]—**B'nspiegel.** A speculum or endoscope for exploring the interior of the bladder. [Grünfeld (A, 319).]—**B'nsprenger.** An instrument for rupturing or piercing the membranes in obstetrical practice.—**B'nspritze.** An apparatus for injecting the bladder. [Bernatzik (A, 319).]—**B'nsprung.** Rupture of the bladder or of the fœtal membranes.—**B'nstein.** See the major list.—**B'nstich.** Puncture of the bladder or of the fœtal membranes.—**B'nstrauch.** See the major list.—**B'ntampon.** A vaginal or other tampon consisting of an animal's bladder or a rubber bag with a tube attached, to be inserted empty and distended by forcing water into it. [A, 117.] Cf. COLPEURYNTER.—**B'ntang.** The *Fucus vesiculosus.* [A, 315.]—**B'ntripper.** Gonorrhœal cystitis. [L, 80.]—**B'nvergrösserung.** Hypertrophy of the bladder. [L, 50.]—**B'nvenen.** The vesical veins. [A, 355.]—**B'nvorfall.** Prolapse of the bladder. [E.]—**B'nwand.** The wall of the bladder. [L.]—**B'nwurm.** See the major list.—**B'nziehen.** Vesication. [B, 180.]—**B'nziehend.** Vesicant. [A, 315.]—**B'nziehende Mittel, B'nzieher.** A vesicant. [A, 315.]—**B'nziehpflaster.** A blistering plaster. [L, 80.]—**B'nzug.** The *Clematis flammula.* [L, 46.]—**B'rohr.** A blowpipe. [L, 43.]—**Contractile B.** See *Contractile* VESICLE.—**Gallenb'.** The gall-bladder. [L, 50.]—**Grosshirnb', Hirnb'.** See *Cerebral* VESICLE.—**Mutterb'.** See *Mother*-BLADDER.—**Pulsirende B.** See *Contractile* VESICLE.—**Tochterb'n.** See *Daughter*-BLADDERS.

BLASEN (Ger.), n. Bla^{3}z′e^{2}n. 1. A blowing or a blowing sound. [J; L, 30.] 2. See ACINUS (5th def.).

BLASENAUSSCHLAG (Ger.), n. Bla^{3}z′e^{2}n-a^3-us-shla^{3}g. Pemphigus. [G.]—**B. der Neugeborenen.** See PEMPHIGUS *neonatorum.*—**Falscher B.** See PEMPHIGUS *spurius.*—**Krampfhafter B.** See PEMPHIGUS *nervosus.*

BLASENKIRSCHE (Ger.), n. Bla^{3}z′e^{2}n-kersh-e^2. The genus *Physalis.* [B, 180.]—**Eckige B.** The *Physalis angulata.* [B, 180.]—**Gebogenstengelige B.** The *Physalis flexuosa.* [B, 180.]—**Gemeine B.** The *Physalis alkekengi.* [B, 180.]—**Indische B.** The *Physalis indica.* [B, 180.]—**Klebrige B.** The *Physalis viscosa.* [B, 180.]—**Peruanische B.** The *Physalis peruviana.* [B, 180.]—**Schlafmachende B.** The *Physalis* (*Withania*) *somnifera.* [B, 180.]

BLASENSCHWANZ (Ger.), n. Bla^{3}z′e^{2}n-shwa^{3}ntz. See CYSTICERCUS.—**B. des Zellgewebes.** See CYSTICERCUS *cellulosæ.*—**Dünnhalsiger B., Kugelförmiger B.** See CYSTICERCUS *tenuicollis.*

BLASENSTEIN (Ger.), n. Bla^{3}z′e^{2}n-stin. A vesical calculus. [A, 355.]—**B'auflösend.** Lithontriptic. [L, 43.]—**B'krankheit.** Cystic lithiasis. [A. 322.]—**B'messer.** A lithotomy knife. [E.]—**B'säure.** Uric acid. [A, 355.]—**B'schneider.** A lithotomist. [E.]—**B'schnitt.** Lithotomy. [E.]—**B'zange, B'zängelchen.** A lithotomy forceps. [E.]

BLASENSTRAUCH (Ger.), n. Bla^{3}z′e^{2}n-stra^3-uch^2. The genus *Colutea.* [L, 80.]—**Baumartiger B., Gemeiner B.** The *Colutea arborescens.* [A, 355; B, 180.]

BLASENWURM (Ger.), n. Bla^{3}z′e^{2}n-vurm. A hydatid. [L, 182.]—**Geselliger B., Gesellschaftlicher B., Körniger B.** See CŒNURUS *cerebralis.*

BLASIA (Lat.), n. f. Bla(bla^3)′si^2-a^3. A genus of the *Jungermanniaceæ.* [B.]

BLASIACEÆ (Lat.), n. f. pl. Bla(bla^3)-si^2-a(a^3)′se^2(ke^2)-e(a^3-e^2). Of Dumortier, a tribe of the *Jungermannideæ*, comprising the subtribes *Blasieæ*, *Diplolæmeæ*, and *Scopulineæ.* [B, 170.]

BLASIBAD (Ger.), n. Bla^{3}z′i^2-ba^{3}d. A place in Würtemberg, where there is a spring containing calcium carbonate. [L, 49.]

BLASICHT (Ger.), adj. Bla^{3}z′i^{2}ch^{2}t. Bullous. [A, 355.]

BLASIEÆ (Lat.), n. f. pl. Bla^{2}s(bla^{3}s)-i(i^2)′e^2-e(a^3-e^2). Of Dumortier and others, a subtribe or division of the *Jungermanniaceæ* (*Blasiaceæ*). [B, 170.]

BLASIG (Ger.), adj. Bla^{3}z′i^{2}g. Bullous. [G.]

BLÄSLEIN (Ger.), n. Blaz′lin. See BLÄSCHEN.

BLASROHR (Ger.), n. Bla^{3}s′ror. A blowpipe. [A, 315.]

BLASSE (Ger.), **BLASSHEIT** (Ger.), n's. Bla^{3}s′se^2, -hit. Pallor. [L, 46, 80.]

BLAST, n. Bla^{3}st. A.-S., *blæst.* 1. A forcible stream of air, as from a blowpipe. 2. An old popular term for inflammation. 3. The blight (in animals and plants). 4. A flatulent disease of sheep. [L, 97.]

BLASTE (Lat.), n. f. Bla^{2}st(bla^{3}st)′e(a). Gr., βλάστη. Fr., *blaste.* See BLASTEMA.

BLASTELASMATA (Lat.), n. n. pl. Bla^{2}st(bla^{3}st)-e^{2}l-a^{2}z(a^{3}s)′-ma^3-ta^3. From βλαστός, a germ, and ἔλασμα, a plate. Ger., *Nachkeimblätter.* The layers of the fecundated ovum which succeed or are formed from the ectoderm and the endoderm. [L, 146.]

BLASTEM (Ger.), n. Bla^{3}st-e^{2}m′. See BLASTEMA.—**B'streifen.** Streaks or lines of blastema. [H.]—**B'zapfen.** Cones of blastema. [H.]

BLASTEMA (Lat.), n. n. Bla^{2}st(bla^{3}st)-e(a)′ma^3. Gen., *blastem′atos* (*-tis*). Gr., βλάστημα (= βλάστη). Fr., *blastème.* Ger., *Blastem, Keimstoff, Bildungsflüssigkeit.* It., Sp., *blastema.* 1. Of Richard, the embryo proper (*blastus*) of a plant, apart from the cotyledons. [B, 123.] 2. Of Wallroth, the thallus of a lichen. [B, 123.] 3. Of Hayne, a young shoot, a turio. [B, 198.] 4. Undifferentiated embryonic tissue; the material out of which a part is to be formed; the homogeneous semi-fluid substance, formed by the solution or fusion of embryonic cells, in which the anatomical elements are developed; according to Robin, the substance resulting from the elaboration of nutritive material furnished to the anatomical elements by the blood. [H; J, 27, 33.] 5. Weisman's term for a thin nucleated layer of protoplasm covering the whole yolk in the eggs of some insects and spiders, not divided into distinct cells. ["Quart. Jour. of Micr. Sci.," 1884 (J).] 6. A free or parenchymatous plastic exudate. [L, 41.] Cf. CYTOBLASTEMA.—**B. pili.** A hair papilla. [J.]—**Ossific b., Ossifying b., Subperiosteal b.** Kölliker's term for what is now commonly designated the osteogenetic layer of the periosteum or the subperiosteal tissue. [J, 24, 30, 32.]

BLASTEMAL, BLASTEMATIC, adj's. Bla^{2}st-e′ma^{2}l, -e^{2}m-a^{2}t′i^{2}k. Lat., *blastemalis, blastematicus.* Fr., *blastématique.* 1. Pertaining to or formed from a blastema. [J.] 2. Of or pertaining to the thallus (of a lichen). [B, 123.]

BLASTÈME (Fr.), n. Bla^{3}st-e^{2}m. See BLASTEMA.

BLASTEMIC, adj. Bla^{2}st-e^{2}m-i^{2}k. See BLASTEMATIC.

BLASTENIOSPORI (Lat.), n. m. pl. Bla^{2}st(bla^{3}st)-e^{2}n(an)-i^2-o^{2}s′po^{2}r-i(e). From βλαστός, a germ, ἡνία, a thong, and σπόρος, a seed. Of Massalongo, an order of *Lichenes.* [B, 170.]

BLASTESIS (Lat.), n. f. Bla^{2}st(bla^{3}st)-e(a)′si^{2}s. Gen., *blaste′seos* (*-sis*). Gr., βλάστησις. Fr., *blastèse.* Development, especially the formation of the thallus in lichens. [L, 180.] Used also, improperly, in the sense of blastema.

BLASTEUX (Fr.), adj. Bla^{3}st-u^5. Germinal, blastematic (*q. v.*); as a n., the cellular tissue regarded as giving rise to other tissues. [De Blainville, Laurent (A, 385); J.]

BLASTICLE, n. Bla^{2}st′i^{2}kl. See *Vitelline* NUCLEUS.

BLASTIDE, n. Bla^{2}st′i^{2}d. A small clear space in a segment of a fecundated ovum, the precursor of the nucleus. [L, 66.]

BLASTIDIUM (Lat.), n. n. Bla^{2}st(bla^{3}st)-i^{2}d′i^2-u^{3}m(u^{4}m). A cell produced as a secondary outgrowth in the interior of another cell. [B, 19.]

BLASTIOS (Lat.), n. m. Bla^{2}st(bla^{3}st)-i(e)′o^{2}s. From βλαστός, a germ, and ἰός, poison. Ger., *Keimgift.* Ritgen's term for contagium. [A, 322.]

BLASTIQUE (Fr.), adj. Bla^{3}st-ek. See BLASTEMATIC.

BLASTOCARDIA (Lat.), n. f. Bla^{2}st(bla^{3}st)-o(o^2)-ka^{3}rd′i^2-a^3. From βλαστός, a germ, and καρδία, the heart. Fr., *blastocardie.* Ger., *Keim-Kern, Keimfleck.* One of R. Wagner's terms for the germinal spot (*q. v.*). [A, 322; J.]

BLASTOCARPOUS, adj. Bla^{2}st-o-ka^{3}rp′u^{3}s. Lat., *blastocarpus* (from βλαστός, a germ, and καρπός, a fruit). Fr., *blastocarpe.* Germinating in the fruit; of a vegetable embryo, beginning to develop while still contained in the product of fructification on the mother plant. [B, 123.]

BLASTOCELIS (Lat.), n. f. Bla^{2}st(bla^{3}st)-o(o^2)-se(ka)′li^{2}s. Gen., *blastocel′idos* (*-dis*). From βλαστός, a germ, and κηλίς, a spot. Fr., *blastocélie.* Ger., *Keimfleck.* One of R. Wagner's terms for the germinal spot (*q. v.*). [A, 322; J.]

BLASTOCHEME, n. Bla^{2}st′o-kem. From βλαστός, a germ, and ὄχημα, a vehicle. A medusiform planoblast which does not directly give origin to generative elements, but does so through the medium of special sexual buds developed from it. [L, 193.]

BLASTOCHYLE, n. Bla^{2}st′o-kil. Lat., *blastochylus* (from βλαστός, a germ, and χυλός, juice). Fr., *blastochyle.* Ger., *Keimsaft, Keimfeuchtigkeit.* The clear or shiny liquid of the ovule in plants or of the blastodermic vesicle in animals. [A, 321, 322, 385.]

BLASTOCŒLE, n. Bla^{2}st′o-sel. Lat., *blastocœloma* (from βλαστός, a germ, and κοίλωμα, a hollow). Fr., *blastocœle.* Ger., *Keimhöhle, Furchungshöhle.* The central cavity of a blastula. [A, 12; L, 146.]

BLASTOCŒLOMA (Lat.), n. n. Bla^{2}st(bla^{3}st)-o(o^2)-se^{2}l(ko^2-e^{2}l)-o'ma^3. Gen., *blastocœlom'atos* (*-tis*). See BLASTOCŒLE.

BLASTOCOLLA (Lat.), n. f. Bla^{2}st(bla^{3}st)-o(o^2)-ko^{2}l'la^3. From βλαστός, a bud, and κόλλα, glue. The gummy matter covering the buds of certain trees. [L, 121.]

BLASTOCOLYSIS (Lat.), n. f. Bla^{2}st(bla^{3}st)-o(o^2)-ko^{2}l-i(u^6)'-si^{2}s. Gen., *blastocolys'eos* (*-sis*). More properly written *blastocolusis*. From βλαστός, a germ, and κόλουσις, a cutting short. Ger., *Bildungshemmung*. An arrest of formation. [A, 322.]

BLASTOCYST, n. Bla^{2}st'o-si^{2}st. Fr., *blastocyste*, *blastocystine*. The germinal vesicle. [A, 301, 385.]

BLASTOCYSTINX (Lat.), n. f. Bla^{2}st(bla^{3}st)-o(o^2)-si^{2}st(ku^{6}st)'-i^{2}n^{2}x. Gen., *blastocysting'os* (*-gis*). From βλαστός, a germ, and κύστιγξ (dim. of κύστις), a little bladder. See BLASTOCYST.

BLASTODERM, n. Bla^{2}st'o-du^{6}rm. Lat., *blastoderma* (from βλαστός, a germ, and δέρμα, skin). Fr., *blastoderme*, *membrane* (ou *vésicule*) *blastodermique*. Ger., *Keimhaut* [Pander], *Keimblase* [Bischoff]. The germinal, or blastodermic, membrane, or vesicle; a membranous bag formed in the fecundated ovum, consisting of segmentation spherules (blastomeres) pressed away from the centre by the accumulation of blastochyle; the rudimentary structure from which the embryo is formed. At first it is a simple layer; after the formation of the primitive streak, it consists of two layers, the epiblast (ectoderm) externally and the hypoblast (endoderm) internally; after the formation of the medullary plates and the notochord, a third layer, the mesoblast (mesoderm), forms between the two. [A. Thomson (A, 5); T. Holmes (A, 16); L, 146.] See EPIBLAST, HYPOBLAST, and MESOBLAST.—**Bilaminar b.** The b. at that stage in which it consists of two layers, before the formation of the mesoblast.—**Discoid b.** See DISCOGASTRULA.—**Trilaminar b.** The b. at that stage in which it consists of three layers, the epiblast, the hypoblast, and the mesoblast.

BLASTODERMIC, adj. Bla^{2}st-o-du^{6}rm'i^{2}k. Lat., *blastodermicus*. Fr., *blastodermique*. Ger., *blastodermisch*. Pertaining to the blastoderm.

BLASTODISC, n. Bla^{2}st'o-di^{2}sk. Lat., *blastodiscus* (from βλαστός, a germ, and δίσκος, a disc). See ARCHIBLAST.

BLASTOGÈNE (Fr.), adj. Bla^{3}st-o-zhe^{2}n. Productive of germs or of the blastoderm; as a n., the mother sac of an *Echinococcus*. [A, 385.]

BLASTOGENESIS (Lat.), n. f. Bla^{2}st(bla^{3}st)-o(o^2)-je^{2}n(ge^{2}n)'-e^{2}s-i^{2}s. Gen., *blastogene'seos* (*-gen'esis*). From βλαστός, a germ, and γένεσις, generation. Fr., *blastogenèse*. 1. Reproduction by buds in plants. [Dupetit-Thouars (L, 41, 180).] 2. Formation from a bud. [A, 385] 3. The production of a bud. [A, 385.]

BLASTOGÉNIQUE (Fr.), adj. Bla^{3}st-o-zhan-ek. See BLASTOGÈNE.

BLASTOGENY, n. Bla^{2}st-o^{2}j'e^{2}n-i^2. Ger., *Blastogenie*. The science of the evolution of bodily form. [L, 146.]

BLASTOGRAPHY, n. Bla^{2}st-o^{2}g'ra^{2}f-i^2. Lat., *blastographia* (from βλαστός, a bud, and γράφειν, to write). Fr., *blastographie*. Ger., *Blastographie*. That branch of botany which treats especially of buds. [L, 41.]

BLASTOIDA (Lat.), n. n. pl. Bla^{2}st(bla^{3}st)-o(o^2)-i(e)'da^3. From βλαστός, a germ, and εἶδος, resemblance. Ger., *Seeknospen*. Of Haeckel, a class of the *Thecestrellæ*, divided into the *Eublastoida* and the *Dysblastoida*. [L, 228.]

BLASTOIDEA (Lat.), n. n. pl. Bla^{2}st(bla^{3}st)-o(o^2)-i^{2}d(ed)'e^2-a^3. Fr., *blastoïdes*. An order of fossil *Echinodermata*. [L, 121.]

BLASTOKELIS (Lat.), n. f. Bla^{2}st(bla^{3}st)-o(o^2)-ke(ka)'li^{2}s. See BLASTOCELIS.

BLASTOMERES, n. pl. Bla^{2}st'o-merz. From βλαστός, a germ, and μέρος, a part. The nucleated cells formed by the segmentation of the fecundated ovum, constituting the blastoderm. [A. Thomson (A, 5).]

BLASTOMYCETES (Lat.), n. m. pl. Bla^{2}st(bla^{3}st)-o(o^2)-mi-(mu^6)-se(ka)'tez(tas). From βλαστός, a germ, and μύκης, a fungus. Ger., *Keimpilze*. 1. Of Reichenbach, a formation (*formatio*) of *Fungi* (*Gymnomycetes*), comprising the families *Uredinei* and *Tubercularii*, also, according to a later classification, the *Præformativi*. [B.] 2. See SACCHAROMYCETES.

BLASTOPHOR, n. Bla^{2}st'o-for. See BLASTOPHORE.

BLASTOPHORAL, adj. Bla^{2}st-o^{2}f'o^{2}r-a^{2}l. Pertaining to a blastophore.

BLASTOPHORE, n. Bla^{2}st'o-for. Lat., *blastophorus* (from βλαστός, a germ, and φορεῖν, to carry). Fr., *blastophore*. Ger., *Blastophor*, *Keimträger*, *Keimhalter*. 1. The thick cotyledon (hypoblast) lying against the embryo proper (blastema) in grasses and other plants. [B, 123.] 2. That portion of a spermatospore which does not become converted into spermatozooids. [L, 201.]—**Sperm b.** See *B.* (2d def.).

BLASTOPHYLLA (Lat.), n. n. pl. Bla^{2}st(bla^{3}st)-o(o^2)-fi^{2}l(fu^{6}l)'-la^3. From βλαστός, a germ, and φύλλον, a leaf. Ger., *Urkeimblätter*. The primitive germ-layers (the ectoderm and endoderm) of the fecundated ovum. [L, 146.]

BLASTOPHYLY, n. Bla^{3}st-o^{2}f'i^{2}l-i^2. From βλαστός, a germ, and φυλή, a tribe. Ger., *Blastophylie*. The "tribal history of persons." [L, 146.]

BLASTOPORAL, adj. Bla^{2}st-o^{2}p'o^{2}r-a^{2}l. Pertaining to the blastopore. [L, 121.]

BLASTOPORE, n. Bla^{2}st'o-por. From βλαστός, a germ, and πόρος, a pore. Fr., *blastopore*, *bouche primitive*. Ger., *Urmund*. Syn.: *anus of Rusconi*. Lankester's term for the narrow aperture left in a gastrula after it has become invaginated. [A. Thomson (A, 5); L, 146.]

BLASTOPROLEPSIS (Lat.), n. f. Bla^{2}st(bla^{2}st)-o(o^2)-pro-(pro^2)-le^{2}ps(laps)'i^{2}s. Gen., *blastoprolep'seos* (*-sis*). From βλαστός, a germ, and πρόληψις, anticipation. Ger., *Bildungsübereilung*. Acceleration of development. [A, 322.]

BLASTOPSORÆ (Lat.), n. f. pl. Bla^{2}st(bla^{3}st)-o^{2}p-so're(ra^3-e^2). From βλαστός, a germ, and ψώρα, a lichen. Of Reichenbach, a formation (*formatio*) of *Gymnopsoræ*, including the families *Pulverariæ*, *Coniocarpieæ*, and *Anthonariæ*. [B, 170.]

BLASTOS (Lat.), n. m. Bla^{2}st(bla^{3}st)'o^{2}s. Gr., βλαστός. See GERM.

BLASTOSPHERE, n. Bla^{2}st'o-sfer. Lat., *blastosphœra* (from βλαστός, a germ, and σφαῖρα, a sphere). Fr., *blastosphère*. See BLASTULA and CYTULA.

BLASTOSPILOS (Lat.), n. m. Bla^{2}st(bla^{3}st)-o^{2}s'pi^{2}l-o^{2}s. From βλαστός, a germ, and σπίλος, a spot. See BLASTOCELIS.

BLASTOSPOREÆ [Jessen] (Lat.), n. f. pl. Bla^{2}st(bla^{3}st)-o(o^2)-spor(spo^{2}r)'e^2-e(a^3-e^2). A division of *Algæ* (*Ulvaceæ*). [B, 170.]

BLASTOSTROMA (Lat.), n. n. Bla^{2}st(bla^{3}st)-o(o^2)-stro'ma^3. Gen., *blastostrom'atos* (*-tis*). From βλαστός, a germ, and στρῶμα, a layer. Fr., *blastostroma*. Ger., *Keimschicht*. See *Embryonic* AREA.

BLASTOSTYLE, n. Bla^{2}st'o-stil. From βλαστός, a germ, and στῦλος, a pillar. Fr., *blastostyle*. A columnar zooid attached to the gonosome in the *Hydrozoa*, bearing generative buds. [L, 193.]

BLASTOUS, adj. Bla^{2}st'u^{3}s. Fr., *blasteux*. See BLASTEMATIC.

BLASTULA (Lat.), n. f. Bla^{2}st(bla^{3}st)'u^2(u^4)-la^3. Ger., *Keimhautblase*, *Keimblase*, *Blasenkeim*. The fecundated ovum in the stage immediately succeeding that of the morula, when it is a hollow sphere filled with liquid or a gelatinous substance, and its walls consist of a single layer of cells. [L, 146.]

BLASTULARIA (Lat.), n. n. pl. Bla^{2}st(bla^{3}st)-u^{2}l(u^{4}l)-a(a^3)'-ri^2-a^3. A class of the *Protozoa* of Haeckel, including those which, when fully developed, consist of two layers of cells; divided into the *Planœada* and the *Gastrœada*. [L, 173.]

BLASTULATION, n. Bla^{2}st-u^{2}l-a'shu^{3}n. Fr., *blastulation*. The process of the formation of the blastula from the morula. [A, 385.]

BLASTUS (Lat.), n. m. Bla^{2}st(bla^{3}st)'u^{3}s(u^{4}s). Gr., βλαστός. See BLASTEMA (1st def.).

BLÄSUS (Ger.), adj. and n. Blas'us. See BLÆSUS.

BLAT (Fr.), n. Bla^3. An old name for wheat. [A, 385.]

BLATT (Ger.), n. Bla^{3}t. A leaf (of a plant), also any thin sheet or layer. [B.] See also BLÄTTER.—**Afterb'.** The amphigastrium (*q. v.*). [B, 198.]—**Animales B.** Von Baer's term for the epiblast. [A, 8.]—**Beib'.** See *Afterb'*.—**B'achsel.** The axil of a leaf. [B.]—**B'achselständig.** In botany, axillary. [B, 180.]—**B'ader.** A vein of a leaf. [B.]—**B'ähnlich.** See *B'artig*.—**B'ansatz.** A stipule. [B, 131.]—**B'artig.** Leaf-like, foliaceous. [B, 131.]—**B'auge.** A leaf-bud. [B, 131.]—**B'basis.** The base of a leaf. [B.]—**B'bieger.** See *B'wickler*.—**B'bildend.** Forming or bearing leaves. [B, 49.]—**B'blau.** A blue coloring matter found in leaves. [B, 131.]—**B'blei.** Lead in thin leaves. [B, 131.]—**B'blume.** See the major list.—**B'cyclus.** See LEAF *cycle*.—**B'dorn.** A thorn composed of a metamorphosed leaf. [B. 35, 49.]—**B'eisen.** Sheet iron. [B, 131.]—**B'entwickelung.** Foliation. [B, 131.]—**B'erbse.** The *Lathyrus sativus*. [B, 131.]—**B'falter.** See *B'wickler*.—**B'farbstoff.** Chlorophyll. [B, 270.]—**B'federchen.** See PLUMULE.—**B'fläche.** The lamina of a leaf. [B, 35.]—**B'fleisch.** The parenchyma of a leaf. [B, 131.]—**B'förmig.** Leaf-shaped. [B, 131.]—**B'fressend.** Feeding on leaves. [L, 43.]—**B'gegenständig.** Having opposite leaves. [B, 123.]—**B'gelb.** The yellow coloring matter of leaves. [B, 131.]—**B'gerste.** The *Hordeum distychum*. [B, 131.]—**B'gold.** Gold leaf. [B.]—**B'grün.** Chlorophyll. [B, 3.]—**B'grund.** The base of a leaf. [B, 49.]—**B'häutchen.** A ligule. [B, 123.]—**B'käser.** See CHRYSOMELINÆ.—**B'keimer.** The *Dicotyledones*. [B, 49.]—**B'kiemer.** See LAMELLIBRANCHIATA.—**B'kissen.** See PULVINUS.—**B'knospe.** A leaf-bud (*gemma foliifera*). [B, 123.]—**B'kohl.** The *Brassica oleracca viridis*. [B, 180.]—**B'körner.** See LAMELLICORNIA.—**B'kreise.** See LEAF *cycle*.—**B'kupfer.** Sheet copper. [B, 131.]—**B'lack.** Shellac. [A, 315.]—**B'lahm.** Strained in the shoulder (said of horses and other animals). [A, 315.]—**B'laus.** See APHIS.—**B'läuse.** See HOMOPTERA.—**B'lauskäfer.** See COCCINELLIDÆ.—**B'los.** Leafless, aphyllous. [B, 123.]—**B'lose.** The genus *Sempervivum*. [B, 131.]—**B'loskraut.** The *Sedum acre*. [B, 180.]—**B'mark.** The parenchyma (diachyma) of a leaf. [B, 123.]—**B'moos.** One of the leafy mosses (*Musci frondosi*). [B.]—**B'narbe.** See PHYLULE.—**B'nasen.** See PHYLLOSTOMATA.—**B'nerven.** The nerves (veins) of a leaf. [B, 35.]—**B'organ.** A metamorphosed leaf constituting a floral organ (*e. g.*, a sepal). [B.]—**B'rand.** The edge of a leaf. [B, 35.]—**B'ranke.** A tendril formed from a leaf (*cirrhus foliaris*). [B, 123.]—**B'reich.** Leafy (*foliosus*). [B, 123.]—**B'rippe.** The rib of a leaf. [B, 123.]—**B'rippenständig.** In botany, costal (*costalis*). [B, 123.]—**B'roller.** See *B'wickler*.—**B'roth.** See ERYTHROPHYLL.—**B'scheibe.** The lamina of a leaf. [B, 123.]—**B'scheide.** A leaf-sheath (*vagina*). [B, 123.]—**B'schlauch.** See ASCIDIUM (1st def.).—**B'schlauchförmig.** See ASCIDIOID.—**B'schlauchig.** See ASCIDIATE.—**B'schlauchtragend.** See ASCIDIGEROUS.—**B'schuppe.** A leaf scale. [B.]—**B'silber.** See SILVER *foil*.—**B'spindel.** The common axis (*rhachis*) of a pinnate leaf. [B, 49.]—**B'spitze.** The apex of a leaf. [B, 35.]—**B'spreite.** The lamina of a leaf. [B, 270.]—**B'spur.** See PROSTYPUS.—**B'ständig.** Growing from a leaf (*foliaris*). [B, 123, 131.]—**B'stellung.** See PHYLLOTAXIS.—**B'stiefel.** See OCHREA.—**B'stiel.** A petiole. [B, 123.]—**B'stielartig.** Petiolar (*petiolaceus*). [B, 123.]—**B'stielbasis.** See PHYLLOPODIUM.—**B'stielb'.** See PHYLLODIUM.—**B'stielchen.** A petiolule. [B.]—**B'stieldeckig, B'stielig.** See *B'stielartig*.—**B'stielranke.** A leaf tendril (*cirrhus petiolaris*). [B, 123.]—**B'stielrest.**

See PHYLLOPODIUM.—**B'stielständig.** Petiolar. [B, 123.]—**B'stielvertretend.** See PETIOLANEUS.—**B'tang.** See LAMINARIA.—**B.-Tute.** See OCHREA.—**B'vergoldung.** Gilding with gold leaf. [A, 315.]—**B'versilberung.** Silvering with silver leaf. [A, 315.]—**B'wespen.** See TENTHREDINIDÆ.—**B'wickler.** A collective name for insects that live on leaves and draw them together. [L, 46.]—**B'winkel.** The axilla of a leaf. [B, 123.]—**B'winkelständig.** In botany, axillary. [B, 123.]—**B'wulst.** See PULVINUS.—**B'zelle.** An orthostichie. [B, 49.]—**B'zinn.** Tin foil. [A, 315.]—**B'züngelchen.** See LIGULA.—**Blumenb'.** A petal. [B, 270.]—**Deckb'.** A bract. [B, 270.]—**Einfaches B.** A simple leaf. [B, 35.]—**Fruchtb'.** A carpel. [B, 270.]—**Hintere B'ecke des Ohres.** See ANTITRAGUS.—**Hochb'.** A metamorphosed leaf (*e. g.*, a bract) occurring upon the flower-axis and differing from an ordinary leaf in color or shape. [B, 270.]—**Kelchb'.** A metamorphosed leaf forming a sepal. [B, 270.]—**Kronenb'.** A metamorphosed leaf forming a petal. [B, 270.]—**Laubb'.** An ordinary leaf. [B, 270.]—**Motorisch-germinatives B.** One of Remak's terms for the epiblast. [A, 8.]—**Nebenb'.** A stipule. [B, 270.]—**Niederb'.** A leaf-scale. [B.]—**Sensorielles B.** [Remak], **Seröses B.** [Pander]. The epiblast. [A, 8.]—**Staubb'.** A metamorphosed leaf forming a stamen. [B, 270.]—**Unterb'.** See AMPHIGASTRIUM.—**Vegetatives B.** [Remak]. The hypoblast. [A, 8.]—**Vorb'.** A bracteole. [B, 270.]—**Zusammengesetztes B.** A compound leaf. [B, 35.]

BLATTA (Lat.), n. f. Bla^{2}t(bla^{3}t)′ta^3. Fr., *blatte*. Ger., *Schabe*, *Motte*. 1. Anciently, a clot of blood, also anything of the color of blood. [A, 312.] 2. A genus of the *Blattariæ*, including the cockroaches. [L.]—**B. lapponica.** See TARACANA.—**B. orientalis.** Fr., *blatte orientale* (ou *des cuisines*). Ger., *Schabe*. The cockroach. It has been used as a diuretic, and the active principle, *antihydropin*, is said to have been isolated in a crystalline form by Bogomolon. [A, 247.]

BLATTAIRE (Fr.), adj. Bla^{3}t-ta^{2}r. Pertaining to or resembling the genus *Blatta*; as a n., in the pl., the *Blattariæ*, and in the sing. the *Verbascum blattaria*. [B, 173; L, 41.]

BLATTARIA (Lat.), n. f. Bla^{2}t(bla^{3}t)-ta(ta^3)′ri^2-a^3. The *Verbascum b.* and the *Helichrysum arenarium*. [B.]—**Flores blattariæ.** The flowers of *Helichrysum arenarium*. [B, 180.]—**Herba blattariæ.** The herb of *Verbascum b.* [B, 180.]

BLATTARIÆ (Lat.), n. f. pl. Bla^{2}t(bla^{3}t)-ta(ta^3)′ri^2-e(a^3-e^2). Fr., *blattaires*. The cockroaches; of Latreille, a family of the *Orthoptera*. [L, 196.]

BLATTBLUME (Ger.), n. Bla^{3}t′blum-e^2. The genus *Phyllanthus*. [B.]—**Einfache B.** The *Phyllanthus simplex*. [B, 180.]—**Harntreibende B.** The *Phyllanthus squamifolius*. [B, 180.]—**Langstielige B.** The *Phyllanthus pedunculatus*. [B, 180.]—**Ovalblättrige B.** The *Phyllanthus oblongifolius*. [B, 180.]—**Schuppenblättrige B.** The *Phyllanthus squamifolius*. [B, 180.]—**Vielblüthige B.** The *Phyllanthus multiflorus*. [B, 180.]—**Wegdornähnliche B.** The *Phyllanthus rhamnoides*. [B, 180.]—**Welsse B.** The *Phyllanthus Niruri*. [B, 180.]—**Zurückgedrücktblättrige B.** The *Phyllanthus retusus*. [B, 180.]

BLÄTTCHEN (Ger.), n. Blat′ch^{2}e^{2}n. A leaflet, a lamina, a membrane. [B; L, 46.]—**Beib'.** An amphigastrium. [B, 198.]—**B'gold.** Gold leaf. [A, 315.]

BLATTE (Fr.), n. Bla^{3}t. See BLATTA.—**B. des cuisines.** See BLATTA *orientalis*.

BLATTÉ (Fr.), adj. Bla^{3}t-ta. See BLATTAIRE.

BLATTER (Ger.), n. Bla^{3}t′te^{2}r. A blister, pustule, pimple, wheal, or pock; in the pl., *B'n*, the small-pox. [A, 315.]—**B'belzen.** To variolate; variolation. [L, 30.]—**B'fieber.** The fever of small-pox. [L, 80.]—**B'flechte.** An ecthymatous herpes. [L, 80.]—**B'gift.** Small-pox virus. [A, 315.]—**B'grube.** A pock-mark. [L, 46.]—**B'haus.** A small-pox hospital. [A, 315.]—**B'holz.** Lignum vitæ. [B, 131.]—**B'ig.** Papular or pustular. [G.]—**B'impfer.** A small-pox inoculator. [A, 315.]—**B'impfung.** Variolation. [A, 315.]—**B'krank.** Sick with the small-pox. [L, 46.]—**B'krankheit.** Small-pox. [A, 315.]—**B'kraut.** The *Ranunculus acris*. [B, 131.]—**B'lymphe.** The lymph from a small-pox pock. [G.]—**B'magen.** See OMASUM.—**B'masen.** Pock-marks. [L, 46.]—**B'masern.** Measles resembling small-pox. [L, 80.]—**B'masig.** Pock-marked. [A, 315.]—**B'n.** The small-pox; as a v. intr., to have the small-pox. [A, 315.]—**B'narbe.** See *B'grube*.—**B'narbig.** See *B'masig*.—**B'n der Schweine.** Swine-pox.—**B'n der Schafe.** Sheep-pox.—**B'nflechte.** See *B'flechte*.—**B'nuss.** The *Staphylea pennata*. [B, 131.]—**B'rose.** Erysipelas bullosum. [L, 43.]—**Bösartige B.** See *Contagious* ANTHRAX.—**Bösartige B'n.** See VARIOLA *maligna*.—**Esthische B.** See ANTHRAX *malignus esthonicus*.—**Falsche B'n.** See VARICELLA.—**Faulige B'n.** See VARIOLA *maligna*.—**Fliegende B'n.** See VARICELLA.—**Grosse B.** Syphilis. [G.]—**Schwarze B.** See *Contagious* ANTHRAX.—**Schwarze B'n.** See VARIOLA *hæmorrhagica*.—**Unächte B'n.** See VARICELLA.—**Zusammenfliessende B'n.** Confluent small-pox. [L, 43.]

BLÄTTER (Ger.), n., pl. of *Blatt* (*q. v.*). Blat′te^{2}r.—**B'ansatz.** A stipule. [B, 131.]—**B'blume.** See BLATTBLUME.—**B'bringend.** Leaf-bearing. [L, 46.]—**B'erde.** Normal potassium acetate. [B, 2.]—**B'fressend.** Subsisting on leaves. [A, 315.]—**B'fülle.** Leafiness. [A, 315.]—**B'füsser.** See BRANCHIOPODA.—**B'grün.** Chlorophyll. [A. 315.]—**B'holz.** Lignum vitæ, also box-wood. [A, 315.]—**B'ig.** Laminar; in botany, foliaceous. [A, 315; L, 30.]—**B'knospe.** A leaf-bud. [A, 315.]—**B'kohl.** The *Brassica oleracea*. [A, 315.]—**B'lein.** A pustule. [L, 80.]—**B'los.** Leafless. [L, 46.]—**B'magen.** See OMASUM.—**B'manna.** Flake manna. [B, 180.]—**B'pilz.** See AGARIC.—**B'reich.** Foliaceous. [A, 315.]—**B'schnäbler.** See LAMELLIROSTRES.—**B'schwamm.** See the major list.—**B'stand.** Foliation. [A, 315.]—**B'tabak.** Leaf-tobacco. [A, 315.]—**B'traganth.** Flake tragacanth. [B, 180.]—**B'tragend.** Leaf-bearing. [L, 46.]—**B'treiben.** Leafing, sprouting. [A, 315.]—**B'ung.** Lamination, also exfoliation.—**B'werk.** An arborescent structure (*e. g.*, that of the cerebellum). [I, 17; K.]—**B'wuchs.** Foliation. [A, 315.]—**Indianische B.** See FOLIA *inda*.

BLÄTTERSCHWAMM (Ger.), n. Blat′te^{2}r-shwa^{3}m. The genus *Agaricus*. [B.]—**Nelkenb'.** See MARASMIUS *oreades*.—**Rissiger B.** See AGARICUS *rimosus*.

BLATTIDÆ (Lat.), n. f. pl. Bla^{2}t(bla^{3}t)′ti^{2}d-e(a^3-e^2). Fr., *blattides*. See BLATTARIÆ.

BLATTIEN (Fr.), adj. Bla^{3}t-ti^2-a^{3}n^2. See BLATTAIRE.

BLATTII (Lat.), n. m. pl. Bla^{2}t(bla^{3}t)′ti^2-i(e). Fr., *blattiens*. See BLATTARIÆ.

BLATTINA (Lat.), n. n. pl. Bla^{2}t(bla^{3}t)-ti(te)′na^3. See BLATTARIÆ.

BLÄTTLEIN (Ger.), n. Blat′lin. See BLÄTTCHEN.

BLÄTTRIG (Ger.), adj. Blat′ri^{2}g. See BLÄTTER*ig*.

BLAU (Ger.), adj. and n. Bla^3′u. Blue.—**Berliner B.** See *Prussian* BLUE.—**B'aderig.** Blue-veined. [L, 46.]—**B'bäckchen.** See FALCONIDÆ.—**B'bart.** The *Mytilus edulis*. [L, 43.]—**B'beere.** The *Vaccinium myrtillus*. [B, 180.]—**B'blindheit.** See *Blue*-BLINDNESS.—**B'farbenerz.** Cobalt. [A, 315.]—**B'ervitriol.** Sulphate of copper. [B.]—**B'fieber.** Cyanosis. [L, 46.]—**B'geadert.** See *B'aderig*.—**B'geblümt.** Blue-flowered. [A, 315.]—**B'gesäuert.** Impregnated with hydrocyanic acid. [A, 315.]—**B'glas.** Smalt. [A, 315.]—**B'gras.** The *Melica cærulea*. [A, 315.]—**B'holz.** The wood of *Hæmatoxylon campechianum*. [B, 180.]—**B'holzabsud.** See *Decoctum* HÆMATOXYLI.—**B'manderle.** The *Veronica beccabunga*. [B, 180.]—**B'pulver.** Potassium ferricyanide. [B.]—**B'sauer.** Of or pertaining to hydrocyanic acid; with the name of a base, the hydrocyanate (cyanide) of that base. [B.]—**B'säure.** Hydrocyanic acid. [B.]—**B'spähne.** See *B'holz*.—**B'stein.** Copper sulphate. [B, 180.]—**B'stoff.** Cyanogen. [B, 49.]—**B'sucht.** Cyanosis. [L, 37.]—**B'vitriol.** Copper sulphate. [A, 315.]—**B'wasser.** See AQUA *cærulea*.—**B'wurzel.** The *Pimpinella magna*. [B, 180.]—**Schwarzb'.** See ATRO-CÆRULEUS.—**Thénard's B.** Thénard's blue; cobalt ultra-marine. [B.]—**Turnbull's B.** See *Turnbull's* BLUE and IRON *ferricyanide*.

BLAVELLE (Fr.), **BLAVÉOLE** (Fr.), **BLAVEROLLE** (Fr.), **BLAVET** (Fr.), **BLAVETTA** (Lat., f.), **BLAVETTE** (Fr.), n's. Bla^{3}v-e^{2}l, -a-ol, -e^{2}r-ol, -a, bla^2(bla^3)-ve^{2}t(we^{2}t)′ta^3, bla^{3}v-e^{2}t. The *Centaurea cyanus*. [B, 173.]

BLAWORT, n. Bla′wu^{5}rt. A.-S., *blæwort*. The *Campanula rotundifolia*. [L, 73.]

BLAX (Lat.), adj. Bla^{2}x(bla^{3}x). Gen., *bla′cis*. Gr., *βλάξ*. Ger., *schlaff*. Weak, relaxed, flaccid. [A, 322.]

BLAZING-STAR, n. Blaz″i^{2}ng-sta^{3}r′. The *Aletris farinosa*; in North America, the *Liatris squarrosa* and the *Chamælirium luteum*. [B, 19, 215.]

BLÉ (Fr.), n. Bla. Wheat. [B.] See TRITICUM.—**Amidon de b.** Wheat starch. [B.]—**B. amidonnier.** The *Triticum dicoccum*. [A, 321, 385.]—**B. barbu.** The *Triticum turgidum*. [L, 105.]—**B. caffre, B. cafre.** The *Sorghus Cafrorum*. [B, 173.]—**B. cornu.** Ergotized rye. [B, 132.]—**B. d'abondance.** The *Triticum æstivum*. [B, 173.]—**B. d'amour.** The *Lithospermum arvense*. [L, 87.]—**B. de Barbarie.** The *Zea mais*. [B, 173.]—**B. de bœuf.** The *Melampyrum alpestre*. [B, 173.]—**B. de Canarie.** See *B. des Canaries*.—**B. de Guinée.** The *Zea mais*. [B, 173.]—**B. d'Égypte.** The *Hordeum vulgare silvestre*. [B, 173.]—**B. de la Saint-Jean.** The *Secale cereale*. [B, 173; L, 105.]—**B. de mai.** The *Hordeum vulgare cœleste*. [B, 173.]—**B. de marcet, B. de mars.** The *Triticum æstivum*. [B, 173.]—**B. de miracle.** The *Triticum compositum*. [B, 173.]—**B. de renard.** The *Melampyrum alpestre*. [B, 173.]—**B. de Sainte-Hélène.** The *Triticum excelsum*. [B, 173.]—**B. des Canaries.** The *Phaleris canariensis*. [A, 385.]—**B. de Smyrne.** The *Triticum compositum*. [B, 173.]—**B. d'Espagne.** The *Zea mais*. [B, 173.]—**B. de Tartarie.** The *Polygonum tartaricum*. [B, 173; L, 105.]—**B. de Turquie.** Maize. [B, 173; L, 109.]—**B. de vache.** The *Melampyrum arvense*. [A, 321, 385.]—**B. d'Inde, B. d'Italie.** See *B. de Turquie*.—**B. ergot**^{4}. See *B. cornu*.—**B. franc.** The *Triticum sativum hibernum*. [B, 173.]—**B. géant.** The *Triticum sativum excelsum*. [B, 173.]—**B. locular.** The *Triticum monococcum*. [B, 173.]—**B. marcel, B. marcet.** The *Triticum æstivum*. [B, 173.]—**B. Martin.** The *Polygonum fagopyrum*. [B, 173.]—**B. meteil.** A mixture of wheat and rye. [B, 173.]—**B. noir.** The *Fagopyrum vulgare*. [A, 321, 385.]—**B. rhachitique.** Smutty grain. [L, 18.]—**B. rouge, B. sarrasin.** See *B. noir*.—**B. trémois.** The *Triticum æstivum*. [B, 173.]—**B.-Turquie.** See *B. de Turquie*.—**Fécule de b.** Wheat starch. [B.]—**Gros b.** The *Triticum turgidum*. [B, 173.]

BLEABERRY, n. Ble′be^{2}r-ri^2. The *Vaccinium myrtillus*, also the *Vaccinium uliginosum*. [B, 19.]

BLEAREDNESS, n. Bler′e^{2}d-ne^{2}s. Lat., *lippitudo*. Fr., *chassie*. Ger., *Triefäugigkeit*. It., *cispa*. Sp., *lagaña*. A condition of chronic soreness of the eyes from blepharitis marginalis (*q. v.*). [F.]

BLEAR-EYE, n. Bler′i. See BLEAREDNESS.

BLEAR-EYED, adj. Bler′id. Lat., *lippus*. Fr., *chassieux*. Ger., *triefäugig*. It., *cispo*. Sp., *lagaño*. Affected with bleared-ness.

BLEAR-EYEDNESS, n. Bler′id-ne^{2}s. See BLEAREDNESS.

BLEB, n. Ble^{2}b. Gr., *πομφόλυξ*. Lat., *bulla*, *ampulla*. Fr., *bulle*, *ampoule*, *cloche*. Ger., *Blase*, *Wasserblase*. It., *bolla*, *ampolla*, *vescica*, *flittena*. Sp., *vejiga*. Syn.: *blob*, *blister*, *bladder*. A lesion of the skin produced by a collection of serum beneath the cuticle, causing a circumscribed elevation of the surface greater than that produced by a vesicle (*q. v.*). [G, 60.]

O, no; **O**^{2}, not; **O**^{3}, whole; **Th**, thin; **Th**^{2}, the; **U**, like oo in too; **U**^{2}, blue; **U**^{3}, lull; **U**^{4}, full; **U**^{5}, urn; **U**^{6}, like ü (German).

BLÉCEURE (Fr.), n. Bla-su^{5}r. An old form of *blessure* (*q. v.*). [L, 41.]

BLECH (Ger.), n. Ble^{2}ch^2. A thin plate of metal obtained by hammering. [B.]—**B'rinne.** A metallic guttered splint. [E. Gurlt (A, 319).]

BLECHNACEÆ (Lat.), n. f. pl. Ble^{2}k(blach^2)-na(na^3)'se^2(ke^2)-e(a^3-e^2). Of Presl, a section of ferns (*Aspleniaceæ*), comprising *Blechnum*, *Athyrium*, etc., divided into the sections *Blechneæ* and *Blechnopsideæ*. [B, 170.]

BLECHNEÆ (Lat.), n. f. pl. Ble^{2}k(blach^2)'ne^2-e(a^3-e^2). Of Gaudichaud and Presl, a subtribe or section of ferns (*Pteridaceæ*, *Btechnaceæ*), comprising *Blechnum*, etc. [B, 170.]

BLECHNIDEÆ (Lat.), n. f. pl. Ble^{2}k(blach^2)-ni^{2}d'e^2-e(a^3-e^2). Of Gray, a division of ferns including *Blechnum* and other genera. [B, 170.]

BLECHNOIDEÆ (Lat.), n. f. pl. Ble^{2}k(blach^2)-no(no^2)-i^{2}d(ed)'-e^2-e(a^3-e^2). Of Reichenbach, a subdivision of polypodiaceous ferns comprising *Blechnum*, *Lomaria*, and other genera. [B, 170.]

BLECHNON (Lat.), n. n. Ble^{2}k(blach^2)'no^{2}n. See BLECHNUM.

BLECHNOPSIDEÆ (Lat.), n. f. pl. Ble^{2}k(blach^2)-no^{2}p-si^{2}d'-e^2-e(a^3-e^2). Of Presl, a section of the *Blechnaceæ*, comprising *Blechnopsis* and other genera. [B, 170.]

BLECHNUM (Lat.), n. n. Ble^{2}k(blach^2)'nu^{3}m(nu^{4}m). Gr., *βλῆχνον*. Fr., *blégne*. A genus of ferns. [B, 19.]—**B. boreale** [Swartz]. The *Lomaria spicant*. [B, 173, 180, 242.]—**B. flabellatum** [Presl]. The *Actinopteris radiata*. [B, 242.] See ACROSTICHUM *radiatum*.—**B. linguifolium.** The *Scolopendrium vulgare*. [L, 116.]—**B. spicant** [Linnæus]. The *Lomaria spicant*. [B, 19, 173, 180, 242.]—**B. squamosum.** The *Asplenium ceterach*. [L, 116.]

BLECHON (Lat.), n. f. Ble^{2}k(blach^2)'o^{2}n(on). Gen., *blecho'nis*. Gr., *βλήχων*. An ancient name for pennyroyal (*Mentha pulegium*). [A, 311 ; L, 119.]

BLECHROPYRA (Lat.), n. f. Ble^{2}k(blach^2)-ro^{2}p'i^2(u^6)-ra^3. From *βληχρός*, weak or mild, and *πῦρ*, fever. Fr., *bléchropyre*. 1. A trivial, transitory fever (the *βληχρὸς πυρετός* of Hippocrates). [A, 311, 322.] 2. As sometimes improperly used, an adynamic fever. [A, 322.]

BLECHROPYRUS (Lat.), n. m. Ble^{2}k(blach^2)-ro^{2}p'i^2(u^6)-ru^{3}s-(ru^{4}s). See BLECHROPYRA.

BLECHROS (Lat.), adj. Ble^{2}k(blach^2)'ro^{2}s. See BLECHRUS.

BLECHROSPHYGMIA, BLECHROSPHYGMUS (Lat.), n's f. and m. Ble^{2}k(blach^2)-ro(ro^2)-sfi^{2}g(sfu^{6}g)'mi^2-a^3, -mu^{3}s(mu^{4}s). From *βληχρός*, weak, and *σφυγμός*, the pulse. Weakness of the pulse. [A, 322.]

BLECHRUS (Lat.), adj. Ble^{2}k(blach^2)'ru^{3}s(ru^{4}s). Gr., *βληχρός*. Mild (said of fever), weak (said of the pulse). [A, 322.]

BLED (Fr.), n. Bla. The *Triticum sativum*. [B, 173.]

BLEEDER, n. Bled'u^{5}r. From A.-S., *bledan*, to bleed. Fr., *saigneur* (1st def.). Ger., *Aderlasser* (1st def.), *Bluter* (2d def.). 1. A professional bloodletter, also a physician who practises bloodletting largely (as in Meigs's phrase, "a good Gordonian bleeder"). 2. A person affected with the hæmorrhagic diathesis.

BLEEDING, adj. Bled'i^{2}ng. Fr., *saignant*. Ger., *blutend*. Loosing blood.—**B.-heart.** The *Dicentra spectabilis*. [B, 75.]

BLEEDING, n. Bled'i^{2}ng. Fr., *perte de sang* (1st def.), *saignée* (2d def.). Ger., *Blutung* (1st def.), *Aderlassen* (2d def.). 1. Loss of blood. See HÆMORRHAGE. 2. Bloodletting.

BLÉGNE (Fr.), n. Blan. See BLECHNUM.

BLEI (Ger.), n. Bli. Lead. [B.]—**Acrylsaures B.** Lead acrylate. [B, 4.]—**Aconitsaures B.** Lead aconitate. [B.]—**Adipinsaures B.** Lead adipate. [B.]—**Ameisensaures B.** Lead formate. [B.]—**Amidosulfonsaures B.** Lead amidosulphonate. [B.]—**Angelicasaures B.** Lead angelate. [B.]—**Arsenigsaures B.** Lead arsenite. [B.]—**Arsensaures B.** Lead arsenate. [B.]—**Antimonsaures B.** Lead antimonate. [B, 270.]—**B'acetät.** Lead acetate. [A, 315.]—**B'acetätsalbe.** See *Unguentum* PLUMBI *acetatis*.—**B'amalgam.** See *Amalgam of* LEAD.—**B'amaurose.** Amaurosis due to lead poisoning. [L. Lewin (D, 18).]—**B'amyl.** See LEAD *amyl*.—**B'anästhesie.** See *Lead* ANÆSTHESIA.—**B'antimoniat.** Lead antimonate. [B, 270.]—**B'arthralgie.** A painful affection, chiefly of the flexor muscles of the lower limbs, but spreading to other parts, even to the bones ; due to lead poisoning. [L. Lewin (A, 319).]—**B'artig.** Resembling lead, plumbeous. [A, 315.]—**B'asche.** Lead suboxide (*cinis plumbi*). [B, 48.]—**B'äthyl.** See LEAD *ethyl*.—**B'balsam.** See *Balsamum* SATURNI.—**B'baum.** See under ARBOR *Saturni*.—**B'blech.** Sheet lead. [A, 315.]—**B'borat.** Lead borate. [B.]—**B'bromür.** Lead bromide. [B.]—**B'cachexie.** The cachexia of lead poisoning. [L. Lewin (L, 57).]—**B'carbonat.** Lead carbonate. [B.]—**B'carbonatpflaster.** See *Emplastrum* PLUMBI *carbonatis*.—**B'carbonatsalbe.** See *Unguentum* PLUMBI *carbonatis*.—**B'cerat.** See *Ceratum* PLUMBI *subacetatis*.—**B'chlorür.** Lead chloride. [B.]—**B'chromat.** Lead chromate. [B.]—**B'cuprocyanür.** Lead cuprocyanide. [B.]—**B'cyanür.** Lead cyanide. [B.]—**B'darmgicht.** Lead colic. [L, 46.]—**B'dioxyd.** Lead dioxide. [B.]—**B'dyskrasie.** See *B'cachexie*.—**B'epilepsie.** See EPILEPSIA *saturnina*.—**B'erz.** Lead ore. [B, 180.]—**B'essig.** See *Vinegar of* LEAD.—**B'extrakt.** See *Liquor* PLUMBI *subacetatis*.—**B'farbe.** Lividity. [A, 315.]—**B'farben, B'farbig.** Livid. [L, 46.]—**B'gelb.** Yellow oxide of lead (massicot). [B, 48.]—**B'glanz.** Native lead sulphide, galena. [B.]—**B'glas.** Lead glass (*vitrum plumbi*). [B, 48.]—**B'glätte.** Litharge. [B, 48.] See LEAD *oxide*.—**B'glättenpflaster.** Diachylon plaster. [A, 315.]—**B'glättensalbe.** See LEAD *ointment*.—**B'glötte.** See *B'glätte*.—**B'grau.** Steel-gray. [A, 315.]—**B'haltig.** Containing lead.—**B'hydrat.** Lead hydrate. [B.]—**B'hydroxyd.** Lead hydroxide. [B.]—**B'hyperoxyd.** See *Puce-colored oxide of* LEAD.—**B'icht.** Like lead. [A, 315.]—**B'ig.** Containing lead. [A, 315.]—**B'intoxication.** Lead poisoning.—**B'jodid.** Lead iodide. [B.]—**B'jodidsalbe.** See *Unguentum* PLUMBI *iodidi*.—**B'jodür.** Lead iodide.—**B'jodürpflaster.** See *Emplastrum* PLUMBI *iodidi*.—**B'kamm.** A lead comb. [Bernatzik (A, 319).]—**B'kolik.** Lead colic. [L, 46.]—**B'könig.** Regulus of lead. [A, 315.]—**B'krankheit.** Chronic lead poisoning.—**B'kraut.** The botanical genus *Plumbago*. [A, 315.]—**B'krystall.** Potash glass containing lead. [B, 270.]—**B'lähmung.** Paralysis due to lead poisoning. [L, 30.]—**B'liniment.** See *Linimentum* PLUMBI *subacetatis*.—**B'mercaptid.** See LEAD *mercaptide*.—**B'methyl.** See LEAD *methyl*.—**B'milch.** Lead water ; a solution of lead acetate in water. [A, 315.]—**B'molybdat.** Lead molybdate. [B, 270.]—**B'mulm.** Friable galena. [A, 315.]—**B'niederschlag.** Magistery of lead, a precipitate of lead. [A, 315.]—**B'nitrat.** Lead nitrate. [B, 270.]—**B'ocher.** Red oxide of lead. [A, 315.]—**B'öl.** See *Balsamum* SATURNI.—**B'oxybromür.** Lead oxybromide. [B.]—**B'oxychlorür.** Lead oxychloride. [B.]—**B'oxyd.** Lead oxide. (See under LEAD.) In the older system of chemical nomenclature, according to which the salts of lead were regarded as compounds of acids with the oxide of lead, the German names of plumbic salts were compounded of this word and an adjective denoting the acid. In such compound names, B. is now generally substituted for B'oxyd. [B.]—**B'oxyjodür.** Lead oxyiodide. [B.]—**B'perchlorür.** Lead perchloride. [B.]—**B'peroxyd.** Lead peroxide. [B.]—**B'pflaster.** See *Emplastrum* PLUMBI *carbonatis*.—**B'phosphat.** Lead phosphate. [B, 270.]—**B'platinochlorür.** Lead platinichloride. [B.]—**B'protoxyd.** Lead protoxide. [B.]—**B'rahm.** Lead citrate. [A, 315.]—**B'rost.** See *White* LEAD.—**B'roth.** See *Red* LEAD.—**B'salbe.** See *Ceratum* PLUMBI *subacetatis*.—**B'salpeter.** Lead nitrate. [B.]—**B'salz.** A salt of lead.—[L, 80.]—**B'saum des Zahnfleisches.** The bluish-black discoloration of the gums seen in cases of chronic lead poisoning. [L. Lewin (A, 319).]—**B'säure.** Plumbic acid. [B, 270.]—**B'saures B.** Lead plumbate. [B.]—**B'schaum.** See *B'asche*.—**B'selenid.** Lead selenide. [A, 315.]—**B'sesquioxyd.** Lead sesquioxide. [B, 48.]—**B'silicat.** Lead silicate. [B, 270.]—**B'subacetat.** Lead subacetate. [B.]—**B'suboxyd.** Lead suboxide. [B.]—**B'sulfat.** Lead sulphate. [B, 270.]—**B'sulfid.** Lead sulphide. [A, 315.]—**B'sulfocacodylat.** Lead thiocacodylate. [B.]—**B'sulfochlorid.** Lead thlochloride. [B.]—**B'tannat.** Lead tannate. [B.]—**B'tetramethyl.** See PLUMBTETRAMETHYL.—**B'teträthyl.** See PLUMBTETRETHYL.—**B'tetroxyd.** Lead tetroxide. [B.]—**B'trimethyl.** Lead trimethyl. [B.]—**B'überoxyd.** Lead peroxide. [B.]—**B'vergiftung.** Lead poisoning. [L. 30.]—**B'vitriol.** Lead sulphate. [B.]—**B'wasser.** See *Liquor* PLUMBI *subacetatis dilutus*.—**B'weiss.** See *White* LEAD.—**B'weisspflaster.** See *Emplastrum* CERUSSÆ.—**B'weisssalbe.** See *Unguentum* PLUMBI *carbonatis*.—**B'wurz.** See the major list.—**B'zinnober.** Minium. [B, 270.]—**B'zucker.** Sugar of lead. [B.] See LEAD *subacetate*.—**Borsaures B.** Lead borate. [B.]—**Bromb'.** Lead bromide. [B.]—**Chlorb'.** Lead chloride. [B.]—**Chromsaures B.** Lead chromate. [B.]—**Cyanb'.** Lead cyanide. [B.]—**Cyanürsaures B.** Lead cyanurate (or tricyanate). [B.]—**Essigsaures B.** Lead acetate. [B.]—**Falsches B.** Graphite. [B, 180.]—**Ferridcyanb'.** Lead ferricyanide. [B.]—**Ferrocyanb'.** Lead ferrocyanide. [B.]—**Gerbsaures B.** Lead tannate. [B.]—**Glycocholsaures B.** Lead glycocholate. [B.]—**Gummisaures B.** Lead gummate. [B.]—**Hartb'.** See *Hard* LEAD.—**Jodb'.** Lead iodide. [B.]—**Kieselsaures B.** Lead silicate. [B.]—**Kohlensaures B.** Lead carbonate. [B.]—**Metaborsaures B.** Lead metaborate. [B.]—**Metaphosphorsaures B.** Lead metaphosphate. [B.]—**Metarsenigsaures B.** Lead metarsenite. [B.]—**Milchsaures B.** Lead lactate. [B.]—**Molybdänsaures B.** Lead molybdate. [B.]—**Orthophosphorsaures B.** Lead orthophosphate. [B.] See LEAD *phosphate*.—**Phosphorsaures B.** Lead phosphate. [B.]—**Pyroarsensaures B.** Lead pyroarsenate. [B.]—**Pyroborsaures B.** Lead pyroborate. [B.]—**Pyrophosphorsaures B.** Lead pyrophosphate. [B.]—**Pyrothioarsensaures B.** Lead pyrothioarsenate. [B.]—**Reissb'.** See *Black* LEAD.—**Salpetersaures B.** Lead nitrate. [B.]—**Schwarzes B'weiss.** Graphite. [B, 180.]—**Schwefelantimonsaures B.** Lead thioantimonate. [B.]—**Schwefelarsensaures B.** Lead thioarsenate. [B.]—**Schwefelb'.** Lead sulphide. [B.]—**Schwefelcyanb'.** Lead thiocyanate. [B.]—**Schwefelsaures B.** Lead sulphate. [B.]—**Thioantimonsaures B.** Lead thioantimonate. [B.]—**Thioarsensaures B.** Lead thioarsenate. [B.]—**Thiocacodylsaures B.** Lead thiocacodylate. [B.]—**Thiocyansaures B.** Lead thiocyanate. [B.]—**Vanadinsaures B.** Lead vanadate. [B.]—**Weinsaures B.** Lead tartrate. [B.]—**Wolframsaures B.** Lead tungstate. [B.]—**Zuckersaures B.** Lead saccharate. [B.]—**Zusammengesetzte B'stuhlzäpfchen.** See *Suppositoria* PLUMBI *composita*.

BLEIBEND (Ger.), adj. Blib'e^{2}nd. In botany, persistent. [B.]

BLEICH (Ger.), adj. Blich^2. Pale, sallow. [L, 46.]—**B'e.** Pallor. [L, 46.]—**B'flüssigkeit.** See *Liquor* SODÆ *chloratæ*.—**B'heit.** Pallor. [L, 80.]—**B'kalk, B'pulver.** Bleaching lime, chlorinated lime. [B.]—**B'sucht.** Chlorosis. [H. Eichhorst (A, 319).]—**B'süchtig.** Chlorotic. [L, 46.]—**B'ung.** Bleaching. [L, 80.]

BLEICHBRUNNEN (Ger.), n. Blich^2'brun-ne^{2}n. See DÜRKHEIM.

BLEIERN (Ger.), adj. Bli'e^{2}rn. Saturnine. [A, 315.]

BLEIH (Ger.), n. Bli. The *Cyprinus Brama*. [B, 180.]

BLEIME (Fr.), n. Ble^{2}m. A bruise of a horse's foot, followed by extravasation of blood and suppuration. [L, 41.]

BLEIWURZ (Ger.), n. Bli'vurtz. The genus *Plumbago*. [L, 80.]—**Ceylonische B.** The *Plumbago zeylanica*. [B, 180.]—**Europäische B.** The *Plumbago europæa*. [B, 180.]—**Klimmende B.** The *Plumbago scandens*. [B, 180.]—**Rosenrothe B.** The *Plumbago rosea*. [B, 180.]

BLEMA (Lat.), n. n. Ble(bla)'ma^3. Gen., *blem'atos* (*-tis*). Gr., βλῆμα. 1. A wound. [Herodotus (A, 311).] 2. Food. [A, 325.]

BLENA (Lat.), n. f. Ble(ble^2)'na^3. Gr., βλένα. See Blenna.

BLENANGIAIRRHÉE [Piorry] (Fr.), n. Bla^{3}n-a^{3}n^2-zhi^2-a^3-i^{2}r-ra. Simple catarrh of the air-passages. [L, 82.]

BENANGIBROMORRHÉE [Piorry] (Fr.), n. Bla^{3}n-a^{3}n^2-zhi^2-brom-o^{2}r-ra. An excessive discharge of mucus from the mucous membrane of the alimentary canal. [L, 82.]

BLENANGIURRHÉE [Piorry] (Fr.), n. Bla^{3}n-a^{3}n^2-zhi^2-u^{6}r-ra. Blennorrhœa of the urinary passages. [L, 82.]

BLENCYSTORRHÉE (Fr.), **BLENCYSTURRHÉE** [Piorry] (Fr.), n's. Bla^{3}n-si^{2}st-o^{2}r-ra, -u^{6}r-ra. Blennorrhœa of the urinary bladder. [E; L, 82.]

BLENDBAUM (Ger.), n. Ble^{2}nd'ba^3-um. See Blende*baum*.

BLENDE, n. Ble^{2}nd. Fr., *blende*. Ger., *Blende*. A popular name for various native metallic sulphur compounds, especially native zinc sulphide. [B, 180.]—**Antimony b.** See Antimony *oxysulphide*.—**B'baum** (Ger.). The *Excœcaria agallocha*. [B, 180.]—**B. charbonneuse** (Fr.). A variety of anthracite. [B, 38.]—**B'haut** (Ger.). The iris. [A, 315.]—**Copper b.** See Copper *sulphide*.—**Germain's b.** See Bismuth.—**Manganese b.** See Manganum *sulphide*.—**Silver b.** See Silver *sulphide*.

BLENDLING (Ger.), n. Ble^{2}nd'li^{2}ng. In botany, a hybrid. [B, 35.]

BLENDOUS, adj. Ble^{2}nd'u^{3}s. Ger., *blendig*. Containing blende. [L, 56.]

BLENDUNG (Ger.), n. Ble^{2}nd'ung. In microscopy, a diaphragm for regulating the access of light. [B.]

BLENENTÉRIES [Piorry] (Fr.), n. pl. Bla^{3}n-a^{3}n^2-ta-re. Affections of the intestinal mucous membrane. [L, 82.]

BLENGASTRIES [Piorry] (Fr.), n. pl. Bla^{3}n^2-ga^{3}s-tre. Affections of the gastric mucous membrane. [L, 82.]

BLENMÉTRORRHÉE [Piorry] (Fr.), n. Bla^{3}n^2-ma-tro^{2}r-ra. A mucous discharge from the uterus. [L, 50.]

BLENNA (Lat.), n. f. Ble^{2}n'na^3. Gr., βλέννα, βλαῖννα, πλέννα. Mucus. [A, 322.]

BLENNADENITIS (Lat.), n. f. Ble^{2}n-na^{2}d(na^{3}d)-e^{2}n-i(e)'ti^{2}s. Gen., *blennadenit'idis*. From βλέννα, mucus, and ἀδήν, a gland. Fr., *blennadénite*. Ger., *Schleimdrüsenentzündung*. An inflammation of mucous glands. [L, 55.]

BLENNAZEMIA (Lat.), n. f. Ble^{2}n-na^{2}z(na^{3}z)-e(a)'mi^2-a^3. See Blennozemia.

BLENNELYTRIA (Lat.), n. f. Ble^{2}n-ne^{2}l-i^{2}t(u^{6}t)'ri^2-a^3. From βλέννα, mucus, and ἔλυτρον, the vagina. Fr., *blennélytrie* [Alibert]. Vaginal catarrh. [A, 385; L, 43.]

BLENNEMESIS (Lat.), n. f. Ble^{2}n-ne^{2}m'e^{2}s-i^{2}s. Gen., *blenneme'seos* (*-nem'esis*). From βλέννα, mucus, and ἔμεσις, vomiting. Fr., *blennémèse*. Ger., *Schleimbrechen*. Vomiting of mucus. [L, 81.]

BLENNEMETICUS (Lat.), adj. Ble^{2}n-ne^{2}m-e^{2}t'i^{2}k-u^{3}s(u^{4}s). From βλέννα, mucus, and ἐμετικός, emetic. Pertaining to blennemesis. [L, 50.]

BLENNENTERIA (Lat.), n. f. Ble^{2}n-ne^{2}n-te(te^2)'ri^2-a^3. From βλέννα, mucus, and ἔντερον, an intestine. Fr., *blennentérie* [Alibert]. Ger., *Darmschleimfluss*, *Darmblennorrhöe*. Mucous or purulent diarrhœa. [A, 322, 385; L, 43.]

BLENNENTERICUS (Lat.), adj. Ble^{2}n-ne^{2}n-te^{2}r'i^{2}k-u^{3}s(u^{4}s). Pertaining to blennenteria. [L, 50.]

BLENNENTERITIS (Lat.), n. f. Ble^{2}n-ne^{2}n-te^{2}r-i(e)'ti^{2}s. Gen., *blennenterit'idis*. Fr., *blennentérite*. 1. Inflammation of the intestinal mucous membrane. 2. Intestinal inflammation with excessive secretion of mucus. [L, 50.]

BLENNIDÆ, BLENNIIDÆ (Lat.), n's f. pl. Ble^{2}n'ni^{2}d-e(a^3-e^2), -ni(ni^2)'i^{2}d-e(a^3-e^2). From βλέννος, the blenny. Fr., *blennioïdes*. A family of the *Acanthopterygii*. [L, 207.]

BLENNISTHMIA (Lat.), n. f. Ble^{2}n-ni^{2}sth'mi^2-a^3. From βλέννα, mucus, and ἰσθμός, a narrow passage. Fr., *blennisthmie* [Alibert]. Ger., *Schleimkrankheit* (oder *Schleimhautkrankheit*) *des Rachens*. Pharyngeal catarrh. [A, 322, 385; E.]

BLENNOCÈLE (Fr.), n. Bla^{3}n-no-se^{2}l. From βλέννα, mucus, and κήλη, a tumor. A term proposed by P. Aubert for gonorrhœal epididymitis. ["Lyon méd.," Nov. 15, 1885, p. 357.]

BLENNOCHESIA, BLENNOCHEZIA (Lat.), n's f. Ble^{2}n-no(no^2)-ke(ch^{2}e^2)'zi^2(si^2)-a^3, -zi^2-a^3. From βλέννα, mucus, and χέζειν, or χεσεῖν, to evacuate the bowels. Fr., *blennochésie*. Ger., *Darmschleimfluss*. Mucous diarrhœa. [L, 50, 116.]

BLENNOCHEZICUS (Lat.), adj. Ble^{2}n-no(no^2)-ke^{2}z(ch^{2}e^{2}z)'i^{2}k-u^{3}s(u^{4}s). Pertaining to blennochezia. [L, 50.]

BLENNOCHOES, n. An old name for tobacco. [L, 105.]

BLENNOCYSTITIS (Lat.), n. f. Ble^{2}n-no(no^2)-si^{2}st(ku^{6}st)-i(e)'ti^{2}s. Gen., *blennocystit'idis*. From βλέννα, mucus, and κύστις, the bladder. Fr., *blennocystite*. Catarrh of the urinary bladder. [A, 322, 385; L, 44.]

BLENNODES (Lat.), adj. Ble^{2}n-no'dez(das). See Blennoid.

BLENNOEMESIS (Lat.), n. f. Ble^{2}n-no(no^2)-e^{2}m'e^{2}s-i^{2}s. See Blennemesis.

BLENNOGENIC, BLENNOGENOUS, adj's. Ble^{2}n-no-je^{2}n'-i^{2}k, -no^{2}j'e^{2}n-u^{3}s. Lat., *blennogenes* (from βλέννα, mucus, and γεννᾶν, to generate). Fr., *blennogène*. Ger., *schleimerzeugend*. Secreting mucus, muciparous. [A, 322; L, 41, 81, 107.]

BLENNOHYMENITIS (Lat.), n. f. Ble^{2}n-no(no^2)-hi(hu^6)-me^{2}n-i(e)'ti^{2}s. See Blennymenitis.

BLENNOHYMENODES (Lat.), adj. Ble^{2}n-no(no^2)-hi(hu^6)-me^{2}n-o'dez(das). See Blennymenodes.

BLENNOID, adj. Ble^{2}n'noid. Gr., βλεννώδης (from βλέννα, mucus, and εἶδος, resemblance). Lat., *blennodes*, *blennoides*, *blennoideus*. Fr., *blennode*. Ger., *schleimartig*. Mucus-like, myxoid. [L, 50.]

BLENNOMA (Lat.), n. n. Ble^{2}n-no'ma^3. Gen., *blennom'atos* (*-tis*). From βλέννα, mucus. Fr., *blennome*. Ger., *Schleimgewächs*. A mucous outgrowth (polypus). [A, 322; L, 81.]

BLENNOMETRITIS (Lat.), n. f. Ble^{2}n-no(no^2)-me^{2}t(mat)-ri(re)'ti^{2}s. Gen., *blennometrit'idis*. From βλέννα, mucus, and μήτρα, the womb. Fr., *blennométrite*. See Endometritis.

BLENNOMETRORRHŒA (Lat.), n. f. Ble^{2}n-no(no^2)-me^{2}t-(mat)-ro^{2}r-re'(ro^2'e^2)-a. See Metroblennorrhœa.

BLENNOPHLOGISMA, BLENNOPHLOGOSIS (Lat.), n's n. and f. Ble^{2}n-no(no^2)-flo(flo^2)-ji^{2}z(gi^{2}s)'ma^3, -go'si^{2}s. Gen., *blennophlogis'matos* (*-tis*), *-go'seos* (*-sis*). From βλέννα, mucus, and φλόγισμα, a burn, or φλόγωσις, inflammation. Inflammation of a mucous membrane. [L, 50, 81.]

BLENNOPHTHALMIA (Lat.), n. f. Ble^{2}n-no^{2}p(no^{2}f)-tha^{2}l-(tha^{3}l)'mi^2-a^3. From βλέννα, mucus, and ὀφθαλμία (see Ophthalmia). Fr., *blennophthalmie*. Ger., *schleimichte Augenentzündung*. *Augentripper*. It., *blennoftalmia*. Sp., *blenoftalmia*. Mucous or purulent inflammation of the conjunctiva. [L, 50.]

BLENNOPHTHALMICUS (Lat.), adj. Ble^{2}n-no^{2}p(no^{2}f) tha^{2}l-(tha^{3}l)'mi^{2}k-u^{3}s(u^{4}s). Fr., *blennophthalmique*. Pertaining to blennophthalmia. [A, 322; L, 81.]

BLENNOPTYSIS (Lat.), n. f. Ble^{2}n-no^{2}p'ti^{2}s(tu^{6}s)-i^{2}s. Gen., *blennoptys'eos* (*-op'tysis*). From βλέννα, mucus, and πτύσις (from πτύειν), spitting. Fr., *blennoptysie*. Ger., *Schleimspeien*, *Schleimhusten*. An expectoration or spitting of mucus; also bronchial or pharyngeal catarrh. [L, 50.]

BLENNOPYRIA (Lat.), n. f. Ble^{2}n-no(no^2)-pi^{2}r(pu^{6}r)'i^2-a^3. From βλέννα, mucus, and πῦρ, feverish heat. Fr., *blennopyrie*. Ger., *Schleimfieber*. See *Mucous* fever.

BLENNORRHAGIA (Lat.), n. f. Ble^{2}n-no^{2}r-ra(ra^3)'ji^2(gi^2)-a^3. From βλέννα, mucus, and ῥήγνυσθαι, to break forth. Fr., *blennorrhagie*. Ger., *Schleimfluss* (1st def.), *Tripper* (2d def.). It., *blennorragia*. Sp., *blenorragia*. 1. A very copious mucous discharge. 2. Gonorrhœa. [A, 322.]—**B. analis.** Fr., *blennorrhagie du rectum*. Ger., *Aftertripper*. B. of the anus or rectum. [L, 44.]—**B. arthritica.** Fr., *blennorrhagie arthritique* (ou *goutteuse*). An affection resembling gonorrhœa, but attributed to gout. [A, 385.]—**B. balani.** Fr., *blennorrhagie du gland*. See Balanitis.—**B. benigna.** See Blennorrhœa *benigna*.—**B. catarrhalis.** Fr., *blennorrhagie catarrhale*. A simple as opposed to a specific b. [A, 385.]—**B. chronica.** Fr., *blennorrhagie chronique*. Gleet (*q. v.*). [G.]—**B. herpetica.** Fr., *blennorrhagie herpétique*. A b. supposed to depend on the herpetic diathesis. [A, 385.]—**B. notha.** Fr., *fausse blennorrhagie*. Balanitis. [L, 41.]—**B. ocularis.** See *Gonorrhœal* ophthalmia.—**B. rheumatica.** Fr., *blennorrhagie rhumatique*. B. supposed to be due to rheumatism. [A, 385.]—**B. sanguinea.** Gonorrhœa in which the discharge is bloody. [L, 44.]—**B. scorbutica.** Fr., *blennorrhagie scorbutique*. B. supposed to be due to scurvy. [A, 385.]—**B. spuria.** See *B. notha*.—**B. syphilitica.** Fr., *blennorrhagie syphilitique*. Gonorrhœa complicated with chancre, or contracted at the same time with chancre. [A, 385.]—**B. urethralis.** Fr., *blennorrhagie uréthrale*. Gonorrhœa limited to the urethra. [L, 44.]—**B. uterina.** Fr., *blennorrhagie de l'utérus*. Gonorrhœa of the uterus. [L, 44.]—**B. vaginalis.** Fr., *blennorrhagie du vagin*. Ger., *Vaginaltripper*. Gonorrhœa of the vagina. [L, 44.]—**Pulmonary b.** Fr., *blennorrhagie pulmonaire*. See Bronchorrhœa.—**Vulvar b.** Fr., *blennorrhagie vulvaire*. Ger., *Vulvartripper*. Gonorrhœa of the mucous membrane of the vulva.

BLENNORRHAGIC, adj. Ble^{2}n-no^{2}r-ra^{2}j'i^{2}k. Lat., *blennorrhagicus*. Fr., *blennorrhagique*. Ger., *tripperartig*. It., *blennorragico*. Sp., *blenorrágico*. Pertaining to blennorrhagia or gonorrhœa. [G.]

BLENNORRHAGIE (Fr.), n. Bla^{3}n-no^{2}r-ra^3-zhe. See Blennorrhagia and Gonorrhœa.—**B. à répétition.** A gonorrhœa which recurs without a new infection, as the result of indiscretion in diet, etc. [L, 49.]—**B. arthritique.** See Blennorrhagia *arthritica*.—**B. balano-préputiale.** Gonorrhœal balano-posthitis. [L.]—**B. cordée.** See Chordee.—**B. du gland.** Gonorrhœal balanitis. [L, 41.]—**B. goutteuse.** See Blennorrhagia *arthritica*.—**B. herpétique.** See Blennorrhagia *herpetica*.—**B. partielle.** Gonorrhœa affecting only a portion of the urethra. [L, 88.]—**B. pulmonaire.** See Bronchorrhœa.—**B. rhumatique.** See Blennorrhagia *rheumatica*.—**B. simple.** See Blennorrhagia *catarrhalis*.—**B. syphilitique.** See Blennorrhagia *syphilitica*.—**B. uréthrale.** See Blennorrhagia *urethralis*.—**B. uréthro-vaginale.** Gonorrhœa of both the urethra and the vagina. [L, 41.]—**B. virulente.** See Gonorrhœa *virulenta*.—**Fausse b.** See Blennorrhagia *notha*.

BLENNORRHÉE (Fr.), n. Bla^{3}n-no^{2}r-ra. See Blennorrhœa.—**B. atmosphérique.** See Blennorrhœa *atmosphærica*.—**B. conjonctivale, B. de la conjonctive.** See Blennorrhœa *conjunctivæ*.—**B. des paupières.** See Blepharo-blennorrhœa.—**B. du gland.** Gonorrhœal balanitis. [L.]—**Blépharo-b.** See the major list.

BLENNORRHÉIQUE (Fr.), adj. Bla^{3}n-no^{2}r-ra-ek. See Blennorrhœal.

BLENNORRHINIA (Lat.), n. f. Ble^{2}n-no^{2}r-ri^{2}n'i^2-a^3. From βλέννα, mucus, and ῥίς, the nose. Fr., *blennorrhinie* [Alibert]. Ger., *Nasenschleimfluss*. See Coryza.

BLENNORRHÖE (Ger.), n. Ble^{2}n-no^{2}r-ru^5'e^2. See Blennorrhœa.—**Alveolarb'.** See *Alveolar* pyorrhœa.—**Atmosphärische**

B. See BLENNORRHŒA *atmosphœrica*.—**Augenb'.** See *Purulent* OPHTHALMIA.—**Augenb' der Neugeborenen.** See OPHTHALMIA *neonatorum*.—**Bindehautb'.** See BLENNORRHŒA *conjunctivæ*.

BLENNORRHŒA (Lat.), n. f. Ble^{2}n-no^{2}r-re'(ro^2'e^2)-a^3. From βλέννα, mucus, and ῥεῖν, to flow. Fr., *blennorrhée*. Ger., *Blennorrhöe, Schleimfluss* (1st def.). It., *blennorrea*. Sp., *blenorrea*. 1. An excessive secretion and discharge of mucus. 2. Gleet (*q. v.*). [G.]—**Alveolar b.** Ger., *Alveolarblennorrhöe*. See *Alveolar* PYORRHŒA.—**B. atmosphærica.** Fr., *blennorrhée atmosphérique*. Ger., *atmosphärische Blennorrhöe*. An old term for epidemic purulent inflammation of the conjunctiva, because it was supposed to be due to some atmospheric influence. [F.]—**B. benigna.** An old term for leucorrhœa. [A, 66.]—**B. chronica.** See GLEET.—**B. ciliaris.** Conjunctival inflammation confined chiefly to the lids and the glands opening on the ciliary margin. [F.]—**B. conjunctivæ.** Fr., *blennorrhée conjonctivale* (ou *de la conjonctive*). Ger., *Bindehautblennorrhöe*. Purulent inflammation of the conjunctiva. [F.]—**B. intestini recti.** See PROCTORRHŒA.—**B. nasalis.** See CORYZA.—**B. neonatorum.** See OPHTHALMIA *neonatorum*.—**B. oculi.** See *Purulent* OPHTHALMIA.—**B. oculi gonorrhoica.** See *Gonorrhœal* OPHTHALMIA.—**B. oculi neonatorum.** See OPHTHALMIA *neonatorum*.—**B. oculi purulenta.** See *Purulent* OPHTHALMIA.—**B. purulenta infantum.** See OPHTHALMIA *neonatorum*.—**B. of the lacrymal sac.** Ger., *Blennorrhöe des Thränensacks*. Purulent inflammation of the lacrymal sac. [F.]—**B. simplex.** See BLENNORRHAGIA *catarrhalis*.—**B. sporadica.** Purulent ophthalmia occurring sporadically. [F.]—**B. Stoerkii.** Fr., *blennorrhée de Stœrk*. Ger., *Störk'sche Blennorrhöe*. A disease described by Stoerk as a chronic b. of that portion of the air-passages extending from the nose to the trachea, characterized by the formation of larger crusts within the larynx than are formed in other blennorrhœal affections and by the subsequent occurrence of laryngeal stenosis which has been attributed to adhesion of the vocal bands. It is said to be observed mostly in Moldavia, Galicia, and southern Russia. Some regard it as a manifestation of syphilis, and others doubt its existence as a distinct disease. [Krakauer *et al.*, "Bull. méd.," Dec. 7, 1887, p. 1301.]—**B. torpida.** Gleet. [G.]—**B. urethralis.** Gleet.—**B. urinalis.** See CYSTORRHŒA.—**B. venerea.** Gleet.—**B. ventriculi.** See BLENNEMESIS.—**B. vesicæ.** See CYSTORRHŒA.—**Blepharo-b.** See the major list.—**Venereal b.** Gleet.

BLENNORRHŒAL, BLENNORRHOIC, adj's. Ble^{2}n-no^{2}r-re'a^{2}l, -ro'i^{2}k. Lat., *blennorrhoicus, blennorrhœus*. Fr., *blennorrhéique*. Ger., *blennorrhoisch*. It., *blennorroico*. Sp., *blenorreico*. Pertaining to, of the nature of, or caused by, blennorrhœa. [L, 80.]

BLENNORRHOÏDES (Fr.), n. pl. Bla^{3}n-no^{2}r-ro-ed. Diday's term for urethral diseases simulating gonorrhœa and not due to traumatism, including *uréthrorrhée* and *herpétisme uréthral*. [G.]

BLENNORRHOÏQUE (Fr.), **BLENNORRHOISCH** (Ger.), adj's. Bla^{3}n-no^{2}r-ro-ek, ble^{2}n-no^{2}r-ro'i^{2}sh. See BLENNORRHŒAL.

BLENNOS (Lat.), n. m. Ble^{2}n'no^{2}s. Gr., βλέννος. See BLENNA.

BLENNOSIS (Lat.), n. f. Ble^{2}n-no'si^{2}s. Gen., *blenno'seos* (*-sis*). Fr., *blennose*. Ger., *Schleimkrankheit*. Any disease of a mucous membrane. [A, 322; Alibert (A, 385).]

BLENNOSTASIS (Lat.), n. f. Ble^{2}n-no^{2}st'a^3-si^{2}s. Gen., *blennosta'seos* (*-nost'asis*). From βλέννα, mucus, and στάσις (see STASIS). Fr., *blennostase*. The checking, suppression, or stagnation of a mucous secretion. [L, 81.]

BLENNOSTATIQUE (Fr.), adj. Bla^{3}n-no-sta^{3}t-ek. Curative of mucous discharges. [Robert, "Union méd.," Sept. 27, 1885, p. 525.]

BLENNO-STRUMEUX (Fr.), adj. Bla^{3}n-no-stru^6-mu^5. Pertaining to gonorrhœa and to a scrofulous condition (applied by Melchior Robert to the adenitis accompanying gonorrhœa). [L, 88.]

BLENNOTHORAX (Lat.), n. m. Ble^{2}n-no(no^2)-tho'ra^{2}x(ra^{3}x). Gen., *blennothora'cos* (*-cis*). From βλέννα, mucus, and θώραξ, the thorax. Fr., *blennothorax*. Ger., *Schleimbrust*. It., *blennotorace*. An accumulation of mucus in the chest; pulmonary catarrh. [A, 322; Alibert (A, 301).]—**B. acutus.** Ger., *Stickhusten*. Convulsive cough. [L, 50.]—**B. chronicus.** See *Catarrhal* ASTHMA.

BLENNOTORRHŒA (Lat.), n. f. Ble^{2}n-not-o^{2}r-re'(ro^2'e^2)-a^3. From βλέννα, mucus, οὖς, the ear, and ῥεῖν, to flow. Fr., *blennotorrhée*. Ger., *Ohrschleimfluss*. A mucous discharge from the ear; otorrhœa. [A, 322, 385; Alibert (A, 301).]

BLENNOZEMIA (Lat.), n. f. Ble^{2}n-no(no^2)-zem(zam)'i^2-a^3. From βλέννα, mucus, and ζημία, loss. See BLENNORRHŒA.

BLENNURETHRIA (Lat.), n. f. Ble^{2}n-nu^{2}r(nur)-e(a)'thri^2-a^3. From βλέννα, mucus, and οὐρήθρα, the urethra. Fr., *blennuréthrie*. Urethral blennorrhœa. [A, 322, 385; Alibert (A, 301).]—**B. acuta.** Urethral gonorrhœa. [L, 50.]—**B. chronica.** Gleet. [L, 50.]—**B. inflammatoria, B. venerea.** See *B. acuta*.

BLENNURIA (Lat.), n. f. Ble^{2}n-nu^2(nu)'ri^2-a^3. From βλέννα, mucus, and οὐρεῖν, to pass urine. Fr., *blennurie*. Ger., *Schleimharnen*. It., *blennuria*. A condition in which the urine contains mucus. [A, 322, 385; Alibert (A, 301).]

BLENNURICUS (Lat.), adj. Ble^{2}n-nu^2(nu)'ri^{2}k-u^{3}s(u^{4}s). Pertaining to or affected with blennuria. [A, 322; L, 81.]

BLENNUS (Lat.), n. m. Ble^{2}n'nu^{3}s(nu^{4}s). Gr., βλέννος. See BLENNA.

BLENNYMEN (Lat.), n. m. Ble^{2}n-ni(nu^6)'me^{2}n(man). Gen., *blennym'enos* (*-nis*). From βλέννα, mucus, and ὑμήν, a membrane. Ger., *Schleimhaut*. A mucous membrane. [L, 50.]

BLENNYMENERYSIPELAS (Lat.), n. n. Ble^{2}n-ni(nu^6)''-me^{2}n-e^{2}r-i^2(u^6)-si^{2}p'e^{2}l-a^{2}s(a^{3}s). Gen., *blennymenerysipel'atos* (*-tis*). For deriv., see BLENNYMEN and ERYSIPELAS. Erysipelas affecting a mucous membrane. [A, 322; E.]

BLENNYMENITIS (Lat.), n. f. Ble^{2}n-ni(nu^6)-me^{2}n-i(e)'ti^{2}s. Gen., *blennymenit'idis*. Inflammation of a mucous membrane. [L, 50.]

BLENNYMENODES (Lat.), adj. Ble^{2}n-ni(nu^6)-me^{2}n-o'dez(das). From βλέννα, mucus, ὑμήν, a membrane, and εἶδος, resemblance. Ger., *schleimhautähnlich*. Resembling a mucous membrane; as a n. (*pseudoplasma* understood), a neoplasm resembling mucous membrane. [L, 50, 81.]

BLEPHARA (Lat.), n. f. Ble^{2}f'a^3-ra^3. Fr., *bléphare*. A toothed or fringed process on the peristome of a moss. [B, 19.] As a neut. pl., the eyelids. See BLEPHARON.

BLEPHARADENES (Lat.), n. m. pl. Ble^{2}f-a^{3}r-a^{2}d(a^{3}d)'e^{2}n-ez(e^{2}s). From βλέφαρον, the eyelid, and ἀδήν, a gland. Ger., *Augenliderdrüsen*. See *Meibomian* GLANDS.

BLEPHARADENITIS (Lat.), n. f. Ble^{2}f-a^{3}r-a^{2}d(a^{3}d)-e^{2}n-i(e)'ti^{2}s. Gen., *blepharadenit'idis*. Fr., *blépharadénite*. Ger., *Augenliderdrüsenentzündung*. It., *blefaradenite*. A term formerly applied to inflammation of any of the glandular tissues of the lids; now usually restricted to inflammation of the sebaceous glands of the hair follicles and, secondarily, of the follicles themselves. [F.]

BLEPHARAL, adj. Ble^{2}f'a^{2}r-a^{2}l. Fr., *blépharique*. See PALPEBRAL.

BLEPHARANTHRACOSIS (Lat.), n. f. Ble^{2}f-a^{3}r-a^{2}n(a^{3}n)-thra^3-ko'si^{2}s. Gen., *blepharanthraco'seos* (*-sis*). From βλέφαρον, the eyelid, and ἀνθράκωσις (see *Anthracosis*). Fr., *blépharanthracose*. Ger., *Augenliderbrand*. Carbuncle or gangrenous inflammation of the eyelid. [A, 322; F; L, 81.]

BLÉPHARE (Fr.), n. Bla-fa^{3}r. See BLEPHARA.

BLEPHARECCOPEUS (Lat.), n. f. Ble^{2}f-a^{3}r-e^{2}k'ko^{2}p-u^{2}s. Gen., *blephareccop'eos* (*-ec'copis*). From βλέφαρον, the eyelid, and ἐκκοπεύς, a knife for excision. See BLEPHAROPSALIS.

BLEPHARELOSIS (Lat.), n. f. Ble^{2}f-a^{3}r-e^{2}l(al)-o'si^{2}s. Gen., *blepharelo'seos* (*-sis*). From βλέφαρον, the eyelid, and εἱλεῖν, to roll. An old term for ectropion and entropion of the eyelids. [L, 50.]

BLEPHARELOTICUS (Lat.), adj. Ble^{2}f-a^{3}r-e^{2}l(al)-o^{2}t(ot)'-i^{2}k-u^{3}s(u^{4}s). Pertaining to or affected with blepharelosis. [L, 50.]

BLEPHAREMPHYSEMA (Lat.), n. n. Ble^{2}f-a^{3}r-e^{2}m-fi^{2}s-(fu^{6}s)-e(a)'ma^3. Gen., *blepharemphysem'atos* (*-tis*). From βλέφαρον, the eyelid, and ἐμφύσημα (see EMPHYSEMA). Ger., *Augenliderwindgeschwulst*. It., *blefaro-enfisema*. Emphysema of the eyelid. [L, 50.]

BLEPHARHELOSIS (Lat.), n. f. See BLEPHARELOSIS.

BLEPHARICUS (Lat.), adj. Ble^{2}f-a^{2}r(a^{3}r)'i^{2}k-u^{3}s(u^{4}s). Fr., *blépharique*. See PALPEBRAL.

BLEPHARIDES (Lat.), n. f. pl. Ble^{2}f-a^{2}r(a^{3}r)'i^{2}d-ez(e^{2}s). Gr., βλεφαρίδες (pl. of βλεφαρίς). Fr., *blépharides*. Ger., *Augenwimpern*. The eyelashes. [A, 322, 325; F.]

BLEPHARIDOPLASTICA, BLEPHARIDOPLASTICE (Lat.), n's f. Ble^{2}f-a^{2}r(a^{3}r)''i^{2}d-o(o^2)-pla^{2}s(pla^{3}s)'ti^2-ka^3, -se(ka). From βλεφαρίς, an eyelash, and πλάσσειν, to form. An obsolete term for any operation on the eyelid designed to give a proper direction to the eyelashes; occasionally used also as a synonym of blepharoplasty (*q. v.*). [F.]

BLÉPHARIQUE (Fr.), adj. Bla-fa^{3}r-ek. See PALPEBRAL.

BLEPHARIS (Lat.), n. f. Ble^{2}f'a^{3}r-i^{2}s. Gen., *blephar'idos* (*-dis*). Gr., βλεφαρίς. Fr., *blépharide*. Ger., *Augenwimper*. An eyelash. [L, 41, 80.]

BLEPHARISMUS (Lat.), n. m. Ble^{2}f-a^{3}r-i^{2}z(i^{2}s)'mu^{3}s(mu^{4}s). From βλεφαρίζειν, to wink. Fr., *blépharisme, clignotement*. Ger., *Blinzeln*. It., *nictazione*. Sp., *nictación*. Nictation; rapid involuntary winking. [F.]

BLÉPHARITE (Fr.), n. Bla-fa^{3}r-et. See BLEPHARITIS.—**B. angulaire.** See BLEPHARITIS *intermarginalis*.—**B. ciliaire.** See BLEPHARITIS *simplex*.—**B. diphthéritique.** A form of blepharitis in which a false membrane forms on the margins of the lids. [L, 41.]—**B. érysipélateuse.** See BLEPHARITIS *erysipelatosa*.—**B. furfuracée.** See BLEPHARITIS *ciliaris*.—**B. furonculeuse.** See HORDEOLUM.—**B. générale.** A blepharitis involving the entire substance of the lid. [L, 41.]—**B. glanduleuse.** See BLEPHARITIS *glandulosa*.—**B. glandulo-ciliaire.** See BLEPHARITIS *simplex*.—**B. granuleuse.** See TRACHOMA.—**B. lymphatique.** See BLEPHARITIS *simplex*.—**B. marginale.** See BLEPHARITIS *intermarginalis*.—**B. muqueuse.** Inflammation of the palpebral conjunctiva. [L, 41.]—**B. muqueuse granuleuse.** See TRACHOMA.—**B. scrofuleuse, B. tarsienne.** See BLEPHARITIS *simplex*.

BLEPHARITICUS (Lat.), adj. Ble^{2}f-a^{3}r-i^{2}t'i^{2}k-u^{3}s(u^{4}s). Pertaining to or affected with blepharitis. [L, 50.]

BLEPHARITIS (Lat.), n. f. Ble^{2}f-a^{3}r-i(e)'ti^{2}s. Gen., *blepharit'idis*. Gr., βλεφαρῖτις. Fr., *blépharite*. Ger., *Augenliderentzündung*. It., *blefarite*. Sp., *blefaritis*. Inflammation of the eyelid. [F.]—**B. angularis.** Fr., *blépharite angulaire*. Ger., *Augenlidwinkelentzündung*. It., *blefarite angolare*. Sp., *blefaritis angular*. See *B. intermarginalis*.—**B. ciliaris.** Fr., *blépharite ciliaire*. Ger., *Randblepharitis*. It., *blefarite ciliare*. Sp., *blefaritis ciliar*. See *B. simplex*.—**B. erysipelatosa.** Fr., *blépharite érysipélateuse*. Ger., *erysipelatöse Augenliderentzündung*. It., *blefarite erisipelatosa*. Sp., *blefaritis erisipelatosa*. Erysipelas of the eyelids. [F.]—**B. gangrænosa.** See BLEPHARANTHRACOSIS.—**B. glandularis, B. glandulosa.** Fr., *blépharite glandulaire* (ou *glanduleuse*). Ger., *glandulöse Augenliderentzündung, Augenliderdrüsenentzündung*. It., *blefarite ghiandolare*. Sp., *blefaritis glandular*. Inflammation of the Meibomian glands; chalazion. [F.]—**B. intermarginalis.** Fr., *blépharite marginale*. Ger., *Augenlidränderentzündung*. It., *blefarite marginale*. Sp., *blefaritis marginal*. Irritation and excoriation of the intermarginal portion of the lids, produced by the continual lacrymation and muco-purulent secretion of simple inflammation of the conjunctiva. [F.]—**B. interna.** Inflammation of the palpebral conjunctiva.—**B. lymphatica.** Fr., *blépharite lymphatique*. See *B. simplex*.—**B. mar-**

ginalis. See *B. intermarginalis.* — **B. phlegmonosa.** Ger., *Augenliderzellgewebsentzündung.* Inflammation of the cellular tissue of the lid. [L.]—**B. scrofulosa.** Fr., *blépharite scrofuleuse.* Ger., *skrophulöse Augenliderentzündung.* See *B. simplex.*—**B. simplex.** Fr., *blépharite simple.* Ger., *einfache Augenliderentzündung.* It., *blefarite semplice.* Sp., *blefaritis simple.* A mild inflammation of the borders of the eyelids, in which the ciliary margins are swollen and the skin is reddened, moist, and covered more or less closely with yellowish crusts, so that the eyelashes are glued together. [F.]—**B. squamosa.** B. with the formation of scabs or scales. [L, 57.]—**B. ulcerosa.** Fr., *blépharite ulcéreuse.* Ger., *Geschwür der Lidränder.* It., *blefarite ulcerosa.* Sp., *blefaritis ulcerosa.* A violent form of b. simplex, in which pustules form on the edge of the lid, at the mouths of the hair follicles. The crusts are continuous and, when removed, leave a raw and bleeding surface with ulcerated spots. [F.]—**B. variolosa.** Fr., *blépharite varioleuse.* Ger., *variolöse Augenliderentzündung.* It., *blefarite vajuolosa.* Sp., *blefaritis viruelosa.* Inflammation of the eyelids, mainly of the skin and subcutaneous tissue, occurring in the course of variola. [F.]—**Randb'** (Ger.). See *B. simplex.*

BLEPHARO-ADENITIS (Lat.), n. f. Ble2f″a3r-o(o2)-a2d(a3d)-e2n-i(e)′ti2s. See BLEPHARADENITIS.

BLEPHARO-ADENOMA (Lat.), n. n. Ble2f″a3r-o(o2)-a2d-(a3d)-e2n-o′ma3. Gen., *blefaro-adenom′atos (-tis).* For deriv., see BLEPHARON and ADENOMA. Fr., *adénome des paupières.* Ger., *Augenlidadenom.* It., *adenoma delle palpebre.* Sp., *adenoma de los parpados.* A rare form of tumor of the eyelid, first described by von Graefe. It occurs on the ciliary margin, and produces great irritation and thickening of the lid, ulceration, and fistulous openings. Microscopically, it consists of a new formation of epithelial tubes anastomosing with each other. It is distinct from adenoma of the Meibomian glands. ["Arch. f. Ophthal.," x, 1 (F.).]

BLEPHARO-ATHEROMA (Lat.), n. n. Ble2f″a3r-o(o2)-a2th-(a3th)-e2r(ar)-o′ma3. Gen., *blepharo-atherom′atos (-tis).* For deriv., see BLEPHARON and ATHEROMA. A tumor of the lid, of very slow growth, sometimes soft, sometimes hard, firmly attached to the tarsus, the skin being freely movable over it. It has a distinct cyst wall, and is imbedded in the tarsus. Its contents consist of a semi-fluid, gelatinous matter made up of masses of epidermis, fatty detritus, and cholesterin crystals. [F.]

BLEPHARO-BLENNORRHŒA (Lat.), n. f. Ble2f″a3r-o(o2)-ble2n-no2r-re′(ro2′e2)-a3. For deriv., see BLEPHARON and BLENNORRHŒA. Fr., *blépharo-blennorrhée.* Ger., *Augenliderschleimfluss.* It., *blefaro-blennorrea.* See *Purulent* OPHTHALMIA.—**B. gonorrhoica, B. maligna.** See *Gonorrhœal* OPHTHALMIA.—**B. neonatorum.** See OPHTHALMIA *neonatorum.*—**B. urethritica.** See *Gonorrhœal* OPHTHALMIA.

BLEPHARO-CARCINOMA (Lat.), n. n. Ble2f″a3r-o(o2)-ka3r-si2n(ki2n)-o′ma3. Gen., *blepharo-carcinom′atos (-tis).* For deriv., see BLEPHARON and CARCINOMA. Ger., *Augenliderkrebs.* Carcinoma of the eyelid. [L, 50.]

BLEPHARO-CATOCHUS (Lat.), n. m. Ble2f″a3r-o(o2)-ka2t-(ka3t)′o(o2)-ku3s(ch2u4s). From βλέφαρον, the eyelid, and κάτοχος, retentive. See BLEPHAROSTAT.

BLEPHARO-CHROMIDROSIS (Lat.), n. f. Ble2f″a3r-o(o2)-krom(ch2rom)-i2d-ro′si2s. Gen., *blepharo-chromidro′seos (-sis).* From βλέφαρον, the eyelid, χρῶμα, color, and ἱδρώς, sweat. Fr., *blépharo-chromidrose.* "Colored sweat"; a rare affection in which bluish spots of different tints appear on the lids, especially in the cutaneous folds. The coloring matter can be wiped off with a cloth dipped in oil or glycerin, but is renewed after a time. Women are more subject to the disease than men. It always begins on the eyelids, and spreads to other parts of the face. The pigment exists either in epithelial cells or as free granules. [Graefe and Saemisch (F).]

BLEPHARO-CLEISIS (Lat.), n. f. Ble2f″a3r-o(o2)-kli′(kle2-e′)-si2s. From βλέφαρον, the eyelid, and κλεῖσις (= κλῇσις), closure. See ANKYLOBLEPHARON.

BLEPHARO-COLOBOMA (Lat.), n. n. Ble2f″a3r-o(o2)-ko2l-o(o2)-bo′ma3. Gen., *blepharo-colobom′atos (-tis).* Fr., *blépharo-colobome.* See COLOBOMA *palpebræ.*

BLEPHARO-CONJUNCTIVITIS (Lat.), n. f. Ble2f″a3r-o-(o2)-ko2n-ju3n2k(yu4u2k)-ti2-vi(we)′ti2s. Gen., *blepharo-conjunctivit′idis.* Fr., *blépharo-conjonctivite.* Ger., *Augenliderbindehautentzündung.* It., *blefaro-congiuntivite.* See *Palpebral* CONJUNCTIVITIS.

BLEPHARO-DYSCHRŒA (Lat.), n. f. Ble2f″a3r-o(o2)-di2z-(du6s)-kre′(ch2ro2′e2)-a3. From βλέφαρον, the eyelid, and δύσχροια, a bad color. Fr., *décoloration des paupières.* Ger., *Verfärbung der Augenlider.* It., *discolorazione delle palpebre.* Sp., *descoloramiento de los parpados.* An obsolete term for discoloration of the skin of the eyelids from any cause; as used by von Ammon, a nævus of the eyelid. [F.]

BLEPHARŒDEMA (Lat.), n. n. Ble2f-a3r-e2d(o2-e2d)-e(a)′-ma3. Gen., *blepharœdem′atos (-tis).* For deriv., see BLEPHARON and ŒDEMA. Fr., *blépharœdème.* Ger., *Augenliderödem.* It., *blefaro-edema.* Œdema of the eyelids. [F; L, 50, 80.]—**B. aquosum, Watery b.** See *B.*

BLEPHARO-EMPHYSEMA (Lat.), n. n. Ble2f″a3r-o(o2)-e2m-fi2s(fu6s)-e(a)′ma3. See BLEPHAREMPHYSEMA.

BLEPHAROGLOTTIS (Lat.), n. f. Ble2f″a3r-o(o2)-glo2t(glot)′-ti2s. Gen., *blepharoglot′tidis.* From βλεφαρίς, an eyelash, and γλῶττα (= γλῶσσα), the tongue. Fr., *blépharoglotte.* A species-name applied to plants having the lip of the nectary tongue-shaped and provided with hairs. [L, 180.]

BLEPHARO-HÆMATIDROSIS (Lat.), n. f. Ble2f″a3r-o(o2)-he2m(ha3-e2m)-a2t(a3t)-i2d-ro′si2s. Gen., *blefaro-hœmatidro′seos (-sis).* From βλέφαρον, the eyelid, αἷμα, blood, and ἱδροῦν, to sweat. Bloody sweating from the cutaneous surface of the eyelids; very rare and probably a mere hæmorrhage from the ducts of the cutaneous glands. [F.]

BLEPHARO-HYPERIDROSIS (Lat.), n. f. Ble2f″a3r-o(o2)-hi(hu6)-pu6r(pe2r)-i2d-ro′si2s. Gen., *blepharo-hyperidro′seos (-sis).* From βλέφαρον, the eyelid, ὑπέρ, above measure, and ἱδροῦν, to sweat. Hyperidrosis (*q. v.*) of the eyelids. [F.]

BLEPHARO-LITHIASIS (Lat.), n. f. Ble2f″a3r-o(o2)-li2th-i(i2)′a2s(a3s)-i2s. Gen., *blepharo-lithia′seos (-thi′asis).* From βλέφαρον, the eyelid, and λιθίασις, a calculous affection. Ger., *Augenlider steinkrankheit.* The formation of calcareous concretions on the margin of the eyelid. [L, 50.]

BLEPHARO-MACHÆRION (Lat.), n. n. Ble2f″a3r-o(o2)-ma2k(ma3ch2)-e′(a3′e2)-ri2-o2n. From βλέφαρον, the eyelid, and μαχαίριον, a surgeon's knife. See BLEPHAROPSALIS.

BLEPHARO-MELÆNA (Lat.), n. f. Ble2f″a3r-o(o2)-me2l-e′(a3′e2)-na3. From βλέφαρον, the eyelid, and μελαίνειν (from μέλας, black), to blacken. An obsolete name for a deposit of dark-colored pigment in and beneath the skin of the eyelid; sometimes continuous and sometimes in isolated patches so dense as to form a tumor; usually considered benign. As used by Law, the word is synonymous with blepharo-chromidrosis. [F.]

BLEPHAROMETRUM (Lat.), n. n. Ble2f-a3r-o(o2)-me2t′ru3m-(ru4m). From βλέφαρον, the eyelid, and μέτρον, a measure. Fr., *blépharomètre.* Ger., *Augenlidmesser.* It., *blefarometro.* An absurd name given by Buzzi to a set of instruments for cutting out a portion of the eyelid for trichiasis, consisting of a Beer's forceps and a pair of curved scissors. [A, 322.]

BLEPHARON (Lat.), n. n. Ble2f′a3r-o2n. Gr., βλέφαρον. Fr., *paupière.* Ger., *Augenlid.* It., *palpebra.* Sp., *parpado.* The eyelid. [F.]—**B. atoniaton.** See ATONIATONBLEPHARON.

BLEPHARONCOSIS (Lat.), n. f. Ble2f-a3r-o2n2-ko′si2s. Gen., *blepharonco′seos (-sis).* From βλέφαρον, the eyelid, and ὄγκωσις (from ὀγκοῦν, to become enlarged), increase in bulk. Fr., *blépharoncose.* The formation of a blepharoncus, also the state of being affected with such a growth. [L, 50.]

BLEPHARONCUS (Lat.), n. m. Ble2f-a3r-o2n2′ku3s(ku4s). From βλέφαρον, the eyelid, and ὄγκος, an enlargement. Fr., *tumeur de la paupière.* Ger., *Augenlidgeschwulst.* It., *tumore della palpebra.* Sp., *tumor del parpado.* Any defined swelling or tumor of the eyelid. [F.]

BLEPHARO-OPHTHALMIA (Lat.), n. f. Ble2f″a3r-o(o2)-o2p(o2f)-tha2l(tha3l)′mi2-a3. See BLEPHAROPHTHALMIA.

BLEPHAROPACHYNSIS (Lat.), n. f. Ble2f-a3r-o(o2)-pa2k-(pa3ch2)-i2n(u6n)′si2s. Gen., *blepharopachyn′seos (-sis).* From βλέφαρον, the eyelid, and πάχυνσις, thickening. Ger., *Augenlidschwiele.* Thickening of the eyelid. [A, 322.]

BLEPHAROPHIMOSIS [von Ammon] (Lat.), n. f. Ble2f-a3r-o(o2)-fi(fi2)-mo′si2s. Gen., *blepharophimo′seos (-sis).* From βλέφαρον, the eyelid, and φίμωσις (see PHIMOSIS). Congenital narrowing or shortening of the interpalpebral fissure. [A, 301; F.]

BLEPHAROPHLEGMASIA (Lat.), n. f. Ble2f-a3r-o(o2)-fle2g-ma(ma3)′zi2(si2)-a3. From βλέφαρον, the eyelid, and φλεγμασία (see PHLEGMASIA). See BLEPHARITIS.

BLEPHAROPHORUS (Lat.), adj. Ble2f-a3r-o2f′o2r-u3s(u4s). From βλεφαρίς, an eyelash, and φορεῖν, to bear. Fr., *blépharophore.* Having ciliated edges (said of leaves). [L, 180.]

BLEPHAROPHRYPLASTIK (Ger.), n. Ble2f-a3r-o2f-ru6-pla3st-ek′. From βλέφαρον, the eyelid, ὀφρύς, the eyebrow, and πλάσσειν, to form. The equivalent of a term applied by Rizzoli to a plastic operation in which a lost portion of the eyebrow is replaced by a flap from the temporal portion of the hairy scalp. [Reuss (A, 319).]

BLEPHAROPHTHALMIA (Lat.), n. f. Ble2f-a3r-o2p(o2f)-tha2l(tha3l)′mi2-a3. From βλέφαρον, the eyelid, and ὀφθαλμία (see OPHTHALMIA). Fr., *blépharophthalmie.* Ger., *Blepharophthalmie.* It., *blefaroftalmia.* Sp., *blefaroftalmía.* Inflammation of both the ocular and the palpebral conjunctiva. [F; L, 50.]—**B. cancrosa.** Ger., *Augenliderkrebs.* Cancer of the eyelid. [L, 80.]—**B. glandulosa.** See BLEPHARITIS *glandulosa.*—**B. neonatorum.** See OPHTHALMIA *neonatorum.*—**B. purulenta.** See *Purulent* OPHTHALMIA.—**B. ulcerosa.** See BLEPHARITIS *ulcerosa.*

BLEPHAROPHTHALMIC, adj. Ble2f-a3r-o2p(o2f)-tha2l′-mi2k. From βλέφαρον, the eyelid, and ὀφθαλμικός, pertaining to the eye. Pertaining to both the globe of the eye and the eyelids or to blepharophthalmia.

BLEPHAROPHTHALMITIS (Lat.), n. f. Ble2f-a3r-o2p(o2f)-tha2l(tha3l)-mi(me)′ti2s. Gen., *blepharophthalmit′idis.* Fr., *blépharophthalmite.* See BLEPHAROPHTHALMIA.

BLEPHAROPHTHALMO-BLENNORRHŒA (Lat.), n. f. Ble2f-a3r-o2p(o2f)-tha2l(tha3l)″mo(mo2)-ble2n-no2r-re′(ro2′e2)-a3. See BLEPHAROPHTHALMIA.

BLEPHAROPHTHALMOSTAT, n. Ble2f-a2r-o2p(o2f)-tha2l′-mo-sta2t. From βλέφαρον, the eyelid, ὀφθαλμός, the eye, and στατικός (from ἱστάναι, to cause to stand), bringing to a standstill. An instrument for maintaining immobility of both the eyeball and the lids. [Bernard, "Rec. d'ophthal.," "N. Y. Med. Jour.," Feb. 27, 1886, p. 254.]

BLEPHAROPHTHEIRIASIS (Lat.), n. f. Ble2f-a3r-o2p(o2f)-thi(the2-i2)-ri2-a(a3)′si2s. Gen., *blepharophtheirias′eos (-sis).* From βλέφαρον, the eyelid, and φθειρίασις, lousiness. Ger., *Augenliderläusesucht.* A condition in which the eyelashes are infested with lice. [L, 50.]

BLEPHAROPHYMA (Lat.), n. n. Ble2f-a3r-o(o2)-fi(fu6)′ma3. Gen., *blepharophym′atos (-tis).* From βλέφαρον, the eyelid, and φῦμα, a tumor. Fr., *blépharophyme.* Ger., *Augenlidergeschwulst.* See BLEPHARONCUS.

BLEPHAROPHYSEMA (Lat.), n. n. Ble^{2}f-a^{3}r-o(o^2)-fi^{2}s(fu^{6}s)-e(a)'ma^3. See BLEPHAREMPHYSEMA.

BLEPHAROPLASTIA (Lat.), n. f. Ble^{2}f-a^{3}r-o(o^2)-pla^{2}st-(pla^{3}st)'i^2-a^3. See BLEPHAROPLASTY.

BLEPHAROPLASTIC, adj. Ble^{2}f-a^{3}r-o-pla^{2}st'i^{2}k. Lat., *blepharoplasticus.* Fr., *blépharoplastique.* Ger., *blepharoplastisch.* Pertaining to or of the nature of blepharoplasty.

BLEPHAROPLASTICA, BLEPHAROPLASTICE (Lat.), n's f. Ble^{2}f-a^{3}r-o(o^2)-pla^{2}st(pla^{3}st)'i^2-ka^3, -se(ka). See BLEPHAROPLASTY.

BLEPHAROPLASTY, n. Ble^{2}f'a^{3}r-o-pla^{2}st-i^2. From βλέφαρον, the eyelid, and πλάσσειν, to form. Lat., *blepharoplastica, blepharoplastice.* Fr., *blépharoplastie.* Ger., *Blepharoplastik, künstliche Augenlidbildung.* It., *blefaroplastia.* Sp., *blefaroplastía.* Any plastic operation on the eyelid, especially for restoring a part or the whole of the lid. [F.] See *Arlt's, Billroth's, Burow's, De Wecker's, Dieffenbach's, Fricke's, Knapp's, Landolt's, Lawson's, Noyes's, Reverdin's, Serre's, Szymanowsky's, von Ammon's, Wells's,* and *Wolfe's* OPERATION.

BLEPHAROPLEGIA (Lat.), n. f. Ble^{2}f-a^{3}r-o(o^2)-ple(pla)'ji^2-(gi^2)-a^3. From βλέφαρον, the eyelid, and πληγή (from πλήσσειν, to smite), a stroke. Fr., *blépharoplégie.* Ger., *Augenlidlähmung.* Paralysis of the eyelids. [A, 322, 385.]

BLEPHAROPSALIS (Lat.), n. f. Ble^{2}f-a^{3}r-o^{2}p'sa^{2}l(sa^{3}l)-i^{2}s. Gen., *blepharopsal'idos (-dis).* From βλέφαρον, the eyelid, and ψαλίς, a pair of scissors. A name proposed by Kraus for the *blepharometrum* of Buzzi. [A, 322.]

BLEPHAROPTOSIS (Lat.), n. f. Ble^{2}f-a^{3}r-o^{2}p-to'si^{2}s. Gen., *blepharopto'seos (-sis).* From βλέφαρον, the eyelid, and πτῶσις, a falling. Fr., *blépharoptose.* Ger., *Augenlidvorfall.* It., *blefaroptosi.* Sp., *proptoma del parpado.* A falling or drooping, partial or complete, of the upper eyelid, caused by paralysis of the levator palpebræ superioris muscle. [F.]—**B. ectropion.** See ECTROPION.—**B. entropion.** See ENTROPION.—**B. genuina.** See *B.*—**B. lagophthalmus.** See LAGOPHTHALMUS.

BLEPHAROPYORRHŒA (Lat.), n. f. Ble^{2}f-a^{3}r-o(o^2)-pi-(pu^6)-o^{2}r-re'(ro^2'e^2)-a^3. From βλέφαρον, the eyelid, πύον, pus, and ῥεῖν, to flow. Fr., *blépharopyorrhée.* Ger., *Augenlidereiterfluss.* It., *piorragia delle palpebre.* Sp., *piorragía de los parpados.* Syn.: *pyorrhœa palpebræ.* A flow of pus from the inner surface of the eyelids; a sign of purulent inflammation of the conjunctiva. [F.]—**B. neonatorum.** See OPHTHALMIA *neonatorum.*

BLEPHARORRHAPHY, n. Ble^{2}f-a^{3}r-o^{2}r'ra^{2}f-i^2. Lat., *blepharorrhaphia* (from βλέφαρον, the eyelid, and ῥαφή, a seam). Fr., *blépharorrhaphie.* The operation of stitching together a portion of the two eyelids, chiefly for the correction of ectropion. ["Union méd.," Sept. 9, 1886, p. 409.]—**Median b.** Lat., *blepharorrhaphia medialis.* B. at the inner canthus; proposed by Arlt for persistent eversion of the lower lid. [Hock (A, 319).]

BLEPHARORRHŒA (Lat.), n. f. Ble^{2}f-a^{3}r-o^{2}r-re'(ro^2'e^2)-a^3. From βλέφαρον, the eyelid, and ῥεῖν, to flow. Fr., *blépharorrhée.* Ger., *Augenliderfluss.* A discharge from the eyelids, usually purulent. [F.]

BLEPHARO-SAROTHRUM (Lat.), n. n. Ble^{2}f''a^{3}r-o(o^2)-sa^{2}r(sa^{3}r)-o^{2}th(oth)'ru^{3}m(ru^{4}m). From βλέφαρον, the eyelid, and σάρωθρον (= σάρωτρον), a broom. See BLEPHAROXYSTUM.

BLEPHAROSPASM, n. Ble^{2}f'a^{3}r-o-spa^{2}zm. Lat., *blepharospasmus* (from βλέφαρον, the eyelid, and σπασμός, a spasm). Fr., *blépharospasme.* Ger., *Augenlidkrampf.* It., *blefarospasmo.* Sp., *espasmo de los parpados.* Spasm of the orbicular muscle of the eyelids; either *tonic* (when the eyelids remain firmly closed) or *clonic* (when they open and close with great rapidity). [A, 301.]—**Scrofulous b.** Lat., *blepharospasmus scrofulosus.* Fr., *blépharospasme scrofuleux.* Ger., *skrophulöser Augenlidkrampf.* It., *blefarospasmo scrofoloso.* Sp., *blefarospasmo escrofuloso.* A form occurring in connection with scrofulous inflammation of the cornea or conjunctiva. [F.]

BLEPHAROSPATH, n. Ble^{2}f'a^{3}r-o-spa^{2}th. From βλέφαρον, the eyelid, and σπάθη, a spatula. Fr., *blépharospathe.* Ger., *Blepharospath.* A hæmostatic forceps for the upper eyelid. One blade is a broad plate, and the other is a ring of the same size and shape; the two may be clamped together with a screw. [F.]

BLEPHAROSTAT, n. Ble^{2}f'a^{3}r-o-sta^{2}t. From βλέφαρον, the eyelid, and στατικός (from ἱστάναι, to cause to stand), bringing to a standstill. Fr., *blépharostat.* Ger., *Augenlidhalter.* An instrument for holding the lids fixed in operations on the eye. [A, 385.]

BLEPHAROSTENOSIS (Lat.), n. f. Ble^{2}f-a^{3}r-o(o^2)-ste^{2}n-o'si^{2}s. Gen., *blepharosteno'seos (-sis).* From βλέφαρον, the eyelid, and στένωσις, a contraction. Fr., *blépharosténose.* Ger., *Verkleinerung der Lidspalten.* It., *blefarostenosi.* Sp., *blefarostenosis.* Narrowing of the interpalpebral aperture, congenital or acquired. [F.]

BLEPHAROSYMPHYSIS (Lat.), n. f. Ble^{2}f-a^{3}r-o(o^2)-si^{2}m-(su^{6}m)'fi^{2}s(fu^{6}s)-i^{2}s. Gen., *blepharosymphys'eos (-sym'physis).* From βλέφαρον, the eyelid, and σύμφυσις, a growing together. Fr., *blépharosymphyse.* Ger., *Verwachsung der Augenlider.* Adhesion of the eyelids to each other. [L, 81.]

BLEPHAROSYNDESMITIS (Lat.), n. f. Ble^{2}f-a^{3}r-o(o^2)-si^{2}n-(su^{6}n)-de^{2}s-mi(me)'ti^{2}s. Gen., *blepharosyndesmit'idis.* From βλέφαρον, the eyelid, and σύνδεσμος, a bond of union. Fr., *blépharosyndesmite.* See *Palpebral* CONJUNCTIVITIS (than which, however, this is a better term).

BLEPHAROSYNECHIA (Lat.), n. f. Ble^{2}f-a^{3}r-o(o^2)-si^{2}n(su^{6}n)-e^{2}k(e^{2}ch^2)-i(e)'a^3. From βλέφαρον, the eyelid, and συνέχεια, continuity of substance. See BLEPHAROSYMPHYSIS.

BLEPHAROTIS, BLEPHAROTITIS (Lat.), n's f. Ble^{2}f-a^{3}r-o'ti^{2}s, -o(o^2)-ti(te)'ti^{2}s. Gen., *blepharot'idis, -otit'idis.* See BLEPHARITIS.

BLEPHAROXYSTON, BLEPHAROXYSTUM (Lat.), n's n. Ble^{2}f-a^{3}r-o^{2}x-i^{2}st(u^{6}st)'o^{2}n, -u^{3}m(u^{4}m). Gr., βλεφαρόξυστον (from βλέφαρον, the eyelid, and ξύειν, to scrape). Fr., *blépharoxyste.* Ger., *Augenlidkratzer.* An ancient instrument for scraping the inner surface of the eyelid, described by Paulus Ægineta. [F.]

BLEPHARYDATIS (Lat.), n. f. Ble^{2}f-a^{3}r-i^{2}d(u^{6}d)'a^{2}t(a^{3}t)-i^{2}s. Gen., *blepharydat'idos (-dis).* From βλέφαρον, the eyelid, and ὑδατίς (see hydatid). A bullous affection or a hydatid of the eyelid. [L, 50.]

BLEPHILIA (Lat.), n. f. Ble^{2}f-i^{2}l'i^2-a^3. From βλεφαρίς, an eyelash, on account of the ciliate bracts. Fr., *bléphilie.* A genus of labiate plants of the tribe *Monardeæ*, established by Rafinesque. [B, 215.]—**B. hirsuta** [Bentham], **B. nepetoides** [Rafinesque]. Syn.: *Monarda hirsuta* [Pursh] (seu *ciliata* [Michaux]). A villous-hirsute perennial herb growing in moist, shady places throughout the northern and Atlantic United States. [B, 215.]

BLÈSE (Fr.), adj. Ble^{2}s. See BLÆSUS.

BLÉSEMENT (Fr.), **BLÉSITÉ** (Fr.), n's. Blas-ma^{3}n, -i^2-ta. See BLÆSITAS.

BLESSÉ (Fr.), adj. Ble^{2}s-sa. Wounded, injured. [A, 385.]

BLESSED HERB, n. Ble^{2}s'se^{2}d u^{6}rb. The GEUM *urbanum.* [B.]

BLESSISSEMENT (Fr.), n. Ble^{2}s-ses-ma^{3}n^2. See BLETTING.

BLESSISSURE (Fr.), n. Ble^{2}s-ses-su^{6}r. See BLESSURE.

BLESSON (Fr.), n. Ble^{2}s-so^{2}n^2. A variety of wild pear. [L, 41.]

BLESSURE (Fr.), n. Ble^{2}s-su^{6}r. 1. A wound, an injury. [A, 385.] 2. Accidental abortion. [A, 96.] 3. Applied improperly to uterine hæmorrhage occurring during pregnancy. [A, 301.]

BLESTRISMUS (Lat.), n. m. Ble^{2}s(blas)-tri^{2}z(tri^{2}s)'mu^{3}s(mu^{4}s). Gr., βληστρισμός (from βληστρίζειν, to toss about). Fr., *blestrisme.* Jactitation. [A, 322, 325.]

BLET (Fr.), adj. Bla. Softened, but not decayed (said of fleshy fruits). [L, 49.]

BLETA ALBA (Lat.), n. f. Ble(bla)'ta^3 a^{2}l(a^{3}l)'ba^3. Milky urine. [Paracelsus (A, 325).]

BLETIA (Lat.), n. f. Ble(bla)'shi^2(ti^2)-a^3. A genus of orchidaceous plants. [B.]

BLETIDÆ (Lat.), n. f. pl. Ble^{2}t'i^{2}d-e(a^3-e^2). Of Lindley, a section of orchids (*Epidendreæ*). [B, 170.]

BLÉTISSEMENT (Fr.), n. Blat-es-ma^{3}n^2. See BLETTING.

BLETTE (Fr.), n. Ble^{2}t. The genus *Blitum*, especially the *Blitum capitatum.* [B, 173.]—**B. à fleurs en tête.** The *Blitum capitatum.* [B, 173.]—**B. en verge.** The *Blitum virgatum.* [B, 173.]—**B. épineuse.** The *Blitum spinosum.* [B, 173.]

BLETTING, n. Ble^{2}t'ti^{2}ng. Lat., *hyposathria.* Fr., *blétissement.* Ger., *Molschwerden.* A peculiar transformation of vegetable tissue by which it assumes a brown color without undergoing putrefaction. [B, 19.]

BLETUS (Lat.), adj. Ble(bla)'tu^{3}s(tu^{4}s). Gr., βλητός (from βάλλειν, to smite). Smitten, struck (said anciently of those who showed marks as of bruises, either during life or after death, which were interpreted as signs of a severe internal disease). [Hippocrates (A, 325).]

BLEU (Fr.), adj. and n. Blu^6. Blue. [B.]—**B. coupier.** A blue pigment made up of compounds of triphenylenediamine blue and violaniline with sulphuric acid. [B, 49.]—**B. d'azur.** A mixture of protoxide of cobalt and silica. [A, 385.]—**B. de Berlin.** Ferrocyanide of iron. [B, 81.]—**B. de composition.** See *B. de Saxe.*—**B. de Lyon.** A blue dye obtained by heating a salt of rosaniline with aniline. [Perkin, "Nature," July 30, 1885 (B).]—**B. de montagne.** Carbonate of copper. [A, 385.]—**B. de Nerprun.** A violet-blue coloring matter found in the berries of *Rhamnus catharticus*; it is turned green by alkalies and by alum. [A, 301.]—**B. de Paris.** An aniline blue obtained by heating stannic chloride with aniline. [B, 2.]—**B. de Prusse.** See *B. de Berlin.*—**B. de Saxe.** A blue pigment formed by the action of sulphuric acid on indigo. [B, 173.]—**B. d'Inde.** Indigo. [B, 173.]—**B. en liqueur.** See *B. de Saxe.*

BLEUET (Fr.), n. Blu^6-a. The *Centaurea cyanus.* [B, 173.]

BLEUISSEMENT (Fr.), n. Blu^6-es-ma^{3}n^2. The assumption of a blue color. [A, 385.]

BLÉVILLE (Fr.), n. Bla-vel. A place in the department of the Seine-Inférieure, France, where there is a spring containing iron sulphate, manganese, and alumina. [L, 49.]

BLEWITS, n. Blu^2'i^{2}tz. The *Agaricus personatus.* [B, 19.]

BLEY (Ger.), n. Bli. See BLEI.

BLEYME (Fr.), n. Ble^{2}m. See BLEIME.

BLICHODES (Lat.), adj. Bli^{2}k(bli^{2}ch^2)-o'dez(das). Gr., βλιχώδης. Affected with coryza. [Hippocrates (A, 311).]

BLICKE (Ger.), n. Bli^{2}k'e^2. The *Cyprinus alburnus.* [L, 43.]

BLIESSHAARIG (Ger.), adj. Bles'ha^{3}r-i^{2}g. Having fleecy hair; as a n., in the pl., see ERIOCOMI. [L, 228.]

BLIGHIA (Lat.), n. f. Bli'i^2-a^3. Fr., *blighie.* A genus of sapindaceous trees growing in the West Indies, bearing a fleshy fruit much sought after by animals. [B, 38.]—**B. sapida** [Koenig]. Syn.: *Akeesia africana, Cupania sapida* (seu *edulis*). The akee- or aki-tree of Jamaica, bearing a fruit that is edible when cooked. A semi-solid fatty substance is obtained from the seeds by expression. [B, 19.]

BLIGHT, n. Blit. Ger., *Mehlthau, Brand.* A withering, or anything producing it, in an animal or a vegetable organism.—**Barberry b.** See ÆCIDIUM *berberidis.*—**B. in the eye.** An obsolete term for a catarrhal inflammation of the eyelids accom-

panied with spots on the cornea. [F.]—**Sandy b.** A popular term for a form of ophthalmia accompanied by the formation of tenacious pus in the mouths of the Meibomian glands, causing photophobia and a sensation of grittiness, and sometimes ending in ulceration of the cornea. [J. Reid, "Australas. Med. Gaz.," May, 1885, p. 183.]

BLIGHTED, adj. Blit'e^{2}d. Affected with blight.

BLIMBING-BULA, n. An East Indian name for the *Averrhoa carambola.* [L, 49.]

BLINCTA, n. An alchemical name for terra rubra. [Ruland (A, 325).]

BLIND, adj. Blind. A.-S., *blind.* Gr., τυφλός. Lat., *cæcus.* Fr., *aveugle.* Ger., *blind.* It., *cieco.* Sp., *ciego.* 1. Destitute of the faculty of sight. 2. Terminating without any open communication (*e. g.*, the cæcum).

BLINDHEIT (Ger.), n. Bli^{2}nd'hit. See Blindness.—**B. bei Nacht.** See Hemeralopia.—**B. bei Tage.** See Nyctalopia.—**B. in die Ferne.** See Myopia.—**Nachtb'.** See Hemeralopia.—**Rindenb'** [Munk]. See *Cortical* blindness.—**Seelenb'** [Munk]. See *Mental* blindness.—**Tagb'.** See Nyctalopia.

BLINDIACEÆ [Hampe], **BLINDIEÆ** (Lat.), n's f. pl. Bli^{2}nd-i^2-a(a^3)'se^2(ke^2)-e(a^3-e^2), -i(i^2)'e^2-e(a^3-e^2). From *Blindia*, one of the genera. A tribe of mosses. [B, 121.]

BLINDNESS, n. Blind'ne^{2}s. Gr., τυφλότης. Lat., *cæcitas.* Fr., *aveuglement*, *cécité.* Ger., *Blindheit.* It., *cecità.* Sp., *ceguedad.* The state of being blind. [F.]—**Absolute b.** 1. Complete b. 2. See *Cortical b.*—**Blue-b., Blue-yellow b.** Fr., *cécité pour bleu.* Ger., *Blaublindheit.* It., *cecità per azzurro* (o *per turchino*). Sp., *ceguedad por azul.* That form of color-b. in which there is inability to recognize either blue, bluish-green, or violet or the complementary yellow. [F.]—**Color-b.** Lat., *achromatopsia, dyschromatopsia.* Fr., *achromatopsie. cécité des couleurs.* Ger., *Farbenblindheit.* It., *cecità dei colori.* Sp., *ceguedad de los colores.* Syn.: *Daltonism.* A partial or complete incapability of distinguishing colors. [F.]—**Cortical b.** Ger., *Rindenblindheit.* Syn.: *absolute b.* Permanent loss of vision resulting from complete destruction of the visual centre in the cortical portion of the occipital lobe in the dog's brain. [Landois (K).]—**Day-b.** Ger., *Tagblindheit.* See Nyctalopia.—**Green-b.** Fr., *cécité pour vert.* Ger., *Grünblindheit.* It., *cecità per verde.* Sp., *ceguedad por verde.* That form of color-b. in which there is inability to recognize either pure green or its complementary color, purplish-red. [F.]—**Intellectual b., Mental b.** Fr., *cécité mentale.* Ger., *Seelenblindheit.* Syn.: *psychical b.* A state in which the power of sight is retained, but there is inability to interpret visual impressions correctly. [M; L. C. Gray, "N. Y. Med. Jour.," June 18, 1887, p. 673.]—**Moon-b.** See Hemeralopia.—**Nervous b.** See Amaurosis.—**Night b., Nocturnal b.** See Hemeralopia.—**Psychic b., Psychical b.** See *Mental b.*—**Red-b., Red-green b.** Fr., *cécité pour rouge.* Ger., *Rothblindheit.* It., *cecità per rosso.* Sp., *ceguedad por colorado* (ó *rojo*). Syn.: *anerythropsia.* That form of color-b. in which there is inability to recognize either red or its complementary color, bluish-green, the former appearing blackish-gray, and the latter whitish-gray. [F.]—**Snow-b.** Fr., *cécité* (ou *aveuglement*) *de neige.* Ger., *Schneeblindheit.* It., *cecità da neve.* Sp., *ceguedad de nieve.* B. produced by exposure of the eyes to the long-continued reflection of sunlight from the surface of snow. True s.-b. depends on a paralysis of the retina, but the term has been applied also to a state of irritation and inflammation of the conjunctiva occurring in snowy latitudes. [F.]—**Soul-b.** See *Mental b.*

BLINDSACK (Ger.), n. Bli^{2}nd'za^{3}k. See Cul-de-sac.

BLINKEN (Ger.), n. Bli^{2}n^{2}k'e^{2}n. See Nystagmus.

BLINKERN (Ger.), n. Bli^{2}n^{2}k'e^{2}rn. See Nictation.

BLINZEN (Ger.), n. Bli^{2}ntz'e^{2}n. Nictation. [L, 80.]

BLINZHAUT (Ger.), **BLINZHÄUTCHEN** (Ger.), n's. Bli^{2}ntz'ha^3-ut, -hoit-ch^{2}e^{2}n. See Membrana *nictans.*

BLISTER, n. Bli^{2}st'u^{5}r. Perhaps from A.-S. *blæstan*, to blast or puff. Gr., ψύδραξ (1st def.), ψυδράκιον (1st def.). Lat., *vesica* (1st def.), *vesicula* (1st def.), *vesicans* (2d def.). Fr., *vessie* (1st def.), *vésicatoire* (2d def.). Ger., *Blatter* (1st def.), *Blase* (1st def.), *Bläschen* (1st def.), *Blasenpflaster* (2d def.). 1. A bleb, whether occasioned by a burn or other injury or by a vesicatory or occurring without the action of an external agency. [G.] 2. A vesicant. [L, 77.]—**B.-beetle, B.-fly.** See Cantharis *vesicatoria.*—**B.-plant.** The *Ranunculus acris.* [B, 275.]—**B.-plaster.** See *Ceratum* cantharidis.—**Fever-b.** A popular term for an herpetic vesicle of the lip.—**Fly-b.** A vesicant consisting of a preparation of cantharides (usually the ceratum cantharidis), as distinguished from other vesicants.—**Flying b.** Fr., *vésicatoire volant.* 1. A b. which is punctured and allowed to heal at once. [A, 321.] 2. A b. which is applied to different portions of a given region of the body successively.—**Magistral b.** See Vésicatoire *magistral.*—**Permanent b.** Fr., *vésicatoire permanent.* A b. produced by the full action of a vesicant and then treated by removing the raised epidermis and dressing the exposed surface with an irritant, to prevent its healing. [A, 259.]

BLISTERING, adj. Bli^{2}st'u^{5}r-i^{2}ng. See Vesicant.

BLITA (Lat.), n. n. pl. Bli(bli^2)'ta^3. Of Adanson, a family of plants, comprising *Atriplex*, *Chenopodium*, *Basella*, *Phytolacca*, *Piper*, and other widely distinct genera. [B, 170.]

BLITE, n. Blit. The *Amarantus blitum*, also various species of *Blitum* (*Chenopodium* and *Atriplex*). [B, 19, 275.]—**Coast-b.** See *Sea-b.*—**Frost-b.** The *Chenopodium album.* [B, 275.]—**Sea-b.** The *Suæda maritima.* [B, 19, 275.]—**Strawberry-b.** The genus *Blitum.* [B, 19.]—**Wild b.** The *Amarantus blitum.* [B, 275.]

BLITEÆ (Lat.), n. f. pl. Bli^{2}t'e^2-e(a^3-e^2). Of Endlicher, Meissner, Reichenbach, and others, a subtribe of chenopodiaceous plants, comprising *Blitum* and related genera. [B, 170.]

BLITUM (Lat.), n. n. Bli(bli^2)'tu^{3}m(tu^{4}m). Gr., βλίτον. A genus of chenopodiaceous plants, referred by Bentham and Hooker to *Chenopodium.* [B, 42.]—**B. album majus** [Bauhin]. The *Amarantus oleraceus.* [B, 211.]—**B. album minus** [Cam.]. The *Amarantus b.* [B, 211.]—**B. atriplex silvestris dictum** [Ray]. The *Chenopodium album.* [B, 211, 214.]—**B. bonus Henricus** [Reichenbach], **B. bonus Henricus dictum** [Ray]. The *Chenopodium bonus Henricus.* [B, 211.]—**B. capitatum** [Linnæus]. The *Chenopodium polyspermum.* [B, 211.]—**B. fœtidum vulvaria dictum** [Ray]. The *Chenopodium vulvaria.* [B, 200.]—**B. gangeticum** [Mönch]. The *Amarantus gangeticus.* [B, 173.]—**B. kali minus album dictum** [Ray]. The *Suæda maritima.* [B, 211.]—**B. maritimum** [Nuttall]. The *Chenopodium rubrum.* [B, 228.]—**B. minus.** See *B. album minus.*—**B. oleraceum** [Mönch]. The *Amarantus oleraceus.* [B, 173.]—**B. perenne bonus Henricus dictum** [Ray], **B. perenne spinaciæ facie** [Morison]. The *Chenopodium bonus Henricus.* [B, 200, 211.]—**B. polymorphum** [C. A. Meyer]. The *Chenopodium rubrum.* [B, 214, 228.]—**B. polyspermum** [Bauhin]. The *Chenopodium polyspermum.* [B, 211.]—**B. rubrum** [Reichenbach]. The *Chenopodium rubrum.* [B, 228.]—**B. rubrum minus** [Bauhin]. The *Amarantus b.* [B, 211.]—**B. spinosum** [Rumphius]. The *Amarantus spinosus.* [B, 214.]—**B. virgatum.** See under Chenopodium.

BLITZCATARRH (Ger.), n. Bli^{2}tz'ka^{3}t-a^{3}r''. Influenza. [Riess (A, 319).]

BLITZFEUER (Ger.), n. Bli^{2}tz'foi-e^{2}r. Electricity. [L, 46.]

BLITZPULVER (Ger.), n. Bli^{2}tz'pul-fe^{2}r. Lycopodium. [B.]

BLITZSTOFF (Ger.), n. Bli^{2}tz'sto^{3}f. Electricity. [L, 46.]—**B'flasche.** A Leyden jar. [L, 46.]—**B'halter.** An electrical machine. [L, 46.]—**B'haltig.** Electrical, charged with electricity. [L, 46.]—**B'maschine.** See *B'halter.*—**B'messer.** An electrometer. [L, 46.]—**B'sauger.** An electrical condenser. [L, 46.]—**B'träger.** A conductor of electricity. [L, 46.]

BLOAT, v. intr. Blot. Fr., *s'enfler.* Ger., *aufschwellen.* To become swollen and puffy, as from œdema. [D.]

BLOB, n. Blo^{2}b. See Bleb.

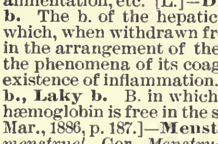
BLOCKINGWER (Ger.), **BLOCKZITTWER** (Ger.), n's. Blo^{2}k'i^{2}ng-ve^{2}r, -tzi^{2}t-ve^{2}r. The *Zingiber zerumbet.* [B, 180; L, 80, 105.]

BLÖDLING (Ger.), n. Blu^{5}d'li^{2}ng. An idiot. [L, 46.]

BLODROT, n. The *Tormentilla erecta.* [B, 173; L, 105.]

BLÖDSICHTIG (Ger.), adj. Blu^{5}d'zi^{2}ch^{2}t-i^{2}g. Weak-sighted. [L, 43.]

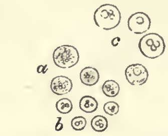
BLÖDSINN (Ger.), **BLÖDSUCHT** (Ger.), n's. Blu^{5}d'zi^{2}n, -zuch^{2}t. Imbecility, idiocy. [D, 29; L, 80.]



BLONDYRAS, n. The *Senecio vulgaris.* [L, 105.]

BLOOD, n. Blu^{3}d. A.-S., *blôd.* Gr., αἷμα. Lat., *sanguis.* Fr., *sang.* Ger., *Blut.* It., *sangue.* Sp., *sangre.* A liquid which, in man and all the higher animals, circulates constantly through the system, being propelled into the arteries by the heart and received back by that organ through the veins. It carries nutrient material to all parts of the organism and excrementitious matter to the various organs by which it is to be eliminated, the latter having been taken up by it in its passage through the tissues and carried to the heart. Histologically considered, b. is a tissue, with solid or semi-solid cellular elements and a liquid intercellular substance. In mammalian b. the cellular elements are red b.-corpuscles, white b.-corpuscles, and the more or less hypothetical so-called hæmatoblasts, or third corpuscular elements. B. is a thickish liquid, of a crimson color in the arteries and varying from bluish-red to black in the veins, of a faint but characteristic odor (varying in different animals), of a feebly saline taste, of alkaline reaction, of a sp. gr. ranging from 1·052 to 1·057, and of a temperature of from 98° to 107° F. When drawn from the b.-vessels, it tends to form a semi-solid mass (clot, coagulum). It consists of a clear liquid (plasma) in which the corpuscular elements are suspended. For the composition of the b., see under Plasma. [A, 440; J, 30, 31, 35, 36, 42, 44, 45; K.]—**Arterial b.** Lat., *sanguis arteriosus.* Fr., *sang artériel* (ou *rouge*). Ger., *arterielles Blut.* Syn.: *red b.* 1. The bright-red or scarlet b. normally contained in the left cavities of the heart, the systemic arteries, and the pulmonary veins, also in the umbilical vein of the fœtus. It contains a relatively large amount of oxygen and a small amount of carbon dioxide, and is of uniform composition. 2. The b. contained in the arteries, without regard to its quality. [J, 2.]—**Black b.** Fr., *sang noir.* See *Venous b.*—**B'berry.** The *Rivina humilis.* [B, 185.]—**B.-boil.** See Hæmatoma.—**B.-clot.** See Clot and Coagulum.—**B.-corpuscles.** See the major list.—**B.-crystals.** See Hæmatoidin.—**B.-cyst.** See Hæmatoma and Hæmatocele.—**B.-discs.** See Blood-corpuscles.—**B.-flower.** The genus *Hæmanthus.* [B, 19.]—**B.-globules.** See Blood-corpuscles.—**B.-heat.** See under Heat.—**B.-iron.** See Fleam.—**B.-islands.** Lat., *insulæ sanguinis.* Fr., *îlots sanguins.* Ger., *Blutinseln*, *Pander'sche Inseln*, *Blutpunkte.* Syn.: *Pander's islets.* Collections of greatly enlarged hollow cells in which red b.-corpuscles are being developed; these cells also unite to form b.-vessels. The name was originally (1817) given by Pander to such collections, containing embryonic b.-corpuscles, in the developing chick; it has since been applied to like collections in any situation (*e. g.*, the subcutaneous connective tissue of the new-born rat). [A, 8; J, 30, 35; K, 16.]—**B'letter.** See Bleeder (1st def.).—**B'letting.** See the major list.—**B.-murmurs.** See under Murmur.—**B.-particles.** See Blood-corpuscles.—**B.-picture.** The appearance presented, un-

der the microscope, by a piece of glass on which b. (liquid or dried), dissolved in distilled water, has been placed and then carefully evaporated to dryness at a temperature of from 12·2° to 15° C. [A, 470.]—**B.-pigments.** See under PIGMENT.—**B.-plasma.** See under PLASMA.—**B.-plaques, B.-plates.** Fr., *globulins, plaques, plaquettes.* Ger., *Blutplättchen.* Syn.: *b.-tablets, plaques, hæmatoblasts* (*q. v.*). Circular or oval protoplasmic discs, constant in the blood of *Mammalia* and probably in that of all vertebrates. They are much smaller than the red corpuscles, varying in man from 1·5 to 3·5 μ in diameter. Their number, as compared with the red corpuscles, in man, is about 1 to 18 or 20. In drawn blood they speedily collect and partly disintegrate, forming the so-called granule-masses or granular débris. They are supposed to be specially connected with coagulation and the formation of thrombi. [W. Osler, "N. Y. Med. Jour.," xliii, 1886 (J).] See also HÆMATOBLASTS.—**B.-plum.** The *Hæmatostaphis Barteri.* [B, 185.]—**B.-poisoning.** See under POISONING.—**B.-rain.** A term applied to the b.-red spots sometimes seen on cooked food; supposed to be due to an *Alga* (the *Palmella prodigiosa*) or to be a variety of mold. [L, 108.]—**B.-red.** Of the color of b.—**B. respiration.** See *B.* RESPIRATION and *External* RESPIRATION.—**B.-root.** The *Sanguinaria canadensis* and the *Geum canadense.* [B, 19.]—**B.-serum.** See SERUM.—**B.-shot.** Red and looking as if inflamed, from a turgid and dilated state of the b.-vessels (said of the eyes). [L, 56.]—**B.-sounds.** See *B.*-MURMURS.—**B.-spaces.** See *Intervillous* LACUNÆ.—**B.-stroke.** Fr., *coup de sang.* Cerebral congestion or apoplexy. [A, 321.]—**B.-tablets.** See *B.-plates.*—**B.-tumor.** See HÆMATOMA.—**B.-vascular.** Pertaining to or consisting of b.-vessels.—**B.-vesicles.** See *Red* BLOOD-CORPUSCLES.—**B.-vessel.** See the major list.—**B.-weed.** The *Asclepias curassavica.* [B.]—**B'wood, B'wort.** See the major list.—**Chylous b.** See PIARRHÆMIA.—**Defibrinated b.** B. from which the fibrin has been removed by beating with a bundle of rods; used for transfusion, rectal alimentation, etc. [L.]—**Dragon's-b.** See the major list.—**Hepatic b.** The b. of the hepatic vein. [A, 429.]—**Inflammatory b.** B. which, when withdrawn from the vessels, shows certain peculiarities in the arrangement of the corpuscles, the amount of fibrin present, the phenomena of its coagulation, etc., interpreted as indicating the existence of inflammation. [A, 2.] See *Buffy* COAT.—**Lake-colored b., Laky b.** B. in which the red corpuscles are dissolved and the hæmoglobin is free in the serum. [L. C. Wooldridge, "Practitioner," Mar., 1886, p. 187.]—**Menstrual b.** Lat., *sanguis mensium.* Fr., *sang menstruel.* Ger., *Menstrualblut.* It., *sangue mestruo.* The b. which flows from the uterus during menstruation; arterial b. mingled with uterine and vaginal epithelium and secretions. [A, 216.]—**Portal b.** The b. of the portal vessels. [A, 333.]—**Red b.** Fr., *sang rouge* (ou *rutilant*). See *Arterial b.*—**Venous b.** Lat., *sanguis venosus.* Fr., *sang veineux* (ou *noir*). Ger., *venöses Blut, Venenblut.* Syn.: *black b.* 1. Dark-red or maroon b. containing a relatively small amount of oxygen and a large amount of carbon dioxide; of different composition in different parts of the body. It is contained in the right cavities of the heart, in the systemic veins, and in the pulmonary artery of the adult; in the fœtus, all the b. is venous or mixed, except that in the umbilical vein (see *Arterial b.*). As compared with arterial b., venous b. is variable in composition, containing sugar in the hepatic veins and the products of digestion and chyle and lymph from the thoracic duct in the præcava; it contains from 8 to 12 per cent. less oxygen and 6 per cent. more carbon dioxide. 2. The b. contained in the veins, without regard to its quality. [J, 11.]—**White b.** Fr., *sang blanc.* See *B.* PLASMA and LYMPH.



BLOOD, v. tr. Blu^{3}d. In veterinary medicine, to bleed (let blood). [B, 117.]

BLOOD-CORPUSCLES, n. pl. Blu^{3}d'ko^{2}r''pu^{3}s-slz. Lat., *corpuscula sanguinis.* Fr., *globulins sanguins.* Ger., *Blutkörperchen, Blutzellen.* Syn.: *blood-cells.* A general term for the solid or semi-solid elements in the plasma of the blood. [J.] See *Red b.-c., White b.-c., Blood-*PLATES, and HÆMATOBLASTS.—**Colored b.-c.** See *Red b.-c.*—**Colorless b.-c.** See *White b.-c.*—**Granular b.-c.** Ger., *körnige Blutkörperchen.* Certain corpuscles in the blood of mammals, described by Erb as transitional between white and red b.-c. ["Arch. f. path. Anat. u. Physiol. u. f. klin. Med.," xxxiv, p. 138 (J).]—**Pale b.-c.** See *White b.-c.*—**Red b.-c.** Fr., *cellules* (ou *globules*) *rouges du sang* (ou *hématiques*), *hématies.* Ger., *rothe* (oder *gefarbte*) *Blutkörperchen* (oder *Blutkügelchen,* oder *Blutzellen*). It., *globuli rossi del sangue.* The minute circular or oval bodies in the blood which contain the hæmoglobin and consequently serve as carriers of oxygen. It is only when massed that they have the characteristic color of blood; singly or in a very thin layer, and viewed by transmitted light, they are of a reddish-yellow or yellowish-green tint. In all *Mammalia* they are non-nucleated, and their shape is that of circular biconcave discs, except in the *Camelidæ,* where they are elliptical. In man their diameter varies from 7 to 8 μ. [Woodward (J).] They are largest in the elephant (9·5 μ in diameter), and smallest in the meminna and the Napu deer (2 μ in diameter). [J, 21, 28, 30, 35.] In birds, reptiles, the *Amphibia,* and fishes they are nucleated and elliptical, except in the *Petromyzon* and its larva (*Ammocetes*), where, although nucleated, they are circular. [J, 21, 28, 35; W. Jones, "Phil. Trans.," 1846, p. 63 (J).]—**White b.-c.** Fr., *globules blancs du sang, leucocytes.* Ger., *farblose* (oder *weisse*) *Blutkörperchen* (oder *Blutkügelchen*). It., *globuli* (o *corpuscoli*) *bianchi del sangue, leucociti.* Syn.: *leucocytes, lymph-cells, wandering cells, blood bioplasts.* Minute masses of naked and nucleated protoplasm (cells) found in various tissues, but especially in the circulating blood and lymph, having the power of amœboid movement. When at rest they are rounded or spheroidal in form and, in man, about 10 μ in diameter. In number, their proportion to the red b.-c. is about as 1 to 350 or 500. [J, 24, 28, 30, 31, 35.]

RED CORPUSCLES OF HUMAN BLOOD, MAGNIFIED 350 DIAMETERS. (AFTER ALLCHIN [A, 364].)

a, normal, singly and in rouleaux; *b*, shrunk by treatment with a concentrated liquid; *c*, distended and globular from absorption of water.

WHITE BLOOD-CORPUSCLES, MAGNIFIED 350 DIAMETERS. (AFTER ALLCHIN [A, 364].)

a, normal; *b*, after treatment with acetic acid; *c*, distended with water.

BLOODING, n. Blu^{3}d'i^{2}ng. See BLOODLETTING.

BLOODLESS, adj. Blu^{3}d'le^{2}s. Ger., *blutlos.* Destitute or largely deprived of blood; unattended with loss of blood (said of operations).

BLOODLETTING, n. Blu^{3}d'le^{2}t-ti^{2}ng. Gr., αἵμαξις [Aretæus]. Lat., *missio* (seu *detractio*) *sanguinis.* Fr., *saignée, émission sanguine.* Ger., *Blutlassen, Blutentziehung.* It., *salasso.* Sp., *sangria.* Syn.: *bleeding.* The withdrawal of blood from the body for therapeutic purposes.—**General b.** Ger., *allgemeine Blutentziehung.* The withdrawal of blood from an artery or a large vein, so as to effect a reduction of the general mass of the blood. See ARTERIOTOMY and VENESECTION.—**Local b.** Ger., *örtliche Blutentziehung.* The abstraction of blood from the diseased part or in its immediate neighborhood, as by scarification, leeching, or cupping.—**Revulsive b.** B. practised for the purpose of arresting internal hæmorrhage. [A, 321.]

BLOOD-VESSEL, n. Blu^{3}d've^{2}s''se^{2}l. Lat., *vas sanguineum.* Fr., *vaisseau sanguin.* Ger., *Blutgefäss.* It., *vaso sanguigno.* Sp., *vaso sanguineo.* Any tubular structure (artery, vein, or capillary) the function of which is to carry blood. [C.]—**Capillary b.-v.** See CAPILLARY (n.).—**Inner b.-v.** See ENDANGEIUM.

BLOOD-WOOD, n. Blu^{3}d'wu^{4}d. See BALOGHIA *lucida.*—**B.-w. of Jamaica.** The *Gordonia hæmatoxylon.* [B, 19.]—**B.-w. of Norfolk Island.** See BALOGHIA *lucida.*—**B.-w. of Queensland.** The *Eucalyptus paniculata.* [B, 19.]—**B.-w. of Victoria.** The *Eucalyptus corymbosa.* [B, 19.]—**B.-w.-tree.** The *Lagerstroemia reginæ,* also the *Croton gossypifolium.* [B, 19, 75.]

BLOODWORT, n. Blu^{3}d'wu^{5}rt. The *Sanguinaria canadensis,* also an old name for the *Rumex sanguineus.* [B, 19, 34.]—**B. family.** The *Hæmodoraceæ.* [B, 75.]

BLOODY, adj. Blu^{3}d'i^{2}. Gr., αἱματηρός, αἱμαλέος. Lat., *sanguineus.* Fr., *sanguin, sanglant.* Ger., *blutig.* It., *sanguinoso.* Sp., *sangrienso.* Consisting of, containing, or stained with, blood; attended with loss of blood (said of operations and of diseases).—**B.-warrior.** The *Cheiranthus Cheiri.* [B, 275.]

BLOOM, n. Blum. Goth., *blôma.* Ger., *Blüthe.* 1. In chemistry, a term applied to certain native metallic oxides, also the mass of wrought iron before it has been rolled into bars, etc. [A, 1, 347.] 2. In botany, a flower, also the state of being in flower. [A, 302.] 3. The delicate powdery coating of certain fruits, flowers, etc. [A, 302.] 4. An attractive appearance of health (in the complexion).—**Antimony b.** See under ANTIMONY.—**Arsenic b.** See ARSENOLITE.

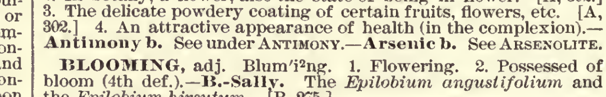
BLOOMING, adj. Blum'i^{2}ng. 1. Flowering. 2. Possessed of bloom (4th def.).—**B.-Sally.** The *Epilobium angustifolium* and the *Epilobium hirsutum.* [B, 275.]

BLOSS (Ger.), adj. Blo^{2}s. Naked; in botany, achlamydeous (*q. v.*).—**B'legung.** Denudation. [L, 46.]

BLOSSBURG SPRINGS, n. Blo^{2}s'bu^{5}rg. A place in Tioga County, Pennsylvania, where there are springs said to resemble the alum springs of Virginia. [A, 363.]

BLOTCH, n. Blo^{2}ch. A popular term for various lesions of the skin, and especially for a group or agglomeration of such lesions.—**Milk-b.** An old term for impetiginous eczema of the face (*crusta lactea*) in infants. [A, 66.]

BLOUNT SPRINGS, n. Blu^{3}nt. A place in Blount County, Alabama, 1,580 feet above the level of the sea, where there are saline sulphurous springs. [A, 363.]



BLOW, v. tr. and intr. Blo. A.-S., *blôvan, blavan.* Lat., *sufflare* (1st def.). Fr., *souffler* (1st def.). Ger., *blasen* (1st def.), *klopfen* (2d def.), *blühen* (4th def.). It., *soffiare* (1st def.). Sp., *soplar* (1st def.). 1. To force air rapidly through the mouth or nose. 2. To breathe rapidly, to pant. 3. To deposit eggs upon (as flies b. meat). 4. To flower. [J.]

BLOW-BALL, n. Blo'ba^{4}l. The *Leontodon taraxacum.* [B, 275.]

BLOW-HOLES, n. pl. Blo'holz. Ger., *Blaselöcher.* The anterior nares of the *Cetacea.* [L, 121.]

BLOWN, adj. Blon. 1. Affected with temporary dyspnœa from exertion. 2. Contaminated with ova (*e. g.*, those of flies). [J.]

BLOWPIPE, n. Blo'pip. Lat., *tubus ferrominatorius.* Fr., *chalumeau.* Ger., *Löthrohr, Blasenrohr.* It., *sampogna, fistola.* Sp., *soplete.* 1. A straight or bent tube, terminating in a small opening, for producing intense heat by blowing the flame of a lamp or candle upon an object in the form of a cone. This cone of flame is white without and blue within, and the most intense heat is pro-

THE OXYHYDROGEN BLOWPIPE. (AFTER ROSCOE AND SCHORLEMMER.)

S, the oxygen tube; W, the hydrogen tube; *a*, *b*, projections from the oxygen tube for keeping it in the centre.

duced just at the tip of the white flame. [A, 1, 321, 347.] 2. Any tube used for inflating a structure.—**Oxyhydrogen b.** Fr., *chalumeau à gaz oxyhydrique.* A device by which hydrogen is burned at the moment of its being allowed to mix with oxygen. Both gases being under pressure, the flame is projected, and the heat of the flame has been calculated by Bunsen to be 2844° F. [A, 9.]

BLUBBER, n. Blu^{3}b'bu^{5}r. The subcutaneous cellular tissue of the whale, together with the fat or oil contained in it. [L, 108.]—**B.-grass.** The *Bromus mollis.* [B, 275.]—**Sea-b's.** See LUCERNARIDA.

BLUE, adj. and n. Blu^2. Gr., κυάνεος (adj.), κύανος (n.). Lat., *cœruleus* (adj.), *cœruleum* (n.). A.-S., *bleoh.* Fr., *bleu.* Ger., *blau* (adj.), *Blau* (n.). It., *bleu, azzurro.* Sp., *azul.* Of a color more or less like that of the clear sky ; as a n., such a color or a substance possessing it. [A, 302.]—**Aldehyde b.** The b. coloring matter produced by the action of aldehyde on a solution of rosaniline in sulphuric acid. [B, 2.]—**Alizarin b.** See under ALIZARIN.—**Alkali b.** A b. dye formed by treating spirit b. with sulphuric acid, precipitating with water, and dissolving the precipitate in a solution of soda. [B, 258.]—**Aniline b.** See under ANILINE, also *Soluble b., Spirit b.*, and *Nicholson's b.*—**Azo-b.** See the major list.—**Azodiphenyl b.** See under AZODIPHENYL.—**Basic b.** See *Opal b.*—**Berlin b.** See *Prussian b.*—**B. baby.** A popular term for a child born with cyanosis.—**B.-bell.** See the major list.—**B'berry.** The genus *Vaccinium.* [B, 34, 75.]—**B'berry root.** The genus *Caulophyllum.* [B.]—**B.-bonnet, B.-bottle.** The *Centaurea cyanus.* [A, 316 ; B, 185 ; L, 56.]—**B.-bush.** The *Ceanothus azureus.* [B, 275.]—**B.-curls.** The *Trichostema dichotomum.* [L, 56.]—**B.-eyes.** The *Veronica chamœdrys.* [B, 275.]—**B.-hearts.** An American name for the genus *Buchnera.* [B, 19.]—**B.-innocence.** The *Houstonia cœrulea.* [B, 275.]—**B.-John.** The *Taxus stricta.* [B, 275.]—**B.-kiss.** The *Scabiosa succisa.* [B, 275.]—**B.-legs.** The *Agaricus personatus.* [B, 275.]—**B. mass.** See *Massa* HYDRARGYRI.—**B.-money.** The *Anemone pulsatilla.* [B, 275.]—**B. pill.** See *Massa* HYDRARGYRI.—**B.-stone.** See COPPER *sulphate.*—**B.-tangles.** The *Vaccinium frondosum.* [B, 19.]—**B. Venus's-pride.** The *Houstonia cœrulea.* [B, 275.]—**B.-weed.** The *Echium vulgare.* [B, 19.]—**China b.** A variety of soluble b. obtained by adding ammonium carbonate to a concentrated solution. [B, 258.]—**Cobalt b.** See *Thénard's b.*—**Copper b.** See under COPPER.—**Cotton b.** See *Soluble b.*—**Diphenylamine b.** See under DIPHENYLAMINE.—**English b.** See COPPER *b.*—**Hoffner's b.** See *Thénard's b.*—**Insoluble aniline b., Insoluble b.** See *Spirit b.*—**Insoluble Prussian b.** Ordinary Prussian b. [B.]—**King's b.** See SMALT.—**Lichen b.** A b. coloring matter produced by the action of air and alkalies on certain lichens. [B, 8.] See LITMUS and ORCHIL.—**Marine b.** Ger., *Marineblau.* A b. dye prepared by treating triphenylenediamine b. with sulphuric acid. [B, 49.]—**Mountain b.** See COPPER *b.*—**Nicholson's b.** The most ordinary form of aniline b. or spirit b. [B, 2, 158.]—**Opal b.** Fr., *bleu de Lyon, violet impérial.* A fine variety of spirit b., consisting of triphenylrosaniline purified by solution in aniline and precipitation with hydrochloric acid, and in other ways. [B, 258 ; Perkin, "Nature," July 30, 1885 (B).]—**Parma b.** A reddish variety of spirit b. [B, 258.]—**Prussian b.** Fr., *bleu de Prusse* (ou *de Berlin*). Ger., *Berlinerblau.* It., *bleu di Prussia, azzurro di Berlino.* Sp., *azul de Prusia.* Syn.: *Berlin b.* Ferric ferrocyanide, $Fe_7C_{18}N_{18} = Fe_4.3Fe(C_3N_3)_2$. See IRON *ferrocyanide.* Soluble P. b. is produced by the addition of potassium ferrocyanide in excess to a solution of a ferric salt. It consists of ferric ferrocyanide in which potassium has been substituted for a certain amount of iron, but its exact composition is unknown. With water it forms a deep-b. solution. [B.]—**Runge's b.** An unstable b. dye formed by the action of chlorinated lime on aniline. [Perkin, *l. c.* (B).]—**Saxony b.** See SMALT.—**Soluble b.** Syn.: *water b., cotton b.* A b. pigment soluble in water, consisting of the ammonium or sodium salt of triphenylrosanilinetrisulphonic acid, $C_{38}H_{28}N_3(SO_2.ONa)_3$, or $C_{38}H_{28}N_3(SO_2.ONH_4)_3$, or, according to Perkin, $[NaSO_3(C_6H_3)NH.C_6H_5]_2 = C = [N(C_6H_5).C_6H_3.NaSO_3]$. [B, 258 ; Perkin, *l. c.* (B).]—**Soluble Prussian b.** See under *Prussian b.*—**Spirit b., Spirit-soluble b.** A b. pigment readily soluble in alcohol, but soluble with difficulty in water. The name is applied to several aniline b's, especially to the salts of triphenylrosaniline and to diphenylamine b. [B, 258.]—**Thénard's b.** Cobalt ultramarine ; a b. pigment containing cobalt and alumina. Its exact composition is not known. [B, 3.]—**Triphenylenediamine b.** See under TRIPHENYLENE*diamine.*—**Turnbull's b.** Ferrous ferrocyanide, $Fe_3.Fe_2(C_3N_3)_4 = Fe_6C_{12}H_{12}$; a dark-blue powder, insoluble in water, formed by the addition of a ferrous salt to a solution of ferricyanide of potassium. [B.]—**Victoria b.** A b. pigment, of which several shades are known, derived from tetramethyldiamidobenzophenone. [B, 258.]—**Water b.** See *Soluble b.*—**Williamson's b.** Insoluble Prussian b. [B.]

BLUEBELL, n. Blu^2'be^{2}l. The *Hyacinthus nonseriptus.* [B, 19.]—**B. of Scotland, Scotch b.** The *Campanula rotundifolia.* [B, 19.]

BLUE LICK SPRINGS, n. See LOWER BLUE LICK SPRINGS and UPPER BLUE LICK SPRINGS.

BLUE RIDGE SPRINGS, n. Blu^2 ri^{2}j spri^{2}ngz. A place in Botetourt County, Virginia, 1,300 feet above the level of the sea, where there are purgative calcic waters containing magnesium, iron, and calcium carbonates, sodium chloride, potassium, sodium, magnesium, and calcium sulphates, alumina, and silicic acid. The combination is highly stable, and the water therefore bears transportation well. [A, 363.]

BLUE SULPHUR SPRINGS, n. Blu^2-su^{3}l'fu^{5}r spri^{2}ngz. A place in Greenbrier County, West Virginia, where there are hot sulphurous springs. [A, 363, 385.]

BLUET (Fr.), n. Blu^6-a. 1. The *Agaricus amethystinus* of Fries. 2. Of the Fr. Cod., the *Centaurea cyanus.* [B, 113, 173.]

BLUETS, n. Blu^2'e^{2}tz. An American name for the *Vaccinium angustifolium* and the *Hedyotis cœrulea* ; also applied to the *Centaurea cyanus.* [B, 19.]

BLÜHEN (Ger.), n. Blu^6'he^{2}n. See ANTHESIS.

BLÜHEND (Ger.), adj. Blu^6'he^{2}nd. Flowering. [L, 43.]

BLÜHEZEIT (Ger.), n. Blu^6'he^2-tzit. The period of flowering in plants. [L, 80.]

BLÜMCHEN (Ger.), n. Blu^{6}m'ch^{2}e^{2}n. 1. See ANTHYLLIUM. 2. Menstruation. [L, 80.]—**B. im Auge.** Leucoma. [L, 80.]

BLUME (Ger.), n. Blum'e^2. A flower. [B.]—**B'nähnlich, B'nartig.** Flower-like, corolline, corollaceous. [B, 123 ; L, 80.]—**B'nbecher.** A calyx. [B, 131.]—**B'nbehältniss.** The receptacle of a flower. [B, 131.]—**B'nbinse.** See the major list.—**B'nblatt.** A petal. [B, 123.]—**B'nblattähnlich, B'nblattartig.** Petaloid. [B, 123.]—**B'nblattlos.** Apetalous. [B, 123.]—**B'nblattrig.** Petalous. [B, 123.]—**B'nblau.** The blue coloring matter of flowers. [B, 131.]—**B'nblüthe.** A flower-bud. [B.]—**B'nblüthig.** See COROLLIFLORUS.—**B'nboden.** The receptacle of a flower. [B, 123.]—**B'nbüschel.** A corymb. [B, 131.]—**B'nbüscheltragend.** Corymbiferous. [B, 131.]—**B'ndecke.** See BLÜTHEN*decke.*—**B'nduft.** See ANTHOSMIAS.—**B'nesche.** See the major list.—**B'nfliege.** See ANTHOMYIA.—**B'nfliegen.** The *Syrphidœ* of Latreille. [L, 30.]—**B'nförmig.** Flower-shaped. [B, 131.]—**B'nfressend.** See ANTHOPHAGOUS.—**B'ngelbe.** See ANTHOXANTHIN.—**B'ngras.** The *Stellaria holostea.* [B, 180.]—**B'ngriffel.** In botany, a style. [B, 131.]—**B'nhülle.** A perianth, perigone. [B.]—**B'nhülse.** An involucre. [B, 131.]—**B'nkelch.** A calyx. [B, 131.]—**B'nknospe.** A flower-bud. [B.]—**B'nkohl.** The cauliflower (*Brassica oleracea*, var. *botrytis* [Linnæus]). [B, 180.]—**B'nkohlgewachs.** See *Cauliflower* EXCRESCENCE.—**B'nkolbe.** A spadix. [L, 43.]—**B'nkopfig.** See ANTHOCEPHALOUS.—**B'nkopf-Krauseminze.** The herb of a species of *Mentha.* [B, 180.]—**B'nkörbchen.** See VELUM *medullare inferius.*—**B'nkoroll.** The *Oculina prolifera.* [B, 180.]—**B'nkronartig.** See *B'nkronenartig.*—**B'nkrönchen.** A corollula. [B, 123.]—**B'nkrone.** A corolla. [B, 123.]—**B'nkronenartig.** Corolliform, corollaceous, corolline. [B, 123.]—**B'nkronenblatt.** A petal.—**B'nkronenblattähnlich.** Petaloid. [L, 43.]—**B'nläuse.** See HOMOPTERA.—**B'nlehre, B'nlese.** See ANTHOLOGY.—**B'nmehl.** Pollen. [L, 43.]—**B'nmundig.** See ANTHOSTOMOUS.—**B'nnelke.** The *Dianthus caryophyllus.* [B, 131.]—**B'nrohr.** The genus *Canna.* [B, 180.]—**B'nroth.** See ANTHERYTHRIN.—**B'nsamig.** See ANTHOSPERMIC.—**B'nscheibe.** The disc of a radiate flower-head. [B, 131.]—**B'nscheide.** A spathe. [B, 131.]—**B'nschirm.** An umbel. [B, 131.]—**B'nständig.** See ANTHODIATE.—**B'nstaub.** Pollen. [B, 131.]—**B'nstiel.** A flower-stalk, a peduncle. [B, 131.]—**B'nstielchen.** A pedicel. [B, 131.]—**B'nstielständig.** In botany, pedunculate. [B, 131.]—**B'nthee.** See *Flos* THEÆ.—**B'nthierchen.** See VORTICELLINA.—**B'ntragend.** See ANTHOPHOROUS.—**B'nträger.** See ANTHOPHORUM.—**B'nwulst.** See TORUS.—**B'nwurzel.** See ANTHORRHIZA.—**B'nzwiebel.** The bulb of a plant. [B, 131.]

BLUMEA (Lat.), n. f. Blum'e^2-a^3. A genus of composite herbs growing in the tropical regions of Asia and Africa. [B.]—**B. aurita.** An East Indian species, resembling *B. lacera* in appearance and properties. [B, 19.]—**B. balsamifera** [De Candolle]. Syn.: *Baccharis salvia* [Loureiro]. A tall species growing in Cochin-China, emitting a camphoraceous odor when bruised and yielding Ngai camphor on distillation. [B, 19, 81, 266.]—**B.-Kampher** (Ger.). See *Ngai* CAMPHOR.—**B. lacera.** An East Indian species, of a strong terebinthaceous odor, used in the treatment of dyspepsia. [B, 19.]

BLUMENBACHIA (Lat.), n. f. Blum-e^{2}n-ba^{3}ch^2'i^2-a^3. A genus of climbing loasaceous plants. [B, 19.]

BLUMENBACHIEÆ (Lat.), n. f. pl. Blum-e^{2}n-ba^{3}ch^2-i(i^2)'e^2-e(a^3-e^2). Of Reichenbach, a subdivision of loasaceous plants, comprising *Blumenbachia* and two other genera. [B, 170.]

BLUMENBINSE (Ger.), n. Blum'e^{2}n-bi^{2}n-ze^2. The genus *Butomus.* [B.]—**Doldentragende B.** The *Butomus umbellatus.* [B, 180.]

BLUMENESCHE (Ger.), n. Blum'e^{2}n-e^{2}sh-e^2. The *Fraxinus ornus.* [B, 131.]—**Europäische B.** See *B.*

BLUMENSTEIN (Ger.), n. Blum'e^{2}n-stin. A place in Switzerland, where there is a chalybeate spring. [L, 49.]

BLUMIG (Ger.), adj. Blum'i^{2}g. See ANTHODES.—**Silberb'.** See ARGYRANTHOUS.

BLUNJEE PAT (Bengal.), n. The *Corchorus olitarius.* [B, 172.]

BLUSH, n. Blu^{3}sh. See RUBOR.

BLUSHWORT, n. Blu^{3}sh'wu^{5}rt. The genus *Erythrœa.* [B, 19.]

BLUT (Ger.), n. Blut. See BLOOD.—**Afterb'fluss.** Hæmorrhage from the anus. [L, 43.]—**Allgemeine B'entleerung.** General bloodletting.—**Aeusseres B'auge.** Hæmorrhage beneath the conjunctiva. [L, 80.]—**Ausgetretenes B.** Extravasated blood. [L, 43.]—**B'abgang.** Hæmorrhage. [L, 80.]—**B'ader.** See the major list.—**B'ähnlich.** Resembling blood. [L, 80.] See HÆMATODES.—**B'albumin.** See *Serum* ALBUMIN.—**B'ampfer.** The *Rumex sanguineus.* [A, 315.]—**B'andrang.** Congestion, determination of blood. [L, 80.]—**B'anhäufung, B'ansammlung.** An accumulation of blood. [L, 43, 80.]—**B'arm.** Anæmic. [L, 80.]—**B'armuth.** Anæmia.—**B'athmung.** See *External* RESPIRATION.—**B'auge.** 1. A blood-shot state of the eye. 2. The *Potentilla palustris.* [A, 355.]—**B'ausfluss.** Hæmorrhage. [A, 355.]—**B'ausleerung.** Hæmorrhage, also bloodletting. [A, 355.]—**B'aussaugung.** A sucking out of blood (as with the mouth, by cupping, etc.). [L, 135.]—**B'austretung, B'austritt.** An escape, effusion, or extravasation of blood. [L, 80, 135.]—**B'auswurf.** See

HÆMOPTYSIS.—**B'bad.** See *Blood* BATH.—**B'bahn.** A blood-channel.—**B'balg.** A sac containing blood. [L, 135.]—**B'bauch.** See ASCITES *cruentus.*—**B'behälter.** A venous sinus. [L, 80.]—**B'behälter der Augenhöhle.** The ophthalmic sinus. [L, 80.]—**B'behälter des Felsenbeins.** The petrosal sinus. [A, 355.]—**B'behälter des Gehirns.** The sinuses of the brain. [A, 355.]—**B'behälter des Herzens.** A cavity of the heart. [L, 30.]—**B'behälter des Hinterhaupts.** The occipital sinus. [L, 80.]—**B'bereltung.** Sanguification, hæmatosis. [L, 46 ; K.]—**B'beschaffenheit.** Any particular state of the blood (as in a diathesis). [L, 30.]—**B'beschreibung.** A description of the blood. [L, 43.]—**B'beule.** See HÆMATOMA.—**B'bewegung.** The circulation of the blood. [K.]—**B'bildung.** See *B'bereitung.*—**B'birn.** The pomegranate. [L, 46.]—**B'bläschen.** A bleb containing blood. [L, 80.]—**B'blase.** 1. Hæmorrhagic pemphigus. 2. A hydatid sac containing blood. [A, 355.]—**B'blaustoff.** See HÆMATOCYANIN.—**B'blume.** The genus *Hœmanthus.* [B, 49.]—**B'braun.** Dark-brown, reddish-brown ; as a n., the brown coloring matter of the blood. [Grossi (L, 50).] — **B'brechen.** See HÆMATEMESIS.—**B'bruch.** See HÆMATOCELE.—**B'buche.** The *Fagus sanguinea.* [B, 180.]—**B'dissolution.** Decomposition of the blood. See SEPTICÆMIA.—**B'druck.** The pressure of the blood within the vessels. [K.] — **B'druckmesser.** See HÆMODYNAMOMETER. — **B'drüsen.** The hæmatopoietic glands. [L, 30.]—**B'duft, B'dunst.** See SPIRITUS *sanguinis.* — **B'durchfall.** Bloody diarrhœa. [L, 80.]—**B'durchschwitzung.** See HÆMODIAPEDESIS.—**B'egel.** A leech. [L, 65, 77, 80.]—**B'egelschnitt.** See BDELLOTOMY.—**B'egelstlch.** A leech-bite. [L, 135.]—**B'elnspritzung.** See INFUSION *of blood.* —**B'elter.** Bloody pus. [L, 46.]—**B'eiterung.** Pyæmia. [A, 317.]—**B'enthaltend.** Sanguiferous, containing blood. [A, 315.] —**B'entleerung, B'entziehung.** Hæmorrhage, also bloodletting. [L, 46.]—**B'entzündung.** An old name for a supposed state of inflammation of the blood. [L, 80.]—**B'er.** A bleeder (a person with the hæmorrhagic diathesis). [L, 30.]—**B'erbrechen.** See HÆMATEMESIS.—**B'erdyskrasie.** See *B'erkrankheit.*—**B'ergiessung, B'erguss.** An effusion of blood. [A, 315 ; L, 135.]—**B'erkrankheit.** The hæmorrbagic diathesis. [L, 57.]—**B'erzeugung.** See *B'bereitung.*—**B'erzeugungsmittel.** A remedy that promotes hæmatosis. [A, 317.]—**B'extravasat.** An extravasation of blood. [L, 135.]—**B'farbig.** Blood-colored. [A, 315.]—**B'farbstoff.** The coloring matter of the blood. [K.]—**B'farbstoffhaltig.** Containing blood pigment. [K.]—**B'faserstoff, B'fiber.** Fibrin. [L, 3.]—**B'fingergras.** The *Digitaria sanguinalis.* [L, 80.]—**B'finne.** See ANTHRAX (2d def.).—**B'fleck.** An ecchymosis. [L, 80.]—**B'flecken.** Petechiæ. [L, 80.]—**B'fleckenkrankheit, B'fleckkrankheit.** Purpura hæmorrhagica. [A, 355.]—**B'fluss.** Hæmorrhage. [L, 80.]—**B'fluss bei Frauen.** Menstruation. [L, 46.]—**B'flüssig.** Affected with hæmorrhage. [L, 46.]—**B'führend.** Conveying blood, sanguiferous. [L, 50.]—**B'fülle.** 1. Full-bloodedness, plethora. [L, 46.] 2. The amount of blood contained in a part. [K, 16.]—**B'gang.** A flow of blood, especially the menstrual flow. [L, 80.]—**B'ganglymphe.** Chyle. [L, 80.]—**B'gas.** See SPIRITUS *sanguinis.*—**B'gaspumpe.** An apparatus devised by Pflüger for exhausting blood of its gases. [K.] —**B'gefäss.** A blood-vessel. [A. 355.]—**B'gefässausbreitung.** The distribution of a blood-vessel. [A, 317.]—**B'gefässgeschwulst.** See ANGEIOMA.—**B'gefässknäuel.** A congeries of blood-vessels. [A, 317.]—**B'gefässknote.** A varix. [L, 43.]—**B'gefässlehre.** Angeiology. [L, 46.]—**B'gefässnetz.** A network of blood-vessels. [A, 317].—**B'gefässneubildung.** See ANGEIOMA.—**B'gefässschlingen.** The ligation of a blood-vessel. [L, 31.]—**B'gefässsystem.** The blood-vascular system. [L, 115.]—**B'gefässverengerung.** Stenosis of a blood-vessel. [L, 50.]—**B'gefässverstopfung.** Obstruction of a blood-vessel.—**B'gehalt.** The amount of blood contained in a part. [K, 16.]—**B'geist.** See SPIRITUS *sanguinis.*—**B'gerinnung.** Coagulation of blood. [L, 57.]—**B'gerinnsel.** A blood-clot. [A, 355.]—**B'geschwindigkeitmesser.** See HÆMODROMOMETER.—**B'geschwulst.** See HÆMATOMA, HÆMATOCELE, and THROMBUS.—**B'geschwür.** A furuncle. [L, 43.]—**B'gewebe.** See TELA *hœmalis.*—**B'gifte.** Antlplastic remedies. [L, 30.]—**B'glitze.** See *B'blume.*—**B.-Goldhahnkäfer.** The *Chrysomela sanguinolenta.* [L, 80.]—**B'gras.** The *Digitaria sanguinalis.* [L, 46.]—**B'harn.** The elements of urine in the blood. [L, 80.]—**B'harnen.** 1. Hæmaturia. [A, 355.] 2. In veterinary medicine, murrain. [L, 46.]—**B'hauch.** See SPIRITUS *sanguinis.*—**B'haut.** A pellicle formed on the surface of coagulated blood. [L, 30.]—**B'hirse.** See *B'gras.*—**B'hof.** See AREA *vasculosa.*—**B'hodensacksbruch.** Hæmatocele of the tunica vaginalis testis. [L, 43.]—**B'höhle.** A venous sinus. [A, 355.]—**B'holz.** Logwood. [B.]—**B'husten.** See HÆMOPTYSIS.—**B'icterus.** See *Hœmatogenous* ICTERUS.—**B'ig.** Bloody, sanguineous. [L, 80.]—**B'igel.** See *B'egel.*—**B'igelansetzer.** A leech-glass. [L, 50.]—**B'igwerden.** Hæmorrhage. [L.]—**B'injection.** See INFUSION *of blood.*—**B'inseln.** See BLOOD-*islands.*—**B'kirsche.** The *Cerasus austera.* [B, 180.] —**B'klee.** The *Trifolium incarnatum.* [L, 46.]—**B'klumpen.** A clot of blood. [L, 80.]—**B'klystier.** A rectal injection of blood. [Kleinwächter (A, 319).]—**B'kohl.** The *Dioscorea sativa.* [L, 80.]—**B'koralle.** Red coral (*Corallium rubrum* [Lamarck]). [B, 180.] —**B'körnchen.** A blood-corpuscle. [L, 43.]—**B'körnchenstoff.** Hæmoglobin. [L, 50.]—**B'körperchen.** A blood-corpuscle. [J.] —**B'kopfgeschwulst.** See CEPHALÆMATOMA.—**B'krankheit.** 1. A dyscrasia. 2. Any anomaly of menstruation. 3. Hæmorrhoids. [L, 30.] 4. A disease of cattle and sheep characterized by a bloody flux. [A, 315.]—**B'kraut.** The *Geranium sanguineum*, the *Lithospermum arvense*, the *Polygonum aviculare*, the *Sanguisorba officinalis*, and the *Scleranthus perennis.* [B, 180.]—**B'krautwurz.** The *Spirœa ulnaria.* [L, 30.]—**B'krebs.** Medullary cancer. [A, 355.]—**B'krelslauf.** The circulation of the blood. [K.] —**B'kropf.** An enlargement of the thyreoid gland accompanying menstruation. [A, 355.]—**B'krystalle.** See *Blood* CRYSTALS.—**B'kuchen.** A clot of blood. [L, 115.]—**B'kügelchen.** A blood-corpuscle. [L, 80.]—**B'kügelchenstoff.** Hæmoglobin. [L.]—**B'lassen.** Bloodletting. [A, 355.]—**B'lauf.** Dysentery. [L, 46.] —**B'lauge.** Blood-lye. [L, 46.]—**B'laugensalz.** Lit., salt of blood-lye ; a name applied to the potassium cyanides, because they were formerly prepared from dried blood. [B.]—**B'läuse.** See APHIDES. —**B'leer.** Bloodless, exsanguinated, anæmic. [A, 315.]—**B'leere, B'leerheit.** Anæmla. [A, 315.]—**B'lehre.** See HÆMATOLOGY.—**B'leiter.** See *B'behälter.*—**B'leiter der harten Hirnhaut.** The sinuses of the dura mater. [A, 355.]—**B'leiternerv, B'leiternerve.** The recurrent branch of the ophthalmic nerve. [A, 317.]— —**B'ling.** The *Agaricus deliciosus.* [L, 43.]—**B'los.** Bloodless, anæmic. [A, 355.]—**B'losigkeit.** Anæmia. [L.]—**B'lüftung.** Aeration of the blood. [J.]—**B'lymphe.** Blood-serum. [L, 80.]—**B'maal.** An ecchymosis. [L, 80.]—**B'machend.** Hæmatopoietic. [L, 43.]—**B'machung.** Hæmatosis. [L, 80.]—**B'mal.** A nævus. [L, 37.]—**B'mangel.** A deficiency of blood. [L, 80.]—**B'melken.** The discharge of bloody milk in cattle or sheep. [L, 30.] — **B'membran.** See ENDANGEIUM. — **B'messen, B'messkunst.** See HÆMATOMETRY. — **B'mole.** See *Blood* MOLE. — **B'molke.** Bloody milk. [L, 80.]—**B'nabelbruch.** See HÆMATOMPHALOCELE.—**B'napf, B'näpfchen.** A bleeding-basin. [L, 46.]—**B'netzen.** Hæmaturia (in cattle). [L, 30, 46.]—**B'ödem.** See HÆMATŒDEMA.—**B'öl.** An oil obtained by the dry distillation of blood. [L, 30.]—**B'pfirsch.** The nectarlne. [L, 46.]—**B'pfropf.** A thrombus. [L, 80.]—**B'phlegma.** Blood-serum. [L, 80.]—**B'pilz.** The *Micrococcus prodigiosus.* [A, 396.]—**B'plättchen, B'platte.** See HÆMATOBLAST.—**B'pocken.** Pustules containing blood. [L, 30.]—**B'pucken.** See HÆMOPTYSIS.—**B'pumpe.** See BDELLOMETER.—**B'pünktchen.** Punctate ecchymoses. [L, 80.]—**B'punkte.** See BLOOD-*islands.*—**B'regungen.** See HÆMATERETHICA. — **B'relch.** Plethoric. [A, 315.] — **B'reichthum.** Plethora. [L, 30.]—**B'reinigend.** Purifying to the blood. [L, 80.] —**B'reinigungsmlttel.** A blood-purifying remedy. [A, 315.] —**B'rose.** See *B'koralle.*—**B'roth.** Blood-red ; as a n., hæmatosin. [K ; L, 46.]—**B'ruhr.** Dysentery. [L, 80.]—**B'rünstig.** Hæmorrhagic. [L, 80.]—**B'sack.** A cyst containing blood, also an hæmatocele. [E.]—**B'saugemesser.** See BDELLOMETER.—**B'saugen.** An abstraction of blood by suction. [L, 57.]—**B'sauger.** A leech. [L, 80.]—**B'säule.** A column of blood in a vessel. [K.]—**B'säure.** Pseudothiocyanic acid. [B, 2.] See THIOCYANIC ACID.—**B'schärfe.** Acridity of the blood. [A, 317.]—**B'schau.** See HÆMATOSCOPY.—**B'scheu.** See HÆMATOPHOBIA.—**B'schlag, B'schlagfluss.** 1. Sanguineous apoplexy. [L, 80.] 2. See *B'harnen* (2d def.).—**B'schleimfluss.** A muco-sanguineous discharge. [L, 80.]—**B'schwächung.** Impoverishment of the blood. [L, 50.]—**B'schwamm.** 1. Fungus hæmatodes. [E.] 2. Surgeon's agaric. [L, 80.]—**B'schwär.** See *B'geschwür.*—**B'schweiss.** See HÆMATIDROSIS.—**B'schwelle.** Blood spavin. [L, 46.]—**B'schwiele.** See VIBEX.—**B'schwitzen.** See HÆMATIDROSIS.—**B'senkung.** See HYPOSTASIS.—**B'serum.** Blood-serum. [L, 80.]—**B'seuche.** See *Apoplectic* ANTHRAX.—**B'sieb.** See PARENCHYMA.—**B'spaltpilze.** *Fungi* which have gained entrance into the circulation of a healthy person, but soon die. [A, 396.]—**B'spat, B'spath.** See *B'schwelle.*—**B'speien, B'spucken.** Hæmoptysis. [L, 57.]—**B'spur.** A blood-stain. [L, 57.]—**B'staar.** See CATARACTA *cruenta.* —**B'statten.** See *B'harnen* (2d def.).—**B'staufe.** See *B'seuche.*—**B'stauung.** A stasis of blood. [K.]—**B'stein.** See HÆMATITES and PHLEBOLITH.—**B'stiel.** The *Galium verum.* [L, 43.]—**B'stillend.** Hæmostatic. [A, 315.]—**B'stillung.** The arrest of hæmorrhage. [A, 355.]—**B'stillungsmittel.** A hæmostatic. [L.]—**B'stockung.** Stasis of blood. [L, 80.]—**B'stoff.** Hæmatin. [L.]—**B'streif, B'strieme.** See VIBEX.—**B'stropfen.** The genus *Sanguisorba.* [B, 180.]—**B'stuhl.** Bloody diarrhœa. [L, 80.]—**B'sturz.** Hæmorrhage, also a disease of horses characterized by profuse hæmorrhage from the nose. [L. 30. 80.]—**B'sucht.** See *B'erkrankheit.*—**B'sverwandtschaft.** Consanguinity. [L. 57.]—**B'system.** The circulatory system. [L, 80.]—**B'tausch.** Transfusion of blood. [L. 46.]—**B'thätigkeit.** Hæmatosis. [A, 355.]—**B'theilchen.** A blood-corpuscle. [J.]—**B'thermometer.** A clinical thermometer. [L, 30.]—**B'thier.** See HÆMATOBIUM.—**B'treibend.** Causing hæmorrhage. [L, 50.]—**B'trinken.** The drinking of blood as a remedial measure. [L. Landois (A, 319).]—**B'tröpfeln.** An oozing of blood. [L, 80.]—**B'tröpfschen.** The *Sanguisorba officinalis.* [L, 30.]—**B'überfluss.** Hyperæmia. [L, 80.]—**B'überleitung.** Transfusion of blood. [L, 43.]—**B'umlauf, B'umtrieb.** The circulation of the blood. [L, 80.]—**B'ung.** Hæmorrhage. — **B'ungssucht.** See *B'erkrankheit.* — **B'unterlaufen, B'unterlaufung.** An ecchymosis. [L, 80.]—**B'vene.** A vein. [L, 80.]—**B'verarmung.** Deterioration of the blood. [A, 317.]—**B'verdickung.** Inspissation of the blood. [L, 43.]—**B'verdünnung.** Attenuation of the blood. [L, 80.]—**B'verlust.** Loss of blood. [L, 57.]—**B'vermolkung.** See HÆMATORRHOSIS.—**B'voll.** Plethoric. [L, 50.]—**B'wage.** See HÆMODYNAMOMETER. —**B'wärme.** The temperature of the blood. [K.]—**B'wasser.** Blood-serum. [L, 115.]—**B'wassergefäss.** A lymphatic vessel. [L, 46.]—**B'wässerig.** Serous. [K.]—**B'wässerigkeit.** Serosity. [A, 315.]—**B'weinen.** Bloody lacrymation. [R. Arndt (A, 319).]—**B'welle.** A wave of blood. [K, 13.] — **B'wurzel.** The *Sanguinaria canadensis.* [A, 247.] — **B'wurzelessig.** See *Acetum* SANGUINARIÆ.—**B'wurzeltinktur.** See *Tinctura* SANGUINARIÆ.—**B'zähler.** See HÆMOCYTOMETER.—**B'zelle.** A blood-corpuscle. [L, 30.]—**B'zersetzung.** Decomposition of the blood. [L, 30.] See SEPTICÆMIA.—**B'zufuhr.** The blood-supply of a part. [K.] —**B'zwang.** Dysentery. [L, 80.]—**Canadisches B'kraut.** The *Sanguinaria canadensis.* [A, 355.]—**Elliptischer B'leiter des Hirnanhangs.** See *Circular* SINUS.—**Farblose B'körperchen** (oder **B'kügelchen**). The white blood-corpuscles. [J.] — **Felsenb'leiter.** The petrosal sinus. [L, 31.]—**Flüssiges B'wurzelextrakt.** See *Extractum* SANGUINARIÆ *fluidum.* — **Gebärmutterb'fluss.** Uterine hæmorrhage. [L, 43.]—**Gefarbte B'zellen.** The red blood-corpuscles. [J.]—**Gelbes B'laugensalz.** Potassium ferrocyanide. [B.]—**Gerader B'hälter** (oder **B'leiter**). The straight sinus. [L, 80.] — **Geronnenes B.** Coagulated blood. [K.]—**Grundbeinb'leiter.** See *Occipital* SINUSES. —**Hinterer Grundbeinb'leiter.** See *Posterior occipital* SI-

NUS.—**Hinterhauptsb'leiter.** See *Occipital* SINUSES.—**Hirnb'fluss.** Cerebral hæmorrhage. [L, 43.]—**Inneres B'auge.** Hæmorrhage in the interior of the eye. [L, 80.]—**Keilbeinb'leiter.** See *Transverse* SINUS.—**Körnige B'körperchen.** See *Granular* BLOOD-CORPUSCLES.—**Kranzförmiger B'leiter des Hirnanhangs, Kreisförmiger B'behälter des Ridley.** See *Circular* SINUS.—**Künstlicher B'sauger.** An artificial leech. [L, 80.]—**Länglichster B'behälter.** See *Longitudinal* SINUS.—**Lungenb'fluss.** Pulmonary hæmorrhage. [L, 43.]—**Monatliches B.** Menstruation, the menstrual flow. [A, 355.]—**Oberer Felsenb'leiter, Oberer Pyramidenbeinb'leiter.** See *Superior petrosal* SINUS.—**Oberer Sichelb'leiter.** See *Superior longitudinal* SINUS.—**Oertliche B'entziehung.** Local bloodletting.—**Positive B'welle.** An arterial wave of blood; the movement of blood in an artery at each systole of the heart. [K, 13.]—**Pulsirende B'beule.** A false aneurysm. [D.]—**Pyramidenb'leiter.** See *Petrosal* SINUSES.—**Rothes B'laugensalz.** Potassium ferricyanide. [B.]—**Rückenb'.** See *B'harnen* (2d def.).—**Scharlachrothe B'blume.** The *Hœmanthus coccineus.* [B, 180.]—**Schwammichter B'behalter.** The cavernous sinus. [L.]—**Senkrechter B'behälter.** See *Straight* SINUS.—**Sichelb'leiter, Sichelförmiger B'lelter** (oder **B'behälter**). See *Superior longitudinal* SINUS and *Inferior longitudinal* SINUS.—**Weiblicher B'gang.** Menstruation. [L, 43.]—**Weisse B'körperchen.** White blood-corpuscles. [J.]—**Weisses B.** Chyle. [L.]

BLUTADER (Ger.), n. Blut'a^3-de^{2}r. A blood-vessel, especially a vein. [A, 315.]—**Ablaufenb'n.** The emissary veins. [L, 117.]—**Achselb'.** The axillary vein. [L.]—**Aeussere Drosselb'.** The external jugular vein. [L.]—**Aeussere Hüftb'.** The external iliac vein. [L.]—**Aeussere Kopfb'.** The facial vein. [L.]—**Aeussere Rosenb'.** The external saphenous vein. [L.]—**Aeussere Rückenb'n der Wirbelsäule.** The external posterior spinal veins. [L.]—**Aeussere Wirbelb'.** The external cervical vein. [L.]—**Aufsteigende Hohlb'.** The inferior vena cava. [L.]—**Aufsteigende Lendenb'.** The lumbo-costal vein. [L.]—**Augenb'n.** The ophthalmic veins. [L.]—**Augenhöhlenb'n.** The orbital veins.—**Augenlidb'n.** The palpebral veins.—**Bauchdeckenb',** The epigastric vein. [L.]—**Beckenb'.** The internal iliac vein. [L.]—**Blendungsb'n.** The ciliary veins.—**B'ausdehnung.** Dilatation of a vein. [L, 80.]—**B'bruch.** Varicocele. [L, 43.]—**B'entzündung.** Phlebitis. [E.]—**B'eröffnung.** Venesection. [L, 135.]—**B'gang.** The ductus venosus. [L, 80.]—**B'geschwulst.** A varix. [E.]—**B'klappe.** A valve of a vein. [L, 80.]—**B'knoten.** A varix. [L, 80.]—**B'lein.** A venule. [L, 80.]—**B'öffnung.** Venesection. [L, 80.]—**B'presse.** See *Aderbinde.*—**B'strang.** A varix. [L. 135.]—**Brustb'n.** The mammary veins.—**Centralb' der Netzhaut.** The central retinal vein. [L.]—**Drosselb'n.** The jugular veins.—**Ellenbogenhauptb'.** The basilic vein. [L.]—**Fingerb'n.** The digital veins. [L.]—**Gaumenb'.** The palatine vein. [L.]—**Gehörb'n.** The auditory veins.—**Gekrösb'n.** The mesenteric veins.—**Gemeinschaftliche Beckenb'.** The common iliac vein. [L.]—**Gemeinschaftliche Drosselb'.** The external jugular vein. [L.]—**Gemeinschaftliche Geslchtsb'.** The facial vein. [L.]—**Gemeinschaftliche Hüftb'.** The common iliac vein. [L.]—**Gemeinschaftliche Schamb'.** The common pudic vein. [L.]—**Gesichtsb'n.** The facial veins.—**Grosse Gekrösb'.** The superior mesenteric vein. [L.]—**Grosse Herzb'.** The right coronary vein of the heart. [L.]—**Grosse Hirnb'n.** The deep cerebral veins. [L.]—**Grosse Kranzb' des Herzens.** See *Grosse Herzb'.*—**Grosse Rosenb'.** The internal saphenous vein. [L.]—**Halbunpaare B'n, Halbunpaarige B'n.** The hemiazygous veins. [D; L, 115.]—**Halsb'n.** The cervical veins.—**Hauptb' des Beckens.** The internal iliac vein. [L.]—**Hautb' des Halses.** The anterior jugular vein. [L.]—**Herzb'n.** The cardiac veins.—**Hintere Blendungsb'n.** The posterior ciliary veins. [L.]—**Hintere Gesichtsb'.** The posterior facial vein. [L.]—**Hintere Rosenb'.** The external saphenous vein. [L.]—**Hintere Schläfenknochenb'.** The posterior temporal vein. [L.]—**Hintere Siebbeinb'.** The posterior ethmoidal vein. [L.]—**Hinterhauptknochenb'.** See VENA *diploica occipitalis.*—**Hirnb'n.** The cerebral veins.—**Hohlb'.** The vena cava.—**Hüftb'n.** The iliac veins.—**Innere Brustb'.** The internal mammary vein. [L.]—**Innere Drosselb'.** The internal jugular vein. [L.]—**Innere Gehörb'n.** The internal auditory veins. [L.]—**Innere Kieferb'.** The internal maxillary vein. [L.]—**Innere Rosenb'.** The internal saphenous vein. [L.]—**Innere Samenb'.** The internal spermatic vein. [L.]—**Innere tiefe Hirnb'n.** The deep cerebral veins. [L.]—**Kammerb'n.** The veins of the ventricles of the heart.—**Kaumuskelb'n.** The masseteric veins. [L.]—**Kieferb'n.** The maxillary veins.—**Kleine Gekrösb'.** The inferior mesenteric vein. [L.]—**Kleine Herzb'n.** The anterior cardiac veins. [L.]—**Kleine Rosenb'.** The external saphenous vein. [L.]—**Kleinste Herzb'n.** See VENÆ *cordis minimœ.*—**Kniekehlb', Kniekehleb'.** The popliteal vein. [L.]—**Kranzb'.** A coronary vein. [L.]—**Kreuzbeinb'n.** The sacral veins.—**Kurze Rosenb'.** The external saphenous vein. [L.]—**Leberb'.** The hepatic vein. [L.]—**Lendenb'n.** The lumbar veins. [L.]—**Linke Kammerb'.** The posterior vein of the left ventricle of the heart. [L.]—**Linke Vorhofb'.** The oblique vein of the left auricle of the heart. [L, 117.]—**Lippenb'n.** The labial veins.—**Lungenb'n.** The pulmonary veins. [L.]—**Milzb'.** The splenic vein. [L.]—**Mittelarmb'.** The median vein of the arm. [L.]—**Mittlere Drosselb'.** The anterior jugular vein. [L.]—**Mittlere Herzb'.** The middle cardiac vein. [L.]—**Mittlere Kreuzbeinb'.** The middle sacral vein. [L.]—**Mittlere Schilddrüsenb'.** The middle thyreoid vein. [L.]—**Mittlere Schläfenb'.** The middle temporal vein. [L.]—**Mundb'n.** The buccal veins. [L.]—**Nabelb'.** The umbilical vein. [L.]—**Nackenb'n.** The cervical veins.—**Nebennierenb'n.** The supra-renal veins. [L.]—**Nierenb'.** The renal vein. [L.]—**Oberaugenhöhlenb'.** The supra-orbital vein. [L.]—**Obere Augenlidb'n.** The superior palpebral veins. [L.]—**Obere Gekrösb'.** The superior mesenteric vein. [L.]—**Obere Hirnb'n.** The superior cerebral veins. [L.]—**Obere Lippenb'n.** The superior labial veins. [L.]—**Obere Magenb'.** The superior gastric vein. [L.]—**Obere Schilddrüsenb'.** The superior thyreoid vein. [L.]—**Oberflächliche Schläfenb'.** The superficial temporal vein. [L.]—**Oberste Zwischenrippenb'.** The superior intercostal vein. [L.]—**Ohrb'n.** The auricular veins.—**Quere Gesichtsb'.** The transverse facial vein. [L.]—**Quere Halsb'.** The transverse cervical vein. [L.]—**Quere Schulterblattb'.** The transverse scapular vein. [L.]—**Rechte Kranzb' des Herzens.** The right coronary vein of the heart. [L.]—**Rosenb'n.** The saphenous veins.—**Samenb'n.** The spermatic veins.—**Schamb'n.** The pudic veins.—**Schenkelb'.** The femoral vein. [L.]—**Schilddrüsenb'n.** The thyreoid veins.—**Schläfenknochenb'n.** The temporal veins.—**Schlundkopfb'.** The pharyngeal vein. [L.]—**Schlüsselbeinb'.** The subclavian vein. [L.]—**Seitliche Kreuzbeinb'n.** The lateral sacral veins. [L.]—**Siebbeinb'n.** The ethmoidal veins.—**Speichenhauptb'.** The cephalic vein. [L.]—**Stirnb'.** The frontal vein. [L.]—**Stirnknochenb'.** See VENA *diploica frontalis.*—**Thränenb'.** The lacrymal vein. [L.]—**Thränensackb'.** The vein of the lacrymal sac. [L.]—**Tiefe Gesichtsb'.** The deep facial vein. [L.]—**Tiefe Nackenb'.** The deep cervical vein. [L.]—**Umgeschlagene Hüftbb'.** The circumflex iliac vein. [L.]—**Unpaare B.** An azygous vein. [L.]—**Untere Augenb'.** The inferior ophthalmic vein. [L.]—**Untere Gekrösb'.** The inferior mesenteric vein. [L.]—**Untere Hirnb'n.** The inferior cerebral veins. [L.]—**Untere Hohlb'.** The inferior vena cava. [L.]—**Untere Lippenb'n.** The inferior labial veins. [L.]—**Untere Schilddrüsenb'.** The inferior thyreoid vein. [L.]—**Unterkieferb'.** The inferior maxillary vein. [L.]—**Unterkinnb'.** The submental vein. [L.]—**Unterschlüsselbeinb'.** The subclavian vein. [L.]—**Vordere Blendungsb'n.** The anterior ciliary veins. [L.]—**Vordere Drosselb'.** The anterior jugular vein. [L.]—**Vordere Gesichtsb'.** The anterior facial vein. [L.]—**Vordere innere Kieferb'.** The deep facial vein. [L.]—**Vordere Ohrb'n.** The anterior auricular veins. [L.]—**Vordere Schläfenknochenb'.** The anterior temporal vein. [L.]—**Vordere Siebbeinb'.** The anterior ethmoidal vein. [L.]—**Vorhofb'n.** The veins of the auricles of the heart.—**Wirbelb'.** The vertebral vein. [L.]—**Wirbelkieferb'n.** The basivertebral veins. [L.]—**Zungenb'.** The lingual vein. [L.]—**Zwerchfellb'n.** The diaphragmatic veins. [L.]—**Zwischenrippenb'n.** The intercostal veins. [L.]

BLUTAGE (Fr.), n. Blu^{6}t-a^{3}zh. The process of bolting flour. [A, 385.

BLÜTCHEN (Ger.), n. Blu^{6}t'ch^{2}e^{2}n. A floret. [B, 123.]

BLÜTHE (Ger.), n. Blu^{6}t'e^2. A flower. [B.]—**B'nauflösung.** See ANTHOLYSIS.—**B'nauge.** See *B'nknospe.*—**B'naxe.** See *Flower-axis.*—**B'nblatt.** A petal. [B, 245.]—**B'nboden.** The receptacle of a flower. [B, 198.]—**B'ndeckblatt.** A bract. [B, 198.]—**B'ndecke.** A perianth. [B, 123.]—**B'ndeckenlage.** Æstivation. [B, 123.]—**B'ndiagramm.** See *Floral* DIAGRAM.—**B'ndoldig.** Umbellated. [A, 315.]—**B'nformel.** See *Floral* FORMULA.—**B'nfrucht.** See AMPHANTHIUM.—**B'nhüllblatt.** A sepal. [B, 123.]—**B'nhülle.** A perigone or perianth. [B, 49, 123.]—**B'nkelch.** A calyx. [A, 315.]—**B'nknäuel.** In botany, a glomerulus. [B, 123.]—**B'nknopf.** See ALABASTRUS.—**B'nknospe.** A flower-bud. [B, 123.]—**B'nknospenlage.** Æstivation. [B, 123.]—**B'nkopf.** A head (*capitulum*) of flowers. [B, 123.]—**B'nkorb, B'nkörbchen.** See CALATHIDIUM.—**B'nkrone.** A corolla. [B, 245.]—**B'nkuchen.** See CŒNANTHIUM.—**B'nlager.** A clinanthium or phoranthium. [B, 123.]—**B'nlos.** Flowerless; cryptogamous. [B.]—**B'npflanzen.** Flowering plants. [B.]—**B'npolster.** The torus, or disc, of a flower. [B, 270.]—**B'nscheide.** A spathe. [B, 123.]—**B'nscheidig.** Spathaceous. [B, 123.]—**B'nschweif.** See ANTHURUS.—**B'nstand.** See the major list.—**B'nständig.** Floral. [B, 123.]—**B'nstaub.** Pollen. [B, 245.]—**B'nstengel, B'nstiel.** The stalk, or peduncle, of a flower. [A, 315; B, 123.]—**B'nstielchen.** A floral pedicel. [B, 123.]—**B'nstielständig.** In botany, peduncular. [B, 123.]—**B'nstielvertretend.** See PEDUNCULANEUS.—**B'nstrauss.** A thyrse. [B, 123.]—**B'ntanze.** The *Florideœ.* [B, 49.]—**B'ntragend.** Bearing flowers. [B, 123.]—**B'ntraube.** A raceme. [B, 131.]—**B'nverein.** See the major list.—**B'nzeit.** The time of flowering. [B, 123.]

BLUTHEIL (Ger.), n. Blut'hil. The genus *Androsœmum.* [B, 180.]—**Gebrauchliches B.** The *Androsœmum officinale.* [B, 180.]

BLÜTHENSTAND (Ger.), n. Blu^{6}t'e^{2}n-sta^{3}nd. Inflorescence. [B, 35.]—**Aehriger B.** Inflorescence in the form of a spike. [B, 35.]—**B'achse.** The axis of inflorescence. [B, 35.]—**Botrytischer B.** Botrytic inflorescence. [B, 123.]—**Cymöser B.** Inflorescence in the form of a cyme. [B, 35.]—**Doldiger B.** Inflorescence in the form of an umbel. [B, 123.]—**Einfacher B.** See *Simple* INFLORESCENCE.—**Rispiger B.** Inflorescence in the form of a panicle. [B.]—**Traubiger B.** Inflorescence in the form of a raceme. [B, 35.]—**Trugdoldiger B.** See *Cymöser B.*—**Zusammengesetzter B.** See *Compound* INFLORESCENCE.

BLÜTHENVEREIN (Ger.), n. Blu^{6}t'e^{2}n-fe^{2}r-in. See SYNGENESIA.—**Gleichmässiger B.** See SYNGENESIA *œqualis.*—**Getrenter B.** See SYNGENESIA *segregata.*—**Nothwendiger B.** See SYNGENESIA *necessaria.*—**Ueberflüssiger B.** See SYNGENESIA *superflua.*—**Vergeblicher B.** See SYNGENESIA *frustranea.*

BLÜTHESCHE (Ger.), n. Blu^{6}t'e^{2}sh-e^2. See BLUMENESCHE.

BLYSMUS (Lat.), n. m. Bli^{2}z(blu^{6}s)'mu^{3}s(mu^{4}s). A genus of the *Cyperaceœ* (tribe *Scirpeœ*), including European and Asiatic species. [B, 19.]

BLYXA (Lat.), n. f. Bli^{2}x(blu^{6}x)'a^3. A genus of acaulescent aquatic plants of the order *Hydrocharidaceœ.* [B, 19.]

BOA (Lat.), n. f. Bo(bo^2)'a^3. Written also *bova.* 1. An ancient term for measles or small-pox. [Pliny (G).] 2. Syphilis. [G.]—**B. lansa.** The fruit of an unknown tree of Java, of about the size of a cherry, which emits a bitter white juice. [L, 105.]—**B. ma-**

lacca, **B. nellica.** A fruit, of about the size of a hen's egg, eaten in Java with tea. [L, 105.]

BOÆ (Lat.), n. f. pl. Bo(bo²)'e(a³-e²). Sp., *boas.* See BOA.

BOAK (Ar.), n. A variety of leprosy. [L, 83.]

BOALA, n. A Transylvania name for a disease of the same character as Scherlievo (*q. v.*). [G.]

BOARDAGOOMOODOO (Teloogoo), n. The *Benincasa cerifera.* [B 172.]

BOARMIDÆ (Lat.), n. f. pl. Bo-a³rm'i²d-e(a³-e²). A family of the *Geometridæ.* [L, 248.]

BOASI, n. The leprosy of Surinam. [L, 109.]

BOAST, n. An Angola name for an ulceration which appears in elephantiasis. [L, 109.]

BOA-TAM-PAIJANG, n. See BUNGTALAI.

BOATLIP, n. Bo³t'li²p. See SCAPHYGLOTTIS.

BOAT-SHAPED, adj. Bo³t'shapd. See SCAPHOID.

BOB, n. The *Laurus nobilis.* [L, 105.]

BOBEÆ (Lat.), n. f. pl. Bo²b'e²-e(a³-e²). A subtribe of *Vanguerieæ*, made by Miquel, comprising the single genus *Bobea.* [B, 170.]

BOBENFIST (Ger.), n. Bob'e²n-fi²st. The *Lycoperdon bovista.* [L, 135.]

BOBERELLE (Ger.), n. Bob-e²r-e²l'le². The *Physalis alkekengi.* [B, 180.]

BOBERRI, n. Turmeric. [L, 119.]

BOBINE (Fr.), n. Bo-ben. An induction coil. [A, 385.]

BOBRA (Teloogoo), n. The *Dolichos sinensis.* [B, 172.]

BOBUA (Lat.), n. f. Bo²b'u²(u⁴)-a³. A genus of combretaceous plants, now referred to *Symplocos.* [B, 19.]

BOCAGEÆ (Lat.), n. f. pl. Bo-ka(ka³)'je²(ge²)-e(a³-e²). Fr., *bocagées.* Of Reichenbach, Endlicher, and Lindley, a subsection, tribe, or suborder of anonaceous plants, including the genus *Bocagea.* [B, 170.]

BOCCHEGGIANO (It.), n. Bok-ke²d-ji²-a³'no. A place in Tuscany, where there is a saline and chalybeate spring. [L, 49.]

BOCCO, n. Buchu (*q. v.*). [A, 385.]

BOCCONIA (Lat.), n. f. Bok-kon'i²-a³. Fr., *bocconie.* A genus of papaveraceous plants. [A, 385; B, 19.]—**B. frutescens** [Linnæus], **B. quinquifolia** [Mönch]. Fr., *bocconie arbrisseau.* A shrub growing in the West Indies, the leaves of which are vulnerary and contain an acrid juice used as a purgative and anthelminthic. [B, 173, 180.]

BOCCONIEÆ (Lat.), n. f. pl. Bok-kon-i(i²)'e²-e(a³-e²). Of Reichenbach and others, a division of papaveraceous plants. [B, 170.]

BOCHETUM (Lat.), n. n. Bo-ke(ch²a)'tu³m(tu⁴m). Fr., *bochet.* The name of an old decoction of various sudorifics. [A, 325.]

BOCHIA (Lat.), n. f. Bo'ki²(ch²i²)-a³. See BOCIA.

BOCHIUM (Lat.), n. n. Bo'ki²(ch²i²)-u³m(u⁴m). See BOCIUM.

BOCHO, n. Buchu (*q. v.*). [A, 385.]

BOCIA (Lat.), n. f. Bo(bo²)'si²(ki²)-a³. An ancient name for a sort of glass subliming vessel. [A, 325.]

BOCIUM (Lat.), n. n. Bo(bo²)'si²(ki²)-u³m(u⁴m). An old term under which vicarious menstruation and goître seem to have been included; a disease of women beginning with bullæ followed by a fleshy growth on or beneath the skin. [Paracelsus (H).]

BOCK (Ger.), n. Bo²k. See TRAGUS; in the pl., *Böcke*, see *B'käfer.*—**B'käfer.** The CERAMBYCIDÆ. [L.]—**B'raute.** The *Galega officinalis.* [L.]—**B'sauge.** See ÆGILOPS.—**B'säure.** Hircic acid. [A, 324.]—**B'sbart.** See the major list.—**B'sbeere.** The *Ribes nigrum.* [B, 180.]—**B'sbeerstrauch.** The *Rubus cæsius.* [L, 80.]—**B'sbohnenkraut.** The leaves of *Menyanthes trifoliata.* [B, 180.]—**B'sdorn.** See the major list.—**B'sfett.** Goat's fat. [L, 80.] See SEVUM *hircinum.*—**B'sgeilen.** The *Hinanthoglossum hircinum.* [L, 80.]—**B'sgeruch, B'sgestank.** The odor of the armpits. [L, 43, 80.]—**B'shaare.** The hairs that sometimes grow on the external ear. [L, 115.]—**B'shodchen.** The root of *Hinanthoglossum hircinum.* [B, 180.]—**B'shorn.** See the major list.—**B'smelde.** The *Chenopodium olidum.* [B, 180.]—**B'spetersilie.** The *Pimpinella saxifraga.* [B, 180.]—**B'stalg.** See BOCK*sfett.*—**B'stimme.** Ægophony. [L, 80.]—**B'storchschnabel.** The *Geranium robertianum.* [L, 80.]—**B'sschmalz.** See BOCK*sfett.*

BOCKLET (Ger.), n. Bo²k'le²t. A place in Bavaria, where there are chalybeate and sulphurous springs. [A, 385; L, 105.]

BOCKSBART (Ger.), n. Bo²ks'ba³rt. The *Spiræa ulmaria.* [B, 180.]—**Grosser B.** The *Tragopogon major.* [B, 180.]—**Lauchblättriger B.** The *Tragopogon porrifolius.* [B, 180.]

BOCKSDORN (Ger.), n. Bo²ks'do²rn. The *Astragalus exscapus.* [L, 80.]—**Afrikanischer B.** The *Lycium Afrum.* [B, 180.]—**Chinesischer B.** The *Lycium chinense.* [B, 180.]—**Europäischer B.** The *Lycium europæum.* [B, 180.]

BOCKSHORN (Ger.), n. Bo²ks'ho²rn. The *Trigonella fœnum græcum.* [B.]—**B'baum.** The *Ceratonia siliqua.* [B, 180.]—**B'klee.** See *B.*—**B'samen** [Ger. Ph.]. The seeds of *Trigonella fœnum græcum.* [B, 205.]

BODAJK, n. A place in Hungary, where there is a spring containing calcium sulphate, used for gastro-intestinal affections. [A, 385; L, 49.]

BODATARUM (Teloogoo), n. The *Sphæranthus indicus.* [B, 172.]

BODDAMA (Teloogoo), n. The *Bryonia callosa.* [B, 172.]

BODEN (Ger.), n. Bod'e²n. 1. See BASIS. 2. The soil. [A, 315.] 3. The fornix cerebri. [L, 80.]—**B'bein.** The sphenoid bone. [L, 80.]—**B'nblüthig.** See THALAMIFLORUS.—**B. des Hirnhöhles.** The region of the base of the brain corresponding to the floor of the third ventricle. [I, 30; K.]—**B. des vierten Gehirnhöhles.** The base of the fourth ventricle of the brain. [L, 115.]—**B'hefe.** Grounds, dregs, lees. [A, 315.]—**B'satz.** Sediment. [L, 80.]—**B'ständig.** Hypogynous. [B, 131.]—**B'verunreinigung.** Contamination of the soil with filth. [Reichardt (A, 319).]—**Grauer B.** The ventricular gray substance of the brain. [Meynert (I, 11; K).]

BODENFELD (Ger.), n. Bod'e²n-fe²ld. A place in Hannover, where there is a cold saline spring. [L, 49.]

BODID, n. An alchemical name for an egg. [Ruland (A, 325).]

BODO (Lat.), n. m. Bo'do. 1. Of Ehrenberg, see CERCOMONAS. 2. Properly, a genus of the *Flagellata*, differing from *Cercomonas* in having two flagella, one of which is quite rigid and generally directed backward. [L, 182.]—**B. saltans** [Ehrenberg]. A variety 0·006 mm. long, said to occur in great numbers on unhealthy ulcers. [L, 182.]—**B. urinarius.** A species of an oval or round shape, 0·0012 mm. long and 0·0007 mm. thick, found in the albuminous, alkaline urine of cholera patients. [Hassall (L, 182).]

BODOK, n. A place in Transylvania, where there is a spring containing sodium bicarbonate. [L, 49.]

BODONINA (Lat.), n. n. pl. Bo-do-ni(ne)'na³. Of Bütschli. a family of the *Heteromastigoda* in which the flagella are of nearly equal size. [L, 121.]

BODY, n. Bo²d'i². A.-S., *bodig.* Gr., *σῶμα.* Lat., *corpus.* Fr., *corps.* Ger., *Körper.* It., *corpo.* Sp., *cuerpo.* 1. Any mass of matter. 2. The material part of man as distinguished from the mind or the spirit. 3. The trunk as distinguished from the head and limbs; the principal part of any structure. See also under CORPS, CORPUS, and KÖRPER.—**Accessory b.** A nerve-cell. [J.]—**Adenoid b.** Fr., *corps adénoïde.* 1. An old term for the prostate. [A, 306.] 2. A melanotic tumor. [Blasius (A, 385).]—**Adrenal bodies.** See *Suprarenal* CAPSULES.—**Amylaceous bodies, Amyloid bodies.** See *Amylaceous* CORPUSCLES.—**Anterior bigeminal bodies.** The anterior pair of the corpora quadrigemina. [I, 14; K.]—**Axile b.** See *Axile* CORPUSCLE.—**Bigeminal bodies.** See CORPORA *quadrigemina*, under CORPUS.—**Blackwell b.** Ger., *Blackwell-Körperchen.* A sensory-nerve termination, situated partly or wholly within the epidermis, consisting of a cluster of nerve-cells connected centrally with one large medullated nerve-fibre and peripherally with the intra-epidermic nerve-fibrils. [Hoggan, "Jour. of Anat. and Physiol.," 1884, p. 182 (J).—**B.-cavities.** See *Intermesoblastic* SPACES.—**B.-cavity.** See CŒLOMA.—**B. of Luys.** See CENTRE *médian de Luys.*—**B. of Oken.** See MESONEPHROS.—**B. of Rosenmüller.** See EPOOPHORON.—**B.-sarcode.** The protoplasm of the b. of a cell. [J.]—**Browne b.** Ger., *Browne-Körperchen, Browne-Endigung.* Syn.: *Browne termination.* A sensory-nerve termination, in or near the apex of a cutaneous papilla, in which a naked axis-cylinder terminates in two or more prongs or branches. [Hoggan. *l. c.* (J).]—**Callous b.** See CORPUS *callosum.*—**Capito-pedal bodies.** In certain *Mollusca*, two minute, oblong, yellow bodies on each side of the neck; thought to be rudimentary ctenidia. [L, 121.]—**Catalytic bodies.** Fr., *corps catalytiques.* The ferments. [A, 385.]—**Cavernous bodies.** See CORPORA *cavernosa*, under CORPUS.—**Cell-b., Cellular b.** See CELL-*b.*—**Central b.** See NUCLEUS.—**Ciliary b.** Lat., *corpus ciliare.* Fr., *corps ciliaire.* Ger., *Ciliarkörper.* It., *corpo ciliare.* Sp., *cuerpo ciliar.* The middle segment of the second, or uveal, coat of the eye, between the iris in front and the chorioid behind; comprising the ciliary muscle, the ciliary ligament, and the ciliary processes (to the latter of which the term was formerly restricted). [F.]—**Colostrum bodies.** See *Colostrum* CORPUSCLES.—**Coming down of the b.** See *Falling of the b.*—**Concentric b.** See *Concentric* CORPUSCLE *of Hassall.*—**Dentate b., Dentated b. of the olive.** See CORPUS *dentatum.*—**Directive b.** See *Extrusion* GLOBULE.—**Embryoplastic bodies.** See *Fibro-plastic* CELLS.—**External geniculate b.** Lat., *corpus geniculatum externum.* Fr., *corps géniculé externe.* Ger., *äusserer Kniehöcker.* A projection at the posterior part of the optic thalamus, to the outer side of the pulvinar, consisting of alternate layers of white and gray matter. [I, 15, 62; K.]—**Falling of the b.** A popular term for prolapse of the rectum. [E.]—**Fibro-plastic bodies.** See *Fibro-plastic* CELLS.—**Fimbriated b.** See CORPUS *fimbriatum.*—**Foreign b.** Lat., *corpus alienum.* Fr., *corps étranger.* Ger., *Fremdkörper.* It., *corpo straniero.* Sp., *cuerpo extraño.* A b. which has gained entrance into the organism from without, or, having been originally a constituent portion of the organism, has ceased to be so; one that can answer no good purpose in the organism, but is likely to prove a source of irritation. [A, 385.]—**Ganglionic bodies.** See *Nerve*-CELLS.—**Hoggan b.** A sensory-nerve termination similar to the Pacinian corpuscle (*q. v.*), except that the nerve divides into two, three, or more branches immediately after entering the capsule. [Hoggan, *l. c.* (J).]—**Hyaloid b.** Fr., *corps hyaloïde.* See CORPUS *vitreum.*—**Inferior olivary b.** Lat., *corpus olivæ inferius.* Fr., *corps olivaire inférieur.* Ger., *untere* (oder *grossere*) *Olive.* The olivary b. of the medulla oblongata, as distinguished from the small group of cells in the pons Varolii having the same name. [I, 15; K.]—**Inner geniculate b.** See *Internal geniculate b.*—**Intermediate perforate b.** See *Posterior perforated* SPACE.—**Internal geniculate b.** Lat., *corpus geniculatum internum.* Fr., *corps géniculé intérieur.* Ger., *innerer Kniehöcker.* A prominent mass of gray and white matter at the lower and outer part of the optic thalamus, with which its gray matter is continuous. [I, 29, 62; K.]—**Interrenal b.** A long, irregular b., of a yellow color, lying to the inner side of the ureter in certain of the *Batoides.* [L, 200.]—**Intravertebral b.** The centrum of a vertebra. [L, 300.]—**Laminated amyloid bodies.** See *Amylaceous* CORPUSCLES.—**Lower olivary b.** See *Inferior olivary b.*—**Malpighian bodies.** See *Malpighian* CORPUSCLES.—**Marginal**

bodies. Bodies attached to the edge of the umbrella in free *Medusæ*. Those of one variety resemble vesicles, and are thought to be sensory organs; the others are collections of pigment provided with a transparent refracting b. [L, 176.]—**Mehli's b.** See *Shell* GLAND.—**Meissner's bodies.** See *Tactile* CORPUSCLES.—**Muriform b.** The morula (the vitellus of a fecundated ovum in the stage of segmentation); so called from its resemblance to a mulberry. [A, 86.]—**Nuclear b.** The nuclear disc (*q. v.*) of a maturing ovum after it has assumed an ellipsoidal form. [J, 1.]—**Nucleoplasmic b.** The definite mass formed in a maturing ovum by a collection of the plasma of the nucleus (germinal vesicle) after the membrane of the vesicle has disappeared. [J, 1, 30.]—**Olivary b.** Lat., *corpus olivare, oliva.* Fr., *corps olivaire.* Ger., *Olivenkörper, Olive.* Syn.: *olive.* An oval projection at the upper portion of the medulla oblongata, just above the extremity of the lateral column. It is separated from the lower edge of the pons Varolii by a well-marked groove. It is surrounded by bundles of nerve-fibres (the capsule, *siliqua olivæ*). Its centre is occupied by a mass of gray matter surrounded by convoluted laminæ of white substance (the *corpus dentatum olivæ*) which are not continuous, but leave an opening on the mesial side (the *hilum*) through which bundles of nerve-fibres pass into the gray centre (the olivary peduncle). [I, 15; K.]—**Organic bodies.** Chemical compounds peculiar to the animal or the vegetable kingdom.—**Organized bodies.** Fr., *corps organisés.* Organisms.—**Outer geniculate b.** See *External geniculate b.*—**Pacchionian bodies.** Lat., *corpora* (seu *glandulæ*) *Pacchioni.* Fr., *corpuscules* (ou *granulations,* ou *glandes*) *de Pacchioni, granulations méningiennes.* Ger., *Pacchioni'sche Körper* (oder *Granulationen*), *Arachnoidalzotten.* It., *glandole di Pacchioni.* The small granulations, or granular growths, seen on the surface of the dura mater along the longitudinal sinus and extending into the sinus itself. They do not originate in the dura mater, but have been shown by Luschka to be simply hypertrophied arachnoidal villi which have grown through the dura. They may be injected through the subarachnoid space, and have been supposed to aid in equalizing the pressure in the venous sinuses and the subarachnoid cavity in case of a sudden increase in the amount of the cerebro-spinal fluid. [I, 15; K.]—**Pacinian bodies.** See *Pacinian* CORPUSCLES.—**Parenchymal bodies.** Ger., *Parenchymkörper.* The lobules of the lacrymal gland. [J, 35.]—**Perineal b.** H. Savage's term for a highly elastic and resistant structure formed by a sort of fusion (without loss of identity) of those perineal structures which, in women, meet at a point midway between the anus and the posterior commissure of the vulva; forming a point of attachment for the ischio-perineal ligaments, the superficial transverse perineal muscles, and the anterior part of the superficial sphincter ani. [A, 203.]—**Pineal b.** See *Pineal* GLAND.—**Pituitary b.** See HYPOPHYSIS *cerebri.*—**Polar b.** See *Extrusion* GLOBULE.—**Postpyramidal b.** [Owen]. See *Posterior* PYRAMID.—**Prepyramidal b.** [Owen]. See *Anterior* PYRAMID.—**Problematical bodies.** 1. A term used by Semper to designate what Sabatier considers to be nuclei of dentospermoblasts (*q. v.*) which have not undergone division. 2. Masses of accessory corpuscles. [Geddes (J, 55).]—**Psalloid b.** See LYRA.—**Pyramidal b.** A prominence on the infero-posterior surface of the plantar cushion of the horse, corresponding to the frog. [L, 13.]—**Refractive bodies.** Minute cylindrical crystals, of unknown composition, scattered through the protoplasm of some of the lower *Protozoa.* [L, 121.]—**Restiform b.** Lat., *corpus restiforme.* Fr., *corps restiforme.* Ger., *strickförmiger Körper.* Syn.: *inferior peduncle of the cerebellum.* A rounded mass of nerve-fibres at the posterior part of the medulla oblongata, which results from the union of the lateral cerebellar tract with the cuneate funiculus and the funiculus of Rolando, and terminates in the cerebellar hemisphere. The term is sometimes applied to the posterior column of the medulla oblongata (exclusive of the funiculus gracilis) together with the lateral cerebellar tract, also to the posterior column alone. [I, 15; K.]—**Rhomboid b.** See *Fourth* VENTRICLE.—**Rod-like bodies.** See *Intracellular* RODS.—**Segmental bodies.** See *Segmental* APPARATUS.—**Semilunar b.** See DEMILUNE.—**Striated b.** See CORPUS *striatum.*—**Superior olivary b.** Lat., *corpus olivare superius.* Fr., *corps olivaire supérieur.* Ger., *oberer Olivenkörper.* Syn.: *superior olivary nucleus.* A group of nerve-cells near the central region of the pons Varolii, just below the facial nucleus, near the outer edge of the *formatio reticularis.* It gives origin to some of the fibres of the trapezium. [I, 31; K.]—**Suprarenal b.** See *Suprarenal* CAPSULE.—**Thyreoid b.** See *Thyreoid* GLAND.—**Touch-bodies.** See *Tactile* CORPUSCLES.—**Trapezoid b.** The trapezium (*q. v.*) of the pons Varolii. [I, 31; K.]—**Upper olivary b.** See *Superior olivary b.*—**Vermiform b.** A name sometimes given to the carpogonium of an *Ascobolus.* [B, 75.]—**Vitreous b.** See *Corpus vitreum.*—**White b.** A b. found in the orbit of certain *Mollusca,* the function of which is unknown. [L, 121.]—**Wolffian b.** Fr., *corps de Wolff.* Ger., *Wolff'scher Körper, Urniere.* It., *corpo di Wolff.* Sp., *cuerpo de Wolff.* See MESONEPHROS.—**Yellow b.** See CORPUS *luteum.*

BO-DYANG, n. A root, a decoction of which is used in Siam as a remedy for paralysis. [Finlayson (L, 105).]

BŒBERA (Lat.), n. f. Be^{2}b(bo^2-e^{2}b)-e(a)'ra^3. Fr., *bœbère.* A genus of composite plants now referred to *Dysodia.* [B.]—**B. chrysanthemoides** [Willdenow], **B. glandulosa** [Persoon]. The *Dysodia chrysanthemoides.* [B, 173, 215.]

BŒHMERIA (Lat.), n. f. Bu^{5}m-e(a)'ri^2-a^3. Written also *Böhmeria.* Named for G. R. Böhmer, a German botanist. Fr., *bœhmérie.* A genus of urticaceous herbs and shrubs allied to *Urtica,* but not bearing stinging hairs. [B, 19.]—**B. albida.** A species growing in the Sandwich Islands; used in the manufacture of cloth. [B, 19.]—**B. caudata.** A species growing in the West Indies and South America (the *asapeixe* of the Brazilians), used in Brazil as a remedy for hæmorrhoids. [B, 19, 121, 180; H. Baillon (L, 87).]—**B. cochinchinensis** [Sprengel]. Syn.: *Parietaria cochinchinensis* [Loureiro]. A perennial species growing in China and Cochin-China, where it is employed externally and internally as a diuretic and demulcent. [B, 180.]—**B. nivea** [Hooker and Arnott]. The Chinese grass-cloth plant (the *ramie* of India, the *tchow-ma* of China, the *rheea* of Assam); a hairy shrub 3 or 4 feet high, from the fibre of the inner bark of which a fine fabric called

THE BŒHMERIA NIVEA. [A, 327.]

grass-cloth is made. The fibre called *rhea-fibre* is obtained from the *B. nivea,* var. *candicans.* [B, 19, 81.]—**B. puya.** The *pooah,* or *puya,* of India, closely resembling *B. nivea,* but larger; furnishing a fibre used in making sail-cloth and cordage. [B, 19.]—**B. tenacissima** [Gaudichaud]. The *B. nivea,* var. *candicans.* [B, 81.]

BŒHMERIEÆ (Lat.), n. f. pl. Bu^{5}m-e^{2}r-i(i^2)'e^2-e(a^3-e^2). Written also *Böhmerieæ.* Of Gaudichaud and succeeding authors, a tribe or division of the *Urticaceæ,* comprising *Bœhmeria* and other genera; divided by Weddell into the subtribes *Eubœhmerieæ, Sarochlamydeæ, Maoutieæ,* and *Phenaceæ* (*Villebruneæ*). [B, 170.]

BOELLE (Fr.), n. Bo-e^{2}l. See BOYAU.

BOERHAAVIA (Lat.), n. f. Bur-ha^{3}v'i^2-a^3. Fr., *boerhaavie.* A genus of tropical nyctaginaceous herbs. [B, 19.]—**B. diandra** [Linnæus]. A perennial herb growing in Guiana, where its root is used as a purgative and emetic. [B, 173.]—**B. diffusa** [Linnæus]. Fr., *patagonelle, herbe à Patagon.* A perennial herb, by some identified with *B. hirsuta,* growing in the West Indies. The root is purgative. [B, 173, 180.]—**B. erecta** [Linnæus]. A perennial species growing in South America and the West Indies, having the same properties as *B. diandra,* with which it is identified by some authors. [B, 173, 180.]—**B. hirsuta** [Linnæus]. A West Indian species the juice of the leaves of which is employed in hepatic disorders. [B, 173.]—**B. paniculata** [Lamarck]. See *B. diandra.*—**B. peruviana** [Desfontaines]. See *B. tuberosa.*—**B. polymorpha** [Richard]. See *B. diffusa.*—**B. procumbens** [Roxburgh]. A species growing in India, employed as a purgative, anthelminthic, and febrifuge. [B, 19, 180.]—**B. sarmentosa** [Brown], **B. scandens** [Linnæus]. Fr., *herbe à la purgation.* A West Indian shrub, the root of which is used in India, either in decoction or in infusion, as a remedy for gonorrhœa. [B, 173, 180; Ainslie (L, 87).]—**B. tuberosa** [Lamarck]. Fr., *herbe à la purgation.* A Peruvian shrub used in the treatment of gonorrhœa and other venereal affections. [B, 173, 180.]

BOERHAAVIEÆ (Lat.), n. f. pl. Bur-ha^{3}v-i(i^2)'e^2-e(a^3-e^2). Of Reichenbach and Choisy, a tribe or subdivision of plants (*Allionieæ, Nyctaginaceæ*), including *Boerhaavia* and related genera. [B, 170.]

BOETHEMA (Lat.), n. n. Bo(bo^2)-e^2(a)-the(tha)'ma^3. Gen., *boethem'atos* (*-tis*). Gr., βοήθημα (from βοηθεῖν, to assist). A remedy. [Hippocrates (A, 311).]

BOETHEMATICUS, BOETHETICUS (Lat.), adj's. Bo(bo^2)-e^2(a)-the^{2}m(tham)-a^{2}t(a^{3}t)'i^{2}k-u^{3}s(u^{4}s). -the^{2}t(that)'i^{2}k-u^{3}s(u^{4}s). Gr., βοηθηματικός, βοηθητικός. Remedial, auxiliary; also (of symptoms) indicative of a favorable progress. [L, 84.]

BŒUF (Fr.), n. Bu^{5}f. An animal of the genus *Bos;* an ox, bull, or cow. [A, 385.]—**Moëlle de b.** [Fr. Cod.]. See ADEPS *medullæ bovis.*—**Suif de b.** [Fr. Cod.]. Beef suet. [B.]

BŒUVONNAGE (Fr.), n. Bu^{5}v-o^{2}n-na^{3}zh. The operation of spaying a cow. [Charlier (A, 385); L, 41.]

BOF, n. An alchemical name for quicklime. [Ruland (A, 325).]

BOFIST (Ger.), n. Bo'fi^{2}st. The *Lycoperdon bovista.* [B, 131.]

BOGEN (Ger.), n. Bo'ge^{2}n. See ARCH.—**Alveolarb'.** See *Alveolar* ARCH.—**Anastomotischer B.** See *Anastomotic* ARCH.—**Aortenb'.** See *Aortic* ARCH.—**Augenbrauenb'.** See *Superciliary* RIDGES.—**B'beine.** See OSSA *bregmatis,* under OS.—**B'bündel, B'faser.** See *Arcuate* FIBRES.—**B'förmig.** Arched, arcuate. [A, 315.]—**B'furche.** Arnold's term for the fissura hippocampi.—**B'gang.** See the major list.—**B'körperchen.** See ARCULUS.—**B'messer.** A curved knife. [L, 135.]—**B'strang.** See

FASCICULUS *arcuatus*.—**B'system.** See ARCH-*system*.—**B'tripper.** Gonorrhœa with chordee. [L, 80.]—**B'windung.** See the major list.—**B'wulst.** See GYRUS *fornicatus*.—**Greisenb'.** See ARCUS *senilis corneæ*.—**Greisenb' der Linse.** See ARCUS *senilis lentis*.—**Hinterer B. des Trägers.** The posterior arch of the atlas. [L.]—**Hohlhandb'.** See *Superficial* and *Deep palmar* ARCH.—**Jochb'.** See *Zygomatic* ARCH.—**Kiemenb'.** See *Postoral* ARCHES.—**Oberer Augenlidb'.** See ARCUS *tarseus superior*.—**Oberflächlicher Hohlhandb'.** See *Superficial palmar* ARCH.—**Schamb'.** See *Pubic* ARCH.—**Sohlenb'.** See *Plantar* ARCH.—**Unterer Augenlidb'.** See ARCUS *tarseus inferior*.—**Visceralb'.** See *Pastoral* ARCHES.

BOG-BEAN, n. Bo^{2}g'ben. The *Menyanthes trifoliata*. [A, 247.]

BOG-BILBERRY, n. Bo^{2}g'bi^{2}l-be^{2}r-ri^2. The *Vaccinium uliginosum*. [A, 247.]

BOGENGANG (Ger.), n. Bo'ge^{2}n-ga^{2}ng. A semicircular canal. —**Aeusserer B.** See *External semicircular* CANAL.—**Hinterer B.** See *Inferior semicircular* CANAL.—**Mittlerer B.** See *External semicircular* CANAL.—**Oberer B.** See *Superior semicircular* CANAL.—**Unterer B.** See *Inferior semicircular* CANAL.—**Vorderer B.** See *Superior semicircular* CANAL.

BOGENWINDUNG (Ger.), n. Bo'ge^{2}n-vi^{2}nd-ung. See GYRUS. —**Aeussere B.** See GYRUS *uncinatus*.—**B. von Arnold.** See GYRUS *fornicatus*.—**Innere B.** See GYRUS *dentatus*.

BOGHEAD, n. Bo^{2}g'he^{2}d. A variety of bituminous schist which, when distilled, yields benzene, paraffin, etc. The residue is used as a disinfectant. [L, 87.]

BOGON (Fr.), n. Bo-go^{2}n^2. The *Ficus religiosa*. [B, 173.]

BOGUETTE (Fr.), n. Bo-ge^{2}t. Buckwheat. [L, 42.]

BOHEIC ACID, n. Bo-he'i^{2}k. Fr., *acide bohéique*. Ger., *Boheasäure*. An unstable, yellowish, hygroscopic powder, $C_7H_{10}O_6$, obtained by Rochleder from tea-leaves. It is readily soluble in water and in alcohol, and acts as an acid. [B, 270.]

BOHEO-TANNIC ACID, n. Bo-he''o-ta^{2}n'ni^{2}k. Fr., *acide bohéo-tannique*. See BOHEIC ACID.

BÖHMERIA (Lat.), n. f. See BŒHMERIA.

BÖHMERIEÆ (Lat.), n. f. pl. See BŒHMERIEÆ.

BOHNE (Ger.), n. Bon'e^2. A bean. [B.]—**B'nbalg.** See *B'nhülse*.—**B'nbaum.** See the major list.—**B'nblatt.** The leaves of *Menyanthes trifoliata*. [B, 180.]—**B'nerz.** Bean-ore (granular argillaceous oxide of iron). [A, 315; L, 108.]—**B'ngeschwulst.** See ARTHROPHYMA *bursale*.—**B'nhülse.** The shell of beans. [B, 131.]—**B'nkaper, B'nkapper.** The *Zygophyllum fabago*. [B, 131, 180.]—**B'nklee.** The *Anagyris fœtida*. [B, 131.]—**B'nkraut.** The *Satureia hortensis*. [B, 180.]—**B'nmehl.** Bean-meal (*farina fabarum*). [B, 180.]—**B'nschale, B'nschote.** See *B'nhülse*.—**B'nstärke.** Bean-starch. [B, 270.]—**B'nstrauch.** See BOHNENBAUM.—**B'nwicke.** The *Vicia faba*. [B, 180.]—**Brasilianische B.** The Pichurim bean. [B. 180.]—**Brechb'.** The *Phaseolus nanus*. [B, 180.]—**Buff-B.** The *Vicia faba*. [B, 180.]—**Buschb'.** See *Brechb'*.—**Butterb'n.** The seeds of *Vateria indica*. [B, 270.]—**Dreilappige B.** The *Phaseolus radiatus*. [B, 180.]—**Feuerb'.** The *Phaseolus multiflorus*. [B, 180.]—**Frühb'.** See *Brechb'*.—**Futterb'.** See *Buff-B.*—**Kriechb', Krüpb'.** See *Brechb'*.—**Mungo-B.** The *Phaseolus mungo*. [B, 180.]—**Pferdeb'.** See *Buff-B.*—**Rauchhaarige B.** See *Mungo-B.*—**Saub'.** See *Buff-B.*—**Scharlachrothblühende B.** See *Feuerb'*.—**Schminkb', Schneideb', Schwertb'.** The *Phaseolus vulgaris*. [B, 180.]—**Stahlfrüchtige B.** See *Dreilappige B.*—**Stangenb'.** See *Schminkb'*.—**Staudenb'.** See *Brechb'*.—**Türkische B'n, Wälsche B'n.** French beans (the beans of *Phaseolus multiflorus*). [B, 131.]—**Weisse B'n.** White beans (the beans of *Phaseolus vulgaris*). [B, 180.]—**Zwerg-B., Zuckerb'.** See *Brechb'*.

BOHNENBAUM (Ger.), n. Bon'e^{2}n-ba^3-um. The *Cytisus laburnum*, the *Colutea arborescens*, and the *Robinia caragana*. [B, 131, 180.]—**Süsser B.** The *Cassia alata*. [B, 131.]

BOHNENSTRAUCH (Ger.), n. Bon'e^{2}n-stra^3-uch^2. See BOHNENBAUM.—**Gemeiner B.** The *Phaseolus vulgaris*. [B, 180.]

BOHNERZ (Ger.), n. Bon'e^{2}rtz. See BOHNEN*erz*.

BOHON, BOHON-UPAS, n's. The *Antiaris toxicaria*. [L, 105, 109.]

BOHREN (Ger.), n. Bor'e^{2}n. A piercing, boring, trephining. [L, 80.]

BOHRER (Ger.), n. Bor'e^{2}r. A drill, a perforator. [E.]—**Kopfb'.** A perforator used in craniotomy. [A, 315.]

BOHUN, BOHUN-UPAS, n's. See BOHON-UPAS.

BOIDA (Lat.), n. n. pl. Bo(bo^2)'i^{2}d-a^3. Fr., *boïdés*. Of J. E. Gray, a family of *Ophidia* having the *Boa* as the type. [L, 180.]

BOIDÆ (Lat.), n. f. pl. Bo(bo^2)'i^{2}d-e(a^3-e^2). See BOIDA.

BOIL, n. Boil. A.-S., *býl*. O. E., *bile*. Gr., δοθιήν. Lat., *furunculus*. Fr., *furoncle, clou*. Ger., *Beule*. It., *furoncolo, chiodo, figuolo*. Sp., *divieso*. A circumscribed, acute phlegmonous and suppurative inflammation of the skin, or of the subcutaneous tissue, forming a hard, rounded or conical, sensitive, and painful swelling, usually attended with the formation and discharge of a central slough called the "core." [G.] Cf. FURUNCLE.—**Aleppo b.** Lat., *pustula aleppensis, pyrophlyctis endemica* (seu *syriaca*). Fr., *bouton d'Alep*. Ger., *Aleppobeule*. Syn.: *Aleppo button* (or *bouton*, or *evil*). A supposed special form of disease of the skin observed in Syria and other countries of the Levant. It has been variously described as having the characters of a b., an anthrax, or an ulcerating papule or tubercle, followed by cicatrization. Recent investigations by Geber ("Arch. f. Dermat. u. Syph.," 1874, p. 445) in the regions where it was said to occur indicate that under this term a number of diseases are comprehended, especially syphilis, lupus, and scrofulodermata, and that there is no special or independent form of disease to which the name may be applied. Similar affections have been described under the names of *bouton de Bagdad, gangrène de Bassorah* (in Turkey), *bouton de Égypte, chancre de Sahara, Biskra button*, and *bouton des Zibans*. [G.] Cf. *Delhi b.* —**Blind b.** A popular term for an abortive b., *i. e.*, one of brief duration and not attended with the formation of a core. [G.]—**Blood b.** Ger., *Blutbeule*. See HÆMATOMA.—**Cat b.** See *Blind b.*—**Delhi b.** Fr., *bouton de Delhi*. Ger., *Delhi-Beule*. It., *furoncolo* (o *piaga*) *di Delhi*. Syn.: *Delhi* (or *oriental*) *sore, bulkea, aurungzebe*. A cutaneous disease of obscure character occurring in India, sometimes as an epidemic. It is said to begin in the form of itching red spots on exposed situations, such as the face, hands, feet, elbows, ankles, etc. On the red spots smooth, shining papules appear, which coalesce and undergo ulceration, the ulcerated surface being "red, flabby, and irregular, and studded over by fungoid granulations that bleed freely" and are followed by cicatrices. According to D. D. Cunningham, the lesion is a simple granuloma associated with, and perhaps due to, a peculiar parasitic organism (probably the plasmodium or amœba of some simple organism of mycetozoic origin) which takes a blue stain from gentian-violet, but is not affected by other dyes. Similar affections are known in different parts of India as *Scinde boil, Lahore boil, Moultan sore*, etc. [Geber (A. 319); "Indian Med. Gaz.," Feb., 1886, p. 51; G.]—**Gum-b.** See *Alveolar* ABSCESS.—**Wasp's-nest b.** See FURONCLE *guêpier*.

BOINA (Lat.), n. f. Bo-i(e)'na^3. From βοῦς (= *bos* [*q. v.*]). Cowpox. [A, 322.]

BOIN-KAKÉLI, n. A kind of parasitic orchid of India, the buds of which are used in making plasters for tumors, etc. [L, 41, 105.]

BOIS (Fr.), n. Bwa^3. 1. Wood; also a name applied to a number of trees and shrubs that furnish wood, as well as to some plants that are not woody. [B, 121.] 2. An antler. [A, 301.]—**Alcoolat de b. de Rhodes.** A preparation made by digesting for four days 500 parts of lignum aspalathi in 4,000 of alcohol, and distilling over a water-bath until all the alcohol is recovered. [A, 259.]—**B. à aiguilles.** A general name for coniferous trees. [B, 38, 121.]—**B. à amer.** See *B. d'absinthe*.—**B. à baguettes.** The *Coccoloba uvifera* and the *Coccoloba latifolia*. [B, 93, 121.]—**B. à balais.** The *Erythroxylon hypericifolium*. [B, 121, 173.]—**B. à balle.** The *Guarea trichilioides*. [B, 173.]—**B. à barrique.** 1. See *B. à flambeau*. 2. The *Bauhinia porrecta*. [B, 121.]—**B. à bouton.** The *Cephalanthus occidentalis*. [B, 121.]—**B. à bracelets.** 1. The *Jacquinia armillaris*. [B, 121, 173.] 2. A genus of myrsinaceous plants. [B, 93.]—**B. à caleçons.** The *Bauhinia tomentosa*. [B, 173.] —**B. à calumet.** The *Mabea Piriri*, also the *Taquari*. [B, 121.] —**B. à cassave.** See ARALIA *arborea*. [B, 121.]—**B. à chiques.** The *Cordia calococca*. [B, 121, 173.]—**B. à coton.** The poplar, also other plants having downy seeds. [B, 173.]—**B. à dard.** The *Possira arborescens*. [B, 121, 173.]—**B. à dartres.** The *Hypericum latifolium* and the *Hypericum sessilifolium*. [B, 121, 173.]—**B. à huile.** See *B. d'huile*.—**B. à enivrer.** Plants that are used to stupefy fishes (*e. g.*, the *Phyllanthus conami* and the *Piscidia carthaginensis*). [B. 121.]—**B. à feu.** The *Cecropia ambaiba*. [B, 121, 173.]—**B. à flambeau.** The *Hedwigia balsamifera*. [B, 173.] —**B. à fléau.** The *Bombax gossypium*, the *Cordia macrophylla*, the *Hibiscus paritium*, and the *Hibiscus tiliaceus*. [B, 121.]—**B. à fumier.** The *Clematis vitalba*. [B, 121.]—**B. à la fièvre.** The *Hypericum sessilifolium*. [B, 121, 173.]—**B. à lardoins.** The *Euonymus europæus*. [B, 121, 173.]—**B. à malingres.** A species of *Tournefortia* growing in the Mascareignes. [B, 121.]—**B. amer, B. amer de Bourbon.** See *B. d'absinthe*.—**B. amer de Surinam** [Fr. Cod.]. The *Quassia amara* or its wood. [B, 121.]—**B. angelin.** See ANGELIN.—**B. à pian.** The *Morus tinctoria*. [B, 121, 173.]—**B. à poudre.** A species of *Rhamnus* the wood of which is used in making gunpowder. [B, 38.]—**B. arada.** The *Chrysobalanus icaco*. [B, 121.]—**B. aspalath.** See *Lignum* ASPALATHI. —**B. bacha.** See *B. à caleçons*.—**B.-balles.** See *B. à balle*.—**B. baptiste.** The *Hypericum guianense*. [B, 121.]—**B. batate.** A variety of the *Ipomœa batatas*. [B, 121, 173.]—**B. bénit.** The *Buxus sempervirens*. [B, 93, 121, 173.]—**B. bitumineux.** A fossil wood containing bitumen. [B, 121.]—**B. blanc.** Any tree with a soft, light-colored wood, especially the poplars, willows, and lindens; in Martinique, the genus *Staphylia*; in the Mascareignes, the *Hernandia ovigera* and the *Shakna pubescens*. [B, 121.]—**B. blanc rouge.** In the Mascareignes, the *Poupartia borbonica*. [B, 121.]—**B. bleu.** See HÆMATOXYLON.—**B. bouton.** See *B. à bouton*.—**B. brai.** The *Cordia macrophylla*. [B, 121.]—**B. caca.** The *Capparis ferruginea*. [B. 121, 173.]—**B. cachiman.** The *Magnolia* (*Talauma*) *Plumieri*. [B, 121, 173.]—**B. calumet.** The *Mabea Piriri*. [B, 121, 173.]—**B. canic.** The *Guilandina bonduc*. [B, 173.]—**B. cannelle.** A name applied to various kinds of wood. [B.] See the three following headings.—**B. cannelle blanc.** The wood of the *Canella alba* and that of the *Laurus capsuliformis*. [B, 121, 173.]—**B. cannelle gris.** The wood of the *Elæocarpus serrata*. [B, 121, 173.]—**B. cannelle noir.** The wood of the *Drimys Winteri*. [B, 121, 173.]—**B. canon.** The *Cecropia peltata*. [B, 121, 173.]—**B. canon bâtard.** The *Panax chrysophyllum*. [B, 121, 173.]—**B. canot.** A name applied to several species of *Calophyllum*, also to the *Liriodendron tulipifera* and the *Cupressus disticha*. [B, 121.]—**B. capitaine.** The *Malpighia urens*. [B, 173.]—**B. carapat.** The *Ricinus communis*. [B, 121.]—**B. caratas.** The *Agave vivipara*. [B, 173.]—**B. carré.** The *Euonymus europæus*. [B, 173.]—**B. cassant.** The *Psatura borbonica*. [B, 121.]—**B. Cayan.** See *B. de Cayan*.—**B. chandelle.** A name applied to various trees or plants furnishing materials for illumination (*e. g.*, several species of *Amyris* and the *Erithalis fruticosa*). [B, 121.] Cf. *B. à flambeau*.—**B. chaud.** The *Acer campestre*. [B, 173.]—**B. choiseul.** The *Æschynomene* (*Agati*) *grandiflora*. [B, 173.]—**B. citron.** The *Erythalis fruticosa*. [B, 173.]—**B. cochon.** The *Hedwigia balsamifera*. [B, 93.]—**B. collant.** A name given in

the Mauritius to the *Psatura*. [B, 121.]—**B. corail.** The *Erythrina corallodendron*. [B, 93.]—**B. Coromandel.** Coromandel wood; referred to an East Indian species of *Diospyrus*. [B, 121.]—**B. cossais.** See *B. d'acossais*.—**B. costière.** The *Rhamnus ellipticus*. [B, 173.]—**B. cotelet.** The *Cornutia pyramidata*. [B, 121.]—**B. cuir.** The *Dirca palustris*. [B, 121.]—**B. cypres.** The *Cordia gerascanthus*. [B, 121.]—**B. d'absinthe.** The *Carissa xylopicron*, also the genera (*Quassia* and *Simaruba*) furnishing quassia wood. [B, 38, 121, 173.] Cf. *B. amer*.—**B. d'acacia.** The *Acacia farnesiana*, also the *Inga unguis cati*. [B, 121, 173.]—**B. d'acossais.** The *Hypericum sessilifolium* (*guianense*). [B, 121, 173.]—**B. d'acouma.** The *Homalium racemosum*. [C. d'Orbigny (B, 121).]—**B. d'agalloche.** Aloes-wood. [B, 121.]—**B. d'agara.** An odorous wood of China, of unknown botanical origin. [B, 121.]—**B. d'agouti.** The *Vitex divaricata*. [A, 385.]—**B. d'aigle.** A variety of aloes-wood (*q. v.*). [L, 55.]—**B. d'ajawa.** The *Ptychotis* (*Carum*) *ajowan*. [B, 121, 173.]—**B. d'almarie.** The *Calophyllum calaba*. [B, 173.]—**B. d'aloès.** See ALOES-WOOD.—**B. d'amarante.** The *Swietenia mahagoni* of Brazil. [B, 121.]—**B. d'amourette.** The *Mimosa tenuifolia* and the *Mimosa tamarindifolia*. [B, 121.]—**B. d'angelin.** See ANGELIN.—**B. d'anis.** The *Limonea madagascariensis*, the *Piper aduncum*, the *Piper anisatum*, the *Illicium anisatum*, the *Persea gratissima*, and the *Mesua ferrea*. [B, 121, 173.]—**B. d'anisette.** The *Piper umbellatum*. [B, 121, 173.]—**B. d'arc.** The wood of the *Cytisus laburnum*, the *Cytisus alpinus*, and the *Maclura aurantiaca*. [B, 173.]—**B. d'artois.** The *Buxus suffruticosa*. [B, 121.]—**B. d'aspalath.** See *Lignum* ASPALATHI.—**B. de balata.** The *Mimusops balata*. [B, 121.]—**B. de baume.** The *Balsamodendron gileadense* [B, 173.]—**B. de Bigaillon.** The *Eugenia Bigailloni*. [B, 121.]—**B. de benjoin.** In the Mauritius, the *Terminalia benzoin*. [B, 121.]—**B. de bitte.** In India, the *Sophora heterophylla*. [B, 121.]—**B. de boco.** See *B. de fer*.—**B. bombarde.** The *Ambora tambourissa* of Bourbon. [B, 121.]—**B. de boue.** The *Premna dentifolia*. [B, 121.]—**B. de Brésil.** Brazil-wood; the wood of several species of *Cæsalpinia*, especially the *Cæsalpinia echinata*. [B, 121, 173.]—**B. de calambac.** See ALOES-WOOD.—**B. de Campêche, B. de Campêchie** [Fr. Cod.]. Logwood; the wood of *Hæmatoxylon campechianum*. [B, 113, 121, 173.]—**B. de camphre.** The *Laurus porrecta*. [B, 121, 173.]—**B. de cannelle.** See *B. cannelle*.—**B. de carapat.** See *B. carapat*.—**B. de cassie.** The *Quassia amara*. [B, 121, 173.]—**B. de cavalan.** The *Sterculia fœtida*. [B, 121.]—**B. de Cayan.** The *Simaruba officinalis*. [B, 121, 173.]—**B. de cèdre.** The *Aniba guianensis*. [B.]—**B. de cerisier.** The *Malpighia glabra*. [B, 121. 173.]—**B. de chandelle, B. de chandellier.** See *B. chandelle*.—**B. de charpentier.** The *Justicia pectoralis*. [B, 121.]—**B. de chat.** The *Astronium fraxinifolium*. [B, 121.]—**B. de chauve-souris.** The *Fernetia buxifolia*. [B, 121.]—**B. de chêne.** A name applied to several bignoniaceous plants, especially the *Bignonia longissima*. [B, 121.]—**B. de chenilles.** The *Volkameria heterophylla*. [B, 121.]—**B. de cheval.** A San Domingo tree of uncertain botanical characters, thought by some to be the *Erythroxylon havanense*; used in equine diseases. [B, 121.]—**B. de chien.** The *Cornus florida*, also the *Piscidia erythrina*. [B, 121, 173.]—**B. de chik, B. de Chine.** The *Cordia sebestana* or the *Cordia myxa*. [B, 121, 173.]—**B. de choiseul.** See *B. choiseul*.—**B. de Chypre.** See *Lignum* ASPALATHI. [B, 121, 173.]—**B. de citron.** See *B. citron*.—**B. de clou.** Trees that have buds in the form of nails, like the clove-tree. [B, 121.]—**B. de cochon.** See *B. cochon*.—**B. de coco.** See *B. de fer*.—**B. de colophane bâtard.** The *Bursera obtusifolia*. [B, 121.]—**B. de colophane franc.** The *Bursera paniculata*. [B, 121, 173.]—**B. de combage.** A West Indian species of *Myrtus*. [B, 121.]—**B. de compagnie.** See *B. de colophane bâtard*.—**B. de copayer.** The *Copaifera cordifolia*. [B, 121.]—**B. de corail.** See *B. corail*.—**B. de corail tendre.** The *Pterocarpus gummifera*. [B.]—**B. de corde.** The *Cichorium intybus*. [B, 121, 173.]—**B. de corne.** The *Garcinia cornea*. [B, 121, 173.]—**B. de costière.** The *Rhamnus ellipticus*. [B, 121, 173.]—**B. de couleuvre.** The *Strychnos colubrina*. [B, 121, 173.]—**B. de coult.** See *B. néphrétique*.—**B. de courbaril.** The *Hymenæa courbaril*. [B, 121.]—**B. de crabe.** The wood of the *Myrtus caryophyllata*.—**B. de cranganor.** The *Pavetta indica*. [B, 121.]—**B. de crave.** See *B. de crabe*.—**B. de crocodile.** The *Croton eleuteria*. [B, 121.]—**B. de cuir.** See *B. cuir*.—**B. de damier.** The genus *Terminalia*. [B, 121.]—**B. d'ébène.** Ebony-wood; the wood of several species of *Diospyros*, also dark-colored woods from various other trees. [B, 121.]—**B. d'ébène blanc.** White ebony; the wood of *Diospyros chrysophylla*. [B, 121.]—**B. d'ébène jaune.** A sort of ebony derived from a West Indian species of *Bignonia*. [B, 121.]—**B. d'ébène noir.** Black ebony; the wood of *Diospyros ebenum*. [B, 121, 173.]—**B. d'ébène vert.** See *B. d'ébène jaune*.—**B. d'écorce.** The genus *Uvaria*. [B, 121.]—**B. de demoiselles.** The *Kirganelia phyllanthoides*. [B, 121.]—**B. de dentelle.** The *Lagetta lintearia*. [B, 121.]—**B. de fer.** The *Robinia panacoco*; in the West Indies, the *Rhamnus ellipticus*. [B, 121, 173.]—**B. de fer-blanc, B. de fer d'Afrique.** The *Sideroxylon cinereum*. [B, 173.]—**B. de fer de Judas.** The *Cossignia borbonica*. [B, 173.]—**B. de Fernambouc.** See *B. de Brésil*.—**B. de férole,** The *Ferolia guianensis*. [B, 173.]—**B. de feu.** See *B. à feu*.—**B. de fièvre.** See *B. à la fièvre*.—**B. de flèche.** 1. The wood of *Amelanchier ovalis*. [B, 19.] 2. See *B. à dard*.—**B. de flot.** See *B. à fléau*.—**B. de frédoche.** The *Citharexylon melanocordium*. [B, 121.]—**B. de frésne.** The *Quassia amara* and the *Tecoma radicans*. [B, 121.]—**B. de fustet.** The *Caryophyllus racemosus*. [B, 121, 173.]—**B. de gaïac.** Guaiacum-wood. [B, 121.]—**B. de garo.** See ALOES-WOOD.—**B. de Garou.** The *Daphne mezereum*. [B, 121.]—**B. de gaulettes.** The *Melicocca diversifolia*, several species of *Phyllanthus*, the *Hirtella racemosa*, and the *Cuparia venulosa*. [B, 121.]—**B. de gayac.** See *B. de gaïac*.—**B. de girofle.** The wood of *Myrtus caryophyllata*. [B, 121, 173.]—**B. de glu.** The *Sapium ancuparium*. [B, 121.]—**B. de gommier blanc.** The *Bursera gummifera*. [B, 121.]—**B. de gommier bleu.** The *Eucalyptus globulus*. [B, 121.]—**B. de gonzalo-aloès.** See *B. de chat*.—**B. de gouyave.** The *Prockia ovata*. [B, 121.]—**B. de grenadelle.** The *Brya ebenus*. [B, 121.]—**B. de grignon.** The *Bucida buceras*. [B, 121.]—**B. de Jamone.** The *Cupania americana*. [B, 121, 173.]—**B. de joli-cœur.** The *Celastrus undulatus*. [B, 121, 173.]—**B. de lait.** The milk-wood of Jamaica; the *Plumiera alba* and the *Tabernæmontana citrifolia*, also the *Piratinera spuria* (*Brosimum spurium*). [B, 121, 173.]—**B. de la Jamaïque.** See *B. d'Inde*.—**B. de lance.** The wood of *Duguetia quitarensis*. [Roxburgh (A, 321).]—**B. de lance bâtard.** 1. The *Unona odorata*. [B, 121.] 2. The *Randia aculeata*. [B, 173.]—**B. de lance franc.** The *Randia aculeata*. [B, 121, 173.]—**B. de lardoire.** The *Euonymus europæus*. [B, 121.]—**B. de lessive.** The *Cytisus laburnum*. [B, 121.]—**B. de lettres.** 1. The *Sideroxylon inerme*. [B, 121.] 2. The *Piratinera guianensis*. [B, 173.]—**B. de licari, B. de licore.** The *Licaria guianensis*. [B, 121.]—**B. de liège.** See *B. à fléau*.—**B. de lièvre.** See *B. de lessive*. [B, 121.]—**B. de losteau.** The *Antirrhœa verticellata* and the *Antirrhœa dioica*. [B, 121, 173.]—**B. de Luce, B. déluce.** The *Petaloma edulis*. [B, 121.]—**B. de lumier.** See *B. chandelle*.—**B. de mabouia.** See *B. caca*.—**B. de Maclure.** The *Maclura aurantiaca*. [B, 121.]—**B. de mafoutres.** A name applied to two Madagascar trees, one of which is a species of *Antidesma*, and the other is not yet determined. [B, 121.]—**B. de Mahaleb.** See *B. de Sainte-Lucie*.—**B. de mai.** The *Cratægus oxyacantha*. [B, 121, 173.]—**B. de mèche.** The *Apeiba glabra*, the *Agave fœtida*, and the *Agave cubensis*. [B, 121, 173.]—**B. de merde.** See *B. caca*.—**B. de merle.** The *Andromeda salicifolia*, the *Sapindus saponaria*, and the *Senecio undulata*. [B, 93, 121, 173.]—**B. de Montbrun.** The *Quevisia heterophylla*. [B, 121.]—**B. de musc.** The *Croton eleuteria*. [B, 121, 173.]—**B. de nagas, B. de naghas.** See *B. de fer*.—**B. de Natte.** The *Labourdannaisia glauca*, the *Achras* (*Mimusops*) *balata*, and the *Imbricaria borbonica*. [B, 121, 173.]—**B. d'encens.** A name applied to several burseraceous trees. especially of the genus *Bursera*, also to the *Icica heptaphylla*. [B, 121.]—**B. de Nicaragua.** 1. The same as *B. de Brésil*, but of an inferior quality. [B, 121.] 2. See *B. de Campèche*.—**B. dentelle.** See *B. de dentelle*.—**B. de pagaye blanc.** The *Robinia panacoco*. [B, 121.]—**B. de palissandre.** The wood of several species of *Dalbergia*. [A, 301; Guibourt (B, 121).]—**B. de panacocco.** The *Robinia panacoco*. [B, 121.]—**B. de Panama** [Fr. Cod.]. A wood supposed to be derived from the *Quillaia saponaria*, capable of forming a lather with water; used in the preparation of emulsions. [B, 121, 173.]—**B. de patte de lièvre.** The *Ochroma lagopus*. [B, 121.]—**B. de pavane.** The *Croton tiglium*. [B, 121. 173.]—**B. de perdrix.** See *B. de vouacapoua*.—**B. d'épi de blé.** A species of *Andira*. [B, 121.]—**B. de perpignan.** The *Celtis australis*. [B, 119.]—**Sain-b.** See *B. sain.*—**Teinture de b. d'aloès.** See *Tinctura* LIGNI *aloes.*—**Teinture de b. de Panama** [Fr. Cod.]. A preparation made by macerating 1 part of the wood of *Saponaria quillaia* in 5 parts of 80-per-cent. alcohol, and filtering. [B.]—**Teinture de b. de Panama coaltarée** [Fr. Cod.]. A preparation made by warming together 4 parts of *teinture de b. de Panama* and 1 part of coal-tar. [B.]

BOISDUVALIA (Lat.), n. f. Bwa^3-du^6-va^{3}l'*i*^{2}a^3. Fr., *boisduvalie.* A genus of the family *Onagarieœ*, comprising two species. [B, 19, 132.]

BOISEUX (Fr.), adj. Bwa^3-zu^5. Woody (said of plants). [B, 132.]

BOISSE (Fr.), n. Bwa^{3}s. A place near Fontenay-le-Comte, France, where there are purgative waters apparently containing sodium chloride and calcium carbonate and sulphate. [A, 348.]

BOISSIÉE (Fr.), n. Bwa^{3}s-si^2-a. An Australian genus of leguminous plants. [B, 132.]

BOISSON (Fr.), n. Bwa^{3}s-so^{2}n^2. A draught. [B ; L, 49.]—**B's acidules.** Acidulous drinks. [A, 385.]—**B's alcooliques.** Spirituous liquors. [A, 385.]—**B's aqueuses.** Watery drinks, such as lemonade, emulsions, etc. [A, 385.]—**B's aromatiques.** Aromatic infusions and decoctions, such as tea, coffee, etc. [A, 385 ; L, 41, 88.]—**B's économiques.** Cheap substitutes for wine. [A, 385.]—**B's effervescentes.** Effervescent drinks. [A, 385.]—**B's fermentées.** Fermented drinks ; beer, wine, cider, etc. [B, 132.]—**B's nutritives.** Soups, bouillon, etc. [A, 385.]—**B. simple.** Pure water. [B, 132.]—**B's spiritueuses.** See *B's alcooliques.*

BOÎTE (Fr.), n. Bwa^{3}t. A box or any box-like structure. [A, 385.]—**B. à amputations.** A case of amputating instruments. [A, 385.]—**B. à dissection.** A case of dissecting instruments. [A, 385.]—**B. à réactifs.** A case of chemical reagents. [A, 385.]—**B. à savonnettes.** See CAPSULA *circumcissa.*—**B. cranienne.** The cranium. [A, 385.]—**B. de la hanche.** The acetabulum. [L, 41.]—**B. de l'épaule.** The glenoid cavity of the scapula. [L, 41.]—**B. de secours.** A case containing instruments and appliances for the immediate treatment of the injured. [A, 385.]—**B. du crâne.** See *B. cranienne.*—**B. du genou.** The lower articular surface of the femur. [L, 41.]—**B. osseuse du crâne.** See *B. cranienne.*

BOITEMENT (Fr.), **BOITERIE** (Fr.), n's. Bwa^{3}t-ma^{3}n^2, -e^2-re. Lameness or any unnatural character of the gait due to some morbid state of one or both lower limbs. [L. A. de St.-Germain, "Rev. des mal. de l'enfance," April, 1885, p. 170 ; E.]

BOITEUX (Fr.), adj. Bwa^3-tu^5. Lame or affected with club-foot. [L, 41.]

BOÎTIER (Fr.), n. Bwa^{3}t-i^2-a. 1. An ointment box. [A, 300.] 2. A dressing-case with compartments for bandages, etc. [A, 385; E.]

BOJEREÆ [Reichenbach], **BOJERIEÆ** [De Candolle] (Lat.), n's f. pl. Bo-je(ya)'re^2 e(a^3-e^2), -je^{2}r(ye^{2}r)-i(i^2)'e^2-e(a^3-e^2). A division of vernoniaceous plants. [B, 170, 214.]

BOKENAKOO (Hind.), n. The *Zapania nodiflora.* [B, 172.]

BOKERELLE, n. The *Physalis alkekengi.* [B.]

BOKÖL, n. A Norwegian liquid alcoholic preparation of malt, of feeble diastasic power. ["Lancet," April 30, 1887, p. 886.]

BOL (Fr.), n. Bol. See BOLUS and BOLE.—**B. alimentaire.** See *Alimentary* BOLUS.—**B. aloétique** [Fr. Cod.]. See *B. purgatif.*—**B's antimoniaux.** See BOLI *stibiati.*—**B. blanc.** See *White* BOLE.—**B. calmant.** A bolus of 1 drachm of theriaca and $\frac{3}{4}$ grain of opium. [A, 259, 362.]—**B. d'Arménie, B. de Bohème.** See *Armenian* BOLE.—**B. de France.** See BOLE *of Blois.*—**B. de Hongrie, B. de Sinope.** See *Armenian* BOLE.—**B. du pays.** See BOLE *of Blois.*—**B. emménagogue.** See BOLUS *emmenagogus.*—**B. oriental.** See *Armenian* BOLE.—**B. purgatif** [Fr. Cod.]. A purgative bolus for horses, consisting of 375 grains of aloes, 30 grains of powdered colocynth, and a sufficient quantity of black soap. [A, 253.]—**B. rouge.** See *Armenian* BOLE.—**B. rouge artificiel.** A preparation made by dissolving 8 parts of alum and 1 part of sulphate of iron in water, mixing the solution with a solution of $3\frac{1}{4}$ parts of caustic soda, and washing and drying the precipitate. [Van Mons (A, 362).]—**B's stibiés.** See BOLI *stibiati.*—**Poudre de b. d'Arménie** [Fr. Cod.]. Lat., *pulvis boli orientalis* [Fr. Cod.]. A preparation made by pulverizing Armenian bole in an iron mortar, triturating the powder with water in an earthen dish, agitating the mixture from time to time for forty-eight hours, then mixing the deposit with the liquid, allowing the whole to stand for a few minutes, and then decanting the turbid liquid. These manipulations are repeated until all the fine portion has been separated and recovered, the residue of coarse powder being rejected. The deposit is formed into lozenges on a cloth and dried by heat. [A, 253.]

BOLA (Bengal., Hind.), n. The *Paritium tiliaceum.* [B, 172.]

BOLACEÆ (Lat.), n. f. pl. Bol-a(a^3)'se^2(ke^2)-e(a^3-e^2). Of Reichenbach, a division of the *Umbelliferœ* (or, according to a later classification, the *Araliaceœ*), comprising *Bolax*, *Hydrocotyle*, and other genera ; divided into the sections *Hermadeœ* and *Hydrocotyleœ.* [B, 170.]

BOLARERDE (Ger.), n. Bol'a^{3}r-e^{2}rd-e^2. See BOLE.

BOLARY, adj. Bol'a^{3}r-i^2. Gr., βώλινος. Lat., *bolaris.* Fr., *bolaire.* Ger., *bolar.* Of the nature of bole.

BOLAX (Lat.), n. f. Bol'a^{2}x(a^{3}x). Gen., *bol'acos* (*-cis*). Gr., βῶλαξ. See AZORELLA.—**B. aretioides, B. cæspitosa.** See AZORELLA *cœspitosa.*—**B. Gilliesii** [Hooker]. See AZORELLA *Gilliesii.*—**B. glebaria** [Commerson], **B. gum, B. gummifer** [Sprengel], **B'harz** (Ger.). See AZORELLA *glebaria.*—**B. trifurcata.** See AZORELLA *trifurcata.*—**Gomme de b.** (Fr.). See AZORELLA *glebaria.*

BOLBIDA, n. See BELBELTA.

BOLBITON, BOLBITOS, BOLBITUM (Lat.), n's n., m., and n. Bo^{2}l'bi^{2}t-o^{2}n, -o^{2}s, -u^{3}m(u^{4}m). See BOLITON.

BOLBOCASTANON (Lat.), n. n. Bo^{2}l-bo(bo^2)-ka^{2}s(ka^{3}s)'ta^{3}n-u^{3}m(u^{4}m). See BULBOCASTANUM.

BOLBODES, BOLBOIDES (Lat.), adj's. Bo^{2}l-bo'dez(das), -bo(bo^2)-i(e)'dez(das). Gr., βολβώδης, βολβοειδής. Ger., *zwiebelförmig.* Bulbous. [A, 322.]

BOLBOMELANOMA, BOLBOMELANOSIS (Lat.), n's n. and f. Bo^{2}l-bo(bo^2)-me^{2}l-a^{3}n-o'ma^3, -si^{2}s. Gen., *bolbomelanom'atos* (*-tis*), *-o'seos* (*-sis*). From βολβός, a bulbous root, and μελάνωμα, blackness, or μελάνωσις, a growing black. Ger., *Schwarzschwamm des Auges, schwarze Augenkrebs.* Old terms for melanotic cancer of the eyeball. *Bolbomelanosis* is more properly the process of formation of such a cancer. [A, 322.]

BOLBOS (Lat.), n. m. Bo^{2}l'bo^{2}s. Gr., βολβός. An ancient name for the bulbous root of a certain plant that grew wild in Greece. [A, 311 ; L, 119.]

BOLCHON (Lat.), n. n. Bo^{2}l'ko^{2}n(ch^{2}o^{2}n). Gr., βολχόν. According to Dioscorides, bdellium (*q. v.*). [Gorræus (A, 325).]

BOLDINE, n. Bold'en. An alkaloid found in the leaves of the *Peumus boldo.* [B, 81.]

BOLDO [Fr. Cod.], n. Bold'o. Lat., *boldus.* The leaves of *Peumus b.* ; thought to be tonic (especially to the intestinal canal), narcotic, and diuretic. [A, 471 ; B, 81.]—**B.-glucin.** A glucoside

obtained by Chapoteaut from the leaves of *Peumus b.*; hypnotic and thought by Juranville likely to prove of value in neurotic and maniacal insomnia. ["Lancet," Oct. 16, 1886, p. 744.]—**Fluid extract of b.** See BOLDI *extractum fluidum.*—**Tincture of b.** Fr., *teinture de b.* [Fr. Cod.]. A tincture prepared with 20 parts of the leaves of *Peumus b.* and 100 of 60-per-cent. alcohol. [B, 81.]—**Wine of b.** Fr., *vin de b.* [Fr. Cod.]. A preparation made with 100 parts of Madeira wine and 3 of the leaves of *Peumus b.* [B, 81.]

BOLDOA (Lat.), n. f. Bol-do'a^3. From the Chilian name, *boldu.* A genus of monimiaceous trees. The drupes, of about the size of haws, are succulent and very aromatic. The bark is used in tanning, and the wood in making charcoal. [B, 19.]—**B. aromatica.** A Chilian tree. Every part of it is aromatic; the leaves and bark are used for baths in rheumatism; the fruit is juicy and edible; and the wood yields excellent charcoal. ["Proc. of the Am. Pharm. Assoc.," xvi, p. 198 (B).]—**B. fragrans** [A. Gray]. See PEUMUS *boldo.*

BOLDU, n. A Chilian name for the *Peumus boldo.* [B, 19.]

BOLDUS (Lat.), n. m. Bold'u^{3}s(u^{4}s). See BOLDO.—**Boldi extractum fluidum.** A fluid extract of the leaves of *Peumus boldo,* of which 17 fl. oz. represent 17⅜ oz. (av.) of the drug in No. 60 powder, alcohol being used as the menstruum. [A, 472.]

BOLE, n. Bol. Gr., βῶλος. Lat., *bolus.* Fr., *bol.* Ger., *Bolarerde.* It., *bolo.* Sp., *bol.* A form of argillaceous earth or clay occasionally employed in medicine; consisting chiefly of aluminium silicate, often colored more or less red by the presence of iron oxide or hydrate. It was often stamped with a seal when prepared for medicinal use, and was then called *terra sigillata.* [B, 5, 10.]—**Armenian b.** Gr., βῶλος ἀρμήνιος. Lat., *bolus Armeniæ* (seu *orientalis* [Fr. Cod.], seu *Armenæ* [Belg. Ph.], seu *armena* [Pruss. Ph., 6th ed., Gr. Ph., Hung. Ph.]). Fr., *bol d'Arménie* [Fr. Cod.]. Ger., *armenischer Bolus.* It., *bolo armeno.* Sp., *bol arménico* [Sp. Ph.]. A fine, unctuous, reddish variety originally brought from Armenia. [B.]—**B. of Blois, French b.** A yellow variety found in France, containing calcium carbonate. [L, 108.]—**Lemnian b.** Ger., *lemnische Erde.* B. brought from the island of Lemnos. [B.]—**Red b.** Lat., *bolus rubra.* Fr., *bol rouge.* Ger., *rother Bolus.* Armenian b. colored red by the presence of a salt of iron. [B, 5.]—**White b.** Lat., *bolus alba* [Ger. Ph., Dan. Ph.], *argilla* [Belg. Ph.]. Fr., *bol blanc.* Ger., *weisser Bolus* (oder *Thon* [Ger. Ph.]). A white clay, tasteless, odorless, and free from sand, consisting chiefly of aluminium silicate. [B.]

BOLESIS, n. An alchemical name for coral. [Ruland (A, 325).]

BOLET (Fr.), n. Bo-la. See BOLETUS.—**B. à écailles.** See POLYPORUS *subsquamosus.*—**B. amadouvier.** See POLYPORUS *igniarius.*—**B. bigarré.** See POLYPORUS *versicolor.*—**B. blanc.** See BOLETUS *albus.*—**B. bleuissant.** See BOLETUS *cyanescens.*—**B. bronzé.** See BOLETUS *æreus.*—**B. chicotin.** See BOLETUS *felleus.*—**B. comestible.** See BOLETUS *edulis.*—**B. de Sologne.** See POLYPORUS *suaveolens.*—**B. du mélèze.** See BOLETUS *cyanescens.*—**B. du mûrier blanc.** See BOLETUS *lacteus.*—**B. du noyer.** See BOLETUS *luridus.*—**B. fongo-corvo.** See BOLETUS *fongo-corvo.*—**B. indigo, B. indigotier.** See BOLETUS *cyanescens.*—**B. luisant.** See BOLETUS *luridus.*—**B. marron.** See BOLETUS *æreus.*—**B. odorant.** See BOLETUS *satanas.*—**B. orange.** See BOLETUS *scaber.*—**B. pernicieux.** See BOLETUS *luridus.*—**B. poivré.** See BOLETUS *piperatus.*—**B. rabateux.** See BOLETUS *scaber.*—**B. scopetino.** See BOLETUS *scopetino.*—**B. subéreux.** See BOLETUS *suberosus.*—**B. touffu.** See POLYPORUS *frondosus.*—**B. velu.** See POLYPORUS *hirsutus.*

BOLETATE, n. Bol'e^{2}t-at. Fr., *bolétate.* A salt of boletic acid. [A, 385.]

BOLETI (Lat.), n. m. pl. Bol-e(a)'ti(te). Of Ehrenberg, a cohort of *Fungi,* comprising *Boletus* and other genera. [B, 170.]

BOLETIC, adj. Bol-e^{2}t'i^{2}k. Fr., *bolétique.* Pertaining to or derived from a *Boletus.* [A, 385.]—**B. acid.** Fr., *acide bolétique.* Ger., *Boletsäure* See FUMARIC ACID.

BOLETIDEÆ (Lat.), n. f. pl. Bol-e^{2}t(at)-i^{2}d'e^2-e(a^3-e^2). Of Gray, a division of the *Hymenotheceæ,* comprising *Boletus* and other genera [B, 170.]

BOLETIFORM, adj. Bol-e^{2}t'i^2-fo^{2}rm. Fr., *bolétiforme.* Mushroom-shaped. [L, 232.]

BOLÉTIN (Fr.), adj. Bo-la-ta^{2}n^2. Living in or among *Fungi.* [L, 41.]

BOLETIVOROUS, adj. Bol-e^{2}t-i^{2}v'o-ru^{3}s. From *boletus* (*q. v.*), and *vorare,* to eat. Fr., *bolétivore.* Subsisting on *Fungi.* [A, 385.]

BOLETOIDEÆ (Fr.), n. f. pl. Bol-e^{2}t(at)-o(o^2)-i^{2}d(ed)'e^2-e(a^3-e^2). Of Schulz, a family of *Fungi* (*Hymenosporangeiæ*), comprising the sections *Meruliacea* and *Polyporea.* [B, 170.]

BOLÉTOÏDE (Fr.), adj. Bo-la-to-ed. See BOLETIFORM.

BOLETOIDEI (Lat.), n. m. pl. Bol-e^{2}t(at)-o(o^2)-i^{2}d(ed)'e^2-i(e). Of Persoon, Lamarck, and others, a division of *Fungi* (*Hymenothecii*), including *Boletus* and other genera. [B, 170.]

BOLÉTOPHAGE (Fr.), adj. Bo-la-to-fa^{3}zh. See BOLETIVOROUS.

BOLETSÄURE (Ger.), n. Bol-at'zoir-e^2. See FUMARIC ACID.

BOLETUS (Lat.), n. m. Bol-e(a)'tu^{3}s(tu^{4}s). Gr., βωλίτης. Fr., *bolet.* Ger., *Kugelschwamm, Röhrenpilz.* A genus of hymenomycetous *Fungi* characterized by having the receptacle in the form of a soft, fleshy pileus borne on a central stipes (often reticulate) and containing the spores in parallel patent tubes readily separable from each other and from the pileus. [B, 105.]—**B. adustus** [Willdenow]. The *Polyporus adustus.* [B, 180.]—**B. æreus** [Bulliard]. Fr., *bolet bronzé, cèpe franc* (ou *noir*). Ger., *Kupferpilz.* Syn.: *Suillus æreus* [Poiret]. A species growing in France and Germany; eaten in France. [B, 180.]—**B. æstivalis** [Fries]. Fr., *cèpe royal, grand mousseau d'été.* Syn.: *Tubiporus æstivalis* [Paulet]. A species growing in the late spring and early summer, having a reddish-yellow pileus and stipes, the latter expanded at the base and attenuate above. The flesh is white and has an agreeable odor and taste. [B, 61, 105.]—**B. æstivus** [Slotterbeck]. See *B. edulis.*—**B. agaricus.** See POLYPORUS *officinalis.*—**B. albidus** [Persoon]. See POLYPORUS *ovinus.*—**B. albus** [Bulliard]. Fr., *bolet blanc.* An edible species growing in France. [B, 173.]—**B. annulatus.** See *B. subtomentosus.*—**B. atrofuscus, B. atrorufus.** See POLYPORUS *versicolor.*—**B. aurantiacus** [Bulliard], **B. aurantius** [Persoon]. See *B. scaber.*—**B. aureus.** See *B. granulatus.*—**B. badius** [Fries]. Ger., *Maronenpilz.* An edible species growing in pine woods. [B, 180.]—**B. betulinus.** See POLYPORUS *betulinus.*—**B. bovinus.** Ger., *Kuhpilz.* 1. Of Linnæus, an edible species growing in pine woods in autumn. 2. Of Schaeffer, the *B. scaber.* 3. Of the "Fl. dan.," the *B. subtomentosus.* 4. Of Müller, the *B. edulis.* 5. Of others, a variety of the *B. luridus.* [B, 61, 173, 180.]—**B. buglossum** [Retzius]. See FISTULINA *hepatica.*—**B. bulbosus** [Schaeffer]. See *B. edulis.*—**B. canus.** See *B. scaber.*—**B. castaneus** [Bulliard]. Fr., *cèpe creux, bolet marron.* Ger., *Kastanienpilz.* Syn.: *Tubiporus fistulosus* [Paulet]. An edible species, of agreeable odor and taste, having a chestnut-colored stipes and pileus, growing in the woods in summer and autumn. [B, 61, 105, 180.]—**B. caudicinus** [Scopoli], **B. cellulosus** [Lightfoot]. See POLYPORUS *squamosus.*—**B. cervi, B. cervinus.** See ELAPHOMYCES *granulatus.*—**B. chioneus** [Fries]. See *B. scaber.*—**B. chirurgorum.** See POLYPORUS *fomentarius.*—**B. chrysenteron** [Fries, Bulliard]. An edible species, usually referred to *B. subtomentosus.* [B, 61, 173, 180.]—**B. cinnamomeus** [Schumacher]. A variety of *B. luridus.* [B, 173.]—**B. circinans** [Persoon]. See *B. granulatus.*—**B. citrinus** [Nees]. See POLYPORUS *sulphureus.*—**B. collinitus.** An edible species growing in the United States. [B, 61.]—**B. communis** [Bulliard]. See *B. sanguineus.*—**B. constrictus** [Persoon]. See *B. cyanescens.*—**B. convexus** [Retzius]. See *B. scaber.*—**B. coriaceus** [Hudson]. See POLYPORUS *sulphureus.*—**B. corinthiacus** [Persoon]. See POLYPORUS *subsquamosus.*—**B. crassipes** [Schaeffer]. See *B. subtomentosus.*—**B. cristatus.** See POLYPORUS *frondosus.*—**B. cupreus** [Schaeffer]. See *B. subtomentosus.*—**B. cyanescens** [Bulliard]. Fr., *bolet indigo* (ou *indigotier,* ou *bleuissant*). Syn.: *B. constrictus* [Persoon]. A poisonous species (although said to be eaten by some persons) with the stipes and pileus pale; the tubes milky-white, changing to yellowish-white; and the flesh white, assuming a blue tint on section. [B, 61, 173.]—**B. discoideus.** See POLYPORUS *suaveolens.*—**B. dulcis** [Persoon]. See *B. edulis.*—**B. edulis** [Bulliard, Persoon]. Fr., *bolet comestible, cèpe franc, tête rousse, polonais, gyrole, potiron, gros-pied, bruguet.* Ger., *Herrenpilz, Steinpilz.* Syn.: *Suillus esculentus* [Micheli], *Tubiporus edulis* [Paulet]. A species growing in the ground in the woods in spring, summer, and autumn; distinguished by its thick, cushion-shaped, pale-red or tawny, moist pileus, its large, cylindrical, reddish stipes, and its white tubes, which subsequently assume a ferruginous tint. It has an agreeable odor and taste, and is one of the most important edible species. A variety with a black pileus (Fr., *cèpe franc à tête noire*) and another with a reddish pileus (Fr., *cèpe de Fontainebleau, cèpe de Bordeaux*) are both edible. [B.]—**B. elegans** [Fries]. An edible European species. [B, 61.]—**B. erythropus** [Persoon]. A variety of *B. luridus.* [B, 173.]—**B. esculentus.** 1. Of Persoon, the *B. edulis.* 2. An old pharmaceutical name for various edible species of *Morchella.* [B, 173, 180.]—**B. felleus** [Bulliard]. Fr., *bolet chicotin.* A poisonous species having white flesh, changing to a rose color when cut, a bitter taste, a yellowish stipes with tawny lines forming a cylindrical network, and a tawny pileus at first convex, then flat. [B, 105.]—**B. ferrugineus.** 1. Of Schaeffer, the *B. granulatus.* 2. Of Batsch, the *B. piperatus.* [B, 173, 180.]—**B. flavidus** [Fries]. An edible species. [B, 61.]—**B. flavorufus** [Schaeffer]. See *B. granulatus.*—**B. flavus.** A European species said to be edible. [B, 61.]—**B. fomentarius** [Linnæus]. See POLYPORUS *fomentarius.*—**B. fongo-corvo** [Micheli]. An edible Italian species. [B, 173.]—**B. fre** [Bellardi]. See *B. luridus.*—**B. frondosus** [Linnæus, Dickson, Schranck]. Fr., *bolet touffu.* See POLYPORUS *frondosus.*—**B. fulvidus** [Fries]. A variety of the *B. cyanescens.* [B, 173.]—**B. fulvus** [Willdenow, Scopoli]. A species referred to *Polyporus igniarius* or *Polyporus marginatus.* [B, 173.]—**B. granulatus** [Linnæus]. Fr., *pinceau jaunâtre.* Ger., *Schmierling.* Syn.: *Fungus porosus* [Vaillant]. A species often eaten and said to have an agreeable taste, although by some regarded as poisonous. It grows in the woods in summer and autumn. [B, 61, 105, 180.]—**B. gregarius** [Vahl]. The *B. bovinus* of Linnæus. [B, 180.]—**B. Grevillei.** A species said to be edible. [B, 61.]—**B. hepaticus** [Persoon, Hudson]. See FISTULINA *hepatica.*—**B. hippocrepis** [Schranck]. See POLYPORUS *igniarius.*—**B. hirsutus** [Scopoli], **B. hispidus** [Bulliard]. See POLYPORUS *hirsutus.*—**B. igniarius.** Of Linnæus, the *Polyporus igniarius*; in pharmacy, the *Polyporus fomentarius.* [B, 173, 180.]—**B. imbricatus** [Scopoli]. See POLYPORUS *versicolor.* [B, 173.]—**B. impolitus** [Fries]. An edible species. [B, 270.]—**B. intybaceus** [Baumgarten]. See POLYPORUS *frondosus.*—**B. juglandis** [Bulliard]. In part, the *Polyporus squamosus.* [B, 105, 173.]—**B. lacrimans.** See MERULIUS *lacrimans.*—**B. lacteus** [Batsch]. Fr., *bolet du mûrier blanc.* A species in part referred to *Polyporus tuberaster.* [B, 173.]—**B. laricis.** See POLYPORUS *officinalis.*—**B. leoninus.** See *B. obsonium.*—**B. leucopodius** [Persoon]. See *B. scaber.*—**B. lingua cervina, B. lobatus.** See POLYPORUS *sulphureus.*—**B. lupinus** [Fries].

THE BOLETUS EDULIS. [A, 327.]

Ger., *Feuerpilz, Rothfuss.* A poisonous species. [B, 270.]—**B. luridus** [Schaeffer, Krombholz]. Fr., *bolet pernicieux* (ou *luisant*, ou *du noyer*), *oignon de loup.* Ger., *Hexenpilz, Judenpilz, Schusterpilz, Donnerpilz.* Syn.: *Tubiporus cepa* [Paulet]. A very poisonous species sometimes confounded with *B. edulis.* It has a strong nauseous odor; white flesh, turning blue and then greenish-black when broken; a red stipes with a yellow tint; and a cushion-shaped pileus, grayish at first, then olive-colored. The lower surface of the tubes is of a blood-red or vermilion color. [B, 61, 105, 173, 180.]—**B. luteus.** See *B. subtomentosus.*—**B. magni Julii mensis.** See *B. versipellis.*—**B. marginatus** [Persoon]. See POLYPORUS *marginatus.*—**B. mori albi** [Duchesne]. A French species a decoction of which yields different coloring matters. [B, 173.]—**B. mutabilis** [Schulz], **B. nigrescens** [Pallas]. See *B. luridus.*—**B. nitens** [Batsch]. See POLYPORUS *sulphureus.*—**B. obsonium** [Fries]. Fr., *obson, cèpe obson.* Syn.: *Tubiporus obsonium* [Paulet]. An edible species appearing in autumn, having a lemon-colored stipes, a pale cinnamon, soft, silky pileus, and yellow tubes turning to brown. [B, 105.]—**B. obtusus** [Persoon]. See POLYPORUS *igniarius.*—**B. officinalis** [Batsch]. See POLYPORUS *officinalis.*—**B. ovinus** [Schaeffer]. See POLYPORUS *ovinus.* [B, 74, 180.]—**B. pachypus** [Fries]. Fr., *cèpe cordon-rouge, bousse de vache.* Syn.: *Suillus esculentus crassus* [Micheli], *Tubiporus extensus* [Paulet]. A poisonous species. [B, 105, 270.]—**B. parvulus** [Léveillé]. Fr., *cépillon.* Syn.: *Tubiporus parvulus.* A poisonous species. [B, 105.]—**B. pellitus** [Léveillé]. Fr., *cèpe peaucier à verrues.* Syn.: *Tubiporus pellitus* [Paulet]. An edible species. [B, 105.]—**B. perniciosus.** See *B. luridus.*—**B. pes capræ** [Persoon]. See POLYPORUS *pes capræ.*—**B. phalloides.** See PHALLUS *impudicus.*—**B. pini laricis.** See POLYPORUS *officinalis.*—**B. piperatus** [Bulliard]. Fr., *bolet poivré.* Ger., *Pfefferschwamm, Pfefferpilz.* A poisonous species growing in France. [B, 173, 270.]—**B. platyporus** [Persoon]. See POLYPORUS *squamosus.*—**B. plicatus** [Schumacher]. See POLYPORUS *versicolor.* [B, 173.]—**B. polycephalus** [Persoon]. See POLYPORUS *umbellatus.*—**B. polymorphus** [Bulliard]. See POLYPORUS *squamosus.*—**B. pomaceus** [Persoon]. A variety of the *Polyporus igniarius.* [B. 173.]—**B. procerus** [Bolton]. See *B. scaber.*—**B. psittacinus** [Léveillé]. Fr., *cèpe perroquet.* Syn.: *Tubiporus psittacinus* [Paulet]. A poisonous European species. [B, 105.]—**B. purgans.** Of Persoon and the pharmacists, the *Polyporus officinalis.* [B, 180.]—**B. quercus.** A pharmaceutical name for the *Polyporus fomentarius.* [B, 180.]—**B. radicans** [Persoon, Krombholz]. Fr., *cèpe écaillé longue-tige.* Syn.: *Tubiporus longipes* [Paulet]. A poisonous species. [B, 105.]—**B. ramosissimus** [Schaeffer, Scopoli]. The *Polyporus frondosus* and *Polyporus umbellatus.* [B, 180.]—**B. ramosus** ["Fl. dan."]. See POLYPORUS *umbellatus.*—**B. regius** [Krombholz]. Ger., *Königspilz.* An edible species. [B, 270.]—**B. reticulatus** [Schaeffer]. See *B. edulis.*—**B. ribis.** One of the species from which amadou is said to be prepared. [A, 308.]—**B. rubeolarius** [Bulliard]. See *B. luridus.*—**B. rubeolus** [Sowerby]. A variety of *B. luridus.* [B, 173.]—**B. rufus** [Schaeffer]. See *B. versipellis.*—**B. salicinus** [Bulliard], **B. salicis.** See POLYPORUS *suaveolens.*—**B. sanguineus** [Withering, Sowerby]. Fr., *pinceau tête-rouge.* A poisonous species; of Planer, the *Fistulina hepatica.* [B, 173.]—**B. satanas** [Lenz]. Fr., *bolet odorant.* Ger., *Satanspilz, wohlriechender Weidenschwamm.* A very poisonous species having a yellowish pileus, turning blue when broken; tubes with dark brick-red orifices; and a thick, dark-red stipes. It has been vaunted as a remedy for consumption. [B, 61, 180; L, 43, 49.]—**B. scaber** [Bulliard]. Fr., *bolet orange, girole rouge, roussile.* Ger., *Kapuzinerpilz.* An edible species growing in the woods in summer and autumn; having a thick, convex, reddish-brown pileus; a grayish-white, scabrous stipes, attenuate above; and white tubes which subsequently become dusky. The *B. scaber*, var. *rufus* [Persoon], is the *B. versipellis.* [B, 105, 173, 180.]—**B. scopetino** [Micheli]. An edible Italian species. [B, 173.]—**B. scutiformis** [Frattinik]. See POLYPORUS *igniarius.*—**B. soloniensis** [Dubois]. Fr., *chavancelle.* A French species, used in the preparation of amadou. [B, 173.]—**B. spongiosus** [Lightfoot]. See POLYPORUS *hirsutus.*—**B. squamosus** [Schaeffer]. See POLYPORUS *squamosus.*—**B. strigosus** [Schulz]. See POLYPORUS *igniarius.*—**B. suaveolens.** Fr., *bolet de Sologne.* Of Linnæus and the pharmacists, the *Polyporus suaveolens.* [B, 180.]—**B. suberosus.** Fr., *bolet subéreux.* Of Bolton, the *Polyporus suaveolens*; of Bulliard, a species sometimes referred to *Dædalea*, used as a substitute for cork. [B, 173.]—**B. subsquamosus** [Fries]. See POLYPORUS *subsquamosus.* [B, 173.]—**B. subtomentosus** [Linnæus]. Fr., *marbrés, mouchetés.* Ger., *Ziegenlippe.* Syn.: *Tubiporus marmoratus* (var. *major, minor, multicolor*, and *fuliginosus*) [Paulet]. *Tubiporus guttatus* (var. *major* and *minor*) [Paulet]. A species regarded as edible, although some have considered it poisonous; having a pale, faintly yellowish stipes, often striate; a soft, yellowish pileus covered with a pellicle like chamois-skin; soft, yellow flesh; and yellow tubes changing to green. The *B. subtomentosus*, var. β [Fries], is the *B. sanguineus.* [B, 61, 105, 173, 180.]—**B. sulphureus, B. tenax** [Bolton]. See POLYPORUS *sulphureus.*—**B. terreus** [Retzius]. See *B. scaber.*—**B. tuberaster** [Jacquin]. See POLYPORUS *tuberaster.*—**B. tuberosus** [Bulliard]. See *B. luridus.*—**B. umbellatus** [Persoon]. See POLYPORUS *umbellatus.*—**B. umbrinus** [Persoon]. See *B. edulis.*—**B. ungulatus.** Of Bulliard, the *Polyporus fomentarius*; of Schaeffer, the *Polyporus marginatus.* [B, 180.]—**B. variegatus.** Ger., *Sandpilz.* An edible species growing on sandy soil in pine woods. [B, 180.]—**B. velutinus** [Sowerby]. Fr., *bolet velu.* See POLYPORUS *hirsutus.*—**B. versicolor** [Linnæus]. See POLYPORUS *versicolor.*—**B. versipellis** [Fries]. Fr., *cèpe de juillet.* An edible species often regarded as a variety of *B. scaber.* [B, 61, 105.]—**B. villosus** [Hudson]. See POLYPORUS *hirsutus.*—**B. viscidus** [Linnæus], **B. viscosus** [Schulz]. See *B. scaber.*—**Touchwood b.** See POLYPORUS *igniarius.*

BOLIMBA, n. The *Averrhoa bilimbi.* [B, 88.]

BOLINIDÆ (Lat.), n. f. pl. Bo^{2}l-i^{2}n'i^{2}d-e(a^3-e^2). Syn.: *Ophiusides.* A family of the *Limbatæ.* [L, 248.]

BOLISMUS (Lat.), n. m. Bo^{2}l(bol)-i^{2}z(i^{2}s)'mu^{3}s(mu^{4}s). A form of the word *bulimus* found in Avicenna. [A, 325.] See BULIMIA.

BOLI'S ROOT, n. The *Psoralea eglandulosa.* [B.]

BOLITES (Lat.), n. m. Bol-i(i^2)'tez(tas). Gr., βωλίτης. 1. See BOLETUS. 2. The root of the *Lychnis.* [Pliny (A, 318).]

BOLITOGLOSSIDÆ (Lat.), n. f. pl. Bo^{2}l(bol)-i^{2}t-o(o^2)-glo^{2}s-(glos)'si^{2}d-e(a^3-e^2). From βωλίτης, a mushroom, and γλῶσσα, the tongue. A family of *Salamandridæ* having a mushroom-shaped tongue. [L, 204.]

BOLITON (Lat.), n. n. Bo^{2}l'i^{2}t-o^{2}n. Gr., βόλιτον. Cow-dung. [A, 322.]

BOLITOPHILE (Fr.), adj. Bol-i^{2}t-o-fel. From βωλίτης, a mushroom, and φιλεῖν, to be fond of. Living on mushrooms (said of insects). [L, 41.]

BOLITOS (Lat.), n. m. Bo^{2}l'i^{2}t-o^{2}s. Gr., βόλιτος. See BOLITON.

BOLIVARIACEÆ [Griselad. Meissner], **BOLIVARIEÆ** [Endlicher] (Lat.), n's f. pl. Bo^{2}l-i^2-va^{3}r-i^2-a(a^3)'se^2(ke^2)-e(a^3-e^2), -i(i^2)'e^2-e(a^2-e^2). An order of plants (*Ligustrinæ*) comprising the genera *Bolivaria* and *Menodora.* [B, 170.]

BOLL (Ger.), n. Bol. A place in Würtemberg. where there is a spring containing sodium sulphate and hydrogen sulphide.

BOLLAUGE (Ger.), n. Bol'a^3-ug-e^2. See EXOPHTHALMIA.

BOLLE (Ger.), n. Bol'le^2. The root of *Allium cepa.* [B, 180.]

BOLLE (It.), n. Bol'la. See ACQUA *B.*

BOLLETERIE, BOLLETRIE, n's. See BALATA.

BOLLICHT (Ger.), **BOLLIG** (Ger.), adj's. Bol'i^{2}ch^{2}t, -i^{2}g. Bulbous, globular. [L, 46.]

BOLLION, n. The *Vaccinium myrtillus.* [L, 105.]

BOLOGNESERSPATH (Ger.), n. Bol-on-yas'e^{2}r-spa^{3}t. A variety of barium sulphate found in Italy. [B, 180.]

BOLORRHETIN, n. Bol-o^{2}r-re'ti^{2}n. From βῶλος, a clod of earth, and ῥητίνη, pine-resin. Fr., *bolorrhétine.* A resinous substance found in the leaves of the *Coniferæ* and in the wood of fossil pines. [L, 42.]

BOLOS (Lat.), n. m. Bol(bo^{2}l)'o^{2}s. Gr., βόλος (from βούλεσθαι, to cast). A shedding of teeth; also the eruption of the teeth, dentition. [Aristotle (A, 311); A, 322.]

BOLSA DEL PASTOR (Sp.), n. Bol'sa^3 de^{2}l pa^{3}s-tor'. The *Capsella bursa pastoris.* [L, 105.]

BOLTENHAGEN (Ger.), n. Bolt'e^{2}n-ha^{3}g-e^{2}n. A sea-bathing establishment in Mecklenburg-Schwerin. [L, 30.]

BOLTONIA (Lat.), n. f. Bo^{3}l-ton'i^2-a^3. After J. Bolton, an English botanist. A genus of composite plants of the tribe *Asteroideæ*, subtribe *Heterochromeæ*, made by L'Héritier. [B, 42, 212, 214, 215.]—**B. indica** [Bentham and Hooker]. See LOTONIA *indica.*

BOLTS, n. Bo^{3}ltz. An old name for the *Trollius europæus.* [B.]

BOLUS (Lat.), n. f. (1st def.) and m. (2d def.). Bol'u^{3}s(u^{4}s). Ar., *lezma* (2d def.), *lacma* (2d def.), *cuthaira* (2d def.). Heb., *patbag* (2d def.), *pat* (2d def.). Gr., βῶλος. Fr., *bol, bouchée* (2d def.), *morceau* (2d def.). Ger., *Bolarerde* (1st def.), *Bissen* (2d def.). 1. Bole (*q. v.*). [A, 322, 325; B.] 2. A mass ready to be swallowed; in pharmacy, a pill-like mass of large size. [A, 385; B, 180.]—**Alimentary b.** Lat., *b. alimentarius.* Fr., *bol alimentaire.* Ger., *Bissen.* The rounded mass of food after it has been masticated and impregnated with saliva and is about to be swallowed. [A, 385.]—**Armenischer B.** (Ger.). See *Armenian* BOLE.—**Boli diuretici pro equis** [Belg. Ph.]. Diuretic b'es for horses, 25 parts each of powdered potassium carbonate and powdered potassium nitrate, 62·5 of powdered licorice root, 100 each of white or Burgundy pitch and soap, and 6 of oil of juniper are beaten into a mass with the necessary excipient, which is divided into b'es of 900 grains each. [B, 95.]—**Boli emmenagogi irritantes** [Bat. Ph., 1805]. Fr., *bols emménagogues irritantes.* B'es made of 1 part of Socotrine aloes, 2 parts of aqueous extract of myrrh, 3 parts of extract of horehound, and a sufficient quantity of honey; each weighing between 7 and 8 grains. [L, 85.]—**Boli martiales emmenagogi** [Bat. Ph., 1805]. B'es made of 8 parts of Socotrine aloes, 30 of scales of iron, and a sufficient quantity of elder rob; each weighing 6 grains. [L, 85.]—**Boli purgantes pro equis.** See BOLS *purgatifs.*—**Boli stibiati.** Fr., *bols stibiés* (ou *antimoniaux*). B'es each containing 4 grains of antimonium crudum and 1 grain of cinnamon made into a mass with conserve of roses. Similar preparations have been ordered in various unofficial formularies. [Ph. of the Paris Mil. Hosp., 1839 (B); B, 119.]—**B. ad quartanam.** An old febrifuge preparation containing cinchona, tartar emetic, and potassium carbonate; used particularly in remittent fevers. [L, 32.]—**B. alba** [Ger. Ph.]. See *White* BOLE.—**B. alimentarius.** See *Alimentary b.*—**B. armena, B. Armenæ.** See *Armenian* BOLE.—**B. armena rubra.** See *Red* BOLE.—**B. Armenæ præparatus** [Belg. Ph.]. A preparation similar to the *poudre de bol d'Arménie* (*q. v.*, under BOL). [B, 95.]—**B. armenia, B. armeniaca, B. Armeniæ.** See *Armenian* BOLE.—**B. blessensis.** See BOLE *of Blois.*—**B. candida, B. communis alba.** See *White* BOLE.—**B. drasticus anglicus** [Belg. Ph.]. A b. made up of 35 parts of Barbadoes aloes, 4 of gamboge, 10 of white soap, and 1 part of oil of anise. [B, 95.]—**B. gallica.** See BOLE *of Blois.*—**B. judaica.** See ALTHÆA.—**B. orientalis** [Fr. Cod.]. See *Armenian* BOLE.—**B. purgativus** [Belg. Ph.]. A b. made up of 15 parts of Cape aloes, 5 of white soap, 4 of gentian root, and 1 part of magnesium carbonate. [B. 95.]—**B. rubra.** See *Red* BOLE.—**B. rubra nostras.** See BOLE *of Blois.*—**B. vulgaris alba.** See *White* BOLE.—**B. vulgaris rubra.** See *Red* BOLE.—**Pulvis boli orientalis** [Fr. Cod.]. See *Poudre de* BOL *d'Arménie.*—**Rother B.** (Ger.). See *Red* BOLE.—**Weisser B.** See *White* BOLE.

BOMA-PAPATA (Teloogoo), n. The *Stylocaryne webera.* [B, 172.]

BOMAREA (Lat.), n. f. Bom-a^{3}r-e(a)'a^{3}. Fr., *bomarée*. Of Mirbel, a genus of amaryllidaceous plants. [A, 385.]—**B. salsilla** [Mirbel]. See ALSTROEMERIA *salsilla*.

BOMB, n. Bu^{3}m. See BOMBUS.—**Discharging b's.** The cysts of certain of the *Gregarinidæ*; so called from their rupturing with apparent violence. [L, 182.]

BOMBACEÆ (Lat.), n. f. pl. Bo^{2}m-ba(ba^{3})'se^{2}(ke^{2})-e(a^{3}-e^{2}). Fr., *bombacées*. A group of thalamifloral dicotyledonous plants of Lindley's malval alliance: considered a suborder of the *Sterculiaceæ* (or *Malvaceæ* [Bentham and Hooker]). [B, 19, 42.] See MALVACEÆ.

BOMBACEOUS, adj. Bo^{2}m-ba'shu^{3}s. Lat., *bombaceus*. Fr., *bombacé*. Resembling the *Bombax*; of or pertaining to the *Bombaceæ*. [B.]

BOMBALO, n. Bo^{2}m'ba^{3}l-o. A glass globe formerly used in subliming camphor. [L, 65.]

BOMBARDE (Fr.), n. Bo^{2}n^{2}-ba^{3}rd. The *Tragopogon pratense*. [B, 173.]

BOMBARDIERKÄFER (Ger.), n. Bo^{2}m-ba^{3}rd-er'kaf-e^{2}r. See BRACHINUS *crepitans*.

BOMBATE, n. Bo^{2}m'bat. A salt of bombic acid. [L, 56.]

BOMBAX (Lat.), n. n. Bo^{2}m'ba^{2}x(ba^{3}x). Gen., *bom'bacis*. 1. Cotton. [A, 325.] 2. A genus of bombaceous (according to Bentham and Hooker, malvaceous) plants, including those that produce the so-called silk-cotton. [B, 19, 180.]—**Bombacis semina.** The seeds of *Gossypium herbaceum*. [B, 180.]—**B. ceiba.** See ERIODENDRON *anfractuosum*.—**B. grandiflorum.** The *Cochliospermum gossypium*. [B, 180.]—**B. heptaphyllum.** See *B. malabaricum* and *B. septenatum*.—**B. hibiscifolium.** The *Maximiliania regia*. [B, 173.]—**B. malabaricum** [De Candolle]. An East Indian tree, the bark of which is used externally for inflammations and cutaneous eruptions, the root-bark as an emetic, the leaves for diarrhœa, and the nectar of the flowers as a laxative and diuretic. [B, 173, 180.]—**B. occidentale** [Sprengel]. See ERIODENDRON *occidentale*.—**B. orientale** [Sprengel]. See ERIODENDRON *orientale*.—**B. pentandrum.** See ERIODENDRON *occidentale*.—**B. pyramidale.** See OCHROMA *lagopus*.—**B. quinatum.** See ERIODENDRON *anfractuosum*.—**B. septenatum** [Jacquin]. A large tree of the West Indies and South America, where the root-bark is used as a vulnerary and given internally as an emetic. Demulcent pectoral drinks are made from the seeds, and the young leaves are eaten. [B, 180.]—**Semen bombacis.** See *Semen* GOSSYPII.

BOMBEMENT (Fr.), n. Bo^{2}mb-ma^{3}n^{2}. See BOMBUS.

BOMBIATE, n. Bo^{2}m'bi^{2}-at. See BOMBATE.

BOMBIC ACID, n. Bo^{2}m'bi^{2}k. Lat., *acidum bombicum*. Fr., *acide bombique* (ou *bombycique*). Ger., *Seidenwurmsäure*. An acid found in the chrysalis of the silk-worm. [A, 385; B, 91.]

BOMBICCITE (Fr.), n. Bo^{2}n^{2}-bi^{2}k-set. A fossil resin, $C_7H_{13}O$, found in a lignite of Tuscany. [A, 385; L, 49.]

BOMBINATORIDÆ (Lat.), n. f. pl. Bo^{2}m-bi^{2}n-a^{3}-to^{2}r'i^{2}d-e(a^{3}-e^{2}). Fr., *bombinatoroïdes*. A subfamily of the *Bombinatorina* having webbed toes. [L, 288.]

BOMBINATORINA (Lat.), n. n. pl. Bo^{2}m-bi^{2}n-a^{3}-to^{2}r-i(e)'na^{3}. A family of the *Opisthoglossa oxydactyla* having an imperfectly developed ear, no parotids, the sacral vertebræ not dilated, and maxillary teeth. [L, 288.]

BOMBONAXA, n. A species of *Carludovica* found in equatorial South America. [A, 385.]

BOMBUS (Lat.), n. m. Bo^{2}m'bu^{3}s(bu^{4}s). Gr., βόμβος. Fr., *bombement*, *bourdonnement*. Ger., *Ohrentönen*, *Ohrenlauten*. 1. A buzzing noise or the sensation of such a noise, also the rumbling of flatus. [A, 311, 322.] Cf. TINNITUS *aurium* and BORBORYGMUS. 2. The humble-bee. [L, 132.]

BOMBYATE (Fr.), n. Bo^{2}m-bi^{2}-a^{3}t. See BOMBATE.

BOMBYCAL (Fr.), adj. Bo^{2}m-bi^{2}-ka^{3}l. Pertaining to the genus *Bombyx*. [L, 41.]

BOMBYCE (Fr.), n. Bo^{2}m-bes. See BOMBYX.—**B. du mûrier.** See BOMBYX *mori*.—**B. processionnaire.** See BOMBYX *processionea*.

BOMBYCELLE (Fr.), n. Bo^{2}m-bi^{2}-se^{2}l. A section of the genus *Hibiscus*. [L, 41.]

BOMBYCIDÆ (Lat.), n. f. pl. Bo^{2}m-bi^{2}s(bu^{6}k)'i^{2}d-e(a^{3}-e^{2}). Fr., *bombycides*. A family of the *Lepidoptera*, including the silk-worms. [L, 196.]

BOMBYCIENS (Fr.), n. pl. Bo^{2}m-bi^{2}-si^{2}-a^{3}n^{2}. See BOMBYCINÆ.

BOMBYCIFORM, adj. Bo^{2}m-bi^{2}s'i^{2}-fo^{2}rm. Resembling the *Bombycidæ*. [L, 121.]

BOMBYCINA (Lat.), n. n. pl. Bo^{2}m-bi^{2}(bu^{6})-si(ke)'na^{3}. A group of the *Lepidoptera* including *Bombyx*. [L, 121.]

BOMBYCINÆ (Lat.), n. f. pl. Bo^{2}m-bi^{2}(bu^{6})-si(ke)'ne(na^{3}-e^{2}). Fr., *bombycines*, *bombyciens*. See BOMBYCIDÆ.

BOMBYCINE, adj. Bo^{2}m'bi^{2}-si^{2}n. Lat., *bombycinus*, *bombycius*. Fr., *bombycin*, *bombycien*. Smooth, silky. [B, 19.]

BOMBYCIQUE (Fr.), adj. Bo^{2}m-bi^{2}-sek. Pertaining to the silk-worm. [A, 385.] See BOMBIC ACID.

BOMBYCITES, n. pl. Bo^{2}m'bi^{2}-sits. See BOMBYCIDÆ.

BOMBYCIVORE (Fr.), adj. Bo^{2}m-bi^{2}-si^{2}-vor. Subsisting on silk-worms. [A, 385; L, 41.]

BOMBYCOIDÆ (Lat.), n. f. pl. Bo^{2}m-bi^{2}(bu^{6})-ko(ko^{2})-i(e)'de-(da^{3}-e^{2}). Fr., *bombycoïdes*. See BOMBYCINA.

BOMBYLANS (Lat.), adj. Bo^{2}m'bi^{2}l(bu^{6}l)-a^{2}nz(a^{3}ns). Fr., *bourdonnant*. Buzzing, humming. [L, 180.]

BOMBYLIARII (Lat.), n. m. pl. Bo^{2}m-bi^{2}l(bu^{6}l)-i^{2}-a(a^{3})'ri^{2}-i(e). A family of the *Proboscidiæ*. [L, 301.]

BOMBYLIUS (Lat.), n. m. Bo^{2}m-bi^{2}l(bu^{6}l)'i^{2}-u^{3}s(u^{4}s). Gr., βομβυλιός. Fr., *bombyle*. 1. A narrow-necked jug; so called from the gurgling sound produced when liquid was poured from it. [Hippocrates (A, 311, 325).] 2. The larva of the silk-worm. [Aristotle (A, 311).] 3. Any humming insect. [Aristotle (A, 311).] 4. A genus of the *Anthophila*. [L, 41, 49.]

BOMBYX (Lat.), n. m. Bo^{2}m'bi^{2}x(bu^{6}x). Gen., *bomby'cos* (*-cis*). Gr., βόμβυξ. Fr., *bombyce*. 1. Anciently, the silk-worm, also silk. [A, 311.] 2. The typical genus of the *Bombycidæ*. [L, 196.] 3. See *Vermiform* PROCESS.—**B. cynthia, B. mori** [Fabricius]. Fr., *bombyce du mûrier*. Ger., *Seidenwurm*, *Seidenspinner*, *Seidenraupe*. Syn.: *Phalœna b. mori* [Linnæus]. A species the larva of which is the Chinese silk-worm. The moth, which is about three inches long, has white, falcate fore-wings; the hind-wings not reaching to the tip of the abdomen; and well pectinated antennæ. The larva is small, of an ashy or cream color, with the second thoracic segment humped and a long horn on the tail. [L, 196.]—**B. processionea.** Fr., *bombyce processionnaire*. A species the larva of which has urticating hairs. [L, 49.]—**B. rubi.** Ger., *Brombeerspinner*. A poisonous species. [T. Husemann (A, 319).]

BOMPAULWURZEL (Ger.), n. Bom'pa^{3}-ul-vurtz-e^{2}l. The *Taraxacum officinale*. [B, 180.]

BONASLA, n. Fr., *bonasle*. The *Leonurus cardiaca*. [L, 87, 109.]

BONATI, n. An Amboyna tree all parts of which are bitter. [L, 87.]

BONAVERIA (Lat.), n. f. Bo^{2}n-a^{3}-ve(we^{2})'ri^{2}-a^{3}. Of Scopoli, a genus of leguminous plants. [B, 180.]—**B. securidaca** [Scopoli]. Syn.: *Coronilla securidaca* [Linnæus], *Securigera coronilla* [De Candolle]. A species growing throughout southern Europe. The seeds (*semina securidacæ*, the ἡδύσαρον of Dioscorides), which are brownish-red and bitter, were formerly employed in digestive derangements. [B, 180.]

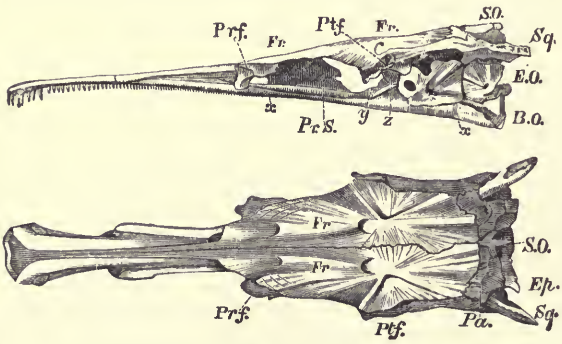
BONBON (Fr.), n. Bo^{2}n^{2}-bo^{2}n^{2}. A small mass composed mostly of sugar, with or without the addition of gum, starch, or a drug. [A, 385.]—**Pectoral b's.** Ger., *Brustb's*. B's made from 6 parts of carrageen, 4 each of Iceland moss, licorice, and marshmallow root, 3 each of red-poppy petals and daisy, and 2 each of coltsfoot and Souchong tea, boiled with 24 of water and the strained decoction mixed with refined sugar. [L, 120.]

BONCAR, n. The *Salsola soda*. [B, 173.]

BONDEA (Lat.), n. f. Bo^{2}nd'e^{2}-a^{3}. See ERYTHROPHLŒUM.

BONDONNEAU (Fr.), n. Bo^{2}n^{2}-do^{2}n-no. A place in the department of Drôme, France, where there is a spring containing various alkaline carbonates, iron, bromine, iodine, free carbon dioxide, and a little hydrogen sulphide; used by bathing, drinking, and gaseous inhalation in rheumatism, scrofula, herpetic affections, and syphilis. [L, 49.]

BONDUC (Fr.), n. Bo^{2}n^{2}-du^{6}k. The *Guilandina bonducella*. [B, 180.]—**B.-seeds.** See BONDUCELLÆ *semina*.

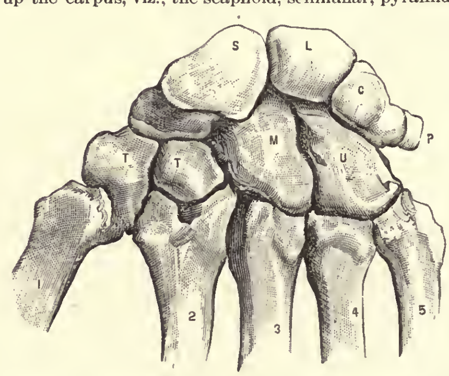


BONDUCELLA (Lat.), n. f. Bo^{2}n-du^{2}(du^{4})-se^{2}l(ke^{2}l)'la^{3}. See GUILANDINA *b*.—**Bonducellæ semina** [Ind. Ph.] Ger., *Bonduosamen*, *Cuiquiersamen*. Port., *silva do prago*. Bonduc-seeds, nick-ar-nuts; the seeds of *Guilandina bonduc* and *Guilandina bonducella*. They are emetic in large doses, but in small doses are used in malarial fevers, and an oil expressed from them is employed in paralyses. E. Heckel and Schlagdenhauffen have extracted from them a bitter principle, in the form of a white powder, which Isnard has found, in doses of from 1½ to 3 grains, to be as effective as quinine in intermittent fevers. ["Dtsch. chem. Ztg.," "Dtsch. Med.-Ztg.," Dec. 20, 1886, p. 1140; B, 8, 180.]

BONDUCH, n. See BONDUCELLA.

BONDUCSAMEN (Ger.), n. pl. Bo^{2}n'duk-za^{3}m-e^{2}n. See BONDUCELLÆ *semina*.

BONE, n. Bo^{3}n. Sanscr., *asthi*, *astham*. Gr., ὀστέον. Lat., *os*. Goth., *bain*. A.-S., *ban*. Fr., *os*. Ger., *Bein*, *Knochen*. It., *osso*. Sp., *hueso*. An individual separable piece of the skeleton of a vertebrate at any stage of development after ossification has begun, also the tissue of which the skeleton is composed—an organic base containing calcium phosphate, carbonate, and fluoride, magnesium phosphate, sodium chloride, and iron and manganum oxides. [A, 327.]—**Acetabular b.** Lat., *os acetabuli*. See *Cotyloid b*.—**Addental b.** G. St.-Hilaire's term for the superior maxilla in fishes and the crocodile. [L, 14.]—**Adgustal b.** G. St.-Hilaire's term for the pterygoid b. in fishes and for the ectopterygoid b. in the crocodile. [L, 14.]—**Adnasal b.** G. St.-Hilaire's term for the premaxillary b. in fishes and the crocodile. [L, 14.]—**Adorbital b.** [G. St.-Hilaire]. 1. See *Lacrymal b.* (1st def.). 2. The malar b. in the crocodile. [G. St.-Hilaire (L, 14).]—**Air-b's.** See *Pneumatic b's*.—**Alisphenoid b.** Fr., *os alisphénöide*. Ger., *grosser Keilbeinflügel* (in birds and mammals) [Meckel and Wagner] (1st def.). Syn.: *orbitosphenoid b.* [Owen] (1st def.). 1. In comparative anatomy, a cartilage b. lying in front of the auditory capsule and representing the greater wing of the sphenoid b. of the human subject. [L, 12, 153.] 2. Of Owen, the prootic b. [L, 207.]—**Angular b.** Lat., *os angulare*. Fr., *os angulaire*. In comparative anatomy, a b. that assists in forming the lower and back portion of the mandible. [L, 207, 294.]—**Angulo-splenial b.** A constituent of the mandible in the *Amphibia* which represents the angular, coronary, and splenial bones of fishes. [L, 121.]—**Ankle-b.** See ASTRAGALUS (3d def.).—**Anterior frontal b.** Fr., *os frontal antérieur*. 1. Of Cuvier, the prefrontal b. in fishes, the *Urodela*, and crocodiles, the nasal b. of the *Anura*, and the lacrymal b. of the *Ophidia*. [L, 14.] 2. Of Agassiz, see *Prefrontal b*.—**Anterior maxillary b.** See *Premaxillary b*.—**Anterior palatine b.** The palatal b. of birds. [G. St.-Hilaire (L, 14).]—**Anterior sphenoid b., Anterior sphenoidal b.** Ger., *vorderes Keilbein*. Cuvier's term



for the entosphenoid b. in fishes and for the presphenoid b. of mammals. [L, 14.]—**Anterior turbinated b.** See *Superior turbinated b.*—**Anterior zygomatic b.** [Bojanus]. See *Malar b.*—**Antero-ventral pelvic b.** See Os *pubis.*—**Antorbital b.** See *Suborbital b.*—**Apohyal b.** G. St.-Hilaire's term for the ceratohyal b. of mammals. [L, 14.]—**Articular b.** Lat., *os articulare, os condyloideum maxillæ inferioris* [Bojanus] (1st def.). Fr., *os articulaire, submalléal* (in fishes), *subrupéal* (in the crocodile) [G. St.-Hilaire] (1st def.). Ger., *Gelenkstück des Unterkiefers* [Meckel and Wagner] (1st def.). 1. In comparative anatomy, the proximal bone of the mandible; it articulates above with the quadrate b. or its representative, and below with the angular and dentary b's. [L, 200, 202.] 2. The thin layer of compact osseous tissue at the articular extremity of a bone which lies immediately beneath the articular cartilage, and is destitute of Haversian canals. [L, 298.]—**Asymmetrical b's.** Fr., *os asymetriques.* B's which lie on one side of the median plane of the body and which are not divided by it into two equal parts. [L, 13.]—**Back b.** See *Vertebral* COLUMN.—**Bar b.** See Os *pubis.*—**Basal b.** See *Basisphenoid b.* and *Basioccipital b.*—**Basibranchial b's.** Fr., *queue de l'os hyoïde* [Agassiz]. Syn.: *basihyal b's, urohyal b's* (in fishes) [G. St.-Hilaire]. A row of small b's which extend forward from the body of the hyoid bone in fishes and from which spring the first four branchial arches. [L, 147, 200.]—**Basibranchiostegal b.** [Parker]. See *Uro-hyal b.*—**Basidigital b's.** A term applied to both the metatarsal and the metacarpal bones, on account of their being situated at the bases of the phalanges. [L, 12.]—**Basihyal b.** Lat., *os linguale medium* [Soemmerring] (1st def.). Fr., *corps de l'os hyoïde* (in saurians, birds, and mammals) [Cuvier] (1st def.), *tête glénoïdale* [Agassiz] (1st def.). Ger., *mittleres Stück des Zungenbeins* [Meckel and Wagner] (1st def.). Syn.: *apo-hyal b., ceratohyal b.* (in fishes) [G. St.-Hilaire] (1st def.). 1. In comparative anatomy, the bone which forms the middle portion of the hyoid apparatus and is the representative of the body of the hyoid b. in man. [L, 153.] 2. In the pl., the basibranchial b's. [G. St.-Hilaire (L, 14).]—**Basilar b.** Lat., *os basilare, os tribasilare* [Virchow] (1st def.). Fr., *os basilaire.* Ger., *Grundbein.* It., *osso basilare.* 1. The sphenoid and occipital b's regarded as one b. [L, 14, 31.] 2. The basioccipital b. [Cuvier and Stannius (L, 207)]. 3. The sacrum. [L, 43.] 4. The last lumbar vertebra. [L, 43.] 5. The sphenoid b. [L, 44.] 6. G. St.-Hilaire's term for the basisphenoid b. of birds. [L, 14.]—**Basioccipital b.** Lat., *os basi occipitale, corpus ossis occipitis* [Hallmann], *os occipitale basilare* (seu *inferius* [Harting]), *squama occipitis* [Stannius]. Fr., *os basioccipital, os basilaire*

THE SKULL OF THE PIKE. (AFTER HUXLEY.)

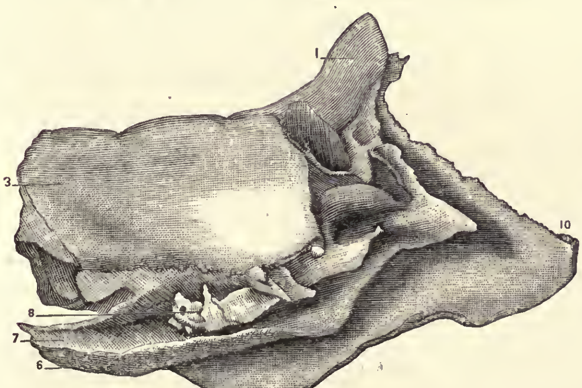
Pa, the parietal bone; *Fr*, the frontal bone; *Prf*, the prefrontal bone; *Ptf*, the postfrontal bone; *Sq*, the squamosal bone; *Ep*, the epiotic bone; *BO*, the basioccipital bone; *EO*, the exoccipital bone; *SO*, the supra-occipital bone; *Prs*, the presphenoid bone; *z*, the alisphenoid bone; *y*, the basisphenoid bone; *xx*, the parasphenoid bone.

[Agassiz], *os basisphénal* (in fishes [G. St.-Hilaire]), *os otosphénal* (in fishes [G. St.-Hilaire]). Ger., *Hinterhauptstück des Hinterhauptsbeins* [Wiedemann], *Hinterhauptkörper* [Meckel, Wagner]. Syn.: *inferior occipital b.* (in the cod and the python [Cuvier] and in birds [G. St.-Hilaire]). The basilar portion of the occipital b. before it has united with the other elements. In many of the lower vertebrates it persists as a distinct b. through life. [L, 12, 142, 153.]—**Basi-occipito-sphenoidal b.** [Owen]. See *Parasphenoid b.*—**Basipresphenoid b.** In comparative anatomy, a b. formed by the confluence of the basisphenoid and presphenoid b's. [L, 14.]—**Basisphenoid b.** Lat., *os basisphenoidale, sphenoideum basilare* [Bojanus, Harting, Stannius]. Fr., *os basisphénoïde, sphénoïde principal* (in fishes [Agassiz]), *partie postérieure du sphénoïde unique* (in reptiles and birds), *sphénoïde postérieur* (in mammals [Cuvier]), *hyposphénal* (in fishes and the crocodile), *basilaire* (in birds [G. St.-Hilaire]). Ger., *Keilbein* [Rathke], *Keilbeinkörper* [Meckel, Wagner]. In comparative anatomy, a cartilage b. of the base of the skull which lies between the basioccipital and presphenoid b's; in human embryology, that portion of the sphenoid b. from which the posterior portion of its body and the sella turcica are formed. [L, 12, 14, 153.]—**Basitemporal b.** A membrane b. which in birds underlies the basisphenoid and a portion of the basioccipital bones; the name is sometimes applied also to the lingula of the sphenoid b. [L, 142, 294.]—**Blade b.** See SCAPULA.—**Boat-like b.** See *Scaphoid b.*—**B. crumbs.** See *Osseous* GRANULES.—**B'let.** See OSSICLE.—**B's of Bertin.** See *Sphenoidal turbinate b's.*—**B. of the Incas.** Lat., *os Incæ.* A term applied to the interparietal b. of man when it persists through life, on account of the belief that it is always found in the skulls of the ancient Peruvians. [L, 149.]—**B. oil.** See *Dippel's animal* OIL.—**B.-setter.** Fr., *bailleul, rebouteur, renouveur, rhabilleur.* Lit., one who devotes himself to the treatment of fractures; as commonly used, an irregular practitioner who is supposed to have a particular gift in that direction. [L.]—**B'shave.** See *Femoro-popliteal* NEURALGIA.—**Branchiostegal b's.** Fr., *rayons branchiostégaux* [Cuvier], *côtes sternaux* [G. St.-Hilaire]. Ger., *Kiemenhautstrahlen* [Meckel]. A term applied to several small dagger-shaped b's which are articulated or attached by ligament to the epihyal and ceratohyal b's of fishes and between which the branchiostegal membrane is stretched. [L, 207.]—**Breakb'.** See DENGUE.—**Breast-b.** See STERNUM.—**Calf-b.** See FIBULA.—**Canal b.** See CLAVICLE.—**Cancellated b., Cancellous b.** Fr., *os spongieux.* B. which consists largely of cancellated or spongy tissue. [L, 114.]—**Cannon-b.** The middle metatarsal b. in the solipeds. [L, 13.]—**Carpal b's.** Lat., *ossa carpi.* Fr., *os carpiens.* Ger., *Handwurzelknochen.* The b's which make up the carpus, viz., the scaphoid, semilunar, pyramidal, and

THE POSTERIOR SURFACE OF THE CARPAL BONES. (AFTER SAPPEY.)

S, the scaphoid bone; L, the semilunar bone; C, the pyramidal bone; T, the trapezium; T, the trapezoid bone; M, the os magnum; U, the unciform bone; P, the pisiform bone; 1, 2, 3, 4, 5, the metacarpal bones.

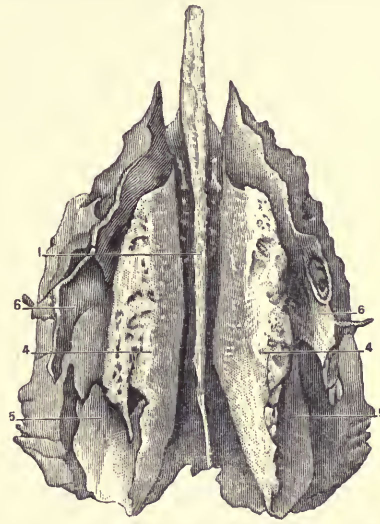
pisiform b's, the trapezium, the trapezoid b., the os magnum, and the unciform b. [L, 142.]—**Cartilage b's.** B's having an intracartilaginous ossification. [L, 294.]—**Cerato-branchial b.** That b. of a branchial arch which lies between the hypobranchial and the epibranchial b's. [L, 207.] Cf. *Hypopharyngeal b's.*—**Cerato-hyal b.** Lat., *os linguale superius* (seu *pisiforme* [Soemmerring]) (1st def.). Ger., *Zungenbogen* [Meckel] (1st def.). Syn.: *hyosternal b.* (in fishes), *glossohyal b.* (in birds), *apohyal b.* (in birds [G. St.-Hilaire]) (1st def.). 1. In comparative anatomy, that piece of the hyoid apparatus which lies between the basihyal and the epihyal b's, and is the representative of the lesser cornu of the hyoid b. of man. [L, 14, 153.] 2. The epihyal b. of mammals. [G. St.-Hilaire (L, 14).]—**Channel b.** See CLAVICLE.—**Cheek b.** See *Malar B.*—**Chevron b's.** Fr., *os en V.* Ger., *untere Bogen.* A term applied to a number of small b's, in the shape of an inverted arch, which are situated beneath and nearly opposite the intervertebral spaces of the caudal vertebræ of animals having well-developed tails. They are usually articulated to prominences on the lower surface of the bodies of the vertebræ, and serve to increase the surface for the attachment of the caudal muscles. [L, 153.]—**Chondrogenous b's.** See *Cartilage b's.*—**Cloacal b.** Lat., *os cloacæ.* A small rod of bone which, in certain fishes, passes backward from the symphysis ischii to the ventral wall of the cloaca. [L, 200.]—**Cockal b.** See ASTRAGALUS (3d def.).—**Coffin b.** The ungual phalanx of the solipeds. [L, 14.]—**Collar b.** See CLAVICLE.—**Coraco-clavicular b.** A b. formed by the fusion of the coracoid b. and the clavicle in the mole and allied genera. [L, 153.]—**Coracoid b.** Lat., *os coracoideum, clavicula* [Stannius, Parker (1st def.)]. Fr., *huméral* (in fishes), *os coracoïdien* (in reptiles and birds), *apophyse coracoïdienne, tubercule coracoïdien* (in mammals [Cuvier]), *clavicule* [Agassiz], *furculaire* (in fishes), *coracoïde* (in reptiles, birds, and mammals [G. St.-Hilaire]). Ger., *vorderes Schlüsselbein* (in fishes), *hinteres Schlüsselbein* (in other vertebrates [Meckel, Wagner]). (All these apply only to the 1st def.) 1. In comparative anatomy, a b. which articulates above with the scapula and below with the sternum or its fellow of the opposite side, and aids in supporting the pectoral limbs. It has been regarded as the homologue of both the clavicle and the coracoid process of the scapula in man, but it most probably is the representative of the latter. [L, 12, 13, 14, 153, 200, 201, 202.] 2. A term applied by Parker to the radius of fishes. [L, 207.]—**Coronal b.** See *Frontal b.*—**Coronary b.** 1. The middle phalanx of the manus of the solipeds. [L, 13.] 2. See *Coronoid b.*—**Coronoid b.** Fr., *os coronoïde, complémentaire* (in lizards [Cuvier]) (1st def.), *souspalpébral* (in the crocodile [G. St.-Hilaire]) (1st def.). Ger., *Kronenstück des Unterkiefers* [Meckel, Wagner] (1st def.). 1. In comparative anatomy, a b. on the inner surface of the mandible, which is the representative of the coronoid process of the inferior maxilla of man. 2. Of Bojanus and Harting, the supra-angular b. [L, 14, 27.]—**Cotyloid b.** Lat., *os acetabuli.* A small b. in the acetabulum of certain of the lower vertebrates which lies adjacent to the os pubis. [L, 200.]—**Covering b's.** See *Membrane b's.*—**Coxal b.** See COCCYX and ILIUM.—**Cranial ethmoid b.** Fr., *os ethmoïde cranien.* A term applied by Agassiz to the entosphenoid b., and by Cuvier to the ethmo-turbinal b. [L, 14.]—**Cranial-roof b.** See *Epicranial b.*—**Cribriform b.** See *Ethmoid b.*—**Cross b.** See SACRUM.—**Crow-beak b.** See *Coracoid b* (1st def.).—**Crupper b.** See COCCYX.—**Cuboid b.** Lat., *os cuboides.* Fr., *os cuboïde.* Ger., *Wurfelbein.* A b. which lies on the outer side of the foot, between the os calcis and the fourth and fifth metatarsal b's, with which it



articulates. [L, 152.]—**Cuneiform b.** Lat., *os cuneiforme.* Fr., *os cunéiforme.* 1. See *Pyramidal b.* 2. See *Sphenoid b.*—**Cylindrical b's.**. See *Long b's.*—**Dentary b.** Fr., *os dentaire.* Ger., *Zahnstück des Unterkiefers* [Meckel, Wagner]. Syn.: *subdental b.* (in fishes and the crocodile [G. St.-Hilaire]). A b. found in fishes and the *Amphibia*, which, with its fellow of the opposite side, forms the anterior portion of the mandible. [L, 207.]—**Dermal b's.** Owen's term for b's which are ossifications of and belong to the cutis. [L, 207.]—**Dermal ethmoid b., Ectethmoid b.** See *Prefrontal b.*—**Ectocuneiform b.** See *External cuneiform b.* —**Ecto-ethmoid b.** See *Prefrontal b.*—**Ectopterygoid b.** Syn.: *transverse b.* (in ophidians, lizards, and crocodiles [Cuvier]), *adgustal b.* (in the crocodile [G. St.-Hilaire]). In comparative

THE SKULL OF THE COD. (FROM NICHOLSON, AFTER CUVIER.)

a, the uro-hyal bone; *b*, the basi-hyal bone; *c*, the cerato-hyal bone; *d*, the branchiostegal rays; *p*, the præoperculum; *o*, the operculum proper; *s*, the suboperculum; *i*, the interoperculum; *m*, the mandible; *n*, the intermaxillary bone.



anatomy, a b. which extends between the superior maxilla and the pterygoid b. [L, 12, 14.]—**Ell b.** See ULNA.—**Elongated b's.** A term sometimes applied to long b's which are destitute of a medullary cavity (*e. g.*, the ribs). [L, 13.]—**Endochondral b's.** A term applied to true b's formed by osteoblastic tissue, which for the most part replaces the calcified cartilage matrix, and is finally itself partly or wholly replaced by adult or periosteal b. [J, 32, 42.] —**Entocuneiform b.** See *Internal cuneiform b.*—**Entoglossal b.** See *Glosso-hyal b.* (1st def.).—**Entohyal b.** 1. See *Glosso-hyal b.* (1st def.). 2. In the pl., the basibranchial b's [Hallmann (L,

THE LATERAL SURFACE OF THE ETHMOID BONE. (AFTER SAPPEY.)

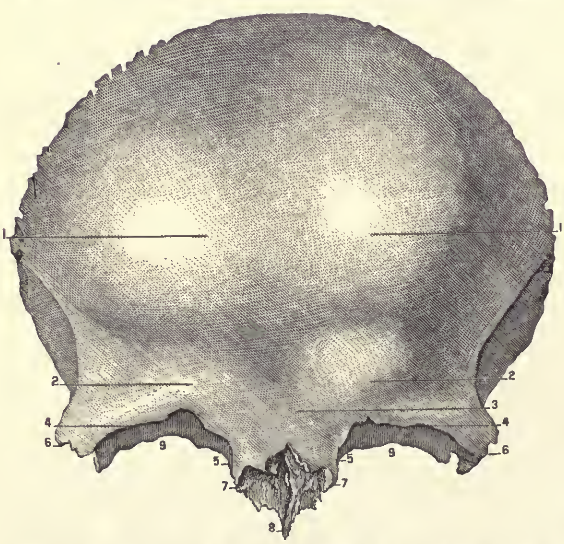
1, the crista galli; 3, the orbital plate; 6, the inferior turbinated process; 7, the middle meatus of the nose; 8, the uncinate process; 10, the perpendicular plate.

27)].—**Entopterygoid b.** Syn.: *internal pterygoid b.* [Cuvier, Agassiz, Hallmann]. In comparative anatomy, a thin lamina of b. fitting against the inner borders of the palatine and pterygoid b's. [L, 14, 200, 207.]—**Ento-sphenoid b.** Lat., *os innominatum* (in the perch), *ala parva ossis sphenoidei* (in the carp [Hallmann]). Fr., *entosphénal* (in fishes [G. St.-Hilaire]). Ger., *vorderer* (oder *kleiner*) *Keilbeinflügel* (in fishes [Meckel, Wagner]). Syn.: *anterior sphenoid b.* (in fishes [Cuvier]). An ossification of the interorbital septum in certain of the lower vertebrates, which is the representative of the presphenoid b. of the higher vertebrates. [L, 14.]—**Epibranchial b's.** Fr., *partie supérieure de l'arceau branchial* [Cuvier], *pluréals supérieures* [G. St.-Hilaire]. A term applied to several small b's which extend out horizontally from the edges of the superior pharyngeal b's, between which and the cerato-branchial b's they are situated. [L, 200, 207.]—**Epicerato-hyal b.** See *Epihyal b.*—**Epicoracoid b.** Ger., *Handwurzelknochen* [Meckel, Wagner]. Syn.: *coracoid b.* (in fishes [Cuvier and G. St.-Hilaire]), *postclavicle.* In comparative anatomy, a slender rod of b. which is connected with the inner face of the clavicle near its dorsal extremity, and runs backward and downward. [L, 12, 200, 207.]—**Epicranial b.** Owen's term for the b. forming the roof of the cranial cavity of the *Propteri* and representing the frontal, parietal, and supra-occipital b's. [L, 14.]—**Epihyal b.** Lat., *ligamentum inter os linguale superius et pro-*

THE INFERIOR SURFACE OF THE ETHMOID BONE. (AFERT SAPPEY.)

1, the perpendicular plate; 4, 4, the inferior turbinated processes; 5, 5, the middle meatus of the nose; 6, 6, the uncinate processes.

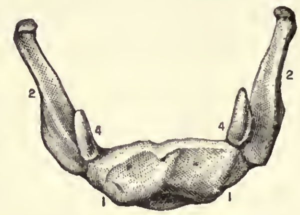
cessum stiliformem [Soemmerring]. Fr., *grande pièce latérale* (in fishes), *seconde pièce de la corne antérieure* (in lizards and mammals [Cuvier]), *hyposternal* (in fishes). Ger., *Zungenhorn* [Meckel, Wagner]. Syn.: *cerato-hyal b.* (in mammals [G. St.-Hilaire]). In comparative anatomy, a small b. lying between the cerato-hyal and stylo-hyal b's. [L, 14, 153, 207.]—**Epiotic b.** Lat., *squama occipitis* [Hallmann]. Ger., *Hinterhauptschuppe* [Meckel, Wagner]. Syn.: *paroccipital b.* [Owen], *external occipital b.* (in the perch and reptiles), *superior occipital b.* (in the cod), *mastoid apophysis* (in many mammals [Cuvier]), *interparietal b.* (in fishes), *superior occipital b.* (in birds [G. St.-Hilaire]), *interparietal b.* [Agassiz]. In human anatomy, an embryonic cartilage b. which corresponds to the lower part of the mastoid process of the temporal b.; in comparative anatomy, a b. which forms the postero-internal portion of the auditory capsule. [L, 12, 14, 142, 153.]—**Epipharyngeal b's.** See *Superior pharyngeal b's.*—**Epipteric b.** Flower's term for a small, scale-like ossification situated between the antero-inferior angle of the parietal b. and the great wing of the sphenoid b. [L, 142.]—**Epipterygoid b.** In comparative anatomy, a small slender rod of b. lying in front and to the outer side of the anterior edge of the prootic b., with which and the pterygoid b. it articulates. [L, 200.]—**Epipubic b's.** See *Marsupial b's.*—**Episternal b.** 1. G. St.-Hilaire's term for the uro-hyal b. in fishes. [L, 14.] 2. See INTERCLAVICLE. 3. See *Suprasternal b.*—**Epitympanic b.** [Owen]. See *Hyo-mandibular b.*—**Ethmoid b.** Lat., *os ethmoideum.* Fr., *os ethmoïde.* Ger., *Siebbein* (1st def.). 1. A cuboid-shaped b., containing within its interior a large number of cells, which assists in forming the cranium, the orbits, and the nasal fossæ. It consists of a central vertical plate and of two lateral masses (the ethmo-turbinals), which unite above to form the cribriform plate. It articulates with the vomer, frontal, sphenoid, nasal, lacrymal, palate, and inferior turbinated b's and the superior maxilla. 2. Of Dugés, the sphenethmoid b. [L, 121.]—**Ethmo-turbinal b's.** [Owen]. The lateral masses of the ethmoid b. [L, 153.]—**Exercise b.** An ossification sometimes found in the left arm of soldiers, and believed to be due to the constant pressure of a musket upon the arm. [L, 299.]—**Exoccipital b.** Lat., *arcus occipitis* [Bojanus]. Ger., *seitliches untere Hinterhauptbein* [Meckel, Wagner], *Gelenktheil des Grundbeins* [Meckel], *Gelenkstück des Hinterhauptbeins* [Wiedmann], *Seitentheil des Hinterhauptbeins* [Rathke]. Syn.: *lateral occipital b.* [Agassiz, Cuvier, Gervais, Hallmann], *exoccipital b.* (in fishes), *lateral occipital b.* (in birds [G. St.-Hilaire]). In human anatomy, a fœtal cartilage b. which forms the side of the foramen magnum and the occipital condyle of the occipital b. It unites with the other elements of the occipital b. about the sixth year, but in many of the lower vertebrates remains through life as a separate b. [L, 12, 14, 153.]—**External cuneiform b.** Lat., *os cuneiforme externum.* Fr., *os cunéiforme externe.* Ger., *drittes Keilbein.* A wedge-shaped b. of the foot, articulating posteriorly with the scaphoid b., anteriorly with the second, third, and fourth metatarsal b's, internally with the



middle cuneiform b., and externally with the cuboid b. [L. 114, 153.] —**External occipital b.** Of Cuvier, the opisthotic b.; of Agassiz, the exoccipital b. [L, 12, 14.]—**External pterygoid b.** A term applied by Hallmann (in fishes) and Stannius to the pterygoid b. [L, 14.]—**Extrascapular b.** Lat., *os extrascapulare* [Stannius]. See *Suprascapular b.*—**Face b.** See *Malar b.*—**Falciform b.** Lat., *os falciforme.* 1. A sickle-shaped sesamoid b. lying on the radial side of the manus of the mole and allied genera. [L, 153.] 2. See

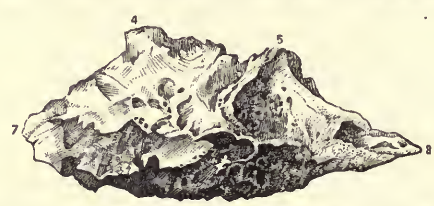
THE POSTERIOR SURFACE OF THE FRONTAL BONE. (AFTER SAPPEY.)

1, the frontal sulcus; 2, the foramen cæcum; 5, the roof of the orbit; 8, the nasal spine; 10, the internal orbital apophysis; 11, the entrance to the sphenoidal sinus; 12, the external orbital apophysis.



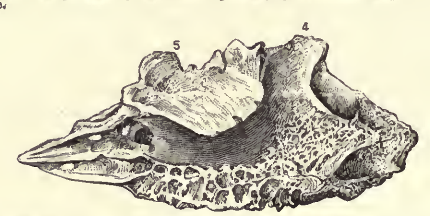
Interparietal b.—**Flat b's.** Lat., *ossa lata* (seu *plana*). Fr., *os plats.* Ger., *breite* (oder *platte*) *Knochen.* B's the length and breadth of which greatly exceed their thickness (*e. g.*, the scapula). [L, 142, 172.]—**Forehead b.** See *Frontal b.*—**Fork b.** See Furcula.—**Frontal b.** Lat., *os frontis* [Soemmerring], *os frontale.* Fr., *os frontal*, *frontal principal* [Agassiz]. Ger., *Stirnbein*, *Hauptbein.* A single b. which forms the fore part of the cranium and the greater part of the upper roof of the orbits. It arches upward and backward and articulates with the parietal, sphenoid, nasal, malar, superior maxillary, lacrymal, and ethmoid b's. [L, 142, 153.]—**Fronto-nasal b.** See *Nasal b.*—**Fronto-occipital b.**

THE ANTERIOR SURFACE OF THE FRONTAL BONE. (AFTER SAPPEY.)



1, 1, the frontal eminences; 2, 2, the supercillary arches; 3, the glabella; 4, 4, the orbital arches; 5, 5, the internal orbital apophyses; 6, 6, the external orbital apophyses; 7, 7, the surfaces for articulation with the nasal and superior maxillary bones; 8, the nasal spine; 9, 9, the roofs of the orbits.

Of Owen, the fronto-parietal b. in the *Dipnoi.* [L, 12, 14.]—**Fronto-parietal b.** Lat., *os frontoparietalis.* Ger., *Stirnscheitelbein.* A b. formed by the confluence of the frontal and parietal b's. [L, 204.]—**Girdle b.** See *Sphenethmoid b.*—**Glosso-hyal b.** Lat., *os linguale.* Ger., *Zungenkerne.* A small b. which, in certain of the lower vertebrates, runs forward from the basihyal b. into the substance of the tongue, which it serves to support. [L, 12, 147.]—**Great cuneiform b.** [Percivall]. The middle cuneiform b. of the solipeds. [L, 13.]—**Haunch b.** See *Innominate b.*—**Heel b.** See Calcaneum.—**Hip b.** Lat., *os coxæ.* See *Innominate b.*—**Hook b.** See *Unciform b.*—**Huckle b.** The coccyx, also the astragalus (3d def.). [A, 67.]—**Humeral b.** Fr., *os humérat.* Of Cuvier, the coracoid b. of fishes. [L, 14.]—**Hyoid b.** Lat., *os hyodes.* Fr., *os hyoïde.* Ger., *Zungenbein.* A U-shaped b. situated at the base of the tongue immediately above the thyreoid cartilage. It consists of a body and the greater and lesser cornua. The greater cornua (the thyreo-hyal b's of comparative anatomy) project backward from the body of the b., and the lesser cornua (the cerato-hyal b's of comparative anatomy) upward and backward from the point of union of the greater cornua and the body. The greater cornua unite with the body in adult life, but the lesser remain distinct, being united only by means of a synovial articulation. [L, 142, 153.]—**Hyo-mandibular b.** Fr., *serrial* (in fishes [G. St.-Hilaire]), *mastoïdien* [Agassiz]. Ger., *oberes Gelenkbein* [Meckel, Wagner]. Syn.: *epitympanic b.* [Owen], *temporal b.* (in fishes), *tympanic b.* (in batrachians [Cuvier]), *quadrate* or *tympanic b.* (in fishes [Hallmann]). The uppermost b. of the mandibulary suspensorium of certain fishes. It articulates above with the side of the cranium and below with the hyoid arch, either directly or indirectly, and is the representative of



THE ANTERIOR SURFACE OF THE HYOID BONE. (AFTER SAPPEY.)

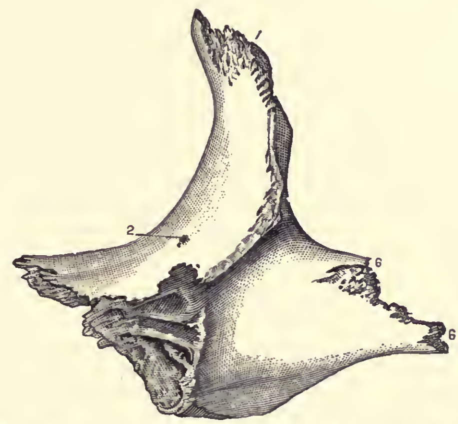
1, 1, the body; 2, 2, the greater cornua; 4, 4, the lesser cornua.

THE INTERNAL SURFACE OF THE INFERIOR TURBINATED BONE. (AFTER SAPPEY.)

4, the lacrymal process; 5, the ethmoid process; 7, the anterior angle; 8, the posterior angle.

THE EXTERNAL SURFACE OF THE INFERIOR TURBINATED BONE. (AFTER SAPPEY.)

4, the lacrymal process; 5, the ethmoid process.

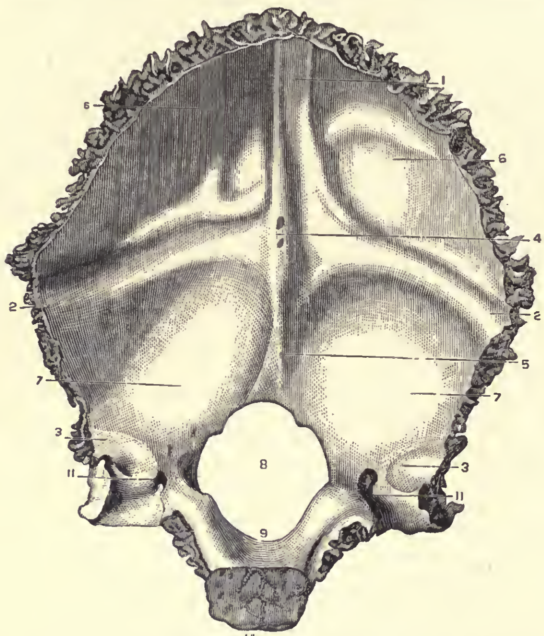


the incus of the higher vertebrates. [L, 12, 14, 202, 207.]—**Hyo-sternal b.** Of G. St.-Hilaire, the cerato-hyal b. in fishes. [L, 14.]—**Hypobranchial b's.** Lat., *ossa lateralia lingualia* [Soemmerring]. Fr., *arythnéals, thyréals* (in fishes), *apohyals, cératohyals* (in birds), *glossohyals* (in mammals [G. St.-Hilaire]). The lowermost pieces of the first three branchial arches of fishes, regarded as the homologue of the thyreo-hyals of higher vertebrates. [L, 14, 207.]—**Hypohyal b.** See *Basihyal b.* (1st def.).—**Hypopharyngeal b's.** A pair of b's which form the fifth branchial arches in fishes; they underlie the floor of the pharynx, are usually dentigerous, and represent the cerato-branchial b's of the other arches. [L, 12, 207.]—**Hyposphenoid b.** Fr., *os hyposphénal.* The presphenoid b. in fishes and in the crocodile. [G. St.-Hilaire (L, 14).]—**Hyposternal b.** Of G. St.-Hilaire, the epihyal b. of fishes. [L, 14.]—**Hypotympanic b.** [Owen]. See *Quadrate b.* (1st def.).—**Hypsiloid b.** 1. See *Hyoid b.* 2. In the pl., of Goubaux, the last coccygeal vertebræ, on account of their resemblance to the letter U. [L, 13.]—**Hypural b.** A small fan-shaped b. which succeeds the last caudal vertebra of fishes and aids in supporting the tail. [L, 12, 200.]—**Iliac b.** See Ilium.—**Incisive b., Incisor b.** See *Premaxillary b.*—**Inferior occipital b.** See *Basioccipital b.*—**Inferior pharyngeal b's.** See *Hypopharyngeal b's.*—**Inferior sphenoid b.** See *Basisphenoid b.*—**Inferior spongy b., Inferior turbinated b.** Lat., *concha inferior.* Fr., *cornet inférieur.* Ger., *untere Nasenmuschel.* A thin plate of b. attached by its upper margin to the lateral wall of the nose and separating the middle from the inferior meatus. It articulates with the superior maxilla, and with the lacrymal, ethmoid, and palate b's. [L, 142.]—**Infra-orbital b's.** Lat., *ossa infraorbitalia.* Fr., *os sousorbitaires.* Syn.: *infra-orbital ring.* In comparative anatomy, a ring of ossicles which forms the lower rim of the orbit. [L, 14, 207.]—**Ingrassial b.** Of G. St.-Hilaire, the orbito-sphenoid b. in fishes. [L, 14.]—**Innominate b.** Lat., *os innominatum* (seu *coxæ*). Fr., *os innominé.* Ger., *ungenanntes*

Bein. It., *osso innominato.* Sp., *hueso innominado.* A b. which, with its fellow of the opposite side and the sacrum and coccyx, forms the bony pelvis. It is made up of the ilium, the ischium, and the os pubis. [L, 142, 172.]—**Intercalary b.** Ger., *Zwickelbein* (1st def.). 1. See *Interparietal b.* 2. See *Opisthotic b.* 3. In the pl., see *Wormian b's.*—**Interclavicular b.** See INTERCLAVICLE.—**Interhyal b.** See *Stylohyal b.*—**Interischial b.** The tuberosity of the ischium when, as in some of the lower vertebrates, it remains distinct through life. [L, 13.]—**Intermaxillary b.** Lat., *pars incisa maxillae superioris* [Soemmerring], *præmaxilla, os intermaxillare.* Fr., *os intermaxillaire, intermaxillaire* (in birds [G. St.-Hilaire]). Ger., *Zwischenkieferbein.* Syn.: *premaxillary b., adnasal b.* (in fishes and the crocodile). A fœtal b. which lies behind the fore part of the superior maxilla, with which it becomes fused. In many of the lower vertebrates it persists as a distinct b. through life, and often joins with its fellow of the opposite side to form a single b., representing that portion of the superior maxilla of man which bears the incisor teeth. [L, 12, 14, 142, 153.]—**Intermuscular b's.** A number of small b's which are articulated to the dorsal sides of the transverse processes of the vertebræ of fishes and pass upward and outward between the muscles. [L, 200.]—**Internal cuneiform b.** Lat., *os cuneiforme internum.* Fr., *os cunéiforme interne.* Ger., *erstes Keilbein.* The largest of the cuneiform b's of the foot. It lies on the inner side of the foot, articulating with the scaphoid, the middle cuneiform, and the first and second metatarsal b's. To it is attached in part the tibialis anticus muscle. [L, 142.]—**Internal pterygoid b.** See *Entopterygoid b.*—**Interopercular b.** Lat., *interoperculum.* Fr., *interopercule, malléal* [G. St.-Hilaire]. Ger., *os linguale.* 1. See *Hyoid b.* 2. See *Glosso-hyal b.*—**Long b's.** Lat., *ossa longa* (seu *cylindrica*, seu *tubulosa*). Fr., *os longues.* Ger., *lange Knochen.* B's the length of which greatly exceeds their breadth or thickness. They consist of a shaft, which is hollowed out to form a medullary canal, and two extremities. [L, 172.]—**Lower-jaw b., Lower maxillary b.** See *Inferior* MAXILLA.—**Lunar b.** See *Semilunar b.*—**Malar b.** Lat., *os malare* (seu *zygomaticum* [Hallmann]), *os zygomaticum anterius* [Bojanus]. Fr., *os malaire, pièce antérieure de l'os jugal* [G. St.-Hilaire]. Ger., *Wangenbein.* Syn.: *jugal b.* (in lizards, crocodiles, and mammals [Cuvier]), *adorbital b.* (in the crocodile). A quadrangular b. which forms the most prominent portion of the face, the greater part of the margin and a portion of the outer wall of the orbit, and the anterior part of the zygoma. It separates the orbit from the temporal fossa and articulates with the superior maxilla and the temporal, frontal, and sphenoid b's. In the lower vertebrates it may articulate posteriorly with either the quadrate b. or the quadrato-jugal b. [L, 12, 14, 142, 153.]—**Mandible b., Mandibular b., Mandibulary b.** See *Inferior* MAXILLA.—**Marginal b's.** Certain otherwise unnamed b's which lie on the radial and ulnar sides of the manus of the *Ichthyosauria.* [L, 12.]—**Marsupial b's.** Lat., *ossa marsupialia.* Fr., *os marsupiaux.* Syn.: *janitores marsupii* [Tyson]. Two elongated, slightly curved b's which articulate with the anterior edges of the ossa pubis and run forward, diverging into the layers of the abdominal parietes. They are found in nearly all the *Marsupialia* and are believed to be ossifications of the inner pillar of the external abdominal ring. [L, 153.]—**Mastoid b.** Lat., *os mastoideum.* Fr., *os mastoïdien.* Ger., *Zitzenbein.* Of Owen, the squamosal b. (1st def.); of Hallmann, the

THE EXTERNAL SURFACE OF THE MALAR BONE. (AFTER SAPPEY.)

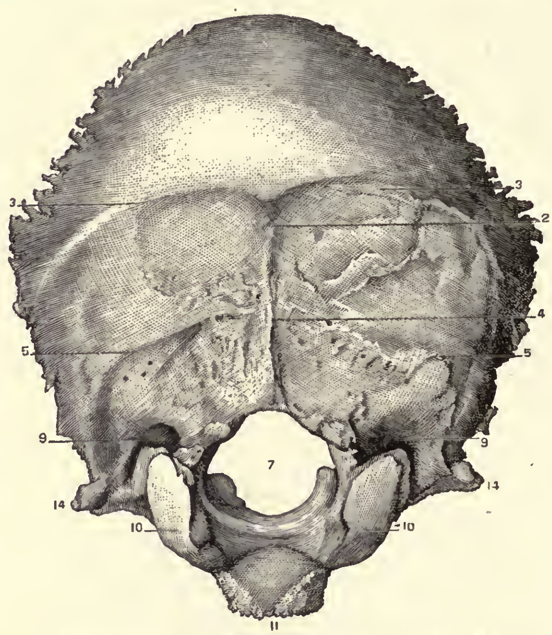
1, the external orifice of the malar canal; 6, the frontal process; 8, the anterior angle; 7, the inferior angle; 9, the temporal process.



THE INTERNAL SURFACE OF THE MALAR BONE. (AFTER SAPPEY.)

1, the frontal process; 2, the internal orifice of the malar canal; 6, 6, the surface which articulates with the zygomatic process of the temporal bone.

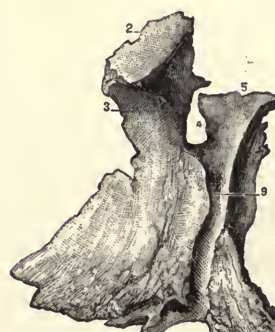
Zwischenkiemendeckelstück. A b. in the gill-cover of fishes which lies in front of and below the opercular b., with which it articulates, and is connected at its opposite extremity by ligament with the angular b. and the hyoid apparatus. [L, 200, 207.]—**Interorbital b.** An inconstant ossification in certain fishes, lying between the fore part of the presphenoid and the orbito-sphenoid b's. [L, 14.]—**Interparietal b.** Lat., *os interparietale.* Fr., *os interpariétal.* 1. In the human fœtus, the tabular portion of the occipital b., which sometimes persists through life as a distinct b. [L, 14, 142.] Cf. *B. of the Incas.* 2. In some of the lower vertebrates, a b. lying between the front edge of the supra-occipital b. and the parietal b's. [L, 149.] · 3. Of Agassiz, see *Supra-occipital b.*—**Interspinous b's.** Fr., *os interépineux.* A number of dagger-shaped b's in certain fishes, which are connected by ligaments to the spinous processes of the vertebræ and extend upward in the median line to articulate with the rays of the median fins. [L, 12.]—**Intestinal b.** Ger., *Darmbein.* See ILIUM.—**Investing b's.** See *Membrane b's.*—**Irregular b's.** Lat., *ossa multiformia.* Fr., *os mixtes.* Ger., *gemischte Knochen.* Those b's which are of such irregular shape that they can not be classed as long, short, or flat b's. [L, 172.]—**Jugal b.** Lat., *os jugale.* Fr., *os jugal.* Ger., *Jochbein.* 1. Of Cuvier, the malar b. (in mammals, crocodiles, and lizards), the squamosal b. (in birds and monotremes), and the quadrate b. (in fishes and batrachians). 2. Of Agassiz, see *Lacrymal b.* 3. Of G. St.-Hilaire, the infra-orbital b. [L, 14.]—**Jugular b., Key-b.** See CLAVICLE.—**Knuckle b.** The coccyx. [A, 43.]—**Labial b.** Ger., *Lippenbein.* The labial cartilages of fishes when they become ossified. [L, 14.]—**Lacrymal b.** Lat., *os unguis.* Fr., *os lacrymal.* Ger., *Thränenbein* (1st def.). Syns.: *jugal b.* [Agassiz], *adorbital b.* (1st def.) [G. St.-Hilaire]. 1. A thin scale of b. which is situated at the anterior and inner part of the orbit, articulating with the frontal and ethmoid b's and the superior maxilla. [L, 14, 153.] 2. Of G. St.-Hilaire, the prefrontal b. [L, 14.]—**Lambdoid b.** [Broca]. See *Interparietal b.* (1st def.).—**Large cuneiform b.** Of Percivall, the scaphoid b. of the tarsus of the solipeds. [L, 13.]—**Lateral ethmoid b.** [Parker]. See *Prefrontal b.*—**Lateral occipital b.** 1. Of Agassiz and Cuvier, the exoccipital b. [L, 14.] 2. Of G. St.-Hilaire, the epiotic b. in fishes. [L, 14.]—**Lenticular b.** See *Orbicular b.*—**Lesser lacrymal b.** The hook-like process of the lacrymal b., which articulates with the superior maxilla, when it remains throughout life ununited with the lacrymal b. [L, 172.]—**Lid b's.** See *Membrane b's.*—**Ligament b's.** See *Sesamoid b's.*—**Lingual b.** Lat., epiotic b.; of Agassiz, the hyo-mandibular b.; of Stannius, the opisthotic b. [L, 12, 14, 204, 207.]—**Masto-tympanic b.** See *Prootic b.*—**Maxillary b.** [Owen]. See *Superior* MAXILLA.—**Maxillary turbinated b.** See *Maxillo-turbinal b.*—**Maxillo-jugal b.** [Dugès]. See *Superior* MAXILLA.—**Maxillo-turbinal b.** In comparative anatomy, a b. which corresponds to the inferior turbinated b. of human anatomy. [L, 153.]—**Membrane b's.** Fr., *os fibreux.* Ger., *Deckknochen.* B's which have an intramembranous ossification. [Kölliker (J, 24).]—**Mento-Meckelian b.** A small nodule of b. lying at the side of the symphysis menti in some of the lower vertebrates. [L 202.]—**Mesethmoid b.** A single b. lying in the median line above the vomer and articulating posteriorly with the frontal b's in certain of the lower vertebrates, which represents the vertical plate of the ethmoid b. and the upper portion of the cartilaginous septum of the nose in man. [L, 12, 153, 202.]—**Mesocuneiform b.** See *Middle cuneiform b.*—**Mesopterygoid b.** [Parker]. See *Entopterygoid b.*—**Mesotympanic b.** [Owen]. See *Symplectic b.*—**Metacarpal b's.** Lat., *ossa metacarpi.* Fr., *os métacarpiens.* Ger., *Mittelhandwurzelknochen.* The five bones of the hand which articulate posteriorly with the carpus and anteriorly with the phalanges. [L, 142.]—**Metaplastic b's.** See *Periosteal b's.*—**Metapterygoid b.** Lat., *os tympani* [Agassiz]. Fr., *tympanal* (in fishes [Cuvier]), *épicotyléal* (in fishes [G. St.-Hiliare]). Ger., *scheibenförmiges Stück des Schläfenbeins* [Meckel, Wagner]. Syn.: *pretympanic b.* [Owen], *posterior pterygoid b.* (in fishes [Hallmann]). A thin lamina of b., in certain of the lower vertebrates, which articulates with the quadrate b. and overlies the hyomandibular and symplectic b's. [L, 12, 14, 202.]—**Metatarsal b's.** Lat., *ossa metatarsi.* Fr., *os métatarsiens.* Ger., *Mittelfussknochen.* The five b's of the foot which articulate posteriorly with the tarsus and anteriorly with the phalanges. [L, 142.]—**Middle cuneiform b.** Lat., *os cuneiforme medium.* Fr., *os cunéiforme petit.* Ger., *zweites Keilbein.* A short, wedge-shaped b. which lies with its base upward and its apex downward between the second metatarsal, the scaphoid, and internal and external cuneiform b's of the foot. [L, 142.]—**Middle spongy b., Middle turbinated b.** Lat., *concha ethmoidalis inferior.* Fr., *cornet moyen de l'ethmoïde.* Ger., *untere Siebbeinmuschel.* A term sometimes applied to the inferior turbinated process of the ethmoid b. It forms the lower portion of the superior meatus of the nose and overhangs the middle meatus. [L, 114, 142.]—**Midfrontal b.** [Owen]. See *Frontal b.*—**Midjaw b.** See *Intermaxillary b.*—**Nasal b.** Lat., *os nasi.*



Fr., *os nasal, nasal maxillaire* (in birds [G. St.-Hilaire]) (1st def.). Ger., *Nasenbein.* Syn.: *ethmoid b.* (in fishes), *prefrontal b.* (in the *Anura* [Cuvier] (1st def.). 1. An irregularly shaped b. which with its fellow of the opposite side forms the bridge of the nose. It articulates with its fellow, with the superior maxilla, with the vomer, and with the frontal b., and by its lower margin supports the lateral nasal cartilage. [L, 142.] 2. Of Cuvier, the inferior turbinated b. in fishes. [L, 14.] 3. Of Harting, the prefrontal b. [L, 204.]—**Multiform b.** See *Sphenoid b.*—**Nasal ethmoid b.** The prefrontal b. in fishes. [G. St.-Hilaire (L, 14).]—**Naso-turbinal b.** In compara-

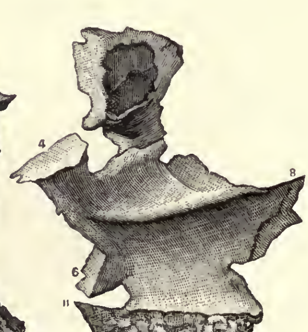
THE ANTERIOR SURFACE OF THE OCCIPITAL BONE. (AFTER SAPPEY.)

1, the grooved surface for the longitudinal sinus; 2, 2, the grooves for the lateral sinuses; 3, 3, the terminations of the lateral sinuses; 4, the internal occipital protuberance; 5, the internal occipital crest; 6, 6, the cerebral fossæ; 7, 7, the cerebellar fossæ; 8, the foramen magnum; 9, the basilar groove; 11, 11, the posterior condylar foramina; 14, the basilar process.



tive anatomy, a b. which is the homologue of the superior turbinated process of the ethmoid b. in man. [L, 153.]—**Navicular b.** Lat., *os naviculare.* 1. A sesamoid b. in the tendon of the flexor digitorum profundus of the solipeds, lying behind the third phalanx. [L, 13.] 2. See *Scaphoid b.*—**Non-pneumatic b's.** B's which do not contain air-cells or air-sacs. [L, 294.] Cf. *Pneumatic b's.*—**Occipital b.** Lat., *os occipitale.* Fr., *os occipital.* Ger., *Hinterhauptbein.* A rhomboidal b. situated at the lower and back part of the cranium. It is divided into the basilar portion (the basioccipital), the condylar portions (the exoccipitals), and the tabular portion (the supra-occipital and the interparietal). The basilar portion, or the occipital process, projects forward, articulates with the body of the sphenoid b., and forms the anterior edge of the foramen magnum; the condylar portions form the lateral margins of the foramen magnum, articulate with the mastoid and petrous portions of the temporal b's, and bear the occipital condyles; the tabular portion passes forward to articulate with the parietal and temporal b's and bears upon its outer surface the superior and inferior curved lines, the external occipital crest, and the external occipital protuberance. At birth this b. consists of four pieces, the basioccipital, the two exoccipitals, the supra-occipital, and the interparietal, all of which are fused into one piece at about the sixth year. [L, 12, 142, 153.]—**Occipito-otic b.** A b. occupying the occipital and auditory regions in certain of the *Anura* in an early stage of their development, which subsequently separates into the occipital and prootic b's. [L, 202.]—**Odontoid b.** Lat., *os odontoideum.* The odontoid process of the axis when, as in certain animals, it is a separate b. [L.]—**Olfactory b.** 1. See *Ethmoid b.* 2. See *Mesethmoid b.*—**Opercular b.** Lat., *operculum.* Fr., *os operculaire, stapéal* [G. St.-Hilaire]. Ger., *eigentliches Kiemendeckelstück.* A flat, triangular b. situated at the side of the head, in fishes, which articulates in front with the hyo-mandibular b. and assists in forming the edge of the gill-cover. [L, 12, 207.]—**Operculo-angular b.** See *Angular b.*—**Opisthotic b.** A b. of certain of the lower vertebrates which forms the postero-ventral portion of the auditory capsule. In man it is represented by the lower portion of the petrous portion of the temporal b., the fenestra rotunda, and the lower half of the fenestra ovalis. [L, 12, 142, 153.]—**Orbicular b.** Lat., *os orbiculare.* A small disc of b. found in some of the lower vertebrates, attached to the long crus of the incus; represented in man by the orbicular process of the incus. [L, 142, 200.]—**Orbito-sphenoid b.** Lat., *ala magna sphenoidei* (in fishes and reptiles), *ala parva sphenoidei* (in birds and mammals) [Hallmann]. Fr., *aile orbitaire* (in fishes, birds, and mammals [Cuvier]), *ptéréal* (in the crocodile), *rocher* (in birds) [G. St.-Hilaire]. Ger., *grosser* *Keilbeinflügel* [Meckel, Wagner]. Syn.: *Ingrassial b.* (in fishes). In comparative anatomy, a b. which lies above and in front of the optic foramen and is the representative of the lesser wing of the sphenoid b. of human anatomy. [L, 12, 14, 202.]—**Otosteal b.** Of Owen, the columella of birds, also its representative in the other vertebrates. [L, 14.]—**Overlapping b's.** See *Membrane b's.*—**Palatal b., Palate b., Palatine b.** Lat., *os palati* (seu *palatinum*). Fr., *os palatin.* Ger., *Gaumenbein.* Syn.: *anterior palatine b.* (in birds [G. St.-Hilaire]). 1. A b. which forms the posterior portion of the hard palate and the lat-

THE POSTERIOR SURFACE OF THE OCCIPITAL BONE. (AFTER SAPPEY.)

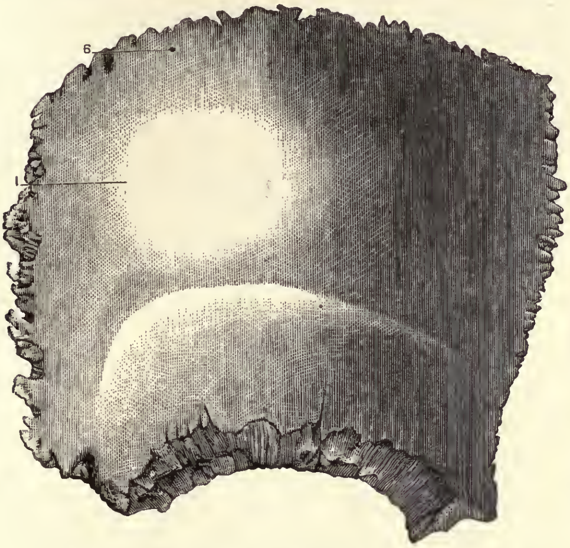


2, the external occipital protuberance; 3, 3, the superior curved lines; 4, the external occipital crest; 5, 5, the inferior curved lines; 7, the foramen magnum; 9, 9, the posterior condylar foramina; 10, 10, the occipital condyles; 11, the basilar process; 14, 14, the jugular processes.

eral wall of the nose between the internal pterygoid plate of the sphenoid b. and the superior maxilla. It consists of a horizontal and a vertical plate, which are united at a right angle, and of three processes, the pyramidal, the orbital, and the nasal. It articulates with its fellow of the opposite side, with the vomer, with the superior maxilla, and with the ethmoid, sphenoid, and inferior turbinated b's. [L, 142.] 2. In comparative anatomy, a b. which extends between the pterygoid and maxillary regions. [L, 12, 14.]—**Palato-maxillary b.** In comparative anatomy, a b. formed by

THE EXTERNAL SURFACE OF THE PALATE BONE. (AFTER SAPPEY.)

2, the orbital process; 3, the maxillary process; 4, the spheno-palatine notch; 5, the sphenoidal process; 9, the groove of the posterior palatine canal.



THE INTERNAL SURFACE OF THE PALATE BONE. (AFTER SAPPEY.)

4, the sphenoidal process; 6, the pterygoid process; 8, the inferior turbinated ridge; 11, the posterior nasal spine.

the confluence of the palate b. and the superior maxilla. [L, 14.]—**Palato-pterygoid b.** In comparative anatomy, a b. formed by the confluence of the palate and pterygoid b's. [L, 202.]—**Parasphenoid b., Parasphenoidal b.** A long, splint-like membrane b. situated at the base of the skull in certain of the lower verte-

brates. In most fishes and *Amphibia* it forms the greater portion of the base of the skull, and appears to replace functionally the basisphenoid and the presphenoid b's. In higher vertebrates it is often confounded with the basisphenoid b. [L, 12, 200.]—**Parethmoid b.** See *Ethmo-turbinal b.*—**Parietal b.** Lat., *os parietale.* Fr., *os pariétal.* Ger., *Scheitelbein, Seitenwandbein.* A quadrilateral b. having an internal concave and an external convex surface. It forms the larger portion of the lateral surface of the skull, the exit of the olfactory nerve externally. The perpendicular plate of the ethmoid b. of man represents the coalesced prefrontal b's of the lower vertebrates. [L, 12, 14.]—**Prefronto-lacrymal b.** A b. in certain *Amphibia* and snakes which forms the anterior boundary of the orbit. [L, 121.]—**Prefronto-nasal b.** A b. constituted by the confluence of the prefrontal and nasal b's. [L, 14.]—**Premaxillary b.** See *Intermaxillary b.*—**Prenasal b.** Syn.: *scooping b.* A b. which is situated at the anterior extremity of the nasal

THE EXTERNAL SURFACE OF THE PARIETAL BONE. (AFTER SAPPEY.)

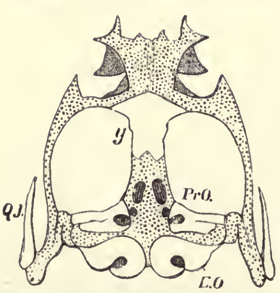
THE INTERNAL SURFACE OF THE PARIETAL BONE. (AFTER SAPPEY.)

1, the parietal fossa; 6, the parietal foramen.

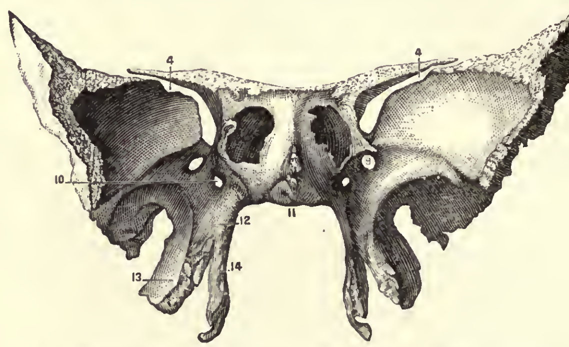
and articulates with its fellow of the opposite side in the middle line and with the frontal, the temporal, the sphenoid, and the occipital b's. [L, 142, 153.]—**Parieto-frontal b.** A b which forms the roof of the cranium in certain fishes, extending from the occipital to the ethmoidal regions and answering to the parietal and frontal b's of the higher vertebrates. [L, 12.]—**Paroccipital b.** [Owen]. See *Epiotic b.*—**Pea-shaped b.** See *Pisiform b.*—**Pedal b.** Lat., *os pedis.* The third distal phalanx of the manus of the solipeds. [L, 13.]—**Pelvic b's.** Fr., *os pelviens.* The b's which constitute the pelvis. [L, 13.]—**Penial b.** Lat., *os penis, os priapi.* Fr., *os pénien.* Ger., *Penisknochen.* A membrane b. found in the septum of the penis of certain mammals. [L, 294.]—**Periosteal b.** Fr., *os périostique.* A b. formed by the osteogenetic layer of the periosteum. It is the principal if not the sole form of adult b., and occurs both in b's having an intracartilaginous and in those having an intramembranous ossification. [J, 30, 32, 42.]—**Periotic b.** A b. formed by the confluence of the epiotic, pro-otic, and opisthotic b's. It represents the mastoid and petrous portions of the temporal b. of man. [L, 12, 153.]—**Peroneal b.** See FIBULA.—**Petro-mastoid b.** Lat., *os petromastoideum.* See *Periotic b.*—**Petrosal b.** Lat., *os petrosum.* Fr., *os pétreux* (ou *pierreux* [1st def.]). Ger., *Felsenbein* (1st def.). It., *rocca.* Sp., *hueso pietroso.* 1. The petrous portion of the temporal b. 2. As used by the older comparative anatomists, the pro-otic b. [L, 14, 176.] 3. The quadrate b. [L, 13.]—**Petrotympanic b.** See *Tympano-periotic b.*—**Pharyngo-branchial b's.** See *Superior pharyngeal b's.*—**Pisiform b.** Lat., *os pisiforme.* Fr., *os pisiforme.* Ger., *Erbsenbein.* A small, pea-shaped b. which lies upon the ulnar side of the pyramidal b. of the carpus. [L, 114, 142.]—**Ploughshare b.** 1. See VOMER. 2. See PYGOSTYLE.—**Pneumatic b's.** B's which contain a large number of air-cells or, as in birds, air-sacs. [L, 294.]—**Pneumatic occipital b.** Of Hyrtl, a small, flat ossicle sometimes found at the occipital insertion of the rectus capitis lateralis muscle, containing cells which communicate with those of the mastoid portion of the temporal b. [L, 37.]—**Postclavicular b.** See *Epicoracoid b.*—**Posterior frontal b.** See *Postfrontal b.*—**Posterior pterygoid b.** See *Metapterygoid b.*—**Posterior sphenoid b.** See *Basisphenoid b.*—**Posterior turbinated b.** See *Inferior turbinated b.*—**Postfrontal b., Postorbital b.** Lat., *os frontale posterius, apophysis orbitaria* [Soemmerring]. Fr., *os frontal postérieur.* Ger., *hinteres Stirnbein.* Syn.: *temporal b.* (in fishes), *jugal b.* (in the crocodile) [G. St.-Hilaire]. Ger., *vordere Schläfenbeinschuppe* [Hallmann]. In comparative anatomy, a membrane b. lying behind the orbit and above the alisphenoid b. (1st def.). [L, 12.]—**Postorbito-supratemporal b.** Of Owen, a b. in the skulls of the *Ganocephala* which represents the postorbital and supratemporal b's. [L, 14.]—**Posttemporal b.** [Parker]. See *Suprascapular b.*—**Precoracoid b.** 1. Of Gegenbaur, a nodule of b. lying in front of the ventral extremity of the coracoid b. [L, 201.] 2. Of Sabatier, the coracoid process of the scapula. [L, 201.]—**Prefrontal b.** Lat., *pars media ossis ethmoidei* [Soemmerring]. Ger., *Nasenbein* [Weidemann, Rathke]. Syn.: *anterior frontal b., ethmoid b.* (in mammals [Cuvier]), *lacrymal b.* (in fishes), *nasal ethmoid b.* (in birds [G. St.-Hilaire]). In comparative anatomy, a b. which is situated in the prefrontal region of the nasal capsule and bounds septum of the pig, and is enveloped in a cartilage which extends around the nostrils. [L, 13.]—**Pre-opercular b.** Lat., *preoperculum.* Fr., *préopercule.* Ger., *Vorkiemendeckelstück.* Syn.: *tympanal b.* [G. St.-Hilaire]. A b. situated in the upper part of the gill of fishes, which in its natural position fits against the outer face of the hyo-mandibular, symplectic, and quadrate b's. [L, 12, 200.]—**Pre-orbital b.** See *Suborbital b.*—**Presphenoid b.** Lat., *sphenoideum basilare* [Hallmann]. Fr., *sphénoïde principal* (in fishes [Cuvier]), *hyposphénal* (in fishes), *entosphénal* (in crocodiles), *os basilaire antérieure* (in birds [G. St.-Hilaire]), *sphénoide principale* [Agassiz]. Ger., *Keilbeinkörper* [Meckel, Wagner]. Syn.: *anterior sphenoid b.* (in mammals). In comparative anatomy, a b. situated at the fore part of the base of the skull. It articulates posteriorly with the basisphenoid b. and anteriorly with the mesethmoid b. and the vomer. It is the representative of that portion of the body of the sphenoid b. of human anatomy which lies in front of the olivary eminence and the lesser wings. [L, 142, 153.]—**Presymphyseal b.** A solid, conical b. lying in front of the symphysis of the lower jaw in certain extinct ganoids. [L, 207.]—**Pretympanic b.** [Owen]. See *Metapterygoid b.*—**Primary b's.** See *Cartilage b's.*—**Primitive key-b.** See *Precoracoid b.*—**Primordial b's.** See *Cartilage b's.*—**Principal metacarpal b.** The larger of the two metacarpal b's of certain of the quadrupeds. [L, 13.]—**Pro-otic b.** Lat., *ala temporis* [Stannius], *ala magna sphenoidei* (in birds and mammals), *os petrosum* (in fishes and reptiles [Hallmann]). Fr., *aile temporale du sphenoïde* (in birds, fishes, and mammals), *grande aile du sphenoïde* [Cuvier], *rocher* (in reptiles [Cuvier]), *ptéréal* (in fishes), *prérupéal* (in crocodiles [G. St.-Hilaire]). Ger., *Felsenbein* (in fishes and reptiles), *grosser Keilbeinflügel* (in birds and mammals [Meckel, Wagner]). Syn.: *alisphenoid b.* [Owen]. In comparative anatomy, a b. which forms the antero-ventral portion of the auditory capsule. It represents the upper portion of the petrous portion and a part of the mastoid process of the temporal b. and the larger portion of the labyrinth of man. This b. has often been mistaken for the alisphenoid b. (1st def.). [L, 12, 14, 142, 153.]—**Propeller b.** The innominate b., from its resemblance to the blade of a screw propeller. [C. M. Dodson, "Sci. Am.," Feb. 2, 1884, p. 67.]—**Pterotic b.** In comparative anatomy, a small b. sometimes found on the upper and outer side of the auditory capsule, lying between the pro-otic and epiotic b's. [L, 12, 202.]—**Pterygoid b.** Lat., *os pterygoideum.* Fr., *os ptérygoïdien, herisséal* (in the crocodile). Ger., *äusserer Flügelfortsatz* (in fishes [Wagner]). Syn.: *transverse b.* (in fishes), *internal pterygoid b.* (in ophidians [Cuvier]), *adgustal b.* (in fishes), *posterior palatine b.* (in birds [G. St.-Hilaire]), *external pterygoid b.* (in fishes [Hallmann]), *internal pterygoid b.* [Agassiz]. In comparative anatomy, a b. which extends between the palatine and quadrate regions, representing the internal pterygoid plate of the sphenoid b. of human anatomy. [L, 12, 14, 207.]—**Pubic b.** See *Os pubis.*—**Pubio-ischiadic b., Pubio-ischiatic b.** Ger., *Leistenbein.* The os pubis and the ischium regarded as one bone. [L, 117.]—**Pyramidal b.** Lat., *os pyramidale.* Fr., *os pyramidal.* Ger., *dreieckiges Bein.* Syn.: *cuneiform b.* A wedge-shaped b. situated at the outer side of the carpus, with its apex directed downward and outward, and articulating with the semilunar, pisiform, and unci-



form b's. [L, 142.]—**Quadrate b.** Lat., *os quadratum.* Fr., *os carré.* Ger., *Quadratbein.* Syn.: *hypotympanic b.* [Owen] (1st def.). 1. A squarish b. found in nearly all vertebrates except mammals, which lies between the base of the skull and the inferior maxilla. It is developed from the proximal portion of Meckel's cartilage, and in mammals is represented by the malleus. [L, 12, 14.] 2. Of Hallmann, the hyo-mandibular b. in fishes. [L.]—**Quadrato-jugal b.** Lat., *os quadratojugale, pars squamosa ossis temporis* [Soemmerring] (1st def.), *zygomaticum posterius* [Bojanus] (1st def.). Fr., *os*

THE PALATO-QUADRATE REGION OF THE PIKE. (AFTER HUXLEY.)

Art, the articular bone; *Mck*, Meckel'e cartilage; *Qu*, the quadrate bone; *Sy*, the evmplectic bone; *HM*, the hyo-mandibular bone; *Mpt*, the mesopterygoid bone; *Ept*, the entopterygoid bone; *Ecpt*, the ectopterygoid bone; *Pl*, the palate bone.



quadrato-jugal, cotyléal (in the crocodile), *pièce postérieure du jugal* [G. St.-Hilaire] (1st def.). Ger., *hintere Schläfenbeinschuppe* (in reptiles), *scheibenförmiges Stück des Schläfenbeins* (in mammals) [Meckel, Wagner] (1st def.). Syn.: *squamosal b.* [Owen], *temporal b.* (1st def.), *temporal b.* (in lizards, the crocodile, and mammals), *jugal b.* (in birds and monotremes [Cuvier]). 1. In comparative anatomy, a b. which extends backward from the malar to the quadrate b. and represents the zygomatic process of the temporal b. of human anatomy. [L, 12, 14, 202.] 2. Of Hallmann, the quadrate b. (1st def.) in fishes. [L, 14.]—**Quadrato-maxillary b.** A term applied by Hallmann to the quadrato-jugal b. (1st def.) in fishes. [L, 14.]—**Raven b.** See *Coracoid b.*—**Rickety b's.** B's which are deficient in earthy matter as the result of rickets.—**Rider's b.** An ossification sometimes found in the tendon of the adductor magnus muscle of those who have ridden a good deal on horseback. [L, 299.]—**Roof b's.** See *Membrane b's.*—**Rooting b.** See *Prenasal b.*—**Rudimentary metacarpal b's.** Syn.: *splint b's.* Two small b's situated on the inner and outer sides of the posterior surface of the principal metacarpal b. in solipeds. They have the shape of an inverted pyramid, and are the rudiments of the metacarpal b's of man. [L, 13.]—**Rump b.** 1. See Coccyx. 2. See Sacrum.—**Scaphocuboid b.** In comparative anatomy, a b. formed by the confluence of the scaphoid and cuboid b's. [L. 14.]—**Scaphoid b.** Lat., *os scaphoideum.* Fr., *os scaphoïde.* Ger., *Kahnbein.* 1. A b. of the tarsus lying on the outer side of the foot, which articulates posteriorly with the artragalus, anteriorly with the internal, middle, and external cuneiform b's, and sometimes laterally with the cuboid b. [L, 31.] 2. The most external b. of the first row of the carpus. It is somewhat boat-shaped, and articulates with the radius, the os magnum, and the trapezium, and with the trapezoid and semilunar b's. [L, 31.]—**Scapho-lunar b.** A b. formed by the confluence of the scaphoid and semilunar b's. [L, 14.]—**Scleral b's.** See *Dermal b's.*—**Sclerogenous b's.** See *Membrane b's.*—**Sclerosteous b's.** See *Sesamoid b's.*—**Sclerotal b's, Sclerotic b's.** The bony plates found in the sclerotic coat of the eye in certain of the lower vertebrates. [L, 200.]—**Scooping b.** See *Prenasal b.*—**Seat b.** Lat., *os sedentarium.* See Ischium.—**Secondary b's.** See *Membrane b's.*—**Semilunar b.** Lat., *os lunatum.* Fr., *os semilunaire.* Ger., *Mondbein.* A b. of the first row of the carpus lying between the scaphoid and pyramidal b's, with which and the radius, os magnum, and unciform b. it articulates. [L, 114.]—**Septal b.** The ossification found in the ventricular septum of the heart of certain vertebrates. [L, 12.]—**Septo-maxillary b.** A small nodule or plate of b. attached to the side of the nasal septum near its anterior termination in many of the lower vertebrates. [L, 200.]—**Sesamoid b's.** Lat., *ossa sesamoidea.* Fr., *os sésamoïdiens.* Ger., *Sesambeine.* Small b's which lie within the substance of the tendons of various muscles. [L, 31.]—**Share b.** 1. See Ilium. 2. See Os *pubis.*—**Shin b.** See Tibia.—**Short b's.** Lat., *ossa brevia.* Fr., *os courts.* Ger., *kurze Knochen.* B's of which the length is greater than the breadth or thickness, but in no marked degree. [L.]—**Sieve-like b.** See *Ethmoid b.*—**Skin b's.** See *Dermal b's.*—**Sling b.** See Astragalus (3d def.).—**Small cuneiform b.** A b. situated at the inner side of the tarsus of the solipeds, which represents the confluence of the internal and middle cuneiform b's of man. [L, 13.]—**Small pastern b.** The middle

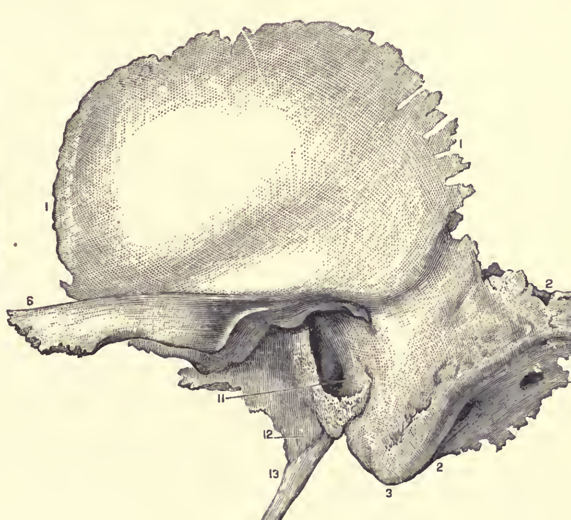
THE INFERIOR AND LATERAL SURFACES OF THE SPHENOID BONE. (AFTER SAPPEY.)

10, the foramen ovale; 11, the foramen spinosum; 12, the spine; 13, the external pterygoid plate; 14, the internal pterygoid plate.

THE SUPERIOR AND POSTERIOR SURFACES OF THE SPHENOID BONE. (AFTER SAPPEY.)

1, 1, the lesser wings; 2, 2, the groove for the optic commissure; 3, 3, the optic foramina; 4, the pituitary fossa; 6, the groove for the cavernoue sinus; 7, the anterior clinoid process; 8, the posterior clinoid process; 11, the foramen rotundum; 12, the foramen ovale; 13, the spinous process; 14, the posterior orifice of the Vidian canal; 15, the pterygoid fossa; 16, the external pterygoid plate; 17, the internal pterygoid plate; 18, the hamular process.

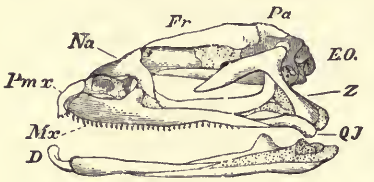


projecting downward (the pterygoid process). It articulates with the occipital, parietal, malar, frontal, and palate b's, with the petrous and squamous portions of the temporal b., with the vomer, and occasionally with the superior maxilla. It represents the basisphenoid, presphenoid, alisphenoid, and pterygoid b's of comparative anatomy. [L, 12, 153.]—**Sphenotic b.** [Parker]. See *Postfrontal b.*—**Splanchnic b's.** B's which are developed within the tissues of some of the viscera or are connected with the organs of sense. [L, 153.]—**Splenial b.** Fr., *operculaire* [Agassiz, Cuvier], *subvoméral* (in fishes), *sublacrymal* [G. St.-Hilaire]. Ger., *inneres Ausfüllungsstück des Unterkiefers* [Meckel, Wagner]. In compara-

tive anatomy, a b. situated upon the inner surface of the mandible, lying between the angular and the dentary b's. [L, 12, 14, 200.]—**Splint b's.** See *Rudimentary metacarpal b's.*—**Splinter b.** See Fibula.—**Spoke b.** See Radius.—**Spongy b's.** See *Cancellous b's* and *Turbinated b's.*—**Squamo-mastoid b.** A b. formed by the confluence of the mastoid and squamosal b's. [L, 14.]—**Squamosal b.** Lat., *os squamosum.* Fr., *exrupéal* (in fishes), *écaille du temporal* [Agassiz] (1st def.). Ger., *Zitzenbein* [Hallmann] (1st def.). Syn.: *mastoid b.* [Owen] (1st def.), *mastoid b.* (in fishes and reptiles), *temporal b.* (in birds and monotremes) [Cuvier] (1st def.), *temporal b.* (in the crocodile), *parietal b.* (in birds) [G. St.-Hilaire] (1st def.). 1. In comparative anatomy, a flat, scale-like b. situated on the outer side of the head, above and in front of the auditory capsule, representing the squamous portion and the zygomatic process of the temporal b. of human anatomy. [L, 14, 142, 153.] 2. Of Owen, the quadratojugal b. (1st def.). [L, 14.]—**Squamoso-parietal b.** A b. formed by the confluence of the squamosal b. (1st def.) and the parietal b. [W. K. Parker, "Trans. of the Zool. Soc. of London," ii, p. 78 (L).]—**Squamoso-tympanic b.** A b. formed by the confluence of the squamosal (1st def.) and the tympanic b's. [L, 153.]—**Square b.** See *Quadrate b.*—**Stirrup b.** See Stapes.—**Stylo-hyal b.** Fr., *osselet styloïde* (in fishes), *os styloïde* (in lizards and mammals) [Cuvier], *stylohyal* [G. St.-Hilaire], *styloïde de l'os hyoïde* [Agassiz]. [G. St.-Hilaire]. A b. which lies on the dorsal edge and outer side of the mandible in certain of the lower vertebrates. [L, 200, 202.]—**Supraclavicular b.** Lat., *scapula* [Owen, Cuvier, Stannius]. Fr., *omoplate* [G. St.-Hilaire]. Syn.: *supraclavicle.* A rod of b. which, in some of the lower vertebrates, articulates above with the suprascapular b. and below with the coracoid b. [L, 12, 14, 200.]—**Supra-ethmoid b.** In comparative anatomy, a b. which is sometimes found overlying the upper portion of the nasal capsule. [L, 202.]—**Supra-occipital b.** Lat., *squama occipitis* [Hallmann]. Ger., *Hinterhauptschuppe* [Meckel, Wagner]. Syn.: *superior occipital b.* (in reptiles and birds), *interparietal b.* (in the perch) [Cuvier], *interparietal b.* (in fishes), *superior occipital* (in birds) [G. St.-Hilaire], *suroccipital b.* [Owen], *interparietal b.* [Agassiz.]. A b. found in nearly all the lower vertebrates, which bounds the foramen magnum behind and assists in forming the roof of the skull. It represents the posterior part of the tabular portion of the occipital b. of man. [L, 12, 14, 153].—**Supra-orbital b.** Fr., *os surorbitaire.* Ger., *Oberaugenhöhlenbein.* Syn.: *superorbital b.* 1. A b. which forms the upper margin of the orbit in certain of the lower vertebrates. [L, 200.] 2. In the pl., one or two rows of b's which form the upper margin of the orbit. [L, 27.]—**Suprascapular b.** Lat., *omolita* [Stannius]. Fr., *os surscapulaire.* Ger., *oberste Knochen des Schultertheils.* Syn.: *surscapular b.* [Owen],

THE INTERNAL SURFACE OF THE TEMPORAL BONE. (AFTER SAPPEY.)

4, 4, the mastoid portion; 7, the mastoid foramen; 10, 10, the petrous portion; 13, the internal auditory foramen; 15, the hiatus Fallopii; 17, the styloid process; 18, the vaginal process.



THE EXTERNAL SURFACE OF THE TEMPORAL BONE. (AFTER SAPPEY.)

1, 1, the squamous portion; 2, 2, the mastoid portion; 3, the mastoid process; 5, the mastoid foramen; 6, the zygomatic process; 11, the external auditory meatus; 12, the vaginal process; 13, the styloid process.

Ger., *Griffelfortsatz des Schläfenbeins* (in mammals), *kleine stiletförmige Knochen des Zungenbeins* (in fishes [Meckel, Wagner]. In comparative anatomy, a slender b. which connects the hyoid apparatus with the skull. It is represented in man by the styloid process of the temporal b. [L, 14, 153.]—**Subcaudal b's.** See *Chevron b's.*—**Subdental b.** See *Dentary b.*—**Subdermal b's.** See *Membrane b's.*—**Subjugal b.** See *Supra-angular b.*—**Sublacrymal b.** Of G. St.-Hilaire, the splenial b. in the crocodile. [L, 14.]—**Suboccipital b.** See *Basioccipital b.*—**Subopercular b.** Lat., *suboperculum.* Fr., *sousopercule, incéal* [G. St.-Hilaire]. Ger., *Unterkiemendeckelstück.* A flat b. lying beneath the opercular b. in the gill-cover of certain fishes. [L, 200, 207.]—**Suborbital b.** Fr., *os sousorbitaire.* Ger., *Jochbein* (in fishes [Meckel, Wagner]), *Unteraugenhöhlenbein* [Bojanus]. Syn.: *jugal b.* [G. St.-Hilaire]. In comparative anatomy, the largest and most anterior of the b's which form the infra-orbital ring; regarded as being the representative of the lacrymal b. of man. [L, 14, 200, 207.]—**Subpalpebral b.** Of G. St.-Hilaire, the coronoid b. in the crocodile. [L, 14.]—**Subtemporal b.** Of G. St.-Hilaire, the angular b. in the crocodile. [L, 14.]—**Subvertebral wedge b.** A small nodule of b. connected with the anterior surface of the centrum of a cervical vertebra of some of the *Amphibia.* [L, 200.]—**Superadded b's.** See *Membrane b's.*—**Supercarpal b.** The pisiform b. of the horse. [L, 13.]—**Superficial ethmoid b.** See *Prefrontal b.*—**Superior occipital b.** 1. See *Supra-occipital b.* 2. Of Cuvier, the epiotic b. of the cod. [L, 14.]—**Superior pharyngeal b's.** Fr., *os pharyngiens supérieurs, pharyngéaux* [Cuvier]. Ger., *obere Schlundknochen.* Syn.: *pharyngo-branchial b's* [Owen]. The uppermost of the segments of the branchial arches of fishes. They lie in the roof of the pharynx and are usually dentigerous. [L, 12, 14, 200.]—**Superior spongy b., Superior turbinated b.** Lat., *concha ethmoidalis superior. Fr., cornet supérieure.* Ger., *obere Siebbeinmuschel.* The superior turbinated process of the lateral mass of the ethmoid b. [L, 142, 153.]—**Supermaxillary b.** See *Superior* maxilla.—**Superorbital b.** See *Supra-orbital b.*—**Supertemporal b.** See *Supratemporal b.*—**Supra-angular b.** Fr., *os surangulaire.* Ger., *äusseres Ausfüllungsstück des Unterkiefers.* Syn.: *coronoid b.* [Harting, Bojanus], *subjugal b.* (in the crocodile) *posttemporal b.* [Parker.] A superficial b. which articulates below with the supraclavicular b. and above with the epiotic and pterotic b's or with the side of the skull. It serves to connect the scapular arch with the skull. [L, 12, 14, 200.]—**Suprasternal b.** Lat., *os suprasternale.* A small nodule of b. sometimes found in man between the clavicular and interclavicular notches of the sternum. It and its fellow of the opposite side are regarded as being the vestiges of the interclavicle of the lower animals. [L, 142.]—**Supratemporal b.** Fr., *os surtemporal.* Ger., *Augenbogenschuppe.* In comparative anatomy, a b. lying above and behind the squamosal b. (1st def.), with which it is sometimes blended. [L, 202.]—**Suroccipital b.** See *Supra-occipital b.*—**Surscapular b.** See *Suprascapular b.*—**Symmetrical b's.** Fr., *os symétriques.* B's which are divided into two equal halves by the median plane of the body (*e. g.*, the sternum). [L, 13.]—**Symplectal b., Symplectic b.** Lat., *os symplecticum.* Fr., *os symplectique, tympanomalléal* [Agassiz], *uroserrial* (in fishes) [G. St.-Hilaire]. Ger., *griffelförmiges Stück des Schläfenbeins.* Syn.: *mesotympanic b.* [Owen]. In comparative anatomy, a small b. articulating with the lower border of the hyo-mandibular b. and with the inner face of the quadrate b. [L, 12, 14, 202.]—**Tail b.** See Coccyx.—**Tarsal b's.** Lat., *ossa tarsi.* Fr., *os tarsiens.* Ger., *Mittelfussknochen.* The b's which form the tarsus, viz., the calcaneum, the astragalus, the scaphoid b., the cuboid b., and the internal, middle, and external cuneiform b's. [L, 114.]—**Tarso-metatarsal b.** A term applied to a b. in the leg of birds, formed by the fusion of the distal portion of the tarsus and the metatarsus. [L, 12, 147.]—**Tegumentary b's.** See *Membrane b's.*—**Temple b., Temporal b.** Lat., *os temporis.* Fr., *os temporal.* Ger., *Schläfenbein, felsiges Bein.* 1. A b. situated at the side of the skull and articulating with the occipital, parietal, sphenoid, and malar b's and with the inferior maxilla. It is of an irregular shape and is divided into the squamous, zygomatic, mastoid, and petrous portions. The squamous portion forms the anterior and superior part of the b. and presents an arched border which articulates with the parietal b. and the greater wing of the sphenoid b. From the lower and outer part of this portion the zygomatic process passes forward to articulate with the malar b. The posterior part of the b. is formed by the mastoid portion, which is prolonged down-

ward into the mastoid process. The petrous portion resembles somewhat a three-sided pyramid. It is situated below and between the mastoid and squamoso-zygomatic portions, and within it are found the cavity of the ear and the internal and external auditory meatuses. During fœtal life it consists of three pieces, the squamoso-zygomatic, petro-mastoid, and tympanic. [L, 14, 142, 1535.] 2. Of G. St.-Hilaire, the postfrontal b. in fishes. [L, 14.] 3. Of Cuvier, the hyo-mandibular b. in fishes and the quadrato-jugal b. (1st def.). [L, 14.]—**Temporo-mastoid b.** Fr., *os temporo-mastoïdien.* Of Dugès, a b. on the side of the skull of the frog, which reaches down to the quadrate b. Its upper part represents the squamosal b. (1st def.) of the higher vertebrates, and its lower portion the tympanic b. [L, 12.]—**Thigh b.** See FEMUR.—**Thyreo-hyal b's.** The greater cornua of the hyoid b., which in many of the lower vertebrates persist throughout life as separate b's. [L, 153.]—**Tibio-fibular b.** A b. in some of the *Amphibia* which represents the ankylosed astragalus and os calcis of the higher vertebrates. [L, 200.]—**Tibio-tarsal b.** A cylindrical b. in the leg of birds, which lies between the femur and the tarso-metatarsal b., and represents the tibia and the proximal portion of the tarsus of the higher vertebrates. [L, 200.]—**Tongue b.** See *Hyoid b.* and *Uro-hyal b.*—**Transpalatine b.** A b. which in some *Amphibia* and snakes extends between the pterygoid b. and the superior maxilla. [L, 200, 202.]—**Transverse b.** Lat., *os transversum.* Of Cuvier, the pterygoid b. in fishes and the ectopterygoid b. in ophidians, lizards, and crocodiles; of Hallmann, the ectopterygoid b. [L, 14.]—**Trapezoid b.** Lat., *os trapezoideum.* Fr., *os trapézoïde.* Ger., *kleines vieleckiges Bein.* A b. of the second row of the carpus, which articulates with the os magnum, the trapezium, the scaphoid b., and the second metacarpal b. [L, 142.]—**Tricuspid b.** A term sometimes applied to the sixth cervical vertebra. [L, 13.]—**Triquetral b's.** Lat., *ossa triquetra.* See *Wormian b's.*—**Trivertebral b.** A b. formed by the confluence of the last cervical and the anterior dorsal vertebræ in some of the *Edentata.* [L, 12.]—**Tubular b's.** See *Long b's.*—**Turbinal b.** [Owen]. See *Inferior turbinated b.*—**Tympanal b.** 1. Of G. St.-Hilaire, the pre-opercular b. [L, 14.] 2. Of Cuvier, the metapterygoid b. in fishes. [L, 14.] 3. See *Tympanic b.*—**Tympanic b.** Lat., *os tympanicum.* Fr., *os tympanique, caisse* (in ophidians, crocodiles, and mammals), *os carré* (in birds) [Cuvier], *enostéal* (in the crocodile), *tympanostyloïde* (in birds) [G. St.-Hilaire]. Ger., *Pauke, Gelenktheil des Schläfenbeins* [Meckel, Wagner]. In comparative anatomy, an osseous ring, incomplete above, which lies on the outer side of the periotic b. and surrounds the inferior three fourths of the membrana tympani. In man this b. becomes united with the other elements which make up the temporal b. [L, 153, 142.]—**Tympano-hyal b.** A small b. which, in certain of the lower vertebrates, connects the stylo-hyal b. with the hinder edge of the tympanic b. [L, 153.]—**Tympano-malleal b.** Of Agassiz, the symplectic b.; of Dugès, the quadrato-jugal b. [L, 14, 204.]—**Tympano-periotic b.** A b. formed by the confluence of the tympanic and periotic b's. [L, 153.]—**Unciform b.** Lat., *os hamatum.* Fr., *os unciforme.* Ger., *Hakenbein.* The innermost b. of the carpus. It is somewhat triangular in shape and has a hook-shaped process upon its anterior surface. It articulates with the os magnum and with the semilunar, pyramidal, and fourth and fifth metacarpal b's. [L, 142, 172.]—**Upper-jaw b.** See *Superior* MAXILLA.—**Uro-hyal b.** Fr., *queue de l'os hyoïde* (in fishes and birds) [Cuvier], *corps de l'os hyoïde* [Agassiz]. Ger., *hinteres mittlere Stück des Zungenbeins* [Meckel, Wagner]. Syn.: *basibranchiostegal b.* [Parker], *episternal b.* (in fishes) [G. St.-Hilaire]. In comparative anatomy, a b. which runs backward from the basihyal b. to unite with the median elements of the branchial arches. [L, 12, 14.]—**Vertex b., Vertical b.** See *Parietal b.*—**Vomeric b.** See VOMER.—**Vomero-palatine b.** A b. formed by the confluence of the vomer and the palatine b's. [L, 294.]—**Whale-b.** See WHALEBONE.—**Whistle-b.** The coccyx. [A, 43.]—**Wedge-shaped b's.** See *Cuneiform b's.*—**Wish-b.** See FURCULA.—**Wormian b's.** Lat., *ossa wormiana.* Fr., *os wormiens.* Ger., *Nahtknochen.* The small b's often found in the cranial sutures. [L, 153.]—**Wrist-b's.** See *Metacarpal b's.*—**Yoke b.** See *Malar b.*—**Zygomatic b.** See *Malar b.*

THE SKULL OF THE FROG. (AFTER HUXLEY.)

Z, the temporo-mastoid bone; *EO*, the exoccipital bone; *QJ*, the quadrato-jugal bone; *Pa*, the parietal bone; *Fr*, the frontal bone; *Na*, the nasal bone; *Pmx*, the premaxillary bone; *Mx*, the superior maxilla; *D*, the dentary bone.

BONELYAX, n. See GOSSYPIUM.

BONESEED, n. Bo^{3}n'sed. The genus *Osteospermum.* [B, 19.]

BONESET, n. Bo^{3}n'se^{2}t. The *Eupatorium perfoliatum.* [B, 215.]—**Climbing b.** The *Mikania scandens.* [B, 275.]

BONFERME (Fr.), n. Bo^{2}n^2-fe^{2}rm. The name of a certain aromatic water or tincture. [A, 385.]

BONG (Bengal.), n. The *Solanum melongena.* [B, 172.]

BONGA, n. The *Areca catechu.* [L, 87.]

BONGARDIA (Lat.), n. f. Bo^{2}n^2-ga^{3}rd'i^2-a^3. Fr., *bongardie.* A genus of berberidaceous plants. [L, 41, 87.]—**B. chrysogonum** [Linnæus]. An Asiatic species reputed antipsoric. [A, 385.]

BONGLE, n. See ABABANGAY.

BON-HENRI (Fr.), n. Bo^{2}n-a^{3}n^2-re. The *Chenopodium bonus Henricus.* [B, 173.]

BONHOMME (Fr.), n. Bo^{2}n-o^{2}m. The *Marrubium germanicum*, the *Mentha rotundifolia*, and the *Verbascum thapsus.* [B, 173.]—**B. de rivière.** The *Mentha aquatica.* [B, 173.]—**Grand b.** The *Marrubium germanicum.* [B, 173.]—**Herbe à b.** The *Verbascum thapsus.* [B, 173.]

BONIFACIA, BONIFACIUS (Lat.), n's f. and m. Bo^{2}n-i^2-fa(fa^3)'si^2(ki^2)-a^3, -u^{3}s(u^{4}s). The *Ruscus hypoglossum.* [B, 180.]

BONNAYA (Lat.), n. f. Bo^{2}n-na^3'ya^3. Fr., *bonnaye.* Of Link, an Asiatic genus of scrophulariaceous plants. [A, 385; B, 180.]—**B. brachiata** [Link, Otto]. Syn.: *Ruellia antipoda* [Linnæus]. A species growing in the East Indies, where it is used for the chronic skin diseases of children. [B, 180.]—**B. grandiflora** [Sprengel]. Syn.: *Gratiola grandiflora* [Retzius]. A species growing in the East Indies and the Moluccas, where it is used for herpetic eruptions, ulcers, etc. [B, 180.]—**B. integrifolia** [Kost.]. Syn.: *Gratiola integrifolia* [Roxburgh]. A species growing in the East Indies, where the whole plant is used for gonorrhœa, for diseases of the eyes, and, combined with calamus and pepper, for epilepsy in children. [B, 180.]—**B. serrata** [Dietr.]. An East Indian species used for the same purposes as *B. brachiata.* [B, 180.]

BONNE-DAME (Fr.), n. Bo^{2}n-da^{3}m. The *Atriplex hortensis.* [B, 173.]

BONNE-FEMME (Fr.), n. Bo^{2}n-fa^{3}m. The *Plantago lanceolata.* [B.]

BONNE-FONTAINE (Fr.), n. Bo^{2}n-fo^{2}n^2-te^{2}n. A place in the department of the Moselle, France, where there is a chalybeate spring. [A, 385; L, 49.]

BONNEMAISONIEÆ (Lat.), n. f. pl. Bo^{2}n-me^{2}z-o^{2}n-i(i^2)'e^2-e(a^3-e^2). Of Trevisan, a subtribe of *Algæ* (*Rhodomeleæ* or, according to Harvey, *Laurenciaceæ*). [B, 170.]

BONNES (Fr.), n. Bo^{2}n. See EAUX-BONNES.

BONNET (Fr.), n. Bo^{2}n-na. 1. The second stomach of a ruminant. [L, 41.] See RETICULUM. 2. In ornithology, the upper part of the head. [L, 41.] 3. A cap-like covering. [A, 385.]—**B. à deux globes.** See *Capeline* BANDAGE.—**B. carré.** The fruit of *Barringtonia speciosa.* [B, 173.]—**B. d'électeur.** The *Cucurbita clypeata.* [B, 173.]—**B. de prêtre.** The *Euonymus europæus* and the *Cucurbita clypeata.* [B, 173.]—**B. d'Hippocrate.** See *Capeline* BANDAGE.—**B. tourlouris.** The spathe of *Manicaria saccifera*, used as a covering for the head. [B, 173.]

BONNETIÆ [Martius], **BONNETIEÆ** [Bartling] (Lat.), n's f. pl. Bo^{2}n-na'shi^2(ti^2)-e(a^3-e^2), -na-ti(ti^2)'e^2-e(e^3-e^2). A division (of Martius, an order) of ternstrœmiaceous plants. [B, 170.]

BONNETTE (Fr.), n. Bo^{2}n-ne^{2}t. The *Brunella officinalis.* [B, 173.]

BONNEVAL (Fr.), n. Bo^{2}n-va^{3}l. A place in the department of Savoie, France, where there is a hot sulphurous spring containing calcium. [A, 385; L, 49.]

BONPLANDIA (Lat.), n. f. Bo^{2}n^2-pla^{3}nd'i^2-a^3. Fr., *bonplandie.* See GALIPEA.—**B. angustura.** The *Galipea cusparia.* [B, 173.]—**B. trifoliata.** The *Galipea officinalis.* [B, 5, 173, 180.]

BONRAKA, n. A very astringent root used in Siam as a tonic. [Ainslie (L, 87).]

BONTA-JEMOODOO (Teloogoo), n. The *Euphorbia antiquorum.* [B, 172.]

BONTI, n. An East Indian name for the *Smilax china.* [L, 41.]

BONTIA (Lat.), n. f. Bo^{2}n'ti^2-a^3. Fr., *bontie.* A genus of myoporineous plants. [L, 41.]—**B. daphnoides** [Linnæus]. Fr., *olivier bâtard.* A West Indian species. A decoction of the flowers and the oil of the berries are emollient, and the latter is used as a remedy for tænia. [B, 173.]—**B. germinans** [Linnæus]. The *Avicennia africana.* [B, 173.]

BONTIEÆ (Lat.), n. f. pl. Bo^{2}n-ti(ti^2)'e^2-e(a^3-e^2). From *Bontia*, the single genus. A subdivision of the *Myoporinæ* made by Reichenbach. [B, 170.]

BONT-JAA, n. A variety of tea. [L, 105.]

BONUS HENRICUS (Lat.), n. m. Bon(bo^{2}n)'u^{3}s(u^{4}s) he^{2}nri(re)'ku^{3}s(ku^{4}s). See CHENOPODIUM *b. H.*

BONWORT, n. Bo^{2}n'wu^{5}rt. The *Bellis perennis.* [L, 73.]

BONY, adj. Bo^{3}n'i^2. Gr., ὀστίτης, ὄστινος, ὀστέϊνος, ὀστεώδης. Lat., *osseus.* Fr., *osseux.* Ger., *beinern, beinig, knochern, knochig, knochenartig.* It., *osseo.* Sp., *huesoso.* Osseous; pertaining to, consisting of, containing, or resembling bone.

BOO (Jap.), n. Sugar-cane. [L, 41.]

BOO-BOO, n. Written also *bouhou.* A name applied in the Sandwich Islands to a kind of fever which attacks only new-comers, characterized by great depression of spirits and moaning (whence the name); probably a subacute gastritis. [L, 7.]

BOOCHO, BOOCKO, n's. See BUCHU.

BOOIEN-KAVITE (Hind.), n. The *Feronia elephantum.* [B, 172.]

BOOK, n. Bu^{4}k. A.-S., *bôc.* Gr., βιβλίον. Lat., *liber.* Fr., *livre.* Ger., *Buch.* It., Sp., *libro.* In zoology, a collection of laminar structures arranged like the leaves of a b.—**Gill-b's.** The respiratory lamellæ of the *Podosomata.* [L, 210.]—**Lung-b's.** The respiratory lamellæ of the scorpions and of certain spiders. [L, 210.]

BOOKO, BOOKOO, n's. See BUCHU.

BOONGO-MALLOOR, n. The *Mogorium sambac.* [L, 105.]

BOOPE (Fr.), adj. Bo-op. See BOOPS.

BOOPIDEÆ (Lat.), n. f. pl. Bo(bo^2)-op-i^{2}d'e^2-e(a^3-e^2). Fr., *boopidées.* From *Boopis*, the typical genus. Syn.: *Calyceraceæ* [R. Brown]. Of Cassini, see CALYCEREÆ; of Bory de St. Vincent, an order of plants intermediate between the *Compositæ* and the *Dipsaceæ.* [B, 42, 170.]

BOOPS (Lat.), adj. Bo(bo^2)′o^{2}ps(ops). From βοῶπις (from βοῦς, an ox, an ὤψ, the eye), ox-eyed. Fr., *boope.* Ger., *ochsenaugig.* Having large eyes. See Balæna *b.*

BOORAGA (Teloogoo), n. The *Eriodendron anfractuosum.* [B, 172.]

BOORAK (Ar.), n. Borax. [A, 308.]

BOORGH (Teloogoo), n. The *Bombax malabaricum.* [B, 172.]

BOOR-TREE, n. Bur′tre. A Scotch name for the elder (*Sambucus nigra*). [B, 19.]

BOOSEE (Teloogoo), n. The *Vitex arborea.* [B, 172.]

BOOT, n. But. Fr., *botte.* Junod's b., invented by Junod, a Swiss physician, is a receptacle for the foot and leg, resembling a b., constructed so as to fit the limb closely at the top, and provided with a suction pump for exhausting the air, the object being to draw blood away from the head and trunk.

BOOT (Bengal., Hind.), n. The *Cicer arietinum.* [B, 172.]

BOOTIA (Lat.), n. f. Bot′i^2-a^3. Fr., *bootie.* A genus of hydrocharidaceous plants, comprising a single species found on the banks of the Irrawadi, in Ava. [B, 19.]—**B. vulgaris.** The *Saponaria officinalis.* [B, 173.]

BOOT-KALEY (Bengal., Hind.), n. The *Cicer arietinum.* [B, 172.]

BOPYRIDÆ (Lat.), n. f. pl. Bo-pi^{2}r(pu^{6}r)′i^{2}d-e(a^3-e^2). From *Bopyrus,* the typical genus. Fr., *bopyrées.* A family of the *Isopoda.* [A, 385; L, 41, 121.]

BOQUETIER (Fr.), **BOQUETTIER** (Fr.), n's. Bo-ke^{2}t-i^2-a. The *Malus acerba.* [A, 385; B, 172.]

BOR (Ger.), n. Bor. Boron. [B.]—**B'säure.** See the major list.—**B'wasser.** A solution of boric acid in water, usually of the strength of 3·5 per cent. [E. Küster (A, 319).]

BOR, n. A negro name for a Senegal shrub from which a salt used in cooking is extracted. [L, 87.]

BORA (Hind.), n. The *Dolichos catjang.* [B, 172.]

BORACHERA, n. A West Indian tree from the juice of which an intoxicating liquor is said to be made. [L, 109.]

BORACIC, adj. Bor-a^{2}s′i^{2}k. Lat., *boracicus, boracicius.* Fr., *boracique.* It., *boracico.* Sp., *borácico.* Containing or derived from borax. [B.]—**B. acid.** See Boric *acid.*

BORACIN (Fr.), **BORACIQUE** (Fr.), adj's. Bor-a-sa^{2}n^2, -sek. See Boracic.

BORACITE, n. Bor′a^{2}s-it. Fr., *boracite.* Ger., *Boraxspath, Würfelstein.* Native magnesium borate. [A, 385.]

BORACO, n. An alchemical name for borax. [Ruland (A, 325).]

BORACOUS, adj. Bor′a^{2}k-u^{3}s. See Boracic.

BORADES, n. An alchemical name for metallic filings. [Ruland (A, 325).]

BORAGE, n. Bu^{3}r′e^{2}j. Lat., *borago, borrago* [Fr. Cod.]. Fr., *bourrache* [Fr. Cod.]. Ger., *Boretsch, Borasch, Gurkenkraut.* It., *borragine, borrana.* See Borago *officinalis.*—**B'worts.** See Boragineæ.—**Garden b.** See Borago *officinalis.*

BORAGEÆ (Lat.), n. f. pl. Bor(bo^{2}r)-a^{2}j(a^{3}g)′e^2-e(a^3-e^2). Of Don and others, a tribe of the *Boragineæ* comprising *Borago* and related genera, including, according to Bentham and Hooker, those with an entire, rarely bifid, style tipped by a truncate or depressed-capitate stigma and surrounded at the base by a 4-lobed, rarely 2-lobed, ovary, each lobe of which contains a single cell inclosing a single ovule, and with fruit composed of 4 indehiscent nutlets, which when ripe separate from the base (gynobase) of the carpels and which inclose each one exalbuminous seed. [B, 42, 170, 215.]

BORAGINACEÆ (Lat.), n. f. pl. Bor(bo^{2}r)-a^{2}j(a^{3}g)-i^{2}n-a(a^3)′-se^2(ke^2)-e(a^3-e^2). See Boragineæ.

BORAGINACEOUS, adj. Bor-a^{2}j-i^{2}n-a′shu^{3}s. See Boragineous.

BORAGINEÆ (Lat.), n. f. pl. Bor(bo^{2}r)-a^{2}j(a^{3}g)-i^{2}n′e^2-e(a^3-e^2). Fr., *borraginées.* Ger., *Boragineen.* Syn.: *Asperifoliæ* [Linnæus]. An order of gamopetalous dicotyledonous plants comprising scabrous or hispid herbs, trees, or shrubs with watery juice, bearing alternate (rarely opposite) exstipulate, generally entire leaves, and scorpioid, dichotomously branching cymes of usually regular and five-parted perfect flowers with hypogynous, campanulate, or tubular calyx; a gamopetalous, funnel-shaped, tubular, hypocrateriform, or campanulate corolla with the lobes imbricate, convolute, or plicate in the bud; stamens equaling in number and alternate in position with the lobes of the corolla, from the throat or tube of which they spring; an inconspicuous hypogynous disc confluent with the base of the ovary; a gynœcium regularly composed of 2 bi-ovulate carpels which may either coalesce into a single entire 4-ovuled ovary bearing the single style upon its summit or may divide into a 4-lobed, 1-ovuled ovary, including the style between its divisions. The ovules are anatropous or amphitropous, the seeds are nearly or quite exalbuminous, the embryo is usually straight, and the radicle is superior or centripetal. The fruit is composed of 4 nutlets or is a drupe containing from 2 to 4 cells. The *B.* are divided into the tribes *Cordieæ* (by some made a separate order), *Ehretieæ, Heliotropieæ,* and *Borageæ.* [B, 42, 215.]

BORAGINEOUS, adj. Bor-a^{2}j-i^{2}n′e^2-u^{3}s. Lat., *boragineus.* Fr., *borraginé.* Pertaining to or resembling the *Boragineæ* or the genus *Borago.* [A, 385.]

BORAGINOIDEÆ (Lat.), n. f. pl. Bor(bo^{2}r)-a^{2}j(a^{3}g)-i^{2}n-o(o^2)-i^{2}d(ed)′e^2-e(a^3-e^2). See Boragineæ.

BORAGO (Lat.), n. f. Bor(bo^{2}r)-a(a^3)′go. Gen., *borag′inis.* Fr., *bourrache* [Fr. Cod.]. Ger., *Boretsch, Borasch.* A genus of boragineous (asperifolious) plants. [B, 180.]—**B. officinalis** [Linnæus]. Fr., *bourrache officinale, bourrache* [Fr. Cod.]. Ger., *gebräuchlicher Boretsch* (oder *Borasch*). Borage; a species indigenous to Asia, now common in Europe. The expressed juice of the fresh leaves (Lat., *herba boraginis;* Ger., *Wohlgemuthkraut, Herzblumenkraut*) and the flowers are used as an emollient, diuretic, and diaphoretic, and the flowers have been employed as a nervine tonic. [B, 173, 180.]—**Flores boraginis.** Ger., *Boretschblumen.* The flowers of *B. officinalis.* [B, 180.]—**Herba boraginis.** The leaves of *B. officinalis.* [B, 180.]

THE BORAGO OFFICINALIS. (AFTER DE LANESSAN.)

BORAMÈTE (Fr.), n. Bor-a^{3}m-e^{2}t. See Cibotium *Barometz.*

BORAS (Lat.), n. m. Bor(bo^{2}r)′a^{2}s(a^{3}s). Gen., *borat′is.* See Borate.—**B. natricus.** See Sodium *borate.*—**B. sodæ** [Belg. Ph.]. See Borax.—**B. sodicus** [Fr. Cod.]. See Sodium *borate.*—**B. supersaturatus, B. supersodicus.** See Borax.—**Collutorium cum borate sodico** [Fr. Cod.]. See *Collutoire au borate de* soude. —**Tabellæ cum borate sodico** [Fr. Cod.]. See *Tablettes de borate de* soude.

BORASCH (Ger.), n. Bor′a^{3}sh. See Borago.—**Gebräuchlicher B.** See Borago *officinalis.*

BORASSE (Fr.), n. Bor-a^{3}s. See Borassus.

BORASSEÆ (Lat.), n. f. pl. Bor(bo^{2}r)-a^{2}s(a^{3}s)′se^2-e(a^3-e^2). Fr., *borassées.* Of Martius, Reichenbach, and others, a series or tribe of palms. According to Bentham and Hooker, it comprises those with orbicular leaves, the segments of which are folded like a fan and in vernation are induplicate; with spadices growing between the leaves, numerous sheathing spathes, and diœcious flowers with an entire trilocular ovary and ascending ovules. [B, 42.]

BORASSINÆ (Lat.), n. f. pl. Bor(bo^{2}r)-a^{2}s(a^{3}s)-si(se)′ne(na^3-e^2). Of Martius and others, a tribe of palms corresponding to the *Borasseæ* (*q. v.*); by Drude, made a suborder of palms comprising the single tribe *Borasseæ.* [B, 170, 245.]

BORASSINEÆ (Lat.), n. f. pl. Bor(bo^{2}r)-a^{2}s(a^{3}s)-si^{2}n′e^2-e-(a^3-e^2). Fr., *borassinées.* See Borasseæ.

BORASSUS (Lat.), n. m. Bor(bo^{2}r)-a^{2}s(a^{3}s)′su^{3}s(su^{4}s). Gr., βόρασσος. 1. The fruit of the palm-tree. [Dioscorides (A, 311).] 2. A Linnæan genus of palms of the tribe *Borasseæ.* [B, 245.]—**B. Æthiopum** [Martius]. An African species resembling *B. flabelliformis* in general appearance, but having an enlargement of the stem at about its middle. The leaves and fruit are used for the same purposes as those of *B. flabelliformis.* [B, 19; L, 87.]—**B.**

THE BORASSUS FLABELLIFORMIS. [A, 327.]

flabelliformis [Linnæus]. Fr., *rondier en éventail, cocotier de mer.* Ger., *gemeine Fächerpalme.* Syn.: *Lontarus domestica* [Rumphius]. The Palmyra palm of India, the Deleb-palm of Africa, a lofty tree of tropical Africa and the East Indies. It has been

supposed to furnish bdellium; the fresh juice of the young flower-spike is employed by the natives as a cooling and resolvent drink, and has been used in phthisis; fermented, the juice constitutes palm wine (*toddy*), from which arrack is distilled; treated like the juice of sugar-cane, it yields palm sugar (*jaggery*); the fruit is eaten; a variety of sago is sometimes made from the pith of the stem; and various parts of the tree are put to a multitude of uses. [A, 327; B, 19, 75, 173, 180, 245.]—**B. gomutus.** The *Arenga saccharifera.* [B, 173.]—**B. sechellensis.** The *Lodoicea maldivica.* [B, 173.]—**B. tunicatus** [Loureiro]. Fr., *rondier tuniqué.* A species the fruit of which resembles the cocoa-nut and is used for the same purposes. [B, 173, 180.]

BORATE, n. Bo′rat. Lat., *boras.* Fr., *borate.* Ger., *Borat, borsaures Salz.* It., Sp., *borato.* A salt of boric acid. The term is often applied to the salts of metaboric and pyroboric acids, which should be called metaborates and pyroborates. The b's are unstable, and their characters are but little known. The general formula of the b's proper (orthoborates) is $R'''(BO_3)_3$ or $R''(BO_3)_2$, in which R‴ and R″ may represent one or more radicles having collectively a trivalent and a bivalent combining power; and these radicles may also be in part replaced by hydrogen. [B.]—**B. sursaturé** (Fr.). See BORAX.

BORATED, adj. Bo′rat-e^{2}d. Lat., *boraxatus.* Fr., *boraté.* Containing or impregnated with boric acid or borax. [L, 42.]

BORÄTHYL (Ger.), n. Bor′at-u^{6}l. See TRIETHYLBORINE.

BORAX [Br. Ph., Swiss Ph.] (Lat.), n. m. and f. Bor(bo^{2}r)′a^{2}x-(a^{3}x). Gen., *bor′acis.* Ar., *borraca, tincar. luzara, aldeheb.* Gr., *χρυσόκολλα.* Fr., *borax, borate de sodium* (ou *de soude* [Fr. Cod.]). Ger., *Borax, borsaures Natron.* It., *borace, borato di sodio.* Sp., *bórax, borraj, biborato sódico, atincar.* Syn.: *sodii boras* [U. S. Ph.], *Natrium biboricum* (seu *biboracicum*) [Ger. Ph.], *boras sodæ* [Belg. Ph.], *biboras natricus* [Dan. Ph., Finn. Ph., Netherl. Ph., Norw. Ph., Swed. Ph.], *natrium boracicum* [Austr. Ph., Hung. Ph.], *natrum biboricum* [Russ. Ph.], *natrum subboracicum* [Greek Ph.], *boras sodæ alcalescens.* Sodium pyroborate (or biborate), $Na_2B_4O_7$. Without water of crystallization b. forms an amorphous, vitreous mass called *b. glass;* with 5 molecules of water of crystallization it constitutes *octahedral b.*, crystallizing in hard, transparent octahedra; with 10 molecules of water of crystallization it forms *common*, or *prismatic, b.*, in the form of large transparent prisms, only moderately soluble in water, and having a cooling, sweetish taste. When heated, b. becomes a spongy, amorphous mass called *b. usta.* B. is used as a topical application in aphthæ and various mild affections of mucous membranes, and it has been thought to be emmenagogue and oxytocic. [A, 325; B.]—**Anhydrous b.** Fr., *b. anhydreux.* Ger., *wasserfreies B.* B. deprived of its water of crystallization; b. glass. [B.]—**B. carmine.** See under CARMINE.—**B. glass.** See under *B.*—**B'glycerol** (Ger.). See *Glycerinum boracis.* —**B'honig** (Ger.). See *Mel* SODII *boratis.*—**B'salmiak** (Ger.). Ammonium borate. [L, 80.]—**B'salz.** See BORATE.—**B'sauer** (Ger.). Containing boric acid. [A, 315.]—**B'säure** (Ger.). Boric acid. [B.] —**B'seife** (Ger.). See SAPO *boraxatus.*—**B'spath** (Ger.). See BORACITE.—**B. tartarisata.** See TARTARUS *boraxatus.*—**B. usta** [Austr. Ph., Hung. Ph.], **Burnt b.** [B, 95.] See under *B.*—**B. veneta** [Ed. Ph., 1699]. Lit., Venetian b.; purified b. (so called because originally prepared in Venice). [B, 180.]—**B. vitrificata.** B. glass. [B.] See under *B.*—**B'weinstein** (Ger.). See TARTARUS *boraxatus.*—**Calcined b.** Burnt b. [L, 86.] See under *B.*—**Flores boracis.** Boric acid. [B.]—**Glass of b.** Lat., *b. vitrificata.* B. glass. [L, 130.] See under *B.*—**Glycerinum boracis** [Br. Ph.]. Fr., *glycérole de b.* Ger., *B'glycerol.* It., *glicerato* (o *glicerite*) *di borace.* Sp., *glicerolado de bórax.* Glycerine, or glycerite, of b., consisting of 1 oz. (av.) of powdered b. dissolved in 4 fluidounces of glycerin. [B, 5.]—**Honey of b., Mel boracis** [Br. Ph.], **Mellite de b.** (Fr.). See *Mel* SODII *boratis.*—**Octahedral b.** Fr., *b. octaédrique.* Ger., *oktaëdrischer B.* See under *B.*—**Prismatic b.** See under *B.*—**Sal acidum** (seu **volatile**) **boracis.** Boric acid. [B, 97.]—**Tartrate of b. and potassium.** See TARTARUS *boraxatus.*—**Venetian b.** See *B. veneta.*

BORAXATUS (Lat.), adj. Bor(bo^{2}r)-a^{2}x(a^{3}x)-a(a^3)′tu^{3}s(tu^{4}s). See BORATED and TARTARUS *b.*

BORAX SPRINGS, n. A place in Lake County, California, where there are springs containing sodium and ammonium carbonates (the latter to the amount of 8·613 grains to the pint), sodium chloride, magnesium iodide, borax (12·911 grains to the pint), alumina, silicic acid, and free carbon dioxide, together with traces of calcium sulphate, potassium chloride, and magnesium bromide. [A, 363.]

BORBONIA (Lat.), n. f. Bo^{2}r-bon′i^2-a^3. Fr., *borbonie.* A genus of leguminous plants growing in southern Africa. [B, 19.]—**B. cordata** [Linnæus], **B. cordifolia** [Lamarck]. Fr., *b. en cœur.* A species the leaves of which (Fr., *thé du Cap*) are used for tea at the Cape of Good Hope. [B, 173.]—**B. en cœur** (Fr.). See *B. cordata.*—**B. fructu oblongo nigro**, etc. [Plumier]. The *Persea carolinensis.* [B, 180.]—**B. globosa** [Gärtner, Jr.]. The *Laurus globosa.* [B, 173.]—**B. ruscifolia.** A species employed as a diuretic. [L, 107.]

BORBONIEÆ (Lat.), n. f. pl. Bo^{2}r-bon-i(i^2)′e^2-e(a^3-e^2). Of Lindley, a division of the *Genisteæ.* having *Borbonia* as the typical genus. [B, 170.]

BORBORI, n. Fr., *huile de Macassar.* An oily preparation made of the flowers of the *Uvaria odorata* and other flowers, with cocoa-nut oil; used by the natives of the Moluccas for rubbing the body during the prevalence of fevers. [A, 385; L, 49.]

BORBORODES (Lat.), adj. Bo^{2}r-bo^{2}r-o′dez(das). Gr., *βορβορώδης* (from *βόρβορος*, mud, and *εἶδος*, resemblance). Turbid (said of pus, urine, etc.); fœtid. [Hippocrates (A, 311, 325); Galen (A, 325).]

BORBORUS (Lat.), n. m. Bo^{2}r′bo^{2}r-u^{3}s(u^{4}s). Gr., *βόρβορος.* Filth, fæcal matter. [A, 311, 322.]

BORBORYGMUS (Lat.), n. m. Bo^{2}r-bo^{2}r-i^{2}g(u^{6}g)′mu^{3}s(mu^{4}s). Gr., *βορβορυγμός.* Fr., *borborygme, gargouillement* (ou *grouillement*) *d'entrailles.* Ger., *Leibkollern, Leibknurren, gurgelndes Geräusch.* It., *gorgogliamento.* Sp., *mormullo.* A rumbling noise made by the movement of gas in the bowels. [Hippocrates (A, 311); A, 322, 325; D, 1, 70, 72; K.]

BORCETTE (Fr.), n. Bor-se^{2}t. See BURTSCHEID.

BORD (Fr.), n. Bor. See BORDER.—**B. dentelé** (ou **interne**) **de la corne d'Ammon.** See CORPUS *fimbriatum.*

BORDER, n. Bo^{2}rd′u^{6}r. Lat., *margo.* Fr., *bord.* Ger., *Rand.* In descriptive anatomy, the boundary of a surface. [L, 43.] Cf. MARGIN.—**Basal b.** See *Cuticular* LAYER.—**Bright b.** The b. of a ciliated cell, called by Engelmann the operculum (*q. v.*). [J.]—**Cuticular b., Striated b.** See *Cuticular* LAYER.—**Vermilion b.** The line of junction of the mucous membrane of the lip with the skin.

BORDIGHERA (It.), n. Bor-de-ga′ra^3. A climatic resort in the Riviera (*q. v.*). [L. Perl (A, 319).]

BORE (Fr.), n. Bor. See BORON.

BORÉ (Fr.), adj. Bor-a. Containing boron. [A, 385.]

BOREAL, adj. Bo′re-a^{2}l. Lat., *borealis.* Fr., *boréal.* Ger., *nördlich, nordisch.* It., *boreale.* Sp., *boreal.* Pertaining to the North; growing in northern latitudes (said of plants). [A, 385; L, 109.]

BORECH (Ger.), n. Bor′e^{2}ch^2. Borax (*q. v.*). [B, 180.]

BORECOLE, BORE COLE, n's. Bor′kol. The *Brassica oleracea.* [B, 19, 75.]

BORETHYL, n. Bor-e^{2}th′i^{2}l. Fr., *boréthyle.* Ger., *Boräthyl.* See TRIETHYL*borine.*

BORETSCH (Ger.), n. Bor′e^{2}ch. See BORAGO.—**B'blumen.** The flowers of *Borago officinalis.* [L, 80.]—**Gebräuchlicher B.** The *Borago officinalis.* [B, 180.]

BORGNE (Fr.), adj. Born. Blind in one eye; as a n., a canal having but one opening (*e. g.*, a sinus). [A, 385; L, 41.]

BORI, n. 1. The jujube-tree. [A, 385; L, 41, 109.] 2. See BOR (negro). 3. A Malay name for the *Croton tiglium.* [L, 87.]

BORI-BORI, n. See BORBORI.

BORIC, adj. Bo′ri^{2}k. Lat., *boricus.* Fr., *borique.* Ger., *borisch, Bor-* (in comp.). It., *borico.* Sp., *bórico.* Pertaining to or containing boron. [B.]—**B. acid.** Lat., *acidum boricum.* Fr., *acide borique.* Ger., *Borsäure.* It., *acido borico.* Sp., *ácido bórico.* An acid containing boron as a trivalent radicle. Such acids include *orthoboric acid* (commonly called b. acid), *metaboric acid*, and *pyroboric acid.* For the two latter, see the major list. Orthoboric acid (the *acidum boricum* of the U. S. and Ger. Ph's; the *acide borique cristallisé* of the Fr. Cod.) is a tribasic acid, H_3BO_3, forming white, shining, laminar crystals, devoid of odor, unctuous to the touch, slightly bitter, soluble in about 25 parts of cold water, in 3 of boiling water, in 6 of alcohol, and in 5 of glycerin. It forms salts properly called borates, although the term is often applied to the salts of pyroboric acid. [B.]—**B. anhydride.** A very hard, transparent, brittle glass, B_2O_3, left after the expulsion of all the water from b. acid at a red heat. [A, 247.]—**B. ether.** Fr., *éther borique.* Ethyl monoborate. ["Proc. of the Am. Pharm. Assoc.," xvi, p. 267 (B).]—**B. oxide.** See *B. anhydride.*—**B. salts.** See under BORON.

BORIDE, n. Bo′ri^{2}d(rid). A compound of boron with an element or a radicle. [L, 41.]

BORINE, n. Bo′ren. A compound analogous to an amine, of 1 atom of boron and 3 atoms of a univalent element or 3 molecules of a univalent radicle. [B.]

BORITIS, n. An alchemical name for the philosopher's stone. [Ruland (A, 325).]

BORIUM (Lat.), n. n. Bo(bo^2)′ri^2-u^{3}m(u^{4}m). See BORON.

BORKE (Ger.), n. Bork′e^2. 1. Bark. [B.] 2. A crust, a scab. [G.]—**Aeussere B. des Gehirns.** The cortical substance of the brain. [L, 80.]—**B'nartig.** Crustaceous. [L, 80.]

BORKHAUSENIA (Lat.), n. Bork-ha^3-us-e^{2}n′i^2-a^3. Fr., *borkhausénie.* See FUMARIA.

BORKIG (Ger.), adj. Bork′i^{2}g. Crustaceous, scabbed. [A, 315.]

BORLAND, n. Bor′la^{2}nd. A place in Pleasants County, West Virginia, where there is a well the water of which contains in each pint

	Grains.
Sodium carbonate	9·725
Magnesium carbonate	0·232
Calcium carbonate	1·094
Sodium chloride	30·009
Magnesium chloride	0·267
Potassium sulphate	2·828
Sodium sulphate	4·734
Aluminium phosphate	0·029
Magnesium iodide	0·003
Magnesium bromide	0·035
Aluminium and iron (as carbonates)	0·080
Silica	0·073
Hydrogen sulphide	amount undetermined.
Manganese and organic matter	traces.

[A, 363.]

BORMETHYL, n. Bor-me^{2}th′i^{2}l. See TRIMETHYL*borine.*

BORMIO (It.), n. Bor′me-o. A place in Italy where there are hot and cold springs containing sodium chloride, sulphates, and a little iron. [A, 385; L, 49.]

BORNEENE, n. Bo^{2}rn′e^2-en. Fr., *bornéène.* Ger., *Borneen.* A colorless liquid, $C_{10}H_8$, derived from Borneo camphor. [A, 385.]

BORNEOKAMPFER (Ger.), n. Bo^{2}r″ne^2-o-ka^{3}mpf′e^{2}r. See *Borneo* CAMPHOR.

BORNEOL, n. Bo^{2}rn′e^2-o^{2}l. Fr., *bornéol.* See *Borneo* CAMPHOR.

BORNESITE, n. Bo^{2}rn′e^{2}s-it. Fr., *bornésite.* Ger., *Bornesit.* A prismatic crystalline substance, $C_6H_{11}(CH_3)O_6 = C_7H_{14}O_6$, derived from Borneo caoutchouc; a methyl substitution compound of Borneo dambose. [B, 4.]

BORNEYL, n. Bo^{2}rn′e^2-i^{2}l. The radicle, $C_{10}H_{14}$, of Borneo camphor. [B, 4.]

BORNGRIND (Ger.), n. Bo^{2}rn′grend. Incrusted eczema of the face. [L, 80.]

BORNKRAUT (Ger.), n. Bo^{2}rn′kra^3-ut. The herb of *Cnicus benedictus.* [B. 180.]

BOROAZOTURE (Fr.), n. Bo-ro-a^{3}z-ot-u^{6}r. A compound of boron nitride with an element or a radicle. [A, 385.]

BOROCALCITE, n. Bo-ro-ka^{2}l′sit. Native calcium borate. [L, 108.]

BOROCITRATE, n. Bo-ro-si^{2}t′rat. A compound of an element or a radicle with both citric acid and metaboric acid. Three classes of such compounds are possible: the *monoborocitrates*, of the general formula $[C_6H_7O_7.HBO_2]_nR_N$, in which R_N is a radicle having a combining capacity of *n*; the *diborocitrates*, of the formula $[C_6H_6O_7.2HBO_2]_n2R_N$; and the *triborocitrates*, of the formula $[C_6H_5O_7.3HBO_2]_n3R_N$. ["Drug. Circ. and Chem. Gaz.," Jan., 1881, p. 3 (B).]

BOROGLYCERIDE, n. Bo-ro-gli^{2}s′e^{2}r-i^{2}d(id). Ger., *Boroglycerid.* It., *borogliceride.* A preparation made by gradually dissolving 2 parts of boric acid in 3 of hot glycerin; a pasty mass dissolving in water in all proportions and mixing with fats, used as an antiseptic. [B.]

BORO-JOAN (Bengal.), n. The *Ptychotis ajowan.* [B, 172.]

BOROMETZ, n. See CIBOTIUM *barometz.*

BORON, n. Bo′ro^{2}n. Lat., *borium.* Fr., *bore.* Ger., *Bor, Boraxstoff.* It., Sp., *boro.* A non-metallic element (symbol, B or Bo; atomic weight, 11) discovered in 1808 by Sir H. Davy and also by Gay-Lussac and Thénard; found in nature in combination, as in borax and various minerals. It occurs in two allotropic forms: 1. *Amorphous b.*, obtained by the action of heat on b. trioxide, is a dark-brown amorphous powder, odorless and tasteless, very slightly soluble in water, to which it imparts a yellow color, and infusible at a white heat. 2. *Crystallized*, or *adamantine*, *b.*, obtained by heating b. or b. trioxide with aluminium. It forms octahedral or prismatic crystals surpassed in hardness only by the diamond. Thus prepared, the crystals contain aluminium and carbon, together with other impurities. Both varieties of b. show but little tendency to undergo chemical change, and are hardly affected by ordinary reagents. In composition b. acts either as a trivalent or as a quinquivalent radicle. [B, 3.]—**Adamantine b., Amorphous b.** See under *B.*—**B. ammoniochloride.** A white crystalline substance, $2BCl_3.3NH_3$, obtained by the action of ammonia on b. trichloride. [B, 3.]—**B. bromide.** A compound of b. and bromine. The *tribromide*, BBr_3, is a colorless liquid, fuming on exposure to the air and boiling at 90·5° C. [B, 3.]—**B. chloride.** A compound of b. and chlorine. The *trichloride*, BCl_3, is a colorless liquid, fuming when exposed to the air and boiling at 18° C. [B, 3.]—**B. fluoride.** A compound of b. and fluorine. See *B. trifluoride.*—**B. nitride.** A compound of b. and nitrogen, BN; a white amorphous powder. [B, 3.]—**B. oxide.** See *B. trioxide.*—**B. sulphide.** See *B. trisulphide.*—**B. tribromide, B. trichloride.** See *B. bromide* and *B. chloride.*—**B. triethyl.** Ger., *Bortriäthyl.* See TRIETHYL*borine.*—**B. trifluoride.** A colorless gas, BF_3, of a strong pungent odor, fuming on contact with the air. It forms with ammonia a solid compound of the formula $BF_3.NH_3$, also liquids of the composition $BF_3(NH_3)_2$ and $BF_3(NH_3)_3$. It dissolves in water, forming a fuming, oily, highly caustic liquid. [B, 3.] See *Hydrated b. trifluoride.*—**B. trimethyl.** Ger., *Bortrimethyl.* See TRIMETHYL*borine.*—**B. trioxide.** A substance, B_2O_3, obtained by the ignition of b. or by the action of heat on boric acid; brittle, vitreous, and having a strong affinity for water, with which it forms boric acid; frequently used in blowpipe analysis on account of the characteristic colors which it imparts to many metallic oxides. [B, 3.]—**B. trisulphide.** A compound, B_2S_3, usually forming a white glass, but also occurring in the form of silky acicular crystals. It has a pungent odor, and its vapor is irritating to the conjunctiva. [B, 3.]—**Crystalline b., Crystallized b.** See under *B.*—**Graphitoid b.** A name formerly applied to certain copper-colored opaque scales, consisting of an alloy of b. and aluminium, formed in a process of converting amorphous into crystalline b. [A, 327.]—**Hydrated b. trifluoride.** A liquid, approximately $BF_3 + H_2O$, obtained by dissolving the gaseous trifluoride in water and expelling the excess of gas by means of heat. [B, 3.]

BORONATROCALCITE, n. Bo-ro-na-tro-ka^{2}l′sit. A mineral consisting essentially of 1 molecule of sodium borate and 2 molecules of calcium borate with 2 molecules of water; used as a substitute for borax. [A, 308.]

BORONETZ, n. See CIBOTIUM *barometz.*

BORONIEÆ (Lat.), n. f. pl. Bo-ron-i(i^2)′e^2-e(a^3-e^2). Fr., *boroniées.* Of Bartling, Spach, and others, a division or tribe of the *Diosmeæ* (*Rutaceæ*) including *Boronia* and other genera. [B, 170.]

BOROSILICATE, n. Bo-ro-si^{2}l′i^{2}k-at. A compound of boric acid and silicic acid with a base. [L, 49.]

BOROTARTRATE, n. Bo-ro-ta^{3}rt′rat. A compound of boric acid and tartaric acid with a base. [L, 49.]

BOROVIK, n. A Russian provincial name for the *Boletus edulis.* [L, 105, 109.]

BOROZAIL, n. An Ethiopian name for one or more venereal diseases. [L, 41, 84.]

BORRA (It.), n. Bor′ra^3. A place in Italy, near Sienna, where there are three effervescent springs, one of which is warm. [L, 105.]

BORRAGE, n. See BORAGE.

BORRAGEÆ, BORRAGINACEÆ, BORRAGINEÆ (Lat.), n's f. pl. See BORAGEÆ, BORAGINACEÆ, and BORAGINEÆ.

BORRAGINES (Lat.), n. f. pl. Bo^{2}r-ra^{2}j(ra^{3}g)′i^{2}n-ez(e^{2}s). Of Adanson, a family of plants corresponding in the main to the *Boragineæ* (*q. v.*). [B, 170.]

BORRAGO [Fr. Cod.] (Lat.), n. f. Bo^{2}r-ra(ra^3)′go. See BORAGO, and for other words in *Borr-* of like origin, see the corresponding words in *Bor-.*—**Aqua borraginis** [Belg. Ph.]. A preparation made by distilling the leaves of *Borago officinalis* with water. [B, 95.]—**Folia borraginis** [Belg. Ph.]. The leaves of *Borago officinalis.* [B, 95.]—**Ptisana de folio borraginis** [Fr. Cod.]. See *Tisane de* BOURRACHE.—**Succus borraginis** [Fr. Cod.]. See *Suc de* BOURRACHE.

BORRAR, n. The *Arctium lappa.* [L, 105.]

BORRAS (Sp.), n. Bor′ra^{3}s. Lit., sediment, dregs, lees; "the altered sedimentary blood ejecta characteristic of yellow fever and other diseases associated with gastro-intestinal hæmorrhages." [Matas, "New Orleans Med. and Surg. Jour.," Apr., 1882.]

BORRERA (Lat.), n. f. Bo^{2}r-re(ra)′ra^3. Fr., *borrère.* A genus of *Lichenes.* [L, 41.]—**B. ciliaris.** The *Physcia ciliaris.* [B, 173.]—**B. furfuracea.** The *Parmelia furfuracea.* [B, 173, 180.]—**B. tenella.** The *Physcia tenella.* [B, 173.]

BORRERIA (Lat.), n. f. Bo^{2}r-re(ra)′ri^2-a^3. Fr., *borrérie.* Of Meyer, a genus of rubiaceous plants, now referred to *Spermacoce.* [B.]

BORRHA (Lat.), n. f. Bo^{2}r′ra^3. Gr., βοῤῥά. Food. [A, 325.]

BORROU (Fr.), n. Bor-ru. An East Indian tree, the bark of which yields a purgative juice. [L, 109.]

BORROZAIL, n. See BOROZAIL.

BORSA, n. A place in Hungary where there are alkaline ferruginous springs. [L, 49.]

BORSAROS, n. A place in Transylvania where there is an alkaline ferruginous spring. [L, 49.]

BORSÄURE (Ger.), n. Bor′zoir-e^2. Boric acid. [B.]—**B.-Allylester.** Allyl borate. [B.]—**B.-Amylester.** Amyl borate. [B.]—**B′salbe.** See *Unguentum* ACIDI BORICI.—**B′weinstein.** Potassium borotartrate. [L, 65.]—**Gereinigte B.** See ACIDUM BORICUM *purissimum.*

BORSHOM, n. A place in the Caucasus where there are springs the waters of which are used like those of Vichy. [A, 319.]

BORSONE (Fr.), n. Bor-son. Yellow agaric. [L, 41, 109.]

BORSTE (Ger.), n. Borst′e^2. See ACICULA.—**B′nfäule.** 1. See SETA *alba.* 2. "Wild-fire," a disease of the throat in pigs. [L, 46, 80.]—**B′nförmig.** Bristle-shaped. [L, 43.]—**B′nstachelig.** See MUCRONATE.—**B′nstrauch.** See the major list.—**B′ntragend.** Setigerous. [L, 46.]—**B′nwurm.** The genus *Filaria.* [L, 43.]—**B′nwürmer.** See CHÆTOPODA.—**Weisse B.** See SETA *alba.*

BORSTENSTRAUCH (Ger.), n. Borst′e^{2}n-stra^3-uch^2. See CHÆTOGASTRA.—**Graulicher B.** The *Chætogastra canescens.* [B, 180.]

BORSTFEDERGRAS (Ger.), n. Borst′fad-e^{2}r-gra^{3}s. See PENNISETUM.—**Kriechendes B.** The *Pennisetum holcoides.* [B, 180.]

BORSTIG (Ger.), adj. Borst′i^{2}g. Setous, setaceous. [B.]

BORSZÉK, n. A place in the Carpathian Mountains, Hungary, where there are several springs, the chief one of which contains sodium, calcium, iron, and magnesium carbonates and free carbon dioxide. [A, 319.]

BORUM (Lat.), n. n. Bo′ru^{3}m(ru^{4}m). See BORON.

BORURE (Fr.), n. Bor-u^{6}r. See BORIDE.

BORURÉ (Fr.), adj. Bor-u^{6}r-a. Combined with boron so as to form a boride. [L, 109.]

BORURET, n. Bor′u^2-re^{2}t. Lat., *boruretum.* See BORIDE.

BORUSSIAS (Lat.), n. m. Bo^{2}r-u^{3}s(u^{4}s)′si^2-a^{2}s(a^{3}s). Gen., *borussiat′is.* See CYANATE.

BORUSSICUS (Lat.), adj. Bo^{2}r-u^{3}s(u^{4}s)′si^{2}k-u^{3}s(u^{4}s). Prussian, prussic. [B.] See HYDROCYANIC.

BOS (Lat.), n. m. Bo^{2}s(bos). Gen., *bo′vis.* Gr., βοῦς. Fr., *bœuf.* Ger., *Ochs, Ochse.* It., *bue.* Sp., *buey.* A genus of *Mammalia* of the order *Ruminantia*, family *Bovidæ* (*Cavicornia*). [B, 180; L, 147.]—**B. americanus.** The bison (buffalo) of North America. Its horns were formerly used as a sudorific and its excrement as a resolvent. [L, 105.]—**B. bubalus.** Fr., *buffle.* Ger., *Büffel.* The buffalo of India. Its gall is said to be indistinguishable from that of the ox and to have the same properties. [B, 180.]—**B. domesticus** [Johnston]. See *B. taurus.*—**B. indianus.** See *B. bubalus.*—**B. taurus** [Linnæus]. Fr., *bœuf domestique.* Ger., *gemeines Rind.* The domestic ox, bull, or cow. [A, 321; B, 180.]

BOSA, n. An Egyptian name for an intoxicating mixture of darnel-flour, hemp-seed, and water. [Prosper Alpinus (A, 325); L, 109.]

BÖSARTIG (Ger.), adj. Bu^{5}z′a^{3}rt-i^{2}g. Malignant. [L, 80.]—**B′keit.** Malignancy. [L, 80.]

BOSAYA, n. A sort of fern found in Malabar, where it is used in medicine. [L, 41.]

BOSEINEÆ (Lat.), n. f. pl. Bo^{2}s-e^2-i^{2}n′e^2-e(a^3-e^2). From *Bosea*, the only genus. Of Webb and others, a subtribe of the *Chenopodeæ.* [B. 170.]

BÖSKRAUT (Ger.), n. Bu^{5}s'kra^{3}-ut. The genus *Thapsia.* [B, 180.]—**Garganisches B.** The *Thapsia garganica.* [B, 180.]—**Schmalblätteriges B.** The *Thapsia asclepium.* [B, 180.]—**Stinkendes B.** The *Thapsia fœtida.* [B, 180.]—**Zottiges B.** The *Thapsia villosa.* [B, 180.]

BOSOM, n. Bu^{4}z'u^{3}m. A.-S., *bôsum, bôsem.* Lat., *sinus.* Fr., *sein.* Ger., *Brust.* It., Sp., *seno.* The breast (the region or the gland) of a human being. [A, 300; L, 56.]

BOSS, n. Bo^{2}s. Gr., *ὕβωμα.* Lat., *gibbus, gibba, tuber.* Fr., *bosse.* Ger., *Höcker.* It., *gobba.* Sp., *giba.* A broad and more or less circular protuberance rising gradually above the surrounding surface (said especially of such protuberances of the bones of the skull). [A, 385.]

BOSSE (Fr.), n. Bo^{2}s. See Boss.—**B. sanguine.** 1. A swelling containing extravasated blood due to a contusion. 2. The caput succedaneum (*q. v.*). [L, 41.]

BOSSED, adj. Bo^{2}sd. Circular and flat with a prominent centre. [B, 19.]

BOSSELATED, adj. Bo^{2}s'se^{2}l-at-e^{2}d. Fr., *bosselé.* Provided with bosses. [L, 13, 41.]

BOSSEN, n. A place in the Tyrol where there is a whey-cure establishment. [A, 385.]

BOSSIÆEÆ (Lat.), n. f. pl. Bo^{2}s-si^{2}-e'(a^{3}'e^{2})-e(a^{3}-e^{2}). A subtribe of leguminous plants of the tribe *Genisteæ.* [B, 42.]

BOSSU (Fr.), adj. Bo^{2}s-su^{6}. Humpbacked; as a n., a humpback. [A, 385.]

BOSTONITE, n. Bo^{2}s'tu^{3}n-it. Canadian asbestos. [B, 49.]

BOSTRICHIÆ (Lat.), n. f. pl. Bo^{2}s-tri^{2}k(tri^{2}ch^{2})'i^{2}-e(a^{3}-e^{2}). See Botrychiæ.

BOSTRYCHIDÆ (Lat.), n. f. pl. Bo^{2}s-tri^{2}k(tru^{6}ch^{2})'i^{2}d-e(a^{3}-e^{2}). A group of the *Malacodermi.* [L, 121.]

BOSTRYCHOID, BOSTRYCHOIDAL, adj's. Bo^{2}s'tri^{2}k-oid, bo^{2}s-tri^{2}k-oid'a^{2}l. Gr., *βοστρυχώδης* (from *βόστρυχος,* a curl or lock of hair, and *εἶδος,* resemblance). Lat., *bostrychodes, bostrychoides.* Fr., *bostrychoïde.* Ger., *lockenförmig, lockenähnlich.* Resembling a lock of hair; curly. [A, 311, 322.]

BOSTRYCHOPODA (Lat.), n. n. pl. Bo^{2}s-tri^{2}k(tru^{6}ch^{2})-o^{2}p'-o^{2}d-a^{3}. From *βόστρυχος,* a lock of hair, and *πούς,* a foot. Fr., *bostrychopodes.* See Cirripedia.

BOSTRYX (Lat.), n. m. Bo^{2}s'tri^{2}x(tru^{6}x). Gen., *bos'trycis.* Ger., *Locke, Schraubel.* A helicoid cyme. [B, 75, 270.]

BOSWELLIA (Lat.), n. f. Bo^{2}z-we^{2}l'i^{2}-a^{3}. Fr., *boswellie.* Of

THE BOSWELLIA CARTERI, VAR. MAGHRAYT D'SHEEHAZ. (AFTER DE LANESSAN.)

Roxburgh, a genus of burseraceous trees of India, southern Arabia, and eastern Africa, furnishing olibanum. [B, 19, 180.]—**B. bhau-dagiana** (seu **bhau-dajiana**) [Birdwood]. A species closely resembling *B. Carteri,* and perhaps only a variety of it. [A, 260.]—**B. Carteri, B. Carterii** [Birdwood]. A species (perhaps only a variety) growing in southeastern Arabia and the Somali Country. The varieties *maghrayt d'sheehaz,* growing in Arabia, and *morh madow,* growing in Somali, are described. One of the most important sources of the olibanum of commerce. [A, 260; B, 19.]—**B. frereana** [Birdwood]. Fr., *tacamaque jaune huileuse* [Guibourt]. A species growing in the mountains of the Somali Country, furnishing, according to Flückiger and Hanbury, *luban meyeti,* or *luban matti,* which is probably the same as oriental or African elemi, also a variety of anime, which are used in the East as a masticatory. [A, 260.]—**B. glabra** [Roxburgh]. Syn.: *Canarium balsamiferum* [Willdenow]. An East Indian species furnishing a gum-resin called by the natives *koondricum;* used in gonorrhœa and as an application to ulcers. [B, 172, 180.]—**B. mauritiana, B. paniculata** [Lamarck]. See Canarium *commune.*—**B. papyrifera** [Richard]. Syn.: *Amyris papyrifera* [Delile]. An Abyssinian tree called *makker,* or *maker,* furnishing a transparent, lemon-yellow resin used for incense. The bark, which peels off in thin layers, is used as paper. [B, 173, 197.]—**B. serrata** [Stackh.]. Fr., *Boswellie*

THE BOSWELLIA SERRATA. [A, 327.]

dentelée. Ger., *indischer Weihrauchbaum.* Syn.: *B. thurifera* [Roxburgh], *Olibanus thurifera* [Colebrook]. A tree growing in the mountains of central India and on the Coromandel coast, furnishing East Indian olibanum (the frankincense of the ancients). [A, 327; B, 173, 180.]—**B. thurifera** [Roxburgh]. See *B. serrata.*

BOT, n. Bo^{2}t. Ger., *Engerling, Pferdewurm.* The larva of the *Œstrus equi.* [A, 315; L, 108.]

BOTACADAMIE (Teloogoo), n. The *Nauclea parviflora.* [B, 172.]

BOTALLIEN (Fr.), adj. Bo-ta^{3}l-li^{2}-a^{3}n^{2}. The equivalent of *de Botal.* [L, 41.] See Foramen *of Botalli.*

BOTAMUM, n. An alchemical name for washed lead. [Ruland (A, 325).]

BOTANE, BOTANIA (Lat.), n's f. Bo^{2}t'a^{2}n(a^{3}n)-e(a), bo^{2}t-a^{2}n(a^{3}n)'i^{2}-a^{3}. Gr., *βοτάνη, βοτανία.* An herb. [L, 94.]

BOTANIC, adj. Bo^{2}t-a^{2}n'i^{2}k. See Botanical. Certain medical practitioners professing to use only vegetable drugs call themselves b. physicians.

BOTANICA (Lat.), n. f. Bo^{2}t-a^{2}n(a^{3}n)'i^{2}k-a^{3}. See Botany.

BOTANICAL, adj. Bo^{2}t-a^{2}n'i^{2}k-a^{2}l. Gr., *βοτανικός.* Lat., *botanicus.* Fr., *botanique.* Ger., *botanisch.* It., *botanico.* Sp., *botánico.* Pertaining to botany or to the vegetable kingdom.

BOTANICE (Lat.), n. f. Bo^{2}t-a^{2}n(a^{3}n)'i^{2}-se(ka). See Botany.

BOTANICON (Lat.), n. n. Bo^{2}t-a^{2}n(a^{3}n)'i^{2}k-o^{2}n. Gr., *βοτανικόν.* 1. A catalogue of the plants of a given region. [L, 109.] 2. The name of a certain plaster described by Paulus Ægineta. [A, 325.]

BOTANICS, n. sing. Bo^{2}t-a^{2}n'i^{2}kz. See Botany.

BOTANIK (Ger.), n. Bo^{2}t-a^{3}n-ek'. See Botany.

BOTANIKER (Ger.), n. Bo^{2}t-a^{3}n'i^{2}k-e^{2}r. See Botanist.

BOTANIQUE (Fr.), adj. and n. Bo^{2}t-a^{3}n-ek. See Botanical and Botany.

BOTANISCH (Ger.), adj. Bo^{2}t-a^{3}n'i^{2}sh. See Botanical.

BOTANIST, n. Bo^{2}t'a^{2}n-i^{2}st. Lat., *botanicus.* Fr., *botaniste.* Ger., *Botaniker.* It., *botanico.* Sp., *botanista.* One who studies botany. [A, 322, 385.]

BOTANOGRAPHY, n. Bo^{2}t-a^{2}n-o^{2}g'ra^{2}f-i^{2}. From *βοτάνη,* an herb, and *γράφειν,* to write. Fr., *botanographie.* See Botany.

BOTANOLOGER, n. Bo^{2}t-a^{2}n-o^{2}l'o-ju^{5}r. Fr., *botanologue.* See Botanist.

BOTANOLOGY, n. Bo^{2}t-a^{2}n-o^{2}l'o-ji^{2}. Lat., *botanologia* (from *βοτάνη,* an herb, and *λόγος,* understanding [1st def.], or *βοτανολογεῖν,* to gather herbs [2d def.]). Fr., *botanologie.* 1. Botany. 2. The pursuit of collecting plants. [A, 322.]

BOTANOMANCY, n. Bo^{2}t'a^{2}n-o-ma^{2}n-si^{2}. Lat., *botanomantia* (from *βοτάνη,* an herb, and *μαντεία,* divination). Fr., *botanomancie.* Ger., *Wahrsagung aus Krautblättern.* Divination from an inspection of the leaves of plants, especially sage. [A, 322, 385.]

BOTANOPHAGA (Lat.), n. n. pl. Bo^{2}t-a^{2}n(a^{3}n)-o^{2}f'a^{3}-ga^{3}. From *βοτάνη,* an herb, and *φαγεῖν,* to eat. Fr., *botanophages.* Ger., *pflanzenfressende Beutelthiere.* Of Haeckel, a legion of the *Marsupiala,* including the herbivorous varieties; divided into the *Barypoda, Macropoda, Rhizophaga,* and *Carpophaga.* [L, 173.]

BOTANOPHAGOUS, adj. Bo^{2}t-a^{2}n-o^{2}f′a^{2}g-u^{3}s. Gr., *βοτανοφάγος*. Lat., *botanophagus*. Fr., *botanophage*. Ger., *pflanzenfressend*. Subsisting exclusively on vegetable food. [L, 41.]

BOTANY, n. Bo^{2}t′a^{2}n-i^2. Lat., *botanica, botanice*. Fr., *botanique*. Ger., *Botanik, Pflanzenkunde, Kräuterkunde*. It., *botanica*. Sp., *botánica*. The science of the structure, physiology, distribution, and classification of plants.—**Agricultural b.** Fr., *botanique agricole*. The study of wild and cultivated plants with reference to their agricultural value or their destructiveness to useful plants. [A, 385.]—**Applied b.** Fr., *botanique appliquée*. B. in its applications to cultivation, medicine, the arts, etc. [B, 38.]—**Classical b.** Fr., *botanique classique*. The study of the plants mentioned by ancient authors. [A, 348.]—**Comparative b.** Fr., *botanique comparée*. The study of the relations of the individual organs in various sorts of plants. [A, 348.]—**Descriptive b.** Fr., *botanique descriptive*. Ger., *deskriptive* (oder *beschreibende*) *Botanik*. The simple description of plants. [A, 348.]—**Fossil b.** Fr., *botanique fossile* (ou *oryctologique*). The b. of fossil plants, whether extinct or identical with those still extant. [A, 348.]—**General b.** Fr., *botanique générale*. B. in its relations to all plants, without regard to special forms. [A, 385.]—**Geographical b.** Fr., *botanique géographique, géographie botanique*. The study of the geographical distribution of different plants. [A, 348.]—**Historical b.** Fr., *botanique historique*. The history of the origin and progress of b. [A, 348.]—**Industrial b.** Fr., *botanique industrielle*. The study of plants employed in the industrial arts. [A, 348.]—**Medical b.** Fr., *botanique médicale*. Ger., *medicinische Botanik, Arzneipflanzenkunde*. The study of medicinal plants and those that furnish articles of food. [A, 348, 385.]—**Morphological b., Organic b.** Fr., *botanique morphologique* (ou *organique*). Ger., *morphologische* (oder *organische*) *Botanik*. The study of the structure and functions of the various organs of plants. [A, 348.]—**Palæontological b.** Fr., *paléontologie végétale*. See *Fossil b.*—**Physiological b.** Fr., *botanique physiologique*. Ger., *physiologische Botanik*. The physiology of plants.—**Special b.** Fr., *botanique spéciale*. The study of one or more of the particular divisions (classes, orders, etc.) of the vegetable kingdom. [A, 385.]—**Structural b.** The study of the anatomy and histology of plants.—**Systematic b.** Fr., *botanique systématique*. The study of the distinctive characteristics of various plants and of their classification. [A, 354.]

BOTARGUM, n. The salted roe of a fish. [L, 119.]

BOTAURINÆ (Lat.), n. f. pl. Bo^{2}t-a^{4}r(a^3-u^{2}r)-i(e)′ne(na^3-e^2). The bitterns; a subfamily of the *Ardeidæ*. [L, 221.]

BOTCH, n. Bo^{2}ch. See BLOTCH.

BOTELLIFÈRE (Fr.), adj. Bo-te^{2}l-li^2-fe^{2}r. From *botellus*, a sausage, and *ferre*, to bear. Having sausage-shaped appendages. [L, 41, 109.]

BOTELLUS (Lat.), n. m. Bo(bo^2)-te^{2}l′lu^{3}s(lu^{4}s). Lit., a sausage; a bowel. [B.]

BOTETOURT SPRINGS, n. Bo^{2}t′e^2-tort. A place in Roanoke County, Virginia, where there are two springs, one sulphurous and the other chalybeate. [A, 363.]

BOTHOR (Lat.), n. m. Bo′tho^{2}r. Ar., *bodsar*. An old term applied in a broad sense to any tumor, more specifically to an ulcerated tumor, and in the narrowest sense to a papule; also by some writers to ozæna, to psoriasis, and to strophulus in infants. [A, 322, Falloppius (A, 325); G.]—**B. lacteus.** Incrusted eczema of the face in children. [G.]

BOTHRENCHYMA (Lat.), n. n. Bo^{2}th-e^{2}n^2′ki^2(ch^{2}u^6)-ma^3. Gen., *bothrenchym′atos* (*-tis*). From *βόθρος*, a pit, and *ἔγχυμα* (from *ἐγχεῖν*, to pour in), an infusion. See *Pitted* TISSUE.

BOTHRIADÆ (Lat.), n. f. pl. Bo^{2}th-ri(ri^2)′a^3-de(da^3-e^2). A section of the *Cestoda*, including the *Tetraphyllidæ, Diphyllidæ, Tetrarrhynchidæ, Bothriocephalidæ, Ligulidæ, Caryophyllæidæ, Amphilinidæ*, and *Archigetidæ*. [B, 27.]

BOTHRIDIUM [De Blainville] (Lat.), n. n. Bo^{2}th-ri^{2}d′i^2-u^{3}m-(u^{4}m). From *βόθρος*, a pit. Fr., *bothridie*. 1. A *Bothriocephalus* in the resting stage. 2. A fossa of a *Bothriocephalus*. 3. A genus of the *Cestoda* parasitic in the *Python*. [A, 385.]

BOTHRIOCÉPHALE (Fr.), n. Bo^{2}t-ri^2-o-sa-fa^{3}l. A *Bothriocephalus*; in the pl., the *Bothriocephalidæ*. [L, 18.]—**B. de l'homme, B. large.** See BOTHRIOCEPHALUS *latus*.

BOTHRIOCEPHALIDÆ (Lat.), n. f. pl. Bo^{2}th-ri^2-o(o^2)-se^{2}f-(ke^{2}f)-a^{2}l(a^{3}l)′i^{2}d-e(a^3-e^2). From *βοθρίον* (dim. of *βόθρος*), a small pit, and *κεφαλή*, the head. Fr., *bothriocéphalées, bothriocéphalides*. Ger., *Grubenkopfwürmer*. A group of the *Cestoda* having an egg-shaped, flattened head; two longitudinal suctorial grooves; hooks, if present, without a rostellum; segmentation indistinct and sometimes wanting; joints, if present, broader than they are long, not detached singly, but in numbers. The larvæ are developed in intermediate hosts and never become encysted. [L, 182.]

BOTHRIOCEPHALUS (Lat.), n. m. Bo^{2}th-ri^2-o(o^2)-se^{2}f(ke^{2}f)′-a^{2}l(a^{3}l)-u^{3}s(u^{4}s). Fr., *bothriocéphale*. Ger., *Grubenkopfwurm*. It., *botriocefalo*. Sp., *botriocéfalo*. Syn.: *Phytelminthus* [Zeder], *Phytis* [Zeder], *Alyselminthus* [Zeder], *Halysis* [Zeder], *Bothryocephalus* [Cuvier], *Botryocephalus* [Lamarck], *Dibothrium* [Diesing], *Tetrabothrium*. A genus originally made to include all tapeworms having suctorial grooves on the head; of Rudolphi, a genus of the *Bothriocephalidæ* having a hookless head distinctly marked off from a long segmented body; the cirrus and vagina usually opening on the ventral surface of the joint, rarely at the margin; and the uterus lying in the middle of the segment, in the form of a coiled canal often rosette-shaped. In the larval state the body is more or less long and ribbon-shaped. [L, 182.]—**B. cordatus** [Leuckart]. A species found in Greenland; shorter and more compressed than *B. latus* and differing in the shape of the head, which is short, broad, and cordiform with lateral projecting borders. [L, 16, 182.]—**B. cristatus** [Davaine]. A doubtful variety occasionally met with in man; from 8 to 10 feet long, characterized by two prominences which form a crest covered by numerous minute papillæ. [L, 24.]—**B. latus** [Bremser]. Fr., *bothriocéphale large* (ou *de l'homme*), *tœnia à anneaux courts* [Bonnet] (ou *à mamelons ombilicaux* [Bonnet], ou *de la première espèce* [Andry], ou *sans épine* [Andry]). Ger., *breiter Grubenkopfwurm*. It., *botriocefalo largo* (o *dell'uomo*). Syn.: *Tœnia vulgaris* [Linnæus] (seu *lata*, seu *grisea* [Pallas], seu *membranacea* [Pallas], seu *tenella* [Pallas], seu *dentata* [Pabst], seu *humana inermis* [Brera], seu *prima* [Plater], seu *veterum* [Spigel]), *Halysis lata* (seu *membranacea*) [Zeder], *Botryocephalus hominis* [Lamarck], *Dibothrium*

The Head × 25.

Proglottides × 2½.

THE BOTHRIOCEPHALUS LATUS. (AFTER PEYER.)

latum [Diesing]. The Swiss tapeworm; a species sometimes attaining a length of 25 feet and a breadth of nearly an inch, and having as many as 4,000 joints. The head has no hooks, but two lateral grooves, by means of which the worm attaches itself to the intestine. It is bluish-white, and is most commonly found in Switzerland and neighboring countries, rarely out of Europe. Its larval form probably exists in fishes. [L, 182.]—**B. liguloides** [Leuckart]. Syn.: *Ligula Mansoni* [Cobbold]. A variety the larval form of which has been found in the subperitoneal connective tissue of man in China and Japan. It may attain a length of 8 inches; posteriorly it is narrowed, and anteriorly it is widened for a short distance into a sort of disc. The head is somewhat compressed and usually more or less invaginated, and lies on a papilliform elevation in the middle of the anterior end. Both surfaces of the body are alike. [L, 182.]—**B. tropicus.** Fr., *tœnia des tropiques*. A variety of cestode found by Schmidtmüller in negroes and whites who had been in Guinea. [L, 17.]

BOTHRIOID, adj. Bo^{2}th′ri^2-oid. From *βόθρος*, a pit, and *εἶδος*, resemblance. Fr., *bothrioïde*. Foveolated, beset with pit-like depressions. [A, 385.]

BOTHRION, BOTHRIUM (Lat.), n's n. Bo^{2}th′ri^2-on, -u^{3}m-(u^{4}m). Gr., *βοθρίον* (dim. of *βόθρος*, a pit). Lit., a little pit; an old term for a deep ulcer of the cornea, also for the alveolus of a tooth. [A, 322, 325.]

BOTHROCEPHALUS (Lat.), n. n. Bo^{2}th-ro(ro^2)-se^{2}f(ke^{2}f)′-a^{2}l(a^{3}l)-u^{3}s(u^{4}s). See BOTHRIOCEPHALUS. and for other words in *Bothro-* not here given, see the corresponding words in *Bothrio-*.

BOTHROS, BOTHRUS (Lat.), n's m. Bo^{2}th′ro^{2}s, -ru^{3}s(ru^{4}s). Gr., *βόθρος*. Fr., *fosse*. Ger., *Grube*. A pit, depression. [A, 322.]

BOTHRYOCEPHALUS (Lat.), n. m. Bo^{2}th-ri^2(ru^6)-o(o^2)-se^{2}f-(ke^{2}f)′a^{2}l(a^{3}l)-u^{3}s(u^{4}s). See BOTHRIOCEPHALUS.

BOTHRYUM (Lat.), n. n. Bo^{2}th′ri^2(ru^6)-u^{3}m(u^{4}m). See BOTRYON.

BOTHYA, n. Fr., *bothye*. The *Melastoma malabathrum*. [B, 121; L, 41.]

BOTIA (Lat.), n. f. Bo(bo^2)′shi^2(ti^2)-a^3. See BOCIA.

BOTIN, n. An alchemical name for turpentine and for a certain terebinthinate balsam. [Ruland (A, 325).]

BOTIUM (Lat.), n. n. Bo(bo^2)′shi^2(ti^2)-u^{3}m(u^{4}m). See BOCIUM.

BOTONARIA (Lat.), n. f. Bo^{2}t-o^{2}n-a(a^3)′ri^2-a^3. The *Globularia vulgaris*. [B, 121; L, 105.]

BOTOR (Lat.), n. m. Bo(bo^2)′to^{2}r. See BOTHOR.

BOTOTHINUS (Lat.), adj. Bo(bo^2)-to(to^2)-thi(the)′nu^{3}s(nu^{4}s). A fanciful word by which Paracelsus expressed the typical development of a disease, as in the expression *locusta gummata botothina* (meaning gout). [A, 325.]

BOTOU (Fr.), n. Bo-tu. See BOTUA.

BO-TREE, n. Bo′tre. The *Ficus religiosa*. [L, 56.]

BOTRIA (Lat.), n. f. Bo^{2}t′ri^2-a^3. See BOTRYA.—**B. africana.** See AMPELOPSIS *botrya*.

BOTRIDA (Lat.), n. n. pl. Bo^{2}t′ri^{2}d-a^3. A family of the *Monopylæa*, having a shell composed of several chambers irregularly agglomerate and with a single central capsule. [L, 121.]

BOTRIOCEPHALUS (Lat.), n. m. Bo^{2}t-ri^2-o(o^2)-se^{2}f(ke^{2}f)′-a^{2}l(a^{3}l)-u^{3}s(u^{4}s). See BOTHRIOCEPHALUS.

BOTRION (Lat.), n. n. Bo^{2}t′ri^2-o^{2}n. See BOTHRION.

BOTRYA (Lat.), n. f. Bo^{2}t′ri^2(ru^6)-a^3. Fr., *botrie*. A genus of oriental climbing shrubs. [L, 109.]—**B. africana** [Loureiro]. Fr., *botrie d'Afrique*. See AMPELOPSIS *b*.

BOTRYCÉPHALE (Fr.), n. Bo^{2}t-ri^2-sa-fa^{3}l. See BOTHRIOCEPHALUS.

BOTRYCHIACEÆ [Presl], **BOTRYCHIÆ** [Gray] (Lat.), n's f. pl. Bo^{2}t-ri^{2}k(ru^{6}ch^2)-i^2-a(a^3)'se^2(ke^2)-e(a^3-e^2), -ri^{2}k(ru^{6}ch^2)'i^2-e-(a^3-e^2). A division or suborder of ferns (*Ophioglossaceæ*) of which *Botrychium* is the only genus. [B, 170.]

BOTRYCHIUM (Lat.), n. n. Bo^{2}t-ri^{2}k(ru^{6}ch^2)'i^2-u^{3}m(u^{4}m). Fr., *botryche, botrychion.* Ger., *Mondraute.* A genus of ophioglossaceous ferns found in all parts of the world except Africa. [B, 19.]—**B. anthemoides** [Presl], **B. brachystachys** [Kunze], **B. cicutarium** [Swartz], **B. lanuginosum.** See *B. virginianum.*—**B. lunaria** [Swartz]. Fr., *lunaire, langue de cerf.* Ger., *gemeine Mondraute, Wallpurgiskraut.* Syn.: *Osmunda lunaria* [Linnæus]. Moonwort. The root, which is astringent, and an extract of the young shoots have been vaunted in the treatment of rickets. The whole plant was formerly used as a vulnerary. [B, 19, 173, 180.]—**B. virginianum** [Swartz]. A species growing in the northern United States, northern Europe, and the Himalayas. [B, 249.]

BOTRY-CYME, n. Bo^{2}t'ri^2-sim. The floral product of a botryo-cymose inflorescence. [B, 75.] See BOTRYO-CYMOSE.

BOTRYDEÆ (Lat.), n. f. pl. Bo^{2}t-ri^{2}d(ru^{6}d)'e^2-e(a^3-e^2). Of Mathieu, a tribe of *Fungi* (*Mucedines*) comprising *Ascomyces, Penicillium, Botrytis,* etc. [B, 170.]

BOTRYDES (Lat.), n. f. pl. Bo^{2}t-ri(ru^6)'dez(de^{2}s). Of Ehrenberg, a cohort (of Fries, a subsection) of *Fungi* (*Mucedines*) comprising *Aspergillus, Penicillium, Botrytis,* etc. [B, 170.]

BOTRYE (Fr.), n. Bo-tre. A branch bearing a flower at every axil. [A, 385.]

BOTRYITES (Lat.), adj. Bo^{2}t-ri^2(ru^6)-i(e)'tez(tas). Gr., βοτρυίτης (from βότρυς, a bunch of grapes). See BOTRYOID.

BOTRYITIS (Lat.), n., f. of adj. *botryites.* Bo^{2}t-ri^2(ru^6)-i(e)'ti^{2}s. Gen., *botryit'idis.* Gr., βοτρυῖτις. Calamine. [Galen (A, 311).]

BOTRYLLARIA (Lat.), n. n. pl. Bo^{2}t-ri^{2}l(ru^{6}l)-la(la^3)'ri^2-a^3. Fr., *botryllaries, botryllides, botrylliens.* Of Lamarck, an order of the *Tunicata.* [L, 180.]

BOTRYLLIDÆ (Lat.), n. f. pl. Bo^{2}t-ri^{2}l(ru^{6}l)'li^{2}d-e(a^3-e^2). Fr., *botryllaires.* The compound ascidians, a family of the *Tunicata.* [Woodward (L, 147).]

BOTRYOCARPEÆ (Lat.), n. f. pl. Bo^{2}t-ri^2(ru^6)-o(o^2)-ka^{3}rp'e^2-e(a^3-e^2). From *Botryocarpa,* one of the genera. Of Kützing, a family of *Algæ* (*Platynoblasteæ*). [B, 170.]

BOTRYOCEPHALUS (Lat.), n. m. Bo^{2}t-ri^2(ru^6)-o(o^2)-se^{2}f-(ke^{2}f)'a^{2}l(a^{3}l)-u^{3}s(u^{4}s). See BOTHRIOCEPHALUS.

BOTRYO-CYMOSE, adj. Bo^{2}t''ri^2-o-si'mos. In botany, primarily cymose and secondarily botryose (said of the inflorescence). [B, 75.]

BOTRYOID, BOTRYOIDAL, adj's. Bo^{2}t'ri^2-oid, bo^{2}t-ri^2-oid'a^{2}l. Gr., βοτρυοειδής (from βότρυς, a bunch of grapes, and εἶδος, resemblance). Lat., *botryodes, botryoides.* Fr., *botryoïde.* Ger., *traubenförmig.* Resembling a bunch of grapes, racemose. [A, 322, 385.]

BOTRYOMYCES (Lat.), n. m. Bo^{2}t-ri^2(ru^6)-o^{2}m'i^2(u^6)-sez(kas). Gen., *botryomyce'tos* (*-tis*). From βότρυς, a bunch of grapes, and μύκης, a fungus. The pathogenetic micro-organism of botryomycosis (*q. v.*). [Bollinger, "Dtsch. Ztschr. f. Thiermed. u. vergl. Path.," xiii, 1887, 2, 3; "Ctrlbl. f. Bakteriol. u. Parasitenk.," ii, 1887, 25, p. 762.]

BOTRYOMYCOSIS (Lat.), n. f. Bo^{2}t-ri^2(ru^6)-o(o^2)-mi(mu^6)-ko'si^{2}s. Gen., *botryomyco'seos* (*-sis*). Ger., *Botryomykose.* A disease observed in horses, in the form of multiple fibromatous nodules in the lungs. [Bollinger, "Dtsch. Ztschr. f. Thiermed. u. vergl. Path.," xiii, 1887, 2, 3; "Ctrlbl. f. Bakteriol. u. Parasitenk.," ii, 1887, 25, p. 762.]

BOTRYON (Lat.), n. n. Bo^{2}t'ri^2(ru^6)-o^{2}n. Ger., *Traubenauge.* An old name for staphyloma. [A, 322.]

BOTRYOPHYMA (Lat.), n. n. Bo^{2}t-ri^2(ru^6)-o(o^2)-fi(fu^6)'ma^3. Gen., *botryophym'atos* (*-tis*). From βότρυς, a bunch of grapes, and φῦμα, a tumor. A fungus-like vascular growth from the skin resembling a bunch of grapes; described as sometimes smooth, sometimes abraded. [G, 33.]—**B. cæruleum.** A form in which the growth is blue. [G, 33.]—**B. rubrum.** A form in which the growth is red. [G, 33.]

BOTRYOPSIS (Lat.), n. f. Bo^{2}t-ri^2(ru^6)-o^{2}p'si^{2}s. Gen., *botryop'sidis.* A genus of menispermaceous plants of Brazil. [B, 19.]—**B. platyphylla.** See PAREIRA.

BOTRYOSE, adj. Bo^{2}t'ri^2-os. In botany, having the flowers situated laterally on the main axis or the secondary axes. As the axis continues to grow, the cluster may be extended indefinitely (indeterminate). [B, 75.]

BOTRYOSPORÆ (Lat.), n. f. pl. Bo^{2}t-ri^2(ru^6)-o^{2}s'po^{2}r-e(a^3-e^2). Of Schulz, a family of ferns (*Synorgani sporiferi*) comprising the sections *Schizæacea, Osmundacea, Glaicheniacea,* and *Marattiacea.* [B, 170.]

BOTRYS (Lat.), n. m. (although treated by botanists as fem.). Bo^{2}t'ri^{2}s(ru^{6}s). Gen., *bot'ryos.* 1. A raceme. 2. The *Chenopodium b.* and the *Teucrium b.* [B, 19, 173.]—**B. mexicana.** The *Chenopodium ambrosioides.* [L, 105.]—**B. vulgaris.** The *Chenopodium b.* [B, 180.]—**Herba botryos.** The herb of *Chenopodium b.* [B, 180.]—**Herba botryos chamædryoides.** The herb of *Teucrium aureum.* [B, 180.]—**Herba botryos mexicanæ.** The herb of *Chenopodium ambrosioides.* [B, 180.]—**Herba botryos vulgaris.** See *Herba botryos.*

BOTRYTACEÆ (Lat.), n. f. pl. Bo^{2}t-ri^2(ru^6)-ta(ta^3)'se^2(ke^2)-e(a^3-e^2). Of Lindley, an order of plants of the fungal alliance; the *Hyphomycetes.* [B, 170.]

BOTRYTES (Lat.), adj. Bo^{2}t-ri(ru^6)'tez(tas). See BOTRYITES and BOTRYOID; as a botanical species-name, see BRASSICA *botrytis.*

BOTRYTIC, adj. Bo^{2}t-ri^{2}t'i^{2}k. Gr., βοτρυίτης. Lat., *botryites.* Fr., *botrytique.* Ger., *traubenförmig* (1st def.), *blumenkohlförmig* (2d def.). 1. See BOTRYOID. 2. See BOTRYOSE.

BOTRYTIDEÆ (Lat.), n. f. pl. Bo^{2}t-ri^2(ru^6)-ti^{2}d'e^2-e(a^3-e^2). Of Brongniart, a division of *Fungi* (*Mucedineæ*) including *Penicillium, Botrytis,* etc. [B, 170.] Cf. BOTRYDEÆ.

BOTRYTIDEI (Lat.), n. m. pl. Bo^{2}t-ri^2(ru^6)-ti^{2}d'e^2-i(e). Of Fries and others, a tribe of *Fungi* (*Mucedines*) including *Penicillium, Aspergillus, Botrytis,* etc. [B, 170.] Cf. BOTRYDEÆ and BOTRYTIDEÆ.

BOTRYTIS (Lat.), n., f. of adj. *botrytes* (= *botryites*). Bo^{2}t-ri(ru^6)'ti^{2}s. Gen., *botryt'idis.* Fr., *botrytide.* Ger., *Traubenschimmel.* A genus of *Mucorini,* parasitic on decaying vegetables and on insects. [B, 19, 206.]—**B. bassiana, B. Bassii.** Ger., *Muscardinepilz.* The fungus that produces the disease of silk-worms termed muscardine. [B, 19, 61, 238.]—**B. infestans.** A species parasitic on the potato-plant, causing the disease termed murrain. [B, 19.]—**B. Jonesii.** A term formerly applied to various conidioid forms of *Mucor mucedo.* [A, 443.]

BOTRYTOSTEOPHYTE, n. Bo^{2}t-ri^{2}t-o^{2}s'te^2-o-fit. From βοτρυίτης, botryoid, ὀστέον, a bone, and φυτόν, a growth. Lat., *botrytosteophyton.* Fr., *botrytostéophyte, ostéophyte botrytique* (ou *en choufleur*). Ger., *Botrytosteophyt, blumenkohlförmige Knochengewächs.* An osteophyte of a cauliflower-like appearance. [A, 322, 385.]

BOTRYUM (Lat.), n. n. Bo^{2}t'ri^2(ru^6)-u^{3}m(u^{4}m). See BOTRYON.

BOTS, n. Bo^{2}tz. 1. A diseased condition in horses and oxen, thought to be due to the larvæ of the *Œstrus equi.* Various morbid conditions, such as colic, convulsions, and staggers, have been ascribed to their presence, but as a rule they are innocuous. 2. In the sheep, troubles caused by the larvæ of the *Œstrus ovis* in the nasal passages. [L, 297.]

BOTSK, n. The *Archangelica officinalis.* [L, 105.]

BOTTACIO (It.), n. Bot-ta^3'chi^2-o. A place in Tuscany where there is a spring containing various chlorides. [A, 385; L, 49.]

BOTTINE (Fr.), n. Bot-ten. 1. An artificial foot, partial or entire. 2. A piece of leather fashioned something like a boot, to be applied to a horse's foot for the purpose of retaining dressings, etc. [A, 385.]

BOTTLE, n. Bo^{2}tl. Lat., *buticula.* Fr., *bouteille.* Ger., *Flasche.* It., *bottiglia.* Sp., *botella.* A vessel, usually of glass and having a more or less narrow neck, for holding liquids.—**B.-brush.** The *Equisetum arvense.* [L, 73.]—**B.-fed.** Fed by means of a nursing-b.—**B.-flower.** The *Centaurea cyanus.* [B, 19.]—**B.-gourd.** The *Cucurbita lagenaria.* [B, 19.]—**B.-grass.** The *Setaria viridis.* [L, 56.]—**B.-tree.** The *Sterculia rupestris.* [A, 327.]—**Drop b.** A b. having the stopper fitted with some device (*e. g.,* two tubes bent externally in opposite directions) to enable the contents to be poured out in drops.—**Nursing-b.** Fr., *biberon.* A b. from which milk or some mixture containing milk is to be sucked by an infant; preferably a b. with a rubber nipple slipped over its mouth.—**Specific-gravity b.** A b. used for ascertaining the specific gravity of bodies. It may be a narrow-necked b. marked at a point indicating the height reached by 1,000 grains of water poured into it, in which case the substance to be examined is introduced into it up to the same level, and the whole then weighed, when, the weight of the empty b. being known, a comparison of the weight of the substance with 1,000 grains shows the specific gravity; or a wide-mouthed b. with a perforated stopper, to be filled with water, after which the stopper is to be inserted, causing a certain amount of liquid to overflow at the top, so that what remains exactly fills the b. and the perforation in the stopper, constituting a definite quantity for comparison with an equal bulk of water. [A, 257, 327.]—**Wash-b.** A b. partly filled with water and having two tubes enter it through the stopper, one dipping below the surface of the water and the other terminating above it; used for washing gases, which are forced in through the tube which has its end submerged, rise through the water, and escape by the other tube; also, with the tubes suitably bent, used for washing precipitates, etc., by directing a stream of water on to them by blowing through the tube which terminates just below the stopper. [L.]

BOTUA (Lat.), n. f. Bo^{2}t'u^2(u^4)-a^3. Fr., *botou.* The *Cissampelos pareira.* [B, 180.]

BOTULIFORM, adj. Bo^{2}t-u^{2}l'i^2-fo^{2}rm. From *botulus,* a sausage, and *forma,* form. Sausage-shaped. [L, 56.]

BOTULINIC ACID, n. Bo^{2}t-u^{2}l-i^{2}n'i^{2}k. Lat., *acidum botulinicum.* Ger., *Wurstfettsäure.* A name applied by Buchner to a mixture of various substances found in poisonous sausages. [T. Husemann (A, 319).] Cf. ALLANTOTOXICON and ALLANTURIC ACID.

BOTULIQUE (Fr.), n. Bot-u^{6}l-ek. Pertaining to sausages. [A, 385.]

BOTULISMUS (Lat.), n. m. Bo^{2}t-u^{2}l(u^{4}l)-i^{2}z(i^{2}s)'mu^{3}s(mu^{4}s). See ALLANTIASIS.

BOTUS (Lat.), n. m. Bot(bo^{2}t)'u^{3}s(u^{4}s). See BOCIA.

BOTYDÆ (Lat.), n. f. pl. Bo^{2}t'i^{2}d(u^{6}d)-e(a^3-e^2). Fr., *botydes.* A tribe of the *Pulverulentæ.* [L, 248.]

BOU (Fr.), n. Bu. The *Ficus carica.* [B, 173.]

BOUBA, n. Frambœsia. [A, 385; L, 49.]

BOUCAGE (Fr.), n. Bu-ka^{3}zh. See ÆGOPODIUM *podagraria.*—**B. anis.** See PIMPINELLA *anisum.*—**B. élevé, B. majeur.** See *Grand b.*—**B. mineur, B. saxifrage.** The *Pimpinella saxifraga.* [A, 385; B, 173.]—**Grand b.** The *Pimpinella magna.* [B, 173.]—**Petit b.** See *B. mineur.*

BOUCANAGE (Fr.), n. Bu-ka^{3}n-a^{3}zh. The process of drying meat, fish, etc., by smoking. [A, 301; L, 87.]

BOUCENNA, n. The *Albizzia anthelminthica.* [L, 49.]

BOUCERAS (Lat.), n. n. Bu'(bo^2'u)-se^{2}r(ke^{2}r)-a^{2}s(a^{3}s). See BUCERAS.

BOUCHE (Fr.), n. Bush. The mouth, also any orifice resembling a mouth. [A, 385.]—**Arrière-b.** See ARRIÈRE-GORGE.—**B.-de-lièvre.** The *Merulius cantharellus.* [B, 173.]—**B's-en-flute** [Cuvier]. See AULOSTOMIDES.—**B. primitive.** See BLASTOPORE.

BOUCHEA (Lat.), n. f. Bu-sha'a^3. A genus of tropical verbenaceous herbs and undershrubs. [B, 19.]—**B. pseudo-gervao** [St.-Hil.]. The *Stachytarpheta jamaicensis.* [B, 180.]

BOUCHON (Fr.), n. Bu-sho^{2}n^2. A plug.—**B. de Ecker.** A plug-like mass of endodermic cells which, according to Van Beneden's theory of the formation of the blastoderm, fills up an opening that exists in the surrounding epiblast. [A, 15.]—**B. gélatineux.** The thick, tenacious mucous plug that occupies the canal of the cervix uteri during pregnancy. [A, 385.]

BOUCLE (Fr.), n. Bukl. 1. See CLAVUS. 2. An aphthous stomatitis of the hog and ox, occasionally becoming gangrenous. [A, 301.]

BOUCLÉ (Fr.), adj. Bu-kla. See CLAVATE.

BOUCLEMENT (Fr.), n. Bukl-ma^{3}n^2. See INFIBULATION.

BOUCLIER (Fr.), n. Bu-kli^2-a. 1. The *Agaricus brevipes* and the *Agaricus clypeolarius.* [B, 105.] 2. The apothecium of a lichen. [A, 385.] 3 See STERNUM.

BOUCLUS (Fr.), n. Bu-klu^6. The *Agaricus brevipes.* [L. 41.]

BOUCNEMIA (Lat.), n. f. Buk'(bo^2'uk)-ne(na)'mi^2-a^3. See BUCNEMIA.

BOUCQUETINE (Fr.), n. Buk-ten. See BOUCAGE.

BOUCRANION (Lat.), n. n. Buk(bo^2-uk)-ra(ra^3)'ni^2-o^{2}n. See BUCRANIUM.

BOUDES (Fr.), n. Bud. A place in the department of Puy-de-Dôme, France, where there is a chalybeate spring containing sodium bicarbonate. [A, 385; L, 49.]

BOUDIN (Fr.), n. Bu-da^{2}n^2. A sausage.—**B. cæcal déjeté en dedans.** F. Glénard's term for a lump in the right flank, consisting of the cæcum. ["Lyon méd.," Apr. 5, 1885, p. 492.]—**B. noir.** An East Indian mushroom said to be edible. [L, 109.]—**B. spermatique.** Syn.: *sac spermatique.* Coste's term for the peculiar form in which the spermatozooids are massed when they leave the epididymis. [A, 4.]

BOUDZAREAH, n. A place in Algeria where there is a chalybeate spring containing bicarbonates. [A, 385 ; L, 49.]

BOUE (Fr.), n. Bu. Mud.—**B. minérale.** Syn.: *limon minéral.* The mud deposited from the water of a mineral spring. [L, 87, 88.]—**B. purulente.** Thick, muddy pus ; also the thick brownish contents of certain ovarian cysts, etc. [L, 55.]—**B. splénique.** A red pulpy material resulting from an old extravasation of blood into the substance of the spleen. [L, 55.]—**B. végétale.** Vegetable matter in which a mineral water is retained. [L, 87, 88.]

BOUEN-RIBLÉ (Fr.), n. Bu-a^{3}n^2-re-bla. The *Marrubium vulgare.* [L, 105.]

BOUEUX (Fr.), adj. Bu-u^5. Muddy, also living in mud. [L, 55, 180.]

BOUFA (Fr.), n. Bu-fa^3. The *Centaurea cyanus.* [B, 173.]

BOUFFÉE (Fr.), n. Buf-fa. That period in the prevalence of an epizootic in which the greatest number of animals are attacked. [A, 385.]—**B. de chaleur.** "Flashes of heat" ; transitory flushing of the face, with a burning sensation. [A, 385 ; L, 49.]

BOUFFI (Fr.), adj. Buf-fe. Turgid. [L, 180.]

BOUFFISSURE (Fr.), n. Buf-fi^{2}s-su^{6}r. A non-inflammatory swelling, generally due to subcutaneous œdema. [A, 385 ; L, 49.]

BOUGAINVILLÆEÆ (Lat.), n. f. pl. Bu-ga^{2}n^2-vi^{2}l-le'(la^3'e^2)-e^2-e(a^3-e^2). A subtribe of the *Nyctagineæ*, tribe *Mirabilieæ.* [Bentham and Hooker (B, 42).]

BOUGAINVILLEÆ (Lat.), n. f. pl. Bu-ga^{2}n^2-vi^{2}l'le^2-e(a^3-e^2). Of Choisy, a tribe of the *Nyctaginaceæ.* [B, 170, 214.]

BOUGANNE, n. The fruit of a tree of Senegal ; used, boiled, as a remedy for colic. [L, 105.]

BOUGIE, n. Bu-zhe'. Lat., *candelula.* Fr., *bougie.* Ger., *Wachsstock.* It., *candeletta.* Sp., *candelilla.* Lit., a candle ; a cylindrical instrument, generally flexible, designed for insertion into the urethra or some other canal of the body ; in pharmacy, a solid preparation in the form of a cylinder for introduction into the urethra and other like canals. [B ; E.]—**Acorn-tipped b.** A b. with an acorn-shaped expansion at the tip.—**Armed b.** [E. Home]. Fr., *b. armée.* It., *candeletta armata.* An ordinary b. having some caustic substance fixed to its tip or in an excavation at any point in its length. [L.]—**B. à béquille** (Fr.). See *Elbowed b.*—**B. à boule** (Fr.). See *Bulbous b.*—**B. à empreinte** (Fr.). A b. having some soft, wax-like substance fixed at its point, designed to take an impression of the face of a stricture. [L, 88.]—**B. à nœuds** (Fr.). A b. having several bulbous expansions at various points, increasing in size as they recede from the point ; used for the rapid dilatation of strictures, also for detecting their calibre. [L, 88.]—**B. armée** (Fr.). See *Armed b.*—**B. à trois nœuds** (Fr.). A *b. à nœuds* (*q. v.*) having three bulbous expansions. [E.]—**B's au tannin** (Fr.). See *Cereoli cum* ACIDO TANNICO.—**B. à ventre** (Fr.). See *Fusiform b.*—**B. caustique** (Fr.), **B. cautérisante** (Fr.). See *Armed b.*—**B. conique** (Fr.). See *Conical b.*—**B. corrosive** (Fr.). See *Armed b.*—**B. coudée** (Fr.). See *Elbowed b.*—**B. cylindrique** (Fr.). See *Cylindrical b.*—**B. de baleine** (Fr.). A whalebone b. [L, 87.]—**B. de cire** (Fr.). See *Wax b.*—**B. de corde à boyaux** (Fr.). A catgut b. [L.]—**B. de Daran** (Fr.). A variety of medicated b. made of the leaf of a plant with oil and lard. [L, 87.]—**B. de gomme élastique** (Fr.). See *Gum-elastic b.*—**B. de l'oreille** (Fr.). See *Ear b.*—**B. dilatable** (Fr.). A b. which expands on absorbing water ; used for dilating strictures, etc. [L, 88.] See TENT.—**B. dilatante** (Fr.). A dilating b. [Voillemier (L, 87).]—**B. d'ivoire ramolli.** A b. made of ivory decalcified with hydrochloric acid. [L, 88.]—**B. élastique** (Fr.). See *Gum-elastic b.*—**B. emplastique** (Fr.). 1. A b. similar to the gum-elastic b., but made with a mixture of wax, diachylon, and olive oil. [A, 385.] 2. See *B. à empreinte.*—**B. en baleine** (Fr.). See *B. de baleine.*—**B. en ivoire** (Fr.). See *Soluble b.*—**B.-sonde** (Fr.). A gum-elastic catheter. [A, 385.]—**Bulbous b.** Fr., *b. à boule.* It., *candeletta bulbare.* Sp., *algalia de bola.* An exploring b. having the shaft slender and bearing at its extremity a globular or acorn-shaped expansion. [E.]—**Caustic b.** Fr., *b. caustique* (ou *cautérisante*, ou *armée*). See *Armed b.*—**Conical b.** Fr., *b. conique.* A b. that tapers uniformly from one end or from some point in the shaft to the other end. [A, 385.]—**Corrosive b.** Fr., *b. corrosive.* See *Armed b.*—**Cylindrical b.** Fr., *b. cylindrique.* A b. having the point rounded and the shaft of the same diameter throughout. [L, 88.]—**Ear b.** Fr., *b. de l'oreille.* Ger., *Ohrenbougie.* It., *candeletta dell' orecchio.* Sp., *candelilla de la oreja.* A long, slender piece of catgut, usually of violin string, designed for insertion into the Eustachian tube through a Eustachian catheter, for purposes of dilatation or (when impregnated with some medicinal substance) of medication. [F, 3.]—**Elastic b.** See *Gum-elastic b.*—**Elbowed b.** Fr., *b. coudée* (ou *à béquille*). A b. having a sharp bend near the point. [L, 88.]—**Electrolysis b.** A metallic b. having the shaft insulated ; used as an electrode in the electrolytic treatment of stricture.—**Eustachian b.** See *Ear b.*—**Filiform b.** A very slender whalebone or gum-elastic b. [E.]—**Flexible b.** See *Gum-elastic b.*—**Fusiform b.** Fr., *b. fusiforme* (ou *à ventre*). A b. having a bulbous expansion in some part of its shaft. [A, 385.]—**Gum-elastic b.** Fr., *b. de gomme élastique.* A b. made of some fine fabric rolled into a cylinder and coated with a mixture of boiled linseed oil, litharge, amber, India-rubber, etc., or simply with linseed oil. [A, 385 ; Voillemier (L, 87).]—**Medicated b.** Fr., *b. médicamenteuse.* Ger., *medicinirte B.* It., *candeletta medicata.* Sp., *candelilla medicada.* A soluble b. containing a medicinal substance, also a flexible b. carrying such a substance on its surface. [F, 3 ; L, 87.]—**Metallic b.** Fr., *b. métallique.* Ger., *metallische B.* A b. made of metal.—**Ohrenb'** (Ger.). See *Ear b.*—**Ointment b.** A b. having one or more depressions to be filled with ointment. [E.]—**Olive-pointed b.** Fr., *b. olivaire.* A b. (usually flexible and tapering near the point) terminating in a small bulb.—**Plaster b.** See *B. emplastique* (1st def.).—**Salve b.** See *Ointment b.*—**Soluble b.** Fr., *b. dissoluble.* A b. composed of substances which dissolve at the temperature of the body. [B.]—**Wales's rectal b.** A very flexible soft-rubber b. for use in the rectum. [E.]—**Wax b.** Fr., *b. de cire.* A b. made of fine linen or silk soaked in melted wax and rolled into a cylindrical shape between two polished surfaces. [A, 385.]

BOUGIERUNG (Ger.), n. Bu-ger'ung. The passage of a bougie, also treatment by the passage of bougies. [Eitelberg, "Ztschr. f. Ohrenh.," xiii, 2, 3 ; "Ctrlbl. f. Chir.," 1884, 33, p. 566.]

BOUGRAINE (Fr.), **BOUGRANE** (Fr.), n's. Bu-gre^{2}n, -gra^{3}n. The *Ononis spinosa.* [B, 173.]

BOUHOU, n. See BOO-BOO.

BOUI, n. An African name for the *Adansonia digitata.* [L, 105.]

BOUILLARD (Fr.), n. Bu-el-yar. The *Betula alba.* [B, 173.]

BOUILLI (Fr.), n. Bu-el-ye. Meat that has been used for making *bouillon* (*q. v.*). [A, 385.]

BOUILLIE (Fr.), n. Bu-el-ye. Pap, gruel. [A, 385.]

BOUILLON (Fr.), n. Bu-el-yo^{2}n^2. 1. A soup or broth, especially a clear soup made from lean beef. [K.] 2. A common name for various plants.—**B. aux herbes** [Fr. Cod.]. See *Tisane d'*OSEILLE *composée.*—**B. blanc** [Fr. Cod.]. The *Verbascum thapsus.* [B, 173.]—**B. de Liebig.** Beef-tea made from Liebig's extract of beef. [A, 385.]—**B. d'os.** A soup made from bones and a little meat. [A, 385.]—**B. femelle.** The *Verbascum lychnitis.* [B, 173.]—**B. mâle.** The *Verbascum thapsus.* [B, 173.]—**B. médicinal.** A soup containing some medicinal substance or prepared from a particular kind of meat selected with a view to its digestibility. [A, 385.]—**B. mitiers.** The *Verbascum blattaria.* [B, 173.]—**B. noir.** The *Arctium majus.* [B, 173.]—**B. pectoral.** A soup made from chicken and some pectoral plants. [A, 385.]—**B. sec, Tablettes de b.** Tablets made by evaporating clear beef soup on a water bath to the consistence of a soft extract, adding gelatin, and shaping the product in molds. [B, 92.]—**Tisane de b. blanc** [Fr. Cod.]. A strained and filtered infusion of 5 parts of the flowers of *Verbascum thapsus* in 1,000 of boiling distilled water. [A, 253.]

BOUILLONNEMENT (Fr.), n. Bu-el-yon-ma^{3}n^2. The agitation of a liquid produced by boiling. [A, 385.]

BOUILLOT (Fr.), n. Bu-el-yo. The *Maruta fœtida.* [B, 173.]

BOUIS (Fr.), n. Bu-e. The *Buxus sempervirens.* [B, 173.]

BOUITHEE (Ger.), n. Bo-u-e'ta. See *Bohea* TEA.

BOUKA, n. Of Rheede, the *Epidendron sterile.* [A, 385 ; L, 49.]

BOULE (Fr.), n. Bul. 1. A ball, a bulb. 2. A disease of sheep termed "rot." [L.]—**B. adipeuse de Bichat.** See *B. graisseuse de Bichat.*—**B's d'acier, B's de Mars, B's de Nancy.** See *Martial* BALLS.—**B's de mercure.** See *Mercurial* BALLS.—**B. de neige.** The *Viburnum roseum* and the *Agaricus campestris.* [B,

173.]—**B. d'or.** The *Trollius europœus.* [B, 173.]—**B. graisseuse de Bichat.** Ger., *Saugpolster.* A separate mass of fat, having a capsule of its own, situated between the anterior border of the masseter muscle and the outer surface of the buccinator muscle, having a pedicle dividing into two branches, one of which goes to the spheno-palatine fossa and the other to the temporal fossa, passing under the zygomatic arch; most marked in infants. [A, 385; H. Ranke, "Arch. f. path. Anat. u. Physiol. u. f. klin. Med.," xcvii, 3, 1884, p. 527.]—**B. hystérique.** See GLOBUS *hystericus.*

BOULÉ (Fr.), n. Bul-a. See AGARICUS *ovoideus.*

BOULEAU (Fr.), n. Bul-o. See BETULA.—**B. à canots.** See BETULA *nigra.*—**B. à papier, B. blanc, B. commun, B. hybride.** See BETULA *alba.*—**B. nain.** See BETULA *nana.*—**B. pendant.** See BETULA *alba.*—**B. rouge.** See BETULA *nigra* (3d def.).

BOULESIS (Lat.), n. f. Bu⁵(bo²)-u⁴l-e(a)'si²s. See BULESIS.

BOULET (Fr.), n. Bul-a. 1. In the solipeds, the pastern joint. [A, 385; L, 180.] 2. The *Agaricus campestris.* [B, 173.]—**B. de canon.** The fruit of the *Couroupita guianensis.* [B, 173.]—**Effort du b.** A sprain of the pastern joint. [A, 301.]

BOULETÉ (Fr.), adj. Bul-e²t-a. Of horses, sprained in the pastern joint. [A, 385.]

BOULETTE (Fr.), n. Bul-e²t. A pellet. [A, 385.]—**Grande b.** The *Echinops multiflorus.* [B, 173.]—**Petite b.** The *Echinops pauciflorus.* [B, 173.]

BOULETURE (Fr.), n. Bul-e²t-u⁶r. In horses, a sprain of the pastern joint. [A, 385; D, 76.]

BOULIGOULE (Fr.), n. Bul-i²-gul. See BALIGOULE.

BOULIMIE (Fr.), n. Bul-i²-me. See BULIMIA.

BOULIMIQUE (Fr.), adj. Bul-i²-mek. See BULIMIC.

BOULINGOULE (Fr.), n. Bul-a²n²-gul. See BALIGOULE.

BOULOGNE-SUR-MER (Fr.), n. Bul-on-su⁶r-me²r. A sea-bathing station in the department of Pas-de-Calais, France, where there is a weak ferruginous spring. [A, 321, 385.]

BOULOU (Fr.), n. Bu-lu. The *Bambusa arundinacea.* [L, 105.]

BOUMELIA (Lat.), n. f. Bu⁵(bo²)-u⁴-mel(me²l)'i²-a³. See BUMELIA.

BOU-NAFA, n. See BOU-NEFAÂ.

BOUNCING-BET, n. Bu⁵''u⁴ns-i²ng-be²t'. An American name for the *Saponaria officinalis.* [B, 19.]

BOUNDOU, n. An African ordeal poison, probably identical with akazga. [B, 5.]

BOU-NEFAÂ (Ar.), n. An Algerian name for the resin of the *Thapsia garganica.* [A, 259.]

BOUQUÉRON-LES-BAINS (Fr.), n. Bu-ka-ro²n²-la-ba²n². A place in the department of the Isère, France, where there is a water-cure establishment. [A, 385.]

BOUQUET (Fr.), n. Bu-ke². 1. In general, a collection of similar structures springing from a common point (said of flowers, blood-vessels, etc.). [Poirier, "Progr. méd."; "N. Y. Med. Jour.," Sept. 19, 1885, p. 335; L, 43, 49.] Cf. *B. de Riolan.* 2. The perfume of wine; also, according to Berthelot, a volatile neutral organic compound to which the odor of wine is due. [A, 385.] 3. Dengue (*q. v.*). [G.] 4. See BARBOUQUET. 5. The *Polyporus frondosus.* [B, 105.]—**B. anatomique de Riolan.** See *B. de Riolan.*—**B's artificiels des vins.** The so-called essences used for flavoring factitious wines, brandy, etc. [A, 385.]—**B. de chêne.** See *B.* (5th def.).—**B. de Riolan.** The collection of muscles and ligaments attached to the styloid process of the temporal bone. [A, 385; L, 43, 49.]—**B. parfait, Œillet à b.** The *Dianthus barbatus.* [B, 173.]

BOUQUETIER (Fr.), n. Buk-ti²-a. The *Citrus crispifolia.* [B, 173.]

BOUQUETIN (Fr.), n. Buk-ta²n². The genus *Pimpinella.* [B, 173.]—**Grand b.** The *Pimpinella magna.* [B, 173.]—**Petit b.** The *Pimpinella saxifraga.* [B, 173.]

BOUQUIMBARDE (Fr.), n. Bu-ka²n²-ba³rd. The *Clavaria coralloides.* [B, 173.]

BOUQUIN (Fr.), n. Bu-ka²n². 1. The *Orchis hircina.* [B, 173.] 2. See BARBOUQUET.—**Barbe de b.** See *B.* (1st def.).

BOUQUINBARBE (Fr.), n. Bu-ka²n²-ba³rb. See BOUQUIMBARDE.

BOURBILLON (Fr.), n. Bur-bel-yo²n². The core of a boil. [A, 385.]

BOURBON-LANCY (Fr.), n. Bur-bo²n²-la³n²-se. A place in the department of Saône-et-Loire, France, where there is a feebly chalybeate spring. [A, 385; L, 49.]

BOURBON-L'ARCHAMBAULT (Fr.), n. Bur-bo²n²-la³r-sha³n²-bo. A place in the department of Allier, France, where there are warm and cold salt springs. [A, 385.]

BOURBONNE-LES-BAINS (Fr.), n. Bur-bo²n-la-ba²n². A place in the department of the Haute-Marne, France, where there are springs containing sodium chloride, alumina, and a little iron, manganese, lithium, strontium, cæsium, and rubidium, together with free carbon dioxide, nitrogen, and oxygen. [L, 49.]

BOURBOUILLE (Fr.), n. Bur-bu-e-y'. Lichen tropicus. [L, 49.]

BOURBOULE (Fr.), n. Bur-bul. A place in the department of Puy-de-Dôme, France, where there are several hot springs containing arsenic. The waters are drank and used as baths and douches in scrofulous and cutaneous diseases and syphilis. [A, 321, 385.]

BOURDAINE (Fr.), n. Bur-de²n. The *Rhamnus frangula.* [B, 173.]—**B. blanche.** The *Viburnum lantana.* [B, 173.]

BOURDON DE SAINT-JACQUES (Fr.), n. Bur-do²n²-d'-sa²n²-zha³k. The *Althœa rosea.* [B, 173.]

BOURDONNEMENT (Fr.), n. Bur-don-ma³n². A buzzing or humming sound like that of certain insects. [A, 385.]—**B. amphorique.** An auscultatory sound resembling the buzzing of a bee in a vase. [A, 385.]—**B. d'oreilles.** The subjective sensation of a humming or buzzing sound. [A, 385.]

BOURDONNET (Fr.), n. Bur-do²n-ne². An ovoid or globular mass of lint. [A, 385.]

BOURG D'AULT (Fr.), n. Burg-do. A sea-bathing station in the department of the Somme, France. [A, 385.]

BOURG-D'OISANS (Fr.), n. Burg-dwa³-za³n². A place in the department of the Isère, France, where there is a spring containing carbonates, feebly sulphurous. [L, 49.]

BOURGÈNE (Fr.), n. Bur-zhe²n. See BOURDAINE.

BOURGEON (Fr.), n. Bur-zho²n². 1. A bud. 2. A germ. 3. A pustular or tubercular lesion of acne appearing about the age of puberty, also a papule. [Sauvages (G).] 4. A fleshy granulation. [E.]—**B. celluleux, B. charnu.** See *B.* (4th def.).—**B. écailleux.** A bud provided with protective scales (*hibernacula*). [A, 321.]—**B. floral.** A floral bud. [A, 385.]—**B. foliacé, B. foliafère, B. foliaire.** A bud the scales of which contain leaves. [A, 385.]—**B. frontal.** See *Frontal* PROCESS.—**B. nu.** A bud not provided with protective scales. [A, 321.]—**B. vasculaire.** See *B.* (4th def.).

BOURGEONNANT (Fr.), adj. Bur-zho²n-na³n². Budding. [A, 385.]

BOURGEONNÉ (Fr.), adj. Bur-zho²n-na. Affected with pimples. [L, 42.]

BOURGEONNEMENT (Fr.), n. Bur-zho²n-ma³n². The process of budding, gemmation; also the formation of granulations. [A, 321, 385; B.]

BOURG-ÉPINE (Fr.), n. Burg-a-pen. The *Rhamnus catharticus.* [B, 173.]

BOURGES (Fr.), n. Burzh. A place in the department of Cher, France, where there is a chalybeate spring. [L, 49.]

BOURGOGNE (Fr.), n. Bur-gon. The *Onobrychus sativa.* [B, 173.]

BOURIGOULE (Fr.), n. Bur-i²-gul. See BALIGOULE.

BOURNAND (Fr.), n. Bur-na³n². A place in the department of Vienne, France, where there is a sulphurous spring. [L, 49.]

BOURNEMOUTH, n. Born'mu³th. A seaside winter resort in Hampshire, England. [A, 316.]

BOURRACHE (Fr.), n. Bur-ra³sh. See BORAGO.—**B. bâtarde.** The *Anchusa amœna.* [B, 173.]—**B. officinale.** See BORAGO *officinalis.*—**Extrait de b. (feuille)** [Fr. Cod.]. A preparation made by infusing 1,000 parts of the leaves of *Borago officinalis* in coarse powder for twelve hours in 6,000 parts of boiling water, straining with expression, and allowing to settle; treating the residue with 2,000 parts of boiling water in the same way: concentrating the first infusion over a water bath; adding the second infusion brought to a syrupy consistence; and evaporating the whole to the consistence of a soft extract. [A, 253.]—**Fausse b.** See *B. bâtarde.*—**Petite b.** See BORAGO *officinalis.*—**Suc de b.** [Fr. Cod.]. Lat., *succus borraginis* [Fr. Cod.]. A preparation made by bruising the leaves of *Borago officinalis* in a marble mortar to a pulp, adding one fifth their weight of water, expressing, and filtering. [A, 253.]—**Tisane de b.** [Fr. Cod.]. Lat., *ptisana de folio borraginis* [Fr. Cod.]. A preparation made by infusing 1 part of the dried leaves of *Borago officinalis* in 100 parts of boiling water for half an hour, and straining. [A, 253.]—**Tisane de b. (fleur)** [Fr. Cod.]. A preparation made by infusing 5 parts of the flowers of *Borago officinalis* in 1,000 of boiling water for half an hour, and straining. [A, 253.]

BOURRAGINÉES (Fr.), n. pl. Bur-ra³-zhi²n-a. See BORAGINEÆ.

BOURRASOL (Fr.), n. Bur-ra³-sol. A place in the department of the Haute-Garonne, France, where there is a spring containing iron and a little sulphur. [L, 49.]

BOURRE (Fr.), n. Bur. 1. A thick wool-like nap covering the buds and other parts of certain plants. [L, 41.] 2. The short, silky hair of certain mammals, concealed by the long hair. [A, 385; L, 180.]

BOURREAU DES ARBRES (Fr.), n. Bur-ro-daz-a³rbr. The *Celastrus scandens.* [B, 173.]

BOURREAU DU LIN (Fr.), n. Bur-ro-du⁶-la²n². The *Cuscuta epithymum.* [B, 173.]

BOURRELET (Fr.), n. Bur-re²l-e². 1. In general, any elevation of a surface of a semicylindrical shape (*e. g.,* the vesicular border of a pock). 2. In solipeds, the elevation of the skin at the beginning of the matrix of the hoof. [A, 385.] 3. A longitudinal thickening or band on the edge, spire, or external surface of certain spirivalve shells, cutting the turns of the spire transversely or at a right angle. [L, 180.]—**B. allantoïdien.** In the embryo, a prominence found between the lower end of the intestine, the future anus, and the allantois. [H.]—**B. arrondi.** See SPLENIUM.—**B. cotyloïdien.** The prominent border of the cotyloid cavity, also the fibrous tissue by which it is surmounted. [A, 385.]—**B. cutané anal.** A cutaneous fold partly or wholly surrounding the anus. [A, 385.]—**B's du corps calleux.** The anterior and posterior borders of the corpus callosum. [A, 385.]—**B. glénoïdien.** The prominent border of the glenoid cavity, also the fibrous tissue by which it is surmounted. [A, 385.]—**B's latéraux.** The lateral walls of the fourth ventricle of the brain in the embryo. [I, 28; K.]—**B. muqueux de la lèvre.** A prominence sometimes formed by the labial mucous membrane along the line of contact of the lips. [A, 385.]—**B. périoplique** [R. Bouley]. See *B.* (2d def.).—**B. roulé.** See CORNU *Ammonis.*

BOURRERIA (Lat.), n. f. Bur-ra'ri²-a³. After *Bourrer,* a Nuremberg apothecary, written also *Beurreria.* Fr., *bourrérie.* Of P. Browne, a genus of boraginaceous trees and shrubs of the

tribe *Ehretieæ.* [B, 215.]—**B. havanensis** [Miers]. Syn.: *Ehretia havanensis* [Willdenow] (seu *beurreria* [Chapman]), *Pittonia similis* [Catesby]. A shrub or small tree growing in the Florida Keys and the West Indies. [B, 215.]—**B. succulenta** [Jacquin]. Syn.: *Ehretia* [Brown] (seu *Cordia* [Linnæus]) *beurreria.* A Jamaica species, the berries of which are edible. [B, 173.]

BOURSAULT (Fr.), n. Bur-so. The *Salix caprea.* [B, 173.]

BOURSE (Fr.), n. Burs. A bursa, also any bag-like structure or appliance; in the pl., *b's*, the coverings of the testicle (the scrotum, the cremaster, the tunica vaginalis, etc.). [A, 385.]—**B.-à-berger, B.-à-pasteur.** The *Capsella bursa pastoris.* [B, 173.]—**B. calcinale.** See CHROMATOPHORE.—**B. de Fabricius.** See BURSA *Fabricii.*—**B. de plume.** A feather follicle. [A, 385.]—**B. de poil.** A hair follicle. [A, 385.]—**B's marginales.** The chromatophores situated around the margin of the discs in many of the malacodermatous *Zoantharia.* [L, 121.]—**B. muqueuse.** See BURSA *mucosa.*—**B. muqueuse accidentelle.** See *Accidental* BURSA.—**B. muqueuse d'un tendon.** See BURSA *mucosa subtendinosa.*—**B. muqueuse sous-cutanée.** See BURSA *mucosa subcutanea.*—**B. muqueuse vaginale d'un tendon.** See BURSA *mucosa vaginalis.*—**B. muqueuse vésiculaire d'un tendon.** See BURSA *mucosa subtendinosa vesicularis.*—**B. musculaire.** See BURSA *musculosa.*—**B. pharyngée, B. pharyngienne.** See BURSA *pharyngea.*—**B. pileuse.** A hair follicle. [A, 385.]—**B. prémentonnière** [Richet]. A bursa situated beneath the soft parts at the point of the chin, next to the periosteum. [L, 31.]—**B. prérotulienne.** See BURSA *patellæ.*—**B. sébacée.** A sebaceous follicle. [L, 43.]—**B. séreuse.** See BURSA *mucosa.*—**B. séreuse de Fleischmann.** See BURSA *mucosa sublingualis.*—**B. séreuse sous-cutanée.** See BURSA *subcutanea.*—**B. séreuse tendineuse.** See BURSA *serosa tendinosa.*—**B. sous-cutanée.** See BURSA *subcutanea.*—**B. sous-muqueuse.** See BURSA *submucosa.*—**B. synoviale.** See BURSA *synovialis.*—**B. synoviale sous-aponévrotique.** See BURSA *synovialis subaponeurotica.*—**B. synoviale tendineuse.** See BURSA *synovialis tendinosa.*—**B. tendineuse cubitale.** The synovial sac which lines the sheath of the tendons of the flexor sublimis digitorum. [L, 31.]—**B. tendineuse externe.** See *B. tendineuse radiale.*—**B. tendineuse interne.** See *B. tendineuse cubitale.*—**B. tendineuse radiale.** The synovial sac which lines the sheath of the flexor longus pollicis. [L, 31.]—**B. testiculaire.** The scrotum together with the other coverings of the testicle. [L, 41.]

BOURSETTE (Fr.), n. Bur-se^{2}t. The *Fedia olitoria*, also the *Thlaspi bursa pastoris.* [B, 173.]

BOURSOUFLÉ (Fr.), adj. Bur-su-fla. Swollen, distended. [A, 385.]

BOURSOUFLEMENT (Fr.), n. Bur-sufl-ma^{3}n^2. Tumefaction. [A, 385.]

BOURSOUFLÉS (Fr.), n. pl. Bur-su-fla. See BULLATI.

BOURSUFLU (Fr.), adj. Bur-su-flu^6. See BOURSOUFLÉ.

BOURSOUFLURE (Fr.), n. Bur-su-flu^{6}r. See BOURSOUFLEMENT.

BOUR-TREE, n. Bur'tre. The *Sambucus nigra.* [B, 75.]

BOUSINE (Fr.), n. Bu-sen. Numbness produced by cold. [L, 41.]

BOUSSAN (Fr.), n. Bus-sa^{3}n^2. A place in the department of the Haute-Garonne, France, where there is a spring containing calcium and magnesium bicarbonates. [A, 385.]

BOUSSE DE VACHE (Fr.), n. Bus-d'-va^{3}sh. The *Boletus pachypus.* [B, 105.]

BOUSSEROLE (Fr.), n. Bus-se^{2}r-ol. The *Arctostaphylos uva ursi.* [B, 173.]

BOUTAROT (Fr.), n. Bu-ta^{3}r-o. The *Agaricus colubrinus.* [B, 173.]

BOUT DE SEIN (Fr.), n. Bu-d'-sa^{2}n^2. An artificial nipple; a nipple-shield. [L, 49; Auvard, "Gaz. hebd. de méd. et de chir.," Feb. 17, 1888, p. 99.]

BOUTÉ (Fr.), adj. Bu-ta. See BOULETÉ.

BOUTEILLE (Fr.), n. Bu-te^{2}l-y'. 1. See BOTTLE. 2. A soft, fluctuating swelling which appears on the lower jaw of sheep in the disease termed "rot." [L, 41.]—**B. de Leyde.** A Leyden jar. [B.]

BOUTET (Fr.), n. Bu-te^2. The *Nigella arvensis.* [B, 173.]

BOUTOIR (Fr.), n. Bu-twa^{3}r. 1. A prolongation of the snout, as in the tapir. [L, 180.] 2. An instrument for cutting horses' hoofs. [A, 385.]

BOUTON (Fr.), n. Bu-to^{2}n^2. 1. A bud. [A, 385.] 2. A bulb (of a hair or a feather). [A, 385.] 3. A pimple, vesicle, pock, pustule, or boil; in the pl., *b's*, a popular term for acne. [G.]—**B. bulbiforme.** A hair bulb having a hollow to receive the papilla. [A, 385.]—**B. claviforme.** A club-shaped hair bulb occupying a follicle destitute of a papilla. [A, 385.]—**B. crêté.** A lithotomy staff having a ridge to serve as a guide to the forceps. [L, 43.]—**B. d'Alep.** See *Aleppo* BOIL.—**B. d'Amboine.** Framboesia. [L, 87.]—**B. d'argent.** The *Achillea ptarmica*, also the double-flowered *Ranunculus platanifolius.* [B, 19, 173.]—**B. de Bagdad, B. de Biskara, B. de Biskra, B. de Cochin-Chine.** See *Aleppo* BOIL.—**B. de fer, B. de feu.** A cautery iron having a button-shaped tip. [E; L, 43.]—**B. d'Égypte.** A disease occurring in Egypt, similar to the Aleppo boil (*q. v.*). [G.]—**B. de règle.** See *Menstrual* HERPES.—**B. des Zibans.** See *Aleppo* BOIL.—**B. d'or.** The *Gnaphalium citrinum*, also the double-flowered *Ranunculus acris.* [B, 19, 173.]—**B. femelle.** The central lesion of the Aleppo boil when there is a group. [L, 109.]—**B. infantile.** A circumscribed induration of the palatine mucous membrane observed in the new-born in Egypt. [A, 385.]—**B. mâle.** The lesion of the Aleppo boil when it is single. [L, 109.]—**B. malin.** See *Malignant* PUSTULE and *Contagious* ANTHRAX.—**B. noir.** The *Atropa belladonna.* [B, 173.]—**B. olivaire.** An olive-shaped knob or an instrument (*e. g.*, a lithotomy staff) tipped with such a knob. [L, 43.]—**B. pileux.** A hair bulb. [A, 385.]—**B. radical.** In botany, a small bulb springing from the axil of the outer scales of a bulb. [A, 385.]—**B. rouge.** The *Cercis canadensis.* [B.]—**B's varioliformes** [Andral]. Pustules observed in the course of certain grave fevers, probably of a variety of ecthyma. [G.]

BOUTONNÉ (Fr.), adj. Bu-to^{2}n-na. 1. Provided with *boutons.* 2. Having a button-like extremity. [A, 385.]

BOUTONNEUX (Fr.), adj. Bu-to^{2}n-nu^6. 1. Papular. [G.] 2. See BOUTONNÉ.

BOUTONNIÈRE (Fr.), n. Bu-to^{2}n-ni^2-e^{2}r. 1. A stigma (of a caterpillar). [L, 180.] 2. An incision, especially into the urethra, shaped like a button-hole. [A, 385; E.]

BOUTRI (Fr.), n. Bu-tre. The extremity of the penis in the sheep. [L, 41.]

BOUTRON, n. An Hawaiian name for influenza. [A, 385.]

BOUTURAGE (Fr.), n. Bu-tu^{6}r-a^{3}zh. The cutting and planting of a slip. [A, 385.]

BOUTURE (Fr.), n. Bu-tu^{6}r. A slip for grafting or transplanting. [L, 49.]

BOUVARDIA (Lat.), n. f. Bu-va^{3}rd'i^2-a^3. Fr., *bouvardie.* Of Salisbury, a genus of cinchonaceous (rubiaceous) shrubs and herbs. [B, 215.]—**B. angustifolia.** Sp., *trompetilla* [Mex. Ph.]. A species the leaves of which, as well as those of *B. hirtella* and *B. triphylla*, are used in decoction in Mexico as a remedy for rabies. [J. M. Maisch, "Am. Jour. of Pharm.," April, 1886, p. 168.]—**B. hirtella.** A species employed in Mexico as stated under *B. angustifolia.*—**B. Jacquini** [Humboldt and Bonpland], **B. triphylla** [Salisbury]. Syn.: *Ixora americana* [Jacquin], *Houstonia coccinea* [Andr.]. A species having three leaves with stipules between their petioles; used in Mexico as a mild astringent and tonic, also as a remedy for rabies. The powdered root is applied to old weak ulcers. [J. M. Maisch, *l. c.*; B, 19, 180.]

BOVA, n. A variety of vanilla. [B, 19.]

BOVIDÆ (Lat.), n. f. pl. Bo'vi^{2}d(wi^{2}d)-e(a^3-e^2). Fr., *bovidées.* A family of the *Ruminantia*, including the common ox, the buffalo, etc. [L, 121, 302.] Cf. CAVICORNIA.

BOVILLÆ (Lat.), n. f. pl. Bo-vi^{2}l(wi^{2}l)'le(la^3-e^2). An old name for the measles. [A, 325.]

BOVINA (Lat.), n. n. pl. Bo-vi(we)'na^3. A tribe of the *Bovidæ*, including the true oxen. [L, 173, 302.]

BOVINE, adj. Bo'ven(vin). Lat., *bovinus* (from *bos*, an ox). Fr., *bovin.* Pertaining to or derived from an ox, bull, cow, or calf.

BOVISTA (Lat.), n. f. Bo-vi^{2}st(wi^{2}st)'a^3. See LYCOPERDON *b.*

BOWDITCHIA (Lat.), n. f. Bu^6-u-di^{2}ch'i^2-a^3. Fr., *bowditchie.* A genus of leguminous plants, of the group *Cæsalpineæ*, growing in South America. [B, 19.]—**B. major** [Martius]. Fr., *soukoupire.* Syn.: *Sebipira major* [Martius]. A Brazilian tree furnishing *sicopirin*, also, according to Petit, an alkaloid having convulsive, narcotic, and mydriatic properties. [J. M. Maisch, "Am. Jour. of Pharm.," Dec., 1886, p. 613; Petit, "Bull. et mém. de la soc. de thérap.," May 13, 1885; "Dtsch. Med.-Ztg.," Feb. 8, 1886, p. 128; Camperdon, "Nouv. remèdes," June 15, 1885, p. 124; B.]—**B. virgilioides** [Kunth]. A Colombian tree furnishing alcornoque bark. [B, 180.]

BOWED, adj. Bod. See ARCUATE.

BOWEL, n. Bu^6'u-e^{2}l. Fr., *boyau.* See INTESTINE.—**Lower b.** See RECTUM.

BOW-KNEE, n. Bo'ne. See GENU *varum.*

BOWL-CELLS, n. pl. Bol'se^{2}ls. See *Cup*-CELLS.

BOW-LEG, n. Bo'le^{2}g. Fr., *genou en dehors.* Ger., *Säbelbein, O-Bein.* See GENU *varum.*

BOW-LEGGED, adj. Bo'le^{2}g-ge^{2}d. Affected with genu varum.

BOX, n. Bo^{2}x. Fr., *buis.* Ger., *Buchs.* The genus *Buxus* (*q. v.*). [B.]—**Bastard b.** The *Polygala chamæbuxus.* [B, 19.]—**B.-bark.** See *Écorce de* BUIS.—**B.-berry.** Fr., *box-berryle.* The *Gaultheria procumbens.* [B, 215.]—**B.-elder.** The *Negundo aceroides* and the *Negundo fraxinifolium.* [B, 19, 75.]—**B.-holly.** The *Ruscus aculeatus.*—**B.-thorn.** The *Lycium vulgare.* [B, 215.]—**B.-tree.** The *Buxus sempervirens.* [B, 75.]—**B'wood.** See the major list.—**Dwarf b.** See *Bastard b.*—**Gray b. of Victoria.** The *Eucalyptus dealbata.* [B, 19.]—**Ground b.** See *Bastard b.*—**Prickly b.** The *Ruscus aculeatus.* [B, 275.]—**Queensland b.** The *Lophostemon macrophyllus.* [B, 19, 275.]—**Red b. of New South Wales.** The *Lophostemon australis.* [B, 19, 275.]—**Spurious b. of Victoria.** The *Eucalyptus leucoxylon.* [B, 19, 275.]—**Tasmanian b.** The *Bursaria spinosa.* [B, 19, 275.]—**White b. of Australia.** The *Eucalyptus albens.* [B, 19, 275.]—**Yellow b. of Australia.** The *Eucalyptus melliodora.* [B, 19, 275.]

BOXWOOD, n. Bo^{2}x'wu^{4}d. The wood of the *Buxus sempervirens.* [B.]—**American b.** The *Cornus florida.* [B, 275.]—**B. bark.** See *Écorce de* BUIS.—**Jamaica b.** The *Tecoma pentaphylla.* [B, 19, 275.]

BOYAU (Fr.), n. Bwa^3-yo. 1. See INTESTINE. 2. A term applied to various tubular structures.—**B'x de chat.** Catgut. [L, 105.]—**B'x du diable.** The *Convolvulus sepium.* [B, 173.]—**B'x nucléiniens.** See *Nuclear* FIBRILS.—**B. pollinique.** A pollen tube. [L, 41.]—**B. violet.** The contagious typhus of ruminants. [A, 385.]—**Corde de b'x.** Catgut. [L, 43.]

BOYRA (Hind.), n. The *Terminalia bellerica.* [B, 172.]

BOZE DRZUSKKO (Pers.), n. The *Artemisia abrotanum.* [L, 77.]

BOZEN (Ger.), n. Botz'e^{2}n. A climatic and grape-cure resort in the southern Tyrol. [L, 57.]

BRAB, n. The *Borassus flabelliformis*. [B, 275.]

BRABYLA (Lat.), n. n. pl. Bra^{2}b(bra^{3}b)′i^{2}l(u^{6}l)-a^3. Gr., βράβυλα. A general term for plums, particularly the inferior varieties. [Galen (A, 322).]

BRACCATE, adj. Bra^{2}k′kat. From *braccatus* (= *bracatus*), wearing trowsers. In ornithology, having the feet concealed by long feathers. [L, 108.]

BRACE, n. Bras. O. Fr., *brace*. An apparatus for supporting some part of the body or for strengthening some other part of an apparatus.

BRACELET, n. Bras′le^{2}t. Fr., *bracelet*. In ornithology, a ring of color above the foot. [L, 41.]—**Lithotomy b's.** See under Anklet.

BRACER, n. Bras′u^{5}r. A popular term for a tonic, stimulant, or appetizer. [L, 56.]

BRACERA (Lat.), n. f. Bra(bra^3)′se^{2}r(ke^{2}r)-a^3. See Brayera.

BRACHBULZ (Ger.), n. Bra^{3}ch^2′bultz. The *Agaricus campestris*. [L, 105.]

BRACHDISTEL (Ger.), n. Bra^{3}ch^2′di^{2}st-e^{2}l. The *Eryngium campestre*. [B, 180; L, 77.]

BRACHELYTRA (Lat.), n. n. pl. Bra^{2}k(bra^{3}ch^2) e^{2}l′i^2(u^6)-tra^3. From βραχύς, short, and ἔλυτρον, the sheath of an insect's wing. Fr., *brachélytres*. A group of the *Coleoptera* having the elytra much shorter than the abdomen. [L, 121, 292.]

BRACHELYTROUS, adj. Bra^{2}k-e^{2}l′i^{2}t-ru^{3}s. Lat., *brachelytrus*. Fr., *brachélytre*. Belonging to the *Brachelytra* or having short elytra. [L, 121.]

BRACHERIUM (Lat.), n. n. Bra^{2}k(bra^{3}ch^2)-e(e^2)′ri^2-u^{3}m(u^{4}m). For deriv., see Brachium. An old name for a truss. [A, 322, 325.]

BRACHFROSCH (Ger.), n. Bra^{3}ch^2′frosh. The *Rana temporaria*. [B, 180.]

BRACHIÆUS (Lat.), adj. Bra^{2}k(bra^{2}ch^2)-i^2-e′(a^3′e^2)-u^{3}s(u^{4}s). See Brachial; as a n., see Brachialis *anticus*.

BRACHIAIRE (Fr.), adj. Bra^3-ki^2-a^{2}r. See Brachial, Brachiate, and Brachiaria.

BRACHIAL, adj. Bra^{2}k(brak)′i^2-a^{2}l. Lat., *brachialis*. Fr., *brachial*. It., *brachiale*. Sp., *braquial*. Pertaining to the arm. [L.]

BRACHIALE (Lat.), n. Bra^{2}k(bra^{3}ch^2)-i^2-a(a^3)′le(la). Lit., a bracelet; an old name for the carpus. [A, 318, 322.]

BRACHIALGIA (Lat.), n. f. Bra^{2}k(bra^{3}ch^2)-i^2-a^{2}l(a^{3}l)′ji^2(gi^2)-a^3. From βραχίων, the arm, and ἄλγος, pain. Neuralgia of one or more of the branches of the brachial plexus. [D, 63.]

BRACHIALIA (Lat.), n. n. pl. Bra^{2}k(bra^{3}ch^2)-i^2-a(a^3)′li^2-a^3. In the *Echinodermata*, a series of plates supported by the radialia, which sometimes bifurcate into the palmaria. [L, 121.]

BRACHIALIS (Lat.), adj. Bra^{2}k(bra^{3}ch^2)-i^2-a(a^3)′li^{2}s. 1. Having the length of an ell (24 inches). [B, 19.] 2. See Brachial; as a n., a name given to several muscles of the arm, also to the carpus. [L.]—**B. anterior, B. anticus.** Fr., *brachial* [Winslow], *brachial antérieur* (ou *interne*), *huméro-cubital* [Chaussier]. Ger., *innerer Armmuskel, Ellenbogenbeuger*. It., *brachiale anteriore, omero-cubitale, omero-corono-cubitale*. Syn.: *b. internus, brachiæus* [Winslow], *flexor antibrachii ulnaris, secundus* (seu *posterior*) *cubitum flectentium* [Vesalius], *secundus cubitum flectens* [Columbus]. A flexor muscle of the forearm arising from the lower portion of the inner and outer aspects of the humerus, embracing a portion of the deltoid, and from the intermuscular septa of the arm, and inserted into the coronoid process of the ulna. [C; L, 142.]—**B. externus.** See *Triceps* extensor *cubiti*.—**B. internus.** See *B. anticus*.

BRACHIARIA, BRACHIATA (Lat.), n's n. pl. Bra^{2}k-(bra^{3}ch^2)-i^2-a(a^3)′ri^2-a^3, -ta^3. Fr., *brachiaires, brachiés*. A subclass of the *Crinoidea* having arm-like appendages. [L, 173, 180.]

BRACHIATE, adj. Bra^{2}k(brak)′i^2-at. Lat., *brachiatus*. Fr., *brachié*. Ger., *armförmig*. In botany, having spreading branches in pairs, each pair at right angles to the next pair. [B, 19.]

BRACHIATION, n. Bra^{2}k(brak)-i^2-a′shu^{3}n. That form of locomotion by which apes swing themselves from one object to another. [L, 14.]

BRACHI-CUVETTE (Fr.), n. Bra^3-ki^2-ku^6-ve^{2}t. See under Cuvette.

BRACHIDE (Fr.), n. Bra^{3}k-ed. A small arm or arm-like appendage. [L, 41.]

BRACHIDÉ (Fr.), adj. Bra^{3}k-ed-a. Arm-like. [L, 41.]

BRACHIÉ (Fr.), adj. Bra^{3}k-i^2-a. See Brachiate; as a n., in the pl., *b's*, see Brachiata.

BRACHIERIUM (Lat.), n. n. Bra^{2}k(bra^{3}ch^2)-i^2-e(e^2)′ri^2-u^{3}m-(u^{4}m). See Bracherium.

BRACHIFEROUS, adj. Bra^{2}k-i^{2}f′e^{2}r-u^{3}s. From *brachium*, the arm, and *ferre*, to bear. Provided with arms. [L, 11.]

BRACHIFORME (Fr.), adj. Bra^{3}k-i^2-fo^{2}rm. Having the form of an arm. [A, 385.]

BRACHILUVIUM (Lat.), n. n. Bra^{2}k(bra^{3}ch^2)-i^2-lu^2(lu)′vi^2-(wi^2)-u^{3}m(u^{4}m). See *Arm* bath.

BRACHINIDÆ, BRACHINIDES (Lat.), n's f. pl. Bra^{2}k-(bra^{3}ch^2)-i^{2}n′i^{2}d-e(a^3-e^2), -ez(e^{2}s). Fr., *brachinides*. A subfamily of the *Carabidæ*. [L, 262.]

BRACHININ, n. Bra^{2}k′i^{2}n-i^{2}n. Fr., *brachinine*. Ger., *Brachinin*. A substance said to be an extract of the *Brachinus crepitans*, which has been recommended as a remedy for rheumatism. [B, 270.]

BRACHINUS (Lat.), n. m. Bra^{2}k(bra^{3}ch^2)′i^{2}n-u^{3}s(u^{4}s). Fr., *brachine, brachyn*. A genus of the *Brachinidæ* many species of which secrete a highly volatile, acid, and caustic liquid which, when expelled from the anus, volatilizes with a loud report. [L, 43.]—**B. crepitans** [Linnæus]. Fr., *brachine* (ou *brachyn*) *pétard* (ou *pistolet*). Ger., *Bombardierkäfer*. The bombardier; a European species furnishing brachinin. [L, 43.]

BRACHIOCÉPHALE (Fr.), adj. Bra^{3}k-i^2-o-sa-fa^{3}l. Cephalopodous; as a n., in the pl., *b's*, the *Cephalopoda*. [L, 41.]

BRACHIOCEPHALIC, adj. Bra^{2}k(brak)-i^2-o-se^{2}f-a^{2}l′i^{2}k. Lat., *brachiocephalicus* (from βραχίων, the arm, and κεφαλή, the head). Fr., *brachio-céphalique*. It., *brachiocefalico*. Sp., *braquiocefálico*. Pertaining to the arm and the head; as a n., the innominate artery. [L, 49.]

BRACHIOCUBITAL, adj. Bra^{2}k(brak)-i^2-o-ku^{2}b′i^{2}t-a^{2}l. Lat., *brachiocubitalis* (from *brachium*, the arm, and *cubitus*, the forearm). Fr., *brachio-cubital*. It., *brachiocubitale*. Sp., *braquiocubital*. Pertaining to both the arm and the forearm. [L, 41, 43.] See *B.* ligament.

BRACHIOCYLLOSIS (Lat.), n. f. Bra^{2}k(bra^{3}ch^2)-i^2-o(o^2)-si^{2}l-(ku^{6}l)-lo′si^{2}s. Gen., *brachiocyllo′seos* (*-sis*). From βραχίων, the arm, and κύλλωσις, a crooking, crippling. A deformity in which the arm is drawn inward, also paralysis of the arm due to such a deformity. [A, 322.]

BRACHIODERMIEN (Fr.), adj. Bra^{3}k-i^2-o-de^{2}rm-i^2-a^{3}n^2. From βραχίων, the arm, and δέρμα, the skin. Pertaining to the skin of the arm (said of the platysma myoides). [L, 13, 41.]

BRACHIOFASCIALIS (Lat.), n. m. Bra^{2}k(bra^{3}ch^2)-i^2-o(o^2)-fa^{2}s(fa^{3}s)-si^2(ki^2)-a(a^3)′li^{2}s. From *brachium*, the arm, and *fascia* (*q. v.*). A bundle of muscular fibres given off from the brachialis anticus muscle and inserted into the fascia of the forearm. [L, 31.]

BRACHIOÏDE (Fr.), adj. Bra^{3}k-i-o-ed. From βραχίων, the arm, and εἶδος, resemblance. Arm-like. [A, 385.]

BRACHIOLAR, adj. Bra^{2}k(brak)-i′o-la^{3}r. Belonging to or resembling the *Brachiolaria*. [L, 201.]

BRACHIOLARIA (Lat.), n. f. Bra^{2}k(bra^{3}ch^2)-i^2-o^{2}l-a(a^3)′-ri^2-a^3. From *brachiolum*, a little arm. The larva of an echinoderm when it is provided with a series of arm-like processes. [L, 201.]

BRACHIOLATUS (Lat.), adj. Bra^{2}k(bra^{3}ch^2)-i^2-o^{2}l-a(a^3)′tu^{3}s-(tu^{4}s). Fr., *brachiolé*. Provided with arm-like processes. [L, 180.]

BRACHIOLUM (Lat.), n. n., dim. of *brachium* (*q. v.*). Bra^{2}k-(bra^{3}ch^2)-i(i^2)′o^{2}l-u^{3}m(u^{4}m). Fr., *brachiole*. Ger., *Aermchen*. A little arm. [A, 322; L, 41.]

BRACHIOMETRUM (Lat.), n. n. Bra^{2}k(bra^{3}ch^2)-i^2-o(o^2)-me^{2}t′-ru^{3}m(ru^{4}m). From βραχίων, the arm, and μέτρον, a measure. Ger., *Armmesser*. An instrument for ascertaining the thickness of an obstetrician's arm. [A, 322.]

BRACHION (Lat.), n. n. Bra^{2}k(bra^{3}ch^2)′i^2-o^{2}n(on). See Brachium.

BRACHIONÆA (Lat.), n. n. pl. Bra^{2}k(bra^{3}ch^2)-i^2-o^{2}n-e′-(a^3′e^2)-a^3. Fr., *brachionés*. Of Ehrenberg, a tribe of the *Rotifera*. [L, 180.]

BRACHIONCUS (Lat.), n. m. Bra^{2}k(bra^{3}ch^2)-i^2-o^{2}n^2′ku^{3}s(ku^{4}s). From βραχίων, the arm, and ὄγκος, a mass. Fr., *brachioncose*. Ger., *Armgeschwulst*. A swelling of the arm, especially one that is hard and chronic. [A, 322; E.]

BRACHIONERYSIPELAS (Lat.), n. n. Bra^{2}k(bra^{3}ch^2)″i^2-o^{2}n-e^{2}r-i^2(u^6)-si^{2}p′e^{2}l-a^{2}s(a^{3}s). Gen., *brachionerysipel′atos* (*-tis*). For deriv., see Brachium and Erysipelas. Erysipelas of the arm. [A, 322.]

BRACHIONÉS (Fr.), n. pl. Bra^{3}k-i^2-o-na. See Brachionæa.

BRACHIONIDÆ (Lat.), n. f. pl. Bra^{2}k(bra^{3}ch^2)-i^2-o^{2}n′i^{2}d-e-(a^3-e^2). A family of the *Loricata*. [L, 121.]

BRACHIONIENS (Fr.), n. pl. Bra^{3}k-i^2-o-ni^2-a^{3}n^2. See Brachionæa.

BRACHIONIGRAPH, n. Bra^{2}k(brak)-i^2-o^{2}n′i^2-gra^{3}f. From βραχίων, the arm, and γράφειν, to write. A patented instrument invented by W. Macgill, designed to enable a person to write, if he is the subject of writer's cramp or paralysis or loss of the distal portion of the upper limb. A long, light strip of iron, curved to fit the ulnar border of the forearm, is fastened to the forearm by a sort of sleeve of leather, and carries at its distal end a mechanism by means of which a pen may be held in any desired position and moved by the muscles of the arm and shoulder. ["Lancet," Aug. 28, 1886, p. 402.]

BRACHIONOPODA (Lat.), n. n. pl. Bra^{2}k(bra^{3}ch^2)-i^2-o^{2}n-o^{2}p′o^{2}d-a^3. See Brachiopoda.

BRACHIOPITHECUS (Lat.), n. m. Bra^{2}k(bra^{3}ch^2)-i^2-o(o^2)-pi^{2}th-e(a)′ku^{3}s(ku^{4}s). From βραχίων, the arm, and πίθηκος, an ape. Fr., *brachiopithèque*. A species-name applied to apes having very long anterior extremities. [L, 109.]

BRACHIOPODA [Duméril] (Lat.), n. n. pl. Bra^{2}k(bra^{3}ch^2)-i^2-o^{2}p′o^{2}d-a^3. From βραχίων, the arm, and πούς, the foot. Fr., *brachiopodes*. Ger., *Brachiopoden, Armfüsser*. Syn.: *Lampades, Palliobranchiata* [De Blainville]. 1. A class of marine *Mollusca* having an inequivalve and equilateral shell, and on each side of the mouth a long, spirally coiled arm fringed with tentacles which were formerly supposed to take the place of feet. They never multiply by gemmation nor give rise to compound organisms. In the larval state they resemble the *Polyzoa* and the *Chætopoda*, and by some they are not regarded as molluscs. They are divided into the *Articulata* and the *Inarticulata*. [B; L, 11, 201, 210, 227, 292.] 2. Of Leuckart, an order of the *Acephala*. [L, 231.]

BRACHIOPODOUS, adj. Bra^{2}k-i^2-o^{2}p′o^{2}d-u^{3}s. Lat., *brachiopodus*. Fr., *brachiopode*. Belonging to or resembling the *Brachiopoda*.

BRACHIOPTERA [De Blainville] (Lat.), n. n. pl. Bra^{2}k(bra^{3}ch^2)-i^2-o^{2}p′te^{2}r-a^3. From βραχίων, the arm, and πτερόν, a wing or fin. Fr., *brachioptères.* A family of fishes having pediculated pectoral fins. [L, 180.]

BRACHIO-RADIAL, adj. Bra^{2}k(brak)″i^2-o-ra′di^2-a^{2}l. Lat., *brachio-radialis* (from *brachium* and *radius* [*q. v.*]). Fr., *brachio-radial.* Pertaining to the arm or the humerus and the radius or the radial region. [L, 44, 84.] Cf. BRACHIO-RADIALIS and *B.-r.* LIGAMENT.

BRACHIO-RADIALIS (Lat.), n. m. Bra^{2}k(bra^{3}ch^2)″i^2-o(o^2)-ra(ra^3)-di^2-a(a^3)′li^{2}s. Soemmerring's name for the supinator radii longus muscle. [C.]

BRACHIORRHACHIDIAN, adj. Bra^{2}k(brak)″i^2-o^{2}r-ra^{2}k-i^{2}d′i^2-a^{2}n. From βλαχίων, the arm, and ῥάχις, the spinal column. Pertaining to the arm and spinal cord (*e. g.*, the *b. bulb*). [L, 13.]

BRACHIOSTROPHOSIS (Lat.), n. f. Bra^{2}k(bra^{3}ch^2)-i^2-o(o^2)-stro^{2}f-o′si^{2}s. Gen., *brachiostropho′seos* (*-sis*). From βραχίων, the arm, and στρέφειν to twist. A twisting of the arm. [A, 322.]

BRACHIOTOMY, n. Bra^{2}k(brak)-i^2-o^{2}t′o-mi^2. Lat., *brachiotomia* (from βραχίων, the arm, and τέμνειν, to cut). Fr., *brachiotomie, section* (ou *désarticulation*) *du membre supérieur.* Ger., *Brachiotomie, Ablösung* (oder *Exartikulation*) *des Armes.* It., *brachiotomia.* The removal of one or both of the arms, especially of the fœtus, to facilitate delivery.

BRACHIPLEX [E. Coues], n. Bra^{2}k(brak)′i^2-ple^{2}x. See *Brachial* PLEXUS.

BRACHIPLEXAL, adj. Bra^{2}k(brak)-i^2-ple^{2}x′a^{2}l. Pertaining to the brachial plexus. [E. Coues, "Med. Rec.," July 30, 1887 (L).]

BRACHIROLUM (Lat.), n. n. Bra^{2}k(bra^{3}ch^2)-i^{2}r′o(o^2)-lu^{3}m-(lu^{4}m). See BRACHERIUM.

BRACHISTOCEPHALUS [Huxley] (Lat.), adj. Bra^{2}k-(bra^{3}ch^2)-i^{2}st″o(o^2)-se^{2}f(ke^{2}f)′a^{2}l(a^{3}l)-u^{3}s(u^{4}s). From βράχιστος (superlative of βραχύς, short), and κεφαλή, the head. Fr., *brachistocéphale.* Having an extremely short, broad head. [L, 150.]

BRACHIUM (Lat.), n. n. Bra^{2}k(bra^{3}ch^2)′i^2-u^{3}m(u^{4}m). Gr., βραχίων. Heb., *derah, ezeroah, hazadh.* Ar., *hadab, hadan, alsahad, said, dara, dira.* Fr., *bras.* Ger., *Arm.* It., *braccio.* Sp., *brazo.* The arm (from the shoulder to the elbow); also any arm-like structure or object. [A, 322, 325, 385.]—**Anterior b.** Lat., *b. anterius.* Fr., *bras antérieur.* Ger., *vorderer Arm.* A tract of white nerve-substance which extends from the anterior corpus quadrigeminum upward and forward between the external and internal geniculate bodies to the optic tract, with which it is continuous. [I, 15; K.]—**B. cerebelli.** Fr., *bras du cervelet.* The peduncle of the cerebellum. [I, 3; K.]—**B. conjunctivum.** Fr., *bras conjonctif.* Ger., *Bindearm.* An arm-like connecting structure (*e. g.*, any of the brachia of the corpora quadrigemina). [I, 6; K.]—**B. conjunctivum anterius.** See *Anterior b.*—**B. conjunctivum posterius.** See *Posterior b.*—**B. conjunctorium.** See *B. conjunctivum.*—**B. copulativum.** The superior peduncle of the cerebellum. [I, 6; K.]—**B. corporis bigemini inferioris.** See *Posterior b.*—**B. corporis bigemini superioris.** See *Anterior b.*—**Brachia fornicis.** See PILLARS *of the fornix.*—**B. inferius.** See *Posterior b.*—**Brachia lateralia.** The brachia of the corpora quadrigemina. [I, 7; K.]—**B. movens quartus.** The latissimus dorsi muscle. [L, 119.]—**B. pontis.** The middle peduncle of the cerebellum. [E. C. Spitzka, "Med. Rec.," Oct. 11, 1884, p. 395 (K).]—**Posterior b.** Lat., *b. posterius.* Fr., *bras postérieur.* Ger., *hinterer Arm.* A tract of white substance extending from the posterior corpus quadrigeminum forward and outward to dip beneath the inner geniculate body. [I, 1; K.]

BRACHIUNA (Lat.), n. n. pl. Bra^{2}k(bra^{3}ch^2)-i^2-u^2(u)′na^3. Of Owen, an order of the *Epizoa* having a suctorial disc at the confluent extremities of the last pair of thoracic limbs. [L, 296.]

BRACHMÄNNCHEN (Ger.), n. Bra^{3}ch^2′man-ch^{2}e^{2}n. The *Agaricus edulis.* [L, 105.]

BRACHOCÈRES (Fr.), n. pl. Bra^{3}k-o-se^{2}r. See BRACHYCERA.

BRACHSEN (Ger.), n. Bra^{3}ch^{2}s′e^{2}n. The *Cyprinus brama.* [B, 180.]

BRACHUNA, n. See ACRAI.

BRACHWURM (Ger.), n. Bra^{3}ch^2′vurm. The larva of the *Œstrus equi.* [L, 46.]

BRACHYACANTHOUS, adj. Bra^{2}k-i^2-a^{2}k-a^{2}n′thu^{3}s. Lat., *brachyacanthus* (from βραχύς, short, and ἄκανθα, a thorn). Fr., *brachyacanthe.* Having short thorns. [L, 41.]

BRACHYACHYRIS [Sprengel] (Lat.), n. f. Bra^{2}k(bra^{3}ch^2)-i^2(u^6)-a^{2}k(a^{3}ch^2)′i^2(u^6)-ri^{2}s. See GUTIERREZIA.

BRACHYACTIS [Ledebour] (Lat.), n. f. Bra^{2}k(bra^{3}ch^2)-i^2(u^6)-a^{2}k(a^{3}ch^2)′ti^{2}s. A genus of composite plants now referred to *Aster* (section, *Conyzopsis*). [B, 215.]

BRACHYANCALOPTENI (Lat.), n. m. pl. Bra^{2}k(bra^{3}ch^2)-i^2(u^6)-a^{2}n^2(a^{3}n^2)-ka^{2}l(ka^{3}l)-o^{2}p-te(ta)′ni(ne). From βραχύς, short, ἀγκαλίς, an arm, and πτηνός, feathered. Fr., *brachyancaloptènes.* J. A. Ritgen's term for the *Brachypteri.* [L, 180.]

BRACHYAUCHEN (Lat.), n. m. Bra^{2}k(bra^{3}ch^2)-i^2(u^6)-a^4′-(a^3′u^4)-ken(ch^{2}an). From βραχύς, short, and αὐχήν, the neck. A short neck; also a person or an animal with a short neck. [A, 322.]

BRACHYBIOTE (Fr.), adj. Bra^{3}k-i^2-be-ot. Gr., βραχύβιος. Ger., *brachybiotisch.* Short-lived. [L, 109.]

BRACHYBIOTIQUE (Fr.), n. Bra^{3}k-i^2-be-ot-ek. Gr., βραχυβιότης. Ger., *Brachybiotik.* Shortness of life; according to Ampère, the art of abridging life. [L, 41.]

BRACHYCARPEÆ (Lat.), n. f. pl. Bra^{2}k(bra^{3}ch^2)-i^2(u^6)-ka^{3}rp′e^2-e(a^3-e^2). From βραχύς, short, and καρπός, a fruit. Fr., *brachycarpées.* Of De Candolle, a section of cruciferous plants, comprising the single genus *Brachycarpea.* [A, 385; B, 121; L, 41.]

BRACHYCEPHALIA (Lat.), n. f. Bra^{2}k(bra^{3}ch^2)-i^2(u^6)-se^{2}f-(ke^{2}f)-a^{2}l(a^{3}l)′i^2-a^3. From βραχύς, short, and κεφαλή, the head. Fr., *brachycéphalie.* Ger., *Brachycephalie, Kurzköpfigkeit.* A type of cranial formation in which the antero-posterior diameter is short, the cephalic index being greater than 80°. [A, 385; L, 149.]

BRACHYCEPHALIC, adj. Bra^{2}k-i^2-se^{2}f-a^{2}l′i^{2}k. See BRACHYCEPHALOUS.

BRACHYCEPHALIDÆ (Lat.), n. f. pl. Bra^{2}k(bra^{3}ch^2)i^2(u^6)-se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)′i^{2}d-e(a^3-e^2). A subfamily of the *Brachycephalina* having free toes. [L, 204.]

BRACHYCEPHALINA (Lat.), n. n. pl. Bra^{2}k(bra^{3}ch^2)-i^2(u^6)-se^{2}f(ke^{2}f)-a^{2}l(a^{3}l)-i(e)′na^3. A family of *Opisthoglossa oxydactyla* without maxillary teeth and having the ear imperfectly developed. [L, 288.]

BRACHYCEPHALISM, n. Bra^{2}k-i^2-se^{2}f′a^{2}l-i^{2}zm. See BRACHYCEPHALIA.

BRACHYCEPHALOUS, adj. Bra^{2}k-i^2-se^{2}f′a^{2}l-u^{3}s. Lat., *brachycephalus.* Fr., *brachycéphale.* Ger., *brachycephalisch, kurzköpfig.* Characterized by brachycephalia.

BRACHYCEPHALY, n. Bra^{2}k-i^2-se^{2}f′a^{2}l-i^2. See BRACHYCEPHALIA.

BRACHYCERA, BRACHYCERATÆ (Lat.), n's n. pl. and f. pl. Bra^{2}k(bra^{3}ch^2)-i^{2}s(u^{6}k)′e^{2}r-a^3, -i^2(u^6)-se^{2}r(ke^{2}r)-a(a^3)′te(ta^3-e^2). From βραχύς, short, and κέρας, a horn. Fr., *brachycères, brachycérées.* A family of dipterous insects having short antennæ and one or two joints to the palpi. [A, 385; L, 121, 180.]

BRACHYCERIDES (Lat.), n. f. pl. Bra^{2}k(bra^{3}ch^2)-i^2(u^6)-se^{2}r(ke^{2}r)′i^{2}d-ez(e^{2}s). Fr., *brachycérides.* A subfamily of the *Curculionidæ.* [L, 267.]

BRACHYCHÆTA (Lat.), n. f. Bra^{2}k(bra^{3}ch^2)-i^2(u^6)-ke′-(ch^{2}a^3′e^2)-ta^3. From βραχύς, short, and χαίτη, the hair of the head. Of Torrey and Gray, a genus of the *Compositæ* closely related to *Solidago*, from which it is distinguished by its very short pappus (whence the name) and its cordate leaves. [B, 215.]—**B. cordata** [Torrey and Gray]. Syn.: *Solidago sphacelata* [Rafinesque] (seu *cordata* [Short]), *Brachyris ovatifolia* [De Candolle]. A species growing in the southern United States. [B, 215.]

BRACHYCHEIRUS, BRACHYCHIRUS (Lat.), adj's. Bra^{2}k(bra^{3}ch^2)-i^2(u^6)-ki′(ch^{2}e^2′i^2)-ru^{3}s(ru^{4}s), -ki(ch^{2}e)′ru^{3}s(ru^{4}s). Gr., βραχύχειρ (from βραχύς, short, and χείρ, the hand). Having the hands or arms short. [A, 322.]

BRACHYCHRONIUS (Lat.), adj. Bra^{2}k(bra^{3}ch^2)-i^2(u^6)-kron-(ch^{2}ro^{2}n)′i^2-u^{3}s(u^{4}s). Gr., βραχυχρόνιος. Fr., *brachychronique.* Of short duration (said of diseases). [Galen (A, 325).]

BRACHYCLADE (Fr.), adj. Bra^{3}k-i^2-kla^{3}d. From βραχύς, short, and κλάδος, a branch. Having short branches. [L, 41, 109.]

BRACHYDACTYLIA (Lat.), n. f. Bra^{2}k(bra^{3}ch^2)-i^2(u^6)-da^{2}k-(da^{3}k)-ti^{2}l(tu^{6}l)′i^2-a^3. From βραχύς, short, and δάκτυλος, a digit. Fr., *brachydactylie.* The state of being brachydactylous. [A, 385.]

BRACHYDACTYLOUS, adj. Bra^{2}k-i^2-da^{2}k′ti^{2}l-u^{3}s. Lat., *brachydactylus.* Fr., *brachydactyle.* Having the fingers or toes short. [A, 385; L, 41.]

BRACHYDERIDES (Lat.), n. f. pl. Bra^{2}k(bra^{3}ch^2)-i^2(u^6)-de^{2}r′i^{2}d-ez(e^{2}s). Fr., *brachyderides.* A subfamily of the *Curculionidæ.* [L, 267.]

BRACHYDIAGONAL, adj. Bra^{2}k-i^2-di-a^{2}g′o^{2}n-a^{2}l. From βραχύς, short, and διαγώνιος, from angle to angle. In crystallography, short and transverse. [B.] See *B.* AXIS.

BRACHYDONT, adj. Bra^{2}k′i^2-do^{2}nt. See BRACHYODONT.

BRACHYELYTRUM (Lat.), n. n. Bra^{2}k(bra^{3}ch^2)-i^2(u^6)-e^{2}l′i^{2}t-(u^{6}t)-ru^{3}m(ru^{4}m). From βραχύς, short, and ἔλυτρον, a husk. Of Beauvois, a genus of grasses of the tribe *Agrostideæ*, subtribe *Stipeæ*; by some made a section of *Muhlenbergia.* [B, 34; Hackel (B, 245).]—**B. aristatum** [Beauvois]. A species indigenous to North America. [B, 245.]

BRACHYFACIAL (Fr.), adj. Bra^{3}k-i^2-fa^3-si^2-a^{3}l. From βραχύς, short, and *facies*, the face. Having the face short. [L, 150.]

BRACHYGLOSSE (Fr.), **BRACHYGLOTTE** (Fr.), adj's. Bra^{3}k-i^2-glos, -glot. From βραχύς, short, and γλῶσσα (= γλῶττα), the tongue. Having the tongue or the languet short; as n's, see BRACHYGLOTTIS. [A, 385.]

BRACHYGLOTTIS (Lat.), n. f. Bra^{2}k(bra^{3}ch^2)-i^2(u^6)-glo^{2}t-(glot)′ti^{2}s. Gen., *brachyglot′tidos* (*-dis*). From βραχύς, short, and γλωττίς (see GLOTTIS). Fr., *brachyglotte.* A genus of composite plants. [B, 19; L, 41.]

BRACHYGNATHUS (Lat.), adj. Bra^{2}k(bra^{3}ch^2)-i^{2}g(u^{6}g)′na^3-thu^{3}s(thu^{4}s). From βραχύς, short, and γνάθος, the jaw. Fr., *brachygnathe.* Having the jaws short. [A, 322, 385; L, 49.]

BRACHYLÆNEÆ (Lat.), n. f. pl. Bra^{2}k(bra^{3}ch^2)-i^2(u^6)-le^{2}n′-(la^3′e^{2}n)-e^2-e(a^3-e^2). From *Brachylæna*, the typical genus. A subdivision of composite plants (*Euconyzeæ*) made by Schultz. [B, 170.]

BRACHYLOBUS (Lat.), n. m. Bra^{2}k(bra^{3}ch^2)-i^{2}l(u^{6}l)′ob(o^{2}b)-u^{3}s(u^{4}s). From βραχύς, short, and λοβός, a lobe. Fr., *brachylobe.* A genus of cruciferous plants. [A, 385; B, 173.]—**B. amphibius.** See SISYMBRIUM *amphibium.*

BRACHYLOMATEÆ (Lat.), n. f. pl. Bra^{2}k(bra^{3}ch^2)-i^{2}l-om-a^{2}t(a^{3}t)′e^2-e(a^3-e^2). From *Brachyloma*, one of the genera. Of Hanstein, a subtribe of the *Gesnereæ*, comprising eight genera. [B, 170.]

BRACHYMERIDÆ (Lat.), n. f. pl. Bra^{2}k(bra^{3}ch^2)-i^2(u^6)-me^{2}r′i^{2}d-e(a^3-e^2). From βραχύς, short, and μέρος, a part. A family of the *Opisthoglossa platydactyla*. [L, 204.]

BRACHYMÉTROPE (Fr.), adj. Bra^{3}k-i^2-ma-trop. Myopic. [A, 385.]

BRACHYMETROPIA (Lat.), n. f. Bra^{2}k(bra^{3}ch^2)-i^2(u^6)-me^{2}t-rop(ro^{2}p)′i^2-a^3. From βραχύς, short, μέτριος, within measure, and ὄψις, sight. Fr., *brachymétropie*. See Myopia.

BRACHYN (Fr.), n. Bra^{3}sh-a^{2}n^2. See Brachinus.

BRACHYNIN, n. Bra^{2}k′i^{2}n-i^{2}n. See Brachinin.

BRACHYNOSIS, BRACHYNSIS (Lat.), n's f. Bra^{2}k(bra^{3}ch^2)-i^{2}n(u^{6}n)-o′si^{2}s, -i^{2}n(u^{6}n)′si^{2}s. Gen., *brachyno′seos* (*-sis*), *-chyn′seos* (*-sis*). From βραχύνειν, to shorten. Fr., *brachynose*. Ger., *krankhafte Verkürzung*. A pathological shortening of an organ or part. [Grossi (A, 322).]

BRACHYNTICUS (Lat.), adj. Bra^{2}k(bra^{3}ch^2)-i^{2}n(u^{6}n)′ti^{2}k-u^{3}s(u^{4}s). Pertaining to or affected with brachynosis. [A, 322.]

BRACHYNUS (Lat.), n. m. Bra^{2}k(bra^{3}ch^2)′i^{2}n(u^{6}n)-u^{3}s(u^{4}s). See Brachinus.

BRACHYODONT, adj. Bra^{2}k′i^2-o-do^{2}nt. From βραχύς, short, and ὀδούς, a tooth. Having a short crown (said of teeth). [L, 121.]

BRACHYOPODUS (Lat.), adj. Bra^{2}k(bra^{3}ch^2)-i^2(u^6)-o^{2}p′o^{2}d-u^{3}s(u^{4}s). See Brachypodus.

BRACHYOTUS (Lat.), adj. Bra^{2}k(bra^{3}ch^2)-i^2(u^6)-o′tu^{3}s(tu^{4}s). From βραχύς, short, and οὖς, the ear. Fr., *brachyote*. Ger., *kurzohrig*. Having short ears. [L, 41, 180.]

BRACHYPETALUS (Lat.), adj. Bra^{2}k(bra^{3}ch^2)-i^2(u^6)-pe^{2}t′-a^{2}l(a^{3}l)-u^{3}s(u^{4}s). From βραχύς, short, and πέταλον, a petal. Fr., *brachypétale*. Having short petals. [L, 41.]

BRACHYPHYLLUS (Lat.), adj. Bra^{2}k(bra^{3}ch^2)-i^2(u^6)-fi^{2}l-(fu^{6}l)′lu^{3}s(lu^{4}s). From βραχύς, short, and φύλλον, a leaf. Fr., *brachyphylle*. Having short leaves. [L, 41.]

BRACHYPNEUMA (Lat.), n. n. Bra^{2}k(bra^{3}ch^2)-i^{2}p(u^{6}p)-nu^2′-ma^3. Gen., *brachypneu′matos* (*-tis*). From βραχύς, short, and πνεῦμα, wind. See Brachypnœa.

BRACHYPNEUMATIC, adj. Bra^{2}k-i^{2}p-nu^2-ma^{2}t′i^{2}k. See Brachypnœic.

BRACHYPNŒA (Lat.), n. f. Bra^{2}k(bra^{3}ch^2)-i^{2}p(u^{6}p)-ne′-(no^2′e^2)-a^3. Gr., βραχύπνοια (from βραχῦς, short, and πνεῖν, to breathe). Fr., *brachypnée*. Ger., *Kurzathmen*, *Kurzathmigkeit*. It., *brachipnea*. Sp., *braquipnea*. A disturbance of breathing in which the respirations are short and separated by long intervals. [Galen (A, 325); A, 385.]

BRACHYPNŒIC, adj. Bra^{2}k-i^{2}p-ne′i^{2}k. Gr., βραχύπνοος. Lat., *brachypnoos*, *brachypnous*, *brachypnus*. Fr., *brachypnéique*. Ger., *kurzathmig*. Pertaining to or affected with brachypnœa. [A, 322; L, 41.]

BRACHYPODE (Fr.), adj. Bra^{3}k-i^2-pod. See Brachypodus.

BRACHYPODES (Lat.), n. f. pl. Bra^{2}k(bra^{3}ch^2)-i^{2}p(u^{6}p)′o^{2}d-ez(e^{2}s). 1. A division of mosses (*Pterygophylloidei*). [B, 170.] 2. A phalanx of the *Cichlomorphæ*. [L, 121.]

BRACHYPODIEÆ (Lat.), n. f. pl. Bra^{2}k(bra^{3}ch^2)-i^2(u^6)-po^{2}d-i(i^2)′e^2-e(a^3-e^2). A subtribe of gramineous plants of the tribe *Festuceæ*, including *Bromus*, *Brachypodium*, and two other genera; differing from the *Eufestuceæ* chiefly in the structure of their starch-granules. [Hackel (B, 245).]

BRACHYPODIINÆ (Lat.), n. f. pl. Bra^{2}k(bra^{3}ch^2)-i^2(u^6)-po^{2}d-i^2-i(e)′ne(na^3-e^2). A subfamily of the *Temeliidæ* having short tarsi. [L, 278.]

BRACHYPODIUM (Lat.), n. n. Bra^{2}k(bra^{3}ch^2)-i^2(u^6)-pod(po^{2}d)-i^2-u^{3}m(u^{4}m). Of Beauvois, a genus of gramineous plants of the tribe *Festuceæ*. [Hackel (B, 245).]—**B. pinnatum** [Beauvois]. Fr., *jaucou*, *palène*, *paulène*, *pimouche*. Syn.: *Avena læta*, *Bromus pinnatus* (seu *fragilis*, seu *tigurinus*), *Festuca pinnata*, *Triticum bromoides* (seu *gracile*, seu *pinnatum*). A European species furnishing good forage. [B, 173.]

BRACHYPODUS (Lat.), adj. Bra^{2}k(bra^{3}ch^2)-i^{2}p(u^{6}p)′o^{2}d-u^{3}s-(u^{4}s). From βραχύς, short, and πούς, a foot. Having short petioles. [L, 180.]

BRACHYPOTES (Lat.), n. m. Bra^{2}k(bra^{3}ch^2)-i^{2}p(u^{6}p)′ot(o^{2}t)-ez(as). Gr., βραχυπότης. A person who is *brachypotus* (*q. v.*). [Hippocrates (A, 311).]

BRACHYPOTOS, BRACHYPOTUS (Lat.), adj's. Bra^{2}k-(bra^{3}ch^2)-i^{2}p(u^{6}p)′ot(o^{2}t)-o^{2}s, -u^{3}s(u^{4}s). Gr., βραχυπότος (from βραχύς, short, and πότος, a drinking). Fr., *brachypote*. 1. Drinking hastily, greedily. 2. Drinking little. [A, 311, 322, 325, 385.]

BRACHYPTERA, BRACHYPTERÆ, BRACHYPTERI (Lat.), n's n. pl., f. pl., and m. pl. Bra^{2}k(bra^{3}ch^2)-i^{2}p(u^{6}p)′te^{2}r-a^3, -e(a^3-e^2), -i(e). From βραχύς, short, and πτερόν, a wing. Fr., *brachyptères*. Ger., *Kurzflügler*. A class or family of birds having wings too short for flying. [L, 180.]

BRACHYPTEROUS, adj. Bra^{2}k-i^{2}p′te^{2}r-u^{3}s. Gr., βραχύπτερος. Lat., *brachypterus*. Fr., *brachyptère*. Ger., *kurzflüglig*. Having short wings. [A, 385; L, 41, 56.]

BRACHYRIS (Lat.), n. f. Bra^{2}k(bra^{3}ch^2)′i^2(u^6)-ri^{2}s. Fr., *brachyre*. Of Nuttall, the genus *Gutierrezia*. [B, 215.]—**B. Euthamiæ.** See Gutierrhezia *Euthamiæ*.—**B. ovatifolia** [De Candolle]. The *Brachychæta cordata*. [B, 215.]

BRACHYRRHINE (Fr.), adj. Bra^{3}k-i^{2}r-ren. From βραχύς, short, and ῥίς, the nose. Short-nosed. [A, 385.]

BRACHYRRHINIE (Fr.), n. Bra^{3}k-i^{2}r-ri^{2}n-e. Natural or pathological shortness of the bones of the nose. [A, 385.]

BRACHYRRHYNCHI (Lat.), n., m. pl. of adj. *brachyrrhynchus* (*q. v.*). Bra^{2}k(bra^{3}ch^2)-i^{2}r(u^{6}r)-ri^{2}n^2(ru^{6}n^2)′ki(ch^{2}e). Fr., *brachyrrhynques*. A division of the *Curculionidæ*. [L. 262.]

BRACHYRRHYNCHIDÆ (Lat.), n. f. pl. Bra^{2}k(bra^{3}ch^2)-i^{2}r(u^{6}r)-ri^{2}n^2(ru^{6}n^2)′ki^{2}d(ch^{2}i^{2}d)-e(a^3-e^2). A family of *Hemiptera homoptera*. [L, 121.]

BRACHYRRHYNCHUS (Lat.), adj. Bra^{2}k(bra^{3}ch^2)-i^{2}r(u^{6}r)-ri^{2}n^2(ru^{6}n^2)′ku^{3}s(ch^{2}u^{4}s). From βραχύς, short, and ῥύγχος, the snout. Fr., *brachyrrhynque*. Having a short beak or beak-like process. [L, 41, 109.]

BRACHYSCII (Lat.), n. m. pl. Bra^{2}k(bra^{3}ch^2)-i^{2}s(u^{6}s)′si^2(ki^2)-i(e). Gr., βραχύσκιοι (from βραχύς, short, and σκιά, a shadow). Ger., *kurzschattige Völker*. The equatorial races of men; so called because their shadows are commonly short in consequence of the position of the sun. [A, 322.]

BRACHYSOME (Fr.), adj. Bra^{3}k-i^2-som. From βραχύς, short, and σῶμα, the body. Having a short body. [A, 385.]

BRACHYSTACHYUS (Lat.), adj. Bra^{2}k(bra^{3}ch^2)-i^2(u^6)-sta^{2}k-(sta^{3}ch^2)′i^2(u^6)-u^{3}s(u^{4}s). From βραχύς, short, and σταχύινος, pertaining to an ear of corn. Fr., *brachystachie*. Ger., *kurzährig*. Having short ears (as of corn). [L, 41.]

BRACHYSTELMA (Lat.), n. n. Bra^{2}k(bra^{3}ch^2)-i^2(u^6)-ste^{2}l′ma^3. Gen., *brachystel′matos* (*-tis*). Of R. Brown, a genus of asclepiadaceous plants of the tribe *Ceropegieæ*. [B, 42.]—**B. comaru** [E. Meyer]. The *comaru* of the Hottentots; a species growing at the Cape of Good Hope. [B, 214.]—**B. cusprum** [Graham]. The *kukuno* of the Hottentots; a species growing at the Cape of Good Hope. [B, 214.]—**B. macrorrhizum** [E. Meyer]. A South African species; the *kuu* of the Hottentots. [B, 214.]

BRACHYSTEMUM [Michaux] (Lat.), n. n. Bra^{2}k(bra^{3}ch^2)-i^{2}s(u^{6}s)′te^{2}m-u^{3}m(u^{4}m). See Pycnanthemum.

BRACHYSTOCEPHALUS (Lat.), adj. Bra^{2}k(bra^{3}ch^2)-i^{2}st-(u^{6}st)″o(o^2)-se^{2}f(ke^{2}f)′a^{2}l(a^{3}l)-u^{3}s(u^{4}s). An improper form of *brachistocephalus* (*q. v.*).

BRACHYSTOMUS (Lat.), adj. Bra^{2}k(bra^{3}ch^2)-i^{2}s(u^{6}s)′to(to^2)-mu^{3}s(mu^{4}s). Gr., βραχύστομος (from βραχύς, short, and στόμα, the mouth). Fr., *brachystome*. Having a short mouth. [A, 385; L, 41.]

BRACHYTARSI (Lat.), n. m. pl. Bra^{2}k(bra^{3}ch^2)-i^2(u^6)-ta^{3}rs′-i(e). From βραχύς, short, and ταρσός (see Tarsus). Fr., *brachytarses*. Ger., *Kurzfüsser*. See Lemurini.

BRACHYTOPHYTUM (Lat.), n u. Bra^{2}k(bra^{3}ch^2)-i^{2}t(u^{6}t)-o^{2}f′-i^{2}t(u^{6}t)-u^{3}m(u^{4}m). Of Necker, a genus (order) of plants comprising the species (genera) *Nasturtium*, *Lepidium*, *Thlaspi*, *Lunaria*, *Clypeola*, *Biscutella*, *Anastatica*, *Isatis*, *Cochlearia*, *Alyssum*, *Bunias*, *Draba*, *Iberis*, *Subularia*, and one or two others. [B, 170.] Cf. Cruciferæ.

BRACHYURA (Lat.), n. n. pl. Bra^{2}k(bra^{3}ch^2)-i^2(u^6)-u^2(u)′ra^3. From βραχύς, short, and οὐρά, a tail. Fr., *brachyures*. A section of the *Podophthalmia* of a flattened orbicular shape, having a short tail curved downward. [A, 385; L, 121.]

BRACHYURAL, adj. Bra^{2}k-i^2-u^2′ra^{2}l. Lat., *brachyurus*. Fr., *brachyure*. Short-tailed. [A, 385.]

BRACHYURAN, n. Bra^{2}k-i^2-u^2′ra^{2}n. Fr., *brachyure*. A member of the *Brachyura*. [L, 121.]

BRACHYURINA (Lat.), n. n. pl. Bra^{2}k(bra^{3}ch^2)-i^2(u^6)-u^2(u)-ri(re)′na^3. A tribe of the section *Trichiura*, family *Cebiidæ*, having blunt claws, soft and silky hair, large and nocturnal eyes, and the incisor teeth vertical in a regular series with the canines. [L, 272.]

BRACHYUROUS, adj. Bra^{2}k-i^2-u^2′ru^{3}s. See Brachyural.

BRACIUM, n. An alchemical name for copper. [Ruland (A, 325).]

BRACKEN, n. Bra^{2}k′e^{2}n. The brake (*Pteris aquilina*). [B, 19, 275.]—**B'distel** (Ger.). The *Eryngium campestre*. [L, 105.]—**B'distelwurzel** (Ger.). The root of *Eryngium campestre*. [B, 180.]

BRACKET, n. Bra^{2}k′e^{2}t. O. Fr., *braquet*. A splint-like apparatus for supporting or immobilizing a joint. [Stillman, "Trans. of the Am. Med. Assoc.," 1881.]

BRACONIDÆ (Lat.), n. f. pl. Bra^{2}k(bra^{3}k)-o^{2}n′i^{2}d-e(a^3-e^2). Fr., *braconides*, *braconoïdes*. A family of the *Spiculifera*. [L, 121.]

BRACT, n. Bra^{2}kt. Lat., *bractea*. Fr., *bractée*. Ger., *Deckblatt*, *Nebenblatt*. It., *brattea*. Sp., *bractea*. 1. In botany, a modified leaf from the axil of which a flower or its pedicel springs. [A, 354.] 2. In zoology, see Hydrophyllium.

BRACTEA (Lat.), n. f. Bra^{2}k(bra^{3}k)′te^2-a^3. 1. A thin sheet of metal. 2. A bract. [A, 322.]

BRACTÉAIRE (Fr.), **BRACTÉAL** (Fr.), adj's. Bra^{3}k-ta-a^{2}r, -a^{3}l. Pertaining to or of the nature of bracts. [A, 385; L, 41.]

BRACTEATE, BRACTEATED. adj's. Bra^{2}k′te-at, -at-e^{2}d. Lat., *bracteatus*. Fr., *bractéifère*. Ger., *deckblättrig*. Furnished with bracts. [A, 385.]

BRACTÉE (Fr.), n. Bra^{3}k-ta. See Bract.

BRACTEIFEROUS, adj. Bra^{2}k-te^2-i^{2}f′e^{2}r-u^{3}s. Lat., *bracteiferus* (from *bractea*, a bract, and *ferre*, to bear). Fr., *bractéifère*. See Bracteate.

BRACTEIFORM, adj. Bra^{2}k′te^2-i^2-fo^{2}rm. Lat., *bracteiformis* (from *bractea*, a bract, and *forma*, form). Fr., *bractéiforme*. Ger., *deckblattförmig*. Resembling a bract. [A, 385; L, 43.]

BRACTEOLATE, adj. Bra^{2}k-te′o-lat. Lat., *bracteolatus*. Fr., *bractéolé*, *bractéolaire*. Provided with bracteoles. [L, 41, 109.]

BRACTEOLE, n. Bra^{2}k′te-ol. Lat., *bracteola*. Fr., *bractéole*. A small bract, especially the innermost of several bracts; in a compound inflorescence, the bract of a secondary pedicel. [B, 1, 13.]

BRACTÉTÉ (Fr.), adj. Bra^{3}k-ta-ta. See Bracteate.

BRACTIIFLORÆ (Lat.), n. f. pl. Bra^{2}k(bra^{3}k)-ti^2-i^2-flor'e-(a^3-e^2). 1. Of Link, a section of grasses including the single genus *Bambusa*. 2. Of Fries, a class of plants (*Incompletæ*) comprising the families *Aristolochiaceæ*, *Santalaceæ*, *Thymeleæ*, *Eleagneæ*, *Artocarpeæ*, *Ulmaceæ*, *Urticaceæ*, *Amaranthaceæ*, and *Chenopodiaceæ*. [B, 170.]

BRACTLESS, adj. Bra^{2}kt'le^{2}s. Destitute of bracts. [L, 56.]

BRACTLET, n. Bra^{2}kt'le^{2}t. See BRACTEOLE.

BRADÆSTHESIA (Lat.), n. f. Bra^{2}d(bra^{3}d)-e^{2}s(a^3-e^{2}s)-the-(tha)'zi^2(si^2)-a^3. See BRADYÆSTHESIA.

BRADA-KÉMA, n. An Afghanistan name for the *Ferula galbaniflua*. [J. E. T. Aitchison, "Pharm. Jour. and Trans.," Dec. 11, 1886, p. 465; "Am. Jour. of Pharm.," Jan., 1887, p. 38.]

BRADFORD, n. Bra^{2}d'fo^{2}rd. A place in Merrimack County, New Hampshire, where there are mineral springs. [A, 363.]

BRADYÆSTHESIA (Lat.), n. f. Bra^{2}d(bra^{3}d)-i^2(u^6)-e^{2}s(a^3-e^{2}s)-the(tha)'zi^2(si^2)-a^3. From βραδύς, slow, and αἴσθησις, sensory perception. Blunted sensibility. [A, 322.]

BRADYARTHRIA (Lat.), n. f. Bra^{2}d(bra^{3}d)-i^2(u^6)-a^{3}rth'ri^2-a^3. From βραδύς, slow, and ἀρθροῦν, to articulate. See BRADYLALIA.

BRADYBOLICUS (Lat.), adj. Bra^{2}d(bra^{3}d)-i^2(u^6)-bo^{2}l'i^{2}k-u^{3}s-(u^{4}s). Pertaining to or affected with bradybolismus (*q. v.*). [A, 322.]

BRADYBOLISMUS (Lat.), n. m. Bra^{2}d(bra^{3}d)-i^2(u^6)-bo^{2}l-i^{2}z-(i^{2}s)'mu^{3}s(mu^{4}s). From βραδύς, slow, and βάλλειν, to throw. Ger., *erschwerte Ausspritzung des Samens.* A condition in which the ejaculation of semen takes place slowly and with difficulty. [A, 322.]

BRADYCAUMA (Lat.), n. n. Bra^{2}d(bra^{3}d)-i^2(u^6)-ka^4'(ka^3'u^4)-ma^3. Gen., *bradycau'matos (-tis)*. From βραδύς, slow, and καῦμα, a burning. Ger., *Moxabrandwunde*. 1. The effect of a slow burning, as with the moxa. [A, 322.] 2. See BRADYCAUTERIUM.

BRADYCAUSIS (Lat.), n. f. Bra^{2}d(bra^{3}d)-i^2(u^6)-ka^4'(ka^3'u^4)-si^{2}s. Gen., *bradycau'seos (-sis)*. From βραδύς, slow, and καῦσις, a burning. 1. A slow burning. 2. The application of a moxa. [A, 322.]

BRADYCAUSTICUM, BRADYCAUTERIUM (Lat.), n's n. Bra^{2}d(bra^{3}d)-i^2(u^6)-ka^{4}s'(ka^3'u^{4}s)-ti^{2}k-u^{3}m(u^{4}m), -ka^4(ka^3-u^4)-te(ta)'-ri^2-u^{3}m(u^{4}m). From βραδύς, slow, and καυστικός, capable of burning, or καυτήριον, a branding-iron. Ger., *langsames Brennmittel*. A slow caustic, such as a moxa. [A, 322.]

BRADYECOIA (Lat.), n. f. Bra^{2}d(bra^{3}d)-i(u^6)-e^{2}k(ak)-o(o^2)'-i^2-a^3. From βραδυήκοος, hard of hearing. Ger., *Schwerhören*. Difficulty of hearing. [F.]

BRADYFIBRIN, n. Bra^{2}d-i^2-fi'bri^{2}n. From βραδύς, slow, and *fibrin* (*q. v.*). Fr., *bradyfibrine*. It., *bradifibrina*. A term applied by Polli to the coagulative material of the blood in cases of "buffy coat." [K.]

BRADYLALIA (Lat.), n. f. Bra^{2}d(bra^{3}d)-i^2(u^6)-la^{2}l(la^{3}l)'i^2-a^3. From βραδύς, slow, and λαλεῖν, to talk. Ger., *Bradylalie, langsames Sprechen*. Abnormal slowness of speech. [D, 18.]—**B. interrupta.** A form characterized by decided pauses between syllables. [D, 18.]

BRADYLOGIA (Lat.), n. f. Bra^{2}d(bra^{3}d)-i^2(u^6)-loj(lo^{2}g)'i^2-a^3. Gr., βραδυλογία. See BRADYLALIA.

BRADYMASESIS (Lat.), n. f. Bra^{2}d(bra^{3}d)-i^2(u^6)-ma^{2}s(ma^{3}s)-e(a)'si^{2}s. Gen., *bradymase'seos (-sis)*. Gr., βραδυμάσησις (from βραδύς, slow, and μασᾶσθαι, to chew). Ger., *langsames und erschwertes Kauen*. Slow and difficult mastication. [A, 322.]

BRADYNOSOS, BRADYNOSUS (Lat.), n's f. Bra^{2}d(bra^{3}d)-i^{2}n(u^{6}n)'o(o^2)-so^{2}s, -su^{3}s(su^{4}s). From βραδύς, slow, and νόσος, disease. A chronic disease. [A, 322.]

BRADYPEDÆ (Lat.), n. f. pl. Bra^{2}d(bra^{3}d)-i^{2}p(u^{6}p)'e^{2}d-e-(a^3-e^2). From βραδύς, slow, and *pes*, the foot. See BRADYPODIDÆ.

BRADYPEPSIA (Lat.), n. f. Bra^{2}d(bra^{3}d)-i^2(u^6)-pe^{2}p'si^2-a^3. Gr., βραδυπεψία. Fr., *bradypepsie*. Ger., *Bradypepsie*. Slow or difficult digestion. [A, 322; K.]

BRADYPEPTICUS, BRADYPEPTUS (Lat.), adj's. Bra^{2}d-(bra^{3}d)-i^2(u^6)-pe^{2}p'ti^{2}k-u^{3}s(u^{4}s), -pe^{2}p'tu^{3}s(tu^{4}s). 1. Slow of digestion (said of food). 2. Pertaining to or affected with bradypepsia. [A, 322.]

BRADYPHASIA, BRADYPHRASIA (Lat.), n's f. Bra^{2}d-(bra^{3}d)-i^2(u^6)-faz(fa^{3}s)'i^2-a^3, -fraz(fra^{3}s)'i^2-a^3. From βραδύς, slow, and φάσις or φράσις, speech. Fr., *bradyphasie, bradyphrasie*. See BRADYLALIA.

BRADYPNŒA (Lat.), n. f. Bra^{2}d(bra^{3}d)-i^{2}p(u^{6}p)-ne'(no^2'e^2)-a^3. From βραδύς, slow, and πνεῖν, to breathe. Fr., *bradypnée*. Slowness and difficulty of breathing. [A, 322.]

BRADYPNOOS, BRADYPNUS (Lat.), adj's. Bra^{2}d(bra^{3}d)-i^{2}p(u^{6}p)'no(no^2)-o^{2}s, -nu^{3}s(nus). Gr., βραδύπνοος, βραδυπνους. Affected with bradypnœa. [A, 322.]

BRADYPODA (Lat.), n. n. pl. Bra^{2}d(bra^{3}d)-i^{2}p(u^{6}p)'o^{2}d-a^3. See BRADYPODIDÆ.

BRADYPODAL, adj. Bra^{2}d-i^{2}p'o^{2}d-a^{2}l. Belonging to or resembling the *Bradypodidæ*. [L, 14.]

BRADYPODIDÆ (Lat.), n. f. pl. Bra^{2}d(bra^{3}d)-i^2(u^6)-po^{2}d'i^{2}d-e(a^3-e^2). From βραδύπους, slow of foot. Fr., *paresseux*. Ger., *Faulthiere*. The sloths; a family of the *Edentata*. [L, 121.]

BRADYPTERI (Lat.), n. m. pl. Bra^{2}d(bra^{3}d)-i^{2}p(u^{6}p)'te^{2}r-i(e). From βραδύς, slow, and πτερόν, a wing. A group of the *Turdiformes*. [L, 278.]

BRADYSPERMATISMUS (Lat.), n. m. Bra^{2}d(bra^{3}d)-i^2(u^6)-spu^{5}rm(spe^{2}rm)-a^{2}t(a^{3}t)-i^{2}z(i^{2}s)'mu^{3}s(mu^{4}s). From βραδύς, slow, and σπέρμα, semen. Fr., *bradyspermatisme*. See BRADYBOLISMUS.

BRADYSURIA (Lat.), n. f. Bra^{2}d(bra^{3}d)-i^{2}s(u^{6}s)-u^2(u)'ri^2-a^3. From βραδύς, slow, and οὐρεῖν, to pass urine. Slow and difficult urination. [A, 322.]

BRADYTROPHIQUE (Fr.), adj. Bra^{3}d-i^2-trof-ek. From βραδύς, slow, and τροφή, nutrition. A term proposed by Landouzy (in the expression *diathèse b.*) to denote various conditions of the system characterized by retarded metamorphosis. [Lannois, "Rev. de méd.," June, 1882, p. 555.]

BRADYURIA (Lat.), n. f. Bra^{2}d(bra^{3}d)-i^2(u^6)-u^2(u)'ri^2-a^3. Fr., *bradyurie*. See BRADYSURIA.

BRAGA (Port.), n. Bra^3'ga^3. A place in Portugal where there is a ferruginous and sulphurous spring. [A, 385; L, 49.]

BRAGANTIA (Lat.), n. f. Bra^{2}g(bra^{3}g)-a^{2}n(a^{3}n)'shi^2(ti^2)-a^3. Fr., *bragantie*. A genus of aristolochiaceous plants growing in tropical Asia. [A, 385.]—**B. tomentosa.** A Java species, used as a tonic and emmenagogue. [A, 321; L, 107.]—**B. Wallichii** [R. Brown]. A species the leaves of which are used for ulcers, skin diseases, and snake-bites. [A, 321; B, 172.]

BRAGANTIEÆ (Lat.), n. f. pl. Bra^{2}g(bra^{3}g)-a^{2}nt(a^{3}nt)-i(i^2)'-e^2-e(a^3-e^2). Fr., *bragantiées*. Of Reichenbach, a subdivision of the *Aristolochiaceæ* (*q. v.*) comprising the single genus *Bragantia*. [B, 170.]

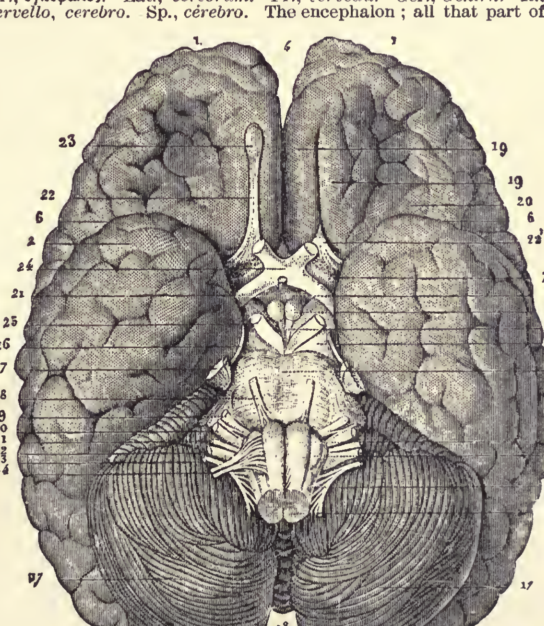
BRAGGAT, n. A drink made of honey and water. [L, 84.]

BRAGUE (Fr.), n. Bra^{3}g. The scrotum. [A, 385.]

BRAHMADAREHA (Sanscr.), n. The *Sison ammi*. [L, 105.]

BRÁHMAMANDUKI, n. An East Indian name for the *Hydrocotyle asiatica*. ["Lancet," Mar. 7, 1885, p. 444.]

BRAHMI (Sanscr.), n. The *Ruta graveolens*. [L, 105.]



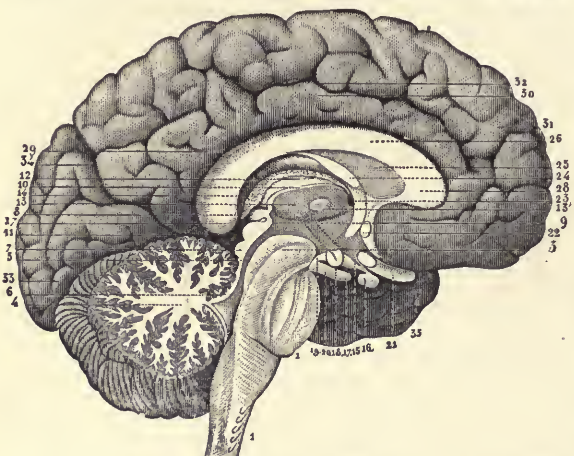
BRAI (Fr.), n. Bre^2. Pitch, tar. [A, 385.]—**B. gras artificiel.** A mixture of tar, rosin, and pitch. [A, 385.]—**B. gras naturel.** Bitumen obtained from asphalt. [A, 385.]—**B. liquide.** Tar. [A, 385.]—**B. sec.** Rosin. [A, 385.]

BRAIDISM, n. Brad'i^{2}zm. Lat., *braidismus*. Fr., *braidisme*. Hypnotism; so called in honor of J. Braid, who wrote of it under the title of *neurypnology*. [A, 385; A Forel, "Corresp.-Bl. f. schw. Aerzte," No. 16, 1887; "Ctrlbl. f. d. ges. Therap.," Oct., 1887, p. 567; D.]

BRAIE (Fr.), n. Bre^2. See ENTRE-FESSES.

BRAIME (Fr.), adj. Bre^{2}m. Barren (said of the female). [L, 109.]

BRAIN, n. Bran. A.-S., *bragen, brægen, bregen*. Dan., *brein*. Gr., ἐγκέφαλος. Lat., *cerebrum*. Fr., *cerveau*. Ger., *Gehirn*. It., *cervello, cerebro*. Sp., *cérebro*. The encephalon; all that part of



THE BASE OF THE BRAIN. (FROM RANNEY, AFTER HIRSCHFELD.)

1, 1, anterior lobe of the cerebrum; 2, sphenoidal portion of the posterior lobe; 3, 3, occipital portion of the same lobe; 4, anterior extremity of the median fissure; 5, posterior extremity of the same; 6, 6, fissure of Sylvius; 7, anterior perforated space; 8, tuber cinereum and pituitary body; 9, corpora albicantia; 10, interpeduncular space (posterior perforated space); 11, crura cerebri; 12, pons Varolii; 13, medulla oblongata; 14, anterior pyramids; 15, olivary body; 16, restiform body (only partially visible); 17, 17, hemispheres of the cerebellum; 18, fissure separating these hemispheres; 19, 19, first and second convolutions of the inferior aspect of the frontal lobe with the intervening sulcus; 20, external convolutions of the frontal lobe; 21, optic tract; 22, olfactory nerve; 22', section of the olfactory nerve, showing its triangular prismatic shape: the trunk has been raised to show the sulcus in which it is lodged; 23, ganglion of the olfactory nerve; 24, optic chiasm; 25, motor oculi; 26, patheticus; 27, trigeminus; 28, abducens; 29, facial; 30, auditory nerve and nerve of Wrisberg; 31, glosso-pharyngeal; 32, pneumogastric; 33, spinal accessory; 34, hypoglossal.

the central nervous system which is contained within the skull, comprising the cerebrum and the cerebellum; a soft mass of white

nervous matter coated with a layer (cortex) of gray matter, convoluted on its surface. See CEREBRUM and CEREBELLUM.—**Abdominal b.** Ger., *Gehirn des Unterleibs.* The solar plexus. [A, 355.]—**After-b.** See METENCEPHALON.—**B.-bladders.** The cerebral vesicles. [L, 146].—**B.-case, B.-chamber.** That part of the skull which incloses the b. [L, 73, 121.]—**B.-like.** See ENCEPHALOID.—**B.-pan.** See *B.-case.*—**B.-sand.** Lat., *acervulus cerebri.* Fr., *sablier du cerveau.* Ger., *Hirnsand.* The calcareous particles found in the follicles of the epiphysis cerebri and sometimes also in the chorioid plexuses. [I, 15 ; K.] Cf. ACERVULUS *cerebri.*—**Chronic b.-wasting.** Of Crichton Browne, a form of mental disorder characterized mainly by confusion, failure of the memory, inability to concentrate the attention, and general inertia. [D, 36.]—**Fore-b.** See PROSENCEPHALON.—**Great b.** See CEREBRUM.—**Hind-b.** See EPENCEPHALON.—**Inter-b.** See DIENCEPHALON and THALAMENCEPHALON.—**Little b.** See CEREBELLUM.—**Mid-b.** See MESEN-

A VERTICAL SECTION OF THE BRAIN. (FROM FLINT, AFTER HIRSCHFELD.)

1, medulla oblongata; 2, tuber annulare; 3, cerebral peduncle; 4, cerebellum; 5, aqueduct of Sylvius; 6, valve of Vieussens; 7, tubercula quadrigemina; 8, pineal gland; 9, inferior peduncle; 10, superior peduncle; 11, middle portion of the great cerebral fissure; 12, optic thalamus; 13, 13, gray commissure; 14, chorioid plexus; 15, infundibulum; 16, pituitary body; 17, tuber cinereum; 18, bulb of the fornix; 19, anterior perforated space; 20, root of the motor oculi communis; 21, optic nerve; 22, anterior commissure of the cerebrum; 23, foramen of Monro; 24, section of the fornix; 25, septum lucidum; 26, 27, 28, corpus callosum; 29, 30, 31, 32, 33, 34, convolutions and sulci of the cerebrum. The olfactory ganglia and corpora striata are not shown in this section.

CEPHALON.—**Railway b.** A neurosis resulting from shock in railway employees. In a case reported by Thomsen, of Berlin, the leading symptoms were anæsthesia, impaired sensory perceptions, subsequently insomnia, cranial and spinal hyperæsthesia, paresis, and spasms of the region supplied by the facial nerve. ["Med. News," Sept. 3, 1887, p. 273.]—**Twixt-b.** See DIENCEPHALON and THALAMENCEPHALON.

BRAINVILLIÈRE (Fr.), n. Bra^{2}n^2-vel-ye^{2}r. The *Spigelia anthelmia.* [B, 173.]

BRAIRELLE (Fr.), **BRAIRÈTE** (Fr.), **BRAIRETTE** (Fr.), n's. Bra^{2}r-e^{2}l, -e^{2}t. The *Primula officinalis.* [B, 173 ; L, 41, 77.]

BRAISE (Fr.), n. Bre^{2}z. Ignited charcoal. [A, 385 ; L, 41.]

BRAKE, n. Brak. A common name for several ferns. [B, 5.]—**B.-fern.** The *Pteris aquilina.* [B, 275.]—**B'root.** The *Polypodium vulgare.* [B, 275.]—**Common b.** See *B.-fern.*—**Rock-b.** The *Allosorus crispus.* [B.]

BRAMADARBHA (Sanscr.), n. See BRAHMADAREHA.

BRAMBLE, n. Bra^{2}mbl. A.-S., *brembel.* A common name for various species of *Rubus* and other prickly shrubs. [B, 19.]—**Arctic b.** The *Rubus arcticus.* [B, 275.]—**Blue b.** The *Rubus cæsius.* [B, 275.]—**Canadian b.** The *Rubus canadensis.* [B, 275.]—**Dog-b.** The *Ribes cynosbati.* [B, 19, 275.]—**Double-flowered b.** The *Rubus discolor.* [B, 275.]—**Dwarf crimson-flowered b.** The *Rubus arcticus.* [B, 275.]—**Hawthorn-leaved b.** The *Rubus cratægifolius.* [B, 275.]—**Japanese climbing b.** The *Rubus phœnicolasius.* [B, 275.]—**Mountain b.** The *Rubus chamæmorus.* [B, 19.]—**Nepal b.** The *Rubus nepalensis.* [B, 275.]—**New Zealand b.** The *Rubus australis.* [B, 275.]—**Nootka Sound b.** The *Rubus nutkanus.* [B, 275.]—**Purple-flowered b.** The *Rubus odoratus.* [B, 275.]—**Rose-leaved b.** The *Rubus rosæfolius.* [B, 275.]—**Rosy-flowered b., Showy-flowered b.** The *Rubus spectabilis.* [B, 275.]—**Showy white-flowered b.** The *Rubus deliciosus.* [B, 275.]—**Stone-b.** The *Rubus saxatilis.* [B, 275.]—**Sweet-scented b.** The *Rubus odoratus.* [B, 275.]

BRAMEE (Hind.), n. The *Sarcostemma brevistigma.* [B, 172.]

BRAMI, n. The *Herpestes monneria.* [L, 105.]

BRAMIA (Lat.), n. f. Bra^{3}m'i^2-a^3. From the East Indian name *brami.* Fr., *bramie.* A genus or subgenus of scrophulariaceous plants. [L, 73.]—**B. indica** [Lamarck]. The *Herpestes monneria.* [B, 180.]

BRAMSTEDT, n. A place in Denmark, where there is an alkaline ferruginous spring. [A, 385 ; L, 49.]

BRAN, n. Bra^{2}n. Gr., πίτυρον. Lat., *furfur.* Fr., *son.* Ger., *Kleie.* It., *crusca.* Sp., *salvado.* A collection of the epidermic scales separated from grain by bolting. In the form of unbolted flour, b. is made into bread, which is eaten as a corrective of constipation and for the additional nutriment contained in the b.; by itself, in hot infusion (b.-tea) it is used as a demulcent application. It is also used for making poultices. [A, 301, 385.]—**B.-cell.** See under CELL.

BRANCA (Lat.), n. f. Bra^{2}n^2(bra^{3}n^2)'ka^3. Perhaps from *bracca*, or *braca*, breeches, trowsers, or from L. Lat. *branca*, a claw. Fr., *branc, branche.* A name given to certain plants the leaves of which have been fancied to resemble the claws of some animal. [L, 56.]—**B. germanica.** See *B. ursina spuria.*—**B. leonis.** Ger., *Löwenfuss.* The *Alchemilla vulgaris.* [B, 180.]—**B. lupina.** Ger., *Wolfsschweif, Löwenschweif.* The *Leonurus cardiaca.* [B, 180.]—**B. spuria, B. ursi, B. ursina germanica, B. ursina spuria.** Ger., *gemeine Bärenklaue, Bärentatze.* The *Heracleum sphondylium.* [B, 180.]—**B. ursina vera, B. vera.** See ACANTHUS *mollis.*

BRANCARD, n. Bra^{2}n^2'ka^{3}rd. Fr., *brancard.* A light stretcher or litter for the transportation of sick and injured persons. [A, 385.]—**B. pliant** (Fr.). A folding b. [Wahl (A, 244).]

BRANCARDIER (Fr.), n. Bra^{3}n^2-ka^{3}rd-i^2-a. A soldier detailed to assist in carrying the sick and wounded on brancards. [Percy (A, 244).]

BRANCH, n. Bra^{3}nch. Gr., ἔρνος, κλάδος. Lat., *ramus.* Fr., *branche.* Ger., *Ast.* It., Sp., *ramo.* An outgrowth or prolongation from a main trunk or structure ; one of two or more divisions of a main stem, as of a plant, an artery, a nerve, a bronchial tube, etc.

BRANCHÆ (Lat.), n. f. pl. Bra^{2}n^2(bra^{3}n^2)'ke(ch^{2}a^3-e^2). From βράγχος, hoarseness. An old term for swollen tonsils. [Rolandus (A, 325).] Cf. BRANCUS.

BRANCHE (Fr.), n. Bra^{3}n^{2}sh. A branch (*q. v.*), also either part of an instrument (like a forceps or a pair of scissors) composed of two jointed parts. [A, 385.]—**B. femelle.** Of an obstetrical forceps, that one of the two separate portions which bears the mortise of the lock. [A, 385.]—**B. mâle.** Of an obstetrical forceps, that portion which bears the device for locking in the mortise of the other portion. [A, 385.]

BRANCHELLIANÆ, BRANCHELLIDÆ (Lat.), n's f. pl. Bra^{2}n^2(bra^{3}n^2)-ke^{2}l(ch^{2}e^{2}l)-li^2-a(a^3)'ne(na^3-e^2), -ke^{2}l(ch^{2}e^{2}l)'li^{2}d-e-(a^3-e^2). Fr., *branchelliennes.* A family of the *Hirudinacea* having gill-like lobes on each side of the segments. [L, 261.]

BRANCHE-URSINE (Fr.), n. Bra^{3}n^{2}sh-u^{6}r-sen. See BRANCA *ursina.*

BRANCHI (Lat.), n. m. pl. Bra^{2}n^2(bra^{3}n^2)'ki(ch^{2}e). See BRANCHÆ.

BRANCHIA (Lat.), n. n. pl. Bra^{2}n^2(bra^{3}n^2)'ki^2(ch^{2}i^2)-a^3. See BRANCHIÆ.

BRANCHIÆ (Lat.), n. f. pl. Bra^{2}n^2(bra^{3}n^2)'ki^2(ch^{2}i^2)-e(a^3-e^2). Gr., βράγχια. Fr., *branchies.* Ger., *Kiemen.* It., *branchie.* Sp., *branquias.* The gills of fishes ; the respiratory organs of fishes and of the *Perennibranchiata* and the *Caducibranchiata.* They consist essentially of folds of mucous membrane richly supplied with capillary blood-vessels, and are generally supported by an osseous or cartilaginous framework (see *Branchial* ARCHES and *Branchial* BASKET). In fishes they are contained as a rule in the branchial cavities, or chambers, but in the *Perennibranchiata* they are external. [L, 12, 147, 207, 227.] Cf. *Branchial* FILAMENTS.—**B. trachealcs.** The temporary gills of the aquatic larvæ of certain insects ; membranous cylinders or laminæ containing tracheal tubes. [L, 296.]—**Fixed b.** Fr., *branchies fixes.* B. so attached to the sides of the branchial arches that a cavity is formed in each cleft opening by a separate aperture. [L, 158.]—**Free b.** Fr., *branchies libres.* B. opening into a common cavity. [L, 158.]—**Intestinal b.** Fr., *branchies intestinaux.* Folds of mucous membrane in the rectum of the aquatic larvæ of certain insects, containing tracheæ. [L, 158.]—**Lymphatic b.** Fr., *branchies lymphatiques.* In the *Annelida*, plate-like processes containing a great number of canals and lacunæ connecting with the general body cavity and containing the same fluid. [L, 158.]—**Opercular b.** Fr., *branchies operculaires.* Supplemental b. attached to the inner surface of the operculum in certain fishes. [L, 147.]—**Pseudo-b.** The remnants of b. which preceded the permanent ones and have lost their respiratory function ; in adult fishes they are the *retia mirabilia*, containing arterial blood. [L, 207.]—**Pulmo-b.** Peculiarly modified respiratory tracheæ in insects, consisting of a sac containing a great number of lamellæ freely supplied with blood-vessels, in which the blood is aerated. [L, 121.]

BRANCHIAL, adj. Bra^{3}n^2'ki^2-a^{2}l. Lat., *branchialis.* Fr., *branchial.* Pertaining to the branchiæ or to the b. arches or fissures. [A, 301, 385.]

BRANCHIATA (Lat.), n. n. pl. Bra^{2}n^2(bra^{3}n^2)-ki^2(ch^{2}i^2)-a(a^3)'-ta^3. Fr., *branchiés.* 1. Of Cuvier and Ficinus, an order of *Amphibia*, embracing those that breathe by means of branchiæ. [L, 180.] 2. A class of the *Annelida.* [L, 121.] 3. Of Vogt, an order of the *Gasteropoda.* [L, 231.]

BRANCHIATE, adj. Bra^{3}n^2'ki^2-at. Lat., *branchiatus.* Fr., *branchié, branchifère.* Ger., *Kiementragend.* Provided with branchiæ. [L, 147.]

BRANCHIATI (Lat.), n. m. pl. Bra^{2}n^2(bra^{3}n^2)-ki^2(ch^{2}i^2)-a-(a^3)'ti(te). Of Leuckart; on order of the *Annelida.* [L, 204, 231.]

BRANCHICOLUS (Lat.), adj. Bra^{2}n^2(bra^{2}n^2)-ki^{2}k(ch^{2}i^{2}k)'ol-(o^{2}l)-u^{3}s(u^{4}s). From βράγχια, gills, and *colere*, to inhabit. As a species name, inhabiting the gill-cavity (said of the parasites of fishes). [L, 207.]

BRANCHIDEPRESSOR (Lat.), n. m. Bra^{2}n^2(bra^{3}n^2)''ki^2-(ch^{2}i^2)-de(de^2)-pre^{2}s'so^{2}r. Gen., *branchidepresso'ris.* For deriv.,

see Branchiæ and Depressor. In certain fishes, a muscle arising from the basi-hyal bone and inserted into the cerato-branchial bones. [L, 14.]

BRANCHIES (Fr.), n. pl. Bra^{3}n^2-she. See Branchiæ.

BRANCHIFERA (Lat.), n. n. pl. Bra^{2}n^2(bra^{3}n^2)-ki^{2}f(ch^{2}i^{2}f)′e^{2}r-a^3. From *branchiæ* (*q. v.*), and *ferre*, to bear. Fr., *branchifères*. See Branchiogasteropoda.

BRANCHIFEROUS, BRANCHIGEROUS, adj's. Lat., *branchiferus*, *branchiger* (from *branchiæ* [*q. v.*], and *gerere*, to bear). See Branchiate.

BRANCHILEVATOR (Lat.), n. m. Bra^{2}n^2(bra^{3}n^2)′′ki^2(ch^{2}i^2)-le^2-va(wa^3)′to^{2}r. Gen., *branchilevato′ris*. For deriv., see Branchiæ and Levator. In certain fishes, a muscle arising from the pro-otic bone and inserted into the epibranchial bones by a fasciculus to each. [L, 14.]

BRANCHIOBDELLIDÆ (Lat.), n. f. pl. Bra^{2}n^2(bra^{3}n^2)-ki^2-(ch^{2}i^2)-o(o^2)-de^{2}l(bde^{2}l)′li^{2}d-e(a^3-e^2). From βράγχια (see Branchiæ), and βδέλλα, a leech. A family of *Hirudinei*, usually ectoparasitic. [L, 121.]

BRANCHIO-CARDIAC, adj. Bra^{3}n^2′′ki^2-o-ka^{3}rd′i^2-a^{2}k. From βράγχια (see *branchiæ*) and καρδία, the heart. Fr., *branchiocardiaque*. Pertaining to the branchial and cardiac regions. [L, 11.] Cf. *B.-c.* groove.

BRANCHIODELA (Lat.), n. n. pl. Bra^{2}n^2(bra^{3}n^2)-ki^2(ch^{2}i^2)-o(o^2)-de(da)′la^3. From βράγχια (see Branchiæ), and δῆλος, visible. Fr., *branchiodèles* [Duméril]. A family of worms having external respiratory organs. [L, 180.]

BRANCHIODELOUS, adj. Bra^{3}n^2-ki^2-o-de′lu^{3}s. Lat., *branchiodelus*. Fr., *branchiodèle*. Having external branchiæ. [L, 41.]

BRANCHIODES (Lat.), adj. Bra^{2}n^2(bra^{3}n^2)-ki^2(ch^{2}i^2)-o′dez-(das). See Branchioid.

BRANCHIOGASTEROPODA (Lat.), n. n. pl. Bra^{2}n^2-(bra^{3}n^2)′′ki^2(ch^{2}i^2)-o(o^2)-ga^{2}s(ga^{3}s)-te^{2}r(tar)-o^{2}p′o^{2}d-a^3. From βράγχια (see Branchiæ), γαστήρ, the belly, and πούς, a foot. Fr., *branchiogasteropodes*. A subclass of the *Gasteropoda*, characterized by aquatic respiration and a hæmal flexure of the intestine; divided into the orders *Prosobranchiata*, *Opisthobranchiata*, and *Nucleobranchiata* (*Heteropoda*). [L, 11, 147.]

BRANCHIOGASTRA (Lat.), n. n. pl. Bra^{2}n^2(bra^{3}n^2)-ki^2-(ch^{2}i^2)-o(o^2)-ga^{2}s(ga^{3}s)′tra^3. From βράγχια (see Branchiæ), and γαστήρ, the belly. Fr., *branchiogastres* [Latreille]. An order of the *Crustacea* having the branchiæ below the abdomen. [L, 180.]

BRANCHIOID, adj. Bra^{3}n^2′ki^2-oid. Gr., βραγχιοειδής (from βράγχια, gills, and εἶδος, resemblance). Lat., *branchioides*, *branchiodes*, *branchodes*. Fr., *branchioïde*. Ger., *kiemenartig*. Resembling gills. [A, 322, 387.]

BRANCHIOMERISM, n. Bra^{3}n^2-ki^2-o^{2}m′e^{2}r-i^{2}zm. From βράγχια (see Branchiæ), and μερισμός, division. A division into segments corresponding to the branchial arches. [L, 294.]

BRANCHIO-PALLIAL, adj. Bra^{3}n^2′′ki^2-o-pa^{2}l′li^2-a^{2}l. From *branchiæ* (*q. v.*), and *pallium*, a mantle. Pertaining to the branchiæ and the pallium. [L, 11.]

BRANCHIOPHORE (Fr.), adj. Bra^{3}n^2-shi^2-o-for. From βράγχια (see Branchiæ), and φορεῖν, to bear. See Branchiate.

BRANCHIOPNONTES (Fr.), n. pl. Bra^{3}n^2-shi^2-o^{2}p-no^{2}nt. From βράγχια (see Branchiæ), and πνεῖν, to breathe. All invertebrate animals which breathe by means of branchiæ. [L, 41.]

BRANCHIOPOD, adj. Bra^{2}n^2′ki^2-o-po^{2}d. See Branchiopodous; as a n., in the pl., *b's*, see Branchiopoda.

BRANCHIOPODA (Lat.), n. n. pl. Bra^{2}n^2(bra^{3}n^2)-ki^2(ch^{2}i^2)-o^{2}p′o^{2}d-a^3. From βράγχια (see Branchiæ), and πούς, a foot. Fr., *branchiopodes*. Ger., *kiemenfüssige Krebse*. A division, or legion, of the *Entomostraca*, comprising, according to Haeckel, the *Archicarida*, *Phyllopoda*, *Trilobita*, *Cladocera*, and *Ostracoda*. Of Cuvier, an order of the *Entomostraca*; of Lamarck, a suborder of the *Heterobranchiata*. According to others, it embraces the *Cladocera*, *Phyllopoda*, *Trilobita*, and *Merostoma*. Still others regard it as a division of the *Crustacea* containing only the *Phyllopoda* and *Cladocera*. Huxley considers the formation of the group as of doubtful propriety. The branchiæ are numerous and attached to the legs. [L, 11, 147, 173, 201, 231.]

BRANCHIOPODIFORMIS [Kirby] (Lat.), adj. Bra^{2}n^2-(bra^{3}n^2)′′ki^2(ch^{2}i^2)-o(o^2)-po^{2}d-i^2-fo^{2}rm′i^{2}s. From βράγχια (see Branchiæ), πούς, a foot, and *forma*, form. Fr., *branchiopodiforme*. Apodous and having antennæ, a distinct head, and a flexible, transparent body with a respiratory tube posteriorly (said of larvæ). [L, 180.]

BRANCHIOPODOUS, adj. Bra^{3}n^2-ki^2-o^{2}p′o^{2}d-u^{3}s. Lat., *branchiopodus*. Fr., *branchiopode*. Ger., *kiemenfüssig*. Resembling or belonging to the *Branchiopoda*. [A, 385.]

BRANCHIOSPINES, n. pl. Bra^{3}n^2′ki^2-o-spinz. From *branchiæ* (*q. v.*), and *spina*, a spine. Fr., *branchiospines*. The so-called branchial teeth of fishes; hard, flexible prominences on the anterior border of the branchial arches. [A, 385.]

BRANCHIOSTEGAL, adj. Bra^{3}n^2-ki^2-o^{2}st′e^{2}g-a^{2}l. From βράγχια (see Branchiæ), and στέγειν, to shelter. Lat., *branchiostegus*. Fr., *branchiostège*. Protecting the branchiæ; pertaining to the gill-covers or b. rays; having an indistinct gill-opening; as a n., in the pl., *b's*, the b. rays. [L, 108, 207.]

BRANCHIOSTEGI (Lat.), n. m. pl. Bra^{2}n^2(bra^{3}n^2)-ki^2(ch^{2}i^2)-o^{2}st′e^2-ji(ge). Fr., *branchiostèges*. 1. The branchiostegans; of Linnæus and others, a class of fishes having free branchiæ and a cartilaginous skeleton. 2. The branchiostegal rays. [L.]

BRANCHIOSTEGITE, n. Bra^{3}n^2-ki^2-o^{2}st′e^2-jit. That portion of the carapace of a crustacean which overlies the branchiæ. [L, 11.]

BRANCHIOSTEGOUS, adj. Bra^{3}n^2-ki^2-o^{2}st′e^{2}g-u^{3}s. See Branchiostegal.

BRANCHIOSTOMA (Lat.), n. n. Bra^{2}n^2(bra^{3}n^2)-ki^2(ch^{2}i^2)-o^{2}st′-o^{2}m-a^3. From βράγχια (see Branchiæ), and στόμα, the mouth. Fr., *branchiostome*. The gill-opening. [L, 41.] See Amphioxus.—**B. lubricum.** See Amphioxus *lanceolatus*.

BRANCHIOTOCA (Lat.), n. n. pl. Bra^{2}n^2(bra^{3}n^2)-ki^2(ch^{2}i^2)-o^{2}t′o^{2}k-a^3. See Dipnoa.

BRANCHIOTROCH, n. Bra^{3}n^2′ki^2-o-tro^{2}k. From βράγχια (see Branchiæ), and τροχός, a circle. The ciliated band which, in the larva of the *Polyzoa*, lies behind the mouth. [L, 121.] Cf. Cephalotroch.

BRANCHIPODIDÆ (Lat.), n. f. pl. Bra^{2}n^2(bra^{3}n^2)-ki^2-(ch^{2}i^2)-po^{2}d′i^{2}d-e(a^3-e^2). From βράγχια (see Branchiæ), and πούς, a foot. Fr., *branchipodiens*. A family of the *Phyllopoda*. [L, 180.]

BRANCHIRETRACTORES (Lat.), n. m. pl. Bra^{2}n^2(bra^{3}n^2)′′-ki^2(ch^{2}i^2)-re^{2}t-ra^{2}k(ra^{3}k)-tor′ez(e^{2}s). For deriv., see Branchiæ and Retractor. In certain fishes, two muscular fasciculi arising from the coracoid bone and inserted into the cerato-branchial bones. [L, 14.]

BRANCHI-TRACHEAL, adj. Bra^{3}n^2-ki^2-tra^{2}k′e-a^{2}l. For deriv., see Branchiæ and Trachea. Pertaining to the branchiæ tracheales. [L, 296.]

BRANCHIURA (Lat.), n. n. pl. Bra^{2}n^{2}k(bra^{3}n^{2}ch^2)-i^2-u^2(u)′-ra^3. A family of the *Digestorii*. [L, 121.]

BRANCHLET, n. Bra^{3}nch′le^{2}t. Lat., *ramulus*. Fr., *ramule*, *ramuscule*. Ger., *Aestchen*. A small branch. [A, 301.]

BRANCHUS (Lat.), n. m. Bra^{2}n^2(bra^{3}n^2)′ku^{3}s(ch^{2}u^{4}s). Gr., βράγχος. An old term for hoarseness, also for a throat affection giving rise to hoarseness. [A, 322, 325.] Cf. Brancus.

BRANCI (Lat.), n. m. pl. Bra^{2}n(bra^{3}n^2)′si(ke). See Branchæ.

BRANC-URSINE (Fr.), n. Bra^{3}n^{2}k-u^{6}r-sen. See Branca *ursina*.

BRANCUS (Lat.), n. m. Bra^{2}n^2(bra^{3}n^2)′ku^{3}s(ku^{4}s). Paracelsus's term for a variety of angina characterized by swelling followed by ulceration. [H.] Cf. Branchus and Branchæ.

BRAND, n. Bra^{2}nd. A.-S., *brand*, *brond* (from *brinnan*, to burn). Fr., *charbon des graminées*. Ger., *Brand*. A disease of cereals, especially wheat, due to the growth of a parasitic fungus (*Uredo carbo*). [A, 301.]

BRAND (Ger.), n. Bra^{3}nd. 1. Combustion. 2. Gangrene. [E.] 3. See *B.* (Eng.).—**B'ader.** The femoral vein. [L, 80.]—**B'ähnlich.** Gangrenous. [L, 80.]—**B'balsam.** An old spirituous mixture for the prevention of gangrene. [L, 30.]—**B'beule.** A carbuncle. [E.]—**B'blase.** A bleb due to gangrene. [L, 30, 80.]—**B'blatter.** A formation of pustules with gangrenous inflammation, as in small-pox. [L, 30.]—**B'borke.** See *B'beule*.—**B. durch Aufliegen.** A bed-sore. [L, 43.]—**B'erz.** An earth made up of mercury sulphide, bituminous coal, etc. [B, 180.]—**B'fieber.** Fever due to gangrene. [Samuel (A, 319).]—**B'fleck.** A gangrenous spot. [E.]—**B'geschwür.** A gangrenous ulcer. [E.] See also Anthrax.—**B'herd.** The focus of a gangrenous part; that portion in which mortification is complete. [Samuel (A, 319).]—**B'hof.** The part surrounding the focus of a patch of gangrene, in which death of the tissues is not yet complete. [Samuel (A, 319).]—**B'icht, B'ig.** Gangrenous. [E.]—**B'igwerden.** Gangrenescence, sloughing. [A, 322; E.]—**B'jauche.** Ichor from a gangrenous part. [L. 30, 80.]—**B'körperchen.** Demme's term for certain angular microscopical particles of black pigment found in gangrenous ichor. [Samuel (A. 319).]—**B'marken.** Tattooing. [A, 322; L, 80.]—**B'öl.** An empyreumatic oil. [L, 57.]—**B'pilze.** See Ustilagineæ.—**B'rose.** Gangrenous erysipelas. [E.]—**B'salbe.** An ointment for burns. [A, 450.]—**B'-schorf.** An eschar. [E.]—**B'schwär.** A gangrenous abscess, a carbuncle. [E; L, 80.]—**B'schwären.** Carbuncular ulceration. [L, 30.]—**B'stelle.** See *B'herd*.—**B'stiftungstrieb.** A monomania for incendiarism. [L. Blumenstock (A, 319).]—**B'wein.** See Brandy.—**B'wunde.** A burn. [L, 135.]—**Contagiöser B.** See *Contagious* anthrax.—**Feuchter B.** Moist gangrene. [L, 43.]—**Fusszehenb'.** Senile gangrene of the foot. [L, 30.]—**Heisser B.** A form of gangrene in which the vitality of the part is not entirely lost. [L.]—**Knochenb'.** Necrosis of bone. [L, 30.]—**Milzb'.** See *Contagious* anthrax.—**Schmerzloser B. der Alten.** Painless senile gangrene. [L, 30.]—**Trockener B.** Dry gangrene. [L, 43.]

BRANDE (Fr.), n. Bra^{3}nd. The *Erica fucata*. [B, 173.]

BRANDELLENS (Fr.), n. Bra^{3}nd-e^{2}l-la^{3}n^2. Shaking palsy. [A, 385.]

BRANDEULE (Ger.), n. Bra^{3}nd′oil-e^2. The *Strix aluco*. [B, 180.]

BRANDEVIN (Fr.), n. Bra^{3}nd-va^{2}n^2. See Brandy.

BRANDLATTICH (Ger.), **BRANDLATTIG** (Ger.), n's. Bra^{3}nd′la^{3}t-ti^{2}ch^2, -ti^{2}g. The genus *Tussilago*, especially the *Tussilago farfara*. [B, 180.]—**B'blumen.** The flowers of *Tussilago farfara*. [L, 80.]—**B'grosshuf.** See *B.*

BRANDTANG (Ger.), n. Bra^{3}nd′ta^{3}ng. The genus *Sphacellaria*. [B, 180.]—**Besenförmiger B.** The *Sphacellaria scoparia*. [B, 180.]

BRANDY, n. Bra^{2}nd′i^2. O. E., *brandwine*. Lat., *spiritus vini gallici* [U. S. Ph., Br. Ph.]. Fr., *eau-de-vie*, *cognac*. Ger., *Branntwein*. It., *acquavite*. Sp., *aguardiente*. A spirituous liquor distilled from wine. It has a peculiar flavor and odor, and varies in color from pale amber to dark reddish-brown. The color is due to principles derived from the wood of the cask, and usually deepens with age, but that of the highly colored liquors is due to an admixt-

ure of caramel. B. should have a sp. gr. varying from 0·925 to 0·941, and an alcoholic strength of from 39 to 47 per cent. by weight (46 to 55 per cent. by volume). The name is sometimes applied to liquors distilled from other substances than wine. [B, 5.]—**Apple b.** See under APPLE.—**B. mixture.** See *Mistura spiritus* VINI *gallici.*—**German b.** Fr., *eau-de-vie allemande.* Sp., *aguardiente aleman.* See *Teinture de* JALAP *composée.*

BRANK, n. Bra^{2}n^{2}k. An English provincial name for buckwheat. [A, 302.]

BRANKS, n. Bra^{2}n^{2}kz. A Scotch popular term for mumps. [E. C. Brush, "Columbus Med. Jour.," April, 1885, p. 435.]

BRANKURSINE, BRANK URSINE, n's. Bra^{2}n^{2}k′u^{5}rs-en. See ACANTHUS *mollis.*

BRANLANT (Fr.), adj. Bra^{3}n^2-la^{3}n^2. Tremulous. [A, 385.]

BRANLEMENT (Fr.), n. Bra^{3}n^{2}l-ma^{3}n^2. Tremor. [A, 385.]

BRANNTWEIN (Ger.), n. Bra^{3}nt′vin. See BRANDY.—**B'hefe.** The *Saccharomyces cerevisiæ.* [B, 206.]—**B'mixtur.** See *Mistura spiritus* VINI *gallici.*

BRANNY, adj. Bra^{2}n′ni^2. Ger., *kleienartig.* See FURFURACEOUS.

BRANULAR, adj. Bra^{2}n′u^{2}l-a^{3}r. Cerebral. [L, 56.]

BRARICIA, n. An alchemical name for glass. [Ruland (A, 325).]

BRAS (Fr.), n. Bra^3. See ARM and BRACHIUM.—**B. antérieur.** See *Anterior* BRACHIUM.—**B. conjonctif.** See BRACHIUM *conjunctivum.*—**B. de la moelle allongée.** The cerebral peduncle. [L.]—**B. des tubercules quadrijumeaux.** The brachia of the corpora quadrigemina. [I, 28; K.]—**B. des tubercules quadrijumeaux inférieur.** See *Posterior* BRACHIUM.—**B. des tubercules quadrijumeaux supérieur.** See *Anterior* BRACHIUM.—**B. du cerveau.** The cerebral peduncle. [I, 49; K.]—**B. du cervelet.** The peduncle of the cerebellum. [I, 3, 22; K.]

BRASE (Fr.), n. Bra^{3}z. See BRAISE.

BRASH, n. Bra^{2}sh. A cutaneous eruption. [L, 56.]—**Water-b.** Fr., *fer-chaud.* Ger., *Sodbrennen.* See PYROSIS.

BRASILEIN, n. Bra^{2}s-i^{2}l-e′i^{2}n. Fr., *brasiléine.* A substance, $C_{36}H_{14}O_{12}$, formed by the oxidation of brasilin. [A, 385.]

BRASILETHOLZ (Ger.), n. Bra^{3}s-i^{2}l-e^{2}t′ho^{3}ltz. The *Cæsalpinia bijuga* and the *Cæsalpinia crista.* [B, 180.]

BRASILETTO, n. Bra^{3}s-i^{2}l-e^{2}t′to. The *Cæsalpinia brasiliensis.* [L, 105.]

BRASILHOLZ (Ger.), n. Bra^{3}z-el′ho^{3}ltz. See BRASILIENHOLZ.

BRASILIA (Lat.), n. f. Bra^{2}z(bra^{3}s)-i^{2}l′i^2-a^3. See CÆSALPINIA.

BRASILIASTRUM (Lat.), n. n. Bra^{2}z(bra^{3}s)-i^{2}l-i^2-a^{2}st(a^{3}st)′-ru^{3}m(ru^{4}m). See GUILANDINA.

BRASILIC ACID, n. Bra^{3}s-i^{2}l′i^{2}k. Fr., *acide brasilique.* See BRASILIN.

BRASILIENHOLZ (Ger.), n. Bra^3-zel′i^2-e^{2}n-ho^{3}ltz. Brazil-wood. [B.]—**B'baum.** See ARABOUTAN.—**Falsches gelbes B.** The *Rhus cotinus.* [B, 180.]—**Gelbes B.** The wood of *Broussonetia tinctoria.* [B, 180.]—**Rothes B.** The *Cæsalpinia brasiliensis.* [B, 180.]

BRASILIENMINZE (Ger.), n. Bra^3-zel′i^2-e^{2}n-mi^{2}ntz-e^2. The *Mentha gentilis.* [B, 180.]

BRASILIENPFEFFER (Ger.), n. Bra^3-zel′i^2-e^{2}n-pfe^{2}f-fe^{2}r. The unripe fruit of the *Pimenta aromatica*, also the fruit of *Capsicum annuum.* [B, 180.]

BRASILIENRINDE (Ger.), n. Bra^3-zel′i^2-e^{2}n-ri^{2}nd-e^2. See CORTEX *adstringens brasiliensis.*

BRASILIENSIS (Lat.), adj. Bra^{2}z(bra^{3}s)-i^{2}l-i^2-e^{2}n′si^{2}s. Indigenous to or obtained from Brazil.

BRASILIN, n. Bra^{2}s′i^{2}l-i^{2}n. Fr., *brasiline.* Syn.: *brasilic acid.* A crystallizable coloring principle, $C_{22}H_{20}O_7$, obtained from Brazil-wood; of a sulphur-yellow color or colorless when pure and preserved in the dark, but rapidly turning red on exposure. [B, 5.]

BRASILLET (Fr.), n. Bra^{3}s-i^{2}l-la. The genus *Cæsalpinia.* [B, 173.]—**B. de la Jamaïque.** The *Cæsalpinia bahamensis.* [B, 173.]

BRASIUM, n. An old name for malted barley. [A, 325.]

BRASMA (Lat.), n. n. Bra^{2}z(bra^{3}s)′ma^3. Gen., *bras′matos* (*-tis*). Gr., βράσμα (from βράζειν, to boil). Ebullition. [A, 322.]

BRASMOS (Lat.), n. m. Bra^{2}z(bra^{3}s)′mo^{2}s. Gr., βρασμός (from βράσσειν, to agitate). Fermentation. [A, 325.]

BRASS, n. Bra^{3}s. A.-S., *bræs.* Gr., χαλκός. Lat., *æs.* Fr., *laiton, cuivre jaune.* Ger., *Messing.* It., *rame.* Sp., *bronce.* An alloy of zinc and copper in the proportion of about 1 part of the former to 2 parts of the latter. [B, 16.]

BRASSADELLA (Lat.), n. f. Bra^{3}s-sa^3-de^{2}l′la^3. Fr., *brassatelle.* The fern adder's-tongue (*Ophioglossum*). [A, 325.]

BRASSADELLICA (Lat.), n., f. of adj. *brassadellicus* (*ars* understood). Bra^{3}s-sa^3-de^{2}l′li^{2}k-a^3. Of Paracelsus, a method of treating wounds by the application of brassadella and other vegetable substances. [Libavius (A, 325).]

BRASSATE, n. Bra^{3}s′sat. A salt of brassic acid. [L, 73.]

BRASSATELLA (Lat.), n. f. Bra^{3}s-sa^3-te^{2}l′la^3. See BRASSADELLA.

BRASSICA (Lat.), n. f. Bra^{2}s(bra^{3}s)′si^{2}k-a^3. Fr., *chou.* Ger., *Kohl.* 1. The cabbage. [Cicero (A, 318).] 2. A genus of cruciferous plants of the tribe *Brassiceæ*, including the cabbages, turnips, and (according to Bentham and Hooker) the mustards. [B, 19, 34, 75.]—**B. alba.** See SINAPIS *alba.*—**B. alba crispa.** Ger., *Buschkohl.* The white curled cabbage. [L, 94.]—**B. apiana.** The jagged or crumpled colewort. [L, 119.]—**B. asparagodes.** See *B. oleracea botrytis asparagoides.*—**B. asperifolia.** Fr., *gros navet, navet turneps, grosse rave, rave plate, rabiolle, rabioule.* 1. The turnip. 2. Of Lamarck, the *B. napus*, var. *asperifolia.* [A, 301; B, 173.]—**B. botrytis.** See *B. oleracea botrytis.*—**B. botrytis cymosa.** See *B. oleracea*, var. *botrytis asparagoides.*—**B. campestris** [Linnæus]. Fr., *chou des champs.* Ger., *Schnittkohl.* The cole, wild cabbage, bargeman's cabbage, navew, or summer rape; a species indigenous to northern Europe and cultivated in the United States. A variety, the *B. campestris*, var. *rutabaga*, the Swedish turnip, is used in place of the common turnip. The following varieties are mentioned: *B. campestris napobrassica alba* (Fr., *chou-navet blanc*); *B. campestris napobrassica flavescens* (Fr., *chou de Laponie, chou-navet jaune*), the rutabaga turnip; *B. campestris napobrassica purpurascens* (Fr., *chou-navet rouge*); *B. campestris oleifera* [De Candolle] (Fr., *colza, colzat*); and *B. campestris pabularia* [De Candolle] (Fr., *chou à faucher* [ou *à vaches*]; Ger., *krauser Schnittkohl*). [B, 5, 19, 34, 173, 180, 275.]—**B. canina.** The *Mercurialis silvestris.* [L, 119.]—**B. capitata.** See *B. oleracea capitata.*—**B. chinensis.** The Chinese cabbage (*pak-choi*). [B, 275.]—**B. congylodes.** See *B. oleracea gongylodes.*—**B. cumana.** See *B. oleracea rubra.*—**B. eruca** [Linnæus]. Fr., *roquette cultivée* (ou *des jardins*). Ger., *Senfkohl, Raukenkohl.* Syn.: *Eruca sativa* [Lamarck] (seu *fœtida* [Mönch]), *Sinapis eruca* [Roehl], *Sisymbrium erucastrum* [Vill.]. The salad-rocket. It is stimulating and antiscorbutic, and has been reputed aphrodisiac. The seeds are irritant. The leaves are eaten in Italy. [B, 173, 180.]—**B. erucastrum.** Fr., *fausse roquette, roquette sauvage.* The bastard-rocket. [B, 173, 275.] See ERUCA *silvestris.*—**B. fimbriata.** See *B. oleracea botrytis asparagoides.*—**B. florida.** See *B. oleracea botrytis.*—**B. gongylodes.** See *B. oleracea gongylodes.*—**B. incana.** A species supposed to be the κράμβη ἀργία of Dioscorides, the leaves of which were used as a vulnerary. [B, 180.]—**B. italica.** See *B. oleracea botrytis asparagoides.*—**B. juncea** [Hooker *fil.*]. Syn.: *Sinapis juncea* [Linnæus]. Sarepta (or Russian) mustard; a species cultivated in southern Russia, Africa, and India, the seeds of which are used like those of *Sinapis nigra.* [A, 247.]—**B. lacuturria, B. lacuturris.** See *B. sabauda.*—**B. marina.** Fr., *chou marin.* The *Convolvulus soldanella.* [B, 180.]—**B. medullifera.** See *B. oleracea botrytis.*—**B. napobrassica** [Linnæus]. Fr., *chou-navet.* Ger., *Erdkohlrübe.* The turnip. [B, 173, 180, 275.]—**B. napus** [Linnæus]. Fr., *navet, navau.* Ger., *Raps, Rapskohl, Kohlraps.* Rape, winter rape, navew, coleseed, French turnip; a species having a spindle-shaped root smaller than that of the common turnip. [B, 5, 19, 180, 275.]—**B. nigra.** See SINAPIS *nigra.*—**B. napus asperifolia.** Fr., *navette, rabette.* A cultivated variety of *B. napus* which yields about 33 per cent. of rape-seed oil. [A, 301; B, 173.]—**B. napus esculenta** [De Candolle]. Fr., *chou comestible.* See *B. napus.*—**B. napus oleifera** [De Candolle]. Fr., *navette d'hiver.* Ger., *eigentlicher Kohlraps.* The carcel-oil plant, a variety of *B. napus* yielding rape-seed oil. [B, 180, 275.]—**B. nigra** [Koch]. See SINAPIS *nigra.*—**B. oblonga.** See *B. rapa.*—**B. oleifera.** See *B. napus oleifera.*—**B. oleracea** [Linnæus]. Fr., *chou commun* (ou *ordinaire*, ou *potager*). Ger., *Gartenkohl, Gemüsekohl.* The cabbage, including cauliflower, broccoli, etc. The leaves have been recommended as a stimulating application to foul, indolent ulcers, and are often worn on the head, under the hat, in hot weather as a preventive of sunstroke. [A, 308, 385; B, 19, 34, 180, 275.]—**B. oleracea acephala** [De Candolle]. Fr., *chou sans tête.* Ger., *Braunkohl.* Borecole, kale. [B, 180.]—**B. oleracea botrytis** [Linnæus]. Fr., *chou-fleur.* Ger., *Blumenkohl, Karfiol.* The cauliflower. [B. 180, 275.]—**B. oleracea botrytis asparagoides** [De Candolle]. Fr., *broccolis.* Ger., *Spargelkohl.* Broccoli. [B, 180, 275.]—**B. oleracea bullata.** See *B. oleracea sabauda.*—**B. oleracea capitata.** Fr., *chou pommé, chou-cabus, cabus.* Ger., *Kopfkohl, Kopfkraut, Krauthaupt.* A variety of *B. oleracea* comprising the red-leaved cabbage; official in the Fr. Cod. [B, 180, 275.]—**B. oleracea caulorapa** [De Candolle]. Fr., *chou-rave, chou à tige en rave.* See *B. oleracea gongylodes.*—**B. oleracea cymosa.** See *B. oleracea botrytis asparagoides.*—**B. oleracea gemmifera.** Fr., *chou de Bruxelles.* A variety of *B. oleracea sabauda.* [A, 316, 385.]—**B. oleracea gongylodes** [Linnæus]. Fr., *rave, chou de Siam.* Ger., *Kohlrabe, Kohlrabi, Kohlrübe.* The kohl-rabi. [B, 180.]—**B. oleracea napobrassica.** See *B. napobrassica.*—**B. oleracea rubra.** Fr., *chou rouge.* The red-leaved variety of *B. oleracea capitata.* [B.]—**B. oleracea sabauda** (seu **sabellica**). Fr., *chou frise* (ou *bullé*, ou *de Milan*). Ger., *Wirsing, Welschkohl, Savoyerkohl.* The Savoy cabbage. [B, 173, 180.]—**B. oleracea silvestris.** Fr., *chou sauvage.* The wild cabbage. [B, 173.]—**B. oleracea viridis.** Fr., *chou vert* (ou *-cavalier*, ou *en arbre*), *cavalier branchu.* Ger., *Winterkohl, Blattkohl.* A variety from which *Sauerkraut* is made. The juice is considered pectoral and diuretic. [B, 173.]—**B. pabularia.** Fr., *chou à vache* (ou *à faucher*). The cow-cabbage. [B, 173, 180.]—**B. præcox.** Fr., *chou précoce, navette d'été.* A species cultivated in Alsace for its oil. [B, 173.]—**B. rapa** [Linnæus]. Fr., *turneps, navet-turneps, gros navet, grosse rave, rave plate, rabiolle, rabioule.* Ger., *Turnips, Rübenkohl, weisse Rübe, Wasserrübe, Rübsen.* A species one variety of which is the common turnip. The root, which is esteemed antiscorbutic, is said to be the γογγύλη of Dioscorides. The expressed juice is considered pectoral. An inferior quality of spirit is distilled from it in Germany. [B, 19, 34, 173, 180.]—**B. rubra.** The red-leaved variety of *B. oleracea capitata.* [L, 119.]—**B. sabauda.** See *B. oleracea sabauda.*—**B. sativa.** The cultivated variety of *B. oleracea.*—**B. silvestris.** See *B. oleracea silvestris.*—**B. sinapioides** [Roth]. Ger., *Senfkohl.* See SINAPIS *nigra.*—**B. sinapistrum** [Boissier]. Syn.: *Sinapis arvensis* [Linnæus]. The charlock, the seeds of which are smaller than those of *Sinapis nigra* and less pungent. [A, 247.]—**B. viridis.** Fr., *chou vert* (ou *vert de Tourraine*, ou *-palmier*, ou *en arbre*, ou *à feuilles de chêne*, ou *à grosses côtes*, ou *de Beauvais*). Ger., *Blattkraut.* See *B. oleracea acephala.*

BRASSICACEÆ (Lat.), n. f. pl. Bra^{2}s(bra^{3}s)-si^2-ka(ka^3)'se^2-(ke^2)-e(a^3-e^2). Of Lindley, an order of the cistal alliance of plants, corresponding to the *Cruciferæ* of other authors. [B, 170.]

BRASSIC ACID, n. Bra^{3}s'si^{2}k. Fr., *acide brassique.* Ger., *Brassinsäure.* Syn.: *brassidic* (or *erucidic*) *acid.* A monobasic crystalline acid, $C_{22}H_{42}O_2$, in the form of acicular crystals, derived from mustard oil, rapeseed oil, and grape-seeds; isomeric with erucic acid, from which it may be obtained by treatment with nitric acid. [B, 3, 4.]

BRASSICÆ (Lat.), n. f. pl. Bra^{2}s(bra^{3}s)'si^2-se(ka^3-e^2). Of A. Richard, an order of the *Cruciferæ*, corresponding to the *Brassiceæ* of De Candolle. [B. 170.]

BRASSICAIRE (Fr.), adj. Bra^{3}s-si^{2}k-a^{2}r. Pertaining to the genus *Brassica.* As a n., a sort of sponge the cells of which are arranged like the leaves of a cabbage; in the pl., a family of lepidopterous insects the caterpillar of which lives on the cabbage. [A, 385; L, 41.]

BRASSICASTRUM (Lat.), n. Bra^{2}s(bra^{3}s)-si^2-ka^{2}st(ka^{3}st)'-ru^{3}m(ru^{4}m). Fr., *brassicastre.* A section of the genus *Brassica.* [L, 109.]

BRASSICÉ (Fr.), adj. Bra^{3}s-si^2-sa. Pertaining to the genus *Brassica;* as a n., in the f. pl., *b'es,* the *Brassiceæ.* [A, 385.]

BRASSICEÆ (Lat.), n. f. pl. Bra^{2}s(bra^{3}s)-si^{2}s(si^{2}k)'e^2-e(a^3-e^2). Fr., *brassicées.* Of De Candolle, Endlicher, and others, a tribe of cruciferous plants of the suborder *Siliquosæ,* comprising *Brassica, Sinapis, Eruca,* and other genera. [B, 34, 170.]

BRASSICIDÆ (Lat.), n. f. pl. Bra^{2}s(bra^{3}s)-si^{2}s(si^{2}k)'i^{2}d-e(a^3-e^2). Of Lindley, a tribe of cruciferous plants corresponding to the *Brassiceæ.* [B, 170.]

BRASSICIQUE (Fr.), adj. Bra^{3}s-si^{2}s-ek. Pertaining to the genus *Brassica.* [A, 385.]—**Acide b.** See Brassic acid.

BRASSIDÆ (Lat.), n. f. pl. Bra^{2}s(bra^{3}s)'si^{2}d-e(a^3-e^2). Of Lindley, a section of the *Vandeæ,* including *Brassia* and other genera. [B, 170.]

BRASSIDELLA, BRASSIDELLICA (Lat.), n's f. Bra^{2}s-(bra^{3}s)-si^2-de^{2}l'la^3, -li^{2}k-a^3. See Brassadella and Brassadellica.

BRASSIDIC ACID, n. Bra^{3}s-si^{2}d'i^{2}k. Fr., *acide brassidique.* See Brassic acid.

BRASSINSÄURE (Ger.), n. Bra^{3}s-sen'zoir-e^2. See Brassic acid.

BRASSOLEIC ACID, n. Bra^{3}s-sol-e'i^{2}k. Fr., *acide brassoléique.* A liquid acid extracted from colza oil by saponification, distinguished from oleic acid by not yielding sebacic acid on dry distillation. [A, 321.]

BRASSOLINÆ (Lat.), n. f. pl. Bra^{2}s(bra^{3}s)-so^{2}l-i(e)'ne(na^3-e^2). Of Bates, a subfamily of the *Nymphalidæ.* [L, 257.]

BRASSYLIC ACID, n. Bra^{3}s-si^{2}l'i^{2}k. Fr., *acide brassylique.* Ger., *Brassylsäure.* A dibasic crystalline acid, $C_{11}H_{20}O_4$. [B, 4.]

BRATEN (Ger.), n. Bra^{3}t'e^{2}n. See Assatio.

BRATHU, BRATHY (Lat.), n's n. Bra^{2}th(bra^{3}th)'u^2(u^6), -i^2(u^6). Gen., *brath'ydos* (*-dis*). Gr., *βράθυ.* Fr., *brathy, brathys.* Savine (*Juniperus sabina*). [L, 84, 119.]

BRATHYDEÆ [Reichenbach], **BRATHYDINEÆ** [Spach] (Lat.), n's f. Bra^{2}th(bra^{3}th)-i^{2}d(u^{6}d)'e^2-e(a^3-e^2), -i^{2}d(u^{6}d)-i^{2}n'e^2-e(a^3-e^2). From *Brathydium* and *Brathys,* two of the genera. A section of the *Hypericeæ.* [B, 170.]

BRATHYS (Fr.), n. Bra^3-te. See Brathy.

BRÄTLING (Ger.), n. Brat'li^{2}ng. The *Agaricus volemus.* [B, 180.]

BRATYS (Fr.), n. Bra^3-te. See Brathy.

BRAUBACH (Ger.), n. Bra^3'u-ba^{3}ch^2. A place in the duchy of Nassau, where there is a spring containing bicarbonates and sodium chloride. [A, 385; L, 49.]

BRAUERKRAUT (Ger.), n. Bra^3'u-e^{2}r-kra^3-ut. The *Ledum palustre.* [B, 180.]

BRAUNDISTELWURZEL (Ger.), n. Bra^3'un-di^{2}st-e^{2}l-vurtz-e^{2}l. The root of *Eryngium campestre.* [B, 180.]

BRAUNDOSTKRAUT (Ger.), n. Bra^3'un-do^{2}st-kra^3-ut. The *Origanum vulgare.* [B, 180.]

BRÄUNE (Ger.), n. Broin'e^2. See Angina.—**B'artig.** Anginose. [E.]—**B. der Brust, Brustb'.** See Angina *pectoris.*—**Häutige B.** Membranous angina. [D.]—**Ludwig'sche B.** See Angina *Ludovici.*—**Ohrendrüsenb'.** Mumps. [L.]—**Thymusb'.** See *Thymic* asthma.

BRAUNELLE (Ger.), n. Bra^3-un-e^{2}l'le^2. The *Brunella vulgaris.* [B, 180.]

BRÄUNEWURZEL (Ger.), n. Broin'e^2-vurtz-e^{2}l. The *Asperula cynanchica.*

BRAUNHEIL (Ger.), n. Bra^3'un-hil. See Braunelle.

BRAUNHOLZ (Ger.), n. Bra^3'un-ho^{3}ltz. The *Cæsalpinia brasiliensis.* [B, 180.]

BRAUNITE, n. Bra^{4}n'it. Fr., *braunite.* A native anhydrous sesquioxide of manganum. [A, 385; L, 73.]

BRAUNKOHL (Ger.), n. Bra^3'un-kol. The *Brassica oleracea acephala.* [B, 180.]

BRAUNKOHLE (Ger.), n. Bra^3'un-kol-e^2. Peat. [A, 450.]—**B'nöl, B'ntheeröl.** An empyreumatic oil distilled from peat. [L, 57, 135.]

BRÄUNLICH (Ger.), adj. Broin'li^{2}ch^2. See Brunneous.

BRAUNMANDERLENKRAUT (Ger.), n. Bra^3'un-ma^{3}nd-e^{2}r-le^{2}n-kra^3-ut. The *Teucrium chamædrys.* [B, 180.]

BRAUNMANGANERZ (Ger.), n. Bra^3'un-ma^{3}n^2-ga^{3}n-e^{2}rtz. Native black oxide of manganese. [B, 180.]

BRAUNSILGENKRAUT (Ger.), n. Bra^3'un-zi^{2}lg-e^{2}n-kra^3-ut. The herb of *Ocimum basilicum.* [B, 180.]

BRAUNSTEIN (Ger.), n. Bra^3'un-stin. Manganum oxide. [L, 77.]—**B'erz.** See *B.*—**B. metall.** Manganum. [L, 80.]—**B'oxyd.** See *B.*—**Grauer B., Natürlicher B., Schwarzes B'oxyd.** Native black oxide of manganum. [B, 180.]

BRAUNWURZ (Ger.), n. Bra^3'un-vurtz. The genus *Scrophularia.* [B, 180.]—**B'pflanzen.** See Scrophularineæ.—**Fremde B.** The *Scrophularia peregrina.* [B, 180.]—**Gemeine B.** See *Knotige B.*—**Glänzende B.** The *Scrophularia lucida.* [B, 180.]—**Knotige B.** The *Scrophularia nodosa.* [B, 180.]—**Marilandische B.** The *Scrophularia marylandica.* [B, 180.]

BRAUNWURZEL (Ger.), n. Bra^3'un-vurtz-e^{2}l. See Braunwurz.

BRAUSCHE (Ger.), n. Bra^3'ush-e^2. See *Hœmatic* abscess.

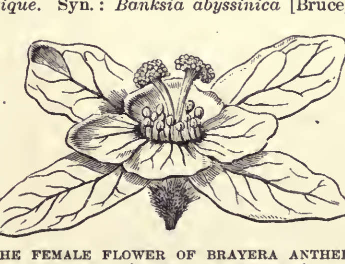
BRAUSE (Ger.), n. Bra^3'us-e^2. Effervescence, fermentation. [A, 450.]—**B'bad.** See *Effervescent* bath.—**B'becher.** A glass vessel divided into two compartments by a vertical partition; used for administering such preparations as seidlitz powders when it is desired that all the carbonic acid shall be swallowed. The carbonate is dissolved in one compartment, and the acid in the other; the patient then brings the glass to his mouth in such a manner that he drinks from both compartments simultaneously, and effervescence takes place in his mouth. [Bernatzik (A, 319).]—**B'limonadenpulver.** See Pulvis *ad potum effervescentem.*—**B'magnesia, B'magnesicitrat.** Effervescent magnesium citrate. [Bernatzik (A, 319).]—**B'mischung.** An effervescent mixture. [Bernatzik (A, 319).]—**B'pulver.** See the major list.—**B'wasser.** An effervescent water. [L, 65.]

BRAUSEN (Ger.), n. Bra^3'us-e^{2}n. A roaring or buzzing noise. [A, 450.]—**B. der** (oder **vor den**) **Ohren, Ohrenb'.** See Tinnitus *aurium.*

BRAUSEPULVER (Ger.), n. Bra^3'us-e^2-pul-fe^{2}r. An effervescent powder. [B.]—**Abführendes B.** Lat., *pulvis aerophorus laxans* [Ger. Ph.]. A seidlitz powder. [B.] See Pulvis *effervescens compositus.*—**Englisches B.** Lat., *pulvis aerophorus anglicus* [Ger. Ph.]. See Pulveres *effervescentes.*

BRAUT IN HAAREN (Ger.), n. Bra'ut i^{2}n ha^{3}r'e^{2}n. The *Nigella damascena.* [B, 180.]

BRAWN, n. Bra^{4}n. O. Fr., *braon, braion.* Firm muscular tissue. [L, 56.]



BRAWNY, adj. Bra^{4}n'i^2. Resembling or abounding in brawn; hard like brawn (said of inflammatory induration). [A, 419; L, 56.]

BRAXY, n. Bra^{2}x'i^2. Anthrax in sheep. [L, 297.]

BRAYA (Port.), n. Bra^3'ya^3. A place in Portugal, where there are sulphurous and ferruginous springs. [A, 385.]

BRAYER (Fr.), n. Bra^3-ya. A truss. [L, 41.]—**B. à cuiller.** A truss with a concave pad; designed to limit the descent of a hernia, but not to keep it reduced. [L, 41.]—**B. à raquette.** A truss the pad of which consists of a ring over which leather is stretched. [L, 41.]—**B. à ressort.** A spring truss. [L, 41.]—**B. de Samson.** A truss with an inflatable pad. [L, 41.]—**B. mou.** Any hemispherical object used to prevent the recurrence of a hernia after its reduction, being held in place by means of a bandage or adhesive plaster. [L, 41.]—**B. omniforme.** A truss purporting to be adjustable to various forms of hernia. [L, 41.]

BRAYERA (Lat.), n. f. Bra^3'ye^{2}r-a^3. From the name *Brayer.* Fr., *brayère.* 1. Of Kunth, a genus of rosaceous plants. [A, 385.] 2. Of the U. S. Ph., the female inflorescence of *B. anthelminthica* (the *cusso* of the Br. Ph., the *fleurs de cousso* of the Fr. Cod., the *flores koso* of the Ger. Ph.). [B.]—**B. anthelminthica** [Kunth]. Fr., *brayère anthelmintique.* Syn.: *Banksia abyssinica* [Bruce], *Hagenia abyssinica* [Willdenow]. A tree growing in the mountainous districts of Abyssinia, furnishing the drug kousso, used as a remedy for tapeworm. [A, 247; B, 5, 173.]—**Extractum brayeræ fluidum** [U. S. Ph.]. Fr., *extrait liquide de cousso.* Ger., *flüssiges Kosoextrakt.* Syn.: *extractum koso fluidum.* Fluid extract of b. (or kousso); made by moistening 25 oz. of b. (2d def.) with 10 oz. of alcohol, exhausting by percolation with the further addition of alcohol, reserving the first 21¼ fl. oz. of the percolate, distilling off the alcohol from the remainder over a water-bath, evaporating the residue to a soft extract, dissolving this in the reserved portion, and adding enough alcohol to make 24 fl. oz. [A, 247.]—**Flores brayeræ anthelminthicæ.** See *B.* (2d def.).—**Infusum brayeræ** [U. S. Ph.]. Fr., *apozème de cousso* [Fr. Cod.]. Ger., *Kossotrank.* Syn.: *infusum cusso* [Br. Ph.], *apozema de cousso* [Fr. Cod.]. Infusion of b. (or kousso); made, according to the U. S. Ph., by infusing 6 parts of b. (2d def.) in No. 20 powder in 100 of boiling water in a covered vessel, without straining. The Br. Ph. orders ¼ oz. of b. to 8 fl. oz. of boiling distilled water, and the Fr. Cod. directs 2 parts of b. to 15 of boiling water. [A, 247.]—**Pulvis brayeræ anthelminthicæ** (seu **anthelminticæ** [Fr. Cod.]). See *Poudre de* cousso.

THE FEMALE FLOWER OF BRAYERA ANTHELMINTHICA. (AFTER DE LANESSAN.)

BRAYERIN, n. Bra^3'ye^{2}r-i^{2}n. See Kosin.

BRAYES DE COUCOU (Fr.), n. Bra^{3}-e^{2} d' ku-ku. The *Primula elatior.* [B, 173.]

BRAZILETTO, n. Bra^{3}z-i^{2}l-e^{2}t'to. See BRASILETTO.

BRAZILIC ACID, n. Bra^{3}z-i^{2}l'i^{2}k. See BRASILIN.

BRAZILIN, n. Bra^{3}z'i^{2}l-i^{2}n. See BRASILIN.

BRAZIL-NUTS, n. pl. Bra-zi^{2}l'nu^{3}tz. The nuts of the *Bertholletia excelsa.* [B, 275.]

BRAZIL-WOOD, n. Bra-zi^{2}l'wu^{4}d. Lat., *lignum brasiliense.* Fr., *bois de Brésil.* Ger., *Brasilienholz.* Sp., *palo del Brazil* [Mex. Ph.]. The wood of *Cæsalpinia echinata* and other species of *Cæsalpinia.* [B, 19, 275.]

BREAD, n. Bre^{2}d. A.-S., *bread, breod.* Gr., ἄρτος, σῖτος. Lat., *panis.* Fr., *pain.* Ger., *Brod.* It., *pane.* Sp., *pan.* An article of food made by baking a paste-like mixture of some ground cereal, water, salt, etc., usually after kneading and partial fermentation. [A, 301.]—**Aerated b.** Unfermented b. rendered porous by forcing air into the dough.—**Almond b.** B. made of ground blanched almonds and eggs; used as food for diabetics. [L, 20.]—**Bee-b.** The pollen of flowers, kneaded by bees into masses which they carry in a hollow on the broad surface of the tibia of each hind leg. [L, 292.]—**B.-crumb.** See *Mica* PANIS.—**B.-fruit tree.** The *Artocarpus incisa.* [B, 275.]—**B.-fruit tree of North Australia.** The *Gardenia edulis.* [B, 19, 275.]—**B.-lead.** The *Lepidium latifolium.* [L, 77.]—**B.-nut.** The *Brosimum alicastrum.* [B, 275.]—**B. poultice.** See *Cataplasma* PANIS.—**B.-root.** The *Psoralea esculenta.* [B, 19, 275.]—**B.-tree.** See *B.-fruit tree.*—**Chalybeate b.** B. containing iron. A form containing about 1 grain of lactate of iron to the ounce has been used in chlorosis. [A, 308.]—**Crumb of b.** [Br. Ph.]. See *Mica* PANIS.—**Monkey-b.** See ADANSONIA *digitata.*—**Native b. of Australia.** The *Mylitta australis.* [B, 19, 275.]—**Tartar b.** The *Crambe tatarica.* [B, 19, 275.]

BREAK-AXE, n. Brak'a^{2}x. The *Sloanea jamaicensis.* [B, 19, 275.]

BREAK-BONE FEVER, n. Brak'bo^{3}n. See DENGUE.

BREAK-SHARE, n. Brak'sha^{2}r. See BRAXY.

BREAKSTONE, n. Brak'sto^{3}n. See SAXIFRAGA.

BREAKUMMIN (Swed.), n. The *Carum carui.* [L, 105.]

BREAK-YOUR-SPECTACLES, n. Brak-yur-spe^{2}k'ta^{2}klz. Fr., *casse-lunettes.* The *Centaurea cyanus.* [B, 19.]

BRÉANE (Fr.), n. Bra-a^{3}n. See ICICANE.

BREAST, n. Bre^{2}st. Goth., *brusts.* A.-S., *breost.* Gr., στῆθος (1st def.), στέρνον (1st def.), μαζός (2d def.), μαστός (2d def.). Lat., *pectus* (1st def.), *mamma* (2d def.). Fr., *poitrine* (1st def.), *sein* (1st and 2d def's), *mamelle* (2d def.). Ger., *Brust* (1st def.), *Brustdrüse* (2d def.). It., *petto* (1st def.), *seno* (2d def.). Sp., *pecho* (1st def.), *seno* (2d def.). 1. The chest, especially its upper and anterior portion. 2. The mammary gland.—**B.-bone.** See STERNUM.—**B.-pang.** See ANGINA PECTORIS.—**Broken b.** A popular term for abscess of the mammary gland.—**Hysterical b.** A form of irritable b. (*q. v.*) dependent on hysteria.—**Irritable b.** A condition of induration and tenderness, with or without pain and swelling, of the whole or a part of the mammary gland, not from organic disease of the part, but as a manifestation of derangement of the general health or of the sexual or digestive organs.—**Pigeon-b.** Lat., *pectus carinatum.* A deformity of the chest characterized by forward projection of its median portion.

BREASTINGS, n. Bre^{2}st'i^{2}ngz. See COLOSTRUM.

BREATH, n. Bre^{2}th. A.-S., *brædh.* Gr., πνεῦμα (1st and 2d def's), πνοή (2d def.). Lat., *respiratio* (1st def.), *spiritus* (2d def.), *anima* (2d def.), *halitus* (2d def.). Fr., *respiration* (1st def.), *haleine* (2d def.), *exhalation pulmonaire* (2d def.). Ger., *Athmen, Athem.* It., *respiro* (1st def.), *alito* (2d def.), *fiato* (2d def.), *lena* (2d def.). Sp., *respiración* (1st def.), *halito* (2d def.), *aliento* (2d def.). 1. The process of breathing, also an individual act of inspiration or expiration. See RESPIRATION. 2. The air breathed, especially the expired air. [J.]—**Shortness of b.** See DYSPNŒA.

BREATHABLE, adj. Breth^{2}'a^{2}-bl. See RESPIRABLE.

BREATHING, n. Breth^{2}'i^{2}ng. See RESPIRATION.—**B. air** [Hutchinson]. See *Tidal* AIR.—**B. capacity.** Fr., *capacité respiratoire* (ou *inspiratrice extrême,* ou *vitale*). Ger., *vitale Capacität, Athemgrösse.* Syn.: *vital* (or *extreme breathing*) *capacity.* The amount of air that can be forced from the lungs voluntarily after the fullest possible inspiration, representing the sum of the tidal, complemental, and reserve air. [J.]—**B. volume.** See *Tidal* AIR.—**Mouth-b.** Habitual b. through the mouth, especially during sleep.—**Spurious b.** Sighing. [J.]

BREATHLESSNESS, n. Bre^{2}th'le^{2}s-ne^{2}s. See DYSPNŒA.

BRECHACT (Ger.), n. Bre^{2}ch^{2}'a^{3}kt. The act of vomiting. [K, 16.]

BRECHARZNEI (Ger.), n. Bre^{2}ch^{2}'a^{3}rtz-ni. An emetic. [A, 450.]

BRECHBAR (Ger.), adj. Bre^{2}ch^{2}'ba^{3}r. Fragile, brittle; in optics, refrangible. [A, 450; B.]

BRECHBECHER (Ger.), n. Bre^{2}ch^{2}'be^{2}ch^{2}-e^{2}r. See CALICES *vomitorii* (under CALIX).

BRECHBOHNE (Ger.), n. Bre^{2}ch^{2}'bon-e^{2}. The *Phaseolus nanus.* [B, 180.]

BRECHDURCHFALL (Ger.), n. Bre^{2}ch^{2}'durch^{2}-fa^{3}l. Vomiting and purging. [L, 30.]

BRECHEN (Ger.), adj. Bre^{2}ch^{2}'e^{2}n. Vomiting.—**B'erregend.** Emetic. [L, 43.]—**B'stillend.** Antemetic.

BRECHET (Fr.), n. Bre^{2}sh-a. The xiphoid cartilage, also the sternum. [A, 301, 385; L, 41.]

BRECHFEDER (Ger.), n. Bre^{2}ch^{2}'fad-e^{2}r. A feather or some similar soft object used for tickling the fauces in order to produce vomiting. [Oser (A, 319).]

BRECHFIEBER (Ger.), n. Bre^{2}ch^{2}'feb-e^{2}r. Fever with vomiting. [A, 450.]

BRECHHASELKRAUT (Ger.), n. Bre^{2}ch^{2}'ha^{3}z-e^{2}l-kra^{3}-ut. The *Asarum europœum.* [L, 105.]

BRECHKRAUT (Ger.), n. Bre^{2}ch^{2}'kra^{3}-ut. The genus *Psychotria.* [B, 180.]—**Fliederartiges B.** The *Psychotria sambucina.* [B, 180.]—**Schmarotzendes B.** The *Psychotria parasitica.* [B, 180.]

BRECHMA (Lat.), n. n. Bre^{2}k(bre^{2}ch^{2})'ma^{3}. Gen., *brech'matos* (*-tis*). See BREGMA.

BRECHMITTEL (Ger.), n. Bre^{2}ch^{2}'mi^{2}t-te^{2}l. An emetic. [A, 450.]

BRECHMOS (Lat.), n. m. Bre^{2}k(bre^{2}ch^{2})'mo^{2}s. See BREGMA.

BRECHMOST (Ger.), n. Bre^{2}ch^{2}'mo^{3}st. The *sapa vomitoria, sapa vomitoria Sylvii.* [B, 48.]

BRECHMUS (Lat.), n. m. Bre^{2}k(bre^{2}ch^{2})'mu^{3}s(mu^{4}s). See BREGMA.

BRECHNUSS (Ger.), n. Bre^{2}ch^{2}'nus. The genus *Jatropha,* also nux vomica. [B, 180; L, 79.]—**B'abstrakt.** See *Abstractum* NUCIS VOMICÆ.—**B'tinctur.** Tincture of nux vomica. [B.]—**Schwarze B.** The *Jatropha curcas* (*Curcas purgans*). [B, 180.]

BRECHÖL (Ger.), n. Bre^{2}ch^{2}'u^{5}l. Oil of ben. [B, 180.]

BRECHPFLANZE (Ger.), n. Bre^{2}ch^{2}'pfla^{3}ntz-e^{2}. See BRECHKRAUT.

BRECHPILLE (Ger.), n. Bre^{2}ch^{2}'pi^{2}l-le^{2}. An emetic pill. [A, 450.]

BRECHPULVER (Ger.), n. Bre^{2}ch^{2}'pul-fe^{2}r. An emetic powder. [A, 450.]

BRECHPUNKT (Ger.), n. Bre^{2}ch^{2}'punkt. A point of refraction. [A, 450.]

BRECHPURGIREN (Ger.), n. Bre^{2}ch^{2}'purg-er-e^{2}n. See BRECHDURCHFALL.

BRECHPURGIREND (Ger.), adj. Bre^{2}ch^{2}'purg-er-e^{2}nd. Emeto-cathartic. [L, 80.]

BRECHREIZ (Ger.), n. Bre^{2}ch^{2}'ritz. An irritation of the vomiting centre. [K.]

BRECHRIEMEN (Ger.), n. Bre^{2}ch^{2}'rem-e^{2}n. See LORUM *vomitorium.*

BRECHRUHR (Ger.), n. Bre^{2}ch^{2}'rur. See BRECHDURCHFALL.

BRECHSCHEU (Ger.), n. Bre^{2}ch^{2}'shoi. See EMETOPHOBIA.

BRECHSTOFF (Ger.), n. Bre^{2}ch^{2}'sto^{3}f. See EMETINE.

BRECHTRANK (Ger.), n. Bre^{2}ch^{2}'tra^{3}nk. An emetic draught. [A, 450.]

BRECHUNG (Ger.), n. Bre^{2}ch^{2}'ung. See REFRACTION.—**B's-ebene.** The plane of refraction. [B.]—**B'sexponent.** The index of refraction. [B.]—**B'svermögen.** Specific refractive power. [B.]—**B'swinkel.** See ANGLE *of refraction.*

BRECHVEILCHEN (Ger.), n. Bre^{2}ch^{2}'filch^{2}-e^{2}n. See BRECHVIOLE.

BRECHVIOLE (Ger.), n. Bre^{2}ch^{2}'fe-ol-e^{2}. The genus *Jonidium.* [B, 180.]—**Aechte B.** The *Jonidium ipecacuanha.* [B, 180.]—**Kurzstengelige B.** The *Jonidium brevicaule.* [B, 180.]—**Rauhhaarige B.** The *Jonidium poaya.* [B, 180.]

BRECHVITRIOL (Ger.), n. Bre^{2}ch^{2}'fi^{2}t-ri^{2}-ol. Zinc sulphate. [A, 450.]

BRECHWASSER (Ger.), n. Bre^{2}ch^{2}'va^{3}s-se^{2}r. An aqueous solution of tartar emetic. [L, 30.]

BRECHWEIN (Ger.), n. Bre^{2}ch^{2}'vin. Wine of antimony. [A, 247.]

BRECHWEINSTEIN (Ger.), n. Bre^{2}ch^{2}'vin-stin. Tartar emetic. [L, 77.] See ANTIMONY *and potassium tartrate.*—**B'pflaster.** See EMPLASTRUM *antimoniale.*—**B'pocke.** The eruption produced by tartar emetic. [B, 137.]—**B'salbe** [Ger. Ph.]. See *Unguentum* ANTIMONII *tartarati.*

BRECHWURZEL (Ger.), n. Bre^{2}ch^{2}'vurtz-e^{2}l. See IPECACUANHA.—**Aechte B.** The *Cephaelis ipecacuanha.* [B, 180.]—**Bastardb'.** The *Triosteum perfoliatum.* [B, 180.]—**Braune B.** See *Aechte B.*—**B'extrakt.** Emetine. [L, 43.]—**B'kopfblume.** See *Aechte B.*—**B'küchelchen, B'pastillen.** See *Trochisci* IPECACUANHÆ.—**B'pulver.** See *Pulvis* IPECACUANHÆ.—**B'syrup.** See *Syrupus* IPECACUANHÆ.—**B'tinctur.** See *Tinctura* IPECACUANHÆ.—**B'wein.** See *Vinum* IPECACUANHÆ.—**B.-Wolfsmilch.** See EUPHORBIA *ipecacuanha.*—**Geringelte B.** See IPECACUANHA *annulata.*—**Gestreifte B.** See IPECACUANHA *striata.*—**Graue B.** See *Aechte B.*—**Mehlige B.** See IPECACUANHA *undulata.*—**Peruanische B.** See IPECACUANHA *striata.*—**Rostfarbene B.** See IPECACUANHA *ferruginea.*—**Röthlichgraue B.** The *Ipecacuanha annulata griseo-rubens* of Mérat. [B, 180.]—**Schwarze B.** See IPECACUANHA *striata.*—**Spanische B.** See IPECACUANHA *undulata.*—**Weisse B., Weissholzige B.** See IPECACUANHA *alba.*—**Weisslichgraue B.** The *Ipecacuanha annulata griseo-alba* of Mérat. [B, 180.]—**Wellenförmige B., Wogige B.** See IPECACUANHA *undulata.*

BRECHWOLFSMILCH (Ger.), n. Bre^{2}ch^{2}'vo^{3}lfs-mi^{2}lch^{2}. The *Euphorbia ipecacuanha.* [L, 135.]

BRECHWUTH (Ger.), n. Bre^{2}ch^{2}'vut. See EMETOMANIA.

BRECOS, n. See BREKOS.

BRECTAN, n. A Bohemian name for the *Hedera helix.* [L, 105.]

BRÈDE (Fr.), n. Bre^{2}d. A popular name for various plants, particularly the *Amarantus oleraceus.* [A, 385; B, 173.]—**B. bengale.** A Chinese species of *Chenopodium.* [L, 105.]—**B. ciraumon.** The buds of a variety of *Cucurbita melopepo.* [L, 105.]—**B's cresson.** The leaves of *Sisymbrium nasturtium.* [B, 173.]—**B. de l'Inde.** The *Amarantus oleraceus.* [L, 87.]—**B. du Malabar.** The *Amarantus spinosus.* [B, 46.]—**B. gandole.** See *B. d'Angole.*—**B. glaciale.** The *Mesembryanthemum crystallinum.* [L, 87.]—**B. malabare.** See *B. du Malabar.*—**B. malgache.** The *Spilanthes oleracea.* [L, 87.]—**B. morelle.** The leaves of *Solanum nigrum,* var. *atriplicifolium.* [B, 173.]—**B. puante.** The leaves of *Cleome pentaphylla.* [B, 173; L, 87.]

BRÉDISSURE (Fr.), n. Brad-i^{2}s-su^{6}r. See Trismus *capistratus.*

BREDOL DE RIO (Port.), n. Brad-ol' da re'o. The *Phytolacca decandra.* [L, 77, 105.]

BREDO-TALI, n. A name given in the Philippine Islands to the *Basella rubra.* [L, 105.]

BREDOUILLEMENT (Fr.), n. Bre^{2}d-u-el-y'ma^{3}n^2. Stuttering. [A, 301.]

BREEA (Lat.), n. f. Bre(bra)'a^3. See Serratula.—**B. arvensis.** Ger., *Ackerdistel.* The *Cnicus arvensis.* [B, 215.]

BREECH, n. Bri^{2}ch. Fr., *siége.* Ger., *Steiss.* It., *sede.* Sp., *nalgas.* The buttocks; the lower and posterior portion of the trunk. See *B.* presentation.

BREECHES, n. pl. Bri^{2}ch'e^{2}z. A.-S., *brec, broec.* Lat., *braccæ.* Fr., *culottes.* Ger., *Beinkleider, Hosen.* It., *brache, calzoni.* Sp., *calzones.* A man's garment covering the lower part of the body and the upper part of the lower limbs. The term has been applied to articles of woven wire fashioned into the shape of such a garment and used as splints. [A. 276.]

BREEHUTI (Hind.), n. The *Solanum ferox.* [B, 172.]

BREESE, BREESE-FLY, BREEZE, BREEZE-FLY, n's. Brez, brez'fli. A.-S., *brimse.* The *Œstrus (Tabanus) bovinus.* [G; L, 25.]

BREGEOTTE (Fr.), n. Bre^2-zhot. The *Erica cinerea.* [B, 173.]—**B. jaune.** The *Genista humifusa.* [B, 173.]

BREGMA (Lat.), n. n. Bre^{2}g'ma^3. Gen., *breg'matos (-tis).* Gr., *βρέγμα* (said to be from *βρέχειν,* to moisten, because the part is soft and moist in infants). The upper and fore part of the head; more exactly, the point of junction of the coronal and sagittal sutures, corresponding to the anterior fontanelle in infants. [L, 149.]

BREGMATIC, adj. Bre^{2}g-ma^{2}t'i^{2}k. Lat., *bregmaticus.* Fr., *bregmatique.* Ger., *bregmatisch.* Pertaining to the bregma. [L, 41.]

BREGMOS, BREGMUS (Lat.), n's m. Bre^{2}g'mo^{2}s, -mu^{3}s-(mu^{4}s). See Bregma.

BRÉHAIGNE (Fr.), adj. Bra-e^{2}n. Sterile (said of the domestic animals); as a n., a mare that has canine teeth (supposed to indicate sterility). [A, 301, 385; L, 109.]

BRÉHAIGNETÉ (Fr.). n. Bra-e^{2}n-ta. Sterility (said of the domestic animals). [L, 109.]

BREHÊME (Fr.), n. Bre^2-e^{2}m. The *Solanum esculentum.* [B, 173.]

BREI (Ger.), n. Bri. Gruel, pap. [A, 450; L, 43.]—**B'apfel, B. apfelbaum.** The *Achras sapota.* [B, 180; L, 80.]—**B'apfelkörner.** The seeds of *Achras sapota.* [B, 180.]—**B'artig.** Pap-like, atheromatous. [A, 450.]—**B'geschwulst.** An atheromatous tumor. [A, 450; L, 43.]—**B'mehl.** See *Mineral* agaric.—**B'umschlag.** A poultice. [L, 43.]—**B'weich.** See *B'artig.* **Grützb'.** Boiled groats, oatmeal pap, water-gruel. [A, 450.]—**Grützb'jökel.** Sulphate of iron. [A, 450.]—**Grützb'suppe.** Oatmeal gruel. [A, 450.]—**Milchb'.** Milk-pap. [A, 450; L, 43.]

BREIDIN, n. Bre'i^{2}d-i^{2}n. Fr., *bréidine.* A crystallizable substance obtained from elemi. [B, 2.]

BREIN, n. Bre'i^{2}n. Fr., *bréine.* An uncrystallizable substance found in elemi. [B, 10.]

BREISLAUCH (Ger.), n. Bris'la^3-uch^2. The *Allium schœnoprasum.* [L, 37.]

BREITBEUTEL (Ger.), n. Brit'boit-e^{2}l. The genus *Platanthera.* [B, 180.]—**Grünblüthiger B.** The *Platanthera chlorantha.* [B, 180.]—**Weissblüthiger B.** The *Platanthera bifolia.* [B, 180.]

BREITBLÄTTERICHTER (Ger.), n. Brit'blat-te^{2}r-i^{3}ch^{2}t-e^{2}r. The *Sium latifolium.* [L, 43.]

BREITBLÄTTERIG (Ger.), adj. Brit'blat-te^{2}r-i^{2}g. Broad-leaved. [A, 450.] See Latifolius.

BREITBLATT-MANNSSCHILD (Ger.), n. Brit'bla^{3}t-ma^{3}ns-sheld. The *Androsace maxima.* [L, 80.]

BREITBRÜSTIG (Ger.), adj. Brit'bru^{6}st-i^{2}g. Broad-chested. [A, 450.]

BREITE (Ger.), n. Brit'e^2. Breadth. [A, 450.] See Amplitude.—**B'nlangenindex.** The ratio of the transverse to the antero-posterior diameter of the skull. [Benedikt (A, 319).]

BREITFÜSSIG (Ger.), adj. Brit'fu^{6}s-si^{2}g. Broad-footed. [L, 80.] See Platypodus.

BREITGEFIEDERT (Ger.), adj. Brit'ge^2-fed-e^{2}rt. Broad-winged. [A, 450.] See Platypterus.

BREITGESCHULTERT (Ger.), adj. Brit'ge^2-shult-e^{2}rt. Broad-shouldered. [A, 450.]

BREITGESCHWÄNZT (Ger.), adj. Brit'ge^2-shwantzt. Broad-tailed. [A, 450.]

BREITGESTIRNT (Ger.), adj. Brit'ge^2-sternt. Having the forehead broad. [A, 450.]

BREITKÖPFIG (Ger.), adj. Brit'ku^{5}pf-i^{2}g. Broad-headed. [L, 30.] See Platycephalus.—**B'keit.** Broad-headedness. [L, 30.] See Platycephalia.

BREITMORCHEL (Ger.), n. Brit'morch^2-e^{2}l. The *Morchella esculenta.* [L, 43.]

BREITNASIG (Ger.), adj. Brit'na^{3}z-i^{2}g. Broad-nosed. [A, 450.] See Platyrrhinus.

BREITSCHNABELIG (Ger.), adj. Brit'shna^{3}b-e^{2}l-i^{2}g. Having a broad bill or snout. [A, 450.] See Latirostratus.

BREITSCHULTERIG (Ger.), adj. Brit'shult-e^{2}r-i^{2}g. See Breitgeschultert.

BREITSCHWÄNZIG (Ger.), adj. Brit'shwantz-i^{2}g. See Breitgeschwänzt.

BREITSTIRNIG (Ger.), adj. Brit'stern-i^{2}g. See Breitgestirnt.

BREIUMSCHLAG (Ger.), n. Bri'um-shla^{3}g. A poultice.

BREKOS, n. An Egyptian name for the *Lupinus varius.* [L, 105.]

BRELISIS, n. See Caranna.

BREMSE (Ger.), n. Bre^{2}ms'e^2. See Œstrus.—**Afterb', Afterkriecher-B.** See Œstrus *hæmorrhoidalis.*—**B'nschwindel.** Syn.: *Drehkrankheit.* A disease of sheep known as maggots. [L, 135.]—**Nasenb'.** See Œstrus *nasalis.*—**Ochsenb'.** See Œstrus *bovis.*—**Pferdeb'.** See Œstrus *equi.*—**Schalb'.** See Œstrus *ovis.*

BRENA (Sp.), n. Bran'a^3. The *Rubus fruticosus.* [L, 105.]

BRENNBORSTIG (Ger.), adj. Bre^{2}n'borst-i^{2}g. See Brennhaarig.

BRENNCYLINDER (Ger.), n. Bre^{2}n'tsu^{6}l-i^{2}nd-e^{2}r. See Moxa.

BRENNEISEN (Ger.), n. Bre^{2}n'i-ze^{2}n. A cautery-iron. [E.]

BRENNEN (Ger.), n. Bre^{2}n'e^{2}n. A burning. [E.]—**B. im Magen.** See Pyrosis.—**Harnb'.** See Ardor *urinæ.*—**Mageub', Sodb'.** See Pyrosis.

BRENNFIEBER (Ger.), n. Bre^{2}n'feb-e^{2}r. An ardent fever. [L, 43.]

BRENNGLAS (Ger.), n. Bre^{2}n'gla^{3}s. A burning-glass. [B.]

BRENNHAAR (Ger.), n. Bre^{2}n'ha^{3}r. A stinging hair, as of a nettle. [B.]

BRENNHAARIG (Ger.), adj. Bre^{2}n'ha^{3}r-i^{2}g. Furnished with stinging hairs. [L, 43.]

BRENNHELM (Ger.), n. Bre^{2}n'he^{2}lm. The head of a still. [L, 43.]

BRENNKEGEL (Ger.), n. Bre^{2}n'kag-e^{2}l. See Moxa.

BRENNKOLBEN (Ger.), n. Bre^{2}n'kolb-e^{2}n. An alembic. [L, 46.]

BRENNKRAUT (Ger.), n. Bre^{2}n'kra^3-ut. The genus *Acalypha,* also the *Clematis erecta* and the *Ranunculus acris.* [B, 180; L, 105.]—**B'gewächse.** See Acalypheæ.

BRENNMESSER (Ger.), n. Bre^{2}n'me^{2}s-se^{2}r. A cautery-knife. [E.]

BRENNMITTEL (Ger.), n. Bre^{2}n'mi^{2}t-te^{2}l. A caustic, a cautery. [E.]

BRENNNESSEL (Ger.), n. Bre^{2}n'ne^{2}s-se^{2}l. The genus *Urtica.* [B, 180.]—**B'gewächse.** See Urticaceæ.—**Grosse B.** The *Urtica dioica.* [B, 180.]—**Kleine B.** The *Urtica urens.* [B, 180.]

BRENNOFEN (Ger.), n. Bre^{2}n'of-e^{2}n. A furnace. [L, 43.]

BRENNPUNKT (Ger.), n. Bre^{2}n'pun^{2}kt. A focus. [B.]—**Scheinbarer B., Virtueller B.** An apparent (virtual) focus. [B.]—**Zusammengehörige B'e.** Conjugate foci. [B.]

BRENNRAUM (Ger.), n. Bre^{2}n'ra^3-um. See Brennpunkt.

BRENNREBEN (Ger.), n. Bre^{2}n'rab-e^{2}n. The *Clematis vitalba.* [L, 77.]

BRENNREITZIGER (Ger.), n. Bre^{2}n'ritz-i^{2}g-e^{2}r. The *Agaricus pyrogalus.* [L, 80.]

BRENNSPIEGEL (Ger.), n. Bre^{2}n'speg-e^{2}l. A burning-mirror; a concave mirror which converges rays of heat and light to a focus. [B.]

BRENNSPITZE (Ger.), n. Bre^{2}n'spi^{2}tz-e^2. See Brennhaar.

BRENNSTIFT (Ger.), n. Bre^{2}n'sti^{2}ft. A stick of caustic. [Bernatzik (A, 319).]

BRENNSTOFF (Ger.), n. Bre^{2}n'sto^{3}f. Nitrogen. [L, 80.]

BRENNWALDREBENKRAUT (Ger.), n. Bre^{2}n'va^{3}ld-rab-e^{2}n-kra^3-ut. The *Clematis erecta.* [B, 180.]

BRENNWEITE (Ger.), n. Bre^{2}n'vit-e^2. The focal distance of a lens. [B.]

BRENNWURZBEEREN (Ger.), n. pl. Bre^{2}n'vurtz-bar-e^{2}n. The dried fruit of *Daphne gnidium.* [B, 180.]

BRENTHIDÆ, BRENTIDÆ, BRENTIDES (Lat.), n's f. pl. Bre^{2}n'thi^{2}d-e(a^3-e^2), -ti^{2}d-e(a^3-e^2), -ez(e^{2}s). Fr., *brenthides, brentides.* A family of the *Coleoptera.* [L, 292.]

BRENZACONITSÄURE (Ger.), n. Bre^{2}ntz'a^{3}k-on-et"zoir-e^2. Itaconic acid. [A, 324.]

BRENZCATECHIN (Ger.), n. Bre^{2}ntz'ka^{3}t-e^{3}ch^2-en". See Pyrocatechin.

BRENZCITRONENSÄURE (Ger.), n. Bre^{2}ntz'tsi^{2}t-ron"e^{2}n-zoir-e^2. Pyrocitric acid. [B, 270.]

BRENZESSIGGEIST (Ger.), n. Bre^{2}ntz'e^{2}s-si^{2}g-gist. Acetone. [B.]

BRENZGALLUSSÄURE (Ger.), n. Bre^{2}ntz'ga^{3}l-lus-zoir-e^2. Pyrogallic acid. [B.]

BRENZHARNSÄURE (Ger.), n. Bre^{2}ntz'ha^{3}rn-zoir-e^2. Cyanuric acid. [A, 324.]

BRENZKATECHIN (Ger.), n. Bre^{2}ntz'ka^{3}t-e^{2}ch^2-en''. See PYROCATECHIN.

BRENZKOMENSÄURE (Ger.), n. Bre^{2}ntz'kom-an''zoir-e^2. Pyromeconic acid. [A, 324.]

BRENZLICH (Ger.), adj. Bre^{2}ntz'li^{2}ch^2. Empyreumatic. [L, 43.]—**B.-holzlichsauer.** Pyroligneous. [L, 80.]—**B't.** See *B.*—**B.-weinsteinsauer.** Pyrotartaric. [L, 80.]

BRENZÖL (Ger.), n. Bre^{2}ntz'u^{6}l. An empyreumatic oil. [B, 270.]—**B'säure.** Sebacic acid. [B, 270.]

BRENZSÄURE (Ger.), n. Bre^{2}ntz'zoir-e^2. See *Pyro*-ACID.

BRENZSCHLEIMSÄURE (Ger.), n. Bre^{2}ntz'shlim-zoir-e^2. Pyromucic acid. [B, 270.]—**B'äthylester.** Ethyl pyromucate. [B.]

BRENZTARTRYLSÄURE (Ger.), n. Bre^{2}ntz'ta^{3}rt-ru^{6}l''zoir-e^2. Pyrotartrylic acid. [B, 270.]

BRENZTEREBINSÄURE (Ger.), n. Bre^{2}ntz'te^{2}r-e^{2}b-en''-zoir-e^2. Pyroterebic acid. [B, 270.]

BRENZTRAUBENSÄURE (Ger.), n. Bre^{2}ntz'tra^3-ub-e^{2}n-zoir-e^2. Pyroracemic acid. [B, 270.]

BRENZWEINSÄURE (Ger.), n. Bre^{2}ntz'vin-zoir-e^2. Pyrotartaric acid. [B, 270.]

BREPHAMORPHA (Lat.), n. f. Bre^{2}f-a^{2}m(a^{3}m)-o^{2}rf'a^3. From βρέφος, a new-born infant, and ἄμορφος, deformed. An old term thought by Kraus to denote some spot or blemish of the skin in infants. [A, 322.]

BREPHICUS (Lat.), adj. Bre^{2}f'i^{2}k-u^{3}s(u^{4}s). Gr., βρεφικός. Infantile, pertaining to an infant or a fœtus. [A, 322.]

BREPHOCACOCOLPIA (Lat.), n. f. Bre^{2}f-o(o^2)-ka^{2}k(ka^{3}k)-o(o^2)-ko^{2}l'pi^2-a^3. From βρέφος, an infant, κακός, ill-conditioned, and κόλπος, the vulva. Gangrene of the vulva in infants. [A, 322.]

BREPHOMENINGURIA (Lat.), n. f. Bre^{2}f-o(o^2)-me^{2}n(man)-i^{2}n^2-gu^2(gu)'ri^2-a^3. From βρέφος, an infant, μῆνιγξ, a membrane, and οὖρον, urine. A condition in infants in which membranous shreds are passed with the urine. [A, 322.]

BREPHOPITYRIASIS (Lat.), n. f. Bre^{2}f-o(o^2)-pi^{2}t-i^2(u^6)-ri(ri^2)'a^3-si^{2}s. Gen., *brephopityria'seos* (*-ri'asis*). From βρέφος, an infant, and πιτυρίασις (see PITYRIASIS). Pityriasis in infants. [A, 322.]

BREPHOPOLYSARCIA (Lat.), n. f. Bre^{2}f-o(o^2)-po^{2}l-i^2(u^6)-sa^{3}r'si^2(ki^2)-a^3. From βρέφος, an infant, and πολυσαρκία, fleshiness. Excessive fleshiness in infants. [A, 322.]

BREPHOTROPHIUM (Lat.), n. n. Bre^{2}f-o(o^2)-tro(tro^2)-fi(fe)'-u^{3}m(u^{4}m). Gr., βρεφοτροφεῖον (from βρέφος, an infant, and τρέφειν, to nurse). Ger., *Findelhaus.* A foundling hospital. [A, 322.]

BREPHULCUS (Lat.), n. n. Bre^{2}f-u^{3}l(u^{4}l)'ku^{3}s(ku^{4}s). Gen., *brephul'ceris.* From βρέφος, an infant, and ἕλκειν, to draw down. Ger., *Kinderzieher.* An obstetrical forceps. [A, 322.]

BREPHYDROCEPHALUS (Lat.), n. m. Bre^{2}f-id(u^{6}d)-ro(ro^2)-se^{2}f(ke^{2}f)'a^{2}l(a^{3}l)-u^{3}s(u^{4}s). From βρέφος, an infant, and ὑδροκέφαλος (see HYDROCEPHALUS). Ger., *Wasserkopf der Kinder.* Hydrocephalus in children. [A, 332.]

BRESILIN, n. Bre^{2}s'i^{2}l-i^{2}n. Fr., *brésiline.* See BRASILIN.

BRÉSILLET (Fr.), n. Bra-zi^{2}l-la. 1. Brazil-wood. [A, 385.] 2. The genus *Guilandina.* [B, 173.]—**B. de Fernambouc.** The *Cæsalpinia echinata.* [L, 87.]—**B. des Antilles.** The *Cæsalpinia brasiliensis.* [L, 87.]—**B. des Indes.** The *Cæsalpinia sappan.* [B, 173; L, 87.]—**Faux b.** The *Comocladia integrifolia.* [B, 173.]

BRÉSILLOT (Fr.), n. Bra-zi^{2}l-lo. See BRESILLET (1st def.).

BRETANICA (Lat.), n. f. Bre^{2}t-a^{2}n(a^{3}n)'i^{2}k-a^3. See BRITANNICA.

BRETCHEN (Ger.), n. Bre^{2}t'ch^{2}e^{2}n. A small wooden splint. [L, 135.]

BRÈTE (Fr.), n. Bre^{2}t. See BRÈDE.

BRETT (Ger.), n. Bre^{2}t. See BLATT.—**B'ähnlich, B'artig.** See SANIDODES.—**B'er-Feldbettstelle.** A portable bedstead made of boards, for use in field-hospitals. [A, 319.]

BREUVAGE (Fr.), n. Bru^{6}v-a^{3}zh. In veterinary medicine, a drench; any liquid medicinal preparation. [A, 301, 385.]—**B. ammoniacal.** Ammonia-water diluted with 100 parts of water; used for tympanites in ruminants. [L, 49.]—**B. antiseptique d'Alfort.** Diluted *eau de Rabel.* [L, 49.]—**B. calmant** [Fr. Cod.]. A preparation made of 15 parts each of asafœtida, camphor, and commercial ether, and 1,000 of water. [A, 253.]—**B. calmant opiacé** [Fr. Cod.]. A preparation made of 30 parts of Sydenham's laudanum, 15 of commercial ether, and 1,000 of water. [A, 253.]—**B. cordial.** A mixture of wine, tincture of cinnamon, and molasses. [L, 49.]—**B. diurétique.** A mixture of 90 parts of potassium nitrate, 115 of honey, and 4,000 each of white wine and water. [L, 49.]—**B. émétique.** A solution of from 4 to 6 parts of antimony and potassium tartrate in 2,000 of water. [L, 49.]—**B. purgatif.** A preparation made of 30 parts of aloes, 60 of magnesium sulphate, 15 of aniseed, and 1,000 of water. [L, 49.]—**B. rafraichissant.** A mixture of honey and vinegar. [L, 49.]—**B. stimulant antiputride.** A mixture of 10 parts of oil of turpentine, 20 of tincture of cinchona, and 200 each of wine and water. [L, 49.]—**B. vermifuge.** A mixture of 30 parts of oil of turpentine, the yolks of 3 eggs, 200 parts of honey, and 1,000 of white wine. [L, 49.]

BREVETAGE (Fr.), n. Brev-e^{2}t-a^{3}zh. The process of combining a potassium or ammonium salt with one of aluminium so as to make an alum. [L, 41.]

BREVEXTENSOR (Lat.), n. m. Bre(bre^2)-ve^{2}x(we^{2}x)-te^{2}ns'o^{2}r. Gen., *brevextenso'ris.* E. Coues's term for an extensor brevis muscle. [L.]—**B. digitorum** [E. Coues]. See EXTENSOR *brevis digitorum.*

BREVICAUDATE, adj. Bre^{2}v-i^2-ka^{4}d'at. Lat., *brevicaudatus* (from *brevis*, short, and *cauda*, a tail). Fr., *brévicaude.* Having a short tail or tail-like appendage. [L, 41, 180.]

BREVICAULINE, adj. Bre^{2}v-i^2-ka^{4}l'i^{2}n. Lat., *brevicaulis* (from *brevis*, short, and *caulis*, a stalk). Fr., *brévicaule.* Short-stemmed. [L, 41.]

BREVICEPS (Lat.), adj. Bre(bre^2)'vi^2(wi^2)-se^{2}ps(ke^{2}ps). From *brevis*, short, and *caput*, the head. Having a short head. [L.]

BREVICIPITIDÆ (Lat.), n. f. pl. Bre(bre^2)-vi^2(wi^2)-si^{2}p(ki^{2}p)-i^{2}t'i^{2}d-e(a^3-e^2). A family of the *Raniformia.* [L, 204.]

BREVICOLLIS (Lat.), adj. Bre(bre^2)-vi^2(wi^2)-ko^{2}l'li^{2}s. From *brevis*, short, and *collum*, the neck. Fr., *brévicolle.* Ger., *kurzhalsig.* Short-necked. [L, 41, 180.]

BRÉVICÔNE (Fr.), adj. Bra-vi^2-kone. From *brevis*, short, and *conus*, a cone. See BREVIROSTRATUS.

BREVICORNIS (Lat.), adj. Bre(bre^2)-vi^2(wi^2)-ko^{2}rn'i^{2}s. From *brevis*, short, and *cornu*, a horn. Fr., *brévicorne.* Having short horns or antennæ. [L, 41.]

BREVIDENS (Lat.), adj. Bre(bre^2)'vi^2(wi^2)-de^{2}nz(de^{2}ns). From *brevis*, short, and *dens*, a tooth. Fr., *brevidenté.* Having short teeth. [L, 41.]

BREVIDUCTOR (Lat.), n. m. Bre(bre^2)-vi^2(wi^2)-du^{3}k(du^{4}k)'-to^{2}r. Gen., *breviducto'ris.* E. Coues's term for an adductor brevis muscle. [L.]

BREVIFLEXOR (Lat.), n. m. Bre(bre^2)-vi^2(wi^2)-fle^{2}x'o^{2}r. Gen., *breviflexo'ris.* E. Coues's term for a flexor brevis muscle. [L.]—**B. hallucis** [E. Coues]. See FLEXOR *brevis pollicis pedis.*—**B. minimi** [E. Coues]. See FLEXOR *brevis minimi digiti.*—**B. pollicis** [E. Coues]. See FLEXOR *brevis pollicis.*

BREVIFLORUS (Lat.), adj. Bre(bre^2)-vi^2(wi^2)-flor'u^{3}s(u^{4}s). From *brevis*, short, and *flos*, a flower. Fr., *bréviflore.* Ger., *kurzblüthig.* Having short flowers. [L, 41, 180.]

BREVIFOLIUS (Lat.), adj. Bre(bre^2)-vi^2(wi^2)-fol(fo^{2}l)'i^2-u^{3}s-(u^{4}s). From *brevis*, short, and *folium*, a leaf. Fr., *brévifolié.* Ger., *kurzblätterig.* Having short leaves. [L, 41.]

BRÉVIGASTRE (Fr.), adj. Bra-vi^2-ga^{3}str. From *brevis*, short, and *gaster* (= γαστήρ), the belly. Short-bellied. [L, 41.]

BREVILINGUIA (Lat.), n. n. pl. Bre(bre^2)-vi^2(wi^2)-li^{2}n^2'gwi^2-a^3. From *brevis*, short, and *lingua*, the tongue. Fr., *brévilingues.* A group of the *Lacertilia* having a thick, fleshy tongue capable of being protruded only when the mouth is open. [L, 147.]

BREVIPED, adj. Bre'vi^2-pe^{2}d. Lat., *brevipes* (from *brevis*, short, and *pes*, a foot). Fr., *brévipède.* Ger., *kurzfüssig.* Having short feet or legs. [L, 56.]

BREVIPEDES (Lat.), n. f. pl. Bre^2-vi^{2}p(wi^{2}p)'e^{2}d-ez(e^{2}s). Fr., *brévipèdes.* Of Scopoli, an order of birds embracing those with short feet; of Harvoth, a family of saurians having short feet. [L, 180.]

BREVIPENNATÆ (Lat.), n. f. pl. Bre(bre^2)-vi^2(wi^2)-pe^{2}n-na(na^3)'te(ta^3-e^2). A family of the *Natatores.* [L, 14.]

BREVIPENNATE, adj. Brev-i^2-pe^{2}n'nat. Lat., *brevipennatus* (from *brevis*, short, and *penna*, a wing). Fr., *brévipennes.* Ger., *kurzflügelig.* Short-winged. [L, 180.]

BREVIPENNES, BREVIPENNIA (Lat.), n's f. and n. pl. Bre(bre^2)-vi^2(wi^2)-pe^{2}n'nez(ne^{2}s), -ni^2-a^3. Fr., *brévipennes.* Ger., *kurzflügler.* Of Cuvier and others, a family of birds with short wings not adapted to flying; of Duméril, a family of the *Coleoptera* having short elytra. [L, 292.]

BREVIPERONEUS (Lat.), n. m. Bre(bre^2)-vi^2(wi^2)-pe^{2}r-o^{2}n-e(a)'u^{3}s(u^{4}s). E. Coues's term for the peroneus brevis muscle. [L.]

BREVIROSTRATA (Lat.), n. n. pl. Bre(bre^2)-vi^2(wi^2)-ro^{2}s-tra(tra^3)'ta^3. Fr., *brévirostres.* Of Latreille, a division of the *Curculionites* having a short beak, also an order of the *Edentata* having a short muzzle. [L, 180.]

BREVIROSTRATUS, BREVIROSTRIS, BREVIROSTRUS (Lat.), adj's. Bre(bre^2)-vi^2(wi^2)-ro^{2}s-tra(tra^3)'tu^{3}s(tu^{4}s), -ro^{2}s'tri^{2}s, -tru^{3}s(tru^{4}s). From *brevis*, short, and *rostrum*, a beak, snout, or muzzle. Fr., *brévirostre.* Ger., *kurzschnabelig.* Having a short bill, snout, or operculum. [L, 180.]

BREVIS (Lat.), adj. Bre(bre^2)'vi^{2}s(wi^{2}s). Short; as a n., a short muscle. [F; L.]—**B. cubiti.** The anconæus muscle of the forearm. [A, 379.]—**B. palmaris.** See PALMARIS *brevis.*—**B. radii.** The supinator radii brevis muscle. [A, 379.]

BREVISCAPUS (Lat.), adj. Bre(bre^2)-vi^2(wi^2)-skap(ska^{3}p)'-u^{3}s(u^{4}s). From *brevis*, short, and *scapus* (= σκῆπος), a stem. Fr., *bréviscape.* Having a short stem. [L, 41, 180.]

BREVISETUS (Lat.), adj. Bre(bre^2)-vi^2(wi^2)-se(sa)'tu^{3}s(tu^{4}s). From *brevis*, short, and *seta*, a bristle. Fr., *brévisète.* Having short hairs. [L, 41.]

BREVISSIMUS (Lat.), adj., superl. of *brevis.* Bre^2-vi^{2}s(wi^{2}s)'-si^{2}m-u^{3}s(u^{4}s). Shortest.—**B. oculi.** The inferior oblique muscle of the eye, from its being the shortest of the muscles that rotate the eyeball. [L, 107.]

BREVISTYLUS (Lat.), adj. Bre(bre^2)-vi^2(wi^2)-stil(stu^{6}l)'u^{3}s-(u^{4}s). From *brevis*, short, and *stylus* (= στῦλος), a shaft. Fr., *brévistyle.* In botany, having a short style. [L, 41.]

BREVISUPINATOR (Lat.), n. m. Bre(bre^2)-vi^2(wi^2)-su^2(su^4)-pin(pen)-a(a^3)'to^{2}r. E. Coues's term for the supinator radii brevis muscle. [L.]

BREXANTES (Lat.), n. f. pl. Bre²x-a²nt(a³nt)'ez(e²s). Gr., βρέξαντες. An ancient name for certain little green frogs, the blood of which was used to restrain the growth of the hair. [Galen (A, 325).]

BREXIACEÆ [Lindley] (Lat.), n. f. pl. Bre²x-i²-a(a³)'se²(ke²)-e(a³-e²). Fr., *brexiacées*. See SAXIFRAGEÆ.

BREXIADS, n. pl. Bre²x'i²-a²dz. See BREXIACEÆ.

BREXIAL, adj. Bre²x'i²-a²l. Lat., *brexialis*. Of or pertaining to the genus *Brexia*, or belonging to the b. alliance. [B.]—**B. alliance.** See BREXIALES.

BREXIALES (Lat.), n. f. pl. Bre²x-i²-a(a³)'lez(le²s). Of Lindley, an alliance of the *Polycarpicæ*, comprising the single order *Brexiaceæ*. [B, 170.]

BREXIEÆ [Reichenbach] (Lat.), n. f. pl. Bre²x-i(i²)'e²-e(a³-e²). A subdivision of the *Ilicinæ*. [B, 170.] See BREXIACEÆ.

BREY (Ger.), n. Bri. See BREI.

BREYNIA (Lat.), n. f. Brin'(bre²'u⁶n)-i²-a³. A species of *Capparis*. [L, 84.]

BREZILIN, BREZILINE, n's. Bre²z'i²l-i²n, -en. See BRASILIN.

BRIAR, n. Bri'a³r. See BRIER.

BRIAREIDÆ [Gray] (Lat.), n. f. pl. Bri(bri²)-a³r-e(e²)'i²d-e-(a³-e²). A family of the *Zoophytaria*. [L, 244.]

BRICK, n. Bri²k. Fr., *brique*. A material composed mostly of clay baked in the sun and by means of fire. Powdered and mixed with lard, it was formerly used as an ointment in certain skin diseases. [A, 301.]

BRICUCUM, BRICUMUM, n's. Old names for one or more species of *Artemisia*. [L, 84, 94.]

BRIDE (Fr.), n. Bred. See BRIDLE.—**B. masculine du vestibule.** Of Pozzi, a transverse band described by him as situated between the clitoris and the meatus urinarius, on either side of which it curves downward and becomes continuous with the hymen; said to constitute the remains of the anterior portion of the embryonic corpus spongiosum. ["Progr. méd.," Feb. 23, 1884, p. 151.]—**B's placentaires.** Amniotic bands attached to the placenta. [Marchand (A, 319).]

BRIDÉ (Fr.), adj. Bred-a. Having one or more bridle-like bands; in zoology, having one or more colored streaks running from the back toward the head, somewhat resembling bridles. [L, 180.]

BRIDELIA (Lat.), n. f. Bri²d-el(al)'i²-a³. Fr., *bridélie*. A genus of euphorbiaceous plants. [B, 173.]—**B. spinosa.** Fr., *bridélie épineuse*. A species the bark of which is astringent and is used in India as a remedy for intestinal worms in animals. [B, 173.]

BRIDES-LES-BAINS (Fr.), n. Bred-la-ba²n². A place in the department of Savoie, France, where there are warm springs containing calcium sulphate and sodium chloride. [A, 385.]

BRIDEWORT, n. Brid'wu⁵rt. The *Spiræa ulmaria*. [B, 275.]

BRIDGE, n. Bri²j. A.-S., *brycg*. Gr., γέφυρα. Lat., *pons*. Fr., *pont*. Ger., *Brücke*. It., *ponte*. Sp., *puente*. In general, a structure extending like a roadway from one part to another; of the nose, the anterior and upper, salient portion.—**B. of Varolius.** See PONS *Varolii*.—**Intercellular b's.** Slender processes of cell-substance connecting neighboring cells. [J.]—**Jugal b.** See *Zygomatic* ARCH.—**Wheatstone's b.** An apparatus for determining the resistance encountered by a galvanic current by comparing or balancing it with a known resistance. It consists of four wires, *AB*, *BC*, *CD*, and *DA*, forming the sides of a parallelogram and constituting a closed circuit, two opposite points of which, *A* and *C*, are connected with the poles of a galvanic battery, and two other opposite points, *B* and *D*, with a galvanometer. There are four breaks, *a*, *b*, *c*, and *d*, one at the middle of each wire. At two of these points connection is made by wires of a known degree of resistance; at the third is inserted a rheostat by which a known resistance variable at will can be interposed in the circuit; at the fourth is inserted the substance the resistance of which is to be ascertained. If now a current from the battery enters the circuit at *A*, it will divide and pass partly along *AB* and *BC* to *C*, and partly along *AD* and *DC*; and, if the combined effect of the resistances at *a* and *b* is equal to that of those at *c* and *d*, the two currents will neutralize each other and the galvanometer needle will not be deflected. In this condition of equilibrium the four resistances are in proportion to each other, and, three of them being known, the fourth can be determined. Hence, to find the unknown resistance it is only necessary to alter the resistance in the rheostat until the galvanometer needle no longer deviates. [B, 21.]

BRIDLE, n. Bridl. A.-S., *bridel*. Gr., χαλινός. Lat., *frenum*, *frenulum*, *retinaculum*. Fr., *bride*. Ger., *Bändchen*. It., *freno*, *briglia*. Sp., *brida*, *freno*. A band or filament stretching from one part to another, whether normal or pathological. [A, 301, 385.] Cf. FRENUM.

BRIDOU (Fr.), n. Bred-u. See PERLÈCHE.

BRIEDÉLIE (Fr.), n. Bred-al-e. See BRIDELIA.

BRIEFTRÄGER (Ger.), n. Bref'trag-e²r. The subscapularis muscle. [L, 80.]

BRIEG (Ger.), n. Breg. A place in Switzerland, where there is a hot sulphurous spring. [L, 135.]

BRIER, n. Bri'u⁵r. A.-S., *brœr*. Any prickly herb or shrub; a general name for wild roses and brambles. [B, 275; L, 56.]—**B.-rose.** The *Rosa canina*. [B, 275.]—**Green b.** The *Smilax rotundifolia*. [B, 275.]—**Sensitive b.** The genus *Schrankia*. [B, 275.]—**Wild b.** See *B.-rose*.

BRIESEL (Ger.), n. Bre'ze²l. The mammary gland. [L, 43.]

BRIESTMILCH (Ger.), n. Brest'mi²lch². Colostrum (*q. v.*). [L, 43.]

BRIGANTES (Lat.), n. m. pl. Bri²g-a²nt(a³nt)'ez(e²s). An old name for the *Acarus scabiei* and other mites. [G. Behrend (A, 319).]

BRIGBOG, n. The *Aristolochia clematitis*. [B, 173.]

BRIGG (Ger.), n. Breg. See BRIEG.

BRIGHTHELMSTONE, n. Brit'he²lm-sto³n. See BRIGHTON.

BRIGHTIQUE (Fr.), adj. Brit-ek. Of or pertaining to Bright's disease; as a n., a person affected with Bright's disease. [Dieulafoy, "Gaz. hebd. de méd. et de chir.," May 19, 1882, p. 321.]

BRIGHTON, n. Britn. A climatic resort on the southern coast of England. [L. Perl (A, 319).]

BRIGNOLIER (Fr.), n. Bri²n-yol-i²-a. The *Averrhoa acida*. [B, 173.]

BRIGOULE (Fr.), n. Bri²-gul. The *Agaricus eryngii*. [B, 173.]

BRILLANTESIA (Lat.), n. f. Bri²l-la²nt(la³nt)-ez(as)'i²-a³. Fr., *brillantésie*. A genus of acanthaceous plants. [L, 41.]

BRILLANTGRÜN (Ger.), n. Bri²l-ya³nt'gru⁶n. See *New Victoria* GREEN.

BRILLE (Ger.), n. Bri²l'le². A lens, also a pair of spectacles. [L, 135.]—**B'nschlange.** The *Vipera naja*. [L, 80.]—**Conservationsb'.** Spectacles designed not to improve vision, but to prevent its further impairment. [L, 30.]—**Drahtsiebb'n.** Protective spectacles of wire gauze. [L, 30.]—**Glimmerb'n.** Mica spectacles. [L.]—**Malerb'n.** See *Pantoscopic* SPECTACLES.—**Schielb'n.** Spectacles in which, instead of glass, there is a metallic plate having a small opening; used in the treatment of strabismus. [L, 30, 46.]—**Staubb'n.** Goggles. [L, 46.]

BRIM, n. Bri²m. A.-S., *brymme*. A border or brink; in anatomy, the superior strait of the pelvis (*q. v.*, under STRAIT).

BRIMBALLIER (Fr.), n. Bra²n²-ba³l-i²-a. The *Vaccinium myrtillus*. [B, 173.]

BRIMBELLE (Fr.), n. Bra²n²-be²l. The berry of the *Vaccinium myrtillus*. [B, 173.]

BRIMSTONE, n. Bri²m'sto³n. O. E., *brynston*, *brendston* (from A.-S. *bryne*, a burning). See SULPHUR.—**B.-wort.** The *Peucedanum palustre*. [B, 275.]

BRINBALLIER, BRINBELLE (Fr.), n's. See BRIMBALLIER and BRIMBELLE.

BRIN D'AMOUR (Fr.), n. Bra²n²-da³m-ur. The *Malpighia urens*. [B, 173.]

BRINDONIA (Lat.), n. f. Bri²n-don'i²-a³. Fr., *brindonie*. A genus of guttiferous plants. [B, 173.]—**B. indica.** Fr., *brindonie des Indes*. See GARCINIA *indica*.

BRINE, n. Brin. A.-S., *bryne*. Fr., *saumure*. A strong solution of sodium chloride.

BRINGÈLE (Fr.), n. Bra²n²-zhe²l. The *Solanum esculentum*. [B, 173.]

BRINJAL, n. The fruit of the egg-plant (*Solanum melongena*). [B, 19.]

BRINRAJ BUNGRAH (Hind.), n. The *Eclipta erecta*. [B, 172.]

BRINT (Ger.), **BRINTLUFT** (Ger.), n's. Bri²nt, bri²nt'luft. Hydrogen. [L, 80.]

BRINVILLIÈRE [Fr. Cod.] (Fr.), **BRINVILLIERS** (Fr.), n's. Bra²n²-vel-li²-e²r, -a. The *Spigelia anthelminthica*. [B, 173.]

BRIQUE (Fr.), n. Bri²k. See BRICK.

BRIQUEBEC (Fr.), n. Bri²k-be²k. A place in the department of the Manche, France, where there is a chalybeate spring. [L, 49.]

BRIQUETÉ (Fr.), adj. Bri²k-ta. Like brick or brick-dust; lateritious; as a n., the *Agaricus deliciosus*. [A, 385; B, 173.]

BRISÉ (Fr.), adj. Brez-a. Bent at a sharp angle. [A, 385.]

BRISE-COQUE (Fr.), n. Brez-kok. A sheathed double-bladed instrument devised by Heurteloup for crushing the shell of a vesical calculus after breaking up the inner portion by means of his *mandrin à virgule*. [A, 301.]

BRISE-LUNETTE (Fr.), n. Brez-lu⁶n-e²t. The *Euphrasia officinalis*. [B, 173.]

BRISEMENT (Fr.), n. Brez-ma³n². A breaking, rupture. [E.]—**B. forcé.** Syn.: *redressement brusque*. The forcible breaking up of an ankylosis. [E.]

BRISE-PIERRE (Fr.), n. Brez-pi²-e²r. 1. An old form of toothed forceps for crushing a vesical calculus to facilitate its removal through the wound made in lithotomy. [A, 301.] 2. The *Peucedanum pratense*. [B, 173.]—**B.-p. urétral.** See LITHOTRITE.

BRISINGASTRA (Lat.), n. n. pl. Bri²s-i²n²-ga²st(ga³st)'ra³. Of Haeckel, an order of the *Actinogastra*. [L, 173.]

BRISINGIDA, BRISINGIDÆ [Perrier] (Lat.), n's n. pl. and f. pl. Bri²s-i²n(i²n²)'ji²d(gi²d)-a³, -e(a³-e²). A subdivision of the *Asteridea*. [L, 121.]

BRISTLE, n. Bri²stl. A.-S., *bristl*, *byrst*. Gr., θρίξ. Lat., *seta*. Fr., *soie*. Ger., *Borste*. It., *seta*. Sp., *seda*. A stiff, coarse hair, especially that of the hog.—**B.-fern.** The *Trichomanes radicans*. [B, 173.]—**B'worts.** Of Lindley, the *Desvauxiaceæ*. [B, 19.]

BRISTLY, adj. Bri²stl'i². See SETACEOUS.

BRITANNICA (Lat.), n. f. Bri²t-a²n(a³n)'ni²k-a³. Fr., *britannie*. An old name for various plants, especially the *Rumex hydrolapathum*. [B, 180.]

BRITHOS (Lat.), n. m. Bri(bre)'tho²s. Gr., βρῖθος. Weight or pressure. [L, 49.]

BRIZA (Lat.), n. f. Briz(bri²z)'a³. From βρίζα, rye. Fr., *brize, paturin.* Ger., *Zittergras.* Quaking-grass; a Linnæan genus of festuceous plants of the subtribe *Eufestuceæ*, including the sections *Eubriza, Chaseolytrum*, and *Calotheca*. [Hackel (B, 245); B, 173.]—**B. bipinnata.** The *Poa cynosuroides.* [B, 173, 188.]—**B. caroliniana.** The *Uniola paniculata.* [B, 173.]—**B. eragrostis.** The *Poa megastachya.* [B, 173, 188.]—**B. maxima.** Fr., *grande amourette.* An annual species growing in Europe and occasionally cultivated in the United States. [B, 34, 188.]—**B. media.** Fr., *brize* (ou *amourette*) *tremblante, gramen tremblant, pain d'oiseau, crolette, grolette tamisaille.* Ger., *mittleres Zittergras.* A perennial European species, acclimatized in the United States, used as forage. The panicle (*spica graminis leporini*) was formerly employed in medicine. [B, 121, 173, 180.]—**B. megastachya, B. oblongata.** The *Poa megastachya.* [B, 173.]—**B. tremula.** See *B. media.*—**B. viridis.** Fr., *brize verte.* A variety of *B. media.* [B, 173.]

BRIZEÆ (Lat.), n. f. pl. Bri²z'e²-e(a³-e²). Of Reichenbach, a section of grasses (*Poaceæ*) comprising *Briza* (with *Chaseolytrum* and *Calotheca*), *Anthochloa, Melica*, and two other genera. [B, 170.]

BRIZOCERAS (Lat.), n. n. Bri²z-o²s(o²k)'e²r-a²s(a³s). From βρίζα (see BRIZA), and κέρας, a horn. Ergot. [A, 322.]

BRIZOPYRUM (Lat.), n. n. Bri²z-o(o²)-pi(pu⁶)'ru³m(ru⁴m). From βρίζα (see BRIZA), and πυρός, wheat. Fr., *brizopyre.* See DESMAZERIA.

BROACH, n. Broch. A steel dental instrument having a fine needle-like point; used for pricking pastes, etc., into the pulpy cavity of a tooth and for extracting nerve tissue. [L, 125.]

BROAD-SEED, n. Bra⁴d'sed. The genus *Ulospermum.* [B, 19.]

BROCCOLI, n. Bro²k'ko²l-i². It., *broccoli* (pl. of *broccolo*, a sprout). The *Brassica oleracea*, var. *botrytis.* [B, 19, 180.]

BROCHA (Lat.), n., n. pl. of adj. *brochus* (= *brocchus*). Brok(bro²ch²)'a³. Of Ficinus and Carus, a family of marine *Mammalia*, so called from their projecting teeth. [L, 180.]

BROCHAGOGEUS (Lat.), n. m. Bro²k(bro²ch²)-a²g(a³g)-o'ju²s(gu²s). From βρόχος, a noose, and ἀγωγεύς, a conductor. Ger., *Schlingenleiter, Schlingenführer.* See BROCHOPHORON.

BROCHOPHORON (Lat.), n. n. Bro²k(bro²ch²)-o²f'o²r-o²n. From βρόχος, a noose, and φορεῖν, to bear. Fr., *porte-lacs.* Ger., *Schlingenträger.* An instrument for guiding a noose over a part (as of the fœtus). [A, 322.]

BROCHOS (Lat.), n. m. Brok(bro²ch²)'o²s. Gr., βρόχος. A noose, a sling. [A, 322, 325.]

BROCHTHOS, BROCHTHUS (Lat.), n's m. Bro²k(bro²ch²)'tho²s, -thu³s(thu⁴s). Gr., βρόχθος. The gullet, also a drinking-cup. [A, 325.]

BROCHUS (Lat.), n. m. Brok(bro²ch²)'u³s(u⁴s). 1. See BROCHOS. 2. A person with projecting teeth or lips. [A, 322, 325.]

BROD (Ger.), n. Brod. See BREAD.—**B'baum.** The genus *Artocarpus.* [B, 49.]—**B'brei, B'brühe.** Panada. [L, 43, 80.]—**B'fruchtbaum.** See *B'baum.*—**B'fruchtbäume.** The *Artocarpaceæ.* [B, 49.]—**B'fütterung.** A diet composed largely or entirely of bread. [Gruenhagen (K).]—**B'gährung.** The fermentation of bread. [L, 43.]—**B'kohle.** See *Carbo* PANIS.—**B'krümchen, B'krume.** Bread-crumb. [L, 80.]—**B'kümmel.** Caraway seed. [A, 450.]—**B'nuss.** The genus *Brosimum.* [B, 180.]—**B'rinde.** Bread-crust. [L, 80.]—**B'rindenpflaster.** See *Emplastrum de* CRUSTA *panis.*—**B'schabe.** The *Blatta orientalis.* [B, 180.]—**B'stärkemesser.** See ALEUROMETER.—**B'suppe.** See *B'brei.*—**B'wasser.** Toast-water. [L, 30.] See also AQUA *aromatica spirituosa.*—**B'wurm.** See *B'schabe.*—**B'wurzel.** The yam. [A, 450.]—**Eingeschnittenblättriger B'baum.** The *Artocarpus incisa.* [B.]—**Ganzblättriger B'baum.** The *Artocarpus integrifolia.* [B, 49, 180.]—**Gemeiner B'baum.** The *Artocarpus incisa.* [B, 49.]—**Indischer B'baum.** The *Artocarpus integrifolia.* [B, 49.]

BRODIUM (Lat.), n. n. Brod(bro²d)'i²-u³m(u⁴m). An old pharmaceutical term for the juice which exudes from a fruit, etc., the liquid formed by the deliquescence of a salt, or the liquor in which anything is preserved. [A, 325.]

BROIEMENT (Fr.), n. Brwa³-ma³n². A crushing, as of the fœtal skull in cephalotripsy, a vesical calculus in lithotrity, a cataract in keratonyxis or scleronyxis, etc., also the accidental crushing of a part. [A, 301, 385; F.]—**B. linéaire.** See ÉCRASEMENT *linéaire.*—**B. parcellaire.** A crushing piecemeal, as of the bones in cranioclasis. [A, 15.]

BROKEN, adj. Bro³k'e²n. In botany, having the component parts lying nearly but not quite in the same plane, thus forming a short spiral (said of a whorl). [B, 19.]—**B.-wing.** See DENGUE.

BROM (Ger.), n. Brom. Bromine; in comp. with the name of a base, the bromide of that base. [B.]—**B'acne.** See *Bromine* ACNE.—**B'acrylsäure.** Bromacrylic acid. [B.]—**B'akne.** See *Bromine* ACNE.—**B'anissäure.** Bromanisic acid. [B.]—**B'anissäure-Aethylester.** Ethyl bromanisate. [B.]—**B'äther, B'äthyl.** Ethyl bromide. [B, 49.]—**B'äthylbenzol.** Bromethylbenzene. [B.]—**B'äthylen.** Bromethylene. [B.]—**B'benzoesäure.** Brombenzoic acid. [B.]—**B'benzol.** Brombenzene. [B.]—**B'benzolsulfonsäure.** Brombenzenesulphonic acid. [B.]—**B'cachexie.** Bromism. [B.]—**B'chloressigsäure.** Bromchloracetic acid. [B.]—**B'erucasäure.** Bromerucic acid. [B.]—**B'essigsäure.** Bromacetic acid. [B.]—**B'exanthem.** A cutaneous eruption due to bromine. [L, 57.]—**B'glycolsäure.** Bromglycollic acid. [B.]—**B'hämatin.** Hæmin formed by the union of bromine with hæmatin. ["Ctrlbl. f. d. med. Wissnsch.," Apr. 24, 1886, p. 289 (B).]—**B'hydrat.** Bromine hydrate deposited from bromine-water. [B, 270.]—**B'hydrochinon.** Bromhydroquinone. [B.]—**B'iodür.** A bromiodide. [B.]—**B'ig.** Bromous. [B.]—**B'igsäure.** Bromous acid. [B.]—**B'irt.** Brominized; combined with bromine. [B.]—**B'maleïnsäure.** Brommaleic acid. [B.]—**B'mesitylen.** Brommesitylene. [B.]—**B'metaxylol.** Brommetaxylene. [B.]—**B'nitroäthan.** Bromnitroethane. [B.]—**B'nitrobenzol.** Bromnitrobenzene. [B.]—**B'oleïnsäure.** Bromoleic acid. [B.]—**B'nitranilin.** Bromonitraniline. [B.]—**B'paraxylol.** Bromparaxylene. [B.]—**B'phenylmercaptursäure.** Bromphenylmercapturic acid. [B.]—**B'propionsäure.** Brompropionic acid. [B.]—**B'pseudocumol.** Bromopseudocumene. [B.]—**B'salicylsäure.** Bromsalicylic acid. [B.]—**B'sauer.** Bromic; with the name of a base, the bromate of that base. [B.]—**B'säure.** Bromic acid. [B.]—**B'toluol.** Bromtoluene. [B.]—**B'wasser.** Bromine-water. [B.]—**B'wasserstoff.** Hydrogen bromide. [B.] See HYDROBROMIC ACID.—**B'wasserstoffäther.** Hydrobromic ether. [L, 65.]—**B'wasserstoffhomatropin.** Homatropine hydrobromide. [B.]—**B'wasserstoffsäure.** Hydrobromic acid. [B.]—**B'xylol.** Bromoxylene. [B.]—**B'zimmtsaure.** Bromcinnamic acid. [B.]

BROMA (Lat.), n. n. Bro'ma³. Gen., *bro'matos* (*-tis*). Gr., βρῶμα. 1. Solid food. [A, 325.] 2. A proprietary preparation resembling chocolate. 3. Bromine. [A, 322.]

BROMACEÆ (Lat.), n. f. pl. Brom(bro²m)-a(a³)'se²(ke²)-e(a³-e²). Of Koch, a division of gramineous plants (*Loxanthanæ*) comprising the genera *Bromus, Brachypodium, Agropyrum, Triticum, Secale*, and *Ægilops*; of Lemaire, the *Gramineæ.* [B, 170.]

BROMACETAL, n. Brom-a²s'e²t-a²l. A substitution compound of bromine and acetal ($CH_3Br.CH.2\ OC_2H_5$). [B, 2.]

BROMACETAMIDE, n. Brom-a²s-e²t'a²m-i²d(id). A substitution compound of acetamide in which bromine replaces hydrogen. The formula of *monobromacetamide* is $C_2H_4BrON = N\left\{\begin{matrix}H_2\\CH_2BrO\end{matrix}\right.$ [B.]

BROMACETIC ACID, n. Brom-a²s-et'i²k. Fr., *acide bromacétique.* Ger., *Bromessigsäure.* An acid derived from acetic acid by the substitution of one or more atoms of bromine for hydrogen. Three of these compounds are possible; *monobromacetic acid*, $C_2H_3BrO_2$, often called simply b. a.; *dibromacetic acid*, $C_2H_2Br_2O_2$; and *tribromacetic acid*, $C_2HBr_3O_2$. [B, 2.]

BROMACETONES, n. pl. Brom-a²s'e²t-onz. Compounds formed from acetone by the substitution of bromine for hydrogen. Those now known are *monobromacetone*, C_3H_5BrO; *tetrabromacetone*, known only in the form of its hydrate, $C_3H_2Br_4O.2H_2O$; and *pentabromacetone*, C_3HBr_5O. [B, 2.]

BROMACETYL, n. Brom-a²s'e²t-i²l. An addition product of bromine and acetyl, C_2H_3BrO. [B, 2.]—**B. hydrate.** See BROMACETIC ACID.—**B. nitride.** See BROMACETAMIDE.—**B'urea.** Ger., *Bromacetoxylharnstoff.* A crystalline body, $CH_2.Br.CO-NH.-CONH_2 = C_3H_5BrN_2O_2$, formed by the substitution of b. for hydrogen in urea. [B, 4.]

BROMACETYLENE, n. Brom-a²s-e²t'i²l-en. Fr., *bromacétylène.* Ger., *Bromacetylen.* A compound, C_2HBr, formed from acetylene by the substitution of bromine for hydrogen. [B.]

BROMACETYLIDE, n. Brom-a²s-e²t'i²l-i²d(id). A substitution product of bromacetylene formed by the replacement of hydrogen by a univalent metal or radicle. [B, 2.]

BROMACIDE (Fr.), n. Brom-a³s-ed. See *Brom*ACID.

BROMACRYLIC ACID, n. Brom-a²k-ri²l'i²k. Fr., *acide bromacrylique.* Ger., *Bromacrylsäure.* An acid formed from acrylic acid by the substitution of bromine for hydrogen. Two isomeric varieties are known; *α-b. a.*, $CHH-CBr-CO.OH$, and *β-b. a.*, $CHBr-CH-CO.OH$. [B, 2, 4.]

BROMADIPIC ACID, n. Brom-a²d-i²p'i²k. A product of adipic acid formed by the substitution of bromine for hydrogen. Four such compounds are known: *Monobromadipic acid*, $C_6H_9BrO_4$, a dark-colored solid of a camphoraceous odor; *dibromadipic acid*, $C_6H_8Br_2O_4$, of which there is an isomeric form called *isodibromadipic acid*; *tribromadipic acid*, $C_6H_7Br_3O_4$; and *tetrabromadipic acid*, $C_6H_6Br_4O_4$. [B, 2.]

BROMAGASTRIE [Piorry] (Fr.), n. Brom-a³-ga³s-tre. From βρῶμα, food, and γαστήρ, the stomach. Saburral obstruction of the stomach. [L, 82.]

BROMAL, n. Brom'a³l. From *bromine* and *aldehyde* (*q. v.*). Lat., *bromalum.* Syn.: *tribromaldehyde, tribromacetyl oxide.* A colorless, oily liquid, of a burning taste and penetrating odor, soluble in water, in alcohol, and in ether, having the constitution of acetic aldehyde in which three atoms of hydrogen are replaced by three atoms of bromine, C_2HBr_3O. [B, 2.] Cf. CHLORAL.—**B. alcoholate.** Ger., *B'alkoholat.* A crystalline body, $C_2H_7Br_3O_2 = CBr_3.CH<^{OH}_{OC_2H_5}$, formed by the action of alcohol on b. [B, 4.]—**B. hydrate.** Lat., *bromalum hydratum.* Fr., *hydrate de b.* Ger., *Bromalhydrat.* A crystalline substance, $CBr_3.CH(OH)_2 = C_2H_3Br_3O_2$, analogous to chloral hydrate, formed by the union of b. with water; decomposed by alkalies with the production of bromoform. It has been used in epilepsy, chorea, and the pains of tabes dorsalis, in doses of from ⅔ grain to 7 grains, best given in pills or capsules. After a short stage of excitement, it produces sleep and anæsthesia, with diminished frequency of the pulse and respiration. In poisonous doses, it paralyzes the heart, which stops in systole, and lessens the irritability of the spinal ganglia and the peripheral nerves and muscles. [A, 319; B, 4.]—**B. hydrocyanide.** A compound of the formula $C_2HBr_3O.HCN$. [B, 2.]

BROMALDEHYDE, n. Brom-a²l'de-hid. Fr., *bromaldéhyde.* Ger., *Bromaldehyd.* A compound of bromine with aldehyde. *Dibromaldehyde* has the composition $CHBr_2.CHO$, with a polymeric form, *paradibromaldehyde*, $3C_2H_2Br_2O$. For *tribromaldehyde*, see BROMAL. [B, 2.]

BROMALIZARIN, n. Brom-a^{2}l-i^{2}z'a^{3}r-i^{2}n. A substitution compound of bromine and alizarin, $C_{14}H_7BrO_4 = C_{14}H_6O_2.(OH)(OBr)$, occurring as orange acicular crystals. [B, 2.]

BROMALLYL, n. Brom-a^{2}l'li^{2}l. See ALLYL *bromide.*

BROMALLYLENE, n. Brom-a^{2}l'li^{2}l-en. Fr., *bromallylène.* Ger., *Bromallylen.* A substitution compound of bromine and allylene, $C_3H_3.Br$. [B, 2.]

BROMALOIN, n. Brom-a^{2}l-o'i^{2}n. Fr., *bromaloïne.* Syn.: *tribromaloin.* A substitution compound of bromine and barbaloin, occurring as yellow acicular crystals. The formula has been variously given as $C_{34}H_{30}Br_5O_{14}$, $C_{17}H_{15}Br_3O_7$, and $C_{16}H_{13}Br_3O_7$. [B, 2, 5.]

BROMALUM (Lat.), n. n. Brom'a^{3}l-u^{3}m(u^{4}m). See BROMAL.—**B. hydratum.** See BROMAL *hydrate.*

BROMAMETRUM (Lat.), n. n. Brom-a^{3}-me^{2}t'ru^{3}m(ru^{4}m). See BROMATOMETER.

BROMAMIDOBENZENE, n. Brom-a^{2}m-i^{2}d-o-be^{2}n'zen. Fr., *bromamidobenzène.* Ger., *Bromamidobenzol.* See BROMANILINE.

BROMAMYL, n. Brom-a^{2}m'i^{2}l. Fr., *bromamyle.* See AMYL *bromide.*

BROMAMYLENE, n. Brom-a^{2}m'i^{2}l-en. Fr., *bromamylène.* Ger., *Bromamylen.* A substitution product of bromine and amylene, including *monobromamylene, dibromamylene,* etc., the first of which is meant when the term is used without qualification. [B, 2.]

BROMANGELIC ACID, n. Brom-a^{2}n-je^{2}l'i^{2}k. Fr., *acide bromangélique.* An addition product of bromine and angelic acid, $C_5H_8Br_2O_2$, isomeric with dibromovaleric acid; an inodorous, sour, crystalline substance, of acid properties, readily soluble in alcohol and in ether. [B, 2.]

BROMANIL, n. Brom-a^{2}n'i^{2}l. Fr., *bromanile.* See TETRABROMQUINONE.

BROMANILINE, n. Brom-a^{2}n'i^{2}l-en. Fr., *bromaniline.* Ger., *Bromanilin.* Syn.: *bromamidobenzene.* A substitution compound of bromine and aniline. [B.] See MONOBROMANILINE, DIBROMANILINE, and TRIBROMANILINE.

BROMANILOID, n. Brom-a^{2}n'i^{2}l-oid. Fr., *bromaniloïde.* See TRIBROMANILINE.

BROMANISATE, n. Brom-a^{2}n'i^{2}s-at. Fr., *bromanisate.* Ger., *Bromanisat, bromanissaures Salz.* A salt of bromanisic acid.

BROMANISIC ACID, n. Brom-a^{2}n-i^{2}s'i^{2}k. Fr., *acide bromanisique.* Ger., *Bromanissäure.* A substitution compound of bromine and anisic acid, $C_8H_7BrO_3$. [B, 2.]

BROMANISOL, n. Brom-a^{2}n'i^{2}s-o^{2}l. A crystallizable compound, $C_{20}H_9O_2Br_3$, formed by the action of bromine on anise camphor. [A, 301; L, 49.]

BROMARGYRITE, n. Brom-a^{3}r'ji^{2}r-it. Native bromide of silver. [L, 108.]

BROMARSENIOUS ACID, n. Brom-a^{3}r-se^{2}n'i^{2}-u^{3}s. Fr., *acide bromarsénieux.* See ARSENIC *oxybromide.*

BROMATE, n. Brom'at. Lat., *bromas.* Fr., *bromate.* Ger., *Bromat, bromsaures Salz.* It., Sp., *bromato.* A salt of bromic acid. These salts have the general formula $R.(BrO_3)_n$, in which R is a radicle of the combining power *n.* [B.]

BROMATECCRISIS (Lat.), n. f. Brom-a^{2}t(a^{3}t)-e^{2}k'kri^{2}s-i^{2}s. Gen., *bromateccris'eos* (*-ec'crisis*). From βρῶμα, food, and ἔκκρισις, a rejection. The discharge of undigested food. [A, 322.]

BROMATED, adj. Brom'at-e^{2}d. See BROMINATED.

BROMATION, BROMATIUM (Lat.), n's n. Brom-a(a^{3})'-shi^{2}(ti^{2})-o^{2}n, -u^{3}m(u^{4}m). Gr., βρωμάτιον. A light meal. [A, 322.]

BROMATODES (Lat.), adj. Brom-a^{2}t(a^{3}t)-o'dez(das). Gr., βρωματώδης (from βρῶμος, a stench, and εἶδος, resemblance), fœtid. [Dioscorides (A, 387).]

BROMATOGRAPHY, BROMATOLOGY, n's. Brom-a^{2}t-o^{2}g'ra^{2}f-i^{2}, -o^{2}l'o-ji^{2}. Lat., *bromatographia* (from βρῶμα, food, and γράφειν, to write), *bromatologia* (from βρῶμα, food, and λόγος, understanding). Fr., *bromatographie, bromatologie.* Ger., *Nahrungsmittelkunde.* See DIETETICS.

BROMATOMETER, n. Brom-a^{2}t-o^{2}m'e^{2}t-u^{6}r. Lat., *bromatometrum* (from βρῶμα, food, and μέτρον, a measure). Fr., *bromatomètre.* Ger., *Speisenmesser.* An instrument used in bromatometry (*q. v.*). [A, 322, 385.]

BROMATOMETRY, n. Brom-a^{2}t-o^{2}m'e^{2}t-ri^{2}. Fr., *bromatométrie.* The determination of the daily amount of food required by an individual. [A, 301, 385.]

BROMATUS (Lat.), adj. Brom-a(a^{3})'tu^{3}s(tu^{4}s). Fr., *bromé* (1st def.). Ger., *bromirt* (1st def.). 1. Brominated, brominized, bromated; containing bromine. 2. Due to the action of bromine (*e. g.,* acne bromata).

BROMAURATE, n. Brom-a^{4}r'at. A salt of bromauric acid, also a double bromide of gold and another element or radicle. [B.]

BROMAURIC, adj. Brom-a^{4}r'i^{2}k. For deriv., see BROMINE and AURUM. Containing gold as a trivalent radicle and bromine. [B.]—**B. acid.** A monobasic acid, $HAuBr_4 + 5H_2O$, occurring in dark-red acicular crystals. [B, 3.]

BROMBEERE (Ger.), n. Brom'bar-e^{2}. See BROMBEERSTRAUCH.—**Ackerb', Blaue B.** The *Rubus cæsius.* [B. 180.]

BROMBEERRINDE (Ger.), n. Brom'bar-ri^{2}nd-e^{2}. The bark of *Rubus villosus.* [L, 65.]—**B'nextrakt.** See *Extractum* RUBI *fluidum.*—**B'nsyrup.** See *Syrupus* RUBI.

BROMBEERSPINNER (Ger.), n. Brom'bar-spi^{2}n-ne^{2}r. The *Bombyx rubi.* [T. Husemann (L, 57).]

BROMBEERSTAUDE (Ger.), n. Brom'bar-sta^{3}-ud-e^{2}. See BROMBEERSTRAUCH.

BROMBEERSTRAUCH (Ger.), n. Brom'bar-stra^{3}-uch^{2}. The genus *Rubus,* especially the *Rubus fruticosus.* [B, 180.]—**Gemeiner B.** The *Rubus fruticosus.* [B, 180.]—**Mollukkischer B.** The *Rubus moluccanus.* [B, 180.]—**Nordischer B.** The *Rubus arcticus.* [B, 180.]—**Westlicher B.** The *Rubus occidentalis.* [B, 180.]—**Zottiger B.** The *Rubus villosus.* [B, 180.]

BROMBENZENE, n. Brom-be^{2}nz'en. Fr., *bromobenzine.* Ger., *Brombenzol.* A substitution compound of bromine and benzene, including *monobrombenzene, dibrombenzene, tribrombenzene, tetrabrombenzene, pentabrombenzene,* and *hexabrombenzene.* [B.]

BROMBENZENESULPHONIC ACID, n. Brom-be^{2}nz''en-su^{3}lf-o^{2}n'i^{2}k. Fr., *acide bromobenzinesulfonique.* Ger., *Brombenzolsulfonsäure.* An acid, $C_6H_4.Br.SO_2.OH$, which may be regarded as benzene in which two atoms of hydrogen are replaced by bromine and the sulphuric-acid residue $(-SO_2OH)$. If the replacement occurs in two adjacent atoms of hydrogen in the structural formula of benzene, the product is called *orthobrombenzenesulphonic acid,* $C_6(H,Br,SO_3H,H,H,H)$; if two alternate atoms of hydrogen are replaced, the product is *metabrombenzenesulphonic acid,* $C_6(H,Br,H,SO_3H,H,H)$; if two hydrogen atoms at opposite points of the closed benzene chain are replaced, the product is *parabrombenzenesulphonic acid,* $C_6(H,Br,H,H,SO_3H,H)$. [B, 4.]

BROMBENZOIC ACID, n. Brom-be^{2}nz-o'i^{2}k. Fr., *acide bromobenzoïque.* Ger., *Brombenzoësäure.* See ORTHOBROMBENZOIC ACID, METABROMBENZOIC ACID, and PARABROMBENZOIC ACID.

BROMBENZOYL, n. Brom-be^{2}nz'o-i^{2}l. Fr., *bromobenzoyle.* A crystalline body, $C_7H_5O.Br$, formed by the action of bromine on oil of bitter almonds; of an agreeable odor, soluble in alcohol and in ether. [A, 321.]

BROMBENZOYLIC ACID, n. Brom-be^{2}nz-o-i^{2}l'i^{2}k. Fr., *acide bromobenzoylique.* See BROMBENZOYL.

BROMCAFFEINE, n. Brom-ka^{2}f'fe^{2}-en. A crystalline substitution compound of bromine and caffeine, $C_8H_9BrN_4O_2$. [B, 3.]

BROMCAMPHOR, n. Brom-ka^{2}m'fo^{2}r. See CAMPHORA *monobromata.*

BROMCHLORACETIC ACID, n. Brom-klor-a^{2}s-et'i^{2}k. Fr., *acide bromochloracétique.* Ger., *Bromchloressigsäure.* A caustic liquid, $CHBrCl.CO.OH = C_2H_2BrClO_2$, of a powerful odor, acting as a monobasic acid. [B, 3.] Cf. CHLOROBROMACETIC ACID.

BROMCINNAMIC ACID, n. Brom-si^{2}n-na^{2}m'i^{2}k. Fr., *acide bromocinnamique.* Ger., *Bromzimmtsäure.* A bromine substitution product of cinnamic acid. *α-b.a.* crystallizes in long, shining needles, melts at about 130° C., and volatilizes unchanged; *β-b.a.* crystallizes in hexagonal plates, melts at 120° C., and is converted into *α-b.a.* on distillation. [B, 4.]

BROMCINNAMIN, n. Brom-si^{2}n'na^{2}m-i^{2}n. Fr., *bromocinnamine.* A substance, $C_{45}H_8Br$, formed by the action of bromine on cinnamin. [A, 385.]

BROMCOMENIC ACID, n. Brom-kom-e^{2}n'i^{2}k. Fr., *acide bromocoménique.* A crystalline compound, $2C_6H_3.BrO_5 + 3H_2O$, formed by the action of bromine-water on comenic acid or meconic acid. [B, 3.]

BROMDICHLORHYDRIN, n. Brom-di-klor-hid'ri^{2}n. A liquid, $C_3H_5Cl_2Br = CH_2Cl-CHBr-CH_2Cl$, formed from glycerin by the substitution of two atoms of chlorine and an atom of bromine for three molecules of hydroxyl. [B, 4.]

BROMDINITROETHANE, n. Brom-di nit''ro-e^{2}th-an'. Fr., *bromodinitroéthane.* Ger., *Bromdinitroäthan.* A substitution product of bromine and dinitroethane, $C_2H_3.Br.(NO_2)_2$; a colorless oil. [B.]

BROMDIPHENYL, n. Brom-di-fe^{2}n'i^{2}l. A bromine substitution product of diphenyl, including *parabromdiphenyl,* $C_6H_4Br.C_6H_5$; and *dibromdiphenyl,* $C_6H_4Br.C_6H_4Br$. [B, 4.]

BROME, n. Brom. See BROMUS.—**B.-grass.** The genus *Bromus.* [B.]—**False b.** The genus *Brachypodium.* [B, 19.]—**Soft b.-grass.** The *Bromus mollis.* [B, 19.]

BROME (Fr.), n. Brom. See BROMINE and BROMUS.—**B, à gros épi.** The *Bromus secalinus.* [B, 173.]—**B. cathartique.** The *Bromus catharticus.* [L, 49.]—**B. des champs.** The *Festuca arvensis.* [B, 173.]—**B. des prés.** The *Bromus erectus.* [B, 173.]—**B. des seigles.** The *Bromus secalinus.* [B, 173.]—**B. des toits.** The *Festuca tectorum.* [B, 173.]—**B. gigantesque.** The *Festuca gigantea.* [B, 173.]—**B. mou.** The *Bromus mollis.* [B, 173.]—**B. nain.** The *Bromus mollis,* var. *nanus.* [B, 173.]—**B. purgatif.** The *Bromus purgans.* [B, 173.]—**B. rude.** The *Festuca squarrosa.* [B, 173.]

BROMÉ (Fr.), adj. Brom-a. See BROMATUS (1st def.).

BROMEÆ (Lat.), n. f. pl. Brom(bro^{2}m)'e^{2}-e(a^{3}-e^{2}). Fr., *bromées.* Of Kunth, a tribe of the *Gramineæ,* including the divisions *Avenaceæ, Arundinaceæ,* and *B. veræ;* of others, a division of grasses, comprising *Bromus* and other genera. [B.] Cf. FESTUCEÆ.—**B. veræ** [Kunth]. A division of *B.* comprising *Sesleria, Kœleria, Dactylis, Glyceria, Centotheca, Festuca, Bromus, Brachypodium, Melica, Briza, Poa,* and a few other genera. [B, 170.]

BROMÉLAYLE (Fr.), n. Brom-al-a^{3}-el. Ethylene bromide. [L, 49.]

BROMELEÆ (Lat.), n. f. pl. Brom-e^{2}l'e^{2}-e(a^{3}-e^{2}). See BROMELIACEÆ.

BROMELIA (Lat.), n. f. Brom-e^{2}l'i^{2}-a^{3}. From *O. Bromel,* a Swedish physician and botanist. Fr., *bromélia, bromélie.* Of Plumier, a genus of bromeliaceous plants of the tribe *Bromelieæ.* [B, 19, 245.]—**B. ananas** [Linnæus]. The *Ananas sativus.* [B, 173.]—**B. caratas** [Linnæus]. A West Indian and South American species bearing an edible fruit. [B, 180.]—**B. chrysantha** [Jacquin]. A

South American species bearing a very sweet fruit. [B, 180.]—**B. humilis** [Jacquin]. See KARATAS *humilis*.—**B. karatas** [Jacquin]. See KARATAS *Plumieri*.—**B. longifolia** [Rudge]. The *quirebijure*; a species with a very large edible fruit. [B, 245.]—**B. mai-pourri** [Perrotet]. Fr., *maipourri*. A French Guiana species bearing an edible fruit. [B, 173.]—**B. pinguin** [Linnæus]. Sp., *timbirichi* [Mex. Ph.]. A West Indian species bearing yellowish berries of the size of a hen's egg, of an agreeable taste. An acid cooling drink made from them is used in fevers, and they are considered anthelminthic and antiscorbutic. [B, 19, 173, 180, 245; J. M. Maisch, "Am. Jour. of Pharm.," March, 1886, p. 122.]

BROMELIACEÆ (Lat.), n. f. pl. Brom-e^{2}l-i^2-a(a^3)'se^2(ke^2)-e(a^3-e^2). Fr., *broméliacées*. The bromeliads, or pine-apple family; of Jussieu and succeeding authors, an order of monocotyledons of the series *Epigynæ* [Bentham and Hooker] or the order (cohort) *Liliifloræ*, comprising the tribes *Bromelieæ*, *Pitcairnieæ*, *Puyeæ*, and *Tillandsieæ*. [B, 19; Wittmack (B, 245).]

BROMELIACEOUS, adj. Brom-e^{2}l-i^2-a'shu^{3}s. Lat., *bromeliaceus*. Fr., *broméliacé*. Of or pertaining to the *Bromeliaceæ*. [B.]

BROMELIADS [Lindley], n. pl. Brom-e^{2}l'i^2-a^{2}dz. See BROMELIACEÆ.

BROMELIÆ (Lat.), n. f. pl. Brom-e^{2}l'i^2-e(a^3-e^2). Fr., *broméliées*. Of Jussieu, an order of plants comprising *Burmannia*, *Tillandsia*, *Xerophyta*, *Bromelia*, and *Agave*; of Batsch, a family of the *Campanales* comprising the same genera, except *Agave*, also *Pitcairnia* and *Pandanus*. [B, 170.] Cf. BROMELIACEÆ, BURMANNIACEÆ, and PANDANACEÆ.

BROMELIAL, adj. Brom-e^{2}l'i^2-a^{2}l. Of or resembling the *Bromelia*; belonging to the *Bromeliales*. [B.]—**B. alliance.** See BROMELIALES.

BROMELIALES (Lat.), n. f. pl. Brom-e^{2}l-i^2-a(a^3)'lez(le^{2}s). Of Lindley (1833), an alliance of epigynous endogens including the order *Bromeliaceæ*. [B, 170.]

BROMELIDEÆ [Dumortier] (Lat.), n. f. pl. Brom-e^{2}l-i^{2}d'e^2-e(a^3-e^2). See BROMELIACEÆ.

BROMELIEÆ (Lat.), n. f. pl. Brom-e^{2}l-i(i^2)'e^2-e(a^3-e^2). Fr., *broméliées*. Of Reichenbach and succeeding authors, a division or tribe of bromeliaceous plants comprising *Bromelia*, *Billbergia*, *Ananas*, *Karatas*, and other genera, with which preceding writers included *Pitcairnia*, *Agave*, *Fourcroya*, and some other genera now referred elsewhere. [B, 170; Wittmack (B, 245).]

BROMELINÆ [Link] (Lat.), n. f. pl. Brom-e^{2}l-i(e)'ne(na^3-e^2). See BROMELIACEÆ.

BROMELIOIDEÆ (Lat.), n. f. pl. Brom-e^{2}l-i^2-o(o^2)-i^{2}d(ed)'e^2-e(a^3-e^2). Of Brongniart, a class of monocotyledons comprising the families *Hæmodoraceæ*, *Vellosieæ*, *Bromeliaceæ*, and *Pontederiaceæ*. [B, 170.]

BROMELOIDEÆ [Mirbel] (Lat.), n. f. pl. Brom-e^{2}l-o(o^2)-i^{2}d(ed)'e^2-e(a^3-e^2). Fr., *broméloïdes*. See BROMELIACEÆ.

BROMELWORTS, n. pl. Brom'e^{2}l-wu^{5}rtz. The *Bromeliaceæ*. [B, 19.]

BROMERUCIC ACID, n. Brom-e^{2}r-u^{3}s'i^{2}k. Fr., *acide bromérucique*. Ger., *Bromerucasäure*. A monobasic acid, $C_{22}H_{41}BrO_2$, being erucic acid having an atom of hydrogen replaced by bromine. [B, 4.]

BROMÉTHÉRINE (Fr.), n. Brom-a-ta-ren. Ethylene bromide. [L, 49.]

BROMÉTHÉROÏDE (Fr.), n. Brom-a-ta-ro-ed. See BROMALDEHYDE.

BROMETHYL, n. Brom-e^{2}th'i^{2}l. Fr., *bromethyle*. Ger., *Bromäthyl*. Hydrobromic ether. [A, 301, 385.] See ETHYL *bromide*.—**B'benzene.** Fr., *bromo-éthylbenzine*. Ger., *Bromäthylbenzol*. A substitution compound of ethylbenzene in which bromine replaces hydrogen in the benzene residue, C_6H_5. [B.] See MONOBROMETHYLBENZENE.

BROMETHYLENE, n. Brom-e^{2}th'i^{2}l-en. Fr., *bromethylène*. Ger., *Bromäthylen*. A substitution product of bromine and ethylene, including *monobromethylene* (which is meant when the word is used without a prefix) and *tribromethylene* (*q. v.*). [B, 4.]

BROMETUM (Lat.), n. n. Brom-e(a)'tu^{3}m(tu^{4}m). See BROMIDE.

BROMFUMARIC ACID, n. Brom-fu^{2}m-a^{2}r'i^{2}k. Fr., *acide bromofumarique*. A bromine substitution compound of fumaric acid. $\begin{matrix} CH.CO_2H \\ \| \\ CBr.CO_2H \end{matrix}$. [B, 3.]

BROMGALLIC ACID, n. Brom-ga^{2}l'li^{2}k. Fr., *acide bromogallique*. Ger., *Bromgallussäure*. A crystalline acid, $C_6HBr(OH)_3$.-CO.OH, being a bromine substitution compound of gallic acid. [B.] See also DIBROMGALLIC ACID.

BROMGLYCOLLIC ACID, n. Brom-gli^{2}k-o^{2}l'li^{2}k. Fr., *acide bromoglycollique*. Ger., *Bromglycolsäure*. A bromine substitution compound of glycollic acid. [B.]

BROMHIDROSIS (Lat.), n. f. Brom-hi^{2}d-ro'si^{2}s. See BROMIDROSIS.

BROMHYDRAS (Lat.), n. m. Brom-hid(hu^{6}d)'ra^{2}s(ra^{3}s). Gen., *bromhydrat'is*. See HYDROBROMIDE.—**B. cicutinus** [Fr. Cod.]. Coniine hydrobromide. [B.]—**B. cinchonidicus** [Fr. Cod.]. Cinchonidine hydrobromide. [B.]—**B. eserinus** [Fr. Cod.]. Eserine hydrobromide. [B.]—**B. morphicus** [Fr. Cod.]. Morphine hydrobromide. [B.]—**B. quinicus** [Fr. Cod.]. Fr., *bromhydrate de quinine neutre*. Quinine hydrobromide. [B.]

BROMHYDRATE, n. Brom-hid'rat. Lat., *bromhydras*. Fr., *bromhydrate*. Ger., *Bromhydrat*. See HYDROBROMIDE.

BROMHYDRIC, adj. Brom-hid'ri^{2}k. Lat., *bromhydricus*. Fr., *bromhydrique*. Ger., *Bromwasserstoff-*. It., *bromidrico*. Sp., *bromhídrico*. See HYDROBROMIC.—**B. acid.** Lat., *acidum bromhydricum*. Fr., *acide bromhydrique*. Ger., *Bromwasserstoffsäure*. Hydrobromic acid. [B.]—**B. ether.** Lat., *æther bromhydricus*. Fr., *éther bromhydrique*. Hydrobromic ether. [B.]

BROMHYDRIN, n. Brom-hid'ri^{2}n. Fr., *bromhydrine*. A bromine substitution compound of glycerin. [B.] See MONOBROMHYDRIN, DIBROMHYDRIN, and TRIBROMHYDRIN.

BROMHYDRIQUE (Fr.), adj. Brom-ed-rek. See HYDROBROMIC.

BROMHYDROETHYLCROTONIC ACID, n. Brom hid''-ro-e^{2}th-i^{2}l-kro-to^{2}n'i^{2}k. Fr., *acide bromhydro-éthylcrotonique*. A compound of ethylcrotonic and hydrobromic acids, $C_6H_{11}BrO_2$; a crystalline mass. [B, 3.]

BROMHYDROQUINONE, n. Brom-hid''ro-kwi^{2}n-on'. Fr., *bromhydroquinone*. Ger., *Bromhydrochinon*. A bromine substitution compound of hydroquinone. [B.] See MONOBROMHYDROQUINONE, DIBROMHYDROQUINONE, TRIBROMHYDROQUINONE, and TETRABROMHYDROQUINONE.

BROMIBASE (Fr.), n. Brom-i^2-ba^{3}s. See *Basic* BROMIDE.

BROMIC, adj. Brom'i^{2}k. Lat., *bromicus*. Fr., *bromique*. Ger., *Brom-*. It., *bromico*. Sp., *brómico*. Containing or combined with bromine (usually restricted to compounds containing bromine united with oxygen and combined with a greater relative amount of that element than is present in the supposititious bromous compounds). [B.]—**B. acid.** Lat., *acidum bromicum*. Fr., *acide bromique*. Ger., *Bromsäure*. It., *acido bromico*. Sp., *ácido brómico*. 1. A monobasic acid, $HBrO_3$, known only in aqueous solution. 2. Of Kämmerer, hydrobromic acid. [B, 2, 3.]

BROMID (Ger.), n. Brom-ed'. A bromide, especially one containing more bromine than another bromide of the same base. [B.] Cf. BROMÜR.

BROMIDÆ (Lat.), n. f. pl. Brom(bro^{2}m)'i^{2}d-e(a^3-e^2). Of Lindley, a subtribe of grasses (tribe *Festuceæ*) corresponding to the *Bromeæ*. [B, 170.]

BROMIDE, n. Brom'i^{2}d(id). Lat., *bromidum*. Fr., *bromure*. Ger., *Bromür*, *Bromid*. It., Sp., *bromuro*. A direct compound of a metal or radicle with bromine. [B.]—**Basic b.** Fr., *bromure basique*, *bromibase*. Ger., *basisches Bromür*. It., *bromuro basico*. Sp., *bromuro básico*. A compound of a b. with the oxide or hydroxide of the same base. [B.]

BROMIDIA, n. Brom-i^{2}d'i^2-a^3. A proprietary hypnotic preparation containing in each fluidrachm 15 grains each of chloral hydrate and potassium bromide, and ⅛ grain each of extract of *Cannabis indica* and extract of hyoscyamus.

BROMIDROSIS (Lat.), n. f. Brom-i^{2}d-ro'si^{2}s. Gen., *bromidro'seos* (*-sis*). From βρῶμος, a stench, and ἵδρωσις, perspiration. Fr., *bromidrose*, *sueur fétide*. Ger., *Bromidrose*, *stinkender Schweiss*. A morbid condition characterized by the production of fœtid sweat. [G.]

BROMIDUM (Lat.), n. n. Brom'i^{2}d-u^{3}m(u^{4}m). See BROMIDE.

BROMIFÈRE (Fr.), adj. Brom-i^2-fe^{2}r. Containing bromine. [L, 41.]

BROMINA (Lat.), n. f. Brom-i(e)'na^3. Bromine. [L, 45.]

BROMINATED, adj. Brom'i^{2}n-at-e^{2}d. Combined with bromine. [B, 2.]

BROMINE, n. Brom'en. From βρῶμος, a stench. Lat., *bromum* [U. S. Ph., Br. Ph., Fr. Cod., Ger. Ph., Dan. Ph., Belg. Ph., Swiss Ph., Russ. Ph.], *brominium* [U. S. Ph., 1870], *bromium* [Gr. Ph., Netherl. Ph.], *brominum*, *bromineum*, *brominium*, *bromina*. Fr., *brome* [Fr. Cod.]. Ger., *Brom*. It., Sp., *bromo* [Sp. Ph.]. A non-metallic element discovered by Balard in 1826; a very dark brown liquid giving off dark, highly irritant fumes, of a disagreeable, suffocating odor, of a burning taste, caustic, and corrosive; soluble in about 30 parts of water. At −22° C. it forms a reddish-brown solid substance which melts at −24·5°; at 63° it boils. Its sp. gr. is 3·187 at 0° and 2·990 at 15°. Its atomic weight is 79·75; its symbol, Br. It combines readily with hydrogen, forming hydrobromic acid, and, like chlorine, it exerts a bleaching and disinfectant action in the presence of moisture, owing to the decomposition of water and the evolution of oxygen induced by the affinity of b. for hydrogen. It also combines directly with metallic and non-metallic elements to form bromides, which are widely diffused through the mineral kingdom and in mineral waters, sea-water, and many organic compounds. In composition it usually acts as a univalent radicle, rarely as a trivalent or quinquivalent radicle. In medicine it has been used chiefly as a caustic and disinfectant, especially in hospital gangrene. [B, 3.]—**Bibron's b. mixture.** See *Bibron's* ANTIDOTE.—**B. blocks.** Porous cubes containing b., made by incinerating diatomaceous earth with crude tartar or with calcium saccharate. They absorb more than three times their weight of b., which is very gradually given off; used as a disinfectant. [L, 65.]—**B. chloride.** Fr., *chlorure de brome*. Ger., *Bromchlorür*. A compound, said to be $BrCl_5$, formed by passing chlorine gas through b.; a reddish-yellow, volatile, very caustic liquid, the chief ingredient of a nostrum, known as Landolfi's paste, formerly employed in the treatment of cancer. [A, 247; B, 3, 5, 10, 14.]—**B. disulphide.** A red liquid, S_2Br_2. [B, 3.]—**B. hydrate.** An unstable crystalline compound, $Br.5H_2O$, formed by dissolving b. in water just above the freezing point. [B, 3.]

BROMINE (Fr.), n. Brom-en. A place in the department of Savoie, France, where there is a spring containing sodium sulphate. [L, 49.]

BROMINEUM, BROMINIUM [U. S. Ph., 1870] (Lat.), n's n. Brom-i^{2}n'e^2-u^{3}m(u^{4}m), -i^2-u^{3}m(u^{4}m). See BROMINE.—**Brominii chloridum.** See BROMINE *chloride*.

BROMINIZED, adj. Brom'i[2]n-izd. See BROMINATED.

BROMINUM (Lat.), n. n. Brom-i(e)'nu[3]m(nu[4]m). See BROMINE.

BROMIODIDE, n. Brom-i'od-i[2]d(id). Ger., *Bromjodür.* A compound consisting of the bromide and iodide of the same base. [B.]

BROMIODOFORM, n. Brom-i-o[2]d'o-fo[2]rm. Fr., *bromoiodoforme.* A substitution compound of bromine and iodoform, $CHBr^2I$. [B, 2.]

BROMION (Lat.), n. n. Brom(bro[2]m)'i[2]-o[2]n. Gr., βρόμιον. The name of a certain plaster or malagma mentioned by Paulus Ægineta. [A, 325.]

BROMIQUE (Fr.), adj. Brom-ek. See BROMIC.

BROMIRIDIC ACID, n. Brom-i[2]r-i[2]d'i[2]k. Fr., *acide bromoiridique.* A dibasic acid, $H_2IrBr_6 = 2HBr + IrBr_4$, formed by dissolving iridium tetrahydroxide in hydrobromic acid. It forms salts called iridibromides. [B, 3.]

BROMIS (Lat.), n. m. Brom'i[2]s. Gen., *bromi'tis.* See BROMITE (2d def.).

BROMISATINE, n. Brom-i[2]s'a[2]t-en. A compound, $C_8H_4Br.NO_2$, formed by the action of bromine on isatine and indigo blue, forming brilliant orange crystals. [L, 49.]

BROMISM, n. Brom'i[2]zm. Lat., *bromismus.* Fr., *bromisme.* Poisoning with bromine, usually from the excessive use of the bromides; characterized by drowsiness, physical and intellectual weakness, and various skin lesions. [A, 394.]

BROMISOSUCCINIC ACID, n. Brom-i[2]s-o-su[3]k-si[2]n'i[2]k. From βρῶμος (see BROMINE), ἴσος, equal, and *succinum*, amber. Fr., *acide bromisosuccinique.* Syn.: *monobromisosuccinic acid.* A deliquescent crystalline compound, $CH_3CBr(CO_2H)_2$, obtained by heating isosuccinic acid with bromine and water. [B, 3.]

BROMITE, n. Brom'it. Lat., *bromis* (2d def.). Fr., *bromite.* Ger., *Bromit, bromigsaures Salz* (2d def.). 1. A native bromide of silver. 2. A salt of bromous acid. [B, 270.]

BROMIUM [Gr. Ph.] (Lat.), n. n. Brom'i[2]-u[3]m(u[4]m). See BROMINE.

BROMLACTIC ACID, n. Brom-la[2]k'ti[2]k. Fr., *acide bromolactique.* Ger., *Brommilchsäure.* A bromine substitution product of lactic acid, including *monobromlactic acid*, $C_3H_5BrO_3$; *dibromlactic acid*, $C_3H_4Br_2O_3$; and *tribromlactic acid*, $C_3H_3Br_3O_3$. [B, 3.]

BROMLEY, n. Bro[2]m'le[2]. A place in Kent, England, where there is a chalybeate spring. [A, 316; L, 41.]

BROMMALEIC ACID, n. Brom-ma[2]l-e'i[2]k. Fr., *acide bromomaléique.* Ger., *Brommaleïnsäure.* A dibasic crystalline acid, $C_4H_3BrO_4$, of which two isomeric forms are known. [B, 4.]

BROMMBEERE (Ger.), n. Brom'bar-e[2]. See BROMBEERE.

BROMMESITYLENE, n. Brom-me[2]s-i[2]t'i[2]l-en. Fr., *bromomésitylène.* Ger., *Brommesitylen.* A bromine substitution product of mesitylene. [B.]

BROMMETAXYLENE, n. Brom-me[2]t-a[3]-zil'en. Fr., *bromométaxylène.* Ger., *Brommetaxylol.* A bromine substitution product of metaxylene. [B.] See MONOBROMMETAXYLENE and TETRABROMMETAXYLENE.

BROMMOLYBDIC, adj. Brom-mo[2]l-i[2]b'di[2]k. Containing bromine together with molybdenum as a hexad radicle. [B.]

BROMNAPHTHALENE, n. Brom-na[2]p(na[2]f)'tha[2]l-en. Fr., *bromonaphthaline.* A bromine substitution product of naphthalene. [B, 4.]

BROMNITROBENZENE, n. Brom-nit-ro-be[2]nz'en. Fr., *bromonitrobenzine.* Ger., *Bromnitrobenzol.* A substitution compound of benzine in which an atom of bromine and a molecule of nitryl replace two atoms of hydrogen. [B.] See ORTHOBROMNITROBENZENE, METABROMNITROBENZENE, and PARABROMNITROBENZENE.

BROMNITROETHANE, n. Brom-nit-ro-e[2]th-an'. Fr., *bromonitroéthane.* Ger., *Bromnitroäthan.* A bromine substitution product of nitroethane, including *monobromnitroethane*, $C_2H_4Br.NO_2$, a heavy oil boiling at 147° C.; and *dibromnitroethane*, $C_2H_3.Br_2.NO_2$, a mobile liquid boiling as 165° C. Both have a very pungent odor. [B.]

BROMNITROPHENOLSULPHONIC ACID, n. Brom-nit-ro-phe[2]n''o[2]l-su[3]lf-o[2]n'i[2]k. Fr., *acide bromonitrophénolsulfonique.* A substitution compound of phenolsulphonic acid in which an atom of bromine and a molecule of nitryl replace two atoms of hydrogen, $C_6H_2Br(NO_2)(OH)SO_2.OH = C_6H_4SNO_6$. [B, 2.]

BROMNITROPROPANE, n. Brom-nit-ro-pro-pan'. Ger., *Bromnitropropan.* A bromine substitution product of nitropropane, including *monobromnitropropane*, $C_3H_6.Br.NO_2$; *dibromnitropropane*, $C_3H_5.Br_2.NO_2$; and *brompseudonitropropane*, $CH_3.CH_3.CBr.NO_2$. All are oily liquids of a pungent odor. [B.]

BROMOACETATE, n. Brom-o-a[2]s'e[2]t-at. Syn.: *acetobromide.* A compound of a bivalent radicle with bromine and the radicle of acetic acid, $R''.BrO.C_2H_3O$. [B.]

BROMOBENZIDE (Fr.), n. Brom-o-ba[3]n[2]z-ed. Benzene hexachloride. [L, 49.]

BROMOBENZINE (Fr.), n. Brom-o-ba[3]n[2]z-en. Brombenzene. [B.]

BROMOCHLORALUM, n. Brom-o-klor'a[2]l-u[3]m. A proprietary disinfectant and antiseptic preparation containing aluminium chloride and alkaline salts. [L, 120.]

BROMOCODIDE, n. Brom-o-kod'i[2]d(id). A substance, $C_{36}H_{40}Br_2N_2O_4 = C_{34}H_{34}N_2O_2(Br)_2(OCH_3)_2$, formed by the action of hydrobromic acid on codeine. [B, 2.]

BROMO-CONJUGUÉ (Fr.), adj. Brom-o-ko[2]n[2]-zhu[6]-ga. Containing bromine as an associated element. [B, 38.] See AZOTURES b.-c's.

BROMOCUMINOL, n. Brom-o-ku[2]m'i[2]n-o[2]l. A heavy oily liquid, $C_{10}H_{11}BrO$, formed by the action of bromine on cuminol. [L, 49.]

BROMOCYANE (Fr.), n. Brom-o-se-a[3]n. Cyanogen bromide. [L, 49.]

BROMODES (Lat.), adj. Brom-o'dez(das). Gr., βρωμώδης (from βρῶμος, a stench, and εἶδος, resemblance). Fœtid. [A, 322.]

BROMOFORM, n. Brom'o-fo[2]rm. Lat., *bromoformum.* Fr., *bromoforme.* Ger., *Bromoform.* Syn.: *formyl tribromide.* An oily liquid, $CH.Br_3$, boiling at about 150° C. and solidifying at −9°, resembling chloroform in its reactions; an anæsthetic and hypnotic. [A, 385; B, 4.]

BROMOGRAPHY, n. Brom-o[2]g'ra[2]f-i[2]. Lat., *bromographia* (from βρῶμα, food, and γράφειν, to write). Fr., *bromographie.* See DIETETICS.

BROMOHÉLICINE (Fr.), n. Brom-o-hal-i[2]s-en. A gelatinous compound, $C_{26}H_{13}O_{14}Br + 2H_2O$, obtained by the action of bromine on helicin. [A, 301, 385.]

BROMOHYDRATE, n. Brom-o-hid'rat. See HYDROBROMIDE.

BROMOHYDRIC, adj. Brom-o-hid'ri[2]k. See HYDROBROMIC.

BROMOHYPERIDROSIS (Lat.), n. f. Brom-o(o[2])-hip(hu[6]p)-e[2]r-i[2]d-ros'i[2]s. Gen., *bromohyperidro'seos* (*-sis*). From βρῶμος, a stench, ὑπέρ, beyond measure, and ἵδρωσις, perspiration. A condition characterized by excessive and offensive perspiration. [L.]

BROMOIDES (Lat.), adj. Brom(bro[2]m)-o(o[2])-i(e)'dez(das). From *bromoïde.* Resembling the genus *Bromus*; a botanical species-name. [B, 245.]

BROMO-IODISM, n. Brom-o-i'o[2]d-i[2]zm. Poisoning with bromine and iodine. [A. F. A. King, "Am. Jour. of the Med. Sci.," lxviii, 1874, p. 153.]

BROMOIODOFORME (Fr.), n. Brom-o-e-od-o-fo[2]rm. See BROMIODOFORM.

BROMOLACTIC ACID, n. Brom-o-la[2]k'ti[2]k. See BROMLACTIC ACID.

BROMOLEIC ACID, n. Brom-o-le'i[2]k. Fr., *acide bromoléique.* Ger., *Bromoleïnsäure.* A crystalline acid, being a bromine substitution compound of oleic acid, $C_{18}H_{33}BrO_2$. [B, 4.]

BROMOMENORRHŒA (Lat.), n. f. Brom-o(o[2])-me[2]n(man)-o[2]r-re'(ro[2]'e[2])-a[3]. From βρῶμος, a stench, μῆνες, the menses, and ῥεῖν, to flow. A disorder of menstruation characterized by an offensive state of the menstrual blood at or before the time of its escape from the uterus. [Wiltshire, "Med. Times and Gaz.," Nov. 4, 1882, p. 551.]

BROMOMESITYLENE, n. Brom-o-me[2]s-i[2]t'i[2]l-en. See BROMMESITYLENE.

BROMOMETRUM (Lat.), n. n. Brom-o(o[2])-me[2]t'ru[3]m(ru[4]m). See BROMATOMETER.

BROMONAPHTHALÈSE (Fr.), n. Brom-o-na[3]p-ta[3]l-e[2]s. A crystallizable compound, $C_{20}H_6Br_2$, obtained by the action of bromine on naphthalene, with the aid of heat. [A, 301, 385.]

BROMONAPHTHALIDE (Fr.), n. Brom-o-na[3]p-ta[3]l-ed. A liquid, $C_{20}H_7Br$, obtained along with *bromonaphthalèse* (*q. v.*). [A, 301, 385.]

BROMONAPHTHALINE (Fr.), n. Brom-o-na[3]p-ta[3]l-en. See BROMNAPHTHALENE.

BROMONITRANILINE, n. Brom-o-nit-ra[2]n'i[2]l-en. Fr., *bromonitraniline.* Ger., *Bromnitranilin.* A bromine and nitryl substitution compound of aniline, $C_6H_3.(NO_2)Br.NH_2 = C_6N_2H_5BrO_2$. [B.] See also DIBROMONITRANILINE.

BROMONT (Fr.), n. Brom-o[2]n[2]. A place in the department of Puy-de-Dôme, France, where there is a chalybeate spring. [L, 49.]

BROMOPHENOL, n. Brom-o-fe[2]n'o[2]l. See BROMPHENOL.

BROMOPHENYLACETAMIDE, n. Brom-o-fe[2]n-i[2]l-a[2]s-e[2]t'-a[2]m-i[2]d(id). Syn.: *acetobromanilide.* A general name for a series of crystalline bromine substitution products of phenylacetamide, including *monobromophenylacetamide* (acetomonobromanilide), $C_6H_4Br.NH.C_2H_3O = C_8H_8BrNO$, three isomeric forms of which are known, termed respectively ortho-, meta-, and paramonobromophenylacetamide; *dibromphenylacetamide* (acetodibromanilide), $C_6H_3Br_2.NH.C_2H_3O = C_8H_7Br_2NO$; and *tribromophenylacetamide* (acetotribromanilide), $C_6H_2Br_3.NH.C_2H_3O = C_8H_6Br_3NO$. [B, 2.]

BROMOPLATINATE, n. Brom-o-pla[2]t'i[2]n-at. A salt of bromoplatinic acid. [B.] See PLATINIBROMIDE.

BROMOPLATINIC ACID, n. Brom-o-pla[2]t-i[2]n'i[2]k. Fr., *acide bromoplatinique.* A dibasic acid, $H_2PtBr_6 + 9H_2O$, forming dark-red deliquescent crystals.

BROMOPSEUDOCUMENE, n. Brom-o-su[2]d-o-ku[2]m'en. Fr., *bromopseudocumène.* Ger., *Brompseudocumol.* A bromine substitution compound of pseudocumene. [B.]

BROMORCIN, BROMORCINOL, n's. Brom-o[2]rs'i[2]n, -i[2]n-o[2]l. A bromine substitution compound of orcin. [B.] See MONOBROMORCIN, TRIBROMORCIN, and TETRABROMORCIN.

BROMOS (Lat.), n. m. and f. Brom(bro[2]m)'o[2]s. Gr., βρόμος. Oats. [Pliny (A, 318).]

BROMOSALICYLOL, n. Brom-o-sa[2]l-i[2]s'i[2]l-o[2]l. Bromsalicylic aldehyde. [B.]

BROMOSEL (Fr.), n. Brom-o-se[2]l. A double bromide. [L, 49.]

BROMOSPIROYLE (Fr.), n. Brom-o-sper-o-el. Bromsalicylic acid. [L, 49.]

BROMOSTYROL (Fr.), n. Brom-o-sti^{2}r-ol. Bromcinnamin. [A, 385.]

BROMOSUS (Lat.), adj. Brom-o'su^{3}s(su^{4}s). From βρῶμος, a stench. Fœtid. [Cælius Aurelianus (A, 318).]

BROMOTÉRÉBÈNE (Fr.), n. Brom-o-ta-ra-be^{2}n. See BROMTEREBENE.

BROMOTETRACODEINE, n. Brom-o-te^{2}t-ra^3-kod-e'en. Fr., *bromotétracodéine.* Ger., *Bromtetracodeïn.* A compound, $C_{144}H_{166}Br_2N_8O_{24} = (C_{36}H_{42}N_2O_6 - H)_4 + 2HBr$, produced by the prolonged action of hydrobromic acid on codeine. [B.]

BROMOTETRAMORPHINE, n. Brom-o-te^{2}t-ra^3-mo^{2}rf'en. Fr., *bromotétramorphine.* Ger., *Bromtetramorphin.* A base, $C_{136}H_{156}Br_2N_8O_8 = (C_{34}H_{38}N_2O_6 - H)_4 + 2HBr$, formed by the prolonged action of hydrobromic acid on morphine. [B, 2.]

BROMOTHIONESSAL (Fr.), **BROMOTHIONESSILE** (Fr.), n's. Brom-o-te-on-e^{2}s-sa^{3}l, -sel. A compound, $C_{26}H_7SBr_2$, produced by the action of bromine on thionessal. [A, 301, 385.]

BROMOUS, adj. Brom'u^{3}s. Containing bromine united with oxygen in the same proportion as in the chlorous compounds (but b. compounds are not known). [B.]

BROMOXAFORM, n. Brom-o^{2}x'a^3-fo^{2}rm. Lat., *bromoxaformum.* Fr., *bromoxaforme.* A colorless, crystalline body, $C_3HBr_6O_2$, formed, along with bromoform, by the action of bromine on aqueous potassium citrate. [L, 49.]

BROMOXYLENE, n. Brom-o-zil'en. Fr., *bromoxylène.* Ger., *Bromxylol.* See BROMMETAXYLENE and BROMPARAXYLENE.

BROMOZANALOIN, n. Brom-o-za^{2}n-a^{2}l-o'i^{2}n. A bromine substitution compound of zanaloin, $C_{16}H_{15}Br_3O_7$, occurring in the form of yellow crystals. [B, 2.]

BROMPARAXYLENE, n. Brom-pa^{2}r-a^2-zil'en. Fr., *bromoparaxylène.* Ger., *Bromparaxylol.* A bromine substitution derivative of paraxylene. [B.] See MONOBROMPARAXYLENE and DIBROMPARAXYLENE.

BROMPHENANTHRENE, n. Brom-fe^{2}n-a^{2}n'thren. A compound, $C_{14}H_9Br$, formed by decomposing phenanthrene dibromide by heat; thin, colorless prisms. [B, 4.]

BROMPHENOL, n. Brom-fe^{2}n'o^{2}l. A bromine substitution product of phenol. [B.] See MONOBROMPHENOL, DIBROMPHENOL, and TRIBROMPHENOL.

BROMPHENOLSULPHONIC ACID, n. Brom-fe^{2}n-o^{2}l-su^{3}lf-o^{2}n'i^{2}k. A bromine substitution compound of phenolsulphonic acid, $C_6H_3Br(OH)SO_2.OH = C_6H_5BrSO_4$, of which two isomeric varieties are known. [B, 2.] See also DIBROMPHENOLSULPHONIC ACID.

BROMPHENYLCYSTEÏN (Ger.), n. Brom-fe^{2}n-u^{6}l-tsu^{6}st-a-en'. E. Baumann's term for bromphenylcystine, as being a derivative of cysteine (*q. v.*). [B.]

BROMPHENYLCYSTINE, n. Brom-fe^{2}n-i^{2}l-si^{2}st'en. Fr., *bromophénylcystine.* Ger., *Bromphenylcystin, Bromphenylcysteïn* [Baumann]. Cystine in which an atom of hydrogen is replaced by a molecule of the univalent radicle, $(C_6H_4Br)'$, formed by the decomposition of bromphenylmercapturic acid; small, shining, acicular crystals, $C_9H_{10}BrSNO_3$, melting at 180° C., nearly insoluble in water, in alcohol, and in ether. [E. Baumann and C. Preusse, "Ztschr. f. phys. Chem.," vi, p. 307 (B).]

BROMPHENYLCYSTOIN, n. Brom-fe^{2}n-i^{2}l-si^{2}st-o'i^{2}n. The anhydride of bromphenylcystine, $C_9H_9SNBr.O$. [E. Baumann and C. Preusse, "Ztschr. f. phys. Chem.," vi, p. 307 (B).]

BROMPHENYLMERCAPTAN, n. Brom-fe^{2}n-i^{2}l-mu^{6}r-ka^{2}p'ta^{2}n. A bromine substitution product of phenylmercaptan, $C_6H_4Br.SH$. [B.]

BROMPHENYLMERCAPTURIC ACID, n. Brom-fe^{2}n-i^{2}l-mu^{6}r-ka^{2}p-tu^{2}r'i^{2}k. Fr., *acide bromophénylmercapturique.* Ger., *Bromphenylmercaptursäure.* A crystalline monobasic acid, $C_{11}H_{12}BrSNO_3$, obtained from urine after the ingestion of brombenzene. It may be decomposed into bromphenylcystine, and this into bromphenylmercaptan and pyruric acid. [E. Baumann and C. Preusse, "Ztschr. f. phys. Chem.," vi, p. 307 (B).]

BROMPROPIONIC ACID, n. Brom-pro-pi^2-o^{2}n'i^{2}k. Fr., *acide bromopropionique.* Ger., *Brompropionsäure.* A monobasic acid, $C_3H_5BrO_2$, of which two isomeric forms are known, both crystalline solids. [B, 4.]

BROMPSEUDONITROPROPANE, n. Brom-su^{2}d-o-nit-ro-pro-pan'. Ger., *Brompseudonitropropan.* See BROMNITROPROPANE.

BROMPYRIDINE, n. Brom-pi^{2}r'i^{2}d-en. Fr., *bromopyridine.* Ger., *Brompyridin.* See MONOBROMPYRIDINE, DIBROMPYRIDINE, and DIBROMOXYPYRIDINE.

BROMPYROMECONIC ACID, n. Brom-pir-o-me^{2}k-o^{2}n'i^{2}k. Fr., *acide bromopyroméconique.* A crystalline compound, $C_6H_3BrO_3$, formed by the action of bromine-water on an aqueous solution of pyromeconic acid. [B, 3.]

BROMSALICYLIC ACID, n. Brom-sa^{2}l-i^2-si^{2}l'i^{2}k. Fr., *acide bromosalicylique.* Ger., *Bromsalicylsäure.* See MONOBROMSALICYLIC ACID, DIBROMSALICYLIC ACID, and TRIBROMSALICYLIC ACID.

BROMSULPHOBENZOIC ACID, n. Brom-su^{3}lf-o-be^{2}nz-o'i^{2}k. Fr., *acide bromosulfobenzoïque.* A dibasic crystalline acid, $C_6H_3Br(CO_2.OH)(SO_2.OH)$. [B, 2.]

BROMTEREBENE, n. Brom-te^{2}r'e^{2}b-en. Fr., *bromotérébène.* Ger., *Bromtereben.* A thick, red liquid, $C_{10}H_{14}Br_2$, formed by the action of bromine on terebene. [L, 49.]

BROMTHEE (Ger.), n. Brom'ta. Bramble-tea; a tea made with 20 parts of frangula bark and 10 each of senna leaves, acacia flowers, linden flowers, and sassafras wood. [B, 270; L, 120.]

BROMTHIOPHENE, n. Brom-thi'o-fen. Fr., *bromothiophène.* Ger., *Bromthiophen.* A bromine substitution product of thiophene. [B.] See MONOBROMTHIOPHENE, DIBROMTHIOPHENE, and TETRABROMTHIOPHENE.

BROMTOLUENE, n. Brom-to^{2}l'u^2-en. Fr., *bromotoluène.* Ger., *Bromtoluol.* A bromine substitution compound of toluene. [B.] See MONOBROMTOLUENE, DIBROMTOLUENE, and TRIBROMTOLUENE.

BROMUM [U. S. Ph., Br. Ph., Fr. Cod., Ger. Ph.] (Lat.), n. n. Brom'u^{3}m(u^{4}m). See BROMINE.

BROMÜR (Ger.), n. Brom-u^{6}r'. A bromide (used chiefly in composition to denote that one of two similar bromides which contains the smaller amount of bromine). [B.] Cf. BROMID.

BROMURATED, adj. Brom'u^{2}r-at-e^{2}d. Lat., *bromuratus.* Fr., *bromuré.* Containing bromine or a bromide. [A, 385.]

BROMURE (Fr.), n. Brom-u^{6}r. See BROMIDE.—**B. ferreux** [Fr. Cod.]. Lat., *bromuretum ferrosum* [Fr. Cod.]. Lit., ferrous bromide; of the Fr. Cod., a solution of that salt, prepared by adding 1 part of iron filings to a mixture of 2 parts of bromine and 5 of distilled water. It is a green, unstable liquid. [B.]—**Pilules de b. ferreux** [Fr. Cod.]. Lat., *pilulæ cum bromureto ferroso* [Fr. Cod.]. Pills, each containing 5 centigrammes (about ¾ grain), of ferrous bromide made up with gum arabic and licorice, rolled in powdered iron filings, and coated with mastic and balsam of Tolu. [B.]

BROMURÉ (Fr.), adj. Brom-u^{6}r-a. See BROMURATED.

BROMURET, n. Brom'u^{2}r-e^{2}t. See BROMIDE.

BROMURETED, adj. Brom'u^{2}r-e^{2}t-e^{2}d. See BROMURATED.

BROMURETUM (Lat.), n. n. Brom-u^{2}r(u^{4}r)-e(a)'tu^{3}m(tu^{4}m). See BROMIDE.—**B. ammonicum** [Fr. Cod.]. Ammonium bromide. [B.]—**B. baryticum** [Fr. Cod.]. Barium bromide. [B.]—**B. camphoratum** [Fr. Cod.]. See CAMPHORA *monobromata.*—**B. ferri** [Belg. Ph.]. See FERRI *bromidum.*—**B. ferrosum** [Fr. Cod.]. See BROMURE *ferreux.*—**B. kalicum.** Potassium bromide. [B.]—**B. lithicum** [Fr. Cod.]. Lithium bromide. [B.]—**B. potassicum** [Fr. Cod.]. Potassium bromide. [B.]—**B. sodicum** [Fr. Cod.]. Sodium bromide. [B.]—**B. zincicum.** Zinc bromide. [L, 65.]—**Pillulæ cum bromureto ferroso** [Fr. Cod.]. See *Pilules de* BROMURE *ferreux.*—**Syrupus cum bromureto potassico** [Fr. Cod.]. See *Sirop de bromure de* POTASSIUM.

BROMURETUS (Lat.), adj. Brom-u^{2}r(u^{4}r)-e(a)'tu^{3}s(tu^{4}s). See BROMURATED.

BROMUS (Lat.), n. m. Brom(bro^{2}m)'u^{3}s(u^{4}s). Gr., βρόμος. Fr., *brome.* Ger., *Trespe.* A genus of gramineous plants of the tribe *Festuceæ*, subtribe *Brachypodieæ*, including several sections, some of which, such as *Libertia* and *Ceratochloa*, have been regarded as distinct genera. [Hackel (B, 245).]—**B. aquaticus** [Gmelin]. Fr., *brome gigantesque.* The *Festuca gigantea.* [B, 173.]—**B. arvensis.** Fr., *brome des champs.* The *Festuca arvensis.* [B, 173.]—**B. capillaris** [Mönch]. The *Leptochloa domingensis.* [B, 173.]—**B. catharticus** [Vahl]. Fr., *brome cathartique.* A species growing in Peru and Chili, where the rhizome is used as a cathartic. [B, 180, 245.]—**B. ciliatus.** See *B. purgans.*—**B. decumbens** [Koeler]. The *Danthonia decumbens.* [B, 173.]—**B. elatior.** Of Sprengel, the *Festuca elatior;* of Linnæus, the *Festuca pratensis.* [B, 173, 188.]—**B. erectus** [Hudson]. Fr., *brome des prés.* Ger., *aufrechte Trespe.* A European species furnishing fodder. [B, 245.]—**B. fragilis** [Lamarck]. The *Brachypodium pinnatum.* [B, 173.]—**B. giganteus.** Of Linnæus, the *Festuca gigantea;* of Leers, the *Festuca elatior.* [B, 173, 188.]—**B. glaucus** [Lapeyrouse]. The *B. erectus.* [B, 173, 188.]—**B. glomeratus** [Scopoli]. The *Dactylis glomerata.* [B, 173.]—**B. imperialis.** The *B. purgans.* [B, 173.]—**B. inermis.** Ger., *wehrlose Trespe.* A European species furnishing fodder. [B, 245.]—**B. mango** [Desvaux]. A species growing in Chili, where, before the introduction of European cereals, it was the most important source of bread. [B, 245.]—**B. mollis** [Linnæus]. Fr., *brome mou.* Soft brome-grass (or chess), blubber-grass, bull-grass; an annual species furnishing a good but temporary meadowy grass. [B, 19, 173, 245.]—**B. nanus.** Fr., *brome nain.* A variety of *B. mollis.* [B, 173, 188.]—**B. odoratus.** The *B. erectus.* [B, 173.]—**B. ovinus** [Scopoli]. The *Festuca ovina.* [B, 173.]—**B. perennis.** The *B. erectus.* [B, 173, 188.]—**B. pinnatus** [Linnæus]. The *Brachypodium pinnatum.* [B, 173, 188.]—**B. pratensis.** Of Sprengel, the *Festuca pratensis.* [B, 173.]—**B. purgans.** Fr., *brome purgatif.* A species found in Canada, where a decoction of the root is used as a purgative. [B, 173.]—**B. Schraderi** [Kunth]. See *B. unioloides.*—**B. secalinus.** Fr., *brome des seigles* (ou *à gros épi*), *droue, fétu, persac, séglin.* Ger., *Ackertrespe.* A species with which, mixed with the grain of wheat, a poor quality of bread is made in the north of France. [B, 173.]—**B. squarrosus** [Linnæus]. Fr., *brome rude.* The *Festuca squarrosa.* [B, 173.]—**B. strigosus.** The *Festuca gigantea.* [B, 173.]—**B. tectorum** [Linnæus]. Fr., *brome des toits.* The *Festuca tectorum.* [B, 173.]—**B. temulentus** [Bernhardi]. The *Lolium temulentum.* [B, 188.]—**B. tigurinus** [Suter]. The *Brachypodium pinnatum.* [B, 173.]—**B. triflorus** [Linnæus]. The *Festuca gigantea.* [B, 173, 188.]—**B. unioloides** [Kunth]. Syn.: *Ceratochlora pendula* [Schrader]. Australian prairie-grass; a fodder grass growing throughout America. [B, 19, 245.]

BRONCHADENES (Lat.), n. m. and f. pl. Bro^{2}n^{2}k(bro^{2}n^{2}ch^2)-a^{2}d(a^{3}d)'-e^{2}n-ez(e^{2}s). From βρόγχια, the bronchi, and ἀδένες (pl. of ἀδήν), glands. The bronchial glands. [A, 322.]

BRONCHADENITIS (Lat.), n. f. Bro^{2}n^{2}k(bro^{2}n^{2}ch^2)-a^{2}d(a^{3}d)-e^{2}n-i(e)'ti^{2}s. Gen., *bronchadenit'idis.* Fr., *adénite bronchiale.* Ger., *Entzündung der Bronchialdrüsen.* Inflammation of the bronchial glands. [A, 322; L, 81.]

BRONCHAPHROSIE [Piorry] (Fr.), n. Bro^{2}n^{2}k-a^3-froz-e. From βρόγχια, the bronchial tubes, and ἀφρός, foam. Obstruction of the bronchial tubes by frothy secretion. [L, 82.]

BRONCHASIE [Piorry] (Fr.), n. Bro^{2}n^{2}k-a^{3}z-e. See BRONCHIECTASIS.

BRONCHE (Fr.), n. Bro^{2}n^{2}sh. See BRONCHUS.—**B. lobulaire.** See BRONCHIOLE.

BRONCHÉAL (Fr.), adj. Bro^{2}n^{2}k-a-a^{3}l. See BRONCHIAL.

BRONCHECTASIS (Lat.), n. f. Bro^{2}n^{2}k(bro^{2}n^{2}ch^2)-e^{2}k′ta^{2}s-(ta^{3}s)-i^{2}s. Gen., *bronchecta′seos* (*-ec′tasis*). Fr., *bronchectasie.* See BRONCHIECTASIS.

BRONCHELCIE [Piorry] (Fr.), **BRONCHELCOSIE** [Piorry] (Fr.), n's. Bro^{2}n^{2}k-e^{2}l-se, -koz-e. From βρόγχια, the bronchi, and ἕλκος, an ulcer. Ulceration of the bronchi. [A, 250.]

BRONCHEMPHRAXIE [Piorry] (Fr.). Bro^{2}n^{2}k-a^{3}n^2-fra^{3}x-e. From βρόγχια, the bronchial tubes, and ἔμφραξις, obstruction. Obstruction of the bronchial tubes. [L, 82.]

BRONCHEOPYRA (Lat.), n. f. Bro^{2}n^{2}k(bro^{2}n^{2}ch^2)-e^2-o^{2}p′i^{2}r-(u^{6}r)-a^3. From βρόγχια, the bronchial tubes, and πῦρ, fire. Ger., *Stickhusten.* Suffocative cough. [Eisenmann (A, 322).]

BRONCHI (Lat.), n. m., pl. of *bronchus* (*q. v.*). Bro^{2}n^{2}k-(bro^{2}n^{2}ch^2)′i(e).

BRONCHIA (Lat.), n. n. pl. Bro^{2}n^{2}k(bro^{2}n^{2}ch^2)′i^2-a^3. Gr., βρόγχια. Fr., *bronches.* Ger., *Bronchien, Luftröhrenäste.* It., *bronchi.* Sp., *bronquios.* An old term for the divisions of the trachea, especially the bronchioles, also for the spongy bodies of the ethmoid bone. [A, 322, 387.]

BRONCHIADENES (Lat.), n. m. and f. pl. Bro^{2}n^{2}k-(bro^{2}n^{2}ch^2)-i^2-a^{2}d(a^{3}d)′e^{2}n-ez(e^{2}s). See BRONCHADENES.

BRONCHIADENOSCIRRHUS (Lat.), n. m. Bro^{2}n^{3}k-(bro^{2}n^{2}ch^2)-i^2-a^{2}d(a^{3}d)-e^{2}n-o(o^2)-si^{2}r(ski^{2}r)′ru^{3}s(ru^{4}s). From βρόγχια, the bronchi, ἀδήν, a gland, and σκίῤῥος (see SCIRRHUS). Scirrhus of the bronchial glands. [A, 322.]

BRONCHIAL, adj. Bro^{2}n^{2}k′i^2-a^{2}l. Lat., *bronchialis, bronchicus.* Fr., *bronchique, bronchial.* Ger., *bronchial.* It., *bronchiale.* Sp., *bronquial.* Pertaining to the bronchi or the b. tubes. —**B. tubes.** See under TUBE.

BRONCHIARCTIA (Lat.), n. f. Bro^{2}n^{2}k(bro^{2}n^{2}ch^2)-i^2-a^{3}rk′-shi^2(ti^2)-a^3. From *bronchia* (= βρόγχια), the bronchial tubes, and *arctare*, to narrow. Fr., *bronchiarctie.* Stenosis of the bronchi or the bronchial tubes. [A, 301 ; L, 32.]

BRONCHIC, adj. Bro^{2}n^{2}k′i^{2}k. See BRONCHIAL.

BRONCHIECTASIS (Lat.), n. f. Bro^{2}n^{2}k(bro^{2}n^{2}ch^2) i^2-e^{2}k′-ta^{2}s(ta^{3}s)-i^{2}s. Gen., *bronchiectas′eos* (*-ec′tasis*). From βρόγχια, the bronchial tubes, and ἔκτασις, expansion. Fr., *bronchectasie.* Ger., *Bronchiektasie.* It., *bronchiettasia.* Sp., *bronquiéctasis.* Dilatation of one or more of the bronchial tubes. [D 1.]

BRONCHIES [Piorry] (Fr.), n. pl. Bro^{2}n^{2}k-e. Diseases of the bronchial tubes. [A, 250.]

BRONCHIITIS (Lat.), n. f. Bro^{2}n^{2}k(bro^{2}n^{2}ch^2)-i^2-i(e)′ti^{2}s. See BRONCHITIS.

BRONCHILLAIRE (Fr.), adj. Bro^{2}n^{2}k-i^{2}l-la^{2}r. Pertaining to the bronchioles. [A, 385.]

BRONCHILLE (Fr.), n. Bro^{2}n^{2}k-el. See BRONCHIOLE.

BRONCHIN, n. Bro^{2}n^{2}k′i^{2}n. Lat., *bronchinum, bronchina.* Ger., *Bronchin.* Von Vest's term for a substance found in the waters of Alpine valleys, to the influence of which goitre, cretinism, etc., have been attributed. [A, 322.]

BRONCHIOCATARRHUS (Lat.), n. m. Bro^{2}n^{2}k(bro^{2}n^{2}ch^2)-i^2-o(o^2)-ka^{2}t(ka^{3}t)-a^{3}r′ru^{3}s(ru^{4}s). Bronchial catarrh. [A, 322.]

BRONCHIOKRISEN (Ger.), n. pl. Bro^{2}n^{2}ch^2-i^2-o-krez′e^{2}n. Bronchial crises occurring in tabes dorsalis ; paroxysmal attacks of cough resembling whooping-cough. [A, 326.]

BRONCHIOLES, n. pl. Bro^{2}n^{2}k′i^2-olz. The ultimate branches of the bronchial tubes, those to which the alveoli are connected. [A, 385.]

BRONCHIOLITIS (Lat.), n. f. Bro^{2}n^{2}k(bro^{2}n^{2}ch^2)-i^2-ol(o^{2}l)-i(e)′ti^{2}s. For deriv., see BRONCHIA and *-itis**. Capillary bronchitis. [Knauthe (A, 319).]—**B. exsudativa** [Curschmann]. A form of b. characterized by severe asthmatic attacks and by the presence of fine fibrinous spirals in the sputa ; most common on the sea-coast. [A, 326.]

BRONCHIOPNEUMONIA (Lat.), n. f. Bro^{2}n^{2}k(bro^{2}n^{2}ch^2)-i^2-o(o^2)-nu^2(pnu^2)-mon(mo^{2}n)′i^2-a^3. See BRONCHO-PNEUMONIA.

BRONCHIORRHŒA (Lat.), n. f. Bro^{2}n^{2}k(bro^{2}n^{2}ch^2)-i^2-o^{2}r-re′(ro^2′e^2)-a^3. See BRONCHORRHŒA.

BRONCHIORRHONCHUS (Lat.), n. m. Bro^{2}n^{2}k(bro^{2}n^{2}ch^2)-i^2-o^{2}r-ro^{2}n^{2}k(ro^{2}n^{2}ch^2)′u^{3}s(u^{4}s). From βρόγχια, the bronchial tubes, and ῥόγχος, snoring. Fr., *râle bronchial.* Ger., *Bronchialrasselgeräusch.* See *Bronchial* RÂLE.

BRONCHIOSPASMUS (Lat.), n. m. Bro^{2}n^{2}k(bro^{2}n^{2}ch^2)-i^2-o(o^2)-spa^{2}z(spa^{3}s)′mu^{3}s(mu^{4}s). From βρόλχια, the bronchial tubes, and σπασμός, spasm. Spasm of the bronchial tubes. [A, 322.] See ASTHMA.

BRONCHIOSTENOSIS (Lat.), n. f. Bro^{2}n^{2}k(bro^{2}n^{2}ch^2)-i^2-o(o^2)-ste^{2}n-o′si^{2}s. Gen., *bronchiosteno′seos* (*-sis*). From βρόγχια, the bronchial tubes, and στένωσις, constriction. Constriction of the bronchial tubes. [L, 107.]

BRONCHIQUE (Fr.), adj. Bro^{2}n^{2}k-ek. See BRONCHIAL.

BRONCHISMUS [M. Hall] (Lat.), n. m. Bro^{2}n^{2}k(bro^{2}n^{2}ch^2)-i^{2}z(i^{2}s)′mu^{3}s(mu^{4}s). Fr., *bronchisme.* Suffocative spasm of the bronchial tubes dependent on spinal paralysis. [A, 301.]

BRONCHITE (Fr.), n. Bro^{2}n^{2}k-et. See BRONCHITIS.—**B. accidentelle.** A mild catarrh of the larger bronchial tubes ; a common cold. [L, 41.]—**B. à râles bullaires.** Of Blau, a general term for varieties of bronchitis with moist râles. [Riegel (L, 20).]—**B. à râles vibrantes.** Of Blau, a general term for varieties of bronchitis with dry râles. [Riegel (L, 20).]—**B. avec quinte.** See *Capillary* BRONCHITIS.—**B. blenplastique** [Piorry]. Bronchial croup. [A, 250.]—**B. convulsive.** Whooping-cough. [L, 41.]—**B. pseudo-membraneuse.** Croupous bronchitis. [L.]—**B. ramusculaire.** See *Capillary* BRONCHITIS.—**B. vulgaire.** See *B. accidentelle.*

BRONCHITIC, adj. Bro^{2}n^{2}k-i^{2}t′i^{2}k. Fr., *bronchitique.* Pertaining to or affected with bronchitis. [A, 385.]

BRONCHITIS (Lat.), n. f. Bro^{2}n^{2}k(bro^{2}n^{2}ch^2)-i(e)′ti^{2}s. Gen., *bronchit′idis.* For deriv., see BRONCHIA and *-itis**. Fr., *bronchite, catarrhe pulmonaire.* Ger., *Bronchitis, Bronchialcatarrh, Lungencatarrh, Entzündung der Luftröhrenäste.* It., *bronchite.* Sp., *bronquitis.* Catarrhal inflammation of the bronchial tubes, especially the larger ones, within the lungs. The term is popularly applied to catarrhal affections of the larynx, trachea, and bronchi. [A, 301 ; D, 1.]—**B. asthenica, B. capillaris.** See *Capillary b.*—**B. crouposa, B. cruposa.** See *Croupous b.*—**B. diffusa sicca.** Diffuse dry b. [Riegel (D, 18).]—**B. exsudativa, B. fibrinosa.** See *Croupous b.*—**B. genuina.** Uncomplicated b. [L, 135.]—**B. pseudomembranacea.** See *Croupous b.*—**B. putrida.** See *Fœtid b.*—**B. senilis.** See *Senile b.*—**B. suffocans.** See *Capillary b.*—**B. synochica.** Uncomplicated b. with high fever. [L, 135.]—**B. verminosa.** See *Verminous b.*—**Capillary b.** Lat., *b. capillaris.* Fr., *bronchite capillaire.* Ger., *Capillarbronchitis.* Syn. : *b. suffocans, bronchiolitis.* An acute catarrhal inflammation of the finer bronchial tubes ; a severe and often fatal affection, commonly thought to attack children especially, but held by some (such as von Niemeyer and Clymer) to be of frequent occurrence in adults ; accompanied by high fever, dyspnœa, painful paroxysms of violent coughing, and the expectoration of thread-like masses. [A, 301 ; Weil (A, 416) ; D, 1.]—**Carbonaceous b.** See ANTHRACOSIS (4th def.).—**Chronic b., Chronic catarrhal b.** Fr., *bronchite* (ou *bronchorrhée*) *chronique.* Ger., *chronische Bronchialcatarrh.* A form of b. characterized by attacks occurring every winter, sometimes at last becoming continuous, or continuous from the first if it is due to the habitual inhalation of irritating substances. It may occur as a complication of other pulmonary diseases or be secondary to gout, rheumatism, syphilis, or disease of the heart or the kidneys. [A, 301 ; D, 28.]—**Croupous b.** Lat., *b. crouposa* (seu *cruposa*). Fr., *bronchite pseudo-membraneuse.* Ger., *Bronchialcroup, croupöse B.* An acute or chronic b. in which casts of the bronchial tubes are formed by fibrinous exudation. [Weil (A, 416) ; Riegel (L, 20).]—**Exudative b., Fibrinous b.** See *Croupous b.*—**Fœtid b.** Fr., *bronchite fétide.* Ger., *fötide* (oder *putride*) *B.* B. with fœtid expectoration not due to bronchiectasis, gangrene, or other pulmonary diseases. [Knauthe (A, 319).]—**Mechanical b.** B. due to mechanical irritation, as by the habitual inhalation of dust of various kinds. [D, 1.]—**Membranous b., Plastic b.** See *Croupous b.*—**Potters' b.** A form of mechanical b. caused by the inhalation of particles of clay. [Parson (D).]—**Pseudo-membranous b.** See *Croupous b.*—**Putrid b.** See *Fœtid b.*—**Senile b.** Lat., *b. senilis.* Fr., *bronchite sénile.* Ger., *B. des Greisenalters.* Chronic b. in aged persons.—**Suffocative b.** Lat., *b. suffocans.* See *Capillary b.*—**Tracheob′.** B. associated with tracheal catarrh. [Riegel (L, 20).]—**Verminous b.** Lat., *b. verminosa.* Fr., *bronchite vermineuse.* A form of b. due to the presence of some variety of *Strongylus* in the bronchial tubes of cattle and sheep ; also an old term for a b. attributed to intestinal worms. [L, 132.]

BRONCHLEMMITIS (Lat.), n. f. Bro^{2}n^{2}k(bro^{2}n^{2}ch^2)-le^{2}m-mi(me)′ti^{2}s. Gen., *bronchlemmit′idis.* From βρόγχια, the bronchial tubes, and λέμμα, peel (see also *-itis**). See *Croupous* BRONCHITIS.

BRONCHO-ÆGOPHONY, n. Bro^{2}n^{2}k-o-e^{2}g-o^{2}f′on-i^2. For deriv., see BRONCHIA and ÆGOPHONY. Fr., *broncho-œgophonie, broncho-égophonie.* Ægobronchophony. [D, 72.] See under ÆGOPHONY.

BRONCHO-ALVEOLITIS (Lat.), n. f. Bro^{2}n^{2}k(bro^{2}n^{2}ch^2)-o(o^2)-a^{2}l(a^{3}l)-ve^2(we^2)-ol(o^{2}l)-i(e)′ti^{2}s. Gen., *broncho-alveolit′idis.* For deriv., see BRONCHIA, ALVEOLUS, and *-itis**. Fr., *broncho-alvéolite.* See *Catarrhal* PNEUMONIA.

BRONCHOBLENNORRHÖE (Ger.), n. Bro^{2}n^{2}ch^2-o-blen-no^{2}r-ru^5′e^2. See BRONCHORRHŒA.

BRONCHOCARCINIE [Piorry] (Fr.), n. Bro^{2}n^{2}k-o-ka^{3}r-si^{2}n-e. Cancerous disease of the bronchial tubes. [L, 82.]

BRONCHOCATARRHUS (Lat.), n. m. Bro^{2}n^{2}k(bro^{2}n^{2}ch^2)-o(o^2)-ka^{2}t(ka^{3}t)-a^{3}r′ru^{3}s(rus). From βρόγχια, the bronchial tubes, and καταῤῥους (= καταῤῥοος), catarrh. Bronchial catarrh. [A, 322.]

BRONCHOCELE (Lat.), n. f. Bro^{2}n^{2}k(bro^{2}n^{2}ch^2)-o(o^2)-sel-(kal)′e(a) : as an Eng. word, bro^{2}n^{2}k′o-sel. Gr., βρογχοκήλη (from βρόγχος, the throat, and κήλη, a swelling). Fr., *bronchocèle.* Ger., *Kropf.* 1. See GOÎTRE. 2. Etymologically, a hernial tumor of the trachea. [A, 322.]

BRONCHOCELICUS (Lat.), adj. Bro^{2}n^{2}k(bro^{2}n^{2}ch^2)-o(o^2)-se^{2}l(kal)′i^{2}k-u^{3}s(u^{4}s). Pertaining to or affected with bronchocele. [A, 322.]

BRONCHO-CÉPHALITE (Fr.), n. Bro^{2}n^{2}k-o-saf-a^{3}l-et. From βρόγχια, the bronchial tubes, and κεφαλή, the head. Whooping-cough. [D.]

BRONCHO-ÉGOPHONIE (Fr.), n. Bro^{2}n^{2}k-o-a-go-fon-e. Ægobronchophony. [D, 72.] See under ÆGOPHONY.

BRONCHO-HÆMORRHAGIA (Lat.), n. f. Bro^{2}n^{2}k-(bro^{2}n^{2}ch^2)-o(o^2)-he^{2}m(ha^3-e^{2}m)-o^{2}r-ra(ra^3)′ji^2(gi^2)-a^3. From βρόγχια, the bronchial tubes, αἷμα, blood, and ῥήγνυσθαι, to break forth. Andral's term for hæmorrhage from the lining membrane of the bronchial tubes. [L, 107.]

BRONCHOLEMMITIS (Lat.), n. f. Bro^{2}n^{2}k(bro^{2}n^{2}ch^2)-o(o^2)-le^{2}m-mi(me)′ti^{2}s. See BRONCHLEMMITIS.

BRONCHOLITH, n. Bro^{2}n^{2}k'o-li^{2}th. From βρόγχια, the bronchial tubes, and λίθος, a stone. Fr., *broncholithe.* A concrement formed in the bronchial tubes. [A, 385.]

BRONCHO-MYCOSIS (Lat.), n. f. Bro^{2}n^{2}k(bro^{2}n^{2}ch^2)-o(o^2)-mi(mu^6)-ko'si^{2}s. Gen., *broncho-myco'seos* (*-sis*). From βρόγχια, the bronchial tubes, and μύκης, a fungus. The development of fungi in the bronchial tubes. [Virchow (B, 46).]

BRONCHOPATHIES [Piorry] (Fr.), n. pl. Bro^{2}n^{2}k-o-pa^{3}t-e. From βρόγχια, the bronchial tubes, and πάθος, disease. Diseases of the bronchial tubes. [A, 250.]

BRONCHOPHONISM, n. Bro^{2}n^{2}k-o^{2}f'on-i^{2}zm. See BRONCHOPHONY.

BRONCHOPHONY, n. Bro^{2}n^{2}k-o^{2}f'on-i^2. Lat., *bronchophonia* (from βρόγχος, a bronchus, and φωνή, the voice). Fr., *bronchophonie.* Ger., *Bronchophonie.* It., *broncofonia.* Sp., *broncofonia.* The natural sound of the voice heard when auscultation is practised over the course of the trachea or the bronchi; in pathology, a similar sound heard in other situations, due to an increased conducting power of the pulmonary parenchyma from consolidation. [A, 287.] Cf. PECTORILOQUY.—**Accidental b.** Fr., *bronchophonie accidentelle* [Laennec]. B. due to disease. [A, 301.]—**Pectoriloquous b.** See PECTORILOQUY.—**Whispering b.** A high-pitched, tubular sound heard on auscultation when the patient whispers. [D, 26.]

BRONCHO-PHTHISIS (Lat.), n. f. Bro^{2}n^{2}k-(bro^{2}n^{2}ch^2)-o(o^2)-tis(ti^{2}s)'i^{2}s. Gen., *broncho-phthis'eos* (*-sis*). For deriv., see BRONCHIA and PHTHISIS. Of Clark, a form of pulmonary phthisis in which the focus of the disease is an extensive ulceration of the bronchial tubes, from those of medium size down to the intralobular branches. [L, 20.]

BRONCHOPHYMIES [Piorry] (Fr.), n. pl. Bro^{2}n^{2}k-o-fem-e. From βρόγχια, the bronchial tubes, and φῦμα, a growth. Tubercular deposits in the bronchial tubes. [L, 82.]

BRONCHOPLASTY, n. Bro^{2}n^{2}k'o-pla^{2}st-i^2. Lat., *bronchoplastice* (from βρόγχος, the trachea, and πλαστικός, formative). Fr., *bronchoplastie.* Ger., *Bronchoplastik, künstliche Luftröhrenbildung.* The application of autoplasty (*q. v.*) to the closure of tracheal fistulæ. [A, 322, 385.]

BRONCHO-PLEURISY, n. Bro^{2}n^{2}k-o-plu^{2}r'i^{2}s-i^2. From βρόγχια, the bronchial tubes, and πλευρῖτις, pleurisy. Fr., *bronchopleurésie.* A diseased condition consisting of coexistent bronchitis and pleurisy. [A, 301.]

BRONCHO-PLEUROPNEUMONIA (Lat.), n. f. Bro^{2}n^{2}k(bro^{2}n^{2}ch^2)-o(o^2)-plu^{2}r-o(o^2)-nu^2-mon(mo^{2}n)'i^2-a^3. It., *bronco-pleuropneumonite.* A diseased condition consisting of coexistent bronchitis, pleurisy, and pneumonia. [D, 5.]

BRONCHO-PNEUMONIA (Lat.), n. f. Bro^{2}n^{2}k-(bro^{2}n^{2}ch^2)-o(o^2)-nu^2-mon(mo^{2}n)'i^2-a^3. From βρόγχια, the bronchial tubes, and πνευμονία (see PNEUMONIA). Fr., *broncho-pneumonie.* Ger., *Bronchopneumonie.* It., *bronco-polmonite.* See *Catarrhal* PNEUMONIA.—**Pseudolobar b.-p.** Fr., *broncho-pneumonie pseudo-lobaire.* B.-p. so distributed through the lung as to resemble lobar pneumonia. [Cadet de Gassicourt, "Rev. mens. des mal. de l'enfance," July, 1884, p. 332 (D).]

BRONCHO-PNEUMONITIS (Lat.), n. f. Bro^{2}n^{2}k-(bro^{2}n^{2}ch^2)-o(o^2)-nu^2-mo^{2}n-i(e)'ti^{2}s. Gen., *broncho-pneumoni'tidis.* See BRONCHO-PNEUMONIA.

BRONCHO-PULMONAIRE (Fr.), adj. Bro^{2}n^{2}k-o-pu^{6}l-mon-a^{2}r. From βρόγχος, a bronchus, and *pulmo*, the lung. Pertaining to both the bronchi and the lungs. [A, 385.]

BRONCHORRHAGIA (Lat.), n. f. Bro^{2}n^{2}k(bro^{2}n^{2}ch^2)-o^{2}r-ra(ra^3)'ji^2(gi^2)-a^3. From βρόγχος, a bronchus, or βρόγχια, the bronchial tubes, and ῥήγνυσθαι, to break forth. Fr., *bronchorrhagie.* Hæmorrhage from or into the bronchi or the bronchial tubes. [L, 32, 107.]

BRONCHORRHÉE (Fr.), n. Bro^{2}n^{2}k-or-ra. See BRONCHORRHŒA.

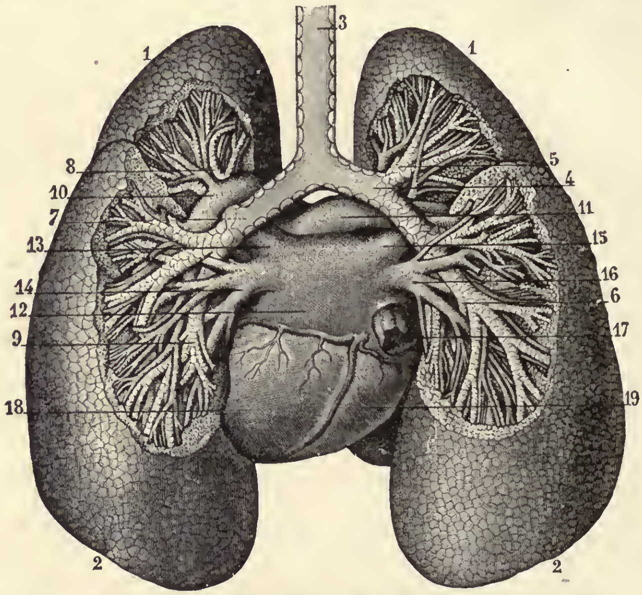
BRONCHORRHÊMIE [Piorry] (Fr.), n. Bro^{2}n^{2}k-or-re^{2}m-e. See BRONCHORRHAGIA.

BRONCHORRHŒA (Lat.), n. f. Bro^{2}n^{2}k(bro^{2}n^{2}ch^2)-or-re'-(ro^2'e^2)-a^3. From βρόγχια, the bronchial tubes, and ῥεῖν, to flow. Fr., *bronchorrhée.* Ger., *Bronchorrhöe, Bronchialschleimfluss.* It., Sp., *broncorrea.* Bronchial catarrh, usually chronic, with profuse expectoration. [Knauthe (A, 319).]—**B. serosa.** B. in which the expectoration is serous (the *pituitous catarrh* of Laennec, the *asthma humidum* of the older authors). [Knauthe (A, 319).]

BRONCHORRHONCHUS (Lat.), n. m. Bro^{2}n^{2}k(bro^{2}n^{2}ch^2)-or-ro^{2}n^{2}k(ro^{2}n^{2}ch^2)'u^{3}s(u^{4}s). From βρόγχια, the bronchial tubes, and ῥόγχος, snoring. See *Bronchial* RÂLE.

BRONCHOS (Lat.), n. m. Bro^{2}n^{2}k(bro^{2}n^{2}ch^2)'o^{2}s. See BRONCHUS.

BRONCHOSTÉNIE [Piorry] (Fr.), **BRONCHOSTÉNOSIE** [Piorry] (Fr.), n's. Bro^{2}n^{2}k-o-stan-e, -stan-o-ze. From βρόγχια, the bronchial tubes, and στένωσις, constriction. See BRONCHIOSTENOSIS.



BRONCHOSYPHILIDIES [Piorry] (Fr.), **BRONCHOSYPHIOSIES** [Piorry] (Fr.), n's pl. Syphilitic affections of the bronchial tubes. [L, 82.]

BRONCHOTOME, n. Bro^{2}n^{2}k'o-tom. Lat., *bronchotomus* (from βρόγχος, the trachea [1st def.], or βρόγχια, the bronchial tubes [2d def.], and τέμνειν, to cut). Fr., *bronchotome.* Ger., *Bronchotom.* It., Sp., *broncotomo.* 1. An instrument devised by Bauchot for making an opening into the larynx or trachea; consisting of a broad, double-edged steel blade inclosed in a silver cannula. [A, 301; E.] 2. An instrument for laying open the bronchi and the bronchial tubes in post-mortem examinations; a pair of strong scissors curved on the edge, with one blade slender, prolonged, and probe-pointed.

BRONCHOTOMY, n. Bro^{2}n^{2}k-o^{2}t'om-i^2. Lat., *bronchotomia.* Fr., *bronchotomie.* Ger., *Bronchotomie, Luftröhrenschnitt.* It., *broncotomia.* Sp., *broncotomia.* A general term for the operations of making an opening into the air-passages. [A, 301; E.] See TRACHEOTOMY, LARYNGOTOMY, and LARYNGO-TRACHEOTOMY.

BRONCHO-TRACHEAL, adj. Bro^{2}n^{2}k-o-tra^{2}k'e-a^{2}l. For deriv., see BRONCHUS and TRACHEA. Fr., *broncho-trachéen.* Pertaining to the bronchi and the trachea. [L, 294.]

BRONCHUS (Lat.), n. m. Bro^{2}n^{2}k(bro^{2}n^{2}ch^2)'u^{3}s(u^{4}s). Gr., βρόγχος. Fr., *bronche.* Ger., *Luftröhrenast.* It., *bronco.* Sp.,

THE BRONCHI AND LUNGS, POSTERIOR VIEW. (FROM FLINT, AFTER SAPPEY.)

1, 1, summit of the lungs; 2, 2, base of the lungs; 3, trachea; 4, right bronchus; 5, division to the upper lobe of the lung; 6, division to the lower lobe; 7, left bronchus; 8, division to the upper lobe; 9, division to the lower lobe; 10, left branch of the pulmonary artery; 11, right branch; 12, left auricle of the heart; 13, left superior pulmonary vein; 14, left inferior pulmonary vein; 15, right superior pulmonary vein; 16, right inferior pulmonary vein; 17, inferior vena cava; 18, left ventricle of the heart; 19, right ventricle.

bronquio. Anciently this name was applied indifferently to the trachea, the œsophagus, and the throat, and occasionally used to signify hoarseness; as now used, it denotes one of the two primary branches of the trachea, leading respectively to the right and left lung, the smaller branches within the lungs being termed *bronchial tubes* or *bronchioles.* [A, 301, 387; C.] Cf. BRONCHIA.—**Eparterial bronchi.** Bronchi lying above the pulmonary artery. [L, 210.]—**Hyparterial bronchi.** Bronchi lying below the pulmonary artery. [L, 210.]

BRONDE (Fr.), n. Brond. The *Solanum dulcamara*, also the *Erica cinerea.* [B, 173.]

BRONDO, n. See AOUAZÉ.

BRONGNIARTIEÆ (Lat.), n. f. pl. Bron-ya^{3}rt-i(i^2)'e^2-e(a^3-e^2). Of Lindley, a subtribe of the *Loteæ.* [B, 170.]

BRONTESIS (Lat.), n. f. Bro^{2}nt-e(a)'si^{2}s. Gen., *bronte'seos* (*-sis*). From βροντᾶν, to thunder. A morbid condition produced in plants by lightning. [B, 19.]

BRONTIDÆ (Lat.), n. f. pl. Bro^{2}n'ti^{2}d-e(a^3-e^2). A family of the *Coleoptera.* [L, 269.]

BRONTOLOGY, n. Bro^{2}nt-o^{2}l'o-ji^2. From βροντή, thunder, and λόγος, understanding. The science of the effects of thunder. [L, 102.]

BRONZE, n. Bro^{2}nz. Gr., χαλκός. Lat., *æs.* Fr., *bronze.* Ger., *Bronze.* It., *bronzo.* Sp., *bronce.* An alloy containing from 84 to 90 per cent. of copper and from 3 to 15 per cent. of tin, usually also from 1 to 8 per cent. of lead and from 1 to 12 per cent. of zinc. [B, 3.]—**Aluminium b.** See under ALUMINIUM.—**Phosphor-b.** Ger., *Phosphorbronze.* B. containing from 0·25 to 2·5 per cent. of phosphorus in the form of phosphide of tin; a very hard, tough, and elastic alloy. [B, 3.]

BRONZED, adj. Bro^{2}nzd. Fr., *bronzé.* Rendered like bronze in color.—**B. skin.** See *Addison's* DISEASE.

BROOK-BEAN, n. Bru^{4}k'ben. The *Menyanthes trifoliata.* [B, 19.]

BROOKITE, n. Bru^{4}k'it. Pure native titanic acid. [L, 108.]

BROOK-LIME, n. Bru^{4}k'lim. The *Veronica beccabunga*. [B, 19, 275.]

BROOK-MINT, n. Bru^{4}k'mi^{2}nt. The *Mentha hirsuta*. [B, 275.]

BROOK-WEED, n Bru^{4}k'wed. The *Samolus valerandi*. [B, 275.]

BROOM, n. Bru^{4}m. A.-S., *brôm*. Fr., *genêt*. Ger., *Ginster*. It., *ginestra*. Sp., *ginesta*. The genus *Cytisus*, especially the *Cytisus* (*Sarothamnus*) *scoparius*, also the *Lygeum spartum*.—**African b.** The genus *Aspalathus*. [B, 19, 275.]—**Amsato b.** The *Genista amsantica*. [B, 275.]—**Arrow-jointed b.** The *Genista sagittalis*. [B, 275.]—**Bitter b.** Sp., *escoba amarga*. The *Parthenium hysterophorus*.—**Black-rooted b.** The *Cytisus nigricans*. [B, 275.]—**B.-corn.** The *Sorghum vulgare* and the *Sorghum saccharatum*. [B, 34, 75, 275.]—**B.-galls.** The galls of the *Genista vulgaris*. [L, 102.]—**B.-grass.** The *Andropogon scoparius*. [B, 34, 275.]—**B.-pine.** The *Pinus palustris*. [B, 275.]—**B.-rape.** The genus *Orobanche*, especially the *Orobanche major*. [B, 34, 275.]—**B.-tops.** Lat., *scoparius* [U. S. Ph.], *scoparii cacumina* [Br. Ph.], *herba scoparii*. Fr., *genêt à balais*. Ger., *Besenginster, gemeiner Ginster*. It., *scoparia*. Sp., *retama*. See SCOPARIUS.—**Butcher's b.** The genus *Ruscus*. [B, 275.]—**Common b.** The *Cytisus* (*Sarothamnus*) *scoparius*. [B, 275.]—**Decoction of b.** See *Decoctum* SCOPARII.—**Dyer's b.** The *Genista tinctoria*. [B, 19.]—**Flax-leaved b.** The *Genista linifolia*. [B, 275.]—**German b.** The *Genista germanica*. [B, 275.]—**Hairy b.** The *Genista pilosa*. [B, 275.]—**He-b.** The *Cytisus laburnum*. [B.]—**Juice of b.** See *Succus* SCOPARII.—**New Zealand b.** The *Carmichælia australis*, also various other species of *Carmichælia*. [B, 19, 275.]—**Purging b.** The *Genista purgans*. [B, 275.]—**Rush-b.** The genus *Viminaria*, also the *Spartium junceum*. [B, 19, 275.]—**Salt of b.** See *Sal* GENISTÆ.—**Spanish b.** The *Spartium junceum*. [B, 19, 275.]—**Sweet b.** The *Scoparia dulcis*. [B, 275.]—**Wood-b.** The *Genista silvestris*. [B, 275.]

BROOMEIEÆ (Lat.), n. f. pl. Brom-i'e^2-e(a^3-e^2). Of Léveillé, a tribe of lycoperdaceous *Fungi*. [B, 170.]

BROSCIDES (Lat.), n. f. pl. Bro^{2}s'si^{2}d(ki^{2}d)-ez(e^{2}s). A subfamily of the *Carabidæ*. [L, 267.]

BROSIME (Fr.), n. Bros-em. See BROSIMUM.—**B. épeautre.** The *Brosimum alicastrum*. [B, 173.]

BROSIMEÆ (Lat.), n. f. pl. Bro^{2}s(bros)-i^{2}m'e^2-e(a^3-e^2). Of Reichenbach and others, a subtribe, tribe, or subdivision of the *Artocarpeæ* comprising *Brosimum* and other genera. [B, 170.]

BROSIMUM (Lat.), n. n. Bro^{2}s(bros)'i^{2}m-u^{3}m(u^{4}m). From βρώσιμος, edible, nutritious. Fr., *brosime*. Ger., *Brodnuss*. A South American genus of moraceous trees of the *Artocarpeæ*. [B, 19, 75.]—**B. alicastrum** [Swartz]. Fr., *brosime épeautre*. The bread-nut tree of Jamaica. The nuts are eaten. The young branches are used for fodder; when old, they contain an acrid milky juice. [B, 19, 81, 173, 180.]—**B. Aubletii.** A species found in British Guiana and Trinidad. [B, 19.]—**B. galactodendron** [Don]. See GALACTODENDRON *utile*.

BROSIS (Lat.), n. f. Bros'i^{2}s. Gen., *bros'eos* (*-is*). Gr., βρῶσις. Fr., *manger*. Ger., *Fressen*. The act of eating. [A, 322; L, 81.]

BROSSÆA (Lat.), n. f. Bro^{2}s(bros)-se'(sa^3'e^2)-a^3. A genus of vacciniaceous plants. [L, 102.]—**B. coccinea.** A species found in San Domingo, bearing an edible fruit. [B, 173.]

BROSSARDIÈRE (Fr.), n. Bros-sa^{3}rd-i^2-e^{2}r. A place near Roche-sur-Yon, France, where there is a chalybeate spring. [L, 105.]

BROSSE (Fr.), n. Bros. 1. A brush. [A, 385.] 2. The *Quercus pubescens*. [B, 173.] 3. The cuff-like arrangement of long hairs on the manus of certain of the *Cavicornia*. [L, 41.]—**B. de bruyère.** The *Polytrichum commune*. [B, 173.]—**B. électrique.** A wire-brush electrode. [A, 385.]—**B. électro-médicale.** A box containing a small magneto-electric machine and having the terminals at its bottom. [A, 385.]—**B. médicale.** A brush for applying friction to the skin. [A, 385.]—**B. volta-électrique.** A voltaic pile with the wire of the negative pole divided into a great number of fine points. [A, 385.]

BROSSETTE (Fr.), n. Bros-se^{2}t. See BROSSE (3d def.).

BROSSIÈRE (Fr.), n. n. Bros-si^2-e^{2}r. The *Andropogon ischæmum*. [B, 173.]

BROSSULINUM (Lat.), n. n. Bro^{2}s-su^{2}l(su^{4}l)-i(e)'nu^{3}m(nu^{4}m). In isopathic practice, the purulent secretion of a chancre, used medicinally by friction. [B, 270.]

BROT (Ger.), n. Brot. See BROD.

BROTAN, n. A Bohemian name for the *Artemisia abrotanum*. [L, 105.]

BROTERA (Lat.), n. f. Bro^{2}t'e^{2}r-a^3. Fr., *brotère*. A genus of composite plants of the suborder *Heliantheæ*, tribe *Millerieæ*. [A, 248.]—**B. corymbosa** [Willdenow]. See CARDOPATUM *corymbosum*.

BROTH, n. Bro^{2}th. A.-S., *brodh*. Gr., ζωμός. Lat., *jus*, *jusculum*. Fr., *bouillon*. Ger., *Brühe*. It., *brodo*. Sp., *caldo*. A simple liquid dietetic preparation made by boiling meat.

BROTULINA (Lat.), n. n. pl. Bro^{2}t-u^{2}l(u^{4}l)-i(e)'na^3. A group of the *Ophidiidæ* having ventral fins attached to the humeral arch. [L, 207.]

BROU DE NOIX (Fr.), n. Bru d'nwa^3. See *Viride* NUCIS *putamen* (under NUX).

BROUILLARD (Fr.), n. Bru-el-ya^{3}r. See ACHLYS.

BROUNEEÆ (Lat.), n. f. pl. Brun-e(e^2)'e^2-e(a^3-e^2). Of Reichenbach, a division of the *Mimoseæ* comprising *Brounea* and *Dipteryx*. [B, 170.]

BROUQUICHONS (Fr.), n. Bru-ke-sho^{2}n^2. The *Hydnum auriscalpium*. [B, 173.]

BROUSSAISISM, n. Brus-se^2'i^{2}zm. Fr., *Broussaisisme*. F. J. V. Broussais's physiological doctrine of pathology and therapeutics, in which the importance of irritability, especially of the mucous membrane of the alimentary canal, was a prominent feature. [A, 290, 301.] Cf. BROWNISM.

BROUSSIN (Fr.), n. Brus-sa^{2}n^2. A spherical excrescence of the duramen and alburnum of certain trees. [A, 385.]

BROUSSONETIA (Lat.), n. f. Brus-so^{2}n-e(a)'shi^2(ti^2)-a^3. Fr., *broussonétie*. A genus of moraceous trees distinguished by the globular female inflorescence. [B, 270.]—**B. aurantiaca.** See Bois *d'arc*.—**B. papyrifera** [Ventenat]. Fr., *mûrier à papier* (ou *de la Chine*). The paper-mulberry tree, from the fibrous inner bark of which the Chinese and Japanese make a very strong brownish-white paper, and the South Sea Islanders a very tough cloth (tapa, or kapa, cloth). [B, 19, 75, 173, 180.]—**B. tinctoria.** Fr., *mûrier de Java, fustique, bois jaune* (ou *à pian*). A West Indian and South American species furnishing yellow Brazil-wood. The fruit is used in Jamaica for inflammatory affections of the air-passages. [B, 173, 180.]

BROUT (Fr.), n. Bru. Syn.: *mal de bois*. A disease of ruminants, attributed to their eating the young shoots of trees in spring. [A, 301, 385.]

BROW, n. Bru^5'u. A.-S., *bräv, brûva*. Gr., ὀφρύς. Lat., *supercilium*. Fr., *sourcil*. Ger., *Braue*. It., *sopracciglio*. Sp., *ceja*. The ridge which overhangs the orbit, also the assemblage of hairs on that part; in a wider sense, the whole or either lateral region of the forehead. The term is also sometimes applied to any overhanging ridge, like that of the acetabulum. [A, 301, 322.]—**B'ache.** Supra-orbital neuralgia. [L.]—**B.-ague.** Supra-orbital neuralgia, especially of malarial origin. [L.]—**B.-pang.** See *B'ache*.—**B.-spot.** See *Interocular* GLAND.

BROWALLIA (Lat.), n. f. Bru^5-u-a^{4}l'li^2-a^3. Fr., *browallie*. A genus of scrophulariaceous plants. [L, 49, 102.]—**B. demissa.** A Colombian species. In Caraccas the decoction is used in skin diseases, especially tinea. [B, 173, 180.]

BROWN, adj. Bru^5'un. A.-S., *brûn*. Gr., φαιός. Lat., *fuscus*. Fr., *brun*. Ger., *braun*. It., *bruno*. Sp., *moreno, castaño, bazo*. Of a dark reddish or tawny color inclining to black; as a n.. that color or a substance possessing it.—**Bismarck b.** Triamidoazobenzene. [B.]—**B. gum-tree.** The *Eucalyptus robusta*. [B, 275.]—**B. mint.** The *Mentha viridis*. [B, 275.]—**B'stone.** Manganum oxide. [L, 77.]—**B'wort.** The *Scrophularia aquatica*. [B, 275.]—**Havana b.** An aniline coloring matter obtained by heating aniline blue with aniline nitrate. [B.]—**Phenyl b.** An explosive b. pigment obtained by the action of nitric and sulphuric acids on phenol. [B, 2.]

BROWNEA (Lat.), n. f. Bru^5'un-e^2-a^3. Named after *P. Browne*, the historian of Jamaica. A genus of leguminous plants of the suborder *Mimoseæ*, growing in the northern part of South America and in Central America. [B, 19.]—**B. coccinea** [Jacquin]. A Venezuela tree. In the West Indies the flowers are given to lying-in women, and a decoction of the leaves is used internally and externally for hæmorrhoids. [B, 180.]

BROWNIAN, adj. Bru^5'un-i^2-a^{2}n. Fr., *brownien*. Ger., *Brownisch*. Syn.: *Brunonian*. See *B. movement*.

BROWNISM, n. Bru^5'un-i^{2}zm. Fr., *Brownisme*. A system of pathology and therapeutics founded on a doctrine maintained by John Brown, a Scotch physician of the eighteenth century, who attributed the vital phenomena and the manifestations of disease to the normal or disordered action of a property which he termed incitability. Excessive incitation was held to cause sthenic diseases, and defective incitation asthenic diseases. [A, 273, 301.]

BROYEURS [Lamarck] (Fr.), n. pl. Brwa^3-yu^{6}r. A subclass of insects having jaws suitable for grinding their food. [L, 180.]

BRUCEA (Lat.), n. f. Bru^{2}s'e^2-a^3. Named after Bruce, the Abyssinian explorer. Fr., *brucée*. A genus of simarubaceous shrubs. [B, 19.]—**B. antidysenterica** [Miller], **B. ferruginea** [L'Héritier]. An African species, formerly thought to be a source of false angustura bark and of brucine. The bark and root are used in Abyssinia for dysentery. [B, 173, 180.]—**B. sumatrana** [Roxburgh]. Hind., *aympadoo*. A Sumatra and Cochin-China species, all parts of which are bitter, tonic, febrifuge, vermifuge, and antidysenteric. [B, 88, 180.]—**B. trichotoma.** A variety said to be febrifuge. [L, 105.]

BRUCH (Ger.), n. Bruch^2. A fracture or rupture, also a hernia.—**Beweglicher B.** A reducible hernia. [L, 43.]—**B'arzt.** A surgeon who treats hernias. [E.]—**B'band.** A truss. [E.]—**B'beere.** The *Vaccinium myrtillus*. [A, 315.]—**B'binde.** A bandage for a fracture. [E.]—**B. des eiförmigen Loches.** Hernia of the foramen ovale. [L, 43.]—**B. des Mutterganges.** Vaginal hernia. [A, 355.]—**B. des Nabels.** Umbilical hernia. [L, 135.]—**B'einbringung.** The reduction of a fracture or of a hernia. [E.]—**B'einklemmung.** Strangulation or incarceration of a hernia. [E.]—**B'fläche.** An irregular, broken surface. [K, 13.]—**B'geschwulst.** A hernial tumor. [E.]—**B'kraut.** See the major list.—**B'lade.** See SPLINT.—**B'messer.** A hernia knife. [E.]—**B'operation.** See KELOTOMY.—**B'pforte.** A hernial ring.—**B'sack.** A hernial sac. [L, 57.]—**B'sackhals.** The neck of a hernial sac. [L, 43.]—**B'sackwassersucht.** Dropsy of a hernial sac. [L, 80.]—**B'schiene, B'schindel.** A splint. [A, 450.]—**B'schneider.** See *B'arzt* and *B'messer*.—**B'schnitt.** See KELOTOMY.—**B'stein.** A variety of calcareous spar. [B, 180.]—**B'stück.** See THRAUSMA.—**B'verschiebung.** The reduction of a hernia *en masse*. [E.]—**B'wasser.** The serosity contained in a hernial sac. [Garré, "Fortschr. d. Med.," 1886, No. 15; "Rev. des sci. méd.," Jan., 1887, p. 43.]—**B'wassersucht.** Hydrocele of the tunica vaginalis testis. [L, 133.]—**B'weide.** The *Salix fragilis*. [B.

180.]—**B'wolfswurzel.** The *Sedum telephium.* [B, 180.]—**B'wurzel.** The root of *Aristolochia clematitis.* [B, 180.]—**Brustmagenb'.** Diaphragmatic hernia of the stomach. [L, 80.]—**Dammb'.** Rupture of the perinæum. [L, 135.]—**Eingeklemmter B.** Incarcerated hernia. [L, 43.]—**Krampfaderb'.** See VARICOCELE.—**Littre'scher B.** See HERNIA *inguino-properitonæalis littrica.*—**Nabelb'.** Umbilical hernia. [A, 355.]—**Reil'scher B.** A method of exposing the medullary centre of the cerebellum by gradually opening up the great horizontal fissure; suggested by Reil. [I, 17; K.]—**Schamlefzenb'.** Pudendal hernia. [L, 80.]—**Schenkelb'.** Femoral hernia. [L, 135.]—**Unbeweglicher B.** Irreducible hernia. [L, 43.]—**Zwerchfellb'.** Diaphragmatic hernia. [A, 355.]

BRUCHELÆ (Lat.), n. f. pl. Bru^{2}k(bruch^2)'e^{2}l-e(a^3-e^2). Fr., *bruchèles.* Of Latreille, a tribe of the *Rhyncophora;* of Schoenherr, a group of the *Curculionides.* [L, 180.]

BRUCHIACEÆ (Lat.), n. f. pl. Bruch^2-i^2-a(a^3)'se^2(ke^2)-e(a^3-e^2). Of C. Müller and of Bruch, a tribe of mosses (*Cleistocarpi*), including the genus *Bruchia.* [B, 170.]

BRUCHIDÆ (Lat.), n. f. pl. Bru^{2}k(bruch^2)'i^{2}d-e(a^3-e^2). A family of the *Coleoptera.* [L, 292.]

BRÜCHIGKEIT (Ger.), n. Bru^{6}ch^2'i^{2}g-kit. Fragility.—**B. der Knochen.** See FRAGILITAS *ossium.*

BRUCHKRAUT (Ger.), n. Bruch^2'kra^3-ut. The *Sanicula europæa.* [B, 180.]—**Kahles B.** The *Herniaria glabra.* [B, 180.]—**Rauhes B.** The *Herniaria hirsuta.* [B.]

BRUCHUS (Lat.), n. m. Bru^{2}k(bruch^2)'u^{3}s(u^{4}s). Gr., βροῦχος. An ancient name for a kind of locust, also for a kind of worm which, dried, was used in rabies. [A, 325.]

BRUCIA (Lat.), n. f. Bru^2(bru)'si^2(ki^2)-a^3. See BRUCINE.

BRUCIN (Ger.), n. Bru-tsen'. See BRUCINE.

BRUCINA (Lat.), n. f. Bru^2(bru)-si(ke)'na^3. See BRUCINE.

BRUCINE, n. Bru^2'sen. Lat., *brucina* [Fr. Cod.]. Fr., *brucine* [Fr. Cod.]. Ger., *Brucin.* It., Sp., *brucina.* Syn.: *vomicine, pseudangustine.* A crystalline alkaloid, $C_{23}H_{26}N_2O_4 + 4H_2O$, derived from *Strychnos nux vomica, Strychnos tieuté,* and *Strychnos ignatia;* soluble with difficulty in water, insoluble in ether, readily soluble in alcohol and in chloroform. In composition it acts as a monacid base. The symbol Br is sometimes assigned to it. It has been used as a local anæsthetic. [B, 2, 5, 81, 95, 118, 173, 270; R. W. Zeiss, "Therap. Gaz.," Jan., 1886; "N. Y. Med. Jour.," Jan. 30, 1886, p. 140.]—**Alcool de b.** (Fr.), **Alcoolé de b.** (Fr.). See *Teinture de b.*—**Azotate de b.** (Fr.). See *B. nitrate.*—**B. acetate.** Lat., *brucinæ acetas, acetas brucinæ, brucina acetica.* Fr., *acétate de b.* Ger., *Brucinacetat, essigsaures Brucin.* A crystalline compound of b. and acetic acid, prepared by saturing b. with acetic acid and evaporating. [B, 119, 270.]—**B. hydrochlorate, B. hydrochloride.** Lat., *brucinæ hydrochloras, hydrochloras brucinæ, brucinum hydrochloricum.* Fr., *chlorhydrate de b.* Ger., *Brucinhydrochlorid, salzsaures Brucin.* It., *cloridrato di brucina.* Sp., *clorhidrato de brucina.* A crystalline compound, $(C_{23}H_{26}N_2O_4)$.HCl, readily soluble in water. [B, 119, 270.]—**B. nitrate.** Lat., *brucinæ nitras, brucinum nitricum.* Fr., *azotate* (ou *nitrate*) *de b.* Ger., *Brucinnitrat, salpetersaures Brucin.* It., *nitrato di brucina.* Sp., *nitrato de brucina.* A compound, $C_{23}H_{26}N_2O_4.HNO_3$, forming quadrilateral prismatic crystals. [B, 270.]—**B. sulphate.** Lat., *brucinæ sulphas, sulphas brucinæ, brucinum sulfuricum.* Fr., *sulfate be b.* Ger., *Brucinsulfat, schwefelsaures Brucin.* It., *solfato di brucina.* Sp., *sulfato de brucina.* A compound, $(C_{23}H_{26}N_2O_4)_2.H_2SO_4 + 7H_2O$, forming long acicular crystals; formerly prescribed in several unofficial formularies. [B, 119, 270.]—**Chlorhydrate de b.** (Fr.). See *B. hydrochloride.*—**Teinture de b.** (Fr.). A solution of 1 part of b. in 30 parts of alcohol. [B, 92.]

BRUCINUM, BRUCIUM (Lat.), n's n. Bru^2(bru)-si(ke)'nu^{3}m-(nu^{4}m), bru^2(bru)'si^2(ki^2)-u^{3}m(u^{4}m). See BRUCINE.

BRUCKBAD (Ger.), n. Bruk'ba^{3}d. One of the springs at Ofen (*q. v.*). [L, 57.]

BRÜCKCHEN (Ger.), n. Bru^{6}k'ch^{2}e^{2}n. See PONTICULUS.—**B. der Rautengrube.** See PONTICULUS *sinus rhomboidei.*

BRÜCKE (Ger.), n. Bru^{6}k'e^2. Any bridge-like structure, especially the pons Varolii. [I, 6; K.]—**Basale B'nhälfte.** The basis of the crus cerebri. [I, 17; K.]—**B'narm.** The middle cerebellar peduncle. [I, 6; K.]—**B'nbeuge.** See *B'nkrümmung.*—**B'ncolobom.** See *Bridge*-COLOBOMA.—**B'nfaserstrang.** A bundle of nerve fibres in the medulla oblongata, derived from the pons Varolii. [I, 6; K.]—**B'nhirnstamm.** The crus cerebri. [I, 17; K.]—**B'nkrümmung.** A cephalic flexure of the embryo, on the ventral aspect, at the junction of the epencephalon with the metencephalon, at the point where the pons Varolii is afterward developed. [A, 8; I, 17; K.]—**B'nschenkel.** See *B'narm.*—**B'nstrahlung** [Burdach], **B'nsystem.** The collection of nerve fibres which radiate from or originate in the pons Varolii. [I, 3; K.]—**Varolsb'.** See PONS *Varolii.*—**Ventrale B'nhälfte.** See *Basale B'nhälfte.*

BRÜCKENAU (Ger.), n. Bru^{6}k'e^{2}n-a^3-u. A place in Bavaria, where there are alkaline chalybeate springs. [L, 49.]

BRUCOURT (Fr.), n. Bru^6-kur. A place in the department of Calvados, France, where there are alkaline chalybeate springs. [L, 49.]

BRUDDELN (Ger.), n. Brud'de^{2}ln. See PARAPHRASIA *præceps.*

BRÜDERIG (Ger.), adj. Bru^{6}d'e^{2}r-i^{2}g. See ADELPHOUS.

BRUDERSCHAFT (Ger.), n. Brud'e^{2}r-sha^{3}ft. See ADELPHIA.

BRUENNICHIEÆ (Lat.), n. f. pl. See BRUNNICHIEÆ.

BRUGHEAS (Fr.), n. Bru^{6}g-e^2-a^3. A place in the department of Allier, France, where there is an effervescent alkaline spring. [A, 385; L, 49.]

BRUGMANSIA (Lat.), n. f. Bru^{6}g-ma^{2}n'zi^2(si^2)-a^3. 1. A genus of solanaceous plants now considered as a section of the genus *Datura.* 2. A genus of parasitic plants closely related to *Rafflesia.* [B, 19, 215.]—**B. bicolor.** The *Datura sanguinea.* [B, 173, 180.]—**B. candida, B. suaveolens.** The *Datura arborea.* [B, 173, 180.]

BRUGNON (Fr.), n. Bru^{6}n-yo^{2}n^2. The *Amygdalus persica,* var. *lævis.* [B, 173.]

BRUGUET (Fr.), n. Bru^6-ga. The *Boletus edulis.* [B, 173.]

BRUGUIERA (Lat.), n. f. Brug-i^2-a'ra^3. A genus of East Indian rhizophoraceous trees, including species having an astringent bark. [B, 19.]—**B. cylindrica.** The *Rhizophora cylindrica.* [B, 180.]—**B. Rheedii** [Blum]. A tree of tropical Asia, the bark of which is used like that of *Rhizophora mangle.* [B, 180.]

BRÜHE (Ger.), n. Bru^6'he^2. Broth. [L, 83.]

BRUISE, v. tr. Bru^{2}z. A.-S., *brysan.* To contuse; as a n., a contusion (*q. v.*).—**B'wort.** The *Bellis perennis.* [B, 275.]

BRUISSEMENT (Fr.), n. Bru^6-es-ma^{3}n^2. See *Purring* TREMOR.

BRUIT (Fr.), n. Bru^6-e. Gr., ψόφος. Lat., *strepitus.* Ger., *Geräusch.* It., *strepito.* Sp., *ruido.* A murmur or other sound heard on auscultation. [A, 301.]—**Anæmic b.** See *Anæmic* MURMUR.—**B. amphorique.** See *Amphoric* MURMUR.—**B. artériel.** A murmur heard on auscultation over an artery. [L, 49.]—**B. d'airain.** A variety of intrapleural metallic tinkling. [A, 385.]—**B. de bourdonnement.** A humming or buzzing murmur. [L, 49.]—**B. de caille.** A variety of cardiac sound resembling the call of the quail in rhythm, due mainly to a delayed mitral murmur which precedes the click of the semilunar valves by a very short period. [D, 45.]—**B. de chiquenaude.** An arterial b. resembling the sound made by rubbing one finger briskly against another. [L, 306.]—**B. de clapotement.** A splashing sound produced on percussion or succussion of a large hollow organ or cavity containing both gas and liquid. [A, 385; L, 49.]—**B. de claquement.** See *B. de drapeau.*—**B. de collision.** The sound produced by causing bodies (such as calculi) to strike against each other. [A, 385.]—**B. de craquement.** A crackling sound. [A, 385.]—**B. de cuir neuf.** A creaking sound like that produced by rubbing two pieces of sole-leather together. [A, 385; D, 63.]—**B. de décollement placentaire.** Caillaut's term for a crackling sound heard, according to him, on auscultation of the hypogastrium at the time when the uterus contracts upon the placenta after the expulsion of the fœtus; due, he supposes, to the separation of the placenta from the uterine wall. [A, 15.]—**B. de diable.** The venous hum (*q. v.*) of anæmia, so called from its resemblance to the sound produced by the toy called *diable;* also the subjective tinnitus of chlorotic patients and a humming hallucination of hearing in the insane. [A, 301; F.]—**B. de drapeau.** A flapping sound produced in the chest or in the upper air-passages by the air striking against partially detached membrane or a polypus. [A, 321.]—**B. de froissement.** See *B. de frottement.*—**B. de frôlement.** A soft variety of friction sound. [A, 321.]—**B. de frottement.** A friction sound caused by the friction of the blood upon the walls of the heart. [L, 306.]—**B. de galop** [Potain]. A triple sound heard during one cardiac revolution, more or less resembling that of a galloping horse. [Lépine, "Lyon méd.," Aug. 20, 1882, p. 541 (D).]—**B. de gargouillement.** A gurgling sound. [D, 74.]—**B. de glou-glou pleural.** A gurgling sound like that produced by pouring liquid from a bottle; heard in certain cases of pneumothorax when the patient executes alternate movements of flexion and extension of the trunk. [Variot, "Rev. de méd.," May, 1882, p. 424 (D).]—**B. de lime.** A filing cardiac murmur. [A, 321.]—**B. de lime à bois** [Laennec]. A rasping sound. [L, 305.]—**B. de miaulement.** A sound like the mewing of a kitten. [L, 306.]—**B. de mouche.** See *Venous* HUM.—**B. de moulin.** The water-wheel sound; a splashing or gurgling, of a metallic character, sometimes heard in connection with pericardial friction sounds. [D, 47.]—**B. de parchemin.** A variety of fricton sound resembling the crackling of parchment. [A, 321.]—**B. de piaulement.** A heart murmur that has been likened to the sound made by a pigeon, a duck, or a young chicken. [L, 306.]—**B. de pot fêlé.** See *Cracked-pot* SOUND.—**B. de raclement.** A scraping sound. [A, 321.]—**B. de râpe.** A rasping sound. [A, 321; D.]—**B. de rappel.** A rolling sound of the heart, fancied to resemble that of the drum-call to arms; due to a delayed mitral murmur occupying more than half the duration of the systole. [D, 45.]—**B. de roue hydraulique.** See *B. de moulin.*—**B. de rouet.** A murmur resembling a prolonged *r*-sound. [L, 306.]—**B. de roulement.** See *B. de bourdonnement.*—**B. des bronches.** See *Bronchial* RESPIRATION.—**B. de scie.** A sawing sound. [D, 62.]—**B. de sifflement.** A whistling sound. [L, 306.]—**B. de souffle.** A blowing sound, like that produced by blowing across the mouth of a bottle.—**B. de souffle à double courant** (ou **continu**). A double murmur in which the first sound is loud like that of a forge-bellows, and the second, immediately following, like the cooing of a dove or sometimes like the whistling of wind through a key-hole. [L, 305.]—**B. de souffle ordinaire et intermittent.** A pathological arterial b. resembling the uterine souffle. [L, 306.]—**B. de soufflet.** See *Bellows* SOUND.—**B. de soufflet à double courant.** See *B. de souffle à double courant.*—**B. de soufflet sibilant** [Laennec]. An arterial murmur resembling the whistling of wind through a key-hole. [L, 306.]—**B. de soupape.** See *B. de drapeau.*—**B. de susurrus.** A soft blowing sound heard in a vein in cases of communication of the vein with an artery. [A, 385.]—**B. de taffetas.** See *B. de frôlement.*—**B. de tiraillement.** See *B. de cuir neuf.*—**B. de tremblement.** See *B. de drapeau.*—**B. d'étrille.** A sound resembling that made with a curry-comb. [A, 438.]—**B. de va et vient.** A to-and-fro friction sound.—**B. humorique.** An auscultatory or percussion sound heard over a cavity (*e. g.,* the pleural) containing both liquid and gas. [A, 385.]—**B. hydatique.** See *Hydatid* THRILL.—**B. hydroaérique, B. hydropneumatique.** See *B. humorique.*—**B. inférieur.** The first sound of the heart. [L, 306.]—**B. métallique.** Metallic tinkling. [A, 321.]—

B. musculaire. The sound heard on auscultation of a contracting muscle ; also, from its supposed muscular character, the first sound of the heart. [K ; L, 49.]—**B. musical.** A musical murmur. [L, 49.]—**B. péricardiaque.** A pericarditic friction sound. [L, 49.]—**B. placentaire.** See *Uterine* SOUFFLE.—**B. respiratoire.** See *Respiratory* MURMUR.—**B. rotatoire.** See *B. musculaire.*—**B. sec de la caisse.** A sound likened by Deleau to the pattering of rain on foliage, heard when a Eustachian catheter is passed into the healthy middle ear. [A. Lucae (A, 319).]—**B. skodique.** A tympanitic percussion sound heard at the apex of the lung in certain cases of pneumonia and especially of pleurisy with effusion, resulting from compression of the lung upward and forward ; so called after Skoda, an Austrian physician. [A, 321.]—**B. supérieur.** The second sound of the heart. [L, 306.]—**B. tympanique.** A tympanitic percussion sound. [A, 321.]—**B. veineux.** A b. heard on auscultation over a vein. [L, 49.]—**B. vésiculaire.** Vesicular respiration. [J.]—**Paradox b.** [Paul]. A systolic murmur so prolonged as to appear to be followed by a diastolic murmur. [D, 45.]—**Placental b.** See *Uterine* SOUFFLE.

BRUJA (Sp.), n. Bru'ha^3. The *Bryophyllum calycinum.* [J. M. Maisch, "Am. Jour. of Pharm.," Mar., 1886, p. 122.]

BRÛLANT (Fr.), adj. Bru^{6}l-a^{3}n^2. Stinging, burning ; in botany, provided with stinging thorns or setæ. [L, 41, 180.]

BRÛLÉ (Fr.), adj. Bru^{6}l-a. In chemistry, an old term for burned or oxidized ; as a zoological species name, of a black or blackish color. [L, 41, 100.]

BRÛLE-QUEUE (Fr.), n. Bru^{6}l-ku^6. Ger., *Schwantzglüheisen.* A ring-shaped cautery-iron used for stopping the hæmorrhage after the amputation of a horse's tail. [L, 32.]

BRÛLURE (Fr.), n. Bru^{6}l-u^{6}r. A burn. [L, 49.]

BRUMADUNDOO [Tamil], n. The *Argemone mexicana.* [B, 172.]

BRUMALIS (Lat.), adj. Brum-a(a^3)'li^{2}s. From *bruma*, midwinter. Fr., *brumal.* Wintry ; as a n., in the pl., *brumales*, plants that flower in the winter. [L, 41, 102.]

BRUMASAR, n. An alchemical name for silver and gold. [A, 325.]

BRUMATI TERREUM, n. An alchemical name for a glass vessel. [Ruland (A, 325).]

BRUMMEN (Ger.), n. Brum'me^{2}n. A buzzing or humming murmur. [L, 230.]

BRUNELLA (Lat.), n. f. Brun-e^{2}l'la^3. Fr., *brunelle.* See PRUNELLA.—**Herba brunellæ, Herba brunellæ vulgaris.** The herb of *Prunella vulgaris.* [B, 180.]

BRUNELLENSTEIN (Ger.), n. Brun-e^{2}l'le^{2}n-stin. See *Sal* PRUNELLÆ.

BRUNETTE (Fr.), n. Bru^{6}n-e^{2}t. See PRUNELLA.

BRUNFELSIA (Lat.), n. f. Brun-fe^{2}ls'i^2-a^3. Named after *O. Brunfels*, a botanist of Metz. Fr., *brunfelsie.* A genus of scrophulariaceous plants. [B, 19.]—**B. americana.** Fr., *brunfelsie d'Amérique.* A species from the fruit of which a syrup is made in the West Indies for use as a tonic during convalescence from diarrhœal diseases. [L, 49.]—**B. uniflora** [Don]. The *mercurio vegetal* of Brazil, where it is used as a purgative, emetic, emmenagogue, and antisyphilitic. [A, 385 ; L, 49.]

BRUNFELSIEÆ (Lat.), n. f. pl. Brun-fe^{2}ls-i(i^2)'e^2-e(a^3-e^2). Of Reichenbach, a section of the *Caprariaceæ* (*Solanaceæ, Atropaceæ* [Miers]), comprising *Duboisia, Anthoceris*, etc. [B, 170.]

BRUNIACEÆ (Lat.), n. f. pl. Brun-i^2-a(a^3)'se^2(ke^2)-e(a^3-e^2). From *Brunia*, the typical genus. Fr., *bruniacées.* Of R. Brown and others, an order of plants of the series *Calycifloræ*, cohort *Rosales*, closely related to the *Hamamelideæ.* [B, 19, 42, 75.]

BRUNIACEOUS, adj. Brun-i^2-a'shu^{3}s. Lat., *bruniaceus.* Fr., *bruniacé.* Of or pertaining to the *Bruniaceæ.* [B.]

BRUNITSCHE (Ger.), n. Brun'i^{2}ch-e^2. The *Rubus saxatilis.* [L, 46.]

BRUNNEN (Ger.), n. Brun'ne^{2}n. A spring, well, or fountain. [A, 450.]—**B'cur.** See *B'kur.*—**B'faden.** The *Crenothrix kühniana.* [B, 237.]—**B'kresse.** See the major list.—**B'kress-Rautenkraut.** The herb of *Nasturtium officinale.* [B, 180.]—**B'kur.** A course of treatment with mineral waters. [L, 46.]—**B'leberkraut.** The *Marchantia polymorpha.* [B, 180.]—**B'wasser.** Spring-water. [L, 43.]

BRUNNENKRESSE (Ger.), n. Brun'ne^{2}n-kre^{2}s-se^2. The water-cress (*Nasturtium officinale*). [B, 270.]—**Gebräuchliche B.** See *B.*—**Indische B.** The *Nasturtium indicum.* [B, 180.]—**Verschiedenblättrige B.** The *Nasturtium amphibium.* [B, 180.]—**Wilde B.** The *Nasturtium silvestre.* [B, 180.]

BRUNNEUS (Lat.), adj. Bru^{3}n(bru^{4}n)'ne^2-u^{3}s(u^{4}s). Of a deep brown. [B, 19.]

BRUNNIBARBIS (Lat.), adj. Bru^{3}n(bru^{4}n)-ni^2-ba^{3}rb'i^{2}s. Fr., *brunnibarbe.* In zoology, having a brown beard. [L. 180.]

BRUNNICHEÆ [Lindley]. **BRÜNNICHEÆ, BRUNNICHIEÆ** [Meissner], **BRÜNNICHIEÆ** (Lat.). n's f. pl. Brun-ni^{2}ch^2'e^2-e(a^3-e^2), bru^{6}n-ni^{2}ch^2'e^2-e(a^3-e^2), -ni^{2}ch^2-i(i^2)'e^2-e(a^3-e^2). A suborder of polygonaceous plants, comprising *Brünnichia* and another genus. [B, 170, 214.]

BRUNNICORNIS (Lat.), adj. Bru^{3}n(bru^{4}n)-ni^2-ko^{2}rn'i^{2}s. Fr., *brunnicorne.* Having brown antennæ. [L, 109.]

BRUNNIPES (Lat.), adj. Bru^{3}n(bru^{4}n)'ni^2-pez(pas). Fr., *brunnipède.* Having brown feet. [L, 109, 180.]

BRUNNISQUAMIS (Lat.), adj. Bru^{3}n(bru^{4}n)-ni^2-skwa(skwa^3)'-mi^{2}s. Fr., *brunnisquame.* Having brown scales. [L, 109.]

BRUNNTHAL (Ger.), n. Brun'ta^{3}l. A place near Munich, where there are bathing and diet-cure establishments. [A, 319.]

BRUNOLIC ACID, n. Brun-o^{2}l'i^{2}k. Fr., *acide brunolique.* An acid of uncertain constitution derived from coal-tar. [A, 385 ; L, 49.]

BRUNONIACEÆ (Lat.), n. f. pl. Brun-on-i^2-a(a^3)'se^2(ke^2)-e(a^3-e^2). From the genus *Brunonia* (named after *R. Brown*). Of R. Brown and Lindley, an order of gamopetalous dicotyledons, closely related to the *Goodeniaceæ*, including the single genus *Brunonia* ; of Reichenbach, a division of the *Plumbagineæ.* [B, 19, 170.]

BRUNONIACEOUS, adj. Brun-on-i^2-a'shu^{3}s. Lat., *brunoniaceus.* Of or pertaining to the *Brunoniaceæ.* [B.]

BRUNONIADS, n. pl. Brun-on'i^2-a^{2}dz. See BRUNONIACEÆ.

BRUNONIAL, adj. Brun-on'i^2-a^{2}l. Lat., *brunonialis.* Belonging to the *Brunoniales.* [B.]—**B. alliance.** See BRUNONIALES.

BRUNONIALES (Lat.), n. f. pl. Brun-on-i^2-a(a^3)'lez(le^{2}s). Of Lindley, an alliance of the *Aggregatæ*, comprising the single order *Brunoniaceæ.* [B, 170.]

BRUNONIAN, adj. Brun-on'i^2-a^{2}n. See BROWNIAN.

BRUNONIANISM, n. Brun-on'i^2-a^{2}n-i^{2}zm. See BROWNISM.

BRUNONIEÆ (Lat.), n. f. pl. Brun-on-i(i^2)'e^2-e(a^3-e^2). Of G. Don, a tribe of the *Goodenoviæ* ; of Reichenbach, the *Brunoniaceæ* of R. Brown. [B, 170.]

BRUNST (Ger.), n. Brunst. The rut of animals ; in botany, the *Elaphomyces granulatus.* [B, 270 ; L, 135.]—**B'ig.** Rutting. [L, 46.]—**B'pulver.** A powder of equal parts of cinnamon and *Elaphomyces granulatus* (the *boletus cervinus* of the pharmacists), formerly used in medicine. [B, 270.]—**B'zeit.** The rutting season. [L, 80.]

BRUNSVIGIA (Lat.), n. f. Bruns-vi^{2}g'i^2-a^3. Fr., *brunsvigie.* See BRUNSWIGIA.

BRUNSWIGIA (Lat.), n. f. Bruns-vi^{2}g'i^2-a^3. Fr., *brunsvigie.* A genus of poisonous amaryllideous plants of the Cape of Good Hope. [A, 385.]—**B. toxicaria** [Ker]. The *Hæmanthus toxicarius.* [B, 180.]

BRUNUS, n. An alchemical name for erysipelas. [Ruland (A, 325).]

BRUQUET (Fr.), n. Bru^6-ka. The *Boletus edulis.* [B, 105.]

BRUSCANDULA (It.), n. Brus-ka^{3}n'du-la^2. The *Humulus lupulus*, also the genus *Lupinus.* [L, 94, 105.]

BRUSCHWURZ (Ger.), n. Brush'vurtz. The *Ruscus aculeatus.* [B, 180.]

BRUSCUS (Lat.), n. m. Bru^{3}s(bru^{4}s)'ku^{3}s(ku^{4}s). The *Ruscus aculeatus.* [B, 180.]

BRUSE (Fr.), n. Bru^{6}z. The *Ruscus aculeatus* and the *Ulex compositus.* [B, 173.]—**Jean b.** The *Ulex compositus.* [B, 173.]

BRUSH, n. Bru^{3}sh. Lat., *penicillus, peniculus.* Fr., *brosse.* Ger., *Bürste, Borstenpinsel.* A collection of bristles or other similar shaft-like objects properly set in the form of an implement for rubbing articles or for applying liquids.—**Acid-b.** A b. made of fine threads of glass, used for applying acids.—**B.-shaped.** Lat., *aspergilliformis.* Slender and terminating in a tuft of long hairs. [B, 19.]—**Croup-b.** A b. for removing false membrane from the larynx and trachea. A form described by Sir M. Mackenzie is made of a piece of squirrel's tail attached, with the hairs running upward, to a curved handle of thick wire. [A, 418.]—**Electric b., Faradaic b.** Fr., *brosse électrique.* A wire b. to be used as an electrode.—**Laryngeal b.** A b. of soft hair, cut square or pointed, attached to a handle bent at a right angle near the armed end ; used for applying solutions within the larynx. [A, 418.]—**Metallic b.** See *Faradaic b.*—**Pharyngeal b.** A camel's-hair pencil attached to a straight handle ; used for making applications to the pharynx. [A, 418.]—**Stomach-b.** Lat., *excutia ventriculi.* A b. to be passed through the œsophagus into the stomach, to stimulate the stomach and assist the discharge of viscid mucus. [L, 97.]—**Terminal b.** See *Motor* END-PLATE.

BRUSHING, n. Bru^{3}sh'i^{2}ng. An injury of a horse's fetlock by its being struck by the shoe of the opposite foot. [L, 297.]

BRUSKEN (Ger.), **BRUSKENKRAUT** (Ger.), n's. Brusk'e^{2}n, -e^{2}n-kra^3-ut. The *Ruscus aculeatus.* [B, 180.]

BRUST (Ger.), n. Brust. See BREAST.—**B'abscess.** A mammary abscess. [L. 135.]—**B'aland, B'alant.** The *Inula Helenium.* [B, 180 ; L, 77, 105.]—**B'angst.** Angina pectoris. [L, 80.]—**B'aorta, B'aorte.** The thoracic aorta. [L, 43.]—**B'armbeinmuskel.** See the major list.—**B'arznei.** A pectoral remedy. [L, 46.]—**B'auswurf.** See SPUTUM.—**B'bauchflösser.** Fishes with both pectoral and ventral fins. [L, 80.]—**B'beengung.** See ANGINA PECTORIS.—**B'beerbaum, B'beeren.** See the major list.—**B'beerenbaum.** See BRUSTBEERBAUM.—**B'beerlein.** The fruit of *Cordia myxa.* [B, 180.]—**B'bein.** See the major list.—**B'beklemmung.** A sense of oppression in the chest. [L, 80.]—**B'beweglichkeit.** The mobility of the thoracic wall, the extent to which the thorax expands on forced inspiration. [Knauthe (A, 319).]—**B'blatt.** See STERNUM.—**B'blutadern.** The mammary veins. [L, 43.]—**B'bonbons.** See *Pectoral* BONBONS.—**B'bräune.** See ANGINA *pectoris.*—**B'bruch.** See PNEUMATOCELE.—**B'buckel.** See LORDOSIS.—**B'canal.** The thoracic duct. [L, 80.]—**B'drüse.** See the major list.—**B'eingeweide.** The thoracic viscera. [L, 80.]—**B'eitersack.** Encysted empyema. [L, 80.]—**B'eitersucht.** Empyema. [L, 80.]—**B'elixir.** See *Elixir e succo* LIQUIRITIÆ.—**B'entzündung.** Pneumonia. [L, 80.]—**B'erforschung.** An examination of the chest. [A, 317.]—**B'eröffnung.** Paracentesis of the thorax. [L, 135.]—**B'federn.** Pectoral feathers. [L, 43.]—**B'fell.** The pleura. [L, 43.]—**B'fellabscess.** Empyema. [L, 80.]—**B'fellausfluss.** Pleuritic effusion. [L, 50.]—**B'fellbruch.**

See Pleurocele.—**B'fellentzündung.** Pleurisy. [L, 80.]—**B'-fellgallenblasenentzündung.** See Pleuro-cholecystitis.—**B'fellsack.** The pleural sac. [L, 43.]—**B'fellwassersucht.** Hydrothorax. [L, 80.]—**B'fieber.** Pneumonia. [L, 80.]—**B'finne.** See *B'flosse*.—**B'flechte.** See the major list.—**B'flosse.** A pectoral fin. [L, 43.]—**B'flossenstrahlen.** The rays of the pectoral fins of fishes. [Meckel, Wagner (L, 14).]—**B'flösser.** See Thoracici.—**B'förmig.** See Mastoid.—**B'gang.** The thoracic duct. [L, 43.]—**B'geburt.** Parturition with the fœtus presenting by the chest. [L, 135.]—**B'geflechte.** The nervous plexuses within the chest. [L, 304.]—**B'gegend.** The mammary or thoracic region. [A, 317.]—**B'genitalien.** The mammary glands. —**B'gewölbe.** The osseous thorax. [L, 80.]—**B'gicht.** Gout in the chest. [L, 80.]—**B'glas.** A breast-pump or a nipple-shield made of glass. [A, 317; L, 30.]—**B'glied.** A pectoral limb. [L, 43.]—**B'gürtel.** A girdle or bandage for the chest. [L, 80.]—**B'harnisch.** A corset. [A, 322; L, 80.]—**B'haut.** The pleura. [L, 80.]—**B'hautmuskel.** See Cutaneus *maximus*.—**B'hautvenen.** The mediastinal veins. [L, 80.]—**B'höhle.** The thoracic cavity. [L, 43.]—**B'höhlenhaut.** The pleura. [L, 30.]—**B'höhlenwände.** The walls of the chest. [L, 43.]—**B'höhlenwassersucht.** Hydrothorax. [L, 80.]—**B'horcher.** A stethoscope. [L, 43.]—**B'husten.** Cough depending on thoracic disease. [L, 80.]—**B'hütchen.** A nipple-shield. [L, 30.]—**B'kasten.** The thorax. [L.]—**B'katarrh.** Pulmonary catarrh. [L, 80.]—**B'kehlbeinmäuslein.** The sterno-hyoid muscle. [L, 80.]—**B'kinnladenmuskel.** See Sterno-maxillaris.—**B'klemme.** Angina pectoris. [L, 50.]—**B'klopfen.** Palpitation within the chest. [L, 80.]—**B'knochen.** The sternum. [A, 317.]—**B'knochenwarzenmuskel.** The sterno-cleido-mastoid muscle. [L, 80.]—**B'knorpel.** See the major list.—**B'knoten.** A thoracic ganglion (nervous or lymphatic). [L.]—**B'korb.** The thorax. [L, 80.]—**B'körper.** The osseous thorax. [L, 80.]—**B'krampf.** Asthma. [L, 135.]—**B'kraut.** The *Stellaria holostea*. [B, 180.]—**B'kräuter.** See Species *pectoralis* and *Herba* galeopsidis *grandifloræ*. —**B'krebs.** Cancer of the breast. [E.]—**B'kuchen, B'küchelchen, B'küchlein, B'kügelchen.** See Trochisci *pectorales*.—**B'lage.** A thoracic presentation of the fœtus.—**B'lattich.** The *Tussilago farfara*. [B, 270.]—**B'latwerge.** A pectoral electuary. [L, 30.]—**B'lehne.** A chest-support attached to a school-child's desk, to prevent stooping. [Reuss (A, 319).]—**B'lein.** The *Fragaria collina*. [L, 80.]—**B'luftwurzel.** The *Archangelica officinalis*. [L, 80.]—**B'magenbruch.** Diaphragmatic hernia of the stomach. [L, 80.]—**B'mark.** The dorsal (lit., the thoracic) portion of the spinal cord. [I, 5; K.]—**B'masern.** Measles with prominent pulmonary symptoms. [L, 50.]—**B'mäuslein.** A pectoral muscle. [L, 80.]—**B'messer.** A stethometer.—**B'messung.** Stethometry. [L, 57.]—**B'milch.** Breast-milk, also a pectoral emulsion. [L, 46, 80.]—**B'milchader.** The thoracic duct. [L, 80.]—**B'mittel.** A pectoral remedy, also the mediastinum. [L, 30, 43.]—**B'muskel.** See the major list.—**B'organe.** The thoracic viscera. [L, 43.]—**B'panzer.** A corset. [A, 322; L, 80.]—**B'pflaster.** A plaster for the chest. [L, 80.]—**B'pillen.** Pectoral pills. [A, 450.]—**B'pressung.** The operation of crushing the fœtal thorax. [A, 88, 112.]—**B'puls.** The impulse of the heart felt through the chest-wall. [L, 50.]—**B'pulsader.** See Brustschlagader.—**B'pulver.** A pectoral powder. [B, 81; L, 30.] See Pulvis *pectoralis*, *Pulvis* liquiritiæ *compositus*, and *Pulvis* glycyrrhizæ *compositus*.—**B'pumpe.** A breast-pump. [L, 80.]—**B'raum.** The thoracic cavity or space. [A, 317.]—**B'reden.** Pectoriloquy. [L, 46.]—**B'rednerisch.** Pectoriloquial. [L, 46.]—**B'reinigend.** Expectorant. [A, 450.]—**B'reinigung.** Expectoration. [A, 450.] —**B'reinigungsmittel.** An expectorant remedy. [A, 317.]—**B'rippenmuskeln.** The sterno-costal muscles. [L, 80.]—**B'röhre.** The thoracic duct, also a lactiferous duct. [L, 80.]—**B'saft.** A pectoral syrup or linctus. [A, 450; L, 43.]—**B'saugespritze.** A breast-pump. [L, 135.]—**B'scheidewand.** The mediastinum. [L, 80.]—**B'schild.** A breast-plate, a corselet. [L, 43.]—**B'schildmuskel.** The sterno-thyreoid muscle. [A, 317.]—**B'schlagader.** See the major list.—**B'schlüsselbeinzitzenfortsatzmuskel.** The sterno-cleido-mastoid muscle. [L, 43.]—**B'schmerz.** Pleurodynia. [L, 50.]—**B'schnitt.** An incision into the thoracic cavity. —**B'schnupfen.** Bronchial catarrh. [A, 317.]—**B'schülpen.** See Thoracocymechos.—**B'schulterblattschlagader.** The acromio-thoracic artery. [L, 115.]—**B'schwamm.** Fungous disease of the breast. [L, 43.]—**B'seuche.** The pulmonary phthisis of the horse. ["Arch. f. path. Anat. u. Physiol. u. f. klin. Med.," cvii, 2, p. 356.]—**B'späher.** A stethoscope. [A, 317.]—**B'spielraum.** See *B'beweglichkeit*.—**B'sprache.** Pectoriloquy. [L, 43.]—**B'steckung.** Asthmatic orthopnœa. [L, 80.]—**B'stich.** Paracentesis of the chest; in the pl., *B'stiche*, spasms in the chest. [E; L, 46.]—**B'stimme.** Pectoriloquy. [A, 317.]—**B'stück.** A breast-plate, a corselet. [A, 450.]—**B'syrup.** A pectoral syrup. [L, 43.] —**B'thee.** See the major list.—**B'theil.** See *B'mark*.—**B'trank.** A pectoral drink. [A, 450.]—**B'tropfen.** Pectoral drops. [A, 450.] —**B'umfang.** The circumference of the chest. [L, 57.]—**B'umschlag.** A poultice for the chest. [L, 57.]—**B.- und Zungenknochenmuskel.** The sterno-hyoid muscle. [L.]—**B'untersuchung.** An examination of the chest. [A, 317.]—**B'venen.** The mammary veins. [L, 43.]—**B'verschleimung.** Secretion of mucus in the lungs. [L, 30.]—**B'vollblütigkeit.** Thoracic congestion. [L, 80.]—**B'wand.** The chest-wall. [L, 43.]—**B'wandlungenbruch.** A hernial protrusion of the lung between the ribs. [L, 50.]—**B'warze.** The nipple. [A, 450.]—**B'warzendeckel.** A nipple-shield. [L, 80.]—**B'warzendistel.** See the major list.—**B'warzenentzündung.** Inflammation of the nipple. [L, 50.]—**B'warzenhütchen.** See *B'warzendeckel*.—**B'warzenkreis, B'warzenkreisring.** The areola of the nipple. [L, 43.]—**B'warzenmangel.** Absence of the nipple, athelasmus. [L, 50.]—**B'warzenschmerz.** Pain in the nipple, mastodynia papillaris. [L, 80.]—**B'warzenüberzahl, B'warzenvermehrung.** A superfluity of nipples. [A, 317.]—**B'wasser.** The watery effusion of pleurisy. [L, 46.]—**B'wassersucht.** Hydrothorax. [L, 30.]—**B'weh.** Pain in the chest. [A, 317.]—**B'windsucht.** Pneumothorax. [L, 30.] —**B'wirbel, B'wirbelbein.** A thoracic (dorsal) vertebra. [L, 43, 80, 115.]—**B'wurz, B'wurzel.** The *Archangelica officinalis*. [B, 180.]—**B'zerscheller.** See Stethothlastes.—**B'zittern.** Thoracic fremitus. [L, 50.]—**B'zungenbeinmuskel, B'zungenknochenmuskel.** The sterno-hyoid muscle. [L, 30, 43, 80.]—**Hängeb'.** A pendulous breast. [A, 322.]—**Schnürb'.** A corset. [L, 50.]—**Ueberzählige Brüste.** Supernumerary breasts. [L, 115.]

BRUSTARMBEINMUSKEL (Ger.), n. Brust-a^{3}rm'bin-musk-e^{2}l. A pectoral muscle. [A, 314.]—**Grosser B.** See Pectoralis *profundus*.—**Kleiner B.** See Pectoralis *superficialis*.

BRUSTBEERBAUM (Ger.), n. Brust'bar-ba^3-um. The *Zizyphus vulgaris*. [B.]—**Schwarzer B.**—The *Cordia myxa*. [B, 180.]

BRUSTBEEREN (Ger.), n. pl. Brust'bar-e^{2}n. Jujube-berries; the fruit of *Zizyphus vulgaris*. [B, 81, 180, 270.]—**B'baum.** See Brustbeerbaum.—**Grosse B.** See Jujubæ *gallicæ*.—**Italienische B.** See Jujubæ *italicæ*.—**Rothe B.** See *B*.—**Schwarze B.** The fruit of *Cordia myxa*. [B, 180.]—**Spanische B.** See Jujubæ *gallicæ*.

BRUSTBEIN (Ger.), n. Brust'bin. See Sternum.—**B'förmig.** See Sternodes.—**B'handgriff.** See Manubrium *sterni*.—**B'kiefermuskel.** See Sterno-maxillaris.—**B'muskel.** See Triangularis *sterni*.—**B'rippen-.** In comp., sterno-costal. [L, 43.]—**B'schild-, B'schildknorpel-.** In comp., sterno-thyreoid. [L, 43.]—**B'schlüsselbein-.** In comp., sterno-clavicular. [L, 80.]—**B'schultermuskel.** See Pectoralis *profundus*.—**B'spalte.** See Fissura *sterni*.—**B'warzenmuskel.** The sterno-cleido-mastoid muscle. [L.]—**B'zungenbeinmuskel.** The sterno-hyoid muscle. [A, 317.]—**Erstes B.** The manubrium of the sternum. [L.]—**Mittleres B.** The gladiolus of the sternum. [L.]—**Oberes B.** See *Erstes B*.—**Schwertfortsatz (oder Schwertknorpel) am B.** The ensiform cartilage or process. [L, 115.]

BRUSTDRÜSE (Ger.), n. Brust'dru^{6}s-e^2. The mammary gland, also the thymus gland. [L, 80, 115.]—**B'nabscess.** A mammary abscess.—**B'narterien.** See *Anterior mediastinal* arteries.—**B'nentzündung.** See Mastitis and Thymitis.—**B'nlappen.** The lobes of the thymus gland. [L, 80.]—**B'nschmerz.** See Mastodynia.—**B'nverhärtung.** Scirrhus of the breast. [L, 135.]—**Grosse innere B., Innere B.** The thymus gland. [L, 115.]

BRUSTFLECHTE (Ger.), n. Brust'fle^{2}ch^{2}t-e^2. The genus *Thelotrema*. [B, 180.]—**Krugförmige B.** The *Thelotrema urceolare*. [B, 180.]—**Vielfrüchtige B.** The *Thelotrema myriocarpum*. [B, 180.]

BRUSTIAIRE (Fr.), n. Bru^{6}st-i^2-a^{2}r. The *Aphyllantes joncea*. [B, 173.]

BRUSTKNORPEL (Ger.), n. Brust'kno^{2}rp-e^{2}l. A costal cartilage. [L, 46.]—**Schwertförmiger B.** The ensiform cartilage. [L, 46.]

BRUSTMUSKEL (Ger.), n. Brust'musk-e^{2}l. A pectoral muscle. [L, 80.]—**Dreieckiger B.** The triangularis sterni muscle. [L, 30.]—**Grosser B.** See Pectoralis *major*.—**Kleiner B.** See Pectoralis *minor*.

BRUSTSCHLAGADER (Ger.), n. Brust'schla^{3}g-a^{3}d-e^{2}r. A mammary or thoracic artery. [L, 115.]—**Aeussere B.** The external mammary artery. [L, 115.]—**Innere B.** The internal mammary artery. [L, 115.]—**Lange B.** See *Aeussere B*.—**Oberste B.** The short thoracic artery. [L, 115.]

BRUSTTHEE (Ger.), n. Brust'ta. A pectoral tea. [B.] See Species *pectoralis*.—**B. mit Früchten.** See Species *pectoralis cum fructibus*.—**B. ohne Früchte, Gewöhnlicher B.** See Species *pectoralis*.

BRUSTWARZENDISTEL (Ger.), n. Brust'va^{3}rtz-e^{2}n-di^{2}st-e^{2}l. The genus *Mamillaria*. [B, 180.]—**Gemeine B.** The *Mamillaria simplex*. [B, 180.]

BRUSZNO, n. A place in Hungary, where there are warm alkaline springs containing sulphates. [A, 385.]

BRUT (Fr.), adj. Bru^{6}t. Crude, rough; as a n., champagne that has not been sweetened. See also Brutus.

BRUT (Ger.), n. Brut. A brood. [L.]—**B'becher.** See *Brood*-capsule.—**B'becherchen.** In botany, a scyphulus, also a cyphella. [B, 123.]—**B'häufchen.** The soredium of a lichen. [B, 123.]—**B'kapsel.** See *Brood*-capsule.—**B'knöspchen.** See Gemmula *prolifica*.—**B'knospe, B'korn.** See Propago.—**B'machend.** Prolific. [B, 123.]—**B'organ.** Of Barkow, an arterial plexus on the abdomen of birds which becomes much enlarged during incubation. [L, 14.]—**B'polster.** See Pulvinulus.—**B'raum.** See *Brood*-capsule.—**B'schicht, B'schichte.** See Stratum *gonimicum*.—**B'tragend.** See Prolifer.—**B'zelle.** See Gonidium.—**B'zellig.** See Gonimicus.—**B'zwiebel.** See Bulbulus.—**Zwiebelb'.** See *Proles* bulbi.

BRUTA (Lat.), n., f. of adj. *brutus* (*q. v.*). Brut'a^3. An old term for a celestial influence manifested in the instincts of brute animals. [Ruland (A, 325).]

BRUTA (Lat.), n., n. pl. of adj. *brutus* (*q. v.*). Brut'a^3. Fr., *brutes*. Of Blumenbach, a family of the *Digitata*, comprising those having no incisor teeth; of De Blainville, an order of the *Monodelphia*, characterized by the invariable lack of median incisor teeth and the frequent absence of all incisors, divided into the *Bradypodidæ* and the *Dasypodidæ*; of Owen, the same as of De Blainville with the addition of the *Edentula*. [B, 48; L, 14, 147.]

BRÜTEN (Ger.), n. Bru^{6}t'e^{2}n. Incubation. [A, 450.]

BRÜTEZEIT (Ger.), n. Bru^{6}t'e^2-tzit. The period of incubation or of gestation. [L, 43, 135.]

BRUTIA PIX (Lat.), n. f. See Bruttia pix.

BRÜTIG (Ger.), adj. Bru^{6}t'i^{2}g. Addled. [L, 46.]

BRUTINO, n. Turpentine. [L, 104, 119.]

BRUTOBON, n. A barbarous name for an ancient Grecian ointment, the composition of which is unknown. [J. H. Velschius (A, 325).]

BRÜTOFEN (Ger.), n. Bru^{6}t′of-e^{2}n. An incubating oven. [H. Sahli, "Illustr. Mntsschr. d. ärztl. Polytechn.," viii, 5, p. 115.]

BRUTOLÉ (Fr.), n. Bru^{6}t-ol-a. See Brytolé.

BRÜTTEMPERATUR (Ger.), n. Bru^{6}t′te^{2}mp-e^{2}r-a^{3}t-ur. The temperature requisite for incubation.

BRUTTIA PIX (Lat.), n. f. Bru^{3}t(brut)′ti^2-a^3 pi^{2}x(pex). An ancient name for a variety of pitch obtained from the southern extremity of Italy (inhabited by the Bruttii). [Calpurnius (A, 318).]

BRUTUS (Lat.), adj. Bru^{2}t(brut)′u^{3}s(u^{4}s). Fr., *brut.* Lit., inert, insensible, stupid ; showing no trace of organization. [L, 180.]

BRUXANELI, BRUXANELLI, n's. A medicinal rubiaceous tree of Malabar. [A, 385 ; L, 49.]

BRUYÈRE (Fr.), n. Bru^6-ye^{2}r. The genus *Erica* ; in the pl., the *Ericaceæ.* [A, 385 ; B, 1.]—**B. à balais.** The *Erica fucata.* [B, 173.]—**B. à quatre faces.** The *Erica tetralix.* [L, 41.]—**B. australe.** The *Erica australis.* [L, 41.]—**B. cendrée.** The *Erica cinerea.* [B, 173.]—**B. ciliée.** The *Erica ciliaris.* [L, 41.]—**B. commune.** The *Erica vulgaris.* [B, 173.]—**B. de la Méditerranée.** The *Erica mediterranea.* [L, 41.]—**B. des marais.** The *Erica tetralix.* [L, 41.]—**B. en arbre.** The *Erica arborea.* [L, 41.]—**B. étalée.** The *Erica vagans.* [L, 41.]—**B. multiflore.** The *Erica multiflora.* [L, 41.]—**B. précoce.** The *Erica carnea.* [B, 173.]—**B. pourpre.** The *Erica purpurescens.* [L, 41.]—**B. tétralix.** The *Erica tetralix.* [B, 173.]—**B. vulgaire, Grosse b.** See *B. commune.*

BRUYÈRES (Fr.), n. Bru^6-ye^{2}r. A place near Luneville, France, where there is a chalybeate spring. [L, 41.]

BRUZNO, n. See Bruszno.

BRY (Fr.), n. Bre. The genus *Bryum.* [B, 173.]—**B. triquêtre.** The *Bryum triquetrum.* [B, 173.]

BRYA (Lat.), n. f. sing. and n. pl. Bri(bru^6)′a^3. From βρύον, a sea-moss. 1. (F. sing.) a genus of papilionaceous trees or shrubs of tropical America. 2. (N. pl.) of Ritgen, a division of plants, including the mosses ; of Montagne, a section of the *Bryaceæ*, comprising *Bryum* and other genera. [B, 19, 170.]—**B. ebenus.** The Jamaica (or West Indian) ebony. [B, 19.]

BRYACEÆ (Lat.), n. f. pl. Bri(bru^6)-a(a^3)′se^2(ke^2)-e(a^3-e^2). Fr., *bryacées.* A division of mosses, variously regarded as a section, tribe, or family ; by Rabenhorst limited to the single genus *Bryum*, by others made to include four or five other genera, and by still others made to comprise all the true mosses and raised to the rank of an order. In recent classifications it constitutes the highest order of the grand division *Bryophyta*, comprising the suborders *Acrocarpæ* and *Pleurocarpæ.* [B, 19, 75, 170.]

BRYACEOUS, adj. Bri-a′shu^{3}s. Lat., *bryaceus.* Fr., *bryacé.* Of or belonging to the *Bryaceæ.* [B.]

BRYASPARAGI (Lat.), n. m. pl. Bri(bru^6)-a^{2}s(a^{3}s)-pa^{2}r(pa^{3}r)′-a^3-ji(ge). Gr., βρύον ἀσπάραγοι. Ger., *Hopfensprossen.* The strobiles of the *Humulus lupulus.* [A, 322.]

BRYCETOS, BRYCETUS (Lat.), n's m. Bri(bru^6)′se^{2}t(ke^{2}t)-o^{2}s, -u^{3}s(u^{4}s). Gr., βρυκετός. See Brychetos.

BRYCHETHMOS, BRYCHETHMUS (Lat.), n's m. Bri^{2}k(bru^{6}ch^2)-e^{2}th(ath)′mo^{2}s, -mu^{3}s(mu^{4}s). Gr., βρυχηθμός, βρύχημα, βρυχή. See Brygmos.

BRYCHETOS, BRYCHETUS (Lat.), n's m. Bri^{2}k(bru^{6}ch^2)′-e^{2}t-o^{2}s, -u^{3}s(u^{4}s). Gr., βρυχετός. Ger., *kaltes Fieber.* The cold stage of fever. [A, 322, 387.]

BRYCHIOS, BRYCHIUS (Lat.), adj's. Bri^{2}k(bru^{6}ch^2)′i^2-o^{2}s, -u^{3}s(u^{4}s). Gr., βρύχιος. 1. Gnashing the teeth. 2. Deep-seated. [A, 322, 325, 387.]

BRYE (Fr.), n. Bre. See Bry.

BRYEÆ (Lat.), n. f. pl. Bri(bru^6)′e^2-e(a^3-e^2). Of Hampe and of Montagne, a tribe of mosses (*Acrocarpi*), comprising *Bryum* and other genera. [B, 170.]

BRYGMA (Lat.), n. n. Bri^{2}g(bru^{6}g)′ma^3. Gen., *bryg′matos* (*-tis*). Gr., βρύγμα. 1. A bite ; anything bitten or gnawed off. 2. See Brygmos. [A, 322.]

BRYGMOS, BRYGMUS (Lat.), n's m. Bri^{2}g(bru^{6}g)′mo^{2}s, -mu^{3}s(mu^{4}s). Gr., βρυγμός (from βρύχειν, to gnash the teeth). Fr., *grincement des dents.* Ger., *Zähneknirschen.* A grating or chattering of the teeth. [A, 322, 387 ; L, 81, 84, 94.]

BRYINEÆ (Lat.), n. f. pl. Bri(bru^6)-i^{2}n′e^2-e(a^3-e^2). Of Angström, a division of the *Bryaceæ*, comprising *Bryum* and other genera. [B, 170.]

BRYOÏDE (Fr.), adj. Bre-o-ed. Resembling or belonging to the genus *Bryum.* [L, 41.]

BRYOIDEA (Lat.), n. n. pl. Bri(bru^6)-o(o^2)-i^{2}d(ed)′e^2-a^3. From βρύον, a moss, and εἶδος, resemblance. Of Reichenbach, a family of the *Sporangeiobrya*, comprising the divisions *Hypophyllocarpia*, *Entophyllocarpia*, *Maschalocarpia*, and *Acrocarpia.* [B, 170.]

BRYOIDEÆ (Lat.), n. f. pl. Bri(bru^6)-o(o^2)-i^{2}d(ed)′e^2-e(a^3-e^2). Of Arnott and others, a tribe, family, or section of mosses, comprising *Bryum* and other genera, among which some authors include *Mnium* and *Bartramia* ; of Schulz, a family of the *Neurophyllosporæ*, comprising the sections *Jungermanniacea* and *Andrœoidea.* [B, 170.]

BRYOIDEI (Lat.), n. m. pl. Bri(bru^6)-o(o^2)-i^{2}d(ed)′e^2-i(e). Of Wahlenberg and succeeding authors, a division or family of mosses (*Musci frondosi*), comprising, according to Wahlenberg, *Bryum*, *Mnium*, *Bartramia*, *Splachnum*, *Sphagnum*, *Phascum*, *Andrœa*, and other genera now ranged in different orders of the *Bryophyta.* [B, 170.]

BRYOIDIN, n. Bri-oid′i^{2}n. Fr., *bryoïdine.* A bitter, acrid crystalline substance, $2(C_{10}H_{16}) + 3H_2O$, obtained from elemi resin by extraction with alcohol. According to Von Schröder, it is identical with Baup's breidin. [B, 81, 270.]

BRYOLOGIST, n. Bri-o^{2}l′o-ji^{2}st. One who studies or understands bryology. [B.]

BRYOLOGY, n. Bri-o^{2}l′o-ji^2. Lat., *bryologia* (from βρύον, a moss, and λόγος, understanding). Fr., *bryologie.* Ger., *Bryologie*, *Laubmooskunde.* The botany of mosses. [A, 322 ; B, 270.]

BRYON (Lat.), n. n. Bri(bru^6)′o^{2}n. Gr., βρύον. Fr., *mousse.* Ger., *Moos.* Moss. [A, 318, 322, 325 ; L, 41, 104.]—**B. thalassium.** Gr., βρύον θαλάσσιον. Sea-moss ; used by Hippocrates for uterine inflammation. [A, 325.]

BRYONE (Fr.), n. Bre-on. The genus *Bryonia.* [B, 119.]—**Alcoolat de b. composé** [Belg. Ph.]. See *Alcoholatum* bryoniæ *compositum.*—**Alcoolature de b.** [Fr. Cod.]. A preparation made by macerating the root of *Bryonia dioica* in its own weight of alcohol for ten days, expressing, and filtering. [B.]—**B. à éperons.** The *Bryonia rostrata.* [B, 173.]—**B. blanche** [Fr. Cod.]. The *Bryonia dioica.* [B.]—**B. calleuse.** The *Bryonia callosa.* [B, 173.]—**B. d'Abyssinie.** The *Bryonia abyssinica.* [L, 41.]—**B. d'afrique.** The *Bryonia africana.* [B, 173.]—**B. d'Amérique.** The *Bryonia mechoacanna.* [B, 173.]—**B. dioïque.** The *Bryonia dioica.* [B.]—**B. rude.** The *Bryonia scabra.* [B, 173.]—**Extrait de b.** See *Extractum* bryoniæ.—**Poudre de b.** [Fr. Cod.]. A preparation made by drying the root of *Bryonia dioica* in an oven, powdering it in an iron mortar, and passing the powder through a No. 120 silk sieve. [B.]—**Racine de b.** See *Radix* bryoniæ.—**Sirop de b.** See *Syrupus* bryoniæ.

BRYONIA (Lat.), n. f. Bri(bru^6)-on′i^2-a^3. Gr., βρυωνία, βρυώνη, βρυωνιάς. Fr., *bryone.* Ger., *Zaunrübe*, *Gichtrübe.* It., Sp., *brionia.* 1. Bryony ; a genus of cucurbitaceous plants. 2. Of the U. S. Ph., the root of *B. alba* and of *B. dioica.* [B, 19, 84, 270.]—**Alcoholatum bryoniæ compositum** [Belg. Ph.], **Aqua bryoniæ composita.** Fr., *alcoolat de bryone composé.* A preparation similar to the aqua asæ fœtidæ composita (*q. v.*), the root of *B. dioica* being substituted for the asafœtida. [B, 92.]—**B. abyssinica.** Fr., *bryone d'Abyssinie.* A species the root of which is said to be edible when cooked. [B, 19.]—**B. africana** [Thunberg]. Fr., *bryone d'Afrique.* A species indigenous to southern Africa. At the Cape of Good Hope the root is used as an emetic and purgative. [B, 81, 173, 180.]—**B. alba** [Linnæus]. Fr., *bryone dioïque*, *colubrine*, *couleuvrée*, *feu ardent*, *gros navet*, *navet* (ou *vigne*) *du diable*, *navet galant*, *navau-bourge*, *parc*, *racine vierge*, *ipécacuanha indigène.* Ger., *gemeine* (oder *schwarzfrüchtige*) *Zaunrübe*, *Gichtrübe*, *Hundsrübe*, *Tollrübe*, *Stickwurz.* Black bryony (the ἄμπελος μέλαινα of Dioscorides); a species with black berries, growing in central and northern Europe. The root (*b.* [U. S. Ph.], *radix bryoniæ*) is used like that of *B. dioica.* The juice of the fresh root is poisonous, and in small doses purgative ; it is also rubefacient. The dried root and the berries are purgative. The acrid principle may be removed by repeated washings and a variety of starch obtained. The young shoots are eaten. [B, 19, 81, 173, 180, 270.]—**B. americana** [Lamarck]. Fr., *bryone d'Amérique.* A species growing in the West Indies, where it is employed like *B. dioica*, of which it has been considered a variety. [B, 81, 180.]—**B. aspera.** See *B. alba.*—**B. callosa** [Rottl.]. Fr., *bryone calleuse.* An Asiatic species (or variety of *B. dioica*), the seeds of which are used in India as an anthelminthic and furnish an illuminating oil. [B, 19, 73, 180.]—**B. cordifolia** [Linnæus]. A variety of *B. dioica.* The leaves are used in Java as a cooling expectorant. [B, 180.]—**B. dioica** [Linnæus]. Fr., *bryone dioïque.* Ger., *weisse Zaunrübe* (oder *Stickwurz*). Red bryony (the ἄμπελος λευκή of Dioscorides); a perennial climbing roughly hairy herb with greenish-yellow flowers, usually

THE BRYONIA DIOICA. (AFTER DE LANESSAN.)

but not always diœcious, and scarlet berries. It has a fœtid odor and acts as an acrid emeto-cathartic. The root—*b.* [U. S. Ph.], *radix bryoniæ* (seu *vitis albæ*, seu *uvæ anguinæ*); the *couleuvrée* of the French ; the *Zaunrübe*, or *Gichtrübe*, of the Germans—is half a yard or more in length, from 2 to 4 inches thick, wrinkled and grayish-brown externally and white within, lactescent, fleshy, of a repulsive odor, which it loses on drying, and of a nauseous, bitter taste. It contains bryonin (*q. v.*). It acts locally as a vesicant and internally as an acrid emeto-cathartic poison. Anciently it was em-

ployed in nervous diseases, especially tetanus and epilepsy, as an emmenagogue and abortifacient, and as a remedy for splenic, renal, and cutaneous diseases, etc.; it is now chiefly used as a hydragogue cathartic in dropsy, as a remedy for chronic serous bronchitis and for whooping-cough, and externally as a vesicant. [B, 19, 81, 270; "Progr. méd.," Dec. 24, 1887, p. 547.]—**B. dissecta** [Thunberg]. A variety of *B. dioica*, used like *B. africana*. [B, 180.]—**B. epigæa** [Rottl.]. A species (or a variety of *B. dioica*) growing in India, where it is used as an anthelminthic, antidysenteric, and antisyphilitic and as a remedy for snake-bites. It was formerly regarded as the source of calumba. [B, 19, 81, 173, 180.]—**B. ficifolia** [Lamarck]. Syn.: *Trianosperma ficifolia* [Martius], *Dermophylla pendulina* [Manso]. A Brazilian species, the root of which (tayuya root) is emetic and purgative and has been used in syphilis and scrofula. [B, 19, 81, 270.]—**B. glabra.** See *B. epigœa*.—**B. grandis** [Linnæus]. The *Cephalandra indica*. [B, 180.]—**B. laciniosa** [Linnæus]. Tamil. *ayvelin*. A species the juice of the leaves of which is used in India in biliary affections. [B, 19, 121.]—**B. maderaspatana** [Berg]. A variety of *B. dioica*. In India it is used as a diaphoretic and diuretic and as a remedy for cholera, gonorrhœa, calculous affections, and toothache, and the fruit is eaten. [B, 180.]—**B. mechoacanna alba.** The *Convolvulus mechoacanna*. [L, 116.]—**B. mechoacanna nigra, B. mechoacanna nigricans, B. nigra.** Black bryony, the *Tamus communis*. [B; L, 94.]—**B. palmata** [Wallich]. The *Cephalandra indica*. [B, 212.]—**B. peruviana.** See *B. nigra*.—**B. pilosa** [Roxburgh]. See *B. rostrata*.—**B. racemosa.** A species with a red, olive-shaped fruit. [L, 102.]—**B. Rheedii** [Blum.]. A variety of *B. dioica*, used like *B. maderaspatana*. [B, 180.]—**B. rostrata** [Rottl.]. Fr., *bryone à éperons*. A variety of *B. dioica*, the root of which is used in Java as a refrigerant and expectorant, also as a demulcent in asthma. [B, 19, 173, 180.]—**B. ruderalis.** See *B. alba*.—**B. scabra** [Linnæus, fil.]. Fr., *bryone rude*. A variety of *B. dioica*, used at the Cape of Good Hope as a laxative. [B, 173, 180.]—**B. scabrella.** A species used medicinally in India. [B, 19.]—**B. scrobiculata** [Hochst.]. An Abyssinian species (the *taffafula* of the natives), said to be a powerful remedy against tape-worms. [B, 270.]—**B. silvestris nigra.** See *B. nigra*.—**B. variegata.** See *B. americana*.—**Cataplasma bryoniæ compositum.** An old form of poultice made of 12 parts of the root of *B. dioica* or *B. alba* and 4 of elder-flowers, boiled and bruised, 2 parts of gum ammoniacum, 1 part of ammonium chloride, and 4 parts of camphorated spirit. [L, 104.]—**Emplastrum bryoniæ compositum.** An old plaster made of 16 parts of the root of *B. dioica* or *B. alba*, 8 of flowers of sulphur, 3 of hydrargyrum cum sulphure, 32 of galbanum, 72 of emplastrum ceræ compositum, and 8 of olive-oil. [Boerhaave (L, 102).]—**Extractum bryoniæ.** Fr., *extrait de bryone*. A watery extract of the root of *B. alba*, official in several old pharmacopœias. [B, 119.]—**Radix bryoniæ.** The root of *B. alba*, also that of *B. dioica*. [B, 270.]—**Radix bryoniæ albæ.** Ger., *Teufelskirschenwurzel*, *Faulrübenwurzel*, *Hundskürbsenwurzel*. The root of *B. alba*. [B, 180.]—**Radix bryoniæ americanæ** (seu **indicæ**, seu **mechoacannæ**). Ger., *Mechoacannawurzel*, *weisse Mechoacanna* (oder *Jalapenwurzel*, oder *Rhabarber*, oder *Purgirwurzel*), *indianische* (oder *amerikanische*) *Zaunrübe*, *Schmeckenicht*, *jüdische Rhabarber*. The root of *Convolvulus mechoacanna*. [B, 180.]—**Radix bryoniæ nigræ.** The rhizome of *Tamus communis*. [B, 180, 270.]—**Syrupus bryoniæ, Syrupus de bryonia.** Fr., *sirop de bryone*. A mixture of 9 parts of the clarified juice of the root of *B. alba* with 16 of white sugar. [Württemb. Ph., 1798 (B, 119).]—**Tinctura bryoniæ** [U. S. Ph.]. Tincture of b.; a preparation made by macerating and percolating 10 parts of the recently dried root of *B. alba* or of *B. dioica* with enough alcohol to make 100 parts. [B, 81.]

BRYONIÆ (Lat.), n. f. pl. Bri(bru^6)-on'i^2-e(a^3-e^2). Of Adanson, a family of plants, comprising *Anguina*, *Bryonia*, *Momordica*, *Elaterium*, *Cucurbita*, *Pepo*, *Melo*, *Penar-valli*, *Uhandiroba*, *Trichosanthes*, *Ceratosanthes*, and three other genera. [B, 170.] Cf. CUCURBITACEÆ.

BRYONICINE (Fr.), n. Bre-on-i^2-sen. See BRYONIN.

BRYONIÉ (Fr.), adj. Bre-on-i^2-a. Resembling the genus *Bryonia*. [L, 41.]

BRYONIEÆ (Lat.), n. f. pl. Bri(bru^6)-on-i(i^2)'e^2-e(a^3-e^2). Of Endlicher and others, a tribe of the *Cucurbitaceæ*, comprising *Bryonia*, *Citrullus*, *Ecbalium*, *Momordica*, *Luffa*, *Benincasa*, and *Lagenaria*; divided by Römer into the subtribes *Eubryonieæ* and *Momordiceæ*. [B, 170.]

BRYONIN, n. Bri-on'i^{2}n, bri'on-i^{2}n. Lat., *bryoninum*, *bryonina*. Fr., *bryonine*, *bryonicine*, *bryonitine*. Ger., *Bryonin*. A glucoside, $C_{48}H_{80}O_{19}$, obtained from *Bryonia alba* and *Bryonia dioica*; an amorphous white powder, intensely bitter, readily soluble in water and in alcohol, insoluble in ether; styptic and in large doses poisonous. On boiling with dilute acids, it is converted into *bryorrhetin* and *hydrobryotin* (or *hydrobryorrhetin*). [B, 81, 270.]

BRYONITINE (Fr.), n. Bre-on-e-ten. See BRYONIN.

BRYONY, n. Bri'on-i^2. The genus *Bryonia*, especially *Bryonia alba* and *Bryonia dioica*. [B, 19.]—**American black b.** A name for various species of *Tamus*. [L, 94.]—**American b.** See BRYONIA *americana*.—**Bastard b.** A species of *Cissus*. [B, 19.]—**Black-berried b.** See *Black b.* (1st def.).—**Black b.** 1. The *Bryonia alba*. 2. The *Tamus communis*. [B, 19, 81.]—**Compound b.-water.** See *Aqua* BRYONIÆ *composita*.—**Extract of b.** See *Extractum* BRYONIÆ.—**Red-berried b., Red b.** The *Bryonia dioica*. [B, 19, 81; L, 43.]—**White b.** The *bryonia alba*. [B, 5.]

BRYOPHILUS (Lat.), adj. Bri(bru^6)-o^{2}f'i^{2}l-u^{3}s(u^{4}s). From βρύον, moss, and φιλεῖν, to love. Fr., *bryophile*. Growing on mosses. [B, 123.]

BRYOPHYLLUM (Lat.), n. n. Bri(bru^6)-o(o^2)-fi^{2}l(fu^{6}l)'lu^{3}m-(lu^{4}m). From βρύειν, to grow, and φύλλον, a leaf, from the peculiar budding of *B. calycinum*. Fr., *bryophylle*. Of Salisbury, a genus of crassulaceous plants of the tribe *Crassuleæ*. [B, 19, 34.]—**B. calycinum** [Salisbury]. Fr., *bryophylle penné*. Sp., *bruja*, *amor tras de la puerta*. Syn.: *Cotyledon pinnata* [Lamarck], *Crassouvia filipendula* [Commerson]. A species indigenous to the Cape of Good Hope, found throughout the tropics, and cultivated in Europe and America; an undershrub the buds of which develop from the edges of the leaves; the leaves are used, in the form of a poultice, in intestinal disorders, and in China as a refrigerant, sedative, and vulnerary. [B, 19, 34, 121, 173, 180.]

BRYOPHYTA (Lat.), n. n. pl. Bri(bru^6)-o^{2}f'i^{2}t(u^{6}t)-a^3. From βρύον, moss, and φυτόν, a plant. Syn.: *Muscineæ*, *Muscinei*. The bryophytes; a grand section of the vegetable kingdom, regarded either as one of the four or seven primary grand divisions [Sachs, Bessey] or as one of the subdivisions of the grand division *Embryophyta zoidiogama* [Engler]. It comprises organisms which reproduce alternately by sexual and non-sexual development; the sexual organs being the *antheridia*, or male organs, consisting of pedunculated bodies filled with sperm-cells, each of which contains a single spermatozooid, and the *archegonia*, or flask-shaped female organs, each of which contains a naked protoplasmic mass (the germ-cell). From the germ-cell, which is fertilized by the penetration of the spermatozooids into its substance, there is developed a frequently pedunculated *sporogonium*, which represents the non-sexual stage of the plant and produces a number of similar spores. The latter germinate and finally either grow directly into a thalloid structure, upon which antheridia and archegonia are again developed, or give rise to a *pro-embryo*, or *protonema*, composed of a mass of filaments from which are produced structures that show a more or less well-marked differentiation into leaves and stem, and upon which the sexual organs are disposed. The *B.* frequently show considerable complexity of structure, approximating to the higher (vascular) plants. They comprise the two classes of *Hepaticæ* (liverworts), in which the thalloid type of structure predominates, and the mosses (*Musci* or *Musci frondosi*), in which the differentiation of the tissues into leaf and stem (cormophytic structure) and the complexity of the tissues themselves are much more marked than in the former class. [B, 75; Engler (B, 245).]

BRYOPHYTES, n. pl. Bri'o-fitz. See BRYOPHYTA.

BRYOPLASTA (Lat.), n. n. pl. Bri(bru^6)-o(o^2)-pla^{2}st(pla^{3}st)'a^3. From βρύειν, to grow, and πλαστός, formed, figured. Fr., *bryoplastes*. Ger., *Keimungen*. A general term given by C. H. Schultz to diseases characterized by some growth, as by the multiplication of parasites or pathogenetic germs, by proliferation of tissue, or by mere accretion (as in calculi). [A, 322.]

BRYOPSIDEÆ (Lat.), n. f. pl. Bri(bru^6)-o^{2}ps-i^{2}d'e^2-e(a^3-e^2). Of Bory and others, a family, tribe, or division of *Algæ* (*Vaucheriaceæ*), including *Bryopsis* and other genera. [B, 170.]

BRYORRHETIN, n. Bri-o^{2}r-re'ti^{2}n. Fr., *bryorrhétine*. A substance produced, along with sugar and hydrobryotin (from both of which it is distinguished by its insolubility in water), by the action of dilute acids on bryonin. [B, 81, 270.]

BRYOZOA, BRYOZOARIA (Lat.), n's n. pl. Bri(bru^6)-o(o^2)-zo'a^3, -zo-a(a^3)'ri^2-a^3. From βρύειν, to sprout, and ζῶον, an animal, or ζωάριον, a little animal. Fr., *bryozoaires*. Ger., *Bryozoen*. Of Burmeister, an order of the *Polypina*; of Milne-Edwards, a class of the *Molluscoidea*; of von Siebold and Stannius, an order of the *Polypi*; of Vogt, a class of the *Molluscoidea*. [L, 231.] Cf. POLYZOA.

BRYOZOIC, adj. Bri-o-zo'i^{2}k. Fr., *bryozoaire*. Of, pertaining to, or resembling the *Bryozoa*. [L, 296.]

BRYTEA (Lat.), n. n. pl. Bri^{2}t(bru^{6}t)'e^2-a^3. See BRYTIA.

BRYTHION, BRYTHRION (Lat.), n's n. Bri^{2}th(bru^{6}th)'i^2-o^{2}n, -ri^2-o^{2}n. A sort of poultice mentioned by Paulus Ægineta. [L, 94, 104, 116.]

BRYTIA (Lat.), n. n. pl. Bri^{2}t(bru^{6}t)'i^2-a^3. Gr., βρύτια, βρύτεα (from βρύττειν, to squeeze). Grape-lees. [A, 325.]

BRYTOLATURE [Béral] (Fr.), n. Bri^{2}t-ol-a^{3}t-u^{6}r. Lat., *brytolaturum* (from βρῦτον, beer). Ger., *Bierauszug*. It., *britolatura*. A vegetable infusion or tincture in which beer is the menstruum. [A, 301, 385.]

BRYTOLÉ [Béral] (Fr.), n. Bri^{2}t-ol-a. Lat., *brytoleum*. Ger., *Bierauflösung*. It., *britolea*. 1. A medicinal preparation made by dissolving some drug or drugs in beer. [A, 301, 385; L, 81.] 2. See BEER.—**B. antiscorbutique.** See BIÈRE *antiscorbutique*.

BRYTOLICA (Lat.), n. n. pl. Bri^{2}t(bru^{6}t)-o^{2}l'i^{2}k-a^3. Fr., *brytoliques*. Ger., *Bierverbindungen*. A general term for medicinal preparations made with beer, whether the drugs are added before or after fermentation. [L, 81.]

BRYTOLIQUE (Fr.), adj. Bri^{2}t-ol-ek. Containing beer. [Béral (A, 301).]

BRYTOLOTIVA (Lat.), n. n. pl. Bri^{2}t(bru^{6}t)-o(o^2)-lo-ti(te)'va^3-(wa^3). From βρῦτον, beer, and *lavare*, to wash. Lotions, clysters, etc., made with beer. [Béral (A, 322).]

BRYTON, BRYTUM (Lat.), n's n. Bri(bru^6)'to^{2}n, -tu^{3}m(tu^{4}m). Gr., βρῦτον (from βρύειν, to bubble). An ancient fermented drink made from barley or rice. [A, 322, 325.]

BRYUM (Lat.), n. n. Bri(bru^6)'u^{3}m(u^{4}m). Gr., βρύον. Fr., *bry*, *bryc*. Ger., *Laubmoos*. A genus of mosses (*Bryaceæ*) of the division *Acrocarpæ*. [B.]—**B. canescens.** The *Tortula muralis*. [B, 173.]—**B. hygrometricum.** The *Fumaria hygrometrica*. [B, 173, 180.]—**B. murale.** See *B. canescens*.—**B. pilosum.** The *Tortula ambigua*. [B, 173.]—**B. pulvinatum.** The *Dryptodon pulvinatus*. [B, 180.]—**B. triquetrum.** Fr., *bry triquètre*. A species which has been used as a hæmostatic. [B, 173.]

BUAHPALA (Malay), n. The *Myristica aromatica*. [L, 105.]

BUANG, n. See BHANG.

BUANTHROPIE (Fr.), n. Bu^6-a^{3}n-tro-pe. From βοῦς (see

Bos), and ἄνθρωπος, a human being. An insane delusion of having been transformed into a cow. [L, 41.]

BUATRICA (Lat.), n. f. Bu^2(bu)-a^{2}t(a^{3}t)'ri^{2}k-a^3. See BUIATRICA.

BUAYCURA (Sp.), n. Bu-a^3-e-ku'ra^3. A South American name for the root of *Statice brasiliensis* and that of *Statice antarctica*. ["Pharm. Jour. and Trans.," ix, p. 466 (B, 5).]

BUAZE, n. A Zambesi name for the fibre of the bark of *Securidacea longipedunculata*. [B, 19.]

BUBALION (Lat.), n. n. Bu^2(bu)-ba(ba^3)'li^2-o^{2}n. Gr., βουβάλιον. The wild cucumber (*Momordica elaterium*). [Apuleius (A, 318); L.]

BUBALUS (Lat.), n. m. Bu^2(bu)'ba^{3}l-u^{3}s(u^{4}s). Gr., βούβαλος. See Bos *b.*

BUBASTICUM (Lat.), n. n. Bu^2(bu)-ba^{2}st(ba^{3}st)'i^{2}k-u^{3}m(u^{4}m). Gr., βουβαστικόν. A term by which Aetius mentioned a certain sort of superficial ulcer particularly affecting children. [Gorræus (A, 325).]

BUBBY, n. Bu^{3}b'i^2. A popular name in some parts of the United States for the seeds of *Calycanthus glaucus*. [R. G. Eccles, "Brooklyn Med. Jour.," March, 1888, p. 232.]

BUBE (Fr., Ger.), n. Bu^{6}b, bub'e^2. A popular term for any morbid elevation of the skin, especially a pustule. [A, 385; G; L.]

BUBELÉ (Fr.), adj. Bu^{6}b-e^{2}l-a. Covered with pustules. [L, 41.]

BUBELETTE (Fr.), n. Bu^{6}b-e^{2}l-e^{2}t. A small pustule. [L, 41.]

BUBENDISTEL (Ger.), n. Bub'e^{2}n-di^{2}st-e^{2}l. The *Dipsacus fullonum*. [A, 315.]

BUBENDORF (Ger.), n. Bub'e^{2}n-do^{2}rf. A place near Basel, Switzerland, where there are mineral springs and arrangements for vapor-baths; used for chronic gouty and cutaneous affections. [L, 135.]

BUBENKRAUT (Ger.), n. Bub'e^{2}n-kra^3-ut. The *Rumex obtusifolius*. [B, 180.]

BUBENQUELLE (Ger.), n. Bub'e^{2}n-kwe^{2}l-le^2. A mineral spring in the duchy of Nassau, the water of which was formerly thought to be curative of sterility in women. [L, 30.]

BUBENVIST (Ger.), n. Bub'e^{2}n-fi^{2}st. The *Lycoperdon bovista*. [B, 180.]

BUBERETZE (Ger.), n. Bub'e^{2}r-e^{2}tz-e^2. The *Agaricus procerus*. [B.]

BUBO (Lat.), n. m. Bu^2(bu)'bo. Gen., *bubon'os* (*-nis*). Gr., βουβών. Ar., *burules*. Fr., *bubon*. Ger., *Drüsengeschwulst*. It., *bubbone*. Sp., *bubon*. An inflammatory swelling of a lymphatic gland, usually of an inguinal gland. [A, 322, 325; G.]—**Abdominal b.** Fr., *bubon abdominal*. A b. situated above the fold of the groin. [A, 385.]—**Absorptionsb'** (Ger.). See *Virulent b.*—**B. acutus.** See *Suppurating b.*—**B'binde** (Ger.). A bandage for a b.; either a spica bandage or a handkerchief. [Grünfeld (A, 319).]—**B. chronicus, B. indolens.** See *Indolent b.*—**B. insons.** See *Simple b.*—**B. of rheumatism.** See *Rheumatic b.*—**B. pestilentialis.** See *Pestilential b.*—**B. scrofulosus.** See *Scrofulous b.*—**B. serpiginosus.** See *Creeping b.*—**B. strumosus.** See *Scrofulous b.*—**Chancroidal b.** See *Virulent b.*—**Chancrous b.** See *Syphilitic b.*—**Common b.** Fr., *bubon commun*. It., *bubbone commune*. See *Simple b.*—**Consecutive b.** Fr., *bubon consécutif*. Ger., *consecutiver B.* A syphilitic b. appearing in regular sequence after a chancre. [A, 385.]—**Consensueller B.** (Ger.). See *Sympathetic b.*—**Constitutional b.** Fr., *bubon constitutionnel*. A syphilitic b. (not necessarily inguinal) appearing as a manifestation of systemic infection. [A, 301, 385.]—**Creeping b.** Lat., *b. serpiginosus*. Fr., *bubon serpigineux*. Ger., *serpiginöses Drüsengeschwür*. An ulcerated b. in which ulceration advances in a serpiginous form. [Solly, "London Jour. of Med.," 1849, p. 437 (L).]—**Crural b.** Fr., *bubon crural*. A b. situated considerably below the fold of the groin. [A, 301.]—**Ellbogenb'** (Ger.). See ADENITIS *cubitalis*.—**Gonorrhœal b.** Fr., *bubon blennorrhagique*. Ger., *Tripperbubo*, *gonorrhöischer B.* It., *bubbone blennorragico*. A simple b. (*q. v.*) due to gonorrhœa. [G.]—**Indolent b.** Lat., *b. indolens*, *b. chronicus*. Ger., *indolenter B.* A b. in which there are enlargement and hyperplasia without noticeable signs of inflammation; resulting from chronic eruptions (such as eczema, ecthyma, and the prurigo of Hebra) on the lower limbs, also from the syphilitic chancre. [G.] Cf. *Syphilitic b.*—**Femoral b.** See *Crural b.*—**Inflammatory b.** See *Simple b.*—**Inguinal b.** Ger., *Leistenbeule*. A b. situated in the groin.—**Malignant b.** Fr., *bubon malin*. See *Pestilential b.*—**Nichtvenerischer B.** (Ger.), **Nichtvirulenter B.** (Ger.). See *Simple b.*—**Non-consecutive b.** See BUBON *d'emblée*.—**Non-venereal b., Non-virulent b.** See *Simple b.*—**Parotid b.** Suppurative parotiditis. [L, 213.]—**Pestilential b.** Lat., *b. pestilentialis*. Fr., *bubon pestilentiel*. Ger., *Pestbeule*. A form of b. observed as a manifestation of the plague. [G.]—**Phagedænic b.** Fr., *bubon phagédénique*. Ger., *phagedänischer B.* A form of virulent b. (*q. v.*) in which phagedæna supervenes. [A, 269.]—**Primary b., Primitive b.** See BUBON *d'emblée*.—**Pubic b.** Fr., *bubon pubien*. A b. situated very near the pubes. [A, 301, 385.]—**Rheumatic b.** Fr., *bubon rhumatismal*. A hard lump sometimes observed in various parts of the body, especially in the posterior cervical region, as a sequel of acute articular rheumatism. [E. Brissaud, "Rev. de méd.," April, 1885, p. 241; "Practitioner," Sept., 1885, p. 211.]—**Schankerb'** (Ger.). See *Virulent b.*—**Scrofulous b.** Lat., *b. scrofulosus* (seu *strumosus*). Fr., *bubon scrofuleux* (ou *strumeux*). Ger., *scrophulöser* (oder *scrophelartiger*, oder *strumöser*) *B.* It., *bubbone strumoso*, *adenite fungosa* (o *iperplastica cronica granulosa*). A b. occurring in a scrofulous subject, occasionally as a variety of the syphilitic b.; characterized by the production of a large indolent swelling consisting of hypertrophied glands, which pursues a protracted course and undergoes involution very slowly, partly by absorption and partly by softening and ulceration. [G.]—**Serpiginous b.** See *Creeping b.*—**Simple b.** Lat., *b. insons*. Fr., *bubon simple* (ou *commun*, ou *sympathique*). Ger., *nichtvenerischer B.* It., *bubbone semplice* (o *commune*), *adenite semplice* (o *simpatica*). Syn.: *common* (or *sympathetic*, or *non-venereal*) *b.* An inflammation of one or more lymphatic glands resulting from any non-specific irritation in the region the absorbents of which are in direct anatomical connection with the glands, and not from the absorption of chancrous or virulent matter, although such a b. may be caused by a chancre acting merely as a common source of irritation. [G.]—**Strumous b.** See *Scrofulous b.*—**Suppurating b.** Lat., *b. acutus*, *inguen suppurans*. Fr., *bubon suppuré*. A b. attended with the formation of an abscess; commonly a virulent b. [G.]—**Sympathetic b.** Fr., *bubon sympathique*. Ger., *sympathischer* (oder *consensueller*) *B.* See *Simple b.*—**Syphilitic b.** Lat., *inguen induratum* (seu *syphiliticum*). Fr., *bubon syphilitique*, *adénite syphilitique primitive*, *adénopathie du chancre infectant*. Ger., *syphilitischer B.*, *syphilitische Leistendrüsengeschwulst*. It., *bubbone sifilitico* (o *sifilomatoso*). The infiltrated and enlarged state of the inguinal glands which attends the syphilitic chancre; usually a chain, or "pleiad," of glands (often three on each side). [G.]—**Venereal b.** Lat., *b. venereus*, *adenitis venerea*. Fr., *bubon vénérien*. Ger., *venerischer B.* A general term for syphilitic and virulent b'es. [G.]—**Virulent b.** Lat., *b. virulentus*, *inguen virulentum*. Fr., *bubon virulent* (ou *du chancre simple*), *adénite chancreuse*. Ger., *virulenter B.*, *Schankerb'*, *Drüsenschanker*. It., *bubbone ulceroso*. Syn.: *chancroidal b.* A b. due to the absorption of the virus of a simple chancre. It is generally attended with suppuration and ulceration, and the discharge has the same virulent properties that pertain to that of the original chancre. [G.]

BUBON (Lat.), n. n. Bu^2(bu)'bo^{2}n(bon). From βουβών, the groin. Fr., *bubon*. Ger., *Steineppich*. A genus of umbelliferous plants. [B, 19.]—**B. galbanum, B. gummiferum.** Fr., *b. galbanifère* (ou *gommifère*). A species indigenous to the Cape of Good Hope, the resinous juice of which resembles galbanum. [B, 19, 173, 180.]—**B. macedonicum, B. multiflorum.** Fr., *b. de Macédoine*. The *Petroselinum macedonicum*. [B, 180; L, 84.] See SESELI.—**B.-upas.** See UPAS *antiar*.

BUBON (Fr.), n. Bu^6-bo^{2}n^2. See *B.* (Lat.) and BUBO.—**B. abdominal.** See *Abdominal* BUBO.—**B. bénin.** See *Simple* BUBO.—**B. chancreux.** See *Virulent* BUBO.—**B. consécutif, B. constitutionnel.** See *Consecutive* BUBO.—**B. crural.** See *Crural* BUBO.—**B. d'absorption.** See *Virulent* BUBO.—**B. de la peste.** See *Pestilential* BUBO.—**B. de Macédoine.** See PETROSELINUM *macedonicum*.—**B. d'emblée.** Ger., *primärer Bubo*. It., *bubbone d'assalto*. A primary, primitive, or non-consecutive bubo; a venereal bubo that occurs without appreciable preceding lesion. It is supposed that the virus is taken up by the cutaneous absorbents and produces no inflammatory or other reaction until it reaches the inguinal glands. It is maintained that such a bubo may be either virulent or syphilitic. [Baumès, Mollière, Cazenave, Vidal de Cassis, Diday, *et al.* (G).]—**B. d'emblée chancrelleux.** A virulent b. d'emblée. [G, 89.]—**B. d'emblée commun.** A syphilitic b. d'emblée. [G, 89.]—**B. d'irritation.** See *Simple* BUBO.—**B. du chancre simple.** See *Virulent* BUBO.—**B. galbanifère, B. gommifère.** See *B.* (Lat.) *galbanum*.—**B. inflammatoire.** See *Simple* BUBO.—**B. mixte.** A bubo that is both virulent and syphilitic, resulting from both syphilitic and chancroidal infection. [G.] Cf. *Mixed* CHANCRE.—**B. par retentissement inflammatoire.** See *Simple* BUBO.—**B. pestilentiel.** See *Pestilential* BUBO.—**B. phagédénique.** See *Phagedœnic* BUBO.—**B. primitif.** See *B. d'emblée*.—**B. pubien.** See *Pubic* BUBO.—**B. rhumatismal.** See *Rheumatic* BUBO.—**B. scrofuleux.** See *Scrofulous* BUBO.—**B. sympathique.** See *Sympathetic* BUBO.—**B. syphilitique.** See *Syphilitic* BUBO.—**B. syphilo-strumeux.** A syphilitic bubo in which scrofulous degeneration has occurred. [Fournier (L, 88).]—**B.-upas.** See ANTIAR.—**B. vénérien.** See *Venereal* BUBO.

BUBONADENITIS (Lat.), n. f. Bu^2(bu)-bo^{2}n(bon)-a^{2}d(a^{3}d)-e^{2}n(an)-i(e)'ti^{2}s. Gen., *bubonadenit'idis*. From βουβών, the groin, and ἀδήν, a gland. Fr., *bubonadénite*. Ger., *Leistendrüsenentzündung*. Inguinal adenitis. [A, 322; L, 81.]

BUBONALGIA (Lat.), n. f. Bu^2(bu)-bo^{2}n(bon)-a^{2}l(a^{3}l)'ji^2(gi^2)-a^3. From βουβών, the groin, and ἄλγος, pain. Fr., *bubonalgie*. Ger., *Leistenschmerz*. Pain in the groins. [A, 322, 385; L, 43.]

BUBONCULUS (Lat.), n. m. Bu^2(bu)-bo^{2}n^2(bon^2)'ku^{2}l(ku^{4}l)-u^{3}s(u^{4}s). See BUBONULUS.

BUBONCUS (Lat.), n. m. Bu^2(bu)-bo^{2}n^2'ku^{3}s(ku^{4}s). See BUBONONCUS.

BUBONINÆ (Lat.), n. f. pl. Bu^2(bu)-bo^{2}n(bon)-i(e)'ne(na^3-e^2). Of Sharpe, a subfamily of the *Strigidœ*. [L, 221.]

BUBONION, BUBONIUM (Lat.), n's n. Bu^2(bu)-bon'i^2-o^{2}n, -u^{3}m(u^{4}m). Gr., βουβώνιον (from βουβών, the groin, because it was formerly used in affections of the groin). The *Aster amellus*. [B, 180.]

BUBONISCUS (Lat.), n. m. Bu^2(bu)-bo^{2}n(bon)-i^{2}sk'u^{3}s(u^{4}s). Ger., *Leistenbinde*. A bandage for the groin. [A, 322.]

BUBONOCELE (Lat.), n. f. Bu^2(bu)-bo^{2}n(bon)-o(o^2)-sel(kal)'-e(a); as an English word, bu^2-bo^{2}n'o-sel. Gr., βουβωνοκήλη (from βουβών, the groin, and κήλη, a tumor). Fr., *bubonocèle*. Ger., *Leistenbruch*. 1. An inguinal hernia, especially one that has not yet descended into the scrotum. [Paulus Ægineta (A, 325); A, 322; E; L, 30.] 2. Any swelling in the groin. [Galen (A, 325).]

BUBONODES, BUBONOIDES (Lat.), adj's. Bu^2(bu)-bo^{2}n-(bon)-o'dez(das), -o(o^2)-i(e)'dez(das). From βουβών, the groin, and εἶδος, resemblance. Fr., *bubonoïde*. Ger., *buboähnlich*. Resembling a bubo. [A, 322, 385; L, 81.]

BUBONONCUS (Lat.), n. m. Bu^2(bu)-bo^{2}n(bon)-o^{2}n^2'ku^{3}s(ku^{4}s). From βουβών, the groin, and ὄγκος, a swelling. Fr., *bubononcose*.

Ger., *Leistengeschwulst.* A swelling in the groin, especially a bubo. [A, 322; L, 41, 81.]

BUBONOPANUS (Lat.), n. m. Bu^2(bu)-bo^{2}n(bon)-o(o^2)-pa-(pa^3)′nu^{3}s(nu^{4}s). From βουβών, the groin, and πᾶνος (see PANUS). An inguinal bubo. [A, 318, 322.]

BUBONORRHEXIS (Lat.), n. f. Bu^2(bu)-bo^{2}n(bon)-o^{2}r-re^{2}x-(rax)′i^{2}s. Gen., *bubonorrhex′eos (-xis).* From βουβών, the groin, and ῥῆξις, a bursting. Fr., *bubonorrhexie.* An inguinal hernia which, having broken through the peritonæum, has no sac. [E; L, 30.]

BUBONULUS (Lat.), n. m. Bu^2(bu)-bo^{2}n(bon)′u^{2}l(u^{4}l)-u^{3}s(u^{4}s). Dim. of *bubo.* Ger., *Nisbeth′scher Schanker.* A virulent lymphangeitis of the dorsum of the penis, due to absorption of chancroidal virus, giving rise to one or more small abscesses. [Grünfeld (A, 319); G; L, 135.]

BUBOPHTHALMIA (Lat.), n. f. Bu^2(bu)-bo^{2}p(bo^{2}f)-tha^{2}l-(tha^{3}l)′mi^2-a^3. More commonly written *buphthalmia (q. v.).* Ger., *Augenwassersucht.* See HYDROPHTHALMIA.

BUBROMA (Lat.), n. n. Bu^2(bu)-brom′a^3. Gen., *bubrom′atos (-tis).* From βοῦς (see BOS), and βρῶμα, food. A genus of *Byttneriaceous* plants. [A, 248.]—**B. guazuma.** Fr., *orme d'Amérique* (ou *pyramidal*). Ger., *ulmenblättrige Guazume.* The *Guazuma ulmifolia.* [B, 173, 180.]

BUBROSTIS (Lat.), n. f. Bu^2(bu)-bro^{2}st(brost)′i^{2}s. Gen., *bubrost′eos (-is).* Gr., βούβρωστις. See BULIMIA.

BUBUCLE, BUBUKLE, n. Bu^2′bu^{3}kl. A corrupt word used by Fluellen, in Shakespeare's "Henry V." formed of the two words *bubo* and *carbuncle;* meaning probably a pustule or some other lesion of gutta rosacea. [G.]

BUBULA (Lat.), n., f. of adj. *bubulus (caro* understood). Bu^2-(bu)′bu^2(bu^4)-la^3. *Beef.* [Scribonius Largus (A, 325).]

BUBULIN, n. Bu^2′bu^{2}l-i^{2}n. From *bubulus (q. v.).* Fr., *bubuline.* Ger., *Bubulin.* Of Morin and Berzelius, a non-crystallizable substance obtained by the action of alcohol on cow-dung. [A, 301; L, 41.]

BUBULUS (Lat.), adj. Bu^2(bu)′bu^{2}l(bu^{4}l)-u^{3}s(u^{4}s). From *bos (q. v.).* Bovine. [A, 318.]—**Caro bubula.** See BUBULA.—**Femur bubulum.** The name of an herb mentioned by Pliny. [A, 318.]—**Lac bubulum.** Cow's milk. [A, 318.]

BUBUNCULUS (Lat.), n. m. Bu^2(bu)-bu^{3}nk(bu^{4}nk)′u^{2}l(u^{4}l)-u^{3}s(u^{4}s). See BUBONULUS.

BUBUTZE (Ger.), n. Bub′utz-e^2. See AGARICUS *procerus.*

BUCAIL (Fr.), **BUCAILLE** (Fr.), n's. Bu^{6}k-a^3-i^{2}l, -i^{2}l-y′. The *Fagopyrum esculentum.* [B, 19, 173.]

BUCANE (Fr.), n. Bu^{6}k-a^{3}n. The *Erica cinerea* and the *Erica vulgaris.* [B, 173.]

BUCANOPHYLLE (Fr.), adj. Bu^{6}k-a^{3}n-o-fel. From βυκάνη, a trumpet, and φύλλον, a leaf. Having trumpet-shaped leaves. [L, 41.]

BUCARDIE (Ger.), n. Bu-ka^{3}rd-e′. From βοῦς (see BOS), and καρδία, the heart. See COR *bovinum.*

BUCCA (Lat.), n. f. Bu^{3}k(buk)′ka^3. Gr., βούκκα. Fr., *bouche* (1st def.), *bouchée* (2d def.). Ger., *Backe* (1st def.). 1. The mouth, especially the inner surface of the cheek. [A, 301, 318, 325.] 2. A mouthful. [A, 318.] 3. In botany, the lateral sepals of the aconite. [B, 19.]—**B. saccata.** See CHEEK-POUCH.

BUCCACRATON (Lat.), n. n. Bu^{3}k(buk)-ka^{2}k(ka^{3}k)′ra^{2}t(ra^{3}t)-o^{2}n. Gr., βουκκάκρατον. An ancient name for bread dipped into wine and eaten at breakfast. [A, 325.]

BUCCA DEI FIORI (It.), n. Buk′ka^3 da-e fe-o′re. A place in Italy, where there is a warm saline purgative spring. [L, 105.]

BUCCAL, adj. Bu^{3}k′ka^{2}l. Lat., *buccalis.* Fr., *buccal.* Pertaining to the mouth, especially to the inner surface of the cheek. [A, 301.]

BUCCAMANCIE (Fr.), n. Bu^{6}k-ka^3-ma^{3}n^2-se. From βούκκα (see BUCCA), and μαντεία, prediction. The art of forming a prognosis from the appearances within the mouth. [L, 41.]

BUCCEA (Lat.), n. f. Bu^{3}k(buk)′se^2(ke^2)-a^3. A mouthful. [A, 318.]

BUCCELATON (Lat.), n. n. Bu^{3}k(buk)-se^{2}l(ke^{2}l)′a^{2}t(a^{3}t)-o^{2}n. Gr., βουκκέλατον. 1. An ancient purgative preparation consisting of scammony and certain corrigents formed into a cake and baked in an oven. [Aetius (A, 325).] 2. A similar preparation made up of scammony, poppy-seeds, pepper, anise, and fennel made into a cake or a thick electuary with honey. [Paulus Ægineta (A, 325).]

BUCCELLA (Lat.), n. f. Bu^{3}k(buk)-se^{2}l(ke^{2}l)′la^3. 1. A little mouthful. [A, 318.] 2. Of Paracelsus, a nasal polypus, on the theory that such growths consisted of tissue that had wandered from the cheek. [A, 325.]—**B. purgatoria.** Ger., *Purgirbissen.* A purgative bolus. [A, 322.]

BUCCELLATI (Lat.), n. m. pl. Bu^{3}k(buk)-se^{2}l(ke^{2}l)-la(la^3)′-ti(te). Fr., *buccellés.* Of Duméril, a family of the *Neuroptera* having a very small mouth. [L, 180.]

BUCCELLATIO (Lat.), n. f. Bu^{3}k(buk)-se^{2}l(ke^{2}l)-la(la^3)′shi^2-(ti^2)-o. See BUCELLATIO.

BUCCELLATUM (Lat.), n. n. Bu^{3}k(buk)-se^{2}l(ke^{2}l)-la(la^3)′-tu^{3}m(tu^{4}m). 1. A biscuit. [A, 318.] 2. See BUCCEA.—**B. purgatorium.** See BUCCELLA *purgatoria.*

BUCCIN (Fr.), n. Bu^{6}k-sa^{2}n^2. See BUCCINUM.

BUCCINA (Lat.), n. f. Bu^{3}k(buk)′si^{2}n(ki^{2}n)-a^3. See BUCINA.

BUCCINALIS (Lat.), adj. Bu^{3}k(buk)-si^{2}n(ki^{2}n)a(a^3)′li^{2}s. More correctly, *bucinalis.* Fr., *buccinal.* Trumpet-shaped. [L, 41.]

BUCCINATEUR (Fr.), n. Bu^{6}k-si^{2}n-a^3-tu^{6}r. See BUCCINATOR.

BUCCINATO-LABIAL (Fr.), n. Bu^{6}k-si^{2}n-a^3-to-la^3-bi^2-a^{3}l. Of Cruveilhier, the buccinator and orbicularis oris muscles regarded as one muscle. [L, 31.]

BUCCINATO-PHARYNGIEN (Fr.), adj. Bu^{6}k-si^{2}n-a^3-to-fa^{3}r-a^{2}n^2-zhi^2-a^{3}n^2. See PTERYGO-MAXILLARY.

BUCCINATOR (Lat.), n. m. Bu^{3}k(buk)-si^{2}n(ki^{2}n)-a(a^3)′tor; as an English word, bu^{3}k′si^{2}n-a-to^{2}r. More properly written *bucinator.* From *bucinare* (= βυκανίζειν), to sound a trumpet. Fr., *buccinateur.* Ger., *Trompetermuskel, Backenmuskel.* It., *buccinatore.* Sp., *bucinador.* A muscle of the cheek which, arising from the outer surface of the posterior part of the alveolar processes of the upper and lower jaws and from the pterygo-maxillary ligament, passes forward in the form of a layer lying in contact with the mucous membrane of the cheek to be inserted at the angle of the mouth, where it is blended with the orbicularis oris. Its action is to press food between the teeth in mastication, to retract the angle of the mouth, and, when the cheeks are distended with air or liquid, to eject it forcibly from the mouth. [A, 5, 314, 318.]

BUCCINÉ (Fr.), adj. Bu^{6}k-si^{2}n-a. See BUCCINALIS.

BUCCINEÆ (Lat.), n. f. pl. Bu^{3}k(buk)-si^{2}n(ki^{2}n)′e^2-e(a^3-e^2). See BUCCINIDÆ.

BUCCINEUX (Fr.), adj. Bu^{6}k-si^{2}n-u^6. See BUCCINALIS.

BUCCINIDÆ (Lat.), n. f. pl. Bu^{3}k(buk)-si^{2}n(ki^{2}n)′i^{2}d-e(a^3-e^2). Fr., *buccinides.* A family of the *Siphonostomata* having the shell notched in front and the canal abruptly reflected. [L, 227.]

BUCCININA (Lat.), n. n. pl. Bu^{3}k(buk)-si^{2}n(ki^{2}n)-i(e)′na^3. A section of the *Buccinidæ.* [L, 282.]

BUCCINOIDÆ (Lat.), n. f. pl. Bu^{3}k(buk)-si^{2}n(ki^{2}n)-o(o^2)-i(e)′-de(da^3-e^2). Fr., *buccinoïdes.* Of Cuvier, the *Buccinidæ.* [L, 180.]

BUCCINUM (Lat.), n. n. Bu^{3}k(buk)′si^{2}n(ki^{2}n)-u^{3}m(u^{4}m). Fr., *buccin.* A genus of the *Buccinidæ;* also an old name for a dentifrice made of the shell of *B. undatum* calcined with salt. [A, 359; L, 104.]—**B. undatum.** The common whelk. [A, 359.]

BUCCO [Netherl. Ph.] (Lat.), n. f. Bu^{3}k(buk)′ko. Gen., *bucconis,* or indecl. See BAROSMA and BUCHU.—**B. betulina.** See BAROSMA *betulina.*—**B'blätter** (Ger.). Buchu-leaves. [B, 180.]—**B. crenata.** See BAROSMA *crenata.*—**B. long** (Fr.). See BAROSMA *serrulata.*—**B'strauch** (Ger.). The buchu plant. [B, 180.]—**Flüssiges B'extrakt** (Ger.). See *Extractum* BUCHU *fluidum.*—**Folia b.** [Russ. Ph. (6th ed.), Dan. Ph., Norw. Ph., Swed. Ph.]. Buchu-leaves. [B.]—**Infusion de b.** (Fr.). See *Infusum* BUCHU.—**Kerbblättriger B'strauch** (Ger.). The *Barosma crenata.* [B, 180.]—**Lange B'blätter** (Ger.). The leaves of *Barosma serratifolia.* [B, 180.]

BUCCO-BRANCHIAL, adj. Bu^{3}k-o-bra^{3}n^2′ki^2-a^{2}l. From βούκκα (see BUCCA), and βραγχία (see BRANCHIÆ). Pertaining to the mouth and to the branchial cavity. [L, 14.]

BUCCO-LABIAL, adj. Bu^{3}k″ko-la′bi^2-a^{2}l. Lat., *bucco-labialis* (from *bucca* [*q. v.*], and *labium,* the lip). Fr., *bucco-labial.* Pertaining to the cheek and to the lips; as a Fr. n., of Chaussier, the buccinator muscle. [A, 299, 301; L, 41.]

BUCCONEI, BUCCONIDÆ (Lat.), n's m. and f. pl. Bu^{3}k-(buk)-kon(ko^{2}n)′e-i(e), -o^{2}n′i^{2}d-e(a^3-e^2). Fr., *bucconés, bucconides.* A family of the *Scansores.* [L, 121, 180.]

BUCCO-PHARYNGEAL, adj. Bu^{3}k-ko-fa^{2}r-i^{2}n′je^2-a^{2}l. Lat., *bucco-pharyngeus* (from βούκκα [see BUCCA], and φάρυγξ, the pharynx). Fr., *bucco-pharyngien.* It., *bucco-faringeo.* Pertaining to the buccal cavity and the pharynx. [A, 385: L.]

BUCCO-PHARYNGEUS (Lat.), adj. Bu^{3}k(buk)-ko(ko^2)-fa^{2}r-(fa^{3}r)-i^{2}n(u^{6}n^2)′je^2(ge^2)-u^{3}s(u^{4}s). See BUCCO-PHARYNGEAL; as a n., that portion of the superior constrictor muscle of the pharynx which arises from the bucco-pharyngeal aponeurosis. [A, 314.]

BUCCU (Lat.), n. n. Bu^{3}k(buk)′ku^2(ku). See BUCHU.

BUCCULA (Lat.), n. f. Bu^{3}k(buk)′ku^{2}l(ku^{4}l)-a^3. Dim. of *bucca (q. v.).* Fr., *bucculé.* Ger., *Unterkinn, Unterkehle.* 1. A fleshy prominence or fullness beneath the chin, forming a "double chin." [A, 325, 385; L, 41.] 2. A small opening or mouth. [A, 385.]

BUCELLATÆ (Lat.), n. f. pl. Bu^2(bu)-se^{2}l(ke^{2}l)-la(la^3)′te-(ta^3-e^2). See BUCCELLATI.

BUCELLATIO (Lat.), n. f. Bu^2(bu)-se^{2}l(ke^{2}l)-la(la^3)′shi^2(ti^2)-o. Gen., *bucellatio′nis.* A method of stopping hæmorrhage by applying lint over a vein or artery, described by Avicenna. [Falloppius (A, 325).]

BUCELLATON, BUCELLATUM (Lat.), n's n. Bu^2(bu)-se^{2}l-(ke^{2}l)′la^3-to^{2}n, -tu^{3}m(tu^{4}m). See BUCCELATON.

BUCELLÉ (Fr.), adj. Bu^6-se^{2}l-la. Having a small mouth; as a n., in the pl., *b's,* see BUCCELLATI.

BUCEPHALUS (Lat.), adj. Bu^2(bu)-se^{2}f(ke^{2}f)′a^{2}l(a^{3}l)-u^{3}s(u^{4}s). Gr., βουκέφαλος (from βοῦς [see BOS], and κεφαλή, the head). Fr., *bucéphale.* Ger., *ochsenköpfig.* Having a head shaped like that of an ox; as a n., a genus of the *Distoma.* [Bauer (L, 18).]

BUCERAS (Lat.), n. n. Bu^2(bu)′se^{2}r(ke^{2}r)-a^{2}s(a^{3}s). Gen., *bucer′atos (-tis).* Gr., βουκέρας (from βοῦς, an ox, and κέρας, a horn). Fr., *bucère.* Ger., *Ochsenhorn.* The *Trigonella fœnum græcum.* [A, 322; B, 173; L, 105.]—**B. fœnum græcum.** See *B.*

BUCERIDÆ (Lat.), n. f. pl. Bu^2(bu)-se^{2}r(ke^{2}r)′i^{2}d-e(a^3-e^2). For deriv., see BUCERAS. Fr., *bucérides.* The horn-bills; a family of the *Cornirostres* having a large bill and a helmet-like appendage above the upper mandible. [L, 147.]

BUCEROS (Lat.), n. m. Bu^2(bu)′se^{2}r(ke^{2}r)-o^{2}s(os). Gr., βούκερως. See BUCERAS.

BUCEROTIDÆ (Lat.), n. f. pl. Bu^2(bu)-se^{2}r(ke^{2}r)-o^{2}t(ot)′i^{2}d-e-(a^3-e^2). See BUCERIDÆ.

BUCHAMPFER (Ger.), **BUCHAMPFERKRAUT** (Ger.), n's. Buch^2'a^{3}mpf-e^{2}r, -e^{2}r-kra^2-ut. The *Oxalis acctosella.* [B, 180.]

BUCHANANIA (Lat.), n. f. Bu^{2}k-a^{2}n-a^{2}n'i^2-a^3. Named after *Buchanan Hamilton*, a botanist. A genus of anacardiaceous trees. [B, 19.]—**B. angustifolia** [Roxburgh]. A Bengal species, used like *B. latifolia.* [B, 180.]—**B. lancifolia.** An East Indian species, the unripe fruit of which is eaten in curry. [B, 19.]—**B. latifolia.** A species growing in India. The seeds are eaten, and furnish cheroonjee oil. A varnish is made from the fruit. [B, 19, 180.]

BUCHBINDE (Ger.), n. Buch^2'bi^{2}nd-e^2. An eighteen-tailed bandage. [L, 30, 135.]

BUCHE (Ger.), **BÜCHE**, n's. Buch^2'e^2, Bu^{6}ch^2'e^2. The genus *Fagus.* [B.]—**B'ckern.** The fruit of *Fagus silvatica.* [B, 180, 270.]—**B'ckernöl.** Beech-oil. [B, 270.]—**B'npilz.** The *Agaricus ostreatus.* [B.]—**B'ntheer.** Beech-tar. [B.]—**B'ntheerseife.** See *Sapo piceus e bitumine* FAGI.—**Gemeine B.** The *Fagus silvatica.* [B, 180.]

BUCHELN (Ger.), n. pl. Buch^2'e^{2}ln. See BUCH*eckern*.

BUCHELÖL (Ger.), n. Buch^2'e^{2}l-u^{6}l. Beech-oil. [B, 81.]

BUCHENTHAL (Ger.), n. Buch^2'e^{2}n-ta^{3}l. A place in the canton of St. Gallen, Switzerland, where there is a water-cure establishment. [A, 319.]

BUCHFINK (Ger.), n. Buch^2'fi^{2}n^{2}k. The *Fringilla cœleps.* [B, 180.]

BUCHKRAUT (Ger.), n. Buch^2'kra^3-ut. The *Agrimonia eupatoria.* [L, 80.]

BUCHLATTIG (Ger.), n. Buch^2'la^{3}t-ti^{2}g. The *Hieracium murorum.* [B, 180.]

BUCHNEITZEN (Ger.), n. Buch^2'nitz-e^{2}n. The genus *Polygonum.* [L, 135.]

BUCHNEREÆ (Lat.), n. f. pl. Buch^2-ne^2're-e(a^3-e^2). Fr., *buchnérees.* Of Reichenbach, a division of the *Personatæ*; of Bentham, a tribe of the *Scrophularineæ*, comprising *Buchnera* and other genera. [B, 170.]

BUCHNÜSSE (Ger.), n. pl. Buch^2'nu^{6}s-se^2. The nuts of *Fagus silvatica.* [B, 180.]

BUCHO, n. See BACHAO.

BUCHS (Ger.), n. Buch^{2}s. The genus *Buxus.* [B, 270.]—**Australisches B'holz.** The wood of several species of *Pittosporum.* [B, 270.]—**B'baum.** See *B.*—**B'ekapsel.** See PYXIDIUM.—**China-B'holz.** The wood of *Murraya exotica.* [B, 270.]—**Echtes B'holz, Türkisches B'holz.** The wood of *Buxus sempervirens.* [B, 270.] —**Westindisches B'holz.** The wood of a species of *Aspidosperma.* [B, 270.]

BÜCHSE (Ger.), n. Bu^{6}ch^{2}s'e^2. In botany, a theca (*q. v.*). [B, 123.]—**B'nflechte.** The *Cladonia pyxidata.* [L, 80.]—**B'nförmig.** See PYXODES.—**B'nhäutchen.** See PERITHECIUM.—**B'nmoos.** The *Cladonia coccifera.* [B, 180.]—**Moosb'.** See PYXIDIUM.

BÜCHSLEIN (Ger.), n. Bu^{6}ch^{2}s'lin. See PYXIDIUM.

BUCHSTABE (Ger.), n. Buch^2'sta^{3}b-e^2. See STŒCHOS.—**B'nähnlich.** See CHACTERIFORMIS.

BUCHT (Ger.), n. Buch^{2}t. A sinus. [B, 123.]—**B'ig.** Sinuate. [B, 123.]

BUCHU (Lat.), n. n. Bu^2(bu)'ku^2(ch^{2}u). Indecl. An adaptation of the native name. Fr., *buchu, bucco.* Ger., *Bucku.* It., *bucco, bocco.* The leaves of *Barosma betulina, Barosma crenulata,* and *Barosma serratifolia*; used by the Hottentots as a vulnerary, and by European and American practitioners chiefly in catarrhal affections of the urinary tract. [A, 247; B.]—**B'aufguss** (Ger.). See *Infusum b.*—**B. betulinum.** See BAROSMA *betulina.*—**B'blätter** (Ger.), **B. folia** [Br. Ph.]. See *B.*—**B'tinctur** (Ger.), **B'tinktur.** See *Tinctura b.*—**Extractum b. fluidum** [U. S. Ph.]. Fr., *extrait liquide de bucco.* Ger., *flüssiges Buccoextrakt.* Fluid extract of b.; a preparation made by exhausting 25 oz. (av.) of b. with enough alcohol and water (in the proportion of 2 to 1) to make 24 fl. oz. [A, 247.]—**Feuilles de b.** (Fr.). See *B.* —**Fluid extract of b.** See *Extractum b. fluidum.*—**Folia b.** See *B.*—**Infusum b.** [Br. Ph.]. Fr., *tisane de b.* [Fr. Cod.]. Ger., *B'aufguss.* Syn.: *infusum barosmæ* (seu *diosmæ*). A preparation made by infusing 1 part of b. in 20 [Br. Ph.] or 100 [Fr. Cod.] parts of boiling distilled water for thirty minutes and straining. [A, 247.] —**Long b.** The leaves of *Barosma serratifolia.* [B, 5.]—**Round b., Short b.** The leaves of *Barosma crenulata.* [B, 5.]—**Tinctura b.** [Br. Ph.]. Fr., *teinture de b.* [Fr. Cod.]. Ger., *B'tinktur.* A tincture made with 2¾ oz. (av.) of b., in coarse powder, and 1 imperial pint of proof spirit. [B, 5.]—**Tisane de b.** [Fr. Cod.] (Fr.). See *Infusum b.*—**Vin de b.** [Fr. Cod.] (Fr.). Wine of b.; made by macerating 30 parts of b., in coarse powder, in 1,000 of white wine in a closed vessel, with occasional agitation, for ten days, expressing, and filtering. [A, 253.]

BUCHWEIZEN (Ger.), n. Buch^2'vitz-e^{2}n. The genus *Fagopyrum.* [B, 180.]—**B'honig.** A variety of honey made by bees from the flowers of *Polygonum fagopyrum.* [B, 180.]—**Gemeiner B.** The *Fagopyrum esculentum.* [B, 180.]

BUCHWINDE (Ger.), n. Buch^2'vi^{2}nd-e^2. The *Polygonum convolvulus.* [L, 80.]

BUCIDA (Lat.), n. f. Bu^2(bu)'si^{2}d(ki^{2}d)-a^3. From βοῦς (see Bos), on account of the horn-like excrescences on the floral peduncles. A genus of combretaceous trees. [B, 19.]—**B. buceras.** Fr., *bois de grignon, chêne français des Antilles.* The olive-bark or black olive; a West Indian species. The bark is used in tanning and the wood as a preservative from the attacks of insects. [B, 19, 173.]—**B. erecta.** Fr., *manglier droit* (ou *gris*). A West Indian species. The powdered bark is used by insufflation for spots on the cornea. [B, 173.]

BUCIDEÆ (Lat.), n. f. pl. Bu^2(bu)-si^{2}d(ki^{2}d)'e^2-e(a^3-e^2). Fr., *bucidées.* Of Sprengel, a division of the *Thymelæœ*, comprising *Terminalia, Bucida, Quisqualis,* and two other genera. [B, 170.] Cf. TERMINALIEÆ.

BUCINA (Lat.), n. f. Bu^2(bu)'si^{2}n(ki^{2}n)-a^3. Any trumpet-shaped structure, particularly a shell. [A, 318, 325.]

BUCINALIS, BUCINATOR (Lat.), adj. and n. m. Bu^2(bu)-si^{2}n(ki^{2}n)-a(a^3)'li^{2}s, -a(a^3)'to^{2}r. More correct forms of *buccinalis* and *buccinator* (*q. v.*).

BUCKA, n. See BUCHU.

BUCK-BEAN, n. Bu^{3}k'ben. Written also *bog-bean.* See MENYANTHES *trifoliata.*—**B.-b. leaves.** See *Folia* TRIFOLII *fibrini.*

BUCKCHE (Hind.), n. The *Conyza anthelminthica.* [B, 172.]

BUCKEL (Ger.), n. Buk'e^{2}l. A hump-like curvature of the spinal column; in botany, see UMBO. [B, 123; L, 135.]

BUCKET, BUCKET FEVER, n's. Bu^{3}k'e^{2}t. Dengue (*q. v.*). [G.]

BUCKEYE, n. Bu^{3}k'i. The *Æsculus glabra.* [B, 19, 75.]—**Ohio b.** See *B.*—**Red b.** The *Æsculus pavia.* [L, 61.]

BUCKHO, n. See BUCHU.

BUCKLANDEÆ [Lindley] (Lat.), n. f. pl. Bu^{3}k-la^{2}nd'e^2-e(a^3-e^2). A tribe of the *Hamamelidaceæ*, including *Bucklandia* and another genus. [B, 170.]

BUCKLANDIEÆ (Lat.), n. f. pl. Bu^{3}k-la^{2}nd-i(i^2)'e^2-e(a^3-e^2). Of Endlicher, Jussieu, and Reichenbach, a tribe of the *Hamamelideæ*, comprising the single genus *Bucklandia.* [B, 170.]

BUCKLER, n. Bu^{3}k'lu^{5}r. In the trilobites, the anterior segment of the carapax. [Dana (A, 302).]—**Cephalic b.** In the *Crustacea*, the cephalo-thorax. [L, 147.]

BUCKLEYEÆ (Lat.), n. f. pl. Bu^{3}k-li^2'e^2-e(a^3-e^2). Of De Candolle, a tribe of the *Santalaceæ*, including the single genus *Buckleya.* [B, 19, 34, 170.]

BUCKLICHTSEIN (Ger.), n. Buk'li^{2}ch^{2}t-zin. A gibbosity. [A, 322.]

BUCKO, n. See BUCHU.

BUCKOWINE (Ger.), n. Buk-o-ven'e^2. See BUCOWIENE.

BUCK'S-HORN, n. Bu^{3}kz'ho^{2}rn. See CORNU CERVI.—**B. plantain.** The *Plantago coronopus.* [L, 73.]—**Ruellius's b.** The *Senebiera coronopus.* [B, 200.]

BUCKTHORN, n. Bu^{3}k'tho^{2}rn. The genus *Rhamnus.* [B, 19; L, 77.]—**Alder b.** The *Rhamnus frangula.* [B.]—**B. bark.** See FRANGULA.—**B. juice.** See RHAMNI *succus.*—**California b.** See RHAMNUS *purshiana.*—**Common b.** The *Rhamnus catharticus.* [A, 247.]—**Dyer's b.** The *Rhamnus infectorius.* [B, 19.]—**Palestine b.** The *Rhamnus paliurus.* [L, 116.]—**Purging b.** The *Rhamnus catharticus.* [A, 247.]—**Sea-b.** The *Hippophae rhamnoides.* [B, 19.]—**Syrup of b.** See *Syrupus* RHAMNI.

BUCKU, n. See BUCHU.

BUCKWHEAT, n. Bu^{3}k'hwet. Fr., *sarrasin.* Ger., *Buchweizen.* The *Polygonum fagopyrum.* [B.]—**B. family.** The *Polygonaceæ.* [B, 75.]—**B.-tree.** The *Cliftonia ligustrina.* [B, 19, 75, 81.]—**Eastern b.** The *Polygonum divaricatum.* [L, 102.]—**West Indian b.** The *Anredera scandens.* [B, 19.]

BUCKWURZEL (Ger.), n. Buk'vurtz-e^{2}l. The root of *Artemisia vulgaris.* [B, 180.]

BUCK-YAM, n. Bu^{3}k'ya^{2}m. The *Dioscorea triphylla.* [L, 65.]

BUCLESORE, n. A place in Bengal, where there is a hot sulphurous spring. [L, 49.]

BUCNEMIA (Lat.), n. f. Bu^{3}k(buk)-ne(na)'mi^2-a^3. From the augmentative particle βοῦ, and κνήμη, the leg. Elephantiasis of the leg. [G.]—**B. indica.** See *B.*—**B. sparganotica.** See PHLEGMASIA *alba dolens.*—**B. tropica.** See *Barbadoes* LEG.

BUCOWIENE (Ger.), n. Buk-o-ven'e^2. A place in Lower Silesia, where there are springs rich in iron. [L, 57, 135.]

BUCRANION (Lat.), n. n. Bu^2(bu)-kran(kra^{3}n)'i^2-o^{2}n. From βουκράνιος, like an ox's head. The genus *Antirrhinum.* [L, 84.]

BUCTON (Lat.), n. n. Bu^{3}k(buk)'to^{2}n. The hymen. [Severinus Piriæus (A, 325).]

BUD, n. Bu^{3}d. Gr., βλαστός. Lat., *gemma.* Fr., *bourgeon.* Ger., *Knospe.* 1. In botany, a prominence consisting of an aggregation of rudimentary structures destined to develop into a leaf or a flower. [B, 75.] 2. In zoology, a prominence resembling the b. of a plant, especially, in the embryo, one that subsequently develops into a limb or other special structure; also one that develops into an independent animal. [L.]—**Accessory b.** A b. developed along with the axillary b. and in close proximity to it. [B, 34.]—**Accidental b.** See *Adventitious b.*—**Active b.** A b. which develops into a leaf, either immediately or, in the case of a winter b., in the following spring. [B, 34.]—**Adventitious b.** Ger., *Adventivknospe.* A b. formed upon an old and fully developed part of a plant, as on an internode of the stem, on the, or on a leaf. [B, 75.] —**Apical b.** See *Terminal b.*—**Axillary b.** A b. that develops in the axil of a leaf. [B, 34.]—**B.-cell.** See under CELL.—**Compound b.** A b. containing several stems or twigs. [B.]—**Dormant b.** See *Latent b.*—**Embryo b.** A b. resembling a woody nodule formed in the bark of a tree, capable of extending into a branch. [B.]—**Flower-b.** A b. which develops into a flower. [B, 34.]—**Generative b., Genital b.** See GONOPHORE.—**Gustatory b's.** See *Taste-b's.*—**Latent b.** A b. which remains undeveloped for an indefinite period. [B, 34.]—**Lateral b.** Ger., *Seitenknospe.* A b. occurring as a sessile lateral outgrowth on the parent stem; really terminal, forming the apex of a very short undeveloped branch. [B, 75, 143.]—**Leaf-b.** A b. that develops into a leaf. [B, 34.]—**Medusa-b's.** Processes given off from the surface of a

Medusa, which separate and become developed individuals. [L, 121.]—**Mixed b.** A b. containing both leaf and flower elements. [*a*, 15.]—**Naked b.** See *Summer b.*—**Normal b.** A single terminal or axillary b. [*a*, 15.]—**Red-b.** The genus *Cercis*. [B, 34.]—**Regular b.** See *Normal b.*—**Scaly b.** See *Winter b.*—**Sexual b.** See GONOPHORE.—**Subpetiolar b.** A b. formed under the base of a leaf-stalk. Such a b. remains very undeveloped and is concealed until the fall of the leaf. [*a*, 15.]—**Summer b.** A b. consisting simply of a mass of rudimentary leaves without enveloping scales. [B, 75.]—**Supernumerary b.** See *Accessory b.*—**Taste-b's.** Ger., *Geschmackknospen*. Ovoid or flask-shaped bodies situated around the circumvallate papillæ of the tongue, with their apices projecting between the epithelial cells in the form of filaments. They have been thought to be organs of taste, but they occur where there is no sense of taste. [L, 142, 233.]—**Terminal b.** A b. developed at the apex of an axis of a plant. [B.]—**Winter b.** A b. covered with hardened scales consisting of transformed leaves, so that its development is arrested until the following spring. [B, 75.]

BUDA, n. See OFEN.

BUDAM (Hind.), n. The *Terminalia catappa*. [B, 172.]

BUDDING, n. Bu^{3}d'i^{2}ng. See GEMMATION.

BUDDLE, n. Bu^{3}dl. The *Chrysanthemum segetum*. [B, 275.]

BUDDLEEÆ [Bentham] (Lat.), n. f. pl. Bu^{3}d-le'e^2-e(a^3-e^2). See BUDDLEIEÆ.

BUDDLEIA (Lat.), n. f. Bu^{3}d-le'i^2-a^3. After *A. Buddle*, an English botanist. Of Houston, a genus of loganiaceous herbs, shrubs, and small trees of the tribe *Loganieæ*. [B, 215.]—**B. americana** [Linnæus]. Sp., *tepozan* [Mex. Ph.]. A small tree of the West Indies and South America. The leaves are used in fomentations and baths. [J. M. Maisch, "Am. Jour. of Pharm.," Mar., 1886, p. 122; B, 180.]—**B. connata** [Ruíz and Pavón]. A Brazilian species, used like *B. americana*. [B, 180.]—**B. globosa** [Lamarck]. A Chilian species, used like *B. americana*. [J. M. Maisch, "Am. Jour. of Pharm.," Feb., 1886, p. 72; B, 180.]—**B. verticillata** [Kunth]. Sp., *mispatle*. A Mexican species. A decoction of the leaves is used as a vulnerary. [J. M. Maisch, "Am. Jour. of Pharm.," Jan., 1886, p. 20.]

BUDDLEIEÆ (Lat.), n. f. pl. Bu^{3}d-le'e^2-e(a^3-e^2). Of Bartling, Bentham, and others, a division of the *Scrophularineæ*, comprising *Buddleia*, also, according to Bartling, some other genera. [B, 170.]

BUDDLEJA [Ruíz and Pavón] (Lat.), n. f. Bu^{3}d-le'ya^3. See BUDDLEIA.

BUDDLIEÆ (Lat.), n. f. pl. Bu^{3}d-le'e^2-e(a^3-e^2). See BUDDLEIEÆ.

BUDE, n. See OFEN.

BUDOSKO, n. A place in Hungary, where there is a hot sulphurous spring. [L, 49.]

BUDREE (Bengal.), n. The *Zizyphus jujuba*. [B, 172.]

BUDRUNGA-GELBHOLZ (Ger.), n. Bud"run^2-ga^3-ge^{2}lb'-ho^{3}ltz. The *Xanthoxylum budrunga*. [B, 180.]

BUÉ (Fr.), n. Bu^6-a. A place in the department of the Hautes-Pyrénées, France, where there is a chalybeate spring. [L, 49.]

BUECPHLYSIS (Lat.), n. f. Bu^2(bu)-e^{2}k'fli^2(flu^6)-si^{2}s. Gen., *buecphlys'eos* (*-ec'phlysis*). From βοῦς (see Bos), and ἐκφλύειν, to boil up. See COW-POX.

BUÉE (Fr.), n. Bu^6-a. Visible condensed vapor of water or perspiration. [A, 385.]

BUELON (Lat.), n. n. Bu^2(bu^4)-e(a)'lo^{2}n. An ancient net-like scoop used in lithotomy. [Sanctus Barolitanus (A, 325).]

BUENA (Lat.), n. f. Bwan'a^3. Fr., *buéne*. A genus of rubiaceous trees, distinguished from *Cinchona* by the shape of the corolla, the dehiscence of the capsule from the apex instead of the base, and the separation of the calyx from the fruit; now included in the genus *Cascarilla*. [B, 5, 23.]—**Brasilianische B.** (Ger.), **B. hexandra** [Pollich]. The *Centaurea speciosa*. [B, 173, 180.]—**B. magnifolia.** The *Cascarilla magnifolia*. [L, 65.]

BUENIN, n. Bwan'i^{2}n. Fr., *buénine*. A principle obtained by Buchner from the bark of *Centaurea speciosa*. [A, 301, 385.]

BUETTNERA (Lat.), n. f. Bu^{6}t'ne^{2}r-a^3. See BUETTNERIA.

BUETTNEREÆ (Lat.), n. f. pl. Bu^{6}t-ne^{2}r'e^2-e(a^3-e^2). Of Sprengel, a family of plants, including *Buettneria*, *Abroma*, *Helicteres*, *Sterculia*, and other genera; of Reichenbach, a division of the *Geraniaceæ*, comprising the subdivisions *Dombeyaceæ*, *Lasiopetaleæ*, and *Theobromeæ* (1831), or (1837) the *B. genuinæ* (comprising *Buettneria* and four other genera), the *Lasiopetaleæ*, and the *Theobromeæ*. [B, 170.] Cf. STERCULIACEÆ.

BUETTNERIA (Lat.), n. f. Bu^{6}t-ne^{2}r'i^2-a^3. After *D. S. A. Buettner*, of Göttingen. A genus of sterculiaceous plants of the tribe *Buettnerieæ*. [B, 19.]—**B. catalpifolia.** An arborescent species with long-petiolate leaves. [B, 19.]—**B. cordata** [Lamarck]. Ger., *Spinnenkraut*. A Peruvian species. The bruised leaves are used for venomous bites. [B, 180.]—**B. heterophylla.** A Madagascar climbing species. [B, 19.]

BUETTNERIACEÆ (Lat.), n. f. pl. Bu^{6}t-ne^{2}r-i^2-a(a^3)'se^2-(ke^2)-e(a^3-e^2). Ger., *Büttneriaceen*. Of R. Brown and others, the *Sterculiaceæ*; divided by Kunth and De Candolle into the sections or tribes *Sterculiaceæ*, *B. veræ* (the *Buettnerieæ* of De Candolle), *Lasiopetaleæ*, *Hermanniaceæ* (the *Hermannieæ* of De Candolle), and *Dombeyaceæ*. [B, 42, 170.]—**B. veræ** [Kunth]. See BUETTNERIEÆ.

BUETTNERIÆ (Lat.), n. f. pl. Bu^{6}t-ne^{2}r'i^2-e(a^3-e^2). A tribe of the *Buettneriaceæ*, including *Theobroma* and *Guazuma*. [B, 170.] Cf. BUETTNERIEÆ.

BUETTNERIEÆ (Lat.), n. f. pl. Bu^{6}t-ne^{2}r-i(i^2)'e^2-e(a^3-e^2). Of De Candolle and others, a tribe of the *Buettneriaceæ*, including *Theobroma*, *Abroma*, *Guazuma*, *Buettneria*, etc. [B, 42, 170.]

BUFFALO, n. Bu^{3}f'a^{2}l-o. See Bos *bubalus*.—**B.-berry.** The *Shepherdia argentea*. [B, 19.]—**B.-grass.** The *Buchloe dactyloides*. [B, 245.]

BUFFALO LITHIA SPRINGS, n. Bu^{3}f'a^{2}l-o li^{2}th'i^2-a^3. A place in Mecklenburg County, Virginia, where there are three springs containing respectively, according to W. P. Tonry, the following constituents in each imperial gallon:

	No. 1.	No. 2.	No. 3.
Magnesium sulphate....	1·530 grains.	0·885 grains.	0·150 grains.
Aluminium sulphate....	8·180 "	9·067 "	3·035 "
Potassium sulphate.....	0·463 "	... ..	......
Calcium sulphate... ...	19·251 "	33·067 "	2·:53 "
Potassium carbonate ...	......	29·300 "	1·852 "
Calcium bicarbonate....	39·277 "	14·963 "	2·524 "
Lithium bicarbonate....	1·484 "	2·250 "	traces.
Iron bicarbonate........	0·500 "	0·300 "	3·774 "
Barium bicarbonate	......	1·750 "	......
Sodium chloride	1·256 "	4·921 "	0·217 "
Silicon chloride....... ..	1·725 "	1·873 "	0·570 "
Phosphoric acid	traces.	traces.	traces.
Iodine...............	traces.	traces.	... ..
Organic matter	traces.	traces.	traces.
Hydrogen sulphide	5·9 cu. in.	8·3 cu. in.	3·4 cu. in.
Carbon dioxide	69·1 " "	59·2 " "	11·6 " "

Used in rheumatic, gouty, and nervous affections. [A, 363; G. H. Boyland, "N. Y. Med. Jour.," Aug. 20, 1887, p. 213.]

BUFFBOHNE (Ger.), n. Buf'bon-e^2. The *Vicia faba*. [B, 180.]

BÜFFEL (Ger.), n. Bu^{6}f'fe^{2}l. See Bos *bubalus*.—**B'horn.** A name given in southern Africa to the wood of *Burchelia capensis*. [B, 19.]

BUFFELI, n. A ring of buffalo-horn, to be worn on the ring-finger as a cure for cramp. [L, 84.]

BUFFLE (Fr.), n. Bu^{6}fl. See Bos *bubalus*.

BUFFONIEÆ (Lat.), n. f. pl. Bu^{6}f-fo^{2}n-i(i^2)'e^2-e(a^3-e^2). Of Reichenbach, a subsection of the *Sabulineæ*, comprising the single genus *Buffonia*. [B, 170.]

BUFFY COAT, n. Bu^{3}f'fi^2-ko^{3}t. Gr., χόριον φλογιστικόν. Lat., *crusta inflammatoria* (seu *pleuritica*). Fr., *couenne inflammatoire* (ou *pleurétique*). Ger., *Speckhaut*. It., *cotenna infiammatoria*. Sp., *costra inflamatoria*. A peculiar yellowish-white or grayish crust observed on coagulating blood under certain conditions (when coagulation is retarded or when the blood contains an excess of fibrin), formerly considered to be diagnostic of inflammation. The surface is often concave, and the clot is then said to be "cupped." The formation of the b. c. is due to a more or less complete subsidence of the red corpuscles before coagulation takes place. [A, 301; K.]

BUFIDINE, n. Bu^2'fi^{2}d-en. From *bufo* (*q. v.*). Fr., *bufidine*. Ger., *Bufidin*. Syn.: *phrynine*. An alkaloid obtained from the venom of toads; constituting, according to Casali, the active principle of the venom of *Bufo viridis* and *Bufo cinereus*. According to Fornara, it is poisonous to cold-blooded animals in small subcutaneous doses, the effects resembling those of digitalin. [T. Husemann (A, 319); B, 270.]

BUFO (Lat.), n. m. Bu^2(bu)'fo. Gen., *bufo'nis*. Gr., μύοξος. Ar., *naraqua*. Fr., *crapaud*. Ger., *Kröte*. It., *rospo*. Sp., *sapo*. 1. The toad; a genus of the *Bufonidæ*, including the toads. [L, 147.] 2. Of the alchemists, the philosopher's stone. [F. Hofmann (A, 325).] 3. Of Paracelsus, a bubo. [H.]—**B. cinereus.** Fr., *crapaud commun*. Ger., *gemeine* (oder *graue*, oder *aschgraue*) *Kröte*, *Feldkröte*. Syn.: *B. vulgaris* [Laurenti], *Rana b.* [Linnæus]. The common toad, formerly used in medicine. When surprised, it ejects an irritant urine from the anus, and a yellowish-white secretion flows from the cutaneous glands. The latter has feeble venomous properties, but is not absorbed by an unbroken cutaneous or mucous surface. [A, 301; B, 180.]—**B'nes exsiccati.** Ger., *getrocknete Kröten*. Dried toads of various species; formerly applied to pestilential boils and given internally as a diuretic in dropsy, also for scabies. [B, 180.]—**B. vulgaris.** See *B. cinereus*.—**Herba b'nis.** The *Chenopodium botrys*. [B, 180.]—**Oleum b'num.** See BALSAMUM *tranquillans*.

BUFONIDÆ (Lat.), n. f. pl. Bu^2(bu)-fo^{2}n(fon)'i^{2}d-e(a^3-e^2). Fr., *bufonides*. A section of the *Anura* or a subfamily of the *Bufonina*. [L, 147, 204.]

BUFONIFORMIA (Lat.), n. n. pl. Bu^2(bu)-fo^{2}n(fon)-i^2-fo^{2}rm'-i^2-a^3. From *bufo*, a toad, and *forma*, form. Of Cope, a group of the *Batrachia salientia*. [L, 204.]

BUFONINA (Lat.), n. n. pl. Bu^2(bu)-fo^{2}n(fon)-i(e)'na^3. Of Günther, a section of the *Opisthoglossa oxydactyla* or a family of the *Anura*. [L, 204.]

BUFONITES (Lat.), n. m. Bu^2(bu)-fo^{2}n(fon)-i(e)'tez(tas). Gen., *bufoni'tæ*. Ar., *hagiar alnaraqua*. Gr., λίθος μυοξονίτης. Fr., *crapaudine*. Ger., *Krötenstein*. The toad-stone; formerly believed to be generated in the toad, but now known to be the tooth of an extinct fish (the *Palæobalistum* of De Blainville). Magical and medicinal virtues were formerly ascribed to toad-stones. [A, 325; B, 180; L, 135.]

BUFONOIDEA (Lat.), n. n. pl. Bu^2(bu)-fo^{2}n(fon)-o(o^2)-i^{2}d(ed)'-e^2-a^3. From *bufo*, a toad, and εἶδος, resemblance. See BUFONIDÆ.

BUFONOIDES (Lat.), n. m. pl. Bu^2(bu)-fo^{2}n(fon)-o(o^2)-i(e)'-dez(de^{2}s). Of Fitzinger, a family of the *Mutabilia*. [L, 204.]

BUG, n. Bu^{3}g. Gr., κόρις. Lat., *cimex*, *scarabæus*. Fr., *punaise*. Ger., *Wanze*. It., *cimice*. Sp., *chinche*. A common term for various sorts of insects, especially the *Acanthia lectularia*.

—**Bed-b.** See ACANTHIA *lectularia*.—**B.-agaric.** See AGARICUS *muscarius*.—**B'bane, B'wort.** The genus *Cimicifuga*. [A, 252; B, 19.]

BUG (Ger.), n. Bug. In veterinary medicine, a joint. [L, 30.]—**B'binde.** A bandage for holding a bone in place after the reduction of a dislocation. [L, 30.]—**B'gelenk.** The humero-scapular joint of the horse. [L, 30.]—**B'lahm.** Lame in the fore leg (said of horses). [L, 30.]—**B'schwinden.** Atrophy of the upper portion of a horse's fore foot. [L, 30.]—**Hinterb'.** A horse's hip. [L, 30.]—**Vorderb'.** A horse's shoulder. [L, 30.]

BUGANTIA (Lat.), n. f. Bu^2(bu)-ga^{2}n(ga^{3}n)'shi^2(ti^2)-a^3. Ger., *Frostbeule*. It., *buganza*. A chilblain. [A, 322, 325; G, 16.]

BUGAVE (Fr.), n. Bu^6-ga^{3}v. The *Ononis spinosa*. [B, 173.]

BÜGEL (Ger.), n. Bu^{6}g'e^{2}l. Lit., a hoop. [A, 315.] See CONUS and STAPHYLOMA *posticum Scarpæ*.

BUGLE, n. Bu^{2}gl. Lat., *bugula*. Fr., *bugle*. Ger., *Günsel*. It., *bugola*. The genus *Ajuga*. [B.]—**B. de Genève** (Fr.). The *Ajuga genevensis*. [B.]—**B. pyramidale** (Fr.). The *Ajuga pyramidalis*. [B, 119.]—**B. rampante** (Fr.). The *Ajuga reptans*. [B, 173.]—**B'weed.** The *Lycopus virginicus*. [B, 81.]—**Common b.** The *Ajuga reptans*. [B, 173.]—**Mountain-b.** The *Ajuga pyramidalis*. [B.]—**Water-b.** See *B'weed*.

BUGLOSS, n. Bu^2'glo^{2}s. Gr., βούγλωσσον, βούγλωσσος (from βοῦς, an ox, and γλῶσσα, the tongue), from a fancied resemblance of the leaf to an ox's tongue. Lat., *buglossa, buglossos, buglossum*. Fr., *buglosse* [Fr. Cod.], *buglose*. Ger., *Rindszunge*. It., *buglossa*. Sp., *buglosa*. A popular name for various species of *Anchusa*, especially *Anchusa officinalis* and *Anchusa italica*. [B, 19.]—**B. cowslip.** See PULMONARIA.—**Small b.** The *Anchusa arvensis*. [B, 19.]—**Viper's b.** The *Echium vulgare*. [B, 81.]—**Wild b.** The genus *Lycopsis*. [B, 19.]

BUGLOSSA (Lat.), n. f. Bu^2(bu)-glo^{2}s(glos)'sa^3. See ANCHUSA.—**B. latifolia.** The *Borago officinalis*. [B, 180.]—**B. lutea.** The *Onosma echioides*. [B, 180.]—**Radix buglossæ.** The root of *Anchusa officinalis*. [B, 180.]

BUGLOSSE (Fr.), n. Bu^6-glos. The bugloss; of the Fr. Cod., the *Anchusa italica* (*paniculata*) and *Anchusa officinalis*. [B.]—**B. à feuilles étroites.** The *Anchusa angustifolia*. [B, 173.]—**B. de Virginie.** The *Anchusa virginica*. [B, 173.]—**B. officinale.** The *Anchusa officinalis*. [B, 173.]—**Conserve de b.** See *Conserva* ANCHUSÆ.—**Eau de b., Hydrolat de b.** See *Aqua* ANCHUSÆ.—**Petite b.** The *Lycopsis arvensis*. [B.]—**Sirop de b.** See *Syrupus* BUGLOSSI.

BUGLOSSEÆ (Lat.), n. f. pl. Bu^2(bu)-glo^{2}s(glos)'se^2-e(a^3-e^2). Of D. and G. Don, a tribe of the *Boragineæ*, comprising the subtribes *Anchuseæ* and *Cynoglosseæ*. [B, 170.]

BUGLOSSOÏDE (Fr.), adj. Bu^6-glos-so-ed. Resembling a bugloss. [L, 41.]

BUGLOSSOS (Lat.), n. m. Bu^2(bu)-glo^{2}s(glos)'so^{2}s. See BUGLOSS.

BUGLOSSUM (Lat.), n. n. Bu^2(bu)-glo^{2}s(glos)'su^{3}m(su^{4}m). See BUGLOSS and ANCHUSA.—**B. agreste.** The *Echium vulgare*. [B, 180.]—**B. amœnum.** The *Anchusa amœna*. [B, 173.]—**B. angustifolium.** The *Anchusa angustifolia*. [B, 173.]—**B. arvense.** The *Lycopsis arvensis*. [B, 180.]—**B. arvense annuum.** The *Alkanna tinctoria*. [B, 180.]—**B. boraginis folio.** See *B. sempervirens*.—**B. elatum.** The *Anchusa amœna*. [B, 173.]—**B. italicum.** See ANCHUSA *officinalis*.—**B. latifolium.** See BORAGO *officinalis*.—**B. officinale** [Lamarck]. Fr., *buglossa officinale*. Ger., *gebräuchliche Rindszunge*. See ANCHUSA *officinalis*.—**B. radice rubra.** The *Anchusa tinctoria*. [L, 104.]—**B. sempervirens** [Gärtner]. An evergreen species, formerly used in medicine. [B, 180.]—**B. silvestre.** The *Lycopsis arvensis*. [B, 180.]—**B. tinctorium.** The *Anchusa tinctoria*. [B, 173.]—**B. urbanum, B. verum.** The *Borago officinalis*. [B, 180.]—**B. vulgare** [Bauhin]. The *Anchusa officinalis*. [B, 180.]—**Flores buglossi.** The flowers of *Anchusa officinalis*. [B, 90, 180.]—**Folia buglossi.** The leaves of *Anchusa officinalis* and *Anchusa italica*. [B, 95.]—**Herba buglossi.** The herb of *Anchusa officinalis*. [B, 180.]—**Radix buglossi.** The root of *Anchusa officinalis*. [B, 180.]—**Syrupus buglossi.** Fr., *sirop de buglosse*. A syrup made by digesting 1 part of the flowers of *Anchusa officinalis* with 2 parts of boiling water and, after expression and clarification, adding 16 parts of sugar to 9 of the decoction. [Württemb. Ph., 1798 (B, 119).]

BUGLOSSUS (Lat.), n. m. Bu^2(bu)-glo^{2}s(glos)'su^{3}s(su^{4}s). See BUGLOSSUM.—**B. quercinus.** The *Fistulina buglossoides*. [B, 173.]

BUGONES (Lat.), n. f. pl. Bu^2(bu)'go^{2}n-ez(e^{2}s). Gr., βουγενεῖς (= βοηγενεῖς [from βοῦς, an ox, and γένος, descent]). An ancient name for wild bees, which were thought to spring from the carcasses of oxen; powdered and mixed with honey, they were used in medicine. [A, 325.]

BUGRANDE (Fr.), n. Bu^6-gra^{3}nd. See BUGRANE.

BUGRANE (Fr.), n. Bu^6-gra^{3}n. The *Ononis spinosa*. [B. 173.]—**B. des champs.** The *Ononis arvensis*. [B, 119.]—**B. épineuse.** See *B.*—**Eau de b.** See *Aqua* ONONIDIS.

BUGULA (Lat.), n. f. Bu^2(bu)'gu^2(gu^4)-la^3. See AJUGA.—**Herba bugulæ.** The herb of *Ajuga pyramidalis* and of *Ajuga reptans*. [B, 180.]

BUGULIDÆ (Lat.), n. f. pl. Bu^2(bu)-gu^{2}l(gu^{4}l)'i^{2}d-e(a^3-e^2). A family of the *Cornea*. [L, 303.]

BUHLKRAUT (Ger.), n. Bul'kra^3-ut. The *Chenopodium olidum*. [B, 180.]

BUHOOARI (Hind.), n. The *Cordia myxa* (or *latifolia*). [B, 172.]

BUHURA (Bengal., Hind.), n. The *Terminalia bellerica*. [B, 172.]

BUIATRICA (Lat.), n. f. Bu^2(bu)-i^2-a^{2}t(a^{3}t)'ri^{2}k-a^3. From βοῦς, an ox, and ἰατρική (fem. of adj. ἰατρικός [τέχνη understood]), the healing art. Ger., *Rindviehheilkunde*. The art of medicine applied to the diseases of cattle. [A, 322.]

BUIS [Fr. Cod.] (Fr.), n. Bwe. The *Buxus sempervirens*. [B.]—**B. à bordures.** The *Buxus sempervirens suffruticosa*. [B, 173.]—**B. bénit.** See *B.*—**B. de Chine.** The *Murraya exotica*. [B, 173.]—**B. de sable.** The *Hura crepitans*. [B, 173.]—**B. nain.** See *B. à bordures*.—**B. piquant.** The *Ruscus aculeatus*. [B, 173.]—**B. toujours vert.** See *B.*—**Écorce de b.** [Fr. Cod.]. Lat., *cortex buxi*. The bark of *Buxus sempervirens*. [A, 253.]—**Extrait de b.** See *Extractum* BUXI.—**Faux b.** See *B. piquant*.—**Huile de b.** See *Oleum* BUXI.

BUISARD (Fr.), n. Bwe-za^{3}r. A place near Château-Thierry, France, where there is an alkaline sulphurous spring. [L, 105.]

BUISSON (Fr.), n. Bwes-o^{2}n^2. A bush, also the *Clavaria coralloides*. [B, 173; L, 180.]—**B. à baies de neige.** The *Chiococca racemosa*. [B, 173.]—**B. ardent.** The *Mespilus pyracantha*. [B, 173.]—**B. de cire.** The *Myrica cordifolia*. [B, 173.]—**B. de Kühne.** A motor end-plate. [J.]—**B. de Noël.** See ALCHORNEA *cordata*.—**B. pyracanthe.** See *B. ardent*.

BUISSONNETTES (Fr.), n. pl. Bwes-o^{2}n-e^{2}t. The *Clavaria amethystina*. [B, 105.]

BUISSONNEUX (Fr.), adj. Bwes-o^{2}n-u^6. Bushy. [L, 180.]

BUISSONNIER (Fr.), adj. Bwes-o^{2}n-i-a. As a species name, living among or upon bushes. [L, 180.]

BUISSONS (Fr.), n. pl. Bwes-o^{2}n^2. See BUISSONNETTES.

BUJJERBHANG (Ar.), n. The *Nicotiana tabacum*. [L, 105.]

BUJUTO (It.), n. Bu-yu'to. A place in Sicily, where there is a spring containing magnesium carbonate and sulphur. [L, 49.]

BUKA (Bengal.), n. See BUKO.

BUKAM PADARUKA (Sanscr.), n. The *Cordia myxa*. [L, 105.]

BUKARJUN (Hind.), **BUKAYUM** (Hind.), n's. The *Melia sempervirens*. [B, 172.]

BUKE (Bengal.), n. See BUKO.

BUKKU, n. See BUCHU.

BUKKUM (Hind.), n. The *Cæsalpinia sappan*. [B, 172.]

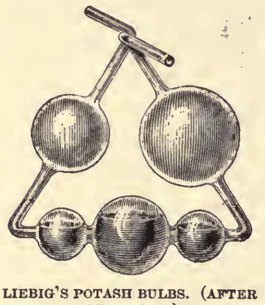
BUKO (Bengal.), n. The *Agati grandiflora*. [B, 172.]

BUKOOL (Bengal.), n. The *Mimus elengi*. [B, 172.]

BULA (Hind.), n. The *Terminalia bellerica*. [B. 172.]

BULACAN, n. A climbing bacciferous plant of the Philippines. The juice of the root is said to be purgative and to hasten the expulsion of the dead fœtus. [L, 105.]

BULAM FEVER, n. See under FEVER.



BULAPATHUM (Lat.), n. n. Bu^2(bu)-la^{2}p(la^{3}p)'a^{2}th(a^{3}th)-u^{3}m-(u^{4}m). Fr., *bulapathe*. The *Polygonum bistorta*. [L, 105.]

BULATA, n. See BALATA.

BULAT-WELA, BULA-WÆLA, n's. The betle. [L, 104, 119.]

BULB, n. Bu^{3}lb. Gr., βολβός. Lat., *bulbus*. Fr., *bulbe*. Ger., *Knollen, Zwiebel, Kolbe*. It., Sp., *bulbo*. 1. In general, any rounded, more or less spherical or ovoid body, whether solid or hollow. 2. In botany, an abbreviated, more or less globular plant-axis enveloped above by an aggregation of fleshy leaves (a leaf-bud) and bearing roots below, also a swollen portion of the pedicle of certain *Fungi*. [A, 301; B, 19, 270.]—**Aortic b.** Lat., *bulbus aortæ*. Fr., *bulbe aortique*. Ger., *Aortenzwiebel*. The expanded initial portion of the aorta; in embryology, the aortic (or primitive arterial) stem (see *Arterial b.*); in comparative anatomy, a bulbous enlargement of the cardiac aorta which contains striped muscular fibres and contracts rhythmically. [L, 11.]—**Arterial b.** Fr., *bulbe artériel*. Of the embryonic heart, the anterior portion, which by division gives rise to the aortic and pulmonary stems. [L, 142.]—**Auditory b.** Fr., *bulbe auditif*. An obsolete term for the cochlea and the membranous labyrinth taken together. [A, 385; L, 49.]—**Brachial b., Brachio-rhachidian b.** The cervical enlargement of the spinal cord at the point where the nerves forming the brachial plexus are given off. [L, 13.]—**B.-axis.** A plant-axis consisting of a b. [B, 75.]—**B. of a hair.** See HAIR-BULB.—**B. of a tooth.** See *Tooth*-PULP.—**B. of Rouget.** See *B. of the ovary* (2d def.).—**B. of the corpus cavernosum.** Lat., *bulbus corporis cavernosi penis*. An enlargement of the crus of the corpus cavernosum at the root of the penis. [C; L, 142.]—**B. of the corpus spongiosum.** See *B. of the urethra*.—**B. of the eye.** Lat., *bulbus oculi*. Fr., *bulbe de l'œil*. Ger., *Augapfel*. The eyeball. [F.]—**B's of the female.** See BULBI *vestibuli vaginæ*.—**B. of the fornix.** See SPLENIUM.—**B. of the olfactory nerve.** See *Olfactory b.*—**B. of the ovary.** Fr., *bulbe* (ou *portion bulbeuse*) *de l'ovaire*. 1. The body or internal part of the organ, as distinguished from its glandular exterior. [A, 15.] 2. A plexus of blood-vessels contiguous to the attached border of the ovary and extending between the folds of the broad ligament of the uterus. [A, 385.]—**B's of the plantar cushion.** In the solipeds, two lateral bulbous expansions at the base of the plantar cushion. [L, 13.]—**B. of the spinal cord (or marrow).** See MEDULLA *oblongata*.—**B. of the urethra.** Lat., *bulbus urethræ*. Fr., *bulbe de l'urèthre*. Ger., *Harnröhrenzwiebel, Wulst der Harnröhre*. A bulbous expansion of the proximal end of the corpus spongiosum urethræ, divided more or less distinctly into two lobes behind. [C; L, 142.]—**B's of the vagina, B's of the vestibule.** See BULBI *vestibuli vaginæ*.—**B.-tuber.** See BULBODIUM.—**Central b.** The core of a terminal nerve-corpuscle. [Krause, "Arch. f. mikr. Anat.," 1881, p. 53 (J).]—**Coated b.** See *Tunicated b.*—**Crural b.** The lumbar enlargement of the spinal cord. [L, 13.]—**Cylindrical end-b's.** See under END-BULB.—**Dental b.** Fr., *bulbe dentaire*. See *Tooth-*

PULP.—**End-b.** See the major list.—**Feather-b.** Fr., *bulbe plumigène.* The papilla of a feather-follicle. [A, 385.]—**Fornix-b.** See *B. of the fornix.*—**Four b's.** See CORPORA *quadrigemina.*—**Gustative b's, Gustatory b's.** See *Taste*-BUDS.—**Hair-b.** See the major list.—**Krause's b's.** See *Krause's* END-BULBS.—**Liebig's potash b's.** A device consisting of a number of b's blown in a glass tube bent into a triangle, containing a strong solution of potassic hydrate, for the purpose of absorbing carbonic anhydride in the quantitative estimation of carbon and hydrogen in elementary organic analysis. The gas first displaces the solution from the largest b., and then passes in bubbles through the others. [A, 3.]—**Lumborrhachidian b.** See *Crural b.*—**Naked b.** A b. (in the botanical sense) with loose, separable scales. [B, 19.]—**Nerve-b.** See the major list.—**Olfactory b.** Lat., *bulbus olfactorius.* Fr., *bulbe olfactif.* Ger., *Riechkolben.* Syn.: *rhinencephalon.* An oblong body, consisting almost entirely of gray matter, resting on the cribriform plate of the ethmoid bone, through the perforations of which it sends down nerve-filaments from its lower surface to enter the nose. [I, 15; K.]—**Pharyngeal b.** Fr., *bulbe pharyngien.* Syn.: *mastax.* An enlargement of the pharyngeal portion of the alimentary canal of certain molluscs, usually provided with chitinous plates or processes. [L, 158.]—**Poison-b.** See BUPHANE *toxicaria.*—**Postcornual b.** See BULBUS *cornu posterioris.*—**Proximal b.** Of a cilium of a ciliated cell, that portion which is next the cell and connected with it by the intermediate segment. [Engelmann (J).]—**Rhachidian b.** Fr., *bulbe rhachidien* (ou *de la moelle épinière*). See MEDULLA *oblongata.*—**Scaly b.** Lat., *bulbus squamosus.* Fr., *bulbe à écailles.* In botany, a subterranean b. giving off roots below and scaly buds above. [A, 301, 385.]—**Solid b.** A corm. [B, 19.]—**Specific-gravity b.** A hydrometer (*q. v.*) of variable immersion. [A, 376.]—**Taste-b's.** See *Taste*-BUDS.—**Terminal nerve-b.** See NERVE-BULB.—**Tonsillar b's.** See BULBI *tonsillares.*—**Tunicated b.** Lat., *bulbus tunicatus.* Fr., *bulbe à tuniques.* In botany, a b. the outer scales of which are thin and membranaceous and completely envelop the b., forming concentric layers. [B, 19, 270.]—**Vaginal b's, Vestibular b's.** See BULBI *vestibuli vaginæ.*

LIEBIG'S POTASH BULBS. (AFTER STRECKER.)

BULBACEOUS, adj. Bu^{3}lb-a'shu^{3}s. Bulbous (*q. v.*).

BULBAR, adj. Bu^{3}lb'a^{3}r. Lat., *bulbaris.* Fr., *bulbaire.* Ger., *bulbär.* 1. Bulbous (*q. v.*). 2. Pertaining to a bulb, especially the rhachidian bulb. See *B.* PARALYSIS.

BULBE (Fr.), n. Bu^{6}lb. See BULB.—**B. à écailles.** See *Scaly* BULB.—**B. à tuniques.** See *Tunicated* BULB.—**B. crânien.** See *Rhachidian* BULB.—**B. de la moelle épinière.** See MEDULLA *oblongata.*—**B's de la veine cérébrale.** See BULBUS *venæ jugularis internæ superior* and *inferior.*—**B. de la voûte, B. de la voûte à trois piliers.** See CORPORA *albicantia.*—**B. dentaire.** See *Tooth*-PULP.—**B. du lobe olfactif.** See *Olfactory* BULB.—**B. du poil.** See HAIR-BULB.—**B's du vagin, B's du vestibule.** See BULBI *vestibuli vaginæ.*—**B. oculaire.** See BULB *of the eye.*—**B. ovarique.** See BULB *of the ovary.*—**B. pileux.** See HAIR-BULB.—**B plumigène.** See *Feather*-BULB.—**B's tonsillaires.** See BULBI *tonsillares.*—**B's vasculaires.** Bulbous enlargements of the arteries in many of the lower animals, which by their contraction aid in the circulation. [L, 158.]

BULBEL, n. Bu^{3}lb'e^{2}l. See BULBIL.

BULBEUX (Fr.), adj. Bu^{6}l-bu^5. See BULBOUS.

BULBICEPS (Lat.), adj. Bu^{3}l(bu^{4}l)'bi^2-se^{2}ps(ke^{2}ps). From *bulbus,* a bulb, and *caput,* the head. Ger., *zwiebelköpfig.* Of a rhizome, bearing bulbils on the summits of the branches. [B, 123.]

BULBIFEROUS, adj. Bu^{3}lb-i^{2}f'e^{2}r-u^{3}s. Lat., *bulbifer, bulbiferus*) from *bulbus,* a bulb, and *ferre,* to bear). Fr., *bulbifère.* Ger., *zwiebeltragend.* Bearing bulbils. [B, 123.]

BULBIFLORÆ (Lat.), n. f. pl. Bu^{3}l(bu^{4}l)-bi^2-flo're(ra^3-e^2). From *bulbus,* a bulb, and *flos,* a flower Of Batsch, a family of the *Coronales,* comprising *Colchicum, Bulbocodium,* and *Gethyllis.* [B, 170.]

BULBIFORM, adj. Bu^{3}lb'i^2-fo^{2}rm. Lat., *bulbiformis* (from *bulbus,* a bulb, and *forma,* form). Fr., *bulbiforme.* Ger., *zwiebelförmig.* Resembling or shaped like a bulb. [B, 123.]

BULBIGER (Lat.), adj. Bu^{3}l(bu^{4}l)'bi^2-ju^{5}r(ge^{2}r). From *bulbus,* a bulb, and *gerere,* to bear. See BULBIFEROUS.

BULBIL, n. Bu^{3}lb'i^{2}l. Lat., *bulbulus, bulbillus* (dim. of *bulbus,* a bulb). Fr., *bulbille.* Ger., *Bulbill, Knospenzwiebel, Zwiebelknospe.* An axillary bud with fleshy scales, which does not develop on the parent stem, but falls off and subsequently develops into a new plant. [B, 19, 123.]

BULBILLIFEROUS, adj. Bu^{3}lb-i^{2}l-i^{2}f'e^{2}r-u^{3}s. Lat., *bulbillifer, bulbilliferus* (from *bulbillus* [see BULBIL], and *ferre,* to bear). Fr., *bulbillifère.* Ger., *bulbillentragend.* See BULBIFEROUS.

BULBILLUS (Lat.), n. m. Bu^{3}l(bu^{4}l)-bi^{2}l'lu^{3}s(lu^{4}s). 1. See BULBIL. 2. A bulb-like expansion of a branchial vessel of *Amphioxus;* it is contractile and propels the blood. [L, 207, 210.]

BULBINE (Lat.), n. f. Bu^{3}l(bu^{4}l)-bi(be)'ne(na). Gr., βολβίνη. A Linnæan genus of liliaceous plants of the *Asphodeleæ,* subtribe *Anthericinæ.* [Engler (B, 245).]—**B. planifolia** [Sprengel]. The *Phalangium bicolor.* [B, 180.]

BULBIPAROUS, adj. Bu^{3}lb-i^{2}p'a^{2}r-u^{3}s. Lat., *bulbiparus* (from *bulbus,* a bulb, and *parere,* to bring forth). Fr., *bulbipare.* See GEMMIPAROUS.

BULBLET, n. Bu^{3}lb'le^{2}t. A small bulb. [B, 77.]

BULBOCAPNOS (Lat.), n. m. Bu^{3}l(bu^{4}l)-bo(bo^2)-ka^{2}p(ka^{3}p)'-no^{2}s. Of Bernhardi, a genus of fumariaceous plants, now made a section of *Corydalis.* [B, 19, 270.]—**B. cavus.** The *Corydalis cava.* [B, 180.]

BULBOCASTANUM (Lat.), n. n. Bu^{3}l(bu^{4}l)-bo(bo^2)-ka^{2}st-(ka^{3}st)'a^{2}n(a^{3}n)-u^{3}m(u^{4}m). Gr., βολβοκάστανον (from βολβός, a bulb, and κάστανον, the chestnut, because of its chestnut-like edible roots). The *Bunium* (*Carum*) *b.* [B, 19.]

BULBO-CAVERNOSUS (Lat.), adj. Bu^{3}l(bu^{4}l)-bo(bo^2)-ka^2-(ka^3)-vu^{5}rn(we^{2}rn)-o'su^{3}s(su^{4}s). From *bulbus,* a bulb, and *cavernosus* (see CORPORA *cavernosa*). Fr., *bulbo-caverneux.* Pertaining to the bulb of the urethra and to the corpora cavernosa of the penis; as a n. (Lat., *accelerator urinæ* [seu *seminis,* seu *lateralis* (Winslow)], *acceleratoris accessorius* [Winslow], *ejaculator urinæ* [seu *seminis*], *compressor bulbi proprius* [Kobelt], *compressor hemisphærium bulbi* [Kobelt], *constrictor radicis penis, primus penis musculus* [Vesalius], *trahens urethram* [Spigelius], *inferior urethræ* [Spigelius], *dilatator urethræ, urethram dilatans* [von Graaf], *ischio-cavernosus urethræ, retractor urethræ, ano-cavernosus* [Blandin]; Fr., *bulbo-caverneux, bulbo-syndesmo-caverneux, bulbo-uréthral* [Chaussier], *ano-caverneux, compresseur du bulbe;* Ger., *Schliessmuskel der Harnröhre, Harntreiber, Samentreiber, Harnschneller. Samenschneller, Zwiebelschwellkörpermuskel;* It., *bulbo-cavernoso, bulbo-uretrale, ano-cavernoso, accelleratore dell' urina e dello sperma*) a muscle which, arising from the central portion of the perinæum and its median rhaphe, runs forward on the surface of the corpus spongiosum urethræ, and is inserted into an aponeurosis in common with its fellow of the opposite side. By compressing the bulb of the urethra it forces out all the urine or semen which it may contain. [A, 246, 262, 263, 299, 314; C; L, 135.]

BULBOCHÆTACEÆ (Lat.), n. f. pl. Bu^{3}l(bu^{4}l)-bo(bo^2)-ke^{2}t-(ch^{2}a^3-e^{2}t)-a(a^3)'se^2(ke^2)-e(a^3-e^2). From *Bulbochæte,* one of the genera. An order or suborder of *Oosporeæ* of the class (and order) *Œdogonieæ,* comprising genera with branched filaments terminated by setæ. [B, 75.]

BULBOCODE (Fr.), n. Bu^{6}l-bo-kod. See BULBOCODIUM.

BULBOCODIEÆ (Lat.), n. f. pl. Bu^{3}l(bu^{4}l)-bo(bo^2)-kod-i(i^2)'-e^2-e(a^3-e^2). Of Salisbury, an order of monocotyledons, comprising the genus *Colchicum.* [B, 170.]

BULBOCODIUM (Lat.), n. n. Bu^{3}l(bu^{4}l)-bo(bo^2)-kod'i^2-u^{3}m-(u^{4}m). From βολβός, a bulb, and κώδιον, a fleece. Fr., *bulbocode.* Of Linnæus, a genus of liliaceous plants, allied to *Colchicum.* [B, 19; Engler (B, 245).]—**B. ruthenicum** [Bunge]. See *B. versicolor.*—**B. vernum** [Linnæus]. A species indigenous to southern Europe, blooming in spring and autumn. [B, 245.]—**B. versicolor** [Sprengel]. A variety of *B. vernum* growing in southern Russia and in Hungary. [B, 245.]—**Radix bulbocodii.** The root of *Narcissus pseudo-narcissus.* [B, 180.]

BULBODIUM (Lat.), n. n. Bu^{3}l(bu^{4}l)-bod'i^2-u^{3}m(u^{4}m). Ger., *Zwiebelknollen, Knollenzwiebel.* A corm. [B, 19.]—**B. reticulatum.** A corm made reticulate by absorption of the tegumentary parenchyma, as in *Allium.* [B, 270.]—**B. tunicatum.** A scaly corm, as in *Colchicum.* [B, 270.]

BULBOGEMMA (Lat.), n. f. Bu^{3}l(bu^{4}l)-bo(bo^2)-je^{2}m(ge^{2}m)'-ma^3. From *bulbus,* a bulb, and *gemma,* a bud. See BULBIL.

BULBONA (Lat.), n. f. Bu^{3}l(bu^{4}l)-bon'a^3. Fr., *bulbonac.* Ger., *Bulbonach.* The *Lunaria biennis* and the *Lunaria rediviva.* [B, 19.]—**Herba bulbonæ.** The herb of *Botrychium lunaria.* [B, 180.]

BULBORRHEXIS (Lat.), n. f. Bu^{3}l(bu^{4}l)-bo^{2}r-re^{2}x(rax)'i^{2}s. Gen., *bulborrhex'eos (-is).* From βολβός, a bulb, and ῥῆξις, rupture. Rupture of the eyeball. [A, 322.]

BULBOSÆ (Lat.), n. f. pl. Bu^{3}l(bu^{4}l)-bos'e(a^3-e^2). Herbaceous plants having a bulbous root. [L, 102.]

BULBOSE, adj. Bu^{3}l'bos. See BULBOUS.

BULBOSINE, n. Bu^{3}l-bos'en. Fr., *bulbosine.* A bitter, poisonous alkaloid, perhaps identical with muscarine, obtained by Boudier from *Agaricus phalloides* (*Amanita bulbosa*). [B, 46, 270.]

BULBOSUS (Lat.), adj. Bu^{3}l(bu^{4}l)-bos'u^{3}s(u^{4}s). See BULBOUS.

BULBO-SYNDESMO-CAVERNEUX (Fr.), n. Bu^{6}l-bo-si^{2}n-de^{2}s-mo-ka^{3}v-e^{2}rn-u^5. See BULBO-CAVERNOSUS.

BULBOTUBER (Lat.), n. n. Bu^{3}l(bu^{4}l)-bo(bo^2)-tu^2(tu)'bu^{5}r-(be^{2}r). Gen., *bulbotub'eris.* From *bulbus,* a bulb, and *tuber,* a knob. See BULBODIUM.

BULBO-URETHRALIS (Lat.), n. m. Bu^{3}l(bu^{4}l)-bo(bo^2)-u^2-(u)-re^{2}th(rath)-ra(ra^3)'li^{2}s. From βολβός, a bulb, and οὐρήθρα, the urethra. See BULBO-CAVERNOSUS.

BULBOUS, adj. Bu^{3}l'bu^{3}s. Gr., βολβοειδής, βολβώδης. Lat., *bulbosus.* Fr., *bulbeux.* Ger., *zwiebelig.* Like a bulb; provided with or bearing one or more bulbs or bulb-like structures. [B, 19, 123.]

BULBULE, n. Bu^{3}lb'u^{2}l. Gr., βολβάριον. Lat., *bulbulus, bulbillus.* Fr., *bulbille.* Ger., *kleine Zwiebel.* A small bulb, also a bulbil (*q. v.*). [L, 109.]

BULBULUS (Lat.), n. m. Bu^{3}l(bu^{4}l)'bu^{2}l(bu^{4}l)-u^{3}s(u^{4}s). Ger., *Brutzwiebel.* A little bulb; in botany, a bulbil, also a diminutive bulb formed within a parent bulb in the axil of one of its scales. [B, 123.] Cf. *Proles* BULBI.—**B. thrasus.** The root of *Cyperus esculentus.* [B, 119.]

BULBUS (Lat.), n. m. Bu^{3}l(bu^{4}l)'bu^{3}s(bu^{4}s). Gr., βολβός. Fr., *bulbe.* Ger., *Knolle.* A bulb, also the rostellum of the *Tæniadæ.*

[B, 95 ; L, 81, 182.]—**B. agrestis.** The *Colchicum autumnale.* [B, 180.]—**B. aortæ, B. aorticus.** See *Aortic* BULB.—**B. arteriosus.** See *Arterial* BULB.—**B. cinereus.** See *Olfactory* BULB.—**B. consumptus, B. consumtus.** An obsolete term for phthisis bulbi. [F.]—**B. cornu posterioris.** The postcornual bulb ; of Henle, an elevation of the posterior cornu, just dorsad of the hippocampus minor ; usually distinct only in well-hardened brains. [I, 6.]—**B. corporis cavernosi penis.** See BULB *of the corpus cavernosum.* —**B. crinis.** See HAIR-BULB.—**B. esculentus.** An edible bulbous root. [L, 119.]—**B. fornicis.** See SPLENIUM.—**B. glandulosus.** The proventriculus (*q. v.*). [L, 14.]—**B. medullæ oblongatæ** (seu **spinalis**). See MEDULLA *oblongata.*—**B. musculosus.** An ovoid expansion of the vas deferens of *Bothriocephalus latus* at its entrance into the cirrus pouch ; regarded by some as a seminal vesicle, by others as forcing on the semen which accumulates in the vas deferens. [L, 182.]—**B. oculi.** Fr., *bulbe de l'œil.* Ger., *Augapfel.* The globe of the eye. [L, 115.]—**B. olfactorius.** See *Olfactory* BULB.—**Bulbi orchidum.** Salep. [B, 180.]—**B. ovarii.** See BULB *of the ovary.*—**B. pili.** See HAIR-BULB.—**B. postcornu.** See *B. cornu posterioris.*—**Bulbi priorum crurum fornicis.** The corpora albicantia. [I, 3 ; K.]—**B. reticulatus.** In botany, a bulb having its enveloping scales reduced by absorption of their parenchyma to a network of vascular bundles. [B, 270.]—**B. rhachidicus.** See MEDULLA *oblongata.*—**B. rusticus.** The bulb of *Scilla maritima.* [B, 180.]—**B. squamosus.** In botany, a bulb enveloped by imbricated scales. [B, 270.]—**B. tabefactus.** See *B. consumtus.*—**Bulbi tonsillares.** Fr., *bulbes tonsillaires.* The lobules of the cerebellum. [L, 49.]—**B. tunicatus.** See *Tunicated* BULB.—**B. urethræ.** See BULB *of the urethra.*—**B. venæ jugularis internæ inferior.** An egg-shaped dilatation of the internal jugular vein just above its junction with the subclavian vein. [L, 31.] **B. venæ jugularis internæ superior.** An expansion of the internal jugular vein at its exit from the jugular foramen. [L, 31.]—**Bulbi vestibuli vaginæ.** Ger., *Wollustorgane.* The bulbs of the vestibule or of the vagina ; each is a network of veins situated behind the labium minus, representing the bulb of the urethra of the male. [L, 142.]—**Proles bulbi.** Ger., *Zwiebelbrut.* A collective term for all the secondary bulbs (bulbuli) springing from a parent bulb. [B, 123.]

BULE, BULESIS (Lat.), n's f. Bu^{2}l(bul)'e(a), bu^{2}l(bul)-e(a)'si^{2}s. Gen., *bul'es, bule'seos (-sis).* Gr., βουλή, βούλησις. Ger., *Wille, Willen, Willensvermögen.* The will, the will-power. [A, 322 ; L, 81.]

BULGA (Lat.), n. f. Bu^{3}l(bu^{4}l)'ga^3. The uterus. [A, 318.]

BULGARIA (Lat.), n. f. Bu^{3}l(bu^{4}l)-ga(ga^3)'ri^2-a^3. Fr., *bulgarie.* A genus of ascomycetous *Fungi.* [B, 173.]—**B. inquinans.** Fr., *noircissant.* A European species sometimes eaten. [B, 173.]

BULGARIACEI (Lat.), n. m. pl. Bu^{3}l(bu^{4}l)-ga(ga^3)-ri^2-a(a^3)'se^2(ke^2)-i(e). Of Fries, an order of *Fungi* (*Ascomycetes*). [B, 170.]

BULGARSKY, n. A sort of kefir. [B, 270.]

BULGNÉVILLE (Fr.), n. Bu^{6}l-nya-vel. A place in the department of the Vosges, France, where there is a spring containing bicarbonates and sulphates. [A, 385 ; L, 49.]

BULIMIA (Lat.), n. f. Bu^{2}l(bul)-i^{2}m(em)'i^2-a^3. Gr., βουλιμία (from the augmentative particle βοῦ, and λιμός, hunger). Fr., *boulimie.* Ger., *Bulimie, Heisshunger, Ochsenhunger.* 1. Bulimy ; an inordinate craving for food, faintness relieved only by eating. [D, 70 ; H.] 2. Of Paracelsus, the eroding power of an ulcer. [H.]—**B. canina.** Fr., *faim canin.* Canine hunger ; b. with vomiting after eating. [L, 119, 132.]—**B. cardialgica.** B. with gastric pain. [L, 119, 132.]—**B. cynorexia, B. emetica.** See *B. canina.*—**B. esuritio, B. helluonum.** Gluttony. [L, 119.]—**B. syncopalis.** Voracious hunger with fainting. [L, 119.]—**B. verminosa.** B. attributed to intestinal worms. [L, 119.]

BULIMIASIS (Lat.), n. f. Bu^{2}l(bul)-i^{2}m-i^2-a(a^3)'si^{2}s. Gen., *bulimias'eos (-sis).* Gr., βουλιμίασις. See BULIMIA.

BULIMIC, adj. Bu^{2}l-i^{2}m'i^{2}k. Lat., *bulimicus.* Pertaining to, of the nature of, or affected with, bulimia. [D.]

BULIMININA (Lat.), n. n. pl. Bu^{2}l(bul)-i^{2}m-i^{2}n-i(e)'na^3. A family of the *Textularidea.* [L, 121.]

BULIMOS, BULIMUS (Lat.), n's m. Bu^{2}l(bul)-li(le)'mo^{2}s, -mu^{3}s(mu^{4}s). Gr., βούλιμος. See BULIMIA.

BULIMY, n. Bu^{2}l'i^{2}m-i^2. See BULIMIA.

BULITHOS (Lat.), n. m. Bu^2(bu)'li^{2}th-o^{2}s. Gr., βούλιθος (from βοῦς, an ox, and λίθος, a stone). Fr., *bulithe.* The bezoar of the ox. [A, 322, 325 ; L, 104.]

BULKEA, n. An East Indian term for the Delhi boil, from the name of a place where it is said to arise from inoculation by a certain black gnat. [G, 69.]

BULLA (Lat.), n. f. Bu^{3}l(bul)'la^3. Gr., πομφόλυξ, βούλλα. Ar., *malchabara.* Fr., *bulle.* Ger., *Blase.* It., *bolla.* A bubble or any bladder-like formation ; a bleb ; a globular osseous expansion ; in the pl., *bullæ*, a class of skin diseases (of Plenck, including phyma, b. solitaria, and pemphigus ; of Bateman, including acute pemphigus and pompholyx [chronic pemphigus]). [A, 325 ; G, 11, 12.]—**Auditory b.** See *Tympanic b.*—**B. a frigore.** A blister due to congelation. [G, 11.]—**B. Arabum.** A disease of doubtful character, described by Plenck as consisting in the spontaneous development of a b. which, after lasting for a time, leaves a slight erosion of the skin which is not painful. [G, 11.] Cf. PEMPHIGUS *leprosus.* —**B. cadmica.** An old name for zinc oxide. [L, 105.]—**B. dolentissima.** A disease in which a b. forms spontaneously and leaves a small cutaneous ulcer which remains for a long time and is very painful. [G, 11, 76.]—**B. ex ambustione.** A blister due to a scald or burn. [G, 11.]—**Bullæ gangrænosæ.** Blebs that form in moist gangrene of the skin. [G.]—**B. ossea.** Ger., *Knochenblase* (1st def.). 1. A globular bony expansion. [L.] 2. The tympanic b. [L, 135.] 3. The tracheal tympanum of birds. [L, 221.]—**B. pedicularis.** [G, 11.] See MALIS *pedicularis.*—**B. solitaria.** "A large blister containing watery fluid and usually solitary"; of Plenck, a suborder of the bullæ, including b. vesicatoria, b. ex ambustione, b. a frigore, b. pedicularis, b. variolosa, b. Arabum, b. dolentissima, and bullæ gangrænosæ. [G, 11.]—**B. variolosa** [G, 11]. See VARIOLÆ *bullatæ.*—**B. vesicatoria.** A blister produced by a vesicatory. [G, 11.]—**Mastoid b.** A hollow prominence on the posterior part of the mastoid portion of the periotic bone in some of the lower *Mammalia.* [L, 153.]—**Petro-tympanic b.** See *Tympanic b.*—**Supratympanic b.** See *Mastoid b.*—**Tympanic b.** A hollow rounded prominence on the inner and lower surface of the tympanic bone of some of the lower *Mammalia.* [L, 153.]

BULLACE, n. The *Melicocca biyuga.* [B, 19.]

BULLÆACEÆ (Lat.), n. f. pl. Bu^{3}l(bul)-le(la^3-e^2)-a(a^3)'se^2-(ke^2)-e(a^3-e^2). Fr., *bulléens.* Of Lamarck, a family of the *Gasteropoda.* [L, 180.]

BULLAIRE (Fr.), adj. Bu^{6}l-a^{2}r. See BULLOUS.

BULLAR, adj. Bu^{3}l'a^{3}r. See BULLOUS.

BULLATE, adj. Bu^{3}l'at. Lat., *bullatus.* Fr., *bullé.* Ger., *bauschig.* 1. Bullous (*q. v.*). [L, 119.] 2. In botany, having bleb-like elevations (said of a leaf) or dilated into the form of a bladder. [B, 1, 123.]

BULL-DOG, n. Bu^{4}l'do^{2}g. The *Antirrhinum majus.* [L, 73.] —**B.-d. forceps.** See under FORCEPS.

BULLE (Fr.), n. Bu^{6}l. See BULLA and BLEB.

BULLÉ (Fr.), adj. Bu^{6}l-a. See BULLATE.

BULLÉENS (Fr.), n. pl. Bu^{6}l-a-a^{3}n^2. See BULLÆACEÆ.

BULLESCENCE, n. Bu^{3}l-e^{2}s'e^{2}ns. Lat., *bullescentia.* Fr., *bullescence.* Ger., *Blasigwerden.* The state of becoming or being bullate. [L, 41.]

BULLET-DETECTOR, n. Bu^{4}l'e^{2}t-de-te^{2}kt"o^{2}r. See *Nélaton's* PROBE, *Induction* BALANCE, etc.

BULLET-EXTRACTOR, n. Bu^{4}l'e^{2}t-e^{2}x-tra^{2}kt"o^{2}r. Fr., *tire-balle.* Ger., *Kugelzange.* It., *tira-palle.* Sp., *sacabalas.* A general name for any instrument designed to grasp and extract a bullet. [A, 321.]

BULLET-GRAPE, n. Bu^{4}l'e^{2}t-grap. The *Vitis rotundifolia.* [B, 19.]

BULLET-TREE, n. Bu^{4}l'e^{2}t-tre. A Guiana name for a species of *Mimusops.* [B, 19.]—**Bastard b.-t.** The *Bumelia retusa.* [B, 19.]—**Black b.-t.** The *Bumelia ingens.* [B, 19.]—**Jamaica b.-t.** The *Lucuma mammosa.* [B, 19.]

BULLEUX (Fr.), adj. Bu^{6}l-u^6. See BULLOUS.

BULLFICE, BULLFIST, n's. Bu^{4}l'fi^{2}s, -fi^{2}st. See BOVISTA.

BULL-GRASS, n. Bu^{4}l'gra^{3}s. The *Bromus mollis.* [L, 73.]

BULL-HOOF, n. Bu^{4}l'hu^{4}f. The *Murucuja ocellata.* [B, 19.]

BULLICAME (It.), n. Bul-li^2-ka^{3}m'a. A place in Italy, near Viterbo, where there is a warm lake containing calcium sulphide, hydrogen sulphide, and carbon dioxide. [A, 385 ; L, 49.]

BULLIDÆ (Lat.), n. f. pl. Bu^{3}l(bul)'li^{2}d-e(a^3-e^2). See BULLINIDÆ.

BULLIER (Fr.), n. Bu^{6}l-i^2-a. A member of the *Bullæaceæ.* [A, 385.]

BULLIFEROUS, adj. Bu^{3}l-i^{2}f'e^{2}r-u^{3}s. Lat., *bulliferus* (from *bulla* [*q. v.*], and *ferre*, to bear). Fr., *bullifère.* Ger., *Blasentragend.* Bearing bullæ or bladder-like processes. [L, 180.]

BULLIMENTUM (Lat.), n. n. Bu^{3}l(bu^{4}l)-li^2-me^{2}nt'u^{3}m(u^{3}m). An ancient name for a vessel of gold or silver highly polished. [Augustinus Pantheus (A, 325) ; L, 109.]

BULLINIDÆ (Lat.), n. f. pl. Bu^{3}l(bul)-li^{2}n'i^{2}d-e(a^3-e^2). A family of the *Pleurobranchiata.* [L, 282.]

BULLION, n. Bu^{4}l'yu^{3}n. See BOVISTA.

BULLOCK'S-EYE, n. Bu^{4}l'o^{2}x-i. The *Sempervivum tectorum.* [L, 73.]

BULLOCK'S-HEART, n. Bu^{4}l'o^{2}x-ha^{3}rt. The *Anona reticulata* or its fruit. [B, 19, 172.]

BULLOSE, BULLOUS, adj's. Bu^{3}l'os, -u^{3}s. Lat., *bullosus.* Fr., *bulleux.* Ger., *blasig.* It., *bolloso, vescicoso.* Pertaining to or characterized by bullæ. [G.]

BULLS-AND-COWS, n. Bu^{4}lz-a^{2}nd-ku^5'uz. The flowers of *Arum maculatum.* [L, 73.]

BULLULA (Lat.), n. f. Bu^{3}l(bul)'lu^2(lu^4)-la^3. Dim. of *bulla.* Fr., *bullule.* A little bulla. [Celsus (A, 318).]

BULLULATUS (Lat.), adj. Bu^{3}l(bul)-lu^2(lu^4)-la(la^3)'tu^{3}s(tu^{4}s). Fr., *bullulé.* Covered or provided with bullulæ. [L, 180.]

BULLY-LES-EAUX (Fr.), **BULLY-SUR-L'ARBRESLE** (Fr.), n's. Bu^{6}l-e-laz-o, -su^{6}r-la^{3}rb-re^{2}sl. A place near Lyons, France, where there are springs containing iron, sulphur, and arsenic. [A, 319 ; "Lyon méd.," May 23, 1886, p. 131.]

BULLY-TREE, n. Bu^{4}l'i^2-tre. See BULLET-TREE.

BULRUSH, n. Bu^{4}l'ru^{3}sh. The *Pencillaria spicata*, the *Scirpus lacustris*, the *Typha latifolia*, and the *Typha angustifolia.* [B, 19 ; L, 56.]—**B'worts** [Lindley]. The *Typhaceæ.* [B, 19.]

BULZLING (Ger.), n. Bultz'li^{2}ng. The *Boletus bovinus.* [L, 105.]

BUMAMMA, BUMASTHON, BUMASTUS (Lat.), n's f., n., and m. Bu^2(bu)-ma^{2}m(ma^{3}m)'ma^3, -ma^{2}s(ma^{3}s)'tho^{2}n, -tu^{3}s(tu^{4}s). Gr., βούμαστος, βούμασθος (from the augmentative particle βοῦ, and μάμμα [= μάμμη], μασθός, μαζός, or μαστός, the breast). 1. The bumast grape ; a large kind of grape, or the vine bearing it. [A, 318, 387.] 2. An unusually large mammary gland. [A, 322.]—**Bumasthon pendulum.** A very large and pendulous breast. [A, 322.]

BUMBELO, n. Bu^{3}m'be^{2}l-o. See Bombalo.

BUMBLEBERRY, BUMBLE-KITE, n's. Bu^{3}mbl'be^{2}r-i^2, -kit. The fruit of *Rubus fruticosus*. [L, 73.]

BUMBO, n. The *Daniella thurifera*. [B, 19.]

BUMBUNNY, n. An emetic plant of Guinea. [L, 105.]

BUMELIA (Lat.), n. f. Bu^2(bu)-mel(me^{2}l)'i^2-a^3. Gr., βουμελία, βουμέλιος (from the augmentative particle βου̃, and μελία, the ash-tree). Fr., *bumélie*. 1. An ancient name for a large kind of ash-tree. [Pliny (A, 318); A, 387.] 2. Of Swartz, a genus of sapotaceous shrubs and trees. [B, 215.]—**B. fœtidissima** [Nuttall]. The *Sideroxylon mastichodendron*. [B, 215.]—**B. ingens**. The black bullet-tree (or bully-tree) of the West Indies. [B, 19.]—**B. lycioides** [Willdenow]. A species bearing berries which are used in diarrhœa. [B, 180.]—**B. nervosa**. The *Chrysophyllum macrophyllum* [B, 173.]—**B. nigra** [Swartz]. See Achras *nigra*.—**B. pallida** [Swartz]. The *Sideroxylon mastichodendron*. [B, 215.]—**B. retusa**. The bastard bullet-tree. [B, 19.]—**B. salicifolia** [Swartz]. See Achras *nigra*.

BUMOLIC ACID, n. Bu^{2}m-o^{2}l'i^{2}k. Fr., *acide bumolique*. An acid said to occur in coal-tar. [B, 14.]

BUMP, n. Bu^{3}mp. A protuberance, especially one caused by a bruise; of the phrenologists, a prominence of a particular region of the skull, thought by them to correspond to the development of the organ of a special mental attribute in the brain at the same situation. [L, 56.]

BUMPING, n. Bu^{3}mp'i^{2}ng. A phenomenon sometimes observed in boiling liquids; when the temperature rises a little above the boiling point before ebullition has taken place, sufficient vapor is suddenly disengaged to throw portions of the liquid violently in different directions. [B.]

BUM-WOOD, n. Bu^{3}m'wu^{4}d. The *Rhus metopium*. [B, 81.]

BUNA, n. The coffee-plant. [L, 105.]—**B. palla**. A Malay name for mace. [L, 105.]

BUN-ASAHOO, n. The *Gossypium herbaceum*. [B, 172.]

BUN-BURBUTEE (Bengal., Hind.), n. The *Phaseolus rostratus*. [B, 172.]

BUNCELLA (Lat.), n. f. Bu^{3}n(bun)-se^{2}l(ke^{2}l)'la^3. Of Paracelsus, a nasal polypus. [L, 135.]

BUNCHOSIA (Lat.), n. f. Bu^{3}n^2(bun^2)-ko(ch^{2}o)'si^2-a^3. Fr., *bunchosie*. A genus of malpighiaceous trees and shrubs. [B, 19.]—**B. armeniaca**. A Peruvian species, said to be poisonous. [B, 19.]

BUNCOMBE, n. Bu^{3}n^2'ku^{3}m. A place in B. County, North Carolina, where there are hot sulphurous springs. [A, 319; L, 105.]

BUND (Ger.), n. Bund. A band, a bundle, a bottle, a truss. [A, 450; E.]—**Türkischer B.** The *Lilium martagon*. [B, 180.]

BUNDAL, n. An East Indian name for the *Luffa bandaal*. [B, 19.]

BUNDAROO (Teloogoo), n. The *Mymenodictyon excelsum*. [B, 172.]

BÜNDEL (Ger.), n. Bu^{6}nd'e^{2}l. See Bundle.—**B'chen.** A fasciculus [I.]—**B'formation.** See the major list.—**B'ig.** Fasciculate. [B, 123.]—**B'kreuzung.** A decussation of fibres. [L, 304.]—**B. vom Fuss zur Haube.** See Pedunculus *substantiæ nigræ*.—**Laterales B. des Schleifenfeldes.** A tract of nerve-fibres in the lower part of the lemniscus area, having its origin in the posterior corpora quadrigemina. [I, 17; K.]—**Mediales B. der Schleifenschicht.** See Pedunculus *substantiæ nigræ*.—**Solitäres B.** See Funiculus *gracilis*.—**Türck'sche B.** The columns of Türck (direct pyramidal fasciculi). [I, 17; K.]—**Vicq d'Azyr'sches B.** See Bundle *of Vicq d'Azyr*.

BÜNDELFORMATION (Ger.), n. Bu^{6}nd-e^{2}l-fo^{2}rm-a^3-tse-on'. A bundle-like structure.—**Runde B.** Of Stilling, the solitary, or trineural, fasciculus of Spitzka. ["Jour. of Nerv. and Ment. Dis.," Apr., 1880, p. 208 (K).]

BUNDLE, n. Bu^{3}ndl. A.-S., *byndel*. Gr., δέσμη, δεσμίς, φάκελλος. Lat., *fascis, fasciculus*. Fr., *faisceau*. Ger., *Bündel*. It., *fascetto*. A collection of fibres having the same general direction; in vegetable morphology, the essential anatomical element of the fascicular system. [B, 75, 229.] See *Fibro-vascular b*.—**Association b's.** The association fibres of the cerebrum. [J.] See under Fibre.—**Basal forebrain b.** See *Basal forebrain* fasciculus.—**Bicollateral b.** A fibro-vascular b. in which a single strand of xylem is interposed between two strands of phloem, or *vice versa*. [De Bary (B, 75, 229).]—**B. of Vicq d'Azyr.** The prolongation of the anterior pillar of the fornix after it leaves the corpus albicans and extends backward and upward to enter the anterior nucleus of the optic thalamus. [I, 15; K.]—**B.-sheath.** The cylindrical mass of parenchyma which surrounds a fibro-vascular b. [B, 75.]—**Cauline b.** A fibro-vascular b. in the stem of a plant having no connection with the leaves. [B, 75.]—**Closed b.** A fibro-vascular b. in which all the procambium has been converted into permanent tissue. [B, 75, 229.]—**Collateral b.** A fibro-vascular b in which a strand of xylem lies by the side of a strand of phloem. [B, 75, 229.]—**Common b.** A fibro-vascular b. which extends from the stem into the leaves. [B, 75.]—**Concentric b.** A fibro-vascular b. in which the phloem is arranged concentrically about the xylem, or *vice versa*. [B, 75, 229.]—**Dorsal crossed b.** [Seguin]. See *Dorsal crossed* fasciculus.—**Dorsal direct b.** [Seguin]. See *Dorsal direct* fasciculus.—**Fibro-vascular b.** The anatomical element of the fascicular, or fibro-vascular, system of a plant; a fascicle or cylindrical aggregation of elongated cells, fibres, and ducts intermixed with parenchyma and often surrounded by a well-defined envelope of the latter. It usually consists of two well-marked portions: a bast-portion (*phloem, liber*) made up of sieve-cells mingled with bast-fibres; and a woody portion (*xylem*) consisting of tracheal cells which may be wholly or partially replaced by ducts. These structures are produced from a mass of similar elements (*meristem*) which develop into elongated cells (the *procambium*) and either become differentiated into the various tissues or remain undifferentiated and capable of further growth (*cambium*). The fibro-vascular b's are found variously aggregated in the different parts of plants, and serve to carry on the circulation of the juices and to give strength and flexibility to the structures. [B, 75, 229.]—**Habenula b.** [Spitzka]. See *Hebenal* fasciculus.—**Internuclear b's.** Fr., *filaments d'union*. Ger., *Intercellularbrücken*. Protoplasmic processes connecting cells, especially prickle-cells. [Delépine, "Jour. of Anat. and Physiol.," 1884, p. 442 (J).]—**Open b.** A fibro-vascular b. in which the entire procambium has not been differentiated into higher tissues, but a portion (the *cambium*), capable of further differentiation, is left interposed between the xylem and the phloem. [B, 75, 229.]—**Primitive b.** A muscular fibre. [J.]—**Radial b.** A fibro-vascular b. in which the xylem and phloem portions occupy alternate radii originating from the centre of the b. [B, 75, 229.]—**Reduced b.** A fibro-vascular b. in which one or more of the tissues normally composing it are wanting. [B, 75.]—**Trineural b.** [Spitzka]. See *Trineural* fasciculus.—**Vascular b.** Ger., *Gefässbündel*. Properly, a reduced b. consisting only of vessels, but applied also to a fibro-vascular b. [B, 75.]—**Ventral crossed b.** [Seguin]. See *Ventral crossed* fasciculus.—**Ventral direct b.** [Seguin]. See *Ventral direct* fasciculus.

BUNDORAN, n. Bu^{3}n'do-ra^{2}n. A sea-bathing resort in County Donegal, Ireland. [A, 319.]

BUNDU, n. See Bonduc.

BUNDURH (Ar.), n. The *Corylus avellana*. [L, 105.]

BUNESAT, n. An African name for the *Anchusa italica*. [L, 105.]

BUN-GAB (Hind.), n. The *Diospyros cordifolia*. [B, 172.]

BUNGAROIDEA, BUNGAROIDEÆ (Lat.), n's n. pl. and f. pl. Bu^{3}n^2(bu^{4}n^2)-ga^{3}r-o(o^2)-i^{2}d(ed)'e^2-a^3, -e(a^3-e^2). Fr., *bungaroïdes*. Of Fitzinger and Ewald, a family of the *Ophidia*. [L, 180.]

BUNGENBLUT (Ger.), **BUNGENSUCHT** (Ger.), **BUNGENWASSER** (Ger.), n's. Bung'e^{2}n-blut, -zuch^{2}t, -va^{3}s-ser A form of dropsy peculiar to cows. [L, 46.]

BUNGRAH (Hind.), n. The *Acorus calamus aromaticus*. [B, 172.]

BUNGTALAI, n. Syn.: *boa-tam-paijang*. A Burmese name for the fruit of *Scaphium scaphigerum*. [O. Stroud, "Brit. and Colon. Drug.," May 1, 1886, p. 279.]

BUN-GUMUK (Hind.), n. The *Cucumis pubescens*. [B, 172.]

BUN-HULDI (Bengal., Hind.), n. The *Curcuma zedoaria*. [B, 172.]

BUNIADÆ [Lindley] (Lat.), n. f. pl. Bu^{2}n(bun)-i(i^2)'a^{2}d(a^{3}d)-e(a^3-e^2). See Buniadeæ.

BUNIADE (Fr.), n. Bu^{6}n-i^2-a^{3}d. See Bunias.—**B. d'Orient.** The *Bunias orientalis*. [B, 173.]—**B. épineux.** The *Bunias spinosa*. [B, 173.]—**B. tétragone.** The *Bunias erucago*. [B, 173.]

BUNIADEÆ (Lat.), n. f. pl. Bu^{2}n(bun)-i^2-a^{2}d(a^{3}d)'e^2-e(a^3-e^2). A tribe or section of cruciferous plants (*Spirolobeæ*), including the single genus *Bunias*. [B, 1, 170.]

BUNIAS (Lat.), n. f. Bu^{2}n(bun)'i^2-a^{2}s(a^{3}s). Gen., *buni'adis*. Gr., βουνιάς. Fr., *buniade*. A genus of cruciferous herbs of the suborder *Spirolobeæ*, tribe *Buniadeæ*. [B, 19.]—**B. cakile** [Linnæus]. The *Cakile maritima*. [B, 173, 180.]—**B. erucago** [Linnæus]. Fr., *buniade tétragone, masse à bedeau*. Syn.: *Erucago segetum* [Tournefort]. An annual European species, formerly employed in dropsy. The herb (*herba erucaginis*) is acrid and of a penetrating odor and taste. [B, 121, 173, 180.]—**B. glomerata.** The *Senbiera coronopus*. [B, 173.]—**B. orientalis.** Fr., *buniade d'Orient, bunier*. A perennial species indigenous to Russia; cultivated for fodder. [B, 173.]—**B. silvestris.** The *Brassica napus*. [L, 119.]—**B. spinosa.** Fr., *buniade épineux, roquette épineuse*. The *Zilla myagroides*. [B, 173.]—**Radix buniadis, Semen buniadis.** The root and seeds of *Brassica napus*. [B, 180.]

BUNIER (Fr.), n. Bu^{6}n-i^2-a. The *Bunias orientalis*. [B, 121, 173.]

BUNIOID, adj. Bu^{2}n'i^2-oid. From βούνιον (see Bunium), and εἶδος, resemblance. Fr., *bunioïde*. Resembling a turnip (formerly said of a variety of scirrhous cancer). [A, 301.]

BUNIOIDES (Lat.), n. f. Bu^{2}n(bun)-i^2-o(o^2)-i(e)'dez(das). Of Bentham and Hooker, a section of the genus *Pimpinella*. [B, 42, 121.]

BUNION (Lat.), n. n. Bu^{3}n(bun)'i^2-o^{2}n. Of Pliny, a kind of wild turnip. [A, 318.] See Bunium.

BUNION, n. Bu^{3}n'yu^{3}n. Said to be from βουνός, a mound, but more probably from O. E. *bunny*, a small swelling. Lat., *tuber verrucosum*. Fr., *oignon*. A hard, painful tumor situated near a joint of the foot, especially the metatarso-phalangeal joint of the great toe, consisting at first of an enlarged bursa and finally leading to enlargement and distortion of the bones. [A, 301, 302; E.]

BUNIUM (Lat.), n. n. Bu^{2}n(bun)'i^2-u^{3}m(u^{4}m). Gr., βούνιον. Of Dalechamps, the *Barbarea vulgaris*; of Linnæus, a genus of umbelliferous herbs, made by Bentham and Hooker a section of *Carum*; of De Candolle, a genus now referred to *Conopodium*; of Koch, see Bunioides; of Lagasca, see Ptychotis. [B, 42, 121.]—**B. bulbocastanum** [Linnæus]. See Carum *bulbocastanum*.—**B. carvi** [Bieberstein]. The *Carum carui*. [B, 173.]—**B. copticum** [Sprengel]. The *Ptychotis coptica*. [B, 180.]—**B. falcaria.** The *Falcaria Rivini*. [B, 180.]—**B. ferulæfolium.** A species growing in Cyprus and Crete, where the root-tubers (the *topana* of the Greeks) are eaten. [B, 19.]—**B. flexuosum.** A species indigenous to western Europe. The tubers taste like chestnuts when cooked, and are often eaten; raw, they are acrid. [B, 19.]—**B. minus** [Gouan]. See Carum *bulbocastanum*.

BUN-JOMA (Hind.), n. The *Clerodendron inerme.* [B, 172.]

BUN-JOOLEE (Hind.), n. The *Phyllanthus multiflorus.* [B, 172.]

BUNKRA (Bengal.), n. The *Urena lobata.* [B, 172.]

BUN-KUCHOO (Hind.), n. The *Colocasia antiquorum.* [B, 172.]

BUN-LUBUNGA (Bengal., Hind.), n. The *Ludwigia parviflora.* [B, 172.]

BUN-MARUNGA (Bengal.), n. The *Oxalis sensitiva.* [B, 172.]

BUN-MULLIKA (Bengal., Hind.), n. The *Jasminum sambac.* [B, 172.]

BUN-MURICH (Bengal.), n. The *Ammannia vesicatoria.* [B, 172.]

BUN-NEEL (Hind.), n. The *Tephrosia purpurea.* [B, 172.]

BUNNIAN, n. Bu^{3}n'ya^{2}n. See Bunion (Eng.).

BUNODONT, adj. Bu^{2}n'o-do^{2}nt. From βουνός, a hillock, and ὀδούς, a tooth. Ger., *kügelzähnig.* Having the grinding surface of the molar teeth decidedly tubercular. [L, 121.]

BUNODONTA, BUNODONTIA (Lat.), n's n. pl. Bu^{2}n(bun)-o(o^2)-do^{2}nt'a^3, -i^2-a^3. Ger., *Kügelzähnige.* A group of the *Artiodactyla.* [L, 121.]

BUNOGASTER (Lat.), adj. Bu^{2}n(bun)-o(o^2)-ga^{2}st(ga^{3}st)'u^{6}r-(ar). From βουνός, a protuberance, and γαστήρ, the belly. Fr., *bunogastre.* Having a protuberant abdomen. [L, 180.]

BUN-OKRA (Bengal., Hind.), n. The *Urena lobata.* [B, 172.]

BUNOTHERIA (Lat.), n. n. pl. Bu^{2}n(bun)-o(o^2)-the(tha)'-ri^2-a^3. Of Cope, an order of the *Mammalia*, including the *Tillodontia*, the *Tæniodonta*, and the existing *Insectivora.* [L, 121.]

BUN-PAT (Bengal.), n. The *Corchorus olitorius.* [B, 172.]

BUNPUTAL (Hind.), n. The *Trichosanthes cucumerina.* [B, 172.]

BUNRAJ (Hind.), n. The *Bauchinia racemosa.* [B, 172.]

BUN-SHIM (Hind.), n. The *Lablab vulgaris.* [B, 172.]

BUN-SUN (Hind.), n. The *Crotalaria verrucosa.* [B, 172.]

BUNT, n. Bu^{3}nt. The *Tilletia caries*, a parasitic fungus attacking wheat. [B, 19.]

BUNT (Ger.), adj. Bunt. Variegated. [B, 123.]—**B'fleckig, B'gefleckt.** Spotted, speckled. [L, 46.]—**B'gestreift.** See *B'streifig.*—**B'kehlig.** Variegated about the throat. [L, 46.]—**B'köpfig.** Having a variegated head. [L, 46.]—**B'schnäbelig.** Having a variegated beak. [L, 46.]—**B'streifig.** Striped with different colors. [L, 46.]

BUNT (Hind.), n. The *Cicer arietinum.* [B, 172.]

BUNWEED, n. Bu^{3}n'wed. The *Senecio jacobœa.* [L, 73.]

BUNYON, n. Bu^{3}n'yu^{3}n. See Bunion (Eng.).

BUOPHTHALMIA (Lat.), n. f. Bu^2(bu)-o^{2}p(o^{2}f)-tha^{2}l(tha^{3}l)'-mi^2-a^3. See Buphthalmia.

BUPEINA (Lat.), n. f. Bu^2(bu)-pin'(pe^2-en')-a^3. From the augmentative particle βοῦ, and πεῖνα, hunger. See Bulimia.

BUPHAGEÆ, BUPHAGI, BUPHAGIDÆ, BUPHAGINEÆ (Lat.), n's f. pl., m. pl., f. pl., and f. pl. Bu^2(bu)-fa^{2}j(fa^{3}g)'-e^2-e(a^3-e^2), bu^2(bu)'fa^2(fa^3)-ji(ge), bu^2(bu)-fa^{2}j(fa^{3}g)'i^{2}d-e(a^3-e^2), -fa^{2}j-(fa^{3}g)-i^{2}n'e^2-e(a^3-e^2). From βοῦς, an ox, and φαγεῖν, to eat. Fr., *buphages, buphaginées.* Ger., *Ochsenhacker.* The ox-peckers or beef-eaters; a family of the *Passeres.* [L, 73, 121, 180.]

BUPHAGOS (Lat.), adj. Bu^2(bu)'fa^{2}g(fa^{3}g)-o^{2}s. Gr., βουφάγος. Beef-eating, having a voracious appetite; as a n., an ancient antidote that caused a voracious appetite. [L, 104, 119.]

BUPHANE (Lat.), n. f. Bu^2(bu)'fa^{2}n(fa^{3}n)-e(a). Syn.: *Crossyne.* A genus of amaryllidaceous plants of the tribe *Amaryllideæ*, subtribe *Hæmanthinæ.* [Pax (B, 245).]—**B. toxicaria** [Thunberg]. The poison-bulb of the Cape of Good Hope. The juice of the bulb is used as an arrow-poison by the Hottentots, and the plant was formerly employed in medicine. [Pax (B, 245).]

BUPHLYSIS (Lat.), n. f. Bu^2(bu)'fli^{2}s(flu^{6}s)-i^{2}s. Gen., *buphlys'eos* (*bu'phlysis*). See Buecphlysis.

BUPHTHALMEÆ (Lat.), n. f. pl. Bu^{3}f(buf)-tha^{2}l(tha^{3}l)'me^2-e(a^3-e^2). For deriv., see Buphthalmos. Fr., *buphthalmées.* Of Bentham and Hooker, a subtribe of composite plants belonging to the tribe *Inuloideæ*, comprising *Buphthalmum* and related genera; divided by Cassini into the *B. veræ*, the *Grangeineæ* (*Pyrardeæ*), and the *Sphœrantheæ*, and by Schulz into the *Eubuphthalmeæ* and the *Dontospermeæ.* [B, 170.]—**B. legitimæ** [Schulz]. A division of the *Eubuphthalmeæ*, comprising *Buphthalmum* and another genus. [B, 170.]—**B. veræ** [Cassini]. A subdivision of the *B.*, comprising *Buphthalmum* and three other genera. [B. 170.]

BUPHTHALMIA (Lat.), n. f. Bu^{3}f(buf)-tha^{2}l(tha^{3}l)'mi^2-a^3. From βοῦς, an ox, and ὀφθαλμός, the eye. Fr., *buphthalme.* Ger., *Buphthalmie, Ochsenauge.* It., *buftalmia.* Sp., *buftalmia.* Syn.: *hydrophthalmia.* A disease characterized primarily by a uniform spherical bulging of the whole cornea. The increase of size generally extends to the neighboring parts of the sclera and often involves the whole eyeball. True b. is always congenital. [F.]

BUPHTHALMIQUE (Fr.), adj. Bu^{6}f-ta^{3}l-mek. Pertaining to buphthalmia. [L, 41.]

BUPHTHALMOS (Lat.), n. m. Bu^{3}f(buf)-tha^{2}l(tha^{3}l)'mo^{2}s. Gr., βούφθαλμος. Fr., *buphthalme.* 1. Of the ancients, a composite plant with edible stalks; perhaps the *Chrysanthemum coronarium.* [B, 121.] 2. A person affected with buphthalmia. [A, 385.]

BUPHTHALMUM (Lat.), n. n. Bu^{3}f(buf)-tha^{2}l(tha^{3}l)'mu^{3}m-(mu^{4}m). From βούφθαλμος (see Buphthalmos). Fr., *buphthalme, œil-de-bœuf.* Ger., *Ochsenauge.* 1. A Linnæan genus of composite plants of the tribe *Inuloideæ*, subtribe *Buphthalmeæ.* [B, 42, 121.] 2. The *Anthemis tinctoria.* [B, 19, 180.]—**B. cowana** [Forskål]. See *B. pratense.*—**B. germanicum.** See *B. vulgare.*—**B. grandiflorum.** A species indigenous to southern France, thought to be a fit substitute for tea. [L, 43.]—**B. majus.** See *B. vulgare.*—**B. oleraceum.** An edible plant of Cochin-China, erroneously referred to the genus *B.* by Loureiro. [B, 121, 173.]—**B. pratense.** A species the twigs of which are used in Egypt for making brooms. [B, 173.]—**B. ramtilla.** A cultivated variety of *Guizotia oleifera.* [B, 180.]—**B. salicifolium** [Linnæus]. A perennial European species regarded as slightly narcotic and alexeteric. [B, 173.]—**B. spinosum** [Linnæus]. An annual European species, esteemed as a vulnerary. [B, 173.]—**B. vulgare.** The *Anthemis tinctoria.* [B, 180.]

BUPHTHALMUS (Lat.), n. m. Bu^{3}f(buf)-tha^{2}l(tha^{3}l)'mu^{3}s-(mu^{4}s). See Buphthalmos.

BUPINA (Lat.), n. f. Bu^2(bu)-pi(pe)'na^3. Better written *bupeina* (*q. v.*). See Bulimia.

BUPLEUREÆ [Sprengel], **BUPLEURINÆ** [Sprengel, Link], **BUPLEURINEÆ** (Lat.), n's f. pl. Bu^2(bu)-plu^{2}r'e^2-e(a^3-e^2), -plu^{2}r-i(e)'ne(na^3-e^2), -i^{2}n'e^2-e(a^3-e^2). From βούπλευρον (see Bupleurum). Fr., *bupleurinées.* An order, suborder, or tribe of umbilliferous plants, comprising *Bupleurum*, *Hermas*, *Odontites*, and *Tenoria.* [B, 170.]

BUPLEURON (Lat.), n. n. Bu^2(bu)-plu^{2}r'o^{2}n. See Bupleurum.

BUPLEURUM (Lat.), n. n. Bu^2(bu)-plu^{2}r'u^{3}m(u^{4}m). Fr., *buplèvre.* Ger., *Hasenohr.* It., *marabuto.* Hare's-ear; a genus of umbelliferous plants; in pharmacy, the *B. rotundifolium.* [A, 322, 385; B, 180.]—**B. falcatum** [Linnæus]. Fr., *oreille de lièvre.* Ger., *sichelblättriges Hasenohr.* Syn.: *Isophyllum falcatum* [Hoffmann]. A perennial herb of southern Europe. The herb and root —*radix et herba bupleuri* (seu *costæ bovis*, seu *auriculæ leporis*)— were formerly employed, the root as a vulnerary and the herb as a febrifuge. [B, 173, 180.]—**B. flexuosum** [Mönch]. See *B. falcatum.*—**B. fruticosum** [Linnæus]. The σέσελι αἰθιοπικόν of Hippocrates and Dioscorides. The root and the fruit were formerly used for chronic coughs and for menstrual and urinary obstructions. [B, 180.]—**B. giganteum** [Linnæus]. The *Hermas gigantea.* [B, 173.]—**B. octoradiatum.** A species the root of which has been esteemed antarthritic, derivative, and sudorific. [L, 75.]—**B. perfoliatum** [Lamarck]. See *B. rotundifolium.*—**B. petiolare.** A species the root of which has been used as an astringent and febrifuge. [B, 173.]—**B. rotundifolium** [Linnæus]. Fr., *buplèvre perce-feuille, perce-feuille annuelle, vraie perce-feuille.* Ger., *rundblättriges Hasenohr, Durchwachs, Durchbrech.* The round-leaved hare's-ear; an annual species growing in central and southern Europe and central Asia. The herb or leaves and the fruit— *herba* (seu *folia*) et *semen bupleuri* (seu *perfoliatæ*)—were formerly used as a vulnerary and astringent; the fruit and an oil (*oleum perfoliatæ expressum*) expressed from the seeds, as a discutient and alexeteric. [A, 301; B, 173, 180.]—**B. scorzoneræfolium** [Willdenow]. See *B. falcatum.*—**Folia bupleuri.** The leaves of *B. rotundifolium.* [B, 180.]—**Herba bupleuri.** The herb of *B. falcatum* and *B. rotundifolium.* [B, 180.]—**Radix bupleuri.** The root of *B. falcatum.* [B. 180.]—**Semen bupleuri.** The fruit of *B. rotundifolium.* [B, 180.]

BUPLÈVRE (Fr.), n. Bu^6-ple^{2}vr. See Bupleurum.

BUPODOPURINUM (Lat.), n. n. Bu^2(bu)-po^{2}d-o(o^2)-pu^{2}r-(pu^{4}r)-i(e)'nu^{3}m(nu^{4}m). From βοῦς, an ox, πούς, a foot, and πύον, pus. The pus of foot-and-mouth disease; used in isopathic practice as a remedy applied by friction. [B, 270.]

BUPRESTÉ (Fr.), adj. Bu^6-pre^{2}st-a. Resembling the *Buprestis.*

BUPRESTI, BUPRESTIADÆ, BUPRESTIADES (Lat.), n's m. pl., f. pl., and f. pl. Bu^2(bu)-pre^{2}st(prast)'i(e), -pre^{2}st(prast)-i(i^2)'a^{2}d(a^{3}d)-e(a^3-e^2), -ez(e^{2}s). Fr., *buprestiens, buprestiades, buprestides.* A family or tribe of the *Coleoptera.* [L, 180, 292.]

BUPRESTIDAN, n. Bu^2-pre^{2}st'i^{2}d-a^{2}n. See Buprestis.

BUPRESTIDES (Lat.), n. f. pl. Bu^2(bu)-pre^{2}st(prast)'i^{2}d-ez(e^{2}s). See Buprešti.

BUPRESTIS (Lat.), n. f. Bu^2(bu)-pre^{2}st(prast)'i^{2}s. Gen., *buprest'eos* (*-is, -idos, -idis*). Gr., βούπρηστις (from βοῦς, an ox, and πρήθειν, to burn). Fr., *bupreste.* Ger., *Prachtkäfer.* 1. Burn-cow; an insect to which the ancients attributed poisonous properties like those of cantharides, and which was used in medicine. Eaten by cattle, it was said to cause them to swell up and die. [Chapuis, "Lyon méd.," May 28, 1882, p. 109; A. 325; H.] 2. A pot-herb, supposed to have been pungent, used by the ancient Greeks. [A, 387.] 3. A genus of the *Bupresti.* [L.] 4. The botanical genus *Hermas.* [B, 173.] 5. Of the ancients and of Sprengel, the *Bupleurum.* [B, 121.]—**B. gigantea** [Sprengel]. The *Hermas gigantea.* [B, 173.]

BUR, n. Bu^{6}r. O. E., *burre, borre.* Lat., *lappa* (1st def.). Fr., *glouteron* (1st def.). Ger., *Klette* (1st def.). 1. The burdock (*Arctium lappa*) or its prickly head, also any similar prickly structure on a plant. 2. The lobe of the ear. 3. The shoulder of an antler, next to the head. 4. The pancreas of the calf. 5. A dental drill with a serrated head larger than the shank. 6. Of Van Helmont, a hypothetical mineral juice generated in water putrefying in the earth, supposed to lead to the formation of minerals. [A, 301, 302, 325; L, 56, 73.]—**B.-bark.** The fibrous bark of *Triumfetta semitriloba.* [B, 19.]—**B.-flag.** The *Sparganium ramosum.* [B, 275.] —**B.-marigold.** The genus *Bidens.* [B, 215.]—**B. parsley.** The *Caucalis daucoides.* [B, 275.]

BUR (Bengal.), n. The *Ficus indica.* [B, 172.]

BURA (Bengal., Hind.), n. The *Villarsia indica.* [B, 172.]

BURAC, n. An alchemical name for any salt, especially borax. [Ruland (A, 325); L, 109.]

BURA-KANOOR (Hind.), n. The *Crinum asiaticum.* [B, 172.]

BURA-LEESORA (Hind.), n. The *Cordia latifolia.* [B, 172.]

BURA MAKHOM-SHIM (Bengal.), n. The *Canavalia gladiata.* [B, 172.]

BURAM-CHADALI, n. An East Indian name for the *Hedysarum gyrans.* [L, 105.]

BURANA, n. A Brazilian name for the *Bursera leptophlocos.* [L, 105.]

BURANG, n. The *Ficus indica.* [L, 41.]

BURANHAM (Port.), **BURANHEM** (Port.), n's. Bur-a^{3}n′-ya^{3}m, -ye^{2}m. See MONESIA.

BURA-PHOOTICA (Hind.), n. The *Melastoma malabaricum.* [B, 172.]

BURA-TUGUR (Hind.), n. The *Tabernæmontana coronia.* [B, 172.]

BUR-BUTEE (Bengal., Hind.), n. The *Dolichos chinensis.* [B, 172.]

BURCARDIA (Lat.), n. f. Bu^{5}r(bur)-ka^{3}rd′i^2-a^3. Fr., *burcardie.* Of Schmidt, see BULGARIA; of Scopoli, see TURNERA.—**B. turbinata** [Schmidt]. The *Bulgaria inquinans.* [B, 173.]

BURCKHARD (Ger.), n. Burk′ha^{3}rd. The *Atriplex hortense.* [B, 180.]

BÜRDE (Ger.), n. Bu^{6}rd′e^2. The secundines. [L, 80.]

BURDI (Ar.), n. The *Cyperus papyrus.* [L, 105.]

BURDO (Lat.), n. m. Bu^{5}rd(burd)′o. Gen., *burdo′nis.* The mule. Its testicles and liver were formerly considered medicinal. [A, 318, 325.]

BURDOCK, n. Bu^{5}r′do^{2}k. Lat., *lappa.* Fr., *bardane* [Fr. Cod.]. Ger., *Klette.* It., *bardana.* The *Arctium lappa.* [B, 5, 19.]—**B.-root.** Lat., *lappa* [U. S. Ph.], *radix bardanæ* [Ger. Ph.], Fr., *racine de bardane* [Fr. Cod.]. Ger., *Klettenwurzel.* It., *radice di lappa.* The root of *Arctium lappa.* [B, 5.]—**Great b.** See LAPPA *major.*—**Lesser b.** See LAPPA *minor.*—**Prairie b.** An American name for the *Silphium terebinthinaceum.* [B. 19, 34.]

BURDUNCULUS (Lat.), n. m. Bu^{5}rd(burd)-u^{3}n^2(u^{4}n^2)′ku^2-(ku^4)-lu^{3}s(lu^{4}s). An ancient name for a plant of the genus *Buglossum.* [A, 318.]

BURETTE, n. Bu^{2}r-e^{2}t′. Fr., *burette.* Ger., *Bürette.* A glass vessel devised by Gay-Lussac for the accurate measurement of liquids used in analysis. It has the general form of a tube from 16 to 18 mm. in diameter and 30 ctm. long, open at the top and closed at the bottom, except for a communication with a narrow tube which is continued upward nearly to the top of the vessel, where it is bent into a spout for delivering the liquid. The vessel is graduated from above downward. [B, 2.]—**Geissler's b.** A b. like Gay-Lussac's, but with the delivery tube inside the vessel. [L, 120.]—**Mohr's b.** A graduated glass tube drawn to a point at the bottom, where the flow of liquid is controlled by a stopcock or by a pinchcock applied to a piece of rubber tubing slipped over the point of the tube. [B.]

BÜRETTEN-INFUSOR (Ger.), n. Bu^{6}r-e^{2}t′te^{2}n-i^{2}n-fuz-or″. See under INFUSOR.

BURGAMOT, n. Bu^{5}rg′a^{2}m-o^{2}t. See BERGAMOT.

BURGBERNHEIM (Ger.), n. Burg′be^{2}rn-him. A place in Bavaria, where there are five springs (the *Doctorbrunnen*, the *Musquetierbrunnen*, the *Badbrunnen*, the *Augenbrunnen*, and the *Kochbrunnen*) containing magnesium sulphate. [A, 319; L, 49.]

BURGUNDY, n. Bu^{5}rg′u^{3}nd-i^2. See *B.* WINE and *B.* PITCH.

BURIN (Fr.), n. Bu^{6}r-a^{2}n^2. An instrument for scaling out cavities in teeth preparatory to filling. [L, 109.]

BURINA, n. An alchemical name for pitch. [Ruland (A, 325).]

BURIS (Lat.), n. f. Bu^2(bu)′ri^{2}s. 1. An old name for "hernia scirrhosa." [Avicenna (A, 325).] 2. The *Artemisia vulgaris.* [L, 105.]

BURITI, n. A Brazilian name for several species of *Mauritia.* [Drude (B, 245).]

BURKING, BURKISM, n's. Bu^{5}rk′i^{2}ng, -i^{2}zm. Murder, especially by suffocation, committed for the purpose of obtaining material for dissection; so called from the practice of one Burke, of Dublin. [A, 302.]

BURLINGTONIÆ [Lindley] (Lat.), n. f. pl. Bu^{5}rl-i^{2}ng-ton-(to^{2}n)′i^2-e(a^3-e^2). A tribe of orchids. [B, 121.]

BURMANNIACEÆ (Lat.), n. f. pl. Bur-ma^{3}n-ni^2-a(a^3)′se^2-(ke^2)-e(a^3-e^2). Fr., *burmanniacées.* Of Blume and succeeding authors, a small order of monocotyledonous plants, which by the earlier authors was regarded as akin to the *Amaryllidaceæ* or *Velloziaceæ*, but in the more recent systematic classifications is placed next to the orchids, and by Bentham and Hooker in the same series (*Microspermæ*) as the latter. According to the latter authors, it is composed of herbs, usually erect and simple, with narrow leaves gathered at the base of the plant or reduced to scales scattered along the stem and terminal (cymose) inflorescence consisting of one or more bluish, yellow, or whitish, regular and usually perfect flowers on very short pedicels, having a perianth tubular below, above dividing into 6 segments, the outer 3 greenish and equal, the inner 3 smaller (sometimes wanting) and equal; 3 or 6 stamens with short filaments, inserted on the tube of the perianth or affixed to the throat of the latter, and bearing bilocular, variously dilated or appendiculate, anthers; an inferior ovary, sometimes trilocular with axile placentæ, sometimes unilocular with 3 parietal placentæ, each placenta bearing very many small ovules; and a single style included in the perianth-tube and dividing above into 3 very short stigmas. The fruit is a variously dehiscing many-seeded capsule crowned with the remains of the perianth. The seeds are minute, with thin testa, and exalbuminous. The order includes *Burmannia* and a few other genera; the genus *Tacca*, which was formerly comprised in it, is now referred to a widely different order (*Taccaceæ*). [B, 42, 170.]

BURMANNIADS, n. pl. Bur-ma^{3}n′ni^2-a^{2}dz. Of Lindley, the *Burmanniaceæ.* [L, 73.]

BURMANNIÆ [Sprengel] (Lat.), n. f. pl. Bur-ma^{3}n′ni^2-e(a^3-e^2). See BURMANNIACEÆ.

BURMANNIEÆ (Lat.), n. f. pl. Bur-ma^{3}n-ni(ni^2)′e^2-e(a^3-e^2). 1. Of Reichenbach and Lindley (1830). an order of the *Narcisseæ* (*Narcissales* [Lindley]). See BURMANNIACEÆ. 2. Of Miers and Lindley (1847), a tribe of the *Burmanniaceæ*, comprising *Burmannia* and *Gonyanthes.* [B, 170.]

BURN, n. Bu^{5}rn. From A.-S., *beornan*, to burn. Gr., **καῦσις**. Lat., *ustio*, *adustio*, *ambustio.* Fr., *brûlure.* Ger., *Brennen*, *Verbrennen.* It., *abbruciamento.* Sp., *quemazon*, *quemadura.* An injury produced by fire or by a very hot dry object. As classified by Dupuytren, b's are of six degrees: 1. Those producing only rubefaction. 2. Those causing vesiculation. 3. Those causing destruction of a portion of the papillary layer of the skin. 4. Those involving destruction of the whole thickness of the skin. 5. Those destroying all the tissues down to the bone. 6. Those that completely char a limb or other part. Commonly the third, fourth, fifth, and sixth of these degrees are classed as one. [A, 301; E.] Cf. SCALD.—**Brush-b.** A contusion resembling a burn, produced by attrition. [J. Ashhurst, Jr., "N. Y. Med. Jour.," Apr. 7, 1888, p. 384.]

BURNEA, n. An old name for pitch. [L, 104.]

BURNER'S SPRINGS, n. Bu^{5}rn′u^{5}rz. A place in Shenandoah County, Virginia, where there are seven springs (the "seven fountains") containing iron, sulphur, etc. [A, 363.]

BURNET, n. Bu^{5}rn′e^{2}t. The *Poterium sanguisorba.* [L, 77.]—**B.-bloodwort.** The *Sanguisorba officinalis.* [L, 73.]—**Canada b., Canadian b.** The *Sanguisorba canadensis.* [A, 302.]—**Common b., Garden b.** See *B.*—**Great b.** The *Sanguisorba officinalis.* [B, 19.]—**Lesser b., Salad b., Small b.** See *B.*

BURNIA, n. See BURNEA.

BURNING, n. Bu^{5}rn′i^{2}ng. Fr., *sensation de brûlure*, *chaleur.* A sensation in a part as if it had been burned or were being burned. —**B. of the feet.** See under BERIBERI.

BURNING, adj. Bu^{5}rn′i^{2}ng. 1. In process of combustion. 2. Causing a burn or a b. sensation. See *B.*-BUSH, *B.* FEVER, *B.*-GLASS, *B.*-NETTLE, *B.*-PLANT, etc.

BURNT, adj. Bu^{5}rnt. Lat., *adustus.* Fr., *aduste*, *brûlé.* Ger., *verbrannt.* Burned, parched, calcined; formerly said also of a supposed state of the blood and other humors of the body, characterized by dryness and heat of the skin, thirst, and a dark color of the blood drawn from a vein, together with its deficiency in serum. [A, 301.]—**B. brass.** See ÆS *ustum.*—**B.-ear.** See under EAR.—**B. hartshorn.** See CORNU CERVI *ustum.*—**B.-holes.** See NOMA and PEMPHIGUS *gangrænosus.*—**B. sponge.** See SPONGIA *usta.*

BURNWOOD, n. A West Indian negro name for the *Rhus metopium.* [B, 19.]

BUROBET (Hind.), n. The *Calamus fasciculatus.* [B, 172.]

BURO-BUHOOARI (Bengal.), n. The *Cordia latifolia.* [B, 172.]

BURONG (Teloogoo), n. The *Ficus rubescens.* [B, 172.]

BUROON (Hind.), n. The *Cratæva Roxburghii.* [B, 172.]

BURO-REETHA (Hind.), n. The *Sapindus emarginatus.* [B, 172.]

BURO-RUKTOKUMBAL (Hind.), n. The *Nymphæa rubra.* [B, 172.]

BURO-SHIAE-KAUTA (Hind.), n. The *Argemone mexicana.* [B, 172.]

BURQUISM, n. Bu^{6}rk′i^{2}zm. Fr., *burquisme.* The practice of metallo-therapeutics: so called from Burq, its inventor.

BURR, n. Bu^{5}r. See BUR.—**Bathurst b.** The *Xanthium spinosum.* [B, 19.]—**Styptic b., Velvet b.** The *Priva echinata.* [B, 19.]

BURRAGE, n. Bu^{5}r′e^{2}j. See BORAGE and BORAGO *officinalis.*

BURRA GHOKEROO (Bengal., Hind.), n. The *Pedalium murex.* [B, 172.]

BURRO, n. The fruit of *Xylopia longifolia.* [B, 270.]

BURRONE (It.), n. Bur-ron′a. A place in Tuscany, where there is a chalybeate spring. [A, 385; L, 49.]

BURSA (Lat.), n. f. More properly written *byrsa.* Bu^{5}rs-(bu^{6}rs)′a^3. From **βύρσα**, a leathern bottle. Fr., *bourse.* Ger., *Beutel.* It., *borsa.* Sp., *bolsa.* 1. A pouch, especially a synovial sac. See *B. mucosa.* 2. A bag-like supporting bandage. [A, 301.] 3. A name proposed for the *Capsella b. pastoris.* [B, 121.]—**Accidental b.** Fr., *bourse muqueuse accidentelle.* A b. resembling a b. mucosa, but containing a less viscid liquid, formed under the skin of a part subjected to habitual friction or pressure. [A, 301; L, 41.]—**Anconeal b.** Lat., *b. anconæa*, *b. anconæi.* A b. situated between the olecranon and the tendon of the triceps extensor cubiti. [L, 31.]—**Boyer's b.** See *B. subhyoidea.*—**Bursæ abductoris minimi digiti** [Synnestvedt]. Two rare bursæ; one between the abductor minimi digiti pedis and the sesamoid bone of the peroneus longus; the other between the abductor and the tuberosity of the fifth metatarsal bone. [F. Baker (A, 473).]—**Bursæ anales.** Certain glandular appendages of the rectum in the *Chelonia*, of unknown function. [L, 210.]—**B. anconæa, B. anconæi.** See *Anconeal b.*—**B. anguli mandibuli.** A rather

rare subcutaneous b. situated over the angle of the jaw. [F. Baker (A, 473).]—**B. anguli sterni.** An accidental subcutaneous b. situated over the angle between the first and second pieces of the sternum. [F. Baker (A, 473).]—**Bursæ aortico-tracheales** [Calori]. Bursæ often found between the aorta and the trachea. [F. Baker (A, 473.)—**B. bicipitis cruris** [Albinus], **B. bicipito-fibularis.** A b. situated between the tendon of the biceps femoris and the short external lateral ligament of the knee. [L, 31.]—**B. bicipito-gastrocnemialis.** See *B. mucosa retrocondyloidea externa media.*—**B. calcanea** [Monro]. A b. situated between the tendo Achillis and the calcaneum. [L, 31.]—**B. capsulæ oculi.** A b. situated between the capsule of Tenon and the globe of the eye. [F. Baker (A, 473).]—**B. circumflexa obturatoris interni.** A b. situated between the obturator internus and the lesser ischiadic notch. [F. Baker (A, 473).]—**B. circumflexi palati** [Rosenmüller]. A b. situated at the turn of the tensor palati around the hamular process. [F. Baker (A, 473).]—**B. coccygea** [Luschka]. A b. situated between the tip of the coccyx and the sphincter ani. [F. Baker (A, 473).]—**B. condyli externi.** A subcutaneous b. over the outer condyle of the femur. [F. Baker (A, 473).]—**B. condyli interni.** A subcutaneous b. over the inner condyle of the femur. [F. Baker (A, 473).]—**B. copulatrix.** See CIARUS-*pouch.*—**B. coraco-brachialis.** See *B. mucosa coraco-brachialis.*—**B. coraco-brachialis minor** [Gruber]. A b. found under a rare muscle arising from the anterior and inner part of the coracoid process. [F. Baker (A, 473).]—**B. coraco-clavicularis lateralis** [Gruber]. An occasional b. found between the coracoid process and the trapezoid ligament. [F. Baker (A, 473).]—**B. coraco-clavicularis media** [Gruber]. A b. situated between the conoid and the trapezoid ligaments. [F. Baker (A, 473).]—**B. coracoidea.** A b. situated near the root of the coracoid process of the scapula. [L, 84.]—**B. costæ primæ.** A b. situated between the tuberosity of the first rib and the overlying muscles. [F. Baker (A, 473).]—**B. crico-thyreo-thyreoidea** [Calori]. A b. situated between the lateral lobes of the thyreoid body and the crico-thyreoid. [F. Baker (A, 473).]—**B. digastrici anterior** [Rosenmüller]. A b. situated at the point of passage of the tendon of the digastric muscle through the fascia binding it to the hyoid bone or through the stylo-hyoid muscle. [F. Baker (A, 473).]—**B. digastrici posterior** [Rosenmüller]. A b. situated between the posterior belly of the digastric muscle and the sterno-cleido-mastoid. [F. Baker (A, 473).]—**Bursæ dorsales subcutaneæ.** Subcutaneous bursæ of the dorsum of the hand or foot. In the hand they are generally situated over the extensor tendons at the metacarpo-phalangeal joints; in the foot, over the first cuneiform bone, over the head of the first metatarsal bone, and occasionally over other bony prominences. [F. Baker (A, 473).]—**Bursæ dorsales subtendineæ.** Bursæ found between the extensor tendons and the capsules of the metacarpo-phalangeal or metatarso-phalangeal joints. [F. Baker (A, 473).]—**B. entiana.** The duodenum in the *Chondropterygii.* [L, 207.]—**B. epicondyli** [Schreger]. A rare b. found between the skin and the outer condyle of the humerus. [F. Baker (A, 473).]—**B. epitrochleæ** [Schreger]. A b. found between the skin and the inner condyle of the humerus. [F. Baker (A, 473).]—**B. extensoris carpi radialis brevioris** [Monro]. An occasional b. found over the head of the radius and beneath the origin of the extensor carpi radialis brevior and the extensor communis digitorum. [F. Baker (A, 473).]—**B. extensoris carpi ulnaris** [Jancke]. A b. situated beneath the origin of the extensor carpi ulnaris, sometimes communicating with the elbow joint and with the anconeal b. [F. Baker (A. 473).]—**B. extensoris digitorum communis** [Monro]. A b. situated between the lower band of the anterior annular ligament of the ankle and the tendons of the peroneus tertius and extensor digitorum communis. [L, 31.]—**B. Fabricii.** Fr., *bourse de Fabrice.* An ovoid sac with glandular walls situated between the dorsal wall of the cloaca and the roof of the pelvic cavity in birds, and opening into the cloaca. Fabricius ab Aquapendente, who discovered it in the hen, supposed that it served as a receptacle for the semen of the male, which, being stored there, retained its activity for a long time and was capable of fertilizing ova formed subsequently. Its function is not known. It usually becomes atrophied in the adult bird. [A, 4; L, 200.]—**B. fibularis subcutanea** [Schreger]. A subcutaneous b. found over the upper end of the fibula. [F. Baker (A, 473).]—**B. flexoris digitorum sublimis** [Gruber]. A rare b. found in the tendon of origin of the flexor digitorum sublimis or between it and the pronator radii teres. [F. Baker (A, 473).]—**B. fossæ infraclavicularis** [Gruber]. A b. situated between the two layers of the coraco-clavicular fascia. [F. Baker (A, 473).]—**B. galeæ capitis.** A b. found, in aged persons, over the occipital protuberance, between the pericranium and the aponeurosis of the occipito-frontalis. [F. Baker (A, 473).]—**B. gastrocnemialis externa.** See *B. mucosa gastrocnemialis externa.*—**B. gastrocnemialis interna.** A b. situated between the inner head of the gastrocnemius and the semimembranosus, behind the inner condyle of the femur, usually communicating with the knee joint. [F. Baker (A, 473).]—**B. gemellorum** [Synnestvedt]. A very rare b. found between the gemelli muscles and the capsule of the hip joint. [F. Baker (A, 473).]—**B. genualis anterior** [Monro]. A b. situated between the head of the tibia and the tendons of the semitendinosus and gracilis. [L, 31.]—**B. genualis posterior.** See *B. synovialis semimembranosi.*—**B. glutæi medii.** See *B. vesicularis glutæi medii.*—**B. glutæi medii anterior.** A b. situated between the trochanter major and the fore part of the tendon of the glutæus medius. [F. Baker (A, 473).]—**B. glutæi medii posterior.** See *B. vesicularis glutæi medii.*—**B. glutæi minimi** [Monro]. A b. situated between the tendon of the glutæus minimus and the trochanter major. [L, 31.]—**B. glutæo-fascialis, B. glutæo-femoralis, B. glutæo-trochanterica.** See *B. mucosa trochanterica.*—**B. humero-tricipitalis.** A rare b. found on the anterior surface of the lower part of the triceps extensor cubiti. [F. Baker (A, 473).]—**B. hyperxiphoidea.** A subcutaneous b. found, in shoemakers and rhachitic children, over the xiphoid cartilage. [F. Baker (A, 473).]—**B. iliaca.** A b. situated between the ilio-psoas muscle and the brim of the pelvis. [L, 31.]—**B. iliaca anterior.** A subcutaneous b. found over the anterior superior spine of the ilium. [F. Baker (A, 473).]—**B. infragenualis, B. infrapatellaris, B. infrapatellaris profunda.** See *B. subpatellaris.*—**B. infrascapularis.** A b. found between the lower angle of the scapula and the subjacent parts. [F. Baker (A, 473).]—**B. infraspinata.** See *B. mucosa infraspinata.*—**Bursæ intermetacarpo-phalangeæ.** Bursæ situated between the heads of the metacarpal bones of the fingers. [F. Baker (A, 473).]—**B. intermetatarso-phalangea.** See *B. mucosa intermetatarso-phalangea.*—**B. intermuscularis extensoris cruris.** A rare b. found between the tendon of the rectus femoris and that of the cruræus. [F. Baker (A, 473).]—**B. intermuscularis pectoralis majoris** [Synnestvedt]. A b. found between the clavicular and thoracic portions of the pectoralis major. [F. Baker (A, 473).]—**Bursæ interosseæ.** See *Bursæ mucosæ interosseæ manus* and *pedis.*—**B. intertubercularis** [Henle]. A prolongation of the synovial sac of the shoulder joint downward upon the long tendon of the biceps flexor cubiti. [L, 31.]—**B. intratendinea olecrani.** A b. found within the tendon of the triceps extensor cubiti. [F. Baker (A, 473).]—**B. latissimi dorsi.** A b. (not found by recent observers) said to be situated between the latissimus dorsi muscle and the inferior angle of the scapula. [F. Baker (A, 473).]—**Bursæ lumbricalium.** See *Bursæ mucosæ musculorum lumbricalium.*—**B. malleoli externi.** A subcutaneous b. over the external malleolus. [F. Baker (A, 473).]—**B. malleoli interni.** A subcutaneous b. over the internal malleolus. [F. Baker (A, 473).]—**Bursæ massetericæ.** Several bursæ situated beneath the masseter muscle. [F. Baker (A, 473.).]—**B. metacarpea ulnaris** [Synnestvedt]. A subcutaneous b. found over the head of the fifth metacarpal bone. [F. Baker (A, 473).]—**B. mucosa.** Fr., *bourse muqueuse, b. séreuse.* Ger., *Schleimbeutel.* A sac lined with a membrane which secretes a synovial fluid, interposed between parts which are subjected to frequent motion upon each other, or developed accidentally beneath the skin of a part subjected to habitual friction or pressure. Some of the bursæ mucosæ are simple roundish sacs; others are shaped like a sheath and surround a tendon. [A, 301; L, 44.]—**B. mucosa acromialis.** A b. situated between the deltoid muscle and the head of the humerus. [L, 31.]—**B. mucosa anguli superioris intraserrati, B. mucosa anguli superioris scapulæ.** A b. situated between the levator anguli scapulæ and the upper portion of the serratus anticus muscle. [L, 31.]—**B. mucosa bicipitalis** [Gruber]. See *B. bicipitis cruris.*—**B. mucosa coraco-brachialis** [Monro]. A b. situated between the subscapularis muscle and the upper ends of the muscles arising from the coracoid process of the scapula. [L, 31.]—**B. mucosa coracoidea.** See *B. mucosa subscapularis.*—**B. mucosa externa** [Gruber], **B. mucosa fibularis** [Gruber]. See *B. bicipitis cruris.*—**B. mucosa fossæ infraclavicularis.** See *B. mucosa supracoracoidea medialis antica.*—**B. mucosa gastrocnemialis externa** [Gruber]. A b. occasionally found beneath the outer head of the gastrocnemius muscle. [L, 31.]—**B. mucosa humeralis.** See *B. mucosa acromialis.*—**B. mucosa infracondyloidea externa** [Gruber]. A b. situated beneath the popliteus muscle and usually communicating with the knee joint. [L, 31.]—**B. mucosa infrapatellaris profunda** (seu subtendinosa) [Gruber]. See *B. subpatellaris.*—**B. mucosa infraspinata** [Arnold]. A b. situated between the fascia of the infraspinatus muscle and the capsule of the shoulder joint. [L, 31.]—**B. mucosa intermetacarpo-phalangea.** A b. situated on the lateral surface of the capsule of a metacarpo-phalangeal articulation, between two adjacent metacarpal bones. [L, 31.]—**B. mucosa intermetatarso-phalangea.** A b. situated between two adjacent metatarso-phalangeal articulations. [L, 31.]—**Bursæ mucosæ interosseæ manus** [Gruber]. Bursæ situated between the tendons of the interosseous muscles of the band and the metacarpo-phalangeal articulations. [L, 31.]—**Bursæ mucosæ interosseæ pedis.** Bursæ situated between the tendons of the plantar interosseous muscles and the metatarso-phalangeal articulations. [L, 31.]—**B. mucosa interstitialis parietis interni cavi axillaris.** See *B. mucosa subserrata.*—**B. mucosa ligamenti fundiformis tarsi.** See *B. mucosa sinus tarsi.*—**B. mucosa ligamenti patellæ posterior.** See *B. subpatellaris.*—**Bursæ mucosæ lumbricales pedis accessoriæ** [Gruber]. Bursæ situated between the tendons of the lumbricales muscles of the foot and the basal phalanges. [L, 31.]—**Bursæ mucosæ lumbricalium pedis propriæ.** See *Bursæ mucosæ musculorum lumbricalium.*—**B. mucosa musculi cruralis.** See *B. synovialis subcruralis.*—**B. mucosa musculi ulnaris externi.** A b. situated beneath the tendon of origin of the extensor carpi ulnaris, sometimes communicating with the capsule of the elbow joint. [L, 31.]—**Bursæ mucosæ musculorum lumbricalium** [Gruber]. Bursæ situated beneath the lumbricales muscles of the foot and between the heads of adjacent metatarsal bones. [L, 31.]—**B. mucosa patellæ profunda.** See *B. mucosa superficialis genu.*—**B. mucosa præpatellaris media** (seu subaponeurotica) [Gruber]. See *B. subfascialis.*—**B. mucosa radialis.** A b. situated between the tendon of insertion of the biceps flexor cubiti and the radius. [L, 31.]—**B. mucosa radialis extensoris brevis** [Gruber]. A b. situated between the origin of the extensor carpi radialis brevis and the supinator brevis. [L, 31.]—**B. mucosa retrocondyloidea externa media** [Gruber] (seu **subcutanea,** seu **superficialis**). A b. found when a sesamoid bone exists in the outer head of the gastrocnemius muscle, between that bone and the tendon of the biceps femoris or the skin. [L, 31.]—**B. mucosa retrocondyloidea interna.** See *B. synovialis semimembranosa.*—**B. mucosa retro-epicondyloidea externa propria** (seu **profunda**). See *B. mucosa gastrocnemialis externa.*—**B. mucosa retro-epitrochlearis** [Gruber]. A b. occasionally found between the deep head of the triceps extensor cubiti and the inner condyle of the humerus. [L, 31.]—**B. mucosa semimembranoso-gastrocnemialis.** See *B. synovialis semimembranosa.*—**B. mucosa sinus tarsi.** A b. occasionally found in the fat of

the tarsal sinus. [L, 31.]—**B. mucosa subclavia** [Monro]. A b. situated on the inner surface of the costo-clavicular ligament. [L, 31.]—**B. mucosa subcoracoidea** [Gruber]. See *B. mucosa subscapularis.*—**B. mucosa subcutanea.** Fr., *bourse muqueuse souscutanée.* Ger., *Hautschleimbeutel.* It., *borsa mucosa sottocutanea.* A normal or abnormal b. mucosa situated beneath the integument. [L, 44.]—**B. mucosa sublingualis.** Fr., *bourse séreuse de Fleischmann.* A b. found by Fleischmann beneath the tongue. [L, 50.]—**B. mucosa subscapularis.** A b. occasionally found between the subscapularis muscle and the b. synovialis subscapularis. [L, 31.]—**B. mucosa subserrata.** A b. situated between the serratus anticus muscle and the upper part of the lateral wall of the chest, beneath the superior angle of the scapula. [L, 31.]—**B. mucosa subtendinosa.** Fr., *bourse muqueuse d'un tendon.* Ger., *Sehnenschleimbeutel.* It., *borsa mucosa sottotendinea.* A b. separating a tendon from any adjacent structure. [L, 44.]—**B. mucosa subtendinosa vesicularis.** Fr., *bourse muqueuse vésiculaire d'un tendon.* Ger., *Bläschenschleimbeutel.* It., *borsa mucosa sottotendinea vesicolare.* The synovial sheath of a tendon. [L, 44.]—**B. mucosa superficialis genu** [Loder]. A b. situated between the superficial insertion of the quadriceps extensor cruris and the capsule of the knee joint. [L, 31.]—**B. mucosa supracoracoidea medialis antica.** A b. situated in front of the coracoid process of the scapula and beneath a fascia extending between the costo-clavicular and coraco-clavicular ligaments. [L, 31.]—**B. mucosa supragenualis** (seu **suprapatellaris** [Gruber]). See *B. synovialis subcruralis.*—**B. mucosa trochanterica.** A b. situated between the trochanter major and the glutæus maximus muscle. [L, 31.]—**B. mucosa vaginalis.** Fr., *bourse muqueuse vaginale d'un tendon.* Ger., *Schleimscheide.* It., *borsa mucosa sotto-tendinea vaginiforme.* A b. which completely surrounds a tendon. [L, 44.]—**B. musculi cruralis** [Monro]. See *B. synovialis subcruralis.*—**B. musculi deltoidei.** See *B. mucosa acromialis.*—**B. musculi flexoris digitorum sublimis** [Gruber]. A b. occasionally found between the tendon of origin of the flexor digitorum sublimis and the pronator radii teres. [L, 31.]—**B. musculi glutæi in tubere ischii.** A b. found between the lower border of the glutæus maximus and the tuberosity of the ischium. [F. Baker (A, 473).]—**B. musculi thyreoidei.** A b. situated between the levator thyreoidei and the thyreoid gland; found by Calori in a case of goître. [F. Baker (A, 473).]—**B. musculi tricipitis.** See *Anconeal b.*—**Bursæ musculorum interosseorum manus.** See *Bursæ mucosæ interosseæ manus.*—**Bursæ musculorum interosseorum pedis.** See *Bursæ mucosæ interosseæ pedis.*—**Bursæ musculorum lumbricalium pedis accessoriæ.** See *Bursæ mucosæ interosseæ accessoriæ.*—**B. Needhamii.** The pouch of Needham; a pouch connected with the vas deferens of the *Cephalopoda*, serving as a receptacle for the semen. [L, 296.]—**B. obturatoris externi.** A b. situated between the obturator externus muscle and the capsule of the hip joint. [L, 31.]—**B. obturatoris interni.** See *B. tuberoso-ischiadica.*—**B. of the digastricus.** A b. situated on the internal surface of the tendon of the digastric muscle. [L, 84.]—**B. of the latissimus dorsi.** A b. situated between the tendon of the latissimus dorsi muscle and the humerus. [L, 84.]—**B. of the pectoralis major.** A b. situated between the head of the humerus and the inner surface of the pectoralis major muscle. [L, 84.]—**B. of the pharynx.** Lat., *b. pharyngea.* Fr., *bourse pharyngienne.* A recess in the mucous membrane of the back part of the pharynx, in the median line, extending up to the tubercle. [C.]—**B. of the quadratus femoris.** A b. situated between the quadratus femoris and the trochanter minor. [L, 84.]—**B. of the sterno-hyoideus.** A b. situated between the hyoid bone and the larynx. [L, 84.]—**B. of the tibialis anticus.** A b. situated between the tendon of the tibialis anticus and the lower part of the tibia and the capsular ligament of the ankle joint. [L, 84.]—**B. of the tibialis posticus.** A b. situated between the tendon of the tibialis posticus and the tibia and astragalus. [L, 84.]—**B. omentalis.** Fr., *bourse omentale.* Ger., *Netzbeutel.* It., *borsa omentale.* A large cavity formed by the peritonæum behind the stomach and in the great omentum. It begins at the foramen of Winslow, and is divided into the *b. omenti majoris* and the *b. omenti minoris.* [H; L, 44.]—**B. omenti majoris.** The cavity of the great omentum. [H.]—**B. omenti minoris.** The cavity of the lesser omentum. [H.]—**B. omo-hyoidei.** A b. situated between the sterno-cleido-mastoid muscle and the middle tendon of the omo-hyoid. [F. Baker (A, 473).]—**B. ovalis obturatoris interni.** A b. found between the gemelli muscles and the tendon of the obturator internus. [F. Baker (A, 473).]—**B. palmaris longi.** A rare b. found between the origin of the palmaris longus and the capsule of the elbow joint. [F. Baker (A, 473).]—**B. pastoris** [Tournefort]. The genus *Capsella*, especially the *Capsella b. pastoris.* [B, 270.]—**B. patellæ, B. patellaris.** Fr., *bourse prérotulienne.* A b. situated between the patella and the skin. [L, 31.]—**B. patellaris lateralis externa.** A rare b. found between the outer lateral expansion of the tendon of the quadriceps extensor cruris and the patella. [F. Baker (A, 473).]—**B. patellaris lateralis interna.** A superficial or deep b. found between the inner lateral expansion of the tendon of the quadriceps extensor cruris and the patella. [F. Baker (A, 473).]—**B. pectoralis minoris.** A b. situated beneath the tendon of the pectoralis minor. [L, 31.]—**B. penis.** See Cirrus-*pouch.*—**B. peronea communis.** A b. situated between the tendons of the peroneus brevis and peroneus longus muscles and the lower part of the fibula. [L, 31.]—**B. peronei longi** [Monro]. The synovial sac surrounding the tendon of the peroneus longus muscle as it passes over the calcaneum. [L, 31.]—**Bursæ phalangeæ dorsales.** Subcutaneous bursæ found on the dorsal aspect of the phalangeal joints. [F. Baker (A, 473).]—**B. pharyngea.** See *B. of the pharynx.*—**B. phrenico-hepatica anterior** [von Brunn]. A b. situated between the left lateral ligament of the liver and the diaphragm in front. [F. Baker (A, 473).]—**B. phrenico-hepatica posterior** [von Brunn]. An occasional b. found between the left lateral ligament of the liver and the diaphragm posteriorly. [F. Baker (A, 473).]—**B. plantaris in capitulo ossis metatarsi primi.** A subcutaneous b. beneath the head of the first metatarsal bone. [F. Baker (A, 473).]—**B. plantaris in capitulo ossis metatarsi quinti.** A subcutaneous b. beneath the head of the fifth metatarsal bone. [F. Baker (A, 473).]—**B. poplitea.** A b. situated beneath the popliteus muscle and on the capsule of the knee joint and the outer tuberosity of the tibia; properly a diverticulum of the capsule, occasionally communicating also with the superior tibio-fibular articulation. [F. Baker (A, 473).]—**B. postcalcanea profunda.** See *B. calcanea.*—**B. postcalcanea superficialis.** An occasional b. found between the tendo Achillis and the deep fascia. [F. Baker (A, 473).]—**B. præligamentosa.** A subfascial b. found over the ligamentum patellæ. [F. Baker (A, 473).]—**B. præmentalis.** See Bourse *prémentonnière.*—**B. præpatellaris subaponeurotica.** A b. situated beneath the aponeurosis covering the patella. [L, 57.]—**B. præpatellaris subcutanea.** A subcutaneous b. in front of the patella. [F. Baker (A, 473).]—**B. præpatellaris subfascialis.** A b. found between the fascia covering the patella and the aponeurosis of the quadriceps extensor cruris. [F. Baker (A, 473).]—**B. prætbyreoidea.** A b. found in the aged, between the skin and the upper part of the thyreoid cartilage. [F. Baker (A, 473).]—**B. prætibialis.** A subfascial b. found over the tuberosity of the tibia. [F. Baker (A, 473).]—**B. pyriformis.** A b. situated beneath the tendon of insertion of the pyriformis muscle. [L, 31.]—**B. quadrati femoris.** A b. situated between the quadratus femoris and the trochanter minor. [F. Baker (A, 473).]—**B. radialis interni** [Monro]. A b. lining the canal in the anterior annular ligament of the wrist for the passage of the tendon of the flexor carpi radialis. [L. 31.]—**B. radialis subcutanea.** An uncommon b. found over the styloid process of the radius. [F. Baker (A, 473).]—**B. radio-bicipitalis.** See *B. mucosa radialis.*—**B. retro-epitrochlearis.** A rare b. found between the triceps extensor cubiti and the ulnar nerve behind and the inner condyle of the humerus and the capsule of the elbow joint in front. [F. Baker (A, 473).]—**B. sacculi lacrimalis.** A rare b. found between the lacrymal sac and the internal palpebral ligament. [F. Baker (A, 473).]—**B. sacralis** [Luschka]. A b. found, in old subjects, over the spine of the fourth or fifth sacral vertebra or over the sacro-coccygeal joint. [F. Baker (A, 473).]—**B. sartorii propria.** A b. situated between the tendon of the sartorius muscle and the tibia. [L, 31.]—**B. semimembranosa.** See *B. synovialis semimembranosa.*—**Bursæ semimembranosæ in tubere ischii.** Two bursæ found between the tendon of the semimembranosus and the quadratus femoris. [F. Baker (A, 473).]—**B. semimembranoso-gastrocnemialis.** The lower portion of the b. gastrocnemialis interna, described by Synnesvedt as a separate b. [F. Baker (A, 473).]—**B. semitendinoso-bicipitalis in tubere ischii.** A b. situated between the tuberosity of the ischium and the conjoint tendon of the semitendinosus and biceps flexor cruris. [F. Baker (A, 473).]—**B. serosa tendinosa.** Fr., *bourse séreuse tendineuse.* See *B. mucosa subtendinosa.*—**B. sinus tarsi.** See *B. mucosa sinus tarsi.*—**B. spermatophora.** A dilatation of the vas deferens in some of the *Cephalopoda.* [L, 121.] Cf. *B. Needhamii.*—**B. spinæ sphenoideæ.** According to Hyrtl, a b. found between the spine of the sphenoid bone and the capsule of the temporo-maxillary joint when the joint is unusually large. [F. Baker (A, 473).]—**B. sterno-hyoidei** [Rosenmüller]. A b. situated between the hyoid bone and the insertion of the sterno-hyoid muscle. [F. Baker (A, 473).]—**B. stylo-hyoidea.** A b. situated beneath the insertion of the stylo-hyoid muscle. [F. Baker (A, 473).]—**B. subacromialis.** See *Subacromial b.*—**B. subcalcanea** [Leloir]. A b. situated between the inferior surface of the calcaneum and the plantar fascia. [F. Baker (A, 473).]—**B. subclavia.** See *B. mucosa subclavia.*—**B. subcoracoidea** [Gruber]. See *B. mucosa subscapularis.*—**B. subcruralis.** See *B. synovialis subcruralis.*—**B. subcutanea.** Fr., *bourse souscutanée.* See *B. mucosa subcutanea.*—**B. subcutanea olecrani** [Camper]. A b. situated between the skin and the periosteum of the olecranon. [F. Baker (A, 473).]—**B. subcutanea tuberis ischii.** A b. described by Hyrtl and Nélaton as found directly under the skin over the tuberosity of the ischium; probably rare. [F. Baker (A, 473).]—**B. subdeltoidea.** A b. situated at the side of the shoulder joint, beneath the deltoid muscle. [L.]—**B. subfascialis** [Linhart]. A b. situated between the superficial insertion of the quadriceps extensor cruris and the lower portion of its fascia lata. [L, 31.]—**B. subhyoidea.** Boyer's b.; found between the thyreo-hyoid membrane and the hyoid bone and the conjoint insertion of the sterno-hyoid, omo-hyoid, and stylo-hyoid muscles. [F. Baker (A, 473).]—**B. subiliaca** [Hyrtl]. A b. situated beneath the tendon of the ilio-psoas muscle, covering the ilio-pectineal tubercle, the anterior aspect of the pubic bone, and the capsule of the hip joint, with which it often communicates. [F. Baker (A, 473).]—**B. sub ligamento interno** [Synnestvedt]. A b. found between the capsule of the knee joint and the internal lateral ligament. [F. Baker (A, 473).]—**B. submammaria.** A rare b. situated between the mammary gland and the pectoralis major muscle. [F. Baker (A, 473).]—**B. sublingualis.** See *B. mucosa sublingualis.*—**B. subpatellaris.** A b. situated between the tendon of the quadriceps extensor cruris and the tibia. [L, 31.]—**B. subscapularis.** See *B. synovialis subscapularis.*—**B. subtendinea brachialis antici.** A rare b. found between the tendon of insertion of the brachialis anticus and the coronoid process. [F. Baker (A, 473).]—**B. subtendinea extensoris carpi radialis brevioris.** A b. situated beneath the tendon of the extensor carpi radialis brevior at its insertion into the third metacarpal bone. [F. Baker (A, 473).]—**B. subtendinea extensoris carpi radialis longioris.** A b. situated beneath the tendon of the extensor carpi radialis longior at its insertion into the second metacarpal bone. [F. Baker (A, 473).]—**B. subtendinea extensoris longi hallucis.** An unusual b. situated between the tendon of the extensor longus hallucis and the head of the first metatarsal bone. [F. Baker (A, 473).]—**B. subtendinea flexoris carpi ulnaris.** A b. situated beneath the tendon of the flexor carpi ulnaris at its inser-

tion into the pisiform bone. [F. Baker (A, 473).]—**B. subtendinea iliaci.** An occasional b. found between the tendon of the ilio-psoas and the femur. [F. Baker (A, 473).]—**B. subtendinea infraspinati.** A b. situated between the tendon of the infraspinatus muscle and the capsule of the shoulder joint. [F. Baker (A, 473).]—**B. subtendinea latissimi dorsi.** A b. situated between the tendon of the latissimus dorsi and the humerus. [F. Baker (A, 473).]—**B. subtendinea obturatoris interni.** A rare b. found between the tendon of the obturator internus and the capsule of the hip joint. [F. Baker (A, 473).]—**B. subtendinea olecrani.** A b. found above the olecranon and in front of or at the side of the tendon of the triceps extensor cubiti. [F. Baker (A, 473).]—**B. subtendinea pectinæi.** A b. found between the insertion of the pectinæus and the femur. [F. Baker (A, 473).]—**B. subtendinea pectoralis majoris.** A b. found between the tendon of the pectoralis major and that of the latissimus dorsi and the b. intertubercularis. [F. Baker (A, 473).]—**B. subtendinea pectoralis minoris.** A rare b. found beneath the insertion of the pectoralis minor. [F. Baker (A, 473).]—**B. subtendinea peronei tertii** [Hyrtl]. See *B. subtendinea musculi peronei tertii.*—**B. subtendinea sartorii.** An unusual b. found between the tendon of the sartorius and the inner condyle of the femur. [F. Baker (A, 473).]—**B. subtendinea subscapularis** [Synnestvedt]. A b. sometimes found between the tendon of the subscapularis muscle and the capsule of the shoulder joint. [F. Baker (A, 473).]—**B. subtendinea tensoris fasciæ latæ** [Synnestvedt]. An occasional b. situated between the ilio-tibial band and the capsule of the knee joint. [F. Baker (A, 473).]—**B. subtendinea teretis majoris.** A b. situated between the tendon of insertion of the teres major and the latissimus dorsi. [F. Baker (A, 473).]—**B. subtendinea teretis minoris** [Gruber]. A rare b. found beneath the tendon of the teres minor. [F. Baker (A, 473).]—**B. subtendinea tibialis antici.** A b. situated beneath the tendon of the tibialis anticus at its insertion. [F. Baker (A, 473).]—**B. subtendinosa musculi peronei tertii.** A b. situated beneath the tendon of the peroneus tertius in the foot. [L, 31.]—**B. subtendinosa musculi teretis minoris.** A b. occasionally found beneath the tendon of insertion of the teres minor. [L, 31.]—**B. supra-acetabularis.** A b. situated between the head of the rectus femoris and the upper edge of the acetabulum. [L, 31.]—**B. supra-acromialis.** An accidental b. found over the acromion. [F. Baker (A, 473).]—**B. supracondyloidea interna.** A b. situated between the inner tendon of the gastrocnemius and the femur. [F. Baker (A, 473).]—**B. supracondyloidea medialis** [Gruber]. A b. situated beneath the tendon of origin of the gastrocnemius and the femur. [L, 31.]—**B. supra-hyoidea** [Verneuil]. A rare b. situated between the upper surface of the hyoid bone and the genio-hyo-glossi. [F. Baker (A, 473).]—**B. suprapatellaris.** A b. situated beneath the common tendon of the quadriceps extensor cruris, above the patella. [L, 142.]—**B. suprapubica.** A b. situated beneath the pubic attachment of the rectus abdominis muscle. [F. Baker (A, 473).]—**B. supraxiphoidea** [Hyrtl]. A b. situated between the linea alba and the ensiform cartilage. [L, 31.] Cf. *B. hyperxiphoidea.*—**B. synovialis.** See *Synovial b.* and *B. mucosa subtendinosa.*—**B. synovialis poplitea.** See *B. mucosa infracondyloidea externa.*—**B. synovialis semimembranosa.** A b. situated between the lateral surface of the tendon of insertion of the semimembranosus and the middle head of the gastrocnemius, usually communicating with the knee joint. [L, 31.]—**B. synovialis subaponeurotica.** Fr., *bourse synoviale sousaponévrotique.* A b. situated beneath an aponeurosis. [L, 49.]—**B. synovialis subcruralis.** A b. situated beneath the common tendon of insertion of the quadriceps extensor cruris, usually communicating with the knee joint. [L, 31.]—**B. synovialis subscapularis.** A b. situated between the subscapularis muscle and the coracoid process and neck of the scapula, usually communicating with the shoulder joint. [L, 31.]—**B. synovialis tendinosa.** Fr., *bourse synoviale tendineuse.* See *B. mucosa subtendinosa.*—**B. tarsica subcutanea** [Schreger]. A subcutaneous b. on the dorsum of the foot. [F. Baker (A, 473).]—**B. tendinis bicipitis.** A b. found between the external lateral ligament of the knee joint and the tendon of the biceps flexor cruris. [F. Baker (A, 473).]—**B. tendinis poplitei.** A b. found between the external lateral ligament of the knee joint and the tendon of the popliteus. [F. Baker (A, 473).]—**B. tendinosa radialis** [Michon]. The synovial sheath of the tendon of the flexor longus pollicis. [F. Baker (A, 473).]—**B. tendinosa ulnaris** [Michon]. A variable synovial sheath of the tendons of the superficial and deep flexors of the fingers in the wrist and palm. [F. Baker (A, 473).]—**B. testicularis, B. testium.** Fr., *bourses.* The scrotum. [A, 325 ; L.]—**B. thyreoidea lateralis** [Gruber]. A b. occasionally found between the inferior constrictor and the greater cornu of the thyreoid cartilage. [F. Baker (A, 473).]—**B. thyreo-trachealis** [Calori]. A b. (occasionally two bursæ) situated between the trachea and the isthmus of the thyreoid gland. [F. Baker (A, 473).]—**B. tibialis antici** [Monro]. A b. situated between the anterior surface of the tibialis anticus and the transverse ligament. [L, 31.]—**B. tibialis interna.** A b. situated between the tendons of the semitendinosus, gracilis, and sartorius and the long internal lateral ligament of the knee joint. [F. Baker (A, 473).]—**B. tibialis subcutanea** [Schreger]. A subcutaneous b. found over the upper end of the tibia. [F. Baker (A, 473).]—**B. trapezii.** A b. found between the base of the spine of the scapula and the aponeurosis of the trapezius muscle. [F. Baker (A, 473).]—**B. trochanterica profunda.** A large b. situated between the posterior and outer portions of the trochanter major and the tendon of the glutæus maximus. [F. Baker (A, 473).]—**B. trochanterica superficialis.** A b. situated at the side of the trochanter major. [F. Baker (A, 473); L, 57.]—**B. trochlearis oculi.** A b. found in the pulley of the superior oblique muscle of the eye. [F. Baker (A, 473).]—**B. tuberoso-ischiadica.** A b. situated between the edge of the lesser sacrosciatic foramen and the tendon of the obturator internus. [L, 31.]—**B. ulnaris interni** [Monro]. A b. situated between the tendon of the flexor carpi ulnaris and the pisiform b. [L.]—**B. ulnaris subcutanea.** An occasional b. found over the styloid process of the ulna. [F. Baker (A, 473).]—**B. ulno-radialis** [Jancke]. A b. found between the tendon of the biceps flexor cubiti and the tuberosity of the radius externally and the ulna and adjacent muscles internally. [F. Baker (A, 473).]—**B. vaginalis abductoris longi et extensoris brevis pollicis.** The synovial sheaths of the tendons of the abductor longus pollicis and the extensor brevis pollicis. [F. Baker (A. 473).]—**B. vaginalis anterior extensoris longi hallucis.** The anterior synovial sheath of the extensor longus hallucis, situated over the first metatarso-phalangeal joint. [F. Baker (A, 473).]—**B. vaginalis extensoris carpi ulnaris.** The synovial sheath of the tendon of the extensor carpi ulnaris. [F. Baker (A, 473).]—**B. vaginalis extensorum carpi radialium.** The synovial sheath of the tendons of the extensores carpi radiales. [F. Baker (A, 473).]—**B. vaginalis extensorum communis et indicis.** The synovial sheath of the tendons of the extensor communis digitorum and the extensor indicis. [F. Baker (A, 473).]—**B. vaginalis extensoris longi digitorum.** The synovial sheath of the tendons of the extensor longus digitorum. [F. Baker (A, 473).]—**B. vaginalis extensoris longi hallucis.** The synovial sheath of the tendon of the extensor longus hallucis. [F. Baker (A, 473).]—**B. vaginalis extensoris longi pollicis.** The synovial sheath of the extensor longus pollicis. [F. Baker (A, 473).]—**B. vaginalis extensoris minimi digiti.** The synovial sheath of the extensor minimi digiti. [F. Baker (A, 473).]—**B. vaginalis flexoris carpi radialis.** The synovial sheath of the flexor carpi radialis in the groove of the trapezium. [F. Baker (A, 473).]—**B. vaginalis flexoris longi digitorum.** The synovial sheath of the tendon of the flexor longus digitorum. [F. Baker (A, 473).]—**B. vaginalis flexoris longi hallucis.** The synovial sheath of the tendon of the flexor longus hallucis. [F. Baker (A, 473).]—**Bursæ vaginales flexorum propriorum.** The synovial sheaths of the flexores proprii of the digits. [F. Baker (A, 473).]—**B. vaginalis pectoralis minoris** [Gruber]. A rare b. surrounding the tendon of the pectoralis minor. [F. Baker (A, 473).]—**B. vaginalis peronei.** The synovial sheath of the peroneal tendons behind the outer malleolus. [F. Baker (A, 473).]—**B. vaginalis peronei longi.** The synovial sheath of the tendon of the peroneus longus in the groove of the cuboid bone. [F. Baker (A, 473).]—**B. vaginalis radialis communis inferior** [Monro]. A b. situated between the posterior annular ligament of the wrist and the tendons of the muscles arising from the radial border of the forearm. [L, 31.]—**B. vaginalis radialis communis superior.** A b. situated between the tendon of insertion of the extensor ossis metacarpi pollicis and the tendons of the radial extensors of the carpus. [L, 31.]—**Bursæ vaginales tendinum musculorum lumbricalium pedis synoviales.** See *Bursæ mucosæ musculorum lumbricalium.*—**B. vaginalis tibialis antici.** The synovial sheath of the tendon of the tibialis anticus. [F. Baker (A, 473).]—**B. vaginalis tibialis postici.** The synovial sheath of the tendon of the tibialis posticus. [F. Baker (A, 473).]—**B. vertebræ prominentis.** A b. situated between the skin and the spine of the seventh cervical vertebra. [F. Baker (A, 473).]—**B. vesicularis glutæi medii** [Monro]. A b. situated between the tendons of the glutæus medius and pyriformis muscles. [L, 31.]—**Bursæ volares articulorum metacarpo-phalangeorum.** Subcutaneous bursæ situated over the flexor tendons at the metacarpo-phalangeal joints. [F. Baker (A, 473).]—**Bursæ volares phalangium primarum.** Rare subcutaneous bursæ found over the flexor tendons of the first and second fingers, over the proximal phalanx. [F. Baker (A, 473).]—**Capitulo-radial b.** A b. situated between the common tendon of the extensor carpi radialis brevis and extensor communis digitorum and the head of the radius. [L, 84.]—**Clavicular b.** A b. situated between the coracoid process of the scapula and the clavicle. [L, 84.]—**Coraco-brachial b.** A b. situated between the tendon of the coraco-brachialis muscle and the capsular ligament of the shoulder. [L, 84.]—**Cubito-radial b.** A b. situated between the tendon of insertion of the biceps flexor cubiti and the supinator brevis muscle and the interosseous ligament. [L, 84.]—**External acromial b.** A b. situated beneath the acromion, between the coracoid process and the deltoid muscle and the capsular ligament of the shoulder. [L, 84.]—**External b. of the teres major.** A b. situated between the teres major muscle and the head of the humerus. [L, 84.]—**Fleischmann's b.** See *B. mucosa sublingualis.*—**Gluteo-fascial b.** See *B. glutæo-fascialis.*—**Gluteo-trochanteric b.** A b. situated between the tendon of the psoas muscle and the trochanter major. [L, 84.]—**Humero-bicipital b.** A b. lining the bicipital groove of the humerus. [L, 84.]—**Ilio-puberal b.** A b. situated between the iliacus internus and psoas magnus muscles and the capsular ligament of the hip joint. [L, 84.]—**Iliac b.** A b. situated between the tendon of the iliacus muscle and the trochanter minor. [L, 84.]—**Infragenual b.** See *B. patellæ.* — **Internal acromial b.** A b. situated above the tendon of the infraspinatus and the teres major. [L, 84.]—**Internal b. of the teres major.** A b. found within the substance of the teres major where its fibres diverge. [L, 84.]—**Obturatory b.** A b. situated between the obturator internus and gemelli muscles and the capsular ligament of the hip joint. [L, 84.]—**Pectineal b.** A b. situated between the pectinæus muscle and the femur. [L, 84.]—**Pharyngeal b.** See *B. of the pharynx.* —**Popliteal b.** A b. situated between the tendon of the popliteus muscle and the subjacent structures. [L, 84.]—**Radio-bicipital b.** A b. situated between the tendons of the biceps flexor cubiti and brachialis anticus muscles and the anterior tubercle of the radius. [L, 84.]—**Subacromial b.** Lat., *subacromialis.* The upper part of the b. deltoidea, sometimes described as a separate b. ; situated upon the muscles covering the top of the shoulder joint, contiguous to the acromion, the coraco-acromial ligament, and the deltoid muscle. [F. Baker (A, 473).]—**Subclavian b.** A b. situated between the tendon of the subclavius muscle and the first rib. [L, 84.]—**Supragenual b.** See *B. subpatellaris.*—**Synovial b.** Lat., *b. synovialis.* Fr., *bourse synoviale.* Ger., *Synovialbeutel.* 1. The synovial sheath of a tendon. 2. The synovial sac of a joint. [C.]—

Tubero-ischiadic b. A b. situated between the obturator internus and the posterior spine and tuberosity of the ischium. [L, 84.]

BURSAIRE (Fr.), adj. Bu6rs-a2r. See BURSAL.

BURSA-KURELLA (Hind.), n. The *Momordica charantia.* [B, 172.]

BURSAL, adj. Bu5rs'a2l. Gr., βυρσοειδής. Lat., *bursalis.* Fr., *bursal.* Pertaining to or resembling a bursa or the scrotum. [A, 322, 325.]

BURSALIS (Lat.), adj. Bu5rs(bu4rs)-a(a3)'li2s. Bursal; as a n., the obturator internus muscle, from the resemblance of its tendinous strings to those of a purse. [Bartholin (A, 325; L, 43).]

BURSALOGY, n. Bu5rs-a2l'o-ji2. Lat., *bursalogia* (from βύρσα [see BURSA], and λόγος, understanding). The anatomy and physiology of the bursæ. [L, 84, 107.]

BURSARIDÆ (Lat.), n. f. pl. Bu5rs(bu4rs)-a2r(a3r)'i2d-e(a3-e2). A family of the *Conomeduæ.* [L, 121.]

BURSARIEÆ (Lat.), n. f. pl. Bu5rs(bu4rs)-a2r(a3r)-i(i2)'e2-e-(a3-e2). Fr., *bursariens.* 1. In botany, a subdivision of the *Pittosporeæ,* comprising the genera *Bursaria* and *Oncospermum.* [Reichenbach (B, 170).] 2. In zoology, a family of heterotrichous *Infusoria.* [L, 182.]

BURSARIUS (Lat.), adj. Bu5rs(bu4rs)-a(a3)'ri2-u3s(u4s). Fr., *bursarien.* Pertaining to the genus *Bursaria.* [A, 385.]

BURSERA (Lat.), n. f. Burs'e2r-a3. Fr., *bursère.* A genus of burseraceous trees of the tribe *Bursereæ.* According to Bentham and Hooker, it includes the genera *Icica* and *Elaphrium.* [B, 19, 42.]—**B. acuminata** [Willdenow]. A West Indian species furnishing carana resin. [B, 270.]—**B. balsamifera.** See HEDWIGIA *balsamifera.*—**B. gummifera** [Jacquin]. A Central American species furnishing a resin called *cative de mangle,* and *archipin.* [B, 270.]—**B. leptophlœos** [Martius]. A Brazilian species. The bark yields a product which has been substituted for turpentine and copaiba balsam. [B, 173, 180.]—**B. obtusifolia** [Lamarck]. Fr., *gomart à feuilles obtuses.* Syn.: *Marignia obtusifolia* [De Candolle]. A species growing in the Mascarene Islands, furnishing the so-called *bois de colophane bâtard* and a resin (*colophane bâtarde*) used as a substitute for rosin. [B, 121, 173.]—**B. orientalis.** The *Colophonia mauritiana.* [B, 173.]—**B. paniculata** [Lamarck]. Fr., *gomart paniculé, bois de colophane.* The *Boswellia mauritiana.* [B, 19.]—**B. tomentosa.** Syn.: *Elaphrium tomentosum* [Jacquin]. A tree indigenous to tropical America, furnishing West Indian tacamahac. [B, 270.]

BURSERACEÆ (Lat.), n. f. pl. Burs-e2r-a(a3)'se2(ke2)-e(a3-e2). Fr., *burséracées.* Of Kunth and succeeding authors, an order of dicotyledonous plants, corresponding to the tribe *Bursereæ* of the order *Amyridaceæ* [Lindley] and afterward extended to embrace the whole of that order; placed by Bentham and Hooker in the cohort *Geraniales* and divided into the tribes *Bursereæ* and *Amyrideæ.* [B, 42, 170.]

BURSERACEOUS, adj. Bu5rs-e2r-a'shu3s. Lat., *burseraceus.* Fr., *burséracé.* Resembling the genus *Bursera* or belonging to the *Burseraceæ.* [B.]

BURSÈRE (Fr.), n. Bu6rs-e2r. See BURSERA.

BURSEREÆ (Lat.), n. f. pl. Burs-e2r'e2-e(a3-e2). Syn.: *Burseraceæ* [Endlicher], *Burseridæ* [Lindley]. A tribe of the *Burseraceæ* (*Amyridaceæ* [Lindley]), comprising *Bursera, Balsamodendron, Hedwigia, Icica, Canarium,* etc. [B, 42, 170.]

BURSERIACEÆ [G. Don] (Lat.), n. f. pl. Burs-e2r-i2-a(a3)'se2(ke2)-e(a3-e2). See BURSERACEÆ.

BURSERIDÆ [Lindley] (Lat.), n. f. pl. Burs-e2r'i2d-e(a3-e2). See BURSEREÆ.

BURSERIDEOUS, adj. Bu5rs-e2r-i2d'e-u3s. Belonging to the *Burseridæ.* [B.]

BURSERIN, n. Bu5rs'e2r-i2n. Lat., *burserinum.* Fr., *bursérine.* Ger., *Burserin.* A resin contained in opobalsam, insoluble in alcohol. [B, 270.]

BURSICULA (Lat.), n. f., dim. of *bursa* (*q. v.*). Bu5rs(bu4rs)-i2k'u2(u4)-la3. Fr., *bursicule.* Ger., *Beutelchen.* In botany, a sort of pouch in the stigma for receiving the caudicle. [B, 19, 123.]

BURSICULATE, adj. Bu6rs-i2k'u2l-at. Lat., *bursiculatus.* Fr., *bursiculé.* Ger., *bebeutelt.* Provided with a bursicula. [B, 19, 123.]

BURSICULE, n. Bu5rs'i2k-u2l. See BURSICULA.

BURSICULÉ (Fr.), adj. Bu6rs-i2k-u6l-a. See BURSICULATE.

BURSIFORM, adj. Bu5rs'i2-fo2rm. From *bursa* (*q. v.*), and *forma,* form. Pouch-shaped, subspherical. [L, 147.]

BURSITIS (Lat.), n. f. Bu5rs(bu4rs)-i(e)'ti2s. Gen., *bursit'idis.* For deriv., see BURSA and *-itis**. Fr., *bursite.* Ger., *Schleimbeutelentzündung.* Inflammation of a bursa. [E.]

BURST, n. Bu5rst. In the horse, a hernia. [L, 297.]

BÜRSTE (Ger.), n. Bu6rst'e2. See BRUSH.

BURSTWORT, n. Bu5rst'wu6rt. The genus *Herniaria.* [B, 275.]

BURSUNGA (Hind.), n. The *Bergera Koenigii.* [B, 172.]

BURTONISIREN (Ger.), v. tr. Burt-on-ez-er'e2n. To add gypsum to water. [B, 270.]

BURTSCHEID (Ger.), n. Burt'shid. Fr., *Borcette.* A place in Prussia, now incorporated with Aachen, where there are four warm springs (the *Mühlenbergquelle,* the *Victoriaquelle,* the *Kochbrunnen,* and the *Pockenbrünnlein*) containing sodium chloride, potassium and sodium sulphates, sodium bicarbonate, and traces of sodium bromide, sodium sulphide, iodine, iron, manganese, copper, and arsenic. [A, 319; B, 270; L, 49.]

BURUL (Hind.), n. The *Artocarpus lakoocha.* [B, 172.]

BURUNHEM, n. See MONESIA.

BURWEED, n. Bu5r'wed. The genus *Xanthium.* [B, 19; L, 73.]—**West Indian b.** The genus *Triumfetta.* [B, 19.]

BÜRZELBEIN (Ger.), **BÜRZELKNOCHEN** (Ger.), n's. Bu6rtz'e2l-bin, -knoch2-e2n. See COCCYX.

BURZELDORN (Ger.), n. Burtz'e2l-do2rn. The genus *Tribulus.* [B, 180.]—**Gemeiner B.** The *Tribulus terrestris.* [B, 180.]—**Grosser B.** The *Tribulus maximus.* [B, 180.]

BURZELKRAUT (Ger.), n. Burtz'e2l-kra3-ut. The *Portulaca oleracea.* [B, 180.]

BUSCATINA, BUSCATINUM (Lat.), n's f. and n. Bu3s(bus)-ka2t(ka3t)-i(e)'na3, -nu3m(nu4m). From βοῦς, an ox, and σκώρ (gen., σκατός), dung. Ger., *Buskatin, Rindskothstoff.* The odoriferous principle of cow-dung. [A, 322; L, 81.]

BUSCH (Ger.), n. Bush. See BUSH.

BUSCHANEMONE (Ger.), n. Bush'a3n-a-mon-e2. The *Anemone nemorosa.* [B, 180.]

BUSCHBAD (Ger.), n. Bush'ba3d. A place in Saxony, where there is a spring containing sodium sulphate, magnesium chloride, etc. [L, 49.]

BUSCHBOHNE (Ger.), n. Bush'bon-e2. The *Phaseolus nanus.* [B, 180.]

BÜSCHEL (Ger.), n. Bu6sh'e2l. A bundle, a fasciculus. [B, 123.]—**B'artig.** Fascicular. [B, 123.]—**B'förmig.** See *B'ig.*—**B'haarig.** Having the hair in tufts; as a n., in the pl., *B'haarige,* see *Lophocomi.* [L, 228.]—**B'ig.** Fasciculate. [B, 19.]—**B'nelke.** The *Dianthus barbatus.* [B.]—**B'schimmel.** See BYSSUS (3d def.).—**B'schwamm.** The *Agaricus fascicularis.* [B.]

BUSCHKIEMER (Ger.), n. pl. Bush'kem-e2r. See LOPHOBRANCHII.

BUSCHKOHL (Ger.), n. Bush'kol. The *Brassica alba crispa.* [L, 80.]

BUSCHSAUERAMPFER (Ger.), n. Bush'za3-u-e2r-a3mpf-e2r. The *Oxalis acetosella.* [L, 77.]

BUSCHTHEE (Ger.), n. Bush'ta. See BUSH-*tea.*

BUSCHWEIDE (Ger.), n. Bush'wid-e2. The *Salix amygdalina.* [B, 180.]

BUSCI (Jap.), n. The *Brassica rapa.* [L, 105.]

BUSCORINA, BUSCORINUM (Lat.), n's f. and n. Bu3s(bus)-ko2r(kor)-i(e)'na3, -nu3m(nu4m). See BUSCATINUM.

BUSE (Fr.), n. Bu6s. See BUTEO.

BUSELINUM (Lat.), n. n. Bu2(bu)-se2l-i(e)'nu3m(nu4m). Gr., βουσέλινον (from the augmentative particle βοῦ, and σέλινον, parsley). An ancient name for a plant of Crete, supposed to have been a species of *Apium.* [A, 318; L, 94, 109, 116, 119.]

BUSEN (Ger.), n. Buz'e2n. The space between the mammary glands. [L, 115.]

BUSENNA, n. An African name for the *Albizzia anthelminthica.* [L, 67.]

BUSH, n. Bu4sh. Gr., θάμνος. Lat., *frutex.* Fr., *arbrisseau, arbuscule.* Ger., *Busch.* It., *cespuglio.* Sp., *arbusto.* A shrub which begins to send off branches near the ground. [A, 301.]—**Benjamin-b.** The *Benzoin odoriferum.* [B, 19.]—**Bitter b.** A Jamaica name for a species of *Eupatorium,* probably the *Eupatorium nervosum.* [B, 5.]—**Burning-b.** The *Euonymus atropurpurens.* [B, 81.]—**B.-lawyer.** The *Rubus australis.* [B, 19.]—**B. syrup.** A saccharine exudation derived from the flowers of *Protea mellifera.* [B, 19.]—**B.-tea.** Ger., *Buschthee.* The leaflets of *Cyclopia genistoides* or *Cyclopia latifolia.* [B, 19, 270.]

BUSIGNARGUES (Fr.), n. Bu6-sen-ya3rg. A place in the department of Hérault, France, where there is an alkaline chalybeate spring. [A, 385; L, 49.]

BUSKATIN (Ger.), n. Busk-a3-ten'. See BUSCATINUM.

BUSKO, n. A place in Russian Poland, where there are springs containing sodium chloride, magnesium iodide, and carbonates. [A, 319, 385; L, 49.]

BUSKORIN (Ger.), n. Busk-or-en'. See BUSCATINUM.

BUSOT (Sp.), n. Bu-sot'. A place in Spain, near Alicante, where there are five hot springs containing magnesium sulphate, also a bathing establishment. [A, 319; L, 49.]

BUSSAAR (Ger.), n. Bus'a3r. See BUTEO.

BUSSANG (Fr.), n. Bu6s-a3n2. A place in the department of Vosges, France, where there are chalybeate acid springs. [B, 270; L, 49.]

BUSSENA, n. The *Albizzia anthelminthica.* [A, 301.]

BUSSEROLE [Fr. Cod.] (Fr.), n. Bu6s-e2r-ol. The *Arctostaphylos uva ursi.* [B, 119.]—**Décoction de b.** See *Decoctum* UVÆ URSI.—**Extrait de b.** See *Extractum* UVÆ URSI.

BUSSHARD (Ger.), n. Bus'ha3rd. See BUTEO.

BUSSIARES (Fr.), n. Bu6s-i2-a3r. A place in the department of Aisne, France, where there is a weak alkaline chalybeate spring. [L, 49.]

BUSSUL (Ar.), n. The *Allium cepa.* [L, 105.]

BUSTOMACOCINUM (Lat.), n. n. Bu3st(bust)-om(o2m)-a3-kos(ko2k)-i(e)'nu3m(nu4m). From βοῦς, an ox, and στόμα, the mouth. The mucous secretion of the foot-and-mouth disease; used in isopathic practice by friction. [B, 270.]

BUSTUM (Lat.), n. n. Bu3st(bu4st)'u3m(u4m). 1. A crematory. 2. Cremation. 3. A corpse. [A, 318, 322.]

BUSUNGU, n. An African name for a climbing plant used to poison fish. [B, 19.]

BUT (Bengal.), n. The *Ficus indica*. [B, 172.]

BUTALANINE, n. Bu^{2}t-a^{2}l′a^{2}n-en. Fr., *butalanine*. Ger., *Butalanin*. A crystalline substance, $(CH_3)_2 \equiv CH.CH.(NH_2) - CO.OH$, being alanine in which ethylene is replaced by isobutylene, prepared from the spleen and pancreas of the ox; apparently identical with amidoisovaleric acid. [B, 4.]

BUTANE, n. Bu^{2}t′an. Fr., *butane*. Ger., *Butan*. Tetrane; a hydrocarbon of the paraffin series, C_4H_{10}. There are two isomeric forms: 1. *Normal b.* (butyl hydride, diethyl, propylmethyl), $CH_3 - CH_2 - CH_2 - CH_3$, a colorless gas liquefying at 1° C. 2. *Isobutane* (isobutyl hydride, trimethylmethane), $CH_3 - C(CH_3).H - CH_3$, a colorless gas liquefying at —17° C. [B.]

BUTCH (Hind.), n. The genus *Acorus*. [B, 19.]

BUTEA (Lat.), n. f. Bu^{2}t(but)′e^{2}-a^{3}. Fr., *butée*. A genus of papilionaceous shrubs and trees. [B, 19; L, 108.]—**B. frondosa** [Roxburgh]. Fr., *butée feuillue*. The *dhak*, or *pulas*, of India; a tree 30 or 40 feet high. The flowers (the *teesoo*, or *keesoo*, of the natives) yield a yellow dye. A coarse fibre obtained from the bark is used as a substitute for oakum. Stick-lac is produced from an exudation from punctures of the twigs made by an insect. From wounds made in the bark a reddish astringent juice exudes which hardens into a red, brittle resin (*maduga b.* [or *Bengal*] *kino*) used in tanning. An oil obtained from the seeds (*moodooga oil*) is used as an anthelminthic. [B, 5, 19, 173.]—**B. gum, B. kino.** See *B. frondosa*, *B. superba*, and *Bengal* KINO.—**B. parviflora** [Roxburgh]. A climbing shrub of India, distinguished by its very small flowers. The gummy exudation is used for hysteria and colic. [B, 19.]—**B. superba** [Roxburgh]. Fr., *butée superbe*. A climbing shrub. Its flowers furnish a dye, and a variety of kino is obtained from it. [B, 19; L, 87.]

BUTENE, n. Bu^{2}t′en. Fr., *butène*. Ger., *Buten*. See BUTYLENE.—**B. glycol.** Syn.: *oxybutyl alcohol*. A glycol, or diatomic alcohol, derived from b. by the addition of two molecules of hydroxyl. There are two isomeric varieties: 1. *α-b. g.* (α-oxybutyl alcohol), $C_4H_8.(OH)_2 = CH_3 - CH_3 - CH_2 : CH(OH).CH_2.(OH)$, a syrupy liquid boiling at 192° C. 2. *β-b. g.* (β-oxybutyl alcohol), $C_4H_8.(OH)_2 = CH_3 - CH(OH) - CH_2.CH_2(OH)$, a syrupy liquid distilling above 200° C. There is a further isomeric form, *isobutene glycol*, $(CH_3)_2 \equiv C.(OH) = CH_2.(OH)$, derived from isobutene; a viscid liquid boiling at about 183° C. [B.]

BUTENYL, n. Bu^{2}t′e^{2}n-i^{2}l. A trivalent radicle, $C_4H_7 = CH_3 - CH_2 - C'' - CH'_2$. [B.]

BUTEO (Lat.), n. m. Bu^{2}t(but)′e^{2}-o. Gen., *buteo′nis*. Gr., βουτέων, τριόρχης. Fr., *buse*, *buteau*. Ger., *Bussaar*, *Busshard*. A genus of *Raptores*, including the buzzard, the testicles of which, boiled with honey, were anciently reputed a remedy for impotence. [A, 325, 385.]

BUTEONINÆ (Lat.), n. f. pl. Bu^{2}t(but)-e^{2}-on-i(e)′ne(na^{3}-e^{2}). A division of the *Aquilinæ*. [L, 303.]

BUTEAU (Fr.). n. Bu^{6}t-o. See BUTEO.

BUTHUS (Lat.), n. m. Bu^{2}(bu)′thu^{3}s(thu^{4}s). Fr., *buthe*. A genus of scorpions. [A, 385.]—**B. afer** [Leach]. Ger., *grosser afrikanische Skorpion*. One of the largest scorpions known; found in the East Indies, Ceylon, and western Africa, especially in Guinea. Its sting is very painful and sometimes causes death. [B, 180.]—**B. occitanus** [Leach]. Ger., *rothgelber Skorpion*. A species found in southern Europe and northern Africa. [B, 180.]

BUTIC ACID, n. Bu^{2}t′i^{2}k. Fr., *acide butique*. See ARACHIDIC ACID.

BUTIGA, n. An ancient term for rosacea. [Ruland (A, 325); G.]

BUTINE, n. Bu^{2}t′en. Fr., *butine*. Ger., *Butin*. A liquid hydrocarbon, $C_4H_6 = CH_2 \equiv CH - CH \equiv CH_2$, formed by the decomposition of erythrite by formic acid, also found in coal-gas. In composition it acts as a quadrivalent radicle.

BUTINIC ACID, n. Bu^{2}t-i^{2}n′i^{2}k. Fr., *acide butinique*. Ger., *Butinsäure*. See ARACHIDIC ACID.

BUT-MOOGRA (Bengal.), n. The *Jasminum sambac*. [B, 172.]

BUTOMACEÆ (Lat.), n. f. pl. Bu^{2}(bu)-to^{2}m-a(a^{3})′se^{2}(ke^{2})-e(a^{3}-e^{2}). Fr., *butomacées*. See BUTOMEÆ.

BUTOMACEOUS, adj. Bu^{2}-to^{2}m-a′shu^{3}s. Lat., *butomaceus*. Fr., *butomacé*. Resembling the genus *Butomus*; belonging to the *Butomaceæ*. [B.]

BUTOMADS, n. pl. Bu^{2}′to^{2}m-a^{2}dz. See BUTOMEÆ.

BUTOMEÆ (Lat.), n. f. pl. Bu^{2}(bu)-tom(to^{2}m)′e^{2}-e(a^{3}-e^{2}). Fr., *butomées*. Syn.: *Butomaceæ* [Gray, Lindley, Endlicher]. Of Salisbury, Reichenbach, Lindley, and others, an order of monocotyledonous plants, made to include *Butomus*, *Hydrocleis*, and *Limnocharis*; by Agardh, followed by the more recent authors, made a tribe of the *Alismaceæ*. [B, 42, 170.]

BUTOMON, BUTOMUM (Lat.), n's n. Bu^{2}(bu)′to^{2}m-o^{2}n, -u^{3}m(u^{4}m). Ancient names for a sort of rush. [A, 387; L, 109, 119.] See BUTOMUS.

BUTOMUS (Lat.), n. m. Bu^{2}(bu)′to^{2}m-u^{3}s(u^{4}s). Gr., βούτομος (from βοῦς, an ox, and τέμνειν, to cut, because it cut the mouths of cattle feeding on it). Fr., *butome*. Ger., *Blumenbinse*, *Igelknospe*, *Igelkolbe*. The flowering rush; a genus of alismaceous plants of the tribe *Butomeæ*. [A, 322; B, 19.]—**B. floridus, B. umbellatus** [Linnæus]. Fr., *butome ombellifère*, *jonc fleuri*. Ger., *Blumenbinse*, *Wasserviole*. The flowering rush of Europe and Asia. The tuberous root-stalk and the seeds (*radix* et *semen junci floridi*) were formerly used in medicine, and the former is eaten in northern Asia. [B, 19, 173, 270.]

BUTONICA [Rumphius, Lamarck], **BUTONICA SPECIOSA** [Lamarck] (Lat.), n's f. Bu^{2}(bu)-to^{2}n′i^{2}k-a^{3}. Fr., *butonic*. See BARRINGTONIA *speciosa*.

BUTRUM, n. An old name for sal ammoniac. [B, 50.]

BUTSNAL (Bengal.), n. The *Aconitum ferox*. [B, 172.]

BUTT (Bengal., Hind.), n. The *Ficus religiosa*. [B, 172.]

BUTTER, n. Bu^{3}t′u^{5}r. A.-S., *buter*. Gr., βούτυρον (thought to be of Scythian origin, but by some said to be compounded of βοῦς, an ox or cow, and τυροῦν, to stir up). Lat., *butyrum* [Belg. Ph.]. Fr., *beurre* [Fr. Cod.]. Ger., *Butter*. It., *butirro*. Sp., *manteca de leche* [Sp. Ph.]. 1. A soft fatty mass, of agreeable taste and odor, consisting essentially of an aggregation of the globules of milk brought about by churning. It contains various fats (the glycerides of butyric, capronic, caprinic, myristic, palmitic, stearic, and oleic acids), casein, lactose, salts (chiefly phosphates), water, and a small amount of an odorous principle. [A, 247, 322, 387; B; L, 43, 77.] 2. Of the old chemists, a general term for a number of compounds (chiefly metallic chlorides) of a more or less buttery consistence. [A, 325; L, 86.] 3. A general term for various vegetable fatty products resembling b.—**Artificial b.** See OLEOMARGARINE.—**Bambarra b., Bambouc b.** See *Shea b.*—**Bog-b.** A variety of hartite, or guaquilite, found in the peat-bogs of Ireland. [L, 108.]—**B.-and-eggs.** The *Linaria vulgaris*. [B, 215.]—**B.-and-tallow-tree.** The *Pentadesma butyracea*. [B, 19.]—**B'äther** (Ger.). Ethyl butyrate. [B.]—**B'artig** (Ger.). Butter-like. [L, 43.]—**B'baum** (Ger.). The *Pentadesma butyracea*. [B, 180.]—**B'bletschen** (Ger.). The *Rumex alpinus*. [B, 180.]—**B'blume** (Ger.). See the major list.—**B'bohnen** (Ger.). The seeds of *Vateria indica*. [B, 270.]—**B.-bur.** The genus *Petasites*. [B. 215.]—**B'cup.** Ger., *B'blume*. The *Ranunculus bulbosus* and other species of *Ranunculus*. [B, 75.]—**B.-cysts.** See under CYST.—**B'essigsäure** (Ger.). Butyracetic acid. [A, 324; L.]—**B.-flower.** The *Ranunculus bulbosus*. [B, 275.]—**B'kohl** (Ger.). See under KOHL.—**B'milk.** See under MILK.—**B'nuss** (Ger.). See *B'nut.*—**B'nussrinde** (Ger.). See *B'nut-bark.*—**B'nussrindenextrakt** (Ger.). See *Extractum* JUGLANDIS.—**B'nut.** The *Juglans cinerea*. [B, 270.]—**B'nut-bark.** The bark of *Juglans cinerea* (the *juglans* of the U. S. Ph.). [B, 81.]—**B. of antimony, B. of arsenic, B. of bismuth.** See ANTIMONY, ARSENIC, and BISMUTH *trichloride.*—**B. of cacao.** See *Oleum* THEOBROMÆ.—**B. of Canara.** A solid oily substance obtained from the fruit of *Vateria indica*. [B, 19.]—**B. of cocoanut.** See *Oleum* COCOIS.—**B. of tin, B. of zinc.** See TIN and ZINC *trichloride.*—**B. powder.** Impure sodium bicarbonate colored with turmeric. [L, 120.]—**B'säure** (Ger.). See the major list.—**B'surrogat** (Ger.). A factitious b. or a substitute for b. [Loebisch (A, 319).]—**B.-tooth.** See under TOOTH.—**B.-tree.** See the major list.—**B'weckenkraut** (Ger.). The *Rumex hydrolapathum*. [B, 180.]—**B.-weed.** The *Senecio lobatus*. [B, 215.]—**B'wort.** See the major list.—**Cacao-b.** See *Oleum* THEOBROMÆ.—**Centrifugenb'** (Ger.). B. made with a centrifugal machine. [Loebisch (A, 319).]—**Chi b.** See *Shea b.*—**Cocoanut-b.** See *Oleum* COCOIS.—**Galam b.** See BAMBUC.—**Kokum b.** Oil of garcinia. [B.]—**Krebsb'** (Ger.). See BUTYRUM *cancrinum.*—**Mahduca b., Mahwa b.** See *Shea b.*—**Mineral b.** See *B.* (2d def.).—**Shea b.** A concrete fatty substance obtained from the seeds of *Butyrospermum Parkii*. [B.]—**Schmalzb'** (Ger.). A commercial name for various kinds of factitious b. [Loebisch (A, 319).]—**Sparb'** (Ger.). See *Wiener Sparb'.*—**Vegetable b.** See *B.* (3d def.).—**Wiener Sparb'** (Ger.). A factitious b. nearly identical with oleomargarine. [Loebisch (A, 319.).]

BUTTERBLUME (Ger.), n. But′te^{2}r-blum-e^{2}. The *Ranunculus acris*. [B, 180.]—**Grosse B.** The *Caltha palustris*. [B, 180.]

BUTTERBY, n. Bu^{3}t′u^{6}r-bi^{2}. A place near Durham, England, where there are sulphur springs. [B, 270.]

BUTTERFLY, n. Bu^{3}t′u^{5}r-fli. Lat., *papilio*. Fr., *papillon*. Ger., *Schmetterling*. It., *parpaglione*, *farfalla*. Sp., *mariposa*. 1. The imago of various *Lepidoptera*, especially of the genus *Papilio* (*q. v.*). [A, 302, 385.] 2. A familiar term for a certain operation on the posterior wall of the vagina and the skin of the perinæum in which a piece of skin and mucous membrane is removed leaving a denuded surface resembling the wings and head of a b. [J. D. Emmet, "N. Y. Med. Jour.," Aug. 14, 1886, p. 180.] 3. A loose flat mass of absorbent cotton with a piece of thread attached at its middle, the portion of cotton on each side of the thread being spread out somewhat into the shape of a b's wing; to be inserted into the vagina (a New York term).—**B.-orchid.** The *Habenaria bifolia* and the *Habenaria chlorantha*. [L, 73.]—**B.-plant.** See the major list.—**B.-shaped.** See PAPILIONACEOUS.—**B.-weed.** The *Asclepias tuberosa*. [B, 215.]

BUTTERFLY-PLANT, n. Bu^{3}t′u^{5}r-fli-pla^{3}nt. The *Oncidium papilio*. [B, 19.]—**Indian b.-p.** The *Phalænopsis amabilis*. [B, 19.]

BUTTERINE, n. Bu^{3}t′u^{5}r-en. A commercial name for a variety of artificial butter. [B, 270.]

BUTTERSÄURE (Ger.), n. But′te^{2}r-zoir-e^{2}. Butyric acid. [B.]—**B.-Aethylester.** Ethyl butyrate, butyric ether. [B.]—**B.-Benzylester.** Benzyl butyrate. [B.]—**B'pilz.** See CLOSTRYDIUM *butyricum.*—**B'salz.** A butyrate. [L, 43.]—**Gährungsb'.** Normal butyric acid. [J. Munk (A, 319).]—**Isob'.** Isobutyric acid. [J. Munk (A, 319).]

BUTTERSTIEL (Ger.), n. But′te^{2}r-stel. The genus *Galium*. [B, 180.]—**Gelber B.** The *Galium verum*. [B, 180.]—**Weisser B.** The *Galium mollugo*. [B, 180.]

BUTTER-TREE, n. Bu^{3}t′u^{5}r-tre. The *Bassia butyracea*, the *Bassia latifolia*, and the *Bassia Parkii*. [B, 75.]—**African b.-t.** The *Bassia Parkii*. [B, 19.]—**Indian b.-t.** The *Bassia butyracea*. [B, 19, 172.]—**West African b.-t.** The *Pentadesma butyracea*. [B, 19.]

BUTTERWORT, n. Bu^{3}t'u^{5}r-wu^{5}rt. The genus *Pinguicula.* [L, 102.]—**Common b.** The *Pinguicula vulgaris.* [B, 215.]

BUTTERWORTH SPRING, n. Bu^{3}t'u^{5}r-wu^{5}rth. A calcic spring, with a bath-house, in the city of Grand Rapids, Michigan. The water much resembles that of Bath, England, but is far richer in magnesium chloride. [A, 363.]

BUTTOCKS, n. pl. Bu^{3}t'o^{2}ks. See Breech.

BUTTON, n. Bu^{3}tn. Fr., *bouton.* Ger., *Knopf.* It., *bottone.* Sp., *boton.* A small knob; a name sometimes given to various elevated inflammatory lesions of the skin. [A, 385.]—**Bachelor's b.** See the major list.—**Belly-b.** A popular term for the navel. [L.] See Umbilicus.—**Biskra b.** See *Aleppo* boil.—**B.-ball.** The *Platanus occidentalis.* [L, 56.]—**B.-bur.** The *Xanthium strumarium.* [L, 73.]—**B.-bush.** The *Cephalanthus occidentalis.* [B, 270.]—**B.-flower.** See the major list.—**B.-hole.** 1. The *Scolopendrium vulgare.* [B, 275.] 2. An operation consisting in making a small incision into a canal or a cavity. [A, 385.] Cf. Boutonnière (2d def.).—**B.-scurvy.** See under Scurvy.—**B.-snakeroot.** See the major list.—**B.-tree.** The genus *Conocarpus.* [B, 19.]—**B.-weed.** The genus *Barreria,* also the *Centaurea nigra,* the *Diodia virginica,* and the *Diodia teres.* [B, 275.]—**B'wood.** See the major list.—**Cautery b.** A cautery-iron having a b.-shaped tip.

BUTTON-FLOWER, n. Bu^{3}tn'flu^5-u-u^{5}r. The genus *Gomphia.* [B, 275.]—**African b.-f.** The *Dais cotinifolia.* [B, 275.]—**Glossy-leaved b.-f.** The *Gomphia nitida.* [B, 275.]

BUTTONS, n. Bu^{3}tns. The *Tanacetum vulgare.* [B, 275.]—**Thorny b.** The *Medicago muricata.* [B, 275.]

BUTTON-SNAKEROOT, n. Bu^{3}tn'snak-ru^{4}t. 1. The genus *Liatris.* [B, 215.] 2. The *Eryngium yuccæfolium.* [B, 270.]—**Dense-spiked b.-s.** The *Liatris pyconostachya.* [B, 275.]—**Hairy-cupped b.-s.** The *Liatris elegans.* [B, 275.]—**Long-spiked b.-s.** The *Liatris spicata.* [B, 275.]

BUTTONWOOD, n. Bu^{3}tn'wu^{4}d. 1. The *Cephalanthus occidentalis.* [B, 81.] 2. The *Platanus occidentalis.* [B, 75.]—**B. shrub.** See *B.* (1st def.).—**Shaggy b.** The *Spermacoce hispida.* [B, 172.]—**White b.** The *Laguncularia racemosa.* [B, 275.]

BUTTRESS, n. Bu^{3}t're^{2}s. In solipeds, the inflexion of the wall of the hoof at the heel. [L, 13.]

BUTUA (Lat.), n. f. Bu^2(bu)-tu^2(tu)'a^3. From the Brazilian name. The roots of a species of *Botryopsis* or, according to Pereira, of the *Cissampelos pareira.* [B, 19.]—**B. do curvo** (Port.). The root of *Cochlospermum insigne.* [B, 19.]—**Radix butuæ.** The root of *Cissampelos pareira.* [B, 180.]

BUTYL, n. Bu^{2}t'i^{2}l. Formerly written *butyle.* From βούτυρον, butter, and ὕλη, material. Lat., *butylium, butylum.* Fr., *butyle.* Ger., *Butyl.* It., *butile.* Sp., *butilo.* Syn.: *balyl, tetryl.* The radicle, C_4H_9, of b. alcohol; a colorless, oily liquid, lighter than water, feebly odorous. [A, 301; B; L, 108.]—**B. acetate.** Fr., *acétate de butyle.* Ger., *B'acetat, essigsaures B.* A body, $C_4H_9.OC_2H_3O = C_6H_{12}O_2$, isomeric with caproic acid. Four bodies having this formula are known, all liquids boiling at from 96° to 125° C. [B, 4.]—**B. alcohol.** Fr., *alcool butylique.* Ger., *B'alkohol.* Syn.: *butylic* (or *tetrylic*) *alcohol, hydrate* (or *hydrated oxide*) *of b.* (or *tetryl*), *hydrogen butylate* (or *tetrylate*), *propyl carbinol.* A monatomic alcohol formed by substituting a molecule of b. for an atom of hydrogen in water, or by substituting a molecule of hydroxyl for an atom of hydrogen in quartane, or by substituting a molecule of propyl for an atom of hydrogen in carbinol; formula, $C_4H_{10}O = C_4H_9.OH$, or $C_3H_7.CH_2.OH$. Four isomeric varieties are known: 1. *Normal primary b. a.* (propyl carbinol), $CH_3 - CH_2 - CH_2 - CH_2.OH$, a colorless liquid of a pleasant odor, boiling at 116° C. 2. *Normal secondary b. a.* (ethylmethyl carbinol), $CH_3 - CH_2 - CH.OH - CH_3$, a liquid boiling at 97° C. 3. *Primary isobutyl alcohol* (isopropyl carbinol, fermentation b.), $(CH_3)_2 = CH - CH_2.OH$, a liquid having a strong odor of fusel oil, boiling at 106° C. 4. *Tertiary isobutyl alcohol* (trimethyl carbinol), $(CH_3)_2 = CH.OH - CH_3$, a liquid contained in the fusel oils, boiling at about 83° C. [B, 2.]—**B. aldehyde.** Butyric aldehyde. [B.]—**B'äther** (Ger.). Butyric ether. [B.]—**B. borate.** Ger., *B'borat.* Isobutyl borate, $(C_4H_9)_3.BO_3$, is known, a liquid boiling at 212° C. [B.]—**B. bromide.** Fr., *bromure de butyle.* Ger., *B'bromür.* A compound of b. and bromine, $C_4H_9.Br$. Two isomeric varieties exist: 1. *Primary bromide of normal b.*, $CH_3 - CH_2 - CH_2 - CH_2Br$, a liquid boiling at 100° C. 2. *Primary bromide of isobutyl,* $(CH_3)_2 = CH - CH_2Br$, a liquid boiling at 92° C. [B.]—**B. butyrate.** Ger., *B'butyrat.* A compound of b. and butyric acid, $C_4H_9.O.C_4H_7O = C_8H_{16}O_2$. [B, 4.]—**B. carbamate.** Ger., *B'urethan, Carbaminsäure-Isobutylester.* Carbamate of isobutyl, $CO\left\{\begin{matrix}NH_2\\O.CH_2 - CH = (CH_3)_2\end{matrix}\right.$, a body melting at 55° C. [B.]—**B. carbamine, B. carbammonium.** Ger., *B'carbamin.* Syn.: *b. isocyanide* (or *pseudocyanide*). A liquid, $C_4H_9 - N \equiv C$, derived from trimethylmethane, boiling at about 115° C. [B.]—**B. carbimide.** Ger., *B'carbimid.* See *B. isothiocyanate.*—**B. carbinol.** See Amyl *alcohol.*—**B. carbonate.** Ger., *B'carbonat.* Carbonate of isobutyl, $(C_4H_9)_2.CO_3$, a liquid boiling at 190° C. [B.]—**B'carbonic acid.** Fr., *acide b'carbonique.* Ger., *B'carbonsäure, B'kohlensäure.* An acid which may be regarded as derived from carbonic acid by the substitution of b. for hydroxyl. Acids of this formula, $C_4H_9.HCO_2$, are *normal b'carbonic, β-b'carbonic, iso-b'carbonic,* and *trimethylcarbincarbonic acids.* [B, 4.] See under Valeric acid.—**B'chloral.** See the major list.—**B. chloride.** Fr., *chlorure de butyle.* Ger., *B'chlorür.* A compound of b. and chlorine, $C_4H_9.Cl$. Four isomeric varieties are known: 1. *Primary chloride of b.*, $CH_3 - CH_2 - CH_2 - CH_2Cl$, a liquid boiling at about 78° C. 2. *Secondary chloride of b.*, $CH_3 - CH_2 - CH.Cl - CH_3$. 3. *Primary chloride of isobutyl,* $(CH_3)_2 = CH - CH_2Cl$, a liquid boiling at 68° C. 4. *Tertiary chloride of isobutyl,* $(CH_3)_2 = C.Cl - CH_3$, a liquid boiling at about 50° C. [B.]—**B. cyanide.** Fr., *cyanure de butyle.* Ger., *B'cyanür.* A compound of the formula $C_4H_9.CN$, or $(C_5H_9)'''N$. Several isomeric varieties are known. *Cyanide of normal b.* (valeronitrile), $CH_3 - (CH_2)_3 - CN$, is a liquid boiling at 140° C. *Cyanide of secondary b.* (isovaleronitrile), $(CH_3)_2 = CH - CH_2 - CN$, is a colorless oily liquid boiling at 127° C. *Cyanide of tertiary b.* (trimethylacetonitrile), $(CH_3)_3 \equiv C.CN$, is a crystalline body melting at 16° C. to form a colorless oily liquid. [B, 4.]—**B. hydride.** See Butane.—**B. hydrosulphide.** See *B. mercaptan.*—**B. iodide.** Fr., *iodure de butyle.* Ger., *Butyljodür.* A compound, C_4H_9I, of which there are four isomeric forms, corresponding to the four varieties of b. alcohol; all liquids boiling at from 99° to 129° C. [B.]—**B. isocyanide.** Fr., *isocyanure de butyle.* Ger., *B'isocyanür.* See *B. carbamine.*—**B. isosulphocyanate, B. isothiocyanate.** Fr., *isosulfocyanate de butyle.* Ger., *B'isothiocyanat, B'senföl.* A compound, $C_4H_9.CNS$, of which several isomeric forms are known. The first, derived from normal b., is a liquid boiling at 167° C.; the second, derived from methylethylcarbinol, is a liquid of penetrating odor, boiling at about 160° C., forming the chief constituent of oil of *Cochlearia officinalis;* the third, derived from isobutyl alcohol, is a liquid boiling at about 162° C. [B.]—**B. mercaptan.** A compound, $C_4H_9.H.S$, of which there are several isomeric forms, all liquids of a disagreeable odor boiling at from 88° to 98° C.; that of secondary b. has the odor of asafœtida. [B.]—**B. mustard-oil.** Ger., *B'senföl.* See *B. isothiocyanate.*—**B. nitrate.** Fr., *azotate de butyle.* Ger., *B'nitrat.* Nitrate of isobutyl, $(CH_3)_2 = CH - CH_2.O.NO_2$, a liquid boiling at 123° (Strecker) or 130° C. (Roscoe and Schorlemmer). [B.]—**B. nitrite.** Fr., *azotite de butyle.* Ger., *B'nitrit.* Nitrite of trimethylcarbyl, $(CH_3)_3 \equiv C.O.NO$, a yellowish oily substance boiling at about 77° C. [B.]—**B. pseudocyanide.** See *B. carbamine.*—**B'senföl** (Ger.). See *B. isothiocyanate.*—**B. sulphate.** Fr., *sulfate de butyle.* Ger., *B'sulfat.* An acid sulphate (b'sulphuric acid, sulphobutylic acid), $C_4H_9.HSO_4$, is known. [B.]—**B'sulphuric acid.** See *B. sulphate.*—**B. sulphide.** Fr., *sulfure de butyle.* Ger., *B'sulfid.* A compound of b. and sulphur, $(C_4H_9)_2.S$, of which there are several isomeric varieties, all liquids of a disagreeable odor. [B.]—**B. thioalcohol.** See *B. mercaptan.*—**B. urethane.** See *B. carbamate.*

BUTYLACETIC ACID, n. Bu^2-ti^{2}l-a^{2}s-e^{2}t(et)'i^{2}k. Fr., *acide butylacétique.* See Hydroxybutyric acid.

BUTYLAMINE, n. Bu^2-ti^{2}l'a^{2}m-en. Lat., *butylamina, butylaminum.* Fr., *butylamine.* Ger., *Butylamin.* A primary amine of butyl, $N.(C_4H_9).H_2$. All such compounds are liquids boiling at from 46° to 75° C. They include *isob'*, derived from isobutyl; *normal b.*, derived from normal butyl; and *trimethylcarbylamine,* derived from trimethylcarbyl. [B.]

BUTYLCHLORAL, n. Bu^2-ti^{2}l-klor'a^{2}l. Lat., *chloral butylicum.* Fr., *butylchloral.* Ger., *Butylchloral.* Syn.: *trichlorbutyraldehyde, oxide of trichlorbutylidene, crotonchloral.* A substitution compound of butyl aldehyde and chlorine, $C_4H_5Cl_3O = CH_3.CHCl.CCl_2.COH$, an oily liquid of a pungent odor. [Liebreich (A, 319); B, 3.]—**B. hydrate.** Fr., *hydrate de b.* Ger., *B'hydrat.* Syn.: *trichlorbutylidene glycol* (or *alcohol*). A body, $C_4H_5Cl_3O + H_2O = CH_3.CHCl.CCl_2.C(OH)_2$, forming volatile tabular crystals giving off a pungent vapor; soluble with difficulty in cold water, readily soluble in alcohol, in ether, and in glycerin; a sedative to the central nervous system. [Liebreich (A, 319); B, 3.]

BUTYLENE, n. Bu^2'ti^{2}l-en. Fr., *butylène.* Ger., *Butylen.* A bivalent hydrocarbon, C_4H_8, isomeric with butylidene. [B, 4.]—**B. alcohol.** A diatomic alcohol, $C_4H_{10}O_2 = C_4H_8.(OH)_2$, formed from quartane by the substitution of two molecules of hydroxyl for two atoms of hydrogen, or from a double molecule of water by the substitution of a molecule of b. for half the hydrogen. [B, 2.]—**B'gallic acid.** Gallic acid in which b. replaces two atoms of hydrogen; a term expressive, according to Remsen and Coale, of the probable constitution of sinapic acid. [B.]—**B. glycol.** See *B. alcohol.*—**Isob'.** A colorless liquid, $(CH_3)_2 = C = CH_2$, forming at −7° C. a gas of disagreeable odor. [B, 4.]—**Normal b.** Ethylvinyl, allylmethyl; a colorless liquid, $CH_3 - CH_2 - CH - CH_2$, converted into a gas at −4° C. [B, 4.]—**Pseudob'.** A liquid, $CH_3 - CH - CH - CH_3$, boiling at 3° C. [B, 4.]

BUTYLIC, adj. Bu^2-ti^{2}l'i^{2}k. Fr., *butilique.* Containing or pertaining to butyl. [A, 385.]

BUTYLIDENE, n. Bu^2-ti^{2}l'i^{2}d-en. Fr., *butylidène.* Ger., *Butyliden.* A bivalent radicle, $C_4H_8 = CH_3 - CH_2 - CH_2 - CH$, isomeric with butylene. [B, 4.]—**B. oxide.** Butyl aldehyde. [B.]

BUTYLLACTIC ACID, n. Bu^2-ti^{2}l-la^{2}k'ti^{2}k. Fr., *acide butyllactique.* Ger., *Butyllactinsäure.* Dimethoxalic acid, acetonic acid, one of the isomeric varieties of hydroxybutyric acid; colorless prismatic crystals, $(CH_3)_2 = C(OH) - CO.OH$. [B, 4.]

BUTYLSCHWEFELSÄURE (Ger.), n. But'u^{6}l-shwaf-e^{2}l-zoir-e^2. Butylsulphuric acid. [B.]

BUTYLSCHWEFLIGSÄURE (Ger.), n. But'u^{6}l-shwaf-li^{2}g-zoir-e^2. Butylsulphonic acid. [B.]

BUTYLSENFÖL (Ger.), n. But'u^{6}l-ze^{2}nf-u^{6}l. Butyl mustard-oil. [B.] See Butyl *isothiocyanate.*

BUTYLSULPHONIC ACID, n. Bu^2-ti^{2}l-su^{3}lf-o^{2}n'i^{2}k. Fr., *acide butylsulfonique.* Ger., *Butylsulfonsäure, Butylschwefligsäure.* A compound, $(C_4H_9).SO_3H$, having acid properties. [B.]

BUTYLSULPHURIC ACID, n. Bu^2-ti^{2}l-su^{3}lf-u^{2}r'i^{2}k. Fr., *acide butylsulfurique.* Ger., *Butylschwefelsäure.* Acid butyl sulphate, sulphobutylic acid. [B.]

BUTYLUM (Lat.), n. n. Bu^{2}t(but)'i^{2}l(u^{6}l)-u^{3}m(u^{4}m). See Butyl.

BUTYPHUS (Lat.), n. m. Bu^2(bu)-ti(tu^6)'fu^{3}s(fu^{4}s). From βοῦς, an ox, and τῦφος (see Typhus). Ger., *Rinderpest.* The cattle plague. [A, 322.]

BUTYRACEOUS, adj. Bu^{2}t-i^{2}r-a'shu^{3}s. Gr., βουτυρινός. Lat., *butyraceus.* Fr., *butyracé, butyreux.* Ger., *butterartig.* Buttery; resembling or producing butter. [B.]

BUTYRAL, n. Bu2'ti2r-a2l. A colorless, very mobile liquid, $C_8H_7O_2$, obtained by distilling barium butyrate. By oxidation it forms butyric acid. [A, 301.]

BUTYRAMIDE, n. Bu2t-i2r'a2m-i2d. Fr., *butyramide*. Ger., *Butyramid*. A butyryl substitution product of ammonia, $NH_2.(C_4H_7O) = NH_2.(CH_3.CH_2.CH_2.CO)$; a solid melting at 115° C. The isomeric *isobutyramide*, $NH_2.([CH_3]_2.CH.CH_2.CO)$, forms crystals melting at about 100° C. [B, 4.]

BUTYRATE, n. Bu2t'i2r-at. Lat., *butyras*. Fr., *butyrate*. Ger., *Butyrat*, *buttersaures Salz*. A salt of butyric acid. [B.]

BUTYRCHLORALHYDRAT (Ger.), n. But'u6r-ch2lor-a3l-hu6d-ra3t''. See BUTYLCHLORAL *hydrate*.

BUTYRELAIC ACID, n. Bu2t-i2r-e2l-a'i2k. Fr., *acide butyrélaïque*. See BUTYROLEIC ACID.

BUTYRELAIN, n. Bu2t-i2r-e2l'a3-i2n. Fr., *butyrélaïne*. See BUTYROLEIN.

BUTYREUX (Fr.), adj. Bu6t-i2r-u5. See BUTYRACEOUS.

BUTYRIACUM (Lat.), n. n. Bu2t(but)-i2r(u6r)-i(i2)'a2k(a3k)-u3m(u4m). Fr., *butyriaque*. See BUTYLAMINE.

BUTYRIC, adj. Bu2t-i2r'i2k. Lat., *butyricus*. Fr., *butyrique*. Ger., *butyrisch*. Derived from or contained in butter. [B.]—**B. acid.** Fr., *acide butyrique*. Ger., *Buttersäure*, *Butyrinsäure*. A volatile acid, $C_4H_8O_2$. There are two isomeric forms: 1. *Normal b. acid* (b. acid of fermentation, propylcarbonic acid), $CH_3 - CH_2 - CH_2 - CO.OH$, a colorless liquid, of unpleasant odor, solidifying at 0° and boiling at 163° C., prepared by the fermentation of sugar with decayed cheese and sour milk, and occurring normally in the sweat, the urine, and the fæces, and in the decomposition products of many albuminoid substances. 2. *Isobutyric acid* (isopropylcarbonic acid), $(CH_3)_2 = CH.CO.OH$, a liquid boiling at 154° C. Both compounds act as monobasic acids, forming butyrates and isobutyrates respectively. B. acid has been used as a hypnotic in drachm doses. Its internal administration is said to have produced nephritis. [B, 4; Janovsky, "Ann. di chim. e di farm.," Mar., 1886, p. 194 (B); L, 49, 86; K.]—**B. aldehyde.** Fr., *aldéhyde butyrique*. Ger., *Butylaldehyd*. Oxide of butylidene, C_4H_8O. Two varieties are known, corresponding to the two varieties of butyl alcohol: 1. *Normal b. aldehyde*, $CH_3.CH_2.CH_2.CHO$, boiling at 75° C. 2. *Isobutyric aldehyde*, $(CH_3)_2 = CH.CHO$, boiling at 61° C. Both are mobile liquids of a powerful odor. *Paraisobutylic aldehyde*, $C_{12}H_{24}O_3$, a polymeric modification of isobutyric aldehyde, forms acicular crystals. [B, 5.]—**B. anhydride.** A liquid, $(C_4H_7O)_2.O$, boiling at about 190° C. [B, 4.]—**B. chloral.** Butyl trichloraldehyde, a chlorine substitution product of butyl aldehyde, $C_4H_5.Cl_3O$. [B, 2.]—**B. chloride.** Ger., *Chlorbutyryl*. A liquid, $C_4H_7.OCl = CH_3.CH_2.CH_2.COCl$, boiling at 101° C. An isomeric form, *isobutyric chloride*, $(CH_3)_2 = CH.COCl$, boils at 92° C. [B, 4.]—**B. ether.** Fr., *éther butyrique*. Ger., *Butyläther*. See ETHYL *butyrate*.—**B. monochloraldehyde.** Monochlorobutyric aldehyde, C_4H_7ClO, a chlorine substitution product of b. aldehyde. [B, 2.]

BUTYRIN, n. Bu2t'i2r-i2n. Lat., *butyrinum*, *butyrina*. Fr., *butyrine*. Ger., *Butyrin*. The butyric ether of glyceryl alcohol (glycerin), formed by the substitution of the radicle of butyric acid for one or more molecules of hydroxyl. [B, 4.]—**B'säure** (Ger.). Butyric acid. [K.]

BUTYROACETIC ACID, n. Bu2t-i2r-o-a2s-et(e2t)'i2k. Fr., *acide butyro-acétique*. See PROPIONIC ACID.

BUTYROARSENITE, n. Bu2t-i2r-o-a3rs'e2n-it. A compound of a base with butyric and arsenious acids. [B.]

BUTYROFURONIC ACID, n. Bu2t-i2r-o-fu2r-o2n'i2k. An oxygen addition compound of furfurvaleric acid, $C_9H_{12}O_6$. [B, 3.]

BUTYROID, adj. Bu2t'i2r-oid. From βούτυρον, butter, and εἶδος, resemblance. See BUTYRACEOUS.

BUTYROLEIC ACID, n. Bu2t-i2r-ol-e'i2k. Fr., *acide butyroléique*. Oleobutyric acid, $C_{36}H_{38}O_3 + H_2O$, obtained from butter by saponification. [A, 301.]

BUTYROLEIN, n. Bu2t-i2r-ol'e2-i2n. Fr., *butyroléine*. A principle found in butter, differing from ordinary olein by not yielding sebacic acid on distillation. [A, 301.]

BUTYROMETER, n. Bu2t-i2r-o2m'e2t-u5r. From βούτυρον, butter, and μέτρον, a measure. Fr., *butyromètre*. An instrument for determining the proportion of fatty matter contained in milk. Marchand's b. is a graduated glass tube, in which equal volumes of milk and ether are to be shaken together, when the ether dissolves the fat; on the addition of an amount of alcohol equal to that of the ether, the fat separates and floats at the top, where its amount may be read off on the scale. [A, 301.]

BUTYRONE, n. Bu2t'i2r-on. Lat., *butyronum*. Fr., *butyrone*. Ger., *Butyron*. See DIPROPYL *ketone*.

BUTYRONITRIC ACID, n. Bu2t-i2r-o-nit'ri2k. Fr., *acide butyronitrique*. Ger., *Butyronsalpetersäure*. See NITROPROPIONIC ACID.

BUTYRONITRILE, n. Bu2t-i2r-o-nit'ri2l(ril). Fr., *butyronitrile*. Ger., *Butyronitryl*. See PROPYL *cyanide*.

BUTYRONYL, n. Bu2t-i2r'o2n-i2l. Fr., *butyronyle*. The hypothetical radicle of butyrone, C_7H_7. [A, 301.]

BUTYROSCOPE, n. Bu2t-i2r'o2s-kop. From βούτυρον, butter, and σκοπεῖν, to examine. A instrument for ascertaining the proportion of fat in milk. Leeds's b. is essentially like Feser's lactoscope (*q. v.*), but the milk and water are mixed in definite quantities. [L, 225.]

BUTYROSE, adj. Bu2t'i2r-os. See BUTYRACEOUS.

BUTYROSPERMUM (Lat.), n. n. Bu2t(but)-i2r(u6r)-o(o2)-spu5rm(spe2rm)'u3m(u4m). From βούτυρον, butter, and σπέρμα, seed. Of Kotschy, a genus of sapotaceous trees. [B, 42, 121.]—**B. Parkii** [Kotschy]. Fr., *arbre à beurre*. Syn.: *Bassia Parkii* [G. Don]. The shea-tree, or African butter-tree. The milky juice furnishes on evaporation a product resembling gutta percha. On boiling, the seeds furnish shea butter. [B, 19, 42, 270.]

BUTYROUS, adj. Bu2t'i2r-u3s. Lat., *butyrosus*. See BUTYRACEOUS.

BUTYRUM [Fr. Cod., Belg. Ph.] (Lat.), n. n. Bu2(bu)-ti(tu6)'-ru3m(ru4m), bu2(bu)'ti2r(tu6r)-u3m(u4m). See BUTTER.—**B. cacao.** See *Oleum* THEOBROMÆ.—**B. cancrinum.** Ger., *Krebsbutter*. An old preparation for which a reddish fat perfumed with benzoin is now dispensed. [B, 270.]—**B. insulsum.** Fresh (unsalted) butter. [Sydenham (B, 90; B, 270.]—**B. nervinum.** See *Unguentum* ROSMARINI *compositum*.—**B. palmarum.** See *Oleum* COCOIS.—**B. Saturni, B. saturninum.** See *B.* SATURNI.

BUTYRYL, n. Bu2t'i2r-i2l. Fr., *butyryle*. A hypothetical radicle, C_8H_7, of butyral, butyric acid, etc. [A, 301; L, 49.]

BUTYRYLFORMIC ACID, n. Bu2t-i2r-i2l-fo2rm'i2k. Fr., *acide butyrylformique*. A colorless liquid, $C_5H_8O_3 = CH_3.CH_2.CH_2.CO - CO.OH$. [B, 4.]

BUTZ (Ger.), **BUTZEN** (Ger.), n's. Butz, butz'e2n. A core (of a fruit or of a boil). [L, 46.]

BUTZENKLETTE (Ger.), n. Butz'e2n-kle2t-te2. The *Lappa major*. [B, 180.]

BUVASIGNA (Malay), n. Cassia pulp. [L, 77.]

BUVEUR (Fr.), adj. and n. Bu6v-u5r. See BIBITORIUS.

BUXACEÆ (Lat.), n. f. pl. Bu3x(bux)-a(a3)'se2(ke2)-e(a3-e2). Fr., *buxacées*. Of Dumortier and of Baillon, a family of plants, comprising *Buxus* and three related genera. [B, 170.]

BUXACEOUS, adj. Bu3x-a'shu3s. Lat., *buxaceus*. Fr., *buxacé*. Resembling the genus *Buxus*; of or belonging to the *Buxaceæ*. [B.]

BUXANS (Lat.), adj. Bu3x(bux)'a2nz(a3ns). Of the color of box-wood. [Apuleius (A, 318).]

BUXBAUM (Ger.), n. Bux'ba3-um. The genus *Buxus*. [B, 180.]—**B'holz.** Box-wood. [L, 80.]—**Gemeiner B.** The *Buxus sempervirens*. [B, 180.]

BUXBAUMIACEÆ [Bruch and Schimper], **BUXBAUMIEÆ** [Hampe], **BUXBAUMIOIDEÆ** [Fürnrohr], **BUXBAUMOIDEÆ** [Greville] (Lat.), n's f. pl. Bux-ba3-um-i2-a(a3)'se2-(ke2)-e(a3-e2), -i(i2)'e2-e(a3-e2), -i2-o(o2)-i2d(ed)'e2-e(a3-e2), -o(o2)-i2d-(ed)'e2-e(a3-e2). A family, tribe, or subdivision of mosses (*Acrocarpi*), including *Buxbaumia* and another genus. [B, 19, 170.]

BUXEÆ (Lat.), n. f. pl. Bu3x(bux)'e2-e(a3-e2). Fr., *buxées*. Of Reichenbach and others, a division of the *Euphorbiaceæ*, comprising *Buxus*, *Drypetes*, *Securinega*, *Tricera*, etc. [B, 42, 170.]

BUXEINE, n. Bu3x'e-en. See BUXINE.

BUXEOUS, adj. Bu3x'e-u3s. Lat., *buxeus*. Of the color of box-wood, pertaining to the genus *Buxus*. [A, 318; L, 56.]

BUXEROLLE (Fr.), n. Bu6x-e2r-ol. The *Arbutus uva ursi*. [B, 173.]

BUXIFOLIUS (Lat.), adj. Bu3x(bux)-i2-fol(fo2l)'i2-u3s(u4s). From *buxus*, the box-tree, and *folium*, a leaf. Fr., *buxifolié*. Ger., *Buchsbaumblättrig*. Having leaves like those of the box-tree. [B.]

BUXINE, n. Bu3x'en. Lat., *buxina*, *buxinum*. Fr., *buxine*. Ger., *Buchsin*, *Buxin*. An alkaloid derived from the bark and leaves of *Buxus sempervirens*; identical with bebeerine. [B, 270.]

BUXINÉ (Fr.), adj. Bu6x-i2n-a. Buxaceous; as a n., in the f. pl., *b'es*, the *Buxaceæ*. [A, 385.]

BUXINEÆ (Lat.), n. f. pl. Bu3x(bux)-i2n'e2-e(a3-e2). Fr., *buxinées*. See BUXACEÆ.

BUXINIDINE, n. Bu3x-i2n'i2d-en. An alkaloid derived, along with buxine, from the bark of *Buxus sempervirens*. [B, 270.]

BUXINUM (Lat.), n. n. Bu3x(bux)-i(e)'nu3m(nu4m). See BUXINE.

BUXOUS, adj. Bu3x'u3s. Lat., *buxosus*. Like box-wood or like the genus *Buxus*. [A, 318.]

BUXTON, n. Bu3x'tu3n. A place in Derbyshire, England, where there are three hot alkaline springs, one of which contains a little acid ferrous carbonate. [B, 270.]

BUXUS (Lat.), n. f. Bu3x(bux)'u3s(u4s). More properly written *pyxus*. Gr., πύξος. Fr., *buis*. Ger., *Buchs*, *Buchsbaum*. The box; a genus of euphorbiaceous shrubs and small trees. [B, 19, 34.]—**B. angustifolia.** Fr., *buis à feuilles étroites*. A variety of *B. sempervirens*. [B, 173, 180.]—**B. arborescens.** Fr., *buis arborescent*. A variety of *B. sempervirens*. [B, 173.]—**B. balearica.** The Minorca box, growing in the Mediterranean islands and in Asia Minor. [B, 19.]—**B. myrtifolia.** Fr., *buis à feuilles de myrte*. A variety of *B. sempervirens*. [B, 173, 180.]—**B. sempervirens** [Linnæus]. Fr., *buis*. Ger., *Buchsbaum*, *Splintbaum*. The common, or evergreen, box; a species growing in Europe and Asia and cultivated in America. The wood (*lignum buxi*) is considered sudorific and is used in syphilis. The bark contains buxine, parabuxine, and buxinidine. The leaves and root-bark were formerly used in medicine. [B, 19, 119, 270.]—**B. semperviva.** See *B. sempervirens*.—**B. suffruticosa.** A suffruticose variety of *B. sempervirens*. [B.]—**Cortex buxi.** See *Écorce de* BUIS.—**Extractum buxi.** Fr., *extrait de buis*. Of the Fr. Cod. (1837), an alcoholic extract of the root-bark of *B. sempervirens*. [B, 119.]—**Folia buxi, Folia buxi sempervirentis, Folia buxi sempervivæ.** The leaves of *B. sempervirens*. They are purgative and have been thought to promote the growth of the hair. [B, 180.]—**Lignum buxi, Lignum buxi arborescentis.** The wood of *B. sempervirens*, formerly used in medicine, especially for syphilis, colic, and intermittent fever. [B, 180.]—**Oleum buxi.** Fr., *huile de buis*. A rectified oil

distilled from the wood of *B. sempervirens*, formerly used in gonorrhœa. [Sard. Ph., 1773, Würtemb. Ph., 1798 (B, 119).]—**Radix buxi.** The root of *B. sempervirens*. [A, 319.]

BUYHUTO (It.), n. Bu-i^2-u'to. A Sicilian spring containing magnesium and calcium sulphates and carbonates. [A, 319.]

BUYO-BUYO, n. A Philippine Island name for a sort of long pepper. [L, 94.]

BUZ-HAGGNI (Ar.), n. The *Arundo donax*. [L, 105.]

BUZIAS, n. A place in Hungary, where there is a chalybeate spring rich in free carbonic acid. [B, 270 ; L, 49.]

BUZIRULBUNJ (Ar.), n. The *Hyoscyamus niger*. [L, 77, 105.]

BUZOT (Sp.), n. Bu-th^{2}ot'. See BUSOT.

BUZRALSCHIBBET (Ar.), n. The *Anethum graveolens*. [L, 105.]

BUZRUK (Ar.), n. The *Linum usitatissimum*. [L, 105.]

BUZZALSCHIPPET (Ar.), n. See BUZRALSCHIBBET.

BUZZARD, n. Bu^{3}z'a^{3}rd. See BUTEO.

BYAKOOL (Bengal., Hind.), n. The *Solanum indicum*. [B, 172.]

BYBO, n. An East Indian name for the *Cassuvium pomiferum*. [L, 105.]

BYCHORCHO (Russ.), n. The *Galeodes araneoides*. [T. Husemann (A, 319).]

BYGUN (Hind.), n. The *Solanum melongena*. [B, 172.]

BYKOWA (Russ.), n. A place in Charcow, where there is a spring containing sodium and magnesium sulphates. [A, 319.]

BYNE (Lat.), n. f. Bin(bu^{6}n)'e(a). Gr., *βύνη*. Barley malt. [Aetius (A, 325).]

BYNIN, n. Bin'i^{2}n. From *βύνη*, malt. An English proprietary liquid extract of malt. ["Practitioner," Dec., 1885, p. 464.]

BYRETHRUM (Lat.), n. n. Bi^{2}r(bu^{6}r)-e^{2}th'ru^{3}m(ru^{4}m). An ancient sort of medicated cap. [Forestus (A, 325).]

BYRON SPRING, n. Bi'ro^{2}n. A spring in the town of Byron, Genesee County, New York, resembling the Oak-Orchard Acid Springs (*q. v.*). [A, 363.]

BYRRHIDÆ (Lat.), n. f. pl. Bi^{2}r(bu^{6}r)'ri^{2}d-e(a^3-e^2). A family of the *Cordyloccrata*. [L, 262.]

BYRRHII (Lat.), n. m. pl. Bi^{2}r(bu^{6}r)'ri^2-i(e). Fr., *byrrhiens*. A tribe of the *Coleoptera*, having *Byrrhus* as the typical genus. [L, 180.]

BYRRHUS (Lat.), n. m. Bi^{2}r(bu^{6}r)'ru^{3}s(ru^{4}s). Fr., *byrrhe*. See ANTHRENUS.

BYRSA (Lat.), n. f. Bu^{6}r(bu^{6}r)'sa^3. A more correct form of *bursa* (*q. v.*).

BYRSODEPSICON, BYRSODEPSICUM (Lat.), n's n. Bu^{5}rs(bu^{6}rs)-o(o^2)-de^{2}ps'i^{2}k-o^{2}n, -u^{3}m(u^{4}m). From *βυρσοδεψικός*, used in dressing hides. An ancient name for a species of *Rhus* used in tanning. [Cælius Aurelianus (A, 325).]

BYRSONIMA (Lat.), n. f. Bu^{5}rs-o^{2}n'i^{2}m-a^3. A genus of malpighiaceous shrubs and trees. [B, 19.]—**B. armeniaca** [Richard]. Syn. : *Malpighia armeniaca* [Cavanilles]. A species the seeds of which are said to be poisonous. [B, 121.]—**B. chrysophylla** [Kunth]. Syn. : *Malpighia moureila* [Aublet], *Galphinia chrysophylla* [Sprengel]. A species growing in Cayenne, where its astringent bark is used as a tonic and febrifuge, and a decoction as a fomentation for ulcers. [B, 173.]—**B. coccolobæfolia** [Kunth]. A tree of Cumana, probably furnishing part of the alcornoco-bark of commerce. [B, 180.]—**B. cotinifolia** [Kunth]. A Mexican shrub, used like *B. verbascifolia*. [B, 180.]—**B. crassifolia** [De Candolle]. Syn. : *Malpighia crassifolia* [Linnæus]. The *moulae-ie* of the Caribs ; a small tree of the West Indies and South America, used like *B. verbascifolia*. [B, 19, 180.]—**B. cumingiana.** The *nanci* of Panama. The bark is used there in skin diseases. The berries are acid and edible. [B, 19.]—**B. laurifolia** [Kunth], **B. rhopalæfolia** [Kunth]. Trees probably furnishing varieties of the alcornoco-bark of commerce. [B, 180.]—**B. spicata** [De Candolle]. A tree of the West Indies and Brazil. Its bark (*muruxi-bark*) contains a great amount of tannin. The fruit is acid and astringent, and is used for gargles and in dysentery. [B, 19, 180.]—**B. verbascifolia** [De Candolle]. Syn. : *Malpighia verbascifolia* [Linnæus]. A low shrub of Brazil and Guiana. The bark and wood are used as astringents and in remittent fevers. [B, 19, 180.]

BYRSOPSIDES (Lat.), n. f. pl. Bu^{5}r(bu^{6}r)-so^{2}p'si^{2}d-ez(e^{2}s). A subfamily of the *Curculionidæ*. [L, 262.]

BYSAUCHEN (Lat.), n. m. Bi^{2}s(bu^{6}s)-a^{4}k'(a^3'u^{4}ch^2)-e^{2}n(an). Gen., *bysauch'enos* (*-is*). Gr., *βυσαύχην* (from *βύειν*, to cover up, and *αὐχήν*, the neck). An old term for a person whose shoulders were habitually elevated, so as to make the neck seem short ; also for a person with a stiff neck. [A, 322, 325, 387 ; L, 94.]

BYSMA (Lat.), n. n. Bi^{2}z(bu^{6}s)'ma^3. Gen., *bys'matos* (*-tis*). Gr., *βύσμα*. A bung, a stopper. [A, 322, 325.]

BYSSACEÆ (Lat.), n. f. pl. Bi^{2}s(bu^{6}s)-sa(sa^3)'se^2(ke^2)-e(a^3-e^2). From *βύσσος*, flax. Fr., *byssacées*. Of Agardh and others, a division of *Fungi*, including such genera as *Torula*, *Hormiscium*, *Monilia*, *Antennaria*, etc. ; according to Brongniart, who made it a tribe of the *Mucedines*, it comprised the subdivisions *Chloridieæ*, *Monilieæ*, and *Byssineæ* ; divided by Fries into the tribes *Collemeæ* and *Bysseæ*. [B, 1, 121, 170.]

BYSSACEI (Lat.), n. m. pl. Bi^{2}s(bu^{6}s)-sa(sa^3)'se^2(ke^2)-i(e). Of Fries, a suborder of *Fungi* (*Inomycetes*), comprising the sections *Epiphyti*, *Byssi solidi*, *Gasterotrichi*, and *Hymenotrichi* ; of Körber, an order of lichens (*Lichenes homœomerici*) ; of Nylander, a family of lichens, comprising the tribes *Sirosiphei*, *Pyrenopsei*, and *Homopsidei*. [B, 121, 170.]

BYSSACEOUS, adj. Bi^{2}s-sa'shu^{3}s. Lat., *byssaceus*. Fr., *byssacé*. Made up of interlaced filaments ; of or pertaining to the *Byssaceæ*. [B, 19.]

BYSSAL, adj. Bi^{2}s'sa^{2}l. Fr., *byssé*. Pertaining to or of the nature of the *Byssus*. [L, 210.]

BYSSEÆ (Lat.), n. f. pl. Bi^{2}s(bu^{6}s)'se^2-e(a^3-e^2). Fr., *byssées*. Of Fries, a tribe of the *Byssaceæ*, comprising *Antennaria*, *Monilia*, *Byssus*, *Oidium*, *Torula*, etc., also the *B. spuriæ*, including nine genera. [B, 170.]

BYSSEI (Lat.), n. m. pl. Bi^{2}s(bu^{6}s)'se^2-i(e). Of Reichenbach, a division of the true *Byssacei* (*Byssacei genuini*), comprising *Torula*, *Oidium*, *Byssus*, *Monilia*, *Antennularia*, etc. [B, 170.]

BYSSI (Lat.), n. m., pl. of *Byssus* (*q. v.*). Bi^{2}s(bu^{6}s)'si(se). Of Adanson, a family of plants, including *Tremella*, *Conferva*, *Aspergillus*, *Byssus*, and other genera now placed in widely distinct orders. [B, 170.]—**B. fibrilliformes** [Persoon]. A division of *Fungi* (*Trichomyci*). [B, 170.]—**B. solidi** [Fries]. A section of the *Byssacei*, comprising the subsections *Moniliæ* and *Byssini*, with two additional genera. [B, 170.]

BYSSIDEÆ (Lat.), n. f. pl. Bi^{2}s(bu^{6}s)-si^{2}d'e^2-e(a^3-e^2). Of Gray, a division of *Fungi* (*Nematomyceæ*), comprising *Monilia*, *Torula*, *Dematium*, *Byssus*, etc. [B, 170.] Cf. BYSSACEÆ.

BYSSIFERA (Lat.), n. n. pl. Bi^{2}s(bu^{6}s)-si^{2}f'e^{2}r-a^3. From *byssus* (*q. v.*), and *ferre*, to bear. Fr., *byssifères*. Of Goldfuss, Carus, and others, a family of molluscs, including those that attach themselves by a byssus. [L, 180.]

BYSSIFEROUS, adj. Bi^{2}s-si^{2}f'e^{2}r-u^{3}s. Lat., *byssiferus*. Fr., *byssifère*. Provided with a byssus. [L, 147.]

BYSSIFERS, n. pl. Bi^{2}s'si^2-fu^{5}rz. See BYSSIFERA.

BYSSINA (Lat.), n. n. pl. Bi^{2}s(bu^{6}s)'si^{2}n-a^3. Of Batsch, a family of the *Aphylla*, comprising *Lepra*, *Byssus*, *Conferva*, etc. [B, 170.]

BYSSINÆ (Lat.), n. f. pl. Bi^{2}s(bu^{6}s)'si^{2}n-e(a^3-e^2). See BYSSACEÆ.

BYSSINE, adj. Bi^{2}s'si^{2}n. Gr., *βύσσινος*. Lat., *byssinus*. Cottony, silky, filamentous.

BYSSINEÆ (Lat.), n. f. pl. Bi^{2}s(bu^{6}s)-si^{2}n'e^2-e(a^3-e^2). Fr., *byssinées*. Of Dumortier and Brongniart, a division of *Fungi* (*Mucedines*), comprising *Dematium*, *Byssus*, etc. [B, 1, 170.]

BYSSINI (Lat.), n. m. pl. Bi^{2}s(bu^{6}s)'si^{2}n-i(e). Of Fries, a subsection of the *Byssi solidi*, comprising *Byssus* and two other genera ; of Corda, a family of *Fungi* (*Coniomycetes*), comprising the tribes *Byssaceæ* and *Phylleriacei*. [B, 170.]

BYSSINOSIS (Lat.), n. f. Bi^{2}s(bu^{6}s)-si^{2}n-o'si^{2}s. Gen., *byssino'seos* (*-sis*). From *βύσσος* (see BYSSUS). Ger., *Baumwollenschwindsucht*. A variety of pneumonoconiosis due to the inhalation of cotton fibre. [Zenker (L, 20).]

BYSSINUS (Lat.), adj. Bi^{2}s(bu^{6}s)'si^{2}n-u^{3}s(u^{4}s). See BYSSINE and BYSSOID.

BYSSOCAUSIS (Lat.), n. f. Bi^{2}s(bu^{6}s)-so(so^2)-ka^4'(ka^3'u^4)-si^{2}s. Gen., *byssocau'seos* (*-sis*). From *βύσσος* (see BYSSUS), and *καῦσις*, cauterization. Cauterization with a cotton moxa. [A, 322.]

BYSSOGÈNE (Fr.), adj. Bi^{2}s-so-zhe^{2}n. From *βύσσος* (see BYSSUS), and *γεννᾶν*, to engender. Producing byssus. [A, 385.]

BYSSOID, adj. Bi^{2}s'oid. Lat., *byssoideus* (from *βύσσος* [see BYSSUS], and *εἶδος*, resemblance). Fr., *byssoïde*. Ger., *byssusartig*. Resembling a *Byssus* ; composed of a fringe of filaments of unequal length. [B, 19.]

BYSSOIDEÆ (Lat.), n. f. pl. Bi^{2}s(bu^{6}s)-so(so^2)-i^{2}d(ed)'e^2-e(a^3-e^2). Fr., *byssoïdées*. Of Kickx, a family of *Fungi*, corresponding nearly to the *Hyphomycetes* and including the divisions *Mucedineæ*, *Mucorineæ*, and *Asconemeæ* ; of Schulz, a family of *Fungi* (*Nematosporæ*), comprising the sections *Byssacea*, *Phyllerica*, *Racodicea*, and *Cœnogonea*. [B, 121, 170.]

BYSSOIDEI (Lat.), n. m. pl. Bi^{2}s(bu^{6}s)-so(so^2)-i^{2}d(ed)'e^2-i(e). Of Sprengel, a division of hyphomycetous *Fungi*. [B, 170.]—**B. veri** [Persoon]. A division of *Fungi* (*Trichomyci*), comprising *Hypha* and six other genera. [B, 170.]

BYSSOPHORE (Fr.), adj. Bi^{2}s-o-for. See BYSSIFEROUS ; as a n., in the pl., *b's*, see BYSSIFERA.

BYSSOPHTHISIS (Lat.), n. f. Bi^{2}s(bu^{6}s)-so^2(so^{2}f)'ti^{2}s(thi^{2}s)'i^{2}s. Gen., *byssophthis'eos* (*-oph'thisis*). See BYSSINOSIS.

BYSSOTHECIUM (Lat.), n. n. Bi^{2}s(bu^{6}s)-so(so^2)-the(tha)'si^2-(ki^2)-u^{3}m(u^{4}m). From *βύσσος* (see BYSSUS), and *θηκίον* (dim. of *θήκη*, a receptacle). Ger., *Wurzeltödler*. A genus of the *Pyrenomycetes*. It attacks the roots of living plants, and causes in potatoes a disease (Ger., *Pockenkrankheit der Kartoffel*) in which pustule-like formations appear on its skin. [A, 396.]

BYSSUS (Lat.), n. m. Bi^{2}s(bu^{6}s)'su^{3}s(su^{4}s). Gr., *βύσσος*. Ger., *Gruftschimmel* (1st def.), *Büschelschimmel* (3d def.). 1. A genus of *Fungi* under which were formerly grouped a number of imperfectly known forms now referred elsewhere. [B.] 2. The stipes of certain *Fungi*. [B, 19, 173.] 3. The filamentous tuft by which certain molluscs attach themselves ; woven into a fabric in some varieties. [L, 49, 227.] 4. Cotton, fine flax, silk, charpie. [A, 322.]—**B'artig** (Ger.). See BYSSOID.

BYSTROPOGON (Lat.), n. m. Bi^{2}s(bu^{6}s)-tro(tro^2)-po'go^{2}n-(gon). Gen., *bystropogon'os* (*-is*). From *βύστρα* (= *βύσμα*), a stopper, and *πώγων*, a beard. Of L'Héritier, a genus of labiate plants of the tribe *Satureineæ*. [B, 42.]—**B. suaveolens** [L'Héritier]. The *Ballota suaveolens*. [B, 173.]

BYTHOS, BYTHUS (Lat.). n's m. Bi^{2}th(bu^{6}th)'o^{2}s, -u^{3}s(u^{4}s). Gr., *βυθός*. The lower part of the abdomen. [Hippocrates (A, 325).]

BYTTERA (Lat.), n. f. Bi2t(bu6t)'te2r-a3. See Bittera.

BYTTNEREÆ [Lindley] (Lat.), n. f. pl. Bu6t-ne2r'e2-e(a3-e2). See Buettnerieæ.

BYTTNERIA (Lat.), n. f. Bu6t-ne2r'i2-a3. See Buettneria.

BYTTNERIACEÆ (Lat.), n. f. pl. Bu6t-ne2r-i2-a(a3)'se2(ke2)-e(a3-e2). Fr., *byttnériacées*. Of De Candolle, an order of the *Thalamifloræ*, corresponding to the *Sterculiaceæ*; of Reichenbach, a division of the *Geraniaceæ*, corresponding to the *Buettnerieæ*. [B, 170, 214.]

BYTTNERIDIEÆ (Lat.), n. f. pl. Bu6t-ne2r-i2d-i(i2)'e2-e(a3-e2). Of Dumortier, a family of the *Thalamisertia*, including *Buettneria*. [B, 170.]

BYTTNERIEÆ (Lat.), n. f. pl. Bu6t-ne2r-i(i2)'e2-e(a3-e2). Of De Candolle and others, a tribe of the *Byttneriaceæ*, including *Buettneria*, *Abroma*, *Guazuma*, *Theobroma*, etc. [B, 170, 214.] See Buettnerieæ.

BYWA (Jap.), n. The *Eriobotrya japonica*. [B, 19.]

BZOWY (Pol.), n. The *Sambucus nigra*. [L, 77.]

C

CAA, n. A Brazilian name for any herb, especially the *Ilex paraguayensis*. [B, 12, 121; L, 49.]—**C.-apia.** The *Dorstenia brasiliensis* and the *Dorstenia tubicina*. [B, 19, 121.]—**C.-ataica.** The *Vandellia diffusa*. [B, 19.]—**C.-ataja, C.-ataya.** A bitter plant of Brazil, perhaps a species of *Gratiola*. [B, 121.]—**C.-cama.** A Brazilian species of *Scrophularia*, used like *Scrophularia aquatica*. [B, 121.]—**C.-chira.** The indigo-plant. [B, 121.]—**C'cica.** The *Euphorbia capitata* and the *Colubrina lusitanica*. [B, 121; L, 105, 119.]—**C'co.** The *Mimosa pudica*. [B, 121.]—**C.-cua.** See *C.-cama.*—**C.-cuys.** Maté, the leaves of *Ilex paraguayensis*. [B, 19; L, 87.]—**C.-eo.** See *C'co.*—**C.-etimary, C'ettmary, C'etymary.** The *Senecio brasiliensis*. [L, 84, 104, 109.]—**C.-ghiynvio.** A plant the powdered irritant leaves of which are applied to indolent ulcers; thought to be *Melastoma pauciflora*. [L, 87.]—**C.-guaza.** See *C.-cuys.*—**C.-jandivap, C.-jandiwap.** The *Plumbago scandens*. [L, 105.]—**C.-mena, C.-mi, C'mini, C.-miri.** See *C.-cuys.*—**C.-na.** The *Ilex giganteus*. [B, 121.]—**C'nthee.** The genus *Mussænda*. [B, 121.]—**C.-opia.** The *Vismia guianensis* or *Vismia baccifera*. [B, 121; L, 105.]—**C.-peba, C.-péba.** Ger., *Grieswurzel*. The genus *Cissampelos*, especially the *Cissampelos pareira*, and the *Aristolochia anguicida*. [B, 19, 121, 245, 270; L, 130.]—**C.-pomango, C.-pomongo.** The *Plumbago scandens*. [B, 19, 121.]—**C.-ponga.** The *Gomphrena vermiculata*, also a species of *Portulaca*. [B, 121, 132.]—**C.-potiragoa.** A species of *Spermacoce*. [B, 121.]—**C.-raboa.** The *Ceratonia siliqua*. [L, 105.]—**C.-rina.** The *Jatropha manihot* or its root. [L, 105, 109.]—**C.-roba.** See *C.-raboa.*—**C.-taya.** See *C.-ataya.*—**C.-tiguá.** The *Moschoxylon catigua*. [B, 19.]—**C.-tinga.** The *Leopoldinia piassaba* and the *Mauritia carana*. [B, 19.]

CAAT-AMUNAR [Tamil], **CAAT-AMUNK** [Tamil], n's. The *Jatropha curcas*. [B, 88, 172.]

CAAT-ARALIE [Tamil], n. The *Cerbera odallam*. [B, 172.]

CAAT-ATTIE [Tamil], **CAAT-ATTIE-POO** [Tamil], n's. The *Bauhinia tomentosa*. [B, 88, 172.]

CAAT-ELOOPPIE [Tamil], n. The *Terminalia bellerica*. [B, 172.]

CAAT-JADICAI [Tamil], n. The *Pyrrhosia Horsfieldi*. [B, 172.]

CAAT-JUTIE [Tamil], n. The *Mandragora officinalis*. [B, 88.]

CAAT-KARNAY [Tamil], **CAAT-KARNAY-KALUNG** [Tamil], n's. The *Dracontium polyphyllum*. [B, 88, 172.]

CAAT-KOLINGIE [Tamil], n. The *Tephrosia* (*Galega*) *purpurea*. [B.]

CAAT-MALLICA [Tamil], **CAAT-MALLICA VAYR** [Tamil], n's. The *Jasminum angustifolium*. [B, 88, 172.]

CAAT-MORUNGHIE [Tamil], **CAAT-MORUNGIE-VAYR** [Tamil], n's. The *Ormocarpum* (*Hedysarum*) *sennoides*. [B, 88, 172.]

CAAT-NOOCHIE [Tamil], n. The *Jatropha curcas*. [B, 172.]

CAAT-SIRAGUM [Tamil], n. The *Conyza anthelminthica*. [B, 172.]

CAB, n. An alchemical name for gold. [Ruland (A, 325).]

CABAL, n. Ka3b-a3l'. From Ar. and Heb., *cabala*, tradition or a doctrine resting on tradition. Fr., *cabale*. The cabalistic art; a pretended occult system of medical practice by means of supernatural agencies. [A, 301, 325.]

CABALATAR, CABALATOR, n's. Alchemical names for nitre. [Ruland (A, 325).]

CABALEAU [Dalechamp] (Fr.), n. Ka3b-a3l-o. The *Dorstenia contrayerva*. [B, 88.]

CABALHAU, n. A Mexican plant somewhat resembling the *Dorstenia contrayerva*; used for wounds from poisoned arrows. [B, 121; L, 109.]

CABALIST, n. Ka2b'a2l-i2st. Fr., *cabaliste*. Ger., *Kabalist*. A person versed in the cabalistic art. [A, 301.]—**C'ic art.** Lat., *ars cabalistica*. Fr., *art cabalistique*. See Cabal.

CABALLINE, adj. Ka2b'a2l-en(in). Lat., *caballinus* (from καβάλλης, a horse). Fr., *caballin*. Ger., *Ross-*. Used for horses (said of a coarse variety of aloes). [A, 301; L, 43.]

CABALLION (Lat.), n. n. Ka2b(ka3b)-a2l(a3l)'li2-o2n. Gen., *cabal'lii*. An ancient name for the genus *Cynoglossum*, especially the *Cynoglossum officinale*. [B, 121.]

CABALONGA (Sp.), n. Ka3b-a3-lon'ga3. The seeds of *Strychnos Ignatii*. [J. M. Maisch, "Am. Jour. of Pharm.," Dec., 1885, p. 601.]

CABARET [Fr. Cod.] (Fr.), n. Ka3b-a3r-a. Lit., a wine-house; the *Asarum europæum* (because used by drunkards as an emetic). [B, 7, 121, 173.]—**C. de muraille.** The *Omphalodes verna*. [B, 121.]—**C. des oiseaux.** The *Dipsacus silvestris*. [B, 173.]

CABASSE (Fr.), n. Ka3b-a3s. A West Indian name for the *Theobroma cacao*. [B. 121, 173.]

CABAY, n. Of the Philippine Islanders, the *Entada* (*Acacia*) *scandens*. [B, 88.]

CABBAGE, n. Ka2b'aj. O. E., *cabbish*. O. Fr., *cabus*. Gr., κράμβη. Lat., *brassica*. Fr., *chou*. Ger., *Kohl*. It., *cavolo*. Sp., *col*. The *Brassica oleracea* and its varieties. [A, 302; B.—**Arkansas c.** The *Strepthanthus obtusifolius*. [B, 275.]—**Australian c.-tree.** The *Livistona* (*Corypha*) *australis*. [B, 19.]—**Bastard c.-bark.** The bark of *Andira inermis*. [B.]—**Bastard c.-tree.** The *Andira inermis* and the *Melanodendron integrifolium*. [B, 19.]—**Black c.-tree.** In St. Helena, the *Melanodendron integrifolium*. [B, 19.]—**Borecole c.** Borecole; a variety of the *Brassica oleracea*. [B, 275.]—**Brazil c.** The *Caladium sagittæfolium*. [L, 73.]—**C.-bark.** Lat., *cortex cabbagi* (seu *cabbagii*, seu *c.*). See Andira *bark*.—**C.-bark tree.** The *Andira* (*Geoffræa*) *inermis*. [B, 19.]—**C.-palm.** The *Areca* (*Oreodoxa*) *oleracea*. [B, 185.]—**C.-palmetto.** The *Sabal palmetto*. [B, 75.]—**C.-palm of New South Wales.** The *Ptychosperma* (*Seaforthia*) *elegans* and the *Livistona humilis*. [B, 121, 185.]—**C.-palm tree.** See *C.-palm* and *C.-palmetto.*—**C.-rose.** The *Rosa centifolia*. [L, 56.]—**C.-rose petals.** The rosæ centifoliæ petala [Br. Ph. (B, 81).]—**C.-tree.** 1. See *C.-palm* and *C.-palm of New South Wales*. 2. The *Kleinia neriifolia*. [B, 19.]—**C.-tree bark.** See Andira *bark*.—**C. tribe.** See Cruciferæ.—**C.-wood.** 1. The wood of the c.-tree. 2. The *Eriodendron anfractuosum*. [B, 19, 275.]—**Canary Island c.-tree.** The *Cacalia kleinia*. [B, 275.]—**Cortex c.** (Lat.). See Andira *bark*.—**Dog's-c.** The *Thelygonum cynocrambe*. [B. 19.]—**Drum-head-c.** The *Brassica oleracea*, var. *capitata*. [B, 275.]—**Kale-c.** See *Borecole-c.*—**Little-umbelled c.-tree.** The *Commidendron spurium*. [B, 19.]—**Meadow-c.** See *Skunk-c.*—**Saint Patrick's c.** The *Saxifraga umbrosa*. [B, 19.]—**Savoy c.** A variety of the *Brassica oleracea*. [B, 275.]—**Sea-c.** The *Crambe maritima*. [B, 275.]—**Sea-otter's-c.** The *Nereocystis lutkeana*. [B, 275.]—**Skunk-c.** The *Symplocarpus fœtidus*. [B, 19.]—**Small-umbelled c.-tree.** See *Little-umbelled c.-tree.*—**Swamp-c.** See *Skunk-c.*—**West Indian c.-tree.** See *C.-bark tree* and *C.-palm.*—**Wild c.** The *Caulanthus crassicaulis*. [B, 66.]—**Wild California c.** The *Caulanthus crassicaulis* and the *Caulanthus procerus*. [B, 275.]

CABBAGIUM, CABBAGIUS, CABBAGUS (Lat.), n's n., m., and m. Ka2b(ka3b)-baj(ba3g)'i2-u3m(u4m), -u3s(u4s), ka2b(ka3b)'-ba2g(ba3g)-u3s(u4s). Ger., *Kohlbaum*. See Andira *inermis*.—**Cabbagii cortex, Cortex cabbagi** (seu **cabbagii**). See Cabbage-*bark*.

CABEB, CABEBI, n's. Alchemical names for scales of iron. [Ruland, Johnson (A, 325).]

CABELIAU (Fr.), **CABELIAUD** (Fr.), n's. Ka3b-e2l-i2-o. Lat., *cabeliavus*. The *Gadus morrhua*. [A, 301, 325, 385.]

CABELLARIA (Lat.), n. f. Ka2b(ka3b)-e2l-la(la3)'ri2-a3. The *Achras mammosa*. [L, 105.]

CABELLOS-DE-ANGEL (Sp.), n. Ka3b-e2l''yos-da-a3n'he2l. A Peruvian name for the *Cuscuta odorata*. [B, 121.]

CABERIDÆ (Lat.), n. f. pl. Ka2b(ka3b)-e2r'i2d-e(a3-e2). A family of the *Geometridæ*. [L, 248.]

CABERLAS, n. A Languedoc name for the *Agaricus squamosus*. [B, 121.]

CABESSA, n. Borneo camphor. [A, 385.]

CABEZA-DE-NEGRO (Sp.), n. Ka3b-ath2''a3-da-na'gro. A popular name in Mexico for the seeds of *Nymphæa odorata*, and in Colombia for the fruit of *Phytelephas macrocarpa*. [J. M. Maisch, "Am. Jour. of Pharm.," Jan., 1886, p. 20; B, 19, 121.]

CABILLAUD (Fr.), n. Ka3b-el-yo. See Cabeliaud.

CABINET, n. Ka2b'i2n-e2t. Fr., *cabinet*. Ger., *Cabinet*. It., *gabinetto*. Sp., *gabinete*. A small chamber, also a museum.—**C. d'anatomie** (Fr.). A dissecting-room. [L, 109.]—**C'käfer** (Ger.). The *Anthrenus museorum*. [L.]—**Pathological c.** A room arranged for the display of pathological specimens.—**Pneumatic c.** Fr., *c. pneumatique*. Ger., *pneumatisches C.* It., *gabinetto pneumatico*. Sp., *gabinete neumatico*. A closed chamber provided with valves, a pump, etc., for compressing or rarefying the air contained within it; used in the treatment of respiratory diseases (see *Pneumatic* differentiation). A small apparatus of this sort has also been used for inflating the tympanum in the treatment of catarrhal deafness. [F, 38.]

CABLIAUD (Fr.), n. Ka3b-li2-o. See Cabeliaud.

CABOMBACEÆ (Lat.), n. f. pl. Ka2b(ka3b)-o2mb-a(a3)'se2-(ke2)-e(a3-e2). Fr., *cabombacées*. Of Gray and others, see Cabombeæ.

CABOMBEÆ (Lat.), n. f. pl. Ka^{2}b(ka^{3}b)-o^{2}mb'e^2-e(a^3-e^2). Fr., *cabombées.* The water-shields ; of A. Richard, an order of plants formerly regarded as monocotyledonous, now considered dicotyledonous, consisting of aquatic herbs ; of Bentham and Hooker, a suborder of the *Nymphæaceæ.* [B, 19, 34, 42.]

CABOMBOIDEÆ (Lat.), n. f. Ka^{2}b(ka^{3}b)-o^{2}mb-o(o^2)-i^{2}d(ed)'-e^2-e(a^3-e^2). A suborder of the *Nymphæaceæ* (the *Cabombeæ* of Bentham and Hooker). [Caspary (B, 245).]

CABOO, n. A plant of Sumatra, sometimes used as a remedy for scabies. [L, 109.]

CABOSSE (Fr.), n. Ka^{3}b-os. The pod which contains the seed of *Theobroma cacao.* [L, 41.]

CABOTZ, n. An Abyssinian name for tape-worm, also for the *Hagenia abyssinica.* [B, 121.]

CABOUILL, n. A West Indian name for the *Agave americana.* [B, 121.]

CABOURG (Fr.), n. Ka^3-burg. A sea-bathing resort in the department of Calvados, France. [L, 87.]

CABRIDELLA, n. A Languedoc name for the *Aster tripolium.* [B, 121.]

CABRIDOULA, n. A Languedoc name for the *Psoralea bituminosa.* [B, 121.]

CABRIFEL, n. A Languedoc name for the *Ligustrum vulgare.* [B, 121.]

CABRILLET (Fr.), n. Ka^{3}b-ri^{2}l-a. The genus *Ehretia.* [B, 121.]

CABRILLAS, n. The *Cantharellus cibarius.* [B, 121, 173.]

CABUGAO, n. The *Citrus limonium.* [B, 121 ; L, 105.]

CABUJA, n. The *Agave americana.* [B, 121 ; L, 105.]

CABULATOR, n. See CABALATAR.

CABUR (Jap.), n. The genus *Polygonum.* [B, 121.]—**C.-c.** The *Polygonum orientale.* [B, 121.]—**C.-muda.** The *Polygonum barbatum.* [B, 121.]

CABUREIBA, n. The *Myroxylon peruiferum.* [B, 88, 121.]

CABUS (Fr.), n. Ka^3-bu^6. The *Brassica oleracea,* var. *capitata.* [B, 173.]

CABUWO, n. The *Dioscorea bulbifera.* [B, 121.]

CACABON (Lat.), n. n. Ka^{2}k(ka^{3}k)'a^3-bo^{2}n. Of Apuleius, the genus *Nymphæa.* [B, 121.]

CACABUM (Lat.), n. n. Ka^{2}k(ka^{3}k)'a^3-bu^{3}m(bu^{4}m). See CACABON and CACABUS (Lat. [1st def.]).

CACABUS (Lat.), n. m. Ka^{2}k(ka^{3}k)'a^3-bu^{3}s(bu^{4}s). Gr., κάκκαβος. 1. A pot or pan. [A, 318, 322, 325.] 2. A specific name applied to a species of *Peziza,* and by Endlicher to a section of that genus. 3. Of Bernhardi, a genus of solanaceous herbs of tropical America. [B, 121.]

CACABUS, n. An African name for belladonna. [B, 121.]

CACÆMIA (Lat.), n. f. Ka^{2}s(ka^{3}k)-em'(a^3'e^{2}m)-i^2-a^3. From κακός, ill-conditioned, and αἷμα, blood. A depraved state of the blood. [A, 322.]

CACÆMIC, adj. Ka^{2}s-e^{2}m'i^{2}k. Pertaining to, caused by, or affected with, cacæmia. [C. H. Hughes, "N. Y. Med. Jour.," Jan. 12, 1884, p. 35 (D).]

CACAEROMETER, n. Ka^{2}k-a-e^{2}r-o^{2}m'e^{2}t-u^{5}r. Lat., *cacaerometrum* (from κακός, bad, ἀήρ, air, and μέτρον, a measure). Ger., *Kakaërometer, Luftverderbnissmesser.* A name proposed by L. A. Kraus for J. F. Jahn's *cacometer,* a device for ascertaining the proportion of noxious constituents in air. [A, 322.]

CACÆSTHESIA, CACÆSTHESIS (Lat.), n's f. Ka^{2}s(ka^{3}k)-e^{2}s(a^3-e^{2}s)-the(tha)'zi^2(si^2)-a^3, -si^{2}s. Gen., *cacæsthesiæ, -the'seos* (*-sis*). From κακός, bad, and αἴσθησις, sensation. Fr., *cacesthésie.* Ger., *Kakästhese.* Any unpleasant morbid sensation ; as sometimes used, see PARÆSTHESIA and PSEUDÆSTHESIA. [A, 322 ; L, 81.]

CACAGOGUE, adj. and n. Ka^{2}k'a^3-go^{2}g. See CACCAGOGUE.

CACA HENRIETTE, n. A French Guiana name for the berries of *Melastoma succosa.* [B, 173.]

CACAHUATA, n. Fr., *cacahuete.* The *Arachis hypogœa.* [B, 121.]

CACALACA, n. A Languedoc name for the *Antirrhinum majus* and the *Digitalis purpurea.* [B, 121 ; L, 105.]

CACALEXETERIA (Lat.), n. n. pl. Ka^{2}k(ka^{3}k)-a^{2}l(a^{3}l)-e^{2}x-e^{2}t(at)-e(a)'ri^2-a^3. From κακός, evil, and ἀλεξητήριον, a preventive remedy. Remedies to prevent the effects of ill-conditioned humors or of inoculation. [A, 322.]

CACALIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-a(a^3)'li^2-a^3. Gr., κακαλία. Fr., *cacalie.* 1. Of the ancients, a plant supposed to have been the *Tussilago farfara.* [A, 387.] 2. Of Linnæus, a genus of composite plants, made by Bentham and Hooker a section of *Senecio.* 3. Of Tournefort, a genus now referred to *Adenostyles.* 4. Of Cassini and Hill, see KLEINIA. 5. Of Loureiro, a genus referred to *Gynura.* [B, 121.]—**C. albifrons** [Linnæus, Jr.]. The *Adenostyles albida* (seu *albifrons*). [B, 180.]—**C. alliariæfolia** [Lamarck], **C. alpina** [Linnæus]. The *Adenostyles viridis* (seu *alpina*). [B, 173, 180.]—**C. ante-euphorbium** [Linnæus]. The *Kleinia* (*Senecio*) *anteeuphorbium.* [B, 173.]—**C. atriplicifolia** [Linnæus]. Syn.: *Senecio atriplicifolius* [Hooker]. Wild caraway ; a species growing in the United States east of the Mississippi. [B, 215.]—**C. bulbosa** [Loureiro]. A species now referred to *Gynura.* [B, 121, 173.]—**C. coccinea.** A garden name for the *Emilia sagittata.* [B, 19.]—**C. ficoides** [Linnæus]. The *Kleinia* (*Senecio*) *ficoides.* [B, 121, 173.]—**C. hastata** [Linnæus]. A Siberian species probably to be referred to *Senecio.* The root is used in Siberia as an antisyphilitic. [B, 173.]—**C. kleinia** [Linnæus]. The *Kleinia nereifolia* (*Senecio kleinia*). [B, 173.]—**C. odora** [Forskål]. A species used in Arabia in the treatment of small-pox. [A, 321.]—**C. pendula** [Forskål]. An Arabian species probably to be referred to *Senecio.* The juice of the branches is used in Arabia for earache. [B, 173.]—**C. petasites** [Lamarck]. See *C. albifrons.*—**C. procumbens** [Lamarck]. A Chinese species probably to be referred to *Senecio ;* eaten by the Chinese. [B, 173.]—**C. repens** [Linnæus]. The *Kleinia* (*Senecio*) *repens.* [B, 173.]—**C. rotundifolia** [Willdenow]. A variety of the *Vernonia cineria.* [B, 180.]—**C. salicina** [Labillardière]. The *Bedfordia salicina.* [B, 219.]—**C. sarracenica** [Linnæus]. The *Senecio cacaliastrum.* [B, 173.]—**C. sonchifolia** [Linnæus]. The *Emilia sonchifolia.* [B, 172.]—**C. suaveolens** [Linnæus]. Syn.: *Senecio suaveolens* [Elliott]. The American sweet centaury, growing in the eastern and central United States. [B, 215.]—**C. tomentosa** [Jacquin]. See *C. albifrons.*—**Herba cacaliæ tomentosæ.** The herb of *Petasites albus.* [B, 180.]

CACALIE (Fr.), n. Ka^{3}k-a^{3}l-e. See CACALIA.—**C. écarlate.** The *Emilia sonchifolia.* [B, 19.]

CACALIEÆ (Lat.), n. f. pl. Ka^{2}k(ka^{3}k)-a^{2}l(a^{3}l)-i(i^2)'e^2-e(a^3-e^2). Fr., *cacaliées.* Of Lessing, a division of the *Senecioneæ,* comprising *Cacalia* and the *Erechthiteæ* of De Candolle. [B, 170.]

CACALOA, n. The cardamom. [B, 88, 121.]

CACA-MULLU (Malay), n. The *Pedalium murex.* [B, 172.]

CACAMUM (Lat.), n. n. Ka^{2}k(ka^{3}k)'a^{2}m(a^{3}m)-u^{3}m(u^{4}m). See CANCAMUM.

CACANCHE (Lat.), n. f. Ka^{2}k(ka^{3}k)-a^{2}n^2(a^{3}n^2)'ke(ch^{2}a). See CACOCYNANCHE.

CACANTHRAX (Lat.), n. m. Ka^{2}k(ka^{3}k)-a^{2}n(a^{3}n)'thra^{2}x-(thra^{3}x). Gen., *cacan'thracis.* See *Contagious* ANTHRAX.

CACAO, n. Ka^3-ka^3'o. 1. The seeds of the chocolate-tree (*Theobroma c.*) and perhaps of other species of *Theobroma.* They contain starch, c. butter, a proteid substance, and theobromine. They are prepared for the market either by drying in the sun or by "sweating" (being buried under ground or confined in a closed box for some days, which renders their taste milder and less bitter). A peculiar fermentation takes place during the sweating process, and c.-red is developed. 2. Of Gärtner, the genus *Theobroma.* [B, 42, 270.]—**Ariba Guayaquil c.** See *Guayaquil c.*—**Bahia c.** A Brazilian variety not subjected to the sweating process ; of a dirty grayish-brown color, with colored striate cotyledons. [B, 270.]—**Berbice c.** A variety smaller and flatter than Caracas c. ; when fully ripe, nearly round and very rich in oil ; fragrant and of a fine oily taste. ["Proc. of the Am. Pharm. Assoc.," ix, p. 206 (B).]—**Beurre de c.** (Fr.). See *Oil of* THEOBROMA.—**Bourbon c.** A variety somewhat like Caracas c., but with smaller seeds. ["Proc. of the Am. Pharm. Assoc.," ix, p. 206 (B).]—**Brazilian c.** See *Bahia c., Para c.,* and *Marañon c.*—**Butter of c., Butyrum c.** See *Oil of* THEOBROMA.—**C'baum** (Ger.). See THEOBROMA.—**C. bicolor** [Poiret]. The *Theobroma bicolor.* [B, 173.]—**C'bohne** (Ger.). See *C.* (1st def.).—**C.-butter.** See *Oil of* THEOBROMA.—**C.-butter tree.** The *Theobroma c.* [B, 275.]—**C. Caraque** [Fr. Cod.] (Fr.). See *Caraccas c.*—**C. cimarrona.** The seeds of *Herrania albiflora* and other species of *Herrania ;* used in the mountainous parts of South America as a substitute for c. [B, 81.]—**C. de la Guyane** (Fr.). See *Surinam c.* and *Cayenne c.*—**C. de la Trinité et de Cuba** (Fr.). See *Trinidad c.*—**C. de Para** (Fr.). See *Para c.*—**C. des Isles** (Fr.). See *West Indian c.*—**C'fett** (Ger.). See *Oil of* THEOBROMA.—**C. guianensis** [Aublet]. The *Theobroma guianense.* [B, 180.]—**C'malve** (Ger.). See ABROMA.—**C. Maragnan** [Fr. Cod.] (Fr.). See *Marañon c.*—**C. minor** [Gärtner]. The *Theobroma c.* [B, 173.]—**C'nüsse** (Ger.), **C.-nut.** See *C.* (1st def.).—**C'öl** (Ger.). See *Oil of* THEOBROMA.—**C'pulver** (Ger.). C. which has been deprived of part of its oily matter by expression. [B, 270.]—**C.-red.** Ger., *C'roth.* A bright-red substance, soluble in water and in alcohol, produced in c.-seeds which have been subjected to the sweating process. [B, 81.]—**C. sativa.** The *Theobroma c.* [B, 173.]—**C. sauvage** (Fr.). A Cayenne name for the *Pachira aquatica.* [B, 88.]—**C'schale** (Ger.). The shell or husk of the c.-seed. [B, 270.]—**C.-seeds.** See *C.* (1st def.).—**C. silvestris** [Aublet]. The *Duroia eriophila.* [B, 173.]—**C.-starch.** Ger., *C'stärke.* The starch found in the cotyledons of c. It forms globular granules which seldom exceed 5 μ in diameter, and are distinguished by the slowness with which they react to iodine and the difficulty with which they are converted into a paste. [B, 270.]—**C'stearin.** Fr., *c'stéarine.* The stearin of oil of theobroma. [A, 385.]—**C. tabulata.** Chocolate. [B, 180.]—**C. terré** (Fr.). C. that has been subjected to the sweating process. [A, 301.]—**C'thee** (Ger.). See *Cortex c. tostus.*—**C. theobroma** [Tussoc], **C.-tree.** The *Theobroma c.* [B, 81, 173.]—**Caracas c., Caraccas c.** A variety brought from Caracas ; with plano-convex seeds, reddish-brown externally, with reddish-brown cotyledons having minute granular prominences. [B, 270.]—**Cayenne c.** A variety elongated and pointed at one end, nearly always flat, having a strong shell and a very oily, polished, and blood-red kernel ; of a harsh, disagreeable taste and a smoky odor, which it loses on roasting. ["Proc. of the Am. Pharm. Assoc.," ix, p. 206 (B).]—**Cerate of c.** Fr., *cérat au c.* A mixture of 1 part of oil of theobroma and 2 parts of almond oil. [Hamb. Ph., 1833 (B, 119).]—**Cortex c. tostus.** Ger., *C'thee.* The husks of c.-seeds roasted and used as a substitute for coffee. [B, 270.]—**Ecuador c.** See *Guayaquil c.*—**Erde'** (Ger.). C. (1st def.) which has been sweated by burying in the earth. [B, 270.]—**Fabæ c.** See *C.* (1st def.).—**Fructus c.** See *C.* (1st def.).—**Gerotteter C.** (Ger.). See *Erde'.*—**Guatemala c.** A variety of c. (1st def.) in which the seeds are very large and convex, frequently angular, and pointed at one end, and containing much oil ; probably from an unknown species of *Theobroma.* ["Proc. of the Am. Pharm. Assoc.," ix, p. 205 (B).] See also *Soconusco c.*—**Guayaquil c.** Two varieties are distinguished ; an ordinary sort (*Machala Guayaquil c.*) with flattened seeds, grayish or yellowish externally, and dark-brown or somewhat violet-colored cotyledons, and a superior kind (*Ariba Guaya-*

quil c.) with large, irregular seeds and blackish-brown cotyledons. The latter is somewhat heavier than Caracas c., and has less husk in proportion to the kernel ; it is also less oily and of a somewhat bitterer taste. [" Proc. of the Am. Pharm. Assoc.," ix, p. 206 (B).] —**Guiana c.** See *Surinam c.* and *Cayenne c.*—**Holländischer C.** (Ger.). C. which has been treated with potash or soda and magnesia and then dried and powdered. [B, 270.]—**Huile de c.** (Fr.). See *Oil of* THEOBROMA.—**Jamaica c.** Syn.: *West India c.* C. from the West Indies ; distinguished by the various colors of the shells. The dark-colored seeds are generally flat, and the kernel has a sharp, bitter taste ; the lighter ones are mostly rounder and of a better taste. [" Proc. of the Am. Pharm. Assoc.," ix, p. 206 (B).]—**Machala Guayaquil c.** See *Guayaquil c.*—**Maracaibo c.** A variety brought from Venezuela, having light-brownish seeds and violet or reddish-brown cotyledons. [B, 270.]—**Maranham c., Marañon c.** A Brazil variety. The seeds are flat and broad, with a smooth, shining shell and a kernel of agreeable, although somewhat bitter, taste ; dark-red and abounding in oil. [" Proc. of the Am. Pharm. Assoc.," ix, p. 205 (B) ; B, 270.]—**Massa c.** Chocolate. [B, 270.]—**Medicated c.-butter.** A preparation made by melting together 32 parts of yellow wax and 224 parts of oil of theobroma and adding 1 part each of balsam of Peru and benzoic acid. [Ferris, Bringhurst (L, 65).]—**Nuces c., Nuclei c.** See *C.* (1st def.).—**Oleum c.** See *Oil of* THEOBROMA.—**Para c.** A variety brought from Para, which has not been subjected to the steaming process. [B, 270.]—**Pâte de c.** (Fr.). See PASTA *cacaotina.*—**Port au Prince c.** An excellent variety, similar to Maracaibo c., but differing in not having been subjected to the steaming process. [B, 270.]—**Puerto Cabello c.** A variety brought from Venezuela, resembling Caracas c., but of higher specific gravity. [B, 270.]—**Sebum c.** See *Oil of* THEOBROMA.—**Semen c.** See *C.* (1st def.).—**Soconusco c.** A superior variety collected in Guatemala and Mexico (said not to be exported) ; small, convex seeds of almost golden yellow, with a fine aromatic and agreeably mild taste. [" Proc. of the Am. Pharm. Assoc.," ix, p. 204 (B) ; B, 270.]—**Sonnenc'** (Ger.). C. (1st def.) cured by drying in the sun. [B, 270.]—**Suppositoires de beurre de c.** [Fr. Cod.] (Fr.), **Suppositoria cum oleo c.** [Fr. Cod.]. Suppositories each containing 4 grammes of c.-butter, made by melting at a gentle heat and pouring into paper molds of an elongated conical shape. [A, 253.]—**Surinam c.** Two sorts are known under this name : 1. Large, roundish seeds, having a dusty shell and a bitter taste. 2. Small, flat seeds, having whitish or dirty-brown shells, owing to a covering of dust or earth, and kernels of a harsh, rancid taste. [" Proc. of the Am. Pharm. Assoc.," ix, p. 206 (B) ; B, 270.]—**Trinidad c.** A variety brought from Trinidad, not subjected to the steaming process ; large, broad seeds of a bright-brown, with violet cotyledons covered with punctiform depressions. [B, 270.]—**Ungerotteter C.** (Ger.). See *Sonnenc'.*—**Venezuela c.** See *Caracas c.*, *Puerto Cabello c.*, and *Maracaibo c.*—**West Indian c.** See *Jamaica c.*, *Trinidad c.*, and *Port au Prince c.*—**Wild c.** The *Herrania purpurea.* [L, 73.]

CACAOÏER (Fr.), n. Ka^3-ka^3-o-i^2-a. The genus *Theobroma.* [B, 121.]

CACAONOGALACTOPECTE (Lat.), n. f. Ka^3-ka^3-o'''no-(no^2)-ga^{2}l(ga^{3}l)-a^{2}k(a^{3}k)''to(to^2)-pe^{2}k(pak)'te(ta). From *cacao* (*q. v.*), γάλα, milk, and πηκτή, a cheese. A name proposed by L. A. Kraus for Arrault's solidified ass's-milk-chocolate. [A, 322.]

CACAOSTEARIC ACID, n. Ka^3-ka^3-o-ste-a^{2}r'i^{2}k. Fr., *acide cacaostearique.* A fatty acid obtained from the stearin of oil of theobroma. [A, 385.]

CACAOTIER (Fr.), n. Ka^3-ka^3-o-ti^2-a. See CACAOÏER.

CACAOTINUS (Lat.), adj. Ka^3-ka^3-o-ti(te)'nu^{3}s(nu^{4}s). Of or made of cacao. [B, 270.]

CACAOYER (Fr.), n. Ka^3-ka^3-o-i^2-a. See CACAOÏER.

CACA-PALAM (Malay), n. The *Lagenaria vulgaris.* [B, 172.]

CACAPHRODITE (Lat.), n. f. Ka^{2}k(ka^{3}k)-a^{2}f(a^{3}f)-ro^{2}d-i(e)'-te(ta). Gen., *cacaphrodi'tes.* From κακός, evil, and ἀφροδίτη, venery. Syphilis. [B. Tomitanus (A, 322).]

CACAPHTHÆ (Lat.), n. f. pl. Ka^{2}k(ka^{3}k)-a^{2}p(a^{3}f)'the(tha^3-e^2). From κακός, malignant, and ἄφθαι (see APHTHÆ). Malignant aphthæ. [A, 322.]

CACAPU, n. The *Torenia asiatica.* [B, 121.]

CACASPISTES (Lat.), n. m. pl. Ka^{2}k(ka^{3}k)-a^{2}s(a^{3}s)-pi^{2}st'ez(e^{2}s). From κακός, evil, and ἀσπιστής, a heavy-armed warrior. A family of *Ophidii* armed with plates. [L, 180.]

CACATALI, n. The *Pedalium murex.* [B, 88.]

CACATIN, n. The *Fagara pentandra.* [B, 121.]

CACATION, n. Ka^{2}k-a'shu^{3}n. Gr., ἀποπάτησις. Lat., *cacatio* (from *cacare*, to go to stool). Defecation. [A, 325.]

CACATORY, adj. Ka^{2}k'a^{2}t-o-ri^2. Lat., *cacatorius.* Fr., *cacatoire.* Affected or attended with diarrhœa. [A, 322 ; L, 43, 73, 104.] See FEBRIS *cacatoria.*

CACATUIDÆ (Lat.), n. f. pl. Ka^{2}k(ka^{3}k)-a^3-tu^2(tu)'i^{2}d-e(a^3-e^2). The cockatoos, a family of the *Scansores.* [L, 121.]

CACATUNFULI, n. The *Endacinus tinctorius.* [B, 121.]

CACAVA, CACAVA QUAHOITL, CACAVAHE, CACAVATA, CACAVATE, CACAVERA, n's. See CACAO.

CACAVI, n. 1. Cacao. [A, 322.] 2. Cassava. [B, 88, 121.]

CACCABININÆ (Lat.), n. f. pl. Ka^{2}k(ka^{3}k)-ka^3-bi^{2}n-i(e)'ne-(na^3-e^2). A subfamily of the *Tetramidæ.* [L, 270.]

CACCAGOGUE, adj. Ka^{2}k'a^3-go^{2}g. Lat., *caccagoga* (from κάκκη [see CACCE], and ἄγειν, to expel). Fr., *caccagogue.* Purgative (formerly said of certain ointments [*caccagoga*] which, being rubbed on the anus, had a cathartic effect). [L, 84.]

CACCAU, n. See CACAO.

CACCE (Lat.), n. f. Ka^{2}k(ka^{3}k)'se(ka). Gen., *cac'ces.* Gr., κάκκη. Human fæces. [A, 322, 387.]

CACCIONDE, n. A word probably derived from an Italian proper name ; formerly applied to a certain pill containing catechu, recommended for dysentery. [Baglivi (A, 325).]

CACCIUTO (It.), n. Ka^{3}t-chi^2-u'to. See ISCHIA.

CACEDÆRIUM (seu **CACEDONIUM**) **TARTARUM**, n. An old term for peccant matter separated by secretion, but still retained within the body. [Ruland, Johnson (A, 325) ; L, 94, 104.]

CACENTERIA (Lat.), n. f. Ka^{2}s(ka^{3}k)-e^{2}nt-e(e^2)'ri^2-a^3. From κακός, evil, and ἔντερον, an intestine. A foul state of the intestines. [A, 322.]

CACEPHEBOTESIA (Lat.), n. f. Ka^{2}s(ka^{3}k)-e^{2}f-e(a)-bo^{2}t-ez-(as)'i^2-a^3. From κακός, faulty, and ἐφηβότης, puberty. A derangement of health incident to puberty. [A, 322.]

CACÉRAS (Fr.), n. Ka^3-sa-ra^3. An edible species of *Cyperus*, perhaps *Cyperus esculentus*, growing in Goa. [B, 38, 88.]

CACHÆMIA (Lat.), n. f. Ka^{2}k(ka^{3}ch^2)-em'(a^3'e^{2}m)-i^2-a^3. See CACÆMIA.

CACHÆMIC, adj. Ka^{2}k-e^{2}m'i^{2}k. See CACÆMIC.

CACHAGUYO (Sp.), n. Ka^3-cha^3-gu'yo. A Chilian name for the *Durvillœa utilis.* [B, 121.]

CACHALON (Fr.), n. Ka^3-sha^{3}l-o^{2}n^2. The *Sylphium trilobatum.* [B, 121.]

CACHALOT (Fr.), n. Ka^3-sha^{3}l-o. The genus *Physeter.* [L.] —**C. à grosse tête, Grand c.** The *Physeter macrocephalus.* [L.]

CACHALOUAI, n. The *Chironia* (*Erythrœa*) *chilensis.* [B.]

CACHALU (Bengal.), n. The *Colocasia antiquorum.* [B, 172.]

CACHANA, n. Henkel's name for the root of an umbelliferous plant used in domestic practice in Mexico ; of a sweet, balsamic taste, a bitter after-taste, and a peculiar, tar-like odor. [" Proc. of the Am. Pharm. Assoc.," xvi, p. 186 (B).]

CACHANG-PARANG, n. A leguminous plant of Sumatra, thought to be *Dolichos ensiformis* or *Entada scandens.* The seeds are used in the treatment of pleurisy. [B, 88, 121.]

CACHAN-LA-HUEN, n. See CACHALOUAI.

CACHARI (Hind.), n. The *Cucumis pubescens.* [B, 172.]

CACHAT (Fr.), n. Ka^3-sha^3. One of the springs at Évian (*q. v.*).

CACHAY-KIJANGOU, n. The *Dioscorea alata.* [B, 121.]

CACHÉ (Fr.), adj. Ka^{3}sh-a. Concealed ; in botany, included (said especially of the radicle when covered in by the elongated base of the cotyledons). [B, 1 ; L.]

CACHECTES (Lat.), n. m. Ka^{3}k(ka^{3}ch^2)-e^{2}kt'ez(as.). Gr., καχέκτης. A cachectic person. [A, 387.]

CACHECTIC, adj. Ka^{2}k-e^{2}kt'i^{2}k. Gr., καχεκτικός. Lat., *cachecticus.* Fr., *cachectique.* Ger., *kacheclisch.* Pertaining to or affected with cachexia. [A, 301.]

CACHECTICUM LUDOVICI (Lat.), n. n. Ka^{2}k(ka^{3}ch^2)-e^{2}k'ti^{2}k-u^{3}m(u^{4}m) lud-o-ve'si(ke). See ANTIMONIUM *diaphoreticum martiale.*

CACHELCOMA (Lat.), n. n. Ka^{2}k(ka^{3}ch^2)-e^{2}l-kom'a^3. Gen., *cachelcom'atos* (*-tis*). From κακός, depraved, and ἕλκωμα, an ulcer. A malignant ulcer. [A, 322.]

CACHELCOPORPHYROTYPHUS (Lat.), n. m. Ka^{2}k-(ka^{3}ch^2)-e^{2}lk-o(o^2)-po^{2}r-fi^{2}r(fu^{6}r)-o(o^2)-tif(tu^{6}f)'u^{3}s(u^{4}s). From κακός, depraved, ἕλκωμα, an ulcer, πορφύρειν. to be purple, and τῦφος, stupor. A typhoid form of scarlet fever with malignant ulceration. [A, 322.]

CACHELCOTICUS (Lat.), adj. Ka^{2}k(ka^{3}ch^2)-e^{2}lk-o^{2}t'i^{2}k-u^{3}s-(u^{4}s). Pertaining to or affected with cachelcoma. [A, 322.]

CACHELOUAI, CACHELOUDI, CACHEN-LA-GUEN, CACHEN-LA-HUEN, n's. See CACHALOUAI.

CACHERÉE (Fr.), n. Ka^{3}sh-e^{2}r-a. An acrid plant of Pondicherry ; according to some, the *Hibiscus sabdariffa.* [B, 88, 132.]

CACHET (Fr.), n. Ka^{3}sh-a. A seal ; in pharmacy, a wafer. [A, 385 ; B.]—**C. de pain, C. médicamenteux.** A wafer of unleavened bread. [L, 49, 65.]—**C's oculistiques.** Old Roman stones engraved with the name of a medicinal preparation, that of the physician ordering it, and that of the eye disease for which it was intended. [L, 49.]

CACHEXIA (Lat.), n. f. Ka^{2}k(ka^{3}ch^2)-e^{2}x'i^2-a^3. Gr., καχεξία (from κακὴ ἕξις, a bad habit of body). Fr., *cachexie.* Ger., *Kachexie.* It., *cachessia.* Sp., *caquexia.* Cachexy ; a vague term for some deteriorated state of the general health occurring as the result of a depraved condition of the blood or in consequence of some organic disease ; characterized by debility and usually a decided change in the appearance of the face, such as a yellowish, waxy look, etc. The old nosologists applied the term to diseased states characterized by emaciation, tumors, or some marked change in the shape of parts. [Samuel (A, 319) ; L, 132.]—**African c.** Lat., *c. africana.* A disease observed in negroes, perhaps identical with miners' anæmia (*q. v.*). [Sonsino, " Med. Times and Gaz.," May 27, 1882, p. 553.]—**Alcoholic c.** See *Drunkards' c.*—**Alkaline c.** Fr., *cachexie alcaline.* A c. induced by the long-continued internal use of alkalies, especially an alkaline state of the blood. [D, 72.]—**Arsenical c.** Chronic arsenical poisoning. [D, 34.]—**C. africana.** See *African c.*—**Cachexiæ anomales.** Of Sauvages, an order of cachexiæ including those not accurately classified, such as gangrene, necrosis, alopecia, etc. [L, 132.]—**C. aquosa.** Fr., *cachexie aqueuse, mal-cœur, pourriture.* Ger., *Egelsucht, Egelkrankheit.* It., *cachessia acquosa.* A form of anæmia observed in cattle and sheep ; thought to be due to a *Distoma* in the bile-ducts. [A, 301 ; L, 44.]—**C. canceratica.** See *Cancerous c.*—**C. car-**

diaca. See *Cardiac c.*—**C. cellulosæ hydatigena.** Ger., *Finnenkrankheit.* It., *cachessia celluloso-hydatigena.* The measles of swine, due to the *Cysticercus cellulosæ.* [L, 44, 81.]—**C. chlorotica.** See CHLOROSIS.—**C. exophthalmica.** See *Exophthalmic* GOÎTRE.—**C. hydropico-verminosa.** See *C. ictero-verminosa.*—**C. icterica.** C. with jaundice.—**Cachexiæ icteritiæ.** An old term for diseases accompanied by a pale, dark, red, or yellow hue without fever, including jaundice and chlorosis. [L, 132.]—**Cachexiæ intumescentiæ.** Cachexiæ with increased size of a part. [L, 132.]—**C. mercurialis.** See *Mercurial c.*—**C. ovium hydropica.** The "rot" of sheep. [L, 81.]—**C. saturnina.** See *Lead c.*—**C. scorbutica.** See *Scorbutic c.*—**C. scrofulosa.** See *Scrofulous c.*—**C. splenica, C. splenica et lymphatica, C. splenico-lymphatica.** A c. due to splenic disease (pseudo-leucocythæmia). [L, 20.]—**C. strumipriva.** Kocher's term for a form of c. observed after removal of the thyreoid gland; amounting in well-marked cases to cretinism. [Baumgärtner, "Arch. f. klin. Chir.," xxxi, 1, 1884; "Ann. of Surg.," Jan., 1885, p. 72; D. G. Zesas, "Dtsch. Med.-Ztg.," July 9, 1885, p. 625.]—**C. uteri, C. uterina.** Old terms for leucorrhœa. [F. Hoffman (A, 66); L, 104.]—**C. venerea.** Syphilis. [G.]—**C. venosa.** See VENOSITY.—**C. verminosa.** See *Verminous c.*—**C. virginum.** Chlorosis. [L, 30.]—**Cancerous c., Carcinomatous c.** Lat., *c. canceratica* (seu *cancerosa*, seu *carcinomatosa*). Fr., *cachexie cancéreuse.* Ger., *Krebscachexie.* C. due to cancerous disease; characterized by debility, emaciation, and a dirty, waxy, straw-colored, brownish, or brownish-green complexion. [D, 52.]—**Cardiac c.** Lat., *c. cardiaca.* Fr., *cachexie cardiaque* [Andral]. A peculiar condition of the subjects of chronic heart disease. The state of the skin and the composition of the blood resemble those of chlorosis, and there is continuous blueness of the mucous membranes. [D, 3.]—**Chlorotic c.** See CHLOROSIS.—**Drunkards' c.** The peculiar condition of ill health caused by the abuse of alcohol. [D, 1.]—**Lead c.** Lat., *c. saturnina.* Fr., *cachexie saturnine.* Ger., *Bleicachexie.* A state of ill health due to chronic lead poisoning; characterized by emaciation and a pallid, lustreless complexion. [D, 34.]—**Lymphatico-splenic c.** See *C. splenico-lymphatica.*—**Malarial c., Malarious c., Marsh c.** Fr., *cachexie paludéenne* (ou *palustre*). C. due to malarial poisoning. "A frequent result of exposure to malarial influences and of repeated attacks of periodic fever is anæmia, or, even though there may have been no fever, often a profound state of c., with which are associated structural changes in the abdominal viscera, and notably in the spleen. The sufferer has a puffy, blanched face, pearly conjunctivæ and lips, short and hurried respiration, weak cardiac action, hæmic murmurs, and a feeble pulse, a tumid abdomen, not infrequently dropsy, œdematous lungs and areolar tissue generally, wasted muscles, and a bronzed, discolorèd skin, with a large spleen extending sometimes as far as the iliac fossa (ague cake)." [Sir J. Fayrer, "Brit. Med. Jour.," Apr. 22, 1882.]—**Mercurial c.** Lat., *c. mercurialis.* Fr., *cachexie mercurielle.* Ger., *Quecksilbercachexie.* A c. due to chronic mercurial poisoning, resembling scurvy; characterized by anæmia, emaciation, loss of hair, pains in the bones and joints, œdema, diarrhœa, etc. [D, 6.]—**Negro c.** See *African c.*—**Osteal c.** A form of profound c. observed in children, associated with more or less painful swelling of one of the long bones, and in some cases with hæmatinuria or hæmorrhage into a tissue; thought by Gee to be a disease by itself, although often accompanied by rhachitic phenomena. ["Lancet," June 3, 1882, p. 924.]—**Pachydermic c.** Fr., *cachexie pachydermique* [Charcot]. See MYXŒDEMA.—**Paludal c.** See *Malarial c.*—**Periosteal c.** See *Osteal c.*—**Scorbutic c.** Lat., *c. scorbutica.* Fr., *cachexie scorbutique.* C. due to scurvy. [A, 301.]—**Scrofulous c.** Lat., *c. scrofulosa.* C. due to scrofula or leading to its development. [D, 1.]—**Splenic c.** See *C. splenico-lymphatica.*—**Strumous c.** See *Scrofulous c.*—**Suprarenal c.** C. due to disease of the suprarenal capsules. [D, 52.]—**Syphilitic c.** The anæmia, etc., of syphilitics. [L, 136.]—**Tubercular c., Tuberculous c.** The state of ill health due to tubercular disease, or, according to Sir J. Clark, tending to its development. [D, 1.]—**Venous c.** Lat., *c. venosa.* See VENOSITY.—**Verminous c.** Lat., *c. verminosa.* The anæmia, discoloration of the skin, etc., produced by intestinal worms. [L, 136.]

CACHEXIE (Fr., Ger.), n. Ka^3-ke^{2}x-e, -ch^{2}e^{2}x-e'. See CACHEXIA.—**Bleic'** (Ger.). See *Lead* CACHEXIA.—**C. alcaline** (Fr.). See *Alkaline* CACHEXIA.—**C. alcoolique** (Fr.). See *Drunkards'* CACHEXIA.—**C. anémique** (Fr.). The cachexia of anæmic persons. [D, 72.]—**C. aqueuse** (Fr.). See CACHEXIA *aquosa.*—**C. chlorotique** (Fr.). See CHLOROSIS.—**C. exophthalmique** (Fr.). An old name for exophthalmic goître. [F.]—**C. nerveuse** (Fr.). A cachexia due to frequent attacks of hysteria, epilepsy, etc. [A, 385.]—**C. pachydermique** [Charcot] (Fr.). See MYXŒDEMA.—**C. paludéenne** (Fr.), **C. palustre** (Fr.). See *Malarial* CACHEXIA.—**C. saturnine** (Fr.). See *Lead* CACHEXIA.—**C. strumeuse** (Fr.). See *Scrofulous* CACHEXIA.—**Krebsc'** (Ger.). See *Cancerous* CACHEXIA.—**Quecksilberc'** (Ger.). See *Mercurial* CACHEXIA.

CACHEXY, n. Ka^{2}k-e^{2}x'i^2. See CACHEXIA.

CACHI, n. A Malabar tree, thought to be the *Artocarpus integrifolius.* [B, 88, 121.]

CACHIBOU, n. The *Bursera gummifera* and the *Maranta lutea.* [B, 75, 121.]—**C.-resin.** Lat., *resina c.* The gum-resin derived from the *Bursera gummifera.* [B, 19, 180.]

CACHIMAN (Fr.), n. Ka^{3}sh-i^2-ma^{3}n^2. The *Anona*, especially the *Anona reticulata.* [B.]—**C.-cœur-de-bœuf.** The fruit of *Anona reticulata.* [B, 173.]—**C. épineux.** The *Anona muricata.* [A, 301.]

CACHIMANT (Fr.), n. Ka^{3}sh-i^2-ma^{3}n^2. The fruit of *Anona squamosa.* [B, 173.]

CACHIMEN (Fr.), n. Ka^{3}sh-i^2-ma^{3}n^2. The *Anona muricata.* [B, 173.]

CACHIMIA (Lat.), n. f. Ka^{2}k(ka^{3}ch^2)-i^{2}m'i^2-a^3. See CACHYMIA.

CACHIMILLA, n. The *Pluchea borealis.* [B, 215.]

CACHINLAGUA, n. See CACHAN-LA-HUEN.

CACHINNATION, n. Ka^{2}k-i^{2}n-a'shu^{3}n. Gr., καγχασμός. Lat., *cachinnatio, cachinnus.* Loud and uncontrollable laughter. [A, 322.]

CACHINNUS (Lat.), n. m. Ka^{2}k(ka^{3}ch^2)-i^{2}n'nu^{3}s(nu^{4}s). See CACHINNATION.—**C. convulsivus.** Ger., *Lachkrampf.* Spasmodic laughter. [Schmalz (A, 322); L, 81.]

CACHIRI, n. A Cayenne name for an alcoholic drink made from the root of manihot. [A, 385; L, 41, 49.]

CACHLA (Lat.), n. f. Ka^{2}k(ka^{3}ch^2)'la^3. Gr., κάχλα. An ancient name for a species of *Buphthalmum.* [Pliny (A, 318).]

CACHLEX (Lat.), n. m. Ka^{2}k(ka^{3}ch^2)'le^{2}x(lax). Gen., *cachle'cos (-cis).* Gr., κάχληξ. A pebble. Whey in which heated pebbles had been quenched was recommended by Galen in dysentery. [A, 325.]

CACHOFLE, n. A Provence name for the artichoke and its edible flower-head. [B, 38.]

CACHOLA, n. The *Cachrys libanotis.* [B, 121.]

CACHONDÉ (Fr.), n. Ka^3-sho^{2}n^2-da. See CACHUNDE.

CACHOOBONG, n. The *Datura fastuosa.* [B, 121.]

CACHOOLONG, n. A Sumatra name for a species of *Stramonium.* [B, 38.]

CACHORE, n. The *Acacia catechu.* [B, 38.]

CACHOS, n. The *Lycopersicum esculentum.* [B, 88.]

CACHOU (Fr.), n. Ka^3-shu. 1. The *Acacia catechu*, also its juice (catechu). [B.] 2. A silvered pill to be chewed, for correcting the odor of the breath. [B.] See *C. de Bologne.* 3. Purified and aromatized licorice pressed into slender sticks, used for coughs. [B, 270.]—**Alcoolé de c.** See *Tinctura* CATECHU.—**C. aromatisé.** See *C. de Bologne.*—**C. brun et plat.** Catechu in rounded, flattened, brownish cakes, of a bitter, astringent taste. [B, 119.]—**C. clair.** See CATECHU *pallidum.*—**C. d'arec.** Catechu obtained from the *Areca catechu.* [B.]—**C. de Bengale.** See *Bengal* CATECHU.—**C. de Bologne.** Syn.: *pastilles pour les fumeurs, c. aromatisé.* Smokers' c's; silvered pills of extract of licorice, catechu, gum arabic, cascarilla, charcoal, Florentine iris, mastic, oil of peppermint, tincture of musk, and tincture of ambergris. [Dorvault (B, 270).]—**C. de Bombay.** See *Bombay* CATECHU.—**C. de Butea frondosa.** See *C. en masse* (2d def.).—**C. de Pégu** [Fr. Cod.]. See CATECHU (1st def.).—**C. en boule.** See *C. d'arec.*—**C. en masse.** 1. Catechu occurring in reddish-brown or blackish masses, of a bitter, astringent taste and an agreeable after-taste. [B, 119.] 2. The sort of kino obtained from the *Butea frondosa.* [B, 180.]—**C. terne et rougeâtre.** Catechu occurring in friable reddish plates, of an astringent taste, not bitter, and an agreeable after-taste. [B, 119.]—**Extrait de c.** An aqueous extract of catechu made by infusion or decoction and evaporation; official in several old formularies. [B, 119.]—**Infusion de c.** See *Infusum* CATECHU.—**Infusion de c. composée.** See *Compound infusion of* CATECHU.—**Pastilles de c.** See *Trochisci* CATECHU.—**Poudre de c.** [Fr. Cod.]. Catechu powdered in an iron mortar, dried by heat, triturated, and passed through a No. 100 silk sieve. [A, 253.]—**Sirop de c.** [Fr. Cod.]. A syrup made by dissolving, with the aid of heat, 25 parts of catechu in double its weight of distilled water, adding the solution to 975 parts of boiling *sirop de sucre*, continuing the action of the heat until the whole amounts to 1,000 parts, and straining. [A, 253.]—**Tablettes de c.** [Fr. Cod.], **Tablettes de c. odorantes.** See *Trochisci* CATECHU.—**Teinture de c.** [Fr. Cod.]. See *Tinctura* CATECHU.—**Teinture de c. aromatisée.** See *Tinctura* CATECHU *composita.*—**Tisane de c.** See *Decoction of* CATECHU.—**Vin de c.** Of the Formulary of the Paris Mil. Hosp. (1839), a mixture of 8 grammes of the teinture de c. of the Fr. Cod. of 1837 (a filtered mixture of catechu with 4 parts of brandy) and a decilitre of red wine. [B, 119.]

CACHOUIC ACID, CACHOUTANNIC ACID, n's. Ka^3-shu'i^{2}k, -shu-ta^{2}n'i^{2}k. See CATECHUTANNIC ACID.

CACHRYDE (Fr.), n. Ka^{3}k-red. See CACHRYS.

CACHRYDEÆ (Lat.), n. f. pl. Ka^{2}k(ka^{3}ch^2)-ri^{2}d(ru^{6}d)'e^2-e-(a^3-e^2). Of Meissner, a subtribe of umbelliferous plants (tribe, *Smyrneæ*), comprising *Cachrys, Conium, Smyrnium, Arracacha*, etc.; of Bentham and Hooker, a subtribe of the *Seselineæ*, comprising *Cachrys, Crithmum, Lophosciadium*, etc. [B, 42, 170.]

CACHRYS (Lat.), n. f. Ka^{2}k(ka^{3}ch^2)'ri^{2}s(ru^{6}s). Gen., *cach'ryos.* Gr., κάγχρυς, κάχρυς. Fr., *cachrys, cachryde.* 1. Of the ancients, a pill containing astringent and heating ingredients; hence applied to aromatic seeds and, according to Pliny, to certain excrescences on the oak and other trees. 2. Of Linnæus, a genus of *Umbelliferæ*, tribe *Seselineæ*, subtribe *Cachrydeæ.* [B, 42, 121.]—**C. cretica** [Linnæus]. A species growing in southern Europe, of similar properties to those of *C. libanotis* and probably also called λιβανωτίς. [B, 180.]—**C. libanotis** [Linnæus]. A species indigenous to northern Africa and southern Europe; the λιβανωτίς of Dioscorides. The acrid-aromatic root and fruit (the latter being the κάχρυς of Dioscorides) were formerly employed in medicine. [B, 180.]—**C. maritima** [Sprengel]. The *Crithmum maritimum.* [B, 173.]—**C. odontalgica** [Pallas]. A species growing in the dry wastes of northern Asia, where its aromatic root was used as a sialagogue masticatory in toothache. [B, 180.]—**C. pterochlæna** [De Candolle], **C. sicula** [Linnæus]. Probably the ἱππομάραθρον of Dioscorides and Hippocrates. [B, 180.]

CACHU (Bengal.), n. The *Colocasia antiquorum.* [B, 172.]

CACHUAR (Bengal.), n. The *Bauhinia variegata.* [B, 172.]

CACHULOT, n. The *Sylphium trilobatum.* [B, 121.]

CACHUNDE, CACHUNDICA, n's. Fr., *cachundé.* A Chinese cachou resembling the cachou de Bologne, spoken of by R.

Lentilius as the "electuarium comfortans"; largely used in China and India to perfume the breath, and regarded as a stomachic and antispasmodic. [A, 301, 325; L, 56, 77.]

CACHUNÜSSE (Ger.), n. Ka^3-ch^{2}u′nu^{6}s-se^2. The cashew-nut. [Vogl (A, 319).]

CACHUR (Bengal.), n. The *Curcuma zerumbet.* [B, 172.]

CACHUTANNIC ACID, CACHUTIC ACID, n's. Ka^3-shu-ta^{2}n′i^{2}k, -shu′ti^{2}k. Fr., *acide cachoutannique* (ou *cachutique*), *tannin du cachou.* See CATECHUTANNIC ACID.

CACHYMIA (Lat.), n. f. Ka^{2}k(ka^{3}ch^2)-i^{2}m(u^{6}m)′i^2-a^3. Of Paracelsus, a general name for various substances regarded by him as almost but not quite metallic and not saline, including the talcs and certain compounds of sulphur, mercury, etc. [A, 325.]

CACIA, n. An alchemical name for a spoon. [Ruland, Johnson (A, 325).]

CACIATRICE, n. The *Plantago coronopus.* [B, 121.]

CACIE (Fr.), n. Ka^3-se. The *Acacia farnesiana.* [B, 173.]

CACIS (Fr.), n. Ka^3-se. The *Ribes nigrum,* also a liqueur made from its fruit. [B, 121, 132.]

CACOA, n. See CACAO.

CACOÆSTHESIS (Lat.), n. f. Ka^{2}k(ka^{3}k)-o(o^2)-e^{2}s(a^3-e^{2}s)-the-(tha)′si^{2}s. See CACÆSTHESIS.

CACOALEXETERIUM (Lat.), n. n. Ka^{2}k(ka^{3}k)-o(o^2)-a^{2}l(a^{3}l)-e^{2}x-e^{2}t(at)-e(a)′ri^2-u^{3}m(u^{4}m). See ALEXETERIUM.

CACOBEY, n. A negro name for leprosy. [E. Schwimmer (A, 319).]

CACOCHIMIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-o(o^2)-ki^{2}m(ch^{2}i^{2}m)′i^2-a^3. See CACOCHYMIA.

CACOCHOLIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-o(o^2)-kol(ch^{2}o^{2}l)′i^2-a^3. From κακός, ill-conditioned, and χολή, bile. Fr., *cacocholie.* A depraved state of the bile. [A, 301, 322.]

CACOCHOLICUS (Lat.), adj. Ka^{2}k(ka^{3}k)-o(o^2)-ko^{2}l(ch^{2}o^{2}l)′-i^{2}k-u^{3}s(u^{4}s). Pertaining to or affected with cacocholia. [A, 322.]

CACOCHONDRITES (Lat.), n. m. pl. Ka^{2}k(ka^{3}k)-o(o^2)-ko^{2}n-(ch^{2}o^{2}n)-dri(dre)′tez(te^{2}s). Of Ritgen, a family of the *Ophidii.* [L, 180.]

CACOCHRI (Lat.), n., m. pl. of adj. *cacochrus* (*morbi* understood). Ka^{2}k(ka^{3}k)′o(o^2)-kri(ch^{2}re). Diseases characterized by cacochrœa.

CACOCHRŒA (Lat.), n. f. Ka^{2}k(ka^{3}k)-o(o^2)-kre′(kro^2′e^2)-a^3. Gr., κακόχροια (from κακός, evil, and χροιά, the complexion). An unnatural color of the skin due to disease. [A, 322.]

CACOCHROI (Lat.), n. m. pl. Ka^{2}k(ka^{3}k)-o^{2}k(o^{2}ch^2)′ro(ro^2)-i(e). See CACOCHRI.

CACOCHRUS (Lat.), adj. Ka^{2}k(ka^{3}k)′o^{2}k(o^{2}ch^2)-ru^{3}s(rus). Gr., κακοχροῦς. Affected with cacochrœa. [A, 322.]

CACOCHYLE (Fr.), adj. Ka^{3}k-o-kel. See CACOCHYLUS.

CACOCHYLIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-o(o^2)-kil(ch^{2}u^{6}l)′i^2-a^3. From κακός, ill-conditioned, and χυλός, chyle. Fr., *cacochylie.* Ger., *Kakochylie.* A depraved state of the chyle; defective or dis ordered chylification. [A, 322; L, 44.]

CACOCHYLICUS, CACOCHYLUS (Lat.), adj's. Ka^{2}k(ka^{3}k)-o(o^2)-ki^{2}l(ch^{2}u^{6}l)′i^{2}k-u^{3}s(u^{4}s), -kil(ch^{2}u^{6}l)′u^{3}s(u^{4}s). Fr., *cacochyle.* Pertaining to or affected with cacochylia. [A, 322.]

CACOCHYME (Fr.), adj. Ka^{3}k-o-kem. See CACOCHYMUS.

CACOCHYMIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-o(o^2)-kim(ch^{2}u^{6}m)′i^2-a^3. From κακός, ill-conditioned, and χυμός, a juice. Fr., *cacochymie.* Ger., *Kakochymie.* A depraved or morbid state of the humors; according to the humoralists, the cause of cachexiæ, and therefore a cachexia; in the pl., *cacochymiæ,* of Young, an order of the *Pareccrises,* comprising diseases attended with vitiated secretions. [A, 301, 322, 325; L, 41, 44, 290.]

CACOCHYMICUS, CACOCHYMUS (Lat.), adj's. Ka^{2}k(ka^{3}k)-o(o^2)-ki^{2}m(ch^{2}u^{6}m)′i^{2}k-u^{3}s(u^{4}s), -kim(ch^{2}u^{6}m)′u^{3}s(u^{4}s). Fr., *cacochyme.* Ger., *kakochymisch.* Pertaining to or affected with cacochymia. [A, 301, 322.]

CACOCNEMIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-o^{2}k-nem(nam)′i^2-a^3. From κακός, ill-conditioned, and κνήμη, the leg. An old term for some defect of the legs, especially thinness. [A, 322.]

CACOCNEMICUS, CACOCNEMUS (Lat.), adj's. Ka^{2}k(ka^{3}k)-o^{2}k-ne^{2}m(nam)′i^{2}k-u^{3}s(u^{4}s), -nem(nam)′u^{3}s(u^{4}s). Gr., κακόκνημος. Pertaining to or affected with cacocnemia. [A, 322.]

CACOCOLPIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-o(o^2)-ko^{2}lp′i^2-a^3. From κακός, ill-conditioned, and κόλπος, the vagina. Fr., *cacocolpie.* Ger., *weibliche Schaamfäule.* Gangrene of the vulva. [A, 322; L, 107.]

CACOCOREMA (Lat.), n. n. Ka^{2}k(ka^{3}k)-o(o^2)-ko^{2}r-e(a)′ma^3. Gen., *cacocorem′atos* (*-tis*). From κακός, foul, and κόρημα, refuse. A purgative. [L, 116, 119.]

CACOCYNANCHE (Lat.), n. f. Ka^{2}k(ka^{3}k)-o(o^2)-si^{2}n(ku^{6}n)-a^{2}n^2(a^{3}n^2)′ke(ch^{2}a). Gen., *cacocynan′ches.* From κακός, evil, and κυνάγχη (see CYNANCHE). Ger., *bösartige Bräune.* Malignant angina. [A, 322.]

CACODÆMON (Lat.), n. m. Ka^{2}k(ka^{3}k)-o(o^2)-de′(da^3′e^2)-mo^{2}n-(mon). Gen., *cacodæ′monos* (*-is*). Gr., κακοδαίμων (from κακός, evil, and δαίμων, a spirit). An evil spirit supposed by the scholastic philosophers to cause diseases. [Harvey (H).]

CACODÆMONIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-o(o^2)-de^{2}m(da^3-e^{2}m)-on(o^{2}n)′i^2-a^3. Gr., κακοδαιμονία. Fr., *cacodémonie.* Demoniac possession, also a belief in the power of evil spirits. [A, 385; L, 136.]

CACODES (Lat.), adj. Ka^{2}k(ka^{3}k)-od′ez(as). Gr., κακώδης (from κακός, evil, and ὄζειν, to smell). Of an offensive odor. [A, 322.]

CACODIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-od′i^2-a^3. Gr., κακωδία. An offensive odor. [A, 322.]

CACODONTIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-o(o^2)-do^{2}n-ti(te)′a^3. From κακός, ill-conditioned, and ὀδούς, a tooth. Ger., *Kakodontie.* A bad condition of the teeth. [A, 322.]

CACODYL, n. Ka^{2}k′o-di^{2}l. From κακώδης, of an offensive odor, and ὕλη, material. Lat., *cacodylium.* Fr., *cacodyle, kakodyle.* Ger., *Kakodyl.* A name first applied to the body now known as dicacodyl (*q. v.*); now given to arsendimethyl, As.$(CH_3)_2$, sometimes denoted by the symbol Kd. It is still further extended to all compounds of two molecules of a hydrocarbon with an atom of arsenic, the particular compound being designated by prefixing the name of the hydrocarbon to the word c.; thus, *methyl c′,* As.$(CH_3)_2$, *ethyl c′,* As.$(C_2H_5)_2$. Used without qualification, the word always means the methyl compound. For compounds of the latter, see DIMETHYLARSINE. [B.]—**C. oxide.** See DIMETHYLARSINE *oxide* and ALKARSINE.—**Ethyl c.** See DIETHYLARSINE.

CACODYLATE, n. Ka^{2}k-o^{2}d′i^{2}l-at. A salt of cacodylic acid. [B.]

CACODYLIC ACID, n. Ka^{2}k-o^{2}d-i^{2}l′i^{2}k. Fr., *acide cacodylique.* Ger., *Kakodylsäure.* See DIMETHYLARSINIC ACID.

CACOESA, n. The *Mimosa instia.* [B, 121.]

CACOETHES (Lat.), adj. Ka^{2}k(ka^{3}k)-o(o^2)-e(a)′thez(thas). Gen., *cacoe′theos* (*-this*). Gr., κακοήθης (from κακός, evil, and ἦθος, a habit). Fr., *cacoèthe.* Ill-conditioned, malignant; as a n. (Gr., ἕλκος κακοήθες), a malignant ulcer. [A, 322.]

CACOETHIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-o(o^2)-e^{2}th(ath)-i(e)′a^3. Gr., κακοήθεια. Malignity. [A, 325, 387.]

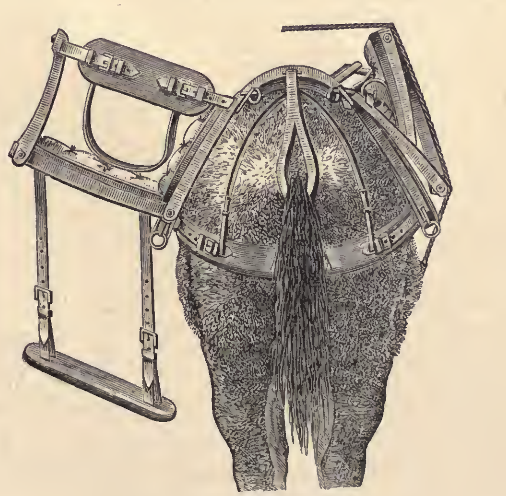
CACOETHICUS (Lat.), adj. Ka^{2}k(ka^{3}k)-o(o^2)-e^{2}th(ath)′i^{2}k-u^{3}s-(u^{4}s). 1. See CACOETHES. 2. Affected with or occasioned by a bad habit. [A, 322.]

CACOGALACTIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-o(o^2)-ga^{2}l(ga^{3}l)-a^{2}k-(a^{3}k)′ti^2-a^3. From κακός, bad, and γάλα, milk. Fr., *cacogalactie.* An abnormal state of the milk. [A, 322; L, 80.]

CACOGALACTICA (Lat.), n., fem. of adj. *cacogalacticus.* Ka^{2}k(ka^{3}k)-o(o^2)-ga^{2}l(ga^{3}l)-a^{2}k(a^{3}k)′ti^{2}k-a^3. One whose milk is of bad quality. [A, 322.]

CACOGALACTICUS (Lat.), adj. Ka^{2}k(ka^{3}k)-o(o^2)-ga^{2}l(ga^{3}l)-a^{2}k(a^{3}k)′ti^{2}k-u^{3}s(u^{4}s). Producing or occasioned by bad milk; as a n., in the f., see CACOGALACTICA.

CACOGALIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-o(o^2)-ga^{2}l(ga^{3}l)′i^2-a^3. See CACOGALACTIA.



CACOGALICUS (Lat.), adj. Ka^{2}k(ka^{3}k)-o(o^2)-ga^{2}l(ga^{3}l)′i^{2}k-u^{3}s(u^{4}s). See CACOGALACTICUS.

CACOGENESIS (Lat.), n. f. Ka^{2}k(ka^{3}k)-o(o^2)-je^{2}n(ge^{2}n)′e^{2}s-i^{2}s. Gen., *cacogene′seos* (*-gen′esis*). From κακός, bad, and γένεσις, formation. Fr., *cacogénèse, cacogénésie.* Ger., *falsche* (oder *krankhafte*) *Bildung.* A general term for deviations of organized bodies from the normal structure, applied by some to monstrosities and by others to formations of pathological tissue. [A, 301, 322; L, 81, 180.]

CACOGENETICUS (Lat.), adj. Ka^{2}k(ka^{3}k)-o(o^2)-je^{2}n(ge^{2}n)-e^{2}t′i^{2}k-u^{3}s(u^{4}s). Pertaining to or affected with cacogenesis. [A, 322.]

CACOGLOSSIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-o(o^2)-glo^{2}s(glos)′si^2-a^3. Gr., κακογλωσσία (from κακός, evil, and γλῶσσα, the tongue). Fr., *cacoglossie.* Ger., *Zungenfäule.* Gangrene of the tongue. [A, 322; L, 116.]

CACOLET (Fr.), n. Ka^3-ko-la. Ger., *Maulthierlehnkorb.* A

A CACOLET. (AFTER LONGMORE.)

mule-chair for the transportation of the wounded in battle. [A, 244, 385; H. Frölich (A, 319).]

CACOMELIASMUS (Lat.), n. m. Ka^{2}k(ka^{3}k)-o(o^2)-me^{3}l-i^2-a^{2}z-(a^{3}s)′mu^{3}s(mu^{4}s). An old term of uncertain origin and meaning,

said to have meant "a bad state of the limbs" (*mala artuum conditio*). [A, 322; L, 116.]

CACOMETRUM (Lat.), n. n. Ka^{2}k(ka^{3}k)-o(o^2)-me^{2}t'ru^{3}m-(ru^{4}m). See CACAEROMETER.

CACOMITE (Sp.), n. Ka^3-ko-me'ta. A Peruvian name for the genus *Cypridia*. [B, 121.]

CACOMORPHIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-o(o^2)-mo^{2}rf'i^2-a^3. From κακός, bad, and μορφή, form. Fr., *cacomorphie*. Ger., *Kakomorphie, Missbildung*. A malformation. [A, 322; L, 43.]

CACOMORPHICUS (Lat.), adj. Ka^{2}k(ka^{3}k)-o(o^2)-mo^{2}rf'i^{2}k-u^{3}s(u^{4}s). Fr., *cacomorphique*. See CACOMORPHUS.

CACOMORPHOMA (Lat.), n. n. Ka^{2}k(ka^{3}k)-o(o^2)-mo^{2}rf-o'-ma^3. Gen., *cacomorphom'atos* (*-tis*). See CACOMORPHIA.

CACOMORPHOSIS (Lat.), n. f. Ka^{2}k(ka^{3}k)-o(o^2)-mo^{2}rf-o'si^{2}s. Gen., *cacomorpho'seos* (*-sis*). A process of malformation. [A, 322.]

CACOMORPHUS (Lat.), adj. Ka^{2}k(ka^{3}k)-o(o^2)-mo^{2}rf'u^{3}s(u^{4}s). Pertaining to or affected with cacomorphia. [A, 322.]

CACONAPEA, n. Fr., *caconapée*. See HERPESTIS.

CACONE, n. A negro name for the seeds of leguminous plants made into necklaces. [B, 121.]—**C. grimpante** (Fr.). The *Acacia* (*Mimosa*) *scandens*. [B, 173.]

CACONÉ (Fr.), n. Ka^{3}k-o-na. The *Mucuna urens*. [B, 38.]

CACONEMIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-o^{2}n-em(e^{2}m)'i^2-a^3. From κακός, bad, and νέμειν, to pasture. The milk-sickness of cattle. [Logan, "Atlanta Med. Register," May, 1882.]

CACONIÆ (Lat.), n. m. pl. Ka^{2}k(ka^{3}k)-on(o^{2}n)'i^2-e(a^3-e^2). See CANONIÆ.

CACONYCHIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-on(o^{2}n)-i^{2}k(u^{6}ch^2)'i^2-a^3. From κακός, bad, and ὄνυξ, the nail. Ger., *Kakonychie*. A diseased condition of a nail. [A, 322.]

CACONYCHICUS (Lat.), adj. Ka^{2}k(ka^{3}k)-on(o^{2}n)-i^{2}k(u^{6}ch^2)'-i^{2}k-u^{3}s(u^{4}s). Pertaining to, affected with, or caused by, caconychia. [A, 322.]

CACOON, n. The *Entada scandens* and the *Fevillea cordifolia*. [B, 19.]

CACOPARONYCHIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-o(o^2)-pa^{2}r(pa^{3}r)-on(o^{2}n)-i^{2}k(u^{6}ch^2)'i^2-a^3. Ger., *bösartiges Nagelgeschwür*. Malignant paronychia. [A, 322.]

CACOPATHES (Lat.), adj. Ka^{2}k(ka^{3}k)-o^{2}p'a^{2}th(a^{3}th)-ez(as). Gen., *cacopath'eos* (*-op'athis*). Gr., κακοπαθής. Affected with or proceeding from cacopathia. [A, 322.]

CACOPATHIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-o(o^2)-pa^{2}th(pa^{3}th)-i(e)'a^3. Gr., κακοπάθεια (from κακός, evil, and πάθος, suffering). Fr., *cacopathie*. A severe mental or bodily affection. [A, 301, 322, 325, 385; L, 43, 44, 84.]

CACOPATHICUS (Lat.), adj. Ka^{2}k(ka^{3}k)-o(o^2)-pa^{2}th(pa^{3}th)'-i^{2}k-u^{3}s(u^{4}s). See CACOPATHES.

CACOPHARYNGIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-o(o^2)-fa^{2}r(fa^{3}r)-i^{2}n-(u^{6}n^2)'ji^2(gi^2)-a^3. From κακός, malignant, and φάρυγξ, the pharynx. Ger., *Schlundfäule*. Gangrene of the pharynx. [A, 322.]

CACOPHOLIDOPHIDES (Lat.), n. m. pl. Ka^{2}k(ka^{3}k)-o(o^2)-fo^{2}l-i^{2}d-o^{2}f'i^{2}d-ez(e^{2}s). From κακός, evil, φολίς, a scale, and ὀφίδιον (dim. of ὄφις), a small snake. Of Ritgen, a family of ophidians having a scaly skin. [L, 180.]

CACOPHONIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-o(o^2)-fon'i^2-a^3. Gr., κακοφωνία (from κακός, bad, and φωνή, the voice). Fr., *cacophonie*. Ger., *Kakophonie*. Any abnormity of the voice or of the enunciation. [A, 322, 325.]

CACOPHONICUS (Lat.), adj. Ka^{2}k(ka^{3}k)-o(o^2)-fo^{2}n(fon)'i^{2}k-u^{3}s(u^{4}s). Fr., *cacophonique*. Ger., *kakophonisch*. Pertaining to or affected with cacophonia. [A, 322.]

CACOPHONY, n. Ka^{2}k-o^{2}f'on-i^2. See CACOPHONIA.

CACOPHTHALMIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-o^{2}p(o^{2}f)-tha^{2}l-(tha^{3}l)'mi^2-a^3. From κακός, evil, and ὀφθαλμός, the eye. Fr., *cacophthalmie*. Ger., *Augenfäule* (1st def.), *bösartige Augenentzündung* (2d def.). 1. Gangrene of the eye. 2. Malignant ophthalmia. [A, 322.]

CACOPLASTIC, adj. Ka^{2}k-o-pla^{2}st'i^{2}k. Lat., *cacoplasticus* (from κακός, bad, and πλαστικός, plastic). Fr., *cacoplastique*. Ger., *kakoplastisch*. Pertaining to, affected with, arising from, causing, or fitted for, defective formation or organization; the opposite of euplastic. [A, 301, 322, 385; K; L, 107.]

CACOPNEUMONIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-o(o^{2}p)-nu^2-mon-(mo^{2}n)'i^2-a^3. From κακός, evil, and πνευμονία (see PNEUMONIA). Ger., *Lungenfäule*. Gangrene of the lung. [A, 322.]

CACOPRACTICUS (Lat.), adj. Ka^{2}k(ka^{3}k)-o(o^2)-pra^{2}k(pra^{3}k)'-ti^{2}k-u^{3}s(u^{4}s). Pertaining to or affected with cacopragia. [A, 322.]

CACOPRAGIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-o(o^2)-pra(pra^3)'ji^2-(gi^2)-a^3. From κακός, bad, and πράσσειν, to act. Fr., *cacopragie*. Ger., *Kakopragie*. Deranged performance of function, especially of the nutritive processes. [A, 301, 322, 385.]

CACOPRAGICUS (Lat.), adj. Ka^{2}k(ka^{3}k)-o(o^2)-pra^{2}j(pra^{3}g)'-i^{2}k-u^{3}s(u^{4}s). See CACOPRACTICUS.

CACOPRAXIS (Lat.), n. f. Ka^{2}k(ka^{3}k)-o(o^2)-pra^{2}x(pra^{3}x)'i^{2}s. Gen., *cacoprax'eos* (*-is*). See CACOPRAGIA.

CACOPROCTIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-o(o^2)-pro^{2}k(prok)'-ti^2-a^3. From κακός, evil, and πρωκτός, the anus. Ger., *Mastdarmfäule*. Gangrene of the rectum. [A, 322.]

CACOREMA (Lat.), n. n. Ka^{2}k(ka^{3}k)-o^{2}r-e(a)'ma^3. Gen., *cacorem'atos* (*-tis*). See COREMA.

CACORRHACHIS, CACORRHACHITIS (Lat.), n's f. Ka^{2}k(ka^{3}k)-o^{2}r'ra^{2}k(ra^{3}ch^2)-i^{2}s, -o^{2}r-ra^{2}k(ra^{3}ch^2)-i(e)'ti^{2}s. Gen., *cacorrhach'idos* (*-dis*), *-rhachit'idis*. From κακός, evil, and ῥάχις, the spinal column. Ger., *Kakorrhachis, Kakorrhachitis, Rückgratskrankheit*. Disease of the spinal column. [A, 322.]

CACORRHEMOSYNE (Lat.), n. f. Ka^{2}k(ka^{3}k)-o^{2}r-re^{2}m-(ram)-o^{2}s'i^{2}n(u^{6}n)-e(a). Gr., κακορρημοσύνη. See ARRHYTHMIA.

CACORRHINIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-o^{2}r-ri^{2}n'i^2-a^3. From κακός, evil, and ῥίν, the nose. Ger., *Nasenfäule*. Gangrene of the nose. [A, 322; L, 81.]

CACORRHYTHMUS (Lat.), adj. Ka^{2}k(ka^{3}k)-o^{2}r-ri^{2}th(ru^{6}th)'-mu^{3}s(mu^{4}s). Gr., κακόρρυθμος (from κακός, bad, and ῥυθμός, rhythm). Irregular, anomalous, atypical. [A, 322.]

CACOS (Lat.), adj. Ka^{2}k(ka^{3}k)'o^{2}s. Gr., κακός. Evil, malignant, ill-conditioned, abnormal. [A, 322.]

CACOSINOS, CACOSINUS (Lat.), adj's. Ka^{2}k(ka^{3}k)-os(o^{2}s)-i-(e)'no^{2}s, -nu^{3}s(nu^{4}s). Gr., κακόσινος. Noxious. [Hippocrates (A, 325).]

CACOSIS (Lat.), n. f. Ka^{2}k(ka^{3}k)-o'si^{2}s. Gen., *caco'seos* (*-sis*). Gr., κάκωσις. A disordered condition, either of the whole body or of an individual organ. [A, 322; L, 43, 80, 81.]

CACOSITIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-o(o^2)-si^{2}t'i^2-a^3. Gr., κακοσιτία (from κακός, bad, and σῖτος, food). Fr., *cacositie*. A morbid aversion to food, also improper feeding. [A, 301, 322, 325, 385; L, 43, 132.]

CACOSITICUS (Lat.), adj. Ka^{2}k(ka^{3}k)-o(o^2)-si^{2}t'i^{2}k-u^{3}s(u^{4}s). Fr., *cacositique*. Pertaining to, affected with, or caused by, cacositia. [A, 322.]

CACOSMIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-o^{2}z(o^{2}s)'mi^2-a^3. Fr., *cacosmie*. 1. See CACODIA. 2. A genus of composite plants of the tribe *Helenioideæ*, subtribe *Jaumeeæ*. [B, 42.]

CACOSMUS (Lat.), adj. Ka^{2}k(ka^{3}k)-o^{2}z(o^{2}s)'mu^{3}s(mu^{4}s). See CACODES.

CACOSOMIUM (Lat.), n. n. Ka^{2}k(ka^{3}k)-o(o^2)-som'i^2-u^{3}m(u^{4}m). Said to be from κακός, evil, and σῶμα, the body. A lazaretto for lepers and other incurables. [A, 322.]

CACOSPERMASIA, CACOSPERMATIA (Lat.), n's. f. Ka^{2}k(ka^{3}k)-o(o^2)-spu^{5}rm(spe^{2}rm)-a(a^3)'zi^2(si^2)-a^3, -shi^2(ti^2)-a^3. See CACOSPERMIA.

CACOSPERMATICUS (Lat.), adj. Ka^{2}k(ka^{3}k)-o(o^2)-spu^{5}rm-(spe^{2}rm)-a^{2}t(a^{3}t)'i^{2}k-u^{3}s(u^{4}s). Pertaining to or affected with cacospermia. [A, 322.]

CACOSPERMIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-o(o^2)-spu^{5}rm(spe^{2}rm)'-i^2-a^3. From κακός, ill-conditioned, and σπέρμα, semen. Fr., *cacospermie*. Ger., *Kakospermie*. An abnormal state of the semen. [A, 322.]

CACOSPHYCTICUS (Lat.), adj. Ka^{2}k(ka^{3}k)-o(o^2)-sfi^{2}k(sfu^{6}k)'-ti^{2}k-u^{3}s(u^{4}s). Pertaining to or affected with cacosphyxia.

CACOSPHYXIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-o(o^2)-sfi^{2}x(sfu^{6}x)'i^2-a^3. Gr., κακοσφυξία (from κακός, bad, and σφύξις, the pulse). Fr., *cacosphyxie*. Ger., *Kakosphyxie*. Any abnormal state of the pulse. [Galen (A, 325); L, 81.]

CACOSPLANCHNIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-o(o^2)-spla^{2}n^{2}k-(spla^{3}n^{2}ch^2)'ni^2-a^3. From κακός, bad, and σπλάγχνα, the entrails. Fr., *cacosplanchnie*. Ger., *Kakosplanchnie*. A depraved state of the digestive apparatus, also emaciation due to such a condition. [A, 322; L, 43.]

CACOSPLANCHNUS (Lat.), adj. Ka^{2}k(ka^{3}k)-o(o^2)-spla^{2}n^{2}k-(spla^{3}n^{2}ch^2)'nu^{3}s(nu^{4}s). Pertaining to or affected with cacosplanchnia. [A, 322.]

CACOSTOMACHUS (Lat.), adj. Ka^{2}k(ka^{3}k)-o(o^2)-sto^{2}m'a^3-ku^{3}s(ch^{2}u^{4}s). Gr., κακοστόμαχος (from κακός, ill-conditioned, and στόμαχος, the stomach). Having a disordered stomach, also hurtful to the stomach. [A, 322, 387.]

CACOSTOMATOSPHRESIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-o(o^2)-stom(sto^{2}m)-a^{2}t(a^{3}t)-o^{2}s-frez(fras)'i^2-a^3. From κακός, bad, στόμα, the mouth, and ὄσφρησις, the act of smelling. Ger., *Kakostomatosphresie*. Fœtor of the mouth. [A, 322.]

CACOSTOME (Fr.), adj. Ka^3-ko-stom. See CACOSTOMUS.

CACOSTOMIA (Lat.), n. f. Ka^{2}k(ka^{3}k)-o(o^2)-stom(sto^{2}m)'i^2-a^3. From κακός, bad, and στόμα, the mouth. Any gangrenous affection of the mouth. [A, 322.]

CACOSTOMUS (Lat.), adj. Ka^{2}k(ka^{3}k)-o^{2}s'tom(to^{2}m)-u^{3}s(u^{4}s). Gr., κακόστομος. Fr., *cacostome*. Having a foul state of the mouth or a fœtid breath. [A, 301, 325, 385; L, 44.]
